Engagement measures are updated every two years with the completion of the Community College Survey of Student Engagement (CCSSE), with reports posted at the OFIE website ([I.B.1-12](#)). Learning assessment reports update the College’s effort at deepening student learning.

### ***Institutional effectiveness and continuous improvement of student learning and achievement***

All these discussions can be mapped to the College’s multi-faceted evaluation framework known as the KELA—Kapi‘olani Engagement, Learning and Achievement—model, with the

Student Success Pathways playing a central role. This model was developed by the Office for Institutional Effectiveness to track continuous improvement in student success through engagement, learning, and achievement as stated in the campus Mission (see I.A.1, I.A.2). Figure 4 depicts the KELA model as implemented at the College.

**Figure 4. Kapi‘olani Engagement, Learning, and Achievement Model**

Data from the sources described above such as the ARPD, the Annual Strategic Plan Scorecards, and the CPRs inform dialogues about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

In addition, the Office for Institutional Effectiveness provides institutional research briefs and works closely with many campus programs to provide annual cyclical reporting targeting their data needs. Annual and semesterly cyclical reports are provided to departments, units, programs and services such as the Disability Support Services Office, TRIO, external grants, Honda International Center, Deans List, and Phi Theta Kappa Honors ([I.B.1-13](#)).

In the last few years, the College has increased opportunities for sustained dialogue to take place and contribute to the larger discussion of institutional effectiveness through various group meetings as well as the assessment process.

## Analysis and Evaluation

The College holds substantive and collegial dialogues about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. The College is improving the documentation of these discussions and making them more easily accessible. Plans for improvement are in the Changes and Plans document.

---

### **1.B.2. The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)**

---

## Evidence of Meeting the Standard

The College articulates and assesses student learning outcomes for all instructional programs and student and learning support services. Program level assessment is guided by UHCC Policy 5.202 ([I.B.2-1](#)) and the College's K5.202 ([I.B.2-2](#)).

### *Assessment of Instructional Programs*

At Kapi'olani Community College, student learning outcomes are defined and assessed for all courses and instructional programs. Student learning outcomes are faculty-driven. Faculty are provided guidelines with clearly articulated options for assessing student learning at the program level ([I.B.2-3](#), [I.B.2-4](#)). Course and program student learning outcomes are developed, articulated, and made evident in the curriculum proposal and review process. Learning outcomes all programs are found in the College catalog, such as those for the Accounting program ([I.B.2-5](#)). Program student learning outcomes are also identified and assessed in the the Annual Report of Program Data (ARPD), as in the ARPD for the Hospitality and Tourism Program ([I.B.2-6](#)) and the Comprehensive Program Review for Accounting ([I.B.2-7](#)). (ER 11; see II.A)

### *Assessment of Student and Learning Support Services*

Kapi'olani Community College defines and assesses student learning outcomes for both student and learning support services (see II.C.2).

Counseling and advising programs across campus have agreed upon and shared student learning outcomes, with different counseling units focusing on specific outcomes based on their mission and student population. These outcomes are assessed on a shared three-year cycle with the goal of continuous improvement ([I.B.2-8](#); see II.C.2). Assessment leaders for each counseling/advising "cluster," who represent all counselors/advisors on a Counseling Assessment Leaders group, ensure assessment-focused dialogue and sharing between and among counseling and advising units ([I.B.2-9](#)). Counseling and advising units organized under

Student Affairs are included in the Student Affairs Comprehensive Program Review (CPR) process. Counseling and advising units organized under academic units are included in those respective CPR processes (see II.C.). Examples of ways that the College has defined and assessed student learning outcomes for its student support programs can be found in the ARPD ([I.B.2-10](#)), the CPR ([I.B.2-11](#)), the Counseling and Advising Student Learning Outcomes Assessment Rubrics ([I.B.2-12](#)), and Taskstream records of their assessment efforts ([I.B.2-13](#)).

Learning support programs also complete Annual Reports of Program Data, focusing on the demand, efficiency, and effectiveness of tutoring, testing, library ([I.B.2-14](#)), and technology learning support services ([I.B.2-15](#)). The metrics are typically defined in terms of the services provided by the unit. The ARPDs for technology and tutoring also include student feedback on their satisfaction and use of learning support services provided by the most recent results of the CCSSE survey (Community College Survey of Student Engagement). In addition, the library regularly assesses student learning outcomes, which is discussed in detail in II.B.3.

For more detailed information on assessment of student and learning support services see II.B. and II.C.

## **Analysis and Evaluation**

The College articulates and assesses student learning outcomes for all instructional programs and student and learning support services.

The College provides solid evidence that it defines and assesses student learning outcomes across its instructional programs and its support services. The College has procedures and processes in place for the assessment of student learning outcomes as well as support for assessment activities conducted by faculty, both instructional and non-instructional. The College is currently strengthening its focus on reporting and analysis of student assessment data through its continued transition to Taskstream, the online assessment management system. The College recognizes that enhancing the existing assessment process will lead to improved student learning, which is one of the six pillars of the Student Success Pathways. As a result, the College has included this goal as part of the Quality Focus Essay.

---

**1.B.3. The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information (ER 11).**

---

### Evidence of Meeting the Standard

The College uses institution-set standards for student achievement for continuous improvement and assesses and publishes this information.

#### *Institution-Set Standards for Student Achievement*

Kapi‘olani Community College uses a framework for student achievement set by the University of Hawai‘i Community College (UHCC) system. UHCC Policy 4.203 ([I.B.3-1](#)) establishes a common standard for all seven campuses to define and assess student achievement for continuous improvement. These standards are an important component of maintaining quality within the community college system. The policy includes a baseline standard and an aspirational standard aligned with system and college strategic plan targets (ER 11).

Most of the institution-set standards for student achievement were developed through an extensive dialogic process within the UHCC system strategic planning process. The College was represented by the Student Congress president, the Faculty Senate chair, the Director of the Office for Institutional Effectiveness, and the Chancellor in these once-per-semester discussions. The baseline numbers in the campus strategic plan for degrees and certificates awarded, Native Hawaiian degrees and certificates awarded, Pell Recipient degrees and certificates awarded, transfer to baccalaureate institutions, and IPEDS student success rate serve as institution-set standards for student achievement ([I.B.3-2](#)). The institutional standard for course completion was set by an analysis of actual, current course success at each campus. (see Chapter 1, Introduction.)

The institutional standard for licensure and certification examination success rates was initially established as the average pass rate for the various exams. This approach was modified during the development process in consultation with the community college faculty senate chairs to be either the average pass rate or the pass rate required by program accreditation standards, whichever is higher. With respect to Perkins standards, per UHCC Policy 4.203 ([I.B.3-3](#)), “[t]he Perkins target is based on a negotiated level of placement within the State plan for Career and Technical Education that includes an expectation of continuous improvement.” Typically, the rate has a small incremental annual increase in value.

Aside from the Institution-Set Standards aligned with those of the UHCC System, the College has its own college-specific standards, framed by its mission, which it is tracking with the Strategic Plan Scorecard. These standards, or performance measures, are indicated by an asterisk (\*). For example, there are specific measures for the Associate in Science/Natural

Sciences on page 3 ([I.B.3-4](#), p. 3). Another example is the campus's sustainability initiative ([I.B.3-5](#)), which addresses Strategic Direction IV.E.

### ***Assessment and Publication of Data for Continuous Improvement***

The College has tracked and reported student achievement data continuously since 2010 in annual reports to ACCJC ([I.B.3-6](#)) and, as of 2012, through the Office for Institutional Effectiveness (OFIE) Strategic Plan Scorecard ([B.3-7](#)).

Prior to the establishment of the UHCC systemwide policy, the College had used a 75 percent baseline course success rate to measure and report student achievement data. The student achievement data include course success rates, licensure rates and job placement rates. The College also conducts an Annual Report of Program Data (ARPD, [I.B.3-8](#)) and a three-year comprehensive program review ([I.B.3-9](#)) for every instructional, student services, and academic support program to track continuous growth and improvement.

All of these reports are publicly available on college or UH system websites. UHCC Policy 5.202, Review of Established Programs ([I.B.3-10](#)), and the College policy on program review are currently being revised, following the recently approved UH Executive Policy EP 5.202 (see IV.A.4). The College's revised policy will integrate with the Student Success Pathway, which aligns with the Strategic Plan outcomes. The revised policy will include alignment with institution set standards. (ER 11)

### **Analysis and Evaluation**

The College uses institution-set standards for student achievement for continuous improvement and assesses and publishes this information.

Kapi'olani Community College uses a framework for student achievement established by the UHCC system for the community colleges ([I.B.3-11](#)). The College has tracked, analyzed, and reported student achievement data for continuous improvement through a comprehensive process as illustrated in the ACCJC Annual Reports, ARPD, and CPR reports. Finally, the College has published this information through the college website. The College meets this standard by using institution-set standards for student achievement for continuous improvement and assesses and publishes this information.

---

**1.B.4. The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.**

---

### Evidence of Meeting the Standard

The College utilizes assessment data to coordinate its institutional processes to support student learning and achievement.

#### *Use of Assessment Data*

The College demonstrates a commitment to using data and evidence to shape initiatives and institutional processes to support and bolster student learning and success. Institutional examples of these activities fall into three general areas: Academic Affairs, Student Affairs, and General Campus Affairs.

#### *Academic Affairs*

After years of participating in Achieving the Dream and based on extensive data collection on the historical performance of students in developmental English and math, the UH Community College system launched an initiative to promote and accelerate the success of students in such courses in Summer 2015. Implementation of a limited set of accelerated and co-requisite models was left to individual campuses. To smoothly transition into these co-requisite models, the College's developmental math and English faculty conducted formative and summative assessment to measure factors such as appropriateness of placement, norming of assessment data in terms of level of curriculum, and streamlining or improving the assessment process ([I.B.4-1](#), [I.B.4-2](#)).

In 2014, faculty developed the Aloha Writers' Kiosk, designed to support emerging writers. Ongoing direct and indirect assessments of student work and tutoring services provided a rich basis for scaling up the service when the Study Hub became operational in 2016. In Spring 2017, the Study Hub conducted a direct assessment of artifacts sourced through the tutoring center; this study showed that the Study Hub directly improved student learning in key metrics. Thus, Study Hub was shaped by assessment data directly tied to student learning and achievement ([I.B.4-3](#)).

#### *Student Affairs*

Assessment Summaries ([I.B.4-4](#)) for each counseling and advising unit across the College are documented in the College's Taskstream assessment tool and are shared through regular assessment dialogue within and between all counseling and advising units. Regular "share outs" of counseling and advising assessment experiences and summaries are scheduled through venues such as "Counseling Assessment Cafés," roundtables, etc.

Dialog about the assessment results occurs at the program level, which then fuels next steps to continue the cycle of continuous learning and improvement. The Comprehensive Program Review (CPR) for Student Affairs ([I.B.4-5](#)) aligns program outcomes and assessment with the College's strategic goals and is completed every three years.

### *Campuswide measures*

In September 2012, the former Chancellor appointed a Foundations Taskforce to develop recommendations to improve the quality of student learning outcomes and student success in pre-college mathematics and English courses. The taskforce identified an increasing performance gap between students who were successful in their math and English courses and those who were not. In November 2013, the Faculty Senate established an Ad Hoc Student Success Committee (SSC) and tasked the members with crafting a vision for creating a student success center on campus. This vision evolved into a vision for a student success culture, not bound by a physical building (I.B.4-6). Compiling input from across campus, the SSC integrated 14 recommendations, 32 objectives, and 83 actions into the document titled “Pouhana” (I.B.4-7). This work continues with the Queen Kapi‘olani Student Success Council, and the framework developed for engaging all members of the College to work toward student success continues to have a powerful influence in goal-setting and resource allocation at the College (I.B.4-8).

Several institution-set standard performance measures have not seen appreciable increases in the last two years. Because the College has seen significant campuswide engagement to support student success with the Student Success Pathways model, the Interim Chancellor is asking all units to address performance measures in this year’s Student Success Pathways plans, as appropriate. This approach is addressed in the Quality Focus Essay on Engagement.

### **Analysis and Evaluation**

The College utilizes assessment data to coordinate its institutional processes to support student learning and achievement.

The College demonstrates a commitment to building an evidence-based practice of continuous improvement through the variety and breadth of closing the loop initiatives discussed in this section. Assessment and achievement information is available on the OFIE website. Assessment data are entered into Taskstream. Additional coordination will be provided by the assessment coordinator position, who will be responsible to address assessment goals, improvement measures, and strategies for all components of the institution. The College is working toward a more systematic approach in using data for overall improved student learning. The College has included this objective in the Quality Focus Essay going forward.

---

**I.B.5. The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.**

---

### Evidence of Meeting the Standard

The College tracks student achievement measures in relation to institution-set standards, the Strategic Plan Scorecard, the KELA model, Annual Reports of Program Data, and ACCJC/WASC Reporting.

Engagement, learning, and achievement—central concepts in the campus mission—are tracked through the KELA framework. The Strategic Plan scorecard tracks progress on campus strategic directions, which are aligned with the mission statement ([I.B.5-1](#)). Annual Reports of Program Data (ARPD) disaggregate course success and fall-to-spring re-enrollment rates for distance education students. ARPDs also disaggregate degree and certificate completion by Native Hawaiian students and Pell recipients. Program Reports explicitly align with the College’s mission to “prepare students for their productive futures.”

In 2017-2018, the Office for Institutional Effectiveness (OFIE) conducted a meta-assessment of the ARPD Program Analyses to assess and evaluate the quality of the program review reports generated by the various instructional programs ([I.B.5-2](#), OFIE reports). The meta-assessment raised important questions that will be addressed as the College revises its program review policy, following the revision of the UH Board of Regents executive policy and the UH Community College policy (see IV.A.4).

The College has a rigorous and systematic schedule of assessment by which it measures the accomplishment of its mission. The mission statement is included in all major planning and assessment documents. Since 2012, the College has followed an assessment schedule that requires Course Assessment Plans (CAP), Course Learning Reports (CLR), Learning Assessment Schedule and Reports (LASR), an Annual Report of Program Data (ARPD), and Comprehensive Program Reviews (CPR) ([I.B.5-3](#)). Starting in Fall 2016, the document-based CLR, LASR, and CAP reporting structure was replaced by the web database Taskstream Assessment Management System (AMS). This change was due to feedback from faculty regarding the document-based system, resulting in an investigation into a better method to store, analyze, and report data ([I.B.5-4](#)). In 2014, the Taskstream AMS was selected ([I.B.5-5](#)). Taskstream provides the College with a centralized, streamlined way to collect, generate, and aggregate data about student learning outcomes at both the course and program level.

The College measures the progress on the mission through program review. A Comprehensive Program Review (CPR) is done every three years. The CPR incorporates data from other review processes—such as the ARPD, CLR, and CAP—and each program learning outcome must be assessed at least once every three years ([I.B.5-6](#); Examples: [I.B.5-7](#) and [I.B.5-8](#)). The College’s program review process is cyclical as it incorporates systematic, ongoing evaluation of programs and services using data on student learning and achievement, which are used for improvement, planning, and re-evaluation. The CPR includes assessment of student learning, program demand and efficiency, analysis of external factors impacting a program, and

assessment of planned program improvements. CPRs also incorporate results from program learning outcomes from the previous three ARPDs and must show steps for improvement based on these results and the previous ARPD recommendations. ARPD data for instructional and student services programs are generated centrally by the UHCC Office for Academic Policy and Planning.

The institutional assessment measures mentioned above, along with Scorecard Reports and University of Hawai'i Community College system data, provide institutional data and evidence on student achievement, which is available via OFIE and the UHCC system office. This information includes disaggregated data on targeted sub-populations, such as STEM, Native Hawaiians, Pacific Islanders, Filipinos, Pell Recipients, and students in pre-collegiate courses. These data are used for program review and decisions relating to program improvement, program modification, and/or budgeting purposes. In addition, improvement along these measures is tied to performance funding from the UHCC system.

Along with the other UHCC campuses, the College implemented the Student Success Pathway (SSP), which is aligned with the College's strategic plan measures and which directly affects resource allocations through alignment with ARPDs, CPRs, and other documents. Pathway teams were created for each phase of the pathway, with over 100 faculty and staff contributing to these teams, which are led by Pathway Leaders from a wide representation on campus and who are not directly tied to administrative offices ([I.B.5-9](#)). The SSP also received input from all four Authorized Governance Organizations. Through this effort, all departments and programs have completed an SSP Template that maps their specific progress on implementing strategies to meet the SSP institutional outcomes and measures ([B.5-10](#), [B.5-11](#)).

## **Analysis and Evaluation**

The College assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement using disaggregated quantitative and qualitative data for analysis by program type and mode of delivery.

This analysis is completed through a regular schedule of assessment reported in various instruments, such as ARPDs, CPRs, and the Student Success Pathway model ([I.B.5-12](#)). The collection and analysis of student learning outcome and achievement data take place in Course Learning Reports, OFIE reports, and the Strategic Plan Performance Measures Scorecard. Quantitative and qualitative data are disaggregated for analysis by program type, and program achievement data are disaggregated by mode of delivery in the ARPD. The College would like to revisit the mapping of student learning outcomes and service area outcomes to the larger learning outcomes at the institutional level to better assess progress on the mission. To meet this goal, the College has added this outcome in the Quality Focus Essay.

---

**I.B.6. The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.**

---

### Evidence of Meeting the Standard

The College disaggregates and analyzes learning outcomes and achievement for subpopulations of students and, when identifying performance gaps, it implements strategies to mitigate those gaps and evaluates the efficacy of those strategies.

#### *Disaggregating Learning and Achievement Findings*

The College has aligned its strategic planning directions with those of the UH and UHCC system, including the special focus on Filipinos, Pacific Islanders, and Pell grant recipients (low income students regardless of ethnicity). As the College is designated by the U.S. Department of Education as a Native Hawaiian-serving institution and it is committed to the plans included in Hawai'i Papa o Ke Ao ([I.B.6-1](#)), its strategic directions also include a special focus on Native Hawaiian students. UHCC system has also commenced a new developmental education acceleration initiative; thus, the College, already strongly committed to developmental education, has now embraced a new acceleration model for pre-college courses. The College and the UHCC system identify significant trends among subpopulations of students by monitoring disaggregated data on relevant measures in the strategic plan scorecard and through the College's institutional effectiveness measures (see ISER section, *Presentation of Student Achievement Data and Institution-set Standards*). Native Hawaiian trends are also evident in Annual Reports of Program Data ([I.B.6-2](#)). If the trend reveals that more support is needed to ensure that subpopulations are meeting performance expectations, then the College implements either targeted measures to support that subpopulation or promotes existing or new general student success measures (e.g. the Study Hub or the online tutoring system, Brainfuse). Upon analyzing trends, performance expectations, and achievement data, the College has instituted several new campus-wide initiatives and targeted programs, while continuing to support and improve existing programs, to better help with the overall success of its sub-populations. These initiatives are discussed below.

#### *Closing Gaps*

**Developmental Education:** counselors and instructors specializing in developmental education support for pre-college level students identified strategies based on student learning outcomes data ([I.B.6-3](#)). For example, in spring 2015, instructors and counselors together created the Learning Plan ([I.B.6-4](#), [I.B.6-5](#)), which was implemented in all ENG 22 pre-college classes. In fall 2016, the UHCC system implemented a new acceleration model for developmental education to increase persistence, lessen the financial burden of college, and streamline and shorten the path to college-level courses to increase persistence levels. To help with this innovative movement, campus representatives, including the chair of the College's previously established Student Success Council, joined UHCC colleagues to support new co-requisite (accelerated) classes, equip classrooms with needed technology, fund professional development, and implement embedded tutoring in pre-college classes.

**Filipino Students:** Based on the success gaps attested in Strategic Scorecard data, the College initiated student support activities to better engage Filipino students and better support their academic success. The College offered a Filipino Women Writers class in Spring 2016, has two advisors committed to the Bayanihan Filipino student club, and hosted the Pamantasan conference in Spring 2017, which focuses on Filipino challenges, student success for Filipino students, and leadership training for Filipino faculty and staff. ([I.B.6-6](#), [I.B.6-7](#), [I.B.6-8](#), [B.6-9](#), [I.B.6-10](#))

**Native Hawaiian and Pacific Islanders:** With the aim of being a model indigenous-serving institution and recognizing the success gaps in achievement by Native Hawaiian students, the College has a long standing commitment to the success of its Native Hawaiian students. The College supports a curriculum that teaches through a Hawaiian lens and framework ([I.B.6-11](#)), such as focusing on ‘aina-based (culture-based) learning ([I.B.6-12](#)). The institution also recently created the Kapo‘oloku Program for Native Hawaiian Student Success ([I.B.6-13](#), [I.B.6-14](#)), the Ka Pohaku Kihī Pa‘a Writing Mentor Program, the Lunalilo Scholars Program ([I.B.6-15](#)), and Kūlia ma Kapi‘olani ([I.B.6-16](#)), a Native Hawaiian Career and Technical Education project.

**STEM:** The College’s Science, Technology, Engineering and Math program received a Tribal Colleges and Universities Program (TCUP) grant from the National Science Foundation (NSF) in 2007, which allowed it to establish the Associate in Science in Natural Science (ASNS) degree in 2011. Since that first grant, the College has been successful with other NSF funded grants to promote Native Hawaiian success in STEM programs ([I.B.6-17](#)). Enrollment of Native Hawaiian students in STEM has remained steady over the past five years, despite a drop in overall enrollment at the College. Furthermore, Native Hawaiian students are over-represented in the STEM majors. The College is the lead campus of a community college systemwide grant funded through NSF’s Louis Stokes Alliance for Minority Participation solicitation, which will allow the College to address the educational needs of additional student subpopulations ([I.B.6-18](#)).

Additional needs of these subpopulations and the remaining subpopulations are also addressed in the following interventions that benefit all students. Since the last accreditation, the College has invested in student support services that target writing and math, such as the Study Hub ([I.B.6-19](#)) and Brainfuse ([I.B.6-20](#)). The UHCC system allocated \$500,000 to the College to support pre-collegiate math and English ([I.B.6-21](#)). The College is also successfully using the new UH STAR Guided Pathway System, which identifies academic pathways and goals, lists the requirements for the student’s major, provides a detailed look at the student’s progress, gives access to transcripts, and assists with scholarship opportunities. The College has also designated a Starfish coordinator to assess and implement the Starfish system to notify counselors of at-risk students. The College continues to support existing programs such as the Maida Kamber Center for Career Exploration, Transfer and Graduation Services ([I.B.6-18](#)), First Year Experience ([I.B.6-19](#)), TRIO-Student Support Services ([I.B.6-20](#)), Honda International Center ([I.B.6-21](#)), Disability Support Services Office ([I.B.6-22](#)), Student Parents Program ([I.B.6-23](#)), Veterans Affairs Center ([I.B.6-24](#)), and Kuilei Outreach Program ([I.B.6-25](#)).

## Analysis and Evaluation

The College disaggregates and analyzes learning outcomes and achievement for subpopulations of students and, when identifying performance gaps, it implements strategies to mitigate those gaps and evaluates the efficacy of those strategies. The College currently collects learning outcomes data for subpopulations, but in pilot and targeted formats. The expansion of the disaggregation of learning results to reveal differences in performance among groups, particularly for underrepresented students, is a critical goal of the College. To build critical mass to examine disparate learning, the College has included this task as part of the assessment action project in the Quality Focus Essay.

---

**I.B.7. The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.**

---

## Evidence of Meeting the Standard

The College regularly evaluates its policies and practices across all areas of the institution to assure their effectiveness in supporting academic quality and accomplishment of mission.

### *Evaluation of policies and practices*

The Policy, Planning, and Assessment Council (PPAC) became the Chancellor's Advisory Council (CAC) in 2013. The CAC is composed of leaders of instructional programs and administrative and educational support units, as well as representatives from the four authorized governance organizations (AGOs, see IV.A.2). It serves as an integrative and centralized mechanism for discussion, analysis, and recommendation related to college policy and planning. The CAC has the responsibility for review and recommendation to the Chancellor concerning campus policies and periodic revisions of the policies.

Per the revised 2017 charter ([I.B.7-1](#)), the CAC is responsible for (1) reviewing and making recommendations on campus policies, those that align with Board of Regents, UH and UHCC policies and those that are specific to Kapi'olani Community College and (2) monitoring updates and revisions to campus policies and updating the policies on Kapi'olani Community College's websites, as needed.

In 2017, the CAC passed K1.100, the Policy on the Policy Development Process ([I.B.7-2](#)), which defines the Council's role in reviewing and voting on policies. New or revised policies can be initiated and drafted by any office, subject-matter-expert, or individual responsible for the policy implementation or oversight using the College's policy template.

### ***Programs and Support***

The College evaluates its instructional programs and student support services through comprehensive program reviews (CPR), which are undertaken every three years. CPRs are informed by annual reports of program data (ARPDs, [I.B.7-3](#)), which evaluate instructional as well as student services and learning support programs. Both evaluation processes follow procedures as described in the University of Hawai‘i Community Colleges Policy UHCCP #5.202 ([I.B.7-4](#)), which establishes a coordinated system-wide program review process that meets the requirements of Board of Regents and Executive policies, external mandates, and standards of good practice. The College’s policy, K 5.202 ([I.B.7-5](#)), establishes campus-specific procedures for the review of instructional, student services, learning support, and administrative services programs. Program reviews are conducted by the faculty and staff in the program, based on agreed-upon measures and program plans. The Chancellor is responsible for oversight of the program review process, including monitoring evaluation and improvement processes and procedures for course, program, general education, and institutional student learning outcomes, and assessing the results and completion of program reviews for all departments and units.

In addition to the progress on the mission using program review, the College evaluates the program review process itself. In August 2017 and February 2018, the Director of the Office for Institutional Effectiveness (OFIE) conducted a meta-evaluation of program review effectiveness using a random sample of the College’s ARPDs to gauge how well they reflected an effective use of data, a focus on students, outcomes assessment, and planning. The results of the studies are being used to inform the system’s efforts to revise program review processes and procedures. Future program review processes call for multiple methods of assessment to triangulate areas of improvement. ([I.B.7-6](#)).

### ***Resource Management***

In 2014, the College issued the Participation in College Decision-Making Processes policy (KOP.1.112, [I.B.7-7](#)) and the Planning and Assessment Integration with Resource Allocation Policy (KOP.1.111, [I.B.7-8](#)) to ensure that faculty, staff, and students have a substantive and clearly-defined role in institutional governance and a substantial voice in College policies, planning, and budget; and to provide a transparent and participatory planning, assessment, and resource allocation process related to strategic planning, program outcomes, and the mission. The CAC’s Budget and Planning Work Group works to ensure alignment of resource allocation with the College’s mission and communicates key budgetary decisions to various campus constituencies. Each department/unit produces an annual budget as well as a five-year budget plan, which must reflect ARPD data and department action plans. Additional requests for allocations can be made through an Action Request Form, which was instituted in 2014 and revised in 2017 to ensure that all requests are related to the Student Success Pathways and/or Strategic Plan.

### ***Governance***

The College evaluates its governance processes primarily through periodic discussions at meetings of the CAC and Authorized Governance Organizations (AGOs, [I.B.7-9](#)). The CAC approved a review process flowchart ([I.B.7-10](#)) that shows how institutional policy is vetted. The biennial campus climate survey ([I.B.7-11](#)) requests feedback on the effectiveness of the various governance organizations as well as the effectiveness of administrators.

## Analysis and Evaluation

The College regularly evaluates its policies and practices across all areas of the institution to assure their effectiveness in supporting academic quality and accomplishment of mission. The College regularly evaluates its policies and practices related to instructional programs, student and learning support services, and governance via review by Authorized Governance Organizations and the Chancellor's Advisory Council. These reviews ensure the effectiveness of institutional policies and practices in supporting academic quality and accomplishment of the mission. Administration, faculty and staff continue to develop and revise campus-specific policies relating to resource management, planning, and assessment. To monitor and assess the effectiveness of these policies across departments, units, programs, and authorized governance organizations, the College has included this in the Quality Focus Essay.

---

**I.B.8. The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.**

---

## Evidence of Meeting the Standard

The College broadly communicates the results of all its assessment activities to establish a shared understanding of its strengths and weaknesses and sets appropriate priorities.

### *Communication of the results*

Results of assessment and evaluation activities are available to all College constituents via websites. The College maintains an accreditation website that reports on college accreditation ([I.B.8-1](#)) and archives ACCJC accreditation reports back to 2006 ([I.B.8-2](#)) and reports on the status of program accreditations ([I.B.8-3](#), [I.B.8-4](#)). Every semester, the Vice President for the University of Hawai'i Community Colleges (UHCC) visits each community college campus and gives an overview of each campus' performance in the context of larger environmental factors and overall UHCC System performance ([I.B.5](#), [I.B.6](#)). His presentations are shared from the website of the Office for Institutional Effectiveness (OFIE). The OFIE website ([I.B.8-7](#)) also provides access to the College's Strategic Plan, three-year Comprehensive Program Reviews, Strategic Plan Performance Measure Scorecards, and institutional surveys that range from student engagement (CCSSE) to enrollment. The UHCC System's Annual Report of Program Data website houses the annual reports of the College's instructional, student services, and learning programs. These reports contain program assessment data and planning information. ([I.B.8-8](#)). The Student Success Pathways (SSP) initiative asks all departments, units, and programs to plan, implement, and evaluate action plans that fall into the six phases of the pathway and are aligned with the College's Strategic Plan ([I.B.8-9](#)). A SSP plan template ([I.B.8-10](#)) is distributed to the entire campus and regular updates and assessments are submitted.

Assessment and evaluation activities are communicated through the College's *News and Events* bulletin, emails, meetings, and websites to all College constituents. For example, the Chancellor's Advisory Council (CAC) serves as the entity for communication with constituents across the College. The Council members are responsible for disseminating information to their areas through meetings and emails as well as reporting concerns and issues from their areas back to the Council. Composed of leaders of instructional programs and administrative and educational support units, as well as representatives from the four Authorized Governance Organizations (AGOs), the CAC has the primary responsibility for communicating the results of the progress of various planning and assessment activities. The CAC agendas and meeting materials are emailed to all members for dissemination among their constituencies as well as published in the online *News and Events*. The meeting minutes are sent to CAC members and archived in the 'Ohana intranet website. Since spring 2018, the CAC minutes have also been disseminated to the entire campus through publication in *News and Events* ([I.B.8-11](#)).

The Student Learning Outcomes committee posts minutes of their monthly meetings to the Faculty Senate website ([I.B.8-12](#)), which is accessible to all members of the College as well as the external community. A summary of committee activities is presented to the Faculty Senate at the end of each academic year, and Senators are tasked with communicating Faculty Senate proceedings to the department/unit they represent.

The Director of the Office for Institutional Effectiveness (OFIE) is a member of the CAC and regularly makes presentations to the CAC and other standing Advisory Councils, AGOs, and Campus Forums. For example, in October 2017, he visited with the Vice Chancellors' Advisory Council (VCAC, composed of all Vice Chancellors, deans, department chairs, and unit heads) to brief them on Institution-set Standards and presented a rubric on a planned two-phase assessment of the Annual Report of Program Data reporting process ([I.B.8-13](#)). OFIE's final report of the assessment of program review was presented in spring 2018 ([I.B.8-14](#)). In fall 2017, campus policies and plans were centralized on the College's main website and on the intranet site, 'Ohana ([I.B.8-15](#), [I.B.8-16](#)).

### ***Setting appropriate priorities***

The College sets its priorities through three main documents, which provide a shared understanding of the College's strengths and weaknesses: the College's Strategic Plan 2015-2021 ([I.B.8-17](#)), the Annual Reports of Program Data (ARPD, [I.B.8-18](#)) and the Comprehensive Program Reviews (CPRs), which include recommendations for improving outcomes ([I.B.8-19](#)). In addition, the budgeting process (PAIR) and five-year budget plan that each department and unit creates connect campus priorities to resource allocations through various discussion venues, including the Chancellor's Advisory Council. ([I.B.8-20](#); [I.B.8-21](#)). From 2016, the Student Success Pathway plans ([I.B.8-22](#)) allow each department, unit, and program to identify specific tactics to achieve the College's goals.

## **Analysis and Evaluation**

The College broadly communicates the results of all its assessment activities to establish a shared understanding of its strengths and weaknesses and sets appropriate priorities by means of websites, committees, presentations and forums, bulletins and newsletters, and campus-wide

assessment activities. Evidence of a shared understanding of the institutional strengths and weaknesses and priority-setting based on this information includes strategic planning, program review and planning, administrative goal-setting, and budget planning. Continuing to improve campuswide communication has been included in the Quality Focus Essay.

---

**I.B.9. The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. (ER 19)**

---

### **Evidence of Meeting the Standard**

The College conducts continuous, systematic evaluation and planning by integrating program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for programs and services and for human, physical, technology, and financial resources.

#### ***Continuous and Systematic Evaluation***

The Annual Reports of Program Data and Comprehensive Program Review are the primary tools for the College's continuous and systematic evaluation and planning processes.

The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to the accomplishment of its mission and the improvement of institutional effectiveness and academic quality. The College's program review policy includes two components: 1) Annual Report of Program Data ([I.B.9-1](#)) and 2) Three-Year Comprehensive Program Review ([I.B.9-2](#)). All instructional, student services, academic support, administrative services, and continuing education programs collect and evaluate data annually. These data are evaluated in the CPR, which includes an analysis of program alignment with the mission, program strengths and weaknesses, evidence of quality, evidence of student learning, resource sufficiency, and recommendations for improving outcomes. Program review results are used for decisions relating to program improvement, program modification, and budgeting.

In 2016, the Taskstream Assessment Management System (AMS) was procured to provide a centralized, streamlined way to collect, analyze, and align student learning outcomes data at the course, program, and institutional levels. Taskstream improves the College's ability to track improvement, thereby measuring institutional effectiveness and academic quality. The results of this analysis inform planning and resource allocation and guide the College in improving institutional effectiveness and carrying out its mission (ER 19).

In 2016, the College launched the Student Success Pathway (SSP) Plan ([I.B.9-3](#), [I.B.9-4](#)), a six-phase path to student success, from students' initial contact with the institution through completion of degree and beyond into workplace and lifetime achievement. Each phase of the plan is aligned with the UH System, UHCC, and College Strategic Plans ([I.B.9-5](#), [I.B.9-6](#), [I.B.9-7](#)), as well as institutional outcomes and measures. Every department, unit, and program at the College is tasked with mapping how their work fits into the pathway and addresses one or more institutional outcomes; resource requests are made to carry out the planned strategic actions.

### ***Long Range to Short Term Needs***

The College's Long Range Development Plan (LRDP) is a 10-year master plan linking the physical planning process with campus programmatic and institutional goals; it also serves as a guide for future project development studies and capital improvement projects. The College's LRDP was last approved by the Board of Regents in 2010 after an extensive and collaborative development process that involved campus members as well as community stakeholders ([I.B.9-8](#)). In 2018, the LRDP is scheduled to be reviewed and updated per the UHCC timeline.

The Strategic Plan ([I.B.9-9](#)) describes a six-year plan for meeting performance outcomes set by the UH Community Colleges. Department and unit five-year budget plans are another tool for mid-range institutional planning ([I.B.9-10](#)). Short-range needs are accommodated by the fiscal year budget request ([I.B.9-11](#)), and allocation request forms (ARFs) ([I.B.9-12](#)). ARFs may address either short-term or long-term needs. Requests for resources must be tied to program and department/unit planning and aligned with the College's mission.

According to the 2017 revised Planning and Assessment Integration with Resource Allocation (PAIR) process, the submission of ARFs is a bottom-up process to allocate additional funding beyond base operational needs. ARFs may be submitted by any constituent on campus. All ARFs must be tied to the strategic plan and student success pathway for consideration. Multiple meetings and town halls are conducted to ensure participation by all constituents throughout the budgeting process ([I.B.9-13](#)).

Effective May 2018, funded requests require a report at the end of the fiscal year detailing how the allocation improved learning or service outcomes. Administrators meet with constituents to consolidate department/unit requests and reach consensus on top priorities before ARFs are submitted. See III.D.1. for more information on the PAIR process. (ER 19)

The Technology Plan 2013-2017 provided a roadmap for addressing project prioritization and key issues facing technology deployment and use at the College. The plan was updated annually based upon the changing needs of students and institutional priorities. The Technology Plan was revised for 2018-2021 ([I.B.9-14](#), see III.C.1). The Technology Plan is aligned with the goals of the Strategic Plan of the College and the University of Hawai'i Community College System. The Technology Plan guides the allocation of technology resources in support of student learning and institutional effectiveness at the College.

In the area of human resources, College prioritizes maintaining the high caliber and staffing levels of faculty and staff who are essential to the quality of educational programs and services and to achieving its institutional mission and purposes. Vacancies are tracked on a spreadsheet and reviewed by the Administrative Staff quarterly or more frequently, if necessary. A revised

procedure for filling vacancies was approved at the Chancellor's Advisory Council meeting in May 2018 ([I.B.9-15](#)).

Finally, all essential plans and processes are reviewed annually and tracked through the Chancellor's Advisory Council's Charter, Attachment A, "Calendar to Review Plans", ensuring continuous, systematic evaluation and planning ([I.B.9-16](#), p. 4).

### **Analysis and Evaluation**

The College conducts continuous, systematic evaluation and planning by integrating program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short-, and long-range needs for programs and services and for human, physical, technology, and financial resources. The College engages in systematic planning by means of the ARPDs, CPRs, the Student Success Pathway, and the Taskstream Assessment Management System. Each of these tools are guided by the Strategic Plan, which is annually evaluated to measure institutional effectiveness and achievement of mission. Short- and long-range resource planning has been taking place through the LRDP, Strategic Plan, five-year budget plan, fiscal year budget request, and the PAIR process and the ARFs. The SSP, launched in 2016, provides a framework for aligning all of these various planning tools and documents.

---

**I.C.1. The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors. (ER 20)**

---

### **Evidence of Meeting the Standard**

The College assures the clarity, accuracy, and integrity of the information provided to current and prospective students, personnel, and all other persons or organizations with a vested interest in the mission of the College through its written materials and publications, its online presence, and its public information announcements.

### ***Accurate and Accessible***

The mission statement is prominently displayed on the College's website ([I.C.1-1](#)) and in all classrooms and is in the course catalog ([I.C.1-2](#), p.1).<sup>2</sup> Information on educational programs ([I.C.1-3](#))<sup>3</sup> and student support services ([I.C.1-4](#)) can be found on the College's website and in the course catalog, as well ([I.C.1-5](#), [I.C.1-6](#), page 14). This information is also shared in New Student Orientation (NSO, [I.C.1-7](#)) and New Employee Orientation (NEO) . Program learning outcomes can be found in the course catalog, as exemplified by Accounting ([I.C.1-8](#)). (ER 20)

When the catalog is produced, the Office of Academic Affairs sends all departments a preview copy of the courses and programs sections of the catalog, with a request to proofread applicable sections, with the goal of ensuring the accuracy and currency of catalog information. In fall 2016, Faculty Senate issued a resolution asking to institutionalize a window of at least ten days during which departments and programs may review catalog information for accuracy prior to publication. The Interim Chancellor approved this request June 8, 2017 ([I.C.1-9](#)). This process decreases the chances of error in the documents and affords more individuals the chance to identify and correct errors. (ER 20)

The College is currently working on a process whereby the Quali Curriculum Management System will feed course and program information directly into catalog production. The College appraises students of all programs and services through a variety of supports including orientation, assessment and matriculation services (see II.C).

### ***Academic Quality and Accreditation Status***

The College provides accurate information electronically to students, faculty, staff, and the public about its accreditation status with the ACCJC ([I.C.1-10](#))<sup>4</sup> and program accreditors ([I.C.1-11](#)) and in print in the catalog ([I.C.1-12](#), p. 30). (ER 20; See Checklist For Compliance).

## **Analysis and Evaluation**

The College assures the clarity, accuracy, and integrity of the information provided to students and prospective students, personnel, and all other persons or organizations with a vested interest in the mission of the College through its written materials and publications, its online presence, and its public information announcements. The College provides accurate information to students, faculty, staff, and the public about its accreditation status with all of its accreditors, including the ACCJC, through its website and catalog.

---

<sup>2</sup> See, Policy of Public Disclosure and Confidentiality in the Accreditation Process.

<sup>3</sup> See, Policy on Institutional Degrees and Credits.

<sup>4</sup> See, Policy on Public Disclosure and Confidentiality in the Accreditation Process.

---

**I.C.2. The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements”. (ER 20)**

---

### Evidence of Meeting the Standard

The College provides an online catalog with precise, accurate, and current information on all facts, requirements, and procedures.

#### *Course catalogs are current and comprehensive*

The College online catalog is annually updated with the latest version published in time for students to use as they register in the spring for fall classes. Current and previous college catalogs are downloadable and printable. The catalog provides precise, current, and accurate information ([I.C.2-1](#)). (See Checklist for Compliance, Credit, Program Length, and Tuition)

The catalog also outlines requirements for admission, including the cost of education, such as student fees and other financial obligations. Similarly, the catalog includes requirements for degree and certificate attainment, graduation, and transfer. Lastly, the catalog provides an overview of the major policies affecting students (ER 20):

- Academic regulations, such as academic honesty (p. 63)
- Non-discrimination (p. 66)
- Transfer (See Checklist for Compliance, Transfer Policies) (p. 16, 18, 28)
- Acceptance and transfer of credits (See Checklist for Compliance, Transfer Policies) (p. 33, 40, 54, with details included for specific degrees)
  - Transcripts (p. 33, 40, 54, with details included for specific degrees)
  - Withdrawal (p. 41-42)
  - Grievance and complaint procedures (p. 66, See Checklist for Compliance, Student Complaints)
    - Sexual harassment (p. 65, See Checklist for Compliance, Student Complaints)
    - Refund of fees (p. 44, See Checklist for Compliance, Title IV)

Archived digital collections of college catalogs from 1966 forward are also available on the college’s dspace repository website ([I.C.2-2](#)).

#### *Varied Instructional Methods*

In the catalog’s Policies and Regulations, the section titled “A Commitment to Integrated Learning and Teaching” states that instruction in all modalities includes “high quality interaction between instructional faculty and students” and “student support services are provided for students in all courses in face-to-face or technology-mediated sessions” ([I.C.2-3](#)).

### Analysis and Evaluation

The College provides an online catalog with precise, accurate, and current information on all facts, requirements, and procedures. The catalog is the seminal document which establishes a

relationship between the college and the student with respect to attainment of a degree or other award, conditions for support and services, and student expectations. College faculty and staff through institutional processes review all requirements, supports and services annually, and provide notification to current and prospective students for successful matriculation and attainment of educational outcomes.

---

**I.C.3. The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)**

---

### **Evidence of Meeting the Standard**

The College communicates matters of academic quality to multiple constituents, including current and prospective students and the public, as well as faculty and staff, by systematically publishing the results of student learning and achievement assessments through multiple sources.

The Vice President for Community Colleges reports on the University of Hawai‘i Community Colleges Strategic Directions 2015-2021 each semester at each community college. The onsite presentation is open to all faculty and staff ([I.C.3-1](#)). PowerPoint presentations are available on the University of Hawai‘i Community College System website ([I.C.3-2](#)) under the Presentations tab.

The College’s K5.202 Review of Established Programs ([I.C.3-3](#)) is based on UHCC System’s UHCCP #5.202 ([I.C.3-4](#)) and provides a framework for reporting student learning and student achievement. The program review policy is primarily implemented with two reports, the 1) Annual Report of Program Data (ARPD, [I.C.3-5](#)) and the 2) Comprehensive Program Review (e.g., the CPR for Culinary Arts, [I.C.3-6](#)). These reports, which are posted online and available to the public, discuss assessment of learning outcomes and provide plans for improvement. (ER 19)

The College’s 2016-2017 Scorecard on the attainment of Strategic Plan outcomes is available to the public at the Hawai‘i Graduation Initiative website ([I.C.3-7](#)). Scorecards provide data on key progress measures such as Time and Credits to Degree, and leading indicators that impact completion. They encourage campuses to set intermediate goals, initiate strategies based on data-driven decision making, and establish a baseline for future performance. (ER 19)

The College collects student achievement data on course success rates ([I.C.3-8](#)), persistence, completion and transfer and publishes the information on the Office for Institutional Effectiveness (OFIE) website ([I.C.3-9](#)). Achievement data for all and differentiated groups (i.e., Filipino, Native Hawaiian, Pacific Islander, Pell recipients) are provided, consistent with performance measures set forth by the University of Hawai‘i Community Colleges (ER19). Assessment results are communicated to campus and stakeholders through the Chancellor’s Advisory Council (CAC) and CAC listserv.

## Analysis and Evaluation

The College communicates matters of academic quality to multiple constituents, including current and prospective students and the public, as well as faculty and staff, by systematically publishing the results of student learning and achievement assessments through multiple sources. Student learning outcome findings are shared through annual program review. Attainment of course level outcomes are contained in college data systems. Academic quality is shared through reports of progress on the strategic planning goals, the institution set standards and larger system goals in a variety of public settings. Opportunity for comment and feedback is provided and institutional improvements to processes and practices is a result of the discussion of progress on the mission through the larger institutional plans. The college in evaluating its SLO processes in particular, has determined that more focused attention to faculty engagement in the process and increased access to data would improve student learning. As a result, the college has included this goal in the Quality Focus Essay Action Project One, Assessment.

---

### **I.C.4. The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.**

---

## Evidence of Meeting the Standard

The College describes the purpose, content, course requirements, and expected learning outcomes of its certificates and degrees.

The College provides detailed, clear, up-to-date, and accurate information for all of its degrees and certificates, including their purpose, content, course requirements and expected learning outcomes. The College's website provides information about its credit and non-credit programs ([I.C.4-1](#)), including degrees and certificates and the purpose of the programs. This information is also available through the online college catalog ([I.C.4-2](#)), which includes content, course requirements, and program learning outcomes. The STAR Guided Pathway System helps students see what courses they need to take, get suggestions on the order in which to take their courses, learn how long it will take to earn a degree, and register for classes ([I.C.4-3](#)).

## Analysis and Evaluation

The College describes the purpose, content, course requirements, and expected learning outcomes of its certificates and degrees in the college catalog, departmental websites and college literature and brochures. Educational planning for successful completion are reviewed at various milestones on the educational pathway. Educational counselors assist students in understanding the expectations for degrees and certificates, and provide information to students to make informed decisions about their educational pathways. These processes are evaluated as

a part of program review and improvements are included in resource allocations where appropriate.

---

**I.C.5. The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.**

---

### **Evidence of Meeting the Standard**

The College regularly reviews and posts institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

Policies and procedures include Board of Regent policies (RP 1-12), Executive policies (EP 1-12), University of Hawai‘i Community College policies, and College policies. System policies indicate whether or not the College should develop its own version of the policy and procedures to implement them. Current policies and plans are available on the college website ([I.C.5-1](#)).

In spring 2017, a Chancellor’s Advisory Committee (CAC) “disappearing” workgroup was established for a short term to develop procedures by which campus policies would be systematically developed, reviewed, and revised ([I.C.5-2](#)). Summer and fall of 2017, the CAC evaluated its processes for regular review of policies and procedures. In fall 2017, the CAC voted on accepting a proposed Policy on Policy Development. Since then, the Governance policy, the Animals on Campus policy, the Facility Use policy, and vacancy procedures (formerly policy) have been in development and review ([I.C.5-3](#)). In addition, based on review and dialogue with its constituencies, the Council created a calendar of review to ensure currency and relevance of all pertinent plans ([I.C.5-4](#))

A detailed discussion of the UH System’s method of regular review of policies and procedures is contained in Standard IV.C. and IV.D.

### **Analysis and Evaluation**

The College regularly reviews and posts institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services. University of Hawaii and UH Community College policies are reviewed under a set calendar. Campus policies and procedures are reviewed by the CAC for currency and relevance and improvements are made based on qualitative feedback and survey results in annual climate and campus surveys. Findings are examined on a regular basis by the college’s Office for Institutional Effectiveness (OFIE) and reports are duly uploaded to campus intranet and public site as appropriate.

---

**I.C.6. The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.**

---

### **Evidence of Meeting the Standard**

The College provides students with information about the total cost of attending the College.

The Board of Regents (BOR) establishes tuition and fees through BOR policy RP 6.201 ([I.C.6-1](#)). Information from the cost of tuition to the cost of supplies is readily available in various locations and formats including the college catalog and the college web page titled “Cost of Attendance” ([I.C.6-2](#)). The college bookstore web page publishes the cost of required textbooks.

Program fees and other costs unique to specific programs are included in program descriptions in the college catalog and on program web pages of the college website. The College Catalog ([I.C.6-3](#)) outlines expenses such as resident and nonresident tuition (p. 37), cost of course materials and supplies, special professional program fees for nursing, health sciences, and Emergency Medical Services programs (p. 44).

The Bookstore website lists textbook costs ([I.C.6-4](#)). The College Financial Aid Office ([I.C.6-5](#)) is responsible for communicating this information to current and prospective students and provides a price calculator ([I.C.6-6](#)) for students.

The College’s Class Availability website lists all classes offered by semester and during summer sessions ([I.C.6-7](#)). Instructors and lecturers whose courses incorporate Open Educational Resources (OER), online resources, library resources, faculty-authored materials, or any combination of no-cost resources can ask their department secretaries to add the “Textbook Cost: \$0” designation to their class section in Banner ([I.C.6-8](#)). The description will appear on the class availability website to accurately inform current and prospective students of expenses ([I.C.6-9](#)).

### **Analysis and Evaluation**

The College provides students with information about the total cost of attending the College. The College’s website and the catalog are sources of information, supplemented by information and advice from the financial aid office. Students are provided timely information of public and private sources of financial support. Costs of books are provided by the bookstore and lab fees and additional course costs are likewise displayed for students on the website and catalog. Other guides and tips for financing higher education is shared with students by other departments on campus whose charge is to help reduce financial barriers to degree completion such as the Lunalilo Scholars Program (see II.C).

---

**I.C.7. In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)**

---

### **Evidence of Meeting the Standard**

The University of Hawai‘i Administrative Rules, Title 20, Chapter 2 Statement on Rights and Responsibilities of the University of Hawai‘i Community ([I.C.7-1](#)) address the right to freedom of conscience for the academic community. The College follows the University of Hawai‘i Community Colleges Statement on Professional Ethics for faculty, adopted in July 2006 (UHCCP #5.211, [I.C.7-2](#)). The policy outlines the expectations for faculty responsibilities related to their professional conduct. Per UHCCP 5.211, all new faculty hires are to be provided a copy of the statement. In addition, the College’s commitment to academic freedom for faculty and students is found in the college catalog with the following statement ([I.C.7-3](#), p. 31). (ER 13)

The University of Hawai‘i includes its commitment to academic freedom and the open pursuit of knowledge in its collective bargaining agreement with the faculty (Article IX, [I.C.7-4](#)). (ER 13)

### **Analysis and Evaluation**

The College uses and publishes governing board policies on academic freedom and responsibility, making clear its support for an atmosphere in which faculty and students benefit from intellectual freedom. Policies are available at the UH Community College website, the College catalog and in the University of Hawai‘i faculty union contract. Academic freedom is a primary area of deference at the college to support free thinking from all perspectives and viewpoints.

---

**I.C.8. The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.**

---

### **Evidence of Meeting the Standard**

The College establishes and publishes comprehensive policies and procedures that promote honesty, responsibility, and academic integrity for administrators, faculty, and staff, and for students, appropriate behavior, academic honesty, and consequences for dishonesty. The College’s policies are aligned with and supportive of policies set by the UH Board of Regents,

the UH System, and the University of Hawai'i Community College system, all of which articulate the system's expectations for all constituencies.

Controls are in place to discourage dishonesty. For example, the Testing Center uses multiple authentication procedures to verify the identity of the student taking a test, including a review of the student's ID card and, in the case of online tests, login authentication. The University of Hawai'i course management system, Lulima (Sakai), which hosts many of these online tests, requires authentication of student identity by user ID and password ([I.C.8-1](#) , p. 21, 35). Examples of relevant policies are listed below:

***Board of Regents policies***

- Board of Regents Policy RP 12.201: Ethical Standards of Conduct for administrators, faculty, and staff ([I.C.8-2](#))

***UH System policies***

- UH Executive Policy EP 12.214: Conflicts of Interest and Commitment ([I.C.8-3](#))
- UH Executive Policy EP 7.208: Systemwide Student Conduct Code ([I.C.8-4](#))

***UHCC policies***

- UHCC Policy UHCCP #5.211: Statement on Professional Ethics (Faculty) ([I.C.8-5](#)). The College includes this statement in its catalog on p. 31 ([I.C.8-6](#)).

***Kapi'olani Community College policies***

- Kapi'olani CC Student Conduct Code ([I.C.8-7](#))

## **Analysis and Evaluation**

The College establishes and publishes comprehensive policies and procedures that promote honesty, responsibility, and academic integrity, including student behavior, academic honesty, and the consequences for dishonesty. Codes of ethics are stated in Board of Regents, University of Hawai'i and UH Community College policies to guide student, faculty, board and employee conduct with appropriate consequences for breaches of the ethics codes.

---

**I.C.9. Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.**

---

## **Evidence of Meeting the Standard**

As stated in I.C.7. and I.C.8., policies are in place to reinforce the practice of academic freedom and professionalism. Faculty distinguish between personal conviction and professionally accepted views in a discipline. Faculty Senate discussions focus periodically on the notion of

opinion versus fact. In addition, department meetings and faculty evaluations consider the notion of free and open exchange of ideas in and out of the classroom. These ideas are reinforced in the faculty-focused collective bargaining agreement between the Board of Regents and the UH Professional Assembly ([I.C.9-1](#)).

### **Analysis and Evaluation**

Faculty distinguish between personal conviction and professionally accepted views in a discipline. Included in the student learning outcomes for courses as well as in the general education pathway and at the institutional learning levels, faculty assess student critical thinking skills to ensure that students similarly can distinguish logical thinking and argument versus personal opinion. Conversations about critical thinking and learning takes place at the departmental levels, in faculty senate discussions, and as a part of learning assessment analysis and program review.

---

**I.C.10. Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or worldviews, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.**

---

### **Evidence of Meeting the Standard**

As a public educational institution and part of the University of Hawai‘i System, the College is an open access learning institution that does not attempt to instill any specific beliefs, faith-based world views for its students, staff, faculty, and administrators

### **Analysis and Evaluation**

Not applicable

---

**I.C.11. Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.**

---

### **Evidence of Meeting the Standard**

The College does not operate in foreign locations; this standard is not applicable.

## Analysis and Evaluation

Not applicable

---

**I.C.12. The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. (ER 21)**

---

## Evidence of Meeting the Standard

The College complies with the standards, policies, guidelines, and public disclosure requirements of the Accrediting Commission and is committed to maintaining this compliance in the future.

This compliance is best evidenced by the decades of timely submission of accreditation self-studies, responsiveness to accreditation concerns and recommendations, and positive accreditation reviews ([I.C.12-1](#)). The College has made appropriate efforts to notify the college, community and students of the self-evaluation process and the peer review team visit in 2018. Most recently, as of the 2012 Accreditation Self Evaluation Report, the College effectively responded to nine recommendations by 2014 through the collaborative work of the Chancellor, the Authorized Governance Organizations, faculty, staff, and students ([I.C.12-2](#))<sup>5</sup>. The College has an Accreditation Liaison Officer, who updates the college community. Documents from earlier accreditation cycles, including action letters and evaluation reports are posted on the college website and/or are kept in the office of the Accreditation Liaison Officer.<sup>6</sup> (ER 21, See Checklist.

## Analysis and Evaluation

The College complies with the standards, policies, guidelines, and public disclosure requirements of the Accrediting Commission and is committed to maintaining this compliance in the future. All relevant information is kept on the college website for public access and review or in the Chancellor's office. The college accreditation liaison officer remains the point

---

<sup>5</sup> See, Policy on Public Disclosure and Confidentiality in the Accreditation Process.

<sup>6</sup> See, Policy on Rights and Responsibilities of ACCJC and Member Institutions.

of contact for college and community questions about accreditation and academic quality. All public comments about accreditation are shared with the college leadership for review. All annual reports, periodic reports and other accreditation documents including self evaluation reports are available online.

---

**I.C.13. The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)**

---

### **Evidence of Meeting the Standard**

The College demonstrates integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself consistently to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)

The College has many decades-long working relationships with external agencies for practicums, clinicals, internships, externships, and fieldwork. It has ongoing agreements with external grantors, including federal and state agencies. The length and strength of these relationships reflect the College's honesty and integrity in its work with external agencies. For example, Kūlia ma Kapi'olani is part of the Native Hawaiian Career & Technical Education project, funded through a grant from the U.S. Department of Education. This program has been in existence for over 20 years and has recently been extended ([I.C.13-1](#)).

In addition, the College partners with Hawai'i P-20 Partnerships for Education, a State Department of Education initiative, supporting early college admissions through the Early College High School Program. Early College brings University of Hawai'i instructional faculty into public high schools to teach college-level coursework and enables participating students to earn credit to satisfy requirements at both. As of 2014, the College has had MOAs with several community high schools ([I.C.13-2](#)).

The College has Master Agreements with a number of the major hospitals in the state. These Master Agreements are periodically reviewed by UH General Counsel and the hospital's legal team. Master agreements with hospitals may cover several programs, including Nursing, Emergency Medical Technician Program, Respiratory Care Practitioner Program, Medical Laboratory Technician Program, Occupational Therapy Assistant Program, Dental Assisting Program, and Physical Therapist Assistant Program. In addition to the Master Agreements, there are program specific agreements with hundreds of employers who participate as clinical training sites for the various individual Nursing, Health Sciences, and EMS programs. These agreements are the result of decades of relationship building work done by the health education faculty.

They result in the College's health education programs graduating highly sought after health professional by the employers of Hawai'i and the U.S. mainland ([I.C.13-3](#), [I.C.13-4](#)).

The College, as a Native Hawaiian serving institution, has had a decades-long relationship with the Federal Department of Education's Title III Program to strengthen programs that promote and support student success. In this current accreditation cycle, the College has received approximately \$16 million in funding.

The College responds responsibly and in a timely fashion to program accreditor concerns. For example, the Dental Assisting Program received several recommendations following an October 2014 site visit by the Commission on Dental Accreditation. The issues were addressed as soon as the recommendations were made official and the program's accreditation status was changed to "approval without reporting requirements" in February 2016 ([I.C.13-5](#)).

The College is in good standing with all of the agencies that accredit the professional programs ([I.C.13-6](#)). Program accreditation status can be found at official accrediting sites, for example, the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) for Medical Lab Technician ([I.C.13-7](#)).

Lastly, the College communicates its ACCJC accreditation status with the community using its College website ([I.C.13-8](#)).

## Analysis and Evaluation

The College demonstrates integrity in its relationships with external agencies, including compliance with regulations and statutes. In contracts with state, local and federal agencies through memorandums of understanding, grant documents and other agreements, the college keeps stewardship of public funds, the maintenance of public trust and honesty and fair dealing first and foremost. It describes itself consistently to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public.

---

**I.C.14. The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.**

---

## Evidence of Meeting the Standard

The College is committed to high quality education, student achievement, and student learning above all other objectives. All employees fall under UH EP 5.214 and sign conflict of interest statements annually ([I.C.14-1](#)). Employees must disclose employment at non-college locations. The UH has an independently elected Board of Regents, which has only oversight and

directional authority. The administration of all policies is the responsibility of the Chief Executive Officer, the President of the University of Hawai‘i System, who also signs a conflict of interest disclosure each year. Similarly, the members of the Board of Regents and all University of Hawai‘i system administrators sign a conflict of interest statement annually and report on their finances annually to the State Ethics Board. Violations of the conflict of interest statements are enforced through existing employment contracts and other legal remedies available to the College ([I.C.14-2](#)).

## Analysis and Evaluation

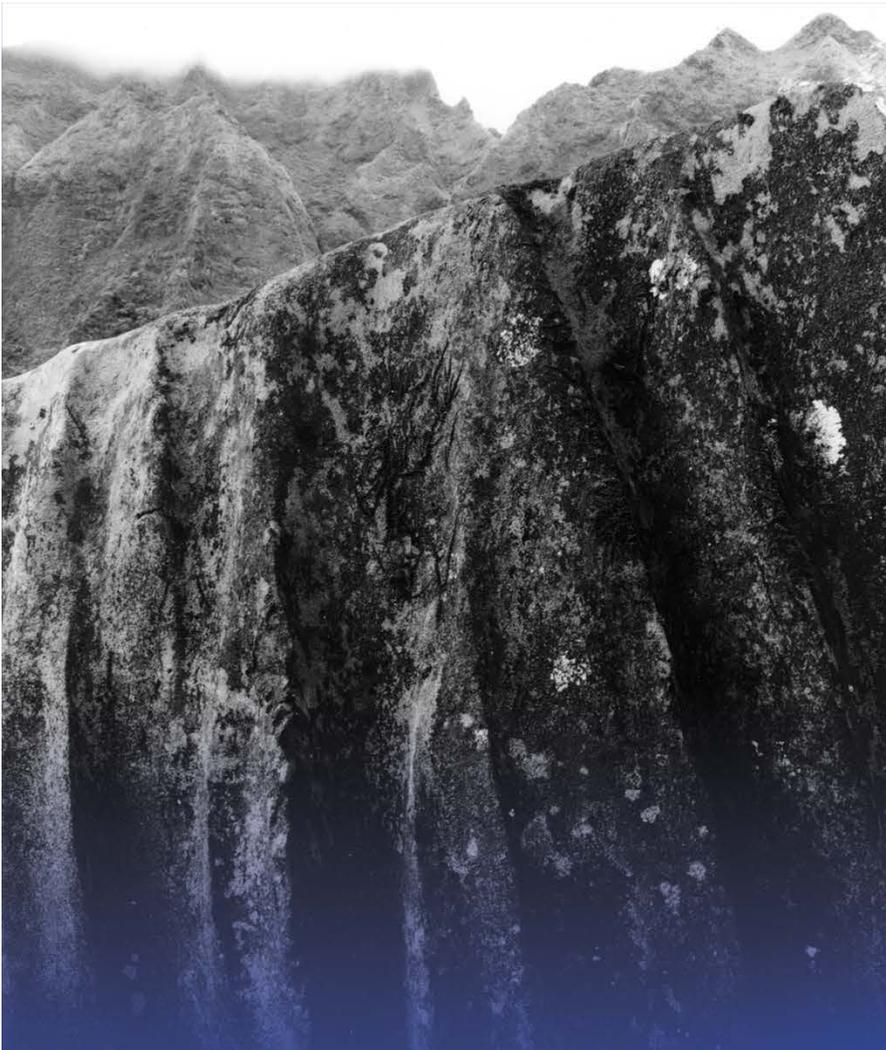

The College is committed to high quality education, student achievement, and student learning above all other objectives. The college is a public, open-access institution and discloses all financial and legal information through proper channels and via transparent documentation. The college manages public funds through a well-established hierarchy of internal and external review. All fiscal activities are to meet the college mission and the legislative purpose of two-year institutions in University of Hawai‘i system.

## **Standard II: Student Learning Programs and Support Services**

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

### **II.A. Instructional Programs**

---

**II.A.1. All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs. (ER 9 and ER 11)**

---

### **EVIDENCE OF MEETING THE STANDARD**

All instructional programs, regardless of location or means of delivery, are offered in fields of study that align with the College's mission, are appropriate to higher education, and culminate in achievement of student learning outcomes, degrees, certificates, employment, or transfer to other higher education programs.

#### ***Courses and Programs***

As a full-service community college, the College offers the well-established curriculum of a two-year institution. ([II.A.1-1](#)). The courses and programs are proposed and approved following system and college policies and procedures. Their academic soundness and appropriateness to both university-wide and campus missions are reviewed as part of the initial approval process and subsequent program review processes. All instructional programs at the College are offered in fields of study consistent with its mission ([II.A.1-2](#)).

The College follows traditional program expectations including:

- All associate degrees are a minimum of 60 credits of college-level courses.
- Pre-professional associate degrees in Liberal Arts, Hawaiian Studies, and Natural Sciences are equivalent to the first two years of baccalaureate study ([II.A.1-3](#), p. 152).

These degrees are aligned and articulated with baccalaureate majors at the University of Hawai‘i at Mānoa, University of Hawai‘i West O‘ahu, and the University of Hawai‘i at Hilo, as well as other universities ([II.A.1-4](#), p. 14).

- Academic Subject Certificates in Associate in Arts degrees are comprised of transfer-level courses with a coherent focus of study ([II.A.1-5](#), p. 197).
- Associate in Science degrees in career and technical education (CTE) prepare students for entry-level positions in the workforce in areas such as Accounting, Culinary Arts, Hospitality, Travel and Tourism, and Nursing. In some cases, CTE Associate degrees have baccalaureate transfer pathways. Program outcomes and curricula in CTE areas are presented to advisory boards for alignment with employers’ needs. ([II.A.1-6](#))
- Certificates of Achievement in CTE disciplines and credit and non-credit Certificates of Competence are offered to meet the workforce needs of regional and state businesses and employers. ([II.A.1-7](#))
- Pre-collegiate, foundation skills courses are offered for second language learners and for those who enroll underprepared to produce collegiate-level work. ([II.A.1-8](#), page 23)

Course numbering conventions, guided by UHCC Policy 5.300, facilitate and promote transparency and standardization of course numbering across the University of Hawai‘i Community Colleges ([II.A.1-9](#)). This policy also clearly specifies, by numbering convention, which courses within the UH system will transfer as baccalaureate-level credit. The College also offers a variety of courses through distance education, either fully online or in a hybrid format where some portion of the classes is delivered face-to-face and some portion delivered online ([II.A.1-10](#)). In order to fully support online offerings, a separate Distance Education Plan was developed to address the manner and method of supporting and expanding digital platforms for learning ([II.A.1-11](#)).

All courses and programs have defined student learning outcomes (SLOs) that are consistent with the College’s mission and are documented in the College catalog (ER 9) ([II.A.1-12](#), p. 379, [II.A.1-13](#), p. 82). Course learning outcomes are mapped to program outcomes in Taskstream ([II.A.1-14](#)). Program outcomes are assessed on a regular basis and the results are documented in the Annual Reports of Program Data (ARPD, [II.A.1-15](#)). As stated in the course catalog, students must earn a cumulative grade point ratio of 2.0 to be in good academic standing and to be eligible to earn a degree or certificate ([II.A.1-16](#), p. 62). In addition, students are required to earn a grade of “C” or higher in all courses required in a program to be eligible to graduate with a degree or certificate in that program, thereby assuring that students attain a satisfactory level of mastery of course and program outcomes.

Every course has specific and measurable SLOs, regardless of location or modality. Course, program, and institutional SLOs are listed in the Catalog. Faculty are required to include in their syllabi course SLOs and assignments and activities that will be evaluated.

The College ensures that programs and services are high-quality and appropriate to the mission through several College processes, including the Annual Report of Program Data (ARPD) and a cyclical five-year curriculum review process that includes review and approval of program and student learning outcomes. Discipline-based faculty document and review assessment methods in Taskstream (under Assessment Plan: Assessment Strategy), during the process of outcomes assessment (ER 11). Until fall 2016, the results of outcomes assessment were documented in Course Learning Reports, archived in digital and paper format in departmental folders and stored in the Academic Affairs office. Since that time, results are archived in Taskstream (Standing Requirements: Course Learning Reports) ([II.A.1-17](#)).

## ANALYSIS AND EVALUATION

Kapi‘olani Community College, as part of the University of Hawai‘i System, is a postsecondary higher education institution with an established curriculum and role as a two-year institution. All programs and courses go through a rigorous curriculum approval process. In accordance with the standard, all instructional programs, regardless of location or means of delivery, are offered in fields of study that align with the College’s mission, are appropriate to higher education, and culminate in achievement of student learning outcomes, degrees, certificates, employment, and transfer to other higher education programs.

---

**II.A.2. Faculty, including full-time, part-time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.**

---

## EVIDENCE OF MEETING THE STANDARD

Faculty ensure that the content and methods of instruction meet academic and professional standards and expectations by systematic evaluation and improvement of their courses, programs, and related services to assure currency, improved strategies, and promotion of student success.

### *Content and Methods of Teaching*

The College’s faculty are responsible for ensuring that the content of all credit courses and certificate and degree programs, including career and technical education and distance education, meet accepted academic and professional standards and expectations. In order to manage this process, faculty use the Quali Student Curriculum Management System (KSCM, [II.A.2-1](#)). Faculty input data such as course title, course description, content, contact hours, type of course (e.g., lecture, lab, clinical), student learning outcomes, methods of instruction, methods of evaluation, texts/materials, requisites, and recommended preparation into KSCM.

Data from KSCM are used to program the STAR GPS registration pathway. The College's Faculty Senate Curriculum Committee provides training materials with guidelines for faculty submitting their course and program proposals ([II.A.2-2](#), [II.A.2-3](#)).

In addition, to ensure that course and program submissions meet accepted academic and professional standards and expectations, there are multiple layers of review, depending on the type of submission. Experimental courses go through three levels of review. New or revised courses go through ten levels of review. The approved course archived in KSCM becomes the official course outline of record and establishes the baseline standard for content, including SLOs, and methods of instruction and assessment for the course. New certificates and degree programs go through a more comprehensive and lengthy review and approval process.

The College's K5.201 Curriculum Review Guidelines and Timeline, Section E: Levels of Review, outlines the different levels of review according to the type of approval required ([II.A.2-4](#)). The KSCM built-in workflow shows the status of the course and/or program proposal's current level of review and approval status.

As evidenced in its meeting minutes and end-of-year reports ([II.A.2-5](#)), the Curriculum Committee conducts a thorough review of curriculum and carries out robust discussions about the quality of each course and program proposal. Once the Curriculum Committee approves curriculum, the appropriate program Dean, the Vice Chancellor for Academic Affairs, and the Chancellor also review and approve all curriculum submissions. New certificate and degree programs are reviewed and approved by the above entities, and final approval is given by the University of Hawai'i's Board of Regents ([II.A.2-6](#)). Extensive feedback, as needed, is provided at each level of review ([II.A.2-7](#)).

### ***Continuous and Systematic Improvement***

Faculty ensure currency and quality of their course and program content and delivery by submitting their programs and courses through the multi-level rigorous review and approval process at least once every five years, as stated in the College's K5.201 Curriculum Review Guidelines and Timeline, Section C: Currency of Curriculum ([II.A.2-8](#)).

Furthermore, faculty are required to regularly and systematically review their programs (both instructional and non-instructional) and services as part of their Annual Report of Program Data (ARPD) and their Comprehensive Program Review (CPR) processes, as established by UHCC Policy #5.202: Review of Established Programs ([II.A.2-9](#)) and the College's K5.202: Review of Established Programs ([II.A.2-10](#)). UHCC Policy #5.202 states that "[a]ll programs shall prepare annual reports documenting performance on agreed upon outcomes, key benchmarks, critical external factors, and planning improvements. All programs shall complete a comprehensive assessment at least once every five years in accordance with the schedule established by the College." Program deans are responsible for reviewing the effectiveness of the system Program Review process and recommending changes to improve the outcomes of the process. The Vice

Chancellors, deans, and/or program directors are responsible for reviewing the measures and content (e.g., program health indicators, benchmarks, recommendations for improvement, achievement of outcomes) of the program review in their respective areas and for ensuring that the review provides the information necessary for program assessment and improvement. Extensive feedback, as needed, is provided at all levels of review.

In both the ARPD and CPR processes, department chairs, program coordinators/directors, faculty, and, in applicable cases, advisory council and community members have rich dialog about best practices, current trends, up-to-date teaching and learning strategies, and improvements to promote program and student success. Feedback gathered from these discussions is used to inform program decisions reported in the CPRs. Examples include Library & Learning Resources ([II.A.2-11](#)); Medical Assisting Program ([II.A.2-12](#)); Student Affairs ([II.A.2-13](#)); and Natural Sciences ([II.A.2-14](#))

Two prime examples of informed program decisions resulting in curricular innovations and improvements are: (1) the redesign and integration of foundational English and math ([II.A.2-15](#)) and (2) the increased number of course sections using Open Educational Resources (OER) ([II.A.2-16](#)). Other curricular advancements that demonstrate the faculty commitment to continuous improvement and the promotion of student success are: (a) the creation of Advanced Professional Certificates in Culinary Arts, Hospitality Operations Management, and Information Technology ([II.A.2-17](#), p. 422, [II.A.2-18](#), p. 508, [II.A.2-19](#), p. 386); and (b) articulation agreements with four-year institutions to accept lower-division courses as equivalent to upper-division courses in the completion of baccalaureate degrees (KCC articulation agreements, [II.A.2-20](#)). All UH System articulation agreements are listed at the UH System website ([II.A.21](#)).

Furthermore, Executive Policy E5.209, UH System Transfer & Intercampus Articulation ([II.A.2-22](#)), ensures that the College's course, certificate and/or degree program articulation agreements across the UH system include sufficient content and length, and require appropriate levels of quality and rigor in recognized higher education field(s) of study. These requirements are vetted carefully before agreements are established. This process allows the College to keep certificate and degree programs current as fields of study evolve. Executive Policy E5.209 stipulates that each campus of the UH System has the authority and responsibility to determine its own curriculum, degree requirements, and related academic policies, and ensure the integrity of its campus-based credentials. As a result, each campus' unique curriculum reflects the needs of its community and the knowledge, skills, interests, and educational philosophy of its faculty, staff, and administration.

Finally, the College has a Faculty Development Council ([II.A.2-23](#)), where faculty can request funding for professional development training and opportunities to engage in deep

conversations about teaching and learning, and best practices with their local, national, and international colleagues. Other opportunities to improve courses include Creative Circles for Collaborative Change (C4wards, [II.A.2-24](#)), integrating Undergraduate Research Experiences (URE, [II.A.2-25](#)), Hawai'i place-based, culture-based learning ([II.A.2-26](#)), and Title III Consortium Fellowships ([II.A.2-27](#)).

## ANALYSIS AND EVALUATION

Faculty ensure that the content and methods of instruction meet academic and professional standards and expectations by systematic evaluation and improvement of their courses, programs, and related services to assure currency, improved strategies, and promotion of student success.

The College is widely and consistently engaged in dialog centered on the review and improvement of course and program curricula to meet academic and professional standards. Kualii Student Curriculum Management System (KSCM) and Taskstream currently serve as the College's repository of course and program descriptions, discussion of teaching methods, SLOs, PLOs, ILOs and assessment data on all courses and programs. An extensive review of course and program proposals includes scrutiny of the course description, content, contact hours, type of course, SLOs, methods of instruction, methods of evaluation, and texts/materials, along with rationale for proposal, resources needed, alignment with the College's Strategic Plan, and impact to other departments or programs. The review processes of the Annual Report of Program Data (ARPD) and Comprehensive Program Review (CPR) further provide for systematic evaluation and improvement of programs and services to ensure currency, improved strategies, and promotion of student success. Faculty receive extensive feedback at multiple levels, including the highest level from the University of Hawai'i's Board of Regents, when warranted, to ensure quality and the achievement of academic and professional standards and expectations.

---

**Standard II.A.3. The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.**

---

## EVIDENCE OF MEETING THE STANDARD

The College has established procedures to regularly identify and assess learning outcomes for courses, programs, certificates, and degrees. Course syllabi for students are created using the course outline of record. Officially approved course outlines of record include student learning outcomes for each course. Students in every class section receive a course syllabus that includes

learning outcomes which have been approved and archived in the Quali Student Curriculum Management system ([II.A.3-1](#)).

### ***Established Institutional Procedures***

The College has established policies and procedures for identifying and assessing learning outcomes at the course, program, certificate, and degree levels ([II.A.3-2](#); [II.A.3-3](#)). The College's Course Level Assessment Plan, originally approved in 2010, was updated and approved by the College's Faculty Senate on February 1, 2016 ([II.A.3-4](#)). Programs are assessed through established guidelines, and reports of the results of learning outcomes assessment are included in the Annual Reports of Program Data (ARPD) ([II.A.3-5](#)) and Comprehensive Program Reviews (CPRs) ([II.A.3-6](#)).

### ***Course Assessment***

At the course level, the College embraces assessment as a means to systematically examine the degree to which students attain the course learning outcomes as evidenced through demonstrated student learning. Faculty assess student performance using both indirect methods such as focus group interviews, student surveys, and course evaluations and direct methods such as exams, portfolios, essays, and performances; and then fine-tune aspects of the course/curriculum, when applicable, with the ultimate goal of improving overall educational quality and achieving improved student learning. Assessment results may suggest curriculum modifications, exploration of various pedagogical tasks, and/or adjustments to assessment practices. The end result is an iterative cycle of improvement. Courses complete an assessment cycle every five years ([II.A.3-7](#)).

In fall 2014, the College purchased Taskstream ([II.A.3-8](#)), a cloud-based assessment management system that includes an in-depth, customizable system to archive the results of student learning outcomes assessment. The College invested in Taskstream to better capture and effectively use assessment results in course and program improvements. Prior to Taskstream, the College collected assessment information (a) in Curriculum Central (the College's former curriculum management system, [II.A.3-9](#)) and (b) in MS Word documents, which were archived on department repository sites. Consequently, both avenues resulted in assessment information remaining static. Both methods for archiving the results of learning outcomes assessment are described below.

Prior to Taskstream, faculty completed their Course Learning Reports (CLRs) and Course Assessment Plans (CAPs) for all active courses in MS Word documents. The CLRs on file for each course are in accordance with the plan laid out in the CAP. CAP and CLR information is reflected in each department's Learning and Assessment Schedule and Report ([II.A.3-10](#)) Completion and submission of these reports conformed to a schedule ([II.A.3-11](#)).

Department chairs and/or program/discipline coordinators ensured that faculty members responsible for assessing learning outcomes in their courses had a CAP and that they followed the plan outlined in it, as well as a CLR (when applicable) on file.

Program/discipline faculty chose from several options delineated in the Course Level Assessment Plan. In addition, faculty followed a six-step assessment process for each course learning outcome ([II.A.3-12](#)).

Currently, faculty are at different stages in using Taskstream. Some are (a) inputting their course and program information directly into this new system, (b) linking their SLOs to their assessment methods, and (c) mapping their SLOs to PLOs. Others are developing their assessment plans, reviewing their results, and implementing improvement strategies to increase student success.

As discussed in Standard II.A.2, the College has a multi-level process to review course proposals that must include SLOs in order to be approved by the department, Curriculum Committee, Faculty Senate, administrators, and if applicable, other key entities (e.g., Foundations Board, General Education Board, and External Advisory Committee).

Course SLOs are stated on course syllabi ([II.A.3-13](#)) and are also housed in Quali Student Curriculum Management, the College's curriculum management system ([II.A.3-14](#)). Course syllabi for students are created using the course outline of record. These outlines establish the baseline standard for content, including SLOs, and methods of instruction and assessment for all courses. In most career and technical education programs, the content and outcomes included in course outlines are aligned with the accreditation standards of their respective professional agencies.

Through Taskstream, faculty are aligning their instructional strategies and methods of evaluation to course SLOs, PLOs, general education outcomes, and ILOs ([II.A.3-15](#)). As faculty create and examine this alignment, they are able to see if their methods are sound or if improvements need to be made prior to implementation. Once implemented, the improvements can be measured for their effectiveness.

### ***Program Assessment***

UHCC Policy 5.202 requires that programs (a) assess whether or not students are meeting program outcomes, accompanied by a summary of evidence; (b) analyze degree completion and retention data with actions to increase these areas, if warranted; (c) report performance on outcomes, key benchmarks, external factors, and plans for improvement; and (d) examine quality of program indicators (e.g., student performance on external exams, alignment with economic demand, student employer satisfaction). All programs are required to complete an annual report of program data and performance on the above areas and a comprehensive program review every three years ([II.A.3-16](#)).

### ***Degree Assessment***

The College offers both associate in science and associate in arts degrees. The current degree outcomes for the two associate in arts degrees, Liberal Arts and Hawaiian Studies, correspond to the existing General Education outcomes, scheduled to be reviewed as part of the Quality Focus Essay. The mapping of course and program outcomes to General Education outcomes was completed in Curriculum Central, the previous curriculum management system. To minimize unnecessary duplication of effort, faculty were not required to transfer this mapping to Taskstream. Rather, the mapping and subsequent assessment will be undertaken based on the revised, not current, General Education outcomes.

The associate in science degree outcomes include five skills that mirror the General Education outcomes plus two outcomes specific to career and technical education programs: recognize relevance of career choices to lifelong learning and demonstrate competence in a selected program of study ([II.A.3-17](#), p. 76). These degree outcomes, too, will be revised and input into Taskstream, thereby making possible the mapping from course and program outcomes and the reporting of assessment.

### ***Acting on Findings***

At both the course and program levels, all department and discipline faculty are responsible for (a) collaboratively developing learning outcomes, (b) creating and implementing plans and methods for assessment, (c) assessing student achievement of outcomes, (c) dialoguing about the results, and (d) generating and carrying out improvement strategies to increase student success. Learning outcomes are measured using a wide variety of assessment methods such as research assignments, field projects, presentations, demonstrations, portfolios, and examinations. While faculty continually engage in assessing student learning, as stated earlier, assessment occurs on a five-year cycle, with emphasis on the development and implementation of improvement strategies to increase student success. Assessment results are also used to inform program reviews ([II.A.3-18](#)).

## **ANALYSIS AND EVALUATION**

The College has established procedures to regularly identify and assess learning outcomes for courses, programs, certificates, and degrees. Officially approved current course outlines of record include student learning outcomes for each course. Every class section receives a course syllabus that includes learning outcomes from the College's approved course outlines of record ([II.A.3-19](#), [II.A.3-20](#)). All course SLOs are also published in the College's catalog.

Kapi'olani Community College recognizes its role to maximize student learning and achievement in fulfillment of its mission. The College has identified two action projects in the Quality Focus Essay (Assessment and Engagement) that are designed to augment the access to and review of student learning findings as well as to augment engagement with the institution to

develop non-classroom student connections. Both action projects are framed in the College's existing student success pathways initiative.

---

**II.A.4. If the institution offers pre-collegiate level curriculum it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.**

---

#### EVIDENCE OF MEETING THE STANDARD

The College distinguishes pre-collegiate level curriculum and provides students with the necessary knowledge, skills, and supports to progress and successfully complete the college-level curriculum.

##### *Helping Students Become College Ready*

UHCC Policy 5.300 ([II.A.4-1](#)) distinguishes pre-collegiate level curriculum (not transferable to the baccalaureate level) from college-level curriculum through its required Course Numbering Convention. Courses numbered 1-99 are considered to be pre-collegiate. This system policy facilitates transparency and promotes standardization of course numbering across the UH Community Colleges. The College's catalog also indicates pre-collegiate curriculum from college-level curriculum through its course-numbering system. Since its inception, the College has continually focused on serving pre-college students, specifically in English and math. Students placing into a pre-college English or math course were required to complete one or two levels of courses before entering a college-level English or math course, depending on their scores on a standardized placement test. For example, if a student placed two levels below college on the math placement test, he/she would need to successfully complete MATH 24 and MATH 25 before taking MATH 100 or higher. Reports on this practice indicated (1) students were taking pre-college courses multiple times before passing and (2) the student rate of persisting to a college-level English and math course was consistently very low ([II.A.4-2](#)). In addition, pre-collegiate courses were not coordinated across the UH system with common course titles, numbering, and learning outcomes.

In summer 2015, the UH Community College system made the decision to adopt a co-requisite model where pre-collegiate courses were combined to reduce the levels or offered as co-requisites to the college-level course with additional support for students. To better integrate the new pre-collegiate and collegiate course delivery options, the College dissolved its pre-college department, Kahikoluamea, and re-integrated faculty teaching foundational math and English back into the math/sciences and English departments. In addition, the UHCC system ([II.A.4-3](#)) worked on English ([II.A.4-4](#)) and math ([II.A.4-5](#)) models to standardize course titles, numbers, and SLOs.

### ***Movement Toward a Co-requisite Model: Supporting Students in Succeeding in College-level Curriculum***

UHCC Policy 5.213 provides guidelines and practices to help students succeed in college-level courses through co-requisite models, thereby shortening the time to completion ([II.A.4-6](#)). The policy requires that students complete college-level English and math within their first 30 credits. In fall 2016, the College implemented an accelerated, co-requisite model. Students are now able to complete developmental and college-level courses within one year if they were placed two levels below college or within one semester if they were placed one level below college. English and math faculty across the UHCC system worked toward adopting the same course titles, numbers, and learning outcomes. Furthermore, faculty across the system agreed to new options for placement. Accuplacer replaced COMPASS at the end of 2016 as the standardized testing instrument, and multiple placement options were introduced (e.g. high school GPA, course grades in selected high school courses). These multiple options made it possible for colleges to select the option that most benefited students' placement levels ([II.A.4-7](#), [II.A.4-8](#)).

The credit hours for co-requisite courses are determined in the same way as college-level courses. To better support successful student completion of the co-requisite courses and the implementation of the English and math models, all co-requisite courses are offered face to face. Students registering for courses during their first 30 credits will be automatically advised by the STAR system to take the appropriate math and English courses. In addition, faculty and staff who coordinate New Student Orientations and First Year Experience help with dissemination of this information. Counselors also meet with students to assist them to fulfill their academic priorities in the most efficient manner.

### **ANALYSIS AND EVALUATION**

The College distinguishes pre-collegiate level curriculum and provides students with the necessary knowledge, skills, and supports to progress and successfully complete the college-level curriculum. The College has examined relevant data on college readiness and has an established pre-collegiate curriculum in math and English. Given the high percentage of students arriving at the institution not ready to complete college level work, the College devotes an appropriate number of its course offerings each semester to enroll all students at their various points on the completion pathway. To supplement the co-requisite courses offered, the College offers wide and varied tutorial and other support for students.

---

**II.A.5. The institution’s degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)**

---

## EVIDENCE OF MEETING THE STANDARD

### *Appropriate Length, Breadth and Depth*

UHCCP 5.203 Program Credentials: Degrees and Certificates ([II.A.5-1](#)) ensures that all degrees require a minimum of 60 baccalaureate-level credits and that high-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all program credentials. This system-wide policy also sets credit requirements for various certificates. UHCC Policy 5.200: General Education ensures that all programs include a breadth of knowledge, regardless of mode of delivery, requiring a minimum of 15 credits of General Education, consisting of one course in each of the following areas: communication, quantitative reasoning, arts and humanities, natural sciences, and social sciences ([II.A.5-2](#)). Associate in Arts degrees consist almost entirely of General Education courses, with 12 credits in the Foundation areas (writing, quantitative reasoning, and global-multicultural issues), as well as 19 credits in three major discipline areas: arts and humanities (6 credits), natural sciences (7 credits) and social sciences (6 credits). Furthermore, all two-year degrees include introductory-level courses numbered 100-199 which, in most cases, serve as prerequisites for 200-level courses, and allow students to develop their depth of knowledge in the disciplines. For students to gain further depth of knowledge in a particular area, all degree programs other than consist of a focused study in at least one area of inquiry.

In addition to attaining general education competencies, students completing career and technical education degrees will have demonstrated technical and professional competencies that meet employment and other applicable standards and will be prepared for external licensure and certification as appropriate to the area. All of the College’s career and technical education programs are accredited or endorsed by professional agencies, except for New Media Arts, for which there is no accrediting agency, but which is in compliance with the above policies. These professional organizations prescribe the length, breadth and depth of degrees and programs to meet industry and professional standards.

### *Rigor, Sequencing, and Time to Completion*

In terms of rigor, the College’s associate degrees and certificates require a cumulative 2.0 GPR (grade point ratio) or higher, in accordance with UHCC Policy 5.203. Degrees require that students must earn a “C” or higher in each major course required for the degree. Faculty

evaluate student work for all degrees and certificates to confirm that course and program learning outcomes have been met ([II.A.5-3](#)). Semester credits or equivalent, course sequencing, and length/time requirements for each degree and certificate program are maintained in the College's curriculum management system (see Standard II.A.2) and published in the College's catalog ([II.A.5-4](#)). The College does not offer baccalaureate degrees.

The College's multi-level and rigorous development, review, and approval process, facilitated by the College's Faculty Senate Curriculum Committee, ensures that all courses, degrees, and programs are developed by faculty experts in the discipline as well as other key stakeholders (e.g., advisory board members, external accrediting bodies, administrators). This extensive review informs discussion through each level of the process regarding appropriate content, outcomes, assessment methods, and rigor. Instructional and evaluation methods, as well as course sequencing in program proposals, are also thoroughly examined (see Standard II.A.2 for details).

The review and approval process is the same for all modes of delivery. Department chairs and faculty members discuss and determine whether courses and programs are appropriate to be offered in distance education (DE) mode, using a set of suggested procedures and a DE Eligibility Worksheet, approved by the Faculty Senate DE Committee in fall 2017 ([II.A.5-5](#)). The College's Teaching Online Preparation Program (TOPP, see II.A.7) requires faculty to include a set of quality measures in the course before it is offered in this delivery method ([II.A.5-6](#)).

The College's General Education Board, in collaboration with department faculty and the Curriculum Committee, ensures compliance with ER 12 (General Education) by verifying that all degree programs integrate a substantial component of general education that (a) fosters breadth of knowledge and stimulates intellectual inquiry, (b) explores fundamental areas of knowledge, and (c) encompasses levels of quality and rigor appropriate to higher education ([II.A.5-7](#)).

Recent implementation of the STAR GPS registration system required a thorough analysis of course sequencing in all the two-year degree programs. From 2014-2016, instructional and counseling faculty collaborated to review each two-year degree to detail the course sequences, semester-by-semester, that will optimize student completion of degrees and certificates in a timely manner. These detailed plans were then formalized into rules and input into the STAR program, which now directs students' choices of courses when they register. The choices presented to students are determined by the optimal sequences developed by faculty.

The College strives to be sure that students are aware of the processes necessary to complete their program of choice. This support begins with the College's New Student Orientation ([II.A.5-8](#)) and specific program orientations/informational sessions ([II.A.5-9](#); [II.A.5-10](#), [II.A.5-11](#)), and is ongoing throughout the students' journey via support and guidance from faculty,

counselors ([II.A.5-12](#)), staff, student handbooks ([II.A.5-13](#)), advising sheets ([II.A.5-14](#)), peer mentorship ([II.A.5-15](#)), and transfer workshops ([II.A.5-16](#)).

### *Synthesis of Learning*

For students in the Associate in Arts degree programs, the synthesis of learning is best seen in the assignments and evaluations designed in the 200-level courses, where students are expected to apply the general concepts learned in the introductory courses to the more specific disciplinary knowledge presented in the sophomore-level courses.

All associate in science degrees in the Career and Technical Education (CTE) disciplines require at least one course that allows students to demonstrate mastery of the program learning outcomes and synthesize the learning they have attained in individual courses. For all CTE programs, this course is an internship, clinical placement or practicum. In internships, students are placed in industry settings, where industry professionals assess and evaluate students' attainment of program outcomes. For students in the health academic programs, the synthesis of learning is evidenced in clinical placements. In some programs, such as nursing and respiratory care, instructional faculty are onsite with students at all times. In other disciplines, students are in the workplace, guided by preceptors. In all instances, an industry professional evaluates the students' performance. This evaluation is a factor in determining the students' overall performance in that course.

## STEM FOR ALL

The disparity for women and select ethnicities within STEM fields is pervasive and systemic. Recognizing the complexity and scope of this national problem, the College has taken continuous and incremental action to remove barriers to STEM fields. Kapi'olani CC provides a wide range of in-class and extramural undergraduate research experiences (UREs), accompanied by subsequent presentation and travel support throughout the science disciplines.

In 2006, the College created an ongoing Summer Bridge Program focused on building college-level math skills. Students become immersed in multidisciplinary science projects with the expectation that they will exit the program more skilled and confident in pursuing extramural research, eager to continue their success in a STEM pathway. Robin Kaai, a Native Hawaiian student, is one of many memorable graduates of the program.

After gaining lab bench skills, Robin joined the campus Biotechnology Research Team with both confidence and trepidation. He found supportive student and faculty mentors quickly, and the next year he was asked to screen viruses in search of mouse-free antibodies. Within just one year, Robin was presenting his research at local and national science conferences. The culmination of his work, and his masterful articulation of it, led to two separate awards while competing against four-year student challengers across the UH System. He then accepted an internship at the National Institutes of Health.

Robin has since finished undergraduate school and is working in the health field while applying to medical school. He attends weekly campus research meetings during which he mentors students who are now in his place, thus giving back to his community. STEM students across the disciplines emulate Robin and inspire others in turn to strive for the highest and to become leaders in their fields. turn to strive for the highest and to become leaders in their fields.

## ANALYSIS AND EVALUATION

The College's degrees and programs follow practices common to higher education that include appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The College ensures that the minimum requirement for an associate degree is 60 semester credits or equivalent.

All courses and programs are generated and implemented by faculty with expertise in relevant disciplines. The College's Faculty Senate Curriculum Committee reviews and approves new courses and programs against criteria that verify learning outcomes, robustness of study, and assessment measures.

---

**II.A.6. The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)**

---

## EVIDENCE OF MEETING THE STANDARD

The College's courses are scheduled in a systematic way to support students in completing their certificate and degree programs in a timely manner.

The established curricula in the College's associate degree and certificate programs prescribe the optimal sequence of courses to promote timely completion. These sequences are programmed into the STAR Guided Pathway System ([II.A.6-1](#)) and are presented to students as they register. Academic planning with campus counselors, academic advisors, and program directors assists students in following these pathways toward completion for a certificate and/or degree program. All students enrolled in programs in Health Sciences, Nursing, and Emergency Medical Services enroll full time and follow established sequences for each semester, which, for most programs, also includes summer.

While the courses in the Arts and Sciences programs are sequenced and programmed into the STAR Guided Pathway System, department chairs have flexibility in course offerings and the students have more flexibility in course-taking sequences. The department chairs in this unit rely on course-taking patterns from prior semesters and closely monitor enrollment during the registration period to adjust course offerings, as needed. The department chairs and deans are provided with enrollment data in real time on the number of students who are waitlisted for classes and the sections that are seeing soft enrollments. The information allows them to make adjustments to open up new sections, combine sections, and cancel sections, helping them to optimize the use of facilities as well as instructional staffing and to clear any barriers to timely completion of degrees and certificates. If students are not able to take one or more courses that are programmed into the STAR Guided Pathway System (GPS), they are able to switch with other courses within their pathway and the STAR GPS system will adjust all future semester

course plans for that student to account for the change.

In addition, to promote students' progress to timely completion, the College offers accelerated course sequencing. For example, to assist Science, Technology, Engineering and Math (STEM) majors to complete the math requirements, the College offers accelerated math courses, scheduling sections of sequential courses in eight-week modules rather than 16-week semester-long courses. The faculty have also initiated an even more accelerated schedule: three courses (MATH 103, 135 and 140) in one 16-week semester to allow students to prepare for calculus the following semester. Accelerated course sequencing is also a feature of some language offerings. For example, students enrolled in American Sign Language have the option to complete a 101 and 102 sequence in the fall term, and a 201 and 202 sequence in the spring term, thereby completing their two-course Associate in Arts language requirement in their first semester, and the four-course language requirement in some baccalaureate degrees at the University of Hawai'i at Mānoa in one academic year ([II.A.6-2](#)).

To accommodate various students' different situations, the College offers face-to-face, hybrid, and online classes, as well as classes in the evenings in certain high-demand areas. In addition to offerings in the regular fall and spring academic semesters, the College offers high-demand courses in two six-week summer sessions.

In 2016, the College, along with the other University of Hawai'i community colleges, utilized Ad Astra to complete an analysis of facilities utilization and course scheduling based on room functionality and capacity, classes scheduled in the rooms, and course offerings over a one-year period. The results of Ad Astra's data analysis were presented to department chairs and administrators ([II.A.6-3](#)). For example, in 2016, Ad Astra findings indicated that course offerings fell within acceptable standards and did not create barriers to completion. However, the data showed that room utilization "could be improved upon." Room use during primetime scheduling was at capacity, and the recommendation was to offer more evening classes. To address this recommendation, the College maintained its current evening schedule, but distributed its instruction by increasing the offerings of online classes. According to Ad Astra's analysis, a number of classes did not follow the predominant schedule blocks, and this "off-grid scheduling" was creating "moderate" waste. Thus, to eliminate "waste," the department chairs reviewed their schedules to ensure that the majority of three-credit lecture classes and lab classes began/ended within the established scheduling blocks. However, given the nature of some classes such as extended culinary labs and English for Speakers of Other Languages (ESOL) classes, "off-grid scheduling" could not be completely eliminated.

## **ANALYSIS AND EVALUATION**

The College's courses are scheduled in a systematic way to support students in completing their certificate and degree programs in a timely manner. The College's student success pathway

efforts are taking steps to minimize the time to degree and to accelerate progress from pre-collegiate to college-level work. The patterns on how students choose courses, enrollment trends, and degree requirements are reviewed regularly by Department Chairs, Deans, and the Vice Chancellor for Academic Affairs. Schedules are reviewed and adjusted accordingly, and student needs are paramount when generating new class schedules.

---

**II.A.7. The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.**

---

### EVIDENCE OF MEETING THE STANDARD

The College's 2015-2021 Strategic Plan ([II.A.7-1](#)) reflects a commitment to closing the achievement gaps for certain identified populations: Native Hawaiians, Pacific Islanders, Filipinos, and Pell recipients. The Strategic Plan also illustrates a clear focus on improving the access and success of certain demographic groups, such as recent high school students and working adults. The College utilizes multiple delivery teaching methods and learning support services to provide equity in success for all students.

#### *Delivery Modes*

The College offers various delivery modes to address student access to learning. The same course may be offered face-to-face, online or as a hybrid course. In certain programs, face-to-face courses are offered in various geographic locations. For example, the College's Nursing program is offered at Leeward Community College for the convenience of students on the west side of the island. Emergency Medical Services programs are regularly offered at Maui College and Hawai'i Community College, and at Kauai Community College, as needed.

Another offsite delivery method is the College's Kuilei Outreach Program, an early college dual-credit program that provides an opportunity for high school students to earn both high school and college credits simultaneously. It allows students to graduate with college credits, better prepares them for the rigors of college/university coursework, and shortens the duration in obtaining a degree post high school graduation. Currently, agreements have been created with several public schools (Kaimuki High School, Kalani High School, Radford High School), a private school (Kamehameha Schools-Kapalama Campus), and a Hawaiian immersion school (Kula Kaiapuni 'O Ānuenuē).

All of the College's Career and Technical Education (CTE) programs deliver instruction via work-based learning approaches such as internships, practica, and clinicals. As research has shown, internships are key to building experience for a student or recent graduate. Internships

provide an opportunity for the student to learn more about the field or industry and apply theories and concepts learned in the classroom to real life situations. Employers are much more likely to hire someone with internship and work experience. Students may learn about internship opportunities through the Employment Prep Center ([II.A.7-2](#)) and programs such as Kulia ma Kapi‘olani, which assists Native Hawaiian students who are pursuing degrees in CTE programs to both graduate and find employment in their chosen fields ([II.A.7-3](#)). Several programs, mostly in Health Sciences and Nursing, require a practicum or clinicals as a fulfillment of the associate degree.

The College has a significant population of Generation Z and Y students, who often have high levels of technological fluency. These students are also taking classes alongside students who are parents, students who are challenged by long commutes to school, and students who are working part-time and full-time jobs. To address students’ needs, the College has developed both online and hybrid courses. In fall 2016, the College developed its first Distance Education Plan in response to a recommendation from the Faculty Senate to the Interim Chancellor to coordinate a systemic improvement of distance education. An interim Distance Education Coordinator was appointed. One focus of the College’s Distance Education Plan, endorsed at the Chancellor’s Advisory Council meeting on May 2, 2017 ([II.A.7-4](#)), was a need for professional development in online pedagogy. To respond to this identified need, the campus developed the Teaching Online Preparation Program ([II.A.7-5](#)) for faculty who are teaching online for the first time. Another focus was to increase the support for online students as their needs are distinct in many ways from face-to-face students through the development of “Success for Online Learners” or SOL program ([II.A.7-6](#), see III.A.14).

### ***Teaching Methodologies***

Many faculty use high-impact practices including ‘āina-based (culture-based) learning, gamification of courses, undergraduate research, flipped classroom, and service learning as teaching methodologies, in order to further encourage student engagement.

An example of ‘āina-based learning is the College’s ProjectOLONā, an intensive six-week summer bridge program for recent Hawai‘i high school graduates interested in exploring careers in Science, Technology, Engineering, and Mathematics (STEM). To help students establish a strong math and science foundation, students are mentored by college faculty and student peers in a supportive and engaging environment. The program encourages ‘āina-based learning through perpetuation of Hawaiian culture and values along with studying Ho‘ohuihui La‘au (Medicinal Plants). ProjectOLONā also helps to close Native Hawaiian student success gaps in all STEM degrees and certificates and four-year transfers ([II.A.7-7](#), [II.A.7-8](#)).

Gamification, the integration of game elements into non-game experiences to influence end-use behavior, is a strategy that is being implemented at the College. Faculty in several departments including Hospitality and Languages, Linguistics and Literature have designed and tested gamification features for instruction and student support services. These tools have been

employed in highly contextualized web-based learning environments using virtual worlds and web-based applications ([II.A.7-9](#)).

Since fall 2014, undergraduate research has been an active teaching methodology for science faculty, and recently has been used by faculty in other disciplines, even in courses not usually associated with the application of the scientific method. This methodology provides students the opportunity to interact closely with faculty, work with peers who share their passion for active learning, and in some cases, develop industry or community connections. At the end of the semester, students' work culminates with a poster session where students present their research to the campus. In fall 2017, students from STEM, English, Communications, Economics, Health Sciences and Project Olonā participated in this event ([II.A.7-10](#)).

Flipped classroom is an instructional strategy and a type of blended learning that reverses the traditional learning environment by delivering instructional content, often online, outside of the classroom. It moves activities, including those that may have traditionally been considered homework, into the classroom. Zoology, dental assisting, linguistics, nursing, and psychology faculty, among others, have successfully flipped their classrooms ([II.A.7-11](#)). The College has a Flipping C4ward group (professional development community of practice) ([II.A.7-12](#), see II.A.2) that consists of faculty who already use or are interested in flipping their classrooms. They meet regularly to discuss the benefits and challenges of this teaching/delivery approach.

Service learning is a teaching and learning method that integrates critical reflection and meaningful service in the community with academic learning, personal growth and civic responsibility. The Service-Learning Pathways' mission is to reduce the severity of social problems facing Hawai'i's local communities. From 1995 to May 2017, 12,883 Kapi'olani Community College students contributed 289,879 hours to the community, averaging 22.5 hours per student ([II.A.7-13](#), [II.A.7-14](#)).

### ***Learning Support Services***

The College provides learning support services to address the changing needs of students in support of equity in success for all students. For example, the College's newly renovated Learning Center and the STEM Center provide on-campus students face-to-face tutoring (see II.B). Live tutors are available in Math, Writing, Reading, Introductory Anatomy & Physiology, Nursing, Biology, Chemistry, Physics, Organic Chemistry, Introductory Accounting, Economics, Finance, Statistics, and Spanish. For off-campus and online learners, Brainfuse provides 24/7 online tutoring services for all students at no charge to them. More than 4,000 students per year take advantage of the Brainfuse tutoring service.

The College provides learning support services through a number of different programs such as the Disability Support Services Office, TRiO, the Student Parents program, Honda International Center, and the Military Veterans Program (see II.C). In addition, the College addresses the diverse needs of its student population through unique programs such as the Lunalilo Scholars

Program, which provides opportunities for transformative college experiences for students who have not considered higher education as a viable alternative because of financial or other barriers limiting college access. The Kapo‘oloku Program for Native Hawaiian Success and Kulia ma Kapi‘olani, a Native Hawaiian Career and Technical Education project, focus on learning support for the Native Hawaiian student population. For example, students in Kulia ma Kapi‘olani are eligible to receive funding for off-campus experiential opportunities where they can expand their knowledge of themselves and their chosen majors by attending conferences, workshops, and seminars.

## ANALYSIS AND EVALUATION

The College utilizes multiple delivery modes, teaching methods and learning support services to support the diverse and changing needs of all students and enhance success for all students.

Kapi‘olani Community College has identified multiple target populations including Native Hawaiian, Pacific Island, and Filipino students, underserved, high school students, and the working adult.

The College utilizes face-to-face, distance education (DE), and hybrid delivery as its main delivery methods. With the rapidly growing DE modality, the College’s TOPP program supports faculty in meeting the needs of online learners by ensuring effectiveness of course delivery. Brainfuse provides 24/7 support for online learners and for all students who are unable to utilize the face-to-face tutoring services.

The College provides support for utilizing high impact practices including ‘āina-based (culture-based) learning , service learning, flipped classrooms, gamification, and summer bridge programs.

---

**II.A.8. The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.**

---

## EVIDENCE OF MEETING THE STANDARD

The College does not use any departmentwide course and/or program examinations. However, the College’s Career and Technical Education (CTE) Programs do offer students the opportunity to take external industry qualifying (practice) examinations to prepare for licensure or certification, but these do not affect students’ placements. CTE national certification program examinations are validated and quality controlled by each of their accreditation boards and requirements. Program examinations for certifications or licensures are dictated by program

accreditors and developed by nationally certified test boards. Students in CTE programs are required to take their program examinations at nationally certified test centers. These boards and centers follow strict guidelines to ensure validity and reliability, and to reduce test biases.

The College follows UHCC Policy #5.302 Assessment of Prior Learning ([II.A.8-1](#)) in awarding college credit for students' prior learning experiences. Two options have been primarily used: (1) examinations based on course content and (2) a rubric-based review and assessment of a portfolio submitted by the applicant. Both options determine the attainment of the course learning outcomes for which the student is seeking credit, and information is on the website ([II.A.8-2](#)) and in the catalog ([II.A.8-3](#), p. 55).

## ANALYSIS AND EVALUATION

The College does not offer departmentwide course and/or program examinations. The College follows UHCC policy in awarding college credit for students' prior learning experiences. Prior learning is assessed on a case-by-case basis by College faculty in the relevant programs.

---

**II.A.9. The institution awards credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)**

---

## EVIDENCE OF MEETING THE STANDARD

The College awards credit, degrees, and certificates based on student attainment of learning outcomes; units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. The College offers a number of courses based on clock hours, following federal standards for clock-to-credit hour conversions.

### ***Awarding Credit, Degrees, and Certificates based on Student Attainment of Learning Outcomes***

All certificates and degrees have learning outcomes that are tied directly to course outcomes. Students must demonstrate a satisfactory attainment of the course learning outcomes to pass the course and thus to pass the program.

The issuance of an Associate degree requires that the student must earn a cumulative grade point ratio (GPR) of 2.0 or higher for all transfer-level courses applicable toward the degree. In addition, a grade of "C" or higher is required in all courses required for the specific program.

Faculty are required to include the course Student Learning Outcomes (SLOs) in their syllabi, corresponding to the outcomes in the approved course outline of record, and to develop assignments that directly assess the SLOs. Faculty assess the achievement of course SLOs through a variety of assessment methods such as exams, quizzes, presentations, demonstrations, essays, journals, and field work and assign an appropriate letter grade or other grading option(s) (see II.A.1). Capstone courses, practica, internships, advanced clinical/field courses, or externships provide a culminating experience for students to effectively demonstrate the culmination of knowledge, skills, and dispositions gained in various degree and certificate programs such as New Media Arts (ART 293/294), Medical Assisting (MEDA 215), Informational Technology (ITS 293), Occupational Therapy Assistant (OTA 270/271), Dental Assisting (DENT 208), and Education (ED 294). ([II.A.9-1](#), ART 293, p. 108; MEDA 215, p. 270, ITS 293, p. 228) (ER 10)

Instructors provide grades for each assessment activity culminating into one final course grade that is posted through the students' portal in STAR (see II.A.5). Faculty create course and program proposals, including the associated learning outcomes, that are vetted through a multi-layer review and approval process supported by the College's curriculum management system ([II.A.9-1](#)). Related assessment methods and results of the assessment are documented in Taskstream ([II.A.9-2](#)). Students who successfully achieve the course learning outcomes through completion of course assignments and other assessment instruments earn credit for the course. Because course SLOs are mapped to program SLOs, students who successfully earn credit in required courses will ultimately meet the program learning outcomes and earn their degrees and certificates. These practices are consistent with current accepted norms in higher education.

The College's catalog ([II.A.9-3](#), p. 60) outlines policies for grading and the awarding of degrees and certificates based on attainment of learning outcomes. The standard A-F grading scale, used in most classes to designate a student's level of achievement, can be found in the College's catalog on page 61. In place of a letter grade, credit/no credit (CR/NC) is sometimes an option, provided the course is not part of general education and major requirements. Some of the required courses have mandatory credit/no credit grading, e.g. EMT 110 (emergency medical technician internship) and EMT 193 (emergency medical technician intermediate internship.) The CR grade is the equivalent of a "C" or higher; however, CR/NC grades are not included in the grade point ratio. Pass/fail options can be used for pre-collegiate courses. All students are provided with appropriate information regarding the awarding of academic credit via the College's catalog and other avenues (e.g., advising sheets, counseling sessions, course syllabi).

### *Units of Credit*

To comply with federal standards and to align with generally accepted practices for degree-granting institutions of higher education, the College follows UH System Executive Policy EP 5.228 ([II.A.9-4](#)) and UHCC Policy 5.228 ([II.A.9-5](#)), which clearly define units of credits and the process by which such credits are awarded. These policies ensure “reliability and accuracy of the assignment of credit hours to activities earning academic credit” (p. 1). These policies are consistent with the Carnegie unit model, which is generally accepted in higher education.

In accordance with UHCC Policy 5.228, a credit is defined as “45 hours of direct and indirect instructional, student work within a standard semester or equivalent term of study (accelerated terms, summer terms, etc.)” (p. 2). In general, this reflects the expected work a student, prepared for the class, would need to achieve the intended student learning outcomes.

In the process of curriculum review, proposers must provide information on the course credits, instructional method, and number of contact hours. During the review process, reviewers ensure that the credit-to-contact hour ratio when measured against the instructional method conforms to the following formula ([II.A.9-6](#), p. 52):

1 credit = 1 hour of lecture per week in a 16-week semester

1 credit = 2 hours of lecture/lab per week in a 16-week semester

1 credit = 3 hours of lab per week in a 16-week semester

1 credit = 3-4 hours of clinical per week in a 16-week semester

### *Federal Standards for Clock-to-Credit-Hour Conversions*

Certain programs include courses that have been designed to follow federal standards for clock-to-credit-hour conversions. These are typically internships, practica or clinical courses such as Respiratory Care (RESP 222), Mobile Intensive Care Technician (MICT 330), Physical Therapy Assistant (PTA 252), and Medical Laboratory Technician (MLT 242). Federal regulations require that one semester/trimester credit hour is equal to at least 37.5 clock hours of instruction ([II.A.9-7](#)). The College exceeds federal standards as most courses that are based on clock hours actually conform to the formula used for classroom-delivered lab courses, where one credit is equivalent to approximately 45 hours of instruction over the 16-week semester.

## **ANALYSIS AND EVALUATION**

The College awards credit, degrees, and certificates based on student attainment of learning outcomes; units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. The College offers courses based on clock hours, following federal standards for clock-to-credit hour conversions. However, the College

exceeds federal standards as most courses conform to the formula used for classroom-delivered lab courses.

---

**Standard II.A.10. The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)**

---

### **EVIDENCE OF MEETING THE STANDARD**

The institution has clear transfer-of-credit policies and articulation agreements that certify that the learning outcomes for transferred courses are comparable to its own courses and appropriate to its mission. Additionally, the university prioritizes and integrates systemwide articulation and transferability in all academic planning as described in the UH System Integrated Academic & Facilities Plan ([II.A.10-1](#), p. 2).

#### ***Transfer-of-Credit Policies and Communication with Students***

The College's Kekaulike Information and Service Center (KISC), in consultation with faculty discipline experts, counselors, program coordinators, and/or department chairs, is primarily responsible for evaluating transfer credits in accordance with system policies and procedures, expected comparable learning outcomes, as well as generally accepted practices in higher education. Transfer students complete a Transcript Evaluation Request Form to start the transfer-of-credit process ([II.A.10-2](#)). All evaluated and accepted transfer credits are then recorded in the students' Banner academic record to facilitate the mobility of students without penalty within the University of Hawai'i system and other higher education institutions. Executive Memorandum No. 06-05, Updated Executive Policy E5.209: Student Transfer and Inter-Campus Articulation ([II.A.10-3](#)), Memorandum of Agreement Transfer of General Education Core Requirements ([II.A.10-4](#)), and the University of Hawai'i System Course Transfer Database ([II.A.10-5](#)) guide the awarding of course credit, degrees and certificates. This searchable Course Transfer Database contains course equivalencies/evaluations for all UH campuses, as well as other colleges and universities. Using this database, students are able to discern if the courses they have taken at another college or university are transferable to the UH system and whether or not the transferred course meets degree requirements or is equivalent to a UH course. While only a guide, since transferability of any course is not guaranteed until an official transfer of credit is completed, this database assists students' decisions regarding transfer and time to certificate/degree completion.

The College accepts credits only from institutions fully accredited by U.S. regional accrediting associations, providing that such credits are substantially equivalent to courses at the College. Credits earned at institutions accredited by other recognized U.S. accrediting associations may be accepted for courses applicable only to certificates and A.S. Career and Technical Education degrees. Guidelines provided by the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council for Higher Education Accreditation are used in the evaluation of institutions and credits earned outside the U.S. The mode of delivery for transfer courses does not play a role in the acceptance of transfer credits. (ER 10)

Transfer-credit policies are communicated between campuses and with students in a variety of ways. The College's catalog is available online and is used by counselors in communicating these policies to students. Counseling regarding transfer of credits is also available for all students via various on-campus and distance methods. Transfer-specific services and pathways available directly to students are detailed in the College's catalog ([II.A.10-6](#), p. 16-27). In 2013, the University of Hawai'i at Mānoa (UHM) hired the first Transfer Specialist to work with students interested in transferring to UHM. The Transfer Specialist communicates with all interested students regardless of their chosen transfer institution and regularly advises them on the transfer of their coursework, plans for transfer, and overall transfer issues. Communication regarding transfer to any of the above institutions is completed in the following ways ([II.A.10-7](#)):

- 5 workshops per semester: The Transfer Specialist, Ka'ie'ie (UH Manoa) Coordinator, and an Admissions Officer offer workshops to provide an overview of transfer requirements and the ways to transfer.
- Walk-in and by-appointment advising: The Transfer specialist is available on campus three days per week to meet with students regarding their transfer plans.

To facilitate the transfer of courses taken at the baccalaureate level to the UH Community College system, the UH four-year and two-year institutions developed UHCC Policy 5.206 Reverse Transfer policy. It allows community college students who transferred to a UH four-year institution before completing their Associate in Arts or Associate in Science in Natural Science degree to obtain that credential while progressing toward their bachelor's degree. This policy ensures a systematic process that leads to an automatic credit review and awarding of these associate degrees to students who have met the community college program requirements after transferring to a UH four-year institution ([II.A.10-8](#)).

The College also has guidelines for transfer of credits for international students for courses taken within and outside of the U.S. International students who completed coursework from an institution within the U.S. and are seeking transfer of credits to the College are required to have an official transcript mailed directly from their previous institution in the U.S. to the admissions and records office or Honda International Center ([II.A.10-9](#)). For students who took courses

outside of the U.S, the process is similar, except that these students are required to attend a comprehensive international student transcript evaluation workshop in order to maximize the transfer of coursework taken overseas that can be applied toward students' degree programs at the College ([II.A.10-10](#)).

### ***Certification and Comparability of Expected Learning Outcomes for Transferred Courses***

In addition to adhering to system policies, the College certifies and awards transfer credits based on attainment of comparable course learning outcomes. Faculty discipline experts determine if the learning outcomes of transfer courses are comparable to the outcomes the College determines students need to achieve successful completion of such courses. If available, completed assignments, course syllabi, as well as the final course grade are used as indicators of students' mastery of the course and its learning outcomes.

The College also recognizes that learning experiences outside the traditional college setting can provide college-level competency and a means to assess these experiences through examinations, portfolios, and records of non-college courses and training, such as articulation with high schools and prior learning assessments ([II.A.10-11](#), p. 54-56).

Transfer of Credit policies and procedures have been developed through a collaborative process relying primarily on the faculty and follow all system guidelines and generally accepted practices. These policies and practices are regularly reviewed and updated to ensure they remain current and align with system guidelines, policies, practices, and procedures.

### ***Articulation Agreements***

The Office of the Vice Chancellor for Academic Affairs (VCAA) is the point of contact for course, program and degree pathway articulation agreements at the College. The VCAA's office consults with the appropriate faculty and department chair to discuss a Memorandum of Agreement (MOA) that includes specific details of the agreement. Instructors and counselors from the partner institutions review course equivalency and learning outcomes of the program. Upon agreement, the MOA is signed by faculty, department chairs, program coordinators, and administrators. The agreement will be in effect from the date signed and evaluated based upon the review dates specified in the agreement. The College has numerous articulation agreements with higher education institutions based upon patterns of enrollment between institutions and the mission of the College ([II.A.10-12](#), Articulation Agreements within the UH System).

## **ANALYSIS AND EVALUATION**

The institution has clear transfer-of-credit policies and articulation agreements that certify that the learning outcomes for transferred courses are comparable to its own courses and appropriate to its mission.

Criteria for evaluating student learning for credit are clearly stated in the College catalog; are consistent with system policies, procedures, and practices; and adhere to standard practices in higher education. Students are informed about transfer of credit policies both on the College website and the catalog, as well as by appropriate counselors, faculty, and staff. The College's Kekaulike Information and Service Center (KISC), in consultation with faculty, counselors, program coordinators, and/or department chairs, is primarily responsible for evaluating transfer credits in accordance with system policies and procedures, expected comparable learning outcomes, as well as generally accepted practices in higher education to facilitate mobility of students between institutions without penalty. The College has clear policies and strong articulation agreements with reputable, accredited universities based upon patterns of enrollment between institutions and the mission of the College. These agreements state specifically and clearly the requirements that students need to transfer smoothly and seamlessly.

---

**II.A.11. The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

The College ensures that appropriate program-level student learning outcomes for all programs include communication, information and quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

#### ***Program-Level Student Learning Outcomes***

All degrees at the College require at least 15 credits of General Education courses. Through this requirement, the College ensures that students acquire communication, information and quantitative competency, analytic inquiry skills, ethical reasoning, and the ability to engage diverse perspectives. The College's general education (GE) learning outcomes are adapted from the Association of American Colleges and Universities' (AAC&U) LEAP Essential Learning Outcomes. These outcomes also serve as the program learning outcomes for the Associate in Arts degree, which primarily consists of GE courses. As stated in the College's catalog, each of the College's associate degree programs share the following general education learning outcomes ([II.A.11-1](#), p. 27):

- **Thinking/Inquiry:** Make effective decisions with intellectual integrity to solve problems and/or achieve goals utilizing the skills of critical thinking, creative thinking, information literacy, and quantitative/symbolic reasoning.

- **Communication:** Ethically compose and convey creative and critical perspectives to an intended audience using visual, oral, written, social, and other forms of communication.
- **Self and Community/Diversity of Human Experience:** Evaluate one's own ethics and traditions in relation to those of other people and embrace the diversity of human experience while actively engaging in local, regional and global communities.
- **Aesthetic Engagement:** Through various modes of inquiry, demonstrate how aesthetics engage the human experience, revealing the interconnectedness of knowledge and life.
- **Integrative Learning:** Explore and synthesize knowledge, attitudes and skills from a variety of cultural and academic perspectives to enhance our local and global communities.

These learning outcomes, including other program-specific outcomes that address the above areas, are integrated into both transfer programs and career and technical education programs. These outcomes, derived from a wide range of diverse courses, foster intellectual and social growth, and provide a foundation for lifelong learning. Courses that address these outcomes emphasize communicative and interpersonal skills, critical thinking, multicultural understanding, and ethical deliberation to enable students to learn throughout their lives, to work creatively and productively with others, and to contribute to the wellbeing and vitality of the community.

All students completing a degree must complete courses that address the above learning outcomes as a part of degree requirements, and the College has determined appropriate courses to meet each area. Students pursuing an Associate in Science in CTE programs must demonstrate mastery in the following GE areas: communication, quantitative literacy, arts and humanities, natural sciences and social sciences and are typically required to take at least one course in each area. Students pursuing an Associate in Arts (A.A.) degree, on the other hand, must complete the following requirements for communication, information and quantitative competency, analytic inquiry skills, ethical reasoning, and engaging in diverse perspectives ([II.A.11-2](#), p. 74):

#### **FOUNDATION REQUIREMENTS**

The foundation requirements are intended to give students skills and perspectives that are fundamental to undertaking higher education.

Written Communication: 3 credits

Symbolic Reasoning: 3 credits

Global and Multicultural Perspectives: 6 credits (from two of three groups)

### **DIVERSIFICATION REQUIREMENTS**

The diversification requirements are intended to assure that every student has exposure to different domains of academic knowledge, while at the same time allowing flexibility in choice of courses for students with different goals and interests.

Arts and Humanities: 6 credits (from two of three groups: Arts, Humanities, and Literature and Language)

Biological Sciences: 3 credits

Physical Sciences: 3 credits

Laboratory Science: 1 credit

Social Sciences: 6 credits (from two different disciplines)

Within the total 60 credits, the A.A. degree also requires students to complete the first level (101 and 102) of a second language (8 credits); Oral Communication (3 credits); Writing Intensive (6 credits); and a course in Hawaiian, Asian and Pacific Issues (3 credits); and electives.

Certificate programs do not necessarily include General Education requirements, since certificates typically prepare students for entry-level jobs in the workplace. However, each certificate may include these competencies as appropriate to the certificate program level and subject area. Programs offered through Continuing Education that result in a credential include program learning outcomes ([II.A.11-3](#), p. 28).

In 2016, in reviewing the College's institutional learning outcomes, the College's General Education Board and key faculty members began a dialogue about the key learning outcomes that are important for all students to achieve, regardless of length of program or certificate. These discussions culminated in the revision and narrowing of the College's existing Institutional Learning Outcomes (ILOs) to four ILOs, which were recommended for approval by the Chancellor's Advisory Council in January 2018 ([II.A.11-4](#)). These new ILOs are also adapted from the Association of American Colleges and Universities' (AACU's) LEAP Essential Learning Outcomes. The ILOs were published in the 2018-2019 course catalog and are as follows:

Within professional, civic, and personal contexts, and in the pursuit of their current individual learning goals, Kapi'olani Community College students are able to:

**ILO 1:** Use critical and creative thinking and reasoning.

**ILO 2:** Communicate clearly and appropriately.

**ILO 3:** Demonstrate an active awareness of the Hawaiian Islands and the rich diversity of its peoples, in particular the values and history of the indigenous culture.

**ILO 4:** Make contributions to their communities. ([II.A.11-5](#), p. 29)

### *Engaging in Diverse Perspectives*

The College is committed to promoting students' ability to engage diverse perspectives as demonstrated by ILO 3, above. Students enrolled in an Associate in Arts degree attain this outcome through degree requirements: Global & Multicultural Perspectives (6 credits); Hawaiian, Asian, and Pacific Issues Focus (3 credits); and Hawaiian/Second language (8 credits).

To satisfy the Global and Multicultural Perspectives requirement, a course must ([II.A.11-6](#)):

1. Provide students with a large-scale analysis of human development and change over time.
2. Analyze the development of human societies and their cultural traditions through time in different regions (including Africa, the Americas, Asia, Europe, and Oceania) and using multiple perspectives.
3. Offer a broad, integrated analysis of cultural, economic, political, scientific, and/or social development that recognizes the diversity of human societies and their cultural traditions.
4. Examine processes of cross-cultural interaction and exchange that have linked the world's peoples through time while recognizing diversity.
5. Include at least one component on Hawaiian, Pacific, or Asian societies and their cultural traditions.
6. Engage students in the study and analysis of writings, narratives, texts, artifacts, and/or practices that represent the perspectives of different societies and cultural traditions.

In order for a course to be designated as a Hawaiian, Asian, and Pacific Issues course, two-thirds of the class must meet and satisfy specific hallmarks, developed by the University of Hawai'i at Mānoa and used by all the UH community colleges: ([II.A.11-7](#)):

**Hallmark 1:** The content should reflect the intersection of Asian and/or Pacific Island cultures with Native Hawaiian culture.

**Hallmark 2:** The course uses assignments or practica that encourage learning that comes from the cultural perspectives, values, and worldviews rooted in the experience of peoples indigenous to Hawai'i, the Pacific, and Asia.

**Hallmark 3:** The course should include at least one topic that is crucial to an understanding of the histories, or cultures, or beliefs, or the arts, or the societal, or political, or economic, or technological processes of these regions.

**Hallmark 4:** The course should involve an in-depth analysis or understanding of the issues being studied in the hope of fostering multi-cultural respect and understanding.

Proficiency in Hawaiian or a second language is an integral part of the University of Hawai‘i and the University of Hawai‘i Community Colleges’ missions to ([II.A.11-8](#), [II.A.11-9](#)):

*“promote distinctive pathways to excellence, instruction, research, and service while fostering a cohesive response to...participation in the global community;”*

*“embrace its unique responsibilities to the indigenous people in Hawai‘i and to Hawai‘i’s indigenous language and culture...ensures active support for the participation of Native Hawaiians at the University and supports vigorous programs of study and support for the Hawaiian language, history and culture;” and*

*“prepare students for the global workplace.”*

#### **ANALYSIS AND EVALUATION**

The College includes in all of its programs as appropriate, student learning outcomes in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program specific learning outcomes. Associate degree programs address the College’s general education learning outcomes, which also serve as program learning outcomes for the Associate in Arts degree. The Associate in Science degree programs are required to include courses that meet the General Education learning outcomes to ensure that students acquire the above competencies, skills, and abilities. Program student learning outcomes and general education learning outcomes are published in the College catalog for all degrees and certificates.

---

**Standard II.A.12: The institution requires of all its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The Institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include students' preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social science. (ER 12)**

---

## EVIDENCE OF MEETING THE STANDARD

The College's philosophy of General Education is found in the catalog, ([II.A.12-1](#), p. 27):

### PHILOSOPHY OF GENERAL EDUCATION

Ma ka hana ka 'ike. (Pukui 227)

"In working, one learns."

Knowledge in ancient Hawai'i was gained through discipline, work, observation of nature, and an abiding respect for spirit, earth, and life. Human beings demonstrated wisdom and skills not by how much they claimed to know, but by their actions and deeds.

He pūko'a kani 'āina. (Pukui 100)

"A coral reef that grows into an island"

A coral reef is a community of interconnected beings; as each being grows and contributes to the whole, the community becomes healthy and firmly established.

General education, integrated into both transfer programs and career and technical programs, provides a foundation for lifelong learning. This foundation consists of diverse courses that, in combination, foster intellectual and social growth. Courses required for general education emphasize communicative and interpersonal skills, critical thinking, multicultural understanding, and ethical deliberation to enable students to learn throughout their lives, to work creatively

## SUSTAINABILITY IN THE CURRICULUM

The College has become a leader in sustainability curriculum and planning for the UH system, thanks to the impassioned effort of a few faculty members who blend environmental concerns with intellectual curiosity and pedagogy. "How does the concept of "sustainability" change what and how we teach?" "How do we prepare students for careers that do not yet exist in a constantly shifting global context?"

and productively with others, and to contribute to the wellbeing and vitality of the community. Learning outcomes are characterized by the ability to make conscious and informed use of knowledge, skills, and attitudes relevant to a particular situation.

***The College’s degrees have a component of general education, including appropriate SLOs and competencies.***

All the College’s Associate in Arts and Associate in Science degrees have a component of general education ([II.A.12-2](#), p. 73), including appropriate SLOs and competencies to prepare students in civil engagement, for life-long learning and application, and with a broad comprehension and practice in the arts and humanities, the sciences, mathematics, and social sciences, based on faculty expertise, as stated in the College catalog. Career and Technical Education (CTE) Associate in Science degrees include a minimum of 15 credits of General Education (GE) ([II.A.12-3](#), p. 76), and Associate in Arts degrees of 60 credits consist primarily of GE courses. The GE outcomes address the skills necessary for lifelong learning and the application of learning (see II.A.11).

All degrees, whether transfer or CTE, address the broad areas of knowledge. CTE degrees are required to include one course in each of these areas: arts and humanities, natural sciences, and social sciences, as well as one course each in communication and mathematics/quantitative reasoning.

## SUSTAINABILITY IN THE CURRICULUM (CONT.)

An art professor, curious about design thinking and systems thinking, used a sabbatical to create a new course, “Intro to Creative Thinking.” This popular course is one of only 8 such courses in the U.S.

A Culinary professor created a campus herb garden fertilized by a traditional compost pile. Today the department integrates food waste management into its kitchen protocols and the initiative supports two large bio-composters.

Several writing and ESOL faculty developed sustainability-focused writing courses. Students in these sections work with research librarians to use academic journals, government reports, and films in areas of climate change, plastics in the ocean, and water rights.

Working with a local farm, a Microeconomics instructor redesigned a course around local issues related to fisheries management.

Based on UN Sustainable Development Goals, the Kapi’olani Service & Sustainability Learning Program supports faculty efforts to keep their courses relevant to Hawai’i’s sustainable future and to connect students to community partners.

In working towards the goal of infusing 75 courses with sustainability content, 47 initial courses created an impetus for the “Sustainability Course” designation across the University of Hawai’i System.

During Earth Week numerous faculty open their sustainability-focused classes to any student or member of the community. Faculty also host interdisciplinary talk-story sessions to help colleagues develop sustainability assignments.

Associate in Arts degrees are required to include two in each of these areas as well as 18 credits of electives, typically in these same areas. (ER 12)

### ***Faculty Expertise***

The College has instituted five governing bodies:

- a. The General Education Board is made up of representative faculty who serve on the Foundations Board, Writing Intensive (WI) Board, Hawaiian, Asian, & Pacific (HAP) Issues Board, and Diversification Boards, and faculty who teach Hawaiian/Second Language courses. The General Education Board serves as a mechanism to have engaged discussions, address any related issues, streamline processes, etc.
- b. The Foundations Board consists of faculty representation from the courses that meet the Foundations requirements: Global & Multicultural Perspectives (FG), Symbolic Reasoning (FS) and Writing (FW),
- c. The Writing Intensive (WI) Focus Board comprises faculty who teach WI courses.
- d. The Hawaiian, Pacific, and Asian Focus (HAP) Board includes key faculty who have expertise and have taught HAP-designated courses.
- e. The Diversification Board involves faculty representing the various diversification areas.

These boards convene approximately once a month or when necessary to review courses, facilitate the application for approval process, and approve courses that will be designated as meeting the General Education or graduation requirements. The chairs of these boards are also the College representatives at the system level, where systemwide issues, policies, and procedures are addressed.

Faculty seeking to have their course approved to meet a General Education or graduation requirement complete an application that outlines how their course meets the Hallmarks ([II.A.12-4](#)) required to be designated a Foundations, WI, or HAP course. Each board also supports faculty through the application process from submittal to revision (if needed) and final approval.

Currently, the College's Diversification Board is being restructured to include a broader representation of faculty from pertinent disciplines (i.e., arts, humanities, literature, social sciences, biological sciences, and physical sciences) and to create a fair and equitable process. At present, the diversification review and approval process rests with the related departments. For example, only faculty in the Arts & Humanities department review and approve the course proposals seeking a diversification designation in that area. Approval is based on whether or not a course(s) meets the hallmarks of the Diversification area.

- UH General Education Information for Faculty ([II.A.12-5](#)). This website provides information on all Foundations, Diversifications, WI, and HAP Hallmarks and support for faculty who are applying for a course designation.
  - The College's Foundations Board Laulima Site. (Password protected) This site houses all Foundations meeting minutes, course proposals, applications with Foundation Hallmarks, and information regarding Foundations at the College.
  - The College's WI/WAC Website ([II.A.12-6](#)) This website houses WI applications with hallmarks, application support, WI assessment, and WI resources.

## ANALYSIS AND EVALUATION

The College's degrees have a component of general education, including appropriate SLOs and competencies to prepare students for civil engagement, lifelong learning and application, and a broad comprehension and practice in the arts and humanities, the sciences, mathematics, and social sciences. Courses that are approved for designation as General Education courses meet established hallmarks, with appropriate SLOs and competencies based on review by faculty with the requisite expertise. The general education course sequence is embedded in each degree in alignment with transfer expectations of the University of Hawai'i and many private universities. Course credits for each content area in associate in arts degrees are aligned with expectations at baccalaureate institutions for depth and breadth of coverage.

---

**II.A.13. All degree programs include a focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.**

---

## EVIDENCE OF MEETING THE STANDARD

The College's Associate in Arts and Associate in Science degree programs generally consist of at least one area of inquiry. These programs include specialized courses that address key theories and practices within the field of study, and have specific learning outcomes and competencies that provide students with comprehensive knowledge and skills.

The Associate of Arts in Liberal Arts is an interdisciplinary degree, with learning outcomes related to the broad areas of a liberal education. In addition to the interdisciplinary Liberal Arts degree, the College has developed Liberal Arts concentrations, where 100- and 200-level courses within an area of inquiry meet baccalaureate degree requirements. After a careful

analysis of baccalaureate degree requirements and existing 100- and 200-level courses, the College has approved the following concentrations ([II.A.13-1](#), p. 541):

Associate of Arts Liberal Arts: Art Concentration  
Associate of Arts Liberal Arts: Business Administration Concentration  
Associate of Arts Liberal Arts: Deaf Studies/Deaf Education Concentration  
Associate of Arts Liberal Arts: Economics Concentration  
Associate of Arts Liberal Arts: Elementary Education Concentration  
Associate of Arts Liberal Arts: English Concentration  
Associate of Arts Liberal Arts: Family Resources Concentration  
Associate of Arts Liberal Arts: History Concentration  
Associate of Arts Liberal Arts: Psychology Concentration  
Associate of Arts Liberal Arts: Secondary Education Concentration

The Associate in Arts in Hawaiian Studies provides a clear, explicit, coherent pathway for students intending to transfer into the Hawaiian Studies major at a baccalaureate institution. The program provides curricula that focus on Hawaiian culture and knowledge ([II.A.13-2](#), p. 525).

All Associate in Science (A.S.) degrees, particularly the CTE programs, focus on at least one area of inquiry. A minimum of 45 credits in the degree are devoted to the courses in the major or courses that support the major to prepare students for entry into the workforce or to transfer to applied science degrees at University of Hawai'i West O'ahu (UHWO). Curriculum development for all CTE programs includes consultation with industry professionals to identify the knowledge and skills expected of entry-level workers. As detailed in the College's catalog, the A.S. curricula include both introductory courses, as well as 200-level, and sometimes 300-level, courses where the students develop mastery of foundational concepts and skills. Selected examples are shown below.

The Associate in Science in Natural Science is a transfer degree that includes explicit, focused curricular pathways designed to meet the requirements of broad areas of baccalaureate science and engineering degrees. This degree has four concentrations ([II.A.13-3](#), p. 586):

Associate in Science Natural Science: Biological Sciences Concentration  
Associate in Science Natural Science: Engineering Concentration  
Associate in Science Natural Science: Information & Communication Technology Concentration  
Associate in Science Natural Science: Physical Sciences Concentration

The Associate in Science in New Media Arts with a Specialization in Animation or Interface Design focuses on specific areas of inquiry in the fields of digital media design, computer

animation, and industries that require advanced skills in multimedia design and production. The program is intended to prepare students at the mastery level for a career in digital design or production ([II.A.13-4](#), p. 602).

The Associate in Science for Educational Paraprofessionals with a Concentration in Second Language Teaching focuses on two areas of inquiry in the fields of education and English as a Second Language. This degree program offers specialized courses in theories and practices that prepare students to work with English Language Learners. ([II.A.13-5](#), p. 577)

### ANALYSIS AND EVALUATION

In developing curricula for its Associate in Science and Associate in Arts degree programs, the College allows for both specificity and breadth of outcomes in at least one area of inquiry. The College ensures that the courses that make up the degree are in a focused area of study and include foundational knowledge and skills as well as opportunities for students to develop mastery of those concepts and skills. Courses consist of specific learning outcomes and competencies, including key theories and practices within the field of study. For the general Associate in Arts in Liberal Arts, the curriculum addresses the broad, interdisciplinary areas traditionally found in liberal education programs.

## SECOND LANGUAGE TEACHING (SLT)

The SLT Program is a small program that trains students interested in becoming second language tutors, second language teaching assistants, and – with further education – second language teachers. The program also helps English as a Second Language (ESL) teachers and assistants already working in the field update and refine their skills.

Programs like SLT are usually housed in universities – within teacher colleges, linguistics departments, or TESOL departments at the 3<sup>rd</sup> and 4<sup>th</sup> year levels, and are rarely found in community colleges. Nevertheless, all Kapi’olani CC SLT courses meet the general education requirements of the 2-year degree framework and simultaneously create pathways for our students to transfer for BA degree completion. This was challenging! Instead of attempting to articulate SLT courses individually, we negotiated three transfer pathways via the Second Language Studies (SLS) Department at UH Manoa (UHM), the College of Education (COE) at UH Manoa, and the TESOL Program at Hawaii Pacific University (HPU) when students complete the entire SLT Program. For each of these unique transfer pathways, SLT graduates receive upper-division credit for their SLT Program coursework and service learning taken at Kapi’olani CC, thus shortening their bachelors’ degree graduation time.

Rachel is a first-generation Korean immigrant who plans to teach English and Korean to U.S. high school students. She transferred from Kapi’olani CC to the SLS Department at UH Manoa where she recently completed her MA degree and is pursuing her teaching license.

---

**II.A.14. Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.**

---

**EVIDENCE OF MEETING THE STANDARD**

In addition to the College's institutional accreditation, all but one of the career and technical education degree programs go through a comprehensive, rigorous external accreditation process to ensure that CTE graduates meet the technical and professional standards necessary for their field and are adequately prepared for employment, licensure, and certification.

***Meeting Employment Standards, Preparation for Certification and Licensure***

The New Media Arts degrees are the exception. No external agency accredits these programs, though the College's program is regularly reviewed by local industry professionals. All other CTE programs at the College maintain accreditation with various external bodies ([II.A.14-1](#)):

- American Culinary Federation
- American Dental Association Commission on Dental Accreditation
- Commission on Accreditation of Allied Health Education Programs
- National Accrediting Agency for Clinical Laboratory Sciences
- Accreditation Council for Occupational Therapy Education
- Commission on Accreditation in Physical Therapy Education
- Joint Review Committee on Education in Radiologic Technology
- Committee on Accreditation for Respiratory Care
- Accreditation Commission for Education in Nursing
- National Accrediting Agency for Clinical Laboratory Sciences
- Accreditation Commission for Programs in Hospitality Administration
- Research Chefs of America

**SECOND LANGUAGE TEACHING (SLT)  
(CONT.)**

Quitney is a third generation Latino-American from Texas who plans to teach English to immigrant elementary school children in the U.S. She was our first transfer student to the COE's new Multilingual Learner (MLL) Program. Quitney completed her course requirements in Spring 2018 and expects to finish her licensing requirements this fall.

Eric is a military veteran who served in Central and South America. He sought a practice-focused program where he could maximize his VA benefits. He was our first SLT student to transfer to HPU, where he completed his BA degree in TESOL in just three semesters. Eric is now teaching ESL to adults in Colombia.

The paralegal degree is approved by the American Bar Association, which endorses but does not accredit programs.

The College’s CTE programs offer nine degrees that require national licensure: Medical Assisting, Medical Lab Technician, Nursing (Registered Nurse, RN), Nursing Licensed Practical Nurse (LPN)-to-RN, LPN, Occupational Therapy Assistant, Physical Therapy Assistant, Radiologic Technician, and Respiratory Care Practitioner. The most recent data show that these licensure programs have met or surpassed the institutional standard for examination pass rates. Perkins indicators for (1P1) CTE students’ attainment of the technical skills required by the program and (2P1) CTE students’ attainment of industry-recognized credentials, certificates or degrees goals have been consistently exceeded. The table below provides the most recent data. A complete list of examination pass rates is found in the ACCJC Annual Reports ([II.A.14-2](#)).

Kapi’olani CC Performance	2009 - 10		2010 - 11		2011 - 12		2012 - 13		2013 - 14	
	standard	actual								
1P1: Technical Skills Attainment	<b>90.05</b>	96.93	<b>90.10</b>	95.77	<b>90.00</b>	97.07	<b>90.00</b>	96.90	<b>91.00</b>	95.06
2P1: Credential, Cert, or Degree	<b>44.50</b>	48.85	<b>45.00</b>	56.35	<b>50.00</b>	52.79	<b>55.00</b>	70.24	<b>47.00</b>	57.17

All CTE programs collaborate with their advisory boards, which comprise various industry professionals. CTE faculty regularly share with them curricular developments, solicit input to better prepare program graduates for the working environment and provide an avenue for additional feedback in maintaining program currency. For example, to strengthen their program, the Hospitality faculty recently met with their advisory board to discuss recruitment efforts, retention strategies, career advancement opportunities, and training needs for their students ([II.A.14-3](#)). As another example, faculty from the IT/Cybersecurity Program asked their advisory board members for the types of certifications the industry is seeking. As a result, many of the College’s ITS classes, such as ITS 124 (Network+), ITS 144 (A+), ITS 122 (Security+), and ITS 222 (Certified Ethical Hacker) are aligned with industry certifications ([II.A.14-4](#)). Finally, the Culinary Arts Advisory Board suggested that the Culinary Arts Program faculty pursue a dual-credit program with the high schools. Consequently, the College is in the process of signing an “Early College” Memorandum of Understanding with the Hawai’i Department of Education ([II.A.14-5](#), p. 5).

An important initiative in developing curricula that meet industry standards has been the involvement of all the University of Hawai’i Community Colleges (UHCC) in a partnership with Hawai’i’s most vital industry sectors. Per the Hawai’i Industry Sectors website , “[o]ne of the University’s initiatives is to engage with industry partners to develop industry-led curriculum that will imbue graduating students with the marketable skills for which businesses are looking.” Additionally, as a result of involvement with the Hawai’i Industry Sectors initiative, the UHCC system office developed a labor market tool that provides access to up-to-

date labor market data and connections to the educational programs in the UHCC system that provide pathways to those targeted occupations ([II.A.14-6](#)). The online tool allows students and others to conduct labor market research and make informed decisions in crafting their paths to successful careers. CTE faculty utilize this tool to share information with their students and/or assign students to research data on job market trends, salary, required education and skills, and the number of available jobs both statewide and nationally. Students are able to explore multiple related occupations at one time. For example, students interested in nursing can compare the differences and similarities between a practical nurse, a registered nurse, and a nurse practitioner. The College's Employment Prep Center Coordinator assists in connecting students and alumni to industry jobs available in the state ([II.A.14-7](#)).

## ANALYSIS AND EVALUATION

CTE graduates meet the employment standards necessary for their field and are adequately prepared for employment, certification and licensure.

This adequate preparation is accomplished by ensuring periodic review of programs for appropriate content, by active discussion with advisory committees members on program improvement, by monitoring licensure/certification pass rate to meet or exceed established standards, and by providing information to students in selecting a major and connecting students to employers upon graduation. Through the use of advisory experts in the workforce areas, curriculum is examined and refined for currency and relevance.

---

**II.A.15. When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.**

---

## EVIDENCE OF MEETING THE STANDARD

The College provides appropriate, timely and seamless avenues for enrolled students to complete their education when programs are dissolved or significantly modified.

### *Elimination of Programs or Significant Change of Program Requirements*

UHCC Policy #5.202: Review of Established Programs ([II.A.15-1](#)), and the Board of Regents Policy RP 5.201: Instructional Programs ([II.A.15-2](#)), address the termination of programs and significant changes of program requirements.

New programs are initially approved by the Board of Regents (BOR) as provisional. In accordance with Policy RP 5.201, after one cycle as a provisional program (two years for certificates, four years for associate degrees), a program may be approved as established. Once approved either as provisional or established, all programs are required to prepare an annual

report documenting performance outcomes, key benchmarks, critical external factors, and planned improvements. In addition, all programs are required to complete a comprehensive assessment, currently at least once every three years. Based on the results of annual reports and program reviews, the College may determine that a program should be “stopped out” or eventually terminated. Such programs may no longer meet the requirements of baccalaureate institutions or may no longer serve student needs, or the needs of business, industry, or community. The Chancellor may approve program “stop-outs” for up to two years. Other program stop-outs and program terminations are approved by the University of Hawai‘i System President, often following program challenges with student enrollment, retention, and completion, and other factors as listed above. Nonetheless, if a provisional program(s) is struggling but demonstrates a community workforce need, the program may be extended and asked to pursue its action plan(s) outlined in its most recent annual report or program review ([II.A.15-3](#)). One example involves an A.S. in Second Language Teaching, which was continued to support a workforce need. This need is now met by an A.A. which leads to transfer to the UH College of Education, so this year the A.S. in SLT will be stopped out. Established programs that are out of date or nonproductive based on a program review are also terminated in the same manner. An annual report on program actions, which includes program terminations, is submitted to the Vice President for Academic Planning and Policy.

Significant changes to a provisional or established program such as deviations from its original intent, purpose, or design must be granted by the UH Board of Regents. If a program is determined to have undergone significant changes, a shorter comprehensive program review cycle may be requested.

The procedures to terminate a program or make significant changes to program requirements are also the same for programs providing distance education courses.

### ***Appropriate, Timely, and Seamless Avenues to Completion for Enrolled Students***

The above policies state that the College will honor commitments made to students already enrolled in programs for up to two-years following program termination. During this time, no new students are accepted into the program. Once a program is identified for termination, the chancellor, vice chancellors, and deans will inform appropriate counselors, academic advisors, program coordinators, instructional faculty, and staff, who will regularly communicate and work with students to ensure a seamless completion of their program requirements or to transition into a related program with full credit transfer or credit substitution in a timely manner with minimum disruption.

Continuously enrolled students in programs that will be terminated or have been significantly changed have the right to continue to follow the original program requirements stated in the College’s catalog or may petition to graduate with different requirements when required program courses for a student’s intended program are no longer offered. Relevant counselors

and program coordinators assist students in modifying their education plans to address significant program changes or selecting a new program. However, if students have not been continuously enrolled in a program that is being terminated or significantly changed, they must complete the requirements of a new program or the revised program.

The College retains full-time tenured faculty of terminated programs to teach courses within their qualifications in other departments or units, coordinate or lead campus' initiatives/projects, develop and oversee a new program, or work with the Chancellor to find an appropriate fit within the College that aligns with the faculty's credentials and experience.

### ***Exercise and Sports Science (ESS) Program***

After a decline in the number of majors and facing instructional space and equipment constraints, the Exercise and Sports Science program was stopped-out effective May 30, 2013 (ESS Program Stop-out Approval from President Greenwood, 2013 ([II.A.15-4](#))). Letters were immediately sent by the Program Coordinator to students who received admission notification in spring 2013 informing them of the stop-out and advising them of alternative academic pathways.

Despite many program improvement initiatives, including conversion to selective admission and implementation of a one-year cohort-based model, the ESS Associate in Science degree program and Certificate of Achievement were terminated effective May 30, 2016 ([II.A.15-5](#), ESS Program Termination Request to President Lassner ([II.A.15-6](#))). There were no ESS majors at the time of program termination that needed to be accommodated.

## **ANALYSIS AND EVALUATION**

The College makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption, when programs are terminated or program requirements are significantly changed.

The College requires a Comprehensive Program Review every three years, as well as an Annual Report of Program Data. It is during these self-assessment efforts that programs identify necessary program modifications or termination. When it is deemed that programs must be terminated to best serve the College's students, operate most efficiently, and adjust to meet community workforce needs, the College ensures that all (continuing) impacted students have the opportunity to complete their education and continue on their academic or career pathway. In the case of terminated programs, program coordinators and other administrators are able to personally reach out to impacted students to ensure their continuance or assist with any necessary transitions. Also available to students are academic and career advising with the College's counseling units.

---

**II.A.16. The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, Career Technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.**

---

## EVIDENCE OF MEETING THE STANDARD

Kapi‘olani Community College routinely evaluates all instructional programs regardless of delivery mode or location to continuously improve the quality and currency of all programs and courses to enhance learning outcomes and achievement for students.

### *Evaluating and Improving the Quality*

The quality of programs, including collegiate ([II.A.16-1](#)), pre-collegiate ([II.A.16-2](#) 2015), Career and Technical Education ([II.A.16-3](#)) and transfer programs ([II.A.16-4](#)), is evaluated annually in the Annual Report of Program Data (ARPD) and more comprehensively every three years with the Comprehensive Program Review (CPR). Continuing Education is subject to review every three years with a CPR.

The ARPD utilizes standardized measures that address relevancy, appropriateness, achievement of program student learning outcomes, currency, program demand and efficiency, distance education for completely online classes, assessment of planned program improvements, future planning, and attainment of Perkins indicators, when appropriate,

According to UHCC Policy 5.202 and the College’s K5.202: Review of Established Programs ([II.A.16-5](#)), the Comprehensive Program Review is intended to provide a regular assessment of the effectiveness of degree and non-credit/continuing education programs in areas such as overall program health and efficiency, analysis of external factors impacting a program, assessment, assessment findings, and plans/actions for program improvements.

The planning actions for program improvement that result from the analyses included in both ARPDs and CPRs form the basis for requests for additional resources, if needed. The allocation request form requires that any requests be tied back to explicit action items in these program review documents.

### *Evaluating and Improving the Currency of Courses*

All credit courses, including pre-collegiate courses, must be reviewed for currency every five years (see II.A.2). The timeline to assess course learning outcomes is tied to the curriculum review timeline, where all courses must be reviewed every five years. Therefore, all course student learning outcomes are reviewed and assessed every five years and revised, if necessary. (see II.A.3).

The Office of Continuing Education and Training has grown its programming to address current community needs for training in industries such as optometry, banking, pharmacy, culinary, and community health ([II.A.16-6](#), [II.A.16-7](#)) while offering opportunities for financial support and apprenticeships for its students.

## ANALYSIS AND EVALUATION

Kapi‘olani Community College routinely evaluates all instructional programs regardless of delivery mode or location and continuously improves programs and courses to enhance learning outcomes and achievement for students.

Improvement are achieved by evaluating programs and courses on a routine basis; by ensuring programs utilize the same evaluation criteria as prescribed in UHCC Policy 5.202; by tying funding to program reviews and improvement plans; and by assessing the effects of the improvement plans and re-initiating the evaluation process.

## **II.B. Library and Learning Support Services**

---

**II.B.1. The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)**

---

### **EVIDENCE OF MEETING THE STANDARD**

Kapi‘olani Community College supports student learning and achievement by providing sufficient library and learning support services for students, personnel responsible for student learning, and educational programs, regardless of location and means of delivery.

#### ***General Library Services***

The College’s Library and Learning Resources Unit, staffed by 18 employees, is comprised of the Library, Testing Center, the Lamakū Learning Center, and an open computer lab ([II.B.1-1](#)). The library sees an average of 344,492 people through its doors per year during its 62 weekly hours of service ([II.B.1-2](#)). Consistently, over the past accreditation cycle, at least 75 percent of students surveyed Agree or Strongly Agree that they are satisfied with the library services offered ([II.B.1-3](#)).

#### ***Library Collections***

Students, faculty, and staff use the Library’s website to search for books, ebooks, articles, DVDs, streaming video, and more ([II.B.1-4](#)). The Library collections are sufficient in terms of quantity, currency, depth, and variety. The Library regularly purchases recently published materials to support the curriculum. Students can find resources to help themselves get started with college, write an argumentative paper for ENG 100, or complete assignments in their disciplines. The Library sees an average of 35 circulations, electronic books used, and full-text journal articles downloaded per student and faculty FTE per year for a total of 150,505 books borrowed and articles downloaded in 2016-17 ([II.B.1-5](#)).

Students, faculty, and staff also have access to resources from other UH System Libraries. See Standard II.B.4 for more information about Intrasystem Loan (ISL) agreements. Librarians purchase current titles on an ongoing basis, and database subscriptions provide access to the most current news and journal sources. With the curriculum in mind, librarians select a variety

of sources to meet the needs of the campus. The Library uses the College's program review system to evaluate its efficiency and program effectiveness, and creates plans for improvements and resource allocations [\(II.B.1-6\)](#).

***Library Instruction and Student Learning Support***

The Library offers resource and information literacy instruction sessions for courses from a wide variety of disciplines. These sessions are customized to the instructor's course assignment and can vary in length from a part of one class period to four sessions, held on subsequent class days or spread throughout the semester [\(II.B.1-7\)](#). For online courses, librarians create online subject guides and online modules in the campus' learning management system to support learning. As a response to evolving Association of College Research Libraries standards for information literacy, the Library has developed and piloted a three-credit information literacy course [\(II.B.1-8\)](#).

Librarians provide one-on-one support to the campus community through Reference Desk services. Reference Librarians also take phone calls and emails from students, including those taking courses via distance education [\(II.B.1-9\)](#).

The Library organizes academic support workshops to help students succeed in college through its Secrets of Success (SOS) program [\(II.B.1-10\)](#). Workshops include taking notes in college, Microsoft Word basics, career exploration, and scholarship writing, among others.

Established in fall 2015, the Study Hub in the Library provides tutoring services to all students primarily for, but not limited to, math and writing. Peer tutors, volunteer instructional faculty, and community volunteers provided roughly 4,760 contact hours in its first year of operation to over 940 unduplicated students (22 percent of student FTE). The Study Hub received College Reading & Learning Association (CRLA) Level I Certified Tutor Certification in 2017 ([II.B.1-11](#)) ([II.B.1-12](#)). In 2017, the Study Hub was moved to the second floor and became part of the Lamakū Learning Center. Following recommendations from the National College Learning Center Association's definition of a learning center, Lamakū supports KCC's diverse student population by providing access to an array of academic support services. In AY 2017-18, tutoring in the Study Hub continued as other activities, e.g. Tai Chi, Well-Being Sessions, and Makerspaces, were offered to nurture the holistic academic growth of students. The center's adaptive, interactive space promotes inclusive learning and fosters engagement while striving to develop lifelong learners. Other tutoring centers around campus include the STEM Center ([II.B.1-13](#)), Business, Legal, and Technology Lab ([II.B.1-14](#)), and TRiO ([II.B.1-15](#)), which serve students in their programs. These specialized tutoring centers provide discipline specific or targeted support to students in the areas where they are most served, adding to the depth and variety of support across campus.

Students who are unable or prefer to not see a tutor in person can receive online support

## THE BIRTH OF THE LAMAKŪ LEARNING CENTER

### Spring 2017

"We're gonna look like tutoring *ninjas*!"

With a bundle of long-sleeved, black t-shirts in hand, a peer writing tutor from the Study Hub of Lama Library dashes off to share the "good news" with her co-workers. They will soon be moving upstairs to assist students in a newly renovated learning center *and* they will be looking sleek in their redesigned uniforms while doing so!

Meanwhile, a construction team surveys the upstairs space. The project, they understand, is significant for student success and the timeframe for completion relatively short: only three months to transform 23,000 square feet into an interactive, multi-faceted learning environment. The race is on!

### Midsummer 2017

The summer passes slowly on campus for a skeleton crew of peer tutors and faculty mentors who continue to assist students. Though less crowded in the summer, the challenge is the same as each student grapples with a particular area of study, from standard deviation to MLA citation to oral presentation. Hearing the intermittent grinding of carpet installation overhead, the tutors and mentors smile and reassure students that the racket is indeed a sign of progress.

### Fall 2017

"Pi'o ke ānuenuē..."

The final words of the Open House blessing chant reverberate through the second floor of Lama library. Students discover the new center has resumed its academic tutoring services, now much expanded, along with holistic offerings of well-being. Tai Chi Tuesday

from Brainfuse Tutoring or the Online Learning Academy. Brainfuse Tutoring provides tutoring on topics such as writing, math, accounting, chemistry, economics, and nursing. About 4,000 students utilize Brainfuse each year as it is available 24/7 for all students ([II.B.1-16](#)). In addition, the University of Hawai‘i at Mānoa’s Online Learning Academy (OLA) is freely available to students and provides English, math, and science tutoring ([II.B.1-17](#)). A study examining 2013-2015 online tutoring usage found that “retention rates for College students who utilized online tutoring were 11% higher than the retention rates of College students as a whole.” ([II.B.1-18](#)).

## THE BIRTH OF THE LAMAKŪ LEARNING CENTER (CONT.)

sessions unfold in the open flex space. Maker spaces pop up to promote sustainable crafting. A Zombie Escape Room materializes, to be followed by a Santa-themed room.

Lamakū Learning Center, with its potential to spark creativity, inquiry and understanding, with its dedicated team of peer tutors, faculty mentors and community volunteers, is now open.

### ***Computer Laboratories***

Computer labs exist throughout the campus and include the Kōpiko Business, Legal, and Technology (BLT) Lab, STEM lab, Mānele Lab, Economics Lab, and the Co-Requisite Lab ([II.B.1-19](#)). Some labs are restricted to students within specific programs. The largest open computer lab is the Lama Open Lab located in the Library, with ample desktops and printing services. The Library also circulates laptops for all-day use.

### ***Testing***

The campus’ Testing Center provides 56 hours a week of proctored placement testing, testing for distance education, make-up testing, and accommodations (ADA) testing ([II.B.1-20](#)). From FY 2015 through 2017, the center has administered an average of 28,597 tests. To increase accessibility, the center has a mutual proctoring understanding with other campuses in the system, through which students at each campus may take proctored tests at campuses convenient to them ([II.B.1-21](#)).

## ANALYSIS AND EVALUATION

Kapi‘olani Community College supports student learning and achievement by providing sufficient library and learning support services for students, personnel responsible for student learning, and educational programs, regardless of location and means of delivery.

Students have ample ways to access information and services. Physical library resources can be made available to students home-based at other campuses, including those taking online courses, via IntraSystem Loan. Librarians travel to classes, create online guides, and answer

reference questions via phone and email. Resources accessible 24/7 regardless of location include the Library's many online resources (over 163,601 full text online books, streaming educational videos, and 27,477 full-text journal, magazine, and newspaper titles), Brainfuse online tutoring, and the Online Learning Academy. Students taking courses via distance education are fully supported by these online services and resources.

The campus has shown an increased focus on developing adequate tutoring options for students, most recently with the establishment of the Study Hub to provide tutoring for all students. There is evidence of an effort to create collaboration and coordination among tutoring centers across campus (see Standard II.B.3).

The campus is cognizant of the need to continue exploring ways to increase remote options for library instruction and academic support, as noted in the campus' Distance Education (DE) Plan ([II.B.1-22](#), p. 22 ).

---

**II.B.2. Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.**

---

**EVIDENCE OF MEETING THE STANDARD**

Kapi'olani Community College selects and maintains educational equipment and materials to support student learning and enhance the achievement of its mission through the expertise of its faculty and learning support services staff.

The LLR's mission statement notes, "The mission of the Library and Learning Resources unit at the College is to support the vision of Kapi'olani Community College by providing an innovative environment for learning and research." This support includes providing "access to and instruction in the use of informational tools and resources (KCC Library Mission)." ([II.B.2-1](#)) The selection of educational materials (print and online books, magazines, journals, databases, and videos) and equipment (computers, software, etc.) supports the mission of the College to provide "open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals to the diverse communities of Hawai'i." ([II.B.2-2](#))

***Educational Materials***

The College's library materials, including print and online books, magazines, journals, films, and databases, are selected by librarians, with recommendations from instructional faculty, to support student learning. As stated in the library's Collection Development Policy ([II.B.2-3](#)), materials are selected to support the College curriculum. Liaison librarians communicate regularly with the faculty in their assigned disciplines to be aware of curriculum needs. They

also meet with departments undergoing professional accreditation to discuss subject coverage within the library's collection ([II.B.2-4](#)). In addition, the course curriculum approval workflow includes a notification to the Head Librarian in order to flag new materials needed for courses ([II.B.2-5](#)).

Liaison librarians consult standard review sources and professional journals, such as Library Journal, Booklist, and Publisher's Weekly, to assess the quality and relevance of materials before purchase, and encourage faculty and students to submit purchase requests ([II.B.2-6](#)). In addition, the Library provides sufficient resources to meet programmatic accreditor expectations for the programs offered at the College, including Occupational Therapy Assistant ([II.B.2-7](#)), Dental Assisting ([II.B.2-8](#)), Surgical Technology ([II.B.2-9](#)), and Nursing ([II.B.2-10](#)).

The Library also emphasizes collecting materials relevant to Hawai'i and hired a Hawaiian Resource Specialist in 2013 who has the appropriate expertise to select materials related to Hawai'i and Hawaiian culture. This expertise is significant in fulfilling the College's vision to be a model indigenous serving institution.

The Library has two unique collections that add to the diversity of materials it provides. The Game Collection consists of a variety of international board games, including the Chinese game Mahjong and the Hawaiian game Kōnane, that students can use anywhere in the library. This collection supports student engagement, lifelong learning, and curriculum in culture/language courses. The Library also has a Seed Stand, which librarians and staff maintain for students to freely take vegetable and flower seeds to grow at home, and they leave extra seeds for others to take. The library considers the seed exchange program a learning resource that supports the curriculum, lifelong learning, and campus sustainability initiatives.

In 2016, in response to student requests and to support student learning, the Library significantly expanded its Course Reserves collection by using Title III grant funds to purchase almost every course textbook. The Library also completed a large deselection/weeding project in 2016-2017 to remove outdated books from the collection to improve its access and use by students.

### ***Learning Equipment***

Kapi'olani CC Library selects and maintains a variety of educational equipment to support student learning, including desktop computers for the open computer lab and Testing Center, Microsoft software, laptops for the Study Hub tutoring center, printers, a scanner, and laptops for students to borrow ([II.B.2-11](#)). It strives to update its equipment every three years.

Representatives of the library meet twice a month with IT staff to discuss future trends, new technology feasibility studies, technology upgrades, and problems. This group is called KAP-IT-Lib. Members of KAP-IT-Lib include the Head Librarian, the network and server administrator for the College, the Electronic Resources Librarian (who represents the interests

of the Reference Librarians), the Research Specialist who supports the open lab, and the Digital Initiatives Librarian (who supervises the Research Specialist, represents the interest of the Testing Center, and helps support the library's servers). KAP-IT-Lib occasionally consults with UH System ITS on software recommendations [\(II.B.2-12\)](#).

The Research Specialist conducts ongoing needs assessments regarding the open lab and makes recommendations for hardware and software changes. The KAP-IT-Lib group takes suggestions from the Library staff and outside departments regarding provision of additional software applications for the computer lab.

## **ANALYSIS AND EVALUATION**

The College selects and maintains educational equipment and materials to support student learning and enhance the achievement of its mission through the expertise of its faculty and learning support services staff.

The Library has a clear Collection Development policy that outlines selection criteria for materials to support the College curriculum and student learning. Librarians are responsible for the selection and maintenance of these materials.

A committee of librarians and IT specialists collaborate to select and maintain equipment such as computers and software to support the College curriculum and student learning. The selection of educational equipment and materials clearly supports the College's mission to provide "open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals to the diverse communities of Hawai'i."

---

**II.B.3. The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.**

---

## **EVIDENCE OF MEETING THE STANDARD**

Kapi'olani Community College continuously evaluates its library and learning support services and makes appropriate changes to improve, ensuring that student learning outcomes and students' needs are met.

### ***Evaluation and improvement of library services***

The KCC Library continuously evaluates its services using a variety of indicators. Library use data is submitted annually for the Annual Report of Program Data (ARPD), which includes the

results of the Community College Survey of Student Engagement (CCSSE), conducted in even-numbered years ([II.B.3-1](#)). Data collected include circulation statistics, number of hits on the library homepage, reference questions answered, and other indicators of demand, efficiency, and effectiveness. The Head Librarian submits a Comprehensive Program Review every three years that responds to the data collected, summarizes library activities, and outlines goals for moving forward ([II.B.3-2](#)). In addition, an annual library survey asks students and other users to rate and provide commentary regarding their satisfaction with the library hours, staff, services, and resources ([II.B.3-3](#), [II.B.3-4](#)). The results over the past few years show that the library is successful in meeting student needs, but improvements can always be made ([II.B.3-5](#)). For example, after reference librarians noted an increase in requests for textbooks. They expanded a textbook reserve collection using a grant to purchase almost every textbook to be available for in-library use.

Instruction librarians have developed student learning outcomes for library instruction sessions and regularly assess these outcomes using student surveys, faculty surveys, and evaluating student work ([II.B.3-6](#)). Instruction librarians submit annual assessment reports to the Head Librarian and meet to discuss assessment results and strategies for improvement. Based on assessment results and in-class observations, the librarians identify next steps for improvement ([II.B.3-7](#)) ([II.B.3-8](#)) ([II.B.3-9](#)).

Librarians systematically use evaluation results as the basis for improvement. For example:

- In AY 2014-15 the Information Literacy Librarian used a rubric to evaluate student work in library sessions for Family Resources and Psychology courses and found only 63 percent of students were strong in achieving the SLO “Students will be able to evaluate information and its sources critically.” She developed prompts and modeling to ensure deeper critical analysis of sources, and has noted an increase in the number of students who have achieved this SLO since implementing these changes.
- In AY 2013-14, the Hawaiian Resource Specialist noted that students in HWST 270 were having trouble evaluating authors in an annotated bibliography assignment, with only 37 percent having strong proficiency in this area. She incorporated a greater focus on evaluation of sources in her instruction and the following year 55 percent achieved strong proficiency, and 33 percent were approaching. She is continuing to focus on this area to increase proficiency.
- The Learning Resources Librarian observed in an ENG 100 class that students were having difficulty in selecting a focused research topic, so she developed a graphic organizer to help guide their topic selection.

### ***Evaluation and improvement of other learning support services***

#### ***The Study Hub***

The Study Hub, a tutoring center that primarily helps students with math and writing skills,

was established in the library in fall 2015 in response to a recommendation made by the Student Success Committee to “create and furnish a Reading and Writing Center, Math Lab, and designated spaces for tutoring for all students in all subjects at all levels”[\(II.B.3-10](#), p. 5). The Study Hub evaluates its services in a variety of ways. It uses the software StarFish Retention Solutions for sign-in and data collection. StarFish provides data on the number of student visits, the number of unduplicated students, tutor contact hours, and courses for which the students are being tutored each semester. In AY 2015/16, over 940 unduplicated students (22 percent of student FTE) used the Hub, including 25 percent of the developmental writing and math student population.

Students who receive support from the Study Hub are asked to complete an online survey to evaluate the service [\(II.B.3-11\)](#) [\(II.B.3-12\)](#). In addition, embedded tutoring for writing courses is evaluated by surveying the participating faculty [\(II.B.3-13\)](#), and the peer tutors submit a self-evaluation [\(II.B.3-14\)](#) to provide feedback and ideas for improvement.

In summer 2016, the Information Literacy librarian engaged in discussion with instructional faculty about assessment of the center and collaborated with them to develop draft student learning outcomes for the service and identify possible assessment methods. A new Learning Center Coordinator was hired in November 2016 to take over management of the Study Hub (now part of the Lamakū Learning Center) and is working towards establishing and improving assessment methods for tutoring services. In spring 2017, pre- and post- writing assignments collected the previous semester were analyzed in a collaborative workshop of peer tutors and faculty to assess tutoring impacts and identify areas for improvement [\(II.B.3-15\)](#)

The Lamakū Learning Center also evaluates the effectiveness of its Well-Being Sessions via survey [\(II.B.3-16\)](#).

### ***Other Tutoring Services***

The College also provides a variety of tutoring services which operate independently across campus. These services include tutoring for students in Accounting, Information Technology, Economics, STEM, TRiO, and Ka Pōhaku Kihī Pa‘a Native Hawaiian Academic Advancement Program. Although the campus completes an Annual Report of Program Data (ARPD) for tutoring, the ARPD does not include all tutoring sites on campus [\(II.B.3-17\)](#). Each tutoring service has their own structure to collect data, and in spring 2017, in an effort to collaborate campus-wide, various academic support (tutoring and mentoring), coordinators convened to share information concerning their programs/services and student populations [\(II.B.3-18\)](#). A follow-up meeting was held later in the semester to discuss standardized data collection via Starfish/MySuccess, including a demonstration highlighting the advantages of this web-based tool [\(II.B.3-19\)](#). In spring 2018, all campus tutoring and several mentoring programs began to co-host monthly “Rise & Shine” events to increase students’ awareness of available support [\(II.B.3-20\)](#).

### ***SOS Workshops***

The SOS (Secrets of Success) program provides workshops on college success, job readiness, technology, library resources, and other topics relevant to student success. The SOS Program Coordinator evaluates these workshops with an evaluation form distributed to every attendee. The 2016-17 SOS assessment data shows that the student satisfaction rate is high. The SOS Coordinator has also used the evaluation results to improve the scheduling and/or marketing of the workshops and provides feedback to presenters if necessary ([IIB.3-21](#)) ([IIB.3-22](#)).

### ***Testing Center***

The Testing Center collects usage data and evaluates its services annually via a student survey. These results are reported in an end of year report as well as in the ARPD ([II.B.3-23](#), [II.B.3-24](#)).

The Testing Center worked on a special project with the First Year Experience program in AY 2014-15 to improve its services, maximize effective testing for students, and accommodate additional testing in the summer for students hoping to enroll in the fall ([II.B.3-25](#)). In response to a rise in cheating, several solutions were investigated and a video surveillance system was installed. In addition, use of the online Students of Concern form to report cheating incidents improved the campus' follow-up with students. The Office of the Vice Chancellor for Student Affairs reviews all Students of Concern reports and checks if students who are reported for cheating are being reported for other concerns by other offices and faculty ([II.B.3-26](#)). This helps to identify students who may be having repeated incidents across the campus and provides a basis by which to plan solutions.

### ***Learning Support Equipment***

Data on usage of the open computer lab and responses on the annual library survey related to the lab are compiled and shared in an annual report by the Digital Initiatives librarian.

Problems with the open lab are reported in an online reporting log and at twice-monthly KAP-LIB-IT meetings. IT problem reports have resulted in improving firewall protection for the campus, replacement of the print card vending and reader systems, and adding software such as Acrobat Pro and plug-ins to support MyMathLab and My IT Lab ([II.B.3-27](#)).

## **ANALYSIS AND EVALUATION**

Kapi'olani Community College continuously evaluates its library and learning support services and makes appropriate changes to improve, ensuring that student learning outcomes and student needs are met. Survey results are compiled and shared on the library website. Instruction librarians regularly assess student learning outcomes for their library workshops and make changes to improve instruction based on assessment results.

Tutoring services offered in the library are evaluated via survey and student work. In addition, the Learning Center Coordinator has spearheaded the increased collaboration of tutoring

services across campus. Other learning support services such as the Testing Center, the SOS Program, and learning support equipment are regularly evaluated to make sure student needs are met and the services are improved.

---

**II.B.4. When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)**

---

#### EVIDENCE OF MEETING THE STANDARD

The College maintains and documents formal agreements or contractual arrangements when collaborating with other institutions or other sources, and ensures effectiveness, security, maintenance, and reliability of its services

##### *Collaboration on Electronic Resources.*

The College maintains formal agreements with database vendors ([II.B.4-1](#), [II.B.4-2](#)) and collaborates with the UH system and Hawai'i Public Library System to provide library services such as the Hawai'i Voyager library catalog and shared databases through the Hawai'i Library Consortium ([II.B.4-3](#)), the Community College Library Consortium, and Medical Libraries Consortium of Hawai'i (MLCH). These e-resources are evaluated via usage statistics, cost, and an annual spring survey. When evaluating database renewals, the Reference team annually looks at a summary prepared by the Electronic Resources Librarian that shows usage statistics and cost of each database. In the 2017 LLR spring survey of students, 92 percent agreed or strongly agreed with the statement: *I get enough articles from the library databases to meet my class needs* ([II.B.4-4](#)). (ER 17)

##### *Collaboration on IntraSystem Loan*

Library users can transfer items from other UH System libraries through IntraSystem Loan at no cost. The UH Libraries IntraSystem Loan committee discusses, revises, and maintains a listing of its policies ([II.B.4-5](#)). In the 2017 LLR spring survey of students, 90 percent agreed or strongly agreed with the statement: *I am generally satisfied with obtaining items from other UH Libraries via KCC Library (IntraSystem Loan).*

### ***Collaboration on Learning Support***

The College partners with the UHCC system to provide Brainfuse as an online tutoring service to support students in a wide range of subjects ([II.B.4-6](#), [II.B.4-7](#)). Students also have free access to English, math and science tutoring via the Online Learning Academy, which is provided by UH Mānoa at no cost to the College ([II.B.4-8](#)).

### ***Security***

Library users use their UH username and password to log in to Library computers. Library electronic databases also require UH username and password login when users are off campus to ensure that users are affiliated with the College. Library materials are tagged with 3M strips that sound when sensitized and leaving the Library through its security gates.

### ***Effectiveness, Maintenance, and Reliability***

The Library and Learning Resources evaluates the effectiveness of its services on a regular basis, providing maintenance when necessary to ensure reliability. See Standard II.B.3 for more details.

## **ANALYSIS AND EVALUATION**

The College maintains and documents formal agreements or contractual arrangements when collaborating with other institutions or other sources, and ensures effectiveness, security, maintenance, and reliability of its services. The Library has an appropriate number of staff to fulfill the needs of library and other learning for the students. The College has partnerships with local libraries, archives, and information resources, which support unique needs. All contracts and arrangements remain under the supervision of the library for evaluation of effectiveness and quality.

## II.C. Student Support Services

---

**II.C.I. The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER 15)**

---

### EVIDENCE OF MEETING THE STANDARD

Kapi‘olani Community College regularly evaluates the quality of student services in support of student learning and the College’s mission. The College provides counseling and advising services through a decentralized organizational model, with counselors assigned to departments in three academic clusters, based on the programs they offer:

Cluster 1: Business, Legal, and Technology Education; Culinary Arts; and Hospitality.

Cluster 2: Emergency Medical Services, Health Sciences, and Nursing

Cluster 3: Arts and Sciences (four departments: Arts and Humanities; Languages, Literature, and Linguistics; Math and Natural Sciences; and Social Sciences). The counselors in the Maida Kamber Center provide career, transfer and graduation services.

Other counselors are assigned to targeted populations serving student needs in programs including

1. First-Year Experience
2. Transfer-Year Experience
3. Native Hawaiian CTE Kulia ma Kapi‘olani
4. Native Hawaiian Student Success
5. Kuilei Outreach Program (High School Outreach Program)
6. Disabilities Support Services
7. Student Parent Program
8. TRiO Student Support Services
9. Veterans and Military Resource Center
10. Mental Health and Wellness
11. Online Learner Success
12. Employment Prep Center
13. Retention/Early Alert

(see II.C.5. for descriptions of these services for targeted populations.)

In this decentralized model, student services personnel in the academic clusters share the responsibility for student success with instructional faculty. Discussions about student access, progress, learning, and success take place in department meetings.

To promote collaboration and ensure communication across the various counseling units, the counselors meet in the Counseling and Academic Advising Council (CAAC). The CAAC is responsible for discussion, analysis and recommendations on issues related to (a) academic advising; (b) student engagement, development, and success; and (c) professional standards and practice. (See II.C.5.)

The chair of the CAAC serves on the Chancellor's Advisory Council (CAC) in order to promote collegewide discussions about student access, progress, learning, and success from a Student Services point of view.

Student support areas include enrollment services (i.e. admissions, registration, financial aid), counseling and advising services (academic programs, targeted populations), disability services, career and job placement services, and student life.

The College evaluates its student support services primarily through program review. Additionally, services are evaluated through the review of grants and initiatives, the Community College Survey of Student Engagement (CCSSE), and the Student Success Pathways.

### ***Program Review***

#### *Annual Report of Program Data and Comprehensive Program Review*

The College's student support services are provided in a variety of delivery methods. Each program has goals for the year and is evaluated primarily through the Annual Report of Program Data (ARPD) (II.C.1-1) and the three-year Comprehensive Program Review (CPR) (II.C.1-2), which are directly aligned with the College's mission and Strategic Plan.

Student Affairs submits a single ARPD encompassing all student support services that fall under the Vice Chancellor for Student Affairs. Academic programs submit ARPDs that include counseling and advising provided within those respective programs and that fall under the Vice Chancellor for Academic Affairs. Once reviewed and approved by the respective Vice Chancellors, the reports are released on the University of Hawai'i Community College ARPD system website (II.C.1-1).

The data and analysis provided in the ARPD allow for monitoring of program improvement. The ARPD also serves to justify, inform, and prioritize budget requests made within the College's Planning and Assessment Integrated with Resource Allocation (PAIR) process with the aim of supporting students and the mission of the College.

### ***Grants and Initiatives***

The College also evaluates its services and programs through its participation in state initiatives and federal grants designed to meet student needs. Some programs require additional assessment and external review, including TRiO Student Support Services and Kūlia ma

Kapi'olani, supporting Native Hawaiian students in Career and Technical Education programs. These programs are evaluated annually according to state and/or federal regulations ([II.C.1-4](#) and [II.C.1-5](#)).

In addition, programs supported with grants secured by the College are reviewed and evaluated on a regular basis. These programs include the U.S. Department of Labor's Trade Adjustment Assistance Community College and Career Training (TAACCCT) grant, Gear Up (Hawai'i P-20 Partnerships for Education), and Lunalilo Scholars.

### ***Community College Survey of Student Engagement (CCSSE)***

The College's regular participation in the CCSSE provides a secondary form of evaluation of its student support services. The frequency with which students use identified support services such as career counseling, disability services, and advising is examined, as is students' perceived satisfaction and rating the importance of those services. CCSSE reports are used to identify patterns emerging in the analysis of the data, such as the pattern that part-time students were significantly less likely to use learning resources as compared with full time students ([II.C.1-6](#)).

### ***Student Success Pathways***

All student support services and programs under the direction of the Vice Chancellor for Student Affairs evaluate the quality of their services and programs through monitoring and assessing of their student success strategies via their Student Success Pathway plans ([II.C.1-7](#)). Faculty and staff report their progress on a quarterly basis and make changes for

## **LUNALILO SCHOLARS PROGRAM**

Meet Maria, a 27-year old single parent when she entered Kapi'olani CC in Spring 2013. A month later she withdrew from school after a motorcycle accident left her with several broken bones and a brain injury. Struggling with short-term memory issues, Maria felt detached from those around her, finding it challenging to remember certain events in her life. Attending the Lunalilo summer bridge program helped Maria build friendships with other Scholars and gave her the hope and reassurance she needed to move forward. After one year at the College, Maria transferred to UH Mānoa and graduated in May 2016 with a bachelor's degree in Communication. Now 33, she works at UH Mānoa as a marketing and sales coordinator in the Student Media department.

The King William Charles Lunalilo Scholars Program has graduated five cohorts, tripled in size, and transformed dozens of lives since its inception in Summer 2012 with just 22 students. The mission of the program is to provide opportunities for students who never considered higher education because of financial or other barriers. Their diverse backgrounds include former foster youth, ex-offenders, former substance abusers, physical, emotional, and sexual abuse victims, single parents, and individuals with disabilities. 70% are Pell eligible, meaning they live below the poverty line. The Program focuses on both academic and personal support, allowing these students to build a foundation for success in the first year of college and beyond. Many start the program with little more than a strong desire to work hard and get ahead. Some are homeless or near the brink of homelessness, or stuck in low paying jobs without possibilities for career advancement. Once in the program, however, Lunalilo

improvements, as needed, to ensure that students' learning is being continually and effectively supported. The Student Success Pathway is aligned with the College's Strategic Plan and includes intentionally-designed and structured educational experiences for students in pursuit of academic, career, and lifelong learning goals from their point of entry to graduation and/or transfer pathways that prepare them for their productive futures. All Student Success Pathway plans are tracked by the Student Success Coordinator and the College's administration.

### ANALYSIS AND EVALUATION

The College regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, support student learning and ensure accomplishment of the mission of the College (II.C.1-8). The decentralized counseling and advising model provides specialized support for the various CTE departments and also for the liberal arts students. In addition, counseling, advising and mentoring is provided for many targeted populations at the College in order to provide for their specific needs.

---

**II.C.2. The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.**

---

### EVIDENCE OF MEETING THE STANDARD

The College identifies and assesses learning support outcomes and provides appropriate services and programs to achieve those outcomes, using assessment data to continuously improve student support programs and services. Counselors have been using Taskstream to record their assessment efforts (II.C.2-1).

The learning support outcomes are addressed through the Counseling Student Learning Outcomes (SLOs). Originally created in spring 2013, the Counseling SLOs measure effectiveness and provide data for improving programs within the College. Having completed

## LUNALILO SCHOLARS PROGRAM (CONT.)

Scholars gain confidence, peer support, and skills. They begin to realize they *can* take steps to break the poverty cycle, find their purpose, and give back to their community. Of particular note is the support provided to Native Hawaiian students. Up to 95% of Lunalilo Scholars are Native Hawaiian, with higher transfer and graduation rates than their non-Hawaiian peers. Of the 69 certificates or degrees earned between Fall 2012 and Spring 2017 by Scholars, 54 belong to Native Hawaiians, four of whom completed a Bachelor's degree, and two are in graduate school. Enjoy the story of another former Lunalilo Scholar, Dionne "Malia" Infiel, at

<https://www.youtube.com/watch?v=dMcnSQuUxb4>

one assessment cycle, counselors updated their SLOs and corresponding rubric in fall 2015 to better reflect their programs' services ([II.C.2-2](#)). The Counseling SLO assessment is currently on a three-year cycle: AY 2016-2019. Based on their assessment of the initial three-year cycle, counselors have designated the third year of the cycle to be a year of reflection dedicated to the continuous improvement of the assessment process ([II. C. 2-3](#)).

Counselors regularly discuss improvements at individual department meetings, Student Affairs Leadership Team (SALT) meetings ([II.C.2-4](#)), the annual Assessment Café ([II.C.2-5](#)), and the Counseling Assessment Leaders group ([II.C.2-6](#)). These venues provide opportunity for counselors to (a) share their assessment experience with other counselors, (b) find where their services intersect and possibilities for collaboration, (c) discuss overall assessment progress, changes/updates, improvements, and resources needed, and (d) determine how to use their results for further program improvement.

The Kekaulike Information Services Center (KISC), which is primarily responsible for Admissions, Graduation and Registration, is in the process of revising its Service Area Outcomes (SAO) ([II.C.2-7](#)). Various meetings between the KISC program unit heads and student affairs assessment coaches were held to help gain a better understanding of assessment and its process. In order to determine SAOs that would fit its goals and services, KISC implemented a mini-survey in fall 2017 ([II.C.2.8](#)). Using these survey data, KISC staff are currently working on an assessment plan to develop, measure, and analyze newly revised SAOs to implement by fall 2018.

The Office of Student Activities (OSA, [II.C.2-9](#)) is currently in the process of developing its SAOs. The program has already collected data through a pre-survey ([II.C.2-10](#)), and the results will be used by the program to create SAOs to evaluate the program's effectiveness. Additionally, OSA also oversees the Board of Student Activities (BOSA, [II.C.2-11](#)). BOSA uses SLOs ([II.C.2-12](#), [II.C.2-13](#), [II.C.2-14](#), and [II.C.2-15](#)) to monitor the student leaders' learning as a result of serving on the BOSA team. The program is still in the process of collecting data ([II.C.2-16](#)) on these SLOs and plans to analyze the results in summer 2018.

## **ANALYSIS AND EVALUATION**

The College identifies and assesses learning support outcomes and provides appropriate services and programs to achieve those outcomes, using assessment data to continuously improve student support programs and services. Through various discussion forums and reporting, the College continuously improves student support programs and services. The assessment of learning takes the form of the student learning outcomes and service area focus, depending on the role and function of the unit. Moreover, student learning information is captured in program review and as part of the goals identified in grants. The assessment of learning forms the basis of resource allocations to close identified learning gaps.

---

**II.C.3. The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services regardless of service location or delivery method. (ER 15)**

---

**EVIDENCE OF MEETING THE STANDARD**

The College ensures that equitable access to appropriate, comprehensive, and reliable student services is available to all students regardless of service location or delivery method. In addition, the College offers a full range of student support services, which includes access to year-round admissions, records, financial aid, veteran certification, academic advising, and targeted populations counseling support. The College uses various modalities to ensure comprehensive and reliable services: website information, email/email newsletters, telephone, web-based video conference, in-person/face-to-face contacts, workshops, subscribed text messaging, and mail, thus serving its diverse population, including off-island and distance education students ([II.C.3-1](#), p. 28).

***Student Outreach***

The College's Kuilei Outreach Program dedicates two full-time counselors to visit high schools and middle schools to introduce prospective students to the College and to encourage matriculation to postsecondary education. These counselors guide incoming students through the college application, assessment, academic advising and application for financial aid. This program also supports three types of dual-credit students: Early Admit, Running Start, and Early College ([II.C.3-2](#), [II.C.3-3](#), [II.C.3-4](#)).

Our First Year Experience (FYE) program offers mandatory orientation to support students' smooth transition into college. Orientation workshops are offered on campus in face-to-face, over-the-phone, and web personalized orientation formats for students who are not able to come to campus. FYE maintains a central location on campus to assist first-year students with social as well as academic adjustment throughout their first two semesters of college ([II.C.3-5](#)).

Counselors also service students enrolled in off-site programs. For example, the Emergency Medical Services Department offers courses and programs off-site at neighbor island University of Hawai'i Community College campuses. To support the students enrolled in these programs, counseling staff make regular in-person visits as well as maintaining accessibility through email and phone contact.

The Kekaulike Information and Service Center (KISC) is a one-stop center providing student services in a convenient, coordinated approach to assist students in the areas of admissions, registration and records ([II.C.3-6](#)). At KISC, students receive assistance with academic transcripts, enrollment and graduation verification, petitions for graduation, U.S. veterans'

enrollment verification certification, and financial aid issues. Forms, processes, and services may be accessed in-person, on the phone, via campus website, email, fax and mail ([II.C.3-7](#), DE Plan, p. 25).

Students can apply for admission to the College via the University of Hawai‘i Common Application electronic form, accessible via the College’s website ([II.C.3-8](#)). Through the campus website, students can view course registration status ([II.C.3-9](#)). They may also access various admissions/registration related forms (e.g. request official transcripts, apply for graduation, obtain military verification, add or drop a course, file for early admissions, and change major or add a second major, ([II.C.3-10](#)) and submit completed forms electronically or via fax.

High school students interested in the College’s Dual Credit program can apply online ([II.C.3-11](#)). These students are offered the same distance education options as their college student counterparts. Dual Credit students are able to email required documents, health documents and test scores to the Kuilei Outreach Program for processing. They may also register for courses, add/drop courses, view their schedule, update their student status, and pay their tuition via MyUH online within academic deadlines. As of fall 2017, all University of Hawai‘i Community College (UHCC) students register for classes via STAR Guided Pathway System (GPS). All students, including distance education students, may call or email KISC with their questions regarding admissions and registration.

The Honda International Center (HIC) provides specialized services for international students in the areas of international admissions, orientation, F-1 visa regulatory advising, international transcript evaluation, housing, and cultural adjustment counseling. Language support for students is also provided in Korean, Chinese, and Japanese, which are the three main language groups of the international student population. These services are available to students virtually—via email or phone as well as in person.

### ***Matching Services to Student Needs***

Students have access to numerous online services; thus, distance education and off-site students are served equitably. Campus services can be accessed wherever internet is available. BrainFuse, an online tutoring service, is available for all students (see II.A.7, II.B.1).

STAR is an electronic, web-based tool that is accessible to students, counselors/advisors, and student support staff as well as department chairs and administrators. STAR is integrated with Banner, the UH system’s student information system, and has been adopted by the UH system as the official arbiter of degree/program completion. Students utilize the module STAR Guided Pathway System (GPS) to view grades and unofficial transcripts, track progress toward graduation, create academic plans toward completing different degree/program requirements, project time to degree completion based on personal matriculation and velocity patterns, search

and apply for UH system scholarships, and register in coursework every semester. Students may also use STAR in collaboration with their academic counselor ([II.C.3-12](#), p. 32).

Dual credit/early college students taking college courses at high school locations can access off-site admissions application workshops, orientations, assessments, and workshops for financial aid.

To increase student access to college and to assist students in paying for their educational expenses, the Financial Aid Office administers all financial aid programs, federal or local, in compliance with applicable laws and regulations. The Financial Aid Office maintains integrity, accuracy and confidentiality in the delivery of financial assistance to eligible admitted students. Types of aid available to students include:

- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal work-study program
- Institutional scholarships
- Other scholarships

The College's website provides students with information on the services available from the Financial Aid Office and with access to forms pertaining to obtaining aid ([II.C.3-13](#)).

Information and applications for scholarships are available on a systemwide scholarship webpage ([II.C.3-14](#)). Informational workshops on how to apply for scholarships are conducted every spring.

Students in need of assistance with completing the Free Application for Federal Student Aid (FAFSA) may obtain help at the Kīkaha o Lae'ahi: Student Success Center, where peer advisors help them complete the application for federal financial aid. The College provides information and resources via phone, college website, and email. Students also have access to walk-in counter services five days per week.

Finally, the College offers a full range of services for students with disabilities, which help with access to course curriculum, mobility services and technology that allows students to demonstrate mastery of course and program content. The College is committed to a barrier-free campus, ensuring that all students have equal access to education and making the necessary academic adjustments to ensure equal access for students with disabilities. This commitment is in accordance with applicable state and federal laws, including the Americans with Disabilities Act, and Sections 504 and 508 of the Rehabilitation Act ([II.C.3-15](#)).

## **ANALYSIS AND EVALUATION**

The College ensures that equitable access to appropriate, comprehensive, and reliable student services is available to all students regardless of service location or delivery method. Recent

improvements have made academic and personal counseling available through various modalities. The College provides services designed to support students' personal as well as academic growth and is continually working to ensure students are able to access these services. The College's role as an open-door, post-secondary institution has as its core mission the role of offering opportunity to first generation and other historically underserved groups.

---

**II.C.4. Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has the responsibility for the control of these programs, including their finances.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The College's co-curricular programs support the College's mission through relevant programming contributing to the social and cultural dimensions of the educational experience of its students. The College's co-curricular programs are regulated by educational policies and standards of integrity that are robust and rigorous. The student services that sponsor these activities are reviewed in the Annual Report of Program Data for Student Services ([II.C.4-1](#)).

#### ***Student Engagement and Development***

The College offers numerous co-curricular activities and events that align with the College's mission ([II.C.4-2](#)) and support the engagement and development of indigenous, local, national, and international students. These activities and events enhance students' cultural competency and experiences and help them build meaningful connections with their peers, faculty, staff, administration, and Hawai'i's communities. The following are regularly promoted and offered throughout the year:

- Social
  - International Film Night Event ([II.C.4-3](#))
  - Board of Student Activities (BOSA) Calendar of Events ([II.C.4-4](#))
  - Ice Cream Social ([II.C.4-5](#))
  - E.A.R.T.H. Day ([II.C.4-6](#))
  - KCC Community Partner Fair ([II.C.4-7](#))
  - International Café ([II.C.4-8](#))
  
- Cultural
  - Kūlia ma Kapi'olani – Native Hawaiian Career & Technical Education Project ([II.C.4-9](#))
  - Kapo'oloku Program for Native Hawaiian Student Success ([II.C.4-10](#))

- Mālama Māunuunuu ([II.C.4-11](#))
- International Festival ([II.C.4-12](#))
- ‘Aha Kalāualani events ([II.C.4-13](#))

The College develops co-curricular programs that reflect the diverse student demographics. For example, in March 2017, the Filipino Club, along with the Office of the Vice Chancellor for Student Affairs, coordinated and hosted the annual Pamantasan Conference ([II.C.4-14](#), [II.C.4-15](#)), bringing together students, staff, and faculty from various campuses throughout the University of Hawai‘i system to engage in dialogue surrounding issues facing Filipino students and community and to celebrate the Filipino culture in Hawai‘i.

The College offers other co-curricular events that showcase student achievement and/or encourage learning outside of the classroom:

- Annual New Media Arts Showcase ([II.C.4-16](#))
- Performing Arts Showcase ([II.C.4-17](#))
- Koa Art Gallery ([II.C.4-18](#))
- February Fest for Student Success ([II.C.4-19](#))
- College Transfer & Employment Fair ([II.C.4-20](#))
- Service Learning ([II.C.4-21](#))
- Secrets Of Success Workshops ([II.C.4-22](#))
- Find Your Passion ([II.C.4-23](#))

Registered Campus Organizations (RCOs) are special interest groups for students organized around academic majors or departments. Registered Independent Organizations (RIOs) are groups formed around interests that include social, leisure, ethnicity, service, or politics ([II.C.4-24](#)). RCOs and RIOs enrich students’ social, cultural, and educational experiences and provide opportunities for leadership training, enhanced career skills, soft skill development, and networking opportunities. All RCOs and RIOs on campus are designed, created, and run by students ([II.C.4-25](#)). Although faculty serve as club advisers, faculty involvement is limited to encouraging student leadership.

The College also increases students’ knowledge about Title IX by promoting gender equity, sexual violence awareness, prevention activities, and intervention strategies primarily through the College’s PAU Violence Coalition ([II.C.4-26](#); [II.C.4-27](#)). The College developed two educational videos on Title IX and shows them during New Student Orientation ([II.C.4-28](#)). A gender neutral bathroom is available in Ilima Building and PAU (Stop) Violence Activities ([II.C.4-29](#)) take place regularly. There is a Respect The Line website ([II.C.4-30](#)) and mandatory sexual harassment training ([II.C.4-31](#)).

The College does not have any athletic programs; however, students may participate in the IM LeeSports League ([II.C.4-32](#)), an intramural sports program that challenges other colleges within the University of Hawai‘i System.

### ***Student Leadership***

The College not only nurtures the social and cultural dimensions of its students, but also the development of student leadership and learning, particularly through its Chartered Student Organizations (CSOs) ([II.C.4-33](#)), which consist of three entities: (1) the Board of Student Activities (BOSA), (2) the Board of Student Publications (BOSP), and (3) the Associated Students of Kapi‘olani Community College (ASKCC). These organizations bring together stakeholders from all areas of the campus to support students in developing their leadership skills, learn new skills and insights about themselves, and engage with the campus community. CSOs are an integral part of campus life and the shared governance structure. Each CSO conducts an annual report ([II.C.4-34](#)) to attest to their viability and continued alignment with the College’s mission.

The **Board of Student Activities** (BOSA) oversees campus activities and makes sure that students have a way to interact socially with one another to maintain a healthy and positive campus atmosphere ([II.C.4-35](#)).

The **Board of Student Publications** (BOSP) is responsible for promoting and overseeing student publications ([II.C.4-36](#)). The mission of the Board of Student Publications is to (1) provide media for instruction and training; (2) showcase student talents; (3) provide media for sharing information, ideas and opinions; and (4) support academic program endeavors.

- *Kapi‘o* News, the online student newspaper, provides students with the opportunity to investigate, write, edit, photograph, and design an online publication ([II.C.4-37](#))
- *Ka Hue Anahā* Journal of Academic Research & Writing ([II.C.4-38](#))
- *Lē‘ahi*: Creative Arts Journal ([II.C.4-39](#))
- *Pueo O Kū*: Journal of Science, Technology, Engineering, and Mathematics ([II.C.4-40](#))
- The new Creative Media Lab provides student access to technologies and resources for academic and personal projects while reducing common financial barriers. The lab provides access to computers, project tables, cameras, and Adobe products and offers free training and equipment loans ([II.C.4-41](#)).

The *Kapi‘o* News is a prime example of student leadership, learning, and campus connections. It is run and written by students for students, and student reporters and writers seek to learn about everyday happenings across the College and the communities it serves.

The **Associated Students of Kapi‘olani Community College** (ASKCC), also known as

Student Congress, is comprised of student officers, leaders, and active, participatory members. This organization maintains a strong presence as one of the College's authorized governance organizations and the official channel between students and the College administration in the areas of college governance, student rights, academic regulations, curriculum development, instruction, support services, co-curricular activities, and all fees assessed by the College to students, including tuition. ASKCC is a voting member of the Chancellor's Advisory Council (CAC), and updates the CAC on its governance activities at each meeting. See IV.A.2 for details related to the CAC.

According to the ASKCC Charter, Articles V & X regarding finances, short and long-term budgeting and expenditure of allocated funds are subject to a review every year by the Chancellor ([II.C.4-42](#)). Additionally, all governing bodies of the ASKCC shall be subject to annual audits in accordance with the College's schedule for audits of non-general fund accounts.

Student leaders in these organizations attend nationally recognized leadership conferences, such as the LeaderShape Institute ([II.C.4-43](#)), where students are challenged to explore, engage in dialogue, and reflect on building their leadership capacity, what kind of leader they want to be, and how they want to lead.

Another student leadership opportunity is Alpha Kappa Psi, the chapter of the Phi Theta Kappa International Honor Society, which offers academically excellent students international recognition and opportunities to develop records of leadership and service to the College and the community. The society is built on four hallmarks: leadership, scholarship, service and fellowship. Alpha Kappa Psi is an active chapter that organizes many campuswide activities and events ([link](#)). The chapter participates in regional events with other chapters in the Pacific Region, and students regularly travel to international society events. The chapter, individual members, and officers have won many awards at the international and regional levels.

## **ANALYSIS AND EVALUATION**

The College's co-curricular programs support the College's mission and address institutional learning outcomes through relevant programming contributing to the social and cultural dimensions of the educational experience of its students; these programs are conducted with sound policy and standards of integrity that guide the institution's control of programs and finances. Policy and institutional oversight guide the establishment and management of these programs to ensure that they support student development and learning. The College recognizes students' role in governance and promotes co-curricular programs in developing student learning outside of the classroom.

---

**II.C.5. The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The College provides counseling and academic advising programs to support students' growth towards the achievement of their educational objectives. Students receive timely, useful, and accurate information about requirements, graduation, and transfer. Counseling services assist students in clarifying career and life goals and in developing an appropriate course of study based on their goals, aptitudes, academic strengths and interests. The College embraces a holistic approach to counseling, ensuring students are supported both academically and personally. Professional development provides counselors/advisors the opportunity to learn best practices and to stay abreast of curricular changes across the system.

#### ***Embedded Academic Program Counseling and Targeted Services***

The College uses embedded academic program counseling and targeted services to support the development and success of all students. Counseling services and orientation are available in a variety of modalities, including face-to-face and online. Each academic and support program provides counseling/advising either by walk-in or appointment listed on a variety of sources (e.g. College website, handouts, emails, etc.) ([II.C.5-1](#), [II.C.5-2](#)). All counselors, regardless of program/department, are able to best serve their population due to their extensive experiences with students directly involved with the program.

In order to provide specialized academic counseling to students and keep in close contact with instructional programming, counselors are embedded in the academic programs. In this way, academic program counselors can work closely with department chairs and instructional faculty to ensure timely, consistent, and accurate delivery of counseling services. Academic program counselors report to their department chairs and participate fully in department program review processes; as members of academic departments, they report to the program dean.

Embedded counselors are in the following departments:

1. Business, Legal, and Technology
2. Culinary Arts
3. Health Sciences and Emergency Medical Services

4. Nursing
5. Hospitality and Travel and Tourism
6. Maida Kamber Center for Career Exploration, Transfer, and Graduation Services (MKC, serving the Arts and Sciences Programs)

Targeted Populations counselors focus on retention strategies and provide intentional counseling support and programming to students to enhance college persistence and success. Targeted Populations counselors report directly to the Vice Chancellor for Student Affairs.

Targeted Populations programs include:

1. First-Year Experience
2. Transfer-Year Experience
3. Native Hawaiian CTE Kulia ma Kapi‘olani
4. Native Hawaiian Student Success
5. Kuilei Outreach Program (High School Outreach Program)
6. Disabilities Support Services
7. Student Parent Program
8. TRiO Student Support Services
9. Veterans and Military Resource Center
10. Mental Health and Wellness
11. Online Learner Success
12. Employment Prep Center
13. Retention/Early Alert

### ***Timely, Accurate Information***

All students receive timely, accurate information on relevant academic, transfer, and graduation requirements based on their possible or selected academic goals in numerous ways:

- Upon admission all new and transfer students receive email notification regarding introduction to the College and next steps.
- All new students participate in a mandatory three-part New Student Orientation (NSO) series to navigate the registration process, learn about the campus and its resources, and ensure that they understand the requirements related to their program of study ([II.C.5-3](#), [II.C.5-4](#)).
- All students participating in the mandatory First Year Experience (FYE) and Transfer Year Experience (TYE) orientations must see a counselor within the desired academic unit before they are allowed to register.
- Program prerequisites, admissions requirements (for select programs), degree requirements, and academic planning sheets are posted on departmental web pages for easy public and student access ([II.C.5-5](#), [II.C.5-6](#)).

- Academic counselors work with program coordinators and program directors to communicate important policies, program updates, and deadlines to students via emails and classroom presentations.
- Academic counselors work closely with UH System baccalaureate institutions to provide seamless transfer pathway for students ([II.C.5-6](#)).
  - University campus tours are offered for interested students before they transfer ([II.C.5-7](#)).
  - Counselors from the University of Hawai‘i at Mānoa and the University of Hawai‘i at Hilo are housed in the College’s Maida Kamber Center to provide prospective transfer students with on-site access to guidance related to their respective baccalaureate institutions.
  - Transfer workshops are offered and designed for students transferring to four-year institutions.
- Counselors use the STAR GPS academic planner to help students understand their academic pathway, graduation requirements, and transfer options ([II.C.5-8](#)) and identify possible degree/certificate completion and/or transfer timelines. All students can access their STAR GPS planner through their MyUH web portal.
- Counselors regularly participate in updating information for students in the catalog, class availability schedule, and College website.
- Maida Kamber Center (MKC) counselors also advise students who may not have a clear vision of their academic/career goals.
- The library offers Secrets of Success (SOS) workshops to provide students with tools to best navigate through their college career.

### ***Professional Development***

Counselors ensure ongoing development of quality services and professionalism by continually engaging in professional development to remain current in the field and to promote student success. Counselors are provided with these opportunities through system workshops such as the Academic Advising and Transfer Network Conference ([II.C.5-9](#), [II.C.5-10](#)) and the annual systemwide conference for all faculty and staff, the Hawai‘i Student Success Institute ([II.C.5-11](#)). There are on-campus workshops such as the Counselor Academy for new counseling faculty ([II.C.5-12](#)) and webinars such as the NASPA Student Affairs Administrators in Higher Education Webinar ([II.C.5-13](#)).

Professional development provides counselors and advisors the opportunity to learn best practices and to stay abreast of curricular changes across the system. Counselors from all units meet on a monthly basis as the Counseling and Academic Advising Council (CAAC) to discuss topics relevant to the current college environment, best practices, and system, institutional, and program-level changes. The CAAC and its subcommittees promote programming and assessment of services to prepare and support counselors ([II.C.5-14](#), [II.C.5-15](#)). CAAC has a

Professional Development committee ([II.C.5-16](#)). There is an Annual Assessment Cafe (C2D2), which is a review of best practices for assessment ([II.C.5-17](#)). The CAAC encourages the use of the Counseling Services Evaluation tool for student feedback ([II.C.5-18](#)) and student service surveys ([II.C.5-19](#)). Each counseling unit by cluster or department develops procedures for the distribution and collection of the evaluation tool.

Counselor performance is also assessed by peer evaluations completed for the purposes of contract renewal, tenure and promotion recommendations. Written evaluations are given and discussed in the dossiers ([II.C.5-20](#)).

## ANALYSIS AND EVALUATION

The College provides counseling and academic advising programs to support student development and success. Counselors embrace a holistic approach to counseling, and through this model, they are able to address counseling issues that their students may face. Students are supported both academically and personally throughout their time at the College and as they prepare for their next academic goal. Students also receive timely, useful, and accurate information about requirements for programs, graduation, and transfer. The College tailors communication of information such as emails and handouts, and conducts orientations specifically for students entering the College for the first time, transferring from another college, or entering a specific program; each orientation is created for students during that specific stage of their college journey.

Professional development opportunities on campus and elsewhere provide counselors the opportunity to learn best practices and to stay abreast with curricular changes across the system. Current issues and trends that affect the community are in constant review so that counselors are well equipped with techniques and services that are deemed in the best interest of the students.

---

**II.C.6. The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER 16)**

---

## EVIDENCE OF MEETING THE STANDARD

The College is an open-access postsecondary institution. The College has adopted and adheres to admission policies consistent with its mission statement (see II.C.1-8) and with Board of Regents Policy RP 5.211, Admissions ([II.C.6-1](#)), which specifies the functions and target population for community colleges. The College's admission policies mirror its mission and commitment to provide "open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals..." by clearly defining qualifications for open enrollment and

select admission programs. Admissions policies and regulations are stated in the College's Catalog and in the KISC Admissions Review Process ([II.C.6-2](#), p. 32, see II.C.3).

The Admissions website provides individualized landing pages for the following students: first time college student, transfer student (from a non-UH campus), returning student, international or non-resident student, current high school student (dual credit), transfer student (from other UH system campus), active military or veteran service members, or "I'm not sure" (designation for students who have not selected or decided on a major) ([II.C.6-3](#)). Prospective students can apply online and complete the UH Common Application ([II.C.6-4](#), [II.C.6-5](#)).

Select admission programs such as those in Nursing, New Media Arts, Emergency Medical Services, and Health Sciences, where prerequisite skills and knowledge are necessary for program success and/or enrollment is limited by available resources, are consistent with the Board of Regents Policy RP 5.211 and policies required by program accrediting bodies ([II.C.6-6](#), [II.C.6-7](#), p. 34). Program admission requirements (e.g., prerequisite requirements and recommended preparation) are specified in the catalog ([II.C.6-8](#), p. 432, ER 16) and on the programs' web pages ([II.C.6-9](#), [II.C.6-10](#)), as well as during pre-admission information sessions (see II.C.5).

Once students are admitted, they receive communication about next steps regarding New Student Orientation (NSO) from the First Year Experience or Transfer Year Experience programs (see II.C.5). International students' applications are processed through the Honda International Center ([II.C.6-11](#)), which provides the students with information about next steps after admissions and mandatory attendance at NSO.

Degree and certificate completion and transfer advising are delineated online, in the catalog, and in person during counseling appointments. Counselors assist students in developing personalized educational plans and clear educational pathways using a variety of tools: STAR GPS, academic planning sheets, and the College catalog (see II.C.5). For students who need more guidance in selecting a pathway, the Maida Kamber Center offers career exploration services and assessments ([II.C.6-12](#), [I.C.6-13](#)). Additionally, Office of Academic and Office of Student Affairs programs and departments collaborate and participate in targeted campus events such as the Health E-Fair, Fall Fest for Student Success, February Fest for Student Success, College Transfer and Employment Fair, STEM Undergraduate Research Fair, Middle School AVID Strive For Your Highest Fair, to educate current and prospective students on various certificates, degrees, transfer, and career opportunities ([II.C.6-14](#), [II.C.6-15](#), [II.C.6-16](#), [II.C.6-17](#), [II.C.6-18](#), [II.C.6-19](#)).

The UH System transfer initiatives such as Ka'ie'ie (for transfer to UH Mānoa), articulation agreements (see II.A.2 and II.A.10) and Auto Admit, along with information on how to prepare for transfer to baccalaureate institutions, help students experience seamless transfers to four-year institutions within and outside of the UH system ([II.C.6-20](#)). Counselors also help students

understand transfer requirements by offering workshops such as *Tips to Transferring to a 4-Year University* to prepare students for university transfer as well as completion of degrees and certificate programs. Representatives from the UH system institutions also hold transfer workshops for targeted populations such as international students to help them understand the process ([II.C.6-21](#)).

To ensure effective oversight of admissions policies and procedures, as well as in the areas of registration, records, transfer and graduation, the registrars and admissions officers from the ten UH campuses, along with Banner Central (the management unit for the systemwide student information system) and the College's liaison to the UH Associate Vice President of Student Affairs, meet on a quarterly basis ([II.C.6-22](#)) to discuss admissions, improving the online application, registration, records, residency, transfer credit evaluation, graduation, systemwide initiatives or pilot projects, best practices, and college policies/procedures.

## ANALYSIS AND EVALUATION

The College has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its program and defines and advises students on clear pathways to complete degrees, certificate, and transfer goals. The College provides clear, accurate and consistent information through print, electronic format, websites and public service announcements. This information is constantly assessed for accuracy and adjusted as needed by departments that create the information sources. Furthermore STAR Guided Pathway to Graduation tool provides all students information about their academic pathway, required courses, transfer options, and graduation trajectory.

---

### **II.C.7. The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.**

---

## EVIDENCE OF MEETING THE STANDARD

The College evaluates its admissions policies and procedures to ensure effectiveness and impartiality. In collaboration with the other community colleges in the UH System, the College also regularly reviews its placement instruments and practices, particularly for proper cut scores for courses in the mathematics and English pathways.

### ***General Policies and Practices for Admission***

Admissions policies and procedures were reviewed in April 2014 ([II.C.7-1](#), [II.C.7-2](#)) by college faculty and staff, using Service Area Outcomes from KISC, and they were reassessed in fall 2017. Admissions policies and regulations are clearly stated in the Course Catalog and in KISC Admissions Review Process ([II.C.7-3](#)). To ensure there is no bias in the process and policies,

systemwide admissions policies are reviewed at quarterly meetings of Registrars and Admissions Officers from the ten UH campuses along with Banner Central and the liaison to the UH Associate Vice President of Student Affairs (see II.C.6).

Selective admissions programs evaluate their admissions requirements and timelines via advisory committee reviews, updated program accreditation standards, and other program assessment processes.

### ***Multiple-Measures Placement Options***

In fall 2014, the University of Hawai‘i Community Colleges (UHCC) Student Success Council ([II.C.7-4](#)) began a data-driven discussion about fair and proper placements and success in pre-collegiate pathways, particularly in the math and English sequences.

In Summer 2015, ACT announced that all COMPASS products would be terminated by the end of 2016. Accuplacer was adopted to replace COMPASS, particularly in cases where alternative primary placement methods (see below) did not apply (see II.A.4). Accuplacer was normed against established COMPASS placement thresholds, which had been previously validated by the UHCC system and ACT.

On November 30, 2016, in collaboration with the UHCC Student Success Council, the College and other UHCCs moved towards alternative placement methods for students enrolling in English and math courses: courses/grades in high school English and math, overall high school GPA, SAT scores and Smarter Balanced Assessments. A subcommittee of the UHCC Student Success Council recommended these placement/cognitive assessment options guided by the principle that students will be placed into the highest level of math and English based on any of the placement options. This approach further reinforces the purpose of UHCC Policy #5.213, which is to support and accelerate students’ time to degree ([II.C.7-5](#), [II.C.7-6](#)). The effectiveness of these alternative placement methods is being monitored by a Student Success Council subcommittee ([II.C.7-7](#)). In addition, the UHCC Student Success Council has reviewed non-cognitive assessments to provide additional information to better meet students’ needs.

With regular analysis and in conjunction with other UHCC faculty, the College reviews and discusses cut score validity for the tests with math and English faculty. Traditional measures of consequential validity and other measures of validity and reliability are used as well. The data are shared with faculty to determine proper cut scores for courses and conditions for review of student requests for higher placement ([II.C.7-8](#)).

The Accuplacer Exam (WritePlacer and MATH placements) is used with students who identify English as their primary language ([II.C.7-9](#)). These tests are administered onsite or remotely by the College’s trained Testing Center personnel.

Students whose primary language is not English are placed by a variety of instruments. To be admitted, international students on F-1 visas must complete standardized tests such as TOEFL,

TOEIC, or EIKEN, and attain established thresholds that determine their placement into the intensive English program or into ESOL or ESL credit courses ([II.C.7-10](#)). Resident immigrants who are also non-native English speakers take the Accuplacer ESL Reading test and ESL Writing Sample test and are placed in the appropriate level of ESOL or ESL credit course. The College continues to review placement instruments and procedures and has established teams dedicated to finding best practices and most efficient forms of placement for English, ESL, and math courses in collaboration with counterparts across the system (see II.A). Information and resources for placement exams, which are ADA accessible, are offered in various modalities (i.e., in-person, online, self reporting) providing equal access opportunities for all students.

### **ANALYSIS AND EVALUATION**

The College regularly evaluates its admissions and placement instruments and practices to validate their effectiveness and to minimize bias. In April 2018, the UHCC office facilitated the Accuplacer validity study to confirm the score ranges for math and English. The College is an open-access institution that adheres to UH Board of Regents admissions policies and college-specific admissions requirements. Admissions policies and procedures are reviewed regularly, most recently in 2017. In collaboration with systemwide efforts and based on recommendations of the Student Success Council, the College has implemented multiple options for placement into English and math courses. Exploration of non-cognitive assessments continues at the UHCC level. Going forward, the College will extend placement strategies beyond traditional assessment instruments to include multiple measures that use more authentic and skills-based assessments for students' placement on the math and English pathway.

---

**II.C.8. The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The College maintains student records permanently, securely, and confidentially, with provisions for secure backup and storage of both paper and digital files. Paper files are stored in a secured location at a distance from the KISC office. The College follows established policies for release of student records ([II.C.8-1](#)). University of Hawai'i administrative procedures and executive policies AP 7.022, EP 2.214, and EP 2.215 are designed to ensure that sensitive information is collected and maintained by the University in an acceptable manner, protecting the rights provided to students under Family Educational Rights and Privacy Act of 1974, FERPA ([II.C.8-2](#), [II.C.8-3](#) and [II.C.8-4](#)).

The College strictly follows the Family Educational Rights and Privacy Act of 1974 (FERPA) .

Policies for the release of student records and provisions of FERPA are detailed in the College catalog ([II.C.8-5](#), p. 68). Copies of the FERPA policy are made available to all students via the College's main admissions and registration office ([II.C.8-6](#)). Students may access their individual password-protected records through their STAR portal. Students also have an employment checklist that highlights the general confidentiality agreement for student employees with limited access to student data or records ([II.C.8-7](#)).

Access to electronic student information is granted by campus administrative approval. The level of access to student data is determined by position and need for access to confidential information. Those whose access is approved are required to sign a confidentiality agreement ([II.C.8-8](#)). As an added safety measure, all student social security numbers in Banner are restricted and the College does not use Social Security Numbers to identify students ([II.C.8-9](#)). Students are issued randomly generated student identification numbers. Access levels are reviewed on a routine basis by the campus administrator in charge of Banner access. These records are electronically maintained with the highest standards in mainframe computers. All student electronic data are maintained, backed-up, and protected by the University of Hawai'i System Information Technology Services Office.

Overall, in addition to FERPA and the University of Hawai'i policies stated above, the College strictly complies with a number of other University of Hawai'i system policies, State of Hawai'i Revised Statutes, and external regulations that address the security of student information ([II.C.8-10](#)). The College further holds responsible and requires all employees with access to student records, information, and data to comply with these policies and regulations.

## **ANALYSIS AND EVALUATION**

The College maintains student records securely and ensures there are secure backups; procedures are published and followed for release of student records. Student records are maintained in permanent, secure, and confidential locations. The procedure for the release of student records is defined as well as published and the College abides by these policies. The College maintains paper and digital copies of student permanent records in secure and safe environments to protect them from breach of confidentiality. Paper files are stored in a secured location at a distance from the KISC office. The College adheres to the Family Educational Rights and Privacy Act (FERPA). Information on FERPA is available in the College's catalog, as well as in paper form in the lobby of the main admissions and registration office. The University of Hawai'i further enhanced policies on protecting student privacy with the creation of policy EP 2.214, which prohibits the use of student social security numbers to be used as a source of identification in daily access of student files.

Only approved staff members have access to student electronic files that contain social security numbers. The main student services area that houses sensitive student records is restricted to only select staff members with approval. The main electronic student information system is

password protected. Electronic maintenance and backup of this system is managed by a University of Hawai‘i system team at the University of Hawai‘i at Mānoa campus.

Copyright © 2018 Kapī‘olani Community College

### Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the standards, and an evaluation of its performance is reflected in the accredited status of the institutions.

Kapi‘olani Community College is one of seven campuses in the University of Hawai‘i Community College system, which is itself part of the 10-campus University of Hawai‘i system, overseen by a president and a single Board of Regents. In matters related to the responsible use of human, physical, technology, and financial resources, the College aligns its internal processes and procedures to comply with policies and procedures established centrally and in accordance with the [UHCC functional map](#).

#### III.A. Human Resources

---

**III.A.1. The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.**

---

#### EVIDENCE OF MEETING THE STANDARD

To ensure the integrity and quality of its programs and services, the College employs administrators, faculty and staff who are qualified by appropriate education, training and experience in order to provide and support for these programs and services, wherein the criteria, qualifications and procedures for the selection of personnel are clearly and publicly stated and address the needs of the College in serving its student population, while the job descriptions are directly related to the College’s mission and goals and accurately reflect position duties, responsibilities and authority.

***The qualifications of College employees***

Faculty, professional staff, and executive/managerial personnel are Board of Regents appointees subject to established classification and qualification rules. Support staff including clerical and grounds and maintenance staff are State of Hawai‘i civil service employees subject to civil service classification and qualification rules.

To ensure that qualified applicants are hired for positions, the College follows well-defined and rigorous guidelines that are aligned with UHCC system and are generally accepted principles of higher education. The UHCC system has set the minimum qualifications and implementation guidelines for the hiring process for faculty positions ([III.A.1-1](#) Minimum Qualifications for Faculty Positions). Degrees or equivalencies that are required for the position establish that applicants have knowledge of their subject matter. For Administrative, Professional and Technical (APT) positions, the University of Hawai‘i Position Description Generator houses an APT Position Description Guide, Band Definitions, and Career Groups ([III.A.1-2](#)). For Civil Service positions, the State of Hawai‘i’s Department of Human Resources Development has posted criteria, qualifications, and procedures ([III.A.1-3](#), [live link](#)).

The College ensures that qualified personnel are hired through its multi-layered selection processes. The UH Community College Application for Faculty or Executive Positions ([III.A.1-4](#)) and the UH Employment 64A and 64B Application Forms for Administrative, Professional, and Technical Positions ([III.A.1-5](#), [III.A.1-6](#), [III.A.1-7](#)) are used by applicants to identify their qualifications for a specific position. The responsible department follows specific guidelines to establish a screening committee in order to review the applicants’ qualifications. Questions for candidates are carefully crafted to ensure that the candidates’ experience and approach or work ethic support the needs of the program or service. Upon completion of the interview process, recommendations are made to administrators, who are responsible for making the final recommendation to the Chancellor, who makes the decision for the College.

***The criteria, qualifications and procedures for the selection of personnel are clearly and publicly stated and address the needs of the College in serving its student populations***

All open positions in the University of Hawai‘i System including the Community Colleges are posted on the University of Hawai‘i’s employment site, Work at UH ([III.A.1-8](#)). The University is transitioning to a new online recruitment, application, and screening system entitled NEOGOV with an expected implementation date of January 1, 2019. Each position advertisement, through the list of duties and responsibilities, describes how the position addresses the needs of the College in serving its student populations. The position advertisement specifies the minimum and desirable qualifications for the position and provides directions as to how to apply for the position. UH System policies exist for the recruitment and selection of applicants to fill faculty, civil service and administrative, professional and technical (APT) positions to ensure that hiring procedures are consistently applied by all departments and units. At the campus level, policies and procedures as to the criteria, qualifications and procedures and are found on the ‘Ohana

[III.A.1-9](#) under the header “Get Ready”. Information for Civil Service positions is found on the State of Hawai‘i Department of Human Resources Development ([III.A.1-10](#)).

***Job descriptions are related to the College’s mission and goals and reflect duties, responsibilities and authority***

After a position is determined to be in alignment with the needs and priorities identified in the mission, strategic plan goals and with the needs of students, a job description is created to state the position’s duties, responsibilities and authority. Job descriptions for Administrative, Professional and Technical personnel are created through use of a Position Description Generator, a component of the online portal ([III.A.1-11](#)). Position descriptions for faculty recruitment are considered to be the duties and responsibilities included in the advertisement for the position. Job descriptions are approved by the Human Resources Office to ensure accuracy and completeness of the information and by the appropriate program administrator to ensure fit within the College’s mission, needs, priorities, and outcomes as stated in the strategic plan. For a recruitment to be approved, the unit is asked to demonstrate the need for the position, in alignment with the goals of the unit and the College’s mission (ARF).

Distance education/continuing education expertise and experience are referenced within the position advertisement for instructional faculty.

Systemwide policies that frame College procedures include the Board of Regents Policy RP 9.201, Personnel Status ([III.A.1-12](#)), BOR Policy 9.202, Classification Plans and Compensation Schedules ([III.A.1-13](#)), the University of Hawai‘i System Executives and Managers Classification and Compensation Plan ([III.A.1-14](#)) and Executive Policy EP 9.212, Executive/Managerial Classification and Compensation ([III.A.1-15](#)), and Faculty Classification and Compensation ([III.A.1-16](#)).

## **ANALYSIS AND EVALUATION**

The College employs administrators, faculty, and staff who are qualified by the education, training, and experience needed to provide and support the College’s programs and services. The criteria, qualifications, and procedures for the selection of personnel are clearly and publicly stated and address the needs of the College in serving its student population. Job descriptions are directly related to the College’s mission and goals and accurately reflect position duties, responsibilities and authority. The College has detailed and well-established job descriptions; well-defined administrative, staff and faculty roles; and a clear employment process. The checks and balances in the system ensure qualified candidates for positions.

---

**III.A.2. Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)**

---

## EVIDENCE OF MEETING THE STANDARD

Faculty qualifications include subject matter knowledge and requisite skills for the services to be performed and are based on appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities and potential to contribute to the College's mission, while faculty job descriptions include development and review of curriculum as well as assessment of learning.

### *Faculty subject matter knowledge and requisite skills*

Minimum qualifications for faculty positions are established by the University of Hawai'i Community College Human Resources Office, in consultation with faculty and administrators at the colleges (see III.A.1). For disciplines in the Arts and Sciences, the minimum qualification is typically a masters degree in the discipline. Minimum qualifications for Career and Technical Education disciplines require master's degrees, wherever possible, or bachelor's degree plus three years of related work experience. In some disciplines, alternative credentials are allowed, with concomitant increase in the number of years of related industry experience. Academic qualifications for lecturers (adjuncts) are identical to those for regular faculty and specified in the Minimum Qualifications for Faculty Positions ([III.A.2-1](#)). For positions in the health programs, licensures or professional certifications are also required.

Faculty and the program administrator determine a position's desirable qualifications to assist with screening applicants who would best fit program and college goals and be able to meet the needs of the students. Interview questions are based on the duties and responsibilities of the position as described in the advertisement and designed to elicit information on the applicant's meeting the desirable qualifications. The screening committee sets rubrics to evaluate the applicants' responses. Screening committees typically ask applicants for instructional positions to demonstrate a teaching scenario or describe strategies that illustrate effective teaching. (ER 14)

In addition to the primary responsibilities, faculty members are expected to participate in essential areas such as professional and self-development, service to the institution, service to their profession (e.g. serving a State, national, or international organization related to the faculty

member's professional status), and public service, which normally occurs outside of the College and is related to the faculty member's professional status. These responsibilities are typically included in the position descriptions and are used to evaluate the merits of applicants.

The Distance Education Plan, addresses the need to develop qualifications and training for DE instruction and the processes to initiate and review courses for DE delivery. Faculty new to online instruction are required to complete the Teaching Online Prep Program (TOPP, [III.A.2-2](#), p. 12).

***Faculty job descriptions include development and review of curriculum as well as assessment of learning.***

Faculty position descriptions used in recruitment advertisement include the responsibility for the development of new curriculum and revisions to existing curriculum as well as the assessment of student learning outcomes for improvement. All instructional faculty position descriptions include curriculum development and outcomes assessment ([III.A.2-3](#), [III.A.2-4](#)). (ER 14)

## **ANALYSIS AND EVALUATION**

The College ensures faculty have the requisite knowledge and skills for instruction. Qualifications include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the College's mission. Faculty job descriptions include development and review of curriculum as well as assessment of learning.

---

**III.A.3. Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.**

---

## **EVIDENCE OF MEETING THE STANDARD**

The College's administrators and other employees responsible for educational programs and services are qualified to perform the duties required to sustain the College's effectiveness and academic quality.

### ***Establishment of appropriate qualifications***

Duties, academic qualifications, and job descriptions are established at the UH System level for all Administrative, Professional, and Technical (APT) support personnel and executive/managerial employees. Colleges use these system policies in hiring, retention, and promotion decisions.

Qualifications for APT staff are codified in the APT Broadband system. Minimally, entry-level administrative, professional, and technical staff must have a bachelor's degree or have acquired comparable work experience in the field for which they are applying. Other minimum qualifications are set dependent on the nature of the position and the level of responsibility reflected in the band level. Band A and Band B positions are typically hired by the College.

To ensure that well-qualified applicants are hired as college administrators, the College follows a well-defined and rigorous hiring process that evaluates the applicant's qualifications based on the position description and interview questions and rubrics. Master's degrees as well as years of experience in the field are required for all administrative positions. For all executive positions, a doctoral degree is preferred.

The College sets guidelines for establishing a screening committee to verify that the applicant has the appropriate knowledge, expertise, and experience relative to the position description. The screening committee develops interview questions and related rubrics based on the position description. In addition to the review of applications and screening committee interview, finalists for administrator positions from deans to Vice Chancellors to Chancellors participate in open forums with the campus community. Feedback gathered from these forums is an integral part of the decision making process.

All administrative position hires are approved by the Chancellor, UHCC Vice President, UH President and the UH Board of Regents, further ensuring that the administrator has the qualifications to perform the duties required for the College's effectiveness and academic quality.

## **ANALYSIS AND EVALUATION**

The College employs professional staff and administrators who possess the qualifications needed to perform the duties required to sustain the College's effectiveness and academic quality. Qualifications for administrative and staff positions also follow a taxonomy similar to those of faculty: educational training, degrees and experience levels. Job descriptions include minimum requirements, desirable skills, and required work duties.

---

**III.A.4. Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

Faculty, administrators and other employees have degrees from institutions which are accredited by recognized U.S. accrediting agencies or from recognized non-U.S. institutions for which degree equivalence has been established.

##### ***Degree qualifications***

All faculty, administrators and other employees must have the requisite degrees from institutions that are accredited by recognized U.S. regional accrediting agencies ([III.A.4-1](#)). The College requires that transcripts have an official seal and are mailed directly from the degree-granting institution. To establish the equivalency of international degrees to degrees from accredited U.S. post-secondary institutions, the College requires applicants to have foreign degrees evaluated by agencies such as National Association of Credential Evaluation Services (NACES) and/or International Education Resource Foundation (IERF).

#### **ANALYSIS AND EVALUATION**

The College has employed faculty, administrators and other employees with the required degrees from U.S. and non-U.S. institutions, following procedures to screen and select qualified faculty, administrators and staff with the appropriate credentials. The UHCC has an established set of educational criteria for each position and an express condition upon hiring is the verification of degrees and certificates from accredited institutions and licenses from recognized bodies or state agencies.

---

**III.A.5. The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.**

---

## EVIDENCE OF MEETING THE STANDARD

The College ensures the effectiveness of its human resources by systematically evaluating all personnel at stated intervals and has established written criteria for evaluating all personnel which includes performance of assigned duties, participation in institutional responsibilities, and other activities appropriate to their expertise. The evaluation process assesses the effectiveness of personnel and encourages improvement with post-evaluation actions documented and implemented in a formal and timely manner.

Evaluation policies and processes are established by the UH System and/or UHCC system for each classification of employee – executive/managerial, faculty, lecturer (adjunct), APT (professional staff), and civil service. The evaluation processes and frequency vary for each classification. Colleges comply with these policies in the evaluation of college employees.

### *Ensuring the effectiveness of personnel*

All categories of employees are evaluated on a regular basis. Evaluation processes vary by category of employee, as described below. The Board of Regents Policy RP 9.213 addresses evaluation of all Board of Regents appointees, including executive/management, faculty, and APT ([III.A.5-1](#)).

Board of Regents Policy RP 9.212 states that executive/management employees are to be evaluated annually ([III.A.5-2](#), p. 4). UHCC Policy UHCCP 9.202 Executive Employees Performance Evaluation requires that every executive employee provides a statement of goals for the upcoming year and, at the end of that year, provides a self-assessment of the accomplishments of those goals ([III.A.5-3](#)). Executive/managerial employees are evaluated in April/May through an online 360 Survey distributed to subordinates, constituents and peers ([III.A.5-4](#)). The results of the 360 Survey are included in the self-assessment required by UHCC Policy UHCCP 9.202. The administrator's supervisor reviews the self assessment with the administrator and determines what follow up may be needed.

In 2016, a resolution was passed by Faculty Senate to request an additional evaluation of all administrators and the performance of their roles. The Administrative Leadership Feedback

DRAFT MAY 8, 2018

System was developed by the Faculty Senate's Evaluations subcommittee ([III.A.5-5](#)). The survey was administered in spring 2017. Approximately 25 percent of the faculty participated ([III.A.5-6](#)). In May 2017, administrators held an open forum where they shared plans to address participants' concerns and respond to the survey results. In May 2018, administrators held a State of the College event where they shared accomplishments from the past year and presented goals for the upcoming year.

As part of faculty contract renewal and tenure/promotion review processes, each faculty submits a document that outlines her/his accomplishments since the prior review following an established timeline. Included in the document are a narrative self assessment, the results of peer observations and student evaluation data, and reports of professional development activities, professional endeavors and service to the institution and community. The creation and review of student learning outcomes are a part of the evaluation process. In contract renewal documents, faculty review prior goals and recommendations from previous reviewers outline how they have responded to these recommendations. They also outline their goals for the upcoming review cycle. The forms and guidelines are kept on the College intranet ([III.A.5-7](#)). UHCC Policy UHCCP 9.203 requires that faculty who have not submitted a contract renewal or promotion dossier within the last five years should be evaluated ([III.A.5-8](#)).

Evaluation of lecturers is guided by UHCC Policy UHCCP #9.104 ([III.A.5-9](#)).

Administrative, Professional And Technical (APT) employees undergo a three-year probationary period and are evaluated annually for the duration of their employment. At the beginning of the evaluation period, November 1-October 31 for all APTs in the UH system, supervisors set expectations for the employees. Online evaluations are completed in accordance with UH Administrative Procedure A9.170 ([III.A.5-10](#)). APTs who exceed expectations may be nominated for Special Compensation Adjustments.

Civil service employees are evaluated by their supervisors annually, on the anniversary of their initial hire, using the State of Hawai'i's Performance Appraisal System (PAS, [III.A.5-11](#)). The PAS requires the supervisor's evaluation of the civil service employee across multiple functions related to the position. Performance is evaluated based on the quality as well as the quantity of work produced, as well as communication, problem-solving and organizational skills, among others. Civil Service employees whose performance is not satisfactory are put on notice for improvement.

## ANALYSIS AND EVALUATION

The College has observed the policies and procedures established by the UH System and/or UHCC System to systematically evaluate its personnel in order to assess the effectiveness of personnel and encourage improvement. Evaluation findings are discussed with personnel for professional improvement. Records of evaluations are retained in permanent employee files. Any evaluation findings that identify substandard work performance are likewise retained as well.

---

**III.A.6. The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.**

---

Effective January 2018, Standard III.A.6 is no longer applicable. The Commission acted to delete the Standard during its January 2018 Board of Directors meeting.

---

**III.A.7. The institution maintains a sufficient number of qualified faculty, which includes full-time faculty and may include part-time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.**

---

## EVIDENCE OF MEETING THE STANDARD

The College maintains a sufficient number of qualified full-time and part-time faculty and lecturers to ensure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.

### *Sufficiency of full-time and part-time faculty and lecturers*

While no formal policy governs the ratio of full-time to part-time faculty and lecturers, the ratio is monitored by the UHCC system and the colleges to assure compliance with the standard. (See Organizational Information, Table 3. Kapiolani Community College Faculty by Rank and Gender, p. 9)

Faculty staffing levels are gauged by information gathered from college reports such as the Annual Report of Program Data (ARPD) and the Comprehensive Program Reviews. The table below is in the Information Technology ARPD.

**Table 1. Efficiency Indicators in ARPD**

Efficiency Indicators		Program Year			Efficiency Health Call
		14-15	15-16	16-17	
9	Average Class Size	19.9	19.9	19.6	<b>Healthy</b>
10	*Fill Rate	91%	92.4%	91%	
11	FTE BOR Appointed Faculty	6	7	5	
12	*Majors to FTE BOR Appointed Faculty	24.5	21.2	29.2	
13	Majors to Analytic FTE Faculty	18.5	20.5	19.0	
13a	Analytic FTE Faculty	8.0	7.3	7.7	
14	Overall Program Budget Allocation	\$593,915	\$749,926	\$802,301	
14a	General Funded Budget Allocation	\$498,094	\$697,533	\$746,250	
14b	Special/Federal Budget Allocation	\$0	\$0	\$0	
14c	Tuition and Fees	\$95,821	\$52,393	\$56,051	
15	Cost per SSH	\$140	\$190	\$195	
16	Number of Low-Enrolled (<10) Classes	0	3	3	

\*Data element used in health call calculation

Last Updated: October 29, 2017

Item 11 in the ARPD for Career and Technical Education instructional programs (Item 10 for General/Pre-professional programs) notes the number of full-time instructors assigned to the program. Item 13a, Analytic Faculty (Item 12a for General/Pre-professional programs), reflects the number of full-time faculty as calculated by sum of semester hours (not student semester hours) taught in program classes divided by 27, which is the teaching assignment for full-time faculty. If the number of Analytic Faculty significantly exceeds the number of actual full-time faculty, and all program faculty positions are filled, the program may request additional positions. For example, the Hospitality and Tourism department lobbied for an additional faculty member due to such ARPD results and program accreditation requirements. The College reallocated a position to the department. Another position was reallocated to the Paralegal Program for the same reasons.

There are external factors influencing decisions about having a sufficient number of qualified faculty, particularly for career and technical programs such as those in health sciences and nursing. These programs require a specific faculty-to-student ratio in order to meet specialized professional accreditation requirements. For example, the majority of the nursing courses require an 8-to-1 faculty-to-student ratio, ensuring that student learning outcomes are met or exceeded. All accredited programs have had successful visits and have met the standards for sufficient staffing.

Beyond CTE programs, the College has offered all the classes in Arts and Sciences that the departments need to offer. Although there has been pressure for staffing on occasion, the College has delivered all curricula without fail.

Each academic year, the College allocates general funds to compensate faculty members who are released from their teaching responsibilities in order to support and lead college initiatives involving a range of programs and services to achieve its mission and purposes.

## ANALYSIS AND EVALUATION

The College maintains a sufficient number of qualified full-time and part-time faculty to ensure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. The College has systems in place to ensure staffing decisions are data driven. The program review process and CTE program accreditation standards help the College identify and respond to faculty position requirements.

---

**III.A.8. An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.**

---

## EVIDENCE OF MEETING THE STANDARD

The College has employment policies and practices which provide for orientation, oversight, evaluation, and professional development for part-time lecturers. The College provides opportunities for the part-time lecturers so that they can integrate into the life of the institution.

### *Policies and practices for part time and adjunct faculty*

Lecturers (adjuncts) are members of the faculty collective bargaining unit University of Hawai'i Professional Assembly (UHPA) and are covered by the collective bargaining agreement ([III.A.8-1](#)). At the beginning of each semester lecturers are encouraged to attend the New Employees Orientation program ([III.A.8-2](#)). The College encourages lecturers to participate in all campus professional development opportunities. Following UHCC and College policies, division/department chairs oversee and evaluate lecturers ([III.A.8-3](#), [III.A.8-4](#)). Department chairs are responsible for maintaining an archive of lecturer evaluations. UHCC policies govern the step advancement of lecturers ([III.A.8-5](#)).

## ANALYSIS AND EVALUATION

The College has employment policies and practices which provide for orientation, oversight, evaluation, and professional development for part-time lecturers. The College provides opportunities for the part-time lecturers so that they can integrate into the life of the institution.

The College has systems in place to ensure that department chairs evaluate lecturers. Department chairs share recommendations with part-time faculty to improve pedagogy and methodology.

---

**III.A.9. The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)**

---

**EVIDENCE OF MEETING THE STANDARD**

The College has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution.

*Staff with qualifications to support the effective educational, technological, physical, and administrative operations of the institution*

Qualifications for all classes of employees are established following guidelines established by the University of Hawai‘i system, the University of Hawai‘i Community College system, and the State of Hawai‘i Department of Human Resources as discussed in III.A.1-3.

UHCC positions are controlled through legislative appropriation. While no formal staffing ratios are established, the staffing levels for various classifications are reviewed regularly through committee discussions, annual program reviews, the annual Planning and Assessment Integration with Resource Allocation process (PAIR), the Student Success Pathways plans, and the Allocation Request Form, which includes a section for personnel requests ([III.A.9-1](#), [III.A.9-2](#), see IV.B.5). To manage emerging needs in the absence of new state-appropriated positions, the College re-allocates positions internally. At times, the College converts vacant positions from one employment category to another to address issues of sufficiency, better address changing duties and responsibilities, or to address changing College needs. The College also sometimes uses temporary positions and casual hire positions to supplement as needed. (ER 8)

**ANALYSIS AND EVALUATION**

The College has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. Staffing needs and duties are identified by departments and programs as part of the college’s program review process or via grant application recommendations. Positions are identified based on meeting student needs and alignment with the college mission.

---

**III.A.10. The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes. (ER 8)**

---

**EVIDENCE OF MEETING THE STANDARD**

The College maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes.

*Administrators with preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes*

While no formal administrative staffing ratios are established, the staffing levels for executive/managerial employees are reviewed regularly. (ER 8)

All administrative positions are filled with employees who have appropriate preparation and experience. Two positions are currently filled by interim appointees and one by an acting appointee:

Louise Pagotto, Ph.D  
Interim Chancellor

Brian Furuto, M.B.A.  
Vice Chancellor, Administrative Services

Brenda Ivelisse, Ph.D.  
Vice Chancellor, Student Affairs

Susan Kazama, MLS  
Interim Vice Chancellor, Academic Affairs

John Richards, M.B.A.  
Dean, Business, Legal, Technology Education, Hospitality, and Culinary Arts

David Nāwa‘a Napoleon, M.A.  
Dean, Arts and Sciences

Aaron Koseki, Ph.D  
Acting Dean, Health Education

Carol Hoshiko, Ph.D  
Dean, Community and Continuing Education

On April 17, 2018, at a campuswide meeting, the Vice President for Community Colleges announced that he had recommended to the University President, the appointment of the Interim Chancellor as the next permanent Chancellor for Kapi‘olani Community College. The effective date of appointment is June 8, 2018.

### ANALYSIS AND EVALUATION

The College maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes. Positions are determined by the chief executive officer as part of the administrative structure to meet the Colleges mission, relative size and complexity. The positions are established as part of the delegation of authority to assure the overall quality of the college.

---

**Standard III.A.11. The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.**

---

### EVIDENCE OF MEETING THE STANDARD

The institution has established, published, and adhered to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

*Establishes, publishes, and adheres to written personnel policies and procedures and are available for information and review*

Personnel policies are established and published at multiple levels, including the UH Board of Regents ([III.A.11-1](#)), UH System Executive Policies and Procedures ([III.A.11-2](#), [III.A.11-3](#)), UHCC policies ([III.A.11-3](#), [III.A.11-5](#)), and college policies ([III.A.11-6](#)). Additionally, collective bargaining agreements govern personnel actions for the covered employees. Policies are periodically reviewed and updated.

The College has ensured that all personnel policies and procedures are available for review by having these policies available online. These personnel policies and procedures cover all faculty, staff, and administrators of the College. The Human Resources Office keeps procedures and

DRAFT MAY 8, 2018

forms in the College intranet, organized by Task and Department ([III.A.11-7](#), [III.A.11-8](#), [III.A.11-9](#)).

***Policies and procedures are fair and equitably and consistently administered***

To ensure that the established policies and procedures are equitably and consistently administered, personnel actions at the College are overseen and reviewed by Human Resources (HR). HR also trains administrators, faculty and staff to perform personnel actions in compliance with established policies and procedures.

The College is guided by the personnel policies and procedures established by the University of Hawai'i System. The fair treatment of employees is safeguarded and ensured by specific procedures outlined in the collective bargaining agreements of the unions that represent the College's employees: the University of Hawai'i Professional Assembly (UHPA, [III.A.10-11](#)); the Hawai'i Government Employees Association (HGEA, [III.A.11-11](#)), representing (1) administrative, professional and technical employees (APT) and (2) white-collar workers; and the United Public Workers (UPW, [III.A.11-12](#)), representing blue-collar workers. The following are examples of policies that recognize the right of employees to a fair and equitable workplace .

- [III.A.11-13](#) UH System Policy AP 9.080, Collective Bargaining in Public Employment
- [III.A.11-14](#) UH System Policy AP 9.025, Fair Information Practice (Confidentiality of Personal Records)
- [III.A.11-15](#) UH System Policies: Non-discrimination
- [III.A.11-16](#) UH Executive Policy EP 5.221 UH Systemwide Policies and Procedure Classification of Faculty

**ANALYSIS AND EVALUATION**

The institution has established, published, and adhered to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

Personnel policies are established and published at multiple levels, including Board of Regents, UH Executive Policies, UH Administrative Procedures, UHCC's System Policies, and college policies. Additionally, collective bargaining agreements personnel actions for the employees and policies are periodically reviewed and updated.

---

**III.A.12. Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.**

---

## EVIDENCE OF MEETING STANDARD

The College has policies and practices in place that allow us to create and maintain programs that support a diverse personnel and regularly assess processes so that recruitments are equitable and ensure diversity consistent with the mission.

### *Policies and practices*

The UH Board of Regents Policy RP 1.205, Nondiscrimination and Affirmative Action, is the overarching system policy committed to complying with all State and Federal statutes, rules, and regulations which prohibit discrimination ([III.A.12-1](#)). The University of Hawai'i Administrative Procedures A9.890 Equal Employment Opportunity/Affirmative Action (EEO/AA, [III.A.12-2](#)) sets procedures. UH Administrative Procedure A9.895 establishes an EEO/AA glossary ([III.A.12-3](#)). Administrative procedure A9.540 sets rules for the recruitment and selection process and ensures compliance with University hiring policies, affirmative action and equal employment opportunity guidelines, and the respective collective bargaining agreements ([III.A.12-4](#)). The UH System EEO/AA Office is a resource to all campuses ([III.A.12-5](#), [III.A.12-6](#)).

Formal EEO/AA analysis is conducted by the UHCC system office on a regular basis and is incorporated into the recruitment/hiring processes ([III.A.12-7](#)). Each UH Community College has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measuring affirmative action efforts, and taking remedial action when necessary.

As part of the affirmative action program, the UHCC Director of Equal Employment Opportunity and Affirmative Action (EEO/AA) annually develops affirmative action plans (AAP) for minorities and women for the seven UH Community Colleges in accordance with federal contractor requirements. In addition, the Director of EEO/AA develops separately an affirmative action plans for protected veterans and individuals with disabilities (Part II) prepared in accordance with federal contractor requirements.

The Director of EEO/AA works closely with assigned EEO/AA Coordinators at each campus to monitor and oversee employment practices, including recruiting and hiring decisions, to ensure compliance with EEO and AA laws and policies and to implement AAP. This includes

monitoring job announcements and recruitment. There is consistent checking for underrepresentation, equitable treatment of applicants, and diversity in screening committees. HR trains search committee members on recruiting and screening, including topics such as nondiscrimination, equal opportunity, implicit bias awareness, accessible interviews and investigating and resolving complaints.

At the campus level, the College implements the UH and UHCC System's established policies and procedures regarding the professional ethics and fair treatment of its administrators, faculty, staff, and students. The College advocates for these policies and procedures through its professional development activities. Employees' grievances are investigated and resolved in compliance with the procedures in the collective bargaining agreements.

In addition to ensuring employment equity and diversity, the College's policies and procedures also allow for programs and services that support diverse personnel. For example, 'Aha Kalāualani, the Native Hawaiian authorized governance organization, supports and advocates for Native Hawaiian employees and provides programming to enhance the College's exposure to and appreciation of Native Hawaiian language and culture ([III.A.12-8](#)). The College also has representatives on the UH Commission on the Status of Women and the UH Commission on Lesbian, Gay, Bisexual, Transgender and Queer+ (LGBTQ+) Equality ([III.A.12-9](#), [III.A.12-10](#)). Together, these organizations ensure that the University, and the College, are apprised of issues and concerns of their constituent groups. The Commissions also sponsor events in support of their constituents.

***The College regularly assesses its record in employment equity and diversity consistent with its mission.***

The College ensures regular assessments are made to its record in employment equity and diversity to maintain consistency with its mission. Working with Human Resources (HR) personnel from the UHCC System office, the College ensures that the goals for employment equity and diversity are met by surveying applicant gender and ethnicity for federal EEO reports, tracking the screening process, and prompting hiring units to adhere to EEO guidelines. Data are reviewed to assess ethnic and gender distribution of positions at the College and to determine if there are any shortages. Future recruitment can then target underrepresented applicant groups.

## **ANALYSIS AND EVALUATION**

The College maintains appropriate programs, practices, and services that support its diverse personnel. The College regularly assesses its record in employment equity and diversity consistent with its mission.

A formal EEO/Affirmative action analysis is conducted by the UHCC systems office on a regular basis and is incorporated into the recruitment/hiring processes. HR has procedures and software

to track and analyze its employment equity record, providing guidelines for screening committees.

---

**III.A.13. The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.**

---

**EVIDENCE OF MEETING THE STANDARD**

The institution has upheld a written code of professional ethics for all of its personnel, including consequences for violation.

***Written codes of professional ethics for all of its personnel, including consequences for violation***

As with other policy frameworks, policies are established by the state and the UH System and frame policies further down the university system ([III.A.13-1](#), [III.A.13-2](#)). All UH System employees are subject to State of Hawai‘i ethics rules and regulations. Formal ethics policies are established by the UH System for various employee classifications. Employees covered by collective bargaining are also subject to ethics provisions in their contracts. For example, the University of Hawai‘i Professional Assembly (Faculty Union, UHPA) contract describes procedures for dealing with alleged breach of professional ethics ([III.A.13-3](#), p. 22). To ensure awareness of professional ethics, the HR office schedules mandatory training about ethics ([III.A.13-4](#)). The following list includes examples of policies and procedures.

- University of Hawai‘i Chapter 2, Statement of Rights and Responsibilities of the University of Hawai‘i Community ([III.A.13-5](#))
- UH Administrative Procedure AP8.025 Fiscal Responsibilities within the University ([III.A.13-6](#))
- UH Office of Research Services AP8.956 Financial Conflicts for Public Health Services ([III.A.13-7](#))
- Executive Policy EP12.214 Conflicts of Interest and Commitment ([III.A.13-8](#))
- UHCC Policy UHCCP #5.211 Statement on Professional Ethics (Faculty) ([III.A.13-9](#))
- UH Executive Policy EP 9.210, Workplace non-violence ([III.A.13-10](#))
- UH Executive Policy EP 1.203, Policy on Consensual Relationships ([III.A.13-12](#))
- Kapi‘olani CC Sexual Respect and Title XI ([III.A.13-13](#))

**ANALYSIS AND EVALUATION**

The College has upheld a written code of professional ethics for all of its personnel, including consequences for violation.

Formal ethics policies and procedures are established by the UH System for various employee classifications. All employees are also subject to State of Hawai‘i ethics rules and regulations.

There are policies at the system and campus levels to address ethical and professional behavior such as the BOR Policy 12.201 Ethical Standards of Conduct that address ethical standards of conduct in research and scholarly activities. These policies are available on the Campus’ intranet and the UH’s system HR website.

---

**Standard III.A.14. The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

The College plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The College systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

##### ***Opportunities for professional development***

The College supports its employees to participate in a number of leadership programs. College secretaries have participated in the UH System’s Professional Administrative Summer Institute (PASI). Faculty and professional staff have participated in the UH System’s President’s Emerging Leaders Program (PELP) and the UHCC System’s Community College Leadership Champions (CCLC) and the Wo Learning Champions.

At the College, faculty play a primary role in identifying and providing activities to address professional development needs. Faculty with proven teaching and learning knowledge and abilities recognize the value of sharing experiences with others. They work together to develop, promote, and conduct professional development activities, with or without funding from the College.

With College funding and occasional support from external grants, faculty designed a series of professional development experiences to meet the needs of faculty as they transition from new hires to seasoned members of the campus community. Such programs include a series of C4ward (Collaborative Circle for Creative Change) workshops, Kalāhū professional development

DRAFT MAY 8, 2018

(culture-based community research), SLO Fridays (regular workshops on student learning outcomes assessment), FELI (a Title III-funded innovative model for Native Hawaiian students), and TOPP (Teaching Online Preparation Program).

Support units at the College also provide professional development for faculty and staff. The Center for Excellence in Learning, Teaching and Technology (CELTT) offers training in distance education, community building, student engagement, standards of conduct, universal design for instruction, new Laulima tools, new Web tools, and web page templates. Technology demonstrations, hands-on workshops, and presentations on the UH system LMS are provided regularly ([III.A.14-1](#)). Library and Learning Resources provide training in research skills, Google tools, and Open Educational Resources.

The Office for Institutional Effectiveness (OFIE) coordinated workshops on grant writing and management, and the writing of survey questions for the purpose of assessment. Auxiliary and Facilities Services schedule professional development opportunities for faculty and staff in such areas as the handling of hazardous materials and cardio-pulmonary resuscitation (CPR) training.

The College has a faculty development fund to provide up to \$1,000 per individual for professional development. Professional development funding is also available for staff and the funds are awarded by the Staff Council, one of the College's authorized governance organizations. In both cases, the funds are awarded in a competitive application process.

In addition to the professional development opportunities provided on campus, the Interim Chancellor allocates a significant amount of funding to campus constituents to participate in

professional development activities off campus and off island.

- [\(III.A.14-2\)](#) Interim Chancellor Memo, Multiple Professional Development Funding Sources, 2.8.2018
- [\(III.A.14-3\)](#) Interim Chancellor Memo, FY Funding for Professional Development
- [\(III.A.14-4, III.14-5\)](#) Interim Chancellor Memo, Amendment to the Procedures for Applying for and Review of RTRF Professional Development Funds and application form
- [\(III.14-6\)](#) Memo from Staff Council reference increase in professional development budget from \$3,000 to \$10,000 per year

Finally, system policies support professional development. Resources for distance education training and support are also provided by the UH System, such as the Teaching And Learning with Electronic Networked Technologies (TALENT) faculty development program [\(III.14-7\)](#).

- University of Hawai‘i Administrative Procedure No. A9.160, University Employee Training [\(III.14-8\)](#)
- BOR Policies RP 5.210, Distance Education and Off site Instruction [\(III.14-9\)](#)
- Distance Learning at the University of Hawai‘i [\(III.14-10\)](#)
- Distance Learning at the University of Hawai‘i , Governance [\(III.14-11\)](#)

## RTRF INVESTMENT IN PROFESSIONAL DEVELOPMENT

In 2017 the Interim Chancellor’s decision to invest RTRF funds for faculty, staff, and administrative development affirms her commitment to fostering leadership and subject matter expertise throughout the campus, as well as a lifelong commitment in this community to continuing education and engagement with one’s profession. Research and Training Revolving Funds (RTRF) are generated from extramural awards: grants, contracts, and foundation/private awards.

For the first time in KCC history, this RTRF investment commits the institution to faculty and staff revitalization as a continuing and ingrained aspect of the campus mission. The cumulative impact promises to be a game changer for the College and for future generations of our students. In fiscal year 2017, the Chancellor awarded 57 individuals the opportunity to participate in off-island conferences and similar activities. In addition and with others, she explored future opportunities for group projects and innovative solutions to existing challenges. Two IT professionals, for example, attended a national conference focused on online teaching and distance education strategies, and administrative staff attended industry conferences to learn about best practices from peer institutions.

Kapi‘olani Community College is currently the only campus to share the results of its professional development investments publicly through the Office for Institutional Effectiveness website. Future applicants can refer to this repository of information for ideas and inspiration on how to refresh their skills and subject matter expertise to continue delivering cutting edge academics, student support and administrative services.

- University of Hawai‘i Distance and Distributed Learning Action Plan ([III.14-12](#))
- University of Hawai‘i E5.204 Distance Learning planning and policy ([III.14-13](#))

### *Evaluating professional development programs for improvement*

The College assesses professional development for the purpose of documenting the value to the participants and potential impact on their students; and where weaknesses in teaching and learning are identified, to make improvements. Through evaluations and surveys of demonstrated learning outcomes and improvement of personnel activities conducted by OFIE and CELTT, the College pursues a systematic assessment the professional development opportunities. The College’s efforts in professional development to improve student success are tracked in student achievement data reported annually in ARPDs and Student Success Pathway plans. The performance measures tracked in the scorecard for the strategic plan and in institutional effectiveness measures provide a broad assessment of the College’s efforts to improve; professional development targeting increases in student success and learning help the College improve in measures such as certificate and degree completion (strategic outcome A and B) and course success (Institutional Effectiveness Measure 1).

In the programs CELTT offers for the improvement of distance education instruction, there are examples of systematic evaluation of professional development programs and how results are used for improvement. The TOPP/TOSP (Teaching Online Prep Program/Teaching Online Self-Paced) program has three (3) built-in summative assessments to gauge its effectiveness and identify opportunities for improvement in the next iteration ([III.A.14-14](#)).

1. **Course Evaluation at the end of the workshop** - a survey on the effectiveness of the course and the facilitators
2. **Mid-Term Self-Assessment** - a rubric-based best practices assessment of the participant's course and teaching effectiveness at mid-point of implementation
3. **Post-Term Reflection** - an essay report on the teaching experience, the learning experience (by students), and plans for improvement.

### **ANALYSIS AND EVALUATION**

The College plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The College systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

Primary responsibility for professional development is with the College. UH System and UHCC also provide professional development opportunities for the personnel at all colleges.

---

**Standard III.A.15. The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The institution has made provisions for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

#### ***Providing for the security and confidentiality of personnel records***

Records retention policies, including security and confidentiality, are established by the UH system in accordance with state law and collective bargaining agreements. The College maintains records under their control in accordance with these policies.

Personnel records of employees are kept in a secure storage room with alarm and access codes. The confidentiality and management of the records are governed by three policies: (1) Fair Information Practice-Confidentiality of Personnel Records (2) Records Management Guidelines; and (3) Personnel Records ([III.A.15-1](#), [III.A.15-2](#), [III.A.15-3](#)). Board of Regents (BOR) employees' union contracts require the confidentiality of personnel files.

#### ***Employee access to personnel records***

College personnel have access to their records as required by state law, UH System policy, and stated in their collective bargaining agreements. For example, the contract with the faculty union UH Professional Assembly (UHPA) addresses employee access to personnel records with Article XIX, Personnel Files ([III.A.15-4](#)). An employee wanting to review his or her records makes an appointment during normal business hours with the HR office. The individual must present photo identification and review records in the HR office.

### **ANALYSIS AND EVALUATION**

The institution has made provisions for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

Records retention policies, including security and confidentiality, are established by the UH system, in accord with state law and collective bargaining agreements. The College maintains records under their control in accord with these policies.

---

**III.B.1. The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.**

---

### EVIDENCE OF MEETING THE STANDARD

Kapi‘olani Community College is comprised of a main campus and a smaller campus approximately 1/5 of a mile from the main campus. Both campuses are located in the Kaimuki-Diamond Head area on the island of O‘ahu. The main campus is made up of 20 primary buildings on 44 acres of land. The smaller campus is home to the Culinary Institute of the Pacific, which is a recently completed facility that lies just south of the main campus. The College also regularly offers Emergency Medical Services programs on Maui and Hawai‘i Island on the campuses of UH Maui College and Hawai‘i Community College, respectively, as well as Nursing programs on the Leeward Community College campus.

All of the College’s maintenance and construction is done with the goal of ensuring a safe, secure and accessible learning and working environment. The College’s Vice Chancellor for Administrative Services (VCAS) and the Auxiliary Services Director (or Facilities Manager, FM) oversee compliance with federal, state, and county laws, ordinances, rules and regulations.

The College is assisted with campus and facility planning by the University of Hawai‘i Community Colleges (UHCC) Facilities and Environmental Health (FEH) office. On large projects that include new construction, the College is assisted by both the UHCC-FEH Office as well as the University of Hawai‘i System Office of Capital Improvements (OCI).

The College provides a safe and secure learning and working environment through units that have different areas of responsibilities. Primary responsibility for facilities lies with the College’s Auxiliary Services (Aux) unit. Aux is divided into three units:

1. Janitorial Services: Responsible for maintaining a clean and orderly environment of common areas and most classrooms and laboratories. Janitorial services removes trash and materials, maintains flooring surfaces through waxing and shampooing services, provides event set up and takedown, and assists with the moving of offices, classrooms and other spaces.
2. Building Maintenance: Responsible for repairing and maintaining the College’s physical facilities through either minor repairs and maintenance work or the management of contractors and other vendors. Most repair and maintenance work on major systems such as air conditioning, electrical and plumbing is done through contractors.

3. Grounds: Responsible for maintaining the campus' landscaping and groundskeeping, including both cutting and planting. In addition, Grounds staff provide minor repairs for parking areas and pathways as well as maintain large designated outdoor areas.

Units, departments, and employees within the College assist in addressing safety issues through reports made to the College's security officers and contractor security guards, who are continuously on duty. Security officers are in the Safety and Emergency Management (SEM) unit. SEM's primary responsibility is to receive calls regarding safety and maintenance issues and, as part of their patrol, monitor and report facilities issues. There is regular communication between the Safety and Emergency Management unit and the Auxiliary Services unit regarding safety concerns and necessary repairs.

SEM ensures that all facilities are secure. The main campus provides 24 hours per day, 7 days per week security services including personal safety, access control and protection of property. The Campus Security office is located on the ground floor of the 'Ohi'a (Cafeteria) Building in room 104. On duty Campus Security personnel are available at (808) 734-9900 or through any of the emergency call boxes. The SEM website includes a link to a map with emergency call box and Automatic External Defibrillator (AED) locations as well as other safety and security information.

The College also provides privacy options for certain students and employees. A designated lactation room for students and employees who are nursing is located on the second floor of the 'Iliahi A Building. An all-gender restroom is located on the second floor of the 'Ilima Building.

The Auxiliary Services Director and the Assistant Auxiliary Services Director perform regular checks and inspections of campus buildings and grounds. If an issue is identified as needing repair, maintenance, upkeep, or general cleaning, particularly due to safety reasons, the Auxiliary Services Director is entrusted to deploy the necessary resources to successfully resolve the issue. The Auxiliary Services Director is responsible for communicating and informing employees, students, and visitors of construction, repair, and other safety concerns.

All community colleges in the UHCC system are supported by the UHCC-FEH unit. FEH works collaboratively with the College in developing and administering a variety of health and safety training and awareness programs, many of which, are directly related to the campus's physical resources. These programs include training and guidance on hazardous materials and waste management, asbestos and lead abatement, indoor air quality, fire safety, stormwater discharge, among many others. These training programs are provided to the College on a continuous basis to ensure that faculty and staff are informed of the best practices in the field and to ensure that a safe learning and working environment is maintained.

FEH also manages all major facilities projects on behalf of the College. FEH ensures that the

College is compliant with all applicable State regulations. They oversee the development and coordination of repair and maintenance projects and capital improvement projects; works with contractors and various government inspectors to assure ADA compliance; and assist the campus in communicating with the Department of Accounting and General Services, and with other state and county regulatory agencies.

### **ANALYSIS AND EVALUATION**

The College provides a safe and accessible learning and working environment. Campus buildings are constructed, maintained or renovated to building code standards and assures full access, safety and security. The College regularly assesses its facilities, security and maintenance programs through planning processes to ensure facilities meet student and staff needs.

---

**III.B.2. The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The College ensures effective utilization and continuing quality of facilities and equipment through planning to support the College's programs and services.

The College's Strategic Plan and Long Range Development Plan (LRDP, [III.B.2-1](#) v.1, [III.B.2-2](#) v.2) are overarching guides for decisions about physical resources. The LRDP serves as a blueprint for future development and drives all future projects. The College completed its most recent LRDP in 2010 (See III.B.4).

Facilities planning is aligned with and connected to the College mission. The LRDP ensures the effective use of the campus' physical resources. In the Annual Report of Program Data (ARPD), programs identify and justify facility, space, and equipment needs, supporting them with data evidence and alignment to the Strategic Plan. This annual assessment of instructional and student support programs informs institutional planning and budgeting. The Planning and Assessment Integration with Resource Allocation (PAIR) process also incorporates assessment, planning, and budgeting, while aligning to the Strategic Plan and LRDP (See III.D.1). In the PAIR process, each department and support services area ranks its needs based upon priorities in the ARPD and Strategic Plan. Institutional priorities are vetted and voted on by the Chancellor's Advisory Council (CAC). These processes assure effective utilization of resources to support programs and services while achieving the College mission.

Similar planning processes are in place for capital improvement program (CIP) projects, minor CIP projects, and capital renewal and deferred maintenance projects. The College adheres to the UH Board of Regents (BOR) Interests in Real Property policy and the Planning and Management of Real Property policy ([III.B.2-3](#), [III.B.2-4](#)). The UHCC System is committed to providing a safe working and learning environment. To ensure safe and sufficient physical resources, the different levels of the UH System share facilities planning and management. The UHCC System Office of Facilities and Environmental Health (FEH) manages projects that are deemed larger and typically require professional design consultants. FEH, when appropriate, assigns its environmental safety specialist to investigate and recommend remediation of code and safety needs. This office prioritizes projects within the total framework of needs for the UH System and UHCC System.

The Vice Chancellor for Administrative Services (VCAS) oversees physical resources and reports to the campus on approved and funded facility projects and campus maintenance and repairs through updates to the Chancellor's Advisory Council and construction advisory announcements.

The College ensures that program and service needs are considered when planning and maintaining its physical resources including facilities, land, and other assets. Between 2013 and 2017, over ten renovation and modernization projects resulted from the College's budget process and focused meetings with campus constituents. The examples below illustrate significant facilities-related projects of the campus:

- 'Ohi'a Auditorium and Foyer Renovation
- Culinary Institute of the Pacific
- Kopiko Courtyard and Classroom Renovation
- Title III Library Tutoring Center (Lamakū Learning Center)

The Lamakū Learning Center, (formerly known as the Study Hub), which is the campus' primary student tutoring center, is a good example of a successful facility project aligning to the College mission, particularly its commitment to student success. In Fall 2017, the center was opened with increased physical and technological capacity. The center includes improved student tutoring spaces, five renovated group study rooms, and collaborative spaces for faculty and students. The Center addresses the campus mission statement, aligns with the LRDP, and meets the College Strategic Plan.

The College ensures that program and service needs determine equipment replacement and maintenance. As part of the campus budget process (see [III.D.1](#)), units and departments make requests via the PAIR process. This process provides the basis for equipment replacement funding. In FY17, the campus provided \$460,000 ([III.B.2-5](#)) and in FY18, \$517,323 ([III.B.2-6](#))

in funds to replace equipment. (See III.D.1. for more details about the PAIR process.)

## ANALYSIS AND EVALUATION

The College's LRDP directs the overall planning and development of facilities. Buildings and facilities are constructed to support the strategic plan and larger goals of the college. The ARPD provides the basis, via the campus integrated budgeting process, for prioritizing program equipment replacement. These plans and processes help to assure the effectiveness and quality of the College's physical resources in supporting its mission.

---

**III.B.3. To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.**

---

## EVIDENCE OF MEETING THE STANDARD

The College plans and evaluates its facilities and equipment regularly to effectively support programs and services.

The College has a facilities manager in the Auxiliary Services (Aux) unit, who is the primary point of contact for campus facility needs. A computerized maintenance management system (AiM) is used for campus departments/units/programs to submit a work request. The AiM enables the campus to identify problems and track recurring issues. Additionally, custodial staff routinely assess the condition of facilities and report to the campus administration any needed repairs or modifications.

For ongoing facilities planning, the College uses the Facilities Renewal Reinvestment Model (FRRM), eFacilities AiM, program ARPDs, and the Scheduler System, which provides utilization reports. In addition, the College uses the annual FRRM database called Sightlines to record maintenance backlog and estimated annual funding required for ongoing capital reinvestment. The College monitors all facilities on a regular maintenance schedule, including planning for deferred maintenance, and establishes priorities for addressing both regular and deferred maintenance.

The College tracks classroom use, vacancy and fill rates, classroom equipment inventory, and campus facilities use. To identify trends, needs, and efficiency, the College compares its data to the data at the other UH System campuses. Current space needs that are existing or are projected

are identified by units, departments and programs. These data, along with feedback from campus groups, impact both current and future decisions.

The College's Planning and Assessment Integration with Resource Allocation (PAIR) process begins with the College Strategic Plan and mission statement, which all departments and units use as a guide for prioritizing activities and projects. As part of the ARPD, units include outcome assessment as an evaluation tool and identify any needed improvements. Any required resources are included in a budget request through the Allocation Request Form (ARF). ARFs are prioritized by campus Authorized Governing Organizations (Faculty Senate, Staff Council, Student Association, and Native Hawaiian Kalāualani Council) and recommended by the Chancellor's Advisory Council.

Using systematic and regular inspection, assessment reports from programs, units, and area, and Administrative Services data gathering, the College is able to accommodate the changing needs of the campus and plan for the future. Administration is active in providing information and updates to the College regarding construction projects and other works that impact physical resources.

## ANALYSIS AND EVALUATION

The College regularly evaluates its physical resources to determine upkeep and viability in supporting the College's academic and student support programs. The College utilizes various sources of data and program assessment results to ensure the effectiveness of its physical resources and plans accordingly.

---

### **III.B.4. Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.**

---

## EVIDENCE OF MEETING THE STANDARD

The LRDP, the College Strategic Plan and University policies provide the overarching direction for all long-range capital plans and support institutional improvement goals.

The LRDP is a comprehensive capital improvement and land use plan. The LRDP identifies the physical resources needed to achieve the College mission, strategic goals, and objectives by supporting and guiding future expansion and growth of the College. It includes a Phase I plan addressing facility needs and campus improvement plans to be implemented within a near-term (seven-year) horizon and an Ultimate Plan to guide orderly campus development over the long-term (20+ years). The College periodically updates its LRDP (typically every ten years), and the

DRAFT MAY 8, 2018

Chancellor recommends it for approval by the UH administration and the Board of Regents (BOR).

The College gained approval from the BOR for its current LRDP in 2010. It not only establishes space requirements and allocations as shaped by the long-term goals, but also provides the framework by which the College requests additional funding for capital improvement projects (see III.B.2).

The *UHCC Strategic Directions 2015-2021* also commits to developing a system of planned equipment replacement, similar to the building maintenance plan that accounts for the expected life of equipment, the cost of replacement, and a system-wide budget for capital equipment replacement. By approaching the replacement of equipment as a system, the influence on campus budgets will be regulated so that large items do not impact the budget in unexpected ways. The clear identification of a replacement schedule also provides a clearer picture of the amount of deferred equipment within the system.

To that end, the UHCC System has implemented an equipment replacement process for all campuses. Using a portion of the 2015 tuition and fee increase and funds that were received through legislative appropriation, the UHCC System centralizes funds from the seven campuses in an equipment replacement pool that is then distributed to each campus on an annual basis. Using the College's request priorities identified in the PAIR process, the College prioritizes its instructional, support, and infrastructure equipment replacement needs through this funding request process. The College has received nearly \$1.0 million in equipment replacement funds using this process during the first two years (FY16 and FY17) of the program's inception.

## ANALYSIS AND EVALUATION

The College has long-range capital plans that support its mission and institutional improvement goals. Long-range capital planning for the College aligns with the plans provided by the UH and UHCC System. Funding for long-range projects is guided by college mission and goals, and planning is coordinated with the systems offices, including projections of the total cost of ownership.

### Evidence for III.B.

- III.B.2-1 Kapi'olani CC Long Range Development Plan (LRDP) Vol 1
- III.B.2-2 Kapi'olani CC Long Range Development Plan (LRDP) Vol 2
- III.B.2-3 Board of Regents Policy RP 10.201, Interests in Real Property
- III.B.2-4 Board of Regents Policy RP 10.202, Planning and Management of Real Property

III.B.2-5 UHCC VPCC FY17 Equipment Replacement Approval

III.B.2-6 UHCC VPCC FY18 Equipment Replacement Approval

---

**III.C.1. Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.**

---

### EVIDENCE OF MEETING THE STANDARD

The Center for Excellence in Learning, Teaching, and Technology ([III.C.1-1](#)) provides network infrastructure support and hardware and software support for audio visual, networked photocopiers, and information technology equipment for the College's management, operational, academic, and academic support services. CELTT's instructional designers offer consulting on technology, distance education, and host and conduct software training for faculty and staff. CELTT arranges for campus-wide software licenses such as MS Office. There are limited licenses for Lynda.com, Zoom, and Adobe Acrobat. CELTT's web team supports the College public website, intranet ([III.C.1-2](#)), and mobile app ([III.C.1-3](#)). The information security officer trains employees on information security and is available for immediate response if needed. CELTT provides facilities for faculty to do their work on computers and Auxiliary Services supports a photocopier in CELTT's building for employees to photocopy large projects. Network and information security support is delivered in collaboration with the district level office University of Hawai'i System Information Technology Services (UH ITS, [III.C.1-4](#)).

Technology management at the ten campuses of the UH System is decentralized, where each campus is responsible for its technology resources, services and support. However, UH ITS provides network connectivity beyond the campus and across the seven community colleges and three universities and supports enterprise software systems such as PeopleSoft, Banner, Centralized Authentication Services, Quali Financial and Curriculum Management, and Lulima (Sakai Learning Management System). UH ITS sets overarching policies and guidelines. The University of Hawai'i Information Technology Service Policies and Compliance website ([III.C.1-5](#)) lists the policies that address the use and management of information technology resources, security and protection of sensitive information, institutional data governance, student conduct code related to technology use, protection of educational rights and privacy of students, the credit card program, electronic payments, records management, social security number protection, security breach of personal information, destruction of personal information records, the Health Insurance Portability and Accountability Act, Family Educational Rights and Privacy Act and other external regulations. There is a continued emphasis on University of Hawai'i

DRAFT MAY 8, 2018

policies, State of Hawai‘i Revised Statutes, federal regulations, and external regulations related to Information Security ([III.C.1-6](#)).

### ***Technology Resources, Services and Support***

The Center for Excellence in Learning, Teaching and Technology (CELTT), a unit under the Vice Chancellor for Academic Affairs ([III.C.1-7](#), p. 5), is the lead entity on campus that plans for, develops and delivers high quality media and computing resources and services for instruction and student learning, administrative operations, and faculty and staff development. The unit is led by an appointed faculty member and includes information technology specialists, a media specialist, a graphic designer, an electronic technician, two instructional design faculty, and several support positions. CELTT continually strives to ensure the campus is informed of best practices and provides the necessary support with available resources. The unit’s website provides an overview of their services and access to information and resources needed by the constituents they serve ([III.C.1-8](#)).

In 2013, the College created a Technology Plan that focused on current and new initiatives necessary to meet the needs and demands of the campus ([III.C.1-9](#)). The technology plan was updated in spring 2018 ([III.C.1-10](#)) and vetted through the Chancellor’s Advisory Council (CAC).

There are several groups and teams in CELTT, each with a specific focus.

### **Instructional Development Support Group (IDSG)**

The IDSG is responsible for professional development related to technology to support faculty, staff, and administrators. A wide range of workshops and training is provided and listed at CELTT’s TEACH site ([III.C.1-11](#)). There is a strong emphasis on faculty professional development for distance education. See the Distance Education plan for details ([III.C.1-12](#), p. 33).

### **Graphics Production**

Graphics production provides layout for posters, flyers, banners and handouts. The graphics specialist meets with clients to determine style and content.

### **Web and Mobile App Development Group**

DRAFT MAY 8, 2018

The web and mobile development group's main role is the maintenance and improvement of the College's main website, the intranet site 'Ohana, and the mobile app. All three are primary communication tools for the College.

The group is also involved in several key projects at the College. One major project is improving compliance with the American Disabilities Act (ADA) for the main website and several subsidiary websites. The group is actively participating on a team of University of Hawai'i Community College (UHCC) website developers and UH ITS to develop a common standard for compliance. In spring 2018, UH Executive Policy EP 2.210 ([III.C.1-13](#)) on the use and management of information technology was updated to improve its support of the ADA and other IT related policies. Page 10, G. Commitment to Access states, "All web content should be in compliance with Section 508 Standards and should also meet the Web Content Accessibility Guidelines (WCAG) 2.0 Level AA." To provide guidelines to the campuses, UH ITS issued UH Guidelines for Accessible Technology and Digital Media ([III.C.1-14](#)), which outlines priorities for website compliance.

### **Networking Team (NT)**

The Networking Team has the vitally important responsibility of keeping the College's network running. The NT oversees the main distribution frame, intermediary distribution frames, College servers, wireless access, security firewalls, and all hardware connections. The team is responsible for fiber runs, copper runs, network switches, patch panels, static IP networks, DHCP networks, VOIP networks, subnets, servers, firewalls, and DNS configurations. The NT manages approximately 24 servers. Each server must be maintained on a regular basis. Much of the maintenance is done at night and on weekends to reduce network interruptions.

### **Digital Systems Group**

This group manages the College's video production, A/V equipment and installation, Voice Over Internet Protocol (VOIP), analog lines, and centralized technology procurement.

### **Customer Care Center (CCC)**

The CCC addresses any problems staff encounter with computers, copiers, printers, projectors or equipment in the classroom. The individuals in the CCC support basic presentation setups (projector, screen, laptop and remote "clicker") and microphone setups. They maintain equipment and upgrade software. They triage the many support tickets that they field using the Resolve Ticket system ([III.C.1-15](#)). The CCC also provides computer lab support and has scheduled a cycle of equipment replacement for all labs.

### **Information Security**

The CELTT team has extensive knowledge on UH privacy and security policies ([III.C.1-16](#)) as well as extensive knowledge on Federal and State privacy and security policies. Information security includes both electronic data and paper files. The Information Security Specialist (ISS) informs, trains, and advises the College on proper information security practices and maintains a secure storage area for all College paper files containing sensitive information. The ISS works with the University's Information Security Officer to keep up-to-date on current trends, policies, and threats, and is responsible for overseeing all investigations and reports if there are any information security breaches.

### ***Assessment of Technology Resources, Services and Support***

In 2012, 2016, and 2018, campus climate surveys were administered to the faculty and staff to gauge their perceptions of College services, including those of CELTT. The 2018 Getting Better at Getting Better climate survey compares 2018 with 2016 and 2012 results. The trend is that CELTT is improving its services relative to 2016 ([III.C.1-17](#), p. 95, questions 48.1-48.4).

Students surveyed through the Community College Survey of Student Engagement (CCSSE) in 2016, responded positively to the services provided by CELTT, where the results are given as percentages of student responses ([III.C.1-18](#)). To illustrate, 95 percent of respondents to the survey indicated that they were satisfied with the customer service of the Help Desk/computer service staff. Additional data on technology resources at the College are found on the Annual Report on Program Data (ARPD) on Technology Resources ([III.C.1-19](#)).

## **ANALYSIS AND EVALUATION**

The College's Center for Excellence in Learning, Teaching, and Technology (CELTT) ensures that the campus has sufficient technology services, support, facilities, hardware and software to support all functions of the College.

CELTT takes the lead on all technology-related initiatives and with the support of the Chancellor's Advisory Council, CELTT maintains a technology plan that prioritizes the information technology needs of the College. The College uses the policies of the University of Hawai'i's Information Technology Service to ensure compliance with state and federal guidelines. Over the last few years, there have been significant improvements in staffing in CELTT in areas such as web support, network support, and instructional design support. Recent initiatives in distance education training have improved professional development offerings at CELTT. In the 2018 climate survey, Getting Better at Getting Better, CELTT improved campus satisfaction ratings relative to the 2016 survey.

---

**III.C.2. The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.**

---

**EVIDENCE OF MEETING THE STANDARD**

Kapi‘olani Community College plans for, updates and replaces technology to maintain its infrastructure, quality and capacity.

*Continuous planning*

CELTT has a campus technology plan ([III.C.2-1](#)), which includes networking, hardware and software, and services (see III.C.1.). CELTT attends regular meetings with the UH System regarding security updates, policies and procedures, and infrastructure planning. CELTT’s individual workgroups stay current with industry developments and advise the CELTT Coordinator and the College on emerging technology trends.

The UH System provides a foundation for the delivery of infrastructure and services for deployment across the ten campus system, significantly reducing costs for individual campuses. The Chancellor’s Advisory Council (CAC) charter ([III.C.2-2](#), p. 4) reviews the Technology Plan annually. The CAC ensures that the Technology Plan supports the College’s mission and Strategic Plan and aligns with the directions set by the University of Hawai‘i Community Colleges and the University of Hawai‘i System.

*Determining priorities*

CELTT has established a list of criteria for prioritizing technology needs. The ranked criteria listed below guide how CELTT allocates its resources to support the College. The criteria are shared with the College to support transparent decision-making and to show that decisions must reflect the best interests of the College and the Strategic Plan. This list embodies the priorities of a centralized information technology management system.

1. Health and safety
2. Campus-wide infrastructure and information security
3. Core services and support
4. Impact on a broad student population across multiple disciplines
5. Workforce development tied to technology and a specific degree or certificate
6. Impact on a specific program or department
7. Impact on a specific course

### ***Updating and Replacing Technology***

Meeting student technology needs requires careful planning and the commitment of resources for continuous updates and upgrades. CELTT identifies needs through the annual budgets of departments, units, and programs, through needs identified in the PAIR (Planning and Assessment Integration with Resource Allocation) process, and through requests from individuals. These needs are documented, prioritized, and compiled for centralized procurement and management. A technology procurement form is available for departments, units, and programs to submit requests for technology purchases ([III.C.2-3](#)). There are also technology requests from grant-funded projects.

The CELTT Coordinator receives a budget allocation from the College. The College allocated \$250,000 in FY 2017 for centralized technology procurement, prioritized in tiers. Tier one includes items such as computers and equipment that require immediate replacement. Tier two includes older computers that are currently operating but the core processors will no longer be able to run new versions of an operating system as upgrades continue. Tier three is for everything else.

An example of the College's commitment to systematically maintain technology resources is the purchase of KACE in 2015, a Dell IT inventory management system, which serves as a centralized inventory system. Through the Planning and Assessment Integration with Resource Allocation (PAIR) process and the submission and approval of Allocation Request Forms (ARF), \$100,000 was allocated to purchase KACE. KACE allows CELTT to inventory all computers and software; tracks software versions, operating systems, usage, and security patches; and helps with replacement schedules. Once equipment is purchased and received, CELTT logs the equipment into the system, installs necessary software, barcodes the equipment, and deploys the equipment to its appropriate location. In addition, KACE allows CELTT to conduct an accurate and comprehensive budget and needs assessment. KACE has been operational since 2015. Although some older inventory still needs to be entered into KACE, all new equipment is properly inventoried.

A few examples of planned upgrades to technology addressed in the Technology Plan are upgrades of network switches, Cat 5 to Cat 6 cabling, classroom projectors, and student lab computers ([III.C.2-4](#), p. 9). Updates to technology resources for online teaching can be found in the Distance Education plan ([III.C.2-5](#), p. 33).

## **ANALYSIS AND EVALUATION**

DRAFT MAY 8, 2018

The College plans for, updates and replaces technology to ensure that the quality and capacity of the technological infrastructure are adequate to support the College's mission, operations, programs, and services.

The College has a dedicated division (CELTT) that is responsible for updating and replacing technology and maintaining the technological infrastructure based on department ARPDs and the Technology Plan, which is continually updated.

---

**III.C.3. The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.**

---

### EVIDENCE OF MEETING THE STANDARD

CELTT implements and maintains technology resources at all physical and distance education locations that offer courses, program, and services, ensuring reliable access, safety and security throughout.

#### *Implementation and maintenance of technology resources*

Faculty and staff request technological support through CELTT's intranet website, [ohana.kapiolani.hawaii.edu/departments/celtt/](http://ohana.kapiolani.hawaii.edu/departments/celtt/). As the College's vision and culture expand beyond "brick and mortar" infrastructure to more online learning, CELTT has positioned the unit to accommodate such changes.

The College offers programs at other locations. For instance, the Emergency Medical Services program is offered at UH Maui College and Hawai'i Community College. The College also offers the Nursing Program at Leeward Community College. CELTT purchases computers, fax machines, phones, and analog services and provides information security support for fieldwork supervisors, instructors, staff, and students. Infrastructure support such as networking and firewalls are maintained by the hosting campus.

The Culinary Institute of the Pacific (CIP) is located less than a mile from the campus and began offering classes in fall 2017. CELTT was involved from the planning stages to the completion of phase one, which included two classroom laboratories, ensuring that the technology infrastructure was in place and that all systems were operational for the first day of instruction.

The 2013-2017 Technology Plan provided a concrete implementation plan to support and maintain a campus-wide infrastructure and network security, which included inventory

management and the purchase and upgrade of a broad range of technology including computers, projectors, screens, speakers, software licenses, wireless access points, bandwidth, network closets, network photocopiers, two-way radios, cellular service with voice and data coverage, analog lines, and distance learning technologies, all in support of current and future renovations and new construction ([III.C.3-1](#)).

### ***Ensuring Reliability of Technology Resources***

The CELTT team has designed a failure-tolerant reliable infrastructure of multiple hard drives which follows the IT standards of practice. If one hard drive should fail in a flood, surge, fire, etc., the backup drives will function in its place. Servers and hard drives are placed strategically throughout the campus, greatly minimizing vulnerability to unforeseen threats.

CELTT's Information Security Specialist holds regular workshops on campus and assists with UH System-sponsored workshops to inform the College of the most recent policies and procedures on data governance and information security ([III.C.3-2](#), [III.C.3-3](#)). For more information on CELTT's Information Security, see III.C.1.

## **ANALYSIS AND EVALUATION**

CELTT maintains and implements technology resources in physical locations where courses, programs and services are offered and in Distance Education environments, ensuring reliable access, safety, and security. The Technology Plan provides a campus action plan addressing infrastructure and network security. The CELTT team has a failure-tolerant disaster recovery and reliability infrastructure. CELTT's Information Security Specialist provides workshops to update and the College has preventive measures in place to ensure information security.

---

**III.C.4. The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.**

---

## **EVIDENCE OF MEETING THE STANDARD**

CELTT provides faculty, staff, and administrators a range of technology and instruction workshops, consultation, and support. In addition, the Library and Learning Resources unit (LLR) provides students with training in the use of relevant software and programs ([III.C.4-1](#)). The newly developed Distance Education Plan provides an overview of these services in the Technical Support and Preparation section ([III.C.4-2](#), p. 33).

### ***Instructional Support for Faculty, Staff and Administrators***

CELTT provides a number of professional development opportunities where instructional designers and other faculty/staff members from across the campus offer workshops on specific topics related to faculty, staff and administrator responsibilities.

CELTT offers various training workshops for faculty, staff, and administrators including Lulima (current course learning management system version of Sakai), Google applications, course design, ADA compliance, screencasting, and other relevant topics ([III.C.4-3](#), [III.C.4-4](#)). Workshops are evaluated for their effectiveness ([III.C.4-5](#)). In addition, nationally sponsored professional development webinars such as Innovative Educators are offered to the campus.

TEACH coordinates and promotes a number of learning opportunities ([III.C.4-6](#)). The "Training" area of this site includes workshops offered in person and online ([III.C.4-7](#)). These workshops span a variety of subjects such as web conferencing, Google Certification (a community of practice for professional development, Collaborative Circles for Creative Change (C4ward), Lulima tools, and a Spotlight workshop series facilitated by fellow instructors. A blog includes updates and information useful for faculty to improve their teaching practices ([III.C.4-8](#)). This site also promotes best practices in distance education and highlights important distance education issues, identified by the US-DOE and ACCJC, such as regular student interaction and student authentication. Other professional development offerings include Recharge '17 Technology Day, Lulima Workshops, and Resources & Tools ([III.C.4-9](#), [III.C.4-10](#), [III.C.4-11](#)).

In summer 2016, CELTT launched the Teaching Online Prep Program (TOPP), a six-week online program for instructors who will be teaching online for the first time, or are looking for ways to improve current practices ([III.C.4-12](#)). A second [TOPP](#) was offered in fall 2017, and will continue to be offered on a regular basis ([III.C.4-13](#)). Evaluations and reflections of the summer 2016 program were summarized by one of CELTT's instructional designers ([III.C.4-14](#)). The Teaching Online Self-Paced Program (TOSP) was launched in fall 2016. This program enables faculty to complete the program at their own pace and not necessarily within a six-week timeframe.

In fall 2016, a Distance Education Faculty Survey was distributed to faculty who are currently teaching online ([III.C.4-15](#)). Some of the questions allowed CELTT and the campus to assess the resources used, the comfort level, and the training needs of online instructors. While the questions and results ([III.C.4-16](#)) were geared specifically towards distance education, the comments about digital resources are widely applicable and important.

The Faculty Senate Distance Education Committee continues to address and discuss various topics important to faculty, including the campus learning management system, learning software, current CELTT resources, Open Educational Resources, foundational practices for instructors and recommendations to the Interim Chancellor ([III.C.4-17](#), [III.C.4-18](#)). CELTT and the Faculty Senate Distance Education Committee have a synergistic relationship that places faculty needs as a priority.

## TOPP IS TOP

*"Oh my goodness, this class has helped me clarify my understanding of online teaching a bunch... [It] reminded me that the tech isn't the point; connecting with the student is the point."*

*"My own experience has made me more aware and hopefully empathetic to the feelings that my students will have as they take my online course."*

*"...Problem-based approaches... serve as real world examples of how we might approach our course design and delivery."*

These are just a few of the positive comments shared by the participants of the Teaching Online Prep Program (TOPP) offered by the Center for Learning, Teaching, and Technology (CELTT). In response to a need for updated, consistent, and accessible online professional development at the College, TOPP was created in 2016 by two instructional designers to help faculty teaching online for the first time, along with faculty wanting to redesign an existing online course. This 6-week, asynchronous online faculty development course provides participants first-hand experience themselves as online learners, and thus develops empathy and provides insight into the mindset of students they teach.

In the first year 26 faculty members completed the program, with 28 online courses either created or updated as a result. Assessments in those courses indicated positive feedback from students and improved student learning. Furthermore, as digital systems shift and evolve, so too does CELTT and its instructional design team.

### *Operational Support for Faculty, Staff, and Administrators*

CELTT responds to a range of individual requests from faculty, staff and administrators. These requests include, but are not limited to, help with Laulima, recording meetings or class sessions, computer viruses, hardware/software not working properly, screencasting, website assistance, uploading documents, Microsoft Office software, and more.

CELTT's Resolve site is accessible for faculty, staff and administrators to request service assistance for equipment, telephone, and/or network problems and instructional support for distance learning, multimedia and Laulima ([III.C.4-19](#)). The unit maintains a support log, which includes a ticket number, nature of the request, department requesting the help, affiliation of the requestor, and other information used for tracking ([III.C.4-20](#)).

### *Support for Student Learning*

Students attend a host of workshops at the library that can assist them in navigating through the technology needed for school.

Currently, the library's Secrets of Success (SOS) program offers workshops on how to survive an online course, Laulima use, Google applications, Microsoft Word basics, Microsoft PowerPoint basics, and Microsoft Excel basics. The staff member who organizes the SOS program works closely with presenters (all of whom volunteer their time) and other on-campus partners to offer relevant workshops ([III.C.4-21](#)).

Pamphlets made available to students and all faculty and the website market the library's SOS Workshops. SOS workshops are announced in the College's daily News & Events ([III.C.4-22](#)). Instructors continue to promote the SOS workshops in conjunction with their courses.

In addition to local campus services, students have access to UH System online services such as Banner-STAR, the Course Evaluation System, Laulima (the Sakai Learning Management System), MyUH Services Portal, and Enhanced UH Login Security. Support is managed primarily at the UH System level (district office).

## **ANALYSIS AND EVALUATION**

Kapi'olani Community College's Center for Excellence in Learning, Teaching, and Technology (CELTT) provides a range of instructional programming and support as they relate to technology for faculty, staff and administrators. The Library and Learning Resources unit currently offers the SOS workshops each semester for students to learn about UH-specific tools and general computer basics.

CELTT provides professional development and training workshops on various technology tools for faculty, staff and administration members. The Faculty Senate Distance Education committee looks to CELTT for expertise in professional development and training. The UH System provides students support with enterprise-wide systems such as Lulima (LMS) and MyUH Portal.

---

**III.C.5. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.**

---

**EVIDENCE OF MEETING THE STANDARD**

The College adopts the information systems policies and procedures set forth by the University of Hawai‘i system to inform the appropriate management and of technology in the teaching and learning processes and has established guidelines and procedures which inform the appropriate use of technology in teaching and learning.

***Policies and procedures that guide the appropriate use of technology in teaching and learning***

As addressed in III.C.1., the University of Hawai‘i Board of Regents approves policies that establish the use and management of all information technology resources, including those that specifically support learning, and the policies are listed on the University of Hawai‘i Information Technology Service Policies and Compliance website ([III.C.5-1](#)). CELTT’s service procedures (see III.C.1.) support the use of technology in the classroom and in distance education. In addition, as mentioned in Standard III.C.1., the College created, vetted, approved, and now is implementing a campus Distance Education (DE) Plan ([III.C.5-2](#)) that addresses support for the DE learning environment, but also addresses support on the physical campus. The Distance Education Plan systematically addresses a wide range of topics ranging from technology infrastructure to services to employee professional development to student support, all in the interest of teaching and learning. These topics are defined by the plan’s purpose, as outlined on page 6.

The Distance Education plan was approved by the Faculty Senate and the Chancellor’s Advisory Council in spring 2017. These same committees and a newly assigned interim DE Coordinator are implementing the plan. As with major campus plans, the DE plan is on scheduled to be reviewed annually ([III.C.5-3](#), p. 4).

## ANALYSIS AND EVALUATION

The College adopts the information systems policies and procedures set forth by the University of Hawai‘i system to inform the appropriate use of technology in the teaching and learning processes. CELTT has applied these policies and procedures and created campus procedures that support technology-supported teaching and learning for the College. The College has also developed its own Distance Education Plan to coordinate the College’s resources and improve support for teaching and learning.

### III.D. Financial Resources

---

**III.D.1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)**

---

#### EVIDENCE OF MEETING THE STANDARD

Kapi‘olani Community College and the University of Hawaii Community College System are committed to support and sustain student learning programs and services and improve institutional effectiveness. Sufficient revenue streams are maintained to cover base (or current service) operations as well as to support initiatives that innovate and enhance programs and services. Institutional priorities are identified through goals and objectives established during the strategic planning process and funding sources are provided to help realize some of these priorities. The College works in concert with the University of Hawai‘i Community Colleges (UHCC) system office to ensure that the budget processes at both the system and campus levels are managed with integrity and that financial stability is maintained.

The operating budget approved by the Board of Regents for FY 2018 has a projected \$49,076,753 in unrestricted revenue to fund an unrestricted expenditure budget of \$49,076,753. Operational reserves exceed the minimum 5% and 10% targeted thresholds ([III.D.1-1](#)).

#### *Sufficient Financial Support, General Funds and Tuition and Fees Special Funds*

Kapi‘olani Community College, and the UHCC system as a whole, rely on State appropriated revenues (General Funds) to subsidize a significant portion of its operations in order to keep post-secondary education within reach of target populations. Each year, the UHCC campus Chancellors and the Vice President for Community Colleges work together to determine General Fund allocations to the individual colleges, with the aim of maintaining established levels of current service funding. Current Service funding equals the prior year General Fund appropriation, plus any previously agreed-upon collective bargaining augmentations, minus base budget reductions, plus funds for new initiatives (program change requests). General Fund base budget reductions are normally driven by downturns in the State economy; however, it should be noted that there have been no significant budget reductions since FY 2011.

In 1995, the Legislature authorized the establishment of the Tuition and Fees Special Fund

(TFSF) and permitted the University to retain and expend revenues earned from tuition in order to “maintain and improve the University’s programs and operations” (Act 161, SLH 1995). Prior to this action, tuition revenues were retained by the State and the University received General Fund appropriations for all of its general operating expenses. This change afforded the Community Colleges the means to implement planned tuition increases designed to sufficiently cover base operations as well as fund initiatives supporting educational improvement and innovation. It should also be noted that in spite of consecutive tuition increases over the past twelve years, the Community Colleges remain affordable. According to the 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education, the UHCC campuses were identified as the most affordable two-year public higher education institutions in the nation ([https://irhe.gse.upenn.edu/affordability-diagnosis/state\\_reports](https://irhe.gse.upenn.edu/affordability-diagnosis/state_reports)).

The General Funds received by the College combined with tuition and fees revenues (Tuition and Fees Special Fund) generated from credit instruction comprise the general operating fund or “unrestricted operating budget” of the campuses. Over the past 5 years, the College has maintained a healthy TFSF balance ([III.D.1-2](#), [III.D.1-3](#))

The funding of the general operating budget through a combination of General Funds and TFSF has a significant stabilizing effect on campus operations. General Fund allocations remain relatively stable even when enrollments contract, mitigating the impact of the loss of TFSF revenue. Conversely when enrollments grow, the College generates additional revenue to meet increased costs. Reductions to the General Fund base itself usually coincide with downturns in the State economy; however, these periods are often associated with increases in enrollment as students leave the workforce to further their education ([III.D.1-4](#), [III.D.1-5](#))

### ***Other Special and Revolving Funds***

Other special and revolving funds also finance certain aspects of campus operations; however, unlike General Funds and TFSF that support general operations, these funding sources are used to support specific program activities. The program activities include non-credit instruction, summer session instruction, conferences, and student activities. The individual funds are established by statute and operate on a self-sustaining basis. In addition to covering direct costs, programs are required to generate an administrative cost fee to cover their equitable share of general campus operating expenses.

### Extramural Funds

Extramural funds are project-based funds from federal, state, and private sources, which relate to research and training grants or contracts. These funds are obtained through competitive grants or contracts and are focused on specific improvements or on services provided to the contracting agency. All extramural funds are administered through the University Office of Research Services ([III.D.1-6](#)).

### Reserves

The UHCC System requires that each campus maintain adequate financial resources to ensure financial stability ([III.D.1-7](#)). The College maintains sufficient cash reserves to address emergencies (5% reserve) and other operating contingencies such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (10% targeted reserves).

## GRANT HIGHLIGHTS

*“Science is a hard subject. And it’s not a subject that we all like or enjoy but having that culture incorporated into it has really helped us with our studies and being more engaged with our Hawaiian culture.”*

In 2014, grant funded Project Olonā engaged Native Hawaiian students in the comparison of plant growth rates using traditional soil and hydroponic systems. These two student quotes show the collateral impact from what a cursory view would classify simply as a “botany” project.

Extramural revenue to fund projects like this exceeds the benchmark set in the Strategic Plan (2008-15) of \$5 million annually. In addition to instructional-related support, this revenue supports building/office renovation, professional development, including travel and conference fees, innovation across all silos, and tuition support.

Grant-funded scholarships benefit students and also help us meet enrollment management and affordability goals. These benefits are most noticeable, however, in their positive impact on our most vulnerable student populations.

Capital Improvements Program (CIP) Funds

The UHCC system supports all campuses by securing and allocating Capital Improvements Program (CIP) funding. The primary revenue source for University CIP projects comes from State-issued general obligation bonds, where debt service payments to retire the bonds are funded by the State. Individual campuses are not obligated to pay for these long-term obligations.

Funding for Capital Renewal and Deferred Maintenance (CRDM) and Minor CIP are provided as State-funded lump sum appropriations, which means that the Community Colleges can determine the

specific projects that are funded through the lump sum appropriations. The UHCC system conducts an annual CRDM and Minor CIP budget meeting to allocate the lump sum appropriations. Each campus formulates prioritized lists of CRDM and Minor CIP projects for consideration. Projects are prioritized at the UHCC system level by weighing the relative importance of each project against the needs of the seven UHCC campuses. This process ensures that the highest CRDM and Minor CIP needs are met by allowing the funds to flow to the most critical projects in the UHCC system ([III.D.1-8](#), [III.D.1-9](#), [III.D.1-10](#)). (ER 18)

**GRANT HIGHLIGHTS (CONT.)**

*"I think it's just the fact that we start all on the same cohort level. We're all moving up at the same time, experiencing all these things at the same time. It's almost just like a shared experiences through the cultural aspects like back to the first summer bridge. I think before we met, we would not even tell each other if we were feeling dumb about stuff. We wouldn't let each other know. Now we, literally, suffer with each other like, 'Man, I don't get it! I don't get it!' 'Yeah, I don't get it, too!' We all bring something to the table. If we don't know...we would just help each other."*

***Financial Integrity and Stability.***

*Board of Regents Oversight*

The framework of financial planning begins with a comprehensive operating financial plan submitted to the Board of Regents (BOR) for its approval prior to the start of each fiscal year. The plan provides the BOR with oversight to ensure that the University is managing its resources in a fiscally responsible manner.

The plan covers all appropriated funds, including the general operating budget and other special and revolving funds. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures. These budgets are broken down on a quarterly basis and variances exceeding established thresholds at the Community College System level must be explained to the BOR at the close of each quarter ([III.D.1-11](#)). (ER 18)

### *Budget Adjustments*

All general operating and other special and revolving fund budgets are entered into the Kualii financial management system at the individual account level and by major category of expenditure (regular payroll, lecturer payroll, casual hire payroll, student help payroll, other current expenses and equipment). These budgets are monitored via monthly budget-to-actual reports that are posted to the UHCC Budget website.

General operating budgets (GF+TF SF) are monitored and adjusted throughout the year as needed. For other special and revolving funds, financial plans are monitored to track revenue and expenditure projections, as shown in the 37-47 reports ([III.D.1-12](#)). Best practices regarding cash management are followed to ensure that cash flow requirements, long-term obligations, and other unanticipated costs can be covered as they arise.

### *Setting Funding Priorities*

Kapi'olani CC is one of seven community colleges in the UHCC system. Accordingly, the College is part of two resource allocation processes – the UHCC system and its own.

At the system level, allocations are provided for priority initiatives to allow all seven campuses the means to implement institutional improvements that support strategically important initiatives. The Hawai'i Graduation Initiative (HGI) is an example of a high-priority initiative. The HGI aims to increase the number of educated citizens within the state. HGI's strategies reflect the UHCC System's commitment to support increased student participation and completion, particularly for students from underserved populations and regions, and to expand workforce development opportunities across the State.

### *UHCC System Performance Funds*

Performance-based funding has been identified as a solution aimed at generating greater institutional productivity, accountability and educational attainment. Through funding incentives, performance-based funding is designed to encourage efficient resource allocation, greater awareness and attention to strategic priorities and a results-oriented campus culture. The Community Colleges system currently earmarks approximately \$6.5 million of its base budget for this purpose. Starting in FY16, the University of Hawai'i system also began providing performance funding allocations that contributed an additional \$2.0 million. Combined, performance funding represents over 4% of the total general operating budget. In the past, the College has performed well; in recent years, however, the College has not met its performance goals in four of the five categories, meeting targets only in the number of degrees and certificates awarded in STEM. The Financial Projections FY 15-17 show historical performance funding allocations ([III.D.1-13](#)).

Performance funding allocations support the HGI by linking funding to the successful attainment

of goals that promote the initiative. Performance measures related to increasing student participation and completion, particularly for students from underserved populations and regions, and expanding workforce development opportunities, are intimately tied to HGI's strategies.

#### *UHCC Innovation Funds and other Strategic Initiatives*

Innovation and strategic initiative funding allocations are used to address critical needs identified through the strategic planning process and support the goals of the HGI. Some of the initiatives include subsidizing the cost of new classes associated with enrollment growth, reforming developmental education (two years of \$500,000 in annual support for developmental education endeavors and co-requisite programming ([III.D.1-14](#)), improving retention and persistence through guided pathway and early intervention systems (\$30,000 to support STAR), expanding financial aid support (\$20,000 to \$25,000 in annual support for development of an open educational resources (OER) and Textbook Cost: \$0 program at the College ([III.D.1-15](#)), supporting Native Hawaiian achievement, and replacing aging or obsolete equipment.

#### *Campus Process*

At the campus level, the College ensures that the entire campus has the opportunity to participate in the budget deliberation process. The campus-based resource allocation, formally codified in KOP 1.111 ([III.D.1-16](#)) and titled the Planning and Assessment Integration with Resource Allocation (PAIR) process, is specifically designed to increase campus-wide participation, improve and increase fiscal communication, and embrace inclusivity. The process is built upon campuswide participation through the College's authorized governance organizations (AGOs). The entire process is based on campus priorities as laid out in its Strategic Plan and as reflected at the program or unit level through annual program reports, such as the Annual Report of Program Data ([III.D.1-17](#)) or Student Success Plans ([III.D.1-18](#), [III.D.1-19](#)).

#### ***Participatory Governance and Financial Planning and Budget Development***

The budget process starts in the summer for the upcoming fiscal year (FY) and continues through the fiscal year to ensure that program resource requirements are discussed and met. Individual units and departments work with the administration to allocate the budget received from the system. Allocations are based on program/unit/department alignment with the strategic plan and student success pathway as reported in the Annual Reports of Program Data (ARPDs) and Comprehensive Program Reviews (CPRs). Departments also refer to their five-year budget plans during the allocation process. Finally, the Planning and Assessment Integration with Resource Allocation (PAIR) process and the submission of allocation request forms (ARFs) is a bottom-up process to allocate funding beyond base operational needs. ARFs may be submitted by any constituent on campus. All ARFs must also be tied to the strategic plan and student success pathway for consideration. Multiple meetings and town halls are conducted to ensure participation by all constituents throughout the budgeting process.

- The UHCC budget report communicates the General Funds (GF) and the Tuition and

Fees & Special Funds (TFSF) allocated to the College for the fiscal year. This report provides the College with the information it needs to realistically project its expenditures for the current fiscal year.

- Budget Allocation Spreadsheet for FY2018 ([III.D.1-20](#)).
- In the summer, the Vice Chancellor for Administrative Services schedules a meeting with all department/unit heads to begin to put together their budget requests.
  - Budget request and 5-year plan meeting schedule ([III.D.1-21](#))
  - Sample budget request form ([III.D.1-22](#))
- In September, the program administrators meet with the various departments to discuss their budget
  - Budget meeting email ([III.D.1-23](#))
- In October, the Chancellor provides all constituents with a snapshot of how the College's budget is allocated.
  - Chancellor budget allocation memo ([III.D.1-24](#))
  - Budget allocation excel document ([III.D.1-25](#))
- In the Planning and Assessment Integration with Resource Allocation (PAIR) process, Allocation Request Forms (ARFs) are submitted by each department in March prior to the fiscal year in which they will be implemented. The ARFs go through many nodes of vetting and approval to ensure all submissions are treated fairly, and town hall meetings are scheduled to allow all requesters time to talk with constituents about their requests. The allocations determined in the final approval of ARFs are included in the FY budget.
  - Academic Year 16-17 Budget Process Flowchart ([III.D.1-26](#))
  - AY17-18 Timeline for ARF review ([III.D.1-27](#))
  - Budget Workgroup Chair, ARF Town Hall AGO meeting ([III.D.1-28](#))
  - ARF form ([III.D.1-29](#))

The graphic AY17-18 PAIR flow chart ([III.D.1-30](#)) reflects the campus' FY18 allocation request process. It is an integrated planning process and is based upon transparency, communicativeness, and inclusivity. The process also places the responsibility for prioritizing requests on the AGOs. The AGOs are Faculty Senate, Student Congress, Staff Council and 'Aha Kalaulani (Native Hawaiian Council)

The PAIR process, as described in Kapi'olani CC Operational Policy (KOP) #1.111 ([III.D.1-31](#)), is used as the basis to request funds for equipment maintenance and replacement, supplies and materials, and new personnel. This process begins at the program or unit level and can be initiated by anyone associated with the College. Program/Unit personnel or program management identifies needs through their ARPD, SSP, CPR or Annual Report, which are all aligned with the campus Strategic Plan. Once identified, these needs are entered into the PAIR process through the submittal of an Allocation Request Form (ARF). ARFs are collected by the department chair, unit head or program coordinator, who are then asked to assess requests by priority. Priority is always given first to issues involving the health and safety of students or

employees. Other requests are assessed based on program or course success. After the department chair organizes ARF priorities, the requests are sent to the program administrator for prioritization. All requests are then summarized and compiled by the campus Budget Manager and submitted to the AGOs for further review and prioritization. When all AGOs have prioritized the requests, the prioritized listing is submitted to the Budget Manager and Vice Chancellor for Administrative Services, who work with the Chancellor's Advisory Committee (CAC) Budget Subcommittee. The CAC Budget Subcommittee is responsible for making a final recommendation to the full CAC. Once voted upon, revised as necessary, and adopted by the full CAC, the recommended requests are sent to the Chancellor for final funding decisions. Because ARFs must be based upon planning and assessment documents, such as the program review, a comprehensive needs assessment of the physical resources, facilities and equipment in each department, unit or program is done to support each request.

### ANALYSIS AND EVALUATION

Financial resources are sufficient, effectively distributed, and managed with integrity to support, sustain, and enhance programs, services, and institutional effectiveness in a manner that ensures financial stability. The combination of general fund appropriations, tuition and fees, and other special and revolving funds provide ample support for college operations. Performance-based funding provided by the UHCC and UH systems allows the College to acquire additional funding to promote system initiatives. Fiscal stability is maintained through budget development oversight by the Board of Regents and an internal process of allocation prioritization.

---

**III.D.2. The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.**

---

### EVIDENCE OF MEETING THE STANDARD

The College's mission and strategic goals, like those of the UHCC, are the foundation for all planning. Strategic goals drive budget priorities in an effort to achieve the outcomes directed by the Board of Regents (BOR). The College aligns its mission and goals to the UHCC system mission and goals.

#### *Mission and Strategic Financial Goals*

##### *System level financial and institutional planning*

The financial planning processes rely on UH System, UHCC System and campus plans for

content. The UH and UHCC strategic plans set the overall direction and performance benchmarks, and college strategic plans set local goals and local budget plans to achieve these goals. Institutional standards for achievement and the methods of assessing these standards are set by UHCC policy ([III.D.2-1](#)). Campus plans operationalize the methods to meet these standards.

The UHCC mission is articulated through the strategic planning process. The University identified guiding principles in the document UH Strategic Directions, 2015-2021. The UH Strategic Directions, approved by the BOR in January 2015, provides the framework, objectives, and priority targets for the University. The UHCC strategic plan and individual campus strategic plans are in alignment with the UH Strategic Directions ([III.D.2-2](#), [III.D.2-3](#), [III.D.2-4](#)).

The timing of the financial planning process at the college level is tied to the State budget and UH budget processes. The University of Hawai‘i System President prepares a budget, which includes all elements of the university, for submission to the BOR. Upon approval by the BOR, the University’s budget is submitted to the Governor for review and incorporation into the executive budget request. The executive budget request for the State is then submitted to the Legislature in December for consideration in the regular session of the Legislature in January. Appropriations by the Legislature are usually passed in May and transmitted to the Governor for approval. The Governor generally approves the Executive Budget in June and within a month, allocation notices are transmitted to the University, including any restrictions imposed on Legislative appropriations. The President determines distributions of general funds including the UHCC level distribution. The Vice President for Community Colleges and the Community College chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding.

### ***Governing Board Information and Planning***

Budget and financial reviews are conducted by the University of Hawai‘i Board of Regents. Board Policy 8.204 sets the University’s fiscal management, budget process, legislative budget proposal, and preparation processes ([III.D.2-5](#)). These processes ensure that institutional priorities and budget expenditures are aligned and that resources are strategically invested in the university’s mission, vision, and plans.

At the system level, strategic planning drives the development of a Budget Policy Paper that is issued by the University President during the biennium budget cycle ([III.D.2-6](#)). The Budget Policy Paper emphasizes proposals that can be framed to support the major strategic directions of the University of Hawai‘i. Strategic planning and budget development are closely linked processes as budget priorities are based on the achievement and advancement of strategic planning goals.

The Strategic Planning Council (SPC) is the primary body for assuring UHCC participation in the strategic planning process ([III.D.2-7](#)). The council consists of the chancellors, faculty senate

chairs, and student government leaders from each of the seven campuses and the vice president and associate vice presidents for the community colleges. The SPC evaluates and finalizes outcomes and performance measures and meets twice a year in full session to review progress made toward the goals and to make adjustments as needed over the planning period ([III.D.2-8](#)). The SPC uses the outcomes of the strategic planning process to set goals and priorities, which are reflected in program planning, budget planning and resource allocation decisions. The SPC also makes recommendations on the allocations and broad purposes of the innovation funds (See [III.D.1](#)).

Strategic goals drive budget priorities in an effort to achieve the outcomes directed by the UH Board of Regents.

#### *Annual Review*

The Board of Regents (BOR) approves an annual operating budget for all campuses, the UH System and the BOR office ([III.D.2-9](#)). The operating budget accounts for all sources of funds, as well as all major categories of expenditures. Additionally, the Board approves an annual capital improvements program budget for the University. The capital improvement budget accounts for all major projects that will be in the planning, design or construction stages. The operating and capital improvement budgets are transmitted to the Board for review and subsequent approval following each legislative session and incorporates the most recent legislative appropriations and actions.

#### *Quarterly Reviews*

The University of Hawai‘i System Administration provides quarterly financial reports to the BOR that reflect budget-to-actual performance, along with explanations for significant deviations from the approved budget. The financial reports provide initial balances, revenues, expenditures, and updates to projected year-end balances based on activity in the previous quarter. The report also includes explanations of significant UHCC System trends or events and Board-established reserve targets with actual reserves for UHCC System during the respective quarterly period.

#### *College level financial and institutional planning*

The College mission is reviewed as part of the strategic planning process. The University of Hawai‘i has identified guiding principles in establishing formal Strategic Directions for 2015-2021. The UH Strategic Directions, approved by the BOR in January 2015, provides the framework, objectives, and priority targets for the College in formulating its own strategic plan. The campus strategic plan is in alignment with the UHCC strategic plan, which also aligns with the UH Strategic Directions (see *Mission and Financial Strategic Goals* at the beginning of [II.D.2](#)).

The College’s strategic plan serves as the focal point of and provides the direction for the

DRAFT MAY 8, 2018

campus-based budget development process, specifically through the Planning and Assessment Integration with Resource Allocation (PAIR) process ([III.D.2-10](#)). The allocation process includes a current service annual base budget determined by an analysis of the continued need for the level of service or instructional capacity. The continued need and level of service required is discussed in program reviews. The allocation process also provides an opportunity for each program and service to seek additional resources beyond the current service to: 1) resolve or mitigate an imminent health and safety need, 2) achieve a Strategic Plan outcome or performance measure, and/or 3) make program improvements or adjustments as detailed in a completed Annual Report of Program Data (ARPD), Comprehensive Program Review (CPR), or Annual Report.

The College's mission and goals are integral to the financial planning carried out by the UH system. The UHCC system considers the individual college mission in planning and allocation. The allocation methodology includes outcomes funding based on common goals, but with specific targets established for each college.

For the College, the UHCC System establishes a current service (or base) budget, which is consistent with campus needs. The overall health and productivity of programs within the College are assessed using Annual Reports of Program Data (ARPDs), which then help guide the campus Strategic Plan. More broadly, the College also formulates a Long Range Development Plan that addresses future needs for the campus and its students. All Program Reports, as well as the Strategic and Long Range Plans, are approved by the BOR and reviewed by campus leadership and supporting committees on an ongoing basis. In addition, an established UHCC Performance Funding Model supplements campus resources if certain performance criteria are achieved.

Ongoing financial support from the campus is also provided to departments and programs based upon justified needs that are identified via regular reports and are aligned with the campus strategic plan as well as with their goals. The synthesis of planning and budgeting is illustrated by the campus integrated budget process that determines priorities and validates correlation with campus goals.

The integrated resource allocation process, formally codified in KOP 1.111 and titled the Planning and Assessment Integration with Resource Allocation (PAIR) process, is specifically designed to increase campuswide participation, improve and increase fiscal communication, and embrace inclusivity. The College ensures that the entire campus has the opportunity to participate in the budget deliberation process. The entire process is based on campus priorities as laid out in its Strategic Plan and as reflected at the program or unit level through annual program reports, such as the Annual Report of Program Data ([III.D.2-11](#)) or Student Success Plans ([III.D.2-12](#)). The graphic AY17-18 PAIR flowchart ([III.D.2-13](#)) reflects the campus' allocation request process.

Financial Plans are disseminated throughout the College in a timely manner through emails and memos from the Chancellor or Vice Chancellor of Administrative Services to the Administrative team, who then communicates this information to department chairs and unit heads. The initial allocations as well as quarterly updates are also shared and discussed at Administrative Staff Meetings and on the college intranet site ([III.D.2-14](#)).

## ANALYSIS AND EVALUATION

The College's mission and strategic goals are aligned with the University's and the UHCC System's strategic directions. Strategic goals are the foundation for all financial planning, which supports institutional planning, and the financial planning is guided by policies and procedures that ensure sound financial practices and financial stability. The College has a well established budgeting process that is discussed regularly. Appropriate financial information is disseminated to the College in a timely manner through the AGOs and the Chancellor's Advisory Council.

---

**III.D.3. The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.**

---

## EVIDENCE OF MEETING THE STANDARD

The UHCC system has clearly defined guidelines and processes for financial planning and budget development. The system budget development process is outlined in the Budget Policy Paper and budget instructions. The policy paper sets forth the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The budget instructions establish the budget philosophy, major budget assumptions, expectations and timeline. Operating budget revenue and expenditure assumptions including enrollment and tuition revenue projections, payroll cost assumptions and utility cost projections are explained. Assumptions for developing CIP revenue and expenditure projections are also provided. Finally, expectations for increased efficiencies and productivity are outlined in this document.

Budget development documents are posted on the UH website. These documents include the following:

- Budget policy paper and budget instructions ([III.D.3-1](#))
- Proposed budget requests to the Board ([III.D.3-2](#))
- CIP budgets request priorities and budget act ([III.D.3-3](#))

The College uses the Planning and Assessment Integration with Resource Allocation (PAIR) process for internal budget development. The PAIR process utilizes needs and requirements identified by programs and units that meet the goals of the College Strategic Plan. Requests prioritized in the PAIR process are funded from monies remaining after the current service (or base) budget has been allocated in addition to UHCC system allocations. An example of this process can be seen in FY17-18 ARF Ranking List ([III.D.3-4](#)), where the College was able to fund eight out of thirty one total requests using both campus tuition and fees and UHCC equipment funding.

## ANALYSIS AND EVALUATION

The College clearly defines and follows guidelines and processes for financial planning and budget development, which include opportunities for all its constituencies to participate in planning and budgeting. The College has a budget process in place through the PAIR process that involves all constituents in the process at different times. The College notifies constituents of the progress of the budget allocation process. The College allows for budget requests to be made from the bottom up to ensure all constituents have equal access to allocation funds.

---

### **III.D.4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.**

---

## EVIDENCE OF MEETING THE STANDARD

Institutional planning at the UHCC campuses reflects a realistic assessment of resource availability as well as the further development of the resources to meet expenditure requirements and strategic goals. Tuition increase proposals balance the competing needs of keeping college affordable, meeting immediate campus needs, and achieving the goals promulgated by strategic plans. The UHCC system has successfully maintained this delicate balance by establishing a tuition rate schedule that ensures adequate resources for ongoing needs, new funding to meet strategic objectives and yet remain affordable when compared to other two-year institutions.

The College has a proven track record of using its resources wisely. In periods of declining revenues, the College has made appropriate decisions to ensure programs and services can continue to operate to meet the needs of its students. Currently, the College has benefited from system funding initiatives and grant opportunities that provide support for programs and services that align with the mission and strategic plan. An example of the former is the UHCC's funding to support student success in developmental education, which has supported faculty professional development as well as upgraded technology and classrooms to improve the learning environment. An example of grant opportunities that align with the College mission and strategic plan is funding awarded by US DOE Title III, both Part A and Part F. Title III funds have

supported peer mentors to enhance support to Native Hawaiian students as well as the creation of the Lamaku Learning Center.

The College provides information about the institutional planning process throughout the academic year. Information on upcoming campus improvements and financial impacts is shared through email, memoranda, or presentations by the Vice Chancellor for Administrative Services. Additionally, the administration shares information about the planning process during the year via email or during campus-wide committee meetings such as the Chancellor's Advisory Council. The emails provide an update to the campus on the status of the budget process and prioritizations from each of the areas including instruction, academic services, student services, and administrative services.

Under UHCC Policy 8.000, the UHCC Office of the Vice President of Community Colleges (OVPCC) is responsible for allocating General Funds (GF) and Tuition and Fees Special Funds (TFSF). The College plans its allocation of funds based on this allocation. The allocation report is usually received in early September of each fiscal year. This report provides the College with the information it needs to realistically project its expenditures for the current fiscal year ([III.D.4-1](#)). The College Budget Office, together with the Chancellor and Vice Chancellor for Administrative Services, generates an allocation plan and memoranda informing each program and unit of its budget allocation for the year.

The college makes allocations in the Fall and Spring of each year. Allocations are communicated via memorandum and through meetings with the administration. The allocation plan includes information for salaries and operational expenditures and allows departments, programs, and units the opportunity to adjust their expenditures accordingly.

The college allocation process is integrated with planning and program assessment. As discussed in III.D.2, this process, titled the Planning and Assessment Integration with Resource Allocation (PAIR) process, requires all budget requests and allocations to be based upon 1) an imminent health and safety need, 2) a Strategic Plan outcome or performance measure, and/or 3) a completed ARPD, CPR, or Annual Report.

## **ANALYSIS AND EVALUATION**

The College and the UHCC and UH systems have clear processes and procedures for budget development and financial planning. These processes and procedures are followed by the College. Additionally the College utilizes its PAIR process to ensure all campus constituencies have an opportunity to submit plans for future program development and request resources. The process is broad-based and driven by the mission and strategic plan.

---

**III.D.5. To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

The College complies with all University Administrative Procedures under Chapter 8, Business and Finance ([III.D.5-1](#)). These policies and procedures establish controls through the proper use of delegations of authority, segregation of duties, workflow management (both paper and online), account reconciliations, and inventory. In addition, several UH administrative software systems are used to conduct the business affairs of the college, and these systems provide the framework and structures by which internal controls for financial resources and business processes are managed. These systems include PeopleSoft for employee information, BANNER for student information, and the Quali Financial Management System (KFS) for fiscal information. These systems are managed by the UH System Information Technology Services (UH ITS) office and are designed to segregate duties and responsibilities among end-users, financial managers, and approval authorities for all financial related transaction revenue and expenditure processing.

The various administrative software systems provide timely and relevant data that is detailed for reporting information. This information is included in planning models and systems at the institutional level for allocation and management purposes. The budget plans developed by using data generated by the administrative software systems represent the formalization of the financial planning decisions of the institution and are analyzed and reviewed throughout the fiscal year.

The policies and procedures at the different levels within the university (UH System, UHCC System, and Campus) provide the basis and framework for financial management and business practices that include internal control mechanisms. A recent example of continuing improvement in this area was the implementation of UHCC Policy 8.200, Financial and Operational Oversight of Revenue Generating and Financially Self-Sustaining Programs ([III.D.5-2](#)), following recommendations made by, and in concert with, the UH Internal Auditor's Office and the UH Community Colleges. The policy was developed to improve the internal control procedures and systems (accounting, cash handling, reconciliation, billing, inventory management) related to the revenue generating activities of the college.

To further ensure the financial integrity and internal controls of the system and the campus are

effective, external audits are conducted regularly. On December 15, 2016, Accuity LLP concluded its financial and compliance audit on the UH System that covered the period July 1, 2014 to June 30, 2016. Accuity auditor's stated, "In our opinion, the consolidated financial statements referred to above present fairly, in all material aspects, the financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America." In the event of an audit exception or management advice item, the College would take any necessary corrective action to prevent future occurrences of such finding. Corrective action plans identify the program and individuals responsible for implementing corrective action, actions taken to correct the audit finding or deficiency, actions taken to prevent reoccurrence, and the date corrective actions were taken.

### ANALYSIS AND EVALUATION

The College has appropriate internal controls in place and disseminates financial information in a timely manner to support decision making. Financial management practices are regularly reviewed and updated to improve internal control systems.

---

**III.D.6. Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.**

---

### EVIDENCE OF MEETING THE STANDARD

As stated in Standard III.D.5, an external auditing and financial consulting firm, Accuity LLP, concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016, and found the financial statements presented fairly the financial position and cash flows of the University ([III.D.6-1](#)).

The College's financial and budget related documents are accurate and credible. The College, in coordination with the UHCC System office, utilizes various multi-year financial projection models, historical revenue and expenditure patterns, business plans, and enrollment forecasts to determine anticipated cash and fund balances, revenues, and expenditures. Additionally, internal and independent reconciliation procedures are performed by the fiscal administrator to ensure accuracy and to maintain integrity in financial and budgeting planning.

The College provides direct support to programs and services through the Planning and Assessment Integration with Resource Allocation (PAIR) process as detailed in Standard III.D.1. This planning and budget process ensures that any request for new resources, and the college's decision to allocate resources for this request, are provided as a result of documented program

needs and activities. Moreover, the allocation of resources will be in line with the campus', the UHCC's, and the University's strategic plans.

### **ANALYSIS AND EVALUATION**

The College has internal controls in place to insure accuracy and credibility in financial documents. Allocations are made based on the Integrated Planning and Budgeting process to align financial resources with student learning programs and services.

---

#### **III.D.7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.**

---

### **EVIDENCE OF MEETING THE STANDARD**

Audit findings identified by auditors are discussed with affected units to ensure units have an understanding of the reason for the finding and the regulations or other requirements upon which the finding is based. Findings are also communicated to campus administrative staff and campus or system support units if they are affected or may be involved with corrective action.

Affected units and administrative or support unit staff discuss and develop corrective action plans, which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, implementation of new systems. As an example of a preventative measure, Destiny, a software program for continuing education course registration, was adopted to improve compliance with regulations, increase or enhance financial or programmatic data available for monitoring and decision making, and improve internal financial control.

Corrective action plans are communicated to the auditor in accordance with deadlines set by the auditor or coordinating office such as the Office for Research Services (A-133 audit corrective action plans). Corrective action plans identify the program and individuals responsible for implementing the corrective action taken to correct the audit finding. If applicable, the actions taken to prevent reoccurrence and the date corrective actions were taken are included in the plan. The College provides timely corrections to audit exceptions and management advice.

For audits by UH Internal Auditor or other external auditors, corrective actions may be confirmed by review of operations or follow-up audit by auditors if any.

The College has not received any audit findings or negative reviews from an external auditor during the last six years.

Although there were no external audit findings, there have been several audits done on various programs by the UH Internal Auditor that have made recommendations to how the College manages its programs. In 2013, the UH Internal Auditor performed an audit on the Culinary Arts Program. The report identified "operational and financial risks" and included recommendations relating to the inventory management, financial analysis and reporting and other aspects of these

program. The College made adjustments to operations to ensure that these recommendations were met and in Spring 2014 the Internal Auditor conducted follow-up reviews to ensure implementation of recommendations.

In 2014, the Internal Auditor performed an audit on the Chancellor's Accounts ([III.D.7-1](#)) that are held in the University of Hawaii Foundation. The report identified issues and included recommendations relating to donor reports and college reimbursement. The College revised operational procedures and created new processes to meet these recommendations and in Fall 2017, the Internal Auditor reported affirmatively on its follow up audit to ensure implementation of recommendations ([III.D.7-2](#)).

## ANALYSIS AND EVALUATION

The College has not received any external audit findings or negative reviews during the last six years. Responses to internal audits on programs and procedures to improve operational processes were comprehensive, timely, and communicated appropriately.

---

**III.D.8. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.**

---

## EVIDENCE OF MEETING THE STANDARD

The College regularly evaluates and assesses its financial management processes through the program review process described in Standard I.B.5. Examples of data collected, reviewed, and assessed yearly for Administrative Services include the following:

- Average number of workdays required to issue UH purchase orders as compared to past years and the UHCC system average
- Average number of workdays required to submit purchase order payment documents to UH Disbursing Office
- Average number of workdays required to issue UH Departmental Checks
- Number of Business Office full-time equivalent staff (Civil Service and APT)

UH and all ten campuses completed the administrative software system upgrade to Quali Financial System (KFS) on July 1, 2012. The system provides a robust, efficient, and reliable financial information system that is considered user-friendly while providing access to timely data to support decision making. Many procedures that required hard copy paper authorizations

DRAFT MAY 8, 2018

are now completed within KFS electronically. Other improvements using electronic systems include authorization for travel and leave requests.

### ***Audit of Consolidated Financial Statements***

An independent auditing firm conducts a financial and compliance audit for the UH System on an annual basis. Part of the consolidated financial statements is the agreed-upon “Report of Independent Auditors on Supplemental Information,” including the statement of net assets and the statement of revenue, expenses and changes in net assets for the UHCCs.

Consolidated financial statements are prepared annually in accordance with generally accepted accounting principles. The audit addresses all UH funds, including all special funds. Extramural funds are audited annually as part of the consolidated financial statement audit and compliance audit. Extramural funding agencies may perform program or financial audits of grants or contracts at any time during or after the funding period for any reason, including normal programmatic or financial monitoring or in the event of suspected fraud or criminal activity.

The annual consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, including the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

The independent auditors’ report for the 2017 consolidated financial statements contains an unqualified opinion, meaning the auditors have no reservations concerning the financial statements. It states: “In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai‘i, as of June 30, 2017 and 2016, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.” ([III.D.8-1](#)).

The auditors consider the University’s internal controls relevant to the preparation and fair presentation of the consolidated financial statements in order to design appropriate audit procedures, but not for the purpose of expressing an opinion on the effectiveness of internal control. However, any weaknesses in financial or internal control observed by auditors during the course of the audit which are required to be reported by federal regulations are reported in a Financial and Compliance Audit report. Any weaknesses in financial or internal control which are not required to be reported by federal regulations in the compliance report are reported in an Internal Control and Business Issues Report.

The Financial and Compliance Audit report provides a report on internal control over financial reporting and on compliance with certain provisions of laws, regulations, and contract and grant agreements which could have a direct and material effect on the determination of financial statement amounts. For the year ended June 30, 2017, the auditors stated “during our audit, we

did not identify any deficiencies in internal control that we consider to be material weaknesses” and “the results of our tests and the report of other auditors disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.”

**The Financial and Compliance Audit report** also provides a report on compliance with the requirements of laws, regulations, and contracts and grants applicable to its federal programs that could have a direct and material effect on each of the University’s major federal programs. For the year ended June 30, 2017, the auditors stated “In our opinion, the University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2017.” With respect to internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program, the auditors stated "We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses." The auditors found six instances of noncompliance which were required to be reported but stated "Our opinion on each major federal program is not modified with respect to these matters." None of the audit findings found in the 2017 Financial and Compliance Audit involved Kapi‘olani CC ([III.D.8-2](#)).

**The Internal Control and Business Issues report** discloses any weaknesses in financial or internal control which are not required to be reported by federal regulations in the Financial and Compliance Report. In addition, the report discloses whether findings from the prior audit are resolved or unresolved and if any of the findings are repeat findings in the current year. For the year ended June 30, 2017, the auditors reported three findings for Kapi‘olani CC.

1. Issue: Purchase orders were executed and approved subsequent to the receipt of goods or services from the vendor. Item: One purchase order totaling \$3,456 for the Trade Adjustment Assistance Community College and Career Training (TAACCCT) major Federal program. This involved Maui CC and Kapi‘olani CC
2. Issue: Travel completion report form was not submitted in the manner consistent with the policies set forth in the University's Administrative Procedures Manual. Item: One instance for the TAACCCT program for travel from 10/28/16 to 11/3/16, travel completion not submitted until 1/19/17.
3. Item: GEAR UP major Federal program for travel from 7/11/16 to 7/21/16, travel completion not submitted until 8/25/16.

All of these findings are considered minor findings and, as stated above, these findings are not required to be reported by federal regulations. ([III.D.8-3](#))

Financial and internal control findings for central offices (GALC, FMO, etc) are addressed in that same manner as campus findings. Affected units discuss and develop corrective action plans which may include recording of transactions to correct errors, changes to existing procedures or

development of new procedures, staffing changes, training, or implementation of new systems.

Internal control systems are considered when developing procedures, for staffing assignments (separation of duties), and when implementing improvements to the financial system or sub systems (e.g. software programs such as Banner, Destiny).

Internal control systems may also be reviewed in response to any deficiencies identified by the management letter from the annual financial audit. Reviews are conducted by central offices (GALC, FMO, etc.) or departments with the assistance of central offices and corrective action implemented by the affected central office or department.

Corrective action plans in response to audit exceptions or deficiencies in an auditor's management letter are implemented when identified during the audit or after completion of the audit. Corrective action plans identify the program, individuals responsible for implementing corrective action, actions taken to correct the audit finding or deficiency if applicable, actions taken to prevent reoccurrence if applicable, and the date corrective actions were taken.

For the annual financial audits, corrective actions are confirmed by the auditor in the subsequent annual audit ([III.D.8-4](#)) or management letter.

#### ***Legislative Auditor and UH Internal Auditor***

Hawai'i Revised Statutes §23-12 requires the State of Hawai'i's Office of the Auditor to conduct a review of University of Hawai'i special, revolving, and trust funds and accounts once every five years ([III.D.8-5](#)). The legislative auditor may, at legislative request or as part of a routine audit selection process, conduct an audit of a specific department, program, or fund and may identify internal control deficiencies. The University also has its own Internal Auditor. UH internal audits are conducted periodically to ensure the quality and integrity of the University's compliance with legal, regulatory and policy requirements, financial reporting and financial statements and internal controls. The University may hire an external audit firm to conduct an audit of a specific department or program and may identify internal control deficiencies. For audits by UH Internal Auditor or other external auditors, corrective actions may be confirmed by review of operations or follow-up audit by auditors if any.

For all internal and external audits, corrective action plans are implemented during or after completion of the audit. Corrective action plans identify the program, individuals responsible for implementing the plans, actions taken to ameliorate audit findings or deficiencies, actions taken to prevent reoccurrence if applicable, and the date corrective actions are taken.

#### **ANALYSIS AND EVALUATION**

The College has demonstrated that external audits coupled with the self-assessment and evaluation process contained within the framework of the PAIR process ensures the integrity of the financial management system. In addition, comparable measures of performance with other

UHCC campuses provide quantifiable data that is used to assess effectiveness and efficiencies and identify potential areas for continuous improvement. The College will continue to evaluate and assess the financial management processes based on feedback received in the planning process, surveys, and a review of comparable data from other campuses.

---

**III.D.9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.**

---

**EVIDENCE OF MEETING THE STANDARD**

Consistent with the UHCC's reserve policy, the College maintains sufficient cash reserves in order to provide for financial stability ([III.D.9-1](#)). All Community College campuses, including Kapi'olani CC, meet both the 5 percent minimum reserve and the 10 percent target reserve requirements of the policy. Meeting these cash balance reserve thresholds ensures that sufficient resources are available to meet unplanned contingencies, emergency response, and repair request needs ([III.D.9-2](#)).

In addition to the cash reserves, the Community College campuses operate as a system of community colleges and funding is appropriated and allotted to the UHCC System on behalf of the state Legislature. Access to other sources of revenue is available should emergency conditions necessitate, if spending fluctuations occur, or if extraordinary conditions exist. The transfer of revenue is accomplished through cash transfers from within the UHCC to and from the individual colleges. These transfers/transactions are managed and monitored by the UHCC budget office and serve to minimize any financial impacts to academic programs or services provided to students should a financial shortfall occur.

There are two primary sources of revenue that are used to support the operating budget of the College: state general fund appropriations and tuition revenue. State general funds are appropriated to the Community College campuses by the state Legislature. The state provides approximately one quarter of the funding prior to the beginning of the fiscal year with the remaining full year allocation made prior to the end of the first quarter. State general fund revenues are used almost exclusively to pay employee salaries. The College collects tuition prior to the beginning of fall and spring terms and these funds are expended over the course of each term. Tuition revenue projections are adjusted according to actual enrollments and budget modifications are made if necessary. Revenue from tuition is used to support salaries and other operational expenses of the College. Unexpended tuition revenue is the primary source of the College's cash reserves.

Revenue-generating programs and activities maintain sufficient cash balances to accommodate working capital requirements. These funds provide annual business plans in which revenues, expenditures, and cash balances are projected. Regular monitoring of budget to actual performance of these funds is conducted through financial reports and the online Kualii Financial System financial management system to prevent cash flow issues.

The state of Hawai‘i, to include the UH and its ten campuses, is self-insured and provides insurance policies and coverages for all state agencies. The College has a delegated responsibility to review potentially high-risk programs and activities and to ensure that these programs and activities are properly assessed to minimize or prevent liability concerns. Oversight for all insurance-related requirements and issues is provided to the College by the UH Office of Risk Management. This office assists the College in identifying and managing risks in order to reduce losses, maintain financial stability, and protect university resources ([III.D.9-3](#), [III.D.9-4](#)).

The projected unrestricted Tuition and Fees Special Fund cash balance of the College is \$2,865,358 for FY 2018 ([III.D.9-5](#)). The College also has direct access to these reserve resources should a financial emergency occur or extraordinary financial obligations exist ([III.D.9-6](#)).

## ANALYSIS AND EVALUATION

The College has sufficient cash flow and reserves to maintain stability, conduct risk management, and implement contingency plans. The College maintains a minimum targeted reserve, as is required by the UH policy. Over the fiscal year, expenditures and revenues are carefully monitored. Appropriate strategies are in place to meet financial emergencies and unforeseen occurrences.

---

**III.D.10. The institution practices effective oversight of finance, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.**

---

## EVIDENCE OF MEETING THE STANDARD

A variety of financial management tools and models are used to plan, project, monitor, and assess the financial condition of the College. The reports are used to monitor extramural funds, loan funds, and non-extramural funds. This includes the use of the following:

- Quarterly budget level summary reporting system
- Monthly budget status reports

DRAFT MAY 8, 2018

- Monthly cash management reports
- Quali Financial System (KFS)

Policies and procedures are in place to ensure financial management integrity at the College, regardless of the source of funds. These policies and procedures ensure that sufficient resources and fund availability (allocations, appropriations) exist, that proper expenditure authorizations are reviewed, and that the College is in compliance with all applicable statutes, rules, and regulations.

The College demonstrates compliance with Federal Title IV regulations and requirements in the following ways:

- Documentation to demonstrate compliance with regulations and requirements such as student eligibility based on need, financial aid awards that do not exceed unmet need or maximum award limits
- Adjustment of awards when unmet need changes or student withdraws
- Repayment of federal program for over award/ adjustments
- Reporting of awards, adjustments, withdraws to federal agency
- Exit interviews for students with loans (Check this)

As stated in Standard III.D.5, the Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016, and found the financial statements presented fairly the financial position and cash flows of the University ([III.D.10-1](#)).

The College has special fund accounts for campus units and activities that generate revenue, including the library, student activities, vending services, food services, and other programs that support the College. Audit and review of the College's special funds is included as part of the UH annual financial and compliance audit.

Monies from scholarships, fundraisers, and donations are housed in accounts under the UH Foundation and are monitored by the Foundation's internal control system. The UH Foundation's responsibilities are to ensure that properly authorized transactions are processed in a timely manner and that disbursements are in compliance with account restrictions and this policy.

The UH Central Accounting office and the Office of Research Services oversee all grants to ensure that they are managed in accordance with all regulations, internal restrictions, and laws governing the agreements.

The College's Office for Institutional Effectiveness (OFIE) assists faculty, program directors/coordinators, principal investigators, and administration in the efficient use of grant

funds, timely delivery of reports, and other post-award activities. Additionally, OFIE assists in pre-award submissions for new proposals.

New to the College in AY 2017-2018 is a Grants Management Office that assists programs and principal investigators in grant related business. This includes the efficient use of grant funds, timely delivery of reports, and other post-award activities. The Grants Office staff includes several professional positions that provide post-award grant accounting support to ensure proper recordation of revenues and expenditures and to coordinate and facilitate financial report preparation and distribution.

### ANALYSIS AND EVALUATION

The College has demonstrated it practices effective oversight of finances for all its programs including financial aid, grants, externally funded programs, and other organizations or foundations. System offices provide oversight of programs for all member colleges of the UHCC.

---

**III.D.11. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.**

---

### EVIDENCE OF MEETING THE STANDARD

The College participates in short-term and long-term planning as noted in Standard I.B.9. and III.B.2. All financial plans incorporate payments of long-term liabilities and obligations, including debt, health benefits, insurance costs, and building maintenance costs. The same information is used in short-term or annual budget and other fiscal planning efforts.

The UHCC campuses do not issue debt for Other Post-Employment Benefits (OPEB) that are funded by the State, insurance costs or repairs and maintenance projects that are funded by the State. The items currently financed with long-term debt are limited to projects that directly create revenue streams that offset debt service costs. See Standard III.D.14 for further discussion.

The College allocates resources for the payment of its liabilities and funds/reserves to address long-term obligations. No funds are directed to actuarially developed plans for OPEB obligations.

### ANALYSIS AND EVALUATION

The College plans for the payment of liabilities and future obligations to ensure its short-term

and long-term financial solvency. The system and the college financial leadership review the obligations for cash flow and responsibility.

---

**III.D.12. The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB) compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

The College is properly contributing and meeting its annual OPEB obligation.

The employer's share of OPEB obligations for general-funded positions is centrally paid for by the State general fund for all State agencies. As such, employer OPEB obligations for general-funded positions are not part of the University of Hawai'i operating budget.

The University is, however, obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the University. The University's contributions are calculated as part of the State's total contribution requirements and are reimbursed to the State's General Fund as part of the fringe benefit rate on the University employees' actual salaries. The University's annual OPEB cost for non-general funded employees is calculated based on the annual required contribution (ARC) of the employer an amount actuarially determined in accordance with the parameters of Government Accounting Standards Board (GASB) Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The employers' OPEB obligations for non-general funded positions are fully recognized and accounted for in UHCC non-general fund financial plans.

#### **ANALYSIS AND EVALUATION**

The College is responsible for the OPEB for only a small number of non-general-funded positions. The OPEB costs associated with these positions are included in the fringe benefit rate on employees' salaries and are factored into the annual and long-term business and financial plans of the revenue-generating accounts and funds that are responsible for paying these costs.

---

**III.D.13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.**

---

**EVIDENCE OF MEETING THE STANDARD**

The College annually assesses and allocates resources for the repayment of debt without loss to current fiscal obligations.

Funds are allocated for the debt service reimbursement annually as part of the budget planning and execution process for each campus. Percentage of the operating budget used for debt service reimbursement is approximately 2% per year. (Total debt service for the College is approximately \$1,000,000 per year. Operating budget for the College is approximately \$50,000,000 per year for all sources of funding). There is no adverse impact on meeting all current fiscal obligations.

With direction from the Office of the Vice President for Community Colleges, the College allocates resources annually for repaying its debt. Payments on revenue bonds are made using appropriate special funded sources, whereas payments on general obligation bonds are made centrally by the Department of Budget and Finance.

**ANALYSIS AND EVALUATION**

The College allocates adequate resources to repay any locally incurred debt. Any and all external funding of college projects are overseen by the system offices and reviewed and approved by the governing board. The College executes its role to examine procedures in accordance with the function map.

---

**III.D.14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.**

---

**EVIDENCE OF MEETING THE STANDARD**

As noted in Standard III.D.10, the College manages its financial resources with integrity including auxiliary activities, fund-raising efforts, and grants.

The College has long-term debt instruments (revenue bonds). Revenue bond funds were used for the purchase and construction costs related to the Culinary Institute of the Pacific building, which opened in 2017. Funds are allocated for debt service annually as part of the budget planning and execution process. In FY18, the percentage of the operating budget used for revenue bond debt service for this building will be 1.2%.

The UHCC campuses also have long-term debt instruments (revenue bonds) for various energy conservation and alternative energy projects on most campuses, including Kapi‘olani CC. Bond funds are used for purchase and installation of new or replacement fixtures and equipment that consume less energy or generate electricity resulting in lower utilities cost for campuses. Debt service is paid centrally by the UHCC system-wide support unit with annual reimbursement from campuses based on energy savings for each campus. The funds for this debt service reimbursement are allocated annually as part of the budget planning and execution process for each campus. In FY18, it is projected that the percentage of the operating budget used for debt service reimbursement for this energy conservation project will be .9 percent at the College.

University policies and procedures require that the funds be used in accordance with state and federal requirements, the mission and goals of the University, and the purpose of the funding source ([III.D.14-1](#), [III.D.14-2](#), [III.D.14-3](#)).

### ***Auxiliary Activities***

Auxiliary Activities are self-supporting activities that provides non-instructional goods or services funded by a user charge or fee. Auxiliary activities include the bookstore, food service, and parking and are conducted for the benefit of students, faculty, and staff. Bookstore operations are administered by the Mānoa Bookstore unit. Other auxiliary activities are reviewed annually to ensure activities are not operating at a deficit or accumulating excess cash or profits.

University policies and procedures require that the funds be used in accordance with state and federal requirements and the purpose of the funding source (Admin Proc).

### ***Gifts and Fundraising***

University policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure funds are properly expended in compliance with donor restrictions and the usual and common business and regulatory practices ([III.D.14-4](#), [III.D.14-5](#), [III.D.14-6](#), [III.D.14-7](#)).

## **ANALYSIS AND EVALUATION**

The College uses all financial resources with integrity in a manner consistent with the intended purpose of the funding source. There are in place systems and controls at the college and system offices that provide balances and controls on the distribution of funds and allocation of financial resources.

---

**III.D.15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.**

---

**EVIDENCE OF MEETING THE STANDARD**

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

The Financial Aid Office staff conducts regular compliance requirement checks pursuant to United States Department of Education (USDOE) regulations. The most recent audit of the College's programs was during the 2015-2016 award year. The results were no findings and no recommended corrective action plans. In addition, no issues have been addressed with the College's Financial Aid procedures and processes by the USDOE.

The College's default rates on student loans fall within the acceptable range under federal guidelines and parameters. According to the Department of Education, institutions with a three-year cohort loan default rate of 30 percent or greater for three consecutive years may be subject to the loss of the Direct Loan Program and/or the Federal Pell Grant Program. The College's three-year cohort default rates during the last published cohort years were 14.9 percent in 2014, 11.5 percent in 2013, and 11.8 percent in 2012. Finally, A-133 Audit (System) for student loan default rates, revenues, and related matters is monitored and assessed to ensure compliance with Federal Regulations.

**ANALYSIS AND EVALUATION**

The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies. The Financial Aid Office ensures that default rates remain within acceptable levels and provides periodic reports to the USDOE and appropriate state agencies.

---

**III.D.16. Contractual agreements with external entities are consistent with the mission and system-wide goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its program, services, and operation.**

---

**EVIDENCE OF MEETING THE STANDARD**

All contracts are consistent with the College's mission and goals and are governed by institutional system-wide policies. Contract provisions maintain the integrity of programs, services, and operations. This institutional integrity is accomplished by policies and procedures set by UH System and Kapi'olani Community College ([III.D.16-1](#), [III.D.16-2](#), [III.D.16-3](#), [III.D.16-4](#)).

Oversight of contractual agreements with external entities is provided by program staff and the College's Administrative Services staff and follow several BOR, UH, and UHCC policies, procedures, and guidelines to ensure all contracts are reviewed on multiple levels and approved prior to implementation. Some of the contractual agreements fulfill basic service-related functions of a campus, such as vending contracts, food service concessions, facility use contracts, and facility service and maintenance contracts. Other contractual agreements meet an institution-related need identified through the planning process, student surveys, or other means. The alignment of contractual agreements with the College mission and goals is demonstrated through integration of the contractual requirements with program operating budgets, which are developed in line with the Planning and Assessment Integrated with Resource Allocation (PAIR) process.

The College has a variety of contractual agreements, including purchase orders, service contracts, memoranda of agreements, concession contracts, affiliation agreements, sponsored class or sheltered class agreements with external agencies, consultant contracts, construction contracts, internships and externships, maintenance contracts, and lease agreements. Noting the need to standardize contractual provisions, establish clarity for approvals, and implement risk-reduction strategies, the UH BOR, in consultation with the System's colleges and universities through the UH Office of General Counsel, adopted a new UH executive policy, EP 8.200 Policy on Contracts and Signing Authority, that is applicable to all contractual agreements between the University and non-University entities. This policy went into effect November 1, 2017 ([III.D.16-5](#)).

Several other UH and/or UHCC policies and procedures address various types of contractual agreements for the College. For instance, UH Administrative Procedure A8.200 - A8.299 provides procurement guidelines for contracts and purchasing; memoranda of agreements for sponsored or sheltered class are covered under UHCC Policy 8.102A; internships and

externships are covered by UH BOR Policies, Chapter 8; and UH Administrative Procedure A8.270 covers lease agreements ([III.D.16-6](#), [III.D.16-7](#), [III.D.16-8](#), [III.D.16-9](#)).

Examples of the contractual agreements include a Xerox lease agreement for copy/duplicating services, an agreement with Leeward Community College for the Nursing program, and a service contract with a tree-trimming contractor. The VCAS and support staff review all contractual agreements with external entities for compliance with established codes, regulations, policies, and procedures. Purchase orders for any service or items costing more than \$2,500 are placed on SuperQuote for bids. For amounts under \$2,500, the purchase order must be approved by the unit or division head, submitted to the Business Office, and then approved by the fiscal officer prior to any commitment of funds.

To limit liability, the College utilizes the UH service contract that has been approved for use by the UH General Counsel office (Office of Procurement and Real Property Management (OPRPM) Form 63). UH service contracts must be completed and approved by the appropriate administrator and then reviewed by the vice chancellor for administrative services. The total amount of the contract determines final signing authority. For contracts up to \$25,000, the College's fiscal administrator reviews and approves. For contracts over \$25,000, final approval is the responsibility of the UH System Office of Procurement and Real Property Management.

The UH service contract provides a termination clause which states, "UNIVERSITY shall have the right to terminate this contract upon TEN (10) days' written notice at any time and for any reason." UH Administrative Procedure A8.275, Contract Formation and Administration, provides provisions "to assure that the Contractor's total performance is in accordance with its contractual commitments and that the obligations of the University are fulfilled. It includes the monitoring and supervision of the contract actions from award of the contract to completion of the work required." A8.275 also provides guidelines for contract modification and termination.

## **ANALYSIS AND EVALUATION**

Contractual agreements are subject to various UH System policies and procedures and oversight is provided by UH System staff, thereby ensuring that the College maintains its integrity in contractual agreements. Contracts are consistent with the College's mission statement and goals. At all times, the College maintains oversight and review and retains authority over all financial decisions.

## Standard IV: Leadership and Governance

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

### A. Decision-Making Roles and Processes

---

**IV.A.1. Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.**

---

### EVIDENCE OF MEETING THE STANDARD

The College's leaders create and encourage innovation leading to institutionwide excellence by supporting administrators, faculty, staff, and students to improve college practices, programs, and services. Participative processes are used to ensure effective implementation of ideas, particularly when policies are impacted or there are significant institution-wide implications.

#### *Fostering Innovation*

The College has long prided itself on the way administrators, faculty, and staff innovate and experiment to improve educational outcomes for students. Executive leadership has fostered the development and testing of new ideas at the College. The Office of the Chancellor "is responsible for maintaining a successful learning environment for all students, an institution that is responsive to the needs of the community, and an environment that provides for professional growth and development of all staff" ([IV.A.1-1](#)), Kapi'olani Community College Functional Statements).

Two recent examples of the forward-looking approach are the ways the College has embraced the Vision Statement and the implementation of the Student Success Pathways.

### ***The Vision***

The Vision Statement states that the College is “a model indigenous serving institution.” [\(IV.A.1-2\)](#). To make this vision central to the College's commitment to encouraging innovation, the College has embraced the value statement: "We are guided by our shared vision, values and commitments and by the recommendations of Hawai‘i Papa O Ke Ao." [\(IV.A.1-3\)](#) This value speaks of continuous improvement based on guidance from the Hawai‘i Papa O Ke Ao, comprised of representatives of each campus across the 10-campus University of Hawai‘i system. This is a working committee appointed by the UH President tasked with developing, implementing, and assessing strategic actions to make the University of Hawai‘i a leader in indigenous education. The committee’s name means “Hawai‘i Foundations of Enlightenment/Knowledge”. Since January 2012, the Hawai‘i Papa O Ke Ao Report [\(IV.A.1-4\)](#) set goals and objectives to address the higher education needs of the indigenous people of Hawai‘i —Native Hawaiians. The College has adopted the report as a guiding principle which has led to initiatives such as ‘āina-based learning, (a pedagogical approach incorporating culture-based learning), and events such as the Makahiki, (the Makahiki season is the traditional [Hawaiian](#) New Year festival, in honor of the god [Lono](#)). (See II.A.7.)

### ***Centering on Student Success***

The College’s implementation of the UHCC’s Student Success Pathway is another example of innovation and participation. This initiative was led by the Student Success Coordinator, who reports directly to the Interim Chancellor [\(IV.A.-5\)](#). The College is committed to using the student success pathway model as a framework for planning and for resource allocation. The integration of the Student Success Pathway with the College’s Strategic Plan simplifies earlier efforts by the College to connect

## MAKAHIKI

After months of planning and preparation, learning and practicing Hawaiian games, carving wood and stone game implements, and gathering plants and ho‘okupu (offerings), the KCC community gathered on Jan. 19, 2018, to celebrate the Makahiki season in Hawai‘i. Makahiki is marked by the rise of the Makali‘i or Pleiades constellation and is a time of peace, celebration and renewal in Hawaiian culture. It is a time to honor the god Lono, who is known for agriculture, fertility, and peace.

student achievement to student programs and support. This was done by associated each strategic plan element with a student success pathway phase ([IV.A.1-6](#), p.7).

### ***Supporting Innovation Initiatives***

The Interim Chancellor demonstrated her commitment to promoting innovation and enhancement of faculty and staff across all the units by allocating additional funding for Fiscal Year 2017. The plan outlined funding pools for faculty and staff to participate in professional development activities.

Later that fall, the Interim Chancellor allocated \$106,000 in Research Training and Revolving Funds (RTRF) monies to be used by faculty and staff to participate in professional development activities ([IV.A.1-7](#)). Awardees participated in a variety of conferences and seminars, many on the continental U.S. Awards were given in support of activities

building capacity for grants and activities required but not covered by grants, or research or training aligned with Student Success Initiatives. In addition, four half-year sabbaticals, which had been deferred since 2014, were awarded.

Throughout the years, professional development for faculty and staff has inspired innovation to improve student learning. In 2014, nine faculty attended the Achieve the Dream “Dream Builders” Conference in Orlando, Florida. From that conference, a multi-pronged Dream Builders plan of action was created. ([IV.A.1-8](#)) Many of the initiatives in the plan were implemented and continue today. One example was the development of IS 109. This Student Success course was revitalized after the Dream Builders conference. The course was piloted in the Lunalilo Scholars Program, which provides high touch support for first-year students who would not have considered college if not for this program. Over the years, the course evolved, incorporating pedagogy from the Academy of College Excellence (ACE) model, primarily focusing on students’ affective development through experiential learning. With the additional curriculum enhancements, IS 109 will be offered in the fall 2018 as IS 108. Another outgrowth of the faculty’s exposure to the ACE Model was the participation of faculty and staff in a Five-Day Experiential Learning Institute (FELI) funded through the College’s Title III grant.

## **MAKAHIKI (CONT.)**

Guided by cultural expert ‘Umi Kai, students, staff, faculty, and administrators gathered quietly early on the morning of the Makahiki celebration to begin the day with an opening procession on the Great Lawn at the center of campus, wearing traditional clothing and following Hawaiian protocols. At the closing of the procession, following oli (chants) and the offering of ho’okupu, a rainbow arched overhead and several manu-o-kū, native seabirds, swooped low in the sky as if to acknowledge this special event. Following the procession, the campus competed in Hawaiian games of strategy and skill and spectators cheered as students, staff, and faculty challenged each other until a lanakila (winner) was named for each game.

This was the first Makahiki event held on our campus, and is an example that speaks to the vision of Kapi’olani CC as “a model indigenous serving institution.”<sup>1</sup> Funded by Title III grants, the event brought the campus together in the celebration of the traditions and knowledge of the Hawaiian people.

The Title III grant has also supported three cohorts of faculty in a summer ‘āina-based professional development seminar. Faculty across multiple disciplines have modified their assignments to incorporate ‘āina-based learning.

To encourage innovation in teaching and to enhance professional skills, the College and University provide an array of workshops. Training includes educational methodology and instructional support for face-to-face and distance education modalities, required safety and technical training for workplace safety, as well as training for administrative functions at the College ([IV.A.1-9](#), [IV.A.1-10](#)).

Professional development is extended not only to faculty and staff, but also to students. Leaders from Student Congress, Student Activities, Phi Theta Kappa, STEM, and Student Publications attend regular leadership training events on O‘ahu, the neighbor Hawaiian islands, and at national conferences.

To support innovation among administrators, the College sends administrators to the Great Leaders Seminar ([IV.A.1-11](#)) and national conferences where leadership best practices are shared. During the summer the College holds professional development for department chairs and unit heads.

A summary of College endeavors is listed in [IV.A.-12](#), Innovation Efforts.

***How innovation was implemented through policy and procedure***

- Co-requisite model: When ideas for improvement of the policy on remedial and developmental education were explored, data indicated that students enrolled in pre-collegiate classes were not persisting through to college-level coursework. These students were spending down their financial aid and getting discouraged with the time required to complete their coursework. Along with the other six community colleges, the College engaged English and math faculty to develop curriculum and re-organize the delivery of these courses. Faculty were released from teaching as well as provided stipends for work. In addition, faculty were consulted on improvements to the organizational structure of the unit delivering remedial and developmental education. The result was a co-requisite model and the English and math faculty who had heretofore been in a separate developmental education department were re-integrated into their respective Arts and Sciences departments. Students now take only one level of stand-alone developmental courses and college-level courses with developmental courses as co-requisites, accelerating their progress to and through college-level courses. The policy requires that students be able to complete college-level English and math in one year.
- STAR: The College implemented a systemwide innovation, the Student Academic Records (STAR) degree audit platform. STAR enables students to plan and track their academic journeys at a single site. Course registration is done exclusively on the STAR

Guided Pathway System (GPS). The STAR GPS System allows students to plan and project a graduation date, track degree requirements with the Academic Essentials tab, register for suggested courses to optimize their paths towards graduation and view unofficial transcripts and grades. Administrators, faculty, and staff worked together to implement the new system. Student Guide to STAR ([IV.A.1-13](#))

- Undergraduate Research Experience: Based on the results of grant-funded innovations in science education, the College has institutionalized undergraduate research experiences. This innovation required the development of a policy for fair compensation of the faculty engaged in this research with individual students. The VC for Academic Affairs and the science faculty collaborated to create the curriculum and the compensation ([IV.A.1-14](#), p. 4). At the end of each semester, students from math, science, English, and communications participate in an end-of-the-year poster presentation on subjects as wide ranging as sustainability and cybersecurity.
- Distance Education Plan: The Faculty Senate, aware of the growing needs of students in online courses, developed two resolutions for the Interim Chancellor. One resolution requested “a clear and precise statement of the Interim Chancellor’s vision for Distance Education at KCC” and the other, based on a recommendation from the Faculty Senate Distance Education Committee, requested the designation of a full-time Online Learning Coordinator to create and implement an overall comprehensive plan for support of Online Learning. These efforts led to the development, seven months later, of a Distance Education Plan approved by the Faculty Senate and the Chancellor’s Advisory Council (CAC) ([IV.A.1-15](#)). The DE plan created a structure for training faculty and dedicated support for online-only students.

## ANALYSIS AND EVALUATION

The College’s leaders create and encourage innovation leading to institutional excellence, supporting faculty, staff, and students to take initiative and effect improvements in a systematic, participative process that assures effective planning and implementation. The College’s Strategic Plan is focused on Student Success initiatives, including the development and enhancement of its faculty and staff. Importantly, faculty and staff are provided support for pursuing professional development opportunities. The College has secured significant federal grants to meet the unique needs of students on the islands and utilizes internal resources that are readily accessible to enable all stakeholders to participate. Finally, the College has platforms for all stakeholders to contribute ideas for improvement and for realizing the vision to be a model indigenous-serving institution.

---

**Standard IV.A.2. The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student view in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.**

---

## EVIDENCE OF MEETING THE STANDARD

The College and the UHCC have established policies and procedures that authorize administrators, faculty, staff, and students to participate in making decisions. There is a specific manner through which individual stakeholders bring forth ideas and work together on policy, planning, and special-purpose committees.

### *Stakeholder Participation*

The University of Hawai‘i Board of Regents sets and publishes systemwide policies regarding governance in the Board of Regents General Overview ([IV.A.2-1](#), p. 9). The University of Hawai‘i Professional Assembly’s (UHPA, the faculty union) collective bargaining agreement establishes clear guidelines regarding the faculty’s scope of authority in decisions regarding academic matters ([IV.A.2-2](#)).

Governance and decision making at the College are participatory processes involving two types of representation, one based on assigned leadership (e.g., the director of Human Resources) and one based on elected leadership (e.g. Faculty Senate Chair). The College’s 2018 governance policy, which was approved by the CAC in April 2018, describes these processes ([IV.A.2-3](#)).

Kapi‘olani Community College Operational Policy KOP #1.112 defines the roles of the four Authorized Governance Organizations and the Chancellor’s Advisory Council ([IV.A.2-4](#)).

The four Authorized Governance Organizations (AGOs, [IV.A.2-5](#)) hold elections and convene meetings on a regular basis. The AGOs are scheduled to present at the convocation of faculty and staff at the start of each semester. Each AGO sends resolutions made on behalf of their constituents directly to the Chancellor for response. In addition, each AGO sends a representative to fully participate and vote in the Chancellor’s Advisory Council, the largest and most representative policy group advising the Chancellor ([IV.A.2-6](#)). The AGO representatives report on their goals, concerns, and activities at the beginning of each CAC regular meeting. The roles of Faculty Senate and Student Congress are recognized in the Board of Regents Guide ([IV.A.2-7](#), p. 9). ‘Aha Kalāualani is the College’s Native Hawaiian Council that represents the College at the Pūko‘a Council of the University of Hawai‘i ([IV.A.2-8](#), [IV.A.2-9](#)). The Staff Council is unique to this College and is evidence of the College’s firm commitment to staff input in campus affairs.

Following is a brief description of the responsibilities of each AGO:

1. The **Faculty Senate** is responsible for speaking on behalf of faculty on academic policy matters such as: (a) policy determining the initiation, review, and evaluation of proposed or authorized research, instructional, and academic programs; (b) budget planning and implementation policy; (c) student-faculty relations policy; (d) policy for the evaluation of faculty and campus academic administrators; (e) the improvement and establishment of a canon of professional ethics and an effective means of professional maintenance of those ethics, including faculty self-discipline; and (f) other subjects affecting academic policy, subjects referred to the Senate by the Chancellor, or by request of the appropriate faculty organization. ([IV.A.2-10](#), [IV.A.2-11](#))
2. The **Associated Students of Kapi‘olani Community College (Student Congress)** develops and implements plans for programs and activities responsive to the needs and interests of students and promotes participation in decision-making concerning the college community. ([IV.A.2-12](#))
3. The **‘Aha Kalāualani**, composed of all Native Hawaiian and Native Hawaiian-serving employees of the College, participates in the governance of the campus and advises in matters relating to Native Hawaiian programs, activities, initiatives, and issues in alignment with Pūko‘a Council. ([IV.A.2-13](#))
4. The **Staff Council** represents the interests of staff employees, provides a formal organizational voice representing the staff in the administration of the campus, and supports the provision of professional development for its members. ([IV.A.2-14](#), [IV.A.2-15](#))

The **Advisory Councils** provide opportunities for campus leaders, faculty, staff, and students to work with administration in the governance process. These councils serve as advisors to the Chancellor and address a wide variety of college wide issues. The AGO leaders meet monthly with the Chancellor during the academic year.

1. The **Chancellor’s Advisory Council (CAC)** is composed of the Chancellor, the Vice Chancellors, the deans, department chairs, unit heads, administrative services section heads (e.g. Human Resources, Business Office, etc.), the Director of the Office of Institutional Effectiveness, the Chair of the Counseling and Academic Advising Council, and the chairs of the four AGOs. It is the broadest and most comprehensive council at the College. All members are responsible for keeping their respective constituents informed of matters discussed in this Council. Special task forces or workgroups support the CAC by researching problems, making recommendations, and/or implementing procedures. For example, the CAC Budget Workgroup plays an integral part in resource allocation recommendations. While membership of the CAC is limited to these individuals, meetings are open to all employees of the College and agendas and minutes are shared broadly. ([IV.A.2-16](#), [IV.A.2-17](#), [IV.A.2-18](#)).

2. The **Administrative Staff Council** convenes on a weekly basis and is comprised of the Vice Chancellors for Academic Affairs, Student Affairs, and Administrative Services; the three Academic Program deans, the Assistant Dean for the Office of Community and Continuing Education, the Student Affairs Coordinator, the Chancellor's Executive Assistant, and the Chancellor. Issues affecting the College are addressed in these meetings and all members are responsible for keeping their respective constituents informed of administrative decisions that address the needs, ideas, and vision of the College's community members. ([IV.A.2-19](#), [IV.A.2-20](#))

There are councils and working groups that make recommendations to the Vice Chancellors for Academic Affairs, Student Affairs, Administrative Service, and the Dean for Community and Continuing Education ([IV.A.2-21](#)). These Councils serve as forums for discussion on the impact of policy and for problem-solving of operational matters in the areas of instruction, student services, administrative services, workforce development, and continuing education.

In addition to the AGOs and Advisory Councils, the Chancellor may also designate special purpose committees such as ad-hoc committees and task forces to address specific issues that remain outside the normal business of the councils.

### ***Collaboration in Decision Making***

An example of collaborative work on policy, planning, and decision making is the process for allocating supplemental Tuition and Fees monies (Tuition and Fees Special Funds--TFSF). Kapi'olani Community College Operational Policy KOP #1.111, Planning and Assessment Integration with Resource Allocation (PAIR, [IV.A.2-22](#)) outlines a workflow and decision process developed by the Vice Chancellor for Administrative Services, vetted by the Administrative Staff Council, and reviewed and recommended for the Chancellor's approval by the CAC.

Each year, in anticipation that there will be supplemental Tuition and Fee Special Funds at the end of the fiscal year, applications for additional budget allocations are submitted by faculty and staff to department chairs and unit heads through the Allocation Request Form (ARF) process. Department chairs and unit heads, along with their dean or Vice Chancellor, prioritize the requests based on alignment with the College's Strategic Plan, with Student Success Initiatives, and with the goal of program improvement. Requests are reviewed independently by each of the four AGOs, representing the interests of faculty, students, the Native Hawaiian community, and staff. Proposers have the opportunity to clarify and advocate for their applications at a Town Hall meeting convened by the AGOs ([IV.A.2-23](#)). The AGOs prioritize the requests and submit them to the Vice Chancellor for Administrative Services. The Vice Chancellor conveys these lists to the CAC Budget Workgroup, composed of members of the CAC. The workgroup further prioritizes the requests and makes recommendations for funding to the CAC. The CAC reviews the recommendations, votes on the recommendations, and forwards the final

recommendations to the Chancellor for approval. The Chancellor reviews the recommendations, makes her decisions, and provides a memo to the CAC summarizing her decisions. If there are decisions that are different from the CAC's recommendations, the Chancellor must provide justification. Members of the CAC are required to share this memo with their constituencies. See III.D.1 for more details about the PAIR process.

- Budget Allocation Request process ([IV.A.2-24](#))
- Budget Workgroup report to CAC ([IV.A.2-25](#), p. 3)
- May 2017 Budget Workgroup Review of ARFs ([IV.A.2-26](#))
- May 2017 Approval memo from Chancellor ([IV.A.2-27](#))

## ANALYSIS AND EVALUATION

The UH System and the College have established a broad and comprehensive set of policies and procedures that authorize administrators, faculty, staff, and students to participate in making recommendations to the Chancellor that inform decision-making. The policies clearly define and distinguish between the role of oversight and that of administration of the College. Within operations, the college gives a voice to all constituency groups for balanced and well-rounded perspectives on governance issues. There are specific manners in which individual stakeholders bring forth ideas and work together on policy, planning, and special-purpose committees.

---

**IV.A.3. Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.**

---

## EVIDENCE OF MEETING THE STANDARD

Governance roles of administrators and faculty are clearly defined and ensure that both have a substantive voice in policy development, planning, and budgetary matters that relate to their areas of responsibility and expertise.

### *Clearly Defined Roles*

UH Executive Policy EP 4.201, Integrated Long-Range Planning Framework ([IV.A.3-1](#)), addresses the roles of administrators and faculty in long-range planning. The College's Functional Statements ([IV.A.3-2](#)) outline the governance responsibilities of all executive administrative offices. The College's Governance Policy clearly states the roles of administrators, faculty, staff, and students at the College in policy development, planning, and budgetary matters (see IV.A.2.). The PAIR process exemplifies how administrators and faculty each have roles set by policy and procedures (see IV.A.2.).

### *Appropriate Voice and Input*

Policies governing academic and student support issues may be initiated through the Faculty Senate, the faculty's authorized governance organization. Recent examples of resolutions can be viewed at the Faculty Senate website ([IV.A.3-3](#)).

The College strives to have broad participation of faculty, staff, and students in discussions on policies, planning, and budget through collegial, open, and participatory governance. Ideas for campuswide policies can be suggested by any member of the College ([IV.A.3-4](#)). These ideas are reviewed by the Administrative Staff Council, the CAC (charter [IV.A.3-5](#)), and the groups each CAC member represents. When relevant, the AGOs are consulted separately and, when needed, the discussion is taken to open forums with the College. Recommendations for policies go to the Chancellor for final decision.

Planning in this setting is characterized by consultation and review that combine the best of bottom-up and top-down approaches. The primary institutional planning document is the Strategic Plan. For example, faculty and administrators, along with students, staff, and community members, collaborated in the development of the most recent Strategic Plan (2015-2021). In concert with directions set by the UHCC system, the College engaged in dialog with stakeholders for 18 months to develop the plan. Drafts were shared in open forums as well as in the constituent groups. Administrators, faculty, staff, and students offered feedback at various points in the development process. The final version of the Strategic Plan was approved by the Authorized Governance Organizations, the CAC, and the Chancellor. The Chancellor and the CAC review the plan annually ([IV.A.3-5](#), p. 4).

The College's planning system involves a set of interrelated plans and processes. The objectives for each plan and process address a part of the overall Mission and Strategic Plan for the College.

- College Strategic Plan, 2015-2021 ([IV.A.3-6](#))
- Annual Report of Program Data (ARPD) ([IV.A.3-7](#))
- Comprehensive Program Review (CPR) ([IV.A.3-8](#))
- Technology Plan ([IV.A.3-9](#))
- Distance Education Plan ([IV.A.3-10](#))
- Student Success Pathway Plans, 2017 ([IV.A.3-11](#))
- College Enrollment Management Plan ([IV.A.3-12](#))
- Hawai'i Papa O Ke Ao ([IV.A.3-13](#))
- Sustainability Plan ([IV.A.3-14](#))

Budget decisions are informed by data and information reported by departments, units, and programs through the College's Annual Report of Program Data (ARPD) and Comprehensive

Program Reviews (CPR).

Budget preparation is primarily the responsibility of the Vice Chancellor for Administrative Services. Allocations are received from the UH Community College Budget Office, which includes general fund allocations from the state legislature and tuition and fees. The Faculty Senate and ‘Aha Kalāualani, the Native Hawaiian authorized governance organization, have standing budget committees, which provide input to budget processes through their representatives on the Chancellor’s Advisory Council’s Budget Workgroup. In addition to the annual process of providing personnel positions and operations funds to various departments and units, the College provides additional opportunities for allocations, such as through the Planning and Assessment Integration with Resource Allocation (PAIR) process, which involves the submission of Allocation Request Forms (ARFs). The authorized governance organizations and the CAC Budget Work group play pivotal roles in making recommendations regarding allocations. (See IV.A.2 for more detail on the ARF process)

## ANALYSIS AND EVALUATION

The roles that faculty and administration play in the governance of the college are clearly identified in the policies and procedures. Moreover, through the system of shared governance, all constituent groups have opportunities to have a voice in the larger issues of the college such as planning, policy development, and decisions regarding budgetary matters. The college has evaluated its governance processes and practices with constituent feedback in surveys and in committee self-reflection. Recent improvements to processes include an update to the governance policy and the clarification of decision flow with updated process maps. Constituents of the College are represented and work collaboratively to reach a variety of goals guided by a common mission and shared vision.

---

**IV.A.4. Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.**

---

## EVIDENCE OF MEETING THE STANDARD

### *Curriculum Oversight*

The Board of Regents Policy 1.210 ([IV.A.4-1](#)), *Regents’ Policy on Faculty Involvement in Academic Decision Making and Academic Policy Development* states, “...the faculty has primary responsibility for such fundamental academic areas as curriculum content, subject matter, and methods of instruction and research. On these matters the power of review and concurrence or final decision lodged in the Board of Regents or delegated to administrative

officers should be exercised adversely only in exceptional circumstances and for reasons communicated to the faculty.”

In addition, K5.201, Policy on Curriculum Review Guidelines and Timeline ([IV.A.4-2](#)), clearly outlines the role of the faculty and academic administrators in the review of curriculum. In accordance with K 5.201, the Faculty Senate Curriculum Committee, the Faculty Senate, and the Vice Chancellor for Academic Affairs review curriculum proposals before final approval by the Chancellor. The Chancellor makes the final decision on curriculum proposals that do not involve significant changes in resources. New programs must be approved by the BOR. The curriculum review process, as specified by the Faculty Senate, requires that faculty proposing new or modified curriculum consult with their academic deans prior to submission of proposals to the review process.

New programs are proposed to the Vice President of Community Colleges and approved by the Board of Regents in accordance with Board of Regents Policy RP 5.201, Academic Affairs, Instructional Programs ([IV.A.4-3](#)). Executive policy EP 5.202, Review of Established Programs ([IV.A.4-4](#)) mandates that the College’s established programs shall receive a comprehensive review at a minimum of every fifth year.

The recent systemwide adoption of Quali Student Curriculum Management as well as the systemwide implementation of student registration through the STAR guided pathways system provided an opportunity to evaluate the approval flow and timelines for the curriculum review process. The result of the evaluation is reflected in a Faculty Senate resolution revising the flow of curriculum documents ([IV.A.4-5](#)) and the formulation of Kapi‘olani CC Policy K5.201, Curriculum Review Guidelines and Timeline, effective 6/23/2015 ([IV.A.4-6](#)). Timelines were revised in January, 2018 ([IV.A.4-7](#)).

As stated in IV.A.2, the Faculty Senate’s Constitution ([IV.A.4-8](#)) states that faculty participate in policy-making regarding:

1. The mission, strategic planning, and directions of the College;
2. Curriculum and instruction;
3. Academic support and student support;
4. Budget;
5. The evaluation of faculty and administrators;
6. The canon of professional ethics, rights, and responsibilities; and
7. Other matters which affect the general quality of the College.

***Student learning programs and services***

K5.202, Policy on Review of Established Programs ([IV.A.4-9](#)), gives responsibility to the College’s faculty and staff to conduct program reviews to assess and evaluate the effectiveness and efficiency of instructional, student support, and learning support programs. The policy

states results are to be used for decisions related to program improvement, modification, and/or termination. The College's ARPDs provide a place for this assessment, as demonstrated by the 2015 ARPD for Hospitality and Tourism ([IV.A.4-10](#), p. 3).

The hierarchy of review always begins with faculty and staff, then department chair and/or program coordinator, then Dean, then appropriate Vice Chancellor, and finally the Chancellor, who makes the final decision and provides an executive summary ([IV.A.4-11](#)).

As depicted in the College's organizational chart ([IV.A.4-12](#)) and the charts in the ISER section on Organizational Information, the Academic deans oversee the learning programs and the Vice Chancellor for Academic Affairs oversees the deans. The Vice Chancellor for Academic Affairs also oversees academic support services such as the Library and Learning Resources and the Center for Excellence in Learning, Teaching and Technology.

The Vice Chancellor for Student Affairs manages the student services area. There are two main groups and one task force in the student affairs area that provide recommendations on student learning programs and services: the Student Affairs Leadership Team (SALT), the Counselors and Academic Advisors Council (CAAC) and the Enrollment Management Task Force. SALT convenes all the leaders in student affairs, CAAC gathers the counselors and advisors to discuss areas of concern, and the Enrollment Management Task Force includes personnel from student affairs, student services, and other areas of the college such as the web team, marketing, public information, and the Office for Institutional Effectiveness ([IV.A.4-13](#)).

## ANALYSIS AND EVALUATION

Faculty and academic administrators, through policy, procedures, and well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services. Program design, implementation and analysis rest first with faculty as subject matter experts through program review and outcomes assessment. Administrative leaders work with faculty to implement and execute program plans based on an analysis of needs and resource allocation requests. Policies and procedures are in place that define the roles of faculty and academic administrators in decisions regarding curriculum, such as the Faculty Senate Constitution. Regular evaluation of the processes leads to improvements.

---

**IV.A.5. Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.**

---

## EVIDENCE OF MEETING THE STANDARD

The College ensures, through its system of board and institutional governance, that relevant

perspectives, expertise, and responsibility guide decision-making and timely action on plans, policies, curricular change, and other key considerations.

### ***Board and Institutional Governance***

The College is governed by a structured hierarchy starting with a Board of Regents that develops policies and procedures for the ten-campus University of Hawai‘i System. The Board of Regents delegates authority to the President of the University of Hawai‘i System to implement these policies. The President delegates authority to the Vice Presidents of the system.

The Vice President for the University of Hawai‘i Community Colleges oversees the seven community colleges and develops policies that align with the UH System policies and are specific to the community colleges. The Vice President for Community Colleges designates authority to each Chancellor responsible for each of the seven community colleges. The Chancellors meet through the Council of Community College Chancellors ([IV.A.5-1](#))

Appropriate roles for faculty, staff, and students are defined by the following UH System policies.

Student leaders from all ten University of Hawai‘i System campuses are convened at the UH Student Caucus ([IV.A.5-2](#), [IV.A.5-3](#)), which provides the opportunity for student leaders to communicate the needs and concerns of UH students directly to university administration, the state legislature, the governor, and other relevant offices.

At the UH Community College System, Chancellors and Vice Chancellors for Academic Affairs, Student Affairs, and Administrative Services meet monthly with their counterparts across the community college system for planning purposes. Faculty senate leaders are convened to discuss issues of concern across the seven community colleges ([IV.A.5-4](#)).

At the College level, the Chancellor receives recommendations from the authorized governance organizations (AGOs) and the advisory councils described in IV.A.2. Timely action on institutional plans, policies, and other key considerations is discussed at the Chancellor’s Advisory Council (CAC).

The curriculum review process described in IV.A.4 is an example of how the College ensures the appropriate level of relevant perspectives, decision-making aligned with expertise and responsibility, and timely action on key considerations. Curricular actions are proposed by faculty and program coordinators and approved by the respective departments prior to submitting to the Faculty Senate Curriculum Committee for review. The next level of approval comes from the Faculty Senate and then the Vice Chancellor for Academic Affairs. The Chancellor provides final approval for all curriculum except new program proposals, which must be approved by the Board of Regents. Deadlines at each stage of the process are set to ensure that review and approval is completed in time for changes to be included in the STAR guided pathways system. ([IV.A.5-5](#)).

## ANALYSIS AND EVALUATION

The College ensures, through its system of board and institutional governance, that the relevant perspectives, expertise, and responsibility guide decision making and timely action on plans, policies, curricular change, and other key considerations. All constituent groups throughout the University of Hawai‘i system, including students to the maximum extent possible, have a place in governance and on specific governance bodies such as Faculty Senate. On the College level, the broad representative membership of the CAC ensures the full range of relevant perspectives are involved in decision making for key issues.

---

### **IV.A.6. The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.**

---

## EVIDENCE OF MEETING THE STANDARD

The College documents and widely communicates across the institution the processes for decision making and the results that ensue.

### *Documentation of Decision-making*

The College primarily uses internal memoranda (e.g., regarding decisions on budget, authorized governance organization (AGO) action requests, resolutions, revised policies) and meeting minutes to document decisions for the campus. For the CAC, a major and the most highly representative council at the College where many of the institution’s decisions are made, the CAC minutes document decisions. Admin Staff Council also documents its decisions with minutes ([IV.A.6-1](#)).

Each of the College’s AGOs maintains a website and a listing of the AGOs is located on 'Ohana, the College’s intranet (AGO listing, [IV.A.6-2](#)). The AGOs document action plans, action requests, and resolutions, when applicable, on their respective websites. Minutes for all authorized governance organizations are publicly available on 'Ohana.

At every CAC meeting, the AGOs are among the first to report on their activities and plans. Their presentations are shared in the CAC minutes.

### *Communication of Decision-making*

The College uses representative meetings, emails, the daily news bulletin *News and Events*, and the intranet 'Ohana to communicate decisions to the campus. All faculty and staff are automatically subscribed to *News and Events*, with the choice to opt-out if so desired.

As the CAC includes all the leadership across the campus, including the AGO leaders, the

members are expected to communicate decisions from the Council to their constituents. The CAC charter states, “The CAC functions as one of the Chancellor’s mechanisms for presenting and discussing issues, concerns, and ideas for the purpose of consulting with campus leaders in areas of campus life... The Council shall serve as the entity for communication with constituents across the college. The Council members shall create a system for disseminating information to their areas as well as reporting concerns and issues from their areas back to the Council.” The Chancellor places this statement on each CAC agenda as a reminder, thereby emphasizing its importance.

Likewise, when the CAC votes on a campuswide issue or policy, the CAC member is voting on behalf of their unit and therefore, receives feedback from those they represent prior to voting. Page two of the CAC Charter states, “When voting, the CAC members are representing their unit. Therefore, a sufficient amount of time will be given for members to receive feedback from their units before the vote. When in discussion on a topic, the CAC members are representing their function as a College leader, not as representative of their unit.” ([IV.A.6-3](#), p. 2)

The CAC distributes its agendas in advance of each meeting to all members, with the expectation that the agendas will be shared among those represented by those members. Draft minutes of the CAC are disseminated to all members of the Council by email and approved at the subsequent meeting. The CAC posts final minutes on the intranet ([IV.A.6-4](#)) and announces the posting through the daily *News and Events* bulletin ([IV.A.6-5](#)). Similarly, all Admin Staff council minutes are stored on the College’s intranet and announced through *News and Events* ([IV.A.6-6](#)). For other advisory councils, attending members are asked to communicate the content of their agendas and decisions to their respective communities via meetings and email.

At each spring and fall convocation, the AGOs are asked to report on their plans for the semester. AGO reports are a regular element of each CAC meeting. As mentioned above, the AGOs post minutes and other important documents on their websites.

All departments and units are funded to cover their allocation costs. Decisions about new Tuition, Fees, and Special Funds (TF SF) funding requests are accomplished through a campuswide Planning and Assessment Integration with Resource Allocation (PAIR) process that invites all departments, units, and programs to submit Allocation Request Forms (ARFs) to the Vice Chancellor for Administrative Services. The AGOs participate in the review of proposals and they hold a public town hall that invites all proposers to present their case to a committee of AGO leaders. AGO comments are forwarded to the CAC’s Budget Committee, which follows a protocol for making funding recommendations to the CAC. The minutes of the CAC Budget Committee are posted on the intranet ([IV.A.6-7](#)).

When a campuswide policy is being developed, it is shared with the College through open forums and presentations to the CAC. A record of these presentations to CAC is shared through the CAC’s minutes. Representatives are expected to share all proposals with their constituents and to bring back to the CAC concerns and suggestions meant to inform any votes regarding

recommending the policy or plan to the Chancellor.

## ANALYSIS AND EVALUATION

The College shares decisions and actions with the entire college and community through a variety of ways and in various venues including online, newsletters, direct reporting to key committees, and in governance body reporting. The College evaluates its efforts regularly and continually discovers new ways to share information. Recent survey findings have identified areas of improved communication about the College’s decision-making process in that an increasing number and percentage of constituents report knowledge of the essential college functions. The Closing the Loop survey in fall 2016 was particularly helpful in recognizing that some staff and faculty, despite all of the communication efforts, still report not being aware of critical decisions at the College. As a result, the College created and shared a document representing an improved decision-making process ([IV.A.6-8](#)). The College began publishing the CAC and Admin Staff Council minutes in the *News and Events*, the daily electronic bulletin. To further ensure campus-wide dissemination of important College information, effective fall 2017, the *News and Events* changed from an “opt-in” subscription to an “opt-out” subscription. The College documents and widely communicates across the institution the processes for decision-making and the results that ensue.

---

**IV.A.7. Leadership roles and the institution’s governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.**

---

## EVIDENCE OF MEETING THE STANDARD

The College regularly evaluates leadership roles, governance, and decision-making policies to ensure integrity and effectiveness. Evaluation results are shared widely and are used to as a basis for improvements.

### *Evaluation of Leadership Roles*

Leadership roles across the campus are evaluated by College constituents through surveys such as evaluations of the Department Chair/Unit Head, and the 2012, 2016, and 2018 Campus Climate Surveys (otherwise known as, respectively, Faculty and Staff Survey, the Closing the Loop Survey, and the Getting Better at Getting Better Survey). Each survey is administered by OFIE (Office for Institutional Effectiveness). The reports are posted on the OFIE website ([IV.A.7-1](#), [IV.A.7-2](#), and [IV.A.7-3](#)). These surveys ask faculty and staff to assess the performance of administrative offices such as the Offices of the Vice Chancellors, service units such as CELTT, and the AGOs. The department chair/unit head survey is administered

annually by OFIE and discussed with the program administrator. One of the takeaways of the 2012 and 2016 surveys was that the College needed to better communicate the various roles of the administration. To increase campus understanding of administrative staff responsibilities and the functions of their respective offices, administrators presented a summary of their office's accomplishments and future goals at an end-of-semester gathering.

In addition, the College's Functional Statements were revised and sent to the UHCC for approval in April 2018. This document accompanies the College's organizational chart and describes the roles and responsibilities for each office on campus ([IV.A.7-4](#)). The updated functional statements reflect the changes in the structure and function of the Arts and Sciences unit, where English and math faculty were reintegrated into that unit from a separate developmental education unit.

In addition to these developments, in order to support leadership and improve decision-making and resource allocation in areas of assessment, student success, and distance education, the following actions were taken:

- the creation of an institutional assessment coordinator position to advance assessment across the College,
- the creation of a student success coordinator position to advance student success initiatives at the College,
- the expansion of the role of the student success pathway to engage faculty and staff in setting student success goals at all levels of the College,
- the creation of a distance education coordinator position to coordinate improving DE services at the College,
- the creation of a distance education counselor to improve academic services to DE students.

### ***Evaluation of the Institution's Governance***

With the interim chancellor beginning her term in June 2016, there has been a thorough evaluation of governance, roles, and decision making policies. The first governance document reviewed, evaluated and revised was the charter of the Chancellor's Advisory Council (CAC). The discussion began with the CAC in fall 2016, and after robust, broad-based dialog, the CAC Charter was approved and signed on January 6, 2017. As processes evolved, an amended version was proposed to codify current practice. The amended Charter was approved by the CAC on October 26, 2017 ([IV.A.7-5](#)) which included a calendar (Attachment A) of when campuswide plans were to be reviewed by the CAC. The CAC Charter will be evaluated again in August 2018. Simultaneously, a decision-making flowchart was approved by the CAC on October 26, 2017 (page 30). As stated in [IV.A.6](#), information and decisions are disseminated to the CAC members, who are required to communicate the same to their constituents. Information and approved minutes that are distributed to the CAC are announced on the College's online

daily *News and Events* bulletin and are archived on 'Ohana, the College's intranet.

The next governance document that was created was the policy to define the process of developing and vetting new policies. A CAC Policy Work Group was formed to make recommendations to structure the policy-making process and approved policy K1.101 on September 26, 2017, with an evaluation date of September 26, 2022 or sooner, if necessary. Policy K1.101 was distributed through the CAC, the College's *News and Events* bulletin, and posted on the Policies and Plans page both on the main Kapi'olani CC website ([IV.A.7-6](#)) and the 'Ohana intranet ([IV.A.7-7](#)). An example of how policies are widely communicated and the results are used as the basis for improvement is the College's Animals on Campus policy, which was approved by the CAC on January 16, 2018. After the policy was approved, there was further debate on the issue of emotional support/comfort animals as there are no federal/state laws or UH policies that specify a process for addressing emotional support/comfort animals. A task force was formed in February 2018 to make recommendations to the CAC in April for possible amendment to the Animals on Campus policy. Legal Counsel from the University of Hawai'i recommended that the Animals on Campus policy be withdrawn due to ongoing deliberation and discussion at the UH System.

Three policies and one procedure were reviewed in fall 2017 and spring 2018.

1. The Governance Policy
2. Animals on Campus Policy
3. Facilities Use Policy
4. Vacancy Procedures

## ANALYSIS AND EVALUATION

The College regularly evaluates leadership roles, governance, and decision-making policies to ensure integrity and effectiveness. These evaluations focus on the processes, procedures and practices at the college. Evaluation results are shared widely and are continuously used to effect improvements. In 2017, for example, the CAC spent considerable time reviewing and updating the governance and decision-making processes. The dialogue revealed a lack of clarity in the flow of some decisions at the college. To help explain the decision process better, the CAC made improvements to the decision-making flowcharts. The College constantly evaluates leadership roles, governance and decision-making policies to insure integrity and effectiveness, and to respond to changing student needs.

The College uses feedback from evaluations to develop practices and policy in pursuit of continuous improvement.

## B. Chief Executive Officer

---

**IV.B.I. The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.**

---

### EVIDENCE OF MEETING THE STANDARD.

At the University of Hawai‘i System, the *President* is the CEO of a system of seven community colleges and three four-year universities. The Vice President for University of Hawai‘i Community College System oversees the seven community colleges. Each community college is led by a *Chancellor*, who serves as the Chief Executive Officer (CEO) of the institution, providing effective leadership in a wide variety of areas including planning and organizing, budgeting, selecting and developing personnel, and assessing College effectiveness.

On June 3, 2016, the Vice President for Community Colleges appointed the Vice Chancellor for Academic Affairs (VCAA) to serve the College as Interim Chancellor. On April 17, 2018, at a campuswide meeting, the Vice President for Community Colleges announced that he had recommended to the University President, the appointment of the Interim Chancellor as the next permanent Chancellor for Kapi‘olani Community College. The effective date of appointment is June 8, 2018. Prior to becoming CEO, the Chancellor served as VCAA for six years, after having served as Interim VCAA for the previous five years (at the University of Hawai‘i, interim appointees are sometimes afforded the opportunity to apply to fill the position on a permanent basis).

For the purpose of this report, the term Interim Chancellor will be used when describing the specific activities during the period of time between June 2016 and June 2018. The term Chancellor will be used when describing the general functions of the position.

### *Improve, Promote, and Connect*

In the summer of 2016, the Interim Chancellor convened a planning retreat with the Administrative Staff Council to focus on three overarching goals for the year:

1. Improve infrastructure,
2. Promote a culture of respect and excellence, and
3. Connect to the Strategic Plan ([IV.B.1-1](#)) ([IV.B.1-2](#))

The goal of improving infrastructure would be addressed by supporting ongoing and initiating new infrastructure projects across the campus. The goal of promoting a culture of respect and

excellence was addressed by efforts to bring the campus together in the wake of the previous Chancellor's departure and to set the stage for new leadership. The goal of building connection to the Strategic Plan was addressed by working to ensure that everyone would see themselves in the relatively new 2015-2021 strategic plan.

In May 2017, the Interim Chancellor, in her State of the College Report to the Chancellor's Advisory Council (CAC) ([IV.B.1-3](#)), reported progress on infrastructure improvements including the fact that the College had filled 52 positions, revised the CAC charter, added additional communication channels, simplified the Planning and Assessment Integration with Resource Allocation (PAIR) process, and spent \$500,000 on classroom furniture upgrades.

In addressing the culture of respect and excellence, the College had conducted a campuswide survey on civility ([IV.B.1-4](#)) and held a forum on the results ([IV.B.1-5](#)). A mandatory campuswide training on civility was held in August 2017. To promote a culture of excellence, six-month sabbaticals were reinstated and two were approved for 2017-2018. Six-month sabbaticals had not been awarded since 2014. The Interim Chancellor approved a significant increase in professional development support, with a combined total of TFSF and RTRF funding of over a \$150,000.

In order to connect faculty, staff, and students with the College's Strategic Plan, the Interim Chancellor authorized that each outcome of the strategic plan should be aligned with a phase of the College's Student Success Pathway (SSP). Consequently, all departments, units, and programs were asked to align their goals with the SSP and develop measurable outcomes to assess progress toward those goals. Fifty-three departments, units, and programs did the work of connecting their projects and initiatives with these phases, thereby connecting to the strategic plan. This was an unprecedented level of college participation ([IV.B.1-6](#), [IV.B.1-7](#), p. 7).

### *Advancing Student Success*

From the start of the Interim Chancellor's tenure, she provided leadership for organizational changes, including the College's implementation of the UHCC Student Success Pathway initiative. As described in the introduction, in 2015, the UHCC System developed a systemwide initiative for Student Success and all community colleges were tasked with implementation. The Interim Chancellor appointed a Student Success Coordinator and, as it was a campuswide initiative, established the position as a direct report.

### **Figure 1. UH Community College's Student Success Pathway Model**

After numerous meetings with campus constituents, the Student Success Coordinator and the Vice Chancellor for Student Affairs modified the pathway, a visual and informational chart that maps out the students’ journey throughout their college journey. This model was presented to the UH Board of Regents in October 2016 ([IV.B.1-8](#)).

**Figure 2. Kapi‘olani Community College Student Success Pathway Model**

The Student Success Coordinator works with faculty, staff, and students in smaller teams assigned to each pathway phase. The teams monitor progress on goal achievement. The Coordinator is a member of the CAC so that issues regarding student success throughout the College may be discussed with the largest representative body in the College’s committee structure. Implementation of the SSP has encouraged cross-campus collaboration. Various parties on campus have come together and created projects and initiatives around each phase of the SSP model.

***Improving governance and planning***

Another major challenge was the evaluation and improvement of the Chancellor’s Advisory Council (CAC). The Chancellor oversees the CAC, an advisory group composed of leaders of instructional programs, administrative and educational support units, and representatives for Authorized Governance Organizations (AGOs) and others offices with campuswide responsibilities. The group meets monthly during the academic year to discuss and make recommendations on major campus issues and policies ([IV.B.1-9](#)). This organizational structure allows for many individuals to work on multiple issues on the campus. It allows feedback from all parts of the campus, ensuring that different programs and services have input on campus projects and initiatives. In September 2017, the Interim Chancellor presented a revised charter and decision-making flowchart. The flowchart re-organizes and codifies the interactive

decision-making process of key advisory bodies. (final Charter [IV.B.1-10](#) and [IV.B.1-11](#)). During fall 2017 and spring 2018, under the Interim Chancellor's leadership, the CAC worked on revising the governance policy. In April 2018, the CAC approved the governance policy ([IV.B.1-12](#)).

### ***Distance Education***

The College recognizes the role that online education formats are playing in meeting the emerging learning needs of its students. As a result, during this academic year, the Interim Chancellor authorized the development of a distance education plan (link to [IV.B.1-13](#)). The CAC and AGOs endorsed the distance education plan in the 2016-2017 academic year (see IV.A.1).

### ***Sustainability Plan***

Under the Interim Chancellor's leadership, the CAC and AGOs endorsed a campus sustainability plan ([IV.B.1-14](#)) in the 2016-2017 academic year. The College first added sustainability measures to strategic planning documents in 2007, for the 2008-15 strategic plan. It encourages the integration of Hawaiian and diverse cultural perspectives on sustainability and climate change, especially as these relate to urgent environmental contexts in Oceania, Asia, and the Americas.

### ***Campuswide Assessment***

The Interim Chancellor led several forums and stakeholder meetings to discuss and vet an institution-wide assessment plan. Although campuswide support could not be achieved for the assessment plan, the Interim Chancellor authorized several assessment initiatives to strengthen assessment at the College, including three assessment colloquia during which faculty and staff were invited to have broad-based dialog and to improve their learning outcomes assessment strategies; the Kapi'olani Research Scholars Project ([IV.B.1-15](#)), a research challenge for faculty and staff to create innovative assessment projects; and an assessment study of the Annual Report of Program Data, involving two focus groups, one in fall 2017 and one in spring 2018. In addition to College assessment initiatives, the College hosted a systemwide assessment training by assessment expert Linda Suskie.

### ***Budgeting and Fiscal Stewardship***

The Chancellor is responsible for the College budget. In FY 17, that budget totaled \$44 million, in addition to extramural funds totaling approximately \$6.8 million, which increase campus revenue by 15.5 percent. Every spring the Vice Chancellor for Administrative Services (VCAS)

alerts the departments and units to create projected annual and five-year budget plans. The VCAS compiles the information and formulates the College's annual budget based on the previous year's allocation funding from the system and the legislature. The UHCC System provides the annual allocation to the College in October of the fiscal year. The Chancellor sends a memo to the College ([IV.B.1.16](#)) with the final budget allocations.

The Interim Chancellor meets with the VCAS and budget manager monthly to review income and expense spreadsheets to monitor the College's financial health. If there are areas that are over- or under-spending, the Interim Chancellor immediately informs the area or the supervisor of the area for information or to remedy the imbalance. Each quarter, all departments and units receive allocation balances for review and monitoring. The statements first go to the Vice Chancellors and deans to ensure that leadership has accountability for the budgets of their departments and units.

### ***Hiring and Developing Faculty and Staff***

The Chancellor participates directly in selecting and developing personnel at the College. In order to manage personnel resources, when vacancies occur at the College, the need for the vacant position is assessed by the deans and Vice Chancellors and discussed by the Administrative Staff Council. The position is not automatically filled with a replacement. The Administrative Staff Council decides if a position should be reallocated to another area of the College. A spreadsheet generated by the Human Resource Manager is used to track vacancies, which are discussed quarterly at Admin Staff meetings ([IV.B.1-17](#)). As of April 2018, the Interim Chancellor authorized a revision to the vacancy procedure to codify this process ([IV.B.1-18](#)).

Whenever possible, the Chancellor participates in interviews for new hires on the campus, especially for faculty recruitment. Program administrators always participate in second-level interviews, and these administrators report on the process when the Chancellor cannot be present. The final decision on selection of new hires rests with the Chancellor, who signs all offer letters to new hires. In addition to making the final selection of new faculty and staff, the Chancellor is also responsible for appointing department chairs and the heads of support units with recommendation from the departments or units. The Chancellor also approves the re-assignment of faculty into new roles. For example, at the request of Faculty Senate, the Interim Chancellor appointed an Interim Distance Education Coordinator from among the faculty to lead an initiative to improve distance education delivery at the College.

During the Convocation of fall 2016, the Interim Chancellor shared that professional development for faculty and staff was a primary focus for the year. During the same semester, the Interim Chancellor drew up a professional development budget funded by Tuition and Fees

Special Funds and divided the funds among the Vice Chancellors to distribute to their respective staff ([IV.B.1-19](#)).

As mentioned above, in spring 2017, the Interim Chancellor revitalized faculty development by re-instituting half-year sabbaticals.

During her tenure as Vice Chancellor for Academic Affairs (VCAA), the Interim Chancellor had supported several system initiatives that focus on professional development. She continues to lead the UHCC System's *Wo Learning Champions* ([IV.B.1-20](#)). She recruits campus participants for the *President's Emerging Leaders Program* ([IV.B.1-21](#)), and the *Community College Leadership Champions* ([IV.B.1-22](#)).

The Interim Chancellor actively encourages faculty to address learning outcomes assessment in their contract renewal and tenure and promotion dossiers. In early January 2017 ([IV.B.1-23](#)) and March 2018 ([IV.B.1-24](#)), she sent emails to department chairs and unit heads, the VCAA, the VCSA, the deans, and faculty, calling attention to the need to address learning outcomes assessment in contract renewal dossiers.

The Interim Chancellor has also supported faculty and administrator development in understanding accreditation. As detailed in IV.B.4., a number of faculty and administrators have attended professional development events and participated in site visits to deepen their understanding of the accreditation process. In a similar fashion, she and faculty, staff, and administrators attended a UHCC systemwide workshop on the Community College Survey of Student Engagement (CCSSE) and she led a team to a national CCSSE institute on student success in fall 2017 ([IV.B.1-25](#), [IV.B.1-26](#)).

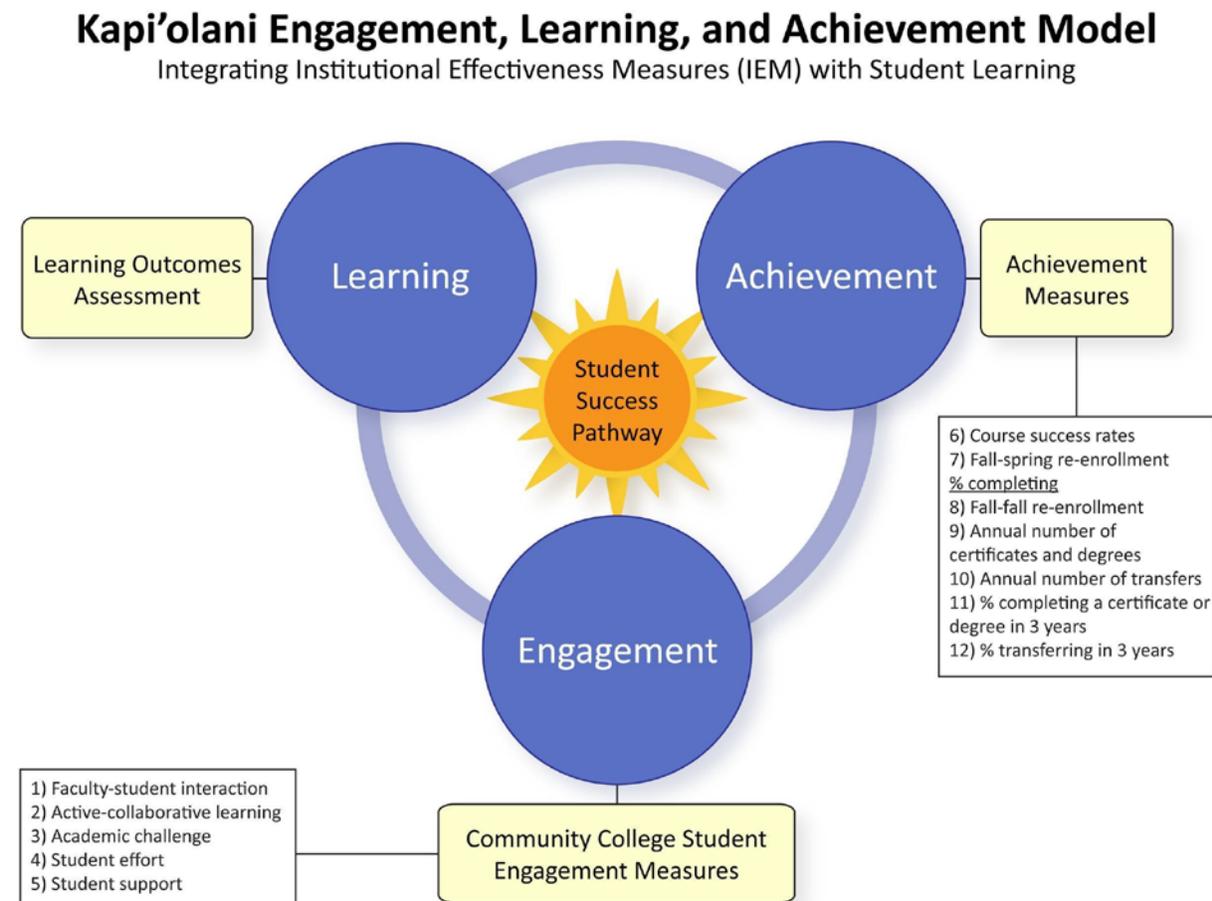

### ***Assessing institutional effectiveness.***

The Chancellor directs the Office for Institutional Effectiveness (OFIE), which “assist(s) with all academic, student services, and continuing education programs in assessing student success, the health of programs, developing tactical plans that align with the College’s strategic plans, and providing data to be used as the basis for administrators to determine the allocation of resources” ([IV.B.1-27](#)). The director of OFIE reports to the Chancellor and is a member of the Chancellor’s Advisory Council.

The Kapi‘olani Engagement, Learning, and Achievement Model (KELA) diagrams student engagement, learning, and achievement. Student engagement is monitored by the CCSSE measures such as faculty-student interaction, active-collaborative learning, academic challenge, student effort, and student support. Student learning is monitored through course, program, general education, and institutional learning outcomes assessment, which is collected in the

assessment management system Taskstream. Student achievement data are collected by the UHCC and in the College’s ARPDs in areas such as course success rates, fall-spring re-enrollment, fall-fall re-enrollment, annual number of certificates and degrees, annual number of transfers, percentage of students completing a certificate or degree in three years, and percentage of students transferring in three years.

**Figure 3. The KELA model**

In the KELA model, Institutional Effectiveness Measures (IEMs) are core effectiveness measures to support the operationalization of institutional goals and objectives as defined in the College’s Strategic Plan (reference Strategic Plan Collegewide Strategy No. 8).

The Interim Chancellor meets with OFIE staff to review data and request additional studies when needed. OFIE analyzes achievement data to be used for planning purposes. The Interim Chancellor shares this information with the campus to ensure everyone is aware of the College’s current state. The results and analyses of the data are discussed with the administrative team

within the framework of the mission and strategic plan, and the Interim Chancellor charges her administrative team to develop and implement plans to move the College forward.

In addition, the Interim Chancellor has directed OFIE to increase its outreach to the campus community to ensure that faculty and staff may leverage the research skills and research data that OFIE can offer to assist with improving student achievement and learning outcomes achievement. The Interim Chancellor also approved increased professional development for faculty and institutional research staff to learn how to better use CCSSE surveys and data.

Annually the UHCC System provides the College with program effectiveness and achievement data in Annual Reports of Program Data (ARPD). Departments, units, and programs augment these reports with narratives that address program learning outcomes, program analyses, results of program assessment, action plans, resource implications, and next steps. These ARPDs are used, in conjunction with the three-year Comprehensive Program Reviews and the Student Success Pathway reports, to inform planning and resource allocation decisions. The Planning and Assessment Integration with Resource Allocation (PAIR) process (discussed in Standard III.D.1.) requires budget requests to be linked to the learning outcomes and achievement analyses in these reports.

In August 2017, in an effort to improve the effectiveness of the ARPD, the Interim Chancellor directed OFIE to conduct an evaluation of the report. Criteria included the use of data, presentation of student achievement data, the assessment of student learning, and the quality of action plans ([link](#) to first rubric). Nine faculty were selected to do a thorough review of five sample ARPDs. Another focus group was conducted in February 2018. The Director of OFIE presented the results of the first focus group to the Vice Chancellors' Advisory Council and shared the full report with the Interim Chancellor in February ([IV.B.1-28](#)).

## **ANALYSIS AND EVALUATION**

The Chancellor has primary responsibility for the quality of the institution, providing effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing effectiveness in a variety of ways. The Chancellor works closely with administrators, faculty and staff to monitor the progress in campus plans and budgeting. In the area of selecting and developing personnel, the Chancellor follows the UH Community College's procedures to ensure fairness in hiring the most qualified candidates (See III.A.1). In this period of transition, the Interim Chancellor intentionally created transparent and accountable decision making processes, informed by data, and built on consensus whenever possible.

---

**IV.B.2. The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution’s purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.**

---

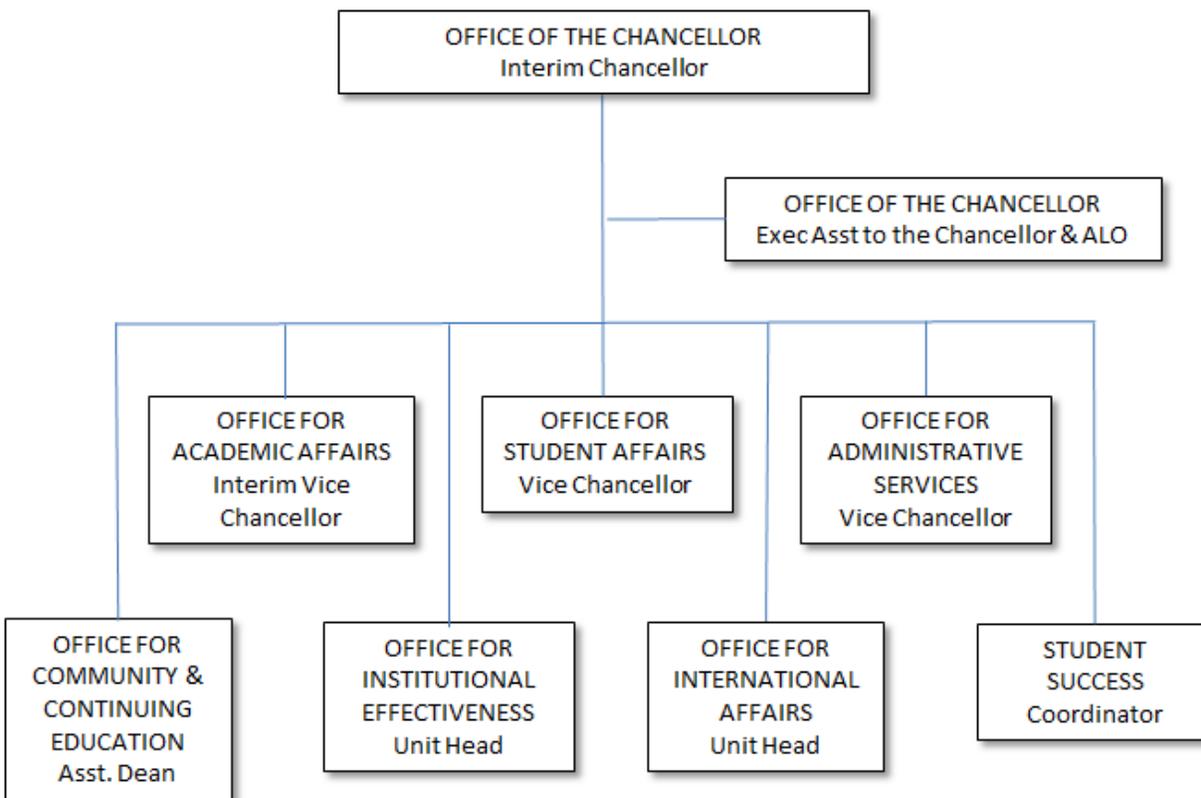

The Chancellor plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution. When appropriate, the Chancellor delegates authority to administrators and others within the College.

**EVIDENCE OF MEETING THE STANDARD**

***The Administrative Structure***

The Office of the Chancellor is responsible for maintaining a successful learning environment for all students, an institution that is responsive to the needs of the community, and an environment that provides for professional growth and development of all staff. The Office of the Chancellor plans, organizes, directs, and controls the institution’s academic and support programs at the campus level in accordance with established policy and procedural guidelines and applicable statutes, and oversees the management and operations of the College in the following functional areas: Office for Academic Affairs, Office for Student Affairs, Office for Administrative Services, the Student Success Coordinator, Office for Community and Continuing Education, Office for International Affairs, and Office for Institutional Effectiveness.

**Figure 5. Administrative Offices**

Each of these offices is associated with various responsibilities to ensure the effectiveness of the College. The Kapi‘olani CC Functional Statements describe in detail the duties and responsibilities of the respective offices ([IV.B.2-1](#)). Additionally, because of the position’s campuswide responsibilities, the Student Success Coordinator reports directly to the Chancellor.

***Planning, overseeing, and evaluating***

The Interim Chancellor has provided organizational leadership in reviewing the structure of the Office for Community and Continuing Education (OCCE). In 2012, one unit of OCCE, the Office for Continuing Education and Training (OCET) was put under “receivership,” with the coordinator reporting directly to the Chancellor. In 2016-2017, based on an evaluation of performance data that showed declining revenue and a need to better address the education of adults of working age, the Interim Chancellor re-assigned leadership of OCET to the Assistant Dean for OCCE ([IV.B.2-2](#)).

As mentioned in IV.B.1, the Chancellor meets with the Administrative Staff Council to discuss staffing needs at the College. Staffing decisions are made after a review of the College's strategic directions to determine where the position would be used most effectively. In addition, at least once a year the Interim Chancellor and Administrative Staff review the College's organizational chart to ensure that all positions are correctly placed. Any discrepancies are corrected as necessary ([IV.B.2-3](#), [IV.B.2-4](#)).

### ***Delegating Authority for Effectiveness***

Leadership at the College is delegated to the vice chancellors, deans, directors, chairs, and heads based on traditional educational divisions and needs of the institution. The Chancellor charges the Vice Chancellor for Administrative Services with managing the budget for the campus. The Chancellor and the Vice Chancellor for Administrative Services (VCAS) allocate an operating budget to each Vice Chancellor, dean, department chair, and unit head. Each area manages its own budget. Within the budget, there are categories for payroll expenses and operating expenses. Every month, the VCAS and the budget manager review the expenditures with the Chancellor and quarterly updates to budget expenditures are provided to each budget area. If the expenditures are increasing disproportionately in any area, the Chancellor addresses the issue immediately.

The Chancellor delegates responsibility to the Vice Chancellor for Academic Affairs to supervise and manage all the instructional units on campus as well as instructional support units such as the Library and Learning Resources (LLR) and the Center for Excellence in Learning, Teaching, and Technology (CELTT).

Finally, the Vice Chancellor for Student Affairs oversees the counseling and advising of targeted student populations; oversees the support for student activities and student government; addresses matters regarding Title IX issues, student grievances, and the student conduct code; and oversees student services such as Admissions, Records, Graduation, and Financial Aid.

All Vice Chancellors implement University of Hawai'i Community College (UHCC) policies, campus policies, and campus operational procedures that have a direct impact on their areas. The Administrative Staff Council, Authorized Governance Organizations (AGOs) and the Chancellor's Advisory Council (CAC) vet all campus policies and procedures before the Chancellor gives her approval. This process is described in the policy on policy development ([IV.B.2-5](#)).

When new initiatives that support student success and overall college effectiveness are needed, the Chancellor provides resources to the Vice Chancellors in the form of additional funding for non-instructional teaching equivalencies (TEs) and/or overload or overtime pay. For example,

such additional funding has allowed for the designation of learning outcomes assessment coaches to support all faculty and staff in improving assessment practices. The assessment coaches have developed workshops, a website, and handbooks, and conducted one-on-one coaching for campus individuals to adopt and effectively use assessment ([IV.B.2-6](#)). TEs and overload are used in a broad variety of projects ([IV.B.2-7](#)). As discussed above, the Interim Chancellor also appoints coordinators for campuswide initiatives (e.g. distance education and student success) to support the workload required by such projects. Similarly, the Vice Chancellor for Student Affairs has appointed coordinators to help carry the workload of managing large sets of services such as counseling for targeted populations.

## ANALYSIS AND EVALUATION

The Chancellor plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution. When appropriate the Chancellor delegates authority to administrators and others within the College. The Chancellor's first line of direct reports oversee all critical functions of the College and are responsible for ensuring that all functions are sufficiently resourced. With input from the Administrative Staff Council, the Chancellor evaluates the effectiveness of the administrative structure and, as in the case of the Office of Continuing Education and Training (OCET), makes changes and delegates authority to improve the performance of the College.

---

### **IV.B.3. Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:**

- **establishing a collegial process that sets values, goals, and priorities;**
  - **ensuring the College sets institutional performance standards for student achievement;**
  - **ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;**
  - **ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;**
  - **ensuring that the allocation of resources supports and improves achievement and learning; and**
  - **establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.**
- 

## EVIDENCE OF MEETING THE STANDARD

The Chancellor guides the institutional improvement of the teaching and learning environment through established systems, policies, and procedures. The Chancellor incorporates constituent

voices in matters of college governance and particularly faculty input in academic and professional matters.

### ***Collegial process of decision making***

When the Interim Chancellor took office in June 2016, one of her first tasks was to finalize the College's Mission, Vision, and Values statements and the strategic plan. She sought feedback from the campus in the final drafting of these documents ([IV.B.3-1](#)). She worked through how the College defines itself as an indigenous serving institution ([IV.B.3-2](#)). She worked closely with 'Aha Kalāualani, the Native Hawaiian Council, to articulate the values of the College. She initiated a campaign to advocate for civility across the campus (see IV.B.1.) ([IV.B.3-3](#)). She solicited feedback and recommendations from constituent groups and worked with them to collectively shape the direction of the College.

### ***Institutional performance standards***

Kapi'olani Community College is one of seven community colleges under the University of Hawai'i system. University of Hawai'i Community College (UHCC) Policy 4.203 establishes the framework for institution-set standards for student achievement for all community colleges. ([IV.B.3-4](#)). The College's institution-set standards for course success are documented in the College's annual reports to the ACCJC.

After consultation and negotiation with the campuses, the Office of the Vice President for UHCC sets the baseline figures and percentage increases for most of the College's student achievement goals, which are documented in the College's Strategic Plan. Each semester, the Vice President of the UHCC reports on how the colleges achieved their goals and how they compare to their sister institutions ([IV.B.3-5](#), [IV.B.3-6](#)). Other student achievement goals are set by the College independently of the system. These are reflected, along with system goals, in the College's Strategic Plan Scorecard and are marked with an asterisk ([IV.B.3-7](#)). The Office for Institutional Effectiveness (OFIE) tracks these goals and reports on achievement.

At the program level, the Annual Report of Program Data (ARPD) includes effectiveness indicators, showing the annual successful completion rates. Every three years each instructional and non-instructional program undergoes a comprehensive review process. The program review process analyzes results from program student learning outcomes and reviews improvement plans for student achievement linked to the College's strategic plan. The data from the ARPDs are analyzed, reviewed, and where appropriate, reflected in updated action plans. Throughout the process there is an overarching commitment to continuous quality improvement ([IV.B.3-8](#)).

The student achievement performance standards for CTE programs that prepare students for licensure exams are established by their respective accrediting agencies, which set national institutional standards for examination pass rates. The College fully supports the program accreditation needs of its departments and programs.

***High quality research and analysis of conditions***

The Office of Institutional Effectiveness (OFIE) ([IV.B.3-9](#)) provides access to and performs quality research on student engagement and achievement, providing data for evaluation and planning. OFIE organizes the College’s CCSSE survey every two years ([link](#)).

The Hawai‘i State Department of Education, the UHCC System, and other academic programs are also consulted, including the following:

- The Hawai‘i State Department of Education reports on student educational needs [IV.B.3-10](#).
- The Assessment and Accountability Branch of the Hawai‘i State Department of Education’s Office of Strategy, Innovation, and Performance ([IV.B.3-11](#)) provides data on each high school, such as demographics, on-time graduation rates, and number of students on the free/reduced lunch program.
- The University of Hawai‘i Community College System: Workforce Development Program [IV.B.3-12](#)
- The University of Hawai‘i Community College System: Hawai‘i Industry Sectors [IV.B.3-13](#)
- University of Hawai‘i Community College analytics on meeting workforce demands [IV.B.3-14](#)
- External organizations are also consulted, such as the American Association of Community Colleges, Western Alliance of Community College Academic Leaders, and Achieving the Dream.

These sources are reviewed and high impact practices are researched before planning. For example, research from Achieving the Dream indicated that the practice of intrusive advising resulted in higher rates of persistence. In 2015 the College developed a three-stage new student orientation program to improve student engagement in the earliest stages of their journey. In 2017, the percentage of students who applied, were admitted, and registered increased from 53 percent to 74 percent ([IV.B.3-15](#), slide 6).

An example of how an analysis of external conditions affected planning is the development of the School Health Assistant (SHA) program. Prior to 2007, the State of Hawai‘i Department of Health provided health services to the public K-12 schools through public health nurses. In

2007, the Department of Education became solely responsible for providing health services in the schools, through 265 School Health Assistants statewide, with 167 on O‘ahu alone. In 2014, in collaboration with the Department of Health and the Department of Education, the College developed a five-credit, 75-hour curriculum for a School Health Assistant Certificate of Competence ([IV.B.3-16](#)). In 2015, a Level II Certificate of Competence was added. Funding for curriculum development and free training for students was received through a U.S. Department of Labor Trade Adjustment Assistance Community College and Career Training (TAACCCT) grant.

***Educational planning integrates with resource planning and allocation***

The State of Hawai‘i does not mandate master educational plans. The Chancellor and the VCAS review the state appropriated budget and tuition revenues in determining allocations to departments, units, and programs to cover personnel and operational costs. Based on action plans developed in the ARPDs and CPRs, departments, units, and programs may request funding beyond their base allocations to implement program improvements. To ensure that educational planning is integrated with resource planning and allocation, the Chancellor is the final decision maker in all budget decisions, after requests are vetted by campus leaders. In close collaboration with the Vice Chancellor for Administrative Services, the Chancellor reviews the allocation of resources to ensure the campus programs and support units have adequate resources and requests are anchored in learning outcomes and achievement assessment and evaluation. Decisions regarding the College’s personnel and operational budget are made through the summer and the final budget is communicated to the College in October of each year.

In the fall 2016, to increase college engagement in the planning process through student success, the Interim Chancellor appointed the Student Success Coordinator to lead the implementation of UHCC System’s Student Success Pathway (SSP). The Kap‘iolani Community College SSP maps out all of the College’s efforts that contribute to student success. This model integrates campus strategic outcomes and goals, the College’s mission statement, programs, initiatives, and plans on how the campus would meet the needs of their students. The Student Success Coordinator meets regularly to update the Interim Chancellor on the creation, development, and implementation of the College’s plans. Effective Spring 2017, every academic program, every support unit, and every administrative unit developed an annual plan in support of the Student Success Pathway. These plans are monitored and administrators report progress at regular intervals.

***Allocated resources improve achievement and learning***

Major institutional decisions involving the allocation of resources must be tied to achievement and learning through the strategic plan, SSP, ARPD, and CPR. The following examples of resources are used for a range of needs:

**Table 1. Resources and supported areas**

Resource	Examples of supported areas
General funds	<ul style="list-style-type: none"> <li>● Personnel allocations</li> </ul>
Indirect Costs from Grants (RTRF)	<ul style="list-style-type: none"> <li>● Professional development for future grant activities</li> </ul>
Donor support (UH Foundation)	<ul style="list-style-type: none"> <li>● Scholarships and support for students with financial barriers (Lunalilo Scholars)</li> <li>● Support of various College programs such as international programs (Freeman Foundation).</li> </ul>
Tuition and Fees and Special Funds (TF SF)	<ul style="list-style-type: none"> <li>● Personnel not funded with general funds or grants.</li> <li>● PAIR proposals to support departmental, unit, and program operations</li> <li>● Teaching equivalencies, overload, and overtime</li> <li>● Professional development</li> </ul>

In the summer of 2017, to prepare for the the FY 2018 budget allocations, the VCAS conducted an annual survey of all departments and units on their annual budget needs. The survey required the units to identify educational planning objectives and align their plans with the College Strategic Plan, the Student Success Pathway, and student learning ([IV.B.3-17](#), [IV.B.3-18](#)). The VCAS used this information in developing the operational budgets of each unit.

***Procedures to evaluate planning and implementation to achieve the College’s mission***

The Interim Chancellor has instituted a calendar ([IV.B.3-19](#)) for the Chancellor’s Advisory Council (CAC) to review the College’s institutional plans. The major plans for the College are assigned a calendar month during which each plan will be discussed, assessed for effectiveness, evaluated, and modified if necessary.

The ARPD is an annual program evaluation and planning document, and its format is controlled by the UHCC System. Evaluation and revision of this document take place under the direction of the Office of the Vice President for Community Colleges. Until spring 2016, a systemwide cross-functional group met at least once every semester to review the program review process and recommend improvements. Changes in personnel in the VP’s office have suspended that

process; however, with the recent revision to the Executive policy on program review, EP 5.202 ([IV.B.3-20](#)), the UHCC Vice Chancellors for Academic Affairs have begun meeting in Spring 2018 to review and revise UHCCP 5.202, Review of Established Programs ([IV.B.3-21](#)). This policy addresses both annual program review and multi-year comprehensive program review.

In August 2017 and February 2018, the Director of OFIE conducted a meta-evaluation of a random sample of the College's ARPDs to gauge how well they reflected an effective use of data, a focus on students, outcomes assessment, and planning. The results of the study ([IV.B.3-22](#)) will be shared with the UHCC system as a resource for evaluating program review and the ARPD.

At the College, campus climate surveys (called *The Faculty and Staff Survey in 2012*, the *Closing the Loop Survey in 2016*, and the *Getting Better at Getting Better Survey in 2018*, see IV.A.7.) included items asking for feedback from the College community regarding overall planning and implementation efforts in achieving the College's mission. Feedback from the campus on the last iteration of the comprehensive program review in spring 2016 will be integrated into the next revision of the College's program review policy K5.202 ([IV.B.3-23](#)).

## ANALYSIS AND EVALUATION

The Chancellor guides the institutional improvement of the teaching and learning environment through established policies and procedures. The Chancellor ensures that planning, prioritizing and goal-setting is based on the evaluation of the College's Strategic Plan scorecard, and from the analysis of the Annual Review of Program Data (ARPDs) and Comprehensive Program Review (CPR). Once an analysis is made, the Chancellor ensures that resource allocation is tied to improving student learning and achievement. Overall institutional planning is evaluated by the Chancellor's Advisory Council annually to ensure that the mission of the institution is achieved.

---

**IV.B.4. The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.**

---

## EVIDENCE OF MEETING THE STANDARD

The Chancellor has the primary leadership role for accreditation and faculty, staff, and administrative leaders have responsibility for compliance with accreditation requirements.

*Accreditation and assessment leadership*

The Accreditation Liaison Officer (ALO) was appointed by the former Chancellor in 2015. She reports regularly to the Interim Chancellor, the Administrative Staff Council, the CAC, and the College community on where the College is excelling and where improvements can be made.

The Interim Chancellor participates fully in the writing of the ACCJC annual and fiscal reports, reviewing all reported data. During her tenure as Vice Chancellor for Academic Affairs, she participated in writing all the comprehensive self-evaluation reports and, when needed, follow-up reports. In preparing the 2018 ISER, the Interim Chancellor reviewed each of the three drafts, provided feedback to the writing teams, and moved the process forward.

In fall of 2016 the Interim Chancellor initiated the beginning of the self-evaluation effort and selected the ALO and a faculty member as the ISER co-chairs. In May 2017, the Interim Chancellor reminded the College that as the self-evaluation process was a top priority for AY 2017, accreditation was again the top priority for AY 2018. She reiterated this sentiment in the fall 2017 faculty and staff convocation.

She has invested considerably in professional development for administrative staff and faculty related to accreditation. In spring 2017 the Interim Chancellor went on an ACCJC site visit. The Interim Chancellor and a team of five faculty members attended the April 2017 ACCJC conference in Irvine to learn more about ACCJC accreditation standards and best practices to address accreditation standards. The team came back from the conference with a renewed commitment to the College and summarized specific ideas that resulted from attending the conference ([IV.B.4-1](#)).

She authorized support for members of the accreditation writing team to attend ACCJC workshops in Guam, San Francisco, and Hawai'i. The College funded training for employees to attend an accreditation workshop in Hawai'i in September 2016, and 40 employees attended an assessment workshop in March 2017. The ISER co-chairs encouraged members of the ISER team and other College employees to sign up for accreditation site visits. In the last two years the College has sent a significant number of faculty and administrators to ACCJC site visits.

To continue with the work of improving learning outcomes assessment, the former Chancellor provided Title III funds to purchase Taskstream, an assessment management system, to record and report on assessment achievements. He also allocated Title III funds to hire an institutional assessment coordinator. The current Interim Chancellor approved continued funding for Taskstream for 2017 to 2020.

The Interim Chancellor has supported substantive teaching equivalency release time from instructional responsibilities for two faculty members to serve as assessment coaches ([IV.B.4-2](#)) for their instructional colleagues. Two other coaches are working with student services. To promote best practices in assessment, the College has sent coaches to the WASC Senior College and University Commission Assessment Leadership Academy. The assessment coaches have created various trainings, a website ([IV.B.4-3](#)), handbooks ([IV.B.4-4](#)), and one-on-one coaching for campus individuals to adopt and effectively use assessment. This model of deploying assessment coaches to support faculty dates back to Fall 2011. The Interim Chancellor also approved the recruitment of an Institutional Assessment Coordinator faculty position, this time using College funds rather than not external grant funds.

After a semester of studying the standards and looking for evidence of meeting the standards, in December 2016 the Interim Chancellor led a group exercise with the Chancellor's Advisory Committee (CAC) to look at the various programs and units where gaps seemed to exist. Together the team created various strategies to help eliminate and address these gaps. This exercise helped the members of CAC understand accreditation requirements, how the campus is already meeting the standards, and where improvements are needed. Outcomes from this meeting can be found in the CAC minutes ([IV.B.4-5](#)).

In January 2017, the Administrative Staff Council discussed at length ways in which the College excels and areas that need improvement ([IV.B.4-6](#)). The Interim Chancellor directed members of the council to report on their endeavors to initiate improvements at a subsequent meeting ([IV.B.4-7](#)). The Interim Chancellor facilitated additional meetings reflecting on the findings from the institutional self evaluation process such as the CAC meeting on March 3, 2017, facilitated by Bob Pacheco, consultant ([IV.B.4-8](#)).

During Spring 2017, a draft assessment plan for the College was disseminated for feedback from the campus ([IV.B.4-9](#), [IV.B.4-10](#)). The Interim Chancellor convened three forums and several meetings to listen to the faculty and provided an anonymous survey to gather feedback. Although most faculty who attended the sessions agreed that assessment is critical for teaching improvement, there was extensive and rich discussion about how the College should structure that process. In these gatherings the Interim Chancellor responded to concerns, feedback, and the overall feelings of the campus. Feedback from the survey and emails and forum discussions were documented ([IV.B.4-11](#), [IV.B.4-12](#), [IV.B.4-13](#), [IV.B.4-14](#)). These important discussions reflect the Interim Chancellor's commitment to the College and the meeting of accreditation standards.

In addition, in August 2017, January 2018 and March 2018, the Interim Chancellor sponsored three Student Learning Assessment Colloquia, one-day, all-day events to engage faculty in deeper discussions on their course assessment plans, assessment artifacts, and next steps. In

October 2017, the Interim Chancellor invited faculty to participate in innovative assessment pilots via an initiative called the Research Scholars Project. The purpose of the Kapi‘olani Research Scholars Project (KRSP) is to encourage faculty and staff to conduct meaningful action research to improve the outcomes of students and advance the practice of teaching and learning ([IV.B.4-15](#), [IV.B.4-16](#)).

## ANALYSIS AND EVALUATION

The Interim Chancellor has exercised primary leadership for accreditation and assessment and has encouraged faculty, staff, and administrative leaders to take responsibility for compliance with accreditation requirements. She has emphasized professional development in accreditation and assessment to strengthen a culture of assessment at the College. She is working to foster a scholarly interest in assessment practices through the assessment colloquia and the KRSP project and has encouraged the assessment of program review to evaluate its effectiveness in improving program performance. \

---

**Standard IV.B.5. The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.**

---

## EVIDENCE OF MEETING THE STANDARD

The governing board of the University of Hawai‘i System is the University of Hawai‘i Board of Regents. The President assures the implementation of statutes, regulations, policies instituted by the Board of Regents. The President delegates to the Vice President of the UHCC the implementation of the UH System policies specifically for the community colleges. The Vice President, in turn, delegates these duties to each campus Chancellor. The Chancellor ensures that the College’s practices are consistent with its mission and policies and assures effective control of the College’s budget and expenditures.

### *Implementing statutes, regulations, and BOR policies*

As a State of Hawai‘i institution, Kapi‘olani Community College is governed by statutes, regulations, and policies from the State Legislature, which funds just over 50 percent of the College’s operating budget. The rules and laws governing the University of Hawai‘i are the Hawai‘i Revised Statutes (HRS) 304A ([IV.B.5-1](#)) and the Hawai‘i Administrative Rules (HAR) Title 20 ([IV.B.5-2](#)).

The University of Hawai‘i operates under the Board of Regents policies, Executive Policies, and Administrative Procedures that govern all ten campuses of the University of Hawai‘i System.

Where applicable, the University of Hawai‘i Community College System creates policies for all seven community college campuses that align with University of Hawai‘i policies, state statutes, and regulations. The Chancellor ensures that Kapi‘olani Community College complies with state statutes and regulations, Board of Regents policies, University of Hawai‘i executive policies, administrative procedures, and University of Hawai‘i Community College policies and, when needed, creates campus specific policies or procedures that align with the aforementioned.

### *Mission Alignment*

The University of Hawai‘i System, under the current President, created University of Hawai‘i Strategic Directions, 2015-2021. The four strategic directions—Hawai‘i Graduation Initiative (HGI), Hawai‘i Innovation Initiative (HI2), 21st Century Facilities (21CF) and High Performance Mission-Driven System (HPMS)—describe the University’s priorities for 2015–2021 ([IV.B.5-3](#)).

From this framework, the University of Hawai‘i Community College System created University of Hawai‘i Community College Strategic Directions, 2015-2021. The plan is organized in six sections ([IV.B.5-4](#)):

- Hawai‘i Graduation Initiative: increasing the number of graduates and transfers and the momentum to get students through to graduation and transfer more quickly.
- Hawai‘i Innovation Initiative: workforce development linked to developing emerging sectors in Hawai‘i’s economy while simultaneously providing a stable workforce for the traditional employment sectors.
- Modern Teaching and Learning Environments: ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments.
- High Performance Mission-Driven System: practices and policies that capitalize on the University of Hawai‘i’s being a single system of higher education in the state that can provide students with smooth transitions from K-12 through the community colleges to the baccalaureate institutions in the most productive, cost-effective, and results-oriented manner possible.
- Enrollment: the identification and goals for targeted currently underserved populations.
- Implementing the Plan: the policy, practice, and communication models needed to ensure the overall success of this strategic plan.

The Chancellor directed the Office for Institutional Effectiveness (OFIE) to lead a collegewide effort to create a new strategic plan for 2015 through 2021. The OFIE director ensured that faculty, staff, and students, especially those representing the College’s Authorized Governance Organizations, attended and participated in University of Hawai‘i System and University of Hawai‘i Community College System meetings during the development of their respective

strategic directions. The director asked community groups for feedback on how best to support the community's needs and workforce (see standard I.A.). As a result, the College is aligned with the strategic directions of the University of Hawai'i System and the University of Hawai'i Community College System and retains a clear focus for the College's mission. In October 2016, the Chancellor's Advisory Council (CAC) voted to approve the current strategic plan with amendments ([IV.B.5-5](#), p. 3). The members of the CAC disseminated these updates and the minutes were shared with the campus.

### ***Financial and Budgetary Stewardship***

The College's operating budget includes an annual allocation of general funds appropriated by the State Legislature plus student tuition and fees. Each community college receives a budget allocation determined by the University of Hawai'i system and oversees its individual budget with processes and guidelines from the University of Hawai'i Community College System. State law requires that the College's budget be balanced each year and the College keeps the required reserve to maintain cash flow and address emergencies (see III.D). The College's budget and expenditures are carefully monitored by the Budget Manager, Fiscal Manager, and Vice Chancellor for Administrative Services.

Annually, the Budget Manager and the VCAS meet with the Chancellor, Vice Chancellors, Deans, department chairs, and unit heads to discuss and frame each area's upcoming fiscal year annual budget and five-year budget projections. Beginning fiscal year 2018, the VCAS sent out a budget survey ([IVB.5-6](#)) to all departments and units to check for alignment with institutional mission and strategic plan goals through the ARPD, the Student Success Pathway, or past ARFs ([IV.B.5-7](#), [IV.B.5-8](#)). Once the fiscal year budget for the College has been determined, the Chancellor sends a memo ([IV.B.5-9](#)) to the College describing the budget for the fiscal year.

The College allocates funds to department, unit, program, and area accounts once in the fall and once in the spring to help control the rate of expenditure. If expenditures are higher than expected, the VCAS adjusts the spring allocations to maintain fiscal stability. The Interim Chancellor, Vice Chancellor for Administrative Services, and the Budget Manager meet monthly to discuss the budget and make adjustments as needed. Every quarter, budget and expenditure spreadsheets are distributed to each account holder via the Vice Chancellors to ensure accountability and oversight.

### **ANALYSIS AND EVALUATION**

The Chancellor ensures that federal and state statutes and regulations, and UH Board of Regents policies are implemented and that the practices at the College are consistent with the mission and policies of the College, including the effective control of the budget and expenditures. The College's Strategic Plan 2015-2021 is directly aligned with both the University of Hawai'i and

University of Hawai‘i Community Colleges Strategic Directions 2015-2021. The Chancellor effectively stewards the annual budget and five-year budget projections with funding from the Legislature and from student tuition and fees. Institutional practices such as monthly monitoring of the budget provide the opportunity for adjustments to be made, if necessary.

---

**IV.B.6. The CEO works and communicates effectively with the communities served by the institution.**

---

**EVIDENCE OF MEETING THE STANDARD**

At Kapi‘olani Community College, the Chancellor works and communicates with the communities served by the institution.

*Conscientious Community Partnership*

The Interim Chancellor attends Chamber of Commerce, Hawai‘i and Industry Sector meetings to gain insights into the needs and future trends of the state’s largest industries and future employers of the College’s graduates. One of the College’s initiatives is to engage with industry partners to develop industry-led curricula that will imbue graduating students with the marketable skills which businesses are seeking. To further this initiative, an online tool ([IV.B.6-1](#)) was developed by the UHCC system that looks not only at occupational data within individual sectors, but at data across all sectors, thus creating a holistic snapshot of industry demands and the current spread of occupations.

The Interim Chancellor meets with the various advisory boards in the College’s CTE program areas. The advisory boards are composed of professionals, graduates, and faculty who inform programs of current and future needs in the specific industry and community. For example, the Nursing Advisory Board relays information on the changing needs of the community and its patients, including areas where more support is needed. In 2014, in response to the need for medical support for low income communities, the Community Health Worker certificate was created. Training is provided at off-campus sites embedded in the communities in which they will serve.

The Chancellor also works directly with local communities and community service providers. In order to meet the needs of a rapidly growing senior population, the State of Hawai‘i Legislature instituted the Kupuna Education Center at the College as part of an initiative addressing an aging local population and its need for long-term care. The mission of the Kupuna Education Center is to develop and provide training and education for the older adult community population in active aging, to provide family caregiver training, to create a quality and committed community health wellness workforce, and to coordinate this information with all of

the University of Hawai‘i Community Colleges. ([IV.B.6-2](#))

A second example of the College’s responsiveness to community needs is the certificate for the Adult Residential Care Home Operator. With this 24-hour course, the College is a leader among institutions providing training for Registered Nurses (RNs) and Licensed Practical Nurses (LPNs) who, with a valid license, wish to operate Adult Residential Care Homes (ARCH). Graduates from the ARCH program at Kapi‘olani Community College receive a Certificate of Competence, which is one of the requirements to become licensed as an ARCH primary caregiver in Hawai‘i ([IV.B.6-3](#)).

The Culinary Arts Department received a grant from Kaiser Permanente to purchase a food truck to feed the community, collaborate with the College’s Health Programs to offer health screenings, and teach community members healthy food options and recipes. In addition, the Culinary Arts Department offers a comprehensive certificate program at the Women’s Community Correctional Center that aims to educate participants in professionalism, commitment, and responsibility. The women work their way up through a four-stage certification, culminating in a graduation ceremony where the participants prepare food for the attendees. They earn 14 credits that will appear on their University of Hawai‘i transcripts. Inmates learn real-life job skills and those who don’t complete the final, advanced stage of certification before they leave, can choose to continue their culinary training at the College.

For two years, the College offered “GoCook! Hawai‘i,” a free fast-track food service job training program for anyone 16 years and older who was unemployed or underemployed and looking for immediate employment in the food industry. Veterans received priority. The training was 12 weeks, 5 days per week, 8 hours per day. All training was conducted in the College’s cafeteria. The trainees earned the equivalency of four college credits upon completion should they decide to return and enroll in a culinary program at any community colleges in the UH system in the future. Job referrals were provided at the end of the training. This program was funded by a grant from the US Department of Labor. Health apprenticeship programs are also available ([IV.B.6-4](#)).

To enhance the two-way relationship with the neighborhood boards near the College, the Assistant Dean for Community and Continuing Education acts as a liaison by attending their monthly meetings and presenting College initiatives as needed. The Interim Chancellor also reaches out directly to the community. The recent construction of the Culinary Institute of the Pacific created concerns among neighboring residents. Upon her appointment, the Interim Chancellor attended a monthly community meeting of all the neighborhood boards that serve the geographic area of the College to hear their concerns. With the Assistant Dean of the Office for Community and Continuing Education, she did a neighborhood walk-about, meeting

neighboring residents, listening to their concerns, and speaking on behalf of the College on how changes and improvements were made to alleviate construction issues.

### ***International Outreach***

International students are a key element of the College's mission. The shared vision and the four operating principles of international education at the college are:

1. Build on and support the languages, cultures, and histories of Hawai'i
2. Develop our students' and our faculty's capacity to understand and respect diverse communities
3. Build strong and viable educational and economic cross-border partnerships
4. Strengthen the College's role as a bridge between Asia, the Pacific, the Americas, and the world.

Under the leadership of the former Chancellor, the College developed over 100 active agreements with institutional partners abroad, especially in Japan, China, and Korea, leading all other community colleges in the state in the number of academic agreements with international institutions. The College has developed educational and economic international partnerships with institutions and universities, private and public sector businesses, government agencies, and recruiting representatives. The Interim Chancellor continues this commitment to the importance of building strong and viable educational and economic partnerships with institutions and organizations throughout the international community. This year, 17 new agreements and partnerships were signed under the Interim Chancellor's leadership. To cultivate and deepen relationships with these international partners, the Interim Chancellor regularly travels to Japan, China, Korea, and other destinations as needed and routinely interacts with international partners.

The College leads the UHCC System in the enrollment of international students, who constitute approximately ten percent of the student population. Institutional agreements involve areas such as study abroad programs, course or program articulation, project collaboration, and recruitment. The Interim Chancellor plays a key role in forging and deepening these international agreements through actively interacting with leaders, teachers, and students from partner institutions abroad to discuss, create, and further possibilities for educational activities. In addition to these partnerships, the College offers short-term education and training to meet the growing demands from Asia. In 2017-2017, 33 programs were delivered to 929 participants.

These partnerships allow the College to offer students personal development and academic excellence opportunities through immersion into foreign cultures throughout the world. One significant study abroad program, the Freeman Foundation Program, is open to students at all of Hawai'i's community colleges and is conducted out of Kapi'olani Community College. The Freeman Foundation has awarded a total of \$7 million in grants to develop intensive language

and culture courses at the College in Chinese, Japanese, Korean, and Vietnamese as a Second language, and a study abroad program with a service-learning component with institutions in China, Japan, Korea, and Vietnam. In 2016-2017, six students studied and traveled to China and nine to Japan (Freeman, [IV.B.6-5](#))

### **Within the College Community**

An important goal of the Interim Chancellor was to provide many opportunities for campus constituents to engage with her and for them to have a safe and clear avenue to express their thoughts and concerns.

The Interim Chancellor’s first opportunity to reach out to the community, and to share about herself, her work, and her vision, was through published pieces called “Chancellor’s Corner,” which she wrote and posted on Kapi’olani Community College’s website

### **CULTURE OF INCLUSIVITY**

When the Interim Chancellor took the helm in June 2016, she placed a high value on providing many opportunities for campus constituents to share their thoughts and concerns with her directly through safe and clear channels. Framing positive and simple questions at the outset, Chancellor Pagotto helped the participants relax and gradually share more difficult situations that she was able to hear and address.

([IV.B.6-6](#)). These columns provide opportunities to highlight major programs and activities on campus and the results from her trips on behalf of the College’s international program.

In addition to these articles, the Interim Chancellor holds weekly office hours for anyone to drop in. In Fall 2016, Interim Chancellor Pagotto invited the College to “Ask Me Anything” sessions ([IV.B.6-7](#)). These were open meetings for anyone to “ask her anything.” She offered these hour-long sessions bimonthly for a total of seven sessions. After a campus-wide climate survey, the Interim Chancellor changed these sessions in Spring 2017 from “Ask Me Anything” to “Give Me Solutions” ([IV.B.6-8](#)). Concurrently, in Spring 2017, to experiment with different ways to engage the campus, the Interim Chancellor offered “B.I.O. Break” Sessions, which stands for “By Invitation Only” ([IV.B.6-9](#)). These sessions targeted faculty and staff who had been employed at the College from 0-5 years, then 6-10 years, and finally 11+ years. The last session of the semester was solely for lecturers. The B.I.O. Break sessions were very well attended and impactful, especially for the faculty and staff who had been employed from 0-5 years. Throughout these sessions, more transparency was achieved between the Interim Chancellor and the faculty and staff. The Interim Chancellor has continued her “Ask Me Anything” sessions, B.I.O. Break sessions and weekly office hours in 2017-2018.

## CULTURE OF INCLUSIVITY (CONT.)

The comments below affirm the Interim Chancellor’s reputation for embracing a culture of inclusivity, engagement, and leadership through service.

Statement 1:

*“I attended the ‘By Invitation Only’ gathering for faculty who have been at the campus for 0-5 years. I appreciated (as I always do) the Chancellor’s relaxed manner and her personal connection with each of the attendees; this is a leader who knows the people who work for her, even the newbies and the folks in less-prominent positions. She listened to everyone and took note of the issues raised, large and small, providing input and suggestions to some but mostly just listening. I think this reflects our Chancellor’s usual MO – she doesn’t make false promises, she doesn’t pretend she can solve all our problems, but she truly does listen and give everyone a fair opportunity to express their concerns and look for solutions where they can be found. I honestly feel that if I wanted to talk one-on-one with the Chancellor, it wouldn’t be hard for me to find her, and I could safely say whatever is on my mind without repercussion.”*

Statement 2:

*“I have been working at KCC campus for over 10 years, from being a student-help to now a professional worker. It was also a humbling experience, where the Interim Chancellor, though busy as she is, found the time to connect with others on campus. What I took away from the session is that problems, concerns or issues are always going to be there because nothing is perfect. If I’m a part of the problem, I can also be a part of the solution. What matters most is that you care for people enough that you make time to connect with them and hear them out.”*

## ANALYSIS AND EVALUATION

The Interim Chancellor responds to the needs and concerns of the community, whether it involves partners in the workforce, neighbors, or the international institutions that the College partners with. As the leader of the college with the largest international community in the University of Hawai‘i Community College System, the Interim Chancellor continues to foster and create effective relationships with international institutions. To help the College navigate through the transition of a change in leadership, the Interim Chancellor has taken extraordinary and effective measures to provide a safe environment for dialogue and the gathering of ideas for new directions for the College.

#### IV.C. Governing Board

---

**IV.C.1. The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.**

---

#### EVIDENCE OF MEETING THE STANDARD

The Board of Regents (BOR) of the University of Hawai'i is established under Hawai'i Revised Statutes HRS§304A-104. The fifteen-member board is responsible for the general management and control of the University that incorporates all of public higher education, including the University of Hawai'i Community College System. The Regents are appointed to five-year terms (with one exception noted below), and represent either one of the four counties in the State or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the University. The student regent is appointed for a two-year term, and may be reappointed. ([IV.C.1-1](#)) ([IV.C.1-2](#))

Members of the Board, drawn from a slate of nominees submitted by the Regents Candidate Advisory Committee (RCAC), are appointed by the Governor and confirmed by the State Senate. The RCAC consists of seven members, with four members appointed by the Governor and one member each appointed by the President of the State Senate, the Speaker of the House, and the Association of Emeritus Regents. The RCAC solicits nominations for the Regents, qualifies and screens the applicants, and presents to the Governor a slate of nominees for each vacant Regent position. ([IV.C.1-3](#)) ([IV.C.1-4](#))

The By-Laws of the Board of Regents include the specific organization and responsibility of the Board and its committees for academic matters, financial oversight, and general control of the University. This authority is further delineated through Regents Policies (RP). ([IV.C.1-5](#)) ([IV.C.1-6](#)) Several policies, including *RP 4.201: Mission and Purpose of the University*, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements. The Board executes these responsibilities through regular reporting and deliberation at Board and committee meetings. The Board also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan (IAFP). ([IV.C.1-7](#)) ([IV.C.1-8](#))

## ANALYSIS AND EVALUATION

The governing board is established in State statute and the Board is appointed through a process of open recruitment for Board member candidates followed by gubernatorial appointment and Senate confirmation.

The authority of the Board for the governance of the University is established in the State constitution and statute, and the Board has organized its by-laws, policies, and processes to carry out the full measure of Board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.

The authority of the Board encompasses all components of the University, including the University of Hawai‘i Community College System and the individual community colleges.

---

**IV.C.2. The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.**

---

## EVIDENCE OF MEETING THE STANDARD

The primary policy governing board interaction among board members and with the broader University community is Regents Policy, *RP 1.202: Relationship of the Board to Administration and University*. Specifically, Section III.A.2.B of the policy states that:

“Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the

board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized.”

The policy also delineates and structures the communication between the Board and the University administration, including the requesting and providing of information to and from the Board and the administration. ([IV.C.2-1](#))

The policy is further emphasized through the Board of Regents handbook that is made available to all incoming Regents and published on the Board website. The handbook is based on best practices drawn from the Association of Governing Boards, and includes expectations of Regents, including the responsibility of individual Regents to “Serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree.” ([IV.C.2-2](#))

The 2017 Board Self Assessment includes several items focused on “Acting as a Unit.” Responses to the self-assessment questionnaire indicate that Regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together.” ([IV.C.2-3](#)) ([IV.C.2-4](#)) ([IV.C.2-5](#))

## ANALYSIS AND EVALUATION

As noted, Board policy RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of Board minutes did not disclose any instances of Board members acting outside the policy guidelines.

---

### **IV.C.3. The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.**

---

## EVIDENCE OF MEETING THE STANDARD

As the governing body of the University of Hawai‘i System, the Board of Regents selects and evaluates the University President. *RP 2.203: Policy on Evaluation of the President*, establishes the evaluation protocols for the University President, including an annual self-assessment by the President, additional data collection by the Board, a preliminary meeting between the Board and the President, and a final evaluation after the President responds to the preliminary assessment. ([IV.C.3-1](#))

### *System CEO Selection*

There has not been a search for the Vice President for Community Colleges (VPCC) since the position was re-established in 2005, and the current Vice President was appointed to oversee the re-organization of the community college system. Should the position of Vice President become vacant, the President would follow the recruitment and other procedures outlined in *RP 9.212: Executive and Managerial Personnel Policies*. In a two-step process that differentiates the functions of appointment and approval, the President would make a recommendation for VPCC to the Board of Regents, which has the final approving authority for that position. ([IV.C.3-2](#))

#### *Campus CEO Selection*

The process for selecting the Chancellor (CEO) of a college is managed by the Vice President for Community Colleges. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee (CSAC), composed of representatives from various college constituencies and the community that the College serves. Nominations for members of the screening committee are solicited from governance groups. The Vice-President determines the final composition, based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of Chancellors, *UHCCP 9.210: Recruitment, Selection, and Appointment of Community College Chancellors*, was drafted in Spring 2018, and vetted and approved by the Chancellors and campus governance bodies. ([IV.C.3-3](#)) A detailed set of procedures, which has been used consistently for several years in this process, has also been codified.

The authority for appointment of the college Chancellor is delegated to the Vice President for Community Colleges, with final approval of the appointment by the President of the University. A public announcement is made, and the selected candidate is also placed on the agenda of the Board of Regents to ensure that the Regents are fully informed of the selection process and the selected candidate.

#### *UH CEO Evaluation*

Evaluations are conducted in executive session at a public Board meeting with the summary results of the evaluation also made public and included in Board minutes. The posted agenda items and subsequent minutes for the past three Presidential evaluations are provided as evidence. ([IV.C.3-4](#)) ([IV.C.3-5](#)) ([IV.C.3-6](#))

#### *UHCC and CC Campus CEO Evaluation*

The Board delegates the evaluation of the Vice President for Community Colleges to the University President, and the evaluation of the individual college Chancellors is further delegated to the Vice President for Community Colleges. The annual evaluation of both the Vice President for Community Colleges and the Chancellors is governed by Executive Policies, *EP 9.203: Evaluation of Board of Regents Appointees*, and *EP 9.212: Executive/Managerial Classification and Compensation*. ([IV.C.3-7](#)) ([IV.C.3-8](#))

Executive Policies establish an annual review that includes a 360-degree assessment by the individual, as well as his/her peers, subordinates, and constituents, of the executive's performance. The individual self-assessment also includes a review of accomplishments and goals set for the review year, and the establishment of goals for the upcoming year. The evaluation information is then discussed between the supervisor and the executive being evaluated. The results of the evaluation impact both continued employment and compensation increases.

The University of Hawai'i Community Colleges system further refines the annual evaluation of executive personnel, including Chancellors, through *UHCCP 9.202: Executive Employees Performance Evaluation*. This policy delineates the requirements for the respondents in the 360 evaluation, and also adds the college's attainment of its strategic goals as a component of the Chancellor's evaluation. ([IV.C.3-9](#))

The evaluation system is reviewed on a periodic basis. In the 2016-2017 review, two changes were adopted. First, an additional item was added to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda. ([IV.C.3-10](#)) Second, the categories of performance rating were changed to better reflect the gradations in overall performance. Each executive/managerial employee is now rated as exceptional, exceeds expectations, meets expectations or does not meet expectations. ([IV.C.3-11](#))

## **ANALYSIS AND EVALUATION**

### ***CEO Selection***

The procedures used to recruit and select the Vice President for Community Colleges and the college Chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The President of the University makes the final selection of the Vice President, subject to approval by the Board of Regents. The Vice President for Community Colleges makes the final determination of the Chancellor, subject to approval by the President.

### ***CEO Evaluation***

Annual evaluations involving 360 evaluations, assessment of goal attainment, and progress toward strategic goals have been conducted for the Vice President and all college Chancellors each year. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and in determination of merit-based salary increases, when available.

---

**IV.C.4. The governing board is an independent, policy-making body that reflects the public interest in the institution’s educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

The autonomy of the University and related independent authority of the Board of Regents is embodied in Article X of the State Constitution. Section 6 of Article X specifically states that:

“There shall be a board of regents of the University of Hawaii, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawaii, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern.” (IV.C.4-1)

In carrying out its responsibilities, the Board leadership often testifies at legislative hearings on matters relating to the University, and meets with key State legislators on various bills and budget matters. These legislative communications are coordinated and consistent between the Board and the University’s administrative legislative coordinator.

#### **ANALYSIS AND EVALUATION**

The autonomy of the University is established in the State constitution. Given the authority of the Legislature to enact laws of statewide concern, the Board remains attentive to whether such laws might impede the University and Board from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for University athletics led to extensive legislative hearings and bills introduced relating to management and control within the University. The

Board of Regents responded by creating an Advisory Task Group on Operational and Financial Controls Improvement (ATG) to conduct its own audit of University operations. The ATG, comprised of both Regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in several areas for improvement. The Board considered the reports, and made governance and policy changes in accordance with some of those recommendations. ([IV.C.4-2](#)) ([IV.C.4-3](#)) ([IV.C.4-4](#)) ([IV.C.4-5](#)) ([IV.C.4-6](#))

By taking the initiative to address the issues raised by the Legislature in a comprehensive and very public manner, the Board exercised not only its responsibility for oversight and management of the University, but also its authority to act on matters relating to the University, and protecting the institution from undue influence and political pressure.

---

**IV.C.5. The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

Both by the structure of and responsibilities established for its standing committees, and by its Regents Policies, the Board acts to fulfill its responsibilities as the single provider of public higher education in the State. Board policies and strategic plans are aligned and guide the University in fulfilling its overall mission. The role of community colleges within the University System is further defined in *RP 4.207: Community College System*. ([IV.C.5-1](#))

The board has modified the University mission statement twice in the past several years. In 2009 the Regents adopted a change in the mission that made explicit the University’s responsibility and commitment to the success of Native Hawaiian students and the desire for the University to be a model indigenous serving institution. ([IV.C.5-2](#)) In 2014 the Regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the University. This subsequently led to the creation of a new policy on Sustainability, *RP 4.208*, illustrating the alignment of mission and policy. ([IV.C.5-3](#)) Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in *RP 4.201*, Section C.b, “The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality.” Policy *RP*

4.201, Section C.a also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements.

### ANALYSIS AND EVALUATION

Board of Regents Bylaws and Policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system, and reflect the broad compliance with the overall expectations of Board management, quality control, and fiscal oversight.

---

**IV.C.6. The institution or the governing board publishes the board bylaws and policies specifying the board’s size, duties, responsibilities, structure, and operating procedures.**

---

### EVIDENCE OF MEETING THE STANDARD

The Board of Regents home page (<http://www.hawaii.edu/offices/bor/>) includes links to the Board Bylaws and Policies. The Bylaws include sections defining the Board membership and organization, the officers and duties of each officer, the standing committee structure of the Board and the scope of each committee, the meeting requirements for both committees and the Board, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the Board. The Bylaws also include the conflict of interest requirements for Board members. ([IV.C.6-1](#)) ([IV.C.6-2](#))

### ANALYSIS AND EVALUATION

The Bylaws are published and made available to the public, and include all required elements of the standard

---

**IV.C.7. The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.**

---

### EVIDENCE OF MEETING THE STANDARD

Board of Regents policies are reviewed on a staggered three-year cycle, with current iterations posted at the Board’s home page. As a result of a recommendation from the previous comprehensive accreditation review, the University and Board developed and implemented the UH Systemwide Policies and Procedures Information System (PPIS). The PPIS documents all of

the Board policies and the related University Executive Policies and administrative procedures. ([IV.C.7-1](#))

The features of the PPIS include:

- Description of the PPIS with frequently asked questions on the PPIS home page
- Easy public access to all policies, including from the Board of Regents home page
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While Regents Policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related Regents policy
- Automatic notification to interested parties of any change in policy ([IV.C.7-2](#))

When the PPIS was implemented in 2014, all policies were re-codified to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1-4, August 2018 for Chapters 5-9, and August 2019 for Chapters 10-13. ([IV.C.7-3](#))

The review of Chapters 1-4 was conducted beginning in Summer 2017 with a review of the twenty-eight policies included in those chapters. Policies were reviewed for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. Recommendations were made as to whether a policy would a) remain unchanged; b) be subject to editing for clarity or alignment with current practice; c) undergo substantive review and modification; or d) be repealed. Based on this assessment, one policy will be repealed and six will undergo substantive review. One new policy may be created. The Board will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on November 1, 2017, and subsequently provided to the Board at its November 16, 2017 meeting. ([IV.C.7-4](#)) ([IV.C.7-5](#)) A further update was provided to the Committee on April 5, 2018. ([IV.C.7-6](#))

## **ANALYSIS AND EVALUATION**

The Board policies are publicly available through the Board of Regents home page and are managed through the comprehensive PPIS. The PPIS system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

The review cycle for Chapters 1-4 was initiated as scheduled in Summer 2017 and resulted in the review of twenty-eight policies. Six policies were substantively updated through the review process.

All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of Board minutes confirmed that Board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawaii Revised Statutes, the public employee collective bargaining law.

---

**IV.C.8. To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.**

---

### **EVIDENCE OF MEETING THE STANDARD**

The Board has established strategic goals for the University and its component colleges in four key areas:

- Hawai‘i Graduation Initiative focusing on student success
- Hawai‘i Innovation Initiative focusing on research and innovation and commercialization of University research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the University’s role as the single system of public higher education in the state.

These key goals, endorsed by the Board in 2015, are further articulated in and aligned with the strategic goals of the UH Community College system and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures. ([IV.C.8-1](#)) ([IV.C.8-2](#)) ([IV.C.8-3](#)) ([IV.C.8-4](#))

The Board regularly receives updates on the University’s progress in meeting these strategic goals through data on established metrics and trends, and presentations at either board meetings or meetings of the academic and student affairs committee. The Board has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the Board has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways. ([IV.C.8-5](#))

The Board meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda ([IV.C.8-6](#), [IV.C.8-7](#))

## ANALYSIS AND EVALUATION

The Board has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

---

**IV.C.9. The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.**

---

## EVIDENCE OF MEETING THE STANDARD

All new Board members receive a full-day orientation that consists of two major components. The first is an introduction to University functions, governance, and strategic directions. The second component deals with Board governance, processes, ethics, and conduct. All new Board members receive a copy of the Board of Regents General Overview as a part of the orientation, as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, new Board members are paired with a more experienced Board member, who serves as a mentor to the incoming member. ([IV.C.9-1](#)) ([IV.C.9-2](#)) ([IV.C.9-3](#))

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees. ([IV.C.9-4](#))

The Board also organizes training for its members as a part of regular Board retreats or Board committee meetings. For example, during the 2016-2017 academic year, the University external auditor conducted a four-part training session for the Board independent audit committee, drawn from the American Institute of Certified Public Accountants (AICPA) handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management. ([IV.C.9-5](#)) The Vice President for Budget and Finance also provides an overview of the State of Hawai'i budget as it pertains to the University system. ([IV.C.9-6](#))

## ANALYSIS AND EVALUATION

New Board members are provided with a comprehensive orientation and related materials, and with a mentor from among the experienced board members. Professional development is provided

through attendance at national board professional associations and through training provided at Board meetings.

In 2017 the Board updated its committee structure to modify the personnel committee to also include Board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to Board service is provided for Board members.

---

**IV.C.10. Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board’s effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

Regents Policy (RP) 2.204 establishes the process for Board self-evaluation. In 2017, the Board bylaws were amended to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance, with explicit responsibility for managing the Board evaluation process. ([IV.C.10-1](#)) ([IV.C.10-2](#))

Pertinent to the current accreditation cycle, the Board has conducted annual evaluations since 2014 ([IV.C.10-3](#)) ([IV.C.10-4](#)) ([IV.C.10-5](#)) Additionally, in 2012-2013, the Board undertook a comprehensive audit of the University operations, including Board functions and structure, and implemented significant changes in response to the audit recommendations. ([IV.C.10-6](#)) The Board has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations. ([IV.C.10-7](#))

#### **ANALYSIS AND EVALUATION**

The Board uses the results of its evaluation to improve its operations. For example, in 2015 the Board evaluation included an assessment of whether the Board committee structure adequately aligned with the strategic directions of the University. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in un-coordinated conversations about student success. After debate and consultation, the Board acted to consolidate the three committees and focus the committee responsibilities on the student success agenda. At the same time, the Board acted to create a committee on research and innovation, also in alignment with the University’s strategic directions.

While the Board has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the Board acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of Board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

---

**IV.C.11. The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.**

---

#### EVIDENCE OF MEETING THE STANDARD

Article X of the Board of Regents Bylaws establishes the conflict of interest policies and procedures for Regents. Regents are informed of the ethics requirements during their initial orientation. ([IV.C.11-1](#))

Regents Policy. *PR 2.206: Policy on Regents as Employees*, also describes the conflicts of interest that may arise when Regents are also active employees of the University and the conditions under which such Regents need to recuse themselves from actions impacted by their employment status. ([IV.C.11-2](#))

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The Board has also included a Board education presentation by the State Ethics Commission Executive Director as an agenda item at its regular meetings. ([IV.C.11-3](#))

#### ANALYSIS AND EVALUATION

The Board is subject to both State ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. Board members are informed of the ethics requirements through their initial orientation, and through regular Board professional development.

Potential ethics concerns are routinely identified during Board meetings and the Regent in question is either recused from action and deliberation on the agenda item, or the potential conflict is determined not to preclude participation. The University General Counsel is available at Board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for Board members having acted in a manner inconsistent with the established ethics bylaws and policies.

---

**Standard IV.C.12. The governing board delegates full responsibility and authority to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.**

---

#### **EVIDENCE OF MEETING THE STANDARD**

Regents Policy, *RP 2.202: Duties of the President*, clearly documents the relationship between the Board of Regents and the University system President, and establishes the authority of the President to implement and administer Board policies. ([IV.C.12-1](#))

The general policy on duties of the President is further refined in specific actions. For example, Regents Policy, *RP 9.218: Delegation of Personnel Actions*, describes those hiring actions reserved by the Board, those delegated to the President, and those that may be further delegated by the President. ([IV.C.12-2](#))

The structure of the University of Hawai'i System establishes this line of authority with the University System President, and through the President to the Vice President for Community Colleges, and the individual college Chancellors.

When the Board does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. Task groups may be established by the chairperson upon authorization by the Board, and with such powers and duties as determined by the Board. The tenure of a specific task group shall expire at the completion of its assigned task.

An example of such a task group was focused on creating an integrated academic and facilities plan (IAFP) for the University System. ([IV.C.12-3](#)) The task group included both Regents and University administrative officials. Several meetings were held that led to the final recommendation to adopt a plan governing academic program planning and related facilities construction across the ten-campus University system. ([IV.C.12-4](#)) ([IV.C.12-5](#)) ([IV.C.12-6](#)) ([IV.C.12-7](#))

## ANALYSIS AND EVALUATION

While the Board maintains its responsibility for establishing overall strategic direction, university policies, and fiduciary management of the University system, the Board does not actively engage in direct or detailed management of the community colleges or individual campuses.

---

**Standard IV.C.13. The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college’s accredited status, and supports through policy the college’s efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.**

---

## EVIDENCE OF MEETING THE STANDARD

The Board is routinely informed about the status of accreditation at each of the community colleges.

In preparation for the 2018 Institutional Self Evaluation Report (ISER), the Board Committee on Academic and Student Affairs was presented with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the Board acted to create a permitted interaction group to assist in the evaluation of board-related standards. [\(IV.C.13-1\)](#) A permitted interaction group is comprised of a sub-set of the regents and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger Board or one of its committees. The permitted interaction group included Board leadership, the chair and vice chair of the Committee on Academic and Student Affairs, and Regents representing all the islands with community colleges. A further briefing on preparing for accreditation was provided to the Board at its March 2017 meeting. [\(IV.C.13-2\)](#)

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017, and met with representatives from the community colleges (ALOs and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the Governing Board, before the completed ISERs from the six campuses were presented for review by the Committee on Academic and Student Affairs, the Board of Regents, and the President of the University of Hawai‘i in early summer 2018.

## ANALYSIS AND EVALUATION

The Board was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

#### IV.D. Multi-College Districts or Systems

---

**IV.D.1. In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.**

---

#### EVIDENCE OF MEETING THE STANDARD

The University of Hawai`i (UH) system is the sole provider of public higher education in the state of Hawai`i. The overall structure of the UH system is established in Board of Regents policy, *RP 3.201: Major Organizational Units of the University of Hawai`i*. The ten-campus UH system as a whole includes the University of Hawai`i Community College System (UHCC), which is comprised of seven community colleges. The UHCC is further established in Regents policy *RP 4.207: Community College System*. UH Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as the multi-campus system now being evaluated. ([IV.D.1-1](#)) ([IV.D.1-2](#))

As an outcome of the reorganization in 2005, overall leadership of the University of Hawai`i Community College System is now provided by the Vice President for Community Colleges (VPCC), the CEO of the system. The VPCC is a member of the senior administration of the UH system, reporting directly to the UH system President. ([IV.D.1-3](#)) The UHCC office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O`ahu at a central site near the flagship campus in Manoa. The VPCC works with an Associate Vice President for Academic Affairs and an Associate President for Administrative Affairs to ensure support for the effective operation of the colleges at the system level. ([IV.D.1-4](#)) ([IV.D.1-5](#))

The VPCC further works with the Chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership. (See also IV.D.4.) ([IV.D.1-6](#)) The CC Chancellors may report through the Vice President for Community Colleges to the President of the UH System for University system-wide policy-making and decisions affecting all campuses; and to the Vice President for Community Colleges for leadership and coordination of community college matters. This flow of communication preserves the Board of Regents' actions in supporting both individual campus autonomy and system-wide coordinated operations. ([IV.D.1-7](#))

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC-System Functional Map, most recently reviewed by the community colleges, and updated in Fall 2017. The Functional Map shows alignment with both the major accreditation topics ([IV.D.1-8](#)), as well as the detailed parts of Standards. ([IV.D.1-9](#))

## ANALYSIS AND EVALUATION

As part of the University of Hawai`i system, the College meets this Standard.

Established policies and procedures clearly identify the positions of CEO for both the UHCC system (Vice President for Community Colleges) and individual campuses (Chancellors), and identify their authorized roles in providing leadership at multiple levels.

---

**IV.D.2. The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system-provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.**

---

## EVIDENCE OF MEETING THE STANDARD

The Vice President for Community Colleges (VPCC, the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions, and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office, and through several bodies comprised of campus representatives.

The operations of the Office of the Vice President for Community Colleges (OVPCC) are overseen by two Associate Vice Presidents who coordinate centralized support services in the areas of Academic Affairs and Administrative Affairs. The Associate Vice President for Academic Affairs provides leadership in operational policy-making pertinent to the development and implementation of CC system-wide academic plans, goals and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment

and policy analysis; career and technical education; student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives. ([IV.D.2-1](#))

The Associate Vice President for Administrative Affairs provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications. ([IV.D.2-2](#)) Facilities management is one area that requires an additional level of coordination and prioritization. Capital improvement projects (CIP) for all campuses are managed at the UH-system level through the UH Office of Capital Improvements (OCI; now designated as the Office of Project Delivery), established by the Board of Regents. General CC repair and maintenance and minor CIP projects are managed by the Associate Vice President for Administrative Affairs, and individual colleges have responsibility for routine maintenance, and health and safety issues. Individual colleges have Long Range Development Plans (LRDP), which are used by the CC and UH systems to develop and justify minor and major CIP. ([IV.D.2-3](#), [IV.D.2-4](#)).

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: Council of Community College Chancellors ([IV.D.2-5](#)); Community College Council of Faculty Senate Chairs ([IV.D.2-6](#)); and Community Council of Native Hawaiian Chairs ([IV.D.2-7](#), [IV.D.2-8](#))

Each campus also mirrors the system level structure in having executive leadership for academic affairs and administrative services; where student services functions are coordinated under the Associate Vice President for Academic Affairs (AVPCCAA) at the system level, the Colleges maintain separate executive management for Student Services with either Vice-Chancellors or Deans. Vice-Chancellors for Academic Affairs (VCAAs), Vice-Chancellors for Administrative Services (VCASs), and Vice-Chancellors for Student Affairs (VCSA) or Deans for Student Services (DOSS) also meet with their counterparts from other campuses on a regular basis, extending the network of collaborative planning and decision-making, and mutual support.

In addition to these councils based on administrative positions, the CC system has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC system having joined the Achieving the Dream Initiative in 2006. ([IV.D.2-9](#)) The system-level Council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and

have support for developing models for implementation that fit best with the individual campus culture and mission.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) Sustainability and b) Distance Education. With reference to Sustainability, an Executive Policy (EP 4.202) and a new Regents Policy (RP 4.208) signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the CC system level, which will require renewed and proactive commitment from the CC system office and the individual campuses. ([IV.D.2-10](#)) ([IV.D.2-11](#)) ([IV.D.2-12](#))

## ANALYSIS AND EVALUATION

As part of the University of Hawai`i system, the College meets this Standard.

The UHCC System is well-structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand, and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC (see also Standard III), while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the Councils that meet with the VPCC, the committees of Vice-Chancellors, and the system-level initiatives such as the Student Success Council.

---

**IV.D.3. The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures.**

---

## EVIDENCE OF MEETING THE STANDARD

The University system's budget preparation and receipt of and further distribution of resources are governed by State law, primarily Chapter 37 of the Hawaii Revised Statutes (HRS). ([IV.D.3-1](#)) Biennial budget requests, financial plans and program performance reports are provided to the

Governor and the Legislature in odd-numbered years; supplemental budget requests (to amend any appropriation for the current fiscal biennium) may also be submitted in even-numbered years. Operating and Capital Improvement Projects (CIP) funds for the UH system are appropriated by major organizational units, of which the UH Community College system is one.

The UHCC System Office, under the guidance of the Associate Vice-President for Administrative Services, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH system, the UHCC system, and the individual College Strategic Plan. [\(IV.D.3-2\)](#) The Community College Strategic Planning Council (SPC) is the primary body for ensuring system-wide participation in the UHCC strategic planning process. The membership of the SPC includes the Chancellor, Faculty Senate Chair, and Student Government Chair from each college; and the Vice President and the Associate Vice Presidents for the community colleges. [\(IV.D.3-3\)](#) The SPC provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC Strategic Plan goals and objectives. The guiding principles of the Community College Strategic Academic Planning Process, which defines the role of the SPC, are codified in *UHCCP #4.101: Strategic Academic Planning*. The Vice President for Community Colleges has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges. [\(IV.D.3-4\)](#)

Each college develops its own budget request (as described in more detail in Standard III.D.) At the UHCC system level, the seven CC Chancellors, with support from the Associate VPs and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level, but are consolidated at the UHCC system level for purposes of further integration in the overall UH system budget, which is ultimately submitted to the State Legislature.

While State general funds, allocated by the Legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Other sources of internal and extra-mural funds (e.g., Special funds, Revolving funds, grant funds, UH Foundation) may also be generated and retained by each college. The management of sources of funding other than general funds is guided by two UHCC Policies: *UHCCP # 8.000: General Fund and Tuition and Fees Special Fund Allocation*, and *UHCCP # 8.201: Unrestricted Fund Reserve—General, Special, Revolving Funds*. Each College's budget reflects a different combination of revenue sources and expenditures; all campuses maintain the Reserve required by accreditors. [\(IV.D.3-5\)](#) [IV.D.3-6](#) [\(IV.D.3-7\)](#)

Campuses have also had access to additional funds from the OVPCC, and more recently from the Office of the UH President, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives. [\(IV.D.3-8\)](#) Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the OVPCC for other campus or system initiatives, such as those associated with Student Success.

In addition to fiscal resources, the UHCC system has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another, in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC Policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy created a system pool of those positions, from which campuses may request reallocation, based on documented need. [\(IV.D.3-9\)](#)

With reference to effective control of expenditures, recent actions taken between 2013-2016 provide an example of the controls in place to ensure accountability and sound fiscal management, as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit (OIA) conducted operational reviews of the Culinary Arts programs at two community college campuses. The reports identified “operational and financial risks” and presented recommendations relating to the inventory management, financial analysis and reporting and other aspects of these programs. In Spring 2014 OIA conducted follow-up reviews to ensure implementation of recommendations. [\(IV.D.3-10\)](#) The Internal Audit report was on the agenda of the May 12, 2015 meeting of the Board of Regents’ Committee on Independent Audit. Subsequent to the December 15, 2016 of that same committee, findings from the Internal Audit report were included in the UH system’s Annual Report on Material Weaknesses and Fraud, presented to the 2017 Legislature. [\(IV.D.3-11\)](#) [\(IV.D.3-12\)](#) [\(IV.D.3-13\)](#) As one outcome of this case, the OVPCC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs. [\(IV.D.3-14\)](#)

## **ANALYSIS AND EVALUATION**

As part of the University of Hawai‘i system, the College meets this Standard.

Allocation of key resources (particularly funding and personnel) is guided by clearly established policies. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that resources are used most effectively to support colleges’ missions in service to student learning

and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

---

**IV.D.4. The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.**

---

**EVIDENCE OF MEETING THE STANDARD**

The University of Hawai'i System has a President, a Vice President for Community Colleges (among several Vice Presidents responsible for differentiated areas of UH-System functions), and Chancellors for each of the ten universities or colleges in the system. As noted, the Vice-President for Community Colleges (VPCC) is the CEO of the system of the seven UH community colleges. Each college has a Chancellor, the CEO of the institution. Board of Regents Policy BP 4.207 established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System. [\(IV.D.4-1\)](#) In 2005, the Board of Regents approved the reorganization of the Community College System and created the new Executive position of Vice President for Community Colleges [\(IV.D.4-2\)](#) A subsequent memo to the college Chancellors provided detailed organizational charts as well as a Functional Statement for the Office of the Vice President for Community Colleges (OVPC.) [\(IV.D.4-3\)](#) Key among the Major Functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of Community College Chancellors for the overall management and governance of their campuses is further affirmed in *Executive Policy 1.102: Authority to Manage and Control the Operations of the Campus*, which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads.” [\(IV.D.4-4\)](#) University of Hawai'i Community Colleges Policy, *UHCCP # 8.000: General Fund and Tuition and Fees Special Fund Allocation*, also specifies the Chancellor's responsibility “...to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission.” [\(IV.D.4-5\)](#) Responsibility for a broad range of personnel actions has also been delegated to the Chancellors in Executive Policy 9.112 (Attachment B). [\(IV.D.4-6\)](#)

In line with the need for accountability in the fulfillment of their duties, Chancellors (and other Executive-Managerial personnel) are subject to annual performance evaluation, with final

assessment by the VPCC. This process is thoroughly codified in *UHCCP #9.202: Executive Employees Performance Evaluation*. ([IV.D.4-7](#)) ([IV.D.4-8](#))

## ANALYSIS AND EVALUATION

As part of the University of Hawai'i system, the College meets this Standard.

It is clearly documented in several policy and procedural documents that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC system. The trend of delineation and delegation has generally given more autonomy to the Chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

---

### **IV.D.5. District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.**

---

## EVIDENCE OF MEETING THE STANDARD

The community colleges in the Hawai'i statewide system of public higher education operate within a three-tiered system: the University of Hawai'i (UH) system as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community College system; and the individual community college campuses located on the four major islands in the state. Satellite Learning Centers, providing additional outreach across the state, are managed by the community colleges and UH-Maui College. ([IV.D.5-1](#)) A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

As noted, there are multiple structures in place at the UH- and the CC-system level (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive Strategic Plan that provides the conceptual guidance for mid-range planning. These currently include the UH Strategic Directions 2015-2021, the UHCC Strategic Directions 2015-2021 (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan. ([IV.D.5-2](#)) ([IV.D.5-3](#)) ([IV.D.5-4](#))

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration. (IV.D.5-5) In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in IV.D.3. (IV.D.5-6)

Most recently, on April 20, 2017, the Board of Regents approved the Integrated Academic and Facilities Plan (IAFP) for the University of Hawai'i System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is "...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH system is addressed without undue duplication or inter-campus competition." (p. 2) (IV.D.5-7) The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the CC system) and affirms the further integration of planning in noting that "The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews." (p. 18)

## ANALYSIS AND EVALUATION

As part of the University of Hawai'i system, the College meets this Standard.

The UH System, the UHCC System and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that are used as the basis of evaluating institutional and system effectiveness.

---

**IV.D.6. Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.**

---

## EVIDENCE OF MEETING THE STANDARD

Multiple modes and avenues of communication exist in the UH system to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the Vice President for Community Colleges (VPCC) and the administrative staff in the Office of the Vice President for Community Colleges (OVPCC) are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH President's senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the Board of Regents (BOR) Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for BOR approval (e.g., Strategic Plans, Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of BOR committee and Board meetings, the VPCC is provided with memos summarizing BOR approved actions. ([IV.D.6-1](#)) Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through notification from the Policies and Procedures Information System (PPIS). ([IV.D.6-2](#))

The VPCC also meets regularly with three Councils representing different aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Meetings of these Councils are documented, and each Council completes an annual self-assessment. ([IV.D.6-3](#), [IV.D.6-4](#), [IV.D.6-5](#))

The VPCC makes semi-annual visits to each CC campus, with information pertinent to both CC-system and individual campus performance. Typically, Fall semester visits focus on major initiatives and budget for the current academic year as well as campus score-cards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work. ([IV.D.6-6](#)) Typically, fall semester visits focus on major initiatives and budget for the current academic year as well as campus score-cards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work. ([IV.D.6-6](#))

As noted, the community colleges function within a three-tiered system: The UH system, the UHCC system and the individual community colleges. Communication between the top two tiers (UH system and UHCC system) is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings (e.g., the Councils identified above, or meetings of functional counterparts such as Vice-Chancellors for Academic Affairs) will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. With the goal of improving timely access to information documenting discussion and decision-making at the system level (e.g., agendas and minutes of Councils and other deliberative bodies), specific steps have been taken to address communication-related concerns: 1) as needed, orientation is provided to those serving as campus representatives to system committees so they

are more fully aware of their reporting duties; and 2) the OVPCC is engaged in a comprehensive update of its own website to enhance accessibility and currency of the information posted there.

## ANALYSIS AND EVALUATION

As part of the University of Hawai`i system, the College meets this Standard.

Just as the VPCC serves as an important point of connection between the UH System and the CC System (OVPCC), and between the OVPCC and the individual colleges, the Chancellors of the individual colleges are responsible for coordinating with the OVPCC, and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC has recognized the need to maintain access to up-to-date documentation of system-level meetings, and is updating its own website to ensure better access to that information.

---

**IV.D.7. The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.**

---

## EVIDENCE OF MEETING THE STANDARD

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing, in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to a) set standards of best practices; and b) minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly reviewed ([IV.D.7-1](#)), new policies are created when need is recognized (e.g., new UHCC policy on selection process for Chancellors), roles and responsibilities are delineated in the Functional Map, and personnel are regularly evaluated on their performance in supporting and achieving educational goals. ([IV.D.7-2](#))

Of specific importance in this last context is the role of the Community Colleges' Strategic Planning Council (SPC), the primary body for assuring system-wide participation in the UHCC strategic planning process, as codified in *UHCCP #4.101: Strategic Academic Planning*. The policy identifies roles and responsibilities in the process of campus academic planning, which

provides much of the critical infrastructure for the effective functioning of the colleges. ([IV.D.7-3](#))

## ANALYSIS AND EVALUATION

As part of the University of Hawai`i system, the College meets this Standard.

Established policies and procedures as well as documentation of governance and decision-making that operationalize those policies and procedures are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

## Quality Focus Essays

The Quality Focus Essay (QFE) represents the culmination of the collective reflection and dialogue that took place at the College over the past eighteen months to discover new ways to improve student learning, achievement, and success. College faculty, staff and administration collected and reviewed the evidence to answer three questions “What do we do for students?”, “How do we do it?”, and “How do we know it is effective?” As part of the Analysis and Evaluation, the College took the analysis a step further to assess our performance and brainstormed changes, improvements and expansions to existing practices and processes asking the question, “How can we become better?” The College created a core group from the entire self-evaluation team that crafted the QFE and shared their recommendations for action with the entire college in a variety of venues.

Using the Student Success Pathway (SSP) model as a guide, the College identified two action projects for a multi-year focus to improve student outcomes:

1. Foster and Increase Engagement in the Assessment of Student Learning Outcomes (SLOs) and Service Area Outcomes (SAOs) to Improve Student Learning and
2. Increase Engagement for Student Success

Undergirding the increased focus on greater learning and achievement in the QFE are the Student Success Council’s vision, *Ne’epapa* to transform the campus community toward a collective culture that moves in unison to advance student success and mission *No ke kauhale ke kuleana* to fulfill our shared responsibility and commitment, as a campus community, to celebrate, support, and promote student success. The College continues its focus on creating student success through a collective culture, where all members take responsibility, work together, and build a community that supports and celebrates students’ engagement, learning, achievement, and success - ***No Ke Kauhale Ke Kuleana*** (the responsibility of the community).

### Overview of the QFEs

The Assessment of Student Learning Outcomes QFE is organized around themes while the Engagement for Student Success QFE is organized by distinct goals for each calendar year. The main themes in the Assessment of Student Learning Outcomes QFE are

- To update the assessment process under the guidance of an Assessment Coordinator
- To review the Taskstream process and to create queries and reports in Taskstream to inform SLO assessments.
- To update the General Education Outcomes and to map SLOs and SAOs to the revised Institutional Learning Outcomes and General Education Outcomes
- To continue innovative workshops and programs to further engage faculty and staff and explore impactful assessment activities across the College.

During the third year, the College will close the loop and make appropriate changes based on completed analyses, including campus feedback on SLO and SAO assessment. Fostering and increasing campus engagement in SLO and SAO assessment will deepen conversations around student learning and, ultimately, will increase student success.

The Engagement for Student Success QFE has a different goal for each year of the QFE timeline. The College launched the Student Success Pathway plans in 2017. Each department, program, unit, and governance organization created goals and action plans to improve student success resulting in 53 plans being submitted and 47 out of 50 Strategic Plan items addressed. In spring 2018, the Student Success Pathway template was revised and improved based on feedback from faculty and staff. The focus for 2018 is the College's completion agenda, aligned with the institution-set standards for student achievement and tied to performance funding measures as discussed in this report's section on student achievement data and institution-set standards. The goals are to increase the number of certificates and degrees for all students; increase student transfers within and outside of the UH system; increase certificates and degrees for Native Hawaiian students; increase certificates and degrees by Pell grant recipients; and increase STEM certificates and degrees.

The QFE timeline starts in January 2019; however, the Student Success Pathway plans started in 2017, giving the Engagement for Student Success QFE a framework and essential data to review and improve the process. The goals for each year are as follows:

- Year 1 (2019) - To increase course completion for all students and fall-to-spring persistence
- Year 2 (2020) - To certificates and degrees for all students, student transfers within and outside of the UH system; certificates and degrees for Native Hawaiian students; increase certificates and degrees by Pell grant recipients; and increase STEM certificates and degrees.
- Year 3 (2021) - To complete the College's 2022-2027 Strategic Plan with clear directions, goals, outcomes, and measures for student engagement, learning, achievement, and success.

### **Structure of the QFEs**

The structure of the Quality Focus Essay (QFE) is derived from the ACCJC Guide for Improving Institutions (May 2017). The College also reviewed the Manual for Self Evaluation (Aug 2017) for additional insight in the creation of this document. This essay displayed in matrix form, identifies the action projects, anticipated outcomes, and alignment with accreditation standards. The QFE describes the action projects' goals, tasks, timelines, responsible parties, and resources needed to implement and sustain the projects. The projects are derived from the analysis and evaluation for each of the relevant accreditation standards.

## Quality Focus Essay: Assessment

ACTION PROJECT: Foster and Increase Engagement in the Assessment of Student Learning Outcomes (SLOs) and Service Area Outcomes (SAOs) to Improve Student Learning					
YEAR 1 FOCUS: Foster and increase engagement (January-December 2019)					
<b>Desired Outcome:</b> Foster and increase campus engagement to support SLO and SAO assessment.					
<p><b><u>Action Steps:</u></b></p> <ul style="list-style-type: none"> <li>● Evaluate and update the assessment process under the guidance of an Assessment Coordinator to best serve the needs of the College.</li> <li>● Review and update the Taskstream process to best serve the needs of the College.</li> <li>● Review and update how student learning outcome (SLOs) and service area outcome (SAOs) assessments will be addressed within a five-year cycle and uploaded into Taskstream.</li> <li>● Create plan to map SLOs and SAOs to revised Institutional Learning Outcomes (ILOs).</li> <li>● Update General Education Outcomes to align with the revised ILOs.</li> <li>● Develop Taskstream queries and reports to produce information that improves assessment and College instructional and support activities.</li> <li>● Continue innovative professional development workshops and programs such as the Kapi‘olani Research Scholars Projects (KRSP), Assessment Colloquia, and program review meta analysis to spark engagement with and improvement of assessment.</li> </ul>					
<p><b><u>Assessment of Outcomes:</u></b></p> <ul style="list-style-type: none"> <li>● Updated assessment process.</li> <li>● Updated Taskstream process.</li> <li>● Department/units/programs provide clear documentation on how their SLOs and SAOs will be addressed within a five-year cycle and uploaded into Taskstream.</li> <li>● Completed plan to map SLOs and SAOs to ILOs.</li> <li>● Updated General Education Outcomes.</li> <li>● Creation and production of reports in Taskstream to inform useful assessment.</li> <li>● Evaluation of professional development workshops and programs demonstrate an increased improvement of and engagement with assessment.</li> </ul>					
Tasks	Std	Start Date	End Date	Responsible Parties	Resources
Evaluate and update existing assessment process.	I.B.2. I.B.5.	Jan 2019	Jul 2019	Assessment Coordinator, SLO Assessment Committee,	Possible resources for the action project might include release time for faculty to

	I.B.7.			Assessment Coaches (All key stakeholders should have the opportunity to provide input.)	conduct assessment, staff time, technology upgrades to improve the storage and access to the data.
Review and update existing Taskstream process.	I.B.2. I.B.5. I.B.7.	Jan 2019	Jul 2019	Assessment Coordinator, SLO Assessment Committee, Assessment Coaches (All key stakeholders should have the opportunity to provide input.)	Additional resources for implementing the process include the purchase and support of software to house the learning information.
Review and update the method that will be used to assess all student learning outcomes and service area outcomes within a five-year cycle. Develop a timeline of when courses will be assessed and how (e.g., 20% per year) and when assessment information will be uploaded to Taskstream. Determine who will be responsible for the assessment of SLOs and SAOs, and uploading assessment information to Taskstream.	I.A.2. I.A.3. I.B.6.	Jan 2019	May 2019	Department/Unit/ Program Faculty and Staff (All key stakeholders should have the opportunity to provide input.)	Allocations of resources (such as TEs) may be necessary depending on the process determined by the department/unit/program. Time for optional consultations with assessment coordinator and coaches.
Create plan to map SLOs and SAOs to revised Institutional Learning Outcomes (ILOs).	I.B.5.	Aug 2019	Dec 2019	Department/Unit/Program Faculty and Staff (All key stakeholders should have the opportunity to provide input.)	The College anticipates no new resources needed to meet this task.
Update General Education Outcomes to align with the revised ILOs.	II.A.11. II.A.12.	Jan 2019	Dec 2019	General Education Board (All key stakeholders should have the opportunity to	Resources might include time for faculty to conduct the discussion and mapping work.

				provide input.)	
Develop Taskstream queries and reports to produce useful assessment information.	I.B.7.	Jan 2019	May 2019	Assessment Coordinator, SLO Assessment Committee, Assessment Coaches (All key stakeholders should have the opportunity to provide input.)	A possible temporary hire of a database professional or a Taskstream consultant. Taskstream training for Coordinator, coaches, and other stakeholders.
Offer innovative professional development opportunities to improve and increase engagement with assessment.	II.A.3.	Jan 2019, Mar 2019 Aug 2019	Jan 2019, Mar 2019, Aug 2019	Assessment Coordinator, SLO Assessment Committee, Assessment Coaches (All key stakeholders should have the opportunity to provide input.)	Resources for stipends, food, and other supports.
Develop methodology to assess effectiveness of 2019-2021 action steps	I.B.7. II.A.16.	Jan 2019	Feb 2019	Assessment Coordinator, SLO Assessment Committee, Assessment Coaches (All key stakeholders should have the opportunity to provide input.)	Most aspects of this task will be met by existing staff and faculty. The College will consider the use of consultants to accelerate progress and understanding.
Prepare and submit final evaluation report, including an evaluation of the achievement of the 2019 action steps and next steps.	I.B.4 I.B.7		End of Dec 2019	Assessment Coordinator, OFIE	The College anticipates no additional resources needed to complete this task.

**YEAR 2 FOCUS: Improve assessment (January-December 2020)**

**Desired Outcome:** Improve assessment of SLOs and SAOs.

**Action Steps:**

- Implement and evaluate updated assessment process.
- Implement and evaluate updated Taskstream process and usage.
- Implement and evaluate the assessment of SLOs and SAOs for each department/unit/program.
- Implement plan to map SLOs and SAOs to Institutional Learning Outcomes (ILOs).
- Approve updated General Education Outcomes, and develop a timeline to map SLOs and SAOs to the General Education Outcomes.
- Evaluate effectiveness and usefulness of Taskstream queries and reports.
- Evaluate and expand assessment professional development opportunities for faculty/lecturers, staff, and administrators.

**Assessment:**

- Completed evaluation report on the effectiveness of the assessment process with recommendations for improvement.
- Completed evaluation report on the effectiveness of the Taskstream process with recommendations for improvement; and a summary report on the usage.
- Completed evaluation report on the assessment of SLOs and SAOs by department/unit/program, highlighting areas of effectiveness and recommendations for Improvement.
- Mapped SLOs and SAOs to ILOs.
- Approved General Education Outcomes with a clear timeline for mapping.
- Completed evaluation report on the effectiveness and usefulness of Taskstream queries and reports with recommendations for improvement.
- Evaluation results indicate effectiveness of professional development opportunities.

Tasks	Std	Start Date	End Date	Responsible Parties	Resources
Implement and evaluate updated assessment process.	I.B.5. I.B.8.	Jan 2020	Dec 2020	Department/Unit/ Program Faculty and Staff, Assessment Coordinator, SLO Assessment Committee, Assessment Coaches (All key stakeholders)	The College anticipates no additional resources needed to meet this task.

				should have the opportunity to provide input.)	
Implement and evaluate updated Taskstream process and usage.	I.B.8. **YEAR 3 FOCUS: Close the Loop (January-December 2021)**

**Desired Outcome:** Close the loop via monitoring and modification of changes made in 2019 and 2020 to improve assessment of SLOs and SAOs.

**Action Steps:**

- Evaluate the overall progress made in all the areas of focus regarding SLO and SAO assessment in 2019 and 2020.
- Make appropriate closing the loop changes based on completed analyses, including campus feedback on the SLO and SAO assessment and Taskstream processes, mapping of SLOs and SAOs to ILOs and General Education Outcomes, Taskstream queries and reports, and professional development opportunities.
- Plan for implementation and evaluation of improvements/changes for 2022.

**Assessment:**

- Completed comprehensive evaluation report on the overall progress and effectiveness of the actions and changes implemented in 2019 and 2020 with recommendations of improvement and a detailed plan for next steps.

Tasks	Std	Start Date	End Date	Responsible Parties	Resources

Prepare and submit final evaluation report, including an evaluation of the achievement of the 2020 action steps and next steps.	I.B.4. I.B.7.	Nov 2021	End of Dec 2021	Assessment Coordinator	The College anticipates no additional resources needed to meet this task.

## Quality Focus Essay: Engagement

ACTION PROJECT: Increase Engagement for Student Success						
YEAR 1 FOCUS: Faculty/lecturers and Staff Engagement for Student Success (January-December 2019)						
<p><b>Desired Outcomes:</b> Through professional development for faculty/lecturers and staff, support for innovations focused on student success, and collaboration within and across departments, units, programs, and authorized governance organizations (AGOs), the College will increase</p> <ul style="list-style-type: none"> <li>● course completion for all students</li> <li>● fall-to-spring persistence</li> </ul> <p>Specific strategies will focus on student effort such as students’ use of learning and student support services and resources, course preparation, selection of career pathways; and development of two-year academic plans.</p>						
<p><b>Action Step(s):</b></p> <ul style="list-style-type: none"> <li>● Refine and implement updated Student Success Pathway (SSP) plans.</li> <li>● Monitor and record progress of SSP plans and make improvements as needed.</li> <li>● Submit end-of-year SSP summary report, including an evaluation of outcomes achieved.</li> <li>● Complete SSP executive summary (including an overall evaluation of outcomes achieved), share with campus community, and obtain feedback for improvements and next steps.</li> <li>● Track student use of learning and student support services and resources.</li> <li>● Investigate ways in which improvements in career pathway selection and development of two-year academic plans may be measured on an annual basis.</li> </ul>						
<p><b>Assessment of Outcomes:</b></p> <ul style="list-style-type: none"> <li>● Compare 2019 with 2018 Institutional-set Standards/Performance Funding Measures to determine if stated desired outcomes were achieved.</li> <li>● Completed SSPs.</li> <li>● Completed SSP Progress Reports.</li> <li>● Completed and detailed summary report on the effectiveness of the strategies, including an evaluation of the outcomes achieved.</li> <li>● Completed SSP executive summary based on campus-wide feedback with recommendations for improvements and next steps.</li> <li>● Measuring student use of learning and student support services and resources.</li> </ul>						
Tasks	Std	Start	End	Responsible	Resources	

		Date	Date	Parties	
Schedule meetings to discuss and generate specific strategies to collaborate across departments, units, programs, and authorized governance organizations (AGOs), action steps, and assessment methods needed to meet stated desired outcomes.	I.B.7.	Jan 2019	Feb 2019	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators (All key stakeholders, should have the opportunity to provide input.)	Time, Location (People, Tech, Money or Physical)
Determine resources needed, submit budget request proposal, and report on status of request.	III.A. III.B. III.C. III.D.	Jan 2019	Feb 2019	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators (All key stakeholders should have the opportunity to provide input.)	Resources will be determined by each department, program, unit, or authorized governance organization.
Include specific student engagement strategies, action steps and assessment methods, along with resources needed, individuals responsible, and timeline in SSPs.	IIC.2. II.C.5.	Jan 2019	Feb 2019	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators	Time
Submit completed SSPs to appropriate Administrator and Student Success Coordinator.	II.C.2. II.C.5.		End of Feb 2019	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators	Time
Monitor and provide three written reports, every 4 months, on the progress	I.B.4. I.B.5. I.B.7.	Progress Rpt #1: Mar 2019	Progress Rpt #1: Jun 2019	Department Chairs, Program/Discipline Coordinators, Unit	Time

of SSPs, effectiveness of strategies, and improvements/ changes made.		Progress Rpt #2: Jul 2019 Progress Rpt #3: Oct 2019	Progress Rpt #2: Sep 2019 Progress Rpt #3: Dec 2019	Heads, AGO Chairs, & Administrators (All key stakeholders should have the opportunity to provide input.)	
Prepare and submit final summary report, including an evaluation of the achievement of the stated desired outcomes.	I.B.4. I.B.5. I.B.7.		End of Dec 2019	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators (All key stakeholders should have the opportunity to provide input.)	Time
Complete an executive summary of SSPs, progress reports, and the overall evaluation of the achievement of the stated desired outcomes in comparison to 2018 results.	I.B.4. I.B.5. I.B.7., I.B.8. I.C.3.		Jan 2020	Student Success Coordinator (in collaboration with Administration, Office of Institutional Effectiveness, and other key stakeholders.)	The College anticipates no additional resources needed to meet this task.
Hold a forum to share executive summary with campus community, to discuss next steps, and to provide feedback for improvements to the SSPs for 2020.	I.B.8. I.C.3.		Jan 2020	Student Success Coordinator (in collaboration with Administration, and other key stakeholders.)	Time, Location

**YEAR 2 : Student Engagement for Student Success (January-December 2020)**

**Desired Outcomes:**

- Through the implementation of specific student engagement strategies, the College will increase the annual number of (a) certificates and degrees for all students; (b) student transfers within and outside of the UH system; (c) certificates and degrees for Native Hawaiian students; (d) certificates and degrees by Pell grant recipients; and (e) STEM certificates and degrees.

**Desired Outcomes (Continuation of YEAR 1):**

Through collaboration within and across departments, units, programs, and authorized governance organizations (AGOs), the College will increase:

- course completion for all students
- fall to spring persistence

Specific strategies will focus on areas such as (a) the use of learning and student support services and resources, (b) course preparation, (b) selection of career pathways, (c) development of two-year academic plans, (d) student success professional development for faculty/lecturers and staff, (e) innovations in departments, units, and programs focused student success, or (f) other areas.

**Action Step(s):**

- Continue implementation, monitoring, and assessment of strategies identified in YEAR 1.
- Develop and implement Student Success Pathway Plans (SSPs) for YEAR 2.
- Monitor and record progress of SSPs, and make improvements as needed.
- Submit end-of-year SSP summary reports, including an evaluation of outcomes achieved.
- Complete SSP executive summary (including an overall evaluation of outcomes achieved), share with campus community, and obtain feedback for improvements and next steps.
- Track student use of learning and student support services and resources.

**Assessment of Outcomes:**

- Compare 2018 & 2019 Institutional Set Standards/Performance Funding Measures results to YEAR 2 (2020) results.
- Compare 2018 CCSSE results to the 2020 CCSSE results.
- (Continuation of YEAR 1 Outcomes) Compare YEAR 1 results to YEAR 2 results to determine if stated desired outcomes were achieved.
- Completed SSPs.

- Completed SSP Progress Reports.
- Completed and detailed summary report on the effectiveness of the strategies, including an evaluation of the outcomes achieved.
- Completed SSP executive summary based on campus-wide feedback with recommendations for improvements and next steps.
- (Continuation of YEAR 1 Outcomes) Compare YEAR 1 results to YEAR 2 results to determine if stated desired outcomes were achieved.
- Measuring student use of learning and student support services and resources.

Tasks	Std	Start Date	End Date	Responsible Parties	Resources
Plan and decide on how to continue the implementation, monitoring, and assessment of strategies in YEAR 1.	I.B.7.	Dec 2019	Jan 2020	Administration	The College anticipates no additional resources needed to meet this task.
Continue to implement, monitor, and assess faculty/lecturers-staff collaborative strategies identified in YEAR 1.	II.A.4. II.A.5.	Jan 2020	Dec 2020	Department Chairs, Program/Discipline Coordinators, Unit Heads, AGO Chairs, & Administrators (All key stakeholders should have the opportunity to provide input.)	Resources will be determined based on assessment of results in YEAR 1.
Include improvements to the SSPs based on feedback from YEAR 1 forum.	II.A.16	Jan 2020	Jan 2020	Student Success Coordinator (in collaboration with Administration)	The College anticipates no additional resources needed to meet this task.
Schedule meetings to discuss and generate specific student engagement strategies, action steps, and assessment methods needed to meet stated desired outcomes.	II.C.1. II.C.2. Hold a campus/community-wide forum to share status College's 2022-2027 Strategic Plan and to discuss next steps for finalization.	I.B.8. I.C.3.	Jan 2022	Jan 2022	OFIE, Administration	Time, Location

## Changes and Plans During the Self-Evaluation

Change, Improvement and Innovation	Standard	College Leads	Completion Date	Outcome
<b>1. Increased Institutional Effectiveness</b>				
<b>a. Improved Program Review Processes</b>				
Conducted Annual Report of Program Data (ARPDs) Meta-evaluation of Processes	I.B.7., I.B.9.	OFIE, VCAA	Spring 2017, fall 2018	Used rubric analysis to improve program review processes.
Revised ARF budgeting flowchart to incorporate SSP	I.B.7., III.A., B, C, D	VCAS	Fall 2017	Improved connectivity of funding to resource allocation process
Revised campus climate survey	I.B.7., I.B.9.; IV.C	OFIE, CAC	Spring 2017	Targeted questions for improvement to governance, planning and instructional service areas
Increased training in use of CCSSE data	I.B.1., I.B.5, I.B.6., I.C.1.	OFIE, Chancellor's Office, Office of Student Affairs, Student Success Coordinator	2016-2018	More informed understanding of student engagement and ways to improve student achievement

2. Improved Governance Processes				
Evaluated, revised, and formalized decision making flow chart	IV.A.2., IV.A.3., 7	CAC	Summer 2017, fall 2017	Formalization and documentation of decision flow, including role of authorized governance organizations, for major college decisions
Updated governance policy	IV.A.2., IV.A.3., 7	CAC	Summer 2017	Memorialized Decision Processes
Created/updated governance body websites	IB.8, 9.; IV.A.2., 7	CAC	Summer 2017	Improvement of communication within college
Annual calendar for policy review	I.B.8, 9.; IV.A.2., 7	CAC	Summer 2017	Improved timelines and communication
Revised CAC Charter	IV.A.2., 7	CAC	Summer 2017	Clarified mission and purpose
Created policy on how college policies are created and approved	I.B.7. IV.A.3.	CAC	Fall 2017	Process of establishing policy is transparent and campus constituents are more clear about their roles in creating policies
3. Improved Student Learning Analysis				
Held Assessment Colloquia	I.A.2.; II.A., II.C.2.	SLO Coaches, Chancellor's Office	2017-2018	Improved dialogue about learning results

KRSP - Kapiolani Research Scholars Project (pilots)	I.A.2.; II.A., II.C.2.	SLO Coaches, Chancellor's Office	2017-2018	Provided alternative venues and methods of assessment
Revised ILOs	I.A.2.; II.A., II.C.2.	Gen Ed Board, CAC, VCAA's Office, Chancellor's Office	2017-2018	Revised and approved institutional learning expectations
<b>4. Improved Distance Education</b>				
Development and implementation of DE Plan	II.A.	DE Committee	2017-2018	Clarified role of distance education at the College and implemented goals for improvement
<b>5. Improved Communications</b>				
Increased channels of communication between Chancellor's Office and campus	IV.B.6.	Chancellor's Office	2017-2018	Increased access to Chancellor.
Enhanced program accreditation web page	I.C.13.	VCAA	2017-2018	Added contact information and accreditation status information
Created policy web page for main website and intranet	I.B.7., I.C.7., I.C.8.,	Chancellor's Office	2017-2018	Important policies are easier to find.
Instituted automatic enrollment for faculty staff in campus bulletin	IV.A.6., IV.B.6.	Chancellor's Office	2017-2018	Faculty and staff automatically receive notices of news and events. Opt-out option is available if needed.
<b>6. Improved Policies and Procedures</b>				

Developed facilities management policy	I.B.7., I.B.9., III.B.	CAC	2017-2018	More transparency in management of facilities
Revised and documented procedures for managing position vacancies	I.B.7., I.B.9., III.A.7., III.A.9., III.A.11., IV.A.3.	CAC	2017-2018	Improved management of position vacancies.
Developed policy addressing animals on campus	I.B.7.	CAC	2017-2018	Faculty and staff have more clarity on managing the presence of service and comfort animals.
<b>7. Increased professional development in accreditation</b>				
Supported training and site visits for campus personnel	I.C.12., IV.B.4.	Chancellor's Office	2016-2018	Improved awareness of accreditation.

### **Additional improvements:**

#### Technology

- Increased transparency with college Technology Plans starting 2013
- Developed procedures for centralized information technology management (e.g. annual technology budget)

#### Assessment

- Purchased the assessment management system Taskstream in 2014 (now Watermark)
- Created a position, Institutional Assessment Coordinator

#### Planning and Resource Allocation

- Established KOP 1.111, Planning and Assessment Integration with Resource Allocation (PAIR) process and subsequent improvements to process
- Established KOP 1.112, Participation in College Decision-Making Processes
- Developed a survey for five year budgets.
- Student Success
  - Established the Queen Kapiolani Student Success Council
  - Developed the Student Success Pathways (SSP)
  - Tied SSP to mission and strategic plan
  - Tied SSP to planning & resource allocation
  - Established Lamaku Tutoring center and worked to standardize and coordinate tutoring across campus

- Developed an enrollment management plan
- Developed a sustainability plan

#### Instruction

- Improved developmental education with co-requisite process and math acceleration
- Institutionalized the Undergraduate Research Experience
- Created new programs: school health assistant, adult residential care home operator
- Established agreements for international internships for Meiji and Meikai University in hospitality in Hawai'i

#### Office of Continuing Education and Training services

- Created new programs: Health Education Non-Credit program and culinary workforce initiatives
- Utilized TAAACCT grants, Perkins grants.
- Offered HINET, SNAP Employment and Training Program
- Developed apprenticeship programs in optometry, community health, pharmacy, and culinary

#### Human Resources

- Increased professional development funding

#### Distance Education

- Developed a DE plan
- Appointed a DE interim coordinator
- Developed a formal professional development program, TOPP, and made it mandatory for faculty new to online instruction
- Developed a program to provide online skills training for students
- Allocated a full time dedicated online counselor

#### Communications

- Reworked the website
- Developed a mobile app for students
- Developed a new intranet, Ohana

#### Student Services

- Established a Title IX program and services
  - Developed a student of concern reporting system
  - Adopted Maxient online system for managing cases for students of concern
- Established a mental health counselor position and hired a mental health counselor

#### Facilities

- Completed phase one of the Culinary Institute of the Pacific - new construction
- Installed new internet switches throughout campus
- Updated classrooms with new equipment
- Renovated buildings: Lama, Mokihana, Naio, Manono, Manele, Iliahi, Ohia, Ilima, Kopiko learning center, Kopiko courtyard, Kopiko storage, STEM center

#### Security

- Increased full-time personnel staffing
- Conducted two active shooter drills
- Provided training for administrators - National Incident Management System training International

## Future Changes and Plans for the Future

Change, Improvement and Innovation	Standard	College Leads	Completion Date	Outcome
1. Easier Accessibility of Information				
a. Information for the Public:				
Student Achievement Data	I.C.	OFIE, VCAA	Fall 2018	Student achievement data moved from OFIE to the College website
CCSSE Reports	I.C.	OFIE	Fall 2018	Move CCSSE data from OFIE to the College's website
Annual Report of Program Data (ARPDs)	I.C.	VCAA	Fall 2018	ARPDs link placed on the College's website
Comprehensive Program Review (CPRs)	I.C.	OFIE, VCAA	Fall 2018	CPRs moved from OFIE to the College's website
b. Information for the Students:				
Articulation Agreements	I.C.	VCAA	Fall 2018	Articulation agreements are moved to the College's website (Kapu, Kazama)
Information on how to Transfer	II.A.	A&S Dean, VCAA	Spring 2019	Transfer out information copied from the catalog to the College's website (Maida Kamber

				page and catalog - put in header?)
Information on the Process when Programs are Eliminated	II.A.	VCAA	Spring 2019	Information on the process when programs are eliminated is moved to the College's website
c. Information for the Faculty and Students:				
Making Syllabi Available	II.A.	Faculty Senate	Spring 2019	Develop a system to make syllabi more readily available to students
2. Syllabi Review and Revision (Form-Fillable Cover Page)				
	II.A.	Faculty Senate	Spring 2019	Standardize information on a cover page for syllabi adopted by faculty
3. Student Records – Archiving Certificates of Competency				
	II.C.	Health Programs, CELTT	Spring 2019	A system for archiving continuing education Certificates of Competency will be established.
4. Technology Support for Students				
	III.C.	FS DE Committee, CELTT	Spring 2019	A policy for student technology support will be created and implemented.
5. Participation in the Budget by all Constituents				

	III.D	VCAS	Fall 2018	An annual forum on the budget will be instituted.

## **A. Introduction**

### *Overview and History*

Kaua‘i Community College (KCC) was established in 1926 as a vocational school within the State of Hawai‘i Department of Education. It is the only public institution of higher education serving Kaua‘i County, which includes the islands of Kaua‘i and Ni‘ihau. In 1965, KCC became a comprehensive community college and was transferred to the University of Hawai‘i System as one of seven colleges in the UH Community College System.

Responsibilities within the system are defined in the functional maps of the College, University of Hawai‘i Community Colleges System, and the University of Hawai‘i System. This organizational structure and hierarchy has been in place since the last reaffirmation of accreditation cycle. The College is led by a Chancellor that oversees the five major units, which are headed by a Vice-Chancellor or Director who reports directly to the Chancellor. The Chancellor reports to the Vice President for Community Colleges and is a member of both the Council of Chancellors and the Council of Community College Chancellors.

KCC provides access to fifteen two-year associate-level terminal and transfer degrees, as well as twenty-four short-term certificates, and non-credit training programs, provided by the Office of Continuing Education and Training (OCET), that enable the College to respond flexibly and quickly to changing workforce needs.

In 1996, KCC was provided a University of Hawai‘i University Center, through Board of Regents Executive Policy 5.215, in response to the growing need for baccalaureate- and graduate-level education in the community. As a University Center, the College can broaden the educational opportunities of island-bound residents by supporting distance education baccalaureate and graduate programs from sister campuses. This allows residents to further their education without leaving the island.

Colleges receive a great deal of support from the UHCC System Office in terms of institutional research, marketing, fiscal, academic affairs, and overall administration. In addition, the UH System Office provides accounting, procurement, treasury, human resources, legal, risk management, IT, and other centralized system-wide support. The UHCC System Office has also established funding for enrollment growth, innovation, and specific initiatives, which is directed to individual campuses based on need and application. Community Colleges within the system are also encouraged to work together to develop programs to avoid duplication and increase articulation.

### *Programmatic Accreditation*

In addition to institutional accreditation by ACCJC, Western Association for Schools and Colleges (WASC), there are four academic programs with additional accreditation. Automotive Technology is accredited by the National Automotive Technicians Education Foundation, and was awarded reaffirmation of accreditation in 2018. The Culinary Arts program was reaccredited by the American Culinary Federation Education Foundation Accrediting Commission in 2017. The Nursing program was also reaccredited in 2017 by the Accreditation Commission for Education in Nursing. Medical Assisting was granted initial accreditation with the Commission on Accreditation of Allied Health Education Programs in 2018.

### Major Developments Since Last Comprehensive Review

Administration: There have been several changes in Executive Management positions since the last ISER. However, it is notable that many of these positions were held by the same person for nearly two or more decades. In 2012, Mr. Gary Nitta, Vice-Chancellor for Administrative Services, retired after 30 years in the position. An interim, Mr. Greg Enos, served as the interim Vice-Chancellor for Administrative Services for five months. Mr. Brandon Shimokawa was hired in 2013 and has been in the position since. He is a member of the Chancellor's Cabinet and oversees computer services, human resources, operations and maintenance, campus public safety, and the business office.

In 2015, Mr. Bruce Getzan, Director of the Office of Continuing Education and Training, retired after five years. He was replaced by an interim director, Mrs. Peggy Lake, after which Mr. Calvin Shirai became the Director in February 2016. He is a member of the Chancellor's Cabinet and oversees the Innovation Center, Testing Center, Performing Arts Center, international education, and non-credit programs.

In 2015, the Director of the University Center, Mrs. Ramona Kincaid, who retired after holding the position for 19 years. She was replaced by an interim director, Mrs. Colleen Ka'imina'auao, who later became the Director in August 2016, then the Director of Institutional Effectiveness and University Center in January 2017 with the reorganization of the College. Dr. Valerie Barko became the Director of Institutional Effectiveness and University Center in August 2017 after a resignation by Mrs. Ka'imina'auao. This position is a member of the Chancellor's Cabinet, serves as the College's Accreditation Liaison Officer, and oversees marketing, grants, institutional research, and the University Center.

In 2015, Mr. Earl Nishiguchi, Vice-Chancellor for Student Affairs, retired after 17 years in the position and was replaced by an interim vice-chancellor, Mr. Isaiah Ka'auwai. Dr. Margaret Sanchez became the Vice-Chancellor for Student Affairs in August 2017. This position serves on the Chancellor's Cabinet and oversees counseling and advising, financial aid, library services, tutoring, student success, student life, and admissions and records.

Degrees and Certificates: Kaua'i Community College has added a myriad new degrees and certificates since 2012. Our new degree programs include an Associate of Science in

Business; an Associate of Science degree in Creative Media Arts; an Associate in Arts in Hawaiian Studies; an Associate of Science degree in Natural Sciences with concentrations in biological sciences, engineering and physical sciences; and an Associate of Science degree in Plant Biology and Tropical Agriculture. We have added Certificates of Achievement in Automotive Green Technologies, Master Automobile Service Technology, Entrepreneurship, Management, and Computer Network Administrator and Security.

Construction and Grounds Projects: Since the 2012 Institutional Self-Evaluation Report, the College has secured capital funding in excess of \$24 million (M) to repair, maintain, and renovate its facilities; \$22.9M in State appropriations and \$1.4M in extramural funding. Notable projects that have already been completed include: renovations to the Learning Resource Center (LRC) of \$5.3M, \$2.9M for the 2,400 square foot Fine Arts Auditorium addition, and \$0.4M in federal TACCCT funds to renovate a storage facility into a classroom and laboratory to support our sustainability and agriculture programs. As of March 31, 2018 the only project currently in construction is the \$4.3M renovations of the Performing Arts Center (PAC). However, the College will begin construction on \$9.2M worth of projects within the next 12 months. These upcoming projects include: \$0.1M to install a second, dedicated flag pole for the Hawaii State Flag, \$0.4M for exterior repairs to the One-Stop Center (OSC), \$2.0M for the construction of a traditional Hawaiian underground teaching oven, \$2.5M to install a photovoltaic system, \$2.0M to install an additional chiller, \$1.7M to improve the A/C in the DKI Technology Center, and \$0.5M to bring the Cafeteria exhaust duct up to code. Additionally, the College expects to finalize its new long-range development plan this coming fall, which is estimated to cost \$0.3M.

Initiatives:

- Integrated Student Support: Development of workgroups that address student support needs including Completion First, Onboarding, and Retention. These workgroups focus on providing “just in time” communication. Examples include the math and English redesign, implementation of STAR GPS/Guided Pathways, and the regional 6-16 Initiative with Waimea schools.
- Sustainability: College focus on the campus footprint, curriculum, and partnering with the community. Both the System and the College are committed to sustainability. The System developed a [policy](#) and the campus developed a [plan](#) to implement the policy. A Sustainable Science Certificate is also available to students.
- Early College: Dual credit college classes taught at the three public high schools. These began and were expanded since the last reaffirmation of accreditation in 2012, and the College has begun offering a pattern of courses that leads to one of several Certificates of Competence (e.g., early childhood education, accounting, and hospitality and tourism) or an Academic Subject Certificate in mathematics.
- Innovation Center: This Center, which will be overseen by the Office of Continuing Education and Training, will support projects that are interdisciplinary, faculty-led, and address a community need while teaching relevant skillsets to students.

- Indigenous-serving Institution: The UH System has committed itself to being a leading indigenous-serving institution. In response, KCC developed a Native Hawaiian Advisory Council, comprised of Hawaiian Charter School Principals, Hawaiian-serving organizations, and campus staff that provide recommendations to the College on how to better serve its Native Hawaiian students. The College also has an internal Council, Makaloa, that reports to the College Council on Native Hawaiian issues.
- Wrap-around Student Services: This initiative was developed in collaboration with the UH Foundation to establish an account to accept donations to help address student hunger by providing students in-need with cafeteria meal vouchers along with a resource guide to campus and community services.

### *The Community We Serve*

Economic Snapshot: The 2016-2020 [Kaua‘i Economic Development Plan](#)/Comprehensive Economic Development Strategy report notes the following significant factors:

- Kaua‘i residents struggle with lower wages as compared to the state as a whole; annual self-sufficiency costs for selected family types (e.g., one adult, two adults, one adult and a preschool child, etc.) as of 2013 range from 11.3% to 31.7% higher than the rest of the state;
- Small businesses (e.g., 100 or fewer employees) employ more than 70% of all workers, and half of all business on Kaua‘i employ four or fewer workers;
- Tourism is the primary economic driver for Kaua‘i; the 2018 Tourism Strategic Plan Update includes career preparation for a skilled workforce, infrastructure upgrades, and increasing awareness of Hawaiian culture and sense of place;
- There is a major focus on boosting the economy by increasing other industry sectors beyond tourism (see below); and
- The current low employment rate (e.g., 1.7% in December 2017) makes it challenging for employers to find qualified workers.

In planning for future economic development, KCC and the county have identified six target clusters as priority areas for Kaua‘i, which collectively included approximately 30% of all private sector jobs in 2014. These include Food and Agriculture, Sustainable Technologies and Practices, Science and Technology, Health and Wellness, Sports and Recreation, and Arts and Culture. Kaua‘i Community College was a contributor to this plan and is a partner in helping achieve strategic goals that include:

- Building, attracting, and retaining a 21<sup>st</sup> century workforce: This aligns with KCC’s strategic goal to provide 21<sup>st</sup> century technology in programs and the College offers Early College STEM courses at high schools;

- Encourage innovation and the building of small, medium, and large businesses and organizations: KCC has expanded the Business Education program, Go Farm partnership, and offers continuing education workshops; and
- Achieve greater food self-sufficiency: The Kaua‘i Economic Development Board has a food production and education center as their top priority, and is partnering with KCC to locate this facility on-campus. The building date remains uncertain.

The 2017 [Kaua‘i County General Plan](#) identifies Kaua‘i Community College as a partner in providing the capacity for economic growth. This will be done by providing “access to quality education and training to not only expand the county’s workforce but also to facilitate growth in emerging industries. The County has recognized KCC as an education center, which is reflected in the County’s recent addition of a new University zoning designation.

Tourism, agriculture, and small businesses were cited as the three areas of growth for the County. KCC is helping the County meet the agriculture goal of [preparing youth for future careers in diversified agriculture](#) by providing Early College at Department of Education high schools, offering a Plant Biology and Tropical Agriculture Certificate, and collaborating with the Go Farm initiative. The College also offers a course in Entrepreneurship.

#### Geographic Location and Demographic Data

Geographically, the College is isolated, and serves the entire county of Kaua‘i, which includes the islands of Kaua‘i and Ni‘ihau. Kaua‘i is the northernmost island of the eight major Hawaiian islands and is separated from Honolulu, the capital and main population and business center of the state, by 100 miles of the Pacific Ocean. Travel to any of the other islands is primarily by air. Ni‘ihau is a privately owned island, which is accessible only by barge and helicopter. It is home to the state’s largest concentration of people who learned Hawaiian as their first language.

According to the 2010 Census, the county has a population of 67,091 with 22.7 percent 18 years of age and under and a median age of 41.3. Of persons 25 and over, only 20.2 percent have a bachelor’s degree compared to a state average of 29.5 percent. There are 16 public schools, six public charter schools with a focus on Native Hawaiian language and culture, and seven private schools. The county also has the highest proportion (11.1 percent) of persons aged 25 and older who do not have a high school education.

#### *Kaua‘i County Ethnicity Data from the 2010 US Census.*

White alone	33.0%
Black or African American alone	0.4%
American Indian and Alaska Native alone	0.4%
Asian alone	31.3%
Native Hawaiian and Other Pacific Islander alone	9.0%
Two or More Races	24.9%
Hispanic or Latino (included in categories above)	9.4%

The US Census Bureau Quickfacts for Kaua‘i County estimates a 2017 population of 72,159 people. The percentages of the main ethnic categories remain relatively stable, with the exception of Hispanic or Latino, which is estimated to experience a 1.6% increase.

*Kaua‘i County Ethnicity Estimates for 2017 from the US Census Quickbooks.*

White alone	33.3%
Black or African American alone	0.6%
American Indian and Alaska Native alone	0.5%
Asian alone	31.4%
Native Hawaiian and Other Pacific Islander alone	9.1%
Two or More Races	25.0%
Hispanic or Latino (included in categories above)	11.0%

*Student Enrollment Trends*

The College’s fall total enrollment peaked in 2013, and has been declining since. Conversely, fall enrollment of Native Hawaiian students peaked a year earlier, but has been increasing since 2015.

*Total and Native Hawaiian Enrollment Trends at Kaua‘i Community College from 2012-2017.*

Fall Term	2012	2013	2014	2015	2016	2017
Total Enrollment	1,495	1,530	1,424	1,401	1,401	1,346
Native Hawaiian Enrollment	476	473	435	409	437	441

As noted above, unemployment rates in Kaua‘i County are low, and the Bureau of Labor Statistics reports an annual decline from 2012-2017 (7.3, 5.6, 4.8, 4.0, 3.3, and 2.6, respectively). The overall trend at the College has been declining full-time enrollment and increasing part-time enrollment, which has generally been attributed to the County’s low when employment rates. This is also reflected in SSH trends, which has gone from a high of 24,810 in 2014 to 20,939 in 2017.

*Full-time and Part-time Fall Enrollment Trends at Kaua‘i Community College from 2012-2017.*

Fall Term	2012	2013	2014	2015	2016	2017
Full-time	571	574	546	484	421	361
Part-time	924	956	878	917	980	985

*Age Distribution*

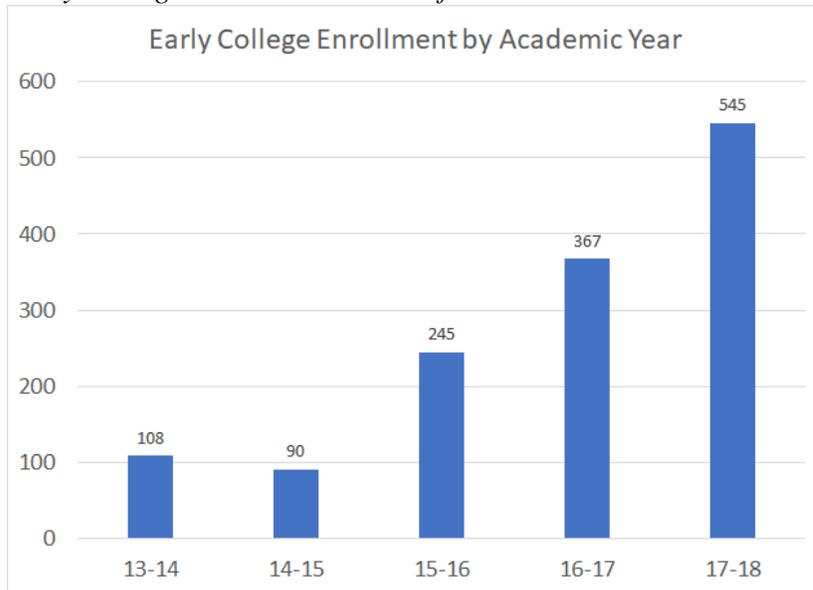

Over the past six years, the greatest change in the age distribution of students has been in the under 18 years of age category. Students in this category have doubled in enrollment at the College since 2012, a direct result of the increase in Early College courses offered at the high

schools. Conversely, there has been a decline in working aged adult enrollment, since the enrollment peak in 2014. As noted above, this is likely correlated with the decline in unemployment rates in the county.

*Age Distribution of Students at Kaua‘i Community College from 2012-2017.*

Fall Term	2012	2013	2014	2015	2016	2017
60 or older	3%	3%	2%	2%	2%	2%
35-59	16%	17%	18%	14%	11%	11%
30-34	6%	7%	7%	7%	6%	5%
25-29	11%	12%	13%	10%	10%	11%
22-24	12%	12%	13%	12%	10%	9%
20-21	16%	14%	15%	13%	14%	15%
18-19	26%	25%	26%	27%	25%	26%
Under 18	10%	10%	7%	14%	21%	20%

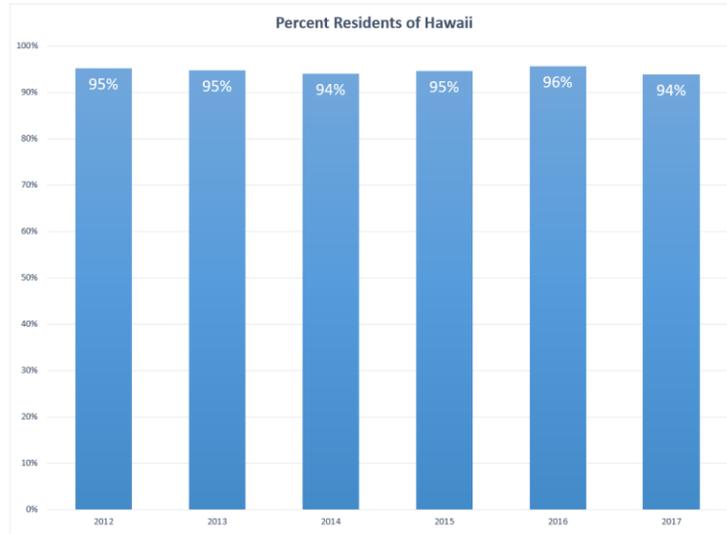

*Early College Enrollment Trends from Fall 2014 – Fall 2017.*

### Local Address

Students at Kaua‘i Community College are predominately residents of the state of Hawai‘i, based on fall enrollment statistics. Of those that are not residents, less than 3.5% paid out-of-state tuition in 2017 because of resident exemptions such as the Hawaiian or Military Exemption. Over the past six years, student geographic location trends have remained consistent, with the majority of students residing in Kawaihau (Kapa‘a area), followed by Līhu‘e, Koloa, and Waimea.

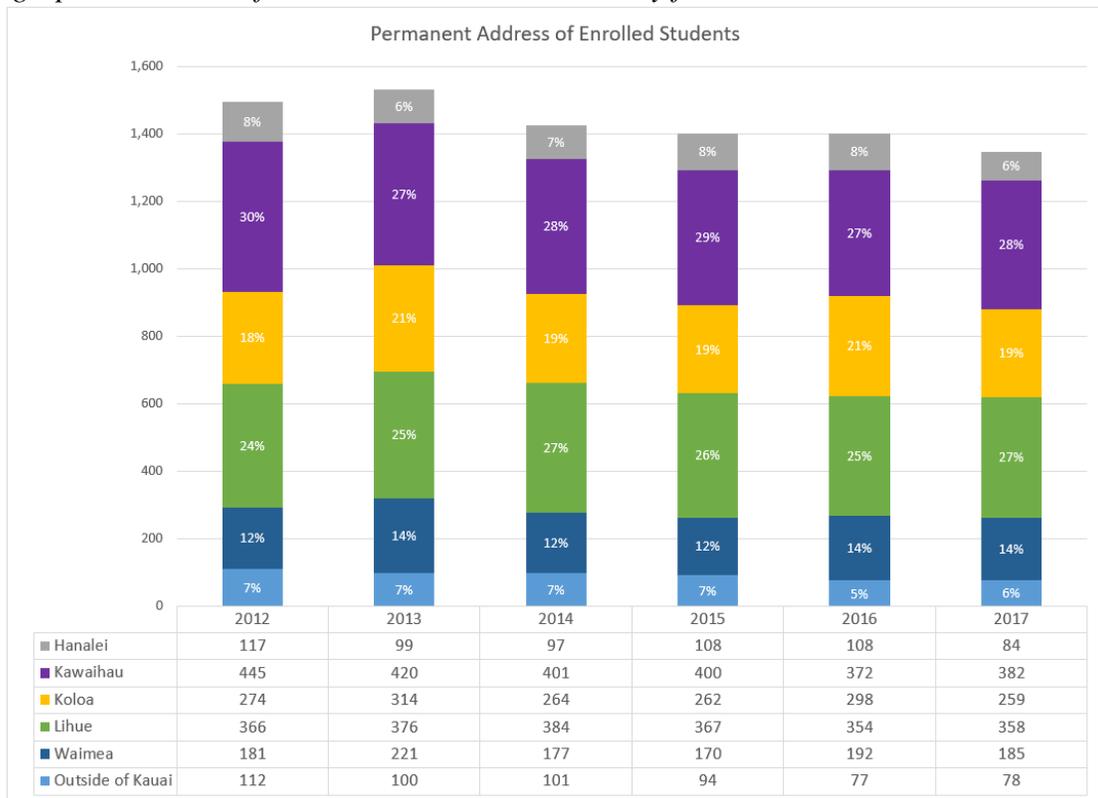

*Residency Status of Students Enrolled each Fall at Kaua'i Community College from 2012-2017.*

*Fall Enrollment by Residency Status of Students at Kaua'i Community College from 2012-2017.*

Tuition	Resident Status	2012	2013	2014	2015	2016	2017
Resident	Resident	1,422	1,449	1,339	1,325	1,339	1,263
	Converted Resident	12	10	21	27	16	18
	Faculty/Staff Exemption	2	2	1	1	2	2
	Hawaiian Exemption	13	12	5	1	2	5
	National Guard/Reserve Exemption				1		
	Military Exemption	2	3	4	5	3	2

*Geographic Location of Students within Kaua‘i County from 2012-2017.*

For the past five years, more female students (58-60%) have enrolled than male students. Notably, the majority of students registering for distance education courses have also been predominately female, as the five-year average is 74%.

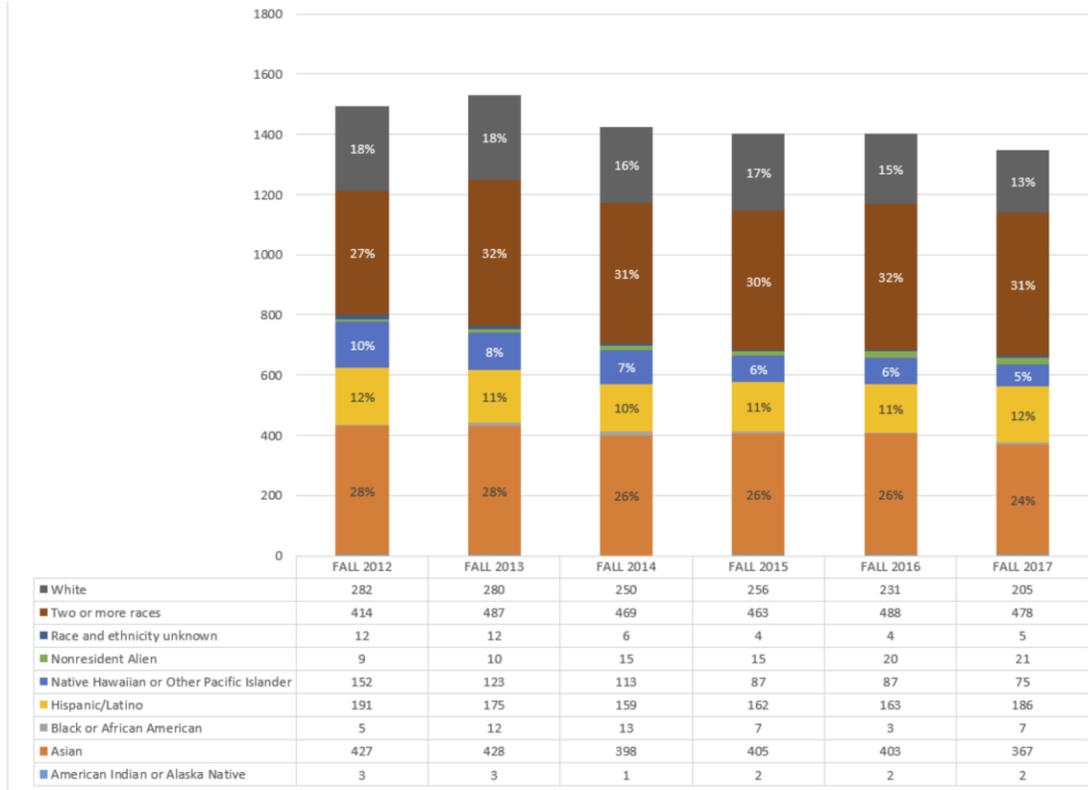

*Gender of Students Enrolled at Kaua‘i Community College from 2013-2017.*

	FALL 2013	SPRING 2014	FALL 2014	SPRING 2015	FALL 2015	SPRING 2016	FALL 2016	SPRING 2017	FALL 2017
Female	915	834	856	758	822	735	817	752	793
Male	615	533	557	524	526	446	521	437	451
Not Reported			11	10	53	43	63	45	102
Grand Total	1,530	1,367	1,424	1,292	1,401	1,224	1,401	1,234	1,346

Ethnicity

Ethnicity at the College is tracked using both Integrated Postsecondary Data System (IPEDS) definitions and expanded University of Hawai‘i categories. Like community, there is not an ethnic majority and trends have remained relatively consistent since 2012, with the largest ethnic population being two or more races, followed by Asian, White, and Hispanic (IPEDS data).

*Ethnicity of Students at Kaua‘i Community College Based on IPEDS Definitions from 2012-2017.*

When examining the expanded ethnicity categories developed by the University of Hawai‘i System, the majority of students at Kaua‘i Community College are Native Hawaiian/part-Native Hawaiian, followed by Filipino, Caucasian, and two or more races.

Pell Status

Over a quarter of students enrolled at the College are classified as low-income and receive Pell support. However, the percentage of students receiving Pell assistance has been declining since 2013. This may be attributed to the declining unemployment rate in the state.

*Percentage of Students Receiving Pell Assistance at Kaua‘i Community College from 2012-2017.*

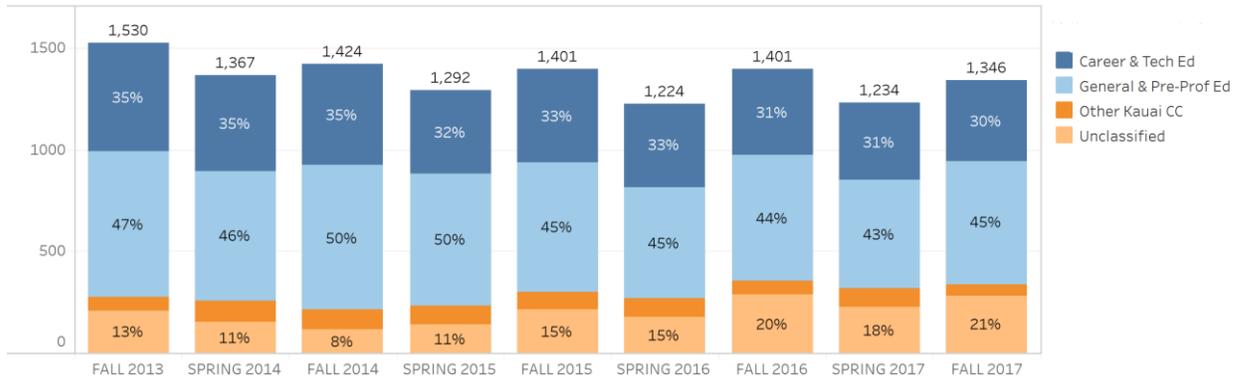

Status	2012	2013	2014	2015	2016	2017
Pell (%)	519 (35)	553 (36)	526 (37)	431 (31)	399 (28)	371 (28)
Not Pell (%)	976 (65)	977 (64)	898 (63)	970 (69)	1002 (72)	975 (72)

Degree Enrollments

The majority of students enrolling at the College have enrolled in general education and pre-professional education associate degree programs from 2013-2017 (Figure 9). In general, enrollments in career and technical education programs have remained relatively stable and

represent approximately one-third of degree-seeking students at the College. Unclassified students have increased over the past five years. Tactics such as high school career pathways as well as the implementation of guided pathways at the College have been implemented to reduce the number of non-degree seeking students.

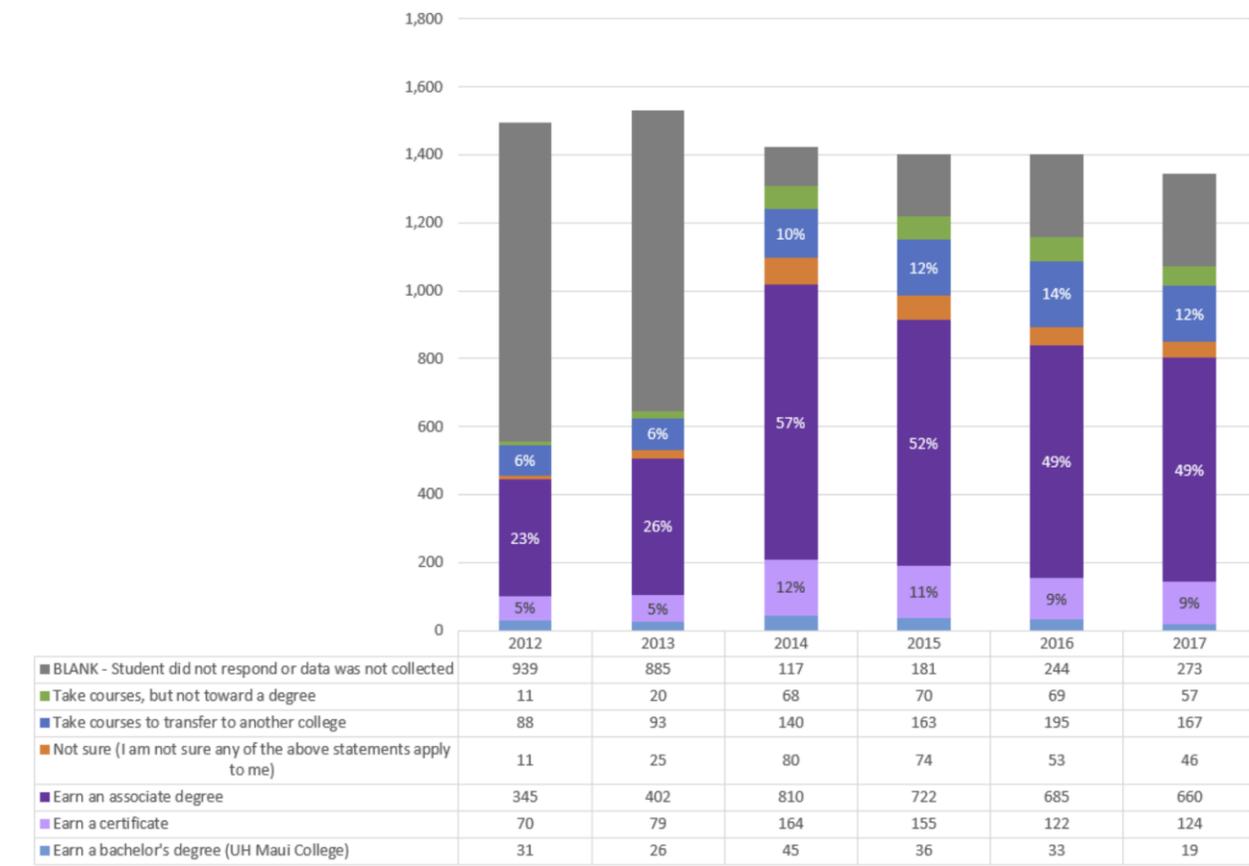

*Percentage of Students Enrolled in Degree Types at Kaua'i Community College from Fall 2012-Fall 2017.*

The majority of students enroll intending to complete a Certificate or Associate degree.

*Intention of Students Enrolling at Kaua'i Community College from 2012-2017.*

Immediate Educational Goal Reported by Student - Fall Semester

Fall-to-spring persistence rates have increased for first-time, part-time students, which mirrors the increase of part-time students at the College. The one-year retention rate of first-time, full-time students has remained close to 60% since 2012, and has increased for first-time, part-time students over the past two years.

*Fall-to-Spring Persistence Rates of Students at Kaua'i Community College from 2005-2016.*

	2005-8	2006-8	2007-8	2008-8	2009-8	2010-8	2011-8	2012-8	2013-8	2014-8	2015-8	2016-8

Student Preparedness for College

In general, the percentage of full-time students placing at developmental level(s), has been declining since the last 2012 self-study. This is likely a result of employing multiple placement measures and redesigning both math and English developmental courses and pathways at the College.

*Writing placement of new students from 2012-2017.*

*Math placement of new students from 2012-2017.*

**B. Student Achievement Data and Institution Set Standards**

The College identified seven Institution Set Standards, when the most current Strategic Plan was developed and implemented in 2015. These standards are:

1. Course Completion
2. Degrees and Certificates Awarded
3. Native Hawaiian Degrees and Certificates Awarded
4. Pell Recipient Degrees and Certificates Awarded
5. Transfer to Baccalaureate Institution
6. IPEDS Student Success Rate
7. Licensure and Certification Exam Success Rates
8. Job Placement Rate

Aspirational values were established by the UHCC System for all of the seven Community Colleges in UHCCP # 4.203. It is notable that the College has met or exceeded aspirational values in the first six standards since baseline data were established in 2015.

*Institution Set Standard Outcomes from 2012-2017. Benchmarks and Aspirational Values Were Developed in 2015 for the Years 2015-2021.*

**UHCCP 4.203 Institution Set Standards**

Kauai Community College - Institutional Research & Analysis

----- Annual Target

Standards seven and eight have been more difficult to track as results must be reported from external agencies or students. Job placement in CTE programs has been tracked using Perkins Core Indicator 4P1, whereas individual programs report their program licensure and certification exam pass rates in their Annual Review of Program Update.

### **C. Organization of the Self-Evaluation Process**

A chair for the self-study process (“Chair”) was chosen by the Chancellor in spring 2016. The chair met with the Accreditation Liaison Officer (ALO) and the Chancellor to outline an approach to the process and to generate a timeline of goals to meet.

The new approach was informed by an analysis of a campus-wide survey that was done in 2013, following the previous reaffirmation of accreditation for the College. The chair drafted a [summary](#) of lessons learned, which guided the development of the new approach.

Highlights of the approach included:

- The chair and ALO divided the accreditation Standards into nine themed areas and created a team to work on each one. This was done in order to reduce redundancy and to better align team members’ expertise to their assignments.
- Each team consisted of a lead, one or two writers, an administrator assigned to support the team, and a complement of members and subject matter experts. Leads were responsible for organizing the work of the team and communicating with the chair. Writers collected the evidence gathered by team members and drafted the initial response to the standards. The administrative support person helped in locating and prioritizing evidence, in addition to communicating recommendations to Cabinet on how the College could better align with the Standards.
- Each Friday of the 2016-2017 academic year, open meeting times were established to work on accreditation, discuss ACCJC Standards and Policies, and exchange ideas. These were coordinated and led by the ISER Chair and ALO.
- Time was set aside for accreditation among the scheduled Convocation Week activities during the past two academic years. These times were used for directed work on aspects of the self-study rather than on presentations. The goal was to keep the campus engaged and active rather than passively listening.
- A College Conversation was held in the One Stop Center in December 2017. Teams were stationed at tables and the campus community had the opportunity to read their evidence lists and provided input and additional evidence examples.
- Teams completed their work by December 2017, at which point the responses to the Standards were edited by the chair and the ALO. The edited draft was presented for comment by the campus, and teams met again in spring 2018 to review the edits and give their approval to the draft.

The University of Hawai‘i Community College System selected a writer for Standards IV.C and IV.D, since this information is nearly identical for all of the colleges within the System. Self-study chairs and ALOs from all of the colleges, including Kaua‘i CC, provided feedback to this writer throughout the drafting process for these standards. These standards have been revised and edited by the chair and ALO for style and perspective.

### **Team Assignments and Leadership Roles**

<b>Team</b>	<b>Lead</b>	<b>Writer</b>	<b>Administrator</b>	<b>STDS</b>
Distance Learning	Peggy Lake (Faculty-OCET Coordinator)	Julia Morgan (Faculty-Philosophy)	Colleen Ka'imina'auao  Valerie Barko (Director of IE and University Center)	I.C.7; II.A.7; support to II.B.1, II.C.1
Governance	Anne McKenna (Faculty-Librarian)	Mary Alexander (Faculty-English)	Helen Cox (Chancellor)	IV. A, IV. B

Teaching and Learning	Jeff Mexia (Faculty-English and PD Coordinator)	Eric San George (Faculty-English)	James Dire (VC for Academic Affairs)	I.C.9, 11; II.A; III.A.6
Facilities and Infrastructure	Calvin Shirai (Director of OCET)	Cheryl Stiglmeier (Faculty-OCET Coordinator)	Brandon Shimokawa (VC for Admin Services)	III.B; III.C
Human Resources and Professional Development	Sandra Magnussen (Faculty-Career Counseling)	Georgeanne Purvinis (Faculty-Electronics Technology)	Brandon Shimokawa (VC for Admin Services)	III.A: 2, 3, 4, 5, 8; III.C.4

## **Self-Study Timeline**

### **Fall 2016**

- Dec 2: 2:00 pm - 3:30 Core group meets
- Dec 9: 2:00 pm - 3:30 pm College Conversation in One Stop Center – update campus on progress, and gather feedback and input
- Late Dec: Identify all gap areas for action team work
- Dec/Jan: Begin writing draft

### **Spring 2017**

- Jan 6: Convocation - update on progress and working session
- Late Feb: Skeleton draft complete
- April: ACCJC Conference – Chair, ALO, and Institutional Researcher Attended
- May: Identify QFE topics and complete rough draft

### **Fall 2017**

- Aug: Convocation - update on progress  
Convocation Week: Team Meetings with Campus
- Aug–Sept: Evidence Meetings with Leads
- Sept: Writers’ Meetings (writers attend at least one)
- Oct: Leads Meet for Progress Report
- Oct 27: College Conversation: Thinking about QFE
- Nov 17: Leads Meet for Progress Report
- Dec 1: Team Draft of Self-Evaluation Report (with citations) Due
- Dec: Chair assembles work into a single document

### **Spring 2018**

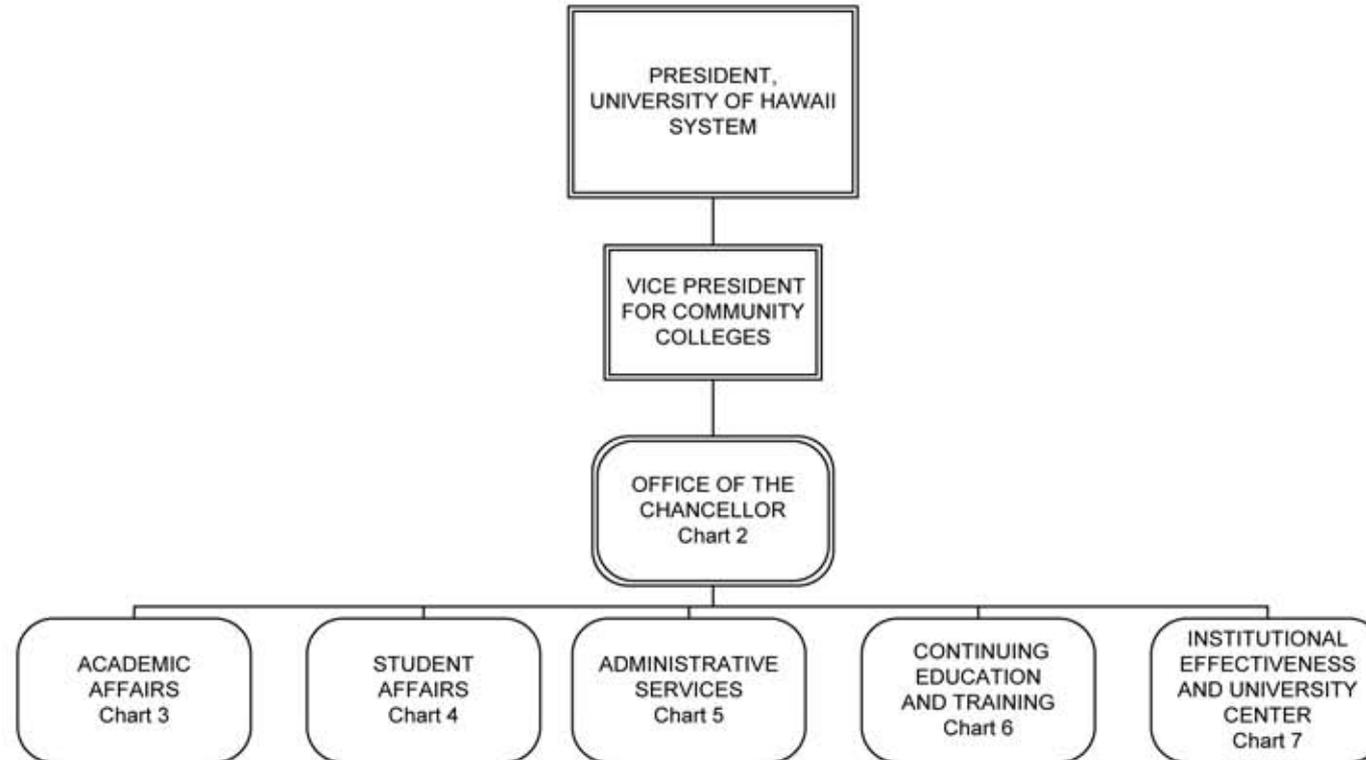

- Jan: Convocation - update on progress
- Jan 12: College Conversation: Choosing two QFE topics
- Jan-Feb 28: College-wide commenting on draft
- Mar–May 10: Editing and evidence linking
- May: Newspaper Article by ALO mentions opportunity for 3<sup>rd</sup> Party Comments
- May 11: Final Draft submitted to UHCC office and Board of Regents
- May 18: Chancellor and ALO present to Board of Regents Committee

### **Fall 2018**

- Aug: Convocation: Brief on site visit
- Aug: Meet with Student Government to discuss site visit
- Aug: Add link to 3<sup>rd</sup> Party Comments on homepage and advertise in newspaper
- Sep: College Conversation: Prep for site visit
- Oct: 15-18 ACCJC Site Visit

## **E. Certification of Continued Institutional Compliance with Eligibility Requirements**

Kaua‘i Community College began in 1926 as Kalaheo Vocational School. Governor John A. Burns signed the Hawai‘i Community College Act into law on April 23, 1964 through Act 39, which directed the University of Hawai‘i Board of Regents to develop and administer a University of Hawai‘i system of community colleges. The signing of Act 34 transferred Honolulu, Kapi‘olani, Kaua‘i and Maui technical schools from the State Department of Education to the University of Hawai‘i. The actual transfer took place in 1965. On July 1, 1966, the technical schools were renamed Kapi‘olani Community College, Honolulu Community College, Kaua‘i Community College and Maui Community College. The history of the beginning of the community college system is documented on the UHCC [website](#) and Act 39 was codified into law under [Hawai‘i Revised Statutes §304A-1101](#).

### *Operational Status*

Kaua‘i Community College is fully operational and has served an average of over 1750 students each year since our last accreditation self-study. A majority of these students have been or are [pursuing a degree or certificate](#).

### *Degrees*

All of the College’s credit offerings are required courses, distribution requirements, or elective courses for the degree and certificate programs it offers in 20 areas. In fall 2017, 45% of students had declared a major in the Liberal Arts transfer A.A. degree program, and 30% had declared a major in a career and technical education program (see degree enrollments section above). The remaining students are unclassified, but 32% of them are enrolled in Early College. Moreover, many of the unclassified students are residents taking advantage of cultural offerings for personal development, such as our performance music courses, ceramics, art or carpentry. All degree programs are listed in the [College Catalog](#).

### *Chief Executive Officer*

UH System [Policy 1.102](#) stipulates that the Chancellor of each college in the UH System has the responsibility for administration and operation of the college, including financial oversight. The Chancellor is appointed by the University of Hawai‘i Board of Regents with full-time responsibility to the College and has the requisite authority to administer board policies developed to ensure the quality and effectiveness of the institution. As chief executive officer for the College, the Chancellor reports to the University of Hawai‘i Vice President for the Community Colleges. The Chancellor of the College has responsibility and authority for the day-to-day management of the institution and implementation of board policies. Neither the President of the UH System nor any Chancellor of an individual campus

within the system may serve on the Board of Regents. Dr. Helen A. Cox has served as Chancellor since her appointment in August 2008.

### Financial Accountability

The University of Hawai‘i’s consolidated financial statements are prepared in accordance with Government Accounting Standards Board (GASB) principles, which establish standards for external financial reporting for public colleges and universities. [EP 8.204, University Audit](#) governs financial auditing within the University. The UH System undergoes an annual audit by an external auditor. Audit reports are posted on the University of Hawai‘i [Financial Reporting](#) website. This financial audit includes the annual A-133 audit required by the federal government.

## **F. Certification of Continued Institutional Compliance with Commission Policies and Federal Regulations**

### Policy on Rights and Responsibilities of the Commission and Member Institutions

The College participates in the development of the Eligibility Requirements, Accreditation Standards, and Commission policies and in the Commission’s periodic reviews both through its representation on the Accrediting Commission via the UHCC System and by sharing announcements and opportunities for feedback related to the ACCJC by the Chancellor and the ALO.

The ALO coordinates accreditation activities at the College, except when the College is preparing a self-evaluation for submittal to the ACCJC. Generally, the process of preparing the self-evaluation begins two years before it must be submitted, and the first step is for the Chancellor to select one or more self-evaluation chairs. The chair(s) are tasked with organizing the self-evaluation process to produce an accurate report based on broad participation across the College. The chair(s) are supported in this task by the ALO. For more information about the current self-evaluation process, see the Organization of the Self-Evaluation Process Section.

The College posts all reports, records, and correspondence related to its accreditation by ACCJC on its accreditation webpage. This page is located one click away from the College homepage. The accreditation page also includes a link to the ACCJC’s form for third party comment.

The College maintains hard-copy records concerning student grievances in different locations, depending on the nature of the grievance. If the grievance is non-academic, the file is maintained with the Office of Student Affairs. If the grievance is academic, the file is maintained with the Office of Academic Affairs. If the grievance warrants a [Title IX](#) or [discrimination](#) investigation, those records are maintained electronically with the system

office. The office of Student Affairs is currently in the process of purchasing a commercially available product, Maxient, to electronically maintain records.

*Policy on Institutional Degrees and Credits*

The College follows [UHCCP 5.228](#) which defines the credit hour as follows:

A. A credit hour is an amount of work represented in intended student learning outcomes and verified by evidence of student achievement. Reasonably approximates but is not less than:

1. Fifty minutes to one hour of class or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately 15 weeks for one semester or the equivalent amount of work over a different period of time.

OR

2. At least an equivalent amount of work for other academic activities such as distance education instruction (instruction delivered synchronously or asynchronously using one or more technologies that support regular and substantive interaction between students who are separated from the instructor), laboratory work, internships, practical, studio work and other work that earns academic credit.

B. Across the UHCC System, a credit is defined as 45 hours of direct and indirect instructional, student work within a standard semester or equivalent term of study (accelerated terms, summer terms, etc.). In general, this reflects the expected work a student, prepared for the class, would need to achieve the intended student learning outcomes.

This definition of credit hour is consistent with the common notion of Carnegie Unit or Carnegie Credit in higher education in the United States, and complies with the federal [34 CFR 600.2](#) definition.

By College policy ([KCCP 4-15](#)), credit is awarded based on faculty-established student learning outcomes.

[UHCCP 5.203](#) requires that all associates degree programs consist of at least 60 credit hours of coursework. Additionally, certificate of achievement programs must consist of at least 24 credit hours. The College does not offer any clock hour courses or programs. See Standards II.A.5 and II.A.9 for more detail.

### *Policy on Transfer of Credit*

The College's transfer of credit policies are clearly stated in the College Catalog and on the College's website. The College requires that transfer courses come from an accredited institution and that students submit official transcripts from the originating institution. The transfer of credit is done manually by the Admissions and Records office. The College does not utilize electronic transfer of credit.

In many cases, transfer and articulation agreements have already been determined for students' transfer courses, especially those from other UH institutions. The UH System maintains a [transfer database](#) that shows information for previously agreed-upon transfer and articulation agreements both within the system and with some common partner institutions. The information in this database is updated every 24 hours.

When students apply for transfer credit for courses that are not covered by prior agreements, the Admissions and Records office contacts faculty members in the course discipline to determine whether or not the course is substantially similar to a course offered by the College or meets the College's standards for elective credit(s) to be awarded. Generally, the College does not award program credit unless a transfer course is accepted as being substantially similar to a course in the program. The exception is for electives, which are accepted based on whether the course, as judged by the discipline faculty reviewer, meets the standard of college-level, based on its content and level of rigor.

Students are advised about transfer at new student orientation and at the mandatory counseling and advising session prior to enrolling in courses for the first time. These are in addition to information on transfer that is available on the College's website and in its College Catalog.

The UH and UHCC Systems have ongoing dialog about the transfer of students. There are several policies and programs that are used to smooth the transfer process for students, while maintaining standards of content and rigor throughout the system. See Standard II.A.10 for more details.

### *Policy on Distance Education and Correspondence Education*

The Kaua'i Community College Distance Education Handbook (KCCDEH) and UH [EP 5.204](#) (Distance and Online Learning) states how distance education (DE) is defined and how courses are classified. The [KCCDEH](#) states the two types of distance education courses that require an instructor certification; fully online courses and hybrid courses.

Through the joint effort of the Office of the Vice Chancellor for Academic Affairs (OVCAA), the Distance Learning Committee, the Professional Development Coordinator,

academic division chairs, and program coordinators there is an accurate and consistent application of the DE policies, procedures, and best practices.

The handbook along with the instructor certification and evaluation processes outline best practices for DE and ensures that faculty who are teaching or planning to teach online are providing substantive interaction with their students. Faculty are required to post a welcome announcement and check-in assignment by midnight of the first day of instruction. Both are designed to encourage student engagement during the early stages of a class and also to inform faculty of students who may need intervention.

The Distance Learning Teaching Certification process is outlined in the handbook and requires that all certified instructors read and review the “Before You Teach Online” packet provided by the Professional Development Coordinator; complete the Distance Education Certification Application; and review the Professional Development Coordinator’s recommendation(s) and complete any follow-up activities. Once a faculty member is certified, he or she must have his or her first distance course taught at the College evaluated by an approved evaluator and receive a rating of “Satisfactory” or better; have at least one distance course evaluated every two academic years by an approved peer evaluator and receive a rating of “Satisfactory” or better; and participate in one DE-related professional development activity per academic year.

Students enrolled in DE courses are encouraged to attend a face-to-face or online orientation. Faculty are also encouraged to provide students with instructions on accessing course materials and navigating the course site as well as providing links to online tutorials, FAQs, and contact information for any service used in a class.

To verify the identity of any student who participates in DE, instructors are required to have their students log-in to UH’s single-sign-on system (which is typically done by having students log-in to Lulima or Google Classroom) to access course material. Additionally, faculty are encouraged to incorporate at least one proctored face-to-face activity at one of the campus testing centers available throughout the state.

The College and UH’s technology infrastructure is sufficient to sustain distance education. UH’s Information Technology Services provides the overall network infrastructure and the College’s Computer Services (CS) unit provides access to this infrastructure by providing faculty and students access to wired and wireless local-area network (LAN). CS also provides faculty and staff with desktop computers (and some laptops) with wired LAN connections for day-to-day use. This technology infrastructure also provides DE faculty reliable and sufficient network bandwidth to conduct their courses without major interruption or downtime.

In summary, the KCC Distance Education Handbook and EP 2.204 provide guidelines and policies to shape distance education at KCC. Currently, the institution does not offer correspondence education.

### *Policy on Representation of Accredited Status*

The College provides the required information about its accreditation status on a webpage that can be reached in one click from the College homepage. The required statement from section C of this policy is included, and no other statement about the institution's accredited status is given. This webpage also contains information on programmatic accreditation for the College's four externally accredited programs.

### *Policy on Student and Public Complaints against Institutions*

The College has student grievance policies and procedures for both [academic](#) and [non-academic](#) grievances, as outlined in Standard I.C.8. These are published in the College Catalog and on the College's website. The policies are reasonable, seeking for the grievance to be resolved amicably among the involved parties first. If that is not possible, the student may bring the grievance to progressive higher levels of the institution. When necessary, the College convenes a review panel of appropriate composition (students, employees, and administrators) to hear all sides of the case and recommend a resolution. If the grievance warrants a Title IX or discrimination investigation, the UH system-wide policies, [EP 1.204](#) or [EP 1.202](#) are adhered to respectively.

### *Policy on Institution Advertising, Student Recruitment, and Representation of Accredited Status*

All advertisements, publications, and recruitments activities of the College are focused on its educational programs and services. The College strives to represent itself clearly and accurately in all communications to the public. To that end, the College has an Enrollment and Marketing Specialist and a Webmaster who review public-facing information about the College.

The College Catalog is updated annually and contains all of the information required by this policy. Page number references for the required elements can be found in Standard I.C.2, addressing ER 20, with the exception of "Faculty with degrees held and the conferring institution", which may be found on p. 181-184 of the 2018-2019 catalog. Although not required by this policy, information on degrees held by staff and administrators is also included on these pages. Where programs lead to licensure examinations for employment in the field, the Catalog refers to these requirements. This applies only to the Practical Nursing and Nursing programs, which both lead to licensure exams for a student to be employed as a licensed practical nurse (LPN) or registered nurse (RN), respectively.

Regarding student recruitment, the College does not take part in any of the "practices to avoid" listed in this policy. Students are recruited by the Enrollment and Marketing

Specialist or by trained academic advisors, generally as part of site visits to the three main public high schools on the island.

The College only offers scholarships based on specific criteria related to merit or financial need.

The College accurately depicts its accredited status in all communications, including on its website and in its Catalog.

*Policy on Contractual Relationships with Non-Regionally Accredited Organizations*

The College contracts with non-regionally accredited organizations for several minor services including a 24/7 tutoring service to supplement on-site tutoring services, some library databases and modules, and some facilities services. The College evaluates these services and assumes the responsibility for their quality. See Standard III for more information. Vital core operations are offered by the College itself, including instruction of all credit courses, admissions and records, financial aid, and student counseling and advising.

UH [EP 8.200](#) (Policy on Contracts and Signing Authority) follows the ACCJC Guidelines for Good Practice in Contracting with Non-Regionally Accredited Organizations as outlined in the ACCJC’s Policy on Contractual Relationships with Non-Regionally Accredited Organizations. The College has developed a Contract Review Form to ensure that contracts are reviewed for alignment with the College’s mission and goals by relevant stakeholders and administrators. The Chancellor has the sole authority to enter into certain external contracts and agreements on behalf of the College and will do so only upon the proper completion of the Contract Review Form. See Standard III.D.16 for details and for some additional examples of the College’s contractual agreements.

*Policy on Institutional Compliance with Title IV*

The College monitors student loan default rates annually by a three-year cohort.

<b>Cohort</b>	<b>Default Rate (by 3rd year)</b>
2010	12.1%
2011	21.2%
2012	25.9%
2013	26.5%
2014	17.0%
2015 (Draft)	21.8%

The Financial Aid Office took actions to reduce default rates after two consecutive years of exceeding a 25% default rate. See Standard III.D.15 for more information. In 2016, the Financial Aid Office responded to a UH System audit finding of two minor compliance issues related to Title IV, and the external auditor found the resulting corrective actions taken by the College to have adequately resolved the issues. The response to the finding was accepted as a viable resolution by the external auditor. See Standard III.D.8 for more information on this audit finding and the College's response.

Within the current accreditation cycle, the College has not had any negative action taken by the U.S. Department of Education regarding its compliance with Title IV requirements.

## **Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity**

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

### **I.A: Mission**

#### **I.A.1**

*The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. (ER 6)*

#### **Evidence of Meeting the Standard**

The Kaua'i Community College (KCC) mission serves our intended student population and demonstrates the College's commitment to student achievement by adhering to its mission when developing educational degrees and other credentials. The College's mission is broad and strives to "inspire, engage, and empower learners and educators to enrich our community and world." The mission is also presented in Hawaiian and refers to a Hawaiian proverb, to reflect the island's cultural heritage.

**"Kaua'i Community College is a kahua that inspires, engages, and empowers learners and educators to enrich our community and our world."**

Ke kū nei ke Kulanui Kaiāulu ma Kaua'i ma ke 'ano he kahua e  
ho'oulu, ho'ā, a ho'oikaika 'ia ai ka 'ike a me ka na'auao o nā  
kānaka a'o aku a'o mai no ka ho'owaiwai 'ana i ke kaiāulu a  
me ka honua.

**'O ke kahua ma mua, ma hope ke kūkulu.  
First comes the foundation, then comes the building.  
(‘Ōlelo No’eau, number 2459)**

Associated practices define the intended student population, types of degrees and other credentials, and commitment to student learning and achievement. Kaua'i Community College:

- Provides open access, affordable education;

- Offers Certificates of Competence, Achievement, and Academic Subjects; Associate in Applied Science, Science, and Arts Degrees;
- Welcomes and values diversity;
- Delivers educational opportunities on campus in small classes, in the community, internationally, and through distance learning;
- Provides programs that address workforce and community needs;
- Prepares and supports students individually and collectively to succeed in academic endeavors and engage in life-long learning;
- Encourages innovation and promotes sustainability while perpetuating the unique history and culture of Kaua‘i.

**Analysis and Evaluation**

The College’s mission describes its broad educational purposes, whereas the associated practices describe the intended student population, types of degrees and certificates offered, and its commitment to student learning and achievement. The college serves its diverse student population by providing a variety of degrees, certificates, and academic pathways. In addition, the college serves its community by offering non-credit training and personal enrichment classes to residents and employees of the island.

**I.A.2**

*The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.*

**Evidence of Meeting the Standard**

Each year, the college reviews performance in meeting mission practices using quantitative and qualitative data. Areas reviewed include affordability, diversity, educational opportunities, workforce alignment, and innovative learning.

<b>Mission Practice</b>	<b>Types of Data Examined</b>
Provides open access, affordable education	Adheres to the community college philosophy of open access and affordability; tuition for AY 17-18 is \$126 per credit (residents) and \$248 per credit (nonresidents)
Welcomes and values diversity	No ethnic majority among students; student clubs support students of different backgrounds and ethnicities; Institutional Set Standard #3 (Native Hawaiian Degrees and Certificates Awarded); Institutional Set Standard #4 (Pell Recipient Certificate and Degrees Awarded)

Delivers educational opportunities on campus in small classes, in the community, internationally, and through distance learning	Average credit class size is 14 students; continuing education class sizes average 10.6 over the last five years; international exchange programs for students; 44 distance learning courses (2016-2017); University Center supports 66 programs and certificates offered by UH universities via distance education; Institutional Set Standard #1 (Course Completion); Institutional Set Standard #2 (Degrees and Certificates Awarded)
Provides programs that address workforce and community needs	Offers 18 CTE programs and certificates; All CTE programs have an advisory board to help to identify community and career/labor market trends;
Prepares and supports students individually and collectively to succeed in academic endeavors and engage in lifelong learning	Academic student clubs; two dedicated academic advisors for Liberal Arts transfer students; CTE advisors assigned to each CTE division; dedicated staff to provide individualized support to students pursuing distance education certificates or degrees through the University Center; Institutional Set Standard #5 (Transfers to Baccalaureate Institutions); Institutional Set Standard #6 (IPEDS Student Success Rate)
Encourages innovation and promotes sustainability while perpetuating the unique history and culture of Kaua'i	Thirty Hawaiian Studies AA degree majors in 2016-2017; Polynesian Voyaging Academic Subject Certificate; eight courses in Hawaiian language and 15 in Hawaiian studies; Sustainability Committee, Sustainability Club, four Sustainable Science Management courses; six Plant Biology and Tropical Agriculture courses; College received a 2013 <a href="#">Climate Leadership Award</a> from Second Nature.

KCC conducts required convocations at the beginning of each semester. The Chancellor shares and explains performance data relating to campus strategic goals and how it connects to UH System [initiatives](#). College Conversations are periodically held to discuss pertinent topics based on shared information, such as the September 22, 2017 College Conversation titled “How Are We Serving Our Students Now and in the Future: [Part I Native Hawaiians](#).” These events serve as a forum for gathering suggestions and determining future actions for the campus, with the goal of meeting institutional priorities as defined by the College’s mission statement.

Further assessment of how well the college is meeting its mission is provided by the Vice President for Community Colleges (VPCC) each fall. Performance measures related to completion, diversity and system-defined subpopulations are presented and discussed via an open campus [meeting](#). Not only are KCC goals versus actual data shared but also results from each UHCC campus, which provides comparison measures.

[Institutional Set Standards](#) are tracked annually in reference to baseline and aspirational goals, which have been set by the UHCC System Office. Longitudinal results are posted on the Institutional Effectiveness [website](#). See Standard I.B.3. for further details on Institutional Set Standards.

### **Analysis and Evaluation**

The college reviews and discusses data related to mission practices throughout the academic year in various forums to guide institution priorities. In addition, the Mission guides strategic priorities. [Strategic Priorities](#) for 2018-2019 include increasing direct high school enrollments, distance education offerings, and transfer and job placement, in addition to decreasing cost and time to graduation. All of these align with Mission Practices (e.g., provide open access affordable education, align programs with workforce and community needs, and prepare students to succeed in academic endeavors and life-long learning).

### **I.A.3**

*The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.*

### **Evidence of Meeting the Standard**

The institution's mission is the foundation for programs and services and guides planning and decision making that fosters student achievement, as indicated by the Review of Established Programs [Policy](#). Program action plans must align with the mission and strategic priorities, as outlined in the Annual Program Review Update (APRU) [template](#). In addition, all programs undergo annual review and five-year program review processes to assure that programs and services are assessed and updated according to the mission and strategic priorities.

Each fall, College Council evaluates academic and support programs using a [rubric](#), which include requirements for aligning with mission and campus strategic goals, outcomes, and evidence. Scoring is ranked higher for prioritizing resource allocations if a program more closely meets the rubric criteria. Resource requests, which are supported with data, aim to fortify programs to improve student learning and achievement. Assessment of student learning is a component of program review, and program Student Learning Outcome (PSLOs) assessments are reported in the APRU. Each resource request should align with at least one PSLO.

### **Analysis and Evaluation**

Programs and campus services are aligned with the mission. The mission directs planning, resource allocations, and decision-making to support student learning and achievement.

College policies require that program review, action plans, and budget requests be aligned with the mission. Assessment and review processes ensure programs and services meet this requirement.

#### **I.A.4**

*The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary. (ER 6)*

#### **Evidence of Meeting the Standard**

KCC's approved mission statement is published on the college's internet homepage and in the [College Catalog](#). The most recent mission statement update process took place from 2015-2017. Multiple groups on and off campus were formed to discuss the current mission statement and solicit comments and suggestions for improvement. The campus College Council reviewed the proposed mission statement and approved it in January 2017, with the UH Board of Regents review and approval in February 2017. The following meetings reflect participation from a broad mix of college and community members.

- Spring 2015: Meetings at community centers around the island
- August 2015: Future Scenarios Workshop
- Spring 2016: Long Range Facilities Development Plan Vision
- May 2016: Meet with KCC Friends to get input on mission and goals
- August 2016: Conduct a community focus group to provide input on mission and the process was outlined at convocation
- September 2016: Create a task force to take input from the community and college to gather input regarding the mission statement
- November 16, 2016: Campus College Conversation on the task force's work
- December 6, 2016: Task force to revise and gather students' input
- December 2016: Submit to College Council for review and recommendation on approval
- January 18, 2017: College Council recommended approval to the Chancellor
- February 13, 2017: [Submitted](#) to Board of Regents by Chancellor Cox
- March 23, 2017: [Approved](#) by Board of Regents

The mission statement is reviewed at least once every five years, per [KCCP 1-1](#) and adheres to system and campus requirements. Policy [KCCP-1-8](#) provides guidelines for developing and maintaining the mission statement within the context of the University of Hawai'i System. The review process requires broad participation from the college and community it serves.

#### **Analysis and Evaluation**

The College's mission statement is approved by the UH Board of Regents and is widely published. The Chancellor initiates a task force to meet and review the mission statement, per

policy. A variety of participants, both internal and external, are solicited for input, review, and recommendations.

### **I.B. Assuring Academic Quality and Institutional Effectiveness Academic Quality**

#### **I.B.1**

*The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.*

#### **Evidence of Meeting the Standard**

KCC continuously discusses student learning and achievement through substantive and collegial dialog in open forums (e.g., College Council), at bi-annual convocations, and in various committees (e.g., Assessment, Curriculum, and Integrated Student Success). College Council reviews student achievement annually during the program review process and makes recommendations to programs for continuous improvement of student learning and achievement. The four programs with external program accreditation also engage in dialog about continuous improvement as part of their accreditation processes. The Chancellor organizes two convocations each academic year to communicate outcomes, progress, and goals for student achievement. [College conversations](#) are also held throughout the academic year and all campus students, faculty and staff are invited to attend and participate. These provide a venue for dialog on current initiatives, innovation, and topics of interest to the college. Recent College Conversation topics include [Early College](#), grants, and [Quality Focus Essay](#) topics.

The University of Hawai‘i Community College (UHCC) System developed achievement goals for all seven community colleges in the system. The Vice President for Community Colleges (VPCC) visits the campus each semester to discuss [system level topics](#), such as prior year results on performance measures for both the college and system. These dialogues have led to the implementation of exploratory majors, structured pathways to reduce excessive credit accumulation, smart registration utilizing the STAR GPS system, and reforms in remedial/developmental education.

### **Analysis and Evaluation**

Convocations, College Conversations, the annual and five-year program review processes, and ongoing college and system initiatives provide forums for sustained dialog about continuous improvement of all aspects of the college.

#### **I.B.2**

*The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)*

### **Evidence of Meeting the Standard**

All [programs](#), which includes both instructional and student learning support services, perform [annual](#) and [five-year comprehensive](#) reviews to assess effectiveness in meeting student learning outcomes and strategic priorities per [KCCP 1.6](#). Each instructional program develops student learning outcomes (SLOs) for both courses and programs. A new assessment tool, LiveText, was implemented in the spring of 2016. This software provides a platform for programs to assess course and program student learning outcomes.

### **Analysis and Evaluation**

The campus defines and assesses student learning outcomes for its instructional programs and student and learning support services through its APRU and CPR processes.

#### **I.B.3**

*The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information.*

### **Evidence of Meeting the Standard**

The college establishes and revises its institution-set standards every five years, per [UHCCP 4.203](#). The current cycle is 2016 – 2021. The standards include course completion, degrees and certificates awarded, Native Hawaiian degrees and certificates awarded, Pell

recipient degrees and certificates awarded, transfer to baccalaureate institutions, integrated postsecondary education data system (IPEDS) student success rate, licensure and/or certification examination success rate, and job placement rate. Annual results are presented to the campus by the VPCC, posted to the college [webpage](#), and discussed at convocations.

Baseline values were set as the three-year average from 2012-2015 and aspirational values were set by the UHCC System to represent 5 percent growth per year from the original baseline. The policy, as well as annual results, are published on the Institutional Effectiveness [webpage](#).

### **Analysis and Evaluation**

The college has established and assessed institution-set standards, per UHCCP 4.203. These standards are aligned with the strategic directions and mission of the college. Annual assessment of achievement of these standards takes place at both campus and system levels. Results are published on the college website.

#### **I.B.4**

*The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.*

### **Evidence of Meeting the Standard**

Student achievement data are reported annually by the UHCC System in the Annual Report of Program Data ([ARPD](#)). Programs review these [metrics](#) and develop action plans for unhealthy indicators and underperforming Core Perkins Indicators. Programs link budget requests to the college's strategic goals, which were developed to improve student achievement. The annual review also requires an analysis of program student learning outcomes that includes the expected achievement level, courses assessed, assessment instrument, results of program assessment, and next steps.

### **Analysis and Evaluation**

The college has demonstrated throughout this self-study its dedication to developing, reviewing, and improving processes, such as program review and use of assessment tools, to support student learning.

For example, early in the current reaffirmation of accreditation cycle, the college reviewed the tool being used for assessment of student learning outcomes, which was a homegrown database. The college determined that the system did not fully meet assessment needs because: 1) each course section had its own spreadsheet template that required manual data entry, which introduces human error into the database through entry and formatting errors; 2) the complexity of the database made multi-year comparisons and trend analysis difficult with SLOs changes because of technical and time-consuming issues; 3) "filtering-up" was deemed

an ineffective way to measure program student learning outcomes; and 4) faculty felt disconnected from assessment because the process was centralized with the Assessment Coordinator and Institutional Researcher.

In 2016, after a formal selection process led by the Institutional Researcher and with representation from faculty and other constituencies across campus, the college chose the LiveText proprietary software to address some of the assessment issues. Its web interface and instant reporting features put more control of assessment data in the hands of the instructors. The Professional Development Coordinator offers individualized and group trainings on this software to assist faculty with implementation.

### **I.B.5**

*Institutional Effectiveness: The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.*

#### **Evidence of Meeting the Standard**

As detailed in Standard I.A.2, the college has a robust program review process that incorporates assessment of student learning and achievement in relation to the college mission and strategic priorities. Each Annual Program Review Update (APRU) is reviewed in context of both the entire college mission and strategic priorities and used to determine future activities and funding for program improvements. Quantitative data, which are disaggregated by programs, subpopulations, and mode of delivery, are provided by the UHCC as Annual Reports of Program Data (ARPD) for [instructional](#), [student services](#), and [academic support](#) programs. Each program is required to discuss the demand, effectiveness, and efficiency of the program using these data, supplemental data provided by the Institutional Researcher, upon [request of the program](#), and qualitative data. Examples of qualitative data used by programs may include trends in hiring supplied by advisory boards, surveys provided to employers, program health indicators, and student demographics.

#### **Analysis and Evaluation**

KCC's program review process is designed to evaluate program goals and student achievement relative to the college mission and goals. Data are disaggregated by program type, subpopulations (e.g., part-time/full-time, Native Hawaiian Students, Pell recipients, and Perkins Core Indicators), and mode of delivery.

### **I.B.6**

*Institutional Effectiveness: - The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance*

gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

**Evidence of Meeting the Standard**

Every year, programs review their [Annual Report of Program Data](#) provided by the UHCC System office, which is disaggregated (i.e., Native Hawaiian, Pell recipients, Perkins Core Indicators, STEM, full-time/part-time, and distance education). Other metrics are used to establish program “[health calls](#).” As part of the review process, programs review demand, efficiency, and effectiveness data and develop action plans to improve areas identified as “unhealthy” or “cautionary.” In addition, programs with Perkins Core Indicators are required to write action plans to address any metric that was below the established benchmark. In this process, programs are also asked to report on the outcome of previous year action plans, and budget requests should be supported by data and linked to the [college’s strategic priorities](#).

In addition, the [UHCC Strategic Directions](#) identified four subpopulations for special attention: Native Hawaiians, Filipinos, Pacific Islanders, and Pell recipients. Subpopulation performance, relative to strategic priorities, is [discussed annually](#) at open forums with the UHCC Vice-President and College Conversations are held to discuss any performance gaps and identify possible improvement strategies.

**2016 Enrollment vs Graduation Comparison for Subpopulations of Students\*\***

	<b>Fall 2016 College Enrollment</b>	<b>FY16 Graduation (Degrees and CAs)</b>
<b>Native Hawaiians</b>	31%	29%
<b>Filipinos</b>	21%	21%
<b>Pacific Islanders</b>	*	*
<b>Pell recipients</b>	54%	58%

\* Not reported because of small size

\*\* Target is for the percentage of graduates from each subpopulation to meet or exceed subpopulation enrollment percentage

In addition to UHCC system initiatives (e.g., exploratory majors, guided pathways, and accelerated college readiness), KCC has developed or expanded services to reduce performance gaps among these four subpopulations. In 2016, the subpopulation with a performance gap in graduation was Native Hawaiian students. One tactic to improve this has been Makaloa Council’s initiative of increasing hiring of qualified Native Hawaiians at the college to provide role models for Native Hawaiian students. In fall 2017, a college

conversation was dedicated to reviewing [Native Hawaiian student](#) achievement across programs, gender, and age, as well as identifying possible interventions. The Chancellor summarized the [minutes](#) and shared the outcome with the campus. Another tactic was the development of the Native Hawaiian Advisory Council, which includes community membership and is chaired by the Chancellor. Suggestions from the College Conversation and Native Hawaiian Advisory Council led to concrete plans for interventions. For example, gaps in Native Hawaiian student success led to [tactics](#) such as summer English and math Early College courses and a summer bridge program for Native Hawaiian students, slated for the summer 2018 semester. Additionally, design-thinking strategies will be implemented by council members to interview Native Hawaiian students to identify barriers, and a survey is being sent to all KCC students to identify how to better serve students.

### **Analysis and Evaluation**

KCC reviews disaggregated outcome and achievement data at both the program and institution level to identify performance gaps. Action plans and/or strategies are developed to improve outcomes for underperforming subpopulations and results of efforts are reviewed annually in program reviews and at the UHCC Institutional Performance presentation by the Vice-President. Since the inception of the 2015-2021 Strategic Priorities Plan, KCC has met achievement goals for the subpopulations established by the UHCC System, except for Native Hawaiian students.

Discussions and ideas developed during the fall 2017 College Conversation regarding the Native Hawaiian student achievement gap were shared with the Native Hawaiian Council to develop an action plan to implement during the 2018-2019 academic year.

### **I.B.7**

*Institutional Effectiveness: - The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.*

### **Evidence of Meeting the Standard**

Per [KCCP 1-1](#), all college policies are reviewed at least once every five years to ensure currency with the current mission and strategic goals. The unit that administers the policy ensures these reviews are conducted and suggests changes and updates to College Council, which is the [advisory council to the Chancellor](#) and has broad representation from units, councils, and labor unions at the college. Faculty Senate is the shared governance body for academic and faculty issues. Hence, academic policies initiate with this senate per [KCCP 4-17](#). Once approved by Faculty Senate, the policy is forwarded to College Council for consideration.

## **Analysis and Evaluation**

KCC evaluates policies across all areas of the institution at least once every five years, and practices align with these policies to support the mission of the College.

### **I.B.8**

*Institutional Effectiveness: - The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.*

## **Evidence of Meeting the Standard**

The college has dialog about institutional strengths and weaknesses at its bi-annual Convocations and at College Conversations. Ongoing discussion also happens at College Council and in campus committee meetings.

Programmatic strengths and weaknesses are identified and discussed within the annual program review (APRU) process. All APRUs are posted to the Institutional Effectiveness website and personnel are alerted to their availability. Minutes for the evaluation and planning process of College Council, to strengthen areas identified in the APRU, are kept on CampusDocs (the College's main Google Docs folder), which is accessible to the campus community.

Institutional strengths and weaknesses are also discussed by the VPCC at bi-annual presentations on UHCC Strategic Directions, achievement metrics for identified subpopulations (see I.B.6), and performance funding metrics. Although institutional performance metrics are calculated at the system level and shared by the VPCC, discussions are held at the campus level to develop tactics for improvement of identified weaknesses at both the institutional and program levels.

## **Analysis and Evaluation**

The institution communicates its assessment and evaluation results to foster a shared understanding of its strengths and weaknesses and collectively develop tactics and action plans for improvement. Recent examples in academic year 2017-2018 include College Conversations on Native Hawaiian students and [College Strategic Priorities](#).

### **I.B.9**

*Institutional Effectiveness: The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning*

*addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. (ER 19)*

### **Evidence of Meeting the Standard**

KCC integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality that is detailed in [KCCP 1-6](#). Instructional and non- instructional programs undergo annual and comprehensive reviews to assess effectiveness, operational decision making and resource allocation. [KCCP 1-8](#) was developed to support the college goals and guide decision making. Long-range planning needs for educational programs and services and for human, physical, technology, and financial resources are addressed by the campus [Long Range Development Plan](#) that aligns with the college strategic goals and mission.

Through these processes, programs request resource allocations to improve identified weaknesses or fund innovative action plans. All Annual Program Review Updates (APRUs) are reviewed by the College Council and proposals for funding to acquire supplies, equipment, training aids, space, and/or additional personnel are ranked. A scoring rubric is used to rank all proposals to align with the college mission and its strategic goals. Programs/units not requesting resource allocation are also reviewed by the College Council during the APRU process, and recommendations are made for program improvement.

The short term APRUs lead to the five-year comprehensive program review ([CPR](#)) that assesses a program's long term effectiveness and addresses improvements and future direction. A long-term strategy is presented and resource requests are proposed to assure continual alignment with the college mission and strategic goals into the future. Additionally, the Executive Cabinet reviews each CPR and schedules a discussion with program leads to improve the program and celebrate program strengths.

Career and Technical Education (CTE) programs also have [program advisory boards](#) that meet at least once per year, to assure industry standards are maintained. Collaboration with industry partners helps to guide programs in preparing graduates to meet community needs and industry standards. Recommendations by an advisory board may guide programmatic resource requests on equipment and training needs. Recommendations made by external program accrediting bodies are also used by programs to guide long-term planning and resource requests.

### **Analysis and Evaluation**

The college addresses short and long term needs through a robust program review process that integrates with its Long Range Development Plan. External program accreditation, as well as advisory boards and other community interactions, also inform the College's planning processes.

## **I.C: Institutional Integrity**

### **I.C.1**

*The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors. ER 20*

#### **Evidence of Meeting the Standard**

The mission statement is reviewed at least once every five years to ensure authenticity and integrity, per [KCCP 1-1](#). The approved mission statement is printed in the [College Catalog](#) and posted to the college's [website](#) homepage.

Each year, departments are asked to review the information related to their program that is published in the College Catalog that includes curricula, program descriptions, student learning outcomes, available support services, and accreditation status, where applicable. The institution gives accurate information to students and the public about accreditation status, of both the institution and academic programs, by posting accreditation information and links on the [website](#) and in the [College Catalog](#).

In addition, the college developed a [webpage owner list](#) that not only identifies the person responsible for each webpage, but also states how often the information should be reviewed and updated. This helps ensure accuracy of electronic information shared with the public.

KCC provides accurate information on student achievement to the public through our [Institutional Researcher's website](#) and through recently implemented annual [Fact Books](#), which make our student success data easily accessible across multiple years. In compliance with the Student Right to Know Act of 1990, additional information is provided to students on gender, race/ethnicity, federal grant/loan recipients, persistence rates, and transfer out rates in both the [College Catalog](#) and online via the [UH Institutional Research Data Access](#) portal.

#### **Analysis and Evaluation**

The college has sufficient processes in place to ensure clarity, accuracy, and integrity of information provided to students, personnel, and the community.

### **I.C.2**

*The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the "Catalog Requirements" (ER 20)*

**Evidence of Meeting the Standard**

The College [posts the current College Catalog](#) on its homepage. Printed copies are also available in the following offices: Chancellor, Vice Chancellor of Academic Affairs, Vice Chancellor of Student Affairs, Vice Chancellor of Administrative Services, Institutional Effectiveness, Academic Counseling, and Registrar.

**The college reviews information required to meet ER20, per the timeline and process detailed in Standard I.C.1. Required information and associated page numbers in the College Catalog are below.**

Category	Item	Catalog Location 2018/2019
<b>General Information</b>		
	Official name, address, telephone number, website	pg. 1
	Educational mission	pg. 8
	Representation of accredited status with ACCJC and programmatic accreditors	pg. 4

<p><b>Locations or Publications where Other Policies may be Found</b></p>		<p>pgs. 41-42: Pursuant to Section 99.6 of the rules and regulations governing the Family Educational Rights and Privacy Act (FERPA)</p> <p>pg. 49 Sexual Harassment: University of Hawai'i Executive Policy EP 1.204</p> <p>pg. 49 Copies of the Student Conduct Code are available at the Office of the Vice Chancellor of Student Affairs or online on the KCC website under Student Support Services – Policies.</p> <p>pg. 49 The process of addressing allegations of misconduct is directed in the Student Academic Grievance Procedure or the Student Grievances Non-Academic Grievance Policy and Procedure. Copies are available at the Office of the Vice Chancellor of Student Affairs.</p>

**Analysis and Evaluation**

The college ensures information required in ER20 is precise, accurate, and current in the College Catalog by following a review process. The college uses software to check that components of the online College Catalog are Americans with Disabilities Act (ADA) compliant and truly accessible to all. The 2018-2019 catalog will be the first edition to meet ADA compliance.

**I.C.3**

*The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)*

**Evidence of Meeting the Standard**

The college communicates student achievement data to the public in numerous reports posted to the College’s website and in multiple places within the College Catalog. Reports posted to the Institutional Effectiveness (IE) webpage include ACCJC [Annual Accreditation reports](#), annual and comprehensive [program reviews](#), which include

assessment of program student learning outcomes and program data, and annual [strategic priority outcomes](#) in relation to system-established benchmarks. Programs have defined student learning outcomes (PSLOs) which are assessed during the APRU process. Graduation and persistence rates are published in annual [Fact Books](#) on the Institutional Research website. Programmatic data on student achievement and student learning outcomes are available on the [program review](#) link on the IE webpage in each annual and comprehensive review. As mentioned in 1.C.1, the college follows “Student Right to Know” requirements by providing information on [student achievement](#) to the public in the College Catalog, including [graduation and persistence data](#). [Gainful Employment](#) information for occupational certificate programs is also provided in the College Catalog and on the website.

### **Analysis and Evaluation**

The institution communicates matters of academic quality to prospective students and the public by posting reports and data to the college internet webpage as well as publishing information in the College Catalog.

### **I.C.4**

*The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.*

### **Evidence of Meeting the Standard**

Degree and certificate programs offered by the college are listed in the [College Catalog](#) and on the [website](#). Within the catalog, each degree or certificate lists [student learning outcomes](#), required courses, number of credit hours required to meet graduation requirements, and jobs available to graduates. In addition, each course offered by the college has a course description in the College Catalog, which includes any prerequisites and and/or minimum placement test scores.

To ensure that certificates and degrees are clear regarding their purpose and expectation when initially developed, a Program Action Request [form](#) is reviewed and approved by the division, assessment committee, curriculum committee, Vice Chancellor of Academic Affairs and the Chancellor. Information from PARs is used to update the College Catalog each academic year and develop [advising sheets](#) for counselors to assist students in planning their course of study. However, with the implementation of STAR GPS, these advising sheets will be replaced with pathways of programs, accessible via their UH portal, to help keep students on-track to on-time completion. STAR GPS is a visual tool that shows real-time progress and remaining courses required for graduation.

### **Analysis and Evaluation**

The college describes the purpose, content, course requirements, and learning outcomes for all degree and certificate programs both on its webpage and in its College Catalog, which is available both in print and electronically.

## I.C.5

*The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.*

### **Evidence of Meeting the Standard**

KCC reviews its established policies at least once every five years, per [KCCP 1-1](#) to ensure accuracy, integrity, and currency. Suggested changes are initiated by the appropriate campus unit then discussed at College Council. Per [KCCP 1-7](#), College Council is charged with reviewing and updating college plans and policies and policy updates are a standing item on every bi-monthly College Council [agenda](#).

The main college publication is the College Catalog, and it is reviewed annually. Program brochures are updated and revised by program coordinators within academic divisions when curricular changes are made and/or as needed. Final drafts of both the College Catalog and program brochures are reviewed by the VCAA's office.

Electronic publications are reviewed and updated by site owners per an established review timeline (see std 1.C.1). Assistance is provided by the Information Technology Advisory Council (ITAC), which "monitors, oversees, and manages the college's webpage along with the webmaster."

### **Analysis and Evaluation**

The college meets this standard by conducting reviews and adhering to established policies for printed and electronic publications, policies, and brochures.

## I.C.6

*The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.*

### **Evidence of Meeting the Standard**

KCC provides students information on the total [cost of education](#) in both the College Catalog and on the college's webpage, which includes tuition and fees, [financial assistance](#), and program-specific expenses (e.g., lab fees). The Financial Aid website also includes a [Net Price Calculator](#) that estimates the total cost of college (including room and board as well as textbooks).

The college complies with federal Gainful Employment requirements by providing information on both the [college website](#) and in the [College Catalog](#) regarding program length, cost, median loan debt, and completion statistics for occupation certificate programs with 10 or more graduates. The college also provides a link to the

[Hawai'i Industry Sector Information](#) to help students realize both potential earning power and job opportunities relative to program cost.

### **Analysis and Evaluation**

The college provides reliable and accurate resources for students to estimate the total cost of their education.

### **I.C.7**

*In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)*

### **Evidence of Meeting the Standard**

The college demonstrates its commitment to institutional and academic integrity by following the guidelines on academic freedom described in [UH Administrative Rules](#). A [campus statement](#) was developed from these guidelines and is published in the College Catalog.

Students have a system wide [Code of Conduct](#) that is published on the College's website and provided during mandatory student orientation. Faculty are provided additional information on their responsibilities to students regarding the pursuit of learning in the Faculty and Staff Handbook and on the College's [policy](#) webpage. Faculty are also provided details on their specific [rights](#) and [responsibilities](#) related to academic freedom in the University of Hawai'i and the UH Professional Assembly contract.

### **Analysis and Evaluation**

The college and UH System support academic freedom and ensure academic integrity by publishing and following policies on academic responsibilities pertaining to faculty and students.

### **I.C.8**

*The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.*

### **Evidence of Meeting the Standard**

The College Catalog contains statements regarding academic honesty, nondiscrimination, and grievance and complaint process (see catalog table in I.C.2). The [Student Support Services webpage](#) includes links to policies and procedures including both [academic](#) and [non-academic](#) grievances, [academic probation](#), and [consequences](#) for violating the System wide Student Conduct Code.

The University of Hawai'i Community College System has policies on faculty responsibilities including [ethics](#), which is provided in the Faculty and Staff Handbook. The University of Hawai'i Professional Assembly (UHPA) contract details the procedure for dealing with alleged [breach of professional ethics](#). Any [disciplinary actions](#) arising out of the investigation follow [Article XVIII](#) of the contract.

### **Analysis and Evaluation**

KCC publishes and follows policies and procedures that promote academic integrity and clearly define the consequences for dishonesty for all constituencies.

### **I.C.9**

*Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.*

### **Evidence of Meeting the Standard**

The UHCC System provides a [Statement on Professional Ethics](#) for faculty. Faculty members are expected to “make every reasonable effort to foster honest academic conduct and to assure that their evaluations of students reflect each student’s true merit.” The UHCC System modeled its professional ethics policy after the [American Association of University Professors](#).

Faculty are expected to teach their courses in alignment with the approved course outline, which creates a course content standard, yet allows for academic freedom in presentation and discussion.

The college’s contract renewal, tenure, and promotion process includes both student evaluations and peer evaluation. Both types of evaluation include comments on the instructor’s teaching, which can be used to identify issues in objectivity of faculty.

### **Analysis and Evaluation**

The college has policies and procedures that provide a framework for objectivity of faculty in their teaching of content while allowing for academic freedom.

### **I.C.10**

*Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.*

Kaua‘i Community College neither requires conformity to a specific code of conduct nor seeks to instill specific beliefs or worldviews. Hence, this standard does not apply to the college.

### **I.C.11**

*Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.*

Kaua‘i Community College does not operate in foreign locations. Hence, this standard does not apply to the College.

### **I.C.12**

*The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. ER 21*

#### **Evidence of Meeting the Standard**

The institution communicates matters of educational quality and institutional effectiveness via the accreditation [website](#). The college has submitted all annual and midterm reports within the required timelines.

#### **Analysis and Evaluation**

KCC meets all compliance requirements, responds to the Commission when directed to act, and discloses required information to the public.

### **I.C.13**

*The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in*

*consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)*

### **Evidence of Meeting Standard**

The college publicizes its institutional and program accreditation status in the [College Catalog](#) and electronically on the institutional effectiveness website. [Accreditation status updates and reports](#) are publically accessible on the institutional effectiveness page of the KCC website. Program accreditation status information is available in the [College Catalog](#), and electronically both on program websites and on the college's institutional effectiveness page. Program coordinators communicate changes and updates on program accreditation status with advisory board members in a timely manner via email and formally through advisory board meetings, whereas any changes in institutional accreditation are communicated to the college and public by the Chancellor.

Kaua'i Community College remains compliant with the regulations of the U.S. Department of Education in regards to accrediting agencies.

### **Analysis and Evaluation**

The institution demonstrates honesty and integrity in its relationships and actions. It maintains a consistent description of itself to all accrediting agencies and communicates any changes in such accredited status.

## **I.C.14**

*The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.*

### **Evidence of Meeting the Standard**

KCC is a state institution without any links to investors, related or parent organizations, or other external interests. The college is fully committed to its mission to serve its students and the community.

### **Analysis and Evaluation**

The college is committed to high quality education, student achievement, and student learning first and foremost.

## **Standard II: Student Learning Programs and Support Services**

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

### **II.A. Instructional Programs**

#### **II.A.1**

*All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs.*

#### **Evidence of Meeting the Standard**

The College adheres to [HRS Section 304A-102](#), the state statute that ensures that programs are appropriate to higher education. All programs culminate in the attainment of program student learning outcomes (SLOs). The College's curriculum development process includes a review of [proposed](#) course and program SLOs to ensure consistency with the College's mission. All instructional programs are developed for students to earn a certificate or associate's degree for employment and/or transfer to a four-year university.

The University of Hawai'i Community College (UHCC) system requires annual and [cumulative \(five-year\) program reviews](#) for all programs at the College, in part, to assess [student achievement](#), which includes the number of program majors, certificate and degree attainment, job placement (Perkins Core Indicators), and transfer to a University of Hawai'i (UH) four-year institution. These metrics are part of the Annual Reports of Program Data ([ARPD](#)), which assess demand, effectiveness, and efficiency of a program in preparing students for the job market and/or transfer. Program review also includes an [analysis by program faculty](#) of how well students are meeting identified program outcomes.

The College does not offer any distance education programs at this time.

### **Analysis and Evaluation**

The processes for curriculum development and program review provide the framework for the College to ensure all instructional programs are consistent with both its mission and higher education.

Additionally, the College analyzes data on the number of open positions in the County of Kaua'i in fields related to the degree/certificate offered by the program. Doing so allows the College to manage the size of its programs so that the workforce needs of the community are served while ensuring students are not graduating with degrees or certificates in fields where they cannot find jobs.

### **II.A.2**

*Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.*

### **Evidence of Meeting the Standard**

Each course offered at the College is reviewed by the Curriculum Committee. All courses address the same SLOs, regardless of mode of instruction (e.g., face-to-face, online virtual, or Polycom<sup>(R)</sup>), location (e.g., campus or high school), or instructor (full-time faculty or lecturer). Quali Curriculum Management currently serves as the College's repository of all course curriculum information, including SLOs, course descriptions, content, objectives, methods of instruction, methods of evaluation, and texts. Every course must be developed in accordance with [accepted standards](#) and is reviewed on a five-year cycle. In addition, each Career and Technical Education (CTE) program has a system-wide UHCC Program Coordinating Committee (PCC), which strives to meet annually to review course content at each campus to ensure currency across all curricula. As described in STD II.A.16, each CTE program also has an [advisory board](#) that meets every academic year to review student outcome data and ensure programs remain relevant to industry standards.

In order to ensure that content and methods of instruction are continuously improved, faculty assess student achievement of course learning outcomes and receive feedback from peer and student evaluations of teaching. Faculty discuss what they have learned from these processes and what improvements they have made in their courses in their contract [renewal, tenure, or promotion dossiers](#). Committees and individuals reviewing these documents base their recommendations, in part, on this reflection [refer to Standard III.A. for relevant policies and procedures].

Each program undergoes annual [program review](#) and a five-year comprehensive program review to examine program learning outcomes, assess student achievement, and develop action plans for continuous improvement, which may include course revision, development of support services, and/or updating course materials/equipment.

### **Analysis and Evaluation**

Faculty are engaged in continuous processes of assessment and curriculum review at both the course and program level. The College uses peer evaluation and the contract renewal/tenure/promotion process to provide additional feedback to faculty on their individual teaching performance. The program review process includes not just instructional programs, but also [services](#) directly related to student learning, such as tutoring services, library services, and academic advising.

### **II.A.3**

*The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.*

### **Evidence of Meeting the Standard**

The core curriculum information for the College's courses and programs, including student learning outcomes, is contained in documents called course outlines (COs) and program action requests ([PAR](#)). Program and division faculty submit COs and PARs to the Curriculum Committee, which evaluates, critiques, and approves them according to the College's curriculum policies and procedures. Curricula are reviewed at least once during the established five-year review cycle. Program SLOs are made available to the public in the College Catalog. Faculty assess course outcomes each semester, which are then aggregated to provide course-wide data using assessment management software (LiveText). Assessment of program SLOs is part of the annual and cumulative [program review](#) process.

Course syllabi with learning outcomes are distributed to students in each course at the beginning of the term. A [course syllabus template](#) is made available to faculty on the CampusDocs Google Drive folder to provide guidance to faculty about elements to include in a syllabus. Faculty are required to submit a syllabus, which includes course student learning outcomes, to their Division Chair and the Academic Affairs' Office, for each course they teach by the end of the first week of instruction each term. The Academic Affairs Office reviews syllabi to verify student learning outcomes are included. A course syllabus reminder is sent out to instructional faculty prior to the start of each semester to submit their syllabi for each course and to provide a copy to each student. The submitted syllabi are posted in CampusDocs in the Office of the Vice Chancellor for Academic Affairs (VCAA) Course Syllabi [folder](#) by the VCAA secretary, who tracks receipt of all syllabi.

## **Analysis and Evaluation**

The campus has an established course review process and annual program review process that provides the framework for reviewing and assessing SLOs. Additionally, the Curriculum Committee reviews course and program outlines using established procedures. The VCAA has the role of ensuring syllabi contain approved SLOs and that students are provided a copy. This requirement is communicated to faculty via e-mail reminders, new faculty orientation, and by division chairs.

### **II.A.4**

*If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.*

## **Evidence of Meeting the Standard**

The College uses a numbering system to distinguish between pre-collegiate and college level courses, guided by the University of [Hawai'i Developmental Education Initiative](#) and [UHCCP 5.300](#). Courses with two digits are identified as pre-collegiate level, whereas college-level courses are numbered with three digits. In addition, each pre-collegiate course is part of an identified [pathway](#) to a college-level course.

To enroll in math or English courses or those with a college-level math or English prerequisite, students must meet certain placement levels that correspond to the basic skills and abilities required for the course. From 2013-2015, Kaua'i Community College (KCC) and Maui College developed and implemented a successful pilot that used high school transcript information to place students into college-level math and English courses. The results of the pilot informed the current 'multiple measures' placement system that has been adopted by the UHCC system and was [presented](#) to the campus by VPCC Morton in spring 2017.

## **Analysis and Evaluation**

Pre-collegiate courses are identified by their course numbers, and these courses have been designed specifically to prepare students for success in a college-level course. KCC has been a leader in the UHCC system efforts to redesign developmental education. The College has piloted accelerated courses in both English and math, as well as alternative placement models. Prior to the UHCC system redesign taking effect, the College had reached full implementation of redesigned math pathways, including a non-STEM developmental course. The College's curriculum for this course has been modeled throughout the system and served as the model for the Department of Education's "Transitions to College" math course.

The combination of shortened developmental pathways, co-requisite support courses, and multiple placement methods (e.g., high school grades or placement test score), have resulted in a higher percentage of students completing college-level English and math within one year of entering the College.

<b>% of entering cohort completing college-level within one year</b>	<b>F13 Cohort</b>	<b>F16 Cohort</b>
English	32%	38%
Mathematics	20%	29%

These and [additional data on student outcomes](#) in math and English were presented by the UHCC Student Success Council in April 2017.

## **II.A.5**

*The institution’s degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level.*

### **Evidence of Meeting the Standard**

The UHCC system has established several policies related to academic programs and higher education. Program length and minimum course GPAs are detailed in [UHCCP 5.203](#), as is the role of the Chancellor. The policy states that the Chancellor is responsible for assuring that “high-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all program credentials.” In summary, all programs must be reviewed for alignment with the College’s mission by the Chancellor; each program must be approved by the Board of Regents; students must earn at least a 2.0 GPA in each program course; and degree and certificate programs have a set number of credit hours to align with higher education standards (e.g., minimum sixty credit hours for an associate’s degree, between twenty-four and fifty-one credit hours for a Certificate of Achievement, and between four and twenty-four credit hours for a Certificate of Competence).

The College approves course sequencing tables when the [PAR](#) is submitted for the development of a new program or revision of a current program. All degree programs are also required to have a [general education component](#).

### **Analysis and Evaluation**

The College offers degrees and certificates that adhere to practices common to higher education by following UHCC system policies when developing programs and certificates.

## **II.A.6**

*The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education.*

### **Evidence of Meeting the Standard**

Plans for course sequencing begin with the initial proposal of the program. The **PAR** requires the proposer to complete a suggested plan of courses for students to complete the degree or certificate based on full-time status.

For existing programs, the College uses a variety of tools to assist with planning and scheduling. Division chairs and program coordinators review and update the Multi-Year Plan of Offerings **MYPO** every academic year to update the next two academic years of course sequencing. Each spring semester, program coordinators, division chairs, counselors, and the VCAA's office meet to discuss and create the class schedule for the summer and upcoming academic year. They make adjustments as needed, based on factors such as historical enrollment trends, cohort model, and survey data. The College began developing academic year course schedules, as opposed to semester schedules, beginning with the 2016-2017 academic year to help students better plan their academic pathway, and is the only Community College in the System to do so. The VCAA plans to advance this to two-year scheduling.

### **Analysis and Evaluation**

The manner in which the College schedules courses is based on available data, student need, and course sequencing. Through a concerted effort between academic advisors, program coordinators, division chairs, and the VCAA's office, the College manages decisions impacting registration, enrollment, cohort pathways, and scheduling while monitoring overall enrollment and class size. In general, the minimum size for a course is ten students. Nonetheless, to support small or cohort programs, some courses proceed with fewer students to facilitate their progress toward degree completion.

The UH system has recently adopted the homegrown STAR GPS registration system, which provides students with recommendations on courses to take to complete their chosen degree or certificate, as well as warnings when students attempt to register for courses outside of

their pathway. This tool not only helps students reduce time-to-degree but also assists the College in ensuring appropriate courses are offered as defined by the pathways.

## Action Item

Programs will develop course sequencing plans for part-time students, who are increasing at our college when compared to full-time students. This action item is directly related to one of our Quality Focus Essays, [Scheduling for Success](#).

### II.A.7

*The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.*

## Evidence of Meeting the Standard

The College has demonstrated its commitment to equity and the changing needs of students by adding distance education and early college courses to its offerings, supporting the UH University Center on Kaua'i, streamlining developmental education pathways in math and English, expanding continuing education offerings, assessing effectiveness of learning support services, and applying various teaching methodologies, as appropriate, augmented with professional development.

**Delivery Modes and Teaching Methodologies:** The College has continued to maintain distance learning opportunities for students while embarking on and expanding the early college modality since the last self-evaluation. Distance learning allows Kaua'i Community College (KCC) students not only to enroll in online courses offered at the College, but also at any college within the UHCC system. Although distance education course enrollment at the College grew for several years, at this point, the College's distance learning offerings are not expanding because of the availability of distance courses offered by other colleges within the UHCC system.

<b>Academic Year:</b>	<b>2012/2013</b>	<b>2013/2014</b>	<b>2014/2015</b>	<b>2015/2016</b>	<b>2016/2017</b>
Students Enrolled in distance education at KCC (duplicated count)	1,183	1,367	1,236	1,078	1,044
# of distance education sections	34	63	60	43	44

Over the past five years, less than 8% of students at KCC have taken distance education at other system community colleges. Most recently (2016-2017), 6% of KCC students were part-time at our college but [full-time in the system](#). Additionally, in 1996, the UH Board of Regents [established](#) three University Centers on the neighbor islands of

Kaua‘i, Maui, and Hawai‘i `i, to provide access to certificate, associate, bachelor, and post-baccalaureate degree programs offered via distance education. Currently, there are 66 programs available with the majority offered via online courses, albeit some Polycom<sup>(R)</sup> and interactive video courses are still offered. Staff at the College provide local support to students enrolled in these programs. Hence, there are many distance education opportunities available for students.

Rather than dedicate more resources to expanding distance education offerings, the College has placed additional emphasis on offering early college courses at the three public Department of Education (DOE) high schools on Kaua`i. Early College has been found to be a [college-bound equalizer](#) for male, low-income, and minority students.

Early College Course Offerings at the Three Public High Schools from 2015-2018

<b>Academic Year:</b>	<b>2015/2016</b>	<b>2016/2017</b>	<b>2017/2018</b>
Kapaa HS	5	8	13
Kaua‘i HS	3	4	8
Waimea HS	2	7	8
<b>TOTALS</b>	<b>10</b>	<b>19</b>	<b>29</b>

Both math and English developmental education courses were [redesigned](#) to reduce the time before students can enroll in college-level courses. Additional support, including embedded and professional tutors, have been added to support student success. Since the inception of the new model in Fall 2016, math and English have seen increases in the [percentage of students completing college-level courses](#).

**Instructional Support Services:** Student support services are reviewed through the annual program review process to identify areas for improvement. In an effort to improve student persistence, increase completion rates, and reduce the time to graduation, the College has initiated several new support services and strategies over the past few years that include the following: mandatory orientation (face-to-face and virtual), distance education orientation (through the University Center), Early Alert System, STAR GPS registration system, online round-the-clock tutoring, and a First Year Experience (see Standards II.B.1, II.C.1, and II.C.3 for details).

### **Analysis and Evaluation**

The College reviews data annually and responds to the changing needs of its students through a variety of methods. Most recently, these have included expanded Early College course offerings, implementation of integrated student support services, and redesign of developmental education. Additionally, professional development offerings have focused on teaching methodologies such as indigenizing the curriculum, teaching millennial students, and using flipped classrooms.

When college-level courses for skill enhancement and workplace advancement are not required, the College also strives to meet the training needs of the island through the [Office of Continuing Education and Training \(OCET\)](#). This center collaborates with local businesses, labor unions, and advisory boards to offer timely trainings and personal enrichment courses.

## **II.A.8**

*The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.*

### **Evidence of Meeting Standard**

The College does not offer department-wide course or program examinations. The College does have a robust process for assessing [prior learning](#) and awarding credit, falling under [UHCCP 5.302](#), the System policy on Prior Learning Assessment (PLA). This process is published in the [College Catalog \(p.18\)](#). Prior learning assessments are designed to determine whether the student meets the learning outcomes for the course in order to receive credit.

The Hospitality and Tourism Program received a Carl D. Perkins Grant in FY17 to market PLA to industry employees. As a result, PLA assessments were developed for three courses, human resource managers on Kaua`i were surveyed for PLA need, outreach materials were created, and accelerated courses were designed to encourage certificate completion for students with PLA.

### **Analysis and Evaluation**

Appropriate policies and procedures are in place to reduce test bias and enhance reliability of PLAs for awarding college credit. The College does not offer department-wide course or program examinations. PLA is available to students and 18 students over the past three years have obtained credit using this process.

## **II.A.9**

*The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions.*

### **Evidence of Meeting the Standard**

## **Evidence of Meeting the Standard**

Units of credit are consistent with the federal definition of a credit hour ([34 CFR 600.2](#)) and the [System policy](#), which both define a credit hour as the Carnegie Unit standard. Each credit hour requires one hour of in-class instruction and a minimum of two hours of out-of-class study each week for approximately fifteen weeks (e.g., forty-five minimum hours for each credit hour), or the equivalent for shorter-term course offerings. In general, this reflects the minimum amount of work required for a student to achieve the intended student learning outcomes. In addition, the College awards credit for student achievement based on faculty-established [student learning outcomes](#). The College does not offer any clock hour courses or programs.

## **Analysis and Evaluation**

The College awards course credit, degrees, and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that comply with federal requirements and generally accepted standards in higher education. (ER 10).

## **II.A.10**

*The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.*

## **Evidence of Meeting the Standard**

The University of Hawai‘i System maintains a [Course Transfer Database](#) to identify equivalencies for students transferring credits within the UH system. The database also includes equivalencies for transfers from some colleges outside of the system. The College’s transfer-of-credit policies to and from other institutions are discussed in the College Catalog.

When a student transfers credits from an institution that does not have an already-established equivalency, the Admissions and Records Office works with faculty in the relevant discipline to examine the course and determine whether it is appropriate to award a transfer credit. The decision is based on whether the course substantively meets the same learning outcomes as the KCC course.

The UHCC system also has a [policy](#) on common course numbering to make it easier for students to take courses from any college within the system and smoothly transfer them back to their home campus. Additionally, [EP 5.209](#) is related to [transfer among UH colleges](#) and universities and was developed to streamline the process and make transfer across the system

more transparent to students. In particular, individual colleges can certify which of their courses meet system-defined hallmarks for general education requirements, which are then accepted at any institution within the system. Therefore, a student who earns an Associate in Arts degree at a college within the system is considered to have met all general education requirements at any university within the system.

The UH system maintains a list of [articulation agreements](#) on its Academic Affairs, Policy, and Planning webpage. Since 2012, the College has established thirteen articulation agreements with other University of Hawai'i campuses to facilitate the seamless transfer of those programs to other UH campuses, particularly the bachelor's degree granting institutions. In addition, the three UH universities have developed an express transfer process that allows students to easily transfer across the system. This process is shared with KCC students at the annual Transfer Day by university representatives.

### **Analysis and Evaluation**

The College clearly states System transfer policies to support the mobility of students. The College certifies that the learning outcomes for transfer courses are comparable to its own and develops articulation agreements when appropriate.

In addition to transfer of courses, the UH system supports reverse transfer, as detailed in [UHCC Policy 5.206](#). Reverse transfer allows community college students who transferred to a UH four-year institution before completing their Associate in Arts or Associate in Science degree to obtain that credential while progressing toward their bachelor's degree. Also, students that complete an associate's degree at the College are automatically admitted to the UH four-year university of their choice.

### **II.A.11**

*The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.*

### **Evidence of Meeting the Standard**

The College's programs have student learning outcomes which are reviewed for appropriateness by the offering division, assessment committee, curriculum committee, VCAA, and Chancellor. Career and Technical Education programs receive input on the relevance of their student learning outcomes from their advisory boards, which include industry leaders in employment areas related to the program. Each degree program is expected to have at least one course student learning outcome (CSLO) that addresses each of these outcome themes: communication competency, information competency, qualitative competency, analytical inquiry skills, ethical reasoning, and diverse perspectives. In most cases, the [outcome themes](#) are met through student learning outcomes in specific courses

within each program's major courses. However, for some programs, some outcomes themes are met through required general education courses in a program rather than in the program's major courses.

### **Analysis and Evaluation**

Every academic program develops its specific student learning outcomes to meet industry and professional competencies as well as to meet the expectations of the College's accrediting body.

### **II.A.12**

*The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.*

### **Evidence of Meeting the Standard**

UHCC policies ([UHCCP 5.200](#) and [5.203](#)) address the inclusion of a component of general education in all degree programs offered by the institution. They ensure that the institution provides an environment that supports learning, enhances student understanding and appreciation of diversity, and encourages personal and civic responsibility as well as intellectual, aesthetic, and personal development for all students.

The College's philosophy for general education is found in the [College Catalog \(p. 10\)](#). Students in all degree programs at the College are required to take general education courses commensurate with their academic program. The College's Institutional Learning Outcomes, which constitute the general education outcomes expected for all degree graduates learning outcomes, are also listed in the [College Catalog \(p. 10\)](#).

When a degree program is created or modified, program faculty document the curriculum action on a Program Action Plan (PAR). The PAR contains general education requirements for the program as well as the program student learning outcomes. Each PAR goes through the College's curriculum process, which includes review by the program's division chair, the assessment committee, the curriculum committee, the VCAA, and the Chancellor, who grants final approval. The general education requirements and learning outcomes for each degree program are listed in the College Catalog under each program's heading.

For transfer degree programs, both Associate in Art degrees and specific Associate in Science degrees, the general education requirements include the University of Hawai‘i diversifications and foundations requirements. Diversification courses fall into the categories of arts, biological science, physical sciences, humanities, literature, social sciences and science labs. Foundations cover global and multicultural perspectives, symbolic/quantitative reasoning, and written communication. The campus Foundations and Diversification committees, comprised of faculty in the related disciplines, approve those designations for general education courses based on hallmarks established throughout the system. General education courses that meet the hallmarks at one UH campus can transfer freely to meet the requirement at any other campus.

The College’s ten institutional learning outcomes stand as the pillars of its general education philosophy. All associate degree programs are designed for students to meet these outcomes. In most degree programs, all of the institutional outcomes are met as part of the program’s identified student learning outcomes. In the remaining cases, some institutional outcomes are met through a major or general education course that is required for the program. Each program maps [program outcomes with institutional outcomes](#), as well as the exceptions where a course rather than a program outcome is used to ensure the given institutional outcome is met.

### **Analysis and Evaluation**

All associate degree programs meet general education competencies as required in [UHCCP 5.200](#) and as described in the College’s General Education Philosophy. The institutional outcomes and all program outcomes are published in the College Catalog and made available on the College’s website so that students are aware of them.

### **II.A.13**

*All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.*

### **Evidence of Meeting the Standard**

Per [UHCCP 5.203](#), all programs are required to focus study in at least one area of inquiry or in an established interdisciplinary core. During the 2017-2018 academic year, the College offered eighteen associate degrees across twenty majors to provide students with the skills and knowledge required for employment or transfer. Each associate degree program at the College contains a core group of courses that provide focus in the designated area of study, including liberal arts, which has an established interdisciplinary core that is common to the notion of a liberal arts education.

The College has faculty boards to award designations that allow courses to satisfy various graduation requirements and ensure the rigor is appropriate to the degree level. Committees, such as the Curriculum Committee and Assessment Committee, make recommendations about programs and courses regarding their appropriateness to their associated degree level and ensure that the core or focused study area will allow graduates to meet program and institution student learning outcomes. In select Career and Technical Education (CTE) programs, advisory boards review and make recommendations about programs and courses in the focused study area regarding the relevance to their respective industry.

### **Analysis and Evaluation**

The College's programs include either a core area of emphasis or an established interdisciplinary core based on the intended outcomes for graduates of the program. UHCC policy makes the Chancellor responsible for ensuring that all associate degree programs include such a core. The Chancellor is the final approving authority for curricular actions, which allows her to exercise this oversight.

### **II.A.14**

*Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.*

### **Evidence of Meeting the Standard**

Career Technical Education (CTE) programs are designed to meet industry standards and remain current with employment standards through advisory boards and/or [external program accreditation](#). At a minimum, CTE advisory boards include representatives from business and industry to ensure programs remain relevant to current employment trends, competencies, and technology. All CTE programs complete Annual Program Review Updates ([APRUs](#)) to analyze demand, efficiency, and effectiveness. Where applicable, licensure pass rates are reported and reviewed during this process as well as in the annual review of [Institution Set Standards](#). Licensure pass rates for certificate programs are reported in the College Catalog and posted on the [website](#) per Gainful Employment Requirements. Student learning outcomes in CTE programs are developed by faculty based on their expertise in the field, industry required skills, employer input, requirements of credentialing agencies, and program-level accreditation standards, when applicable.

### **Analysis and Evaluation**

The College offers Certificates of Achievement, Associate in Science, and Associate in Applied Science degrees in various career and technical education fields. Programs are reviewed annually by advisory boards and/or by program-level accrediting agencies for alignment to current employment competencies and standards.

The Early Childhood Education (ECE) program has volunteered to participate in the [National High-Quality CTE Program Initiative](#) developed by the Association of Career and Technical Education (ACTE). ECE will use knowledge and experience it gains through this pilot not only to improve the program but also to prepare its application for the National Association for the Education of Young Children (NAYCE) program accreditation. Based on results from this pilot, the College will determine if it should be used by other CTE programs to ensure they are competitive nationally.

## **II.A.15**

*When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.*

### **Evidence of Meeting the Standard**

The College follows UH policy [RP 5.201](#) that requires community colleges to offer coursework to current students for up to two years to complete program requirements. When a [program undergoes significant changes](#), the College allows students that stay continuously enrolled to graduate either under the original program curriculum or the modified one

### **Analysis and Evaluation**

The College honors its commitments to students who are enrolled in programs that are eliminated or undergo major curricular change as described above. Very few degree and certificate programs have been eliminated in recent years. The Auto Body Repair and Painting Associate in Applied Science program was eliminated at the end of the 2016-17 academic year. Although the program did not accept new students after the 2016-17 academic year, it offered classes for the remaining two students so they could complete their degree in May 2017. In the 2015-16 academic year, the College eliminated the Renewable and Sustainable Energy Technologies Certificate. No student accommodations were required, as there were no students enrolled in the program.

In fall 2017, the Business Technology Program was temporarily placed on hold to undergo major revisions to make it more relevant to the current needs of the industry. No new students were admitted, with second-year courses only being offered for two subsequent semesters to allow current students the opportunity to complete their degrees under the unmodified degree requirements. Program revisions are expected to be completed so that new first year students can once again enroll in the program starting in fall 2018.

## II.A.16

*The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.*

### **Evidence of Meeting the Standard**

The institution regularly evaluates and improves the quality and currency of all instructional programs and courses, including developmental education, to enhance learning outcomes and student achievement, regardless of delivery mode. The College employs several approaches for improving instructional programs, including annual [program review](#), course curriculum review on a five-year cycle, CTE advisory boards, external program accreditation, and professional development opportunities for faculty. System wide Program Coordinating Committees provide the opportunity for faculty to benefit from their colleagues' experiences in developing and improving their programs. Additionally, reports on annual program data were provided through charts and other data visualizations, beginning in 2017, which facilitated the [comparison of programs](#) across community colleges in the system.

CTE programs present student success data to advisory boards that meet annually to identify gaps regarding relevance of instruction to current industry standards. Programs holding [industry accreditations](#) perform required reviews and comprehensive recertification evaluations.

The College does not offer any distance education programs at this time. However, there are several processes in place for the continuous improvement of distance education courses offered by the College. Courses go through the same review process mentioned above regardless of whether they are offered face-to-face or through distance education. The College also has a Distance Learning Committee that exists to ensure and improve the quality of its distance education offerings. This committee has a certification and peer review process for distance education instructors and offers regular professional development opportunities to help instructors improve their teaching practices in distance education courses.

Non-credit community education courses are offered through the Office of Continuing Education and Training (OCET). OCET meets regularly with industry, community partners, and vocational agencies to ensure that courses offered are relevant. OCET coordinators and directors are members of the Chamber of Commerce, Society of Resource Managers (SHRM), Kaua'i Economic Development Board (KEBD), various business associations, and serve on the Kaua'i Workforce Development Board (WIOA) and its subcommittees. OCET surveys students to ensure that the course suits their needs. Coordinators meet with

instructors to review course curriculum and make revisions where necessary. In addition, OCET staff meetings are held to discuss course frequency, cancellations, length, price, and expenses.

### **Analysis and Evaluation**

Assessing program and course student learning outcomes in comparison to established benchmarks, maintaining program-level accreditation standards for select CTE programs, and adhering to the College's established program review policy ensures the quality and currency of its instruction. For example, the program review of the Business Technology Program identified the need to update its curriculum to reflect the skills needed by today's businesses. The program has temporarily stopped enrolling new students while it undergoes this revision.

Another example is the reform of developmental English and math. Through the College's continual review of developmental education, it was identified that developmental students were not persisting to college-level courses at a satisfactory rate. To address this, developmental pathways were shortened, alternative placement measures were developed, and additional student support services were implemented to allow students greater access to and success in college-level courses. These initiatives were started at the College and provided the structure for the UHCC system developmental redesign initiative.

## **Section II.B Library and Learning Support Services**

### **II.B.1**

*The institution supports student learning and achievement by providing library and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)*

### **Evidence of Meeting the Standard**

The College's [learning support services](#) include a variety of programs available to all students, whether taking classes face-to-face or online. These services include access to library collections, tutoring, online resources, computer laboratories, IT Help Desk, and orientations/trainings for library users and other learning support services; which are often offered as a course activity (i.e., ENG 100 and IS 103). The student affairs and academic

affairs units collaborate to provide a variety of integrated student support services that are delivered across multiple modalities.

The first floor of the Learning Resource Center is designed for collaborative learning. This area consists of a collaborative study space in an open area, two group meeting rooms, a reference desk, computers and printers and the Academic Support Center (ASC). The ASC provides students with peer tutors, access to embedded tutors, professional tutors and many instructors hold office hours in this area.

The Library supports the programs of the College, the learning and success needs of its diverse student population, and instructional and other faculty by providing a rich variety of resources as well as instruction in information competency. The library and the ASC also provide support to online students.

Like other programs at the College, all [student support services](#) are reviewed as part of the annual and comprehensive [program review](#). [Third Party Surveys](#) such as the Community College Survey of Student Engagement (CCSSE) and Noel Levitz are also reported and discussed in program reviews, as student perception and level of engagement in services is another measure of breadth of student services.

### **Analysis and Evaluation**

Library and other support services are accessible to students and personnel both in-person and remotely. The College's robust program review process and the integration of student support among campus units helps ensure services remain varied and current to meet student and personnel needs.

### **II.B.2**

*Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.*

### **Evidence of Meeting the Standard**

Academic faculty and divisions provide input regarding the campus' [student learning resources](#) and the Vice Chancellor of Academic Affairs and the Vice Chancellor of Student Affairs co-chair the campus Integrated Student Support Committee. Additionally, one faculty member from each academic division serves on the Library Advisory Committee, which allows faculty to provide input into resource needs for students. All faculty are strongly encouraged to participate in the book selection process by reviewing new titles in Choice Book Reviews or GOBI<sup>(R)</sup> alerts. Recommendations for book purchases can be marked on the GOBI<sup>(R)</sup> Alerts and will be routed back to the head librarian as recommended purchases. In addition, the library regularly receives individual requests for purchases of books, DVDs, streaming video, and e-resources. Purchases adhere to UH purchasing policies and the [Collection Development Policy](#).

The library maintains twenty-three desktop computer workstations for students to use for research, and students may check out one of thirty laptop computers for short periods of time. The Tutoring Center, which is located in the learning commons area of the library, also has five desktop stations. All computers are maintained and replaced by the Computer Services unit of the College.

### **Analysis and Evaluation**

Although the College has had a Library Advisory Committee, it only met once per semester and focused on hard-copy learning materials. As a result, the College decided to move this committee's function of supporting selection of materials to the [Learning Resources Committee](#), which is also responsible for expanding and reviewing open educational resources. This combined committee will be implemented in fall 2018 and aligns with the College mission by engaging learners and offering both an open and affordable education.

### **II.B.3**

*The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.*

### **Evidence of Meeting the Standard**

The College evaluates the adequacy of its [library](#) and other learning support services through the program review process. Each service unit has defined metrics and learning [outcomes](#) that are analyzed for program review. In addition, an academic support survey was coordinated yearly by the College with faculty and staff evaluating various support services in academic support until 2015. The survey measured how faculty and staff perceived the role the library played in student learning (See Academic Support Survey for 2012, 2013, 2014, and 2015). After the reorganization of the Academic Support unit with Student Services in January 2017, a new faculty/staff survey was developed to evaluate library and tutoring services, which became part of the newly created Student Affairs unit. The survey also evaluates testing services, which is currently housed under the Office of Continuing Education and Training, but will move to Student Affairs in fall 2018

Library data analyzed in the program review process included statistics on use of resources by students and staff, dissemination and analysis of an annual student survey, and assessment of program student learning outcomes. The library has continued to improve its services based on student survey results over the past five years, and all survey questions, with exception of one on whether or not the Library is a comfortable place to study, had over 90% agreement/satisfaction in the most recent survey. [Tutoring Center](#) data reviewed each year includes a review of statistics on CCSSE survey results, the percentage of students

passing a course they were tutored in, the usage of online tutoring services, the number of students per tutor, and student evaluations of tutors.

### **Analysis and Evaluation**

Student learning support services engage in the College's robust program review process that requires analysis of data for continuous improvement, including data on achievement of student learning outcomes. For example, the library will be monitoring student satisfaction with comfort in the library to see if it returns to typically high levels now that the library has moved back to its regular location after having been displaced for two years due to building renovations.

Another example of continuous improvement resulted in the implementation of embedded tutors in math and English courses. Surveys indicated that students desired more time with their tutor. Also, it can be noted that a small percentage of the students take advantage of the tutoring center. As a result, the ASC decided to implement embedded tutors in math and English classes, because they increase the number of students who are exposed to a tutor. As a result, students may feel more comfortable seeking assistance in the ASC where they may receive additional tutoring services.

The mathematics faculty noticed that some students are much more comfortable receiving assistance in the ASC than in faculty offices. Therefore, the mathematics discipline requested that each faculty member hold office hours in the ASC. Other disciplines, such as English and chemistry have followed suit.

### **II.B.4**

*When the College relies on or collaborates with other institutions or sources for library and other learning support services, it documents that formal agreements exist and that such resources and services are easily accessible and utilized and adequate for the College's intended purposes. The College takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)*

### **Evidence of Meeting the Standard**

The library is currently in various forms of collaboration with other libraries and vendors. The largest is the Hawai'i Libraries Consortium (HLC), consisting of libraries of the University of Hawai'i Libraries System, the Hawai'i State Public Libraries System, the Hawai'i State Department of Education, various private colleges and schools, and other organizations. Within the University of Hawai'i Libraries System, there are [Intrasystem Loan](#) and [Lending Policies](#) in which the various campuses agree to share resources. The College also has service agreements with various vendors that provide learning support services. These include many of the library's e-resources such as Credo

Online Reference Service, Ebsco products, Films on Demand, Encyclopedia Britannica, ProQuest products, Science Direct, CQ Researcher, and Kanopy. These services are communicated to students during orientations, and access to these services is integrated into the Library website. The assessment of library services is gathered via end-of-semester surveys (see II.B.2) that are administered to students who have undergone library instruction. New agreements are presented in the program review process and supported by data and a budget request.

The Tutoring Center contracts with a service to provide round-the-clock tutoring to students over the web. This provides additional support for distance education students who cannot make it to a physical appointment in the Tutoring Center. The College tracks usage and satisfaction (link survey) with its [contracted tutoring services](#), and the Tutoring Center coordinator has communicated with faculty about the quality of the services.

The College is committed to virtual and physical resource security. Digital resources must be accessed using a University of Hawai‘i (UH) login and password, whereas physical library resources are tagged and all students entering or departing the library must pass through a scanner. Identification is required if a library resource is checked out by a student, staff, or faculty.

### **Analysis and Evaluation**

The College collaborates with the UH system and other agencies and vendors to adequately provide library and learning support for instructional programs. Evidence is collected and evaluated annually to ensure that these services are easily accessible and utilized. In addition, measures are in place regarding security of both digital and physical library and student support resources.

### **II.B. Evidence**

II.B.4-1	Intrasystem Loan Policy
II.B.4-2	Intrasystem Lending Policy
II.B.4-3	Contracted Tutoring Services Data

## Section II.C Student Support Services

### II.C.1

*The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER 15)*

#### **Evidence of Meeting the Standard**

The College is committed to providing the following core student support services, regardless of location or means of delivery:

<b>Core Service</b>	<b>Access Methods</b>
Admissions and Records	Students can apply and register online, with assistance in person at the College or with assistance at local Department of Education (DOE) High Schools. Students can complete these activities during enrollment days which occur on weekdays and weekends
Financial Aid	Students can apply online, with assistance in person at the College or with assistance at local DOE High Schools
Placement Assessment	Students can take a placement test at the College or at local DOE high schools. Multiple measures are utilized so that high school grades, test scores and coursework may be used for placement. Students can complete placement activities during enrollment days which occur on weekdays and weekends
Orientation Services	Students can complete orientation online or in-person during enrollment days which are offered on both weekdays and weekends

Access to Complaints, Grievances, and Students Rights and Responsibilities	Students may file a complaint or grievance by email or in person. Access to Student Rights and Responsibilities is available online in the student handbook.
Disability Services	Students may access disability services in person at the College.

The College evaluates these support services annually through the program review process. All programs are required to discuss how they align with the [College’s Mission](#), UHCC Strategic Priorities, and the College’s Strategic Goals, as well as collect and/or review [benchmarked data](#).

The annual program review update (APRU) is the primary driver through which the College assesses and improves its student support services, while the comprehensive program review, a more thorough and extensive assessment, is conducted every five years. Program review data summarizes key information including the following: student learning findings, efficiency and demand indicators, Achieving the Dream (AtD) success measures, effectiveness indicators, and results of college-wide surveys, including an assessment of student engagement and satisfaction (Community College Survey of Student Engagement, CCSSE, and SENSE). Representatives from Student Support Services convene to discuss the contents of their program reviews and to identify where to target collaborative efforts in the coming year. This discussion takes place in the Student Affairs Leads meetings and the All Student Affairs meetings that are held every few weeks.

**Analysis and Evaluation**

The College uses a robust program review process to evaluate the quality of student support services annually and comprehensively every five years. Analyses of data regarding demand, efficiency, and effectiveness provide information regarding the impact on student learning, whereas surveys provide direct feedback from students to ensure quality and suitability to the current student population. All programs are required to discuss how their mission aligns with the College’s mission in each program review.

**II.C.2**

*The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.*

The College offers a number of targeted support services in addition to the core services discussed in II.C.1. Core and support service programs at the College have [outcomes](#) that are assessed annually in the program review process. Results from assessments are used to develop action plans to strengthen or expand services.

### **Analysis and Evaluation**

The program review process includes analysis of data for continuous improvement of student support services to assist students in achieving their academic goals. After the completion of the 2017 cycle, many units determined that their outcomes were dated or not easily measurable. In response, these units wrote new outcomes to provide a better assessment of their services. For example, Counseling and Advising engaged the Office of Institutional Research for data review and analysis to determine if their Program Learning Outcomes (PLOs) were assisting students with certificate, degree, or transfer completion. One of the former PLOs involved a check-in with students once they earned thirty credits, which was aimed at guiding these students towards completion. The institutional researcher reported that 65% of currently inactive students dropped prior to completing twenty-four credits. Therefore, the Counseling and Advising unit has adjusted this outcome to better align with current student trends.

### **II.C.3**

*The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method. (ER 15)*

### **Evidence of Meeting the Standard**

The College offers comprehensive student support services, most of which are available in-person, online, by email, telephone, or mail (e.g., US Postal Service or facsimile). Commonly used services, such as admissions/records, counseling, career center, disability and mental health, bursar, administration (student affairs and academic affairs), financial aid, and the testing center have been consolidated into one building, the One Stop Center (OSC), to increase visibility and access to students. The campus also has a [Wellness Center](#) that offers the immunizations and TB testing required for students to enroll at the College. All in-person services are open to students during normal operating hours. Students also have access to the library, Academic Advising and Counseling, new student orientation, financial aid, Tutoring Center, and the UH [bookstore](#), services both in-person and remotely.

During the 2016-2017 academic year, the UHCC developed new support tools for implementation across the seven community colleges to expand online student services. These included an online UH application and the Starfish tool within the MyUH student portal, which students can use to view course schedules, including system-wide online courses, link to orientations and tutorials, request transcripts, and access financial information. Additionally, students can register for courses online using the STAR GPS tool.

## **Analysis and Evaluation**

The College offers comprehensive student support services both in-person, remotely (e.g., telephone and mail), as well as virtually (e.g., online) to ensure access to all students. The College also implements UHCC tools and resources to expand services for students. In an effort to improve services to current and prospective students, the College is embarking on focused outreach efforts as part of its Quality Focus Essay plan on Integrated Career and Academic Services.

### **II.C.4**

*Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.*

## **Evidence of Meeting the Standard**

The Student Life and Development Office oversees co-curricular activities on campus and the Student Life Coordinator is a member of the Association of Student Unions - International (ACU-I) and abides by their [Code of Ethics](#). Although college faculty oversee student life and serve as club advisors, clubs and organizations are student-led and governed. Providing these co-curricular opportunities is aligned with the College's mission of preparing and supporting students individually and collectively to succeed in academic endeavors and engage in lifelong learning. The major elements of Student Life follow Board of Regents policies and include:

- [Associated Students of the University of Hawai'i - Kua'i Community College Student Government](#) (ASUH-KCC SG) – The College's [chartered](#) student government, which also provides two representatives to the [University of Hawai'i Student Caucus](#), the system wide association of all campus student governments; Provides governance leadership training and development opportunities for students;
- [Student Activities Council](#) – The College's chartered student organization that plans co-curricular activities;
- Registered [Independent](#) Campus Organizations (N = 27) – Special interest groups reflecting the diversity of students, including academic, service, cultural, recreational, and religious student clubs (see p. 34 of the [College Catalog](#)).

Like other programs on campus, Student Life undergoes annual program reviews and five-year [comprehensive review](#) to monitor and evaluate demand, effectiveness, program outcomes, and coherence to the College mission, per [RP 7.201](#). Additional data are obtained from student interest surveys that are administered every few

years (see [2017 Student Life Program Review](#)), and an evaluation of longitudinal student participation/attendance data.

Authority is given to the UH President and delegated to chancellors to approve the budget for student organizations, per [Board of Regent Policy 7.202](#) and [Executive Policy 7.101](#). Currently a \$30 [Student Activity Fee](#) is collected from each student each semester, and is appropriated by the State to ASUH-KCC SG for the specific purpose of carrying out and achieving its educational responsibilities, programs, and related activities. The Student Activities Council is allocated a portion of the Student Activity Fee to plan and offer co-curricular activities. Both Student Government and the Student Activities Council are Chartered Student Organizations and their expenditures are compliant with all university [policies and procedures](#).

There is no organized Intramural Athletic program at the College.

### **Analysis and Evaluation**

Co-curricular programs are aligned with the College's mission and are designed to augment the education experience for all students with social and cultural priorities. The UH system has well-defined procedures on student organizations as well as fiscal controls, which apply to all universities and colleges in the system.

### **II.C.5**

*The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.*

### **Evidence of Meeting the Standard**

Upon enrollment, each student is assigned to an academic advisor according to their [program of study](#) in an effort to develop a continued, sustained relationship with a specific advisor. Advisors are engaged with program faculty and the curriculum process so that they understand all aspects of student educational planning, including major requirements, course sequencing, prerequisites, and scheduling issues. It is mandatory for new students to meet with an advisor and attend New Student Orientation (face-to-face or online) before registering for courses. During the initial appointment, the advisor and student clarify educational and career goals and develop an action plan utilizing an academic planner instrument. Besides course sequencing and registration, this planner allows for taking notes on life goals, career exploration, and transfer intent, which may require different courses depending on the institution. Advising is available to students throughout the year by appointment, email, or telephone.

In 2016, the College implemented the STAR Academic Essentials and STAR GPS registration programs, which are online planning and registration applications. Academic Essentials is an online advising tool that tracks the completion of program requirements. Prior to course registration, students identify the program of study or meta-major they will explore. STAR GPS then provides a template which outlines the sequence of program requirements to ensure timely completion.

Academic advisors stay current on best practices through professional development. They regularly attend the annual [Academic Advising and Transfer Network](#) conference.

The UHCC system also holds an annual Spring conference, [Hawai'i Student Success Institute](#), which brings together administration, faculty, and staff. These conferences provide opportunities for receiving and discussing information on upcoming initiatives, program and system wide updates, and learning about best practices in higher education from both national experts and colleagues within the community college system. Individual counselors also attend professional development conferences pertaining to their specific program needs as well as college committees and meetings. For example, counselors attend program, division and advisory board meetings, as well as, course scheduling and low-enrollment meetings to offer insights into curricular decision making.

The Student Success Coordinator and counselors and advisors provide timely, useful, and accurate information about relevant academic requirements and available resources. This information is conveyed to students during one-on-one advising appointments and during the New Student Orientation. The New Student Orientation, offered both in-person and online, provides new students with information about:

- Academic expectations and progress standards
- Description of available programs, support services, and campus facilities
- Academic calendar and important deadlines
- Registration and overall cost of College attendance
- Available education planning services
- How to interpret English and math placement scores
- How to schedule classes, manage time, and calculate GPA
- Financial aid and scholarships
- Policies and procedures on transfer, graduation, and No Show/Drop policies
- Transferring to a four-year university

### **Analysis and Evaluation**

Academic advising is the primary responsibility of the faculty counselors within the Counseling and Advising Office. The counselors hold weekly meetings to share and discuss the myriad of system and campus initiatives involving student success and campus academic issues as well as to provide updates on recently attended professional development.

Academic advisors and admissions specialists from various programs throughout the system meet to share information about transfer opportunities and provide program updates.

Financial support for system meetings is provided by the College and through the UH Foundation.

The UH system has adopted tools for clear navigation through course registration process and presents easily understood program requirements and placement scores. Graduation certification is accomplished using the Academic Essentials evaluation tool, and remaining requirements are communicated to students in real-time when they login to the STAR GPS system. This system was initially piloted by selected programs at the College but has been expanded to all students during the 2016-2017 academic year.

A STAR users group is closely examining important system implications such as course scheduling, program sequencing, course coding in Banner, STAR rules writing, and value to students in reducing time-to-degree. At the time of this writing, the College is advertising for a full-time counseling position that will have responsibilities for overseeing the STAR GPS system.

## **II.C.6**

*The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER 16).*

### **Evidence of Meeting the Standard**

The College is an open admissions institution sanctioned by Board of Regents [policy](#), which provides opportunities for the residents of Kaua'i to access higher education consistent with the College mission. The College's admissions policy is published in the [College Catalog \(p 16\)](#). Admissions criteria are also stated on the College's website.

Some of the College's associate [degree programs](#) have more stringent admission policies, which are approved by the Curriculum Committee and published in the [College Catalog \(p 97\)](#) on the program page (e.g., Nursing) and on the College's [website](#). These policies reflect external accreditation standards and/or clinical site requirements. The College also has some cohort programs with a cap on the number of students in a cohort. These programs admit students on a "first applied, first qualified" or "most qualified" basis.

The Counseling and Advising Office uses an academic planner instrument to help students develop customized academic plans to reach their goals, where course sequencing, schedule offerings, and prerequisites are considered. As noted in Standard II.C.5, the College recently implemented STAR GPS Registration, an online planning and registration tool developed by the UH system to guide students through their academic pathway. Graduation certification is accomplished using the Academic Essentials evaluation tool, and remaining requirements are communicated to students in real time when they login to the STAR system.

### **Analysis and Evaluation**

The College follows publicized admission policies, including open admissions, that aligns with its stated purpose. Programs with more stringent admissions requirements are clearly stated in the College Catalog and on the College's website. Advising tools such as STAR GPS and the Academic Planner are employed by advisors to guide students through their educational pathway, which may include obtaining a certificate, degree, or transferring to a four-year university.

## **II.C.7**

*The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.*

### **Evidence of Meeting the Standard**

The College is part of the University of Hawai'i system, which has an open admissions policy for all community colleges. Because the mission of our institution is to provide education to individuals with a high school diploma or GED, changes to the admission policy would only stem from a change in the overarching community college mission. Some academic programs have additional admission requirements, and these programs review their requirements annually to align with external accreditation, workforce trends, and/or advisory board recommendations.

System-approved placement test cut-off scores are particularly important in a multi-campus community college system where students may attend multiple campuses in a given semester. During the past five years, the English and math departments have **reduced the time** needed to complete the remedial and developmental English and math tracks. The College's math program was a system leader in the development of a non-STEM math pathway in addition to the traditional STEM pathway. The College partnered with UH Maui College to run a pilot for placement into college-level English and math using high school transcript information. The pilot grew into new **alternative placement criteria** that were adopted as part of the system wide redesign of developmental education. For students who do not meet the alternative placement criteria, the College utilizes the Accuplacer placement test. Placement testing information is available on the College's website.

### **Analysis and Evaluation**

The College, along with the UHCC system, has adopted new placement methods as part of its recent developmental education redesign initiative. These methods were informed by a successful pilot project at the College and by a national conversation around alternative placement. The methods are under study by the Student Success Council, which includes input from mathematics and English faculty throughout the system. **Initial findings from 2016-2017 data** indicate that there has been an overall increase in students completing college-level English and math courses within the first year, including students who would have traditionally placed into courses below college-level. Ongoing changes to

optimize outcomes for students are expected as the redesign initiative continues. For example, math faculty at the College are involved in a system work group that is exploring replacing Accuplacer with EdReady. The benefits include vastly reduced cost and the ability to combine placement testing, test preparation, self-guided reviews, and a remediation plan into a single tool.

### **Standard II.C.8**

The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. Banner and application records are backed up daily. The institution publishes and follows established policies for release of student records.

### **Evidence of Meeting the Standard**

In compliance with the University of Hawai'i system wide executive policy and administrative procedures, the College maintains student records securely and ensures backup of all files, per [policy](#) and [procedure](#). As the record custodian of the College, the Admissions and Records Office stores all electronic documents and data on a [secure drive](#). The drive is maintained and monitored by the College's Computer Services Department. Electronic student data is protected and securely stored in Banner. Access to Banner student information is available only to select individuals and requires approval from the campus [data steward](#). The level of access to student data is determined by an individual's position and need for access. Social security numbers are restricted and not used to identify students. Instead, students are issued randomly generated student identification numbers when they are admitted into the UH system. Students also have access to a password-protected personal UH account that provides online services, including email and access to academic records.

All employees with access to personally identifiable information, per [EP 2.215](#) are required to complete the [UH Information Security Awareness Training](#). The training was developed to educate the UH community on the proper handling of sensitive information and UH policies and procedures related to protecting sensitive, personal and confidential information. In addition, individuals are required to sign the [University of Hawai'i General Confidentiality Agreement](#), which is submitted to the Office of Research Services.

Student documents and data are retained for specific time periods as recommended by the American Association of Collegiate Registrars and Admissions Officers (AACRAO). In compliance with the UH administrative procedures and Family Educational Rights and Privacy Act of 1974 (FERPA), policies for the release and withholding of student records are stated in the College catalog (p 41-42) and on the College's [website](#). Students may request their academic records by submitting the [Transcript Request Form](#) in-person, by mail, or by fax. Transcripts may also be requested online through the [National Student Clearinghouse](#).

## **Analysis and Evaluation**

The College follows UH system policies on data storage, access to sensitive information, student records, data governance, and records management. For example, records in the student management system are safeguarded and social security numbers are not listed. The College hosted a training on updated UH data governance policies on February 14, 2018 and staff from Admissions and Records, Computer Services, Financial Aid, and Institutional Research were in attendance.

As another measure to ensure confidentiality, Admissions and Records and Financial Aid staff are required to attend FERPA training and webinars when made available. Recently, on December 7, 2017, these staff attended [FERPA 101 Training](#), which was presented by the director of the Privacy Technical Assistance Center of the United States Department of Education.

## **Standard III: Resources**

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college Systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/System. In such cases, the district/System is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

### **III.A Human Resources**

#### **III.A.1**

*The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.*

#### **Evidence of Meeting the Standard**

Criteria, qualifications, and procedures for selection of administrators, faculty, and staff are clearly and publicly stated. College employees are either Board of Regents (BOR) appointees or State of Hawai‘i Civil Service employees. BOR appointees are categorized as Faculty, APT (Administrative, Professional, and Technical), or Executive/Managerial personnel, and are subject to classification and qualification rules established for these employees. Faculty, APT, and Administrators (Executive Managers) are required to complete an [application form](#) that details education, experience, and professional activities directly related to the position. Support staff, including clerical and grounds and maintenance staff, are State of Hawai‘i Civil Service employees subject to civil service classification and qualification rules, as well as collective bargaining agreements.

The University of Hawai‘i Community Colleges (UHCC) System developed hiring practices for all employee groups to assure appropriate experience, qualifications, and education. Faculty positions are written based on [minimum qualifications](#) that meet institutional and/or program accreditation standards, whereas APT positions are developed using the University of Hawai‘i (UH) Position Description Generator to assure appropriate education and experience based on responsibilities, duties, and authority. All BOR appointed positions are publicly posted on the [Work at UH website](#), which includes detailed directions on how to apply. Civil Service positions exist within the University as well as other state agencies; hence, their recruitment is controlled by the State Department of Human Resource Development (DHRD). As a result, Civil Service position descriptions must adhere to statewide job class specifications, and must be approved by the UH System Office of Human Resources before the two-step recruitment process can begin, which is to: 1) internally advertise to all Civil Service employees within the University through the Work at

UH website and 2) externally advertise by DHRD through the [State's Civil Service Job Listing](#).

UH System wide administrative policy [AP 9.540](#) describes the procedures for recruitment and selection of Faculty and APT personnel. These procedures ensure compliance with the University's hiring policies, affirmative action and equal employment opportunity guidelines, and its respective collective bargaining agreements. The System Director of Human Resources, Director of EEO/AA, or Campus EEO/AA Coordinator oversees the hiring unit/screening committee process, per the checklist attached to AP 9.540, to ensure a consistent process for vetting applicants.

The position description and list of duties/responsibilities are provided in all advertisements and describe the authority of the position as well as how it will serve the mission of the College. New positions and vacant positions are reviewed by the vice-chancellor or director that oversees the area of the position to assure their alignment to the mission and strategic plan. New positions must be presented to College Council for priority ranking in the Annual Program Review Update process, whereas replacement of vacant positions are brought to College Council to seek a recommendation for allocation of funds to support its refilling.

### **Analysis and Evaluation**

The College adheres to System recruiting and hiring policies and aligns positions with the College's mission and strategic priorities. The college clearly states authority, duties, and minimum and desirable qualifications in all job descriptions. Positions are publicly advertised and the Work at UH website describes the steps necessary to apply.

The College's hiring policies and practices lead to the hiring of well-qualified faculty, staff, and administrators. Results in the last [Administrative Services Survey](#) administered to students and staff in the fall of 2017 indicate high percentages of responding students and employees believed that the College had sufficiently qualified faculty (89% agreed), staff (86% agreed), and administrators (85% agreed) to effectively support its programs and services.

### **Action Item**

The College will use the current Administrative Services survey results to establish baseline target values for future surveys. The survey will be given every two years in the future, and used to inform the Administrative Services Annual Program Review Update (APRU).

## **III.A.2**

*Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and*

*potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)*

### **Evidence of Meeting the Standard**

Teaching faculty in any discipline must meet the [minimum qualifications](#) (MQs) set forth and published by the UH System. The MQs include degrees appropriate for the subject matter as well as professional and teaching experience. These MQs are the same for lecturers as for full-time faculty. The expertise of the hiring unit is employed to ensure that job descriptions are written to be aligned with student, programmatic, and institutional needs. Instructional faculty position descriptions are created using a [template](#), which includes expected duties related to curriculum and assessment, and are reviewed by the Vice-Chancellor for Academic Affairs (VCAA) to assure alignment with the college's mission and strategic plan.

Applicants for faculty positions are required to complete an [application form](#) that details degrees, education, courses taught, professional experience, and scholarly activities directly related to the position.

### **Analysis and Evaluation**

The application process and required minimum qualifications provide the structure for the college to hire faculty that are skilled and knowledgeable in their discipline. Additionally, job descriptions for teaching faculty include the development and review of curriculum as well as the assessment of student learning.

In the [Fall 2017 Administrative Services Survey](#), 98% of responding students and 84% of responding employees agreed that the College had sufficiently qualified faculty to effectively support its programs. This is indicative of a general sense throughout the campus that the College delivers effective instruction through faculty who are both qualified and capable.

### **III.A.3**

*Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.*

### **Evidence of Meeting the Standard**

Administrative positions responsible for educational programs and services are developed according to [UH Executive Policy 9.212](#). The current administrators [possess](#) the minimum education and experience requirements detailed in their job descriptions.

Each academic division at the college has a faculty Division Chair. Chairs must be at least Rank 3 (Assistant Professor), as outlined in the University of Hawai'i Professional Assembly (UHPA) Contract, KCCP 4-02, and University of Hawai'i Community Colleges Policy (UHCCP) 9.237. Candidates for Chair are recommended by their academic divisions and selected by the Chancellor. These selection procedures are described in KCCP 4-08.

The [current division chairs](#) as of the spring 2018 semester hold the minimum rank, per policy, and teach in disciplines within their respective division. Additionally, each academic program at the college has a faculty Program Coordinator. Coordinators are nominated by their academic divisions and selected by the Chancellor for their expertise in the discipline and their ability to effectively manage the program, per [KCCP 4-11](#).

### **Analysis and Evaluation**

Administrators and employees responsible for educational programs and services possess the necessary qualifications to perform their duties to promote academic quality and institutional effectiveness.

In the [Fall 2017 Administrative Services Survey](#), 89% of responding students and 83% of responding employees agreed that the College had sufficiently qualified administrators to provide the continuity of leadership necessary to achieve its mission and goals.

### **III.A.4**

*Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.*

### **Evidence of Meeting the Standard**

When the College hires for a position, a screening committee (see III.A.1 and [AP 9.540](#)) is formed. The committee reviews all complete applications, checking that each applicant meets the minimum qualifications for the position. As part of this check, the committee examines any transcripts included in the application and verifies that degrees have been granted from institutions that are accredited by recognized U.S. accrediting agencies or that the candidate has included an equivalency review of their degree(s) by a recognized agency such as the National Association of Credential Services.

Before offering the position to an applicant, the relevant supervisor (e.g. the VCAA for teaching faculty positions) makes a final check of all credentials, including a check of degrees according to the rules described above.

## **Analysis and Evaluation**

The College has a process to ensure that employees hold degrees from U.S. accredited institutions, or an equivalent non-U.S. institution. This requirement is stated on all UH job postings, by stating this requirement on all UH job postings, and degrees are checked by both the hiring committee and the relevant supervisor.

### **III.A.5**

*The institution assures the effectiveness of its human resources by evaluating all personnel Systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

## **Evidence of Meeting the Standard**

The College has a review process for each employee classification, which varies based on bargaining unit contracts and UH policy.

<b>Employee Classification</b>	<b>Formal Procedures</b>	<b>Summary</b>
Civil Service	<a href="#">Performance Evaluation Overview</a> (restricted access)	Probationary employees are reviewed at six month intervals the first year, then every year thereafter.  At the start of the evaluation period the employee must set working goals with the supervisor. At the end of the evaluation period, the employee and his/her supervisor will discuss the performance of the employee and confirm that the employee has met their goals listed at the start of the evaluation.
Faculty (Full-time and Lecturers)	Faculty Evaluations ( <a href="#">KCCP 4-13</a> )	Full-time tenure-track faculty are evaluated for contract renewal in years 2 and 4, and for tenure in year 5. Beyond tenure, promotion intervals are typically every 4 years. Faculty must submit performance reviews every 5 years if they

	<p>Tenure Promotion Guidelines and Application</p> <p>Probationary Contract Renewal Guidelines</p> <p>Non-Probationary Contract Renewal Guidelines</p> <p>Acting Instructor Contract Renewal Guidelines</p>	<p>have not submitted a successful promotion application within that time period.</p> <p>Non-tenure track full-time faculty are evaluated annually.</p> <p>Lecture faculty are evaluated annually if at rank A, biannually if at rank B, and quadrennially if at rank C. Lecturers must submit one peer evaluation to their division chair, results of student evaluations for all classes taught, a self-analysis of the degree of attainment of student learning outcomes in the classes taught, instructional strategies and their effectiveness in each course, and any planned actions as a result of evaluations and/or responses prior evaluation recommendations, if any.</p>
APTs	AP (Administrative Procedure) 9.170 - Administrative, Professional, Technical (APT)	APTs have annual performance evaluations each fall; or on the employee's anniversary during the 3-year probationary period. The Performance Evaluation is completed online and employees develop performance objectives in collaboration with their supervisor at the beginning of each evaluation cycle.
Executive/Managerial	Executive Policy EP 9.212	All EM personnel with at least six (6) months of continuous EM service by March 1st of the evaluation year are evaluated. EM evaluations are conducted on an annual basis to provide feedback regarding the achievement of goals and objectives, expectations, accomplishments, and overall performance. The evaluation includes specific metrics aligned to the University's strategic vision and the identification of goals and objectives to be accomplished in the coming year. The evaluations also include 360 evaluation

		by peers, subordinates, and external constituents.
--	--	--

**Analysis and Evaluation**

The College has evaluation policies and procedures for all employee groups, which are structured to both assess the effectiveness of its personnel as well as promote professional growth and improvement.

**Action Item**

The Human Resources office will develop a list of review dates for APT evaluations to remind supervisors of review deadlines.

**III.A.6**

*The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.*

Effective January 2018, Standard III.A.6 is no longer applicable. The Commission acted to delete the Standard during its January 2018 Board of Directors meeting.

**III.A.7**

*The institution maintains a sufficient number of qualified faculty, which includes full-time faculty and may include part-time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.*

**Evidence of Meeting the Standard**

Each academic program performs an Annual Program Review Update (APRU) along with a five-year Comprehensive Program Review that includes data on the number of faculty assigned to the program and the faculty-to-student ratio. During these reviews, if a program identifies a need for a new or replacement faculty or staff position, then the program or division submits the request through the APRU process. This process involves the ranking of positions and other budgetary requests based on a rubric that includes elements for how well the request aligns with the campus strategic plan goals and for whether data demonstrates the need for the position. Requests that rank highest based on the rubric and availability of funds are reviewed by the Chancellor prior to final approval. The [Faculty MQs Guidelines](#) assure that qualified faculty are hired to fill any new or vacant position.

The College’s academic divisions can hire lecturers to fill additional teaching duties when necessary. However, the College employs more regular faculty than lecturers, and the number of lecturers employed per academic year has generally been decreasing since the 2012-2013 academic year (AY).

	AY12-13	AY13-14	AY14-15	AY15-16	AY16-17
Full-time Faculty	79	80	77	75	80
Lecturers/Part-time	50	51	40	32	32

### **Analysis and Evaluation**

As noted in Standard I, one of the College’s mission practices is to deliver educational opportunities on campus in small classes. One of the College’s unique features is its low [student-to-faculty ratio](#), which has held steady near 12:1 over recent years. The college’s program review process incorporates an analysis of student-to-faculty ratios in each program. As of the 2016-17 academic year, no program had more than 50 student majors per faculty.

In the [Fall 2017 Administrative Services Survey](#), 96% of responding students and 81% of responding employees agreed that the College maintains a sufficient number of faculty to effectively support its programs. This is indicative of a general sense throughout the campus that the College employs enough faculty to consistently deliver effective instruction.

### **III.A.8**

*An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.*

### **Evidence of Meeting the Standard**

All faculty, including lectures, are evaluated per policy and provided an orientation, integration into campus life, and have opportunities for professional development.

**Orientation:** All new full-time and part-time faculty are encouraged to participate in “New Faculty and Staff Orientation,” which occurs at the beginning of each academic year during the Welcome Back Week. These orientations disseminate information such as New Faculty and Staff Handbooks, ethics and other policies, a campus directory of employees and

services, and the college mission and strategic priorities. Additionally, [team building](#) and [other professional development activities](#) are offered to new employees to assist in campus life assimilation.

In addition, each academic division is responsible for [integrating lecturers](#) into the division and providing continuous mentoring and support to lecturers. Lecturers with a workload greater than 7.5 teaching equivalencies in a semester are part of the faculty collective bargaining unit, are considered voting members of their academic division or unit, and are constituents of Faculty Senate.

**Evaluation and oversight:** All lecturers, whether full-time or part-time, are subject to evaluation and must hold the same academic qualifications as full-time faculty, per [UHCCP 9.104](#) and [KCCP 4-13](#). Evaluation frequency depends on the employment level of the lecturer (A: Entry, B: Intermediate, or C: Senior). Minimally, reviews occur once per year, once every two years, or once every four years for step A, B, and C lecturers, respectively. All lecturer evaluations must include one peer review, all student evaluations of teaching, and a self-analysis covering student attainment of learning outcomes, effectiveness of teaching, an analysis of evaluations, and responses to prior evaluation recommendations.

**Professional development:** The College offers training opportunities both face-to-face and via webinar. These are organized by the Professional Development Coordinator and are listed on the [Professional Development website](#). Training opportunities are available to all faculty, including lecturers (part-time and full-time). Lecturers may also apply for Foundation funds for monetary professional development support. More detail is found in III.A.14 below.

All lecturers are invited to campus-wide faculty meetings, ‘ohana gatherings, and professional development events. Attendance is optional.

### **Analysis and Evaluation**

The College adheres to lecturer hiring policies and practices, which include formal evaluation. To help coordinate evaluation of lecturers, the VCAA provides a list of all lecturers along with their level to all division chairs.

Although lecturers are invited to meetings, professional development, and campus community events, a challenge regarding participation is that they often have other employment and cannot always take the time off from their other job(s). Although they cannot replace all of the face-to-face opportunities for involvement at the College, webinars and other “at-your-own-pace” training opportunities that are offered may be the best way for some busy lecturers to stay engaged in professional development.

### **Action Item**

The College will create a guide for orienting and mentoring lecturers.

### III.A.9

*The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)*

#### **Evidence of Meeting the Standard**

(Note that in some areas that may typically be considered ‘staff, Kaua‘i Community College’s employees are classified as faculty. For clarity, these employees will be discussed in this standard.)

Sufficient [support staff](#) is essential to maintain effective campus operations ([College Organizational Chart](#)). Annual Program Review Updates are performed by each program or department to review its indicators for health, demand, effectiveness, and efficiency. Through this process, if the need for new or additional personnel arises, a position request is generated and submitted to College Council. College Council ranks all position requests, along with other budgetary requests submitted during the program review process, and they are funded according to their priority ranking and the availability of resources. The Office of Human Resources ensures that all personnel hired on campus meet the minimum qualifications for the position.

#### **Analysis and Evaluation**

Support staff at KCC is sufficient in number with qualified individuals for the effective operation of the College’s educational, technological, physical, and administrative functions. This assertion is supported by survey results. The [Fall 2017 Administrative Services Survey](#), examined both the quantity and quality of support staff necessary to support the College’s programs and services. In terms of quantity, 93% of responding students and 85% of responding employees agreed that the College had a sufficient number of staff to effectively support its programs and services. In a similar question on quality, 96% of responding students and 80% of responding employees agreed that the College had sufficiently qualified staff to effectively support its programs and services.

During the 2017-2018 program review process, several areas identified the need for additional support staff. One area was Institutional Effectiveness, which was developed into a unit as of January 2017. One responsibility of this unit is marketing and outreach, which includes maintaining the College’s website. The current Webmaster is partially grant-funded and the need for institutionalization of the position became apparent as the new website was being developed to not only meet Americans with Disabilities Act (ADA) requirements but also UH System guidelines. This request was ranked number one by College Council and will be advertised in early 2019 before grant funds are depleted.

### III.A.10

*The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes. (ER 8)*

#### **Evidence of Meeting the Standard**

The College currently employs six executive managers (administrators). While no formal administrative staffing ratios have been established, the staffing levels for executive/managerial employees are reviewed and compared across the colleges and approved by the Board of Regents (BOR), per the [UHCC Functional Map](#).

All administrators are qualified with the appropriate preparation and expertise for the positions they hold in accordance with [EP 9.205](#), which states the minimum qualifications in academic managerial and executive positions (see STD III.A.3 for incumbent administrators' qualifications). Executive Manager job descriptions are written to assure the positions align with the College's mission.

#### **Analysis and Evaluation**

The college maintains a sufficient number of qualified administrators that is on par with other community colleges in the System (e.g., [2-3% of employees](#)). In the [Fall 2017 Administrative Services Survey](#), 90% of responding students and 84% of responding employees agreed that the College had a sufficient number of qualified administrators to provide the continuity of leadership necessary to achieve its mission and goals.

Although the college has the lowest enrollment within the UH System, it still must provide the same level of academic quality and support services as the other campuses. Nevertheless, the college is currently the only campus in the System with no academic deans, which is inconsistent with UHPA contract [provisions](#) for faculty evaluations. Hence, in 2017, the VCAA submitted an APRU request to establish an academic dean position, which was ranked number 16 out of the 25 total requests that were approved and funded. However, due to a number of concerns raised by faculty about the addition of this position, the College spent the 2017-2018 academic year evaluating the need for the position. This evaluation was conducted by a task force, convened by the Chancellor, which was comprised of the VCAA, the chair of Faculty Senate, and a faculty representative from each academic division. Furthermore, the Chancellor shared and discussed the results of the task force with College Council prior to making her decision, which was ultimately to approve it and make a request to the UHCC System for this additional executive position.

### III.A.11

*The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

## **Evidence of Meeting the Standard**

[Personnel policies and procedure](#) are published at multiple levels. These include Board of Regents Policies, Administrative Procedures, UHCC System policies, and the College's [Makaloa Policy](#), which supports the system wide Hawai'i [Papa O Ke Ao Plan](#) that promotes placing Native Hawaiians in decision making-roles at every level. System wide policies and procedures are publicly posted on the UH system's Policies and Procedures Information System (PPIS), whereas college policies are made available to employees electronically via CampusDocs. Additionally, collective bargaining agreements govern personnel actions for the covered employees, which are available electronically on the respective bargaining unit's website.

A checklist and description of evaluation policies and procedures for each non-faculty employee group is available to UH employees on the [Performance Evaluation System](#) website. Faculty evaluation guidelines are detailed in [UHCCP 9.104](#) and [KCCP 4-13](#). These policies and procedures were developed to promote equity, fairness, and consistency of performance evaluations.

Finally, all posted University of Hawai'i position descriptions include a statement summarizing the Systems policies on fairness and equity regarding applicants and personnel: "The University of Hawai'i is an equal opportunity/affirmative action institution and is committed to a policy of nondiscrimination on the basis of race, sex, gender identity and expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, domestic or sexual violence victim status, national guard absence, or status as a covered veteran."

## **Analysis and Evaluation**

The College employs a Human Resources (HR) Manager and Office Assistant to not only serve as the EEO/AA Manager, but also guide supervisors on the proper administration of all personnel policies. The HR Manager also provides training to hiring committees and reviews interview questions prior to any interviews to ensure compliance with equal opportunity and affirmative action requirements. The collective bargaining agreements, along with publicly published policies and procedures, define the process for fair and equitable treatment of employees.

### **III.A.12**

*Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its Mission.*

## **Evidence of Meeting the Standard**

A formal [EEO/Affirmative Action](#) analysis is conducted by the UHCC System office on a regular basis and is incorporated into the recruitment/hiring processes. Each UH Community College has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measuring affirmative action efforts, and taking remedial action when necessary.

In accordance with federal contractor requirements, the [OVPC Director of Equal Employment Opportunity and Affirmative Action Director of EE\)/AA](#) develops annual affirmative action plans (AAP) for the seven UH Community Colleges. These plans cover minorities, women, protected veterans, and individuals with disabilities. The Director of EEO/AA works closely with assigned [EEO/AA Coordinators](#) at each campus to monitor and oversee employment practices. These include:

- recruiting and hiring decisions,
- reviewing job announcements,
- reviewing employment areas for underrepresentation,
- monitoring recruitment,
- ensuring equitable treatment of applicants,
- assembling diverse screening committees,
- briefing search committee members on recruiting practices including nondiscrimination, equal opportunity, implicit bias awareness, and accessible interviews, and
- receiving, investigating, and resolving complaints.

**Policies and practices promoting understanding of equity and diversity:** The UH System has developed [policies](#), [procedures](#), and [statements](#) that govern all University of Hawaii Community College campuses, such as [Anti-Discrimination, Sexual Harassment, Sexual Assault, Domestic Violence, Dating Violence, and Stalking](#), [Consensual Relationships, Disability Access](#), and [Recruitment and Hiring](#). The UH Human Resource department makes this information available to its employees with [Brochures and Posters](#), as well as via email blasts.

**Employment equity tracking and analysis:** The UH System has an [Applicant Data](#) system, which is an online human resources program that performs functions such as:

- informing applicants that their application has been received,
- surveying and analyzing applicant sex, ethnicity, veteran, and disability status for federal EEO reports by authorized users,
- tracking the screening process, and
- prompting hiring units to adhere to EEO guidelines.

### **Analysis and Evaluation**

The UH System has developed Equal Opportunity policies and procedures that guide all campuses to support diverse faculty and staff. Aggregated data on faculty and staff diversity

is provided by the UH [Institutional Research and Analysis Office](#) each fall semester. The effectiveness of the EEO/AA Plan and the college's adherence to its mission of welcoming and valuing diversity is assessed annually during the annual program review process. The College has followed its EEO/AA plan, and the number of [EEO complaints](#) and/or investigations has been two or less annually since the last reaffirmation of accreditation visit.

Additionally, in spring 2018, the College began including a new desirable qualification on all of its position descriptions: "Commitment to, knowledge of, experience with the UH mission to be a premier indigenous serving higher education System." This highlights the College's strategic goal of strengthening itself as an indigenous-serving institution, and also aligns with [KCCP 2-2](#), the campus-specific hiring policy, which was developed to ensure the interests of Native Hawaiians are duly represented in the College's recruitment process.

### **III.A.13**

*The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

#### **Evidence of Meeting the Standard**

Board of Regents Policy [RP12.201](#) sets forth ethical standards of conduct for all employees, whereas the University of Hawai'i Community Colleges Policy [UHCCP 5.211](#) provides a detailed ethics policy for faculty that is based on the [American Association of University Professors](#) statement of ethics. The Chancellor ensures all new hires receive this policy by including a copy in the Faculty and Staff Handbook. Beginning in the 2018-2019 academic year, a printed copy will be incorporated into the new hire paperwork provided by the Human Resources Department.

UH Policy [EP 12.214](#) deals with conflicts of interest. It contains a form for reporting potential conflicts, as well as procedures for how to deal with them as well as consequences for failure to disclose conflicts. Furthermore, all employees of the college are encouraged to complete state ethics training. As detailed in this training, consequences of ethics violations are based on current State law.

#### **Analysis and Evaluation**

The college upholds standards of ethical conduct established by the University of Hawai'i System. Consequences of violating ethics policies are stated in the policies. The State of Hawai'i offers annual ethics trainings, and members of the college are encouraged to attend.

### **III.A.14**

*The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution Systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.*

### **Evidence of Meeting the Standard**

The College has a full-time Professional Development (PD) Coordinator whose primary responsibility is to facilitate PD activities for the faculty and staff, including budgeting and evaluation of PD programs. The PD coordinator is responsible for developing a three-year PD plan for the campus, based on input from faculty and staff, consideration of student learning outcomes assessment data, and the College's mission and goals. The planning process consists of surveying faculty and staff in a variety of ways periodically to identify areas of need. After receiving this information, the PD Coordinator categorizes the feedback and prioritizes training to address these needs.

Professional Development offers a [variety of training and support](#) to both faculty and staff. These trainings include, but are not limited to, sessions on using various UH and KCC-specific services (e.g., Google's suite of applications, Lulima LMS, LiveText Via, Zoom video conferencing, assessment best practices, crafting good rubrics, drafting measurable learning outcomes, etc.). It also includes supporting staff with training and troubleshooting assistance with classroom equipment, which can include computers, projection equipment, software, etc.

PD also provides support to instructional staff who are interested in improving the overall design of their face-to-face and distance courses by discussing [best practices](#) in regards to pedagogy and curriculum design. The PD Coordinator has worked with the Assessment Coordinator on assisting faculty and staff with assessment plans, rubric building, drafting outcomes, data analysis, and closing-the-loop. The PD Coordinator also works closely with colleagues throughout the UH System to ensure Kaua'i Community College faculty and staff have access to System-wide PD opportunities, such as [conducting focus groups](#) and online education resources.

Professional development sessions also have included group and panel discussions on best practices in teaching and in managing Early College courses. Two outcomes from this discussion have been improvements in the Early College enrollment process and greater clarity on the respective roles of the college and high school teachers collaborating on the course.

The PD Coordinator creates and implements the new faculty and staff orientation program every year. The program invites new faculty and staff to participate in monthly meetings that focus on assisting new staff to adjust to working at KCC. The program culminates in a multi-day retreat at the Waipa Foundation grounds located on the north shore of the island. This retreat exposes participants to Native Hawaiian culture, language, and traditional practices, as well team building exercises and community service projects.

Attendance lists for activities are kept to measure the number of participants. Organized professional development activities are followed-up with [surveys](#) to determine whether the activity fulfilled the participants' needs and to continuously improve offerings. Suggestions for future PD offerings are also solicited.

Professional development is a key component of the contract renewal, tenure, and promotion processes for faculty at the College. Applicants must discuss their recent PD activities and explain how each activity contributed to their ability to serve the college. The PD Coordinator also works with faculty who are going through the tenure and promotion process to assist them with drafting and revising their dossiers. This assistance is done on an individual and group basis.

In addition to the activities of the PD Coordinator, the College supports professional development by funding travel, lodging, registration, and other costs for faculty and staff to attend trainings, webinars, conferences, and other PD events. Employees of the College have attended numerous intra- and inter-state trainings and conferences. For example, 27 faculty and staff attended the [Hawai'i Student Success Institute](#) conference at the Hawai'i Convention Center in Honolulu on March 28, 2018. Another group of three attended the renowned [Hawai'i National Great Leaders Seminar](#) held on the Big Island of Hawai'i in February of this year. Also, three faculty and one administrator attended the [Achieving the Dream conference](#) 2018 in Nashville, Tennessee.

The College provides a total of \$5000 in annual funding to each instructional unit to use at their discretion for professional development and provides faculty and staff members the opportunity to apply for additional funding from the UH Foundation and the Edward T White Memorial endowment (more commonly known as the Ed White Fund) to support professional development. As of April 27, 2018, the Ed White Fund's balance of expendable cash is \$87,217. Moreover, tenured faculty with six years of full-time creditable service are eligible to apply for sabbatical, which can be utilized for professional development.

The College also provides [tuition waivers \(III.A.14-8\)](#) of up to six credit hours to employees working at least 50% time to promote and support their continued education by taking any courses offered by the University. Faculty and staff can also take non-credit professional development courses through the Office of Continuing Education and Training. For example, the Chancellor allocated funding for a select number of faculty and staff to take Hawaiian language courses at no or reduced cost during the last two academic years.

The UH and UHCC Systems also provide several leadership training opportunities that employees of the College may apply to attend. These include the annual [Hawai'i National Great Teachers](#) seminar, [Wo Learning Champions](#), [Community College Leadership Champions](#), and [President's Emerging Leaders Program](#).

## **Analysis and Evaluation**

---

The College plans for appropriate professional development for its employees. It supports a Professional Development Coordinator position to assist in the planning and implementation of professional development events, both on an individual basis and for large-scale events. The College also supports employees in seeking their own professional development opportunities, including providing access to UH Foundation funds that may be used for travel to conferences and trainings.

Professional development at the College is planned and coordinated with the mission and goals in mind, and with input from its employees. Faculty and staff can suggest topics for professional development in a variety of ways, including via a [comment forms](#) on the PD webpage, through [post-session surveys](#), and by communicating directly with the PD Coordinator. In the fall of 2012, after meeting with interested division and units, the PD Coordinator determined the priority areas of need as technology, interpersonal relations, and distance education. Therefore, events were planned and conducted in these areas. For example, in the Spring 2014 semester, the PD Coordinator and a Science faculty member escorted the clerical and operations and maintenance staff to the National Botanical Gardens in Kalaheo on Excellence in Education Day for a retreat to discuss their professional development goals and to improve camaraderie. One outcome of this retreat was that the clerical staff committed to reconvening the clerical council on campus.

However, by the fall of 2016, the priority needs had changed slightly. Technology was still a priority, but the emphasis shifted to using LiveText C1 (and eventually LiveText Via) for tracking assessment data. Also, since the College was shifting more focus to program-based assessment, trainings and meetings discussing best practices in assessment were held throughout the 2016-2017 and 2017-2018 academic years.

The College uses [event surveys](#) to evaluate a variety of aspects of each training. Participants are asked to rate the quality of information, the effectiveness of the presenter, and more generally their overall impressions of the session. These results help the PD Coordinator fine-tune event offerings. For example, survey results from a recent Google Suite training suggested that the information was “too basic” and participants wanted to cover more advanced features, specifically in Google Sheets. Hence, the PD Coordinator is planning advanced Google Suite training in partnership with the Office of Continuing Education and Training in the upcoming academic year. The PD Coordinator also discusses survey results with trainers to help them improve.

### **Action Item**

The Professional Development Coordinator will maintain an active three-year campus professional development plan that is visible to all employees of the College.

### **III.A.15**

*The institution makes provision for the security and confidentiality of personnel records.*

*Each employee has access to his/her personnel records in accordance with law.*

### **Evidence of Meeting the Standard**

UH Administrative Procedure [A9.075](#) establishes procedures for the maintenance of official personnel files for all BOR-appointed employees, and identifies the documents to be included therein. These personnel files are maintained in locked filing cabinets in the One Stop Center office 106 H.

Depending on the employees' bargaining unit, official records may be housed elsewhere. For instance, United Public Workers (UPW), Hawai'i Government Employees Association (HGEA), and Executive Employee official records are housed on the island of Oahu in the University of Hawai'i Human Resource Office, and require additional steps for retrieving and viewing. Regardless of where these records are located, all requests to view the records are initiated in the College's Human Resource Office.

Employees records are kept and destroyed according to the [State of Hawai'i - Accounting and General Services, Archives Division Administrative Records, General Records Schedule No. 1, 2002](#).

### **Analysis and Evaluation**

The college maintains personnel records securely and confidentially, following UH System procedures and agreements with collective bargaining entities. All employees have access to their personnel records.

### **III.B Physical Resources**

#### **III.B.I**

*The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.*

#### **Evidence of Meeting the Standard**

Although KCC is part of the UH System, it operates as a sole campus at only one location. The campus resides on 200 acres and consists of 40 buildings and structures totaling approximately 300,000 gross square feet. Facilities are maintained to provide a healthy and safe learning environment. The buildings, facilities, walkways and parking lots meet OSHA safety standards and ADA compliance. The campus receives support from the University of Hawai'i Community College System's Environmental Health and Safety Officer who provides semi-annual trainings and inspections on hazardous material safety and injury prevention. Contracted services are used for elevator maintenance, fire alarm Systems, fire extinguisher maintenance, automatic door maintenance, HVAC System, and vehicle maintenance. The College has five Automated External Defibrillator (AED) kits and eleven surveillance cameras that are monitored by campus security. State and County agencies also inspect new and renovated facilities during their completion for adherence to County building and fire codes as well as Federal handicap accessibility requirements. Since November 2016, the campus has been staffed by its own 24-hour Campus Security personnel and doors were re-keyed in 2016 to enable lockdown in the event of a threat to the safety of people on campus.

The campus was built to accommodate 1,500 FTE students. However, the College has never enrolled more than 900 FTE students, so there is adequate room to grow in terms of classroom and parking space. As a result, neither faculty, staff, nor visitors are charged for parking on-campus.

To respond to the needs of physical maintenance requirements of the campus, the Operations and Maintenance Department, housed under Administrative Services, is staffed with one Facility Manager, eight Janitors, five Groundskeepers, three Building Maintenance staff, and one Office Assistant. This 18-person department maintains the entire campus. In fall 2017, a new [work order system](#) was implemented to meet the needs of campus personnel by centralizing and tracking orders electronically. Campus members can request IT/media services, janitorial services, grounds services, and custodial services via the College website. The College has a standing [Campus Safety and Operations Committee](#) whose mission is to maintain a safe campus environment conducive to learning. The Committee discusses campus safety, construction and maintenance of facilities, and the utilization of space. Issues may be brought to the committee by individuals, divisions, student groups, or units. Recommendations from the committee are submitted directly to the Chancellor.

### **Analysis and Evaluation**

The institution maintains safe and sufficient physical resources through the work of the Operations and Maintenance unit, the Campus Safety and Operations committee, the centralized work order System, and support from the UH System Environmental Health and Safety Officer.

Periodically, Administrative Services surveys students and College employees to evaluate its performance. Relevant responses to the [Fall 2017 Administrative Services Survey](#) regarding buildings, grounds, and safety are below.

Statement	Respondents	Respondents who agree
KCC's buildings and grounds provide spaces that meet your learning needs.		
Buildings	Students	91%
Grounds	Students	93%
KCC's buildings and grounds are clean and well maintained.		
Buildings	Students	100%
Grounds	Students	100%
KCC's physical facilities support an effective learning and working environment.		
Learning	Employees	88%
Working	Employees	91%

KCC's facilities are clean and well maintained.		
Learning	Employees	97%
Working	Employees	97%
KCC's Security Officers provide prompt and courteous service.		
Prompt	Combined	85%
Courteous	Combined	87%
I feel safe at KCC.	Combined	96%
I know what to do in the event of an emergency on campus.	Combined	91%

These results show that the vast majority of responding students and employees believe the campus has safe and sufficient physical resources that are well maintained to ensure a healthful learning and working environment.

**Action Item**

Service outcomes will be developed for Operations and Maintenance prior to the fall 2018 semester.

**III.B.2**

*The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.*

**Evidence of Meeting the Standard**

Since the last ACCJC Self Evaluation Study, the campus has continued to expand its facilities by renovating and improving original (circa 1976) and later-constructed structures, as well as building new facilities, to meet current safety regulations, ADA compliance, and the College's mission. For example, the Learning Resource Center was renovated in 2016, the Fine Arts building was renovated and expanded in 2017, and the Performing Arts Center is currently under current renovation. The [Project List](#) summarizes projects that were completed over the last 5-years and also projects that are currently funded.

Construction of new facilities is done in alignment with the College's Long Range Development Plan (LRDP), which was last updated in 1999. The College is currently in the process of updating its LRDP and expects it to be completed by the end of the fall 2018 semester. This updated plan envisions future needs and opportunities for the growth of the college to better serve its mission and surrounding community. Building and infrastructure maintenance is guided by the UH System capital renewal and deferred maintenance program that uses the Facilities Renewal Resource Model (FRRM).

Programs and units at the college use their [Comprehensive Program Reviews and Annual Program Reviews](#) to analyze and voice their facilities and equipment needs. The APRU funding process determines which requests will be supported.

In the [Fall 2017 Administrative Services Survey](#), 90% of responding students and employees agreed that the College's physical resources meet their learning or working needs. This is an overwhelming indication of a general sense throughout the campus that the College has invested in and effectively utilizes the facilities and equipment necessary to support its programs and services.

### **Analysis and Evaluation**

As reflected in the [Project List](#), since the last accreditation visit the College has completed over \$16 million in facilities renovations, is in the process of completing projects valued at almost \$9 million, and has secured roughly another \$9 million of funding for additional building renovations. The college continually assesses its facilities and infrastructure, prepares both short- and long-term maintenance and development plans, and acquires the funding needed to maintain the physical infrastructure necessary to support its programs and services and achieve its mission.

### **III.B.3**

*To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.*

### **Evidence of Meeting the Standard**

Equipment and infrastructure within campus facilities are evaluated on an annual basis by instructional programs and other campus units through the Annual Program Review process. Each program or unit identifies facilities and equipment needs, supported by data collected independently (e.g., copier use) or from the UHCC System (e.g., [ARPD](#)) and makes requests through action plans for improvements that support the college's mission, strategic priorities, and/or campus strategic goals.

In addition, a [study of classroom utilization](#) was conducted in 2016 by Ad Astra, a consultant contracted by the UHCC System, who prepared a [Capacity Analysis](#)

for the college, as well as other supporting and summary documents. The results of the study showed that the campus' 48 classrooms, had an overall use rate of 46% during normal operating hours (2014 data). Hence, the campus has ample room to support enrollment and programmatic growth over the near term.

### **Analysis and Evaluation**

The College uses its robust annual review process to identify equipment and other infrastructure needed by programs and units. In addition, Administrative Services surveys students and staff to further identify areas for improvement and evaluate the adequacy of facilities and equipment. As a result, the College's [deferred maintenance project list](#) has consistently remained at manageable levels through the combined and concerted efforts of the college as a whole.

### **III.B.4**

*Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.*

### **Evidence of Meeting the Standard**

The College is currently in the process of updating its Long Range Development Plan ([Current LRDP](#)); the [New LRDP Draft Site Plan](#) that will guide and direct the physical form and character of the campus for the next 10-15 years. The plan is being developed in partnership with PBR Hawai'i and Associates, Inc. Highlights of this plan include the building of a photovoltaic field to generate electricity for the campus and support the College's sustainability strategic priority. Renovations are identified for faculty office buildings and to relocate the Hawaiian Studies department. New facilities envisioned to support growth include an Innovation Center, new Health Sciences building, new weight room, and student housing. Having a current LRDP allows the College to request funding for new facilities identified in the plan to support enrollment growth and/or program expansion.

Additionally, the College uses its facilities capital renewal forecasts ([FRRM](#)) to help guide its reinvestment in its existing facilities. According to the model, the College has a current backlog of deferred maintenance of \$1.7 million, which it plans to reduce down to less than \$1 million by the end of fiscal year 2020.

Lastly, the College projects the cost of ownership and plans for additional expenses through the APRU process. The VCAS attends annual System meetings with other UHCC System representatives. A systemwide project priority list is created and submitted to the State Legislature which must approve funds for capital improvement.

### **Analysis and Evaluation**

The College is currently updating its LRDP to better align with its current strategic priorities and goals. Although still in draft form, this update includes a number of capital improvements to support the stated purpose and goals of the institution. For example, in order to reinforce the College as an indigenous-serving institution the Hawaiian Studies department would be relocated from its current 2,000 square foot, wood-frame building located towards the back of the campus to an existing concrete building with 14,000 square feet of usable instructional and office space located at the entrance of the campus. In addition, in response to the University's Modern Teaching and Learning Environment goal, the draft plan incorporates new construction and renovations to support the Health Sciences programs, student and faculty interaction, OCET, and even on-campus student housing. Moreover, to support the UH Hawai'i Innovation Initiative goal, the draft plan adds a 14,000 square foot innovation center that will bring together students, faculty, staff, and the community in a collaborative setting to develop innovative and practical solutions to the problems faced by our community. Lastly, the draft plan will envision the transformation of approximately 40-acres of unused agricultural lands into a teaching and learning environment representative of the College's commitment to place-based education.

Until the University System eliminates, or at least significantly reduces, its approximately \$600 million of deferred maintenance, it will continue to operate under a general new construction moratorium. However, once the prohibition is lifted the APRU resource allocation process used by the College to prioritize all resource requests, including the acquisition of new facilities and equipment, will ensure that the total cost of ownership is considered.

- III.B.3-3 Kaua'i Capacity Analysis
- III.B.3-4 Deferred maintenance List
- III.B.4-1 New Long Range Development Plan (Draft)

### **III.C Technology Resources**

#### **III.C.1**

*Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.*

### **Evidence of Meeting the Standard**

The College has a Computer Services unit, housed within Administrative Services, that is staffed by four Information Technology (IT) Specialists who collectively support the technology resource needs of the campus. This includes the campus' data network, servers that host the College's electronic data and website, approximately 700 computers and related equipment, a multitude of software applications, instructional technology in 40 classrooms, interactive television and Polycom® equipment in four classrooms, audio-visual equipment, and centralized copier equipment.

The Information Technology Advisory Committee (ITAC) identifies, assesses, and recommends the instructional and support technology necessary for the campus to achieve its mission. The Committee recently updated its campus [Technology Vision Plan](#) based on the 2017 University of Hawai'i Information Technology Services [Strategic Plan](#). Classroom technology and educational equipment needs are developed at the program/division level and are reviewed by ITAC to ensure compatibility with current technology Systems. Small purchases (under \$3,000) are made by divisions or units from their individual budgets. Larger purchases are reviewed by College Council, with consideration of ITAC's input, during the program review process to assess alignment with the college's mission and strategic goals. The College has numerous [software tools and applications](#) to serve its programs and units.

### **Analysis and Evaluation**

The college has sufficient technology resources to support its academic programs, student support services, and management and operational functions. ITAC periodically conducts surveys of students and employees to help assess the college's technology needs, and reviews technology purchase requests to ensure currency and compatibility with existing resources. Administrative Services also conducts surveys to determine how well technology needs are being met, and the most recent survey shows that campus technology users generally find resources to be sufficient.

Results of the 2017 Administrative Services Survey indicate that 84% of students and employees believe KCC effectively deploys technology across the campus to develop, maintain, and enhance its programs and services. Seventy-six percent of the same group reported that that "instructional technology used in my classrooms meet my learning or instructional needs," whereas 81% of respondents agreed that KCC uses technology to effectively support communication and sharing of information across the campus.

Results of the survey indicate that the area with the largest room for improvement is classroom technology, and as described below in Standard III.C.2, the College is upgrading technology in 20 classrooms, which is approximately 40% of the College's 48 classrooms, before the start of the fall 2018 semester.

### **III.C.2**

*The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.*

### **Evidence of Meeting the Standard**

ITAC's Vision Plan, which encompasses a five year period, provides the framework for the College, with respect to investing in and implementing new technology to support its programs and services. The IT Technology Plan identifies the replacement schedule and replacement cost of the College's existing technology resources over a seven year period. The plan is a living document that is continually updated as technology resources are added or removed from the College. This includes infrastructure such as networks, servers, hardware, software, and distance education technology (e.g., Polycom® and Hawai'i Interactive Television System (HITS)).

The UH System is responsible for providing the College with enterprise resource planning, student information, and learning management Systems that includes the Quali Financial System, SuperQuote System, Sightlines Facilities Renewal Reinvestment Model, PeopleSoft Human Resources, Banner Student Information System, STAR Guided Pathways System Registration, Academic Essentials degree check, Quali Curriculum Management System, Laulima (UH's online learning and collaboration System), and UH Alert (UH's emergency notification System).

### **Analysis and Evaluation**

During the 2017-2018 fiscal year Annual Program Review Update (APRU) requests regarding upgrading classroom technology ranked high during the review process. Hence, the College allocated a one-time expenditure of \$66,000 to upgrade approximately 20 classrooms with the new technology standard that includes a 75" 4K display, Smart KAPP, desktop PC, and document camera, which aligned with the long-term IT fiscal plan for technology replacement/upgrades.

Furthermore, the System invested in Drupal to provide Colleges a platform for upgrading their websites to ensure ADA accessibility. The College adopted this platform in 2017 because the previous website was built using Google, which lacks some accessibility capabilities.

In the Fall 2017 Administrative Services Survey, only 65% of responding employees agreed that the College's technology planning is integrated with its institutional planning. To address this, ITAC will be updating its review form to be more relevant to the current Program Review process and the College plans to add, as part of the APRU procedure, a written requirement on including the ITAC review form for all technology resource requests.

### **III.C.3**

*The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.*

### **Evidence of Meeting the Standard**

The College operates from a single campus location and most of the Systemwide or online resources used by the College are controlled, managed, and maintained centrally by the University's Information Technology Services (ITS) Department. Both ITS and the College's IT Department have implemented a variety of physical and electronic safeguards, protocols and procedures to protect the College's technology resources.

### **Analysis and Evaluation**

Currently, there are safeguards, protocols, and procedures are implemented at the College regarding both physical and electronic technological resources.

#### **Physical Safeguards:**

1. Primary server rooms located in the One-Stop Center and Learning Resource Center are secured by two locked doors and environmentally controlled through the building's central A/C System, as well as a backup A/C unit;
2. Backup server rooms located in the Natural Science and OCET buildings are secured by a single locked door and environmentally controlled through the building's central A/C System, as well as a backup A/C unit;
3. IT provides continuous backup of local server data;
4. Redundant network firewalls are established and monitored; and
5. Computer labs are monitored by faculty or staff during hours of operation

#### **Electronic Safeguards:**

1. Use of all campus computers and wireless network requires a secure login with a UH Username;
2. Installation of programs or applications of campus computers is restricted to the IT Department, with certain exceptions;
3. All campus computers are protected with antivirus software;
4. All external computers accessing University or campus servers are required to be protected by antivirus software; and
5. [Policies and procedures](#) are developed relative to data governance and information security, which includes mandatory continuing education and training for data users ([AP 2.215](#)).

In the [Fall 2017 Administrative Services Survey](#), 81% of responding students and employees agreed that the coverage and speed of the College's wireless network meets their needs, and 84% of responding students and employees agreed that the College distributes technology resources effectively across the campus. Although this demonstrates the

accessibility of the College's technology resources, it does not address whether or not the campus generally feels these resources are safe and secure. Nevertheless, the College is not aware of any data breaches or incidents of identity theft since the last reaffirmation of accreditation in 2012. The IT Department will consider including a question related to the safety and security of its technology resources the next time the survey is taken.

### **III.C.4**

*The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology Systems related to its programs, services, and institutional operations.*

#### **Evidence of Meeting the Standard**

The College provides technology instruction and support to employees and students through its IT Help Desk (students and employees), work order System to request technology support (employees), professional development (employees), [Institutional Student Learning Outcomes](#) (e.g., Technical Competency; students), [non-credit courses](#) on the use of technology offered by the Office of Continuing Education and Training (employees and students), and credit courses on the use of technology (e.g., ACC 255 Using Excel in Accounting, BUSN 121 Intro to Word Processing, and ICS 111 Intro to Computer Science I; students and employees).

#### **Analysis and Evaluation**

Examples of recent trainings and professional development on technology offered to employees include Starfish (MySuccess), Livetext, Quali-financial training, distance education instructor certification, classroom technology, and new faculty orientation. The hiring of a permanent Professional Development Coordinator in addition to the development of the ITAC Committee is further evidence of the College's commitment to providing appropriate instruction and support on the effective use of technology.

Trainings offered to students each academic year on technology include new student orientation (UH portal and Star GPS), distance education (face-to-face and online), electronic resources at the library, and individualized support at the IT Help Desk.

Further support is provided in the [Fall 2017 Administrative Services Survey](#), where 80% of responding students and employees agreed that the IT Help Desk provided the requested technical support, 84% of responding employees agreed that they receive the technology training necessary to perform their job duties and responsibilities, and 92% of responding employees agreed that IT provides prompt and courteous service. Moreover, to facilitate increased student accessibility to technology support services the IT Help Desk will move from an out-of-the-way location in Natural Science to a more centralized and visible location in the Learning Resource Center starting in the fall 2018 semester.

### III.C.5

*The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.*

#### **Evidence of Meeting the Standard**

The College adheres to UH system wide [Executive Policies and Administrative Procedures](#), which are overseen and managed by the University's Information Technology Services (ITS) Department in conjunction with the Vice-President for Information Technology and CIO. These policies and procedures describe the appropriate and responsible use of technology within the University. The primary governing policy is Executive Policy 2.210, [Use and Management of Information Technology Resources](#), which is communicated to all students and employees at the time their [UH Username](#), the electronic key to gaining access to the University's online services, is established. Policies and procedures form a comprehensive set of rules and responsibilities regarding technology use within at the college and include user rights, responsibilities, privileges and accessibility; appropriate and inappropriate forms of technology use; information security, privacy, and confidentiality; protocols for electronic communication with students; institutional data governance; and mandatory continuing education and training for data users.

#### **Analysis and Evaluation**

The College follows UH System policies and procedures on the appropriate use of technology in the teaching and learning process. These policies outline the rights and responsibilities for all parties, and were developed to ensure security and privacy.

#### **III.D. Financial Resources**

##### **III.D.1**

*Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)*

### **Evidence of Meeting the Standard**

The UHCC campuses rely heavily on general funds, which are appropriated by the state, to subsidize operating expenses. The Vice-President for Community Colleges and the UHCC Chancellors determine the General Fund allocations needed to support the individual UHCC campuses, and the fiscal health of the College is monitored by the Vice-Chancellor of Administrative Services. There have been no significant budget reductions that have reduced the College's ability to finance its programs and services since FY 2011.

These General Funds combined with the tuition collected by the campuses, referred to as tuition and fees special funds (TFSF), comprise the total amount of appropriated funds the campuses receive from the State or the "unrestricted operating budget" of the campuses per Act 161, SLH 1995; Act 161 was codified into law under [Hawai'i Revised Statutes §304A-2153](#). This combination has a stabilizing effect on campus operations because General Funds are independent of enrollment.

In spite of [tuition increases](#) over the past 12 years, the UHCC campuses remain one of the most affordable according to the 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education ([Affordability Study](#)).

Other funding sources (i.e., special and revolving funds, extramural, Capital Improvement Program, Performance-funding, and Innovation Funds) finance specific program activities. Special and Revolving funds support non-credit instruction, summer session instruction, conferences, and student activities. These funds are established by statute and operate on a self-sustaining basis. Extramural funds are project-based funds received from federal, state, and private sources, which relate to research and training grants or contracts. These funds are obtained through competitive grants or contracts and are focused on specific improvements or on services provided to the contracting agency. All extramural funds are administered through the University Office of Research Services. Capital Improvement Program funds are usually generated from state-issued general obligation bonds while debt service payments to retire the bonds are funded by the State. Individual campuses are not obligated to pay for these long-term obligations. Performance-based funding has been identified as a solution aimed at generating greater institutional productivity, accountability and educational attainment. Through funding incentives, performance based funding is designed to encourage efficient resource allocation, greater awareness and attention to strategic priorities, and a results-oriented campus culture. Kaua'i CC has earned the vast majority of the available [UH and UHCC performance funding](#) since this revenue stream was initiated in 2012. Innovation and strategic initiative funding allocations are used to fiscally support critical needs identified through the UHCC Strategic Planning process.

Since 2009 the UHCC System has required that each campus maintain adequate financial resources to ensure long-term financial stability; see [UHCCP 8.201](#), which predates [RP 8.203](#) and [EP 8.210](#). Accordingly, the College maintains a separate unrestricted reserve fund, in addition to its unrestricted operating fund cash balances, and meets the 5% reserve requirement of EP 8.210 and UHCCP 8.201. Together these provide financial stability in case of emergencies, temporary downturns in enrollment, or significant one-time investment opportunities that support educational improvement and innovation. The maximum cash balance generally allowed by EP 8.210 is 16% and the College's total unrestricted cash balance also complies with that requirement.

The College's [unrestricted cash balances](#) split between its reserve fund, which represents the static cash balance maintained throughout the year in a separate reserve account, and the remaining unencumbered cash balance in its operating fund. In accordance with Act 236, SLH 215, which amended Hawai'i Revised Statutes §304A-2153, starting in FY16 the UH System began temporarily sweeping both the reserve fund and operating fund cash balances to UH System-level accounts at the end of each fiscal year; these balances are subsequently returned back to the campus-level accounts at the start of the next fiscal year. Therefore, these temporary transfers must be reversed in order to reconcile the campus' accounting ledger to its true [cash balances](#), and these reconciliations are visible in the FY16 and FY17 balances.

Initial campus budgets are presented to the Board of Regents for approval prior to each fiscal year. The System and campuses use the Kualii fiscal management System to establish and monitor general operating and other special and revolving fund accounts. These budgets are monitored via [monthly budget to actual reports](#) that are posted to the [UHCC Budget website](#). Kaua'i CC's budgetary and cash reserve practices and procedures ensure that cash flow requirements, long-term obligations, and other unanticipated costs can be covered as they arise.

The campus [Operating Budget approved by the BOR for FY 2017](#) has a projected \$14,219,301 in unrestricted revenue and transfers to fund an unrestricted expenditure budget of \$14,271,759. Expenditures exceed revenues by \$52,458 which slightly decreases the College's expected ending operating cash balance to \$551,553. In addition to this operating reserve, the College's expected catastrophic reserve balance of \$722,619 meets the BOR required 5% minimum threshold.

### **Analysis and Evaluation**

The College has met or exceeded cash reserves per UH policy. General funds, special and revolving funds, and tuition and fee funds have continued to provide adequate resources for the programs and services the college offers. Respondents to the [Fall 2017 Administrative Services Survey](#) indicated that 93% of students and 76% of employees felt that financial resources were effectively allocated and used to support and enhance student learning, whereas 93% and 81% of employees felt allocations supported and enhanced student learning within an individual program or department.

### **III.D.2**

*The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.*

#### **Evidence of Meeting the Standard**

The College's integrated planning and budgeting process (APRU) begins with the mission and strategic plan, which aligns with [UHCC Strategic Directions 2015-2021](#). All programs and services complete a program review using the mission and strategic plan goals as a guide and every budget request should be linked to at least one Kaua'i CC [strategic priority](#). Requests are reviewed and ranked by College Council as part of the integrated planning process (see I.B.9 for details). These rankings result in fiscal recommendations to the Chancellor.

Budget and financial reviews are conducted by the Board of Regents (BOR). [Board of Regents Policy 8.204](#) sets the University's fiscal management, budget process, legislative budget proposal, and preparation processes. The [UHCC Budget Preparation webpage](#) provides additional information on the budget development process, including links to the current and previous two years of Fiscal Biennium Budget Policy Papers and Instructions.

The College provides information about the institutional planning process throughout the academic year. Information on upcoming campus improvements and the College's financial circumstances are shared at the fall and spring convocations by the Vice Chancellor for Administrative Services (VCAS). During the fall convocation, the VCAS presents the actual financial results of the [previous fiscal year](#). During the spring, the VCAS presents the [final campus operating expenditure plan or budget](#) for the current year. The VCAS shares [updates about the budgeting process](#), including preliminary and final operating expenditure budgets, with College Council, as well as individual units as needed or requested.

#### **Analysis and Evaluation**

Leading practices encourage boards to establish policies and practices to ensure that institutional priorities and budget expenditures are aligned and that resources are strategically invested in the institution's mission, vision, and plans. RP 8.204 shows that the University of Hawai'i Board of Regents follows these practices. The College has a well-established integrated planning and budgeting process that begins with its mission and goals. The College aligns its mission and goals with the UH System and UHCC System Strategic Directions. Financial information is distributed to the campus on a regular basis at the fall

and spring convocations. Relevant responses to the [Fall 2017 Administrative Services Survey](#) indicated that 77% of employees understood how KCC's mission and goals drive resource allocation in the APRU process, whereas more employees (83%) understood the College budgeting process as a whole when compared to their individual program or department (79%).

These results show that although most employees are aware of the College's overall budgeting process, some don't feel as strongly connected to the budgeting process of their individual units. Consequently, the College has worked with the UHCC System Budget and Finance Office to provide the various units with monthly budget to actual expenditure reports, which will be made available in April 2018 at the [UHCC Budget and Finance Office Public Report webpage](#) (e.g., [February 2018 Report](#)). These reports should stimulate more discussion and awareness of the budgeting process throughout the individual units. Additionally, some employees either do not understand or do not agree that the College's resource allocation process is firmly rooted in its mission and goals. In response, the College continually evaluates and improves its APRU process, and it will identify opportunities to improve the resource allocation methodology of that process for the fall 2018 semester.

### **III.D.3**

*The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.*

#### **Evidence of Meeting the Standard**

The UH and UHCC Systems initiate the financial planning and budget development process at the macro level as described on the [UHCC Budget Preparation webpage](#). The process begins with the University's strategic planning process, which in turn guides the development of the Fiscal Biennium Budget Policy Paper and Instructions (e.g. [FB 2017-19 Budget Policy Paper & Instructions](#)), a document required by [RP 8.204, University Budget \(Operating and Capital Improvements\)](#), and continues on to the elements discussed on the [UHCC Budget Execution webpage](#). This System-level process culminates with the UHCC System Budget and Finance Office, in consultation with the Vice Chancellor for Administrative Services, developing a high-level annual campus operating budget for the current fiscal year during the summer in accordance with the [General Fund and Tuition and Fees Special Fund Allocation Policy](#).

The Budget Policy Paper and Instructions provide the major assumptions the UHCC System uses in developing its centralized Capital Improvement Project (CIP) plan, i.e. capital expenditure plan. The CIP funding request is made to the Legislature, and the UHCC System creates the subsequent CIP budget based on the amount of funding granted and authorized by the Legislature.

The College's campus-level operating budget remains a fluid and constantly evolving working document until the University's general fund appropriations are finalized by the Governor. This may not happen until late in the fall or sometimes into the spring semester. As a starting point for the beginning of the academic year the College uses a traditional methodology which initially allocates each division or unit a base budget, which may be proportionately decreased outright if necessary to bring the College's total expenditures in line with the BOR-approved budget; it is never increased outright even if the BOR approved budget reflects a budget surplus. These base budgets may also be decreased throughout the fall semester as necessary in response to budget restrictions enacted by the Governor, lower than expected enrollment, or other UH or UHCC System-imposed funding reductions. Moreover, each division or unit is given the authority to further allocate the base budget down to its individual programs and departments.

Once the UHCC Budget and Finance Office has confidence that the general fund appropriations, tuition and fee revenues, and other System allocations, transfers, and adjustments are more or less set, the College will allocate any expected budget surplus based on its APRU process, while, while maintaining the 5% minimum reserve and any additional operating contingency reserves necessary to reasonably assure its financial stability (see Standard III.D.1). The APRU process gathers input from all campus constituencies in order to rank all of the current year's budget requests in priority order. These budget requests include all forms of resource requests including but not limited to one-time or base budget increases for personnel, facilities, equipment, supplies, services, or travel. From there, College Council and Cabinet make recommendations on which requests should be funded, primarily based on the priority ranking and availability of funding, but also considering health and safety items, unfunded requests from prior years, and time-sensitive requests. The final decision on which requests are funded is made by the Chancellor, and these approved budget requests together with the base budgets constitute the final operating budget for the campus. For example, refer to the [FY17 Budget](#).

Again, the CIP budget for the community college campuses is centrally controlled by the UHCC System whose overarching priority is to maintain the College's existing aged facilities and physical infrastructure, and eliminate deferred maintenance, which for the campus was \$1.7 million for FY17 according to the University's [facilities renewal reinvestment model](#). The APRU process also serves as the mechanism for the campus to identify capital expenditure priorities for repairs and maintenance, renovations, or new facilities. The Facilities Manager and Vice Chancellor for Administrative Services are the College representatives primarily responsible for communicating and justifying these campus-identified priorities to the UHCC System Facilities and Maintenance Office for funding consideration. For the five-year period from FY13 to FY17, the College completed \$15.6 million in CIP projects, \$3.3 million of which was identified as a priority through the APRU process. See the [Project List](#) for a summary of projects completed over the last five years and projects that are currently funded.

### **Analysis and Evaluation**

The College has clear procedures for budget development and financial planning. All campus

constituencies submit plans for future program development and request resources through the APRU process, which is driven by College and the System’s mission and strategic plan. The BOR-approved summary-level operating budget guides the College in developing its detailed department or account level budgets for the year within the UH Systemwide strategic planning and Statewide social, economic, and political contexts it establishes. While the operating budget is developed at the System level, campus stakeholders have input in the development of department budgets as well as on additional expenditures requested through the APRU process. Although the CIP budget is centrally controlled and managed, the UHCC System works collectively with the community college campuses to allocate these funds to meet the individual needs of each campus.

#### **III.D.4**

*Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.*

#### **Evidence of Meeting the Standard**

The University’s Fiscal Biennium Budget Policy Paper and Instructions provide the College with a realistic assessment of macro level financial and economic indicators, assumptions, and parameters. For example, the [FB 2017-19 Budget Policy Paper & Instructions](#) sets a conservative outlook given the current economic climate of the State and financial situation of the University with the following statements:

“Considering the University’s major revenue sources and the forecasted trajectory for these various revenue components, the University needs to be mindful of balancing its revenues and expenditures with an eye on sustainability of programs... For different reasons, the University needs to cautiously consider the prospect of either revenue component [i.e. general funds and tuition and fees] growing sufficiently to support current levels of operations.”

“Expenditure trajectory of costs for programs and operations are also forecasted to increase and the rate of increase could exceed the rate of any optimistic projection of revenue increases.”

“The Administration anticipates that the majority of CIP budget proposals will be directed towards [addressing] capital renewal and deferred maintenance needs. Although new facility requests will surely be requested for campuses previously identified for strategic growth or evolution, the budget requests will have to be mindful of the existing moratorium on new facilities.”

Historically, approximately 80% of the College’s operating revenues come from general funds, with the remainder being tuition and fees (see [Financial Summary](#)). The [2017-19 Budget Policy Paper](#) provides the following elaboration on the near-term

growth expectations of each of these sources of revenues as well as the University's strategy for securing additional State funding:

“State public fund support in the form of general fund appropriations to the University has been very slowly increasing since the end of the economic recession. However, the total amount of general funds to the University of Hawai‘i remains less than the 2009 peak level prior to the recession, and much of the restoration supports new collective bargaining agreements.”

“The University needs to weigh its requests for State funding support in concert with its own revenue development. State tax revenue trajectory (growth) is forecasted to remain positive for the upcoming biennium; however, there are already signs that the economy has reached its peak for the cycle. For the University, our self-generated revenue growth (i.e., from tuition) will be flat or challenged for growth over the upcoming biennium [i.e. the incremental revenues from the tuition increases in this biennium will be used to address deferred maintenance and modernization at each campus rather than to fund operational activities]. The University cannot assume that revenue growth at the State will translate into increased revenue contributions to alleviate revenue challenges at the University.”

“The Legislature appropriated \$6,360,818 in general funds in each of FY16 and FY17, for the President and the BOR to distribute to campuses as performance funding [refer to the table in III.D.1 for the amount of performance funding received by the College]. This funding is the first substantive representation of performance-based funding to the University System by the Legislature to improve student achievement and degree attainment metrics. The Administration is hopeful that this approach will continue in future legislative budgets. This funding is not, however, treated as recurring funding for the University, so work with the Legislature is required to demonstrate that the University has deployed the initial funding in ways that have resulted in short-term performance results.”

“Budget requests for the upcoming biennium need to be cognizant that the University revenue components have been strained in recent years and are forecasted to remain so into the near-future. As such, requests involving program expansions or new initiatives should expect to be challenged for revenues to be sustainable. University thematic priorities that are rooted in delivery strategic objectives will assist in prioritizing these requests.”

“The University should present program ideas that warrant public funding investment and/or funding ideas that have [a] broad public interest [and are] deserving of public funds. It remains imperative that the University incorporate plans for strategic growth in which the State can invest. Serious weight and consideration must be given to the prospects and trajectory of University revenue components. This includes every campus's evaluation of general fund appropriations in addition to tuition revenues and campus reserve balances. Program initiatives must be weighed for sustainability in the long-term against the likelihood of revenue.”

The 2017-19 Budget Policy Paper also provides guidance for the College to use when developing its campus-level operating budget and expenditure forecasts, as well as laying out the University's CIP funding strategy. The objectives of the biennium budget building process are as follows:

- Request new general funds for those UH initiatives that are most directly aligned to the Strategic Directions and are supported by metrics that can be used to demonstrate performance and return on investments. Support allocation of tuition revenues that incentivize units to improve productivity and efficiency and emphasize alignment with Strategic Directions.
- In allocating campus fiscal budget resources, academic programs will need to be refreshed for relevance to the Strategic Directions and incorporate performance metrics.
- Campuses and System will continue to evolve fiscal reserve administration to maintain strong reserve levels where they exist and build reserve levels to at least the Regent Policy minimum [i.e. 5%] where reserve levels are low.
- Focus on long-term financing of existing deferred maintenance levels in order to eliminate current amounts of deferred maintenance within a ten-year schedule and concentrate on fiscal measures that will prevent new amounts of deferred maintenance.
- Campuses should aggressively realign existing cost components where savings can be realized - especially in the area of developing projects that can garner utility savings or consolidation of shared services.

The following assumptions will be applied in the biennium budget building process for the operating and Capital Improvements Project (CIP) budgets:

- Capital funds for addressing capital renewal or deferred maintenance on existing facilities will be the priority in the capital budget.
- General funds or general obligation bond funds will be the first order of preference to meet annual capital renewal needs and for major renovation and modernization.
- The University will pursue revenue bond authority in order to supplement general fund or general obligation bond funds to the degree that the latter is insufficient to meet capital needs to support our ten-year plan to eliminate current levels of deferred maintenance.
- The moratorium on new construction will continue for the FY2017-2019 biennium, with limited exceptions as previously approved by the BOR. Therefore, requests for new construction will be heavily scrutinized as potentially compromising the University's campaign for adequate funding to address maintenance.

Lastly, prior to the BOR approving the high-level operating budget and CIP budget, the UH System Chief Financial Officer provided the following additional clarifications on the [State's current fiscal situation](#):

- While State ended FY16 with general fund surplus exceeding \$1 billion, that was a single point of data and the current balance is much lower;
- [The State's] Council on Revenues latest forecast is for 5.5% growth for FY17;
- Tax revenue collections at the end of September were down 3.3% compared to FY16;
- ERS (retirement) and EUTF (health fund) unfunded liabilities for the State are roughly \$18 billion [all post-retirement benefits for the University are funded and administered directly by the State];
- Labor negotiations for all 14 bargaining units are underway.

Both the high-level and the campus-level operating budgets for the College are prepared according to the assumptions, parameters, and requirements of the University's Budget Policy Papers. For the high-level operating budget and CIP budget, this compliance is assured through the BOR's approval of both the Policy Paper and the resulting budgets. For the campus-level operating budget, to comply with the spirit of the [2017-19 Budget Policy Paper](#) the College has implemented the following actions or plans:

- Discontinued the Associate in Applied Science in Autobody Repair and Painting due to low enrollment;
- Continues to evaluate and improve the productivity and efficiency measures for academic programs to maximize performance funding and institutional effectiveness;
- Developed a strategic enrollment plan to increase enrollment across underserved populations;
- Requested Legislative funding to support student success initiatives targeted towards Native Hawaiian and veteran students;
- Consolidated Computer Services and Media Services into a new IT unit to gain operational synergies;
- Continues to maintain adequate cash reserves;
- Secured \$2.5 million of legislative funding to install a photovoltaic system which will defray electricity costs;
- Reduces deferred maintenance to less than \$1 million by the end of the FY2020.

The College also supplements its operating revenues with extramural funding, primarily donations administered through the UH Foundation and federal grants. Since the majority of these funds are temporary, the College uses a very conservative approach and generally does not use these "soft" monies to fund its ongoing or core operations. Instead, it uses these revenues to underwrite test trials for new or expanded programs and services, with the goal of permanently funding successful programs or expansions through either the additional enrollment and tuition directly generated by the new or expanded program, or additional general funds secured from the Legislature justified by the program or service improving the College's productivity or efficiency measures. In the few cases where the College relies upon extramural funds to fund a long-term activity, it is either reasonably assured of the stability of the funding source, e.g. an endowed foundation account used to fund faculty and staff professional development, or the activity is not a core operation of the College, such as its 10-year breadfruit research projected funded through a USDA grant.

## **Analysis and Evaluation**

The UH System, UHCC System, and KCC have carefully studied the current fiscal and legislative environment. Financial planning for the college is done in consideration of these factors. The College makes plans and takes precautions to ensure the continued availability of funding for its core functions. At the same time, the College is pursuing initiatives to improve efficiency and effectiveness of its units.

Donations for the college come through the UH Foundation and are allocated according to the donors' wishes. Examples of partnerships include clinical facility agreements, donations from businesses for program equipment, collaboration with Island School and Kawaikini for Preschool and Charter school offerings, and invasive albizia tree removal with Kua'i Island Utility Cooperative.

### **III.D.5**

*To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control Systems.*

## **Evidence of Meeting the Standard**

As proscribed in [EP 8.204](#) the University's Vice President for Budget and Finance/CFO is ultimately responsible for the development and maintenance of an adequate financial controls across the University. To that end the University has a comprehensive set of Administrative Procedures (AP) under [Chapter 8, Business and Finance](#), which establish numerous controls through the proper use of delegations of authority, segregation of duties, online workflow management of transaction approvals, account reconciliations, and physical inventory verifications.

Furthermore, the UHCC System Office has instituted several additional procedures to provide additional guidance and direction to the community college campuses on establishing and maintaining a strong internal control environment and the responsible stewardship of the College's financial resources.

In order to reasonably assure its financial integrity and the responsible use of financial resources, the College complies with all of these procedures related to internal controls. The [linked table](#) categorizes these procedures by their underlying transaction cycle or as a general internal control procedure, for those that relate to all transaction cycles.

To further ensure that it maintains a robust control environment the University employs the following enterprise resource management Systems:

- Quali Financial Management (Procurement and Accounting)
- eThority (Management Reporting)
- eTravel (Travel Approval and Reimbursements)
- Banner (Academic Registration)
- Destiny (Non-credit Registration)
- myGrant (Grant Management)
- PeopleSoft (Human Resources)
- UH Leave System (Employee Leave)

Internal controls are evaluated through an annual audit of the UH System, and CFS & A-133 audits are posted on the [UH System Financial Management Office website](#). These include policies and procedures on purchasing and receiving, travel, and approvals.

Changes to the budget are communicated to the College through several channels: 1) both Cabinet and College Council are made aware of any changes, who are in turn responsible for communicating this information to their constituents, 2) updates on the College's budget are highlighted at Convocation each semester, and 3) each unit's budget is updated to reflect changes such as increases from approved APRU requests or reductions due to unexpected revenue shortfalls.

Financial management practices are regularly reviewed by the Administrative Services Office, the Community College System Budget and Finance Office, and occasionally the University's Office of Internal Audit, which reports directly to the Board of Regents. The results of these reviews are used to update or improve the College's internal control Systems. For example, the Administrative Services Office created a new [operating procedure](#) for the cafeteria cashier position in anticipation of an expected increase in revenue and transactions due to a major student discount that was implemented in the 2017-18 academic year.

UHCC System budget execution documents are distributed during monthly Vice Chancellor for Administrative Services meetings and/or posted on the UHCC [Budget Planning and Finance](#) website. These documents include the following:

- General operating budget allocations ([Allocations](#))
- Capital Improvement Plans ([CIP Plans](#))
- Consolidated Financial Statements ([Financial Statements](#))

### **Analysis and Evaluation**

The College follows all University policies and procedures that govern the maintenance of a strong control environment and regularly reviews its financial management practices to improve its internal control Systems. In so doing, the College utilizes effective segregation of duties, reviews, reconciliations, and verifications to reasonably assure the accuracy and completeness of its financial information. Furthermore, the College widely disseminates

dependable information through a variety of channels to support sound financial decision making.

In the [Fall 2017 Administrative Services Survey](#), only 71% of responding employees agreed that the Business Office provided them with the financial information they needed to perform their job duties and responsibilities, and only 76% agreed that it addressed their questions or concerns in a timely manner. In response, the College has worked with the UHCC Budget and Finance Office to create new, more meaningful monthly budget-to-actual expenditure reports. For example, see the [February 2018 Report](#). These reports are available for the campus to view and download at the [UHCC Budget and Finance Office Public Report webpage](#), and the Business Office will be providing training to the campus on understanding and using these new reports in April 2018. To coincide with the release of the new reports and to further address the survey responses, the Business Office will be better utilizing its recently acquired Fiscal Specialist to support questions and requests from the campus.

### **III.D.6**

*Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.*

#### **Evidence of Meeting the Standard**

To ensure the accuracy and completeness of all financial reports used by the College, UHCC System-generated reports are linked to the general ledger by the UHCC Budget and Finance Office, and all campus generated reports are linked to these UHCC System-generated reports by the Business Office or Vice Chancellor for Administrative Services.

The University's financial statements are audited by external auditors as required by ER 5. Additionally, the policies and procedures (listed in III.D.6) establish and maintain a strong internal control environment to ensure the accuracy and completeness of all other financial documents.

In order to ensure the credibility of the University's financial budgets, and as required by [RP 8.204](#), every year the BOR reviews the high-level annual operating budget, which forms the basis for the detailed operating budget developed by the campus. For the past three years, from FY15 to FY17, the campus-level operating budget has been very accurate, within a 2% variance, when compared to the actual revenues and expenditures for the corresponding period; except for FY15 wherein over \$500,000 of expenditures were either curtailed or charged out to other sources of funding in order to maintain sufficient operating cash balances throughout the year. The percent variances to budget are detailed in the [FY15-17 Actual to Budget Variance Summary](#).

The College's commitment to its student learning programs and services is evident from the large proportion of [fiscal resources allocated](#) to these areas.

Funding allocations over base-budgeting are made to divisions or units through the [APRU process](#), detailed in Standard I.B.9, which serves as the College's integrated planning and resource allocation process. This holistic and inclusive approach promotes broad participation from across the campus to assure the responsible and judicious allocation of financial resources to support student learning programs and services.

### **Analysis and Evaluation**

The College adheres to Generally Accepted Accounting Practices (GAAP), allocates the majority of its resources to support student learning programs and services, and seeks Board of Regents and external auditor reviews to validate accuracy of its financial documents.

### **III.D.7**

*Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.*

### **Evidence of Meeting the Standard**

The College process in response to audit findings is as follows:

- Affected units and administrative or support unit staff discuss and develop corrective action plans which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, or the implementation of new Systems.
- Corrective action plans are communicated to the auditor in accordance with deadlines set by the auditor or coordinating office such as ORS (A-133 audit corrective action plans). Corrective action plans identify the individuals responsible for implementing the corrective action, the actions taken to prevent reoccurrence, and the date corrective actions were taken. Additionally, these corrective actions may be confirmed by a subsequent review of the affected operation or a follow-up audit as determined necessary by the auditor.

The UH System undergoes an annual audit as an external check on the effectiveness of internal controls.

### **Analysis and Evaluation**

The UH System undergoes an annual audit by an external auditor. Audit reports are posted on the [UH Financial Reporting website](#). The college has a process for dealing with audit findings. Since the College's last self-study, it has had one minor audit finding. On December 15, 2016, the firm Accuity LLP concluded its financial and compliance audit on

the UH System that covered the period from July 1, 2014, to June 30, 2016 (Audit Report 12/15/16). Acuity found the College to be **noncompliant** in its administering of Title IV financial aid and enrollment reporting, wherein: 1) the College incorrectly calculated the return of Title IV, which resulted in an underpayment of \$982, and 2) the College's notification procedures failed to update student enrollment status in the NSLDS within the 60-day requirement.

In accordance the College procedure noted above, the Financial Aid and Registrar's Offices have instituted changes in their procedures to prevent these errors from recurring. First, all Financial Aid Office staff were trained on using the correct information to prepare the return of Title IV calculation, and a vacant Financial Aid Specialist position was filled to allow for an independent review and verification of all calculations on the return. Secondly, the Registrar's Office corrected its procedures to keep track of NSLDS reporting due dates based on the graduation status changes as opposed to using only the NSC 'Scheduled Transmission Dates'.

The Financial Aid Director and Registrar implemented corrective action plans based on the audit recommendations, and these plans were accepted as a viable resolution by the external auditor.

### **III.D.8**

*The institution's financial and internal control Systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.*

#### **Evidence of Meeting the Standard**

The BOR's Committee on Independent Audit (Audit Committee) and Office of Internal Audit (OIA) are charged with the duty to evaluate and assess the University's internal control Systems for validity and effectiveness, and ensure the results of these assessments are used for improvement.

The [Bylaws of the Board of Regents of the University of Hawai'i](#) states:

#### Committee on Independent Audit

1. Advise the Board regarding the Board's responsibilities to oversee:
  - a. the quality and integrity of the University's compliance with legal, regulatory and policy requirements, financial reporting and financial statements, and internal controls related to risks;
  - b. the function, disclosures, and performance of the University's compliance, internal control, and risk management Systems regarding ethics and compliance, risk, finance, and accounting, and the adequacy of such Systems; and

- c. the independent certified public accountant's qualification, independence and performance, as well as performance of the internal audit function.
2. Review the annual internal audit plan and the extent to which it addresses high risk areas.
3. Review the annual report of the internal audit department and discuss significant issues of internal controls with the Internal Auditor and management.
4. Discuss the planned scope of the annual independent audit with the independent certified public accountants and review the results of the audit with the independent certified public accountants and management.
5. Receive and review the annual certified financial reports with the independent certified public accountants and management.
6. Recommend to the Board the certified public accountants to serve as the independent auditor, and their fees.
7. Revise the scope of the annual audit, and approve any services other than audit and audit related services provided by the certified public accountants.
8. Provide recommendations to the Board regarding approval of the internal audit mission statement, the committee's charter, and other governance documents related to both internal and external compliance and auditing activities at the University.

Furthermore, the OIA's [charter](#) provides the following mission statement:

“The mission of the University of Hawai‘i (University) Office of Internal Audit is to assist the University’s Board of Regents and University Management (President, Senior Management Team, Council of Chancellors) in fulfilling their oversight, management, and operating responsibilities. This is accomplished through providing independent and objective assurance and consulting services conducted in a Systematic and disciplined approach to evaluate, add value, and improve the University’s operations.”

Since the last accreditation team visit, the activities of the OIA’s annual audit plans that have directly pertained to the College’s specific operations or internal controls are as follows:

1. November 14, 2017 - [Check disbursements less than \\$2,500 survey](#);
2. October 25, 2013 - [HIPAA Questionnaire](#);
3. January 25, 2013 - [Report on Agreed-Upon Procedures for PCards](#).

Additionally, OIA audit activities pertaining to other community college campuses that have or may result in improvements to the College’s internal control procedures are as follows:

1. January 19, 2018 - [Business Office Cash Collections Questionnaire](#);
2. February 6, 2017 - [Financial and Operational Oversight of Revenue Generating Programs](#).

Lastly, in addition to the required Single Audit, (e.g. [2017 Financial and Compliance Audit](#)), the University's external financial auditors also prepare an Internal Control and Business Issues Report (e.g. [2017 Internal Controls Report](#)), which provide the comments and observations identified by the external auditor that were not required to be reported in the aforementioned compliance audit report, i.e. Single Audit. Since the last accreditation visit the College had only one finding related to the Single Audit (formerly the A-133 Audit), which is discussed in III.D.7, with no other findings identified in the Internal Control and Business Issues Reports.

### **Analysis and Evaluation**

Audit activities have resulted in improvements in the College's compliance with University policies and procedures related to PCards and HIPAA. Furthermore, and most significantly, the February 6, 2017 OIA report on Financial and Operational Oversight of Revenue Generating Programs marks the conclusion of a 4-year internal control improvement initiative for the community college campuses, which ultimately resulted in the establishment of [UHCCP 8.200](#), and the corresponding improvement of the College's internal controls resulting from its compliance with that procedure.

### **III.D.9**

*The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.*

### **Evidence of Meeting the Standard**

On December 15, 2016, the Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016 (Audit Report 12/15/16). The opinion read "In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai'i, as of June 30, 2016 and 2015, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America." Additionally, the UHCC System maintains sufficient reserves to maintain financial stability and all UHCC campuses meet both 5% minimum and 10% targeted reserve requirements.

The balance of unrestricted fiscal reserve of the College is \$722,619 as of the BOR-approved budget for FY 2017 ([Approved BOR Budget FY17 p 93](#)). [Campus reserves](#) are 5.3% of the prior year expenditures .

The timing of payment of funding from the State and from tuition provides the college a steady flow of funds into the College throughout the fiscal year. The State provides approximately one-quarter of General funds prior to the beginning of the fiscal year and provides the remaining full year allocation prior to the end of the first quarter. The College collects tuition prior to the beginning of fall and spring terms.

Contingency plans have not been implemented by the College, but would follow UH and UHCC policies and procedures including [RP 8.203](#), Operating Reserves; Non-General Funds, [EP 8.210](#), system wide Financial Reserves, and [UHCCP 8.201](#) Unrestricted Funds Reserve - General, Special, Revolving Funds. Potential contingency plan actions could involve reductions in services, reductions in workforce, or the use of the college's financial reserves.

### **Analysis and Evaluation**

The College meets or exceeds reserve minimums established by the UHCC and receives a steady flow of funds throughout the fiscal year to meet the needs of its programs and services. In addition, careful monitoring of revenues, expenditures and cash are conducted to prevent cash-flow problems. Hence, a contingency plan has not needed to be implemented.

### **III.D.10**

*The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.*

### **Evidence of Meeting the Standard**

A variety of [financial management policies, procedures, and evaluation tools](#) are used to plan, project, monitor, and maintain financial integrity across financial aspects of the College. Reports and management tools used to monitor extramural funds, loan funds, and non-extramural funds include monthly budget status reports, monthly cash management reports, and Kualii Financial System (KFS) reports.

Kaua'i CC participates in the following federal financial aid programs: 1) Federal Pell Grant, 2) Federal SEOG Grant, 3) Federal Work Study, 4) Federal Direct Subsidized Loan, 5) Federal Direct Unsubsidized Loan. In addition to federal aid, state aid and scholarships are also administered through the financial aid office. State and/or UH System aid consists of: 1) B Plus Scholarship, 2) Second Century Scholarship, 3) Opportunity Grant, and 4) Native Hawaiian Tuition Waiver. The majority of our scholarships are managed through the UH Foundation and administered via the financial aid office. All disbursements are made in accordance with the UH System's timeline, which falls 10 days prior to the start of the semester.

The financial aid office at Kaua'i Community College administers all Federal Title IV financial aid in accordance with all UH System policies and procedures and all federal regulations. Compliance is ensured by a System of checks and balances with various government databases (COD, CPS, NSLDS, FAFSA.gov) along with coordinating processes with other departments on campus such as the Business Office and Registrar. The following

are a few examples of regular and recurring processes that have been put in place to ensure compliance:

- Monthly reconciliations for various FA programs amongst financial aid, business office, and government sites;
- Daily import of files from various government sites (CPS, NSLDS, COD), and ensuring of correcting of any rejected records;
- Weekly withdrawal reports to identify any needed R2T4 calculations;
- Administering Pell grants/Direct loans with established amounts set forth from Dept. of Ed;
- Verification process to ensure no conflicting information, prior to awarding, for those selected for verification from Dept. of Ed;
- Knowledgeable guidance for students when completing FAFSA so ensure accurate information on application.

Monies from scholarships, fundraisers, and donations are housed in accounts under the UH Foundation and are monitored by the foundation's internal control System. The UH Foundation's responsibilities are to ensure that properly authorized transactions are processed in a timely manner and that disbursements are in compliance with account restrictions and this policy.

The UH Central Accounting office and the Office of Research Services oversee all grants to ensure that they are managed in accordance with all regulations, internal restrictions, and laws governing the agreements.

### **Analysis and Evaluation**

The College practices effective oversight of finances for all its programs including financial aid, grants, externally funded programs, and other organizations or foundations by adhering to policies and procedures detailed above. Further evidence is the lack of findings in financial audit reports (except the minor December 2016 finding described in Standard III.D.7) since the last reaffirmation of accreditation.

### **III.D.11**

*The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.*

### **Evidence of Meeting the Standard**

The College participates in short-term and long-term planning as noted in Standard I.B.9. and III.B.2. All financial plans incorporate payments of long-term liabilities and obligations,

including debt, health benefits, insurance costs, and building maintenance costs. The same information is used in short-term or annual budget and other fiscal planning efforts.

All fringe benefits for general funded (i.e. budgeted) positions are incurred and paid directly by the State. The College is responsible for paying for fringe benefits for all other types of employees. However, the benefit plans are all managed directly by the State.

The UHCC campuses do not issue debt for Other Post-Employment Benefit (OPEB), insurance costs, or repairs and maintenance projects, which are funded by the State. The items currently financed with long-term debt are limited to projects that directly create revenue streams that offset debt service costs. See Standard III.D.14 for further discussion.

The College allocates resources for the payment of its liabilities and funds/reserves to address long-term obligations. No funds are directed to actuarially developed plans for OPEB obligations.

### **Analysis and Evaluation**

The College maintains a level of financial resources that provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the College considers its long-range financial priorities to assure financial stability. Furthermore, the vast majority of employee benefits cost, particularly pension and OPEB, are borne directly and entirely by the State, which further buttresses the College's solvency. The College clearly identifies, plans, and allocates resources for the payment of liabilities and future obligations. The College has maintained a strong financial position as a result of these practices.

### **III.D.12**

*The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post- Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.*

### **Evidence of Meeting the Standard**

The employer's share of OPEB obligations for general funded positions is centrally paid for by the State general fund for all State agencies. As such, employer OPEB obligations for general funded positions are not part of the UH operating budget.

The University is, however, obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the University; which for the College is less than 5% of its OPEB eligible employees. The University's contributions are calculated as part of the State's total contribution requirements and are reimbursed to the

State's General Fund as part of the fringe benefit rate on employees' actual salaries. The University's annual OPEB cost for non-general funded employees is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of Governmental Accounting Standards Board (GASB) Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The employer's' OPEB obligations for non- general funded positions are fully recognized and accounted for in UHCC non- general fund financial plans.

The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards. From the Notes to Consolidated Financial Statements for June 30, 2017 and 2016, page 67, Funding Policy and Annual OPEB Cost section:

“The University is required by GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, to obtain an actuarial valuation every other year. Therefore, an actuarial valuation was performed as of July 1, 2015.”

### **Analysis and Evaluation**

The College is responsible for the OPEB for only a small number of non-general- funded positions. These allocations are made at the required level based on a calculation by the University.

### **III.D.13**

*On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.*

### **Evidence of Meeting the Standard**

The College calculates the amount of locally incurred debt and allocates adequate resources for its repayment. The percentage of the budget used to repay **locally incurred debt** is approximately 1%.

Funds are transferred from the College to the UHCC System on an annual basis for repayment of these debt instruments. Current locally incurred debt instruments are used to fund energy conservation measure projects that have been implemented campus-wide and to fund alternative energy (photovoltaic) projects. The College includes these debt obligation payments in all budget and planning documents.

### **Analysis and Evaluation**

The College reviews and manages locally incurred debt annually and allocates adequate resources for repayment.

### III.D.14

*All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.*

#### **Evidence of Meeting the Standard**

As noted in Standard III.D.10, the College manages its financial resources with integrity including auxiliary activities, fund-raising efforts, and grants.

**Short-term and Long-Term Debt:** The UHCC campuses have long-term debt instruments (revenue bonds) for various energy conservation and alternative energy projects on most campuses including Kaua‘i. Bond funds are used for purchase, and installation of new or replacement fixtures and equipment that consume less energy or generate electricity resulting in lower utilities cost for campuses. Debt service is paid centrally by the UHCC System wide Support unit with annual reimbursement from campuses based on energy savings for each campus. The funds for this debt service reimbursement are allocated annually as part of the budget planning and execution process for each campus. The percentage of the operating budget used for debt service reimbursement is approximately 1%.

University policies and procedures require that the funds be used in accordance with [state and federal requirements](#), the [mission and goals](#) of the University, and the [purpose](#) of the funding source.

**Auxiliary Activities:** Auxiliary activities are self-supporting services that provide non-instructional goods or services funded by a user charge or fee. Auxiliary activities such as the Bookstore, the Cafeteria, and the Wellness Center are operated for the benefit of the College’s students, faculty, and staff. Bookstore operations are administered by the Mānoa Bookstore unit. Other auxiliary activities are reviewed annually to ensure they are not operating at a deficit or accumulating excess cash or profits, in accordance with [UHCCP 8.200](#). Additionally, [AP 8.025, Fiscal Responsibilities within the University](#), requires that the funds be used in accordance with state and federal requirements and the purpose of the funding source.

**Gifts and Fundraising:** University policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure funds are properly expended in compliance with donor restrictions and the usual and common business and regulatory practices ([RP 8.209, Gifts](#); [RP 8.210, Fund Raising](#); [EP 8.209, Fund Raising](#); and [AP 8.620, Gifts](#).)

**Grants:** The College follows all University policies and procedures and federal requirements related to management of grant funds. These include [AP 8.926](#), Administrative and Financial Management Requirements for Extramurally Financed Research and Training Programs/Activities of the University of Hawai'i, [AP 8.956](#), Accounting for Research & Training, [AP 12.411](#), Subrecipient Monitoring, and [EP 12.102](#), Authority to Sign and Execute Extramural Research and Training Contracts/Grants, Agreements and Contract Assignments and Releases. These policies and procedures were developed to ensure that the College is compliant with federal Office of Management and Budget circular requirements (e.g., 2 CFR 200).

### **Analysis and Evaluation**

University policies and procedures require that all funds be used in accordance with state and federal requirements and the intended purpose of the funding source. Guidelines, processes, and internal control systems are in place and regularly updated to ensure that all financial resources, e.g. bond proceeds, auxiliary activities, fund-raising, and grants, are used with integrity.

### **III.D.15**

*The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.*

The College monitors student loan default rates annually by a three-year cohort.

<b>Cohort</b>	<b>Default Rate (by 3rd year)</b>
2010	12.1%
2011	21.2%
2012	25.9%
2013	26.5%
2014	17.0%
2015 (Draft)	21.8%

As a result of two consecutive years exceeding 25%, the Financial Aid Office implemented plans to mitigate and reduce default rates, because rates at 30% and above trigger heightened monitoring by the Department of Education with enhanced requirements and possible loss of Title IV eligibility. Steps taken by Financial Aid included:

- Require students to apply for loans rather than automatically offering them on their MyUH portal.
- Use the National Student Loan Database System (NSLDS) to identify students who are either in danger of defaulting, or who have previously defaulted on their loans. The College contacts these students to provide support and assistance in avoiding or getting out of default.
- Require face- to- face entrance counseling to inform the student of his/her [responsibilities](#) in regards to student loans.
- Promote direct cost borrowing (only borrowing what they need for school costs) which is discussed during the [face-to-face entrance counseling](#).

The College follows [UH Administrative Procedures](#) to ensure that it complies with federal requirements with regard to its use of other federal funds or assets. Although most of the College’s federal contracts, grants, and awards are administered by the RCUH, the College’s Principal Investigator and Fiscal Administrator are still responsible to ensure all federal funds and assets are expended and managed in compliance with all Federal and University policies, procedures, and requirements.

### **Analysis and Evaluation**

Actions taken to reduce student default rates have improved the default rates over the past two years. Nevertheless, cohort default rates inherently have a certain level of fluidity, and will vary from year to year. Kaua’i CC will continue to practice the proven methods mentioned above, as well as verify the underlying data of the draft cohort rates to ensure the official rates are accurate and complete. In addition, the Financial Aid Office complied with a 2016 financial audit finding by creating action plans to come into compliance (see III.D.7 for details).

### **III.D.16**

*Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.*

### **Evidence of Meeting the Standard**

The University of Hawai‘i System established a policy on [Contracts and Signing Authority](#) in 2017, which sets standard provisions that should be in all contracts, details the approvals and signing authority required to enter written contracts, and identifies priority contracts requiring additional scrutiny. The College uses a [Contract Review Form](#) to document that all non-procurement related contracts or agreements undergo reviews by relevant stakeholders to ensure that they contain appropriate provisions to maintain the integrity and quality of the College’s programs, services, and operations, and comply with University policy. Documents are only executed after this review process has been completed and the Chancellor concurs that the contract or agreement supports the mission and goals of

the College. Additionally, Business Office staff ensure all procurement and extramural funds-related contracts comply with the applicable [UH Administrative Procedures](#).

### **Analysis and Evaluation**

The College has a variety of [contractual agreements](#), which not only abide by policy or procedure, but also align with the mission or strategic priorities of the System and/or College. Contracts are consistent with the College’s mission statement and goals and require approvals that include the Fiscal Officer, VCAS, and the Chancellor. Contractual agreements are subject to various UH System policies and procedures and oversight is provided by UH System staff, thereby ensuring that the College maintains its integrity in contractual agreements.

### **III.D Evidence**

III.D.1-1	HI Revenue Statute
III.D.1-2	Tuition Increase Table
III.D.1-3	Affordability Study

## **Standard IV: Leadership and Governance**

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

### **IV.A. Decision-Making Roles and Processes**

#### **IV.A.1**

*Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.*

#### **Evidence of Meeting Standard**

Kaua‘i Community College leadership has demonstrated a commitment to supporting innovation in a multitude of ways. The strongest evidence are the ideas brought forward by employees and students that have been institutionalized. [Ideas for innovation](#) and improvement of programs, practices, and programs have been brought to leadership in both formal and informal processes. For example, ideas may originate from committees (e.g., Student Government and Sustainability Committee), College Conversations, divisions (e.g., Student Services), the UH System (e.g., Integrated Student Success), or an individual at an informal lunch with the Chancellor when these are held and open to all college employees. Leadership ensures innovations and improvements to services, programs, and practices are channeled through the proper participatory governance processes, per policy.

The College and system also support innovation by investing in professional development aimed to develop current and future leaders (See III.A.14). Opportunities are available to all college employees and include Emerging Leaders, Great Teachers Seminar, Community college Leadership Champions, and Wo Learning Champions. Employee professional development is further supported through UH Foundation funds, which provides monetary support for conferences, training events, and other professional development opportunities. The College established a full-time, general-funded professional development coordinator

that began in fall 2016. The result has been an increase in professional development opportunities along with more organization, planning, advertising, and evaluation of events. Improvements to services, programs and processes have also resulted from implementation of Strategic Priority Goals within and across divisions (e.g., increase the number of Native Hawaiian Graduates), the program review process (e.g., purchase Maxient software to allow for more efficient case management in Mental Health and Disability Services), and input from the community through various boards and advisory groups (e.g., Early College math and English courses being offered to Native Hawaiian students, as suggested by the Native Hawaiian Advisory Board).

### **Analysis and Evaluation**

The breadth of innovation and continuous improvement is evident at Kaua‘i Community College. Leaders create, encourage and support innovation to improve the College’s programs and services. Multiple opportunities and avenues exist for the presentation of innovative ideas. Training to support successful development and implementation of innovations is supported by leadership. In general, successful innovations have had an employee or student champion, in addition to the support of leadership and development through the appropriate participative governance process(es).

To further support innovation at the College, College Council voted to support the establishment of an Innovation Center and hiring for the Center Director is currently underway. Projects supported by the Center will have a faculty lead, address a community concern, be interdisciplinary, and teach students relevant skill sets.

#### **IV.A.2**

*The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.*

### **Evidence of Meeting the Standard**

The framework for participatory governance at the College is provided by policies and procedures that guide administrators, faculty, staff, and students on collaborative decision-making.

The College Council is the primary forum at the College for regular and in-depth dialogue among stakeholders regarding the College Mission, strategic planning, priority setting, policy development, and budget development, as defined in [KCCP 1-7](#). The Council is an advisory body to the Chancellor and is charged with overseeing the development and updating of key plans and policies to ensure that college actions are aligned with the College Mission and strategic goals. This widely inclusive forum, comprised of representative

administrators, faculty, students, and classified staff, also encourages and supports collaboration and the campus-wide, two-way flow of information to improve student learning and the College's responsiveness to community needs. The agendas and minutes for College Council meetings are shared with all employees and ASUH-KCC Student Government representatives. Meetings are also open to all members of the College.

College-wide standing committees report to College Council, which provides an avenue for information-sharing about the committees' work. Examples of these standing committees include Assessment, International Education, Information Technology Advisory, and Marketing and Outreach. The Chancellor may also develop special ad hoc committees to further research topics that have college-wide implications or are broader than a single committee or council. A recent example was the ad hoc Academic Affairs Dean Committee that was tasked with further investigating the roles of instructional deans in the UHCC System in order to make a recommendation to the Chancellor on whether or not there was enough justification and need at our college. Members included instructional and non-instructional faculty and the Chair of Faculty Senate. Other examples include ad hoc committees established to gather suggestions from College Conversations on mission revision, strategic goals, and strategic priorities to present findings and recommendations to College Council.

College Conversations, as described in [KCCP 1-2](#), provide another way in which campus constituents have a voice and opportunity to engage in dialogue. Conversation topics may be proposed by faculty, staff, or students, and provide opportunities to inform and engage the campus on topics of relevance to the College's mission and strategic plan.

**Faculty:** In addition to College Council, two main policies describe faculty participation in governance at the College. The first, [KCCP 4-2](#), defines the roles and responsibilities of academic Division Chairs. All Chairs report directly to the Vice-Chancellor for Academic Affairs (VCAA) on instructional and administrative matters and disseminate information from the administration to their constituents.

The second is [KCCP 4-17](#), which establishes the process for creation or modification of academic policies. The Faculty Senate is the first to review such policies and make a recommendation to College Council. The complete description of Faculty Senate's role is described in their [Charter](#) and [Bylaws](#). This senate body is composed of elected representatives from each division (listed above) in addition to representatives from Student Affairs, Institutional Effectiveness, and the Office of Continuing Education and Training to provide a voice to all college faculty.

**Classified Staff:** Classified Staff are represented on the College Council (see above) with representation from each collective bargaining unit: Facilities (Unit 1), Clerical (Unit 3), and Administrative, Professional, and Technical (Unit 8).

**Students:** The College's elected student government organization, The Associated Students of the University of Hawai'i - Kaua'i Community College (ASUH-KCC) assigns student representatives to college committees. ASUH-KCC representatives are assigned to each of

the College's five divisions as liaisons that attend division meetings to [voice student concerns](#) ( Article V, section 1) and report to their electorates. In addition, student representatives serve on standing committees and ad hoc committees, when appropriate, such as the Campus Reorganization and Campus Mission Statement Revision Committees. Students are also invited to propose and participate in [College Conversations](#).

### **Analysis and Evaluation**

The College has policies and procedures in place to not only ensure faculty and staff participation in decision-making, but also give all campus constituents the opportunity to have a voice in decision-making. Moreover, the campus welcomes widespread participation and dialogue from all major areas of the campus. However, as a two-year commuter campus, one challenge we face is maintaining an active and robust student population in student government. For example, student representation in committee meetings is sometimes missing.

### **Action Item**

The College will dedicate a College Conversation and convene a student focus group to develop strategies to increase student participation in both student government and college committees. This topic was first broached at the [January 10, 2018](#) College Council meeting during a program review discussion.

## **IV.A.3**

*Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.*

### **Evidence of Meeting the Standard**

College policies clearly define roles in institutional governance for administrators and faculty, and both groups have substantial input into policies, planning, and budget appropriate to their areas of responsibilities. [Policies](#) encompass administration, College Council role, integrated planning, College Mission, review of programs, and academic policies.

A recent example that demonstrates the clearly defined roles of college administrators and faculty in planning and decision-making is evident in the review of the College's Mission Statement, which must occur at least every five years. [KCCP-1-8](#) clearly defines the Chancellor's responsibilities, which include: adhering to planning principles stated therein to ensure the integrity of the process; initiating the review process; creating a timeline coordinated with that of the UHCC and UH systems; appointing a Mission Statement Task Force comprised of faculty, staff, students, and community representatives; conducting a

College Conversation to review the College's Mission; soliciting input from internal and external constituencies including student at large and community members; and revising the mission statement to present to the Board of Regents for final approval. The Mission Statement Task Force's responsibilities include compiling suggestions and incorporating them, as appropriate, and providing several different versions of statements for College Council review and recommendation to the Chancellor. The College Council's responsibilities include involving each of its member's constituents in the process and voicing the general consensus of its various constituencies to aid the Chancellor in determining the final mission statement.

### **Analysis and Evaluation**

The College has policies and procedures that clearly define roles for faculty and administrators in institutional governance. All employee groups actively participate in planning, policy development, and resource allocation through College Council. In particular, faculty have the initial role on establishment and modification of academic policies through Faculty Senate.

#### **IV.A.4**

*Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.*

### **Evidence of Meeting the Standard**

The College operates under clearly described procedures that describe faculty and academic administrator responsibilities regarding curriculum and student learning programs and services. In addition, the University System has a [policy](#) that explains the role of the Community College Council of Faculty Senate Chairs in advising the Vice President for Community Colleges (VPCC) on academic planning.

The foundation of this process occurs at the division level. Division faculty meet monthly during the academic year to discuss topics including curricula, student achievement, barriers to student success, course alignment/scheduling, and assessment. When course or program curricula are created or modified, the division submits proposals to the Curriculum Committee.

The [Curriculum Committee](#) is a standing committee of the Faculty Senate that includes the Vice Chancellor for Academic Affairs and faculty from each academic division and student affairs. At the course level, the Curriculum Committee's role is to review and approve, and maintain Course Outlines (COs), conduct five-year course reviews and, approve the deletion or inactivation of courses. At the program level, the Committee reviews and approves the creation, revision, or termination of programs. All curriculum decisions must obtain final approval by the Vice Chancellor for Academic Affairs and the Chancellor.

The Curriculum Committee is assisted by the Assessment Committee, which reviews Student Learning Outcomes (SLOs) for courses and programs. The Assessment Committee's mission is to encourage and promote a culture of assessment at the College. The primary purpose of outcomes assessment is to assure institutional effectiveness and to foster ongoing improvements in student learning. The Curriculum Committee is also assisted by the College's various designation boards, which review and approve applications for course designations to satisfy the various General Education graduation requirements (e.g., written communication, global and multicultural perspectives, quantitative reasoning, etc.).

Academic advisors, counselors, and librarians at the College are classified as faculty. They attend division meetings and provide feedback on academic issues, such as scheduling or the need for additional support services to improve student success in a particular course. The Student Affairs unit was also actively involved in the math and English redesign at the College. The College has developed an Integrated Student Success committee where instructional faculty, student support staff, and administrators meet to discuss how to best integrate student services with instruction.

### **Analysis and Evaluation**

Campus and system policies and procedures are in place regarding the role of faculty and administrators in both curriculum and student learning programs and services. Although these usually function as intended, sometimes not all campuses agree on a system-wide approach. For example, during the development of the UHCC [Time to Degree: Co-Requisite Policy](#), the College's English faculty raised some objections to certain aspects of this policy. Nevertheless, the College has implemented this policy to align with the overall System initiative.

### **IV.A.5**

*Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.*

### **Evidence of Meeting the Standard**

Within the guidelines and policies established by the Board of Regents and the University system, the College has established policies and procedures that ensure the following: 1) appropriate consideration of relevant perspectives; 2) decision-making based on expertise and professional responsibilities; and 3) timely action on institutional plans, policies, curricular changes, and other key issues.

**Appropriate Consideration of Relevant Perspectives:** The College has developed a process for communication that demonstrates its commitment to diverse perspectives.

[College Council](#) consists of representatives from all areas of campus (student government, staff, faculty, and administrators) and meets semi-monthly to address issues of concern to the College or campus community. To encourage the broadest participation in this forum, agendas are emailed to all campus constituents, and meeting minutes are emailed to all employees and posted to the website.

College Conversations, usually held for one-to-two hours during the all-college hour or in the late afternoon when most faculty should be free to attend, further demonstrate the College's desire to address key issues with as many campus stakeholders as possible. As described in the College [Conversations Policy](#), students, staff, faculty, or administrators may propose a conversation topic and the entire campus is invited to attend. The informal, interactive format of College Conversations encourage people from all parts of the campus to work together and share perspectives. Recent College Conversation topics included: Implementation of our Sustainability Policy, Strategic Goals, FY19 College Priorities, Grant Writing, and the Campus Reorganization. During, fall and spring semester Convocations, faculty and staff meet to learn about and discuss topics such as System-wide Initiatives, Goals and Priorities, and Performance Measure Statistics.

The students' role in decision-making is described in the ASUH-KCC [Constitution and Bylaws](#). Article V of the ASUH-KCC [Constitution and Bylaws](#) ensures student representation at the College by requiring thirteen senators to be elected to represent students in each of the five academic divisions and one At-Large member. These senators function as direct liaisons between academic units and student government. In addition to serving as student representatives to each academic division, ASUH-KCC representatives also serve on other college committees to help provide a student perspective.

The College's Makaloa Council also illustrates the College and the UH System's value of diverse perspectives. Although Native Hawaiians are the indigenous population of our state, they are underrepresented in faculty and leadership positions in the UH system. In addition, the UH System's mission is to be a premier indigenous serving institution. To strengthen the College's ability to hire those with an understanding of Hawaiian culture and issues, the Makaloa Council initiated [KCCP 2-2](#), which recommends that a Makaloa Council representative be appointed to all cabinet and search/hiring committees to not only represent the interests of Native Hawaiians but also serve as a cultural advocate to hiring committees.

**Decision-Making based on Expertise and Professional Responsibilities:** The College has [policies](#) that specify governance roles for faculty and students (see also Standard IV.A.3). The faculty's role is described in the University of Hawai'i Board of Regents' Policy on [Faculty Involvement in Academic Decision-Making and Academic Policy Development](#), which states that "the faculty has primary responsibility for such fundamental academic areas as curriculum content, subject matter, and methods of instruction and research." The emphasis on the faculty's role in academic decision-making at the College is echoed in the College's [Division Chair Policy](#), which establishes guidelines for their selection. These criteria state that division chairs are faculty, which makes them valuable as "first-line administrators" in questions relating to instruction.

As noted above, College Council has broad representation and defined responsibilities for decision-making, per [KCCP 1-7](#). Standing Committees that represent specific functions at the College have responsibilities defined in their respective Charter and Bylaws. Faculty also have a role in the development of academic policies through Faculty Senate, as described above.

The College maintains appropriate minimum qualifications for its faculty, staff, and administration (see Standard III.A). This ensures that employees have the necessary expertise to make decisions related to their role on campus.

**Timely Action on Institutional Plans/ Policies/ Curricular Changes/Other Key Issues:**

The College has policies that ensure timely action for updating both policies and institutional goals. Policy [KCCP 1-1](#) states that all policies will be reviewed at least every 5 years, whereas [KCCP 1-8](#) describes the review timeline for the College Mission. [KCCP 1-6](#) provides a timeline for review of academic programs and other units of the College to assess their demand, effectiveness, and efficiency. This policy also defines how and when updates to the review process should be made. The College's curriculum process sets a 5-year review period for courses so that curricula remain relevant to both the profession and local workforce needs.

**Analysis and Evaluation**

Through its system of governance, KCC demonstrates that it values relevant perspectives in its decision-making and aligns decision-making with expertise and responsibility to take timely action on institutional plans, policies, curricular changes, and other key considerations.

The College's adoption of [KCCP 4-10](#), No-Show Drop Policy, is an example of an institutional improvement that resulted from the consideration of diverse perspectives and collaboration of groups and units across the College. This policy, enacted in Spring 2015, enables instructors to drop students from their courses who neither attend nor make contact with the instructor during the first week of class. Both faculty and students recognized that such a policy would benefit the majority of students, as it makes seats available to students and prevents some negative academic and financial repercussions for no-show students, such as receiving F's on their transcripts or incurring payment obligations for courses they never attended.

The composition of the College's Curriculum Committee provides an example of decision-making based on expertise and professional responsibilities. The Curriculum Committee consists of nine voting members; five are faculty representing each division of the College. The Committee also has two ex-officio non-voting members representing academics affairs: the Vice Chancellor for Academic Affairs (VCAA) and the Educational Specialist from the VCAA's office. The VCAA's Secretary serves as the Curriculum Committee secretary.

#### IV.A.6

*The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.*

#### **Evidence of Meeting the Standard**

The College uses governance policies to guide processes for decision-making that are updated at least once every five years per [KCCP 1-1](#). Policies are brought to College Council for discussion and recommendation to the Chancellor. Representatives from each division and unit, including the Faculty Senate, discuss proposals with their constituent groups and provide feedback to the proposer and College Council. College Council strives to achieve consensus through discussion on interpretation, implementation, and potential unintended consequences. In the event that a decision by the Chancellor differs from the Council's recommendation, the Chancellor provides the campus community with a written explanation of the factors affecting her overriding decision in accordance with [KCCP 1-7](#). All of the Chancellor's decisions are documented in College Council minutes, which are e-mailed to campus employees and archived in the shared campus drive, CampusDocs.

The Chancellor keeps the campus apprised of new developments and initiatives at the start of each semester during College Convocation and semi-monthly through Chancellor updates at College Council. Additionally, the VCAA provides a campus and system report on new policies or procedures that affect faculty during the session. Lastly, the VCAS provides campus budget updates, including decisions made on resource allocations, at both Convocation and semi-monthly College Council meetings.

#### **Analysis and Evaluation**

Processes for decision-making are effective and used by employees of the College, and the resulting decisions are documented and widely communicated across the institution. Faculty and staff are involved in the planning phase for all major decisions that affect the College. A recent example is the process used to update the College's mission and goals. A [Mission Statement Task Force](#) was created that involved faculty, staff, and administrators, representing all units, to recommend a new Mission Statement. The recommendation followed the decision-making process (see [KCCP 1-7](#)), and was submitted to College Council for review, discussion, and recommendation to the Chancellor. The Chancellor forwarded the campus-approved proposal to the Board of Regents for final approval. Another example was the College's [Reorganization Plan](#), which garnered participation from a cross-section of faculty, staff, and administrators, that provided input via an ad hoc working group. First, a College Conversation was held to introduce the possibility of reorganizing the College to improve institutional effectiveness and student learning. Next, the ideas generated from the conversation were given to the working group to draft a reorganization proposal to bring to College Council.

#### IV.A.7

*Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.*

#### **Evidence of Meeting the Standard**

KCC Policies (KCCPs) guide the institution and are reviewed at least every five years to assure currency, integrity, and effectiveness, per KCCP 1-1. The policies relating to shared governance include the [roles and responsibilities of the Administration](#), the [review of established programs](#), the [establishment of the College Council](#), the review of the College [Mission Statement and integrated planning](#), the [responsibilities](#) and [selection procedures](#) for division chairs, and the process to [propose or modify an academic policy](#). The most current versions of approved KCCPs are posted to the CampusDocs drive (the College's main Google Drive folder), which is accessible to all college employees.

In 2015, the College challenged itself to re-evaluate its campus organization structure, including leadership roles. While an entire campus reorganization is not undertaken on a regular basis, the College recognized the unique opportunity presented when two long-time administrators announced plans for retirement, which provided favorable circumstances to re-evaluate administrative areas of responsibility in light of current and future goals. Several changes resulted from the reorganization, including: moving developmental English and math from academic support into the respective academic divisions to better align with college-level courses, consolidating the IT function, establishing an Institutional Effectiveness unit, and bridging academic support functions together under the Vice Chancellor for Student Affairs to more effectively serve students. Major [changes in leadership roles](#) occurred as a result. The College's willingness to undertake this process demonstrates its commitment to self-examination and improvement based on widespread campus input and discussion.

#### **Analysis and Evaluation**

The College evaluates its leadership roles, governance structures, and decision-making policies. One challenge the College has faced is creating a regular cycle of evaluation for some of its governance structures. Although surveys have been used for evaluation, some have not been administered on regular review cycles, whereas others have been changed in ways that make trends difficult to identify. As a result, the campus undertook a newly-designed [governance survey](#) in spring 2017 to gauge the effectiveness of KCC's shared governance structures. The results of this survey indicated strengths and weaknesses. For example, one weakness identified by the survey is that staff do not feel as connected to the College Council as faculty. This weakness was addressed by creating a Staff Senate, which mirrors the Faculty Senate, to provide more opportunities for staff voices to be heard and provided it with a voting seat on College Council. As a result, [College Council](#)

was revised to add a Staff Senate representative, complementing the existing three staff members, one for each Staff bargaining unit. The College website was also identified as an area for improvement, and it is being addressed by a new, full-time webmaster. A final weakness was the concern with the transparency of the budgeting process. As a result, the Vice Chancellor for Administrative Services now provides an update to the College Council regarding the fiscal year budget, verifies if divisions will receive base funding, and identifies the amount of extra funds for the APRU process. Rubric rankings, with comments generated from discussions within both College Council and Cabinet, are shared with the entire campus via e-mail. The Chancellor presents the finalized list of items to be funded to College Council, where any questions are addressed.

The governance survey also revealed strengths that included agreement that the mission statement directs the strategic plan, constituents know how to communicate information to College Council, and there is an effective process for reviewing the mission statement. The results of the survey were shared with the campus via email.

## IV.B. Chief Executive Officer

### IV.B.1

*The institutional chief executive officer (CEO) has primary responsibility for the quality for the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.*

#### **Evidence of Meeting the Standard**

##### **Responsibility for Quality of the Institution:** UH [Executive Policy 1.102](#)

stipulates that the Chancellor of each college in the UH System has the responsibility for administration and operation of the College, including financial oversight. The Chancellor is appointed by the University of Hawai‘i Board of Regents with full-time responsibility to the College and has the requisite authority to administer board policies developed to ensure the quality of institutions within the University of Hawai‘i system. As chief executive officer for the College, the Chancellor reports to the University of Hawai‘i Vice President for Community Colleges and serves as the College’s chief liaison officer to the President of the University, the President’s staff, the Board of Regents (BOR), and the Hawai‘i State Legislature.

**Responsibility for Planning and Organizing:** The Chancellor ensures that the College identifies and regularly reviews and updates the College [mission](#) and that the Mission drives the establishment of strategic goals. Both the Mission and Goals provide the framework for college operations and planning. During the last two years, under the Chancellor’s leadership, members of the College community including the College Council, the Cabinet, the Faculty Senate, and other working groups have collaboratively updated the College Mission, developed the [2016-21 Strategic Goals](#) and began drafting a new Long Range Development Plan.

The Chancellor regularly communicates values, goals, institution-set standards, and other relevant information at Convocation each semester and through semi-monthly College Council meetings. In addition, the Chancellor holds College Conversations on important initiatives to encourage input from college faculty and staff. She ensures that the community is aware of the values, goals and performance of the College by including this information on the website, having a regular presence on local radio and in the island newspaper, serving on various community boards, and in speaking engagements for various community organizations.

Beginning in 2014, the Chancellor led discussions and forums with the entire campus on how to reorganize units within the College, after long-standing Administrators retired. The process began with a small group of faculty and administrators attending a conference on best practices in institutional effectiveness. A College Conversation began the formation of the Reorganization Working group. After much discussion within divisions, units, and committees, a final draft was submitted to College Council for review and recommendations to the Chancellor for approval in 2015. The reorganization added a professional development position, realigned the Student Affairs unit, and created an Institutional Effectiveness unit, which is reflected in the current [Organizational Chart](#).

**Responsibility for Budgeting:** The College links institutional effectiveness, planning, and resource allocations to the College strategic goals through the [Annual and Comprehensive Program Review](#) (APRU and CPR) processes. Working closely with Cabinet and College Council, the Chancellor oversees these processes, invites broad input from the College community, makes final budget allocations, and communicates resource decisions to the College.

**Responsibility for Selecting and Developing Personnel:** Per [UH Executive Policy 9.112](#), Delegation of Authority for Personnel Actions, the Chancellor has the final authority for all personnel hires. She also must approve all position requests and job descriptions. Since the last reaffirmation of accreditation cycle, the Chancellor implemented a first-year faculty and staff experience to better support personnel through activities designed to promote community, build teams, and immerse new hires in Hawaiian culture.

**Responsibility for Assessing Institutional Effectiveness:** To evaluate the College's effectiveness in achieving student learning, the Chancellor ensures that course, program and institutional learning outcomes are assessed. The College adopted LiveText to improve these processes. The UHCC System also has [Institution Set Standards](#), adopted by the Council of Community College Chancellors, that measure the College's effectiveness and link outcomes to performance funding, both from the [UHCC](#) and [UH](#) systems. The College's strategic goals are also linked to these standards. The Chancellor promotes college operations to meet or exceed student outcome benchmarks.

### **Analysis and Evaluation**

There are multiple policies and practices at the College that provide the Chancellor with primary responsibility for the quality of the institution. Implementation of these has led to

effective leadership, as indicated by the examples below and relevant results from the [2017 Governance Survey](#).

**Planning and Organizing:** The Chancellor initiated a comprehensive mission review process that led to a new mission statement to better reflect our mission as a college within our particular cultural and community context. The entire campus and community focus groups were involved in this process. Another example was the Chancellor-led process to update the College's Strategic Plan, which once again engaged both the college and the community. In both of these examples, as well as in the reorganization discussed above, the Chancellor not only oversaw the process, but also actively participated in the work group discussions. Seventy-three percent of respondents to the Governance Survey strongly agreed, agreed or moderately agreed that the College has an effective process for reviewing its mission statement (item 22) and 73% of respondents felt that the College's mission directs the development of the strategic plan (item 6).

**Budgeting:** The College recognized that although the program review processes linked planning, data, and resource allocation, the link was not sufficiently strong; hence, the College revised the template and presentation process for program review under the Chancellor's directive. In the Governance Survey, 71% of respondents strongly agreed, agreed, or moderately agreed that budget decisions are trustworthy (item D2-b) and 84% of respondents believed that budget decisions are supportive of KCC's mission and goals (item D2-c). However, only 58% of respondents felt that the APRU process is valuable at measuring the effectiveness of programs (item 21). To address this issue, the Chancellor continues to work on ensuring that the program review process is strongly linked to the College's goals and drives the judicious and transparent allocation of the College's resources. At the end of the 2017-2018 academic year, a group of faculty and staff began meeting with the Director of Institutional Effectiveness to review the process and recommend further improvements to College Council in early fall 2018.

**Selecting and Developing Personnel:** The Chancellor recognized the importance of professional development and advocated for a full-time professional development position that came to fruition in August 2016. She also supported the implementation of the Makaloa Hiring Policy, [KCCP 2-2](#), which recommends that a member of the Makaloa Council serve on select hiring committees. This aligns the College's hiring process with the Hawai'i [Papa O Ke Ao Plan](#) by supporting

**Assessing Institutional Effectiveness:** As part of the reorganization noted above, the Chancellor created a new Institutional Effectiveness unit to provide more structure, oversight, and visibility to institutional effectiveness and quality control.

In the Governance Survey, 71% of respondents strongly agreed, agreed or moderately agreed that they work in a collegial environment that supports innovation (item 1). In addition, 73% felt that they work in an environment that supports institutional excellence (item 2), and 68% felt empowered by college leadership to take initiative to improve practices, programs, and services (item 3), and 65% felt that the institutional culture promotes willingness to examine and openly discuss institutional excellence (item 7).

## IV.B.2

*The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities as appropriate.*

### **Evidence of Meeting the Standard**

UH Board of Regents Policy 2.202, Duties of the President, delegates the operation of the campuses in the System to the Chancellors. The Chancellor represents KCC at the UHC and UHCC System-levels in multiple venues, including the Council of Community College Chancellors, the Council of Chancellors, and the UHCC System Strategic Planning Council.

The Chancellor is assisted in campus planning and oversight by an executive cabinet of vice chancellors and directors, with each having authority over their respective area, as indicated on the current [campus organizational chart](#). Cabinet members include the Vice Chancellor for Academic Affairs, Vice Chancellor for Student Affairs, Vice Chancellor for Administrative Services, Director of Institutional Effectiveness and University Center, and Director of Continuing Education and Training.

Furthermore, each functional unit of the College is supervised by a manager, coordinator, or chair who reports directly to one of the administrators listed above. Examples include faculty members serving as division chairs or program coordinators. Other positions with administrative duties are linked to the unit supervisor in the College's organizational chart.

### **Analysis and Evaluation**

An example of the Chancellor's oversight of the administrative structure is the reorganization effort mentioned in IV.A.1. The reorganization required the Chancellor to assess the administrative structure of the College and identify opportunities to improve the functionality of units both independently and collectively. The Chancellor's leadership on this complex and potentially divisive issue resulted in a well-functioning process with broad participation across the campus. The end result aligned campus functions and personnel to reflect current realities and poise the College to better address future challenges such as accountability, enrollment, and both student access and success.

An evaluation of the effectiveness of the reorganization, which became effective in January 2017, has resulted in several discussions on the misalignment of some positions and the need for some minor adjustments. For example, the Testing Center was moved to the Office of Continuing Education and Training, yet it provides math and English placement testing, which is vital to advising. Thus, the Testing Center will be moved to the Student Affairs unit when the minor reorganization occurs. Another discussion during academic year 2017-2018 revolved around the need for an Academic Dean. This position is being requested from the

UHCC as a new general funded position, as each college in the system is allocated a set number of general funded positions.

### IV.B.3

*Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning community by:*

- *establishing a collegial process that sets values, goals, and priorities;*
- *ensuring the College sets institutional performance standards for student achievement;*
- *ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;*
- *ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;*
- *establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.*

#### **Evidence of Meeting the Standard**

**Establishing a Collegial Process that sets Values, Goals, and Priorities:** The Chancellor ensures the College has a broad-based, comprehensive, and integrated system for establishing values and goals. At the center of collegial processes is KCC's College Council, the governance body for the College. [KCCP 1-7](#) establishes the makeup and functioning of College Council, stating that the Council "is the primary forum at the College which ensures regular and in-depth dialogue among all stakeholders about our mission, strategic planning, priority setting, policy development, and budget development." [KCCP 1-8](#) defines the integrated planning process and details the responsibilities of the Chancellor and College Council for reviewing and updating the mission, strategic planning, reviewing programs, and evaluating processes.

To augment the integrated planning progress, the Chancellor communicates and seeks input regarding the College's values, goals and priorities through Convocations and College Conversations. Ad hoc committees may also be established by the Chancellor to collate input from stakeholders and develop recommendations to assist the College in decision-making.

**Ensuring the College Sets Institutional Performance Standards for Student Achievement:** A common set of Institution-Set Standards (ISS) was adopted by all colleges in the UHCC system per [UHCCP 4.203](#). The College's performance is measured against these standards and tracked annually. The policy explains that while the Office of the Vice President for Community Colleges (OVPC) is responsible for producing an annual report of achievement results, each campus is responsible for reviewing these results and using them in program planning and resource allocation. There is significant overlap between the ISS and the UHCC strategic planning measures.

**Ensuring that Evaluation and Planning Rely on Quality Research and Analysis of External and Internal Conditions:** As part of the recent reorganization at the College (see IV.B.1), the Chancellor established an Institutional Effectiveness unit that includes an institutional researcher to provide the College with data, reports, and analyses. The UH System Office of Institutional Research generates Annual Reports of Program Data (ARPD) to assist academic programs and non-instructional units to review their program's performance. This office also reports on Institution-Set Standards to evaluate the performance of the College as a whole. The College conducts the Survey of Entering Student Engagement (SENSE) and Community College Survey of Student Engagement (CCSSE) every other year and posts results on the Institutional Research website. Results are used by units within Student Affairs to assess their effectiveness in meeting student outcomes. Individual faculty or programs may also request ad hoc reports from the institutional researcher to support data-driven planning and decision-making. To understand conditions in our community, the College relies on the Kaua'i Planning and Action Alliance [Youth Report](#) and the UHCC System's [Hawai'i Industry Sectors](#) tool, as well as input from advisory boards for Career and Technical Education programs.

**Ensuring That Educational Planning is Integrated with Resource Planning and Allocation to Support Student Achievement and Learning:** The Annual Program Review and Five-year Comprehensive Program Review (APRU and CPR) processes require that resource requests and allocations are linked to at least one of the College's Strategic Priorities that support student achievement and learning. Each year, the Chancellor guides the implementation of planning processes (fall semester) and initiates the annual review of these processes through College Council (spring semester) as outlined in [KCCP 1-6](#).

**Establishing Procedures to Evaluate Overall Institutional Planning and Implementation Efforts to Achieve the Mission of the Institution:** The KCC [Policy and Procedures for New or Revised Mission Statement and for Integrated Planning](#) includes a plan for evaluating institutional planning and implementation processes to ensure that they remain aligned and in support of the College's Mission. For example, the APRU and CPR processes are evaluated annually in College Council and changes are made to improve these processes. The College also conducts a governance survey every five years. However, because of a change in Institutional Research personnel, the last survey was disseminated in 2017, a year later than intended.

### **Analysis and Evaluation**

The Chancellor effectively guides institutional improvement through policy and processes and encourages the entire campus to engage in planning and continuous quality improvement through the program review process, College Conversations, Convocations, and committees.

The Chancellor initiated the review of KCCP 1-6 in spring 2018, per policy. An ad hoc committee met multiple times and submitted suggested revisions to College Council to discuss. The updated policy was supported by the Council and updated in April 2018.

In an effort to increase the use of meaningful data and analysis in decision-making, the Chancellor supported the purchase of data visualization software for the Institutional Researcher. This has allowed the Institutional Researcher to implement interactive dashboards for several key measures, including the College's Institution-Set Standards. These are made publicly available on the Institutional Research website and select faculty have been trained on the software. General trainings for the entire campus will be offered during the 2018-2019 academic year.

#### **IV.B.4**

*The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceed Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.*

#### **Evidence of Meeting the Standard**

The Chancellor works directly with the Accreditation Liaison Officer (ALO), who serves on the Administrative Cabinet. Cabinet agendas have a standing agenda item for accreditation items where the ALO and ISER Chair provide updates on accreditation. In addition, the Chancellor has semi-monthly meetings with the ALO to stay abreast of reporting due dates, upcoming changes, and to discuss policies, as needed.

The Chancellor has served as both a member and chair on accreditation peer-evaluation teams, allowing for effective guidance and leadership regarding institutional accreditation. To increase the knowledge of Administrators, Institutional Self-Evaluation Report (ISER) Team Leads, and ISER Writers, the Chancellor has encouraged Cabinet members to complete the ACCJC basic online accreditation training and attend ACCJC conferences. The Chancellor helped to recruit ISER Team Leads and members widely from across the campus. Each member of the administrative team, including the Chancellor, was assigned a role to support the work of the teams working on Standards within their area of authority.

College, UHCC, and UH System policies have been developed and updated to align with ACCJC Eligibility Requirements, Accreditation Standards, and Policies. Therefore, all faculty, staff, and administrators at the College comply with accreditation requirements through adherence to these policies.

#### **Analysis and Evaluation**

The Chancellor has been an active and a committed leader throughout the self-evaluation process, and has ensured that administrators are engaged as well. The Chancellor has set aside time during Convocation Week and throughout the semester for collaborative work on the College's ISER, and has fostered the engagement of faculty and staff in the process. For example, the Chancellor supported involvement of the new ALO (as of August 2017) on a peer-review self-study team in March 2018 and supported travel for key ISER personnel to

participate in accreditation meetings on O‘ahu with other community colleges in the UH System.

In addition, the Chancellor drafted responses to Eligibility Requirements 1-5, participated in College Conversations that led to the two Quality Focus Essay projects, and presented the final draft of the ISER to the Board of Regents’ Academic and Student Affairs Committee in May 2018 to answer questions and seek approval.

To-date, all policies at the College are aligned with ACCJC Standards and have been reviewed at least once during the past five years.

#### **IV.B.5**

*The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.*

#### **Evidence of Meeting the Standard**

The Chancellor administers the UH Board of Regents, UH Executive, and UHCC policies and ensures that institutional policy and practice are consistent with the College’s mission. The College’s [Strategic Plan](#) is nested within the corresponding plans for the [UHCC](#) and [UH](#) systems. In addition, all Kaua‘i Community College Policies align with and include references to Board of Regents, UH, and UHCC policies where appropriate. [KCCP 1-1](#) establishes the process for developing college policies. College personnel have an opportunity to provide input into the development of KCC policies and all BOR, UH, UHCC, and KCC policy additions and revisions are communicated to the campus community once they are official via email.

Per UH [EP 1.102](#), the Chancellor effectively controls budget and expenditures and relies on the Vice Chancellor for Administrative Services and the Fiscal Officer to provide support and financial oversight in administering academic and non-instructional programs. The Chancellor tracks and supervises the budget process and expenditures. Since personnel is a large part of the budget, the Vice Chancellor for Administrative Services and the Chancellor work closely to monitor position counts, as the number of positions allocated to the College are set by the UH System.

#### **Analysis and Evaluation**

The recent mission review and update process, the strategic goals development for 2016-2021, and the reorganization process discussed in IV.B.1, all demonstrate the collaborative approach to a culture of accountability that the Chancellor has developed and that governance decisions are linked to the College’s mission.

#### IV.B.6

*The Chancellor works and communicates effectively with the communities served by the institution.*

#### **Evidence of Meeting the Standard**

The Chancellor plays an active role in the community and serves on many boards. The following table indicates the community boards and committees in which the Chancellor is currently involved or has been involved within the last six years.

<b>Organization</b>	<b>Role</b>
Friends of Kaua'i Community College	Founder
HMSA Foundation Board	Member
Kaua'i Community Partnership Hui (working with transitioning foster youth)	Member
Kaua'i Community College Native Hawaiian Advisory Council	Founder
Hawai'i Council for the Humanities	Executive Committee
Kaua'i Native Hawaiian Chamber of Commerce	Member
Kaua'i Chamber of Commerce	Executive Committee
Kaua'i Community Health Needs Assessment Plan	Steering Committee
Kaua'i Education Leadership Alliance	Member
Kaua'i Economic Development Board	Executive Committee
Kaua'i General Plan Update Community Advisory Board	Member
Kaua'i Planning and Action Alliance	Executive Committee
Keiki (Childhood) to Career Collective Action	Leadership Council
Leadership Kaua'i	Keynote Speaker
Native Hawaiian Education Summit	Keynote Speaker

#### **Analysis and Evaluation**

The Chancellor is active in the community, and her work has resulted in several significant partnerships and productive initiatives, including the following:

- National Tropical Botanical Garden Partnership resulting in a shared lecture series and joint agricultural project,
- Kaua‘i Economic Development Board Partnership resulting in a planned Food Production Center located on the campus, and
- Area high school Partnerships resulting in the growth of the Early College program.

The Chancellor also ensures that communities served by the College are regularly informed about the institution through radio announcements, newspaper articles, and presentations. In recognition of her service to the community, Chancellor Cox was awarded the Adult Leadership Award from Leadership Kaua‘i in 2013.

IV.B.5-3	KCCP 1-1 (Administration and Review of Policies)

### **IV.C. Governing Board**

#### **IV.C.1**

*The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.*

### **Evidence of Meeting the Standard**

The Board of Regents (BOR) of the University of Hawai‘i is established under Hawai‘i Revised Statutes [HRS§304A-104](#). The fifteen-member board is responsible for the general management and control of the University that incorporates all of public higher education, including the University of Hawai‘i Community College System. The [Regents are appointed](#) to five-year terms (with one exception noted below), and represent either one of the four counties in the State or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the University. The student regent is appointed for a two-year term, and may be reappointed.

Members of the Board, drawn from a slate of nominees submitted by the Regents Candidate Advisory Council ([RCAC](#)), are appointed by the Governor and confirmed by the State Senate. The RCAC consists of [seven members](#), with four members appointed by the Governor and one member each appointed by the President of the State Senate, the Speaker of the House, and the Association of Emeritus Regents. The RCAC solicits nominations for the Regents, qualifies and screens the applicants, and presents to the Governor a slate of nominees for each vacant Regent position.

The [Bylaws](#) of the Board of Regents include the specific organization and [responsibility](#) of the Board and its committees for academic matters, financial oversight, and general control of the University. This authority is further delineated through Regents Policies (RP). Several policies, including [RP 4.201](#) (Mission and Purpose of the University), focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements. The Board executes these responsibilities through regular reporting and deliberation at Board and committee meetings. The Board also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan ([IAFP](#)).

### **Analysis and Evaluation**

The governing board is established in State statute and the Board is appointed through a process of open recruitment for Board member candidates followed by gubernatorial appointment and Senate confirmation.

The authority of the Board for the governance of the University is established in the State constitution and statute, and the Board has organized its by-laws, policies, and processes to carry out the full measure of Board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.

The authority of the Board encompasses all components of the University, including the University of Hawai'i Community College System and the individual community colleges.

#### **IV.C.2**

*The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.*

#### **Evidence of Meeting the Standard**

The primary policy governing board interaction among board members and with the broader University community is Regents Policy, [RP 1.202](#) (Relationship of the Board to Administration and University). Specifically, Section III.A.2.B of the policy states that:

“Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized.”

The policy also delineates and structures the communication between the Board and the University administration, including the requesting and providing of information to and from the Board and the administration.

The policy is further emphasized through the Board of Regents handbook that is made available to all incoming Regents and published on the Board website. The handbook is based on best practices drawn from the Association of Governing Boards, and includes [expectations of Regents](#), including the responsibility of individual Regents to “Serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree.”

The 2017 [Board Self-Assessment](#) includes several items focused on “Acting as a Unit.” [Responses](#) to the self-assessment questionnaire indicate that Regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together.”

#### **Analysis and Evaluation**

As noted, Board policy RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of Board minutes did not disclose any instances of Board members acting outside the policy guidelines.

### IV.C.3

*The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the College and/or the district/system.*

#### **Evidence of Meeting the Standard**

As the governing body of the University of Hawai‘i System, the Board of Regents selects and evaluates the University President. [RP 2.203](#) (Policy on Evaluation of the President), establishes the evaluation protocols for the University President, including an annual self-assessment by the President, additional data collection by the Board, a preliminary meeting between the Board and the President, and a final evaluation after the President responds to the preliminary assessment.

**System CEO Selection:** There has not been a search for the Vice President for Community Colleges (VPCC) since the position was re-established in 2005, and the current Vice President was appointed to oversee the re-organization of the community college system. Should the position of Vice President become vacant, the President would follow the recruitment and other procedures outlined in [RP 9.212](#) (Executive and Managerial Personnel Policies). In a two-step process that differentiates the functions of appointment and approval, the President would make a recommendation for VPCC to the Board of Regents, which has the final approving authority for that position.

**Campus CEO Selection:** The process for selecting the Chancellor (CEO) of a college is managed by the Vice President for Community Colleges. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee (CSAC), composed of representatives from various college constituencies and the community that the College serves. Nominations for members of the screening committee are solicited from governance groups. The Vice-President determines the final composition, based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of Chancellors, [UHCCP 9.210](#) (Recruitment, Selection, and Appointment of Community College Chancellors), was drafted in Spring 2018, and vetted and approved by the Chancellors and campus governance bodies. A detailed set of procedures, which has been used consistently for several years in this process, has also been codified.

The authority for appointment of the College Chancellor is delegated to the Vice President for Community Colleges, with final approval of the appointment by the President of the University. A public announcement is made, and the selected candidate is also placed on the

agenda of the Board of Regents to ensure that the Regents are fully informed of the selection process and the selected candidate.

**UH CEO Evaluation:** President evaluations are conducted in executive session at a public Board meeting with the summary results of the evaluation also made public and included in Board minutes. The posted agenda items and [subsequent minutes](#) for the [past three](#) Presidential [evaluations](#) are provided as evidence.

**UHCC and CC Campus CEO Evaluation:** The Board delegates the evaluation of the Vice President for Community Colleges to the University President, and the evaluation of the individual college Chancellors is further delegated to the Vice President for Community Colleges. The annual evaluation of both the Vice President for Community Colleges and the Chancellors is governed by Executive Policies, [EP 9.203](#) (Evaluation of Board of Regents Appointees), and [EP 9.212](#) (Executive/Managerial Classification and Compensation).

Executive Policies establish an annual review that includes a 360-degree assessment by the individual, as well as his/her peers, subordinates, and constituents, of the executive's performance. The individual self-assessment also includes a review of accomplishments and goals set for the review year, and the establishment of goals for the upcoming year. The evaluation information is then discussed between the supervisor and the executive being evaluated. The results of the evaluation impact both continued employment and compensation increases.

The University of Hawai'i Community Colleges system further refines the annual evaluation of executive personnel, including Chancellors, through [UHCCP 9.202](#) (Executive Employees Performance Evaluation). This policy delineates the requirements for the respondents in the 360 evaluation, and also adds the College's attainment of its strategic goals as a component of the Chancellor's evaluation.

The evaluation system is reviewed on a periodic basis. In the 2016-2017 review, two changes were adopted. First, an additional item was added to the [360 instrument](#) to allow respondents to assess the performance of the executive in furthering the student success agenda. Second, the categories of performance rating were changed to better reflect the gradations in overall performance. Each executive/managerial employee is now [rated](#) as exceptional, exceeds expectations, meets expectations or does not meet expectations.

### **Analysis and Evaluation**

**CEO Selection:** The procedures used to recruit and select the Vice President for Community Colleges and the College Chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The President of the University makes the final selection of the Vice President, subject to approval by the Board of Regents. The Vice President for

Community Colleges makes the final determination of the Chancellor, subject to approval by the President.

**CEO Evaluation:** Annual evaluations involving 360 evaluations, assessment of goal attainment, and progress toward strategic goals have been conducted for the Vice President and all college Chancellors each year. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and in determination of merit-based salary increases, when available.

#### **IV.C.4**

*The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.*

#### **Evidence of Meeting the Standard**

The autonomy of the University and related independent authority of the Board of Regents is embodied in Article X of the State Constitution. Section 6 of [Article X](#) specifically states that:

“There shall be a board of regents of the University of Hawai‘i, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawai‘i, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern.”

In carrying out its responsibilities, the Board leadership often testifies at legislative hearings on matters relating to the University, and meets with key State legislators on various bills and budget matters. These legislative communications are coordinated and consistent between the Board and the University's administrative legislative coordinator.

#### **Analysis and Evaluation**

The autonomy of the University is established in the State constitution. Given the authority of the Legislature to enact laws of statewide concern, the Board remains attentive to whether such laws might impede the University and Board from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for University athletics led to extensive legislative hearings and bills introduced relating to management and control within the University. The Board of Regents responded by creating an Advisory Task Group on Operational and Financial Controls Improvement (ATG) to conduct its own audit of University operations. The ATG, comprised of both Regents and respected community members, conducted an [audit of policies and practices](#), evaluated the processes against best practices in higher education, and [made recommendations](#) in [several areas](#) for [improvement](#). The Board considered the reports, and made governance and policy changes in accordance with some of those recommendations.

By taking the initiative to address the issues raised by the Legislature in a comprehensive and very public manner, the Board exercised not only its responsibility for oversight and management of the University, but also its authority to act on matters relating to the University, and protecting the institution from undue influence and political pressure.

#### IV.C.5

*The governing board establishes policies consistent with the College/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.*

#### **Evidence of Meeting the Standard**

Both by the structure of and responsibilities established for its standing committees, and by its Regents Policies, the Board acts to fulfill its responsibilities as the single provider of public higher education in the State. Board policies and strategic plans are aligned and guide the University in fulfilling its overall mission. The role of community colleges within the University System is further defined in [RP 4.207](#) (Community College System).

The board has modified the University mission statement twice in the past several years. In 2009 the Regents adopted a [change in the mission](#) that made explicit the University's responsibility and commitment to the success of Native Hawaiian students and the desire for the University to be a model indigenous serving institution. In 2014 the Regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the University. This subsequently led to the creation of a new policy on Sustainability, [RP 4.208](#), illustrating the alignment of mission and policy. Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in [RP 4.201](#), "The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality." Policy RP 4.201, Section C.a also differentiates the basic unit missions (four-year

and two-year institutions), which are further articulated in individual campus mission statements.

### **Analysis and Evaluation**

Board of Regents Bylaws and Policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system, and reflect the broad compliance with the overall expectations of Board management, quality control, and fiscal oversight.

### **IV.C.6**

*The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.*

### **Evidence of Meeting the Standard**

The Board of Regents home page (<http://www.Hawai'i.edu/offices/bor/>) includes links to the Board [Bylaws](#) and Policies. The Bylaws include sections defining the Board membership and organization, the officers and duties of each officer, the standing committee structure of the Board and the scope of each committee, the meeting requirements for both committees and the Board, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the Board. The Bylaws also include the conflict of interest requirements for Board members.

### **Analysis and Evaluation**

The Bylaws are published and made available to the public, and include all required elements of the standard.

### **IV.C.7**

"

*The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the College/district/system mission and revises them as necessary.*

### **Evidence of Meeting the Standard**

Board of Regents policies are reviewed on a staggered three-year cycle, with current iterations posted at the Board's home page. As a result of a recommendation from the previous comprehensive accreditation review, the University and Board developed and implemented the UH Systemwide Policies and Procedures Information System (PPIS). The PPIS documents all of the Board policies and the related University Executive Policies and administrative procedures.

The features of the PPIS include:

- Description of the PPIS with frequently asked questions on the PPIS home page
- Easy public access to all policies, including from the Board of Regents home page
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While Regents Policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related Regents policy
- Automatic [notification](#) to interested parties of any change in policy

When the PPIS was implemented in 2014, all policies were re-codified to be consistent with the new system. The policy [review dates](#) were set as August 2017 for Chapters 1-4, August 2018 for Chapters 5-9, and August 2019 for Chapters 10-13.

The review of Chapters 1-4 was conducted beginning in Summer 2017 with a review of the twenty-eight policies included in those chapters. Policies were reviewed for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. Recommendations were made as to whether a policy would a) remain unchanged; b) be subject to editing for clarity or alignment with current practice; c) undergo substantive review and modification; or d) be repealed. Based on this assessment, one policy will be repealed and six will undergo substantive review. One new policy may be created. The Board will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on [November 1, 2017](#), and subsequently provided to the Board at its [November 16, 2017](#) meeting.

### **Analysis and Evaluation**

The Board policies are publicly available through the Board of Regents home page and are managed through the comprehensive PPIS. The PPIS system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

The review cycle for Chapters 1-4 was initiated as scheduled in Summer 2017 and resulted in the review of twenty-eight policies. Six policies were substantively updated through the review process.

All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of Board minutes confirmed that Board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawai'i Revised Statutes, the public employee collective bargaining law.

#### IV.C.8

*To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.*

#### **Evidence of Meeting the Standard**

The Board has established [strategic goals for the University](#) and its component colleges in four key areas:

- Hawai‘i Graduation Initiative focusing on student success
- Hawai‘i Innovation Initiative focusing on research and innovation and commercialization of University research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the University’s role as the single system of public higher education in the state.

These key goals, [endorsed by the Board](#) in 2015, are further articulated in and aligned with the strategic goals of the [UH Community College system](#) and of the individual [community colleges \(IV.C.8.6\)](#) and other campuses. When feasible, the goals are [quantified](#) with targeted incremental growth or improvement measures.

The Board regularly receives [updates](#) on the University’s progress in meeting these strategic goals through data on established metrics and trends, and presentations at either board meetings or meetings of the academic and student affairs committee. The Board has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the Board has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways.

The Board meets on a rotating basis at the campuses in the system; it receives a [briefing](#) from the host campus on its progress toward meeting the student success agenda.

#### **Analysis and Evaluation**

The Board has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

**IV.C.9.** *The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.*

#### **Evidence of Meeting the Standard**

All new Board members receive a full-day [orientation](#) that consists of two major components. The first is an introduction to University functions, governance, and strategic directions. The second component deals with Board governance, processes, ethics, and conduct. All new Board members receive a copy of the [Board of Regents General Overview](#) as a part of the orientation, as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, new Board members are paired with a more experienced Board member, who serves as a mentor to the incoming member.

Board members regularly participate in governing board professional development through [attendance at conferences](#) of the Association of Governing Boards and the Association of Community College Trustees.

The Board also organizes training for its members as a part of regular Board retreats or Board committee meetings. For example, during the 2016-2017 academic year, the University external auditor conducted a four-part [training session](#) for the Board independent audit committee, drawn from the American Institute of Certified Public Accountants (AICPA) handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management. The Vice President for Budget and Finance also provides an [overview](#) of the State of Hawai‘i budget as it pertains to the University system.

#### **Analysis and Evaluation**

New Board members are provided with a comprehensive orientation and related materials, and with a mentor from among the experienced board members. Professional development is provided through attendance at national board professional associations and through training provided at Board meetings.

In 2017 the Board updated its committee structure to modify the personnel committee to also include Board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to Board service is provided for Board members.

#### **IV.C.10.**

*Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board’s effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The*

*results are used to improve board performance, academic quality, and institutional effectiveness.*

### **Evidence of Meeting the Standard**

Regents Policy [RP 2.204](#) establishes the process for Board self-evaluation. In 2017, the Board [bylaws were amended](#) to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance, with explicit responsibility for managing the Board evaluation process.

Pertinent to the current accreditation cycle, the Board has conducted [annual evaluations](#) since 2014. Additionally, in 2012-2013, the Board undertook a [comprehensive audit](#) of the University operations, including Board functions and structure, and implemented significant changes in response to the audit recommendations. The Board has drawn from the [Association for Governing Boards](#) as a guide to structuring and evaluating its operations.

### **Analysis and Evaluation**

The Board uses the results of its evaluation to improve its operations. For example, in 2015 the Board evaluation included an assessment of whether the Board committee structure adequately aligned with the strategic directions of the University. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in un-coordinated conversations about student success. After debate and consultation, the Board acted to consolidate the three committees and focus the committee responsibilities on the student success agenda. At the same time, the Board acted to create a committee on research and innovation, also in alignment with the University's strategic directions.

While the Board has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the Board acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of Board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

### **IV.C.11**

*The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.*

### **Evidence of Meeting the Standard**

Article X of the Board of Regents Bylaws establishes the [conflict of interest policies](#) and procedures for Regents. Regents are informed of the ethics requirements during their initial orientation.

Regents Policy [RP 2.206](#) (Policy on Regents as Employees), also describes the conflicts of interest that may arise when Regents are also active employees of the University and the conditions under which such Regents need to recuse themselves from actions impacted by their employment status.

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The Board has also included a Board [education presentation](#) by the State Ethics Commission Executive Director as an agenda item at its regular meetings.

### **Analysis and Evaluation**

The Board is subject to both State ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. Board members are informed of the ethics requirements through their initial orientation, and through regular Board professional development.

Potential ethics concerns are routinely identified during Board meetings and the Regent in question is either recused from action and deliberation on the agenda item, or the potential conflict is determined not to preclude participation. The University General Counsel is available at Board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for Board members having acted in a manner inconsistent with the established ethics bylaws and policies.

### **IV.C.12**

*The governing board delegates full responsibility and authority to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.*

### **Evidence of Meeting the Standard**

Regents Policy, [RP 2.202](#) (Duties of the President), clearly documents the relationship between the Board of Regents and the University System President, and establishes the authority of the President to implement and administer Board policies.

The general policy on duties of the President is further refined in specific actions. For example, Regents Policy, [RP 9.218](#) (Delegation of Personnel Actions), describes those hiring actions reserved by the Board, those delegated to the President, and those that may be further delegated by the President.

The structure of the University of Hawai'i System establishes this line of authority with the University System President, and through the President to the Vice President for Community Colleges, and the individual college Chancellors.

When the Board does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. Task groups may be established by the chairperson upon authorization by the Board, and with such powers and duties as determined by the Board. The tenure of a specific task group shall expire at the completion of its assigned task.

An example of such a [task group](#) was focused on creating an integrated academic and facilities plan ([IAFP](#)) for the University System. The task group included both Regents and University administrative officials. Several meetings were held that led to the [final recommendation to adopt a plan](#) governing academic program planning and related facilities construction across the ten-campus University system.

### **Analysis and Evaluation**

While the Board maintains its responsibility for establishing overall strategic direction, university policies, and fiduciary management of the University system, the Board does not actively engage in direct or detailed management of the community colleges or individual campuses.

### **IV.C.13**

*The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the College's accredited status, and supports through policy the College's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.*

### **Evidence of Meeting the Standard**

The Board is routinely informed about the status of accreditation at each of the community colleges.

In preparation for the 2018 Institutional Self Evaluation Report (ISER), the Board Committee on Academic and Student Affairs was presented with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the Board acted to create a [permitted interaction group](#) to assist in the evaluations of

board-related standards. A permitted interaction group is comprised of a sub-set of the regents and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger Board or one of its committees. The permitted interaction group included Board leadership, the chair and vice chair of the Committee on Academic and Student Affairs, and Regents representing all the islands with community colleges. A further briefing on preparing for accreditation was provided to the Board at its [March 2017 meeting](#).

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017, and met with representatives from the community colleges (ALOs and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the Governing Board, before the completed ISERs from the six campuses were presented for review by the Committee on Academic and Student Affairs, the Board of Regents, and the President of the University of Hawai'i in early Summer 2018.

### **Analysis and Evaluation**

The Board was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

## **IV.D Multi-College Districts or Systems**

### **IV.D.1**

*In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the Colleges. Working with the Colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the Colleges and the district/system.*

#### **Evidence of Meeting the Standard**

The University of Hawai‘i (UH) system is the sole provider of public higher education in the state of Hawai‘i. The overall structure of the UH system is established in Board of Regents policy, [RP 3.20](#) (Major Organizational Units of the University of Hawai‘i). The ten-campus UH system as a whole includes the University of Hawai‘i Community College System (UHCC), which is comprised of seven community colleges. The UHCC is further established in Regents policy [RP 4.207](#) (Community College System). UH Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as the multi-campus system now being evaluated.

As an outcome of the reorganization in 2005, [overall leadership of the University of Hawai‘i Community College System](#) is now provided by the Vice President for Community Colleges (VPCC), the CEO of the system. The VPCC is a member of the senior administration of the UH system, reporting directly to the UH system President. The [UHCC office](#), which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O‘ahu at a central site near the flagship campus in Mānoa. The VPCC works with an [Associate Vice President for Academic Affairs \(AVPAA\)](#) and an [Associate President for Administrative Services \(AVPAS\)](#) to ensure support for the effective operation of the colleges at the system level.

The VPCC further works with the Chancellors (CEOs of the individual colleges), delegating to them the authority for [campus leadership](#) (see also IV.D.4.). The CC Chancellors may report through the Vice President for Community Colleges to the President of the UH System for University system-wide policy-making and decisions affecting all

campuses; and to the Vice President for Community Colleges for leadership and coordination of community college matters. This flow of communication preserves the Board of Regents' actions in supporting both individual campus autonomy and [system-wide coordinated operations](#).

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC-System [Functional Map](#), most recently reviewed by the community colleges, and updated in Fall 2017. The Functional Map shows [alignment with both the major accreditation topics as well as the detailed parts of Standards](#).

### **Analysis and Evaluation**

Established policies and procedures clearly identify the positions of CEO for both the UHCC system (Vice President for Community Colleges) and individual campuses (Chancellors), and identify their authorized roles in providing leadership at multiple levels.

#### **IV.D.2**

*The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system-provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.*

### **Evidence of Meeting the Standard**

The Vice President for Community Colleges (VPCC, the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions, and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office, and through several bodies comprised of campus representatives.

The operations of the Office of the Vice President for Community Colleges (OVPCC) are overseen by two Associate Vice Presidents who coordinate centralized support services in the areas of Academic Affairs and Administrative Affairs. The Associate Vice President for Community Colleges Academic Affairs ([AVPCCAA](#)) provides leadership in operational policy-making pertinent to the development and implementation of CC system-wide academic plans, goals and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment and policy analysis; career and technical education; student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives.

The Associate Vice President for Community Colleges Administrative Services ([AVPCCAS](#)) provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications. Facilities management is one area that requires an additional level of coordination and prioritization. Capital improvement projects (CIP) for all campuses are managed at the UH-system level through the UH Office of Capital Improvements ([OCI](#)) now designated as the Office of Project Delivery), established by the Board of Regents. General CC repair and maintenance and minor CIP projects are managed by the AVPCCAS, and individual colleges have responsibility for routine maintenance, and health and safety issues. Individual colleges have Long Range Development Plans ([LRDP](#)), which are used by the CC and UH systems to develop and justify minor and major CIP.

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: [Council of Community College Chancellors](#); Community College [Council of Faculty Senate Chairs](#); and [Community Council of Native Hawaiian Chairs](#).

Each campus also mirrors the system level structure in having executive leadership for academic affairs and administrative services; where student services functions are coordinated under the Associate Vice President for Academic Affairs (AVPCCAA) at the system level, the colleges maintain separate executive management for Student Services with either Vice-Chancellors or Deans. Vice-Chancellors for Academic Affairs (VCAAs), Vice-Chancellors for Administrative Services (VCASs), and Vice-Chancellors for Student Affairs (VCSA) or Deans for Student Services (DOSS) also meet with their counterparts from other campuses on a regular basis, extending the [network \[IV.D.2.8\]](#) of collaborative planning and decision-making, and mutual support.

In addition to these councils based on administrative positions, the CC system has also developed several system-level initiatives in support of student success and achievement. Primary among these is the [Student Success Council](#), created in 2014 as an outgrowth of the UHCC system having joined the Achieving the Dream Initiative in 2006. The system-level Council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) [Sustainability](#) and b) Distance Education. With reference to Sustainability, an Executive Policy ([EP 4.202](#)), and a new Regents Policy ([RP 4.208](#)) signal a system-level commitment that will

impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the CC system level, which will require renewed and proactive commitment from the CC system office and the individual campuses.

### **Analysis and Evaluation**

The UHCC System is well structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand, and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC (see also Standard III), while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the Councils that meet with the VPCC, the committees of Vice-Chancellors, and the system-level initiatives such as the Student Success Council.

### **IV.D.3**

*The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures.*

### **Evidence of Meeting the Standard**

The University system's budget preparation and receipt of and further distribution of resources are governed by State law, primarily [Chapter 37 of the Hawai'i Revised Statutes](#) (HRS). Biennial budget requests, financial plans and program performance reports are provided to the Governor and the Legislature in odd-numbered years; supplemental budget requests (to amend any appropriation for the current fiscal biennium) may also be submitted in even-numbered years. Operating and Capital Improvement Projects (CIP) funds for the UH system are appropriated by major organizational units, of which the UH Community College System is one.

The UHCC System Office, under the guidance of the Associate Vice-President for Administrative Services, coordinates the budget development and request process for the community colleges, based on the [strategic plans](#) of the UH system, the UHCC system, and the individual College Strategic Plan. The Community College [Strategic Planning Council](#) (SPC) is the primary body for ensuring system-wide participation in the UHCC strategic planning process. The membership of the SPC includes the Chancellor, Faculty Senate Chair, and Student Government Chair from each college; and

the Vice President and the Associate Vice Presidents for the community colleges. The SPC provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC Strategic Plan goals and objectives. The guiding principles of the Community College Strategic Academic Planning Process, which defines the role of the SPC, are codified in [UHCCP 4.10](#) (Strategic Academic Planning). The Vice President for Community Colleges has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges.

Each college develops its own budget request (as described in more detail in Standard III.D.) At the UHCC system level, the seven CC Chancellors, with support from the Associate VPs and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level, but are consolidated at the UHCC system level for purposes of further integration in the overall UH system budget, which is ultimately submitted to the State Legislature.

While State general funds, allocated by the Legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Other sources of internal and extra-mural funds (e.g., special funds, revolving funds, grant funds, UH Foundation) may also be generated and retained by each college. The management of sources of funding other than general funds is guided by two UHCC Policies: [UHCCP 8.000](#) (General Fund and Tuition and Fees Special Fund Allocation), and [UHCCP 8.201](#) (Unrestricted Fund Reserve—General, Special, Revolving Funds). Each college's budget reflects a different combination of [revenue sources and expenditures](#); all campuses maintain the Reserve required by accreditors.

Campuses have also had access to [additional funds](#) from the OVPCC, and more recently from the Office of the UH President, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives. Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the OVPCC for other campus or system initiatives, such as those associated with Student Success.

In addition to fiscal resources, the UHCC system has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another, in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC Policy was developed in November 2012 to more objectively and equitably manage and reassign [vacant positions](#). This policy created a system pool of those positions, from which campuses may request reallocation, based on documented need.

With reference to effective control of expenditures, recent actions taken between 2013-2016 provide an example of the controls in place to ensure accountability and sound fiscal management, as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit (OIA) conducted operational reviews of the Culinary Arts programs at two community college campuses. The reports identified “operational and financial risks” and presented recommendations relating to the inventory management, financial analysis and reporting and other aspects of these programs. In Spring 2014 OIA conducted [follow-up reviews](#) to ensure implementation of recommendations. The [Internal Audit Report](#) was on the agenda of the May 12, 2015 meeting of the Board of Regents’ Committee on Independent Audit. Subsequent to the December 15, 2016 of that same committee, [findings from the Internal Audit Report](#) were included in the UH system’s Annual Report on Material Weaknesses and Fraud, [presented to the 2017 Legislature](#). As one outcome of this case, the OVPCC created a [new policy](#) in March 2016 to provide better management and oversight for revenue-generating programs.

### **Analysis and Evaluation**

Allocation of key resources, particularly funding and personnel, is guided by clearly established policies. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that resources are used most effectively to support colleges’ missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

#### **IV.D.4**

*The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.*

### **Evidence of Meeting the Standard**

The University of Hawai‘i System has a President, a Vice President for Community Colleges (among several Vice Presidents responsible for differentiated areas of UH-System functions), and Chancellors for each of the ten universities or colleges in the system. As noted, the Vice-President for Community Colleges (VPCC) is the CEO of the system of the seven UH community colleges. Each college has a Chancellor, the CEO of the institution. Board of Regents Policy [RP 4.207](#) established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System. In 2005, the Board of Regents approved the reorganization of the Community College System and created the [new Executive position](#) of Vice President for Community Colleges. A subsequent [memo](#) to the College Chancellors provided detailed organizational charts as well as a Functional Statement for the Office of the Vice President for Community

Colleges (OVPCC.) Key among the Major Functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of Community College Chancellors for the overall management and governance of their campuses is further affirmed in [Executive Policy 1.102](#) (Authority to Manage and Control the Operations of the Campus), which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads.” University of Hawai‘i Community Colleges Policy, [UHCCP 8.000](#) (General Fund and Tuition and Fees Special Fund Allocation), also specifies the Chancellor’s responsibility “...to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission.” Responsibility for a broad range of personnel actions has also been delegated to the Chancellors in Executive Policy 9.112 ([Attachment B](#)).

In line with the need for accountability in the fulfillment of their duties, Chancellors (and other Executive-Managerial personnel) are subject to annual performance evaluation, with final assessment by the VPCC. This process is thoroughly codified in [UHCCP 9.202](#) (Executive Employees Performance Evaluation). This review [process was updated](#) in late 2017.

### **Analysis and Evaluation**

It is clearly documented in several policy and procedural documents that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC system. The trend of delineation and delegation has generally given more autonomy to the Chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

#### **IV.D.5**

*District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.*

### **Evidence of Meeting the Standard**

The community colleges in the Hawai‘i statewide system of public higher education operate within a three-tiered system: the University of Hawai‘i (UH) system as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community College system; and the individual community college campuses located on the four major islands in the state. [Satellite Learning Centers](#), providing

additional outreach across the state, are managed by the community colleges and UH-Maui College. A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

As noted, there are multiple structures in place at the UH- and the CC-system level (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive Strategic Plan that provides the conceptual guidance for mid-range planning. These currently include the [UH Strategic Directions 2015-2021](#), the [UHCC Strategic Directions 2015-2021](#) (intentionally developed to be aligned with the overall UH plan), and the [individual campus strategic plans](#), also developed in alignment with the UHCC plan.

A [crosswalk](#) of these three levels of planning further corroborates the high degree of congruity and integration. In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the [Crosswalk of UH System and UHCC System Performance Funding](#) cited in IV.D.3.

Most recently, on April 20, 2017, the Board of Regents approved the Integrated Academic and Facilities Plan ([IAFP](#)) for the University of Hawai'i System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is "...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH system is addressed without undue duplication or inter-campus competition." The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the CC system) and affirms the further integration of planning in noting that "The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews."

### **Analysis and Evaluation**

The UH System, the UHCC System and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that are used as the basis of evaluating institutional and system effectiveness.

### **IV.D.6**

*Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.*

### **Evidence of Meeting the Standard**

Multiple modes and avenues of communication exist in the UH system to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the Vice President for Community Colleges (VPCC) and the administrative staff in the Office of the Vice President for Community Colleges (OVPCC) are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH President's senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the Board of Regents (BOR) Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for BOR approval (e.g., Strategic Plans, Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of BOR committee and Board meetings, the VPCC is provided with [memos](#) summarizing BOR approved actions. Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through [notification](#) from the Policies and Procedures Information System (PPIS).

The VPCC also meets regularly with three Councils representing different aspects of college governance: The [Council of Community College Chancellors](#), the [Community College Council of Faculty Senate Chairs](#), and the [Community College Council of Native Hawaiian Chairs](#). Meetings of these Councils are documented, and each Council completes an annual self-assessment.

The VPCC makes [semi-annual visits](#) to each CC campus, with information pertinent to both CC-system and individual campus performance. Typically, fall semester visits focus on major initiatives and budget for the current academic year as well as campus score-cards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work.

As noted, the community colleges function within a three-tiered system: The UH system, the UHCC system and the individual community colleges. Communication between the top two tiers (UH system and UHCC system) is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings (e.g., the Councils identified above, or meetings of functional counterparts such as Vice-Chancellors for Academic Affairs) will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. With the goal of improving timely

access to information documenting discussion and decision-making at the system level (e.g., agendas and minutes of Councils and other deliberative bodies), specific steps have been taken to address communication-related concerns: 1) as needed, orientation is provided to those serving as campus representatives to system committees so they are more fully aware of their reporting duties; and 2) the OVPCC is engaged in a comprehensive update of its own website to enhance accessibility and currency of the information posted there.

### **Analysis and Evaluation**

Just as the VPCC serves as an important point of connection between the UH System and the CC System (OVPCC), and between the OVPCC and the individual colleges, the Chancellors of the individual colleges are responsible for coordinating with the OVPCC, and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC has recognized the need to maintain access to up-to-date documentation of system-level meetings, and is updating its own website to ensure better access to that information.

#### **IV.D.7**

*The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.*

### **Evidence of Meeting the Standard**

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing, in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to a) set standards of best practices; and b) minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are [regularly reviewed](#), new policies are created when need is recognized (e.g., new UHCC policy on [selection process for Chancellors](#)), roles and responsibilities are delineated in the Functional Map, and personnel are regularly evaluated on their performance in supporting and achieving educational goals.

Of specific importance in this last context is the role of the Community Colleges' Strategic Planning Council (SPC), the primary body for assuring system-wide participation in the UHCC strategic planning process, as codified in [UHCCP 4.10](#) (Strategic Academic Planning). The policy identifies roles and responsibilities in the process of campus academic planning, which provides much of the critical infrastructure for the effective functioning of the colleges.

## **Analysis and Evaluation**

Established policies and procedures as well as documentation of governance and decision-making that operationalize those policies and procedures are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

## H. Quality Focus Essay

As a result of College-wide Conversations with faculty, staff, and students held during the fall 2017 and spring 2018 semesters, two Quality Focus topics were chosen that are both related to student success: “Scheduling for Success” and “Integrated Career and Academic Services for Grades 11-14.” These topics align with UHCC Strategic Directions 2015-2012 (e.g. the Hawai‘i Graduation Initiative), the College’s Institution-Set Standards, and several Kaua‘i CC Strategic Goals (e.g., increase recent high school graduate enrollment/working adults, reduce the time to degree: accelerate college readiness, and increase the number of graduates).

### Quality Focus Project #1: Scheduling for Success

#### *Background*

The College currently offers face-to-face courses at its single campus location, augmented by a limited number of distance education offerings and a small but growing number of early college sections which are taught for high school students on the campuses of the three major public high schools on the island. The College serves students from everywhere on the island, and commuting to campus can be a barrier for some students because of:

- Distance to campus for students living on the west side or north shore
- Structure of roads on the island (coastal roads only)
- Traffic
- Time commitments to family and work
- Limited public transportation -- (Not as easily utilized as in urban locations, although a partnership with Kaua‘i County on a subsidized bus pass for students has been successful)

Regular three-credit face-to-face classes are typically scheduled into time blocks that fit one of two patterns:

- M/W/F mornings: Classes start on the hour, providing three 50-minute blocks per week.
- M/W afternoons and T/R all day: Start times are 85 minutes apart, to provide two 75-minute blocks per week.

The College holds “All-College Hour” on M/W from noon to 1:00 pm, and classes are generally not scheduled on Friday afternoons. This provides time for students to participate in clubs and other activities on campus, and for faculty to hold meetings and serve on committees.

Regular classes typically meet for sixteen weeks each fall and spring semester. There are two summer terms available to offer classes, although summer offerings are typically limited. Also,

with some exceptions, [tuition \(QFE-1\)](#) for summer courses is set at approximately twice the rate as for regular-semester courses.

In recent years, the College has begun to offer more courses with nonstandard amounts of credits, which can create scheduling issues by occupying multiple time blocks or overlapping blocks in an atypical way. These changes have been driven by acceleration of course pathways in mathematics and English, including corequisite support courses.

Furthermore, there is a concentration of courses offered within the time blocks between (roughly) 9:00 am and 11:50 am. The College does not have much information as to whether this situation is correctly serving the needs of students and the community by offering courses during times of naturally high demand, or whether demand would remain static, increase, or decline if class times were more spread-out throughout the day.

Prior to each semester there is a “purge date” on which any student that has registered for classes, and has neither arranged for payment, nor is scheduled to receive financial aid, will have all their classes dropped (purged). The UH System has historically used the purge as a tool to prevent students from incurring unpaid debt to the college(s). However, students can re-register for classes at any time after the purge, until the last day to enroll for the semester. Thus, a student may incur a debt for their courses despite the intentions of the purge process.

### ***Project Description/Goals***

The project will encompass five years (2019-2023) with the goal of examining course scheduling at the College in terms of modality, location, time, days, length, etc... to best align with current student and community needs. This will not only aid in on-time degree completion but also provide novel scheduling opportunities for the community that will provide working adults more opportunities to pursue post-secondary education. Areas that will be explored include:

- Compressed courses (e.g., 8-week block)
- Part-time student course plans for non-cohorted academic programs
- Determine best practices for scheduling courses with nonstandard # of credits
- Expand summer offerings - (Pell grant availability is being marketed summer 2018)
- Develop offerings at off-site locations on north shore and west side to mitigate commute
- Address late registration and class cancellation procedures and timeline
- Consider year-long student registration
- Increase offering of hybrid courses
- Enhance place-based education with reworking of scheduling to provide time for hands-on learning in the community
- Other scheduling strategies as needed or discovered during this project

Two of the areas, Compressed Course Scheduling and Part-time Student Course Plans will be implemented in 2018-2019.

### ***Compressed Course Scheduling***

This strategy involves scheduling courses in “part-of-term” blocks, such as two back-to-back eight-week blocks within the standard sixteen-week semester. This allows students to focus on a smaller number of distinct classes at any given time, creates more efficient scheduling with fewer “empty” zones of time between a student’s classes, and may strengthen classroom communities as students spend more concentrated blocks of time together and with their instructors.

Compressed formats have already been used at the College for cohorted career and technical education programs such as Culinary Arts and Automotive Technology. The innovation in the current plan is to apply this strategy to general education courses. The College has already had some successful experience in offering such formats for mathematics courses. Of the 58 students who began eight-week block pairings of a developmental course and then a college-level course, 37 of them (64%) successfully completed both courses. Although summer classes involve different circumstances, so far 37 out of 43 students (86%) have successfully completed a two-week offering of the Survey of Mathematics course.

In planning meetings for Compressed Course Scheduling, two potential formats have been envisioned. One is a smaller-scale cohort-based format where the compressed courses are taken by students as a “set schedule”. This is the [format \(QFE-2\)](#) that the College will employ for 2018-2019, with one cohort of Natural Science majors and one cohort of pre-Nursing majors. The College will analyze the success of this format and gauge interest among faculty for the potential to offer a wide range of compressed courses that could be freely chosen among by students. Another factor that the College will consider is the length of the compressed blocks. The 2018-2019 cohorts will run based on two eight-week blocks, but [four-week and five-week \(QFE-3\)](#) blocks are also under consideration for possible future offerings.

### ***Part-time Student Course Plans***

Currently, academic programs must submit course plans along with any curriculum changes. These show the suggested sequence of courses for students to take in order to complete the program within the appropriate time span. However, these course sequences are created with the assumption that students take a full-time schedule (a minimum of 12 credits). In recognition of the fact that most students are part-time, academic programs that are not already cohorted will create course plans for part-time students as well. These plans will account for the program’s fall

and spring offerings so that students can take the required courses on schedule. Programs will have plans ready for Fall 2019 and will track part-time students' progress to continually evaluate and revise the plans.

**Major Data Source**

The Institutional Effectiveness Office will conduct a Workforce Survey and a Kaua'i Residents' Survey over summer 2018. The survey will identify the scheduling needs of residents and employers on the island, providing guidance to the College in selecting the most fruitful strategies of the ones mentioned here. The survey results will also aid in establishing the details of how the strategies are implemented.

*Implementation Plan for Scheduling for Success Project.*

<b>Timeline</b>	<b>Action/Activity</b>	<b>Responsible Unit or Person</b>	<b>Anticipated Outcome</b>	<b>Assessment Metric</b>
<b>Year 1 (AY 19)</b>	Offer 8wk/8wk AS-NS and Pre-Nursing cohorts	Program Coordinators and Division Chairs	Increase SSH of students, successful course completion, and on-time graduation rates of nursing and ASNS students in block scheduling	# credit hours per semester per student, course completion rates, % students with on-time graduation, and fall-to-fall retention
	Conduct Workforce Survey and Kaua'i Residents' Survey	Institutional Effectiveness Office (IEO)	Identify scheduling needs of residents and employers to identify new scheduling ideas to increase enrollment (headcount and SSH) and increase on-time graduation rates	# students enrolled in newly scheduled courses; persistence of students in newly scheduled courses in the course, academic year, and fall-to-fall;
	Develop guidelines for efficient scheduling of courses with nonstandard credits	Vice-Chancellor for Academic Affairs (VCAA), Faculty Senate, College Council	Reduction in time gaps on student schedules to increase both SSH and on-time graduation rates	# credit hours per student per semester

<b>Timeline</b>	<b>Action/ Activity</b>	<b>Responsible Unit or Person</b>	<b>Anticipated Outcome</b>	<b>Assessment Metric</b>
<b>Year 1 (AY 19)</b>	Study examples of college implementation of “no late registration” policies; consider feasibility for KCC;	Vice-Chancellor for Admin. Services (VCAS), Registrar, Vice-Chancellor for Student Affairs (VCSA), Advising/ Counseling, and Institutional Research	Increase retention of students and decrease the number of courses that are cancelled at the last minute	# courses cancelled 1 week before or after the semester begins  # students in cancelled course that were able to add another course  Fall-to-spring-fall retention rates of late-registering students
	Appropriate academic programs develop course sequence plans for part-time students	Division Chair, Program Coordinator, program faculty, VCAA, and Advising/ Counseling	Retention and completion rates of part-time students increase because of a clear part-time course pathway	Fall-to-spring-fall retention rates
	Analyze feasibility of registration for full year	Student Affairs Unit	Increase enrollment and persistence because students can better plan by enrolling for an entire academic year, not just a semester	Fall-to-spring-fall retention rates

<b>Timeline</b>	<b>Action/ Activity</b>	<b>Responsible Unit or Person</b>	<b>Anticipated Outcome</b>	<b>Assessment Metric</b>
<b>Year 2 (AY 20)</b>	Develop policies to address late registration and late class cancellation, if necessary, after Year 1 analysis	VCAS, Registrar, VCSA, Advising/Counseling, and Institutional Research	Increase retention of students and decrease the number of courses that are cancelled at the last minute	# courses cancelled more than 1 week before the semester begins  # students in cancelled course that were able to add another course  Fall-to-spring-fall retention rates of late-registering students
	Analyze data for Year 1 cohorts to inform Year 2 cohorts	Institutional Research, Program Coordinators, program faculty, and Division Chairs	Same as Y1 Anticipated Outcomes	Same as Y1 Assessment Metrics
	Expand or contract off-site offerings, as appropriate	Chancellor, VCAA and VCSA	Increase enrollment and access	# courses offered, # students enrolled in each course, and % students enrolled only at the off-site location

<b>Timeline</b>	<b>Action/ Activity</b>	<b>Responsible Unit or Person</b>	<b>Anticipated Outcome</b>	<b>Assessment Metric</b>
<b>Year 3 (AY 21)</b>	Analyze data for Year 2 cohorts	Institutional Research, Program Coordinators, program faculty, and Division Chairs	Same as Y1 Anticipated Outcomes	Same as Y1 Assessment Metrics
	Analyze data for off-site course offerings	Chancellor, VCAA, and VCSA, faculty, and Institutional Research	Same as Y2 Anticipated Outcomes	Same as Y2 Assessment Metrics
	Determine a long-term model for compressed course offerings at the College	Division Chair, Program Coordinator, program faculty, VCAA, and Advising/Counseling	Increase persistence and retention  Increase on-time graduation rates	Fall-to-spring-fall retention  % on-time graduates

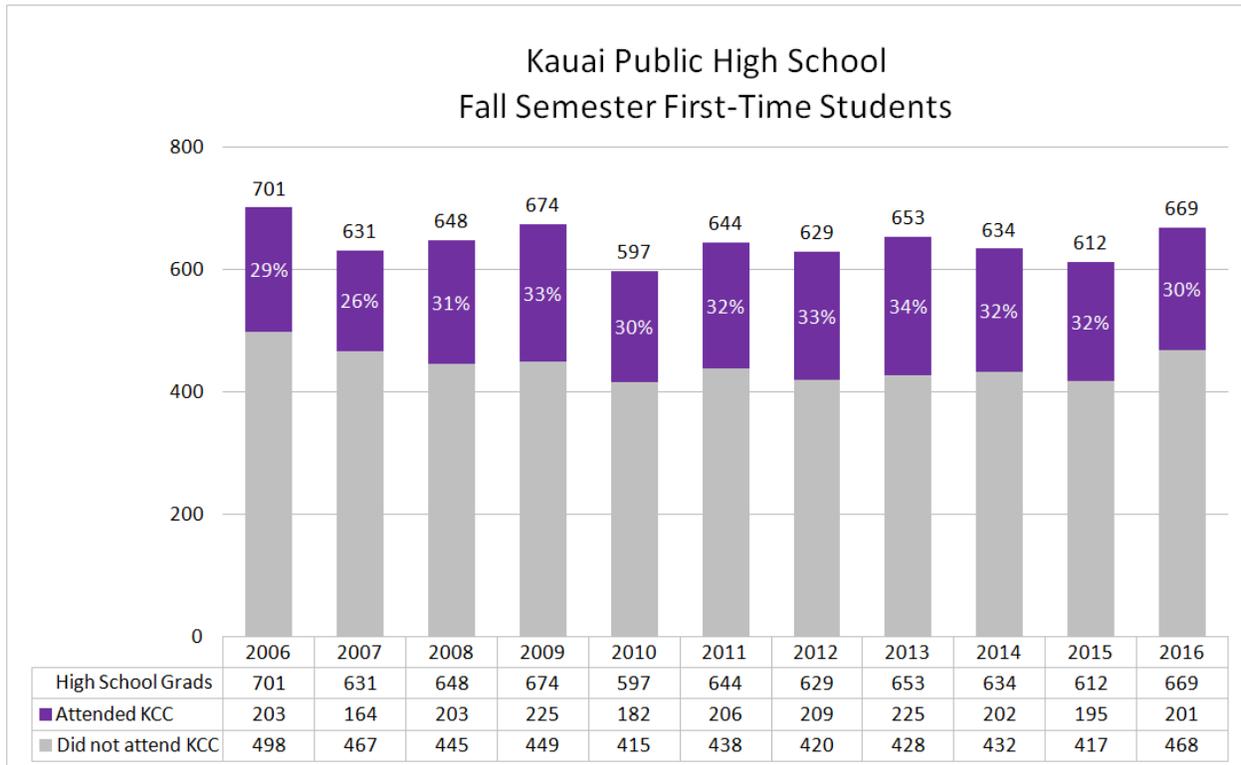

<b>Timeline</b>	<b>Action/ Activity</b>	<b>Responsible Unit or Person</b>	<b>Anticipated Outcome</b>	<b>Assessment Metric</b>
<b>Year 4 (AY 22)</b>	Study impact of policies to address late registration	VCAS, Registrar, VCSA, Advising/Counseling, and Institutional Research	Same as Y2 Anticipated outcomes	Same as Year 2 Assessment Metrics
	Analyze progress towards degree for part-time students in new course sequence plans	Division Chair, Program Coordinator, program faculty, VCAA, Institutional Research, and Advising/ Counseling	Same as Y1 Anticipated outcomes	Same as Year 1 Assessment Metrics
<b>Year 5 (AY 23)</b>	Analyze data from all initiatives and institutionalize successful scheduling practices	Entire College (College Conversation)	Initiatives will improve student success as defined in the UH Strategic priorities 2015-2021, Institution Set Standards, and Kaua'i CC Strategic Goals	Longitudinal analysis of assessment metrics for each initiative piloted

## **Quality Focus Project #2: Integrated Career and Academic Services for Grades 11-14**

### ***Background***

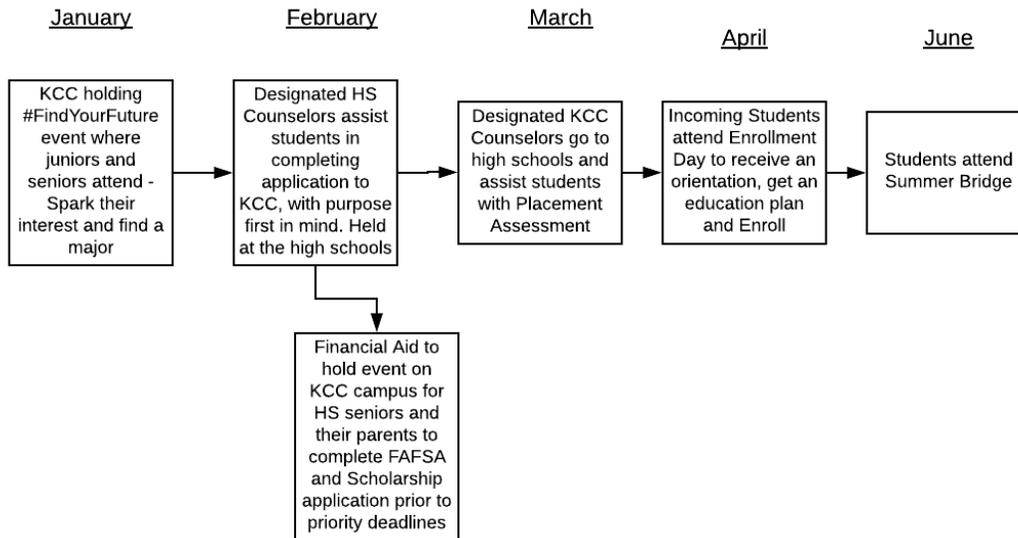

The College annually reviews its performance against its UHCC System Strategic Priority goals. The current Strategic Priority Plan spans 2015-2022. One notable decline over the past three years is in the number of direct high school enrollees, despite growing senior class sizes at the three primary feeder high schools. Hence the College's focus on increasing enrollments in this population over the next several years.

*Percentage of high school graduates that directly enrolled at Kaua‘i Community College from 2006-2016.*

Approximately 25% of these high school graduates directly enroll in a mainland college, and the College does not expect to compete for this population of students. Instead, the College will focus on the 45% of high school graduates not planning to attend college. There is an opportunity to serve these students by educating them on career options and higher education at Kaua‘i CC while they are still in high school. For those who choose KCC, there is a further opportunity to assist them with both the admission process and financial aid application.

The Integrated Career and Academic Services Project will provide scaffolded, developmentally appropriate services to students while they are in their junior and senior years of high school so that they may choose college as an option and be ready to enroll before they graduate from high school. The flowchart below outlines the planned activities.

***Project Description and Goals***

This project will encompass a four-year period (Fall 2018 - Spring 2022) to track participants from their junior and senior years of high school through two years of community college. Specific programming (detailed below) will engage students, especially during their senior year, to explore and possibly choose a major, complete an application, complete orientation, complete placement assessment with the availability of high school grades and coursework, develop an education plan, and enroll. The goal is to complete these activities by April of each academic year to enable students to enroll before they graduate high school (please see flow-chart below).

***Timeline, Responsible Unit/Person, and Assessment Metrics***

A pilot project was implemented at one feeder high school in spring 2018 that included offering a #FindYourFuture Spark event day at KCC for Juniors and Seniors, offering FAFSA and Scholarship workshops at the high school, and scheduling a parents night for incoming students. These activities will be expanded (Table 1) and scaled-up to include all three feeder high schools as well as three charter schools.

Baseline for success will be 2016-2017 data for activities or measures that exist, whereas baseline for new activities will be developed during the 2017-2018 academic year.

*Implementation Plan for Integrated Career and Academic Services Project*

<b>Action Item</b>	<b>Responsible Person or Unit</b>	<b>Timeline</b>	<b>Resources</b>	<b>Assessment Indicator</b>
Offer Financial Aid Nights/FAFSA Completion Nights at DOE High Schools and Island School. Continue to invite charter schools.	Financial Aid (FA)	October to November 2018-2022	FA Officer, FA student assistant	Feedback from HS and sign-in sheets
Implement Scholarship Manager completion nights at High schools. Explore offering this activity during the day at the high schools	Financial Aid	November to March 2018-2022	FA Officer, FA student assistant	# of Applications
Offer Common Scholarship application workshops	Financial Aid	November to March 2018-2022	FA Officer, FA student assistant	# of Applications
Hold #FindYourFuture Spark event day at KCC for Juniors and Seniors	Counseling and Academic Affairs	January 2019, 2020, 2021, and 2022	Avid program, 6-16 Grant	# of Attendees

<b>Action Item</b>	<b>Responsible Person or Unit</b>	<b>Timeline</b>	<b>Resources</b>	<b>Assessment Indicator</b>
Hold application days at local high schools	Designated Counselors	March 2019, 2020, 2021, and 2022	UHCC System Student Success Funds	# of Attendees
Offer Placement Assessment at local high schools	Counseling	March 2019, 2020, 2021, and 2022	None needed	# of Attendees
Invite all high school seniors to participate in an enrollment day at KCC	Student Affairs and Academic Affairs	April 2019, 2020, 2021, and 2022	UHCC System Student Success Funds	# of Enrollees
Schedule Parent Nights for parents of new incoming college students	Student Affairs	April - May 2019, 2020, 2021, 2022	UHCC System Student Success Funds	# of Attendees
Schedule Open Enrollment Days at KCC - students can complete all enrollment steps in one day	Student Success and Counseling	Once per month: April - August 2019-2022	UHCC System Student Success Funds	# of Attendees

<b>Action Item</b>	<b>Responsible Person or Unit</b>	<b>Timeline</b>	<b>Resources</b>	<b>Assessment Indicator</b>
Offer Early College at all three DOE schools and move to a pathway leading to certificate or degree	Academic Affairs	Each semester 2019-2022	DOE	# of Enrollees and # of Completers
Host tours for high school students	Marketing	Ongoing 2019-2022	Marketing Budget	# of Attendees
Offer Summer Bridge for newly matriculating students	Math Department	June-August 2019-2022	UHCC Student Success System Funds and Student Affairs Operating Budget	# of Summer Bridge Attendees and fall-to-spring persistence rates

## **H. Evidence**

- H-1 Tuition Rates for Summer and Regular Terms
- H-2 Fall 2018 Compressed Course Cohort Plans
- H-3 Compressed Course Cohort Block Samples

## I. Changes and Plans Arising out of the Self-Evaluation Process

Throughout the self-evaluation process, Friday accreditation meetings were scheduled to allow for open dialogue regarding the accreditation standards and current College processes. As with any self-evaluation, areas, functions, and processes were examined and possible improvements were suggested.

### *Changes Made at KCC that Arose from Friday Accreditation Meetings.*

Date	Improvement Suggested	Change Implemented
January 20, 2017	Campus technology replacement plan developed and shared with College	ITAC Technology Replacement Plan
January 20, 2017	Add standing items (accreditation and innovation) to Cabinet meetings	Accreditation discussed at each Cabinet meeting
January 27, 2017	Solicit input from faculty and staff regarding governance	IR conducted focus groups in 2017 and shared the report with the Chancellor
February 3, 2017	Develop a governance survey	Disseminated by IR in 2017 and results shared with the campus via email
February 24, 2017	Ensure minutes and charters for standing committees are posted on the website	Modified KCCP 1-3 in September 2017 to require this of committees
February 24, 2017	Purchase visualization software to make data more accessible to faculty and staff	Purchased Tableau in 2017 and IR uses it to create some graphics in the Fact Book
April 21, 2017	Develop a process to update website information	Spreadsheet of all websites created by webmaster and supervisors identified responsible person and update schedule
April 28, 2017	Seek student input on accreditation	Student focus group held and ISER Chair presented results at a Friday meeting
Various meetings	Identified professional development needs	Website workshops and survey training offered in spring 2017

Standard Teams also identified areas for improvement during the process and added them to a master spreadsheet. The master spreadsheet was shared with Cabinet and many suggested improvements were implemented.

*Improvements Implemented from Suggestions Made by ISER Teams.*

Standard	Improvement Suggested	Outcome
I.C.1	Out-of-date policies	Revised KCCP 1-1 to require a review of all policies at least once every five years
I.C.1	Need someone dedicated to maintaining accuracy of website and ensure ADA compliance	Hired a full-time webmaster (previously a part-time position); new website created and launched in May 2018
I.C.2	ADA Compliant Catalog on the Website	2018-2019 Catalog is the first to be ADA compliant
I.C.9	Faculty Handbook needed updating	Completed by the Professional Development Coordinator for the 2017-2018 Academic Year
III.A.10	Faculty not on all levels of administration hiring committees	Added a Faculty Senate representative to all levels of the hiring process
III.A.13	Ensure faculty are aware of the UHCC Ethics Policy	HR will provide a hard copy of UHCCP 5.211 to all new faculty hires
III.B.3	Unsure of the effectiveness of facilities and equipment at the College	Developed and administered a survey to students, faculty, and staff in 2017
IV.A.5	Increase communication between administration and faculty	Faculty Senate Chair and the Chancellor have regular meetings

Areas of improvement that required additional time to complete were added to the ISER as Action Items. The College identified seven of these items:

1. The College's academic programs will develop course sequencing plans for part-time students, who are increasing at our college when compared to full-time students. This action item is directly related to one of our Quality Focus Essays, [Scheduling for Success \(II.A.6-2\)](#).
2. The College will dedicate a College Conversation and convene a student focus group to develop strategies to increase student participation in both student government and college committees during the 2018-2019 academic year.
3. The College will use the current Administrative Services survey results to establish baseline target values for future surveys. The survey will be given every two years in the future, and used to inform the Administrative Services Annual Program Review Update (APRU). The next survey will be disseminated in 2019.

4. The Human Resources office will develop a list of review dates for APT evaluations to remind supervisors of review deadlines for the 2018-2019 academic year.
5. The College will create a guide for orienting and mentoring lecturers prior to the spring 2019 semester.
6. The Professional Development Coordinator will maintain an active three-year campus professional development plan that is visible to all employees of the College, beginning in August 2018.
7. Service outcomes will be developed or revised for both the Testing Center and Operations and Maintenance prior to the fall 2018 semester.

## **Glossary of Terms**

Banner-The College's Student Information System (SIS)

Cognition Center (COGs)-Promotes STEM learning and interest through innovative projects with college faculty and students working with students from elementary to high school

Hawai'i Government Employee Association (HGEA)-Union representing Unit 3 (White Collar Employees), Unit 8 (APTs), & Unit 4 (Security Supervisors)

Ho'ouluwehi Program-Embedding innovative sustainability principles within KCC offered curriculum

Information Technology Advisory Committee (ITAC)-Committee that provides an overall vision for the use of technology on campus

Imu Hale-A structure used by the Culinary program to teach traditional hawaiian cooking methods

Kahua ("Foundation or Base")-Hawaiian word used in the Mission Statement

Kīpaipai-First Year Experience Program that assists students during their freshman year through financial, academic, and social supports

Kuali (KFS)-Proprietary fiscal management tool; also has a module for curriculum recordkeeping

Laulima ("Many hands")-The UH system's implementation of the Sakai Learning Management System. Laulima is the most commonly used platform to support distance education courses, although it is also frequently used to manage face-to-face courses as well

LiveText-Proprietary software for tracking and reporting on assessment data

Makaloa Council-A representative of the council appointed to all cabinet and search/hiring committees to represent the interests of Native Hawaiians and to serve as a cultural advocate to hiring committees

MySuccess (Starfish)-UH System's early alert system.

Papa O Ke Ao ("Hawai'i foundation of enlightenment/knowledge")-A system wide committee whose purpose is developing a plan to make the University of Hawai'i a leader in indigenous education

Program Action Request (PAR)-Contains general education requirements for the program as well as the program student learning outcomes

STAR-A homegrown UH System

Star GPS-Provides students with recommendations on courses to take to complete their chosen degree or certificate, as well as warnings when students attempt to register for courses outside of their pathway

University of Hawai'i Professional Assembly (UHPA)-Union representing faculty at KCC

United Public Workers (UPW)-Union representing Unit 1 (Facilities, Operations & Maintenance)

Ulutopia-A three-acre plot where breadfruit growth is monitored in controlled fertilizer and cover crop applications

Wai'ale'ale Program-Provides free education and intensive support to individuals that would not otherwise consider college because of financial hardship and other barriers

Leeward Community College

# **2018 SELF- EVALUATION REPORT**

**Final Draft, May 11, 2018**

# Certification of the Institutional Self-Evaluation Report

Date: May 11, 2018

To: Accrediting Commission for Community and Junior Colleges,  
Western Association of Schools and Colleges

From: Leeward Community College  
96-045 Ala 'Ike  
Pearl City, Hawai'i 96782

This Institutional Self-Evaluation Report is submitted to the ACCJC for the purpose of assisting in the determination of the institution's accreditation status.

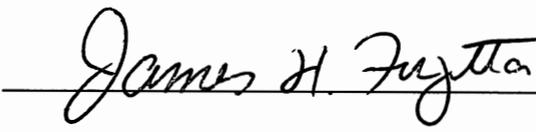

We certify there was effective participation by the campus community, and we believe that the Self-Evaluation Report accurately reflects the nature and substance of this institution.

Signed:

  
\_\_\_\_\_  
Manuel J. Cabral  
Chancellor, Leeward Community College

  
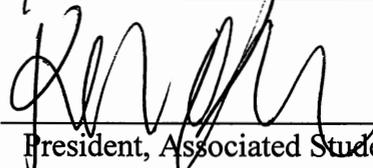

\_\_\_\_\_  
Della Teraoka  
Accreditation Liaison Officer  
Vice Chancellor for Academic Affairs

  
\_\_\_\_\_  
Donna Matsumoto  
Self-Evaluation Core Team Co-Chair

  
\_\_\_\_\_  
James Fujita  
Chair, Faculty Senate

  
\_\_\_\_\_  
Auli'i Silva  
Chair, Campus Council

  
\_\_\_\_\_  
Genai U'ilani Keli'ikuli  
Chair, Pūko'a no nā 'Ewa Council

  
\_\_\_\_\_  
Kristina Nip  
President, Associated Students of University of Hawai'i – Leeward Community College

## WELCOME

The oli komo, or welcoming chant, is a gift offered to those who visit our home. “Hālau Pu‘uloa” tells of the beauty and abundance of our lands of Wai‘awa and the harbor of Pu‘uloa (Pearl Harbor). The area possessed fishponds teeming with marine life and natural springs that fed the lush vegetation that ‘Ewa<sup>1</sup> is known for. It speaks of the refreshing winds that cool and the guardian of the bay who protects. The oli extends all the riches of Pu‘uloa to our guests as we invite them into our home.<sup>2</sup>

### **Hālau Pu‘uloa**

Hālau Pu‘uloa he awa lau no ‘Ewa  
He awa lau moana na ke Kēhau  
He ki‘owai lua he muliwai no ‘Ewa  
No ua ‘āina kai (i‘a) hāmau leo  
E hāmau ana ka leo o ke kanaka  
‘O pānea mai auane‘i hilahila  
Ke‘eo ua i‘a la i loko o ke kai  
O ke kai puakai ‘ula ai ke kai o Kuhia – e  
He mai, he mai  
Eia no mākou nei.

### Translation

*Expansive is Pu‘uloa a harbor for ‘Ewa  
An extensive harbor belonging to the Kēhau breeze  
An abundant, overflowing estuary for ‘Ewa  
To this land belongs the i‘a that silences voices  
The voices of people will be silenced  
Yet, a response is always given lest there be shame  
The aforementioned i‘a fills the sea  
from the sacred reddish sea to the sea of Kuhia  
Greetings, please enter  
For here we are to welcome you.*

Leeward Community College - Wai‘anae Moku Education Center also has an oli that is specific to that location. “Hālau Wai‘anae” is a traditional chant that is used to celebrate the Wai‘anae Moku area.

### **Hālau Wai‘anae**

Hālau Wai‘anae molale i ka lā  
Ala panao ke kula o kūmanomano

---

<sup>1</sup> ‘Ewa refers to the leeward or west side of the island.

<sup>2</sup> Source: “Translation and Transcription of ‘Hālau Pu‘uloa’” ([W-1](#)).

Kūnihi ka noho a Mauna Lahilahi  
Ho‘omaha aku i ka wai o Lualualei  
Lei ana Nu‘uanu i ke kāmakahala  
I paukū ‘ia me ka ‘āhihi  
I ho‘ohihi nō ho‘i au  
Na‘u nō ho‘i ‘oe  
‘O ko‘u kuleana pa‘a nō ia  
He ‘ike haole,  
E lūlū lima ke aloha ē

Translation

*Wai‘anae is like a house that shimmers in the sun  
A dry direct path that leads to the plain of kūmanomano grass  
Steep is the stance of Mauna Lahilahi  
We would rest near the waters of Lualualei  
Nu‘uanu is adorned by the lei kāmakahala  
Combined with the lei ‘āhihi  
My admiration is yours  
And yours is indeed mine  
You are bound to me as one  
When meeting the stranger  
Extend the hand in the greeting of love*

## History of Leeward Community College

Leeward CC was established in 1968 as the first community college in the state of Hawai‘i without a connection to a pre-existing technical school, nine years after statehood was granted. In the first year, there were 1,640 students who were ready to explore the community college experience, more than twice the anticipated number of students. Shortly thereafter, in 1971, the College was accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges (WASC). The College’s original guiding principles emphasized innovation and accessibility to higher education.

Since those beginnings, enrollment has grown to place Leeward CC among the largest of the seven public two-year community colleges in the UHCC System with approximately 7,000 students enrolled each fall semester in liberal arts, career and technical education, and noncredit programs.

In 1972, Leeward CC took over the Wai‘anae-Nānākuli Education Center as the operating agency. In 1977, this center was fully integrated into Leeward’s operations and organization. The Wai‘anae-Nānākuli Education Center was renamed the Leeward CC - Wai‘anae Moku Education Center in fall 2017 in conjunction with its recent move to a permanent facility. The Wai‘anae Moku Education Center offers credit and noncredit courses and a full range of learning and student support services. In fall 2017, it had a headcount enrollment of 417 students.

While the College primarily serves students in the Leeward coast and Central O‘ahu, a geographical region containing approximately a third of the state’s population, students from all parts of the island attend Leeward. One constant over the past 50 years has been Leeward’s focus on student learning as its motto makes clear: “To help people learn.”

## Major Developments

### *New Instructional Programs*

Leeward CC continues to look for new programs that will meet the workforce needs of the community. Since its institutional self-evaluation in 2012, the College has developed four new career and technical education degrees including the following: Associate in Science (AS) in Plant Biology and Tropical Agriculture, AS in Integrated Industrial Technology, Advanced Professional Certificate in Special/Inclusive Education, and a certificate program in Alternative Certification for teachers in career and technical education secondary programs. The College has also successfully moved two programs to established status. These programs are the AS in Natural Science and the Associate in Arts in Hawaiian Studies. Finally, the College received program accreditation for the AS in Health Information Technology. This program was reviewed for established status in fall 2017.

### *Facilities and Infrastructure*

Leeward CC has received a number of grants and system funding to complete, renovate, and refurbish facilities at the Pearl City campus. Shortly after the last self-evaluation visit in 2012, the College completed the Ka ‘Imi ‘Ike Education Building, a facility on the Pearl City campus that is the home of Leeward CC’s Teacher Education program. Designed and built to

meet the Leadership in Energy and Environmental Design's silver certification, Ka 'Imi 'Ike has features such as photovoltaic panels, rainwater collection for irrigation, water bottle refilling stations, natural lighting, and a hybrid air conditioning system that incorporates natural ventilation. Additionally, the College completed the planned renovation of the Learning Commons, which involved re-envisioning the Library building as a one-stop shop for academic support services for students. The College also finished a renovation project of the Hālau 'Ike O Pu'uloa that provides a larger collaboration space for students, additional offices, and renovated classroom spaces. Finally, the College relocated its Office of Workforce Development and Continuing Education due to the new public rail station being built in the campus parking lot. The new portable buildings form a small campus environment on the Diamond Head (east) side of the Pearl City campus.

In addition, the College finalized the move of its education center from Wai'anae town to a neighboring community. The previous Wai'anae site leased 9,680 gross square feet on the first and second floors of a two-story commercial building. The new location, located 1.7 miles from the previous site, is a building of 38,600 gross square feet that is being renovated in multiple phases, dependent upon funding availability. The main building is named Hale Kaiāulu. The word kaiāulu has a dual meaning: kaiāulu means "community" and is also the name of celebrated gentle trade winds unique to the area. Currently, the Wai'anae Moku Education Center operates in the Phase I space of 11,000 gross square feet. Students are able to utilize three general classrooms, a math lab/classroom, a computer lab/English classroom, a testing center, a student lounge, and a conference room. The Wai'anae Moku Education Center also includes program support spaces such as offices and meeting rooms for administrators, faculty, counselors, lecturers, and security personnel. This new location is expected to provide the College an opportunity to expand the population served in this historically underserved area.

### *System Initiatives*

The UHCC System has coordinated a number of initiatives and provided funding to address the changing needs of students. Some of the implemented initiatives include the following:

- **Acceleration Initiative.** Provides accelerated and co-requisite models for helping students move through developmental education classes more quickly. Leeward began its efforts in this area before the UHCC System initiative and has scaled up quickly with dramatic results.
- **Early College (Dual Enrollment).** Provides high school students with the opportunity to take college-level courses and earn both high school and college credits at the same time. Among the seven UHCC campuses, Leeward offers the most Early College courses. In spring 2018, Leeward was the first UHCC campus to have 12 Early College students graduate from two different high schools having also earned an associate degree.
- **Open Educational Resources (OER).** Offers courses that do not require students to purchase a textbook. Most OER courses provide online resources free of charge. Leeward has taken a lead role in developing OER courses in the UHCC System, which is especially important to the College's underserved student populations.

- **STAR and Guided Pathways.** Links undergraduate student pathways to registration using the UH System’s newly launched STAR Guided Pathway Selection (GPS) registration system. Leeward’s STAR team has become the trainers for the rest of the campuses in setting up the pathways and ensuring students are able to complete their program pathways as efficiently as possible.

## **College Demographic Data**

### ***Service Area Demographic Information***

Leeward CC is located on the island of O‘ahu in the state of Hawai‘i and serves communities on the north and west shores of the island. The College’s service area contains approximately 30 percent of the state’s population, which in 2010 was 1,360,301.

### ***Brief Overview of Student Demographic Information – Fall 2016***

In fall 2016, there were 7,262 students enrolled at the College. Of those students, 54 percent attended full time and 46 percent attended part time. The ratio of female to male students has remained consistent at about 3:2 over the last five years. Women constitute close to 60 percent and males about 40 percent of the total student population.

There were 417 students enrolled at the Wai‘anae Moku Education Center in fall 2017. Of those students, 62 percent were Native Hawaiian.

The average age of a Leeward student is 25 years old. However, the majority of students are less than 21 years old indicating that most students are entering the College soon after graduating from high school.

In fall 2016, 66 percent of Leeward’s student population identified as either Native Hawaiian, Filipino, or Asian. Within that group, 26 percent identified as Native Hawaiian, 23 percent as Filipino, and 17 percent as Asian. The next two largest groups were those that identified with more than one ethnicity (16 percent) followed by Caucasian (ten percent). The remaining eight percent of the student population identified as either Pacific Islander, African American, Hispanic, American Indian, or Alaska Native.

The number of students who receive financial aid in the form of Federal Pell Grant funds has remained steady at approximately 26 percent over the last five years, or 1,819 students receiving Pell Grant funds out of 7,262 total enrollment in fall 2016.

### **Instructional Sites**

Leeward CC has two instructional sites (see Figure 2). The College’s main campus is located in Pearl City, O‘ahu. Its other site, the Leeward CC - Wai‘anae Moku Education Center, was originally located in Wai‘anae town and moved 1.7 miles to a new location in fall 2017.

Leeward Community College	96-045 Ala 'Ike Pearl City, HI 96782
Leeward Community College - Wai'anae Moku Education Center	87-380 Kula'aupuni Street Wai'anae, HI 96792

### Specialized and Programmatic Accreditation

The College offers four programs that are accredited by external agencies.

- The Automotive Technology program is accredited by the National Automotive Technicians Education Foundation.
- The Culinary Arts program is accredited by the American Culinary Federation Foundation Accrediting Commission.
- The Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management.
- The Teacher Education Alternative Certification for Career and Technical Education program is accredited by the Council for the Accreditation of Educator Preparation.

## Presentation of Institution-Set Standards and Student Achievement Data

### Institution-Set Standards

The University of Hawai‘i Community Colleges Policy (UHCCP) 4.203, Institution-Set Standards, established seven institution-set standards that apply to the colleges within the UHCC System ([I-1](#)). Each standard has a baseline, or minimum level of achievement, and an aspirational target for improvement.

Table 1.  
*College Wide Student Achievement*

Institution-Set Standard (Data Element)	Definition of the Measure		AY 2013	AY 2014	AY 2015	AY 2016	AY 2017
Successful Course Completion	The percentage of students receiving a grade of C or better in a course. The number of students in the course is defined as the number at the end of the official add/drop period.	Actual	72.4%	73.3%	73.8%	74.0%	74.6%
		Baseline	70.0%	70.0%	70.0%	70.0%	70.0%
		Target	75.0%	75.0%	75.0%	75.0%	75.0%
Degrees and Certificates Awarded	The number awarded during the academic year. The baseline value listed under the academic year 2015 is the average for academic years 2012-2015. The target value represents five percent growth per year from the baseline year.	Actual	770	1,090	1,000	1,057	1,019
		Baseline			953	953	953
		Target	-	-	953	1,001	1,051
Certificates and Degrees Awarded to Native Hawaiian Students	The number awarded during the academic year to students of Native Hawaiian descent. The baseline value listed under the academic year 2015 is the three-year average for academic years 2012-2015. The target value represents five percent growth from the baseline year.	Actual	194	253	236	259	264
		Baseline			228	228	228
		Target	-	-	228	239	251

Institution-Set Standard (Data Element)	Definition of the Measure		AY 2013	AY 2014	AY 2015	AY 2016	AY 2017
Pell Certificates and Degrees Awarded	The number awarded during the academic year to students who received Pell awards. The baseline value listed under the academic year 2015 is the three-year average for academic years 2013-2015. The target value represents five percent growth per year from the baseline year.	Actual	459	476	480	518	527
		Baseline			455	455	455
		Target	-	-	455	478	502
Transfer to Baccalaureate Institutions	Number of UHCC students who transferred to a UH baccalaureate institution during the academic year. The baseline value is the three-year average for academic years 2012-2015. The target value represents five percent growth per year from the baseline year.	Actual	1,257	1,332	1,398	1,410	1,349
		Baseline			1,296	1,296	1,296
		Target	-	-	1,296	1,316	1,358
Integrated Postsecondary Education Data System (IPEDS) Student Success Rate	The rate at which first time, full-time students either graduated or transferred to a baccalaureate institution within 150 percent of the time of entry. The baseline value success rate is based on the fall 2012 IPEDS cohort. The target value represents incremental growth to reach a success rate of 50 percent by fiscal year 2020-2021.	Actual	-	31.9%	34.4%	32.8%	36.2%
		Baseline			30.9%	30.9%	30.9%
		Target		32.8%	34.8%	37.0%	39.3%
Licensure and Certification Examination Success Rate	Leeward CC does not require licensure or certification exams.	N/A	N/A	N/A	N/A	N/A	N/A

Institution-Set Standard (Data Element)	Definition of the Measure		AY 2013	AY 2014	AY 2015	AY 2016	AY 2017
Job Placement Rate	The job placement rate reported for each career and technical education program from the Perkins annual report. The Perkins program data includes all graduates and concentrators (students who have completed a subset of program courses) who have left the program. The Perkins target is based on a negotiated level of placement within the state plan for career and technical education that includes an expectation of continuous improvement. Programs with fewer than ten students exiting the program are not reported. The baseline value is the Perkins established placement rate for AY 2014.	Actual	65.0%	44.8%	66.6%	63.9%	53.3%
		Baseline		68.9%	68.9%	68.9%	68.9%
		Target	64.9%	68.9%	69.0%	63.9%	64.5%

Figure 4. Curriculum category.

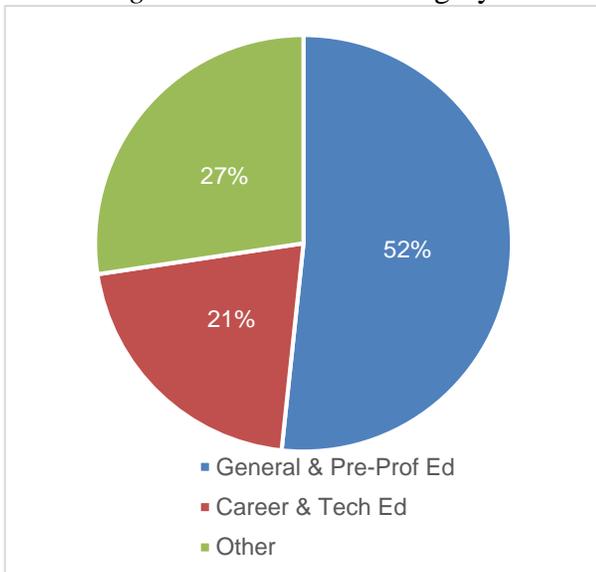

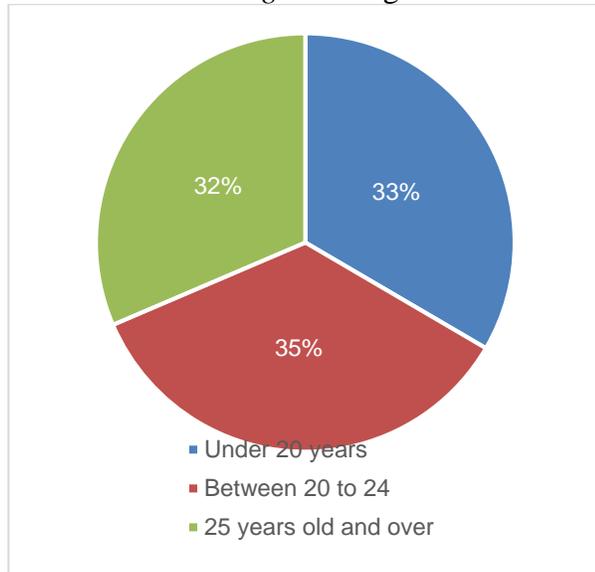

Figure 5. Age.

## Student Achievement Data

### Enrollment

Headcount enrollment has decreased by nine percent since 2013 when the College achieved a record high enrollment of 7,976 students. The percentage of part-time students is consistently around 59 percent while the percentage of full-time students remains steady at about 41 percent.

Table 3.  
*Student Headcount by Enrollment Status, 2013-2016*

Enrollment	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	Part-Time	4,835	60.6%	4,547	58.7%	4,468	59.3%	4,311
Full-Time	3,141	39.5%	3,195	41.3%	3,067	40.7%	2,951	40.6%
Total Headcount	7,976		7,742		7,535		7,262	

Note. Retrieved from Fact Sheets 2013-2017.

### Curriculum Category

Over the past five years, a little over half of Leeward CC's students pursued general and pre-professional degrees and about 20 percent pursued career and technical degrees.

Table 4.  
*Student Headcount by Curriculum Category, 2013-2016*

Curriculum Category	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	General and Pre-Professional	4,374	54.8%	4,272	55.2%	4,019	53.3%	3,753
Career and Technical	1,558	19.5%	1,517	19.6%	1,609	21.4%	1,521	20.9%
Other	2,044	25.6%	1,953	25.2%	1,907	25.3%	1,988	27.4%
Total Headcount	7,976		7,742		7,535		7,262	

Note. Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from Fact Sheets 2013-2017.

### Gender

The ratio of female to male students has remained consistent at about 3:2. Women constitute close to 60 percent and males about 40 percent of the total student population.

Table 5.  
*Student Headcount by Gender, 2013-2016*

Gender	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	Female	4,579	57.4%	4,518	58.4%	4,436	58.9%	4,289
Male	3,289	41.2%	3,158	40.8%	3,064	40.7%	2,946	40.6%
No Data <sup>a</sup>	108	1.4%	66	0.8%	35	0.5%	27	0.4%
Total Headcount	7,976		7,742		7,535		7,262	

<sup>a</sup>The category “No Data” includes students who did not indicate “male” or “female.” The UH System student information system does not contain a field for students who identify as transgender, genderqueer, questioning, or nonconforming.

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from Fact Sheets 2013-2017.

### *Age*

The average age of a student is 25 years old, and the median age is 21. A little over half of Leeward students are 21 years old or less, indicating that most enter Leeward soon after graduating from high school.

Table 6.  
*Student Headcount by Age, 2013-2016*

Age	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	Under 18	445	5.6%	550	7.1%	593	7.9%	686
18 to 19	2,612	27.1%	1,984	25.6%	1,964	26.1%	1,742	23.9%
20 to 21	1,167	20.3%	1,600	20.7%	1,481	19.7%	1,444	19.9%
22 to 24	1,249	15.7%	1,227	15.9%	1,145	15.2%	1,107	15.4%
25 to 59	2,441	30.6%	2,317	29.9%	2,294	30.4%	2,229	30.7%
60 and over	62	0.8%	63	0.8%	58	0.8%	54	0.7%
Total Headcount	7,976		7,742		7,535		7,262	

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from Fact Sheets 2013-2017.

### *Ethnicity*

Leeward CC tracks 17 ethnicities, three mixed ethnicity categories, and three “other” categories. The table below is a condensed representation of the ethnic makeup of Leeward students with particular attention to three special populations as recognized in the College mission and strategic plan: Native Hawaiians, Filipinos, and other Pacific Islanders.

Table 7.  
*Student Headcount by Ethnicity (Condensed Representation), 2013-2016*

Ethnicity	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	Native Hawaiian or Part-Hawaiian	2,124	26.6%	2,141	27.7%	2,037	27.0%	1,913
Filipino	1,792	22.5%	1,745	22.5%	1,661	22.0%	1,644	22.6%
Other Asian	1,386	17.4%	1,327	17.1%	1,327	17.6%	1,260	17.4%
Other	1,338	16.8%	1,202	15.5%	1,152	15.3%	1,135	15.6%
Two or more ethnicities	1,145	14.4%	1,157	14.9%	1,177	15.6%	1,128	15.5%
Other Pacific Islander	191	2.4%	170	2.2%	181	2.4%	182	2.5%
Total Headcount	7,976		7,742		7,535		7,262	

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH.

In fall 2016, 26.3 percent of Leeward CC’s student population identified as Native Hawaiian or part-Hawaiian, constituting the largest ethnic group. Filipinos follow at 22.6 percent and other Asians (Asian Indian, Chinese, Japanese, Korean, Laotian, Thai, Vietnamese, Mixed Asian, and other Asian not listed) collectively make up the third largest group at 17.4 percent of the population.

The next largest group, listed as “Other,” is African American or Black, American Indian or Alaskan Native, Caucasian or White, Hispanic, and those who provided no data. They represent 15.6 percent of the student population. Those who identify with two or more ethnicities make up 15.5 percent of the population. Other Pacific Islanders (Guamanian and Chamorro, Micronesian, Samoan, Tongan, Mixed Pacific Islander, and Other Pacific Islanders) are collectively the smallest group with 2.5 percent. Table 8 shows the distribution of all categories of ethnicity at Leeward CC.

Table 8.  
*Student Headcount by Ethnicity, 2013-2016*

<b>Ethnicity</b>	<b>Fall 2013</b>	<b>Fall 2014</b>	<b>Fall 2015</b>	<b>Fall 2016</b>
African American or Black	2.2%	2.4%	2.5%	2.5%
Amer Indian or Alaskan Native	0.3%	0.4%	0.3%	0.3%

Note. Retrieved from Fact Sheets 2013-2017.

### *First-Term, Degree-Seeking Students*

Over the last five years, approximately 21 percent of the student population were first-time, degree-seeking students. Of that group, over 60 percent sought an Associate in Arts degree, 20 to 30 percent sought an Associate in Science degree, three to nine percent intended to work towards an Accrediting Commission for Community and Junior Colleges degree, about two to three percent sought a Certificate of Achievement, and three to six percent sought a Certificate of Completion or Certificate of Competence.

Table 10.

*Headcount Percentage by Outcome for First-Time, Degree-Seeking Students, 2013-2016*

<b>Outcome</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from Fact Sheets 2013-2017.

### *Distance Education*

Approximately 40 percent of students at Leeward took at least one distance education (DE) course. The data over the last five years show a slight but consistent rise in the number of students who take DE courses. As the College makes more classes available in a DE format and as more students become familiar with the delivery system, the College suspects this number will continue to grow in the next few years.

Table 12.  
*Student Headcount by Course Delivery Method, 2013-2016*

Course Delivery Method	Fall 2013		Fall 2014		Fall 2015		Fall 2016	
	DE Students <sup>b</sup>	3,082	39.0%	3,054	39.4%	3,089	41.0%	3,082
Non-DE Students	4,894	61.0%	4,688	60.6%	4,446	59.0%	4,180	58.0%
<b>Total Headcount</b>	7,976		7,742		7,535		7,262	

<sup>b</sup>The category “DE Students” includes students taking at least one DE class.

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_REGGS\_UH.

### Successful Course Completion

#### *Overall*

The course completion rate is the percentage of students receiving a grade of C or better in a course. The number of students in the course is defined as the number at the end of the official add/drop period. The institution-set target value is 70 percent.

Table 13.  
*Overall Course Completion, 2013-2016*

	2013	2014	2015	2016
<b>Overall Successful Course Completion</b>	72.4	73.3	73.8	74.0%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_REGGS\_UH.

#### *Distance Education vs. Face-to-Face Courses*

Successful course completion rates for students enrolled in DE courses were similar to those enrolled only in face-to-face courses.

Table 14.  
*Course Completion by Course Delivery Method, 2013-2016*

Course Delivery Method	2013	2014	2015	2016
DE Courses	73.5%	73.9%	74.0%	73.8%
Face-to-Face Courses	72.0%	73.0%	73.5%	73.4%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_REGGS\_UH.

#### *Distance Education vs. Face-to-Face Courses by Ethnicity*

Successful course completion rates for Native Hawaiian students enrolled in DE courses were slightly lower than those in face-to-face courses in two of the five years measured. Successful course completion rates among Filipino students enrolled in DE courses were, on average, 2.8 percent lower than those enrolled only in face-to-face courses. Successful course completion rates among other Pacific Islander students had the greatest variation, averaging

ten percentage points between students enrolled in DE courses and those enrolled only in face-to-face courses. In four of the five years measured, successful completion rates for those in DE courses were lower than those enrolled only in face-to-face courses.

Table 15.  
*Course Completion by Ethnicity for Course Delivery Method, 2013-2016*

Ethnicity	2013		2014		2015		2016	
	DE	Face-to-Face	DE	Face-to-Face	DE	Face-to-Face	DE	Face-to-Face
Native Hawaiian	70.9%	68.2%	69.6%	68.8%	68.3%	68.9%	68.5%	68.1%
Filipino	73.2%	73.8%	73.2%	76.5%	75.0%	76.2%	74.8%	76.4%
Other Pacific Islander	50.0%	56.4%	68.9%	58.4%	61.6%	65.2%	62.4%	64.7%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_REGS\_UH.

### Persistence of Students from Term to Term

#### *All Students*

Leeward CC's student persistence from fall to spring semesters is holding steady at around 68 percent. Full-time students have better persistence than part-time students.

Table 16.  
*Overall Student Persistence, 2013-2016*

All Students	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Overall	68.2%	68.4%	67.2%	68.2%
Full-Time	76.5%	77.3%	76.4%	77.2%
Part-Time	59.6%	58.8%	57.4%	58.7%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

#### *Curriculum Category*

Students enrolled in degree-seeking programs have higher persistence.

Table 17.  
*Student Persistence by Curriculum Category, 2013-2016*

Curriculum Category	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Career and Technical	67.3%	70.6%	69.0%	70.4%
General and Pre-Professional	69.9%	69.7%	69.4%	70.6%
Other <sup>c</sup>	54.5%	50.4%	46.1%	48.3%

<sup>c</sup>The category "Other" includes non-Leeward home-institution students, unclassified students, and dual-enrollment students.

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

## Gender

Both male and female students have similar rates of persistence averaging about 69 percent.

Table 18.  
*Student Persistence by Gender, 2013-2016*

Gender	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Female	69.1%	67.9%	66.9%	67.5%
Male	67.2%	69.1%	67.4%	69.2%
No Data <sup>d</sup>	66.7%	59.0%	86.2%	69.6%

<sup>d</sup>The category “No Data” includes students who did not indicate “male” or “female.” The UH System student information system does not contain a field for students who identify as transgender, genderqueer, questioning, or nonconforming.

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

## Age

Recent high school graduates have the highest percentage of persistence at about 80 percent.

Table 19.  
*Student Persistence by Age, 2013-2016*

Age	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Recent high school	77.2%	81.8%	79.4%	81.0%
Less than 21	70.2%	68.9%	67.4%	68.4%
21 to 24	63.7%	61.6%	62.9%	62.6%
25 to 49	66.3%	66.1%	64.3%	65.9%
Greater than 49	62.7%	70.2%	68.5%	69.3%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

## Ethnicity

Filipino and other Asian students have the highest persistence with an average of 70 percent. Native Hawaiian or part-Hawaiian students follow closely at about 68 percent.

Table 20.  
*Student Persistence by Ethnicity, 2013-2016*

Ethnicity	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Asian	71.6%	70.5%	68.3%	69.4%
Filipino	70.2%	70.0%	70.1%	72.4%
Native Hawaiian or Part-Hawaiian	69.0%	68.2%	66.2%	67.4%
Two or more ethnicities	68.6%	66.2%	66.6%	66.7%
Pacific Islander	61.3%	65.1%	64.2%	66.5%
Other	60.9%	65.1%	66.1%	62.2%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

### *Federal Pell Grant Recipients*

Federal Pell Grant recipients fare better than non-Pell Grant recipients in persistence with an average persistence of 75 percent compared to 64 percent.

Table 21.  
*Student Persistence by Federal Pell Grant Recipients, 2013-2016*

	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Pell Recipients	75.4%	75.3%	75.0%	75.5%
Non-Pell Recipients	64.5%	64.9%	63.4%	64.8%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

### *First-Time, Degree-Seeking Students*

The average persistence of first-time, degree-seeking students is 74 percent, slightly higher than the overall persistence of 68 percent.

Table 22.  
*Student Persistence by Outcome for First-Time, Degree-Seeking Students, 2013-2016*

Outcome for First-Time, Degree-Seeking Students	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Associate in Arts	72.8%	75.3%	75.4%	76.5%
Associate in Applied Science	66.9%	65.6%	57.4%	70.7%
Associate in Science	73.6%	76.1%	75.6%	73.2%
Certificate of Achievement	53.3%	65.4%	72.1%	63.9%
Certificate of Completion	65.4%	64.8%	75.0%	75.0%
Overall	71.7%	74.7%	74.7%	75.0%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

### *Progression to College-Level Courses*

The UHCC System implemented the Acceleration Initiative at all seven campuses to alleviate success gaps and enhance the graduation rate for underrepresented students. As part of the Acceleration Initiative, the College has accelerated learning tracks in math and English. These tracks are designed to move students into college-level courses within one semester or one year, depending on the student's readiness. These efforts are intended to increase college-level math and English completion rates and streamline the developmental math and English sequence. The Catalog provides descriptions of the available tracks ([I-2](#)). For further discussion, see Standard [II.A.4](#).

## English

The English faculty created two options to address student needs. The first option compressed the four developmental education courses into a single 6-credit English 24 course. Students can complete English 24 in one semester and take English 100 in their second semester. For students who are almost ready for English 100, the Accelerated Learning Program accelerates students into English 100 and enrolls them in a co-requisite course, Accelerated Learning Program English 22.

Table 23.

### *Progression from English 24 to English 100*

Term	# Enrolled	% Successful Completion	% Enrolling in English 100	English 100 Success Rate	% English 24 Students Successfully Completing English 100	Average # of Terms to Successfully Complete English 100
Fall 2012	115	62.8%	65.2%	74.7%	48.7%	3.1
Spring 2013	88	64.8%	58%	66.7%	36.4%	3.2
Fall 2013	179	69.1%	65.4%	69.2%	45.3%	2.8

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_REGGS\_UH.

## Math

Math faculty moved to an Emporium model for pre-collegiate math classes starting in 2010. The success of this model has led to the use of the Emporium model in some college-level math classes as well. In fall 2016, the College created three different tracks for developmental math: College Algebra, College Math, and Quantitative Methods (QM). Each track has co-requisite courses, which shortened the course sequence and reduced students' time in remedial/developmental math. The tracks help to guide students through the pathways to meet their graduation requirements.

Table 25.  
*Math Courses and Tracks*

Course	Course Description	Purpose	Track
Math 75	Intro to Math Reasoning	Preparation for Math 100, Math 100C, Math 111, Math 115, or QM 107C	College Math
Math 78	College Math Companion	Co-Requisite with Math 100, Math 100C, Math 111, or Math 115	College Math
Math 82	Algebraic Foundations	Preparation for Math 103	College Algebra

## Degrees and Certificates Awarded

### *Curriculum Category*

Leeward CC has 15 degree programs: four general and/or pre-professional and 11 career and technical degree programs.

#### **General and/or Pre-Professional Degrees**

1. Associate in Arts in Liberal Arts
2. Associate in Arts in Teaching
3. Associate in Science in Natural Science
4. Associate in Arts in Hawaiian Studies

#### **Career and Technical Education Degrees**

1. Accounting
2. Automotive Mechanics Technology
3. Business Technology
4. Culinary Arts
5. Digital Media Productions
6. Health Information Technology
7. Information and Computer Sciences
8. Integrated Industrial Technology
9. Management
10. Plant Biology and Tropical Agriculture
11. Television Production

Approximately 75 percent of Leeward students declare an intention to pursue a general and/or pre-professional degree and about 25 percent a degree in a career or technical program.

Table 31.

*Degrees and Certificates Awarded by Curriculum Category, 2013-2016*

<b>Curriculum Category</b>	<b>2013</b>		<b>2014</b>		<b>2015</b>		<b>2016</b>	
General and Pre-Professional	602	76.2%	835	78.6%	781	75.5%	747	73.6%

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH, IRO\_REGS\_UH.

### *Distance Education*

#### *Overall*

The number of degrees and certificates awarded that included at least one DE course increased 21 percent from 346 in 2013 to 417 in 2016.

Table 32.

*Degrees and Certificates Awarded by Course Delivery Method, 2013-2016*

<b>Course Delivery Method</b>	<b>2013</b>		<b>2014</b>		<b>2015</b>		<b>2016</b>	
DE Students	346	43.8%	426	40.1%	418	40.4%	417	41.1%

*Students Earning a Degree or Certificate with 12 Credits Minimum Earned from DE Courses by Native Hawaiian, Filipino, and Other Pacific Islander.*

The College regularly tracks three ethnicities: Native Hawaiian, Filipino, and Other Pacific Islander. Of those ethnicities, more Native Hawaiian students received degrees or certificates with at least 12 credits earned from DE courses.

Table 34.

*Degrees and Certificates Awarded with 12 Credits Minimum Earned from DE Courses by Ethnicity, 2013-2016*

	2013			2014			2015			2016

*Note.* Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH, IRO\_REGS\_UH. The following abbreviations are used in this table: Native Hawaiian (NH), Filipino (FIL), and Other Pacific Islander (PI).

### Age

Students less than 25 years old earned approximately 60 percent of the degrees and certificates awarded. The next largest group is those between the ages of 25 and 49 who earned about 40 percent of the degrees and certificates awarded.

Table 35.

*Degrees and Certificates Awarded by Age, 2013-2016*

Age	2013		2014		2015		2016	
Less than 25 years	453	57.3%	648	61.0%	644	62.3%	604	59.5%
25 to 49 years	313	39.6%	383	36.1%	351	33.9%	374	36.8%
50 years or more	24	3.0.0%	31	2.9%	39	3.8%	37	3.6%
<b>Total Degrees and Certificates</b>	790		1,062		1,034		1,015	

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

### Gender

The ratio of male to females earning a degree or certificate is 2:3.

Table 36.  
*Degrees and Certificates Awarded by Gender, 2013-2016*

<b>Gender</b>	<b>2013</b>		<b>2014</b>		<b>2015</b>		<b>2016</b>	
Female	501	63.4%	625	59.0%	582	56.0%	557	54.9%
Male	284	36.0%	427	40.0%	437	42.0%	454	44.7%
No Data <sup>i</sup>	5	0.6%	10	0.1%	15	0.2%	4	0.4%
<b>Total Degrees and Certificates<sup>j</sup></b>	790		1,062		1,034		1,015	

<sup>i</sup>The category “No Data” includes students who did not indicate “male” or “female.” The UH System student information system does not contain a field for students who identify as transgender, genderqueer, questioning, or nonconforming. <sup>j</sup>The College counts degrees and certificates awarded, not unduplicated counts of persons being awarded. The count of degrees includes those awarded Reverse Transfer.

*Note.* Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

### *Ethnicity*

All target populations earned degrees and certificates at a similar rate as their enrollment. Native Hawaiian and part-Hawaiian received the highest number of degrees or Certificates of Achievement of the three target groups.

Table 37.  
*Degrees and Certificates Awarded by Ethnicity, 2013-2016*

<b>Ethnicity</b>	<b>2013</b>		<b>2014</b>		<b>2015</b>		<b>2016</b>	
Native Hawaiian or Part-Hawaiian	194	25.2%	253	23.2%	236	23.6%	259	24.5%
Filipino	143	18.6%	250	22.9%	236	23.6%	249	23.6%
Pacific Islander	15	1.9%	20	1.8%	14	1.4%	24	2.3%
Other	418	54.3%	567	52.0%	514	51.4%	525	49.7%
<b>Total Degrees and Certificates<sup>k</sup></b>	770		1,090		1,000		1,057	

<sup>k</sup>The College counts degrees and certificates awarded, not unduplicated counts of persons being awarded. The count of degrees includes those awarded Reverse Transfer.

*Note.* Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

### *Degrees and Certificates Awarded by Native Hawaiian Students*

The goal of the Hawai‘i Graduation Initiative is to increase the percentage of working age adults with two- or four-year degrees to 55 percent by 2025. In the *UHCC Strategic Directions 2015-2021*, the UH System identifies Native Hawaiians as one of three featured target groups. (The other two groups identified are low-income students and those from underserved regions and populations in Hawai‘i.) Leeward CC’s *Strategic Plan 2015-2021* aligns with the UH System plan by committing to increase the number of Native Hawaiians who receive a degree and/or certificate from the College. Since 2013, the number of degrees and certificates awarded to Native Hawaiian students has increased by 35 percent.

Table 38.

*Degrees and Certificates Awarded by Native Hawaiian Students, 2013-2016*

<b>Actual</b>	201	248	253	240
<b>Aspirational Target<sup>l</sup></b>	-	-	228 <sup>m</sup>	239
<b>Actual vs. Aspirational Target</b>	-	-	+10.9%	+0.4%

<sup>l</sup>The Aspirational Target is five percent growth per year from the baseline year. <sup>m</sup>This baseline value is established as the three-year average for AY 2012-2015.

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

*Federal Pell Grant Recipients*

The number of Federal Pell Grant recipients awarded a degree or certificate has increased significantly since 2013. The gap between Pell Grant recipients and non-Pell Grant students has become minimal in the last three years.

Table 39.

*Degrees and Certificates Awarded by Federal Pell Grant Recipients, 2013-2016*

	2013	2014	2015	2016
<b>Pell Recipients</b>	351	538	495	501
<b>Non-Pell Grant Recipients</b>	439	524	539	514
<b>Total</b>	790	1,062	1,034	1,015

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

*Location*

About seven percent of students awarded a degree or certificate took classes at the Wai‘anae Moku Education Center.

Table 40.

*Degrees and Certificates Awarded by Location, 2013-2016*

Location	2013		2014		2015		2016	
Wai‘anae Moku Education Center	57	7.0%	71	7.0%	68	7.0%	70	6.9%
Pearl City Campus	733	93.0%	991	93.0%	966	93.0%	945	93.1%
<b>Total Degrees and Certificates</b>	790		1,062		1,034		1,015	

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH.

*Student Transfer to Baccalaureate Institutions in the UH System*

*Overall*

The number and percentage of Leeward students that transfer to a baccalaureate campus within the UH System has been increasing.

Table 41.  
*Student Transfer to UH Baccalaureate Institutions, 2014-2016*

Transfers	2014		2015		2016	
	#	%	#	%	#	%
UH Baccalaureate Institution	602	45.2%	613	44.9%	792	56.2%
Non-UH Baccalaureate Institution	730	54.8%	752	55.1%	618	43.8%
<b>Total</b>	1,332		1,365		1,410	

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_BASE\_UH.

### *Distance Education*

About 44 percent of students who transfer to a UH baccalaureate institute do so with 12 or more credits earned from DE courses. Approximately 44 percent of those students transfer after earning an associate degree.

Table 42.  
*Student Transfer to UH Baccalaureate Institutions with 12 Credits Minimum Earned from DE Courses, 2014-2016*

	2014			2015			2016		
	#	% of total	% of DE	#	% of total	% of DE	#	% of total	% of DE
<b>Transferred with Associate Degree</b>	127	21.1%	43.8%	129	21.0%	44.2%	132	16.7%	44.4%
<b>Transferred to UH Baccalaureate Institution<sup>p</sup></b>	163	27.1%	56.2%	163	26.6%	55.8%	165	20.8%	55.6%
<b>Total Transfers with DE</b>	290	48.2%	100%	292	47.6%	100%	297	37.5%	100%
<b>Total Transfers to UH Baccalaureate Institution</b>	602			613			792		

<sup>p</sup> This category includes students who transferred to the University of Hawai'i at Mānoa, the University of Hawai'i at Hilo, and the University of Hawai'i-West O'ahu from any UHCC campus (home institution) with 12 or more DE-earned credits.

Note. Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH, IRO\_REGS\_UH.

### *Transfers with at Least 12 Credits from Distance Education Courses by Native Hawaiian, Filipino, and Pacific Islander*

About eight percent of those who transfer with an associate degree and about ten percent of pre-degree transfers with at least 12 credits earned from DE courses are Native Hawaiian or part-Hawaiian students. About six percent of students who transfer to a UH baccalaureate institution and about five percent of students who transfer with an associate degree are Filipino. About 0.6 percent of students who transfer to a UH baccalaureate institution and about 0.5 percent of students who transfer with an associate degree are from the Pacific Islands.

Table 43.

*Student Transfer to UH Baccalaureate Institutions with 12 Credits Minimum Earned from DE Courses by Ethnicity, 2014-2016*

	2014			2015			2016		
	NH	FIL	PI	NH	FIL	PI	NH	FIL	PI
<b>Transferred with Associate Degree</b>	45	28	3	73	42	3	36	39	4
<b>% Total</b>	7.5%	4.7%	0.5%	11.9%	6.9%	0.5%	4.55%	4.2%	0.5%

<b>Total Transfers to UH Baccalaureate Institution</b>	602			613			792		

<sup>q</sup>This category includes students who transferred to the University of Hawai'i at Mānoa, the University of Hawai'i at Hilo, and the University of Hawai'i-West O'ahu from any UHCC campus (home institution) with 12 or more DE-earned credits.

*Note.* Retrieved from OPPA Data Extraction, ODS, IRO\_DEGREE\_UH, IRO\_REGGS\_UH. The following abbreviations are used in this table: Native Hawaiian (NH), Filipino (FIL), and Other Pacific Islander (PI).

## Post-Graduate Data

### *Student Job Placement*

The Job Prep Services office offers job placement assistance to all Leeward students and graduates. These services include resume assistance, interview preparation, employment strategies, and labor market information.

The Carl D. Perkins Vocational and Technical Education Act provides funding to states and other grantees to develop academic, career, and technical skills of secondary and postsecondary students. As an awardee, Leeward CC tracks placement rates of students enrolled in career and technical education programs.

Table 44 shows the job placement rate for 2013-2017. The job placement rate is calculated by dividing the number of students who have stopped program participation and who are retained in employment, military service, or an apprenticeship program following program completion with the number of students who have stopped program participation.

Table 44.  
*Job Placement Rate, 2013-2016*

Program	2013-2014		2014-2015		2015-2016	
	Adjusted	Actual	Adjusted	Actual	Adjusted	Actual
Accounting	68.9%	39.1%	69.0%	62.7%	63.9%	60.9%
Automotive Technology	68.9%	57.6%	69.0%	81.6%	63.9%	81.6%
Business Technology	68.9%	46.9%	69.0%	68.1%	63.9%	71.8%
Culinary Arts	68.9%	45.2%	69.0%	63.4%	63.9%	65.8%
Digital Media Production	68.9%	41.4%	69.0%	43.3%	63.9%	37.8%
Health Information Technology	68.9%	N/A	69.0%	66.7%	63.9%	58.8%
Information and Computer Science	68.9%	50.0%	69.0%	87.1%	63.9%	63.2%
Integrated Industrial Technology <sup>f</sup>	-	-	-	-	-	-
Management	68.9%	46.9%	69.00%	68.9%	63.9%	68.3%
Substance Abuse Counseling	68.9%	31.3%	69.0%	80.0%	63.9%	44.4%
Television Production	68.9%	55.6%	69.0%	31.3%	63.9%	90.0%

<sup>f</sup>The Integrated Industrial Technology program was approved in fall 2017, so data has not been collected.

## Organization of the Self-Evaluation Process

### Timeline

Semester	Tasks
Summer 2016	<ul style="list-style-type: none"> <li>● The accreditation liaison officer (ALO) identified the self-evaluation co-chair and members of the self-evaluation core team.</li> </ul>
Fall 2016	<ul style="list-style-type: none"> <li>● The UH vice president of community colleges met with the ALOs from all seven community college campuses to discuss the self-evaluation process and efforts being done at the system level.</li> <li>● The ALO, core team, and administrators participated in a two-day accreditation workshop conducted by consultant Dr. Robert Pacheco for all community college campuses.</li> <li>● The ALO, core team, and administrators met with Dr. Pacheco at the Pearl City campus to design tactics and create a timeline.</li> <li>● The core team worked to better understand the Accreditation Standards and began to collect evidence.</li> </ul>
Spring 2017	<ul style="list-style-type: none"> <li>● Faculty, staff, and administrators participated in breakout sessions on accreditation topics at the College's spring convocation.</li> <li>● The core team continued to collect evidence, began to identify possible changes and plans, and wrote the narrative for the Evidence of Meeting the Standard sections.</li> </ul>
Summer 2017	<ul style="list-style-type: none"> <li>● Five members of the core team met to analyze, evaluate, and revise the Evidence of Meeting the Standard sections.</li> <li>● Standard IV team leads participated in the UHCC System task force to compose system response to Standard IV.C and IV.D.</li> </ul>
Fall 2017	<ul style="list-style-type: none"> <li>● The ALO distributed the first draft of the institutional self-evaluation report (ISER) to the campus.</li> <li>● The campus community provided feedback on the draft.</li> <li>● The campus community engaged in dialogue about the ISER findings.</li> <li>● Standard IV team leads continued to participate in the UHCC System task force.</li> </ul>
Spring 2018	<ul style="list-style-type: none"> <li>● The core team collected broad campus input at convocation through structured roundtable discussions on accreditation topics.</li> <li>● The ALO distributed the second draft of the ISER to the campus.</li> <li>● The ALO, co-chair, and editor finalized the report and the evidence.</li> <li>● The ALO distributed the final draft of the ISER to the campus.</li> <li>● Campus governance groups approved the ISER.</li> </ul>
Fall 2018	<ul style="list-style-type: none"> <li>● The evaluation team visits in October.</li> </ul>

For Standards IV.C and IV.D, the UHCC System convened teams with representatives from each of the six community colleges; the UHCC System office; and, for Standard IV.D, representatives from the Board of Regents. The system teams worked on the Standards starting in summer 2017 until April 2018. The teams agreed upon the content for both Standards through consensus, and the appropriate individuals provided evidence. The teams standardized the text for inclusion in the six UHCC institutional self-evaluation reports. Additionally, UHCC System representatives provided text and evidence for system-related information in Standard III. For a discussion of the governing board's participation in the accreditation process, see Standard [IV.C.13](#).

Self-Evaluation Core Team

<b>Name</b>	<b>Responsibilities</b>	<b>Position</b>
Della Teraoka	ALO and Self-Evaluation Co-Chair	Vice Chancellor for Academic Affairs
Donna Matsumoto	Self-Evaluation Co-Chair	Professor, English
Susan Wood	Editor	Professor, English
Jayne Bopp	Contributing Editor	Assistant Professor, Sociology, Women's Studies
Brent Hirata	Standard I	Associate Professor, Educational Technology Developer
Eiko Kosasa	Standard I	Assistant Professor, Political Science
Jenny Watada	Standard I Standard II (Summer Team) Data and Evidence Reviewer	Associate Professor, Mathematics
Kathryn Fujioka- Imai	Standard II	Associate Professor, English
Junie Hayashi	Standard II Standard III (Summer Team)	Associate Professor, Librarian
Pi'ikea Hardy-Kahaleo'umi	Standard II	Assistant Professor, Counselor
Helmut Kae	Standard III	Associate Professor, Biology
Warren Kawano	Standard III Standard IV (Summer Team)	Assistant Professor, Business Technology
Jan Shimabukuro Lee	Standard III	Associate Professor, Counselor
William Albritton	Standard IV	Associate Professor, Information and Computer Science
Lexer Chou	Standard IV Standard I (Summer Team)	Associate Professor, Student Life Coordinator
Tracie Losch	Standard IV Standard II (Summer Team) Student Achievement Data Commission Policies	Associate Professor, Hawaiian Studies

## Self-Evaluation Contributors

The College received feedback from over 72 contributors during the fall 2017 and spring 2018 semesters.

# Organizational Information

## Organization of Leeward Community College

Leeward CC most recently reviewed and updated its organization charts and functional statements on July 1, 2017 ([l-3](#), [l-4](#)).

Functional Responsibilities of the UH System, the UHCC System, and the College by Major Accreditation Topic

Accreditation Topic	UH System/UHCC System	College
I.A. Mission	The UH System mission is adopted by the Board of Regents (BOR) and reflected in UH policy. All colleges are expected to conform their mission statements to the UH mission.	Individual college missions are derived from the UH System mission and approved by the BOR. Colleges are responsible for disseminating the mission statement and ensuring that college planning and resource allocation decisions reflect the mission statement.
I.B. Academic Quality	The UHCC System establishes system wide institution set-standards as well as system metrics and goals to achieve student success. System student success metrics are used in planning and resource allocation at the UHCC System level.	Colleges manage the process of establishing course- and program-based learning outcomes and assessment and are responsible for using the assessment information to improve student learning.
I.B. Institutional Effectiveness	Both the UH System and the UHCC System provide data analytics to measure student success including differentiating the outcomes by targeted student populations. The UHCC System also provides data to the colleges in support of program review and accreditation compliance.	Colleges use data analytics provided by the UH System and the UHCC System along with their own analysis of assessment results to improve student success. Data is disaggregated to allow analysis of sub-populations.
I.C. Institutional Integrity	The UH System and the UHCC System publish information for prospective students including cost of attendance. Some policies regarding institutional integrity exist in UH System policies or system wide collective bargaining agreements.	Colleges are primarily responsible for communicating accurate information including accreditation information to students, prospective students, and the general public.
II.A. Instructional Programs	The UHCC System establishes policies relating to degrees and certificates in alignment with UH Executive and BOR policies. All degree and certificate programs require BOR approval after review by the college, the UHCC System, and the UH System. The UH System and the UHCC System establish internal UH articulation agreements, general education core agreements, and transfer policies.	Colleges are responsible, through their internal curriculum processes, for approving all courses and programs, including course and program learning outcomes and assessment, and ensuring that both programs and courses meet commonly understood higher education standards.

Accreditation Topic	UH System/UHCC System	College
II.B. Library and Learning Support Services	The UH System provides a common library services software and shared services agreements to all ten UH System campuses. The UH and/or the UHCC System provide some learning support services such as course management software and online tutoring to all students.	Colleges establish the on-campus library and learning support services, assess their effectiveness, and improve services as appropriate.
II.C. Student Support Services	The UHCC System provides shared services for back office financial aid and coordinates other delivery of student support services.	Colleges are responsible for on-campus student support services including establishing service-level outcomes, assessment, and analysis of the services for different sub-populations. All co-curricular services are based at the colleges. UHCC campuses have no athletic programs.
II.A. Human Resources	The UH System, the UHCC System, and applicable collective bargaining agreements determine human resource policies and classifications. The UHCC System establishes faculty academic qualifications for both regular and adjunct faculty. The UH System and the UHCC System act as appeal levels on human resource-related matters. System and colleges share professional development responsibilities.	Colleges implement the applicable human resource policies and collective bargaining contracts. Most hiring and other human resource decisions are based on the campus. Selected higher-level appointments and classifications require system approval.
III.B. Physical Resources	Development of long-range physical plans and implementation of capital improvement plan projects are the responsibility of the UH System and the UHCC System.	Colleges provide input into plans and priorities for capital improvement plan projects. Colleges are responsible for regular maintenance of the physical plant at the college.
III.C. Technology Resources	The UH System manages technology resources including network infrastructure and enterprise software systems. The UH System and the UHCC System plan and coordinate system wide online learning support and program delivery.	Colleges are responsible for on-campus networks, technology resources, and technology support.

Accreditation Topic	UH System/UHCC System	College
III.D. Financial Resource Planning	<p>The UH System and the BOR set reserve policies, approve the annual operating budgets, and approve the UH System request for new operating funds submitted to the state legislature. The development of the budget and budget request are based on a policy paper derived from the strategic plan and approved by the BOR.</p> <p>The UHCC System is appropriated funds by the state legislature and allocates those funds to the colleges. The UHCC System does not receive funds on a full-time equivalent or other formula basis from the legislature.</p>	Colleges are involved in the system budget planning including adhering to all reserve requirements established by the BOR. Colleges are responsible for internal allocation of funds based on the allocations and revenue generated by the colleges.
III.D. Financial Resource Stability	The UH System manages university fiscal systems. Regular audits are conducted of the UH System, including separate schedules for the UHCC System. The UH internal auditor conducts several audits per year focusing on internal controls and management processes. The UH System centrally manages all extramural funds.	Colleges implement fiscal systems in accord with university system fiscal policies. When audits identify weaknesses or needed improvements, colleges respond with improvement plans that are incorporated into the audit reports.
III.D. Financial Resource Liabilities	The UH System does not manage or fund fringe benefits, including post-retirement pensions and other post-retirement benefits. These expenses and liabilities are funded and managed by the state of Hawai'i. The UH System manages all UH debt obligations.	Colleges monitor loan default rates and implement action plans as appropriate.
III.D. Financial Resource Contractual Agreements	The UH System establishes and manages all contracts in accordance with state procurement laws.	Colleges adhere to UH System policies and practices in the procurement of all contracts for goods, services, and professional services.
IV.A. Decision-Making Roles and Responsibilities	Board policy establishes a commitment to shared governance. The UH System and the UHCC System confer regularly with college governance groups. State statute governs formal consultation with collective bargaining units.	Colleges implement shared governance policies and processes for internal college decision-making.

Accreditation Topic	UH System/UHCC System	College
IV.B. Chief Executive Officer (CEO)	The UH System and the UHCC System delegate to the college CEO authority for college operations within the policy limits of the UH System.	College CEOs are responsible for all college actions, subject to UH System policies and delegation of authority as reflected in board policy, UH executive policy, and UHCC System policies.
IV.C. Governing Board	<p>The BOR is established by statute. Members are selected by the governor with the consent of the Senate from a list recommended by a review committee.</p> <p>Board policies are regularly reviewed and posted. BOR bylaws govern board and board member behavior. All board actions are subject to state open meeting and public information laws and regularly published.</p> <p>The vice president for the UHCC System acts as the liaison to the BOR for all UHCC matters including accreditation.</p>	Colleges submit action items to the BOR through the vice president for the UHCC System and the UH System.
IV.D. Multi-College Districts or Systems	<p>The BOR appoints the UH System president who is responsible for the entire ten campus system of higher education in Hawai'i. The UH president appoints the vice president for community colleges who is responsible for the seven-campus community college system. The vice president appoints and supervises the individual community college chancellors.</p> <p>The UH System is responsible for UH executive policies, UH System planning and coordination, and for selected system wide support services such as financial services and facilities planning. The UHCC System is responsible for UHCC wide policies, UHCC budget and resource allocation, UHCC system planning and coordination, and selected system services.</p>	Colleges operate within the policy and planning framework established by the UH System and the UHCC System.

The UHCC System’s detailed functional map summarizes the delineation of functions and the differentiation of responsibilities between system and campus level. The community colleges reviewed and updated the map in fall 2017 ([I-5](#)).

## Certification of Continued Institutional Compliance with Eligibility Requirements

### **1. Authority**

*The institution is authorized or licensed to operate as a post-secondary educational institution and to award degrees by an appropriate governmental organization or agency as required by each of the jurisdictions or regions in which it operates.*

Leeward Community College is a public, postsecondary institution of the University of Hawai'i Community Colleges (UHCC) operating under the authority of the state of Hawai'i and the UH Board of Regents (BOR) to award academic degrees and certificates ([I-6](#)). The College is accredited by the Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges ([I-7](#)).

### **2. Operational Status**

*The institution is operational, with students actively pursuing its degree programs.*

The College has been in operation since 1968, with students actively pursuing degree and certificate programs during the fall and spring semesters and summer sessions. In 2016-2017, the College enrolled 7,262 credit students, down from the 7,535 students enrolled in 2015-2016 and 7,742 students enrolled in 2014-2015. The College awarded 1,034 degrees and certificates in 2014-2015, with a decrease to 1,015 in 2015-2016 and 978 in 2016-2017. A current schedule of classes is available on the College website ([I-8](#)).

### **3. Degrees**

*A substantial portion of the institution's educational offerings are programs that lead to degrees, and a significant proportion of its students are enrolled in them. At least one degree program must be of two academic years in length.*

A substantial portion of the College's educational offerings are programs that lead to degrees. The *Catalog 2017-2018* lists 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence ([I-9](#), [I-10](#)). Data on degrees and certificates awarded by program can be found on the Institutional Research Data webpage of the College intranet ([I-11](#)). The largest program awarding degrees is the Associate in Arts. The College also provides noncredit certificates for students to acquire skills for job placement directly into the workforce through the Office of Continuing Education and Workforce Development ([I-12](#)).

### **4. Chief Executive Officer**

*The institution has a chief executive officer appointed by the governing board, whose full-time responsibility is to the institution, and who possesses the requisite authority to administer board policies. Neither the district/system chief executive officer nor the institutional chief executive officer may serve as the chair of the governing board. The institution informs the Commission immediately when there is a change in the institutional chief executive officer.*

The chief executive officer of a UHCC campus is the chancellor, who is appointed by the BOR. The College’s chancellor is Manuel J. Cabral, who the board officially appointed in May 2008 (I-13). Prior to his appointment, he served as the College’s interim chancellor since March 2007, division chair of the Mathematics and Natural Sciences Division since 1988, and math instructor since 1980. The chancellor provides leadership in planning and setting priorities for the College, managing resources, and ensuring implementation of statutes, regulations, and policies (I-14). After more than 11 years, the chancellor will retire on July 1, 2018, and Suzette Robinson will assume the position of interim chancellor.

### 5. Financial Accountability

*The institution annually undergoes and makes available an external financial audit by a certified public accountant or an audit by an appropriate public agency. Institutions that are already Title IV eligible must demonstrate compliance with federal requirements.*

An independent certified public accounting firm annually audits the UH System’s financial statements. The UH Administrative Procedures, which are located on the Policies and Procedures Information System website, outline internal control procedures (I-15). The auditing procedures provide objective third-party review of internal controls and procedures. The results and recommendations of the audit are presented to the BOR. Other major campus audits include the required Federal Compliance Audit or A-133, the Vocational Education Act Audit, the Financial Aid Audit, various legislative audits, and unscheduled and unannounced audits performed by the UH Office of the Internal Auditor (I-16).

Eligibility Requirements 6 through 21 are addressed in the responses to the following Accreditation Standards:

Eligibility Requirement (ER)	Accreditation Standards
ER 6 Mission	I.A.1, I.A.4
ER 7 Governing Board	IV.C.1, IV.C.4, IV.C.11
ER 8 Administrative Capacity	III.A.9, III.A.10
ER 9 Educational Programs	II.A.1, II.A.6
ER 10 Academic Credit	II.A.9, II.A.10
ER 11 Student Learning and Achievement	I.B.2, I.B.3, II.A.1
ER 12 General Education	II.A.5, II.A.12
ER 13 Academic Freedom	I.C.7
ER 14 Faculty	III.A.2, III.A.7
ER 15 Student Support Services	II.C.1, II.C.3

Eligibility Requirement (ER)	Accreditation Standards
ER 16 Admissions	II.C.6
ER 17 Information and Learning Support Services	II.B.1, II.B.4
ER 18 Financial Resources	III.D.1
ER 19 Institutional Planning and Evaluation	I.B.9, I.C.3
ER 20 Integrity in Communication with the Public	I.C.2
ER 21 Integrity in Relations with the Accrediting Commission	I.C.12, I.C.13

## Certification of Continued Institutional Compliance with Federal Regulations and Commission Policies

<p><b>Public Notification of an Evaluation Team Visit and Third Party Comment</b> [Regulation Citation: 602.23(b)]</p>
<p>Leeward Community College has made an appropriate and timely effort to solicit third-party comment in advance of its comprehensive evaluation visit.</p> <ul style="list-style-type: none"> <li>● The College posted a draft of its institutional self-evaluation report on the College website in spring 2018 (<a href="#">I-17</a>).</li> <li>● The College’s accreditation webpage also includes the visit dates and provides a link to an online feedback form (<a href="#">I-17</a>).</li> <li>● See responses to Standards <a href="#">I.C.12</a>, <a href="#">I.C.13</a>, <a href="#">IV.B.4</a>, and Eligibility Requirement 21.</li> </ul>
<p>The College cooperates with the Accrediting Commission for Community and Junior Colleges (ACCJC) evaluation team in any necessary follow-up related to the third-party comment.</p> <ul style="list-style-type: none"> <li>● The College has received no third-party comments. The College will cooperate with the evaluation team in any necessary follow-up related to third-party comment.</li> <li>● See responses to Standards <a href="#">I.C.5</a>, <a href="#">I.C.12</a>, and Eligibility Requirement 21.</li> </ul>
<p><b>Standards and Performance with Respect to Student Achievement</b> [Regulation Citations: 602.1(a)(1)(i); 602.17(f); 602.19(a-e)]</p>
<p>The College has defined elements of student achievement performance across the campus and has identified the expected measure of performance within each defined element. Course completion is included as an element of student achievement.</p> <ul style="list-style-type: none"> <li>● The College has established institution-set standards for student achievement based on the University of Hawai‘i Community Colleges Policy (UHCCP) 4.203, Institution-Set Standards, and the <i>UHCC Strategic Directions 2015-2021</i> (<a href="#">I-1</a>, <a href="#">I-18</a>). These standards are aligned with the College’s mission statement and <i>Strategic Plan 2015-2021</i> (<a href="#">I-19</a>).</li> <li>● Successful course completion is one of the institution-set measurements.</li> <li>● See <a href="#">Presentation of Institution-Set Standards and Student Achievement Data</a>.</li> <li>● See responses to Standards <a href="#">I.A.1</a>, <a href="#">I.B.3</a>, and Eligibility Requirement 11.</li> </ul>
<p>The College has defined other elements of student achievement performance for measurement that have been determined as appropriate to the College mission.</p> <ul style="list-style-type: none"> <li>● The other measurements of student achievement include, but are not limited to, degrees and certificates awarded, transfer to baccalaureate institutions, Integrated Postsecondary Education Data System Student Success Rate, licensure and certification examination success rate, and job placement rate (<a href="#">I-1</a>).</li> <li>● See <a href="#">Presentation of Institution-Set Standards and Student Achievement Data</a>.</li> <li>● See responses to Standard <a href="#">I.B.3</a> and Eligibility Requirement 11.</li> </ul>
<p>The institution-set standards for programs and across the College are relevant to guide self-evaluation and institutional improvement; the defined elements and expected performance</p>

levels are appropriate within higher education; the results are reported regularly across the campus; and the definition of elements and results are used in program-level and institution wide planning to evaluate how well the College fulfills its mission, to determine needed changes, to allocate resources, and to make improvements ([I-20](#)).

- The College reports institution-set standard data to ACCJC in its annual report ([I-21](#)).
- The College’s annual integrated planning process includes assessments at the course, program, and institutional level ([I-22](#)).
- See responses to Standards [I.B.3](#), [I.B.4](#), [I.B.5](#), [I.B.9](#), and Eligibility Requirement 11.

The College analyzes its performance as to the institution-set standards and as to student achievement, and the College takes appropriate measures in areas where its performance is not at the expected level.

- The College regularly assesses learning outcomes for courses, programs, academic services, and student services units ([I-23](#)).
- Student achievement data are integral to the College’s planning process ([I-22](#)).
- See responses to Standards [I.B.2](#), [I.B.3](#), [I.B.4](#), [I.B.5](#), [I.B.9](#), and Eligibility Requirement 11.

### **Credits, Program Length, and Tuition**

[Regulation Citations: 602.16(a)(1)(i); 602.17(f); 602.19(a-e)]

Credit hour assignments and degree program lengths are within the range of good practice in higher education in policy and procedure.

- The College’s course credit hour conforms to the Carnegie Unit as well as to federal and state guidelines that define a course credit hour.
- The UHCC Policy UHCCP #5.228, Credit Hour, defines a credit hour as 50 minutes to one hour of class or faculty instruction and a minimum of two hours of work per week outside of class over approximately 15 weeks ([I-24](#)).
- Alternately, a credit hour can be earned through an equivalent amount of work for other activities such as distance education (DE) instruction, laboratory work, studio work, and internships.
- See responses to Standard [II.A.9](#) and Eligibility Requirements 9, 10, and 12.

The College verifies the assignment of credit hours and degree program lengths, ensuring they are reliable and accurate across classroom-based courses, laboratory classes, DE classes, and courses that involve clinical practice, if applicable.

- UHCCP 5.203, Program Credentials: Degrees and Certificates, sets graduation requirements for associate degrees and certificates ([I-25](#)). These requirements include the completion of 60 baccalaureate-level semester credits, the evaluation of the student’s work, and the fulfillment of stated outcomes with a cumulative 2.0 grade point average or higher for all courses needed to meet the degree requirements.
- All programs are vetted through the College’s curriculum approval process, which is in compliance with the College’s Policy L5.201, Curriculum Review and Revision ([I-26](#)).
- See responses to Standard [II.A.9](#) and Eligibility Requirements 9, 10, and 12.

Tuition is consistent across degree programs (or there is a rational basis for any program-specific tuition).

- The base tuition at the College is consistent across all degree programs. The Catalog and the College website list any additional fees when relevant or appropriate ([I-27](#), [I-28](#), [I-29](#), [I-30](#)).
- See responses to Standard [I.C.6](#) and Eligibility Requirement 11.

Any clock hour conversions to credit hours adhere to the State of Hawai‘i Department of Education’s conversion formula in policy, procedure, and practice.

- The College does not offer clock-hour based courses.
- See response to Standard [II.A.9](#).

The institution demonstrates compliance with the Commission Policy on Institutional Degrees and Credits.

[Regulation Citations: 600.2 (definition of credit hour); 602.16(a)(1)(viii); 602.24(e), (f); 668.2; 668.9]

- The College ensures that all programs are sufficient in content, breadth, and length through the Curriculum Committee’s approval process ([I-31](#)). The College offers a variety of programs of various lengths of study to meet the needs of students pursuing educational goals at the College. All programs have published learning outcomes developed by the faculty within the program. Program-level learning outcomes are assessed as part of ongoing assessment processes at the College ([I-32](#)). The University of Hawai‘i (UH) Board of Regents (BOR) reviews and approves all programs.
- See responses to Standards [II.A.5](#); [II.A.9](#); and Eligibility Requirements 9, 10, and 12.

### **Transfer Policies**

[Regulation Citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii)]

Transfer policies are appropriately disclosed to students and to the public.

- The Admissions and Records office and counselors distribute the College’s transfer of credit policies.
- The College website and the Catalog list the transfer of credit policies, and these policies are discussed in transfer workshops held throughout the semester ([I-33](#), [I-34](#)).
- The UH System Course Transfer Database, searchable by students, includes course evaluations and equivalencies for UH campuses and other institutions ([I-35](#)).
- See responses to Standard [II.A.10](#) and Eligibility Requirement 20.

Policies contain information about the criteria the College uses to accept credits for transfer.

- Executive Policy (EP) 5.209, Student Transfer and Inter-Campus Articulation, provides guidelines for student transfer and inter-campus articulation within the UH System ([I-36](#)).
- See responses to Standard [II.A.10](#) and Eligibility Requirement 20.

The College complies with the Commission Policy on Transfer of Credit.

[Regulation Citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii)]

- The UH System Course Transfer Database, the UH System Transfer site, and transfer information provided in the Catalog and on the College website as well as the response to Standard II.A.10 provide evidence of the College's compliance with this policy ([I-33](#), [I-34](#)).
- See responses to Standard [II.A.10](#) and Eligibility Requirement 20.

### **Distance Education and Correspondence Education**

[Regulation Citations: 602.16(a)(1)(iv), (vi); 602.17(g); 668.38]

The College has policies and procedures for defining and classifying a course as offered by DE in alignment with U.S. Department of Education (USDE) definitions.

- The College has a DE coordinator who provides DE support with iLearn (for students), iTeach (for instructors), as well as through workshops for campus constituents who teach both credit and noncredit courses ([I-37](#)).
- The College's Faculty Senate has a DE Committee that informs faculty and staff of federal and Commission requirements regarding the definitions of DE and correspondence education and provides examples of instructor-initiated substantive interaction ([I-38](#)).
- See responses to Standards [II.A.1](#); [II.B.1](#); [III.C.1](#); [III.C.4](#); [IV.A.4](#); and Eligibility Requirements 9, 15, and 17.

There is an accurate and consistent application of the policies and procedures for determining if a course is offered by DE (with regular and substantive interaction with the instructor, interaction initiated by the instructor, and online activities that are included as part of a student's grade) or correspondence education (online activities that are primarily "paperwork related," including reading posted materials, posting homework, completing examinations and interaction with the instructor that is initiated by the student as needed).

- Faculty teaching a course taught in a DE format must complete three additional fields and discuss DE components as part of the curriculum approval process before the course can be offered in a DE format. The three required fields include the following questions:
  - 1) "What methods will be employed to ensure timely and effective interaction between faculty and students and student to student? What technological skills will students need to succeed in this course? How will the instructor execute and ensure the rigor and breadth of the course through electronic delivery?"
  - 2) "What type of academic support and technology training will be required to ensure pedagogical development of the instructor for this course?"
  - 3) "How will specific technology be integrated into the course, and how will its use be appropriate to the nature and objectives of the course?" ([I-39](#))
- The College's program review process includes success and enrollment metrics disaggregated for online and face-to-face modes of delivery to ensure comparable course quality ([I-40](#)).
- All faculty teaching in the DE format must complete training on the requirements of faculty-initiated interaction to be in compliance with federal regulations.
- The College does not offer correspondence courses.
- See responses to Standards [I.C.8](#); [II.A.7](#); [III.C.1](#); [III.C.2](#); [III.C.3](#); [III.C.4](#); and Eligibility Requirements 9, 15, and 17.

The College has appropriate means and consistently applies those means for verifying the identity of a student who participates in a DE or correspondence education course or program and for ensuring that student information is protected.

- The College uses Lulima, a Sakai-based learning management system, for online, hybrid, and web-enhanced classes. Lulima provides secure login for both faculty and students ([I-41](#)).
- See responses to Standards [I.C.8](#); [III.C.1](#); [III.C.2](#); [III.C.3](#); [III.C.4](#); and Eligibility Requirements 9, 15, and 17.

The College's technology infrastructure is sufficient to maintain and sustain the DE offerings.

- The College's Information Technology Group (ITG) maintains and manages all computers, computer labs, institutional servers, Voice Over Internet Protocol telephone systems, web servers, networking services, networked printers, information technology security, the Student Test Center, and Help Desk operations ([I-42](#)).
- The Educational Media Center (EMC) maintains smart classrooms and a portable cart with Chromebooks that are available for instructors to use in the classroom. They also operate technology equipment loans, professional development for learning with technology and for teaching online, video production, and the Copy Center, which serve faculty, staff, and students ([I-37](#)).
- The ITG and EMC analyze technology infrastructure through program review to ensure that their infrastructure is adequate to support their mission, operations, programs, and services ([I-22](#)).
- See responses to Standards [I.C.8](#); [III.C.1](#); [III.C.2](#); [III.C.3](#); [III.C.4](#); and Eligibility Requirements 9, 15, and 17.

### **Student Complaints**

[Regulation Citations: 602.1(a)(1)(ix); 668.43]

The College has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the Catalog and online.

- All policies affecting students are printed in the Catalog and on the Policies webpage of the College website and the Services for Students webpage ([I-43](#), [I-44](#), [I-45](#), [I-46](#), [I-47](#), [I-48](#)).
- These policies include, but are not limited to, academic dishonesty, student conduct code, academic rights and freedom, student academic grievance procedures, discrimination complaints, sex discrimination and gender-based violence, and nondiscrimination and affirmative action.
- See responses to Standard [I.C.2](#) and Eligibility Requirement 21.

Student complaint files for the previous six years (since the last institutional self-evaluation) are available; these files demonstrate accurate implementation of the complaint policies and procedures.

- Student complaint files for the previous six years (since the last institutional self-evaluation) are available in the Office of the Dean of Student Services or in the relevant division/unit office for the evaluation team to review ([I-49](#)).
- See response to Eligibility Requirement 21.

The team analysis of student complaint files identifies any issues that may be indicative of the College's noncompliance with any Accreditation Standards.

- Analysis is to be determined by the evaluation team during the accreditation visit.
- See responses to Eligibility Requirement 21.

The College posts on its website the names of associations, agencies, and governmental bodies that accredit, approve, or license the College and any of its programs, and the College provides contact information for filing complaints with such entities.

- The College website identifies ACCJC/WASC as the accrediting organization overseeing the College's compliance with Eligibility Requirements, Accreditation Standards, and Commission policies ([I-17](#)).
- The Catalog (posted on the College website) also identifies program accreditation information provides contact information for filing complaints with such entities.
- The College published its past institutional self-evaluation report on its website in order to inform the public of its good standing ([I-17](#)).
- See response to Eligibility Requirement 21.

The College demonstrates compliance with the Commission Policy on Representation of Accredited Status and the Policy on Student and Public Complaints Against Institutions.

- The College's marketing officer coordinates all marketing and public relations materials in order to ensure consistency, quality, and integrity in College publications. These materials include promotional materials for student recruitment and the publicizing of campus events in the community. Documentation represents the College appropriately and includes required information on the College's current accredited status by ACCJC/WASC ([I-17](#)).
- See response to Eligibility Requirement 21.

### **Institutional Disclosure and Advertising and Recruitment Materials**

[Regulation Citations: 602.16(a)(1)(vii); 668.6]

The College provides accurate, timely (current), and appropriately detailed information to students and the public about its programs, locations, and policies.

- The *Catalog 2017-2018* includes the College's official name, main campus address, telephone number, and website address, and the College's education center address and telephone number. It also provides the mission statement, core values, institutional learning outcomes, history and accreditation status with ACCJC and programmatic accreditors, programs of study (degrees and certificates offered including learning outcomes for programs and degree and program lengths), special programs, description of course offerings, academic calendar, academic rights and freedom policy, student financial aid information, learning resources, and the names and degrees of its administrators and faculty including the names of the regents ([I-50](#)).
- See responses to Standard [I.C.2](#) and Eligibility Requirement 21.

The College complies with the Commission Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status.

- The College’s marketing officer coordinates all marketing and public relations materials in order to ensure consistency, quality, and integrity in College publications ([I-51](#), [I-52](#)).
- These materials include promotional materials for student recruitment and the publicizing of campus events in the community.
- Documentation represents the College appropriately and includes required information on the College’s current accredited status by ACCJC/WASC ([I-17](#)).
- See responses to Standards [I.C.1](#), [I.C.2](#), and Eligibility Requirement 21.

The College provides required information concerning its accredited status as described above in the section on Student Complaints.

- The College website includes information related to its mission statement, learning outcomes, educational programs, and student support services. An accreditation webpage provides students and the general public with information about the College’s accreditation status with all its accreditors ([I-53](#)).
- See responses to Standards [I.C.1](#), [I.C.2](#), and Eligibility Requirement 11.

**Title IV Compliance**  
 [Regulation Citations: 602.16(a)(1)(v); 602.16(a)(1)(x); 602.19(b); 668.5; 668.15; 668.16; 668.71 et seq.]

The College has presented evidence on the required components of the Title IV Program, including findings from any audits and program or other review activities by the USDE.

- An independent certified public accounting firm annually audits the UH System’s financial statements. The UH Administrative Procedures outline internal control procedures ([I-15](#)).
- The auditing procedures provide objective third-party review of internal controls and procedures.
- The results and recommendations of the audit are presented to the BOR ([I-16](#)).
- Other major campus audits include the required Federal Compliance Audit or A-133, the Vocational Education Act Audit, the Financial Aid Audit, various legislative audits, and unscheduled and unannounced audits performed by the UH Office of the Internal Auditor.
- See responses to Standards [III.D.10](#), [III.D.15](#), and Eligibility Requirement 5.

The College has addressed any issues raised by the USDE as to financial responsibility requirements, program record-keeping, and so forth. If the College does not address issues in a timely manner, the College demonstrates it has the fiscal and administrative capacity to do so in the future and to retain compliance with Title IV requirements.

- The USDE has not identified any issues with the College’s financial responsibility.
- See responses to Standards [III.D.10](#), [III.D.15](#), and Eligibility Requirement 5.

The College’s student loan default rates are within the acceptable range defined by the USDE. The College undertakes remedial efforts when default rates near or meet a level outside the acceptable range.

- The College has a current student loan default rate of 16.5 percent, which is well below the 30 percent federal guideline threshold that would require the creation of a student loan default prevention task force and the subsequent development and

implementation of default prevention action plans ([I-54](#)).

- The College monitors its student loan default rates to ensure compliance with federal requirements.
- See responses to Standards [III.D.10](#), [III.D.15](#), and Eligibility Requirement 5.

Contractual relationships of the College to offer or receive educational, library, and support services meet the Accreditation Standards and have been approved by the Commission through substantive change if required.

- Contractual agreements are subject to various UH System policies and procedures. UH System staff provides oversight of the agreements, thereby ensuring that the College maintains its integrity in contractual agreements. Contracts are consistent with the College's mission statement and goals.
- The Library and learning support services certify, purchase, and maintain contractual agreements with other institutions to support student success.
- Administrative Services staff follow EP 8.200, Administrative Procedure (AP) 8.270, UHCCP #8.102A, Regents Policies in Chapter 8, and Administrative Procedures in Chapter 8 to ensure the review and approval of all contracts on multiple levels prior to implementation ([I-55](#), [I-56](#), [I-57](#), [I-58](#), [I-59](#)).
- See responses to Standards [III.D.10](#), [III.D.15](#), [III.D.16](#), and Eligibility Requirement 5.

The College demonstrates compliance with the Commission Policy on Contractual Relationships with Non-Regionally Accredited Organizations and the Policy on Institutional Compliance with Title IV.

- The College does not participate in any contractual relationship with a non-regionally accredited organization.
- See responses to Standards [III.D.10](#), [III.D.15](#), and Eligibility Requirement 5.

## **STANDARD I: MISSION, ACADEMIC QUALITY AND INSTITUTIONAL EFFECTIVENESS, AND INTEGRITY**

### **Student Spotlight Bernie Mack**

As a Native Hawaiian student, I found great success at Leeward Community College. In particular, Hālau 'Ike O Pu'uloa supported my academic journey as a Native Hawaiian. For example, they provided academic and career counseling services. In addition, Hālau 'Ike O Pu'uloa provided cultural enrichment workshops and activities, which allowed for hands-on immersion into Hawaiian culture. Finally, Hālau 'Ike O Pu'uloa provided me with membership into their Ke Ala 'Ike Native Hawaiian Achievement Program, which helped to support my academic success and achievement at Leeward CC.

## STANDARD I: MISSION, ACADEMIC QUALITY AND INSTITUTIONAL EFFECTIVENESS, AND INTEGRITY

*The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.*

### I.A. Mission

#### I.A.1.

*The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. (ER 6)*

### Evidence of Meeting the Standard

#### **Mission of Leeward Community College**

Leeward Community College (Leeward CC)'s mission presents the College's broad educational purposes, its intended student population, the types of degrees and credentials the College offers, and its commitment to student learning and achievement. Below is the College's mission statement and accompanying core values ([IA-1](#)). In alignment with the University of Hawai'i Community Colleges (UHCC)'s commitment to becoming a model indigenous-serving institution, the Leeward CC mission statement is presented in English and Hawaiian language.

#### **Mission Statement**

At Leeward Community College, we work together to nurture and inspire all students. We help them attain their goals through high-quality liberal arts and career and technical education. We foster students to become responsible global citizens locally, nationally, and internationally. We advance the educational goals of all students with a special commitment to Native Hawaiians.

#### **Ke Ala Nu'ukia**

Ma ke Kulanui Kaiāulu o 'Ewa, alu like mākou ma ka mālama a me ke kīpaipai i nā haumāna. Kōkua 'ia nā haumāna ma ka huli a loa'a kā lākou mau pahuhopu ma o nā polokalamu hana no'eau laulā a me nā polokalamu 'oihana pākōlea like 'ole. Paipai 'ia nā haumāna i ka lilo i hoa maka'āinana pono ma ke kaiāulu, ma ke aupuni, a ma ke kau'āina. Kāko'o 'ia nā pahuhopu ho'ona'auao a nā haumāna a pau me ke kūpa'a nō ho'i i nā 'ōiwi Hawai'i.

## **Core Values**

Community: We value cooperation, collaboration, social responsibility, and concern for others as crucial elements in building a sense of community inside and outside of the institution.

Diversity and Respect: We value individual differences and the contributions they bring to the learning process. We believe that our students are enriched through a diverse intellectual and social environment, where learning occurs through exposure to world cultures, and through interaction with peoples of diverse experiences, beliefs, and perspectives.

Integrity: We value personal and institutional integrity by fostering a culture of continuous improvement to open pathways to student success. We hold ourselves accountable for providing a high-quality academic experience.

Open Access: We value all students. We seek to meet their needs, as well as those of the community, by offering a diversity of courses, degree and certificate programs, and training opportunities, through traditional and distance education modes of delivery.

[\(IA-1\)](#)

## **Broad Educational Purposes and Commitment to Native Hawaiians**

The mission clearly defines the broad educational purposes of the College. The first sentence of the mission statement articulates the College's purpose to "nurture and inspire all students." The third sentence of the statement describes the College's purpose to "foster students to become responsible global citizens locally, nationally, and internationally."

The College's mission statement articulates its commitment to "advance the educational goals of all students with a special commitment to Native Hawaiians." This commitment is aligned with the University of Hawai'i (UH) System's Regents Policy (RP) 4.201, Mission and Purpose of the University. The policy states

As the only provider of public higher education in Hawai'i, the University embraces its unique responsibilities to the indigenous people in Hawai'i and to Hawai'i's indigenous language and culture. To fulfill this responsibility, the University ensures active support for the participation of Native Hawaiians at the University and supports vigorous programs of study and support for the Hawaiian language, history and culture. [\(IA-2\)](#)

RP 4.201 identifies that the UH System fulfills its commitment to Native Hawaiians in the following ways, which the College incorporates in its mission:

1. Support for programs and services for Native Hawaiians
2. Increased representation of Native Hawaiians
3. Full participation of Native Hawaiians in all initiatives and programs
4. Consultation from the Native Hawaiian community and specifically the Pūko'a Council, the system wide council of Native Hawaiian faculty, staff, and students that serves as advisory to the UH System president
5. The use of the Hawaiian language
6. Support for the study of Hawaiian language, culture, and history

7. Encouragement of Native Hawaiians to practice their language, culture, and other aspects of their traditional customary rights in Hawaiian environments and facilities.
8. Outreach for the education needs of Native Hawaiians, the state of Hawai‘i, and the world at large in the areas of Hawaiian language, culture, and history ([IA-2](#))

For further discussion of RP 4.201 and the UH System’s responsibility and commitment to the success of Native Hawaiian students, see Standard [IV.C.5](#).

Leeward’s commitment to Native Hawaiians is evident in the establishment of the Wai‘anae-Nānākuli Education Center in 1972. This center, which was relocated and renamed the Wai‘anae Moku Education Center in 2017, is located in the heart of the Wai‘anae coast where the highest percentage of Native Hawaiians reside within Leeward’s service area ([IA-3](#), [IA-4](#)). Based on data from the 2010 Census, Wai‘anae is 60.8 percent Native Hawaiian, and Nānākuli is 71.5 percent Native Hawaiian ([IA-5](#)). At the Pearl City campus, Leeward has focused efforts on improving Native Hawaiian attainment of degrees and certificates with the Hālau ‘Ike o Pu‘uloa (Hālau), the College’s Native Hawaiian student support program. The Hālau focuses on providing cultural and student support services to Native Hawaiian students and to any student interested in participating in the program ([IA-6](#)).

The College also fulfills its commitment to Native Hawaiians through the governance group Pūko‘a no na ‘Ewa Council (Nā ‘Ewa Council), which represents the College at the UH System’s Pūko‘a Council. The mission of Nā ‘Ewa Council is to “provide advocacy, leadership, and support for Native Hawaiians through higher education” ([IA-7](#)). An ad hoc committee of Nā ‘Ewa Council is focusing on ways to indigenize the College, including cultural training through the creation of a College oli (chant) ([IA-8](#)). For a detailed discussion of the role of the Nā ‘Ewa Council, see Standard [IV.A.1](#).

Finally, in support of its commitment to Native Hawaiians, the College has an Associate in Arts (AA) in Hawaiian Studies and an Academic Subject Certificate in Hawaiian Language to provide an opportunity for all students to pursue an instructional program with a focus on Native Hawaiian culture, history, and language.

### **Intended Student Population**

The College’s mission statement identifies its intended student population as “all students,” and the core value of “Open Access” clarifies the broad range of students the College serves. As a comprehensive community college, students who attend Leeward CC are recent high school graduates, students returning to college to improve workforce skills, nontraditional students entering higher education for the first time, students transitioning to college-level work, students advancing their education after fulfilling military service, and students pursuing career and technical advancement. The majority of Leeward students are Hawai‘i residents with other students originating from the U.S. continent and foreign countries.

The College mission is aligned with RP 4.201, which affirms that the UH System “is committed to diversity within and among all racial and ethnic groups served by public higher education” ([IA-2](#)). Ethnically, the College’s diverse student population includes Native Hawaiian (26.3 percent), Filipino (22.6 percent), other Asian (17.4 percent), mixed

ethnicities (15.5 percent), Caucasian (10.5 percent), other Pacific Islander (2.5 percent), and other ethnicities (5.0 percent) ([IA-9](#)).

The College has 26.3 percent Native Hawaiian students enrolled in its overall student population, reaching 1,913 students in fall 2016. The College educates the most Native Hawaiian students of the seven campuses in the UHCC System.

Distance education (DE) is another means by which the College broadens access for all students to enter quality educational programs. Currently, 23 percent of all students at the College enroll in at least one class (3 credits) each semester through this delivery mode ([IA-10](#)). The College expanded its DE course and program offerings as a means to serve students regardless of location and in support of those who cannot attend face-to-face classes. Students served through DE include working adults, parents with young children at home, students who live in outlying areas, and students with disabilities that prevent them from physically attending a campus. The College provides student support services online and face-to-face to ensure comparable access to needed services. See Standard [II.B.1](#) and [II.C.2](#) for more detailed information.

### **Types of Degrees, Certificates, and Credentials**

The College mission describes the types of degrees, certificates, and credentials the College offers, which are appropriate to a degree-granting institution of higher education. The second sentence of the mission statement specifies that the College provides “high-quality liberal arts and career and technical education.” These degrees and certificates are supported by the core values for integrity and open access.

The College’s mission statement is in accordance with RP 4.201, which mandates that all UHCC campuses “offer two-year college transfer and general education programs; two and four-year career and technical education programs; semiprofessional, career and technical, and continuing education programs, and such other educational programs and services appropriate to community colleges” ([IA-2](#)).

The College offers 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence. In fall 2016, 63.7 percent of its students were enrolled in transfer programs, and 25.8 percent were enrolled in career and technical education programs ([IA-11](#)).

Leeward began as a liberal arts college and expanded its general and pre-professional degrees to address student needs. In fall 2011, the College started an Associate in Science (AS) in Natural Science degree to support students interested in transferring into a Science, Technology, Engineering, and Math (STEM) major. In fall 2012, all of the UHCC campuses started an AA in Hawaiian Studies to support transfer of graduating students to the Hawaiian Studies programs at the four-year institutions.

Leeward has added several career and technical education (CTE) programs in direct response to community needs. These include the Associate in Science (AS) in Health Information Technology and the AS in Integrated Industrial Technology. Both programs seek to address anticipated workforce shortages in the state of Hawai‘i ([IA-12](#)). The College also addresses workforce demands through its noncredit offerings from the Office of Continuing Education and Workforce Development (OCEWD). Both the AS in Health Information Technology and

the AS in Integrated Industrial Technology programs began on the noncredit side. OCEWD quickly develops and offers noncredit programs in direct response to workforce demands. OCEWD also addresses short-term training needs in the health field including training for nurse aides and pharmacy technicians.

The mission statement articulates the College's commitment to fostering global citizens and is aligned with RP 4.201, which recognizes that the UH System is a "global leader and model" within a "unique geographical location" ([IA-2](#)). This commitment led the College to create the Academic Subject Certificates in Philippine Studies and Global Studies.

### **Commitment to Student Learning and Achievement**

The mission emphasizes the College's commitment to student learning and achievement. This commitment is demonstrated in the language of the mission statement: "we work together to nurture and inspire," "we help them attain their goals," and "we advance the education goals of all students with a special commitment to Native Hawaiians." This commitment is supported in the College's three institutional learning outcomes for critical thinking and problem solving; written, oral communication, and use of technology; and values, citizenship, and community ([IA-13](#)).

As part of its mission to focus on student learning and achievement, the College has identified three institutional learning outcomes (ILOs).

#### **Critical Thinking and Problem Solving**

Our graduates are able to examine, integrate, and evaluate the quality and appropriateness of ideas and information sources to solve problems and make decisions in real world situations.

#### **Written, Oral Communication and Use of Technology**

Our graduates are able to use written and oral communication and technology to discover, develop, and communicate creative and critical ideas, and to respond effectively to the spoken, written, and visual ideas of others in multiple environments.

#### **Values, Citizenship, and Community**

Our graduates, having diverse beliefs and cultures, are able to interact responsibly and ethically through their respect for others using collaboration and leadership. Our graduates are able to engage in and take responsibility for their learning to broaden perspectives, deepen understanding, and develop aesthetic appreciation and workforce skills.

These three ILOs encompass the seven general education learning outcomes and are critical components of all of the College's programs. Learning outcomes are discussed further in Standard [I.B.2](#).

### **Analysis and Evaluation**

The College's mission statement is clearly defined and describes its broad educational purposes, target student population, degrees and credentials offered, and commitment to student learning and achievement as appropriate for an open-door community college.

I.A.2.

*The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.*

### **Evidence of Meeting the Standard**

#### **College Mission and Program Review**

The College uses the program review process to determine how effectively it is accomplishing its mission. All instructional programs, educational units, and support areas at the College complete an Annual Report of Program Data (ARPD), or program review. The ARPD includes quantitative metrics, results of program learning outcomes, qualitative analysis, plans for future directions, and a list of resources required for the future needs of a program or unit. The College uses assessment results to assess how well a program is meeting the College mission. In addition, every program, educational unit, and support area is required to complete a Comprehensive Review and Evaluation (CRE) at least once every four years. The CRE requires that the program's mission is aligned with the College mission, vision, and values. For example, the Hālau's 2014-2016 CRE includes this statement:

Program Mission:

The primary function of Hālau 'Ike o Pu'uloa is to increase Native Hawaiian student success outcomes by providing a full array of services for our Native Hawaiian students and by sharing 'ike Hawai'i with all students so that Hawaiian culture and wellbeing will flourish in our homeland.

Our mission states, "The faculty, staff, and students of Hālau 'Ike o Pu'uloa direct our work and cultivate partnerships in ways that inspire excellence, promote growth, and advance opportunities for Native Hawaiians." ([IA-14](#))

The College also uses the program review process to demonstrate whether the mission directs institutional priorities in meeting the educational needs of its students. The final step in the program review process is the resource request list. The campus prioritizes items on the resource request lists and uses this prioritization to determine campus funding for the next academic year. For further discussion of the program review process, see Standard [I.B.5](#).

#### **College Mission and Strategic Plan Goals**

The College uses strategic planning to determine how effectively it is accomplishing its mission and institutional priorities. In 2015, the College revised its strategic plan to align with the *UHCC Strategic Directions 2015-2021*, which is further discussed in Standard [IV.D.5 \(IA-15\)](#). The resulting document is the College's *Strategic Plan 2015-2021 (IA-16)*. The plan contains five goals, which the College aligned with its mission:

- **Hawai'i Graduation Initiative:** Increasing enrollment and completion rates while reducing time to completion
- **Increase Enrollment of Target Populations:** Increasing enrollment and year-to-year retention of recent high school graduates, high school non-completers, General

Equivalency Diploma recipients, Pacific Islanders, working adults, and international students

- **Hawai'i Innovation Initiative:** Developing and delivering programs and training needed for a qualified workforce in existing and emerging careers
- **Modern Teaching and Learning Environments:** Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments
- **High Performance System of Higher Education:** Providing students with smooth transitions from K-12 through the community colleges to the baccalaureate institutions in a cost-effective manner

The College's *Strategic Plan 2015-2021* emphasizes its commitment to Native Hawaiian student success through enrollment, retention, and graduation ([IA-16](#)). Based on data from the UHCC System, the College has exceeded its goal in graduating Native Hawaiian students ([IA-17](#), [IA-18](#)). As part of this commitment, the College supports the Hālau using a combination of state resources, federal grants, community partnerships, and private donations. In addition to the College's responsibility to meet the educational goals of Native Hawaiian students, the *Strategic Plan 2015-2021* targets other student populations using data of recent high school graduates, high school non-completers, GED recipients, other Pacific Islander students, working adults, and international students ([IA-16](#), [IA-19](#)).

### **College Mission and Institution-Set Standards**

The College uses data to determine how well it is accomplishing its mission through the UHCC System's institution-set standards for student achievement ([IA-20](#)). The UH vice president for community colleges reviews the College's attainment of institution-set standards at a campus visit each semester. This review process assists campus administration with identifying institutional priorities for the coming year. For further discussion on the College's institution-set standards, see Standard [I.B.3](#).

### **Analysis and Evaluation**

The College collects and analyzes data on student achievement, student learning, and institutional outcomes in order to evaluate progress toward meeting its mission. The mission is at the heart of the College's planning process. The processes used to evaluate progress are grounded in the ARPD and in annual updates from the UHCC System office.

I.A.3.

*The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.*

### **Evidence of Meeting the Standard**

#### **Alignment of Mission with Programs and Services**

The College's programs and services are aligned with its mission. In support of the mission, "(w)e help them attain their goals through high-quality liberal arts and career and technical education." The College offers 15 associate degrees, comprising four transfer programs and 11 CTE programs. The transfer programs include the AA in Liberal Arts, the AA in

Teaching, the AA in Hawaiian Studies, and the AS in Natural Science. All four programs are articulated with four-year degree programs in the state of Hawai‘i with particular attention to ensure seamless transfer to the UH four-year campuses. The remaining 11 associate degree CTE programs target community needs for workforce demand. These career and technical education programs include Accounting, Automotive Technology, Business Technology, Culinary Arts, Digital Media, Health Information Technology, Integrated Industrial Technology, Information and Computer Science, Management, Plant Biology and Tropical Agriculture, and Television Production.

The Office of International Programs (OIP) is dedicated to facilitating “a greater appreciation of cross-cultural relations and international issues in order to assist the College with meeting its mission of fostering students to become responsible global citizens locally, nationally, and internationally” ([IA-21](#), [IA-22](#)). The OIP offers a range of programs to support students who want to study abroad, coordinates programs for visiting international groups, provides instruction for those needing English language preparation, and takes leadership roles in international initiatives on campus. The College also offers two academic subject certificates targeted to this section of the mission statement – Global Studies and Philippine Studies.

The College’s mission statement affirms, “We advance the educational goals of all students with a special commitment to Native Hawaiians.” To meet this goal the College provides specific support programs for the Native Hawaiian population through the Hālau, the Wai‘anae Moku Education Center, and the Ho‘oulu Project ([IA-6](#)). In 2015, the College established Kapunawai, the Hawai‘i Pacific Resource Room, in the Library as a dedicated Hawaiian place of learning. Kapunawai provides access to prominent Hawai‘i-Pacific resources within a multi-functional space ([IA-23](#)). The word kapunawai translates to “spring, well, fountain,” which guide the purpose and function for this space as a spring of inspiration, a well of resources, and a fountain of knowledge. Since 2015, a Title III grant (federal funding for Native Hawaiian serving institutions) has funded a Hawai‘i-Pacific resource librarian position, which allows the Library to provide dedicated on-site support and services. In terms of instructional programs, the College offers a Hawaiian Studies program and Hawaiian language courses ([IA-24](#), [IA-25](#)).

The Library strives to educate students, faculty, staff, and the public about a variety of social issues in order to accomplish the College mission and fulfill the ILOs on critical thinking, social responsibility, and global citizenship. For example, since 2014, the Library has partnered with the Educational Media Center to identify Open Educational Resources (OER) for faculty to review and to deliver training to faculty transitioning to open, no-cost, or affordable textbooks and other learning materials ([IA-26](#), [IA-27](#)). OER courses often rely on online resources, which means the students have access from any location as long as they have an internet connection. The institutionalization of OER is part of system and campus initiatives to reduce or eliminate the cost of textbooks for students ([IA-15](#), [IA-16](#)). In spring 2017, 279 classes had a “Textbook Cost: \$0” designation (23 percent of all classes offered), which benefited 5,121 students. To date, OER has saved Leeward students \$2,087,575 ([IA-28](#)).

### **Alignment of Mission with Decision-Making, Planning, and Budgeting**

The College mission guides decision-making, planning, and resource allocation. The College’s Integrated Planning and Budgeting Process for programs and services is driven by

the College mission and *Strategic Plan 2015-2021*. Figure 6 illustrates how the College mission and strategic plan are the beginning point for the creation of a program or unit and the ending point to measure a program’s or unit’s alignment.

## Integrated Planning and Budgeting Process

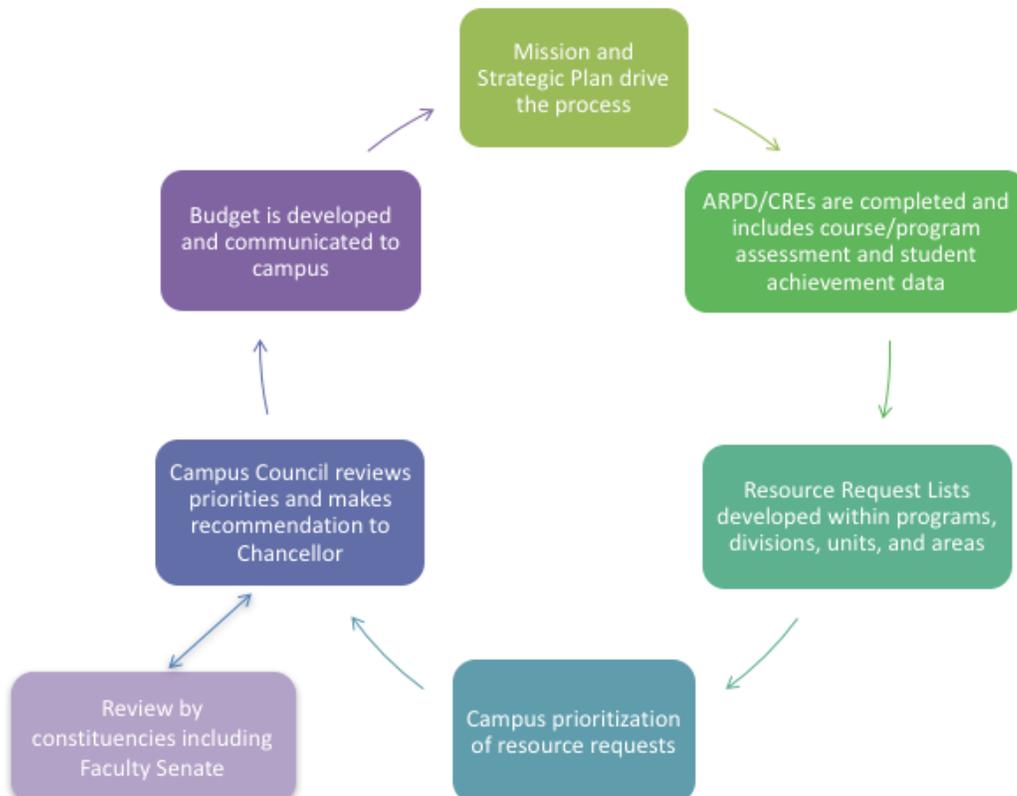

Figure 6. Integrated Planning and Budgeting Process.

The College mission informs institutional goals for student learning and achievement. An example of this alignment is the piloting and implementation of two programs to increase the retention rate of students taking pre-collegiate courses. In fall 2016, the Acceleration Initiative offered accelerated math and English courses to shorten students’ time at the pre-collegiate level and to encourage students to continue their studies while also reducing tuition fees. For further discussion of this initiative, see Standards [I.B.6](#) and [II.A.4](#).

### **Analysis and Evaluation**

The College’s Integrated Planning and Budgeting Process for programs and services is aligned with and driven by the College mission and *Strategic Plan 2015-2021*. Both the mission and strategic plan are the beginning point for the creation of a program and the ending point to measure a program or unit’s alignment. The College consistently strives to improve student learning and achievement through the planning and resource allocation of programs, pilot programs, and support services.

I.A.4.

*The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.*  
(ER 6)

### **Evidence of Meeting the Standard**

#### **Publication of Mission Statement**

The College articulates its mission in a widely-publicized mission statement approved by the UH Board of Regents (BOR) consistent with its legal authorization. The College's mission statement is posted in key locations on the Pearl City campus and at the Wai'anae Moku Education Center including classrooms, labs, high-traffic open spaces, and conference rooms. Additionally, the College publishes its mission statement in the Catalog and on the College website ([IA-1](#), [IA-29](#)).

#### **Review of Mission Statement**

The College periodically reviews its mission statement and updates it as necessary. The College reviews its mission statement in accordance with the College's L4.100, Policy on Institutional Mission, which calls for periodic review every six years ([IA-30](#)). This review period is shorter in duration than the suggested ten-year requirement of RP 4.201 ([IA-2](#)).

#### **Review Process**

In spring 2017, the chancellor tasked the Campus Council, which serves as the recommending and advisory group in matters relating to campus priorities, to facilitate a review of the College's mission statement because the council's membership is representative of the entire campus ([IA-31](#)). This review process was done as a "committee as a whole" where representatives solicited campus wide input. At the council's March 2017 meeting, the interim vice chancellor for academic affairs led a discussion on the mission statement and Accreditation Standard I.A.4. Based on stakeholder input and strategic priorities, the council unanimously approved the current mission without changes ([IA-32](#)). The Faculty Senate, which is the primary voice of faculty in academic governance, also reviewed the College's mission statement in spring 2017. This group did not have any changes but noted that the senate will participate in the next review of the College mission ([IA-33](#)). For a more detailed discussion of the role of the Campus Council and the Faculty Senate, see Standard [IV.A.1](#).

For the 2017 review, the Campus Council did not use data and assessment because the numbers for student achievement and student learning remained the same since the establishment of the *UHCC Strategic Directions 2015-2021* and the *Strategic Plan 2015-2021*, both of which occurred after the last mission review in 2012. The College will use data and assessment as part of its next comprehensive review process. Previously, the College took two years to complete a comprehensive review of its mission statement.

Since there were no changes to the language of the mission statement, the College did not need approval from the BOR. The board approved the mission statement that the College revised in 2012 ([IA-34](#)).

## **Analysis and Evaluation**

The College's L4.100, Policy on Institutional Mission, suggests a periodic review of the mission statement every six years. The College last reviewed the mission in 2017 and, after receiving input from the campus community, determined that the mission did not need to be changed. The College widely publicizes its mission statement through physical postings across the campus, in the Catalog, and on the College website.

Changes and Plans Arising Out of the Self-Evaluation for Standard I.A

Accreditation Standards	Change or Plan	College Leads	Timeline	Achieved or Expected Outcome
I.A.4	Reviewed the mission statement.	Campus Council and Faculty Senate	Spring 2017	The mission statement was reviewed and approved without changes.
I.A.4	Perform a comprehensive review of the mission statement.	Campus Council and Faculty Senate	Estimated Fall 2020	Use institutional assessment data and seek broad campus input to update the mission statement.

## I.B. Assuring Academic Quality and Institutional Effectiveness

### *Academic Quality*

#### I.B.1.

*The institution demonstrates a sustained, substantive and collegial dialogue about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.*

#### **Evidence of Meeting the Standard**

##### **Dialogue on Student Outcomes and Improvement of Student Learning and Achievement**

The College has structured dialogue about student outcomes through learning outcomes assessment at the course and program level in addition to the annual program review process. The College uses assessment data to evaluate student learning and student achievement. Analysis of assessment data helps the College to continuously improve programs and services. For instructional areas, dialogue on assessment results begins at the discipline and program level as part of course assessment discussions. Course assessment is an ongoing process, and faculty submit documentation of assessment results and plans by entering the information into Tk20, the campus assessment software. Programs also report on course assessment results and the impact on program outcomes as part of the annual program review process known as the Annual Report of Program Data (ARPD).

The Assessment Committee, a standing committee of the Faculty Senate, facilitates structured dialogue about student outcomes ([IB-1](#)). The committee reviews and makes recommendations to the Faculty Senate on policies and procedures relating to assessment such as the College's L5.210, Policy on Assessment, and the Prior Learning Assessment Manual. The committee has created an interactive PDF document that demonstrates the Integrated Planning and Budgeting Process and its relationship to assessment ([IB-2](#)). The committee works with the administration and the Office of Planning, Policy, and Assessment (OPPA) to facilitate the assessment process by conducting two Tk20 assessment workshops each month and establishing a culture of assessment through such efforts as the Assessment Think Tank ([IB-3](#), [IB-4](#)). The membership of the committee is made up of instructional division area representatives, support area representatives, and one nonvoting member from the administration or OPPA ([IB-5](#)).

The College has also been actively assessing its general education learning outcomes (GELOs) through a cross-disciplinary task force that reviews artifacts from a range of courses and evaluates the artifacts using a rubric. This group has had rich discussions on the student work and has used the results to improve its assessment process and refine the GELOs. For a more detailed discussion of the assessment of the College's GELOs, see Standard [II.A.3](#).

Support area units play a key role in institutional dialogue during the annual program review process by submitting their own ARPD. Support areas rely more heavily on student achievement data, but some areas use learning outcome data when appropriate. Constituents in each support area come together to discuss results, devise an action plan, and identify

resources needed for improvement. These discussions often lead to dialogue on institutional effectiveness. For more information on the ARPD, see Standard [I.B.4](#).

### **Dialogue on Student Equity and Improvement of Student Learning and Achievement**

The College engages in substantive dialogue about student equity in order to identify performance gaps and implement strategies to mitigate those gaps. Broad-based discussion on student equity often takes place at open forums. For example, starting in fall 2016, the vice chancellor for academic affairs (VCAA) held periodic Talk Story sessions (informal campus conversations) on student success topics such as the early alert and intervention system Maka'ala, the University of Hawai'i Community Colleges (UHCC) Student Success Pathways Framework, and the Guided Pathways and Exploratory Majors in order to explain these initiatives and obtain feedback from faculty and staff ([IB-6](#)).

In addition to discussing student equity through the ARPD, the College has made many strides to close the gap for underrepresented students with a variety of programs including the Hālau 'Ike O Pu'uloa (Hālau), the Pacific Islander summer cohort program, and focused efforts at the Wai'anae Moku Education Center.

The Wai'anae Moku Education Center participates in institutional discussions while also facilitating their own dialogue on similar issues at their location. Faculty and staff hold regular meetings to review how well students are performing and advocate for changes when needed. The faculty and staff also hold training events to address issues that are specific to the community they serve.

### **Dialogue on Academic Quality and Institutional Effectiveness**

The College engages in collegial dialogue about academic quality and institutional effectiveness through a variety of campus activities. The goal of these activities is to develop plans for improvement.

In fall 2016, the Faculty Senate provided feedback to improve the College's Integrated Planning and Budgeting Process and increase transparency ([IB-7](#)). As a result, the VCAA updates the campus on prioritized planning at each stage. These updates provide details regarding how a specific resource request is prioritized and where that request ends up on the final institutional priorities list. (For further discussion of the VCAAs updates, see Standard [IV.A.6](#).) Additionally, in spring 2017, the Campus Council reviewed the Integrated Planning and Budgeting Process and will make recommendations for improvement in 2017-2018.

Another campus event that provides an opportunity for dialogue on academic quality and institutional effectiveness is the campus forum with the University of Hawai'i (UH) vice president for community colleges (VPCC) each semester ([IB-8](#)). At this forum, the VPCC shares information on the College's progress towards institution-set standards and presents data on the College's initiatives and *Strategic Plan 2015-2021* ([IB-9](#), [IB-10](#), [IB-11](#)). Attendees can ask questions and make comments on the issues at hand. Additionally, constituent groups later meet to discuss the information provided by the VPCC and develop strategies for improvement. For further discussion of the VPCC's forums, see Standards [I.B.3](#) and [I.B.6](#).

Governance groups including the Campus Council, the Faculty Senate, the Pūko‘a no na ‘Ewa Council (Nā ‘Ewa Council), and the Student Government meet regularly to engage in collegial dialogue ([IB-12](#), [IB-13](#), [IB-14](#), [IB-15](#)). For example, as a standing committee of the Faculty Senate, the Distance Education (DE) Committee supports institutional dialogue about the continuous improvement of distance learner success. This committee serves as the primary voice on matters relating to DE. Its membership includes faculty and staff from instructional divisions, support area units, as well as the campus DE coordinator and an educational technologist ([IB-16](#)). In spring and fall 2017, the DE committee led well-attended breakout sessions at convocation to facilitate discussion of federal and Commission requirements regarding DE ([IB-17](#)).

For issues of interest to all campus constituents, the College holds a convocation at the beginning of each semester for faculty, staff, and administrators to discuss critical issues ([IB-18](#)). The College has adopted the practice of organizing focused breakout sessions after the general meeting so campus constituents can discuss topics that concern student learning and achievement, academic quality, and institutional effectiveness ([IB-19](#)).

At the convocation in spring 2018, the College sought broad campus input on essential topics that emerged from the draft of the Institutional Self-Evaluation Report ([IB-20](#)). Participants engaged in structured dialogue about how the College is meeting specific Accreditation Standards and Eligibility Requirements and how the College can improve in those areas ([IB-21](#)). Table 45 lists the roundtable discussion topics and corresponding references to the Accreditation Standards and Eligibility Requirements.

Table 45.  
*Spring 2018 Convocation Table Discussions*

<b>Roundtable Discussion Topic</b>	<b>Accreditation Standard and Eligibility Requirement (ER)</b>
Dialogue and Continuous Improvement	I.B.1
Campus Communication and Priorities	I.B.8
Integrated Planning and Budgeting Process	I.B.9
Mission and Instructional Programs	II.A.1 and ER 9
Faculty and Curriculum Development	II.A.2
Course and Program Assessment	II.A.3
Library and Learning Support Services	II.B.1 and ER 17
Mission and Support Services	II.B.2, II.C.1, and ER 15
Library and Learning Support Services Program Review	II.B.3

Student Support Services Program Review	II.C.1 and ER 15
Student Support Services	II.C.2
Shared Governance	IV.A.5
Campus Communication and Decision-Making	IV.A.6

Of those participants who evaluated this convocation (n=118), 100 percent agreed that the roundtable discussions were productive (IB-22). Among the comments received were the following:

- “I like the opportunity to discuss and learn from other faculty and administrators across campus.”
- “I enjoyed the breakout sessions. It was great hearing from other departments/units.”
- “I learned a lot at the breakout sessions. Very interesting to hear comments from each individual.”

Meaningful, productive dialogue occurs when administrators, division chairs, unit heads, and other campus leaders meet for retreats. In February 2013, campus leaders held a retreat to review the planning process and made suggestions for improvement (IB-23). Campus leaders held a retreat in July 2013 to focus on using data to support resource requests and to determine how the College was performing in areas of financial health and academic achievement (IB-24). Leaders held a retreat in July 2014 to discuss and evaluate the Student Success Committee, which was created in 2010 (IB-25). In July 2015, the Leadership Excellence program designed a summit to strengthen campus leadership (IB-26). In August 2017, a leadership retreat focused on “The Student Experience” at the College (IB-27).

### **Analysis and Evaluation**

The College engages in a wide variety of ongoing, meaningful dialog on student outcomes, student equity, academic quality, institutional effectiveness, and the improvement of student learning and achievement through a variety of methods including convocations, retreats, information sessions, governance groups, and the ARPD.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about institutional dialogue and continuous improvement at the College. Participants discussed how the College meets Standard I.B.1 and how the College can improve in these areas. They said that the College provides numerous opportunities for dialogue including convocations, division meetings, and professional development opportunities like the Excellence in Education conference and Teaching Squares. Faculty are enthused about the idea of further opportunities for dialoguing and provided several suggestions for how to add opportunities for dialogue (IB-21).

I.B.2.

***The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)***

## Evidence of Meeting the Standard

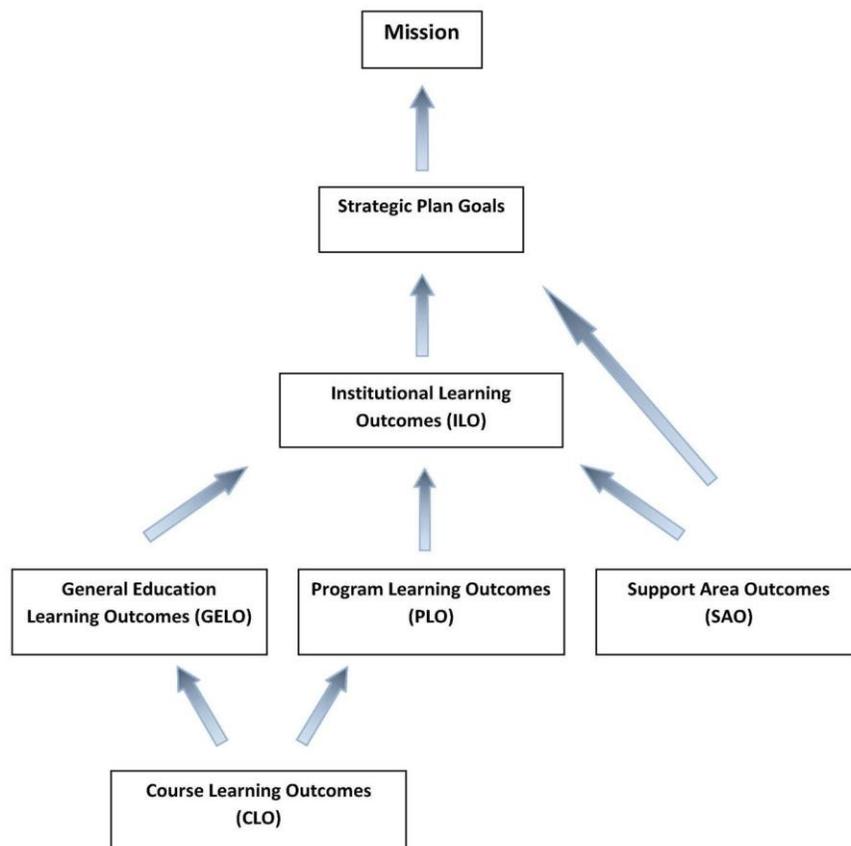

### **Mapping of Learning Outcomes**

At the College, learning outcomes are organized into a hierarchy in order to map the College mission, *Strategic Plan 2015-2021*, and levels of learning outcomes. At the course level, faculty teaching a course develop its course learning outcomes (CLOs) to identify what students are expected to learn by the end of the course.

CLOs align with program learning outcomes (PLOs) and GELOs. Program faculty define the PLOs, which identify what students are expected to learn by the completion of the program. CLOs support the attainment of PLOs. A small group of faculty representing the specific learning outcome developed the GELOs; the GELOs have been revised since their origination.

Support areas develop support area outcomes (SAOs) that are specific to the area. Support areas may also develop learning outcomes if appropriate. SAOs will align with institutional learning outcomes (ILOs) if they are learning outcomes. SAOs that are learning outcomes, PLOs, and GELOs support the attainment of ILOs.

The alignment model continues with learning outcomes and SAOs supporting the strategic plan goals and the College mission.

*Figure 7. Mapping of learning outcomes.*

As Figure 7 illustrates, assessment of learning outcomes is performed at both the course and the program level. Through curriculum maps located in the assessment reporting software Tk20, individual CLOs are linked directly to PLOs. The College publishes in the Catalog each program's expected learning outcomes and any program-specific achievement outcomes. GELOs are assessed at the program level and are linked to the College's mission statement, the *Strategic Plan 2015-2021*, and the *UHCC Strategic Directions 2015-2021*.

### **Institutional Learning Outcomes and General Education Learning Outcomes**

The College developed ILOs in 2009 as summary learning outcomes of the skills representing the GELOs. The College soon after wrote overarching GELOs to encompass the required skills for each individual outcome. The Assessment Committee has been considering the removal of the ILOs in favor of using the GELOs to represent both learning outcomes for general education and the institution since Leeward is a community college and requires GELOs in all degree programs. This discussion is ongoing. In current practice, the faculty are assessing and evaluating the GELOs on an ongoing basis with the understanding that the GELOs further align with the ILOs.

The College annually reports on its GELOs in the ARPD that is posted online ([IB-28](#)). The Faculty Senate discusses the assessment results of the GELOs and recently made some recommendations regarding a further refinement of the outcome language that will be updated in the *Catalog 2019-2020*.

### **Instructional Course and Program Learning Outcomes**

Faculty work together to establish clear, measurable outcomes of student learning for all courses and programs including credit and noncredit instruction. All learning outcomes undergo systematic, ongoing assessment in both face-to-face and DE delivery modes. Through assessment, the College demonstrates that students who complete programs, no matter where or how they are offered, achieve the identified outcomes ([IB-29](#)).

Faculty enter learning outcome statements into the Quali Student Curriculum Management database where they go through an approval process. The Curriculum Committee, the Faculty Senate, and administration review and approve learning outcomes as part of a formal five-year curriculum review and revision process. This process allows for widespread dialogue to provide input on needed changes to improve student learning ([IB-30](#)). For further discussion of the curriculum review and revision process, see Standard [II.A.2](#).

Outcomes assessment is the basis for regular evaluation of all courses and programs. The Assessment Committee's division area representative is responsible for running a multi-year report in Tk20 to determine which courses need to be assessed in his or her division ([IB-31](#)). For each learning outcome statement, instructional faculty from their respective division enter into Tk20 the measures to assess that learning outcome, the criteria for success, assessment results, recommendations, and actions for improvement ([IB-32](#)).

Faculty use the results of course assessment, which are mapped to PLOs in Tk20 and integrated into program review, to analyze the strengths and weaknesses of a course or program. Subsequently, faculty create an action plan and a resource request list based on the needs of a course or program, and then they use the plan and list to make improvements.

Program review often leads to improvements in courses and programs. For example, faculty in the Associate in Arts (AA) in Teaching program assessed the PLO on lesson planning in multiple education courses using signature assignments as an assessment strategy and instrument. Seventy percent of students in the program needed to reach developing proficiency on all signature assignments in order to meet the program's expected level of achievement. Assessment results indicated that 80 percent of face-to-face students scored 70 percent or above, and 75 percent of DE students scored 70 percent or above ([IB-33](#)). Although 70 percent of education majors met the developing proficiency for this PLO, Teacher Education faculty discussed strategies to make lesson planning more consistent among the various courses. They identified common elements in lesson planning and agreed to create a standardized template. The intent was to have students spend less time focusing on technical aspects and more time on creating effective, engaging lessons.

The Office of Continuing Education and Workforce Development (OCEWD) offers noncredit courses and short-term programs that address community workforce needs and provide training in high demand areas. Certificate programs have defined program learning outcomes that OCEWD faculty regularly assess to ensure program effectiveness.

### **Learning Support Services and Student Support Services Outcomes**

Learning support services and student support services define and assess learning outcomes. At the College, support services consist of Academic Services areas, Student Services areas, Administrative Services areas, and Institutional Support areas. The College also has four educational units: International Programs, the Native Hawaiian Student Support Programs, the Office of Continuing Education and Workforce Development, and the Wai'anae Moku Education Center.

All units in the Academic Services and Student Services areas have SAOs, and some units such as the Library, the Learning Resource Center, and the Writing Center have CLOs. The units regularly assess the learning outcomes using qualitative and quantitative data ([IB-31](#)). Each unit uses assessment results to determine how well the unit is meeting its expectations and then develops action plans. Units include plans that have the highest priority in resource requests. The College allocates funding to maintain effective support or make improvements. See Standards [II.B.3](#) and [II.C.2](#) for more information.

Outcome evaluation has led to improvements in support services. For example, the Student Services area included as a priority a resource request for 12 student assistants to help meet unit goals and maintain services, and this request was one of the top institutional priorities to receive funding in 2016-2017 ([IB-34](#), [IB-35](#), [IB-36](#)).

### **Analysis and Evaluation**

The College has defined standards for student achievement and regularly assess its performance against those standards. Each credit and noncredit instructional course has clear and measurable learning outcomes at the course and program level regardless of delivery method. All Academic Services and Student Services units have regularly assessed PLOs, SAOs, or CLOs.

### I.B.3.

*The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information. (ER 11)*

#### **Evidence of Meeting the Standard**

##### **Establishment of Institution-Set Standards**

The UHCC System established the College's eight institution-set standards for student achievement including course completion, program completion, job placement rates, and key metrics used in the U.S. Department of Education (USDE) College Scorecard. These standards align with UHCC Policy (UHCCP) 4.203 on Institution-Set Standards, the *UHCC Strategic Directions 2015-2021*, the College's mission statement, and the College's *Strategic Plan 2015-2021* ([IB-37](#), [IB-38](#), [IB-39](#)). The College uses ongoing assessment to assess how well it is achieving these standards.

Each institution-set standard has a minimum level of achievement and an aspirational target for improvement. Aspirational targets are aligned with the *UHCC Strategic Directions 2015-2021*. The institution-set standards as defined in UHCCP 4.203 are

1. Course Completion
2. Degrees and Certificates Awarded
3. Degrees and Certificates Awarded to Native Hawaiian Students
4. Federal Pell Grant Recipient Degrees and Certificates Awarded
5. Transfer to Baccalaureate Institutions
6. Integrated Postsecondary Education Data System Student Success Rate
7. Licensure and Certification Examination Success Rate
8. Job Placement Rate

These metrics both monitor and challenge institutional performance. The UHCC System office established these metrics using historical performance data to set the benchmarks and the strategic plan goals for aspirational targets. Some of the institution-set standards developed out of the performance funding initiative that the UHCC System implemented in 2010. (Note: The College does not offer licensure or certification examinations.)

Leeward has not set college-specific institution-set standards; however, the College does set College goals. In 2017-2018, the College goal, or Wildly Important Goal (WIG), was to increase student retention and persistence by ten percent over the previous year. This goal is also known as "Keeping the Students We Have" and is the focus for the year's theme of "The Student Experience." For example, the WIG's #IGotClass initiative in fall 2017 encouraged students to register before the end of the semester, and in one month the campus community encouraged and assisted more than 3,100 students to register for spring 2018 ([IB-40](#), [IB-41](#)). In spring 2018, the College formed the sixteen-member WIG Design Team consisting of counselors, administrators, faculty, and staff. The team's first task was to gain a better understanding of how and where the College loses students and then develop an integrated network of people, policies, processes, and practices that will increase retention and persistence ([IB-42](#)). The College also held a professional development event, the Wildly Important Gathering, in March 2018 ([IB-43](#), [IB-44](#), [IB-45](#)). For further discussion of the WIG implementation, refer to the College's [Quality Focus Essay](#).

### Assessment of Student Performance against Institution-Set Standards

The College annually reviews student-achievement data to assess performance against its institution-set standards. The College reports this data to the Accrediting Commission for Community and Junior Colleges (ACCJC) in its annual report (IB-46). The UH Office of the Vice President for Community Colleges (OVPCC) produces an annual update of the baseline values and aspirational goals of the institution-set standards set within the *UHCC Strategic Directions 2015-2021*. The VPCC shares the results with the campus during an annual fall semester visit (IB-9, IB-11).

To ensure that the campus community has a broad understanding of the institution-set standards and their outcomes, the College publishes the VPCC’s presentation in the Bulletin on the College intranet (IB-47). The UH System has similar measures as part of the UH performance-based funding initiative and annually publishes information on how well the College is achieving the performance-based funding metrics on the Hawai‘i Graduation Initiative website (IB-48).

The institution-set standards developed out of the requirements for reporting to ACCJC in the Annual Report and the UHCC performance-based funding metrics that have been in place for over six years. Four of the institution-set standards are performance-based funding metrics including associate degrees and certificates of achievement awarded, Native Hawaiian degrees and certificates awarded, Federal Pell Grant recipient degrees and certificates awarded, and transfer to baccalaureate institutions. Table 46 identifies the UHCC Performance-Based Funding Metrics.

Table 46.  
*UHCC Performance-Based Funding Metrics*

UHCC Performance-Based Funding Metrics	Weight Percentage
Graduates (Associate Degrees and Certificates of Achievement)	35%
Native Hawaiian Graduates (Associate Degrees and Certificates of Achievement)	10%
Science, Technology, Engineering, and Math (STEM) Graduates (UHCC Associate Degrees and Certificates of Achievement and UH STEM baccalaureate graduates)	10%
Federal Pell Grant Graduates (Associate Degrees and Certificates of Achievement)	10%
Annual Transfers to Baccalaureate Colleges	35%

The performance-based funding metrics are based on the strategic plan goals.

### **Continuous Improvement to Achieve or Exceed Institution-Set Standards**

There is a broad-based understanding of the College's priorities and actions to achieve or exceed its institution-set standards. When the College does not meet its own standard, it establishes and implements plans for improvement that will enable it to reach that standard. Assessment results of the College's level of achievement for each institution-set standard in 2016 show that the College surpassed all of the baseline values set by the UHCC System. Furthermore, the College exceeded four out of eight aspirational targets. For a summary of data, see the [Presentation of Institution-Set Standards and Student Achievement Data](#).

### **Analysis and Evaluation**

The UHCC System established the College's eight institution-set standards based on the *UHCC Strategic Directions 2015-2021*, and these standards are aligned with the College's *Strategic Plan 2015-2021* and mission. In pursuit of continuous improvement, each standard has baseline and target values, which the College annually assesses, shares with the campus community, and publishes on the college and system websites.

I.B.4.

*The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.*

### **Evidence of Meeting the Standard**

#### **Use of Data and Processes to Support and Improve Student Learning and Achievement**

Assessment data drives campus planning to support and improve student learning and achievement. The CLO/SAO assessment template includes the following directions for reporting assessment data in Tk20:

1. **Outcome:** Choose ONE course learning outcome (CLO) or support area outcome (SAO) that you want to assess and analyze.
2. **Measure(s):** List an assessment or assignment that measures the outcome.
3. **Measure Type:** Is the measure direct or indirect? Is the measure scored with a rubric or answer key? How many students assessed? Does number of students represent all students or a sample?
4. **Criteria for Success:** List the criteria for what you would consider success on the assessment. Provide breakdown of points or grades for assessment (or assignment).
5. **Results:** List the overall results. List the breakdown of the results.
6. **Analysis/Action:** Analyze the results and describe any specific actions or teaching strategies that you will implement in the future (if any) to increase success on this particular assignment. List any resources that you will need to support that implementation (if any). ([IB-32](#))

At the program level, the College's ARPD template requires data and analysis. Along with the ARPD, planning and budgeting documents include the Resource Request List, Comprehensive Review and Evaluation (CRE), and the Institutional Effectiveness Report

([IB-49](#)). These documents include data related to the achievement of CLOs, PLOs, and SAOs. For a detailed discussion of the Integrated Planning and Budgeting Process, see Standard [I.B.5](#).

### **Analysis and Evaluation**

Program coordinators and unit heads use CLO and SAO assessment data as part of their program review process to support student learning and achievement. The CLO/SAO assessment template and the ARPD program review template require data and analysis. The College's annual Integrated Planning and Budgeting Process uses a wide variety of assessment data to support student learning and achievement. This process is well defined and clearly organized.

### ***Institutional Effectiveness***

I.B.5.

*The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.*

### **Evidence of Meeting the Standard**

#### **Program Review Process and College Mission**

The College uses program review to assess how well its programs and services accomplish the College mission. In the ARPD template, qualitative analyses require that the program, area, or unit reflect on how its previous year's action plan and current action plan align with the College mission and strategic plan goals ([IB-50](#)). The CRE template requires that the program, area, or unit provide an overview analysis that includes a discussion of how its mission is aligned with the College mission. The CRE template also requires that the program, area, or unit explains how its action plans and resource requests are aligned with the College mission ([IB-51](#)).

The College also assesses the accomplishment of its mission through the evaluation of its strategic plan goals and institution-set standards as discussed in Standards [I.A.2](#) and [I.B.3](#), respectively.

#### **Role of Program Review in Planning and Budgeting**

The College has an integrated planning and budgeting process that collects input from all campus levels. The program review process starts at the program, area, or unit level when faculty and staff review and evaluate data metrics and other assessment information. They collaborate on an analysis and evaluation of the data in order to make recommendations for improvement. If faculty and staff determine a need for additional resources, they make the requests at the program, area, or unit level. Higher levels, including instructional or unit heads, the administration team, Campus Council, and Faculty Senate, review and prioritize the resource requests until they develop a final institutional priority list, which they recommend to the chancellor. This entire cycle is called the College's Integrated Planning and Budgeting Process; its development is discussed in Standard [I.B.9](#).

Planning and budgeting documents include the following items:

- **Annual Report of Program Data (ARPD).** Each academic program, educational unit, and support area annually completes a program review. The ARPD is the central planning document for the campus.
- **Resource Implications Template (Resource Request List).** Each academic program, educational unit, and support area annually completes the template to request resources.
- **Comprehensive Review and Evaluation (CRE).** Every four years, each academic program, educational unit, and support area completes a CRE.
- **Institutional Effectiveness Report.** Every four years, the College produces an institutional effectiveness review.

*Annual Report of Program Data (ARPD)*

Each academic program, educational unit, and support area annually completes an ARPD and submits it to the OPPA. The ARPD template requires the following fields of information:

Program/Area/Unit Description  
Part I. Quantitative Indicators  
Part II. Analysis of Program/Area/Unit  
Part III. Action Plan  
Part IV. Resource Implications  
Program/Area/Unit Outcomes and Assessment ([IB-52](#))

The ARPD template includes a section of achievement data for programs, units, and areas based on quantitative indicators for demand, efficiency, and effectiveness. These indicators receive scores of “healthy,” “cautionary,” and “unhealthy,” which the UHCC Health Call Scoring Rubric defines ([IB-53](#)).

Each program, unit, or area is expected to analyze the quantitative data by providing qualitative written data of approximately four pages in length. Part II of the ARPD requires a written analysis of the quantitative indicators. Part III requires a written narrative identifying the actions plans that will be pursued in the next year. Part IV requires a brief summary of the resources needed to implement these action plans ([IB-52](#)). If a program has PLOs, there is additional reporting of assessment results. The final section of the template provides an opportunity for the program, unit, or area to discuss future plans and needed resources.

*Resource Implications Template (Resource Request List)*

Each academic program, educational unit, and support area completes a resource implications template that lists prioritized resource needs ([IB-54](#)). Each instructional division completes a resource implications template to incorporate resources needed that are not identified by a program.

Prioritization occurs by vote and within each overarching area. For instructional prioritization, voting representatives at the prioritization meeting include one representative from each of the six instructional divisions, the Wai‘anae Moku Education Center coordinator, the Native Hawaiian student support program coordinator, and the OCEWD

program coordinator. Each representative has one vote for determining the priorities for instruction. For non-instructional prioritization, voting representatives are the unit heads for each of the Academic Services, Student Services, and Administrative Services units. Each representative has one vote for determining the priorities for services.

Once all overarching areas have prioritized their resource request lists, administration makes an institutional resource request list and provides a draft of the list to the Campus Council and the Faculty Senate for review. Representatives of these governance groups take the draft to their constituencies for review and comment. The Campus Council makes a final recommendation to the chancellor regarding resource request items on the final resource request list.

#### *Comprehensive Review and Evaluation (CRE)*

Each academic program, educational unit, and support area completes a CRE at least once every four years on a staggered schedule ([IB-51](#)). The CRE identifies long-term goals that can be used to direct efforts and create action plans. This requirement ensures that the College meets UHCCP 5.202, Review of Established Programs ([IB-55](#)). A program, unit, or area completing a CRE does not complete an additional ARPD, as ARPD elements are included in the CRE. The College reviews all CREs, which provide information on how well programs, units, and areas are meeting the College mission and strategic plan.

#### *Institutional Effectiveness Report*

The approved planning process includes the publication of the Institutional Effectiveness Report every fourth year. The 2017-2018 Institutional Effectiveness Report is a comprehensive report that examines the College's progress towards meeting institutional goals and the overall impact of plans made within instructional programs, educational units, and support areas. This report provides the College with an opportunity to determine how it is progressing. In the 2017-2018 report, the College evaluated its progress in increasing enrollment for Pacific Islander students, international students, dually enrolled students, and DE students ([IB-42](#)). Administration reviews the report and identifies areas to target in the coming years. This report is under review as part of the Ad Hoc Planning and Budgeting Process Review committee.

#### **Use of Disaggregated Data by Program Type and Delivery Mode**

The OVPCC disaggregates data for each program's ARPD by major for Native Hawaiian students, full-time students, and part-time students; by enrollment trends; by persistence, success, and retention rates; by degrees and certificates awarded; and by delivery mode. Program faculty analyze these factors in the ARPD.

To expand on quantitative data, faculty and staff use the narrative responses in the ARPD as qualitative data and analyze relevant information for each program. The OPPA provides qualitative feedback to faculty and staff during the ARPD process so they can make modifications before final submission.

If applicable, the ARPD can include data on DE, Perkins funding, and performance funding. In addition, the ARPD integrates assessment of PLOs. Through the ARPD, faculty and staff use disaggregated data to analyze a program, develop an action plan to implement modifications, and request resources to make improvements.

In addition to the ARPD, the College uses longitudinal student achievement data to assess how well it fulfills its mission. A more detailed discussion about the use of disaggregated data is in Standard [I.B.6](#).

### **Analysis and Evaluation**

The ARPD is the main planning and assessment document used to accomplish the College mission. Each academic program, educational unit, and support area completes the ARPD, which includes program review and evaluation of goals and objectives, learning outcomes, and student achievement data. Each program's ARPD, where applicable, is disaggregated by major for Native Hawaiian, full-time, and part-time students; enrollment trends; persistence, success, and retention rates; degrees and certificates awarded; delivery mode, Perkins funding; and performance funding. To expand on quantitative data, faculty and staff use the narrative responses in the ARPD as qualitative data. In addition to the ARPD, the College uses longitudinal student achievement data to assess how well it fulfills its mission.

I.B.6.

*The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.*

### **Evidence of Meeting the Standard**

#### **Use of Disaggregated Data for Student Subpopulations**

In coordination with the UHCC System, the College disaggregates and analyzes learning outcomes and student achievement data for specific student populations. When the College identifies performance gaps, it implements strategies and may allocate resources to mitigate those gaps. As part of continuous improvement, the College evaluates the effectiveness of those strategies.

The UHCC System has identified performance gaps for Federal Pell Grant recipients and three underrepresented student populations, which are Native Hawaiian, Filipino, and Pacific Islander ([IB-38](#), [IB-9](#)). The College uses disaggregated student achievement data to evaluate these student populations. For the past three semesters, data results for each of these student populations have remained consistent in terms of retention rate, persistence rate, and successful completion rate ([IB-56](#)).

The College uses disaggregated data to better understand where achievement gaps exist and to subsequently develop action plans. Instructional programs include action plans in the ARPD, which also includes disaggregated data. The College utilizes the Institutional Effectiveness Report to highlight equity gaps ([IB-42](#)). Administration uses this report to identify areas to focus on in the upcoming years. For further discussion of the Planning Process Effective Review, see Standard [I.C.5](#).

## **UHCC System Initiatives for Student Subpopulations**

To monitor performance gaps for underrepresented students and enhance the graduation rate for all students, the UHCC System coordinates efforts at all seven community college campuses. The two primary initiatives implemented in 2016-2017 were the Acceleration Initiative and the Student Success Pathway framework.

### *Acceleration Initiative*

At the College, pilot projects to accelerate students through remedial/developmental courses have been ongoing for several years. The UHCC System provided funding in 2016-2017 and 2017-2018 to all the campuses to support the scaling up of these pilot projects. For the Acceleration Initiative, remedial/developmental math and English faculty shortened the course sequence and adopted a co-requisite model to expedite students through developmental courses within one year. In 2015, the College funded requests for equipment, learning support, and professional development, which the developmental math and English ARPDs identified in the resource implications section ([IB-57](#), [IB-58](#), [IB-59](#)). In fall 2016, developmental math and English faculty fully implemented co-requisite courses in which students enroll in one level below a college-level math or English course with a college-level math or English course in the same semester.

For math, three different tracks (College Algebra, College Math, and Quantitative Methods) with co-requisite courses reduce students' time through graduation. Students in the College Math track who are placed two levels below a college-level math course are given the opportunity to complete a college-level math course with no additional cost. In 2016-2017, over 25 percent of students who placed two levels below college-level math completed a college-level math course in one semester rather than two semesters ([IB-60](#)).

For English, the Accelerated Learning Program provides support for students who place one step below a college-level English course through concurrent enrollment in English 22 (Introduction to Composition) and English 100 (Composition I). Students who place two steps below college level may enroll in English 24 (Reading, Reasoning, and Writing) or English 24C for career and technical students. Whereas students who place at the lowest level previously needed to take and pass up to six courses prior to enrolling in college-level English, the course sequence in place facilitates acceleration and success. Students placing at the lowest level can complete English 100 within one year if they pass English 24 and English 100. For more discussion of this initiative, see Standard [II.A.4](#).

### *Student Success Pathway Framework*

To increase student retention and help eliminate identified performance gaps, the College implemented the UHCC Student Success Pathway framework, which is designed as a clear and structured pathway from point of entrance through graduation to transfer and career. The UH System developed and implemented STAR (brand name), which is a web-based tool designed to assist students stay on track to graduation. Students, counselors, and faculty use STAR to help students achieve academic goals in a timely manner. A recent addition to STAR is STAR Guided Pathway Selection (GPS) Registration, which shows students the courses they need to take in their program of study each semester until graduation. STAR GPS also helps prevent students from taking unnecessary courses that delay graduation and incur additional costs. For a more detailed discussion of the pathway framework, see Standard [II.C.6](#).

### **Campus Initiatives for Student Subpopulations**

In addition to UHCC System initiatives, numerous efforts are in place at the College to monitor performance gaps for Native Hawaiian, Filipino, and other Pacific Islander students and Federal Pell Grant recipients.

To support Native Hawaiian students, the College has operated an education center in Wai‘anae since 1972. The Wai‘anae Moku Education Center has embraced the Native Hawaiian culture through its curriculum, programs, mission statement, and community groups. In addition, the Wai‘anae Moku Education Center created the Going to Finish On-Time program for students who aspire to graduate within two to three years with an associate degree. This program offers academic, personal, and financial support for students who want to commit to full-time status in order to graduate on time. In addition, the UH Foundation-sponsored Access to Education program, which is discussed in Standards [II.A.7](#) and [II.C.3](#), also serves this student subpopulation.

The College also created the Hālau with the main goal of eliminating academic achievement gaps among Native Hawaiians. The College received numerous grants to assist in these goals and established the Hālau on the Pearl City campus, where Native Hawaiian students benefit from a variety of support services, learning tools, study space, welcoming and nurturing staff, and peer engagement. The Hālau coordinates the Lanakila First-Year Cohort, the Ho‘oulu Career Development program, and the Native Hawaiian STEM Scholars program ([IB-61](#), [IB-62](#), [IB-63](#), [IB-64](#)). Additionally, as a means of increasing graduation rates, the program developed the Native Hawaiian Excellence program, Ke Ala ‘Ike, to inspire Native Hawaiians and all those who embrace the Hawaiian culture to commit personal excellence toward their academic and cultural pursuits ([IB-65](#)). Since its inception, Ke Ala ‘Ike has been collaboratively managed and improved by faculty from many disciplines who all share the goal of eliminating academic achievement gaps among Native Hawaiians. At the commencement exercises in May 2017, 20 students earned their Ke Ala ‘Ike Scholars kīhei ([IB-66](#)). The College actively recruits Wai‘anae Moku students into Ke Ala ‘Ike demonstrating a coordination between the Pearl City campus and the Wai‘anae Moku Education Center in assisting Native Hawaiian students.

To increase the success of Filipino students, Philippines studies faculty applied for and received grants that led to the creation of the Dap-ayan room. The indigenous Cordillera word *dap-ayan* refers to a place where community members can meet, learn, and resolve issues and conflicts. This room, which is equipped with computers, printers, and supplies, is critical for students of Filipino descent to come together and build rapport.

Additionally, the College has had a memorandum of agreement with Waipahu High School to provide Early College classes. This school’s student body is 67.8 percent Filipino (and 8.4 percent Native Hawaiian and 14.0 percent other Pacific Islander) ([IB-67](#)). In fall 2017, 142 Waipahu High School students enrolled in the College’s Early College classes. One of these students was the first Early College student in the state of Hawai‘i to complete her associate degree before graduating from high school ([IB-68](#)). In spring 2018, the College inducted 28 of Waipahu High School’s Early College students into its Phi Theta Kappa chapter ([IB-69](#)).

In summer 2016, the College developed a summer cohort for Pacific Islander students. As a cohort, 14 students enrolled in Philosophy 110 while receiving additional support from peer mentors in the class. All these students continued at Leeward during 2016-2017 and received additional support that included working with the Writing Center; having use of a campus-purchased laptop through the spring semester; and having a faculty advisor, a club advisor, and a student support advisor available.

In summer 2017, the College organized another summer bridge opportunity for 21 Pacific Islander students. This summer bridge program enrolled students in Learning Skills 110 (College Success Strategies). This course included brush-up work in math and English, exposure to Pacific Island history, and development of college success skills. These students became acquainted with the College and its services, explored career options, and met with a designated counselor to plan their academic paths. The College purchased additional laptops for these students to use during the fall semester. If the program is successful, the College will continue to allocate funds for this program ([IB-70](#)).

To increase the number of students who receive financial aid, especially Federal Pell Grant recipients, the College's Financial Aid office reviewed its current financial aid process and is working with the Banner Central financial aid lead, the UH System's four-year schools, and fellow UHCC campuses to create best practices and simplify the financial aid process. This office has also been instrumental in providing training to student employees at the Wai'anae Moku Education Center to assist students to complete the Free Application for Federal Student Aid application. In 2017-2018, the UHCCs received additional funding from the state legislature for Hawai'i Promise scholarships ([IB-71](#), [IB-72](#)). Hawai'i Promise scholarships are intended to ensure that students with unmet financial need can get the financial support they need to attend college.

### **Use of Disaggregated Data for Distance Education Students**

Disaggregated student achievement data show that DE students are performing just as well as students taking face-to-face courses at the College ([IB-73](#)). The College continues to monitor student success in DE courses. The Educational Media Center provides ongoing training and professional development for online instructors. As of spring 2018, the College provided instructors the opportunity to take online professional development courses through Quality Matters ([IB-74](#)). The College offered these workshops in addition to the campus activities and events to further ensure faculty are prepared to address student issues specific to DE.

### **Analysis and Evaluation**

The College uses disaggregated student achievement data to evaluate student subpopulations. Rates for retention, persistence, and completion are disaggregated by ethnicity for Native Hawaiians, Filipinos, and other Pacific Islanders, and by Federal Pell Grant recipients. Numerous projects and programs exist to reduce identified performance gaps including an acceleration initiative, student success pathways, support and evaluation for DE classes, and programs targeting specific ethnicities. While the College consistently exceeds institutionally-set targets for Pell Grant recipients, the number of such recipients has remained steady over the past several years and efforts are underway to increase that number.

I.B.7.

*The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.*

**Evidence of Meeting the Standard**

**Evaluation of Institutional Policies and Procedures**

The College exists within a multi-campus system, so the UH Board of Regents (BOR) is responsible for the regular evaluation of regent policies, the UH System is responsible for the executive policies and administrative procedures, and the UHCC System is responsible for UHCC policies.<sup>4</sup>

The College publishes its policies on the College website ([IB-75](#)). Table 47 identifies the College policies, their approval or effective dates, and their review dates. During 2016-2017, a Faculty Senate ad hoc committee reviewed L5.201, Policy on Curriculum Review and Revision ([IB-76](#)). During 2017-2018, an ad hoc committee of the Campus Council and the Faculty Senate reviewed L5.202, Policy on Annual Program Review. During 2017-2018, the Faculty Senate Assessment Committee reviewed L5.210, Policy on Assessment ([IB-77](#), [IB-78](#)). In spring 2018, the Campus Council and the Faculty Senate reviewed L4.100, Policy on Institutional Mission, and L1.201, Policy on Shared Governance. For a more detailed discussion of these efforts by the governance groups, see Standard [IV.A.7](#).

Some policies do not have review dates as they were approved before the creation of the OPPA. OPPA has been understaffed for 2017, and the office is in the process of filling vacant positions. Once the office has been fully staffed, all policies will be reviewed for currency and revisions made if needed.

Table 47.

### **Evaluation of Program Review, Planning, and Budgeting**

The Integrated Planning and Budgeting Process is the College's primary means of evaluating its programs, support services, and resources. In spring 2017, the Campus Council surveyed

authors and reviewers of the ARPD, including instructional discipline coordinators, program coordinators, unit heads, and administrators, and asked them how the program review and planning process might be improved ([IB-79](#)). Survey results indicate that over 80 percent agreed that they understood how to use the data provided by the UH System. Almost 90 percent agreed they know how to make prioritization requests for program or unit improvements. Approximately 55 percent were neutral or disagreed that the program review process motivates them to make programmatic or unit improvements. An ad hoc committee convened in fall 2017 to develop recommendations for improving the Integrated Planning and Budgeting Process. College leaders will use these results to improve program review and planning practices.

The College completes the Institutional Effectiveness Report every four years as a comprehensive review of the College. The review examines the College's progress toward institutional goals and the overall impact of plans made within instructional programs, educational units, and support areas ([IB-42](#)).

The College administers an institutional assessment every two to three years to determine areas of strength and improvement. In fall 2016, the second cohort of the Leadership Excellence program collaborated with the OPPA to administer an employee satisfaction survey ([IB-80](#)). The cohort's goal was to better understand employee morale, satisfaction, and engagement ([IB-81](#)).

In 2014, the College administered a lengthy employee satisfaction survey that contained 86 questions ([IB-82](#)). The cohort reviewed these questions and researched other instruments to determine how best to measure employee satisfaction. In an effort to maximize the quality and quantity of responses, the cohort decided to develop a concise survey that addressed four categories: mission, goals, priorities, and planning; resources; governance and leadership; and work environment. The cohort added open-ended questions to invite employees to share what they liked best about the College and offer suggestions as to how the College could create a better workplace. The cohort distributed the survey through the faculty and staff listserv, which included both active and retired employees.

The cohort presented to the campus community the 2016 survey results as well as data trends based on the employee satisfaction surveys administered in 2011 and 2014 and sent out an analysis report, which was posted on the College intranet ([IB-83](#), [IB-84](#), [IB-85](#)). Administrative leaders discussed the survey results and determined that the Campus Council and the Faculty Senate would create and administer additional surveys to gather more information from campus constituents.

Additionally, individual units and areas will conduct more in-depth surveys. For example, in fall 2017 the vice chancellor of administrative services (VCAS) conducted a survey of administrative services' functional areas and support units ([IB-86](#)). The survey results will help identify specific improvement areas that can support continuous improvement efforts and will be incorporated into the Integrated Planning and Budgeting Process as part of each unit's short- and long-term improvement plans ([IB-87](#)).

## **Analysis and Evaluation**

Through the Integrated Planning and Budgeting Process, ARPD, Institutional Effectiveness Report, and governance groups, the institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to ensure academic quality. Leeward Community College evaluates its policies on a five-year cycle. The College completed an evaluation of the program review and planning process in spring 2017 and an ad hoc committee will develop recommendations for improving the Integrated Planning and Budgeting Process.

I.B.8.

*The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.*

## **Evidence of Meeting the Standard**

### **Communication of Results through Course Assessment**

The College broadly communicates assessment results and evaluation activities through course assessment. The results of course assessment are shared broadly through the posted ARPDs ([IB-88](#)). Programs include in their ARPDs a discussion of PLOs that covers which courses they assessed and information about the results of those assessments. If programs make significant changes to curriculum, they may note it in the PLO section. Programs report on their course and program assessments at advisory board meetings, which are held at least annually for each of the CTE programs. Programs also include course assessments in Tk20; however, Tk20 has not proven to be a reliable method for communicating assessment results.

### **Communication of Results through Program Review**

The College broadly communicates assessment results and evaluation activities through the program review process. The College uses the ARPD to report annually on demand, efficiency, and effectiveness data for all CTE programs, developmental education programs, the associate degree, and support areas such as Academic Services, Student Services, Administrative Services, OCEWD, and the Wai‘anae Moku Education Center. Deans, program coordinators, and faculty analyze data to assess programs, develop action plans for the coming year, and create resource allocation lists. They assess program health using standard benchmarks that the UHCC System has defined and set. Each academic program, educational unit, and support area uses the strengths and weakness identified in the ARPD to set priorities. The OVPCC reviews and summarizes the completed ARPDs and reports results to the BOR and the Federal Office of Vocational and Adult Education. The USDE is informed about program performance and requirements of Perkins funding. The UHCC System website posts the ARPDs so the campus community can review them ([IB-88](#)). The College posts all the ARPDs on its website ([IB-89](#)).

The College uses the CRE to identify long-term goals ([IB-51](#)). Each academic program, educational unit, and support area completes a CRE at least once every four years. Program coordinators use the CRE to review a program and identify strengths and weaknesses based

on the analysis of data. An academic program, educational unit, or support area uses the strengths and weaknesses to complete a resource request and set priorities. The College publishes the CRE reports on its website ([IB-89](#)).

### **Communication of Results through Campus Presentations**

The College broadly communicates assessment results and evaluation activities through campus presentations. Regular communication of its assessment and evaluation provides the campus community with a shared understanding of the College's strengths and weaknesses and allows the College to set appropriate priorities. The VPCC visits the College each semester to provide an update on progress towards UHCC System strategic plan goals, performance benchmarks, and UHCC System initiatives. These presentations are an opportunity for faculty and staff to ask questions and get feedback on how well the College is performing. Additionally, the College provides updates about campus progress at fall and spring convocations.

The OVPCC uses data from the Community College Survey of Student Engagement (CCSSE) when reporting to the BOR on the UHCC System's progress. This national survey, which is coordinated every two years by the Center for Community College Student Engagement and the Community College Leadership program at the University of Texas at Austin, provides the College with data on student satisfaction and student engagement ([IB-90](#)). The ARPDs include CCSSE results.

### **Analysis and Evaluation**

Assessment takes place at the College through numerous methods to ensure the College is meeting its mission and goals. The College broadly reports these assessments to internal and external stakeholders, which include the BOR, the UHCC System, and the campus community.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about campus communication and priorities at the College. Participants discussed how the College meets Standard I.B.8 and how the College can improve in these areas. They said that the College communicates with its constituents through its weekly bulletin, its website, and through email listservs. Funding opportunities and safety notices, for example, are often sent to the campus listserv to ensure that all campus members get notified. The College strives to further increase its web and social media presence to more effectively communicate with students. A particular challenge is to keep the website current ([IB-21](#)).

I.B.9.

***The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. (ER 19)***

## **Evidence of Meeting the Standard**

### **Revision of Planning and Budgeting Process**

The College engages in continuous, broad-based systematic evaluation and planning. This comprehensive process integrates program review, planning, resource allocation, implementation, and re-evaluation. The College designed this process to support its mission and improve academic quality and institutional effectiveness. By the 2012 institutional self-evaluation, however, the process had become overly complex and cumbersome. Faculty and staff felt overburdened by the work required in the Annual Program Review (APR) process, which included a comprehensive review each year. Instructional programs and some support area programs also submitted an ARPD template to the UHCC System website annually. The following section details the implementation, evaluation, and revision of the College's Integrated Planning and Budgeting Process from 2012 to 2017.

The College convened an ad hoc committee in fall 2012 to review the APR process and make recommendations for improvement ([IB-91](#), [IB-92](#), [IB-93](#)). The ad hoc committee created a proposed template and shared it with the leadership group at a mini-retreat in February 2013 ([IB-94](#), [IB-23](#), [IB-95](#)). The leadership group provided feedback and the committee slightly modified the timeline based on the feedback ([IB-96](#)). Additionally, in April 2013, the Campus Council distributed a survey on the APR process. This was a repeat of the survey conducted in 2011. Some of the findings included a need to revise the APR template ([IB-97](#)). Based on the ad hoc committee recommendations and the survey results, the Campus Council approved a new planning process in May 2013, which would go into effect in the following year.

In 2013-2014, the College introduced a shorter template titled Annual Review and Resource Allocation (ARRA) template ([IB-98](#)). All instructional programs still needed to complete the ARPD template for the UHCC System website. These two annual templates created confusion, and feedback indicated it was still a duplicative process.

In 2014-2015, the OPPA decided to use only the Resource Request form from the ARRA template since this form needed to be submitted in conjunction with the ARPD reports submitted to the UHCC System ([IB-99](#)). The Campus Council approved a new proposal for changing the planning process in May 2015 for the following year ([IB-100](#)). The College used this Integrated Planning and Budgeting Process in 2015-2016 and 2016-2017.

In May 2017, the Campus Council distributed a survey to program coordinators, unit heads, and division chairs to get feedback on the current Integrated Planning and Budgeting Process. The Campus Council discussed the feedback at their meeting on May 1, 2017 ([IB-101](#)). Feedback indicated that there continues to be frustration with the UHCC System site and the late release of data for the ARPDs. Survey respondents recommended that the College reduce reliance on the UHCC System data and identify data that will be more meaningful to the specific programs and units. While the Integrated Planning and Budgeting Process will primarily stay the same, the College will encourage the programs and units to include their own data or data supplied by the OPPA for the analysis of their program/unit. The College later supported this discussion with the decision to convene an ad hoc committee to review the Integrated Planning and Budgeting Process.

## **Current Integrated Planning and Budgeting Process**

The Integrated Planning and Budgeting Process for the year begins with a leadership retreat. At the retreat, all administrators, instructional division chairs and unit heads, academic services unit heads, student services unit heads, and administrative services unit heads discuss institutional issues and determine what the focus for the next planning cycle will be. The goal of the retreat in August 2017 was to review campus initiatives and develop a cohesive understanding of where the College would focus its efforts for the next year. The focus for 2017-2018 was placed on “The Student Experience” with a goal of increasing student retention and persistence by ten percent over the previous year. Refer to Standard [I.B.3](#) for further discussion.

### Program Review

The administration disseminated an overview and timeline of the Integrated Planning and Budgeting Process for 2017-2018 to the campus in September 2017 ([IB-102](#)). Instructional programs, educational units, and support areas receive system data in September and begin the process of analyzing the data. Outcomes assessment at the course and program levels is an ongoing process. Each academic program, area, and unit includes outcomes assessment data and results in the ARPD/CRE templates. Sections in the instructional ARPD template include prompts for program learning outcomes that were completed in the previous year.

In addition to using outcomes assessment data, the academic programs, areas, and units use institutional research data to complete the ARPD template, including student achievement data, such as demographic information and disaggregated data comparing DE and face-to-face classes. The College uses several ARPD templates (Instructional, OCEWD, and Support). Each academic program, area, and unit completes the template with input from its constituents. Through the process of completing the templates, the programs, areas, and units review a wide range of data and evaluate its effectiveness.

The College uses results of assessment and analysis in decision making to align institution wide practices to support and improve student learning. Once programs, areas, and units complete their ARPD, each creates a resource request list and indicates priority items for resource allocations. Instructional divisions also complete a resource request list. For example, the Learning Resource Center provides content tutoring and writing support each year. In 2016-2017, assessment data indicated a need to provide additional tutoring and peer mentoring support. The College approved the request for additional funding for student help for a range of student support areas for 2017-2018 ([IB-36](#)).

### Resource Request Prioritization

The College has a process to consolidate the resource request lists from multiple divisions and units into a combined plan. The instructional unit heads (instructional division chairs and educational unit heads) discuss and prioritize each of their resource request lists into a single Instructional Priorities List ([IB-103](#)). The support areas, which include Student Services, Academic Services, and Administrative Services, complete their resource request lists and prioritize as well. The administrative team reviews all of the prioritized lists and compiles them into a draft institutional priorities list for the College. Prioritization is based on common criteria: alignment with strategic goals and outcomes, scope of impact, evidence of measurable outcomes, and impact on health and safety.

The administrative team presents the draft of institutional priorities to the Campus Council for review, discussion, and re-prioritizing, if needed. The Faculty Senate also reviews the institutional priorities and can make recommendations for re-prioritizing, if needed. The Campus Council approves a final institutional priorities list as a recommendation to the chancellor ([IB-101](#)).

Resource Allocation

Each year the VCAS reviews the operating budget and prepares a proposed budget for the upcoming year based on planned increases in revenues and changes in expenditures. If the VCAS identifies available funds, the College uses the institutional priority list to guide decision-making on updating the budget. Refer to Standard [III.D.3](#) for further discussion.

In addition to informing the operating budget, the institutional priorities list is used to develop the biennium budget request and the supplemental budget request for the UH System. The institutional priority list includes funding requests that the College may submit to the UHCC System, which compiles strategic funding requests from all community colleges. The UHCC System’s centralized funding priorities are, in turn, submitted to the UH System and combined with the strategic funding requests from the UH baccalaureate campuses. The UH president and staff prepare a formal budget request of the UH ten-campus system, which the president presents for approval to the BOR in the fall of each year. Following approval by the board, the president submits the budget request to the governor for review and incorporation into the executive budget request. State law requires that the governor's executive budget request be released by December of each year and submitted to the state legislature. The state legislature convenes in regular session each January to begin deliberations regarding the upcoming biennial budget or supplemental budget.

Division chairs and unit heads also use their respective priority lists to determine expenditures in the coming year. The College provides each division and unit with an annual operating budget to spend on ongoing expenses. The instructional divisions also have an additional budget provided from summer school offerings. The VCAA determines these allocations as a profit-sharing plan to split summer school tuition and fee revenues with the instructional divisions. Since implementing this plan, the instructional divisions have offered more summer school classes that are in high demand and reduced low-enrolled summer school classes.

Table 48.

*Evolution of Planning and Budgeting Process Templates*

2012-2013	<ul style="list-style-type: none"> <li>● Used comprehensive Annual Program Review (APR) template.</li> <li>● Created an ad hoc committee to review and make recommendations for improving the planning process.</li> <li>● Conducted a survey of the planning process in April 2013.</li> <li>● The Campus Council approved the revised planning process.</li> </ul>
2013-2014	<ul style="list-style-type: none"> <li>● Introduced ARRA template.</li> <li>● Decided to make additional changes based on confusion with ARRA and ARPD templates.</li> </ul>

2014-2015	<ul style="list-style-type: none"> <li>Continued to use the Resource Request template combined with the ARPD template.</li> <li>Developed the CRE template.</li> <li>The Campus Council approved the revised Integrated Planning and Budgeting Process.</li> </ul>
2015-2016	<ul style="list-style-type: none"> <li>Introduced the revised process including the ARPD template and/or CRE template.</li> <li>Continued to use the Resource Request template.</li> </ul>
2016-2017	<ul style="list-style-type: none"> <li>Expanded the use of the ARPD template to all units and areas, even those not included in the UHCC ARPD.</li> <li>All remaining programs, units, and areas completed the CRE template.</li> </ul>
2017-2018	<ul style="list-style-type: none"> <li>New cycle of the CRE template to begin.</li> <li>Move towards better use of data in the ARPD process with less reliance on UHCC System data.</li> <li>An ad hoc committee will review and evaluate the Integrated Planning and Budgeting Process.</li> </ul>

As Table 48 demonstrates, institutional planning and budgeting happens on a regular basis and follows a consistent process. This process includes wide participation across the campus community and uses valid data sources.

#### Long-Range Planning Process

Institutional planning addresses the short-term and long-term needs of the College. The College requires each academic program, educational unit, and support area to complete a CRE every four years and uses the CRE to identify long-range goals that direct efforts and create action plans. The comprehensive template includes data sets that the academic program or support area defines. The College reviews the CREs to determine how well the program, unit, or area is meeting the College mission and strategic plan goals. For more information about the CRE, see Standard [I.B.5](#).

In accordance with Eligibility Requirement 19, the College makes public how well and in what way it is accomplishing its mission, including assessment of learning outcomes. All ARPDs report on program learning outcomes and the results of assessments. The College provides the ARPDs on the UHCC ARPD website and the College website ([IB-88](#), [IB-89](#)).

#### Analysis and Evaluation

The College has a well-established, broad based, and comprehensive cycle of evaluation, integrated planning, resource allocation, and implementation that addresses both the short- and long-term needs required to accomplish its mission.

The College evaluated its planning and budget cycle in 2016 and received feedback from 200 faculty and staff. When asked if the College planning process resulted in improvement, 60.5 percent of respondents agreed that the process results in improvements of programs and

services and 34 percent were unsure ([IB-81](#)). Based on this finding, the College is currently working to better communicate the results of program improvements to the campus community. In fall 2016, the VCAA shared an overview of the Integrated Planning and Budgeting Process with the campus. In spring 2017, the VCAA shared the ranked priorities for each area (Instruction, Academic Services, Student Services, and Administrative Services) during March and April. In 2017-2018, the College convened an Ad Hoc Planning Process Review Committee to explore ways to improve the planning and budgeting process.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College's Integrated Planning and Budgeting Process. Participants discussed how the College meets Standard I.B.9 and how the College can improve in this area. They said that the ARPD, the College's Integrated Planning and Budgeting Process, helps faculty to plan for and request budget items that support outcomes assessment. While the College annually communicates this process, some faculty and staff are still unclear how the process works and how to request funding for their specific needs. They cited that the Campus Council and Faculty Senate convened a joint ad hoc committee to review the planning and budgeting process and make recommendations for improvement. The work of the ad hoc committee is ongoing, but one change is the ability for any individual or group to add an institutional resource request into the process. This addition provides an additional avenue for resource requests that impact the College but are not prioritized and forwarded from a division, unit, or area ([IB-21](#)).

## Changes and Plans Arising Out of the Self-Evaluation for Standard I.B

<b>Accreditation Standards</b>	<b>Change or Plan</b>	<b>College Leads</b>	<b>Timeline</b>	<b>Achieved or Expected Outcome</b>
I.B.1	Faculty Senate provided feedback to improve the College's Integrated Planning and Budgeting Process and increase transparency.	Faculty Senate and Administration	Fall 2016-present	The VCAA updates the campus on prioritized resource request lists during the prioritization process. The VCAS provides the campus the annual budget with accompanying notes each fall semester.
I.B.1 II.A.7 IV.A.4	DE faculty attended training on faculty-initiated interaction.	DE Committee	Fall 2017-present	Faculty gained awareness of the requirements to document faculty-initiated interaction in DE courses and developed plans for integrating activities into their online course work.
I.B.1	Conducted breakout sessions during convocation to seek feedback on specific Accreditation Standards and Eligibility Requirements (ERs).	Self-Evaluation Core Team	Spring 2018	Campus constituents provided feedback on how the College meets specific Accreditation Standards and ERs and how the College can improve in those areas. The College incorporated the feedback into the Institutional Self-Evaluation Report and shared with appropriate decision makers.
I.B.2	Clarify the relationship between GELOs and ILOs.	Faculty Senate Assessment Committee	Fall 2017-present	Faculty Senate Assessment Committee will make recommendations in 2018-2019.

<b>Accreditation Standards</b>	<b>Change or Plan</b>	<b>College Leads</b>	<b>Timeline</b>	<b>Achieved or Expected Outcome</b>
I.B.3	Initiated the College's institution-set standard WIG to increase student retention and persistence by ten percent over the previous year.	VCAA	Fall 2017-present	WIG Design Team was convened in Fall 2017. Work continues and planned activities are included in Quality Focus Essay (QFE).
I.B.5	Published the College's Institutional Effectiveness Report.	OPPA	Spring 2018	Administration is reviewing the report and will use the results to inform decisions.
I.B.7 IV.A.4	Reviewed L4.100, Policy on Institutional Mission.	Campus Council and Faculty Senate	Spring 2018	Revised policy approved in spring 2018.
I.B.7 IV.A.4	Reviewed L5.201, Policy on Curriculum Review and Revision.	Faculty Senate Ad Hoc Committee	Fall 2016-Spring 2017	Revised policy approved in spring 2018.
I.B.7	Reviewed L5.210, Policy on Assessment.	Faculty Senate Assessment Committee	Fall 2017-Spring 2018	Revised policy approved in spring 2018.
I.B.7 IV.A.3	Conducted the Program Review and Planning Survey.	Campus Council	Spring 2017	Changes needed in program review and planning were identified. Ad Hoc Planning Process Review Committee convened in fall 2017.
I.B.7	Conducted the Employee Satisfaction Survey.	Leadership Excellence Cohort	Fall 2016	Institutional strengths and areas for improvement were identified.

Accreditation Standards	Change or Plan	College Leads	Timeline	Achieved or Expected Outcome
I.B.7	Conducted the Administrative Services Customer Satisfaction Survey and used the results to make improvements.	Office of the VCAS	Fall 2017-present	Administrative Services strengths and areas for improvement were identified.
I.B.9	In response to the Employee Satisfaction Survey, the results of program improvements to the campus community were better communicated.	VCAA and Ad Hoc Planning Process Review Committee	Fall 2016-present	<p>For 2016-2017, the VCAA shared an overview of the Integrated Planning and Budgeting Process and ranked priorities to ensure that campus constituents had an opportunity to express support or concern with their representative on Campus Council.</p> <p>For 2017-2018, an Ad Hoc Planning Process Review Committee was convened to continue to explore ways to improve the planning and budgeting process.</p>
I.B.1 I.B.7 I.B.9 IV.A.3	In response to the Employee Satisfaction Survey, improve the Integrated Planning and Budgeting Process.	Ad Hoc Planning Process Review Committee	Fall 2017-present	The committee has begun work on recommending changes to the process and will continue their work in 2018-2019.
I.B.1 I.B.7 I.B.9 IV.A.3	Review L5.202, Policy on Annual Program Review.	Ad Hoc Planning Process Review Committee	Fall 2017-present	The committee has forwarded a revised policy to Faculty Senate and Campus Council for review and approval.

## **I.C. Institutional Integrity**

### **I.C.1.**

*The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.*

### **Evidence of Meeting the Standard**

The College's Catalog, website, and campus communication system provide clear and accurate information about the College's mission statement, learning outcomes, educational programs, student support services, and accreditation status to current and prospective students, campus employees, the public, and the College's accreditors. The College regularly reviews the information to ensure clarity, accuracy, and integrity ([IC-1](#), [IC-2](#), [IC-3](#), [IC-4](#), [IC-5](#), [IC-6](#), [IC-7](#), [IC-8](#), [IC-9](#), [IC-10](#)).

The College provides a print and an electronic version of the Catalog for its constituencies with precise, accurate, and current information ([IC-11](#), [IC-12](#)). The print version is available for a nominal fee at the campus Copy Center, and the electronic version is available to view and/or download on the College website. Designated campus members review portions of the Catalog annually to confirm accuracy and currency. The College updates corresponding information on the website and in the Catalog to ensure consistency and transparency. For more information, see Standard [I.C.2](#).

In fall 2016, the Creative Services (Marketing and Public Relations) office redesigned the College website to use a responsive template that lends itself to easy browsing on a mobile device. This office also incorporated feedback from students and leveraged usage data to modernize the website ([IC-13](#), [IC-14](#)).

The Creative Services office oversees the campus communication system ([IC-15](#)). This system regularly updates many of the information dissemination channels including the Catalog, campus bulletin boards, on-campus digital signage system, weekly email bulletin (redesigned in fall 2015 and in fall 2017), and official College online sites on Facebook, Twitter, YouTube, Instagram, Flickr, and Pinterest ([IC-16](#), [IC-17](#), [IC-18](#), [IC-19](#), [IC-20](#), [IC-21](#), [IC-22](#)). The Creative Services office ensures consistency and clarity in communication by providing centralized support for all College communication, graphic design, and marketing services ([IC-23](#)).

### **Analysis and Evaluation**

The Creative Services office oversees the campus communication system and ensures the clarity, accuracy, and integrity of information provided to all campus constituencies and stakeholders through varied dissemination channels. The College clearly and accurately describes itself to stakeholders through its website, which includes information related to its mission, learning outcomes, educational programs, and student support services. An

accreditation webpage provides students and the general public with information about the College’s accreditation status with all its accreditors.

I.C.2.

***The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements.” (ER 20)***

**Evidence of Meeting the Standard**

The College provides a print and online version of the Catalog that is easily accessible to current and prospective students. Every academic year, the College updates and publishes its Catalog in hard copy available for purchase at the Leeward Copy Center and as a downloadable electronic version free of charge on its website ([IC-11](#)). The table of contents guides students quickly to the information they seek whether they are potential, new, or continuing students.

The Catalog has precise, accurate, and current information on all facts, requirements, policies, and procedures in accordance with Eligibility Requirement 20 (Integrity in Communication with the Public). Table 49 lists the page numbers from the *Catalog 2017-2018* that correspond to the catalog requirements of the Accrediting Commission for Community and Junior Colleges (ACCJC) ([IC-12](#)).

Table 49.

*ACCJC’s Catalog Requirements and Catalog Page References*

<b>Catalog Requirements</b>	<b>Page(s) in <i>Catalog 2017-2018</i></b>
<b>General Information</b>	
Official Name, Addresses, Telephone Numbers, and Website Address of the Institution	2, 10
Educational Mission (Vision, Mission Statement, Core Values, and Institutional Learning Outcomes)	7-8
Representation of Accredited Status with ACCJC and with Programmatic Accreditors	9
Course, Program, and Degree Offerings	18-104, 137-194
Learning Outcomes for Programs and Degrees	32-104
Academic Calendar and Program Length	2

Academic Freedom Statement	209
<b>Catalog Requirements</b>	<b>Page(s) in Catalog 2017- 2018</b>
Available Student Financial Aid	114-121
Available Learning Resources	196-200
Names and Degrees of Administrators and Faculty	221-230
Names of Governing Board Members	220
<b>Requirements</b>	
Admissions	106-113
Student Fees and Other Financial Obligations	114-121
Degrees, Certificates, Graduation, and Transfer	24-26, 122-125
<b>Major Policies Affecting Students</b>	
Academic Regulations, Including Academic Honesty	126-136, 207
Nondiscrimination	214
Acceptance and Transfer of Credits	122-125
Transcripts	115
Grievance and Complaint Procedures	215
Sexual Harassment	217
Refund of Fees	118

All student policies can be found on the Policies webpage of the College website and the Services for Students webpage ([IC-24](#), [IC-8](#)).

The Catalog describes the instructional delivery modes applied in distance education (DE) courses, programs, and degree offerings. The three different DE modes are televised courses, two-way interactive video courses, and internet courses. The Catalog explains how DE courses differ from traditional, face-to-face courses ([IC-25](#)). The Catalog and course syllabi describe the expected interaction between faculty and students and the accessibility of faculty and staff to students enrolled in DE courses.

The College has established protocols to ensure that the Catalog presents accurate and current information on the College's programs, policies, and locations. The approach to maintaining accuracy in the Catalog is collaborative and team based. The Office of Planning, Policy, and Assessment (OPPA) coordinates catalog revisions and bases the annual catalog revision schedule on the Faculty Senate's curricular deadlines, student registration dates, and STAR Guided Pathway Selection (GPS) input requirements ([IC-26](#)). The catalog revision team includes a wide cross-section of the campus faculty and staff. The team is composed of a revision coordinator, curriculum editors, and a production coordinator. In addition, division chairs, program coordinators, unit heads, dean of student services, vice chancellor for academic affairs (VCAA), and human resources staff review, revise, and proofread the catalog manuscript.

### **Analysis and Evaluation**

Every academic year, the College updates and publishes its Catalog in alignment with ACCJC's Eligibility Requirement 20. Hard copies are available for a nominal fee at the campus Copy Center and a PDF version is available on the College website. The table of contents guides students quickly to the information they seek whether they are potential, new, or continuing students. The catalog revision team includes a wide cross section of the campus faculty and staff to ensure clarity and accuracy.

I.C.3.

*The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)*

### **Evidence of Meeting the Standard**

The College collects and uses assessment data on student learning to communicate matters of academic quality to current and prospective students and the public. The College develops learning outcomes for courses, programs, certificates, and degrees, which the Curriculum Committee vets, approves, and then houses in an online database, Quali Student Curriculum Management. (For more detailed discussion of the Curriculum Committee, see Standard [II.A.2.](#)) The College publishes program learning outcomes (PLOs) for programs, certificates, and degrees in the Catalog where students and the general public can see them. The Catalog is available to the public in an electronic format on the College website ([IC-11](#)).

The College collects and uses assessment data on student achievement to communicate matters of academic quality and makes its data and analysis public. The College provides access to the program review documents by posting them publicly on the College website ([IC-27](#)). Program review includes quantitative and qualitative data including program outcomes assessment results. The Annual Report of Program Data (ARPD) template provides the public with an evaluation of the program quality and recommendations for improvement. For further discussion on the ARPD, see Standard [I.B.5](#).

The College uses Tk20 software to collect and analyze assessment information. The OPPA manages Tk20 by assisting users, uploading course and faculty data, developing reports and

new functionalities, and offering training sessions ([IC-28](#), [IC-29](#)). Program coordinators extract and summarize data from Tk20 to demonstrate learning outcome attainment. The College uses assessment results in the annual Integrated Planning and Budgeting Process. For additional discussion on Tk20, see Standard [I.B.2](#).

### **Analysis and Evaluation**

The College uses Tk20 software, managed by the OPPA, to collect and analyze outcomes assessment information to demonstrate student achievement. Learning outcome creation and assessment are done at least every five years to ensure quality. The College publicly posts program review documents on their website. Program reviews contain quantitative and qualitative data including outcomes assessment results. The ARPD template also provides an evaluation of the program quality and recommendations for improvement.

I.C.4.

*The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.*

### **Evidence of Meeting the Standard**

The College clearly describes its certificates and degrees in the Catalog in terms of their purpose, content, course requirements, and expected learning outcomes. The College offers three types of degrees: Associate in Arts (AA), Associate in Science (AS), and Associate in Applied Science (AAS). The *Catalog 2017-2018* lists these degrees in the Programs of Study section ([IC-3](#)). In addition, the College website lists the degrees and certificates that students can receive through DE ([IC-30](#)).

For all degrees, students must complete a set number of the general education courses as well as four foundation courses and five focus courses, which are additional graduation requirements. The Catalog lists an explanation of the general education requirements ([IC-31](#), [IC-32](#), [IC-33](#)). The College expects graduating students to meet seven general education learning outcomes ([IC-31](#)).

The College offers three types of certificates: certificate of achievement, certificate of competence, and academic subject certificate. The Catalog lists information on the 25 certificates offered, including a description of the program of study, PLOs, and the number of courses needed to receive a certificate ([IC-34](#), [IC-4](#)).

The College's L5.201, Policy on Curriculum Review and Revision, requires that all syllabi must include the course alpha and number designation, course title, number of credits, prerequisites, catalog course description, learning outcomes, instructor information (name, office location, office hours, phone number, and email address), course information (course section number, classroom location, course meeting days and times, and a list of required textbooks and supplies), the instructor's grading policy, and the College's academic dishonesty policy ([IC-35](#)).

Division chairs and discipline/program coordinators ensure that all course syllabi have learning outcomes and other pertinent information. The instructor makes the course syllabus

available to students at the beginning of each term, and a copy is also on file at the instructor's division office. The College recognizes that learning outcome creation and assessment are ongoing processes and, therefore, continually reviews learning outcomes to ensure academic quality.

### **Analysis and Evaluation**

The Catalog clearly describes the institution's degrees and certificates with respect to their purpose, content, course requirements, and expected learning outcomes.

I.C.5.

*The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.*

### **Evidence of Meeting the Standard**

The College regularly reviews and evaluates its policies, procedures, and publications to ensure the integrity of its mission, programs, and services. The College's L1.101, Policy on the Policy Development Process, provides direction for developing and maintaining College policies ([IC-36](#)). The University of Hawai'i (UH) Board of Regents (BOR), campus governance groups, and administration regularly review and evaluate respective policies and procedures, which are discussed in more detail in Standard [I.B.7](#).

The Creative Services office regularly reviews publications according to recommendations of campus committees and representatives responsible for programs and services. The office also regularly reviews and updates its website to ensure integrity, consistency, and transparency, which is discussed in Standard [I.C.1](#).

### **Analysis and Evaluation**

The College has several mechanisms in place to regularly review institutional policies, procedures, and publications in order to ensure accuracy and integrity of programs and services with alignment to its mission. These include policy, governance groups, and the Creative Services office.

I.C.6.

*The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.*

### **Evidence of Meeting the Standard**

The College publishes accurate information on the total cost of education, including tuition, fees, and other required expenses such as textbooks and other instructional materials. The Catalog publishes student fees and costs. It lists the tuition and associated enrollment fees in an easy-to-read table with the following categories: resident, nonresident, and nonresident

Pacific Island jurisdiction. The Catalog highlights other costs such as late registration fee, transcript fee, and installment payment plan fee ([IC-37](#)).

The College website provides current and prospective students with accurate information on tuition, fees, and required textbook and instructional material costs ([IC-38](#), [IC-39](#), [IC-40](#)). In addition, the online Leeward Bookstore allows students to compare textbook prices ([IC-41](#), [IC-42](#)).

The College has undertaken an Open Educational Resources (OER) initiative since 2016 ([IC-43](#)). Courses that offer OER or no cost textbooks include the statement “Textbook Cost: \$0” on the Course Availability webpage and in STAR GPS ([IC-44](#), [IC-45](#)). For further discussion of OER, see Standard [I.A.3](#).

### **Analysis and Evaluation**

The Catalog and website accurately inform current and prospective students about the total cost of education. The Catalog publishes student fees and costs including fees for late registration, transcripts, and installment payment plans. The College website includes information related to tuition and fees as well as textbook and instructional material costs.

I.C.7.

***In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)***

### **Evidence of Meeting the Standard**

The College uses and publishes institutional policies on academic freedom and responsibility in order to communicate its commitment to the free pursuit and dissemination of knowledge. The College supports an atmosphere in which intellectual freedom exists for students and faculty. According to the *Catalog 2017-2018*, “Leeward Community College embraces those aspects of academic freedom that guarantee the freedom to teach and the freedom to learn. Free inquiry and free expression for both students and faculty are indispensable and inseparable” ([IC-46](#)). All members of the campus community are free to examine and test all knowledge appropriate to their discipline or area of study.

As part of a state public university system, the College does not seek to instill specific beliefs or worldviews on its students. The College’s mission statement found in the Catalog clearly delineates the school’s focus and areas of emphasis ([IC-1](#)). In addition, the Catalog contains the Academic Rights and Freedoms of Students ([IC-46](#)).

The University of Hawai‘i Community Colleges (UHCC) Policy (UHCCP) 5.211, Statement on Professional Ethics (Faculty), outlines the academic freedom and responsibility for faculty ([IC-47](#), [IC-48](#)). This policy is easily accessible on the UHCC System Policies website and reviewed on a regular basis ([IC-49](#)). The VCAA reminded faculty of the policy in an email sent in fall 2017 ([IC-50](#)).

Article IX of the 2017-2021 Agreement between the University of Hawai‘i Professional Assembly and the UH Board of Regents protects academic freedom for faculty ([IC-51](#), [IC-52](#)). This collective bargaining agreement is easily accessible on the University of Hawai‘i Professional Assembly (UHPA) website ([IC-53](#)).

### **Analysis and Evaluation**

The College is committed to fostering a campus environment in which students and faculty are supported in the free pursuit and dissemination of knowledge. This is explicitly stated in the Catalog and supported by UHCCP 5.211 and Article IX of the *Agreement between the University of Hawai‘i Professional Assembly and the UH Board of Regents*.

I.C.8.

***The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.***

### **Evidence of Meeting the Standard**

The College has policies and procedures approved by the BOR on student academic honesty and student behavior, which it clearly communicates to current and prospective students. The College’s Student Conduct Code and Student Conduct Code Procedures are based on Executive Policy (EP) 7.208, Systemwide Student Conduct Code ([IC-54](#), [IC-55](#), [IC-56](#)). The executive policy discusses academic honesty and student behavior such as class disruptions and conduct that is threatening or infringing on the rights of other members of the academic community whether on or off campus. In 2018, the UH System reviewed EP 7.208 in order to create greater alignment with all UH System campuses in terms of the conduct code and procedures.

The College website includes the Student Conduct Code in two different documents on the Policies webpage: Student Conduct Code and Student Conduct Code Procedures. Additionally, the Catalog publishes the Student Conduct Code and other full policies relevant to Leeward students ([IC-57](#), [IC-58](#)). Some of the policies included in the Student Conduct Code include academic probation and suspension, sex discrimination and gender-based violence, and academic rights and freedom ([IC-24](#), [IC-58](#)).

The College has approved policies on the faculty’s responsibility on academic honesty and integrity. When policies exist at the UH System level and the UHCC System level, the College does not duplicate that policy but refers to the system policy. UHCCP 5.211 guides the behavior and responsibilities of the faculty regarding academic honesty and integrity. The primary responsibility of faculty is the intellectual honesty in which they approach their studied field. As teachers, they must encourage “the free pursuit of learning” for their students ([IC-47](#)).

The Hawai'i Administrative Rules, Section 20-2, Statement on Rights and Responsibilities of the University of Hawai'i Community, guides UHCCP 5.211, which is based within the context of the Hawai'i Revised Statutes ([IC-48](#)).

The Faculty and Staff For Your Information (FYI) Guidebook reminds faculty of their rights of academic freedom and their responsibilities as educators. Excerpts are from the agreement between the UHPA and the BOR ([IC-59](#)).

The College promotes academic integrity and honesty in the delivery of online courses through student identity and verification processes. See the [Certification of Continued Compliance with Federal Regulations and Commission Policies](#) for a discussion of the College's compliance with ACCJC's Distance Education and Correspondence Education Policy.

### **Analysis and Evaluation**

The College establishes and publishes clear policies and procedures that promote honesty, responsibility, and academic integrity that apply to both students and faculty. These are based on system policies related to student conduct, professional ethics for faculty, and rights and responsibilities of faculty. These policies and their related procedures can be found on the UHCC Policies webpage, in the Catalog, and in the Faculty and Staff FYI Guidebook.

I.C.9.

*Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.*

### **Evidence of Meeting the Standard**

At the College, there is a clear expectation that faculty distinguish between personal conviction and professionally accepted views in a discipline, and the College expects faculty to present data and information fairly and objectively. UHCCP 5.211 adopted the American Association of University Professors' statement on professional ethics that outlines academic freedom and responsibility for faculty ([IC-47](#), [IC-60](#)). The policy informs faculty on their primary responsibility to be effective teachers and scholars.

The Faculty Senate Curriculum Committee reviews learning outcomes to ensure that the outcomes are free from personal conviction and contain professionally accepted views. The College requires that each course follow a formal five-year curriculum review and revision process. The process allows for widespread dialogue to ensure courses meet content requirements while allowing academic freedom through Article IX of the *2017-2021 Agreement between the University of Hawai'i Professional Assembly and the Board of Regents of the University of Hawai'i*, which allows faculty flexibility to present content in a fair and objective manner ([IC-51](#), [IC-52](#)). For a more detailed discussion of the curriculum review and revision process, see Standard [II.A.2](#).

### **Analysis and Evaluation**

The College and system policies on professional ethics inform faculty on institutional expectations to distinguish between personal conviction and professionally accepted views in a discipline. Above all else, faculty are to be effective teachers and scholars, which includes presenting data and information fairly and objectively. The Faculty Senate Curriculum Committee reviews learning outcomes and course outlines to ensure that they are free from personal conviction and contain professionally accepted views for their respective disciplines.

I.C.10.

*Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.*

### **Evidence of Meeting the Standard**

As a publicly-funded institution within the state's ten-campus public higher educational system, the College does not promote specific beliefs or worldviews in accordance with state law. Hawai'i Administrative Rules, Section 20-2, Statement on Rights and Responsibilities of the University of Hawai'i Community, provides the College with guidance on codes of conduct. It states that no member of the academic community may interfere with another person's convictions or academic freedom. More specifically, this statement clarifies that "a member of the academic community may not behave toward another member, even in the name of personal convictions or rights to academic freedom, in a manner denying or interfering with another member's expression of convictions, right to academic freedom or the performance of legitimate duties or functions" ([IC-48](#)).

### **Analysis and Evaluation**

The College is a public, open-access institution following state laws and UH System policies that cover codes of conduct for its employees as well as for students. As a public state-funded institution, the College does not prescribe specific beliefs or world views.

I.C.11.

*Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.*

### **Evidence of Meeting the Standard**

The College operates a main campus in Pearl City, Hawai'i, and an education center in Wai'anae, Hawai'i. The College does not operate in foreign locations and has not requested authorization from ACCJC to operate in foreign locations.

## **Analysis and Evaluation**

The College does not operate in foreign locations.

I.C.12.

*The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. (ER 21)*

## **Evidence of Meeting the Standard**

The College complies with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. The College submitted its most recent annual fiscal report to ACCJC on March 29, 2018, and its most recent annual fiscal report on April 3, 2018 ([IC-61](#), [IC-62](#)). The College meets requirements and reporting deadlines set by the Commission and discloses information required by the Commission to communicate matters of educational quality to the public.

In the Catalog, the College identifies ACCJC as the accrediting organization overseeing the College's compliance with Eligibility Requirements, Accreditation Standards, and Commission policies ([IC-2](#)).

The College website carefully details its relationship and recent history with ACCJC and its efforts to maintain its accreditation standing. The Accreditation webpage on the College website demonstrates that it meets ACCJC's reporting deadlines ([IC-10](#)).

The College published its past institutional self-evaluation report on its website in order to inform the public of its good standing ([IC-10](#)).

The accreditation liaison officer (ALO) regularly contacts ACCJC when clarifications are needed regarding the writing of the Institutional Self-Evaluation Report and to obtain advice on possible substantive change proposals. In fall 2017, the ALO sought feedback on the creation of new degree programs and the possible need for a substantive change request. The ALO provided ACCJC with information on the degree programs, and the College received a letter of confirmation that ACCJC did not need the College to submit a substantive change request. The ALO also sought feedback on the need for a substantive change proposal regarding the recent move of the Wai'anae Moku Education Center. The location change required a substantive change proposal, which the ALO submitted to ACCJC on January 24, 2018, and ACCJC approved on March 2, 2018 ([IC-63](#), [IC-64](#)).

## **Analysis and Evaluation**

The College complies with Eligibility Requirements, Accreditation Standards, and Commission Policies. The College publishes clear and accurate information regarding

educational quality and effectiveness for public review on its website. In addition, the College responds in a timely manner to all requirements set by ACCJC.

I.C.13.

*The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)*

### **Evidence of Meeting the Standard**

The College communicates and complies with external agencies with clarity, honesty, and integrity. The About Leeward webpage of the College website lists the four programs that hold external accreditation:

- The Automotive Technology program is accredited by the National Automotive Technicians Education Foundation.
- The Culinary Arts program is accredited with Exemplary Program status by the American Culinary Federation Education Foundation Accrediting Commission.
- The Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management.
- The Teacher Education: Alternative Certification for Career and Technical Education program is accredited by the Council for the Accreditation of Educator Preparation. ([IC-9](#))

The College complies with regulations and statutes communicating any changes in its accredited status to stakeholders. The College publicly shares its current accreditation status on the College website ([IC-10](#)).

### **Analysis and Evaluation**

The College strives at all times to act with honesty and integrity in its relationships with external agencies by complying with their respective regulations and statutes. The College makes every effort to describe itself in identical terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and public. The publicly accessible College website and the Catalog list all programs that hold external accreditation and the current accreditation status of the College.

I.C.14.

*The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.*

## **Evidence of Meeting the Standard**

The College has developed policies and practices that ensure high quality education for all students who enroll in the College and supports their objectives to be successful in learning and reaching their academic goals. Policies and practices demonstrate that delivering high-quality education is paramount to other objectives including financial decisions.

The *Strategic Plan 2015-2021* puts the College mission into actionable goals such as increasing graduation rates, focusing on targeted student populations, preparing students for the workforce, teaching students about sustainability, and providing a smooth transition from high school through community college and into a four-year institution of higher education ([IC-65](#)).

The program review process guides the decisions to distribute and allocate annual funds to different programs and proposals. The College mission guides the financial decision-making for all campus projects including the use of external contributions and support of financial interests.

Additionally, UHCCP 5.211 supports a high-quality educational experience where faculty and students can freely exchange ideas, which creates an intellectual space for student learning and achievement ([IC-47](#)).

## **Analysis and Evaluation**

The College places its educational responsibility above all other objectives including external contributions and financial interests.

## STANDARD II: STUDENT LEARNING PROGRAMS AND SUPPORT SERVICES

### Student Spotlight Michelle Clark

The technical expertise and appropriate application of skills from the Leeward classes I completed combined with the concept and theories I gained at the bachelor and master's degree level allows me to understand not only the high-level concepts in my field but exactly how everything works and what outcome we should expect. I was surprised how many people struggled with simple tasks like filling out a payroll tax form, one of many valuable assignments I recall from Leeward. I also gained exposure to different perspectives in the multi-cultural communication class that continues to instill a spirit of open-mindedness and respect for people from all walks of life and corners of the world. I feel I am better prepared for most situations in my career given the education and personal experiences from UH Leeward that have deeply enriched my character and created a path for success.

## STANDARD II: STUDENT LEARNING PROGRAMS AND SUPPORT SERVICES

*The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.*

### II.A. Instructional Programs

#### II.A.1.

*All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and transfer culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs. (ER 9)*

#### **Evidence of Meeting the Standard**

##### **Instructional Programs and College Mission**

Leeward Community College (Leeward CC)'s mission statement is focused on providing all students with a "high-quality liberal arts and career and technical education" ([IIA-1](#)). Leeward is a liberal arts college with strong transfer programs that align with the programs at the University of Hawai'i (UH) four-year institutions. In fall 2016, the College awarded 1,057 degrees and certificates. Of those, 74.1 percent were transfer degrees. The remaining 25.9 percent of degrees and certificates awarded were for career and technical education (CTE) programs, which may include a transfer option but are intended to lead to employment in the workforce ([IIA-2](#)). The College offers 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence ([IIA-3](#), [IIA-4](#)).

The College offers instructional programs in fields of study that are consistent with its mission. The instructional programs meet a high standard that is appropriate for higher education regardless of location or delivery mode. The College is committed to supporting its students by offering a range of delivery options including face-to-face courses, hybrid courses, and distance education (DE) courses and programs given that the College serves a large area, including remote areas on the Leeward coast of O'ahu. The College has an education center on the Wai'anae coast, Leeward CC - Wai'anae Moku Education Center. Students can earn their Associate in Arts (AA) in Liberal Arts and other certificate programs on-site. Many students take classes at both sites or in combination with online courses.

High school students participating in the dual-enrollment programs Jump Start, Running Start, and Early Admit take credit courses at the College ([IIA-5](#)). Additionally, the College offers Early College courses at eight local high schools: Campbell High School, Leilehua High School, Mililani High School, Nānākuli High School, Pearl City High School, Sacred Hearts High School, Wai‘anae High School, and Waipahu High School. For all these programs, students who participate are dually enrolled at both their high school and the College. Through some of these programs, students earn dual credit (credit that can be applied to both their high school diploma requirements and their college degree requirements), and in other programs they earn single credit (credit that is only applied to their college degree requirements). The Early College Memorandum of Agreement program is a specific type of dual-enrollment program where the College offers college classes to students through a partnership with a high school ([IIA-6](#)).

In addition to credit programs, the College offers noncredit courses and programs in the Office of Continuing Education and Workforce Development (OCEWD), the Office of International Programs (OIP), and the English Language Institute (ELI). OCEWD is aligned with the College mission to enhance quality of life and strengthen economic stability and growth by providing lifelong development and personal enrichment. OCEWD provides a variety of continuing education programs, public service, consulting services, and cultural programs. Programs support human resource and economic development, job training, and classes for small and large businesses and aspiring entrepreneurs ([IIA-7](#)).

The OIP and ELI align with the College’s mission statement to “foster students to become responsible global citizens locally, nationally, and internationally.” The OIP creates programs to meet the needs of international students wanting academic preparation and Hawai‘i students seeking an international educational experience in a foreign country. Study abroad programs provide Leeward students course content in an international setting. The ELI provides academic preparation in English for international students.

The College mission affirms “a special commitment to Native Hawaiians” ([IIA-1](#)). In support of this section of the mission statement, the College has an AA in Hawaiian Studies and an Academic Subject Certificate in Hawaiian Language to provide an opportunity for all students to pursue an instructional program with a focus on Native Hawaiian culture, history, and language.

### **Evaluation of Student Progress and Learning Outcomes**

The College assesses whether students’ progress through and complete degrees and certificates, gain employment, and/or transfer to four-year institutions in several ways. The primary means of evaluation at the institutional level begins with a review of institution-set standards and progress made toward aspirational goals ([IIA-8](#)). The UH vice president for community colleges (VPCC) shares this information at an annual fall semester campus forum ([IIA-9](#), [IIA-10](#)). Attendees can ask questions and make comments on the issues at hand. (For further discussion on the VPCC visits, see Standard [IV.D.6.](#)) Additionally, constituent groups later meet to discuss the information provided by the VPCC and develop strategies for improvement. Administration also uses these key indicators to identify areas to focus on in the coming year.

At the program level, the program review process provides an opportunity for review and reflection by instructional programs regarding students' progress, completion and transfer data, and employment rates. Through the Annual Report of Program Data (ARPD), programs evaluate their program health and provide recommendations for improvement. The Board of Regents Committee on Academic and Student Affairs annually reviews programs with a low number of graduates and asks colleges to perform a specific review of these programs and provide a report of future plans ([IIA-11](#)).

The College assesses programs for currency, appropriateness within higher education, teaching and learning strategies, and learning outcomes. For a more detailed discussion of course revision and review, see Standard [II.A.2](#).

The College assesses learning outcomes at the course level and the program level. (See Standard [I.B.2](#) for a more detailed discussion of the College's hierarchy of learning outcomes.) All courses have measurable course learning outcomes (CLOs) that the College uses to assess student learning. The same CLOs are used for all courses regardless of location or delivery mode. The College assesses program learning outcomes (PLOs) through various methods. These include but are not limited to capstone projects, student portfolios, or alignment with CLO assessment data. For program review, the College uses the ARPD template to analyze demand, efficiency, effectiveness, and outcomes of an academic program. The College uses assessment results for course and program improvements for all locations and delivery modes and uses ARPD results to plan improvements and prioritize resource requests. For a more detailed discussion of course assessment, see Standard [II.A.16](#).

### **Analysis and Evaluation**

All of the College's instructional programs, regardless of location or means of delivery, are offered in fields of study consistent with the institution's mission to provide high-quality liberal arts and career and technical education programs. The College offers dozens of associate degrees and certificates through a range of delivery options including face-to-face and DE courses at two locations. The College also offers credit courses to high school students through its dual-enrollment programs.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and instructional programs. Participants discussed how the College meets Standard II.A.1, Eligibility Requirement 9, and how the College can improve in these areas. They said that the College regularly assesses what the local community needs and creates programs to meet those needs. To reach more students, the College has increased its delivery modes including DE courses and dual-enrollment courses. As the number of programs develop, the College strives to increase its publicity of the types of programs and the different delivery methods in order to make them all successful ([IIA-12](#)).

#### **II.A.2.**

***Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional***

*courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.*

## **Evidence of Meeting the Standard**

### **Review of Content and Methods of Instruction**

At the College, faculty ensure that the content and methods of instruction meet accepted academic and professional standards. Faculty, including full-time and part-time employees, initiate curriculum proposals and modifications after a collaborative discussion with faculty in their respective discipline or program. Faculty ensure that the quality of courses, regardless of delivery mode, adheres to the College's L5.201, Policy on Curriculum Review and Revision ([IIA-13](#)). Faculty also follow the process approved by the Faculty Senate Curriculum Committee for course and program proposal, review, and modification ([IIA-14](#), [IIA-15](#)).

To conduct curriculum review and revision, the College uses the Kualu Student Curriculum Management (KSCM) database, an online curriculum management system that houses all approved course and program outlines ([IIA-16](#), [IIA-17](#), [IIA-18](#)). In the KSCM database, course outline requirements include learning outcomes and a discussion of how course content is appropriate, relevant, and covered in sufficient depth as well as how it reflects current theory and practice in the content area ([IIA-19](#), [IIA-20](#)). All CLOs must connect to course content, PLOs, and the College mission.

In the KSCM database, program outline requirements include the program's PLOs, mission and objectives, program curriculum plan, target (if any), resources, efficiency, and effectiveness ([IIA-19](#), [IIA-21](#)).

The College's L5.201 and L5.202, Policy on Annual Program Review, require faculty to regularly review all curriculum ([IIA-13](#), [IIA-22](#)). In order for a course or program to be created, modified, or deleted, it must be approved by the division faculty, division chair, Curriculum Committee, the Faculty Senate, instructional dean, and the vice chancellor for academic affairs (VCAA). For further discussion, see Standard [IV.A.4](#).

There are six steps in the College's curriculum approval process.

Step 1: Faculty initiate all new curriculum proposals and all curriculum modifications after a collaborative discussion with discipline faculty and advisory boards. Once faculty and/or advisory boards identify a curriculum change, the faculty proposer enters the new or modified curriculum proposal into the KSCM database.

Step 2: Faculty in the division review and approve the proposal. Once approved, the division chair submits the proposal for review by the Curriculum Committee.

Step 3: The Curriculum Committee chair assigns proposals to subcommittees for thorough review. If needed, the subcommittees suggest changes to the proposer. Once the proposer updates the proposal, the full Curriculum Committee membership votes on it.

Step 4: After the Curriculum Committee approves a proposal, the Faculty Senate reviews it. At this time, the Faculty Senate may request additional changes or approve the proposal.

Step 5: The Faculty Senate forwards approved proposals to the appropriate instructional dean for review and approval.

Step 6: The VCAA performs the final review and approval. Upon final approval, the College publishes the new or revised curriculum change in the next Catalog.

At any step in the process, the reviewer can deny the proposal or return it to the proposer for further updates and changes.

DE courses follow the same curriculum review and revision procedure as courses delivered face-to-face. The College encourages all faculty members interested in teaching in a DE format to attend training for Lulima, the UH System's collaborative learning environment based on the Sakai platform. The Educational Media Center (EMC) regularly offers additional training classes on effective online instructional design and online facilitation. For a discussion of the College's compliance with the Accrediting Commission for Community and Junior Colleges (ACCJC)'s Distance Education and Correspondence Education Policy, see the [Certification of Continued Institutional Compliance with Commission Policies](#).

The OIP and the faculty member who will lead a study abroad trip work together to select courses to offer to participating students during the trip. They select the host institution based on its ability to provide courses that are consistent with the College's CLOs. The division offering the courses assesses the actual course content and CLOs in the program review process. Site visits by faculty and student evaluations conducted at the end of study abroad programs help the OIP determine the other components of the program, such as services, location, and housing.

The Language Arts Division offers ELI courses. Although the courses are noncredit, faculty developed the courses and followed the Curriculum Committee process for new course approval. ELI students receive eighteen hours of English instruction per week in reading, writing, listening, speaking, grammar, pronunciation, and U.S. culture. To meet the needs of students at all levels of English proficiency, the ELI offers four levels of instruction: beginning, low intermediate, high intermediate, and advanced. ELI faculty regularly assess these courses.

### **Continuous Improvement through Program Review**

Faculty continuously improve instructional courses and programs through the annual program review process. All instructional programs follow the program review process regardless of the program type and delivery mode. Through program review of each academic program and educational unit, faculty evaluate a program's relevance, appropriateness, currency, and achievement of learning outcomes. The program review process includes the assessment results of CLOs and PLOs as well as an analysis of demand, efficiency, effectiveness, and course and program completion data.

## **Analysis and Evaluation**

Faculty ensure that the quality of courses, regardless of delivery mode, adheres to the College policies on curriculum development and review. Both new and revised curricula go through an extensive process to ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about faculty and curriculum development at the College. Participants discussed how the College meets Standard II.A.2 and how the College can improve in these areas. They said that the College has numerous faculty and curriculum development programs. The Teaching Excellence Program, the EMC training, assessment workshops, and workshops during convocation week are a few of the opportunities available for faculty professional development. For curriculum development, faculty use peer and student evaluations to make improvements. Faculty expressed a need for more professional development and more opportunities to collaborate with colleagues. Suggestions include online professional development, professional development at the Wai‘anae Moku Education Center, and more division-level opportunities ([IIA-12](#)).

### II.A.3.

*The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution’s officially approved course outline.*

## **Evidence of Meeting the Standard**

### **Assessment of Learning Outcomes**

The College has identified learning outcomes for all courses, programs, certificates, and degrees. The College established L5.210, Policy on Assessment, which requires systematic assessment of outcomes for all areas of the College, including the establishment of appropriate learning outcomes and other outcome measures, the administration of assessment tools, the analysis of results, and the use of such results to inform and improve instructional practices and institutional effectiveness ([IIA-23](#)). The Assessment Committee and the Office of Planning, Policy, and Assessment (OPPA) work together to ensure that all learning outcomes adhere to L5.210.

Faculty are responsible for developing, reviewing, and revising all learning outcome statements. The College’s L5.201, Policy on Curriculum Review and Revision, requires each division to ensure that all disciplines review and assess their courses at least once in a five-year cycle ([IIA-13](#)). This review must include an assessment of learning outcomes. If a course requires modification, faculty submit a modified curriculum proposal for discussion and approval using the process outlined in Standard [II.A.2](#). The review process also helps the College identify which courses are obsolete and should be removed from the Catalog, which ensures that course offerings are current.

Below is the Assessment Committee’s course assessment status for 2017-2018 (see Table 50). The average total is 81 percent, which meets the College’s goal of 80 percent. In previous years, the College reported on course assessment for courses taught in the academic year. However, the reporting denominator did not include courses that were in the Catalog but not being taught. For the ACCJC 2017 Annual Report, the VCAA changed the reporting denominator to include all courses in the Catalog which led to a drop in the percentage in courses assessed from 90.4 percent to 81.2 percent ([IIA-24](#)). The VCAA asked all divisions to review courses listed in the Catalog for currency and relevance and to delete courses that are no longer taught.

Table 50.  
*Course assessment status for 2017-2018.*

Division	Number of Courses in Catalog	Number of Courses Assessed	Percentage of Courses Assessed
Arts and Humanities	126	93	73.8%
Business	65	46	70.8%
Counseling	9	4	44.4%
Language Arts	81	69	85.2%
Math and Science	143	125	87.4%
Professional Arts and Technology	67	53	79.1%
Social Science	67	63	94.0%
Total	558	453	81.2%

Faculty regularly assess learning outcomes at the course and program levels. The College conducts program reviews annually using the ARPD, which analyzes student attainment of PLOs as well as other factors such as demand, efficiency, effectiveness, and degree and/or certificate completion. Every four years, the College requires that each academic program, educational unit, and support area complete a Comprehensive Review and Evaluation (CRE). During the year that a program, unit, or area completes a CRE, it does not need to complete an ARPD since elements of the ARPD are included in the CRE.

In 2016, the College completed a CRE for the AA in Liberal Arts degree, which assessed the general education learning outcomes (GELOs) ([IIA-25](#)). The AA Degree Program Review Task Force submitted a report that provided information about the assessment of GELOs for written communication, critical thinking, and cultural diversity ([IIA-26](#)). Results indicated that 58 percent of students met or exceeded proficiency in written communication, 56 percent of students met or exceeded proficiency in critical thinking, and 30 percent of students met or exceeded proficiency in cultural diversity. Assessment results indicate that there is an overall need for improvement for these GELOs. Specific areas that need improvement are developing a perspective on an issue or problem, developing and gathering appropriate content and credible sources, and analyzing and evaluating an issue or problem.

To ensure ongoing assessment of the GELOs of the AA in Liberal Arts degree, the task force recommended to the Faculty Senate that writing-intensive instructors who participated in the study should review the results, discuss different strategies to make improvements, select and implement a strategy, and re-assess student learning in written communication and critical thinking. The task force also recommended that the College identify additional courses in the associate degree program that address cultural diversity and locate better assignments or student work to measure cultural diversity because the sample size was lower than expected. In 2017-2018, the degree task force is assessing the PLOs for oral communication, quantitative reasoning, information literacy, arts and humanities, and social sciences ([IIA-27](#)).

### **Learning Outcomes in Course Syllabi**

All approved and current course outlines include learning outcome statements. In accordance with L5.201, all course syllabi, regardless of delivery mode, must include standardized and approved elements such as course title, description, learning outcomes, instructor contact information, course number, location, times, and relevant policies ([IIA-13](#)).

Students receive a course syllabus that includes learning outcomes from the College's official course outline. Discipline and program coordinators and division chairs review syllabi for compliance with course outline requirements. The College expects all instructors to include approved learning outcomes in their syllabi and to provide syllabi to all students in their courses. Additionally, the VCAA reminds faculty at the beginning of each semester of the required syllabi content and the need to disseminate syllabi to students ([IIA-28](#)).

### **Analysis and Evaluation**

Two established institutional policies and procedures, the ARPD and the CRE, ensure the regular assessment and approval of learning outcomes for every course, program, certificate, and degree. Regardless of delivery method, students in every class section receive syllabi that include the officially approved learning outcomes. Discipline and program coordinators and division chairs review syllabi for compliance with course outline requirements each semester. In 2016, the College assessed three of the GELOs for the AA in Liberal Arts degree. Only 30 to 58 percent of students met or exceeded outcomes for the GELOs assessed, indicating a need for improvement. In their 2016 report on assessing the AA in Liberal Arts, the AA Degree Program Review Task Force made recommendations to Faculty Senate on strategies for improvement and is currently assessing the remaining GELOs ([IIA-26](#)).

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about course assessment and program assessment at the College. Participants discussed how the College meets Standard II.A.3 and how the College can improve in these areas. They said that all course syllabi contain the learning outcomes, which have been approved by the Curriculum Committee. Course assessments are on a five-year review process which ensures currency. Tk20 offers some challenges because it is not intuitive. Additionally, faculty seek sample assessment material and mentoring and support ([IIA-12](#)). For further discussion of Tk20 and outcomes assessment, refer to the College's [Quality Focus Essay](#)

#### II.A.4.

*If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.*

### **Evidence of Meeting the Standard**

#### **Pre-Collegiate Level Curriculum**

The College offers pre-collegiate level curriculum in math, English, ELI, and English as a Second Language (ESL). Pre-collegiate courses are numbered below 100. College-level credit courses are numbered from 100-299. Pre-collegiate level courses go through the same curriculum approval and review process as college-level courses. Faculty are responsible for making decisions in regards to credit type, location, and delivery mode of pre-collegiate courses. The Catalog provides a complete listing of pre-collegiate level courses ([IIA-29](#), [IIA-30](#), [IIA-31](#), [IIA-32](#)).

#### **Alignment of the Pre-Collegiate Level Curriculum and College-Level Curriculum**

The College provides students enrolled in pre-collegiate level courses with clear and efficient pathways so that they are able to learn the knowledge and skills necessary to advance to and succeed in college-level courses. The University of Hawai'i Community Colleges (UHCC) system implemented the Acceleration Initiative at all seven campuses to alleviate success gaps and enhance the graduation rate for underrepresented students. This initiative is aligned with the *UHCC Strategic Directions 2015-2021*, UHCC Policy (UHCCP) 5.213, Time to Degree: Co-Requisite, and the College's *Strategic Plan 2015-2021* ([IIA-33](#), [IIA-34](#), [IIA-35](#)). As part of the Acceleration Initiative, the College has accelerated learning tracks in math and English, which are designed to move students into college-level courses. The College intends for the initiative to increase college-level math and English completion rates and streamline the developmental math and English sequence. The Catalog provides descriptions of the available tracks ([IIA-36](#)).

Math and English faculty from each of the seven UHCC campuses participated in discussions in summer 2015 about course content and course numbering. The system formed an ad hoc committee for grading options to determine the appropriate grading options for co-requisite courses for math and English ([IIA-37](#)). Math and English disciplines implemented these system agreements by offering an appropriate number of course sections to meet the anticipated student demand.

Developmental math and English faculty regularly collaborate to discuss curricula and frequently provide and participate in professional development activities so they can respond to student needs. At the College, instructors in the Accelerated Learning Program designed and facilitated two summer workshops to address curricular and non-cognitive issues including accommodating students with special needs, integrating updated technological tools, and utilizing authentic learning to increase global, real-world application of learning outcomes. Developmental education instructors attend local as well as national conferences as part of their ongoing training and meet regularly to make decisions about their courses.

The ELI offers eighteen hours per week of English language instruction for international students who seek academic English preparation for college-level coursework and study

(IIA-38). The mission of the ELI is to provide high quality ESL instruction and orientation in U.S. culture to international students, professionals, and other English language learners by means of an intensive English program (IIA-39). Additionally, the Language Arts Division offers 12 pre-collegiate ESL courses to meet the needs of beginning to advanced English language learners and prepare students for college-level courses (IIA-40). The courses are sequenced so that each course builds upon the linguistic knowledge and skills taught in previous courses.

### **Evaluation of Student Progress and Learning in Pre-Collegiate Level Courses**

One of the strategic plan goals is to increase college-level math and English completion rates. Results of the fall 2016 cohort are very positive. For math, college-level completion rates increased by over 20 percent from fall 2013 to fall 2016 for students who placed one level below college level. In addition, eight percent of students who placed more than one level below college-level math completed a college-level math course (IIA-41). English college-level completion rates increased by over 40 percent for students who placed one level below college level. For students who placed more than one level below college level, there were no students who completed college-level English in fall 2013, whereas 38 percent completed college-level English in fall 2016 (IIA-41).

Pre-collegiate level courses go through the same assessment process as college-level courses. Since 2012, math faculty have assessed all CLOs for each developmental math course. The grading policy for each developmental math course requires that a student demonstrate proficiency in all CLOs in order to earn credit for the course. The overall results show that developmental math students have demonstrated acceptable levels of mastery of each CLO. Pre-collegiate level English courses are aligned with college-level English courses in agreed upon CLOs (IIA-42). Each semester, Accelerated Learning Program instructors engage in assessment of specific CLOs to assess English 22 sections in the program. Instructors assess these students' pre- and post-writing samples and discuss changes to curriculum.

The developmental math and English programs go through the same program review process as all campus instructional and support programs. Each year, the ARPD evaluates the developmental math program. Results of the 2016 Remedial/Developmental Math ARPD indicate that the program's efficiency is "healthy" while the effectiveness is "unhealthy" (IIA-43). Although the program did not meet all the UHCC System benchmarks, persistence and success rates from one-level below college level to college level showed an increase from the previous year. With the shortened course sequence and math pathways, which the College fully implemented in fall 2016, the developmental math program expects a more significant increase in persistence and success rates.

The 2016 ARPD developmental English results demonstrate "healthy" efficiency with "unhealthy" effectiveness (IIA-44). Retention for all levels of developmental English courses hold consistent at over 90 percent. Successful completion of the developmental English courses for students placing one-step below college level show an annual increase of three percent from 2013-2016, the period covered by the 2016 ARPD. Given the streamlined pre-college pipeline and curricular modifications to facilitate effectiveness, English faculty expect increases in persistence, retention, course completion, and subsequent student success for all who enter the College at the developmental level.

The OIP conducts the following three assessments and report results through the ARPD process: front desk inquiries, study abroad inquiries and applications, and international student applications. In 2016, the OIP staff resolved 87 percent of the front desk inquiries, which is a 42 percent increase in the satisfaction of the service provided. For study abroad, eight percent of the inquiries and appointments converted to study abroad enrollments; the low number is partly due to a canceled study abroad trip. Finally, 80 percent of the international student applications converted to enrollment in credit programs, which is a four percent increase from the previous year ([IIA-45](#)).

For ELI courses, ELI instructors conduct assessment and report results through the ARPD process. From 2013 to 2017, the ELI faculty assessed CLOs of all 16 classes offered in ELI at least once ([IIA-46](#)). The OIP also assesses the ELI's program efficiency by looking at enrollment, data collected from ELI students' enrollment in a credit program, and the percentage of ELI students who successfully complete ESL 21/22. At the end of each session, the OIP conducts a student survey for each student exiting the ELI program and uses the data to analyze and improve services. Faculty also analyze the persistence and completion rates of ELI students as well as the success rate of students exiting the ELI program and entering the degree program until their graduation and/or transfer ([IIA-47](#)).

ESL faculty regularly assess pre-collegiate ESL courses using multiple measures, including tests of students' reading rates and comprehension, rubrics for multi-draft writing assignments, grammar pre-tests and post-tests, listening comprehension tests, and rubrics for oral presentations. To earn credit and advance to the next course in the sequence, students must demonstrate proficiency in all CLOs for the course. The course assessment results indicate that outcomes are consistently met. ESL faculty use data from course assessments to inform discussions of curriculum and student achievement in the sequence of ESL courses.

### **Analysis and Evaluation**

Committed to open access and student success, the College recognizes the diverse needs of its student population by offering developmental education curricula that promotes acceleration to and preparation for college-level courses. Pre-collegiate level courses are numbered below 100 to distinguish them from college-level courses.

#### **II.A.5.**

*The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)*

### **Evidence of Meeting the Standard**

#### **Policies and Procedures for Institutional Quality**

The College follows practices common to American higher education in order to demonstrate the quality of its degrees and programs. L5.201 defines these practices ([IIA-13](#)). The policy requires each discipline to review its own courses once every five years "ensuring accuracy

of core outlines and their academic rigor, integrity and currency; and continued articulation of courses in the UHCC System, should that be the case” ([IIA-13](#)).

### **Curriculum Review Process**

Faculty in the appropriate discipline use an approved criteria to decide the breadth, depth, rigor, sequencing, time of completion, and synthesis of learning for a course. During curriculum review, faculty address specific questions on breadth, depth, rigor, and sequencing ([IIA-20](#), [IIA-48](#), [IIA-49](#)). To ensure the appropriate sequencing of courses, guidelines require in the absence of prerequisites that the proposer provide evidence that the skills learned earlier in the course are reinforced and enhanced by later activities ([IIA-49](#)).

To ensure that students complete courses in their program in a timely manner, the curriculum review process asks the proposer of a program to provide a program curriculum plan that lists all the courses and credits within the program ([IIA-50](#)). The program curriculum plan also indicates the suggested course sequence for students to take each semester to finish the degree or certificate within the planned length of the program. The Catalog includes the course sequences, which the College uses to define the pathways in STAR Guided Pathway Selection (GPS). To ensure that a program demonstrates a synthesis of learning, the proposer lists the PLOs of the program being modified or proposed ([IIA-51](#)).

A DE course follows the same curriculum review procedures as a face-to-face course but requires additional evidence to demonstrate that the course maintains rigor and breadth, pedagogical development, and technology integration through electronic delivery. The proposer must state the methods used to ensure timely and effective interaction that follows the College’s DE Guidelines ([IIA-52](#), [IIA-53](#)). The proposer also must state the technological skills students will need, the academic support and technology training the instructor will need, and how the course will integrate and use technology ([IIA-53](#), [IIA-54](#), [IIA-55](#)).

After the proposer has provided supporting evidence that the course or program demonstrates breadth, depth, rigor, sequencing, time to completion, and learning outcomes, the proposer sends the course outline to the division chair. Next, the Faculty Senate Curriculum Committee reviews the course or program in subcommittees and then at regular meetings. During a meeting, members discuss the evidence provided by the proposer to evaluate whether the course or program represents high-quality and appropriate instruction as determined by the curriculum review guidelines. If the Curriculum Committee requires revisions, the subcommittee sends the proposal back to the proposer who makes the modifications necessary for approval. The Curriculum Committee chair sends approved proposals to the Faculty Senate for further approval ([IIA-56](#), [IIA-57](#)). For a detailed discussion of the Curriculum Committee, see Standard [II.A.2](#).

All degree programs require a minimum of 60 semester credits at the associate level including general education coursework. The College publishes degree programs and program requirements in the Catalog ([IIA-58](#)). Degree credits are consistent with levels of quality and rigor appropriate to higher education.

## **Analysis and Evaluation**

To ensure the College's degrees and programs follow practices common to American higher education, L5.201, Policy on Curriculum Review and Revision, has a well-established process on how to develop and revises curricula. This process includes specifically addressing issues related to length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. As identified in the Catalog, all degrees require a minimum of 60 semester credits.

II.A.6.

*The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)*

## **Evidence of Meeting the Standard**

The College has made great strides with the development of program pathways and ensuring students can take the required courses needed for a certificate or degree in a timely manner. Beginning in 2013, the Catalog included two-year degree plans for most degrees, and with STAR GPS registration, all degrees have a preferred program pathway.

### **Course Scheduling Process**

The College schedules courses in alignment with program pathways so that students can complete a degree or certificate program within a period of time consistent with established expectations for higher education. The Catalog includes program maps, or suggested courses by semester, for a student to take and earn a certificate and/or degree in a timely manner ([IIA-59](#)). In addition, the UH System uses STAR, a web-based tool that provides students with information about courses that they have completed and identifies courses that students still need to complete for a certificate or degree ([IIA-60](#)). Students can see their progress towards degree completion by selecting the Academic Journey tab.

In 2016, the UH System designed and implemented STAR GPS, an online registration system, to show students which courses should be taken next to assist with their program completion ([IIA-61](#)). STAR GPS is a web-based tool that supports students in reaching their academic goals by tracking degree requirements, describing different pathways and majors, and charting progress toward graduation. If a student registers for an unnecessary course and/or takes a course out of sequence, STAR GPS notifies the student and recalculates the time to completion. For a more detailed discussion of STAR GPS, see Standard [II.C.6](#).

In addition, STAR GPS has a dashboard available to administrators and division chairs. The dashboard, which is updated daily, shows any courses that are at capacity that students need to complete their program. It also indicates how many students have attempted to register for the course. This provides just-in-time information regarding which courses are in high demand so division chairs can add an additional section.

As an open access community college, the College regularly accepts students who require developmental education. Therefore, students may take longer than the prescribed two years to complete a certificate, degree, or academic goal. To address this issue, developmental

education efforts in math and English have moved into self-paced acceleration, which is discussed in more detail in Standard [II.A.4](#).

Division chairs are responsible for creating the schedule of classes based on the needs of students ([IIA-62](#)). The College schedules classes to meet the needs of the diverse student population. Classes are held during the day, evening, weekends, at two locations, and through DE. Classes begin as early as 7:30 a.m. and end by 8:45 p.m.

### **Evaluation of Course Scheduling**

The College uses data to evaluate the degree to which course scheduling allows students to complete each level of a course sequence or program. In fall 2016, the UHCC System provided all of the campuses with a course scheduling and space utilization evaluation with an outside consultant Ad Astra ([IIA-63](#)). The College's evaluation indicated that the College was scheduling its classes in an appropriate manner. Classroom usage was relatively high, and class fill rates were also within an appropriate range.

STAR GPS is being designed to provide additional analysis on course scheduling and its impact on student completion rates. Currently, the dashboard provides just-in-time information on areas that need adjustment in the upcoming semester.

The Faculty Senate Alternate Class Schedule Ad Hoc Committee gathered and analyzed data from students, discipline coordinators, and faculty on the viability of shifting the College's class offerings to a four-day schedule with 75-minute classes primarily scheduled on Monday and Wednesday and Tuesday and Thursday. The analysis resulted in the Faculty Senate approving a motion that flexible scheduling be implemented in spring 2019 ([IIA-64](#), [IIA-65](#), [IIA-66](#)). This alternate schedule will still offer once-a-week lab classes on Friday. This motion is currently under advisement with administration.

### **Analysis and Evaluation**

The Catalog includes program maps to help students earn a certificate and/or degree in a timely manner. In 2016, the UH System designed and implemented STAR GPS, a new online registration system to expedite program completion. The College offers DE, day, evening, and weekend classes at two sites to facilitate student success. Since the College regularly accepts students requiring developmental education, some students may take longer than the prescribed two years to complete a certificate, degree, or academic goal. The College is considering the implementation of flexible scheduling in spring 2019.

II.A.7.

*The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.*

### **Evidence of Meeting the Standard**

#### **Students Assessed Below College-Level Math and English**

As an open-access institution, the College has more than 50 percent of currently enrolled students testing below college level for math and/or English. To address the situation, the

College has worked for several years to develop accelerated programs. The College scaled up these programs in 2016-2017 as part of the Acceleration Initiative, which is discussed in detail in Standard [II.A.4](#).

### **Use and Evaluation of Delivery Modes**

The College utilizes a wide range of delivery modes in order to meet the needs of its diverse student populations. These delivery modes are face-to-face, hybrid, and DE. At the Pearl City campus, face-to-face courses account for 75 percent of all course offerings in a semester. The College has emphasized the development of DE courses and programs with 22 percent of course sections offered in this mode. The College also maintains the Wai‘anae Moku Education Center, which offers six percent of all of the College’s courses to meet the needs of this specific rural student population.

Faculty consider student demand, course fill rates, course evaluations, and other program and course review data to determine which modes are most effective for students and most appropriate for the program. In addition, some programs have identified the use of DE as the primary means of delivering the program’s courses. For example, the College’s AA in Teaching, the only associate degree of its kind in the UHCC System, delivers its program primarily through DE to meet the needs of students across the state interested in pursuing teaching ([IIA-67](#)). The Business programs have also found high demand for online course delivery. Finally, the College created the Health Information Technology program with online offerings as part of its development plan.

In 2017-2018, the UH System announced its intention to develop five-week online courses to target the working adults in Hawai‘i. Leeward will be taking a lead role in the development of this model due to its strong DE courses and support services ([IIA-68](#)).

### **Use and Evaluation of Teaching Methodologies**

Faculty effectively use teaching methodologies to support the success of the College’s diverse student populations. Faculty in the appropriate discipline use an approved criteria to decide each program’s breadth, depth, rigor, sequencing, time of completion, and synthesis of learning. During the curriculum review process, faculty address a course’s methods of instruction, a content area that appears in the KSCM database ([IIA-69](#)). Additionally, faculty have access to a variety of programs, tools, and committees dedicated to helping them adapt their teaching methodology to address students’ different learning styles. For a more detailed discussion of these professional development opportunities, see Standard [III.A.14](#).

For those teaching DE courses, the DE Committee created a mandatory DE training session, which includes an instructor self-evaluation survey on practices used for interaction and collaboration with students ([IIA-70](#)). In addition, the DE Committee developed best practice guidelines regarding course design, interaction and collaboration, and learner support services and implemented the DE Liaison program to help faculty connect with campus resources and other colleagues who regularly teach online ([IIA-52](#)). In 2018-2019, the DE Committee plans to revise the DE peer evaluation form to provide feedback on regular and substantive interaction. The iTech website provides professional development and learning resources to facilitate quality online learning ([IIA-71](#)). For further discussion of these professional development opportunities, see Standard [III.A.14](#).

Leeward's Innovation Center for Teaching and Learning focuses on providing quality workshops for instructional faculty for curriculum development, curriculum improvement, and access to new tools and resources ([IIA-72](#)). For example, in November 2017 the Teaching Guidelines and Issues for Faculty workshop series conducted a workshop on teaching techniques and technology tips ([IIA-73](#)). For further examples of workshops for instructional faculty on teaching methodologies, see Standard [III.A.14](#).

A recent faculty-driven initiative is Open Educational Resources (OER) and no cost textbooks courses. Faculty have participated in professional development workshops and work with the EMC faculty and librarians to identify, revise, or develop textbook resources for their courses that are no cost to the students. For further discussion of OER, see Standards [I.A.3](#) and [I.C.6](#).

### **Use and Evaluation of Learning and Student Support Services**

The College supports the success of all its students by identifying the diverse needs of its student populations and providing appropriate learning support services. The EMC provides resources for students in DE and face-to-face classes ([IIA-74](#)). For example, the EMC manages a website called iLearn that is dedicated to DE ([IIA-75](#)). Additionally, online students have access to online tutoring support through the Learning Resource Center and through Brainfuse, an online tutoring service. The Pasefika Passion Pipeline aims to introduce Pacific Islander students to higher education and to support their success within the UH System ([IIA-76](#), [IIA-77](#)). The Access to Education program at the Wai'anae Moku Education Center works with students who were formerly incarcerated and/or in recovery from substance abuse. When recruitment was first underway for this program, it became clear that many prospective students had not obtained a high school diploma, making them ineligible for financial aid and scholarships, so the Access to Education program assists the prospective students navigate these issues ([IIA-78](#)). The Wai'anae Moku Education Center temporarily suspended recruitment into this program at the end of 2017 with the resignation of the program counselor. See Standard [II.B](#) for more information on the College's learning support services and Standard [II.C](#) for more information on the College's student support services.

### **Analysis and Evaluation**

The College continuously evaluates the effectiveness of all instructional delivery methods and teaching methodologies and adjusts accordingly to changing student needs through innovative educational programs and support services. The College's wide variety of learning and student support programs demonstrates its commitment to support equity for all students.

II.A.8.

*The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.*

## **Evidence of Meeting the Standard**

The College does not use department wide course and/or program examinations.

The College provides students with opportunities to demonstrate competency and earn course credits through various options such as exams and portfolios. The College's Prior Learning Assessment (PLA) Program identifies these opportunities ([IIA-79](#), [IIA-80](#)). The PLA Manual Committee has met several times in 2017-2018 to continue updating the PLA Manual and PLA scoring guide ([IIA-81](#)). The PLA Manual Committee has met with the Counseling and Advising unit to inform them of PLA process and options ([IIA-79](#)). In addition, the committee developed a portfolio-based assessment course on Lualaba for any student in the UH System to earn course credit by documenting life/work experience. This course was part of a pilot project funded by the UH System office.

The pilot program for PLA uses a portfolio-based assessment course to award college credits for incoming students' life experiences. The UH System has provided funding support for instructional faculty to develop portfolio-based assessment courses and assess the work submitted by students. The UH System also provides a stipend to students to fund the tuition cost of the course through a Perkins grant. The Teacher Education program agreed to pilot this new assessment method in spring 2017. The program faculty recruited 14 educational assistants from the Leeward area and had them attempt portfolio-based assessments for two education courses in the Certificate of Competence in Special Education. At the end of the spring semester, 13 of the students had successfully completed the portfolio-based assessment and earned credit for at least one of the education courses ([IIA-82](#)). These students are now enrolled in additional education courses and are on track to earn this certificate with some planning to work towards an AA in Teaching degree.

## **Analysis and Evaluation**

The College does not use department wide course and/or program examinations. The College has processes in place to ensure reliability for prior learning assessments and continues to evaluate current procedures for effectiveness.

II.A.9.

*The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)*

## **Evidence of Meeting the Standard**

### **Awarding of Credits, Degrees, and Certificates**

The College awards course credits based on student attainment of learning outcomes. The College awards degrees and certificates based on student attainment of PLOs. Each instructor is responsible for assessing students' success in meeting the learning outcomes in the approved course outline in KSCM. Instructors design evaluation methods such as exams, papers, and projects to measure student success in meeting these outcomes. In addition,

instructors embed ongoing assessment of learning outcomes in each course. For detailed discussion of outcomes assessment, see Standards [I.B.2](#), [II.A.3](#), and [II.A.16](#).

The College ensures that academic credit hours awarded conform to the Carnegie Unit, which is a commonly accepted practice in American higher education and accepted by ACCJC. Course outlines, corresponding syllabi, and class schedules provide evidence that faculty assign an appropriate amount of work in order to conform to the Carnegie Unit. In addition, the College adheres to federal and state guidelines that define a course credit hour.

### **Policies on Awarding of Credits, Degrees, and Certificates**

UHCCP 5.203, Program Credentials: Degrees and Certificates, sets graduation requirements for associate degrees and certificates ([IIA-83](#)). These requirements include the completion of 60 baccalaureate-level semester credits, the evaluation of the student's work, and the fulfillment of stated outcomes with a cumulative 2.0 GPA or higher for all courses needed to meet the degree requirements.

UHCCP 5.228, Credit Hour, guides the awarding of course credits, degrees, and certificates ([IIA-84](#)). The policy defines a credit hour as 50 minutes to one hour of class or faculty instruction and a minimum of two hours of work per week outside of class over approximately 15 weeks. Alternately, a credit hour can be earned through an equivalent amount of work for other activities such as DE instruction, laboratory work, studio work, and internships.

### **Analysis and Evaluation**

The College awards course credit, degrees, and certificates based on student attainment of learning outcomes. UHCCP 5.203 sets graduation requirements for associate degrees and certificates that reflect accepted norms in higher education. The College academic credit hours awarded conform to the Carnegie Unit, which is a commonly accepted practice in American higher education and accepted by ACCJC.

II.A.10.

*The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)*

### **Evidence of Meeting the Standard**

#### **Policy and Procedures on Transfer of Credit**

The College adheres to Executive Policy (EP) 5.209, Student Transfer and Inter-Campus Articulation, regarding the transfer of classes from and to other UH System campuses. The policy states that students who have earned an articulated associate degree from a UHCC campus shall be accepted as having filled the general education core requirements at all other UH System campuses ([IIA-85](#)).

The College has transfer-of-credit procedures that it clearly communicates to its students. The UH System Course Transfer Database, searchable by students, includes course evaluations and equivalencies for UH System campuses and other institutions ([IIA-86](#)). Students receive notice of credit transfer policies from the Admissions and Records office, counselors, the College website, and transfer workshops held throughout the semester ([IIA-87](#)). The Catalog provides clear information for credit transfer ([IIA-80](#)). Options for prior learning assessment include credit by institutional exam, credits earned at foreign colleges and universities, college transfer credits, equivalency examinations, portfolio-based assessment, and non-collegiate sponsored education credit. Students can request a transcript review via the College website ([IIA-88](#)). The transfer information section in the Catalog provides information for students who are planning to transfer to a UH four-year institution or an institution outside the UH System. Additionally, the College website provides information on prior learning assessment ([IIA-89](#)).

The University of Hawai‘i at Mānoa (UH Mānoa) created a dual-admission, dual-enrollment program, Ka‘ie‘ie, for students who are pursuing a four-year undergraduate degree, but choose to begin their degree at Leeward CC or one of the other UHCC campuses ([IIA-90](#)). Ka‘ie‘ie focuses on students successfully transferring from UHCC campuses to the Mānoa campus while completing their academic degrees.

A similar transfer agreement, Mānanawai, exists with the University of Hawai‘i-West O‘ahu (UH West O‘ahu). This agreement provides for a smooth transfer between Leeward CC and UH West O‘ahu with a focus on dual-admission and dual-enrollment ([IIA-91](#)).

The College certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses when transfer credits fulfill degree requirements. When accepting transfer credits to fulfill degree requirements that fall outside of the UH System or articulation agreements, the College certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses by reviewing and comparing syllabi, which is normally done by academic advisors. When academic advisors are unsure, a transcript evaluation request form is sent to the appropriate division or discipline for review and determination.

### **Articulation Agreements**

The College develops articulation agreements where patterns of student enrollment exist. The College has multiple articulation course and program agreements across the UH System ([IIA-92](#)). For example, students who complete the associate degree with an Academic Subject Certificate in Plant Bioscience Technology at the College may transfer as classified students to the Bachelor of Science in Tropical Plant and Soil Science at UH Mānoa ([IIA-93](#)). Students who complete the Associate in Science (AS) degree with a pre-engineering concentration at the College may transfer as classified students to the Bachelor of Science in Engineering at UH Mānoa ([IIA-94](#)). Similarly, students who complete the AA in Teaching degree at the College are eligible to apply to baccalaureate Teacher Education programs at UH Mānoa, UH West O‘ahu, and Chaminade University ([IIA-95](#)).

## **Analysis and Evaluation**

The College provides clearly stated transfer-of-credit information from a variety of sources including the Admissions and Records office, counselors, the College website and Catalog, a course transfer database, and transfer workshops. Additionally, a procedure is in place to ensure that learning outcomes for courses transferred to the College are comparable. To further facilitate student success, an associate degree from the College fulfills the general education core requirements at all other UH System campuses. Additionally, the College has multiple articulation course and program agreements across the UH System and with some private colleges.

### **II.A.11.**

*The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.*

## **Evidence of Meeting the Standard**

### **Programmatic Learning Outcomes and Competencies in the Accreditation Standard**

The College includes seven specific learning outcomes in all its instructional programs in addition to other program-specific learning outcomes. These outcomes, which the College identifies as GELOs, are critical thinking; technology and information literacy; oral communication; quantitative reasoning; arts, humanities, and sciences; cultural diversity and civics; and written communication ([IIA-96](#)). Each GELO is accompanied with a list of academic skill standards. Table 51 demonstrates how the College's GELOs correspond to the competencies identified in this Accreditation Standard.

Table 51.

*Alignment of GELOs and Competencies in Standard II.A.11*

<b>GELO</b>	<b>GELO Statement</b>	<b>Competency in Standard II.A.11</b>
Critical thinking	Make critical judgments and apply critical reasoning to address challenges and solve problems.	Analytic inquiry skills
Technology and information literacy	Make informed choices about uses of technology and information literacy for specific purposes.	Information competency Ethical reasoning
Oral communication	Gather information appropriately and communicate clearly both orally and in writing.	Communication competency

<b>GELO</b>	<b>GELO Statement</b>	<b>Competency in Standard II.A.11</b>
Quantitative reasoning	Use numerical, symbolic, or graphical reasoning to interpret information, draw valid conclusions, and communicate results.	Quantitative competency
Written communication	Use writing to discover, develop, and communicate ideas appropriately.	Communication competency
Arts, humanities, and sciences	Understand the content and use the methodology of the major areas of knowledge: arts, humanities, natural sciences, and social sciences.	Ethical reasoning  Ability to engage diverse perspectives
Cultural diversity and civics	Appreciate the values and beliefs of diverse cultures and recognize responsibility for local, national, and global issues.	Ethical reasoning  Ability to engage diverse perspectives

All students at the College must meet the minimum general education credit requirements in order to be awarded an AA in Liberal Arts, an AA in Teaching, an Associate in Science (AS), an AS in Natural Science, or an Associate in Applied Science (AAS) degree. This requirement ensures that all students are exposed to the College's GELOs, which represent the minimum outcomes expected of students who have completed their general education experiences. Each course included in the general education curriculum should address at least one of that GELO's academic skill standards.

### **Assessment of Programmatic Learning Outcomes**

The course assessment process ensures that each course in the general education curriculum addresses at least one of the GELOs. In addition, courses are mapped to the PLOs and GELOs in Tk20. The College has focused mapping efforts on CTE programs and those courses that are most commonly taken for the AA in Liberal Arts degree. For an in-depth discussion of how the College assesses its GELOs through the AA degree, see Standard [II.A.3](#).

Faculty establish CLOs for each course included in the general education core and assess them on a regular basis. CLOs demonstrate how the course meets competencies described in the GELOs. Course core outlines, which are located in the KSCM database, list the course CLOs ([IIA-97](#)). New courses as well as those that have already been designated as fulfilling a foundation or diversification requirement must demonstrate how they meet the hallmarks established for their respective designations. (See Standard [II.A.12](#) for a discussion of these requirements.) In addition, foundations and diversification courses are subject to review by their respective review boards ([IIA-98](#)).

The College engages in a systematic evaluation of CLOs established for every course in the curriculum. This process ensures that the College is providing a high quality education to students and that students are learning. Assessment of CLOs requires that assessors evaluate the collected data and use the results as a basis for change when indicated. Each instructional division and support area integrate course and program assessments into an annual ARPD. The ARPDS are instrumental in making campus wide decisions pertaining to resource allocation as well as ensuring a high quality of education. For further discussion of the assessment of CLOs, see Standards [I.B.2](#), [II.A.3](#), and [II.A.16](#).

### **Analysis and Evaluation**

To meet the minimum general education credit requirements at the College, all students must demonstrate competency in the areas of communication, information, ethics, analytic inquiry, quantitative reasoning, and the ability to engage diverse perspectives. The College ensures level-appropriate learning outcomes through the curriculum revision and review process.

II.A.12.

*The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.*  
(ER 12)

### **Evidence of Meeting the Standard**

#### **Rationale for General Education**

The College has a carefully considered general education philosophy that it publishes in the Catalog. This philosophy asserts that “general education provides students the opportunity to develop understandings, abilities, values, and attributes which enable them to apply the knowledge, skills, and talents to make judicious decisions and analyze and solve human problems within a multicultural community” ([IIA-96](#)). The College adheres to UHCCP 5.200, General Education in All Degree Programs, and Regents Policy (RP) 5.213, General Education ([IIA-99](#), [IIA-100](#)).

#### **General Education and Degree Requirements**

The College’s rationale for general education serves as the basis for inclusion of instructional courses in the general education core curriculum. All degree programs at the College require a component of general education. The College divides its general education core requirements into two categories: foundations and diversification. The foundations requirement is intended to give students the skills and perspectives that are fundamental to undertaking higher education. Courses in the foundations category are in written communication, symbolic reasoning, and global and multicultural perspectives. The

diversification requirement is intended to ensure that students have a broad exposure to different domains of academic knowledge, while at the same time allowing flexibility for students with different goals and interests. Courses in the diversification category are in the arts, humanities, and literature; social sciences; and natural sciences.

In order to graduate with an associate degree, students must also fulfill focus requirements that identify important additional skills and discourses necessary for living and working in diverse communities. Students must complete five courses with the focus designation. These include two classes designated as writing intensive and one class in each of the following three focus requirements: Hawaiian, Asian, and Pacific issues; contemporary ethical issues; and oral communication.

Faculty determine the appropriateness of each course in the general education curriculum to ensure breadth of knowledge and promote intellectual inquiry. In order to ensure rigor in the general education requirements, the College maintains six faculty-led curriculum boards to review and analyze applications for courses to receive the appropriate designation: Foundations Focus Board; Diversification Focus Board; Writing-Intensive Focus Board; Hawaiian, Asian and Pacific Focus Board; Ethics Focus Board; and Oral Communications Focus Board. Each board reviews and approves courses in its respective area according to specified hallmarks and learning outcomes. Five of the six curriculum boards maintain a website that publishes information on its application process, hallmarks, and list of designated courses ([IIA-101](#), [IIA-102](#), [IIA-103](#), [IIA-104](#), [IIA-105](#)). The Faculty Senate General Education Committee reports to the senate on the progress of these curriculum boards but does not manage the boards in terms of membership or function ([IIA-98](#)).

The Catalog clearly states the requirements for each associate degree and the courses included in the general education curriculum for each associate degree. The College offers a wide range of general education courses through DE.

- The structure of the AA in Liberal Arts degree is explained in the Catalog ([IIA-106](#)). Graduates must have 12 credits in foundations, 19 credits in diversification, and five focus courses. The Catalog lists the qualifying general education courses ([IIA-107](#)).
- The AA in Hawaiian Studies degree is comprised of 31 credits of general education core and 3 credits of graduation requirements. The remaining 26 credits of the AA in Hawaiian Studies degree focus upon core and elective Hawaiian studies requirements ([IIA-108](#)).
- The AA in Teaching degree is comprised of 25 credits of general education core requirements and 15 credits of graduation requirements. The remaining 22 credits of the AA in Teaching degree focus upon core and elective education course requirements ([IIA-109](#)).
- All AS and AAS degrees require a component of general education. Each program determines program requirements that include at least 12 credits of general education requirements that typically include 3 credits of arts/humanities/literature, 3 credits of natural science, 3 credits of social science, and 3 credits of oral communication. The Catalog lists the courses that meet general education requirements for these degrees and specific degree requirements for CTE programs ([IIA-110](#)).
- The AS in Natural Science degree is comprised of general education core requirements of 29 to 33 credits and concentration requirements for the remaining

credits up to 60 credits ([IIA-111](#)). The program provides a pathway for students planning to transfer into a Science, Technology, Engineering, and Math (STEM) program at UH Mānoa.

General education courses in specific disciplines support the institutional learning outcome for values, citizenship, and community and can be used to satisfy a general education requirement. Philosophy, global studies, political science, and education courses focus on ethical principles. Psychology, sociology, communication, and speech courses focus on civility and interpersonal skills.

Anthropology, Asian studies, theater, East Asian language and literature, Hawaiian studies, and humanities courses support cultural diversity. Art, music, dance, drama, literature, and history courses provide students with historical and aesthetic sensitivity.

American studies, political science, interdisciplinary studies, and women's studies courses emphasize civic, political, and social responsibilities. These courses provide students with opportunities to develop as ethical and global citizens.

Through relationships with partner entities abroad, the Office of International Programs brings short-term groups of students to the College, which provides direct interaction opportunities for Leeward students with their counterparts from another country and culture. These short-term programs include maximum interaction for students from both institutions and learning experiences about each other's cultures. Through partnerships with host institutions for study abroad programs, the College offers students the opportunity to live and study in another culture. As students gain experiences along the continuum of global competency, from coursework at home to study abroad, they become increasingly more successful with intercultural interactions and more culturally sensitive ([IIA-112](#)).

### **Analysis and Evaluation**

The College requires a substantial component of general education in all of its degree programs. Foundation, diversification, and focus requirements help students develop in the areas of written and oral communication; symbolic reasoning; ethics; global and multicultural perspectives; the arts, humanities, and literature; social and natural sciences; and Hawaiian, Asian, and Pacific Issues. Faculty expertise on the diversification, foundations, and focus boards determines appropriate courses for the general education curriculum and ensures levels of quality and rigor appropriate to higher education.

II.A.13.

***All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.***

## **Evidence of Meeting the Standard**

All degree programs at the College require focused study in at least one area of inquiry or established interdisciplinary core. Faculty identify specialized courses in an area of inquiry or interdisciplinary core based on learning outcomes, competencies, and mastery of key theories and practices within the field of study at the appropriate certificate or associate degree level.

Of the 15 associate degrees offered, four are identified as transfer programs: the AA in Liberal Arts, the AA in Hawaiian Studies, the AA in Teaching, and the AS in Natural Science. Each of these degree requirements includes general education courses, elective courses in a chosen field, and graduation requirements. CTE degree programs include a specialized focus of study depending on the career track alignment.

As noted in Standard [II.A.12](#), the Catalog clearly states the course requirements for each associate degree. In addition to the general education requirements, program faculty design the program curriculum based on CLOs and ensure the PLOs will be met at the appropriate competency level. CTE faculty design their programs to include stackable certificates such as the Certificate of Competence and the Certificate of Achievement. Students develop higher-level competencies and mastery of key practices as they move through the certificates to the associate degree. An example of this is the AAS in Automotive Technology. Students can earn a Certificate of Competence in the first 15 credits and a Certificate of Achievement in 30 credits. The remaining 33 to 34 credits take students beyond the introductory courses and into a mastery level of automotive competencies with the earning of the AAS in Automotive Technology ([IIA-113](#)).

## **Analysis and Evaluation**

Within the College's degree programs, students concentrate on a field of study or discipline grounded in relevant learning objectives, theories, principles, and applications. The College's programs all require focused study in at least one area of inquiry or in an established interdisciplinary core. Each of the 15 associate degrees requirements include three major parts: general education courses, electives in a chosen field, and graduation requirements. The 11 CTE associate degree programs all include a specialized course of study depending on the career track alignment.

II.A.14.

***Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.***

## **Evidence of Meeting the Standard**

The College ensures that students who complete CTE certificate and degree programs will be able to meet employment standards and licensure and certification as required in their field of study. The College offers credit-based CTE certificates and degrees in 12 program areas ([IIA-59](#)). These areas are accounting, automotive, business technology, culinary arts, digital media, health information technology, information and computer sciences, integrated industrial technology, management, plant biology and tropical agriculture, television

production, and substance abuse counseling. Additionally, OCEWD offers noncredit certificates in seven industry categories. These categories are business and professional studies, computers and technology, education and career planning, healthcare and caregiving services, healthcare technology, industrial technology, and transportation ([IIA-114](#)).

The College determines technical and professional competency levels and learning outcomes based upon national standards and input from industry representatives. Faculty who are experts in their field teach credit and noncredit courses to prepare students for today's competitive job market ([IIA-115](#)). The College hires CTE and OCEWD instructors based on their educational credentials in the field and/or related industry work experience based on their level of education credential. For example, all Accounting program faculty meet minimum hiring requirements of a master's degree in accounting, a master's degree in business administration including 18 credits in accounting, or a bachelor's degree and three years of related work experience in accounting. All Automotive Technology program faculty meet minimum hiring requirements of a bachelor's degree in automotive engineering or industrial education, an associate degree and five years of related work experience, or 15 college credits and seven years of related work experience, which are the minimum qualifications for faculty positions. For a detailed discussion on the minimum requirements for faculty positions, see Standard [III.A.1](#).

All noncredit courses offered through OCEWD have learning outcomes that undergo the same assessment process as credit instructional courses. Outcomes are based on national standards or state certification for certain industry licenses. Some of the programs that base outcomes on national standards are Medical Billing (American Medical Billing Association Standards), Pharmacy Technician (Pharmacy Technician Certification Board Standards), and Medical Coding (American Health Information Management Association Standards). Some of the programs that base outcomes on state licensure requirements are Nurse Aide, Adult Residential Home Care, and Commercial Motor Vehicle ([IIA-116](#)).

OCEWD assessment of outcomes follows the same process as assessment of course outcomes for credit programs. Faculty use exams, quizzes, projects, and other assessment instruments to measure outcomes as the student progresses through the course. Additionally, a capstone assessment is generally a standardized test. Course, instructor, and program evaluations take place at the completion of each course.

The College has two types of CTE and workforce development programs: those that are reviewed by an outside accrediting agency and those that are not. Table 52 indicates the accrediting body for three of the 12-credit programs and two of the seven noncredit workforce development programs.

Table 52.  
*Accreditation of CTE and Workforce Development Programs*

<b>Accreditation of Programs</b>	
Credit Program	Accrediting Body
Automotive Technology	National Automotive Technicians Education Foundation
Culinary Arts (Exemplary Program Recognition)	American Culinary Federation Education Foundation Accrediting Commission
Health Information Technology	Commission on Accreditation for Health Informatics and Information Management Education
Teacher Education Alternative Certification for Career and Technical Education	Council for the Accreditation of Educator Preparation.
Noncredit Workforce Development Program	Accrediting Body
Industrial Technology	International Certification Accreditation Council
Medical Billing	American Medical Billing Association
Medical Coding	American Health Information Management Association
Patient Services Representative	National Association of Healthcare Access Management
Pharmacy Technician	Pharmacy Technician Certification Board
Nurse Aide	State Licensure
Adult Residential Care Home	State Licensure
Commercial Motor Vehicle and Forklift	State Licensure

The above accrediting agencies have specific competencies for students to achieve. The faculty in these programs integrate these competencies or learning outcomes in the curriculum and develop a process to evaluate the students through various assessments such

as quizzes, exams, group projects, research papers, and hands-on activities to ensure that they have achieved the required competencies.

The College verifies that career-technical disciplines maintain currency of employment opportunities and other external factors. All 12 CTE credit programs offer cooperative education, externship, internship, or practicum courses that integrate academic preparation and career interests with work experience. CTE and workforce development programs that do not have a programmatic accrediting agency consult with industry employers and professional organizations to develop knowledge and skills that are relevant to the workplace.

All 12 CTE credit programs and the Industrial Technology noncredit program have advisory committees made up of industry representatives. These programs schedule between one to two advisory committee meetings per year to develop learning outcomes, assess technical and professional competencies, update course content, recommend equipment and curriculum changes, provide feedback on program reviews, validate program direction and vision, provide current labor market demand, and discuss emerging industry needs. Minutes of advisory committee meetings are available within each program.

### **Analysis and Evaluation**

The College implements a variety of measures to facilitate success for graduates completing career-technical certificates and degrees. Both the credit and noncredit programs hold regularly scheduled advisory committee meetings to discuss learning outcomes, assess technical and professional competencies, recommend equipment and curriculum changes, provide feedback on program reviews, validate program direction and vision, provide current labor market demand, and discuss emerging industry needs. All credit and noncredit CTE programs offer some type of cooperative education, externship, internship, or practicum courses that require evaluative feedback and input by the participating employers. Four of the credit programs hold external accreditation. All OCEWD workforce noncredit certificate programs are recognized by their respective industry association.

II.A.15.

*When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.*

### **Evidence of Meeting the Standard**

The College has a policy and procedures regarding program elimination such that enrolled students are able to complete their education in a timely manner with a minimum of disruption. RP 5.201, Instructional Programs, states, “Provisional and established programs deemed out-of-date or nonproductive based on a program review or other internal assessments may be terminated by the president” ([IIA-117](#)). Additionally, “Commitments to students already officially enrolled in such programs shall be met and limited for up to two years for associate degrees at community college programs and four years for baccalaureate degrees. No new program admissions shall take place.”

The College notifies students of the program elimination and modifies the registration system to not allow future students to enroll. However, current students can continue their studies and complete the degree for up to two years after the program's elimination.

The College clearly communicates to students procedures for program elimination. Counselors notify students when their certificate or degree program is being eliminated and advise them on their option to continue in the program if they can complete it in two years. Counselors also provide other possible majors that are available if students want to change majors.

In 2013, the UHCC System modified UHCCP 5.203, Program Credentials: Degrees and Certificates, to eliminate the Certificate of Completion and identify all certificates with 4 credits to 24 credits as the Certificate of Competence ([IIA-83](#)). This change prompted the College to review all Certificates of Completion and Competence and make decisions regarding modifying or eliminating certificate programs. In 2014-2015, the College converted 17 Certificates of Completion to Certificates of Competence and eliminated four Certificates of Completion. As noted in the summary document, 2012-2017 Program Eliminations, the program faculty continually review program curriculum and eliminate programs that are no longer in demand or not in alignment with current program outcomes ([IIA-118](#)).

### **Analysis and Evaluation**

In the event of programmatic change or dissolution, the College follows established policies and procedures to ensure that students receive the necessary information. The College makes appropriate arrangements so enrolled students may complete their education in a timely manner with minimum disruption.

II.A.16.

*The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.*

### **Evidence of Meeting the Standard**

#### **Evaluation of Instructional Courses and Programs**

The College regularly evaluates the effectiveness of all its courses and programs through its program review process regardless of location and delivery mode. UHCCP 5.202, Review of Established Programs, requires instructional programs to complete an ARPD, which the College uses for its program review ([IIA-119](#)). The ARPD is an assessment of a program's demand, efficiency, effectiveness, DE, degree and certificate completion, transfers, how the program met the Perkins IV Core Indicators from the previous year, how the program met the College's Performance Measures, and other relevant factors. The UHCC website makes available completed reports ([IIA-120](#)).

Credit and noncredit programs with external accrediting bodies as indicated in Standard [II.A.14](#) go through an annual review process, midterm report, self-evaluation and site visit during each accreditation cycle. The external accrediting bodies require additional information, such as licensure and job placement rates.

All instructional programs, including collegiate, pre-collegiate, career-technical, and continuing and community education, consistently follow the program review process. The criteria used in program review include relevancy, appropriateness, currency, achievement of learning outcomes, and planning for the future. The ARPD report requires an analysis of the previous year's performance and the current year's data in terms of demand, efficiency, and effectiveness. As a result of this analysis, program coordinators create an action plan for the coming year and determine resource implications based on the action plan ([IIA-121](#)). The ARPD directly informs program resource requests and helps unit heads and administrators to prioritize requests. Once every four years, the College requires every program to complete a CRE that includes the ARPD data from the previous three years ([IIA-122](#)). For more information about the ARPD and the CRE, see Standards [I.B.5](#) and [I.B.9](#), respectively.

### **Continuous Improvement of Instructional Programs**

The results of program evaluation guide institutional planning, and programs have improved as a result of program evaluations. The College uses data and analysis accumulated in the ARPDs, CREs, and Perkins Performance Indicators Data to implement necessary improvements. For example, the Wai'anae Moku Education Center ARPD identified plans to improve pass rates by requesting funding for additional student tutors and peer mentors ([IIA-123](#)). In 2016-2017, the institutional prioritization list ranked this request second, which resulted in the College allocating appropriate resources to fulfill those plans ([IIA-124](#)).

The Perkins Performance Indicators Data that is provided by the UH Institutional Research Office and compiled in a table format by the College's dean of career and technical education provides a means to compare and analyze various indicators between the CTE programs at the College and can also compare similar programs across the UHCC campuses ([IIA-125](#), [IIA-126](#)). This report identifies where each program met or exceeded the performance standards and where it did not based upon the set benchmarks established by the state CTE director's office. For 2016-2017, four of the six performance standards exceeded the state standard, one performance standard was met at 99.6 percent, and one performance standard was met at 82.6 percent ([IIA-125](#)).

Program faculty use the Perkins Performance Indicators Data to make improvements in their programs. For example, the Management program was not meeting the standard for the 2P1 indicator of completion of certificates and degrees since 2008-2009. Therefore, the program created and offered a two-semester certificate of achievement of 30 credits in fall 2012. After several years of students becoming better aware of this step-laddered certificate that leads to the AS degree, the Management program exceeded the standard of 2P1 in 2016-2017.

### **Analysis and Evaluation**

The College annually evaluates collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location.

The College uses the ARPD and CRE to systematically improve programs and courses to enhance learning outcomes and achievement.

## Changes and Plans Arising Out of the Self-Evaluation for Standard II.A

Accreditation Standards	Change or Plan	College Leads	Timeline	Achieved or Expected Outcome
II.A.3	AA in Liberal Arts Assessment	AA Degree Program Review Task Force	Spring 2018-present	The assessment of the AA in Liberal Arts program and GELOs is an ongoing process that will continue in 2018-2019.
II.A.7	DE Committee plans to revise the DE peer evaluation form to provide feedback on regular and substantive interaction.	DE Committee	Fall 2018 – Spring 2019	Revised DE peer evaluation form will be implemented by Fall 2019.

## II.B. Library and Learning Support Services

### II.B.1.

*The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)*

### **Evidence of Meeting the Standard**

Leeward Community College supports student learning and achievement by providing numerous library and learning support services under the Academic Services area ([IIB-1](#)). These services include library collections and instruction, learning centers and tutoring, disability services, computer laboratories and technical assistance, and testing services. At the Pearl City campus, the three-story Learning Commons building provides a user-friendly space for students, faculty, and staff to access the Library; Kapunawai, the Hawai‘i-Pacific Resource Room; the Learning Resource Center (LRC), which includes the LRC Content Tutoring Center, the Writing Center, and the Kāko‘o ‘Ike Program for disability services; the Help Desk; and the Test Center. The Learning Commons also provides resources including desktop, laptop, and tablet computers; printing, copying, scanning, and charging stations; individual study carrels; and group study rooms ([IIB-2](#)). At the Wai‘anae Moku Education Center, the Student Resource Center and adjoining offices provide a number of learning support services ([IIB-3](#)).

The College provides comparable library and learning support services to students and appropriate personnel regardless of service location or means of delivery, including distance education (DE). As Table 53 indicates, comparable services are available at the Pearl City campus; the Wai‘anae Moku Education Center; and online, via phone, or at other University of Hawai‘i (UH) locations.

Table 53.

*Learning Support Services by Location and Means of Delivery*

Learning support service	Services available at the Pearl City campus	Services available at the Wai‘anae Moku Education Center	Services available online, via phone, or at another UH location
Library	✓	✓	✓
Content Tutoring	✓	✓	✓
Writing Tutoring	✓	✓	✓
Kāko‘o ‘Ike Program	✓	✓	✓
Help Desk	✓	✓	✓
Test Center	✓	✓	✓

In addition to the library and learning support services units provided by the Academic Services area, the College has the Math Lab, which the Mathematics and Natural Sciences Division coordinates, and the grant-funded The Hub (Leeward Student Help Desk), which the Information and Computer Science program coordinates.

### Library Services

The Library is open a sufficient number of hours to meet the needs of campus students ([IIB-4](#)). During the two weeks before final exams, the Library remains open later to accommodate students and hosts a variety of special sessions ([IIB-5](#)). Since the College’s last institutional self-evaluation in 2012, the Library increased its Monday through Thursday operational hours by seven hours per week (13.7 percent) and its Friday operational hours by two hours per week (4.7 percent). According to the 2017 Library User Survey, 93 percent of students (n=129) agreed that they were satisfied with the Library’s hours, indicating that the hours of operation at the Library are sufficient in quantity ([IIB-6](#)).

The Library’s collections of print and video materials are located at the Pearl City campus ([IIB-7](#)). Students can hold or request items at another library in the UH System through an online intra-system loan request and items can be routed to the Pearl City campus or Wai‘anae Moku Education Center ([IIB-8](#), [IIB-9](#)). Students can retrieve items from the Pearl City campus Library Circulation Desk or at the Wai‘anae Moku Education Center by selecting their pick-up location ([IIB-10](#)).

Students and campus personnel can remotely access the Library’s digital collections 24 hours a day through the Library website, which includes the Hawai‘i Voyager online catalog, 141 electronic periodical databases, online guides, electronic books, and relevant websites ([IIB-](#)

[11](#), [IIB-8](#), [IIB-12](#), [IIB-13](#), [IIB-14](#)). (For a detailed profile of the Library and learning support services' holdings and resources, see Standard [II.B.2](#).) The Library launched a new website in August 2016, the culmination of 22 months of development and testing ([IIB-15](#), [IIB-16](#)). The new website better meets the needs of the College's students by providing a more user-friendly site. According to the 2017 Library User Survey, 93 percent of students agreed that the Library website is helpful ([IIB-6](#)).

Library faculty and staff have an established collection development process to ensure that the library collections are sufficient in quantity, currency, depth, and variety to support educational programs. Librarians are assigned subject areas with the responsibility for selecting materials using criteria that include relevance to the curriculum, perceived demand, availability and currency of existing holdings, cost, and access ([IIB-17](#), [IIB-18](#)). The Library solicits recommendations for materials from instructional faculty through direct contact, at division and program meetings, and using an online request form as well as initiates limited-time trial access to new online research databases and other electronic resources for evaluation by faculty and staff ([IIB-19](#), [IIB-20](#)). The Library collects feedback and uses it along with the Collection Development Policy guidelines to select and acquire new electronic resources ([IIB-21](#)). Collections maintenance is key to providing relevant and current materials. Periodically, materials are de-selected and withdrawn based on the criteria that apply to new purchases plus other factors such as wear and usage ([IIB-18](#)).

The Library has updated but not expanded its collection of print materials at the Pearl City campus. The total book volume count declined by 2.3 percent between 2012 and 2016 while print periodical titles declined by 33.5 percent. During the same period, electronic book titles increased by 37.7 percent, and electronic journal titles increased by 120 percent. In 2015, 75 percent of the Library's total resource expenditures supported online resources, and in 2017 the Library had nearly 70 database subscriptions ([IIB-22](#), [IIB-23](#), [IIB-24](#)).

Library faculty and staff support student learning and achievement by providing library services to students and instructional faculty. At the Pearl City campus, library faculty and staff provide in-person assistance at the circulation desk, reference desk, and Kapunawai during regular hours of operation. At the Wai'anae Moku Education Center, library faculty provide in-person reference services at least twice a week and when requested by Wai'anae Moku instructors. Library faculty and staff provide comparable library services to all Leeward students using email, phone, text, and online chat ([IIB-25](#)). They communicate with instructional faculty by attending division and discipline meetings, serving as librarian subject liaisons, and maintaining a weblog ([IIB-17](#), [IIB-26](#)).

Library faculty provide ongoing instruction for students. In 2015-2016, they scheduled 301 classroom sessions reaching 4,868 students at the Pearl City campus and the Wai'anae Moku Education Center ([IIB-22](#)). Sessions focused on library resources, information literacy, search techniques, and researching skills. They use active learning techniques including group activities, "flipped" classrooms, and peer-to-peer learning. According to students who were surveyed in spring 2017, 83.7 percent agreed that these library sessions increased their ability to do research and use library resources ([IIB-6](#)).

## **Learning Support Services**

Faculty and staff in the learning support services units have an established evaluation process to determine whether their services are sufficient in quantity, currency, depth, and variety regardless of location or means of delivery.

### *LRC Content Tutoring Center*

The LRC Content Tutoring Center operating hours are sufficient to accommodate most students ([IIB-27](#)). An analysis of individual tutoring in spring and fall 2017 shows that of the eight most-tutored subjects (computer science, accounting, philosophy, Japanese, chemistry, psychology, Korean, business, and geography) only one section of Korean began before 9:00 a.m. and only two daytime sections ended later than 1:15 p.m. (one for Korean, one for philosophy). Each semester, the majority of class sections covering the eight most-tutored subjects take place during LRC hours; no more than four class sections are scheduled after LRC hours and none are scheduled on the weekend, which suggests that only a few students need extended hours.

The LRC Content Tutoring Center assists students with content courses across the curriculum. The content tutoring is sufficient in quantity, currency, depth, and variety. Each semester, students use tutoring in approximately 50 to 60 courses ([IIB-28](#)). In 2016-2017, the LRC provided 1,299 individual tutoring sessions to 472 students and 653 group visits by 194 students with each individual student's attendance at a group counting as one visit. For example, one meeting of a group of five students would count as five visits. As these figures indicate, many students are repeat users of LRC tutoring. This fact, as well as consistently positive feedback from students, indicates they value this service.

The LRC encourages tutors to meet with instructors for the courses they support so that they are familiar with instructors' expectations and requirements. The LRC also encourages instructors to add course tutors to their LCanvas sites (online course management system) so that tutors can view current assignments. Since the College offers many courses online and some students seldom come to campus, the LRC also offers online tutoring for some courses in addition Brainfuse, a commercial online tutoring service. In spring 2018, content tutoring was available through Skype for 11 courses ([IIB-29](#)). Students can make a tutoring appointment in person, by phone, or online from the LRC website.

Before they begin tutoring, LRC tutors receive extensive training (10 to 11 hours), covering tutoring goals, philosophy, techniques, communication and study skills, and problem-solving strategies. The overarching goal is for tutors to help students become better learners, not just to provide homework help. The LRC offers tutoring for diverse subjects in business, computer skills, languages, humanities, social science, and sciences. Most content tutoring is one-to-one, but the LRC offers various group sessions, including popular weekly language conversation groups led by native speaker tutors or volunteers; review sessions before exams for some social science and science courses; and large workshops on science success skills led by teams of science tutors.

The LRC offers drop-in and in-class tutoring for a wide range of courses. In addition to tutoring appointments, drop-in help is available for general computer skills and a few other subjects during most of the Center's operating hours. Students who are new to college, especially nontraditional students, find this service especially helpful. The LRC also provides

study space, including a small group study room, success skills handouts, and videos ([IIB-30](#), [IIB-31](#)).

### *Writing Center*

The Writing Center provides learning support to develop writing, reading, and college success skills and works with faculty to provide support in the Writing Center as well as in instructional classes. Students can work with writing consultants on class assignments for any class, scholarship essays, grammar review, reading comprehension, critical thinking, placement and exam preparation, time management, learning strategies, critical thinking, and annotation skills.

The Writing Center's scope of services and current hours are sufficient in quantity, currency, depth, and variety in meeting the needs of campus and DE students ([IIB-32](#)). For example, during each semester in 2016-2017, the Writing Center provided services in a variety of modes to more than ten percent of all enrolled students assisting them with success skills development and assignments from approximately 100 courses representing every division. In response to student and faculty demand, writing consultants (peer tutors) worked with students in more than 400 workshops. Feedback from both students and faculty has been consistently positive ([IIB-33](#)). During the two weeks before final exams, the Writing Center offers additional workshops and extended hours ([IIB-5](#)).

The Writing Center offers its services in a variety of modes of delivery. Students can work with writing consultants in person in the Writing Center both individually and in groups, by phone, and online with Skype on either a drop-in or an appointment basis. Students' use of the Writing Center's drop-in availability for "just-in-time" support has averaged 45 percent of all Writing Center sessions for the last three academic years. The Writing Center website includes an online option to schedule appointments to support DE and on-campus students ([IIB-32](#)). Writing consultants facilitate workshops focused on specific writing, reading, and college success skills and, upon request from instructors, provide direct curriculum support during class sessions with in-class workshops. The Writing Center coordinator regularly confers with instructional faculty regarding sessions and workshops. Under the Writing Center's coordination, faculty and staff present campus workshops on writing skills, success skills, and campus resources ([IIB-34](#), [IIB-35](#), [IIB-36](#)).

### *Kako'o 'Ike Program*

The Kako'o 'Ike (KI) Program provides a range of support services for students with disabilities ([IIB-37](#)). The program's name means "support for learning" and the program strives to enable students with disabilities to maximize their independence. Services include pre-admission counseling, classroom accommodations, assistive technology, exam proctoring, and alternative text formats. The KI staff consists of two disability specialists and several student employees, called paraprofessionals, who are available to answer questions regarding KI services, schedule appointments, and provide students with assistance on how to use KI technology services. The staff makes adjustments to staffing in order to accommodate exam proctoring for students attending evening classes.

A disability specialist visits students at the Wai'anae Moku Education Center every other week of the fall and spring semesters. The schedule of visits, which is posted near the

counselors' office, is responsive to students' needs. When requested, a disability specialist visits the Wai'anae Moku Education Center during the summer session to assist students.

In 2016, the KI Program had a total of 252 students, and in 2017 the population increased to 260. In 2016-2017, the KI Program had a total of 46 requests for note taker services. The program was able to provide note takers for 36 out of the 46 requests (78 percent). For unfilled note taker requests, KI staff advised students to record their lectures in order to access the information that their instructor shared in class. In 2016-2017, the KI Program had a total of 15 requests for alternative text and one request for an American Sign Language interpreter and filled 100 percent of those requests ([IIB-38](#)).

The KI Program is currently updating its intake procedures and workflow to include the electronic distribution of accommodation letters directly to instructors. This new distribution method will be used to notify course instructors of appropriate accommodations for students whether the course is taught face-to-face or through DE.

#### *Tutoring at the Student Resource Center, Wai'anae Moku Education Center*

At the Wai'anae Moku Education Center, tutoring services in math and English are available in the Student Resource Center during hours that ensure that services are available at convenient times for students.

Tutors work with students on a one-to-one or one-to-two ratio. During high traffic hours, this ratio may increase to one-to-five with students sitting at computers working on writing or math assignments while the tutor works individually with each student. There is one math tutor integrated into each math class. In these classes, the instructor and tutor are able to provide assistance on a one-to-six to one-to-ten ratio. The Student Resource Center hires additional tutors based on an instructor's request to assist in other subject areas such as Hawaiian studies, philosophy, and psychology. For these classes, the ratio of tutors assisting students is approximately one-to-five. The low ratio of tutor to students and long hours of operation allow tutors to provide students with sustained, in-depth assistance. Students can request as many sessions as needed, with each session lasting anywhere from five minutes to two hours, thus ensuring quality and consistency of tutoring services.

The Student Resource Center hires tutors through recommendations from the math and English instructors based on appropriate class performance and interpersonal communication skills. The Center hires content course tutors as needed. For example, in fall 2016 and spring 2017, the Center hired Hawaiian language tutors to work closely with the instructor; the tutors were available prior to classes to help students. Furthermore, content instructors provide a training orientation and serve as site supervisors to help monitor quality of work and to be available to help tutors troubleshoot any challenges they may encounter when assisting students. When tutors were asked to evaluate their training and supervision, 95 percent of tutor respondents (n=87) rated their training and supervision as "excellent" with the remaining 5 percent rating their support as "good" ([IIB-39](#)).

Over the past five years, the Wai'anae Moku tutoring team serviced approximately 40 percent of students enrolled in math and English classes, and in some semesters they serviced as many as 56 percent of the students enrolled in these classes. In fall 2014, the Office of Planning, Policy, and Assessment (OPPA) examined the impact that these tutors have had on

student success. While the sample size for English tutors was too small to make a clear conclusion, the sample size and success rates of tutored and non-tutored students in Math 22 and Math 103 were large enough to conclude that students who worked with the math tutors were more likely to succeed in a math class ([IIB-40](#)).

In 2014, the Community College Survey of Student Engagement (CCSSE) results indicated that 79 percent of respondents from the Wai‘anae Moku Education Center (n=34) felt that tutoring was important ([IIB-41](#)). In student evaluations collected through math and English classes from spring 2012 to fall 2016, 95 percent of student respondents who used tutoring services consistently rated the tutors as useful. When asked what the tutors did well, students indicated the following: effectively teach specific technical skills, explain concepts and instructor feedback in understandable ways, demonstrate patience, build trusting relationships, and coach specific mindsets such as staying calm in the face of stress and anxiety, not giving up, and feeling confident in one’s abilities ([IIB-39](#)).

#### *Brainfuse Online Tutoring*

The College provides additional tutoring for its DE students, Early College students, and those who are unable to obtain services at the Pearl City campus or the Wai‘anae Moku Education Center. Students can obtain live tutoring and writing assistance in numerous academic subjects through Brainfuse, a professional online tutoring service that is contracted through the University of Hawai‘i Community Colleges (UHCC) system and available to students through a link from their MyUH Services portal ([IIB-42](#), [IIB-43](#)). The UHCC System’s contract with Brainfuse expires in August 2018, so the system has convened a multi-campus committee to review options for continuation or replacement of this service.

#### *Online Learning Academy*

All UH System students have access to the UH Online Learning Academy, which provides free online peer tutoring in math, English, and science ([IIB-44](#)). This service provides an additional resource for DE students and Early College students to get off-campus support.

#### *Help Desk*

The Help Desk supports students, faculty, and staff experiencing computer or network-related problems at both the Pearl City campus and the Wai‘anae Moku Education Center’s Student Resource Center ([IIB-45](#)). Help Desk staff are available to assist via phone and email. At the Wai‘anae Moku Education Center, a lab assistant helps students with computer and laptop use. The Help Desk conducted a satisfaction survey in 2017 that indicated that 98 percent of respondents were highly satisfied (n=414) with the services provided ([IIB-46](#)). Additionally, the UH Information Technology Services Help Desk provides phone and email support ([IIB-47](#)). Students using the UH System course management system LauLima are able to submit an assistance request from the login page ([IIB-48](#)).

The Help Desk provides computer support services for on-campus events such as Geek Day, the Career and Technical Education Business Fair, and the Hawai‘i Strategy Institute. The Help Desk also offers installation and assistance with campus-supported hardware and software, relocation of computer equipment and peripherals, and Voice Over Internet Protocol telephone set up. Additionally, the Help Desk staff works closely with the Wai‘anae Moku Education Center’s information technology staff to resolve computer and network issues.

### *Test Center*

The Test Center at the Pearl City campus provides students with Accuplacer placement testing and proctoring services. These services include online and written tests for DE courses, make-up exams for campus courses, and out-of-state DE tests ([IIB-49](#)).

Effectiveness indicators show a consistent 94 percentile of high satisfaction with the hours of operation for the past three years ([IIB-50](#)). The Test Center user survey conducted in 2017 demonstrated that students are highly satisfied with the Test Center's atmosphere, the service provided by the staff, and the timely and efficient manner in which staff administers exams ([IIB-51](#)).

### *Testing Center, Student Resource Center, Wai‘anae Moku Education Center*

The Testing Center at the Wai‘anae Moku Education Center provides students with Accuplacer placement testing and proctoring services. These services include online and written tests for DE courses and make-up exams for campus courses. Students attending the Pearl City campus can arrange with their instructors to use the Wai‘anae Moku Education Center for testing. Likewise, Wai‘anae Moku students may also seek services at the many UH System test centers throughout the state ([IIB-52](#)).

### *Math Lab*

The Math Lab at the Pearl City campus provides students with tutoring in math and quantitative methods. It also loans textbooks and calculators, provides access to computers and other learning tools, and offers the use of individual and group study areas ([IIB-53](#), [IIB-54](#)). Tutors can assist students with math software such as ALEKS, MyMathLab, and MyStatLab. The Math Lab website provides resources to help students prepare for math placement testing ([IIB-55](#)).

### *The Hub*

The Hub, Leeward Student Help Desk, provides Leeward students with technical assistance for their personal electronic devices including installing new software, upgrading hardware, removing malware, recovering passwords, troubleshooting network issues, and consulting on the purchase of computers and compatible accessories ([IIB-56](#)). The Hub also provides Leeward student interns who are majoring in Information and Computer Science (ICS) an opportunity to gain troubleshooting experience, networking skills, and customer service skills as they work independently. Since its inception, The Hub has served many students in different capacities by holding several events. For example, at a “WiFi Passthrough” event, interns set up a table outside the cafeteria to help students set up the WiFi in their devices so their computer or mobile device automatically logs into the UH System network on any of the ten campuses. Students appreciate this service and learn about The Hub's services and location. The Hub is funded by the Trade Adjustment Assistance Community College and Career Training Grants and implemented by the U.S. Department of Labor's Employment and Training Administration ([IIB-57](#)). In order to provide ICS student interns with a more realistic work environment, a manager supervises student employees, assigns duties and responsibilities, and coordinates a work schedule. *The Hub Handbook*, written by the first group of student interns under the guidance of ICS faculty, codifies its policies ([IIB-58](#)).

## **Analysis and Evaluation**

The College's commitment to student learning and achievement is clearly demonstrated by its variety of quality learning support services for students, faculty, and staff. These services include the Library, the LRC, the KI Program, the Help Desk, the Test Center, the Math Lab, and The Hub. Services are available at the Pearl City campus, the Wai'anae Moku Education Center, and online or by phone. Technical assistance and testing services are also available at other UH System locations.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College's Library and learning support services. Participants discussed how the College meets Standard II.B.1 and Eligibility requirement 17 and how the College can improve these services. They said that the Library has a thriving information literacy program and resources that are current and available to both face-to-face and online learners. Tutoring through the LRC and Writing Center is comprehensive and well utilized by students. The growth of dual-enrollment programs with high schools brings the additional challenge of providing those students access to the library and tutoring services. Also, online students need more access to tutoring ([IIC-59](#)).

During the roundtable discussions the following issues were brought up regarding the KI office: increased communication, collaboration between the KI office personnel and instructional faculty, and training regarding procedures on how students access disability services. As a result, the KI staff plans to create a training program for faculty and staff to include a certification component. Initially, the training module will be presented in person but eventually be accessible to faculty online.

### **II.B.2.**

***Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.***

## **Evidence of Meeting the Standard**

### **Library Equipment and Materials**

The College relies on library faculty and staff, along with the consultation of instructional faculty, to select and maintain the Library's materials and equipment and apply technology to enhance access. Through these efforts, the Library enhances the achievement of the College mission by providing a variety of accessible materials and equipment that promote the effective use of scholarly information and student learning.

The Library's materials include books, periodicals, online resources, and audiovisual media as part of six collections with general and special access guidelines. Access to the Library's online resources is available through the Library website ([IIB-11](#)). In February 2017, the Library held 74,442 print books, periodicals, microfilm pieces, and audiovisual items. Through a combination of consortia agreements and individual purchases, the Library provides access to 53 databases, 30,537 streaming videos, 29,766 e-journals, and 147,053 e-book titles ([IIB-60](#), [IIB-7](#)).

Each of the library faculty is assigned to specific instructional divisions and is responsible for engaging in ongoing discussions with faculty from those divisions about needed resources for students and suggestions for the purchase of books, periodicals, and audio/visual materials ([IIB-17](#), [IIB-19](#)). Library faculty also select resources based on their knowledge and expertise in subject areas, professional library journals and book review sources, publisher alerts and catalogs, course syllabi review, and by helping students find materials for their research. Library faculty identify new electronic resources as potential resources supporting subject areas or disciplines. The Library initiates limited-time trials and promotes them to faculty through general announcements, blog posts, attending division meetings, and word-of-mouth communication. The Library solicits and uses faculty feedback for decision-making about acquisitions ([IIB-61](#), [IIB-62](#)).

The Library provides students use of 65 desktop computers and 30 wireless laptops with a networked suite of office software as well as two scanners and three printers connected to the library print system ([IIB-63](#)). Students are able to study in two rooms with table seating for groups up to four. Student feedback is essential to maintain a student-centered learning environment, so the Library gathers feedback during annual online user surveys and through point of experience survey tablet devices ([IIB-6](#), [IIB-64](#)). Librarians review survey responses and identify user needs. The Library acquired or implemented mobile device printing, digital scanning, additional power options, mobile device charging stations, and authenticated computer use to support student technology needs. Modification of furniture layout and new uses of space helps support a variety of learners and their needs ([IIB-65](#)). Library faculty attending professional conferences bring back ideas for new products and services ([IIB-66](#)). The Library also relies on its relationships with the other UH System campus libraries for ideas for learning space improvements. Meetings of the UH Library Council, consisting of library directors, is another forum for the exchange of ideas. Library staff interactions with students also inform the acquisition of new technology. For example, based on students' requests to improve the reservation process for booking group study rooms, the Library implemented an online reservation system in January 2018. Students can now view room availability and book rooms online.

Annual user survey results show that 96 percent of students indicated that they usually find enough books from the Library's collections and articles from the library databases to meet their class needs ([IIB-67](#)). When asked if the computer resources in the Library contribute to their success at the College, 100 percent of students responded in the affirmative ([IIB-67](#)). While the annual survey is a useful tool and satisfaction rates are routinely in the upper 90 percentile range, the number of responses is relatively modest (n=145) because it is completed on a voluntary basis ([IIB-6](#)). The Library subscribes to the SurveyApp online point of experience customer satisfaction platform to collect ongoing feedback. Timely feedback allows the Library to immediately respond to issues or problems. The Library also engages students in a more informal manner to gather feedback. In fall 2017, librarians positioned a mobile whiteboard in a highly trafficked area with the question "What do you think we need in the Library?" and encouraged students to write their wish list items on the board ([IIB-68](#)). As a result, the Library recently purchased comfortable bean bag chairs for students.

## **Learning Support Equipment and Materials**

The College relies on learning support services professionals to select and maintain educational materials and equipment to support student learning and enhance the achievement of the College mission.

The LRC Content Tutoring provides students with four desktop computers that are connected to the Learning Commons print system. All computers include standard MS Office software, and one includes Adobe software used in Digital Art and Digital Media courses. To support DE as well as on-campus students, the LRC website provides access to the online scheduling software TutorTrac, which allows students to schedule tutoring appointments ([IIB-69](#)). The website features information about tutors, subjects tutored, and other LRC events and services; a study skills materials section of the website is currently under development ([IIB-27](#)). The LRC also provides a comfortable study area and a small group study room that fits up to seven people.

The LRC Content Tutoring Center is operated by a faculty coordinator with 27 years of experience in the center and ten years of prior instructional experience. The coordinator communicates frequently with instructional faculty, whose students the center serves, to ascertain what materials and equipment are needed to support students. Examples of requests from faculty that have been supported include a microphone that French students can use to record their voices and tablets that computer programming students can use for their work. The LRC also purchased a short-throw projector that is used during tutor training and that tutors can use for group sessions, especially in the language conversation group meetings. The Information Technology Group (ITG) maintains and replaces the LRC computers. All of the LRC's materials and equipment enhance the achievement of the College mission by providing students with a high-quality education and advancing their educational goals.

The Writing Center's learning-centered layout, equipment, and resources support student learning and enhance achievement of the College mission. The Writing Center provides a comfortable study area for both individual and group study, and the Writing Center's six desktop computers, which are connected to the Learning Commons print system, are situated to provide space for collaborative study. The Writing Center has one desktop computer on a wheelchair-accessible table; that computer is equipped with the adaptive software Dragon Naturally Speaking and Kurzweil 3000 and is attached to a scanner. The Writing Center added the assistive technology software and scanner in 2017.

Students participating in the Writing Center's focused workshops use the Writing Center's iPads to move through and, as needed, refer back to the workshop material ([IIB-35](#)). The writing consultants and Writing Center coordinator created and continue to update these workshops, which include opportunity for collaborative practice of reading, writing, and college success skills to foster student learning and engagement in keeping with the College mission. Student feedback has been consistently positive. For example, in 2016-2017, student feedback averaged 4.9 on a 5.0-point scale that the workshops benefitted them academically or personally.

The Writing Center provides writing, reading, and success skills handouts and online resources ([IIB-70](#)). The writing consultants regularly incorporate the handouts and use the Writing Center's staff laptops to refer to the online resources in sessions and workshops.

These writing consultants often use the online resources in phone and online sessions. The Writing Center coordinator works with the writing consultants, reviews session and workshop data and feedback, and consults with instructional faculty to update and add to these handouts and online resources. For example, the Writing Center added its latest online resource, a grammar guide, to the Writing Center website in fall 2017 (IIB-71). The Writing Center coordinator reviewed student feedback and session data and worked with the writing consultants to develop this resource. She also sought feedback from writing faculty regarding content and worked with the ITG to add a user-friendly menu to make the resource more accessible for students.

The KI Program has four low-distraction assistive technology computer workstations to support student learning. The workstations are equipped with computers and scanners that offer adaptive software including Dragon Naturally Speaking, Kurzweil 3000, JAWS, Zoomtext, and CCTV. The office provides a large number of informational handouts about success skills for college students, teaching strategies for faculty, and disabilities information for the public. KI staff are available to consult with faculty when they have questions about appropriate accommodations for students with disabilities.

The ITG manages and maintains the Help Desk and Test Center, both of which support student learning through their various roles. The ITG also purchases computers for the College Computer Labs classrooms, which can be used for all instructional programs with priority given to Information and Computer Science and Business Technology courses that require computers (IIB-72). Computers in a few classrooms are configured and purchased according to program specific software needs; the remaining classrooms have a basic minimum hardware configuration (IIB-73, IIB-72). The Help Desk is staffed by one full-time employee and student employees (IIB-45). The Help Desk provides quotes to Pearl City or Wai‘anae Moku faculty and staff for faculty and staff or student use computers and recommends computer systems based on the minimum hardware requirements needed (IIB-74). The Test Center has 44 computers available for students to take placement tests and proctored online and written exams. The Test Center offers placement tests to incoming students and returning students as well as to students who are required to take a placement test for out-of-state colleges. Other proctoring services include make-up exams for campus face-to-face courses, UH System DE online and written exams, and out-of-state DE online and written exams (IIB-49).

Math faculty work directly with the Math Lab to ensure the lab provides students with the support they need to be successful in math classes. The lab provides internet access to computer-based programs used in all math courses. The lab has 29 computers and 9 laptops for students to use while doing course work and receiving assistance from tutors (IIB-75). The lab also has study areas where students can work individually or in groups. To help students with their studying, the Math Lab provides formula sheets ranging from algebra to calculus. Students can also borrow graphing and scientific calculators and current and previous editions of math textbooks. The math discipline continually reviews current textbooks to maintain course content and relevance. When math faculty adopt new textbooks, the math discipline gives multiple copies of the textbook and solution manual to the Math Lab. The solution manual provides students with step-by-step solutions to help them gain a better understanding of how a problem should be solved.

The math lab manager reviews and updates supplemental handouts, which include formulas, conversion tables, and procedures on topics that are common problem areas for students. In addition, the lab manager maintains scientific and graphing calculators as well as the TI-Nspire CASE, which provides students with a deeper understanding of abstract concepts. Since all math courses require computer-based homework, the computer room in the Math Lab underwent remodeling in 2017 as part of the Acceleration Initiative. The College upgraded the computers and furniture in the Math Lab to provide students with more computers and additional work space. All of the services provided by the Math Lab, including its materials and equipment, help strengthen students' math ability and understanding, which enhances the College's achievement of its mission.

The ICS program coordinates The Hub, which is staffed by student interns enrolled in the program's credit-based cooperative education course ([IIB-56](#)). From its inception, The Hub has relied on the expertise of ICS faculty. To enhance the achievement of the College mission, The Hub provides an in-house internship opportunity that benefits students in need of free technical support for their electronic equipment and provides ICS students with hands-on job experience to prepare them for the workforce.

The Hub interns, managers, and supervisors select and maintain standard, up-to-date equipment and materials most commonly used in the industry in order to provide a service to Leeward students that supports their learning. Given the diversity of electronic equipment that college students use, The Hub has equipment to diagnose and fix a variety of mobile devices ranging from phones, tablets, laptops, and desktops. Student interns also fix monitors and storage devices such as hard drives and flash drives. The Hub has tools and hardware to use for general repairs as well as a basic computer repair kit and more advanced kits.

The Wai'anae Moku Education Center provides students with equipment and materials to enhance their learning experience. The study and testing center includes student workspace and a computer testing room. The previous testing center had 5 desktop computers while the new facility has 15. The new computer lab/classroom has 30 desktop computers whereas the previous location had 17. The facility also has 25 laptops available for students to borrow as well as handouts on various topics such as handling test anxiety, taking notes, and learning study techniques ([IIB-3](#)).

### **Analysis and Evaluation**

Library, support services, and instructional faculty and staff collaborate to select and maintain educational equipment and materials that best address students' learning needs to enhance the College mission.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and learning support services. Participants discussed how the College meets Standard II.B.2 and how the College can improve in these areas. They said that the Library, LRC, Math Lab, Writing Center, Help Desk, and Test Center all meet students' needs. They have appropriate and sufficient equipment and materials. The College will continue to inform new faculty and new students about the campus resources ([IIB-59](#)).

### II.B.3.

*The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.*

#### **Evidence of Meeting the Standard**

Academic Services units evaluate the Library and learning support services to ensure that they are meeting the needs of students, faculty, and staff. Each unit uses a variety of methods to assess its support area outcomes (SAOs) and course learning outcomes (CLOs) when appropriate. (For further discussion of the assessment of SAOs, see Standard [I.B.2.](#)) The Library and all learning support services annually submit a program review by completing the Annual Report of Program Data (ARPD) to report on a unit's demand, efficiency, and effectiveness.

#### **Evaluation of Library Services**

The Library regularly evaluates its services through multiple mechanisms to ensure that it adequately supports student learning needs and contributes to the attainment of outcomes. The Library conducts an ARPD to assess its performance, which includes assessment of CLOs ([IIB-76](#)). In 2016, the Library updated its mission and CLO 2 and converted the previous goals to support area outcomes ([IIB-77](#)). The Library also identified measurements for attainment of the CLOs ([IIB-78](#)).

The Library uses the Information Literacy Exam to assess students in English 100 and English 24 for CLO 1 ([IIB-79](#)). Results show that 2,006 students completed the exam for English 100. The average score was 81.6 percent and the pass rate was 93.4 percent. The average score increased by 1.4 percent and the pass rate increased by 1.6 percent from the previous year. The Library revised the information literacy tutorials in 2013. In January 2016, the Association for College and Research Libraries Framework for Information Literacy released new standards for information literacy instruction in higher education, so a revision of the existing tutorials is necessary to align the information literacy program with the new standards ([IIB-80](#)). In 2017, the instructional librarian coordinated an assessment of CLO 2 using 63 anonymized research papers collected from English 100 instructors. The assessment revealed that just 67 percent of the papers achieved CLO 2 ([IIB-81](#)). Based on this information, the instructional librarian changed the English 100 library instruction to devote additional time to teaching citations.

The Library conducts and posts its annual survey of Leeward students, faculty, and staff and uses the results to improve services and resources, including new print and online collections, furniture, laptops/computers, chat reference services, databases, and headsets ([IIB-6](#), [IIB-65](#)). For example, excess noise was an ongoing concern for library staff, and survey comments revealed that noise was a concern for students too. In response, the Library designated quiet and silent study spaces ([IIB-82](#)). Survey results show that 95 percent of students indicated that they feel comfortable being in the Library ([IIB-67](#)). Additionally, the Library requested and received \$20,000 in additional funds for electronic resources that enabled the Library to acquire and/or subscribe to more resources and content ([IIB-83](#)).

The Library regularly maintains usage statistics including circulation, gate counts, database usage, reference requests, circulation requests, and library instruction sessions ([IIB-22](#), [IIB-84](#)). The Library compiles these statistics and adds them to the UH Library Council Annual Report, which includes data from all UH System campus libraries. The comparison of Leeward's data against the two-year campuses is a useful measure of how well the College is doing and helps to justify resource requests ([IIB-85](#)). For example, the total library expenditure was \$14 to \$15 per full-time student from 2012-2015. This was substantially lower than the UHCC average of \$27 per student. Reallocation of the Library's budget to purchase more online databases plus an additional \$20,000 from the College for resources has closed the spending gap from 33 percent to six percent in three years.

### **Evaluation of Learning Support Services**

The LRC regularly evaluates its services through multiple mechanisms to ensure it adequately supports student needs and contributes to the attainment of SAOs and CLOs. The LRC conducts an ARPD to assess its performance ([IIB-86](#)). According to the LRC 2016 ARPD, although the number of students served has shown little increase, the number of tutoring sessions increased by 12 percent, indicating an increase in repeat sessions. Demand for Writing Center services remained steady in both breadth and depth, and writing consultants worked with students taking courses from every division on campus.

The LRC maintains statistics on its tutoring sessions and workshops and uses student surveys for additional feedback ([IIB-86](#)). With continued high enrollment, expanded/diversified services, and the attractive setting of the Learning Commons, demand for both LRC and Writing Center services remain strong. Student responses to the CCSSE indicate a growing demand for tutoring and increased perception of its value ([IIB-87](#)). Additionally, tutors give students a feedback form at the end of every tutoring session for students to provide anonymous feedback on the session ([IIB-88](#)).

The LRC's Content Tutoring Center and Writing Center assess two CLOs for tutoring, comparing pass rates and persistence rates for students who have used tutoring services with other students in the same course who have not used tutoring. For example, the success rate of students using individual tutoring in summer 2015, fall 2015, and spring 2016 was 82.1 percent. In contrast, the success rate of students who took the same course and did not use tutoring was 72.8 percent ([IIB-86](#)). As shown in the ARPD, this CLO has been met consistently. The other CLO that focuses on how tutoring contributes to student learning is new and will be included in the next ARPD. After each tutoring session, students complete a feedback form that includes questions addressing these CLOs. In 2015-2016, 100 percent of the students who attended an individual content tutoring session (n=1,165) agreed that the tutor improved their understanding of the subject and that the session was a positive and helpful experience. In the same academic year, 100 percent of the students who attended an individual writing session (n=2,228) agreed that the writing consultant helped them to improve their writing and/or their understanding of the work discussed. They also agreed that working with the writing consultant helped them plan how to work independently on their essays ([IIB-86](#)). As a result of the positive feedback from students, the LRC Content Tutoring Center and the Writing Center will continue to provide and assess diverse, peer-delivered academic support services that meet current student and campus needs. Student feedback from individual sessions and group in-class workshops demonstrates high levels of engagement and satisfaction as students interacted with writing consultants.

To ensure that they are meeting students' needs, the KI Program regularly evaluates its services in a variety of ways: student and faculty surveys; data collection on student visits to the KI office; percentage of filled accommodation requests; and satisfaction surveys. The KI Program ARPD uses this information to assess and analyze its performance and plan for future directions for the program. The efficiency and effectiveness of the KI Program have mostly remained consistent between fall 2013 and fall 2016. Between spring 2015 and fall 2016, overall student satisfaction declined from 92 to 85 percent. A possible explanation is that beginning in fall 2015, the College employed only one faculty disability specialist, so some students may have had longer waits to receive some services. The second disability specialist position has since been filled. In an ongoing effort to improve services, the KI program is developing a survey for faculty to provide specific data on faculty perception of the program's effectiveness in providing information and support.

The Math Lab regularly evaluates its services through student surveys to ensure that it is meeting its mission to develop students' proficiency in math ([IIB-89](#)). The lab also gathers statistics on tutoring sessions, computer use, and textbook and calculator loans ([IIB-90](#)). Since the Math Lab is under the Mathematics and Natural Sciences Division, it has neither SAOs nor completes an ARPD. However, the lab manager provides the developmental math coordinator with tutoring contact data to include in the developmental math ARPD's action plan and resource implications ([IIB-91](#)). Although the results for the Math Lab evaluations are positive, the number of students being tutored is declining. To address this issue, the lab manager visits math classes in the beginning of the semester to inform students of the availability of the Math Lab and the resources it provides. The lab manager also continuously promotes the lab by reminding instructors to encourage students to visit the lab if they need assistance or a convenient place to study.

The Test Center conducts an ARPD to assess its performance and its SAOs. The center regularly surveys students, faculty, and staff about their satisfaction with computer lab services, equipment, and furniture. The assessment results of the SAO to provide high-quality testing services to students and members of the community indicate that 90 percent of respondents found that the center's services are highly satisfactory. Additionally, 94 percent found that the center's hours meet the needs of students ([IIB-92](#)).

Although the Help Desk does not assess SAOs, the Help Desk surveys both students and faculty to confirm that it meets students' needs. Help Desk satisfaction surveys indicate that users are satisfied with the services provided. Out of 414 surveys collected in fall 2016 and spring 2017, 98 percent of respondents indicated satisfaction with the services received from the Help Desk ([IIB-93](#)).

A computer or mobile device and internet connectivity are important tools to support students' academic success, and The Hub provides students with free technology support, which directly impacts their learning. The Hub has served many students. In 2016, The Hub serviced 315 computer-related problems. The Hub received 184 service calls in spring 2016, 16 calls in summer 2016, and 115 calls in fall 2016 ([IIB-94](#)). In spring 2016, The Hub assisted 185 students at a "WiFi Passthrough" event. In spring 2016, The Hub also set up a satellite help desk in the Library where interns assisted 70 students with computer or printing problems on site ([IIB-94](#)). To ensure that it adequately supports student customers, The Hub

evaluates its services through a customer satisfaction survey and keeps written surveys on file (IIB-94). An example of how The Hub uses evaluation results to make improvements concerns the open sign. A customer commented, “The Hub open sign is not too visible, especially for the students with disability. You need a sign that is more visible and appealing to students.” To address this problem, The Hub purchased a light-emitting diode sign so all students can easily locate The Hub.

Every two years, the College uses the CCSSE to assess learning support services. Specifically, the survey examines how satisfied students are with campus services and their educational experience. The survey also examines how engaged students are in their classes, in extracurricular activities, and with the faculty, campus staff, and their peers. Student engagement is closely related to persistence and achievement, so the CCSSE results help the College develop a clearer picture of its students. Average benchmark scores have improved continuously since the College first administered the survey in 2008 (IIB-95, IIB-87). These scores suggest that the College is making strides in improving student learning and achievement. Among the CCSSE indicators, many students identified that the College provides support to help them succeed and that they use campus computers for their academic work. In addition, students indicated that they are somewhat satisfied with the services that the College provides (IIB-87).

### **Analysis and Evaluation**

To ensure adequacy in meeting student needs, the College uses a variety of assessment tools including information literacy exams, surveys, usage data, feedback forms, student satisfaction, and the CCSSE to evaluate the Library and learning support services. The Library, LRC, KI Program, and Test Center conduct ARPDs to assess their performance. The ARPDs include the assessment of outcomes in order to make correlations between services and their impact on learning, and the Library, LRC, KI Program, and Test Center use these assessment results as the basis for improvement.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about program review for the Library and learning support services. Participants discussed how the College meets Standard II.B.3 and how the College can improve in this area. They said that the Library and LRC provide students with the academic help, support, and coaching to help students more successfully understand and meet learning outcomes for the different courses they are enrolled in. The Library may consider developing assessment tools that measure effectiveness in terms of quality rather than quantity. The Library already counts how many students they serve but has more difficulty in measuring how well they are served (IIB-59).

#### II.B.4.

***When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution’s intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)***

## **Evidence of Meeting the Standard**

The College relies on collaboration with other institutions and other sources for library and learning support services. These services and resources are adequate for the College's intended purposes, are easily accessible, and are utilized.

The Library is part of the UH Library Council. This group is formally recognized with bylaws adopted in 2003 and is comprised of head librarians from the ten UH System campuses ([IIB-96](#)). It is responsible for the purchase and implementation of a system wide shared library integrated management system, Hawai'i Voyager, which facilitates library lending operations, collection management and utilization, cross-campus library usage, and system wide resource sharing ([IIB-8](#)). The UH Library Council subscribes to the Primo Discovery cross-platform research system and the SFX link resolver system.

The Library is part of the Hawai'i Library Consortium that includes members from academic, public, private, and special libraries in Hawai'i ([IIB-97](#)). Through this consortium, the Library purchases full-text, web-based databases suitable for academic libraries such as Opposing Viewpoints, Issues and Controversies, and the Kanopy streaming video service.

The Library has contracts for services and resources including a variety of full-text, web-based, non-consortia databases that are individual to the College. The Library subscribes to the web-content platform LibGuides used by librarians to post webpages on particular topics. Additionally, the Library has contracts with the Pharos library printing system and 3M security gates.

The LRC, including the Writing Center, contracts with TutorTrac, a database program used for logging services and recording tutoring appointments ([IIB-98](#)).

The KI Program contracts with either Isle Interpret or Hawai'i Interpreting Service for American Sign Language services depending on which service has the lower cost and also contracts with Access Text Network and various publishers for alternative text needs. The KI office is a member of the Association of Higher Education and Disability, which provides training and guidance on best practices for providing services to students with disabilities. As a member of this organization, the KI Program has access to training materials, journals, and professional resources ([IIB-99](#)). The annual conference allows KI staff to meet and collaborate with disabilities specialists from other institutions and gain knowledge about changing trends in the field of disability services. Both of the College's disability specialists are active participants in a national listserv made up of other individuals at various higher education institutions. The listserv provides the opportunity to discuss issues and receive updates on changes to disability laws and regulations. On a bi-annual basis, the KI staff participates and attends a disability service providers meeting held at the University of Hawai'i at Mānoa. During this meeting, they discuss issues surrounding disability services within the UH System, the community, as well as those trending nationally.

The College contracts with Accuplacer, a placement assessment that measures academic skills in order to place students accurately into math or English classes. The College, as part of the UHCC System, contracts with Brainfuse, an online tutorial system.

The College ensures security by the use of Fortinet Security subscription to protect the campus network. The Fortinet firewall monitors and protects the campus network from virus, malware, intrusion, and attacks from the internet. The proactive monitoring of the networks allows the College to find and remove any potential system that might compromise the computer environment on the campus network. In addition to network security, all College computers have installed a suite of anti-virus, anti-malware, and anti-ransomware software.

The College evaluates the quality and effectiveness of its collaboration with other institutions and contractual agreements for library and learning support services.

### **Analysis and Evaluation**

The College relies on collaboration with other institutions and other sources for library and learning support services. These services and resources are adequate for the College's intended purposes, are easily accessible, and are utilized. The Library and learning support services certify, purchase, and maintain contractual agreements with other institutions to support student success.

## II.C. Student Support Services

### II.C.1.

*The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER 15)*

#### **Evidence of Meeting the Standard**

Leeward Community College (Leeward CC) recognizes the importance of providing a broad range of student support services to ensure that students can meet their educational and career goals. The Student Services units include Admissions and Records, Counseling and Advising, Financial Aid, Job Prep Services, Recruitment, Student Life, the Student Health Center, and Mental Health Services. The University Health Services manages the Student Health Center under a memorandum of agreement between the University of Hawai‘i at Mānoa (UH Mānoa) and Leeward CC. A mental health counselor who is funded through this memorandum with the Counseling and Student Development Center at UH Mānoa staffs the Mental Health Services. The College has units that provide support services to specific student populations. These units include the Veterans Resource Center, the Hālau ‘Ike O Pu‘uloa (Hālau), and the Office of International Programs (OIP). (For a description of each unit, see Standard [II.C.3.](#))

The College provides comprehensive student support services at its Pearl City campus, the Wai‘anae Moku Education Center, and the Office of Continuing Education and Workforce Development (OCEWD). The College also provides support services to high school students participating in its dual-enrollment programs such as Early College.

#### **Alignment with College Mission**

Student support services are aligned with the College mission and core values that include Open Access and Diversity and Respect ([IIC-1](#)). As the student population has changed, the College has developed new student support services to meet student needs such as requiring mandatory advising, the development of the STAR Guided Pathway Selection (GPS) system, and integrating support services through technology with MySuccess, a software platform of the University of Hawai‘i Community Colleges (UHCC) System, the University of Hawai‘i-West O‘ahu (UH West O‘ahu), and the University of Hawai‘i at Hilo. The College created a mandatory New Student Orientation (NSO) in response to the needs of students who were unaware of services and to provide an initial support system for new students utilizing the MySuccess software. The College created the Veterans Resource Center to support its increasing veteran and active military population. The center provides a place for students to meet a designated counselor and receive assistance with Veterans Affairs benefits and services.

In support of the College’s commitment to Native Hawaiian students, Leeward established the Hālau as an academically rigorous and culturally relevant pu‘uhonua (place of refuge) that houses academic and student support programs to inspire excellence, promote growth, and advance opportunities for Native Hawaiians. The Hālau also serves all students, staff,

and faculty who wish to increase their knowledge of Hawaiian culture, language, and history ([IIC-2](#)).

The OIP supports and promotes communication and cultural exchange among local and international students of diverse backgrounds. The OIP recruits and hosts F-1 visa-holding students pursuing higher education in the United States. Through the OIP, the international student advisor informs fulltime students regarding their F-1 visa status and helps students understand and follow F-1 immigration rules and regulations. The OIP provides an orientation for international students, assists with determining each student's initial English placement, helps students secure accommodations, and advises students continuously on academic, cultural, and practical concerns to support their success at the College ([IIC-3](#), [IIC-4](#)).

### **Evaluation of Student Services for Quality**

The College has regular evaluation processes in place to measure the quality of its student support services. Student Services units engage in several means of evaluation. The primary tool for evaluation is the Annual Report of Program Data (ARPD), which is part of the College's Integrated Planning and Budgeting Process. The ARPD has common metrics to evaluate demand, effectiveness, and efficiency, which the units use to complete a narrative analysis of their unit, develop an action plan, and indicate resources. In the years that Student Services units complete a Comprehensive Review and Evaluation (CRE), they do not complete an ARPD because the CRE includes elements of the ARPD. The College requires each support unit to complete a CRE at least once every four years. Results of the Student Services' 2014-2016 CRE show that the College is supporting students' needs through a wide range of services ([IIC-5](#)). Demand, efficiency, and effectiveness indicators have either increased or remained constant. Student Services units have used the CRE to identify improvements for designated areas, and the College has included plans for implementation of some of the improvements in its resource allocations. A number of units have requested new positions. The Student Services area will need to reallocate vacant positions as they become available to ensure those areas with the highest needs receive additional support. For more information about the College's ARPD and CRE, see Standards [I.B.5](#) and [I.B.9](#), respectively. For detailed discussion of the efforts made by the Student Services units to use assessment data for continuous improvement, see Standard [IIC.2](#).

In an ongoing effort to address the needs of students, the College participates in Community College Survey of Student Engagement (CCSSE), which it administers every two years. Among CCSSE indicators, student frequency, satisfaction, and importance scores all appear to be remaining fairly constant over a three-year period ([IIC-6](#)). Data also indicate that students view academic advising, career counseling, and financial aid advising as among the most important services that the College provides. The ARPD and CRE templates include CCSSE program quantitative indicators ([IIC-7](#)).

As an instructional support unit, the Hālau participates annually in the ARPD process and every third year in the CRE process ([IIC-8](#)). Like all other programs, the Hālau measures its demand, efficiency, and effectiveness using data from its participants in structured programs. Using a strategic enrollment management framework, Hālau staff developed programs such as Lanakila First-Year Cohort; Ho'oulu Career Development; Native Science, Technology, Engineering, and Math (STEM) Scholars; and Ke Ala 'Ike that aim to deliver the "right

touch” in the “right dosage” at each stage of a student’s academic journey. The Hālau adapted the metrics for its review from the UHCC System’s metrics for student services programs; however, rather than reporting the outcomes of the general student body, the Hālau works annually with the Office of Planning, Policy, and Assessment (OPPA) to extract the performance of each metric by the program’s participants. Using this evaluation process, Hālau staff can annually reflect on the quality and effectiveness of each strategy and determine how they can alter its design, delivery, or resource commitment for improved effect.

The OIP submitted an ARPD in fall 2016. Since this unit is unique in the UHCC System, the unit identifies which data metrics to collect. In the ARPD, the OIP focused on an action plan for improving the evaluation of the office while maintaining the current level of services provided ([IIC-9](#)).

The Wai‘anae Moku Education Center regularly evaluates its student services through student surveys and student and faculty comments. It uses CCSSE results, which are disaggregated by location, in its evaluation and completes an ARPD to assess its performance and support area outcomes (SAOs) and to develop plans for improvement ([IIC-10](#), [IIC-11](#)). The Wai‘anae Moku Education Center is halfway through a Title III grant (federal funding for Native Hawaiian serving institutions) that supports the implementation of a cohort program called Going to Finish On-Time. This cohort model has shown early success with strong completion rates of students. With the move to the new location, the faculty and staff are eager to serve more students and evaluate if this program continues to show success.

OCEWD evaluates its services annually and reports the results in the ARPD ([IIC-12](#)). The ARPD describes its assessment of learning outcomes and its alignment with the *Strategic Plan 2015-2021*. OCEWD has seen strong enrollment gains in its noncredit courses and programs. OCEWD conducts regular student evaluations to ensure the courses and programs offered are meeting the needs of its students.

### **Analysis and Evaluation**

In keeping with its mission, the College has an annual assessment process to determine that student support services at various sites and delivered through different modalities meet students’ needs.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and student support services. Participants discussed how the College meets Standard II.C.1 and Eligibility Requirement 15 and how the College can improve in these areas. They said that the Student Services units provide needed services to Leeward students. Student Services may not be evident to students, though, so roundtable participants recommended a one-stop shop for services like the one provided by the Hālau. They also said that Student Services units should continue to find ways to communicate the resources available to students ([IIC-13](#)).

#### **II.C.2.**

***The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those***

*outcomes. The institution uses assessment data to continuously improve student support programs and services.*

## **Evidence of Meeting the Standard**

### **Assessment of Learning Outcomes for Student Services Units**

The Student Services units engage in assessment and program review in order to ensure the effectiveness of their programs and services. Admissions and Records, Counseling and Advising, Financial Aid, Job Prep Services, Recruitment, Student Life, and the Student Health Center have identified and recently updated SAOs ([IIC-14](#)). Each of these units assesses its SAOs and reports the results of those assessments in its ARPD and CRE. The Mental Health Services and the Veterans Resource Center do not complete their own ARPD because their assigned counselors function as part of the Counseling and Advising unit ([IIC-15](#)). Although not a separate unit, the Early College program completes an ARPD and a CRE ([IIC-16](#), [IIC-17](#)).

The Student Services units use SAOs to determine the metrics to be evaluated. Financial Aid, Job Prep Services, Recruitment, Student Life, and the Student Health Center have students, prospective students, or clients complete a survey after each workshop, appointment, or service to determine satisfaction with services received. The units use those evaluation results to continuously improve student support services ([IIC-18](#), [IIC-19](#), [IIC-20](#), [IIC-21](#), [IIC-22](#)). The Counseling and Advising unit uses the UHCC's Starfish software platform called MySuccess for student tracking reports and aggregate counseling evaluations that students complete online to determine trends, workflow, and effectiveness of services. The Counseling and Advising unit reviews this data to determine if and where improvements to service delivery need to take place ([IIC-23](#)).

### **Continuous Improvement of Student Support Services**

#### *Admissions and Records*

The Admissions and Records unit provides a clear example of how the College regularly evaluates the quality of its student support services. In 2017-2018, the Admissions and Records office set three goals to support its SAOs ([IIC-14](#)). The first goal is that students who contact the Admissions and Records office for assistance will receive the desired service as quickly and efficiently as possible and be able to articulate that the service meets or exceeds expectations. The second goal is that student academic records will be maintained according to applicable state and federal guidelines. The third goal is that the Admissions and Records office will contribute to the College's Wildly Important Goal (WIG) of keeping the students already enrolled at Leeward. For additional discussion of the College's WIG, see Standard [I.B.3](#).

The Admissions and Records office improved its admissions-related processes ([IIC-24](#)). Beginning with the processing of summer 2015 applications, all College acceptance notifications are being sent through email rather than hard-copy letter. This has enabled the Admissions and Records office to spend more time processing applications, which increases the number of accepted students for each day of application processing.

Another improvement to Admissions and Records services concerns residency status. In order to expedite acceptance to the College, the Admissions and Records office updated its

procedures in spring 2016 for reviewing residency. The College no longer requires that students have their residency status for tuition purposes finalized before being accepted to the College. The Admissions and Records office instead works with new students to finalize residency information after accepting the student but prior to the student registering for classes.

Beginning with spring 2018 application processing, the Admissions and Records office has ended the practice of placing a miscellaneous admissions hold on every new or returning student's record to prevent students from registering for courses during the priority registration period. The goal of this change is to allow both new and returning students, if eligible, to register for courses based on their number of earned credits. The Admissions and Records office implemented this change specifically to address the College's WIG of keeping Leeward students enrolled.

The Admissions and Records office has sought to improve services for students by adding an online option for official transcript requests. The College is partnering with the National Student Clearinghouse to offer an online option to request official transcripts from the College without having to submit the request form by mail or make the request in person at the Admissions and Records office. Additionally, the Admissions and Records office will implement FileDrop, a UH file sharing service, to allow additional options for document submission to the office by students and/or applicants ([IIC-25](#)). Doing so will improve services by allowing for a more secure method of document delivery that will help protect students' personally identifiable information.

#### *Counseling and Advising*

With its mission and the Counseling Process model as the foundation, the Counseling and Advising unit created its course learning outcomes (CLOs) and aligned SAOs. The unit worked closely with the OPPA to develop SAOs that will support and align with the College's WIG for student retention, the new Counseling Process (see Standard [II.C.5](#)), and the missions of the Counseling and Advising unit, Student Services, and the College ([IIC-14](#)). In 2017-2018, the unit decided to target its assessment efforts on the SAO to "foster a safe, supportive, and caring counseling environment." The unit formed four subcommittees to facilitate the development of a counseling "culture of care" that promotes care for students, care for others in the unit, and self-care. Subcommittees present their initiatives and activities to the larger counseling group, seeking input and participation. These committees also report on their progress and assessment measures at counseling meetings on a bi-monthly basis. For further discussion of the Counseling and Advising unit, see Standard [II.C.5](#).

#### *Financial Aid*

The Financial Aid unit strives to improve its financial advising services and uses assessment data such as the CCSSE to identify areas for improvement ([IIC-18](#)). According to 2016 CCSSE results, Leeward students saw financial aid advising as "somewhat" important, were "somewhat" satisfied with these services, and were "somewhat" likely to use these services ([IIC-6](#)). This unit's outcomes now state that the Financial Aid office will increase the number of students receiving financial aid and will comply with regulatory requirements necessary to participate in federal and state programs. The SAOs focus on increasing Leeward students' ability to recognize the

Financial Aid office as a source for educational financial assistance as well as increasing financial aid recipients' recognition of important financial aid terms, definitions, and aid programs such as the Free Application for Federal Student Aid (FAFSA) and Federal Pell Grant ([IIC-14](#)).

To support its SAOs, the Financial Aid unit strives to increase students' awareness about its services by conducting workshops and presentations and participating in campus activities such as NSO, the Financial Literacy Fair, and the College Bash. The Financial Aid office assists students in researching financial aid opportunities off- and on-campus, helps students complete the FAFSA and submit other forms necessary to complete their file, and maintains the scholarship bulletin board and recommended scholarship websites. As discussed in Standard [I.B.6](#), the Financial Aid office reviewed its current financial aid process and is working with the Banner Central financial aid lead, the University's four-year schools, and UHCC campuses to create best practices and simplify the financial aid process, particularly in light of the state legislature for Hawai'i Promise scholarship that is intended to ensure that students with unmet financial need can get the financial support they need to attend college ([IIC-26](#), [IIC-27](#)). The office has also provided training to student employees at the Wai'anae Moku Education Center to assist students to complete the FAFSA application.

#### *Job Prep Services*

The Job Prep Services unit participates in the ARPD process to assess its performance and SAOs ([IIC-14](#)). The unit measures its services based on how well students and employers view the demand, efficiency, and effectiveness of the services being offered ([IIC-19](#)). The unit collects quantitative data through the Starfish software for appointments, the Job Center Online for job postings, and participant evaluations at workshops. For 2016-2017, the number of students who placed in jobs remained the same and all other quantitative indicators increased ([IIC-19](#)).

To support students as they prepare for employment, Job Prep Services staff assists students with job application materials. To help students with finding career information, Job Prep Services provides access to career resources through the online Career Coach and the Job Center Online. Both resources provide students with information on jobs and careers in various occupational areas. The reports generated from these websites in 2016-2017 indicated an increase in student usage of Career Coach by 84 percent and the Job Center Online by 13 percent ([IIC-19](#)).

Job Prep Services provides students with opportunities to meet employers in person at the on-campus recruitment tables in the concourse area or at job fairs every semester. In 2016-2017, employers came onto the campus for a total of 35 days to recruit. Additionally, 50 to 60 vendors participated in the Fall Job Fair and almost 100 vendors participated in the Spring Job Fair ([IIC-28](#), [IIC-19](#)). Although many employers attended, they commented that they wanted to see more Leeward students since the flow of traffic at the events was very low ([IIC-29](#)). In response to this feedback, in spring 2017 Job Prep Services organized two specialized mini job fairs, one for the Automotive Technology program and one for the Culinary Arts program. These two mini fairs had excellent student attendance since faculty required students to attend. Evaluations from each event were positive ([IIC-30](#), [IIC-31](#)).

The Job Prep Services unit provides opportunities for students to apply for jobs so that they can secure employment. Its staff works with all types of employers for recruitment needs and offers on-campus recruitment opportunities such as recruitment tabling and job fairs. Job Prep Services staff screens each new employer and job posting for legitimacy based on UHCC System criteria. The Job Prep Services office worked with the OPPIA to extract data on fall 2017 and summer 2017 graduates using the Outcomes Survey ([IIC-32](#)). Job Prep Services will use this data to provide an overview of recent graduates and to plan post-graduation activities.

### *Recruitment*

The Recruitment unit's mission is to encourage, motivate, and inspire students to pursue a higher education. This unit's SAOs focus on providing students with information about higher education so they can identify the benefits of attending college, familiarizing prospective students with Leeward CC so they can identify programs and resources, and providing prospective students with application assistance so they can apply to the College ([IIC-14](#)). The current priority of this unit is to increase campus enrollment and financial aid participation.

In 2014-2015, there was a transition period in the Recruitment unit because the recruiter position was vacant; however, in October 2017, the College hired a new recruiter. During the transition period, the College did not hold certain recruitment events, which resulted in a decrease in campus tour requests and college workshops offered. The new recruiter has reinstated the activities and events previously offered. Currently, the Recruitment office is staffed by one full-time recruiter and five student peer mentors. The unit holds monthly team meetings and one-to-one peer mentor meetings to discuss upcoming activities, evaluate current activities, and plan for new, innovative ways to help increase enrollment to the College ([IIC-33](#)). In fall 2017, the Recruitment unit hosted a luncheon for high school counselors to familiarize them with the College's programs and resources ([IIC-34](#)). In spring 2018, peer mentors helped high school students through the entire application process that included applying to the College, creating a UH username, signing up for a NSO session, submitting a health clearance form, and taking the Accuplacer placement test. In addition, the recruiter assists high schools at their FAFSA nights and peer mentors assist prospective students complete the FAFSA. The Recruitment unit has also been working closely with the Wai'anae Moku Education Center coordinator and faculty to help increase the enrollment of Native Hawaiian students ([IIC-20](#)).

### *Student Life*

The Student Life unit's SAOs focus on providing leadership training for students, promoting active student engagement through events, and running NSO ([IIC-14](#)). Student Life has a structured student leadership training series for all its programs to prepare students for leadership roles. Faculty and staff from various UHCC campuses also participate ([IIC-35](#)). In addition to these retreats, Student Life consistently provides True Colors and Safe Zone trainings for Student Life leaders to improve communication between teams and to highlight the importance of inclusivity.

To promote active student engagement through events, the Student Life office works with the Love Pono committee, which consists of a counselor, instructional faculty, a domestic violence prevention advocate, and students. The mission of Love Pono is to provide a safe

environment to help the college community “build and maintain healthy relationships through education, intervention, campus and community resources, and counseling” (IIC-36). The Love Pono committee holds workshops and events such as the “Power of Love” and “Respect the Line” at both the Pearl City campus and the Wai‘anae Moku Education Center. In 2016-2017, 99 percent of all Love Pono workshop attendees (n=101) indicated that they were more aware of available resources after participating in the workshop (IIC-37).

The Student Life unit conducts an evaluation after each NSO session to continuously improve the program (IIC-38). Since the College’s last institutional self-evaluation, NSO has improved by utilizing the MySuccess software to streamline communication and reduce manual inputting of information. MySuccess automatically emails students necessary information based on established guidelines. In 2013, NSO began hosting workshops to educate the campus on the use of MySuccess and how it can help students. For further discussion of the Student Life unit, see Standard [II.C.5](#). For further discussion of NSO, see Standard [II.C.6](#).

### *Student Health Center*

The Student Health Center’s SAOs focus on providing medical services to students, maintaining students’ health clearances, and promoting a healthy lifestyle (IIC-14). Each semester, the Student Health Center conducts a client survey to assess satisfaction of current services and demand for other services (IIC-39). The Student Health Center monitors the number and types of visits using an electronic medical record system (IIC-22). The center promotes its services at NSO, through participation in campus events, and on posters that are displayed around the campus. The center partners with Student Life to provide guidance, health education, and first aid services for campus events. The Student Health Center collaborates with the Admissions and Records office to improve the Health Clearance process through use of Banner and Star software. The College informs the students of health requirements through direct communication, NSO, its website, and the health clearance form. The center uses the Star software to measure the number of students with TB/MMR holds per semester and is working to decrease the number of health clearance deficiencies by ten percent by providing more education on the requirements. The center will continue to work with local high schools to comply with health clearance requirements for dually enrolled students. Storing the immunization records in the electronic health record system aids in a smoother transition when students transfer to other post-secondary institutions. Through its services, the Student Health Center aids in retention by assisting students in maintaining and improving their health. The College encourages students to have health insurance and the center provides students with information regarding the student plan.

### *Mental Health Services*

The Mental Health Services, which is funded through a memorandum of agreement with UH Mānoa, does not complete its own ARPD because the mental health counselor functions as part of the Counseling and Advising unit. The Mental Health Services presence at the College, however, is a result of the College identifying the needs of its student population and then using assessment data to continuously improve its services. In 2015, the College participated in the College Mental Health Project’s survey. Approximately 400 students, faculty, and staff took the survey in order for the College to get a baseline of the campus constituents’ knowledge of, attitudes toward, and experience with mental health and mental illness. Respondents showed a good baseline level of knowledge about mental illness. Of

those who responded (n=405), 79 percent believed that mental health should be a priority on the campus ([IIC-40](#), [IIC-41](#)).

The Student Services' 2014-2016 CRE identifies a "more sustainable and permanent offering of mental health services" as a focus area in the coming three years because the memorandum of agreement with UH Mānoa provides for a mental health counselor only on an annual basis ([IIC-5](#)). The Student Services Resource Requests for 2016-2017 includes as a priority a full-time mental health psychologist ([IIC-42](#)).

### **Analysis and Evaluation**

In order to continuously improve student support programs and services, each of the College's student support programs has identified learning support outcomes, which are annually assessed through the ARPD. When the assessment data identifies areas of improvement the College develops strategies for improvement.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College's student support services. Participants discussed how the College meets Standard II.C.2 and how the College can improve these services. They are proud of the number of campus services that are available for students. These services have helped support retention. Participants would like to see more services for distance education (DE) students as well as have faculty provide information about these services to their students each semester ([IIC-13](#)).

II.C.3.

*The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method. (ER 15)*

### **Evidence of Meeting the Standard**

#### **Equitable Access to Student Support Services**

The College ensures equitable access to all of its students by providing appropriate, comprehensive, and reliable student support services regardless of service location or delivery method. Table 54 demonstrates that comparable student services are available at most campus locations and for all types of students.

Table 54.  
*Student Support Services Unit by Location and Means of Delivery*

Office of International Programs	✓	**	✓

\* Students attending classes at the Wai‘anae Moku Education Center are able to use the services at the Student Health Center on the Pearl City campus and may submit their health clearance form via facsimile.

\*\* International students enrolled in the English Language Institute attend classes at the Pearl City campus.

The Admissions and Records unit processes all admission applications and accepts students to the College (excluding international applications), maintains all student academic records for the College, certifies all students receiving Veterans Affairs benefits, evaluates all transfer credit requests, provides official transcripts and enrollment verifications for students, and confers all degrees and certificates awarded by the College. The College website includes easily accessible ways for students to apply, whether they are first-time students or

international students ([IIC-43](#)). The website includes an online application, academic deadlines, admission requirements, registration information, and financial aid information.

The Counseling and Advising unit provides initial and ongoing academic advising and counseling for all students, prospective students, and graduates ([IIC-44](#)). This unit provides individual and group appointments, drop-in counseling, college-success courses and workshops, university transfer information sessions, informative and just-in-time messaging, and a counseling email for general advising inquiries. Counselors have a caseload of students for whom they assume professional responsibility, including monitoring and intervening as needed. Half of the counselors are program counselors who work with specific instructional programs such as career and technical education, teacher education, business, and developmental math and English ([IIC-45](#)). General counselors work primarily with liberal arts and undecided majors. The Counseling and Advising unit also works with specific populations such as dual-enrollment students, Native Hawaiian students, and veteran students. In spring 2018, the Counseling and Advising Unit expanded their services by offering Express Counseling two nights a week in the Learning Commons ([IIC-46](#)).

The Counseling and Advising unit uses a number of methods for providing support to students. Some examples include a mandatory NSO for all students new to the College, instruction in the use of STAR (brand name) as a degree planning tool for students, intrusive counseling for students who demonstrate a need for additional support, and alternative delivery methods to address students who are not readily available for in-person advising and counseling. Counselors are trained to use alternative delivery methods including Skype and Google Hangouts to support and facilitate online counseling sessions during the day and evening ([IIC-47](#)). Webcams and headsets are available for counselors to use during online student appointments. For a comprehensive discussion of the Counseling and Advising unit, see Standard [II.C.5](#).

The Financial Aid unit is committed to providing access to higher education by assisting students and families to seek, obtain, and manage financial aid resources necessary to pursue their higher educational goals ([IIC-48](#)). The Financial Aid unit has provided training to students who are peer mentors at the Wai‘anae Moku Education Center.

The Job Prep Services unit supports students with their career development ([IIC-49](#)). The unit helps students understand the job search process, organize their employment documents, prepare for job interviews, and create employment strategies. JPS organizes weekly events such as recruitment tables to inform students about upcoming employment opportunities. Staff share their workforce knowledge with students and offer employment preparation workshops for faculty and staff. In spring 2017, JPS added the Hawai‘i Nutrition, Employment, and Training program that supports eligible Leeward students in workforce training programs to receive food stamps and reimbursement for books and transportation. JPS participates in most campus activities to promote its services and co-sponsors events such as the Employment Expo ([IIC-50](#)).

The Recruitment unit provides outreach to area high schools and community organizations and works closely with the Creative Services office to promote an awareness of the College and its programs and services ([IIC-51](#)). The Recruitment unit coordinates outreach activities, participates in college fairs, and organizes campus tours and special events to help attract

prospective students ([IIC-52](#)). The college recruiter coordinates a group of peer mentors who provide one-to-one assistance to students from area high schools and who give classroom presentations at a teacher's request on topics related to college aspiration, financial literacy, and college success. In addition, the college recruiter works closely with other members of Student Services to implement dual-enrollment programs ([IIC-53](#), [IIC-20](#)).

The Student Life unit provides leadership and co-curricular learning opportunities outside of the academic classroom ([IIC-54](#)). Some of these opportunities include shared governance positions, intramural sports, student employment, student organizations, and a variety of enriching events. Campus involvement enables students to gain life skills, increase civic responsibility, and enhance personal and professional development.

The Student Health Center unit, an extension of the University Health Services at the UH Mānoa campus, provides students, faculty, and staff at the College with health care services that include but are not limited to health education, disease prevention, family planning, and treatment for acute episodic illness ([IIC-55](#), [IIC-56](#)). This unit works with the Admissions and Records to ensure that the College meets mandated health requirements for entrance to a post-secondary institution. Health clearance forms and medical record release forms are available for download on the Student Health Center website and may be file-dropped using secure email for evaluation and stored in an electronic medical record system. The center's website contains helpful information regarding health requirements and services ([IIC-55](#)).

The Mental Health Services unit provides individual therapy, couples therapy, case management, emergency/crisis intervention, client-centered consultation, outreach and workshops, and relevant resources. All services to Leeward students are voluntary, free of charge, confidential, and do not affect their academic standing. The mental health counselor (referred to as a "personal counselor") is available to meet with students four days a week at the Pearl City campus and one day a week at the Wai'anae Moku Education Center. This counselor holds a full-time position that is funded through a memorandum of agreement with the Counseling and Student Development Center at UH Mānoa ([IIC-57](#), [IIC-58](#)). This memorandum is the first of its kind at UH Mānoa to stipulate a full-time commitment of mental health services to Leeward CC.

The Veterans Resource Center offers services for the College's current and prospective students who are veterans, active duty, reservists, National Guard members, and military dependents ([IIC-59](#), [IIC-60](#), [IIC-61](#)). An assigned counselor helps these students with program and graduation requirements and Veterans Affairs educational benefits, tuition assistance, and dependent benefits. The counselor assists students with transferring military service for equivalent credits, usually through the Joint Services Transcript. The center refers students to appropriate organizations regarding other related services and benefits such as health and homelessness services. The center serves as a lending library so that students can borrow certain textbooks prior to receiving initial payment of Veterans Affairs benefits. The center is an approved Veterans Affairs Work Study site, which provides student employment and supervisory experience. The center offers a student lounge, computer/laptop use, a group study area, and information on veteran-focused resources. The center provides personnel support for the VetSuccess on Campus program, which includes having a counselor from the U.S. Department of Veterans Affairs on campus on three days a week ([IIC-62](#)). The center provides personnel support for the Veterans Integration to Academic Leadership program,

which provides veterans on campus with mental health services by appointment with a clinical psychologist ([IIC-63](#)). The Veterans Resource Center also partners with community organizations such as the Vet Center Mobile Truck service.

The Wai‘anae Moku Education Center is staffed with two full-time general counselors assigned to its student population in addition to one counselor who is on a federally funded Title III grant for its Going to Finish On-Time program and the UH Foundation-supported Access to Education program ([IIC-64](#)). The Going to Finish On-Time program recruits students who agree to enroll in college full-time and for the first year agree to enroll in a predetermined sequence of courses as a cohort. In support of the program, the College provides this dedicated counselor and peer mentors to help monitor student progress and provide additional academic support ([IIC-65](#)). The Access to Education program consists of individuals recruited from drug-treatment programs along the Wai‘anae coast and those who were recently incarcerated. Some of the students in the Access to Education program are also participating in the Going to Finish On-Time program. The College also provides peer mentor support for this student population.

The OIP provides services for inbound and outbound students and provides support for internationally-related matters between local, national, and international institutions ([IIC-66](#)). For short-term inbound students, the OIP provides study tours that are customized to the partner institutions’ goals and preferred CLOs ([IIC-67](#)). This includes accommodations, English as a Second Language classes, and excursions. For long-term international students, the OIP provides immigration/visa counseling, academic counseling, housing assistance, and scholarship and/or transfer advising ([IIC-68](#)). For Leeward students, the OIP offers faculty-led study abroad programs and provides advising on study-abroad programs and scholarships ([IIC-69](#)). The OIP organizes the College’s annual International Education Week for the entire campus community ([IIC-70](#)). OIP posts its informational flyers at both the Pearl City campus and the Wai‘anae Moku Education Center, and OIP is currently planning International Education Week events at the Wai‘anae Moku Education Center.

Students enrolled in OCEWD noncredit programs receive counseling and academic guidance from the College’s Counseling and Advising unit. In addition, OCEWD program coordinators act as academic advisors for their programs at student’s entry and for the duration of the student’s enrollment. Noncredit students are eligible to access other support services such as Job Prep Services and the Kāko‘o ‘Ike Program.

### **Early College and Other Dual-Enrollment Programs**

Since 2015, the College has partnered with eight high schools to run the Early College program and has dedicated three counselors to serve as liaisons. Through Early College, high school students are able to have dual credit whereby credits earned count toward high school and college requirements ([IIC-71](#)). This program allows for greater academic success, greater transition from high school to college (“college-going”), increased cost effectiveness for students and their families, and better preparation for the rigors of higher education ([IIC-72](#)). At one partner school, students have completed their Associate in Arts degree at the same time that they graduated from high school. All of the College’s dually enrolled students are considered Leeward CC students; therefore, all services available to the College’s regular student body are available to these students.

Through partnerships with participating high schools, the College's Admissions and Records office, Counseling and Advising unit, Recruitment office, Student Health Center, and Test Center support Early College students from the point of college admission through their participation and completion of coursework. The Early College program acts as the liaison between the various offices within the College and the partnering high schools, providing the school partners with information about students' applications, testing, and course eligibility statuses so that the high schools can relay information to potential students and provide them with necessary support. The Recruitment office and three Leeward counselors designated for Early College are available to provide direct support to Early College students completing the admission and registration processes at the Pearl City campus. One counselor at the Wai'anae Moku Education Center provides assistance to the high schools participating in Early College courses along the Wai'anae coast. The Early College counselors regularly hold office hours at their assigned high school campuses and make themselves available to students through email, phone, and Google Hangouts.

High school students who do not attend a partner high school can also participate in the College's other dual-enrollment opportunities using three other programs: Running Start, Early Admit, and Jumpstart. Students who participate in these programs typically pursue the opportunity on their own with the support of their sponsoring high school, and they take classes offered on the College's campus rather than their high school campus. The College's Early College counselors directly support these students' efforts to enroll in the College and register for classes.

Counselors work, sometimes in tandem with partner high schools and Early College instructors, to intervene with students who experience difficulty in their classes and/or who are identified as needing an intervention through the College's Maka'ala and No Show programs. These counselors provide academic advising and career counseling to students as they advance in their accumulation of college credit as well as train students in the use of STAR, which is a UH System-developed, degree-audit software program. Dually enrolled students have access to all technological tools including STAR, MySuccess, and Laulima. As all of these products are available online, the information they provide is also available to students at all times.

In spring 2016, the College was given an Experimental Sites Initiative designation by the federal government, which allowed the campus to award Federal Pell Grants to dually enrolled students ([IIC-73](#)). This designation provides the College with a mechanism to ensure that low-income, dually enrolled high school students have access to coursework that is relevant and applicable to their intended college degrees. Students learn about this opportunity through Early College high school partners as well as the Early College counselors. The College assists interested students in completing their application for admission as well as their FAFSA and are fully advised on the benefits, risks, and obligations associated with using federal financial aid to support Early College coursework. Students who qualify for the Pell Grant have 100 percent of their tuition, fees, and book charges covered regardless of the amount of their Pell Grant award. The College provides these students all forms of support that it provides for dually enrolled students.

## **Assessment of Student Needs for Student Support Services**

The College assesses student needs for student support services regardless of location or mode of delivery and allocates resources to provide for those services. Resource implications in 2014-2016 identified the Early College program as an area that needs more support ([IIC-5](#), [IIC-42](#)). Requested funding support in the 2017-2018 Operating Expenditures Plan provides the Early College program with reimbursement of mileage costs and funds for supplies ([IIC-74](#)).

## **Analysis and Evaluation**

In its efforts to provide mission-driven student support services that foster equitable access to all of its students, the College provides appropriate, comprehensive, and reliable services to all students.

II.C.4.

*Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.*

## **Evidence of Meeting the Standard**

### **Co-Curricular Programs and College Mission**

The College determines what co-curricular programs are appropriate to its mission and students. These programs advance the College's mission statement in that they "foster students to become responsible global citizens locally, nationally, and internationally" ([IIC-1](#)). They also advance the College's core values of diversity and respect in that they provide a "diverse intellectual and social environment, where learning occurs through exposure to world cultures, and through interaction with peoples of diverse experiences, beliefs, and perspectives" ([IIC-1](#)).

The Student Life office, through the advisement of the Student Life coordinator, facilitates co-curricular experiences through the Student Government, the Student Activities Board, campus clubs, the Budget and Finance Committee, *Ka Mana 'o* (student magazine), NSO, and IM LeeSports (Intramural Leeward Sports). The coordinator manages the Board of Student Communications, commencement ceremonies, and Love Pono (campus violence prevention program). Student Life staff manage student identification cards, discounted movie tickets, the student lounge, the senate chambers meeting room, and campus bulletin boards.

Policies and procedures are in place to oversee the effective operation of the Student Life's co-curricular programs and to ensure the College conducts these programs with sound educational policy and standards of integrity. In terms of financial responsibilities, the Student Government, the Student Activities Board, and the Budget and Finance Committee approve all fiscal purchases using student activities fees. The Board of Student Communications approves all fiscal purchases with board fees.

The Student Government is the governing body of the Associated Students of the University

of Hawai‘i-Leeward CC (ASUH-Leeward CC) ([IIC-75](#), [IIC-76](#)). An executive board comprised of a president, vice president, secretary, and treasurer manages the governing body. The executive board oversees five senators who are elected by the ASUH-Leeward CC and one senator who is elected by students enrolled in at least one credit at the Wai‘anae Moku Education Center. Its major responsibilities include managing student activities fees and establishing policies and programs for students. For further discussion of the Student Government, see Standard [IV.A.2](#).

The Student Government advocates for students. It partnered with local food truck vendors to address limited food options on campus, collaborated with the Information Technology Group to increase WiFi usage for outdoor areas, collaborated with administration to implement designated smoking areas and recycling bins, increased funding for the Wai‘anae Moku Education Center, and partnered with faculty to produce a speaker series on various professions.

The Student Activities Board strives to promote student ideas and engagement ([IIC-77](#)). The purpose of the board is to provide fun, educational, and diverse programs and events for the student body. Events include video game tournaments, poetry slams, live entertainment, and cultural events. The board is a separate entity of the Student Government that operates with its own charter and bylaws recognized by the UH Board of Regents ([IIC-78](#)).

Registered independent student organizations, commonly called clubs, are consistent with the College mission in their commitment to nurture and inspire students by providing co-curricular activities that enable students to gain life skills, increase civic responsibility, and develop leadership skills that enrich their personal and professional development. In 2017-2018, the College had 16 registered clubs ([IIC-79](#)). The Student Life coordinator created the Registered Independent Student Organizations Handbook as a resource guide to assist in developing and registering official student organizations ([IIC-80](#)).

The Budget and Finance Committee is a committee of the ASUH-Leeward CC ([IIC-81](#)). This committee focuses on allocating funding to registered clubs and campus entities that co-sponsor educational and social events and programs outside the classroom at both the Pearl City campus and the Wai‘anae Moku Education Center ([IIC-82](#)). Student Government established this committee to appropriately allocate student activity fees through an equitable, organized process.

Although the UHCC System does not have official athletics programs or teams, students at the College are active in a number of intramural sports offered year round. In fall 2011, Student Life inaugurated the intramural sports program IM LeeSports ([IIC-83](#), [IIC-84](#)). The mission of IM LeeSports is to provide students with opportunities to grow, learn, and develop respect for others through a positive experience in organized sports. The activity itself is friendly yet competitive, but the underlying goal is to foster an inclusive community of students who find commonality through their love for sports. IM LeeSports is offered in two programs: a non-competitive campus sports program and a competitive program called IM LeeSports League, which includes all the UHCC campuses on O‘ahu and UH West O‘ahu. In order to provide adequate funding for the IM LeeSports program, the College increased student activities fees and charges the other campuses fees for each team they enter into the league. The IM LeeSports League program received an honorable mention for the Wo

Endowment's Community Building Award in spring 2016 ([IIC-85](#)).

The College offers numerous co-curricular programs that are sponsored by academic disciplines and programs within the Instructional Divisions that are suited to the College mission and core values in that they foster global citizenship and exposure to world cultures. For example, the Global Studies Lecture Series brought a speaker to discuss indigenous activism and slam poetry, the Hawaiian Studies Program brought speakers to discuss indigenous approaches to governance, and the Mauka to Makai: Political Science Lecture Series brought a speaker to discuss the Dakota Access Pipeline ([IIC-86](#), [IIC-87](#), [IIC-88](#)). Every year, the College's Office of International Programs sponsors a variety of cultural activities during the annual International Education Week ([IIC-70](#)).

Additionally, the College offers co-curricular clubs that promote the College's mission statement and core value of integrity by fostering a "culture of continuous improvement to open pathways to student success" ([IIC-1](#)). Phi Theta Kappa, Leeward's chapter of Alpha Lambda Gamma, recognizes and encourages scholarship, leadership, and service among community college students ([IIC-89](#)). Another example is the Phi Beta Lambda/Enactus Business Club, which coordinates the annual Spring Fair and Fall Fair to promote student entrepreneurship and the Dress for Success clothing drive ([IIC-90](#), [IIC-91](#), [IIC-92](#)).

### **Evaluation of Co-Curricular Programs**

The College regularly evaluates the quality and effectiveness of its co-curricular programs. Survey results indicate that students appreciate and enjoy events sponsored by the Student Activities Board ([IIC-93](#), [IIC-94](#), [IIC-95](#)). Survey results for IM LeeSports show that 70 percent of the participants surveyed (n=230 in 2015-2016, n=166 in 2016-2017) enjoyed playing against other colleges, 62 percent of the students surveyed enjoyed meeting new students, 41 percent of the students surveyed enjoyed being in school because of intramural sports, 82 percent of the students surveyed were encouraged to maintain a 2.0 GPA because of the program's GPA requirement, and 83 percent of the students surveyed indicated that they would participate again ([IIC-96](#)).

### **Analysis and Evaluation**

The College's co-curricular and athletic programs are suited to its mission and play an important role in the social and cultural development of Leeward students. Programs include a student government and activities board, clubs, budget finance committee, and intramural sports. Through designated faculty and staff, the College's Student Life unit takes fiscal and programmatic responsibility for these programs and conducts them with sound educational policy and integrity.

#### **I.C.5.**

***The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.***

## **Evidence of Meeting the Standard**

The College provides counseling and academic advising programs to support student development and success. These programs help students understand the requirements related to their programs of study and ensure that students receive timely, useful, and accurate information about relevant academic requirements including graduation and transfer policies. The College also offers personal counseling to help students resolve any problems that are interfering with their ability to concentrate and complete their assignments. For a description of the Counseling and Advising unit, see Standard [II.C.3](#).

### **Programs to Help Students Understand Requirements and Receive Accurate Information**

To promote consistency in the delivery of services and information to students, the Counseling and Advising unit developed a Counseling Process model that identifies eight stages in the “Leeward student experience” and the counselor’s responsibility in each stage. The eight-stage process includes Prospective Student, Admissions, Mandatory NSO, Mandatory New Student Advising (NSA) Appointment, First Semester, Second Semester, Continuing Semester, and Graduation. The Counseling Process model provides a uniform standard that each counselor follows when working with students ([IIC-97](#)).

To be further responsive to the needs of students and their identified academic goals, the Counseling and Advising unit has program counselors in the areas of teacher education; automotive technology; digital media; culinary arts; television production; business; plant biology and tropical agriculture; and Science, Technology, Engineering, and Math (STEM). In addition, the College has identified special populations of students who may need extra support. These populations include Native Hawaiians, veterans, those who place into developmental math and English, and the dually enrolled population who begin taking college courses while they are high school students.

In some cases, program counselors assigned to certain majors or student demographics also service other programs related to their primary student group focus. For example, the developmental English counselor also supports the OIP students who begin their academic journey at the College usually enrolling in English as a Second Language courses. Counselors also provide program and student support services for the College’s noncredit division, OCEWD.

The Counseling and Advising unit provides mandatory NSA for all incoming students to introduce them to the support resources available at the college, degree requirements, registration procedures, and career exploration tools. Based on the major a student indicates on the college application, that student is assigned a counselor who conducts this initial meeting. This not only ensures accurate communication of program services and degree requirements, but also allows for rapport building between the student and the assigned counselor. According to the counseling evaluations from 2012-2017, which assessed students’ achievement of the Counseling and Advising unit’s CLOs, over 90 percent of the respondents (n=2,709) felt that after meeting with their counselor they could identify degree/career options, outline an academic/degree plan, were aware of obstacles that might affect their academic success, could identify next steps toward their college success, and were aware of the resources and information that would help them succeed ([IIC-98](#)). Over 90

percent of the respondents, which included new students, indicated that they were satisfied with how the counselor addressed their questions and concerns and felt comfortable meeting with the counselor for academic or personal counseling in the future ([IIC-99](#)).

Mandatory advising occurs in both individual and group settings. Certain programs, such as Business, have opted to offer “A Session on Program Information and Registration” (ASPIRe) sessions in lieu of individual appointments. These sessions fulfill the same objectives as the individual advising appointments with an added component of community building among the majors with their peers and program support staff. The results of ASPIRe evaluations for 2016-2017 indicated that 75 percent of the respondents (n=79) felt that attending the group session increased their understanding of how to register for classes ([IIC-100](#)).

The Counseling and Advising unit developed an ASPIRe program in fall 2017 for Liberal Arts majors to give these students an opportunity to develop connections with Liberal Arts counselors, build community with peers, and learn about general registration information and procedures. Included in the group NSA session is an icebreaker, video, and breakout registration sessions by exploratory major (Business, Health, Arts and Humanities, and Social Sciences). Initial evaluations of the group NSA sessions were positive and the Counseling and Advising unit has decided to continue this initiative with suggested improvements by the participating counselors.

In fall 2016, the UHCC System implemented exploratory majors and tasked all UHCC System campuses to create an exploratory model and major selection system for their students declaring a Liberal Arts major. The College selected four exploratory Liberal Arts majors: Business, Health, Arts and Humanities, and Social Sciences. From spring to summer 2017, the Leeward STAR team worked on developing the degree templates for each exploratory major in STAR. By spring 2018, Liberal Arts exploratory major options appeared on the common application form, counselors organized mandatory NSA sessions by exploratory majors, and the College assigned students to their respective exploratory major counselors. Similar to program counselors, Liberal Arts counselors now operate with specific major groups in mind.

The College administers a campus wide early alert system each semester known as Maka‘ala to support student success and to help facilitate communication between instructional faculty and the Counseling unit. Maka‘ala gives instructors the opportunity at specific points in the semester to either affirm students’ positive classroom performance or identify students who need more support ([IIC-101](#)). MySuccess, a student retention software, sends electronic surveys to all instructors on predetermined dates so they can provide feedback to students ([IIC-102](#)). Students who are given positive affirmations or who are noted as a concern by their instructors receive instantaneous feedback in an email. Students who are identified as needing more support in the surveys are either asked to contact their instructor for more help, are given information about the College’s tutoring services and are encouraged to contact them, or are contacted by their assigned counselor ([IIC-103](#)).

During the third week of the semester, the Maka‘ala period ends and the counselors use MySuccess to view which students in their assigned population have been referred for poor attendance, not attending class, or behavioral issues. Counselors make two attempts to

contact the student by phone and/or email to further discuss the referred issue. Counselors encourage the students to come in to talk about their situation, but phone conversations and email correspondence are also available. Through these conversations, counselors and students talk about what issues may be hindering the student's success and what resources are available to help the student or what actions can be done to resolve them. Referrals close at the fifth week of the semester.

The Maka'ala Program sends faculty a Consider Withdrawing survey prior to the College's withdrawal deadlines in order to provide students with adequate opportunity to withdraw from class if they feel this is the best course of action for themselves ([IIC-104](#)).

For the past several years, the Career and Technical Education (CTE) Retention Team has been sending CTE students email communications notifying them when they have reached certain degree completion benchmarks. Students receive communications through MySuccess when they have completed 25 percent, 50 percent, and 75 percent of their required coursework. These once-a-semester email messages help students gauge their progress towards degree completion and encourage them to seek academic advising in order to confirm their progress and to plan for their continued progression as well as their eventual completion.

### **Programs to Support Student Development and Success**

The UHCC System began the Integrated Student Support (ISS) initiative in summer 2017. The Student Success Council coordinates this initiative ([IIC-105](#)). As part of the initiative, Student Services units collaborated to assist with the Returning Student Initiative ([IIC-106](#)). The College invited students who were close to graduating to return to complete their degree; this included one class at no cost upon their return in spring 2018. The College contacted 123 eligible students by email, mail, and phone to share more information about the project. A counselor then emailed the students individually with what to expect, next steps, and what classes they still needed to take to graduate. The counselors contacted the students a second time through email after Admissions and Records admitted the student and registration became available. At the beginning of the spring 2018 semester, 23 students or 19 percent registered for a course to begin the journey to complete their degree.

Some CTE programs have student peer mentors and retention specialists, which are funded through external sources such as Perkins funding. These student services personnel work closely with the program counselors to develop a comprehensive support system for CTE majors which includes newsletters, tutoring, student success workshops, academic coaching, and routine progress checks.

Counselors refer students to the Job Prep Services unit for employment assistance, including career assessment through Career Coach ([IIC-107](#)). Counselors also refer students to this unit for assistance with the Hawai'i Nutrition, Employment, and Training program to qualify for food stamps and other reimbursements. Counselors teaching student success courses use Job Prep Services as a resource for developmental employment and career information.

In fall 2017, the Counseling Leadership team consisting of the Student Services coordinator and Counseling and Advising unit head began meeting with the student government officers on a monthly basis to hear and address any concerns from the student body. As a result of

this partnership, the Counseling and Advising unit has increased participation in Student Government initiatives such as the Student Involvement Fair and has worked in partnership with Student Government in order to increase continuing student awareness of the registration period and counseling services ([IIC-108](#)). Future plans include working with the Student Government to conduct student focus groups on counseling and advising services.

### **Evaluation and Improvement of Counseling and Advisement**

As noted in Standard [II.C.1](#), the Counseling unit evaluates its services annually in the ARPD. The unit regularly assesses its services to determine what is working well and what needs further improvement. An area of emphasis is ensuring accurate information about academic requirements. The College has structures in place to verify that all pertinent information on academic requirements is accurate and disseminated in a timely manner. Each year, STAR, an advising and academic planning software, is updated to reflect the approved curricular changes prior to fall registration. In addition, the College updates its Catalog each academic year with new curricular changes. The Catalog is available through the College website. Counselors receive a print copy and can also access the latest course and program updates on the Counseling Handbook website ([IIC-109](#)).

The Counseling and Advising unit assigned one of the general counselors to serve part time as an academic advising coordinator. This counselor is responsible for summarizing and communicating program and course modifications to the entire unit and maintaining documentation of approvals for curricular changes. The unit provides trainings for counselors during weekly counselor meetings or in one-on-one sessions. Program counselors and those who service special student populations provide updates at the general counseling meetings on an as-needed basis, but at least once per semester.

Prior to fall 2017, counselors requested student evaluations after the completion of an appointment. Every six months, counselors received their individual evaluation results and the counseling unit received an aggregate review; each determined if the results of the evaluations necessitated any changes. In fall 2017, the Counseling and Advising unit began using the MySuccess software to email counselor evaluations to students following their appointments. This new practice increased the number of completed evaluations on each counselor, providing better feedback on counseling services ([IIC-110](#)).

The Counseling and Advising unit provides professional development to prepare counselors and academic advisors for their advising roles. Every year, the unit has a professional development retreat to review goals and counseling standards and to reflect on strengths and areas of improvement. In addition, counselors/academic advisors attend an annual UH System conference for regular training and updates, and they pursue various professional development opportunities throughout the year. Senior counselors are paired with junior counselors to allow for further training of newer counselors.

In fall 2017, the Counseling and Advising unit received funding support from the system Co-requisite Initiative Project Allocation. The funding included \$4,000 to support the professional membership of all 22 counselors in the national organization of their choice in order to promote networking and keeping abreast of national trends in counseling and advising. The funding also included \$36,000 towards professional development related specifically to the support of developmental education, co-requisite initiatives, and career

counseling of developmental and general student populations. This funding support has allowed counselors to attend regional and national conferences of professional student support organizations such as the American Counseling Association, the National Academic Advising Association, and the Student Affairs Administrators in Higher Education. Counselors who attend these conferences share what they have learned to either improve their own practice or recommend initiatives for the larger unit.

### **Analysis and Evaluation**

The College offers counseling and advising services in a variety of modalities at both campus sites and online to make sure Leeward's diverse student population receives timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies. Designated program and discipline counselors ensure that students understand the requirements related to their programs of study. The College's counseling and academic advising staff receive quality ongoing training, updates and mentoring, and engage in program assessment to continuously improve program services.

II.C.6.

*The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER 16)*

### **Evidence of Meeting the Standard**

#### **Policies and Procedures for Admissions**

The College adheres to Regents Policy (RP) 5.211, Admissions, which is consistent with the College mission ([IIC-111](#)). The policy specifies the qualifications of students appropriate for the College's programs. The Catalog publishes information on admissions for U.S. citizens and international students ([IIC-112](#)). The College website provides prospective students with additional information including qualifications for admission and online forms for admissions and enrollment ([IIC-43](#), [IIC-113](#)).

The College uses the MySuccess software to streamline the NSO program, which includes NSO Live, NSO Online, and NSO exemptions. NSO Live is an in-person session that includes a campus tour, training on the UH System course management system Laulima, a review of the MySuccess software and instructions on how to select courses for timely degree completion, opportunities to meet with campus resources, and opportunities to meet current students and faculty ([IIC-114](#), [IIC-115](#)).

If a student obtained a certificate or degree within the UH System, attended a UH System campus in the past three years with good academic standing, or attended an NSO Live session the previous semester, MySuccess filters that student as exempt from attending an NSO session and possibly an initial advising appointment ([IIC-116](#), [IIC-117](#)). MySuccess filters a student who attended a UH System campus in the past three years with a GPA under 2.0 as exempt from attending an NSO session but must attend an initial advising appointment. MySuccess filters a student who has a zip code off island as a DE student, and

that student is automatically sent the NSO Online session. A student who will attend the Wai‘anae Moku Education Center may attend NSO Live, NSO Online, or NSO Welcome to Wai‘anae session. Students who obtained a degree from a non-UH System campus may submit their transcript or diploma for an NSO exemption.

The College has a clear admissions process for international students, who are assisted by the OIP staff ([IIC-118](#)). The applicant must be 18 years or older or have graduated from a high school. The applicant needs to complete an international student application form ([IIC-119](#)). The applicant must also provide an original bank statement to verify that the applicant has access to sufficient funds to cover educational and living expenses for one academic year (a minimum of \$18,796 is required), a copy of a current passport, and the appropriate application fee. The College does not require applicants to have a test score to apply to the English Language Institute, but the College does require an applicant to have an official and minimum TOEFL, IELTS, STEP Eiken, or GTEC score to apply directly to a credit degree program ([IIC-118](#)). Upon receiving the necessary documents, the OIP processes the application and generates necessary documents for the student’s visa application ([IIC-120](#)).

### Pathways to Degree Completion and Transfer Goals

The College fully implemented the UHCC Student Success Pathway framework, which is designed as a clear and structured pathway from point of interest through graduation to transfer or career completion ([IIC-121](#)). Figure 8 illustrates how this model provides “just-in-time” support for students.

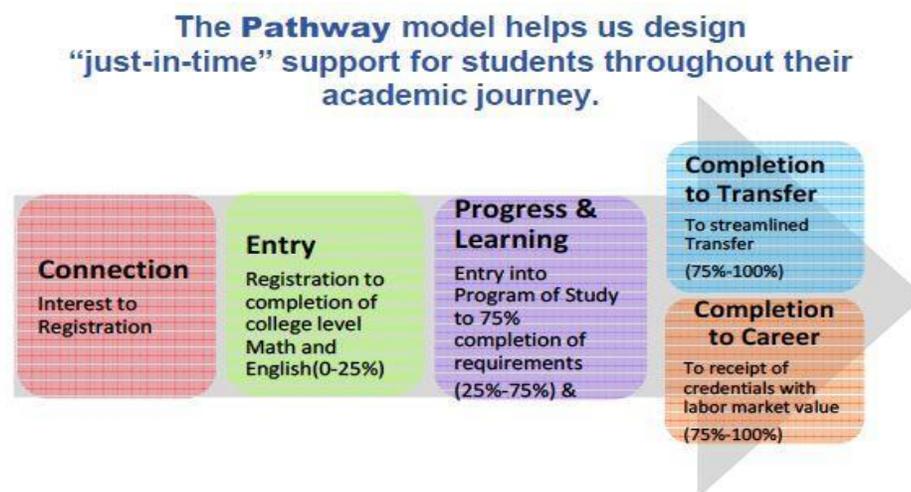

Figure 8. Student success pathway framework.

The UH System’s STAR software program includes STAR GPS, a registration system within STAR that maps an academic pathway for students based on their identified majors ([IIC-122](#)). Counselor/academic advisors and students regularly use this program to ensure students understand all requirements for their degree. The graduation pathway in STAR GPS lists all the requirements for students’ majors and notifies them when they are selecting a class that will not count toward their degree. Therefore, in addition to counselors working with students on degree completion and career counseling, STAR GPS is an important tool to ensure a timely graduation and accurate information.

As of spring 2017, all students within the UH System registered for their courses through the STAR GPS. Because STAR GPS must access the requirements of an identified major, its ability to suggest course offerings is based on the student declaring a major. When students do not see suggestions for course offerings in STAR GPS or they do not have their desired course of study displayed in the program, students need to declare a major or correct the one they declared when first applying to the College. This is another feature to help students create a clear path to graduation.

The “What If Journey” tab in STAR allows students to look at the requirements for any degree or certificate across all ten UH System campuses. By utilizing this feature, students have the tools to map out an academic pathway that leads to a bachelor’s degree from their first day at a community college. This feature is vital to ensuring students take courses that will not only allow them to complete their immediate degree, but also ensures the students take the prerequisites needed for higher degrees. Students take the correct classes to acquire the knowledge needed for their field, and they spend less time in school by creating a streamlined academic plan.

The College’s cohort learning groups provide students with clear academic pathways and extensive support. The College currently offers two cohort programs for students, the Lanakila First-Year Cohort program and the Going to Finish On-Time program at the Wai‘anae Moku Education Center ([IIC-123](#), [IIC-65](#)). A Title III grant supports both of these programs with the goal of increasing Native Hawaiian student completion.

### **Analysis and Evaluation**

The College’s open access philosophy extends to its admissions policies, which clearly outline program requirements, and its advising practices in order to effectively guide students toward achieving educational and career goals.

II.C.7.

*The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.*

### **Evidence of Meeting the Standard**

The College admits any applicant who is a high school graduate, received a high school equivalency credential, or is at least 18 years old. Once a student is admitted, the College uses multiple measures for placement of all students regardless of intended course enrollment, including those in DE courses.

The College regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases. The College has made two important student-centered changes to its admissions and placement practices since 2016. First, students can defer their enrollment if they are unable to attend the original semester that they applied for. Second, the College replaced its placement measures with those recommended by the UHCC Student Success Council.

As of November 2016, the American College Testing (ACT) no longer offered the Compass placement test, which is how the College placed students into math and English courses. The UHCC System chose to replace Compass with Accuplacer as a placement test tool. However, research has shown that a single high-stakes exam is not an accurate predictor for college readiness, so the UHCC System is moving away from Accuplacer to a system of multiple measures. The Cognitive Assessment Committee, along with system wide math and English committees, explored available placement options and developed recommendations for the UHCC Student Success Council, which the College implemented in fall 2016. Students who graduated from high school within the last two years can use any of the following multiple placement measures: cumulative high school grade point average; 12th grade English grade; 12th grade Intro to College Math grade; 12th grade Algebra 3, Trigonometry, or Precalculus grade; Algebra I grade; Algebra II grade; ACT Writing/Math score; Scholastic Aptitude Test Writing/Math score; High School Equivalency Test Language Arts/Math score; or General Equivalency Diploma Language Arts/Math score ([IIC-124](#)).

### **Analysis and Evaluation**

To maintain the consistency and validity of admissions and placement processes, the College regularly assesses its tools and procedures. In order to meet the College mission, every effort is made to minimize any admissions or placement biases.

II.C.8.

*The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.*

### **Evidence of Meeting the Standard**

#### **Process to Maintain Student Records**

The College has an established process to maintain student records permanently, securely, and confidentially, with a provision for secure backup of all files. The Admissions and Records office maintains student records that are permanent, accurate, and complete. All academic records are confidential and are carefully secured against theft. The Admissions and Records office retains the records according to the guidelines of the American Association of Collegiate Registrars and Admissions Officers, and the registrar and the dean of student services are responsible for compliance. Current guidelines call for the preservation of student records for a minimum of three years; however, the Admissions and Records office currently keeps physical copies of student records for five years once a student is no longer enrolled at the College. The Admissions and Records office limits access to authorized personnel only and maintains files in locked cabinets when the files are not in use by office staff. The Admissions and Records office removes older records from the active files and secures them in a separate area.

The Admissions and Records office backs up all physical copies of records contained in student files in the student information system called Banner. In some cases, the Admissions and Records office maintains the records electronically in their separate secure campus server. Banner maintains students' academic history, including application history,

registration history, course grades, and transfer course information, which the College can use in the event that the physical student record is lost or destroyed prior to the end of the record-retention period as set forth in the guidelines.

### **Policies and Procedures for Release of Student Records**

The College publishes and follows its established policies for release of student records. The Catalog clearly states the policies and procedures regarding the release of student information ([IIC-125](#)). In all activities that involve private information, the College makes every effort to comply with the Family Educational Rights and Privacy Act of 1974 ([IIC-126](#)). The Catalog informs students what information the College considers directory information, information that may be disclosed without a student's consent. The College gives students a two-week period at the beginning of each academic term to notify the College of their intent to keep all of their student record information confidential, including their directory information. The procedures relating to the protection of the educational rights and privacy of students is set forth in Administrative Procedure (AP) 7.022 ([IIC-127](#)). The College complies with Executive Policy (EP) 2.214, EP 2.215, EP 2.216, and EP 2.217 that govern how the College handles student data ([IIC-128](#), [IIC-129](#), [IIC-130](#), [IIC-131](#)). For further discussion on data governance and information security, see Standard [III.A.15](#).

Forms to request transcripts are available at the Admissions and Records office and online. The Admissions and Records office does not release official information without a written signature from the student authorizing release. The Admissions and Records office considers requests received from a student's official UH email account valid since the student's identification is verified by the act of signing into the account. A student may access an unofficial transcript online using his or her UH username and password. An unofficial transcript may be used for advising purposes and for transfers within the UH System.

The College has further increased personal security for students by training faculty and staff on the issue of personally identifiable information. The College no longer considers it appropriate to use a student's social security number as the student's identification number on student forms. Instead, the College issues each student a computer-generated Banner (UH ID) identification number when the student is admitted into the College.

The Admissions and Records office has created an application input manual for all of its employees to codify routines and procedures related to the creation of admission and student records in Banner ([IIC-132](#)). While this document is intended primarily as an instrument for ensuring consistency and quality in actions related to the application processing and residency determination, the standardization also enhances the objectivity of all decision-making related to the acceptance process. These processes and procedures are uniform regardless of the ultimate location of courses registered for by an admitted student, whether in traditional classrooms or through DE.

### **Analysis and Evaluation**

In compliance with state and federal laws and professional guidelines, the College has an established process that ensures the security and confidentiality of student records in all forms, including procedures related to their release. The College publishes and disseminates its policies regarding the release of student records through the Catalog.

## STANDARD III: RESOURCES

### **Student Spotlight** **Kristina Nip**

The new facilities at Wai'anae Moku have opened up the campus in a way that allows for better collaboration and studying areas. The layout of the campus is structured well in the sense that the "Common Area" is in the middle of the area where students have easy access to it. There are also always tutors available in the Common Area so that students can access them easily as well. The inside of the campus is always kept clean, including the bathrooms. The testing center is now larger and more secluded so that students using the center can do so without interference or noise. Seeing Wai'anae Moku through its transition, the new facilities have only heightened the campus' ability to function this way with better amenities and facilities. I always feel welcomed and know that the people who work here truly care about me and my educational journey.

## STANDARD III: RESOURCES

*The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).*

### III.A. Human Resources

#### III.A.1.

*The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.*

#### **Evidence of Meeting the Standard**

Leeward Community College ensures that all personnel are qualified by their appropriate education, training, and experience to provide and support the College's programs and services. The College recognizes a variety of personnel positions. The University of Hawai'i (UH) Board of Regents (BOR) appointees who are subject to classification and qualification rules include executive and managerial personnel; faculty; and administrative, professional, and technical (APT) ([IIIA-1](#), [IIIA-2](#), [IIIA-3](#), [IIIA-4](#)). Support staff including grounds and maintenance and clerical staff are state of Hawai'i civil service employees subject to civil service classification and qualification rules ([IIIA-5](#)). All personnel except executive and managerial are subject to collective bargaining agreements.

#### **Appropriate Hiring Criteria for All Personnel**

The College has developed appropriate hiring criteria for administrators, faculty, and staff. The UH System's Executive Policy (EP) 9.212, Executive and Managerial Classification and Compensation, provides for the establishment of executive and managerial classes ([IIIA-2](#)). The class specifications broadly describe the functionality, responsibility, and authority of positions in the class ([IIIA-6](#)). The policy outlines the process for creating a specific position description that can involve creating a new description or amending an existing one. The policy also includes a sample executive and managerial position description ([IIIA-7](#)). Position descriptions include a list of the position's duties and responsibilities as well as the qualifications necessary to perform the duties at a high level. The supervisor is responsible for creating a position description that accurately describes the needs of the College, which the human resources manager then reviews.

For faculty positions, the BOR defines personnel criteria, and the University of Hawai‘i Community Colleges (UHCC) system provides a faculty classification plan in consultation with the collective bargaining unit, the University of Hawai‘i Professional Assembly (UHPA) ([IIIA-1](#), [IIIA-8](#)). The plan defines primary and other responsibilities as well as classification ranks.

For APT positions, the BOR defines the personnel criteria, and the UH System Office of Human Resources provides a classification and compensation plan based on four bands or levels of work complexity ([IIIA-9](#)). Within each band, the system office establishes career group designations, position classifications within each group, and possible duties and responsibilities for each group. Supervisors of APT positions supplement the minimum qualifications as needed.

For civil service positions, the UH System provides a classification and compensation plan ([IIIA-5](#)). The plan provides a systematic means to describe civil service positions. The state of Hawai‘i Department of Human Resources Development sets the minimum qualifications for these positions ([IIIA-10](#)).

### **Consistent Hiring Procedures for All Personnel**

The College employs safeguards to ensure that it consistently follows hiring procedures. The hiring process begins with the formation of a hiring committee, which serves as the prime recommending group throughout the hiring process. This committee consists of at least one subject matter expert. The division chair or unit head chooses a chair for the committee, and the Equal Employment Opportunity and Affirmative Action (EEO/AA) coordinator in the College’s Human Resources office (HRO) determines whether the committee meets diversity requirements. The College requires employees who serve on a hiring committee to attend mandatory training to learn about the hiring process and the responsibilities of screening committee members ([IIIA-11](#)).

The UH System and the UHCC System policies set minimum qualifications for each position, but the supervisor writes the job description to include duties, responsibilities, and appropriate desirable qualifications, which ensures that a person familiar with the position and the College mission writes the description. The UH System administrative procedures for the recruitment and selection of faculty and APT include a suggested checklist for the recruiting and hiring process, instructions for internal posting of job opening announcements, APT selection procedures, a sample APT screening evaluation sheet, and/or faculty selection procedures ([IIIA-12](#), [IIIA-13](#), [IIIA-14](#), [IIIA-15](#), [IIIA-16](#)).

All job descriptions are directly related to the College mission and core values. For example, the Automotive Technology Instructor job description listed as a desirable qualification the “understanding of and experience working with a diverse student population, including students with disabilities and students from a variety of economic backgrounds,” which aligns with the College mission to deliver high-quality career and technical education and the College’s core values of open access and diversity and respect ([IIIA-17](#), [IIIA-18](#), [IIIA-19](#)).

The job description for the College’s Native Hawaiian Career and Technical Education Academic Advisor provides an example of how the duties and responsibilities of the position are directly related to the College’s “special commitment to Native Hawaiians” ([IIIA-18](#),

[IIIA-19](#)). This job description states that the academic advisor “provides enrollment, persistence, and professional skill-building strategies appropriate for Native Hawaiian students” and “develops and implements programs and activities to facilitate student academic career, cultural well-being, and personal success” ([IIIA-18](#), [IIIA-19](#), [IIIA-20](#)).

The College advertises open positions using appropriate venues to attract quality candidates. Once the HRO approves the job description, the College posts executive and managerial, faculty, and APT positions on the Work at UH website ([IIIA-21](#)). The College also posts designated executive and managerial positions in *The Chronicle of Higher Education*. The College initially posts civil service positions internally on the Work at UH website and then posts them on the State of Hawai‘i’s Civil Service Government Jobs Listing website if there are no qualified internal applicants ([IIIA-22](#)).

The College uses methods to ensure that it closely matches qualifications for each position to specific programmatic needs and that it clearly defines the duties, responsibilities, and authority for each position. The hiring committee drafts interview questions and a scoring rubric. The EEO/AA coordinator for EEO compliance reviews both to help determine the best possible candidate for the position with a goal of obtaining information about the candidate’s experience level, competency in the field, and ability to perform the job duties as described. During an interview, the hiring committee may ask applicants to perform job-related skills such as providing a teaching demonstration or solving a job-related problem. The hiring committee scores each applicant on a numeric scale and recommends the top scoring applicants for hire to an administrator, usually the appropriate dean or vice chancellor. The College designed the process to enable a group of people who are familiar with the job position to choose the most qualified candidate from the pool of applicants.

The College has a process to verify the qualifications of applicants and newly hired personnel. The HRO collects documentation to ensure that applicants provide official documentation supporting their educational experience level and that the hiring committee has correctly and uniformly followed the hiring process. The College checks the equivalency of degrees from non-U.S. institutions by referring to the National Association of Credential Evaluation Services website ([IIIA-23](#)).

In fall 2017, the College piloted a new online applicant tracking software called NEOGOV that will replace the Work at UH website. Applicants for all executive and managerial, faculty, APT, and lecturer positions will use this system. The entire recruitment process from application to hiring of the selectee will be online ([IIIA-24](#)).

The College does not include in job announcements specific criteria and qualifications for hiring faculty and staff involved in offering distance education (DE). Current faculty who teach through DE must satisfy the same qualifications that exist for their traditional classroom counterparts. During the recruitment process, instructional divisions may but are not required to identify qualifications for teaching DE courses. When instructional divisions identify DE qualifications, the job advertisement lists them as desirable qualifications. For example, a job advertisement may include the following statement: “May include instructional assignments involving DE.” In addition, the College does not require specific personnel with DE experience to be involved in the recruitment of new personnel.

During 2017-2018, the Faculty Senate DE Committee worked on recommended interview questions that screening committees may use during the recruitment process for instructional faculty ([IIIA-25](#)). The committee drafted the questions based on the DE Guidelines and sent a preliminary set of questions to the HRO for feedback ([IIIA-26](#)). The committee revised the questions based on the feedback, and the HRO approved a final version in February 2018 ([IIIA-27](#), [IIIA-28](#), [IIIA-29](#)).

### **Analysis and Evaluation**

In order to maintain the quality of its programs and services, the College hires qualified personnel (administrators, faculty, and staff) by clearly and publicly posting the criteria required for each position; furthermore, the criteria address the College's needs and are tied to the institutional mission and goals.

#### III.A.2.

*Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)*

### **Evidence of Meeting the Standard**

The UHCC System ensures consistency in generic job descriptions and criteria for tenure and promotion. Academic qualifications for lecturers (adjunct) are identical to those for regular faculty. The College uses system policies in hiring, retention, and promotion decisions ([IIIA-3](#), [IIIA-8](#)).

The College has a consistent process to verify that faculty selected for hire have adequate and appropriate knowledge of their subject matter. The UHCC System sets the minimum qualifications for each faculty position ([IIIA-30](#)). Minimum qualifications include the appropriate degree or comparable work experience, if applicable, that the applicant must have in order to qualify for the position and contribute to the mission of the College. Applicants submit transcripts or copies of transcripts with their applications to allow the HRO to verify that the applicant meets the minimum faculty qualifications. If an applicant submits a copy of an official transcript, that person must submit an official original transcript upon hire.

Faculty job descriptions include the responsibility for curriculum oversight and outcomes assessment. The supervisor is responsible for writing the desirable qualifications for a job description. These qualifications include a desirable level of teaching and/or professional experience and a knowledge of the subject matter specific to the position. Faculty positions that involve teaching also include desirable qualifications that address subject-matter knowledge, experience with a diverse set of teaching methodologies, especially online teaching, experience with curriculum oversight, and assessment of learning outcomes. For example, the job description for the English as a Second Language and the English Language Institute Instructor includes 12 desirable qualifications ([IIIA-31](#)).

The College has a formal process for vetting credentials to ensure that hiring committees hire qualified faculty. The College conducts checks with current and former employers to confirm periods of employment, official titles, duties and responsibilities, work habits and attitudes, and/or reasons for termination.

### **Analysis and Evaluation**

The College has a well-established process to ensure that faculty are highly qualified for their respective positions. Faculty job descriptions include curriculum development, review, and assessment. These job descriptions ensure that people hired have the required knowledge and skills to perform the job.

III.A.3.

*Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.*

### **Evidence of Meeting the Standard**

The College has a consistent process to determine if administrators and other employees responsible for educational programs and services possess the qualifications necessary to perform duties required to sustain academic quality and institutional effectiveness. When the College hires administrators and other employees, a hiring committee is responsible for screening and vetting applicants to determine which candidate will best fit the needs of the College. The hiring committee is a diverse group that includes representation from all campus personnel (faculty, APT, and civil service) and may include a community member with a vested interest in the position.

EP 9.212 provides for the establishment of these classes. The class specifications broadly describe the functionality, responsibility, and authority of positions in the class ([IIIA-2](#)). The policy also outlines the process for creating a specific position description that can involve creating a new description or amending an existing one. Within the UHCC System, executive and managerial classification includes positions such as vice president, associate vice president, chancellor, vice chancellor, dean, assistant dean, director, academic affairs program officer, institutional research and analysis program officer, and assistant to senior executive. Position descriptions include a list of the position's duties and responsibilities as well as the academic qualifications necessary to perform the duties at a high level ([IIIA-7](#)). The supervisor is responsible for creating a position description that accurately describes the needs of the College.

As with the hiring of faculty, the hiring committee conducts the initial interview of selected candidates. However, applicants for executive and managerial positions can often undergo multiple interviews by specific groups such as faculty, administrators, students, and specialty groups from other campuses.

### **Analysis and Evaluation**

In order to maintain the effectiveness and quality of its academic programs, the College vets administrators and employees responsible for academic programs and services to ensure they have the necessary qualifications to perform their tasks.

III.A.4.

*Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.*

### **Evidence of Meeting the Standard**

The College verifies the qualifications of applicants and newly hired personnel. The College complies with UH System policies and practices that are consistent with this standard and verifies qualifications of applicants through official transcripts and employment verification checks. In compliance with the “Minimum Qualifications for Faculty Positions,” a transcript must come from a regionally accredited postsecondary institution ([IIIA-30](#)). The HRO screens each transcript to determine whether it comes from an accredited institution. If a transcript comes from a non-accredited institution, the HRO rejects the application. The College checks the equivalency of degrees from non-U.S. institutions by referring to the National Association of Credential Evaluation Services website ([IIIA-23](#)).

### **Analysis and Evaluation**

All degrees held by employees at the College are from U.S.-accredited institutions or from a non-U.S. institution that has been established as being equivalent to a U.S.-accredited institution.

III.A.5.

*The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

### **Evidence of Meeting the Standard**

The College has a process in place to evaluate all personnel on a regular basis. The UH System and/or UHCC System established evaluation policies and processes for each classification of employee at the College: executive and managerial, faculty, lecturer (adjunct), APT (professional staff), and civil service. State of Hawai‘i civil service policies are on the Department of Human Resources Development Performance Management webpage ([IIIA-32](#)). The process and frequency of an evaluation vary for each classification. These policies are available to all personnel for viewing and include the evaluation criteria for each personnel group ([IIIA-33](#)).

Evaluation criteria accurately measure the effectiveness of personnel in performing their duties. The UHCC Faculty Classification Plan provides the criteria to evaluate faculty members ([IIIA-8](#)). The UHPA collective bargaining agreement requires an evaluation every two years of tenure-track faculty who are serving probation ([IIIA-34](#)). A different set of criteria guides the evaluation of faculty applying for tenure and/or promotion ([IIIA-35](#)). Regardless of the application, the College evaluates applicants based on the following criteria: a self-assessment of their ability to perform primary duties, their effectiveness in teaching or their support of student learning, and their contributions to the College and the community. The applicant prepares a dossier application that is based on evidence and includes supporting documentation. A process is in place to evaluate each submitted dossier, which includes evaluation by a division personnel committee; the division chair; a tenure and promotion review committee, if applicable; and an administrator. Each review level documents feedback and comments, which are returned to the applicant in a timely manner ([IIIA-36](#), [IIIA-37](#)). The primary objective of the process is to serve as a measure of effectiveness and to provide recommendations for improvement. If the process determines that the faculty member is not showing professional growth, the applicant is either terminated in the case of a contract renewal or a tenure application, or in the case of promotion, the applicant is denied promotion.

At the start of each fall semester, the College provides workshops for faculty about the contract renewal and tenure and/or promotion processes. Presenters include the chancellor, the vice chancellor for academic affairs, the UHCC human resources director, and an UHPA representative. The College encourages newly hired faculty and those applying for tenure and/or promotion to attend these workshops ([IIIA-38](#)).

Tenured faculty members must be evaluated every five years. Evaluation is done either through promotion, or for those who do not submit an application for promotion, through the Faculty Five-Year Review. The criteria for this review are similar to that of the tenure and promotion process and are outlined in UHCC Policy (UHCCP) 9.203, Faculty Five-Year Review ([IIIA-37](#)). One difference from the tenure and promotion process is that in the Faculty Five-Year Review process, only the division chair reviews the application. In the event that the division chair is of a lower rank than the applicant or the division chair is also submitting a dossier for review, the division personnel committee performs the evaluation. As a part of the review, the division chair (or equivalent) shares any recommendations to be made with the faculty member. If the division chair (or equivalent) decides that there is need for significant improvement, the division chair (or equivalent) and the faculty member develop a professional improvement plan together.

UHCCP 9.104, Lecturer Evaluation, outlines the lecturer evaluation process, which requires that a lecturer must submit an evaluation document in order to be eligible to continue teaching classes ([IIIA-40](#)). The criteria for evaluation are focused primarily on teaching effectiveness with the primary goal of continued improvement. The rank of the lecturer determines the frequency of evaluation: Step A lecturers are evaluated annually, Step B lecturers are evaluated every two years, and Step C lecturers are evaluated every four years. The division chair and discipline coordinator evaluate the applications and provide feedback on the applicant's strengths and weaknesses as well as any potential recommendations.

Employees who teach DE courses include a discussion on issues related to online teaching and the educational needs of DE students in their contract renewal, tenure and/or promotion application, five-year review, or lecturer review.

The College annually evaluates executive and managerial positions using criteria set by Regents Policy (RP) 9.212 and UHCCP 9.202 ([IIIA-2](#), [IIIA-41](#)). These include the evaluation of a number of performance categories as well as a review of the position description. As a part of the evaluation, the UH System distributes a 360-degree assessment survey to personnel who support or work with the executive or managerial employee ([IIIA-42](#), [IIIA-43](#)). The employee's supervisor discusses the anonymous results with the employee for his or her review and evaluation. The employee also prepares a discussion of specific goals to achieve for the upcoming year. For further discussion of the 360-degree assessment survey, see Standard [IV.C.3](#).

Administrative Procedure (AP) 9.170 outlines the annual performance evaluation of APT personnel ([IIIA-44](#)). The immediate supervisor performs a review of the employee's performance and documents the results electronically ([IIIA-45](#)). The supervisor and employee discuss the review and any improvements and goals for the employee for the upcoming year. For APT employees who are not performing up to standard, the College offers retraining and professional development opportunities.

The State of Hawai'i's Performance Appraisal System outlines the civil service employee evaluation ([IIIA-46](#), [IIIA-47](#)). Supervisors meet with the employees annually to discuss goals and evaluate them on their ability to perform assigned duties. For civil service employees who are not performing up to standard, the College offers retraining and professional development opportunities.

### **Analysis and Evaluation**

Regular and systematic evaluations that have clearly established guidelines allow the College to evaluate the effectiveness of all personnel. Actions taken as a result of the evaluations are formal, timely, and documented.

#### III.A.6.

*The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.*

### **Evidence of Meeting the Standard**

The College's evaluation process leads faculty to improve teaching methods and plans to improve learning. The College recognizes the importance of the assessment of learning outcomes and the use of the assessments as driving forces to improve teaching and learning. As such, the College adheres to L5.210, Policy on Assessment, to promote an environment that is dedicated to the practice of assessment and to ensure that the assessments performed are used in decision-making and resource allocation processes. The policy also stresses that

assessment is a continual process and delineates responsibilities for those involved in assessment ([IIIA-48](#)).

Evaluation instruments, where appropriate, include evidence of engagement with learning outcomes. UHCC faculty classification plans and evaluation processes for contract renewal, tenure and/or promotion, and post-tenure review include the use of outcomes assessment results as a job responsibility and evaluation criteria ([IIIA-34](#), [IIIA-35](#), [IIIA-39](#), [IIIA-40](#)). A lecturer evaluation also includes this criteria. As an example, the criteria for tenure include a self-analysis of the degree of attainment of learning outcomes in the classes taught and the possible impact and contributions that the faculty member has made toward achieving his or her professional objectives and meeting students' needs ([IIIA-35](#)). The criteria indicate that the faculty member is not solely responsible for the attainment of learning outcomes by all students.

The role for administrators, specifically vice chancellors and deans, is to ensure that the assessment process is ongoing for all courses and programs. In addition, the executive and managerial evaluation criteria state that as part of the evaluation, administrators are to discuss the specific metrics outlined by the strategic goals of the College ([IIIA-49](#)).

L5.210 also states that staff members are required to participate in the support of outcomes assessment if it is in the scope of their job responsibilities ([IIIA-48](#)). The College encourages participation from those who do not have assessment as an explicit part of their job description.

### **Analysis and Evaluation**

With the goal of improving teaching and learning, the evaluation of all personnel that are directly responsible for student learning includes the consideration of how they use the results of outcomes assessment.

#### III.A.7.

*The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)*

### **Evidence of Meeting the Standard**

The College has the appropriate staffing levels for each program and service. While no formal policy governs the ratio of full-time to part-time/adjunct faculty, the UHCC System and the College monitor the ratio to ensure compliance with the Accreditation Standard. In fall 2017, the full-time to part-time/adjunct faculty headcount ratio was 63 percent, or 215 full-time faculty to 126 part-time/adjunct faculty.

At the College, each instructional division, instructional program, and support unit completes an Annual Review of Program Data (ARPD) each year. As part of the report, there is an assessment of the "health" of the program, division, or unit using quantitative indicators, which include a measure of the efficiency of the number of faculty in that area. In the event

that the ARPD determines that a program, division, or unit is in need of a faculty position, the College can reallocate a vacant position from another area ([IIIA-50](#)).

Administration discusses staffing sufficiency with the deans and division chairs and reviews ARPD personnel requests to determine if divisions, programs, or units require permanent and/or temporary positions to fulfill the College mission. The campus continually recruits lecturers to teach in disciplines that are deficient in staffing due to a temporary increase in course offerings when demand arises. The campus keeps a list of qualified lecturers to hire on short notice to fill this need.

Each academic year, the College publishes a roster of faculty, including their degrees, in the Catalog ([IIIA-51](#), [IIIA-52](#)). Each semester, the College publishes a current schedule of classes that identifies faculty responsible for each class on the College website for both the Pearl City campus and the Wai‘anae Moku Education Center ([IIIA-53](#)).

### **Analysis and Evaluation**

In order to maintain the quality of educational programs and services, the College maintains a sufficient number of qualified faculty, both full and part time, such that the programs and services meet the goals of the College mission. The ARPD process ensures the number of faculty and staff is sufficient in size to support all of the College’s educational programs.

III.A.8.

*An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.*

### **Evidence of Meeting the Standard**

The College has policies and practices demonstrating that lecturers (adjunct faculty) have opportunities for professional development, are appropriately oriented to the College and its student populations, and are engaged in key academic processes. Lecturers teaching half time or more are members of the faculty collective bargaining unit UHPA and are covered by the collective bargaining agreement ([IIIA-54](#)). UHCC policies govern the step advancement and evaluation of lecturers ([IIIA-40](#)).

The College is responsible for the orientation, oversight, evaluation, and professional development of lecturers and integrates the lecturers into the campus culture. They can attend faculty events including most of the professional development programs coordinated by the Innovation Center for Teaching and Learning (ICTL) ([IIIA-55](#)). Lecturers may serve on committees and participate in campus events. They can also apply for a professional development award ([IIIA-56](#)). Additionally, each year the College recognizes one lecturer through the Outstanding Lecturer Award, which is presented at a campus ceremony in the spring semester ([IIIA-57](#), [IIIA-58](#)).

The College has a Lecturers’ Group, a committee that meets to discuss matters that are important to lecturers ([IIIA-59](#), [IIIA-60](#)). Through these meetings, this group has helped

develop lecturer-specific programs such as the New Lecturer Workshop and the Lecturer Mentoring program (III A-61, III A-62, III A-63). The Lecturer Mentoring program provides lecturers with short-term, one-on-one assistance from selected Power Mentors to improve student learning and/or effectiveness on the job. Both of these programs are similar to programs that exist on campus but contain subject matter that pertains specifically to lecturers and are lecturer driven. This group was also the driving force to ensure that lecturers receive service awards. In addition, the Lecturers' Group may recommend one representative to the Faculty Senate (III A-64).

**Analysis and Evaluation**

The College integrates part-time and adjunct faculty into institutional life through the implementation of policies and practices that provide orientations and evaluation of these faculty, as well as through opportunities for mentoring, serving on governance boards, and professional development.

III.A.9.

*The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)*

**Evidence of Meeting the Standard**

The College has a sufficient number of staff with appropriate qualifications to support the effective educational, administrative, physical, and technological operations of the College. All UHCC positions are controlled through legislative appropriation. By policy, the UHCC System reallocates positions that have gone unfilled by the College. While the UHCC System has not established formal staffing ratios, UHCC System administrators review and compare staffing levels for various classifications of employees across campuses.

As of July 1, 2016, the organization charts for the College had 350 positions (III A-65). Table 55 shows the distribution of those positions.

Table 55.

*Positions at Leeward Community College.*

<b>Classification</b>	<b>Number of Positions</b>	<b>Percentage of Total Positions</b>
Faculty	210	60.0%
Administrative, Professional, and Technical	54	15.4%
Clerical	41	11.7%
Civil Service	37	10.6%
Executive and Managerial	8	2.3%

Each division and academic support unit performs an ARPD in which there is a discussion about staffing levels. If an ARPD demonstrates that a division or academic support unit needs more staff, the state legislature may award a new position, but this is determined by the state's ability to fund these positions. The College may also reallocate positions within its authorized number of position counts.

A more common practice to achieve appropriate staffing levels is the temporary hiring of staff during a time of need. The ARPD process determines if a division or unit requires a new position to support its proper operation, and the College determines if funding is available for a specified period. Prior to the end of the temporary hire's employment period, the College reviews both the need for the position and the budget to decide if the position should be terminated or extended.

By hiring staff that meets the UH System, the UHCC System, or State of Hawai'i Department of Human Resources Development minimum qualifications, the College ensures that the new hires are capable of performing the duties of the position. Official College organization charts and functional statements determine the organizational structure of the College ([IIIA-65](#)). AP 3.101 governs any amendments to these charts and statements ([IIIA-66](#)). Additionally, a vacant position can be reallocated from another area to meet staffing needs.

### **Analysis and Evaluation**

In order to effectively support the educational, technological, physical, and administrative operations, the College is able to maintain a sufficient number of qualified staff.

III.A.10.

*The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes. (ER 8)*

### **Evidence of Meeting the Standard**

The College has policies and practices to determine the appropriate number, qualifications, and organization of administrators. All UHCC positions are controlled through legislative appropriation. By policy, the UHCC System reallocates positions that have gone unfilled by the College ([IIIA-67](#)). The College may also reallocate positions within its authorized number of position counts. While the UHCC System has not established formal administrative staffing ratios, UHCC System administrators review and compare staffing levels of executive and managerial employees across the campuses.

The College's Organization Charts are the UHCC-approved organization of all administrative and faculty positions ([IIIA-65](#)). As stated in AP 3.101, the chancellor annually reviews the organization charts ([IIIA-66](#)). In the event that changes are necessary, the

College can propose a reorganization of existing positions in accordance with the administrative procedures to meet the changing needs of the campus.

Administrators at the College include the chancellor, two vice chancellors, four deans, and one director ([IIIA-68](#), [IIIA-52](#)). The rigorous hiring process helps ensure that administrators are well qualified to perform their duties; the hiring process is further discussed in Standard [III.A.1](#). Additionally, the College annually evaluates executive and managerial positions to ensure that administrators are performing their duties at a sufficient level. For further discussion, see Standard [III.A.5](#).

### **Analysis and Evaluation**

The College hires and maintains a sufficient number of qualified administrators to sustain continuity and provide effective administrative leadership in support of its mission and goals.

III.A.11.

*The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

### **Evidence of Meeting the Standard**

The College establishes, publishes, and adheres to multiple levels of personnel policies, including UH board policies, UH executive policies, UHCC policies, and College policies. All policies are available for all personnel to view at any time on the UH System wide Policies and Procedures Information System (PPIS) website, the UHCC System Policies webpage, and the College's Policies webpage ([IIIA-69](#), [IIIA-70](#), [IIIA-71](#)). Additionally, collective bargaining agreements govern personnel actions for the covered employees. The system reviews all its policies every three years in order to maintain currency and relevancy ([IIIA-72](#), [IIIA-73](#)).

The College's human resources manager serves as the EEO/AA coordinator to ensure that the College consistently administers personnel policies. The EEO/AA position is responsible for equitable and consistent compliance with existing personnel policies and procedures. In addition, the HRO maintains records and makes decisions based on historical practices, and if necessary, from consultations with the UHCC office and the UH Legal Affairs and University General Counsel Office. All new hires receive a briefing of the major personnel policies on campus through the New Hire Orientation ([IIIA-74](#)). Since 2016, the UH System requires all employees to complete training on Title IX policies and practices. The state of Hawai'i designated all faculty as "responsible employees" with a duty to report sexual harassment and other sexual misconduct to the proper authorities ([IIIA-75](#)). Campus wide workshops, seminars, and email announcements communicate any major changes to personnel policies.

## **Analysis and Evaluation**

The College follows an established set of published personnel policies and procedures including UH board policies, UH executive policies, UHCC policies, and College policies that are fair, equitable, and consistently administered.

III.A.12.

*Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.*

## **Evidence of Meeting the Standard**

### **Policies and Practices That Promote Equity and Diversity**

The College's policies and practices promote an understanding of equity and diversity. The College is an institution of equal employment opportunity and affirmative action and is committed to an environment of nondiscrimination for all employees and students. The UH System establishes, publishes, and adheres to nondiscrimination and affirmative action policies and practices that support its diverse personnel ([IIIA-76](#), [IIIA-77](#), [IIIA-78](#), [IIIA-79](#)). In accordance with RP 1.205, Section III, the UH System is committed to a "policy of nondiscrimination on the basis of race, sex, gender identity and expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, national guard absence, or status as a covered veteran" ([IIIA-77](#)). The College's L1.202, Policy on Nondiscrimination and Affirmative Action, reaffirms this commitment ([IIIA-80](#)). The UH System adheres to procedures for the recruitment and selection of all personnel, which ensures compliance with system hiring policies, affirmative action and equal employment opportunity guidelines, and respective collective bargaining agreements ([IIIA-81](#)). The UH System regularly evaluates all policies and procedures to ensure they are effective.

The College has methods to determine the kinds of support its personnel need and regularly evaluates the effectiveness of these programs and services. The UHCC System office conducts formal EEO/AA action analysis on a regular basis and incorporates it into the recruitment/hiring processes. Each UHCC campus has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measurement of affirmative action efforts, and remedial action when necessary.

As part of the affirmative action program, the director of EEO/AA at the Office of the Vice President for Community Colleges develops affirmative action plans for minorities and women on an annual basis for the seven community college campuses in accordance with federal contractor requirements. In addition, the director of EEO/AA develops affirmative action plans for protected veterans and individuals with disabilities that are prepared in accordance with federal contractor requirements.

The director of EEO/AA works closely with assigned EEO/AA coordinators at each UHCC campus to monitor and oversee the employment practice including recruiting and hiring

decisions; to ensure compliance with the laws and policies and with the affirmative action plans including reviewing job announcements, reviewing for underrepresentation, and monitoring recruitment; to ensure equitable treatment of applicants and diverse screening committees; to brief search committee members on recruiting practices including nondiscrimination, equal opportunity, implicit bias awareness, and accessible interviews; and to receive, investigate, and resolve complaints.

The College holds regular training sessions to educate employees on current and new practices concerning equity and diversity. Training starts with the New Hire Orientation (online and in-person options are available), which includes information for new employees about nondiscrimination policies and practices ([IIIA-74](#)). New employees receive the Faculty and Staff For Your Information (FYI) Guidebook ([IIIA-82](#)). Additionally, the UH System holds workshops and training seminars throughout the year for employees on sexual harassment, hostile environment, disabilities, EEO/AA and diversity, and recruitment, selection, and hiring ([IIIA-83](#)).

The College ensures that its personnel and students are treated fairly. The College complies with Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973 ([IIIA-84](#)). In 2016, the state of Hawai‘i mandated that all UH faculty are designated as “responsible employees” with a duty to report sexual harassment and other misconduct to the proper authorities and that all UH employees are required to complete an online training program on Title IX, the Violence Against Women Act, and relevant UH System policies ([IIIA-85](#)). As of fall 2016, the College had 80 percent faculty participation in this mandatory training, the highest rate of the ten campuses in the UH System ([IIIA-86](#)). Additionally, the UH Office of Institutional Equity conducted a Title IX campus training in February 2016, and the compliance and training officer held sessions during the fall 2016 and spring 2017 convocations ([IIIA-87](#), [IIIA-88](#)). In fall 2017, the UH System launched CampusClarity, an online student training program regarding sex- and gender-based violence. The goal of this program is to educate the UH System community on students’ rights and available resources ([IIIA-89](#), [IIIA-90](#)). Additionally, the College’s vice chancellor of administrative services provides faculty with a suggested course syllabus statement regarding Title IX ([IIIA-91](#)).

The College has three designated Title IX coordinators: a Title IX coordinator for the overall campus, a deputy Title IX coordinator assigned to employees, and a deputy Title IX coordinator assigned for students. The College publishes the names of all coordinators on the College website along with Title IX resources for UH System employees and students ([IIIA-84](#)). In fall 2017, the College’s Teaching Guidelines and Issues for Faculty Committee invited the deputy Title IX coordinator assigned for students to facilitate a discussion on how the campus community can continue to support the College’s commitment to protecting students and employees from sex-based discrimination and encroachment ([IIIA-92](#)).

The College is committed to building an inclusive community that supports and advocates for all employees and students. In 2016, the College created two all-gender restrooms for employees and students on the Pearl City campus and one all-gender restroom at the Wai‘anae Moku Education Center. The College has two representatives who participate on the system wide advisory commission that raises awareness about issues relating to the status of Lesbian, Gay, Bisexual, Transgender, Queer, + (LGBTQ+) equality and who regularly

conduct Safe Zone workshops ([IIIA-93](#), [IIIA-94](#), [IIIA-95](#)). In compliance with EP 7.302, Preferred Name, students may change their student identification card to reflect a first name that is concurrent with their gender identity ([IIIA-96](#), [IIIA-97](#)).

The College provides resources designed to assist women, minorities, veterans, and disabled groups including Bridge to Hope, the Children's Center, a Mother's Room for nursing mothers, the Veterans Resource Center, the Military and Veterans Coordination Program, and the Kāko'o 'Ike program ([IIIA-98](#), [IIIA-99](#), [IIIA-100](#), [IIIA-101](#), [IIIA-102](#)). The College has a representative who participates on the system wide advisory commission on the status of women ([IIIA-103](#)).

### **Evaluation of Employment Equity and Diversity Record**

The College tracks and analyzes its employment equity and diversity record consistent with its mission. In order to maintain an equitable and diverse employee group, the College asks new hires to fill out a confidential survey that collects data based on a number of categories. Annual review of the data helps the College to ensure that there is an appropriate distribution of diversity. In the event that there is a shortage in the field (females in administration, for example), the HRO keeps a hiring period open long enough to draw a sufficient number of applicants and/or posts job advertisements in specific publications to solicit a diverse applicant pool. Proper hiring practices, however, determine that the Colleges chooses the best candidate.

### **Analysis and Evaluation**

Through established policies and procedures, the College creates and maintains programs and services that support its diverse personnel and regularly assesses its employment record with respect to equity and diversity.

III.A.13.

*The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

### **Evidence of Meeting the Standard**

The College has approved ethics policies for all of its personnel that delineate consequences for violation. The UH System established formal ethics policies and procedures for various employee classifications ([IIIA-104](#), [IIIA-105](#), [IIIA-106](#), [IIIA-107](#), [IIIA-108](#), [IIIA-109](#)). The UHCC System has a published policy statement of professional ethics for faculty ([IIIA-110](#)). The policy establishes that faculty must maintain academic integrity given their role as educators and scholars. The College references the Hawai'i State Ethics Commission website on the new hire checklist, which contains an ethics guide for state employees ([IIIA-111](#), [IIIA-112](#)).

Employees are subject to state of Hawai'i ethics rules and regulations. The College adheres to Hawai'i Revised Statutes, Section 84, Standards of Conduct ([IIIA-113](#)). This document is a code of ethics that covers the expected conduct of all employees of the state of Hawai'i as well as possible outcomes of the violation of this code.

Every year, employees at the College read and sign a required disclosure form from the State of Hawai'i Ethics Commission ([IIIA-111](#)). Every election year, the UH System and the State of Hawai'i Ethics Commission distribute reminders regarding political campaigns and guidelines that govern employees seeking political office. In the event of a violation, the appropriate bargaining units determine punitive actions. Records of punitive actions are kept in personnel files, but confidential information is kept in a separate file.

### **Analysis and Evaluation**

The College follows a written code of UH System professional ethics for all personnel that includes consequences for violation.

III.A.14.

*The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.*

### **Evidence of Meeting the Standard**

#### **Robust Professional Development Programs**

The College is committed to offering robust professional development programs that are consistent with the College mission for all personnel.

Much of the ongoing professional development offerings on campus come from two units, the ICTL and the Educational Media Center (EMC). Both of these units have full-time, tenure-track faculty coordinating efforts to provide a diversified offering of workshops and programs, and both units receive resources from the College to fund these efforts.

The ICTL's mission is to facilitate professional development to improve teaching and learning by encouraging collaboration, inspiring innovation, and recognizing excellence at the College. The EMC's mission is to inspire, facilitate, and support teaching and learning using technology.

The ICTL has a full-time faculty coordinator, a half-time staff member, and selected faculty coordinators on reassigned time to plan, organize, implement, support, and evaluate professional development for faculty, lecturers, and staff. The ICTL coordinator also recruits and trains faculty and staff to voluntarily coordinate or conduct professional development programs. The ICTL Advisory Committee, consisting of 14 faculty and staff members from across the campus, oversees the programs and operations of the center. ICTL offers general programs for faculty, lecturers, and staff; teaching and learning programs for faculty and lecturers; group programs for staff; and funding programs for faculty, lecturers, and staff. The ICTL staff also works with staff groups to plan, organize, and request professional development programs and activities for their constituencies ([IIIA-55](#)). Table 56 provides a comprehensive list of the ICTL's professional development programs.

Table 56.  
*ICTL Professional Development Programs*

ICTL Program Type	ICTL Program Title
General Programs	<ul style="list-style-type: none"> <li>● New Hire Orientation (campus and online)</li> <li>● Service 101 (Customer Service for Student Assistants)</li> <li>● Service 102 (Customer Service for Faculty and Staff)</li> <li>● Supervisory skills workshops</li> <li>● Convocation</li> <li>● Safety and legal liability workshops</li> <li>● Leadership Excellence Program</li> </ul>
Teaching and Learning Programs	<ul style="list-style-type: none"> <li>● Hawai‘i National Great Teachers Seminar</li> <li>● Hawai‘i Great Leaders Seminar</li> <li>● Mid Semester Assessment</li> <li>● Teaching Squares</li> <li>● Power Mentor Program</li> <li>● Teaching Guidelines and Issues for Faculty</li> <li>● Teaching Excellence Program</li> <li>● New Lecturer Training</li> <li>● Lecturer Mentor Program</li> </ul>
Staff Group Programs	<ul style="list-style-type: none"> <li>● Operations and Maintenance Summer Seminar</li> <li>● Administrative Support Group Summer Institute</li> <li>● Learning and Mentoring Program</li> </ul>
Funding Programs	<ul style="list-style-type: none"> <li>● Travel Grant Program</li> <li>● Professional Development Award</li> <li>● Staff Development Fund</li> </ul>

The ICTL also conducts an annual fundraising drive to raise funds to provide food and lei in support of professional development programs at the College. Headed by members of the ICTL Advisory Committee, the fundraising drive has exceeded its annual goal of \$3,000 for the past few years with donations from current and retired faculty and staff ([IIIA-114](#)). This fundraising effort has also resulted in larger gifts for professional development, leading to the creation of awards for innovation and sustained excellence.

Professional development funding awards by the ICTL support faculty and staff in maintaining their expertise, certification, and relevance to their industry. Travel grant awards assist automotive and culinary staff in fulfilling program accreditation annual training requirements and in learning new program technologies and trends. These awards also help send teams of faculty and staff to conferences. Innovative initiatives on campus also receive professional development funds to develop new programs or support faculty and staff development. For example, the Student Success Awards and Innovation Awards provided funds to develop the Teaching Excellence Program, New Lecturer Training, and Lecturer Mentor Programs.

The EMC offers a wide variety of professional development opportunities and online learning resources for faculty, lecturers, staff, and administrators related to using technology in the classroom and online ([IIIA-115](#)). The faculty and staff within the unit work together in partnership with the College’s administration and instructional faculty to provide meaningful professional development opportunities, which will inspire students to learn. Four full-time educational technologists develop and facilitate all of the EMC’s professional development programs. Table 57 provides a comprehensive list of the EMC’s professional development programs.

Table 57.  
*EMC Professional Development Programs*

EMC Program Type	EMC Program Title
Learning with Technology for Teaching (classroom)	<ul style="list-style-type: none"> <li>● Starter Instructional Technologies <ul style="list-style-type: none"> <li>▪ Syllabus Makeover Challenge</li> <li>▪ Lulima Challenge</li> <li>▪ Smart Classroom Challenge</li> <li>▪ SMART Board Basics Challenge</li> <li>▪ Gmail Challenge</li> <li>▪ Google Docs Challenge</li> </ul> </li> <li>● Course Design (for Classroom)</li> <li>● Flipped Classroom <ul style="list-style-type: none"> <li>▪ Stop Lecturing and Flip Your Classroom</li> <li>▪ Engage Your Audience with Educanon</li> <li>▪ Assess Paperlessly with Google Forms and Flubaroo</li> <li>▪ Capture It with Snagit</li> <li>▪ Putting the You in YouTube</li> </ul> </li> <li>● Go Open, Go Free Using Open Educational Resources</li> <li>● Other Workshops <ul style="list-style-type: none"> <li>▪ Google Classroom Challenge</li> <li>▪ Blackboard Collaborate Moderator Challenge</li> <li>▪ Transform Your Course Schedule Using Google Calendar</li> </ul> </li> <li>● Technology One-On-One Consultation</li> <li>● Self-Paced Online Tutorials</li> <li>● Learning with Technology for Teaching Blog</li> </ul>

For further discussion of the support and training provided by the EMC for information technology, see Standard [III.C.4](#).

Faculty and staff at the Wai‘anae Moku Education Center participate in the College’s professional development activities. They have also held professional development activities at the Wai‘anae Moku facility to meet their specific needs. Activities have included a review and revision of the mission and two retreats to support faculty concerns with classroom management issues.

The UH System supports faculty and staff professional development by offering tuition waivers for up to 6 credits each semester ([IIIA-116](#)). The UHCC System offers sabbatical opportunities each year for qualified faculty with appropriate sabbatical proposals ([IIIA-117](#), [IIIA-118](#)).

The College supports professional development for all employees, including training required to maintain certification to meet the minimum qualifications for the job. The College also supports additional training for employees to keep current in specialized areas such as automotive technology, culinary arts, information and computer science, and digital media.

**Assessment of Professional Development Needs**

Every three years, the ICTL uses a variety of methods to assess professional development needs including online surveys for faculty, lecturers, clerical, and APT staff; interviews with follow-up surveys for administrators; and focus groups for the Operations and Maintenance staff. In addition, specific individuals or groups can approach the ICTL to help identify professional development needs. For example, the Lecturers’ Group was interested in having a mentoring program tailored for lecturers, so the ICTL helped launch the Lecturer Mentoring program in February 2017 ([IIIA-63](#)).

The ICTL bases its professional development funding decisions on the proposal’s relationship to the College mission. For example, the ICTL judges applications for professional development awards “on the benefits to be gained by the applicant and relevancy to the UH system and/or college goals/mission.” Also, one of the guidelines on the travel grant award rubric is that the application “clearly shows direct relationship to college mission, goals, and strategic plans” ([IIIA-119](#)). Faculty and staff may apply for funds from three sources. The Travel Grant program with an annual budget of \$36,000 funds travel for employees for College initiatives. Professional Development Awards help fund on-island

conference and workshop registration fees up to \$500 per faculty and staff (\$4,000 annual budget). The Staff Development Fund provides small grants of up to \$200 to support professional development programs and activities.

The ICTL Advisory Committee provides regular guidance and oversight of the professional development program and activities. This committee approves funding requests throughout the year and selects winners for professional development awards. They assist in the development or provide recommendations or approval of new professional development programs. They revise program policies and bring concerns or recommendations for professional development.

The EMC has methods to identify professional development needs of its faculty and other personnel. To determine specific needs, the EMC regularly surveys faculty and staff. For example, the EMC provides faculty and lecturers with an online self-assessment for teaching online ([IIIA-120](#)). Additionally, in order to maintain currency with changing technologies, the EMC staff looks at trends in higher education and tailors the new technologies to the needs of the College. The educational technologists at the College have an annual \$5,000 budget to experiment with emerging technologies, which provides the means for the technologists to be informed of emerging technologies and their application in the classroom.

### **Evaluation of Professional Development Programs**

The ICTL engages in meaningful evaluation of its professional development activities and uses results for improvement. As an Academic Services Support unit, the ICTL completes an ARPD as part of the College's program review process ([IIIA-119](#)). The ICTL evaluates its programs through a standardized survey, which uses a standard Likert scale to determine the effectiveness of the program. Additionally, surveys for selected professional development programs collect ideas or insights from participants that can be used to improve student learning and assess the effectiveness of new ideas. The surveys also provide opportunities for qualitative feedback. Taken together, the ICTL uses these surveys to improve the programs offered ([IIIA-121](#)). For example, in response to comments that some new personnel had difficulty attending the new hire orientation, which is typically held the week before the semester begins, the ICTL created an online orientation for new hires in September 2015 ([IIIA-74](#)). The ICTL coordinator is also responsive to requests. For example, in response to division chairs' concerns that new lecturers are not aware of College policies, in 2017 the ICTL coordinator developed a one-day orientation designed for new lecturers. This program received positive evaluations from its participants.

Follow-up surveys on the Teaching Excellence Program showed that participants found the program beneficial as they developed partnerships with other participants and program presenters. This information led to an application and award for the Wo Learning Champions Community Building Award in 2017, validating the program's effectiveness ([IIIA-122](#)).

The ICTL conducts a professional development needs assessment every three years for each staff/faculty group. In 2017, the ICTL sent out an online survey and the results (n=97) indicated that faculty and lecturers approved of the professional development programs and funding. Approximately 90 percent of the respondents said that the ICTL programs have had a positive impact on their job effectiveness ([IIIA-123](#), [IIIA-124](#)).

The EMC engages in meaningful evaluation of its professional development activities and uses results for improvement. As an Academic Services Support unit, the EMC completes an ARPD as part of the College's program review process ([IIIA-125](#)). The EMC primarily uses surveys to measure the effectiveness of programs and workshops. A number of surveys exist to measure both short-term and long-term effectiveness. For example, standardized exit surveys conclude each workshop, determining its effectiveness. The EMC uses the final program surveys to measure the overall effectiveness of workshop series. The EMC also uses longitudinal surveys to measure the outcomes of the programs and workshops on teaching and learning and how participants applied their learning to their teaching ([IIIA-125](#)).

The EMC uses a formative evaluation process in order to maintain continued improvement of their workshops and programs. They use the results to adapt and modify offerings based on their effectiveness. For example, the EMC first offered the Teaching Online Challenge in person and focused the content on pedagogical theory. Participant feedback made it clear that many participants had never taught online before and were not aware of the challenges involved in teaching online. As a result, the program is now completely online and focuses more on application and implementation.

### **Analysis and Evaluation**

The College has a robust professional development program that meets the needs of continually evolving pedagogy and technology. The College regularly evaluates these programs to maintain or increase their quality and effectiveness.

According to the 2016 Employee Satisfaction Survey, 83 percent of the faculty and staff who responded agreed with the statement that the College provides professional development activities that help them do their work efficiently and effectively ([IIIA-126](#)).

III.A.15.

*The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.*

### **Evidence of Meeting the Standard**

The College has provisions for keeping personnel records secure and confidential. The UH System establishes personnel records policies, including security and confidentiality, in accord with law and collective bargaining agreements ([IIIA-127](#), [IIIA-128](#)). In spring 2018, the UH Institutional Data Governance Program held an information briefing at the College on data governance and information security ([IIIA-129](#), [IIIA-130](#)). The College maintains records under its control in accord with these policies. The HRO stores and maintains personnel records in the HRO, a secure environment ([IIIA-131](#), [IIIA-132](#), [IIIA-133](#)). The HRO doors require a special key that tracks usage including the date and time of entry. The HRO securely locks all computers with cables, and the rooms have around-the-clock video surveillance. The UH System Office of Human Resources stores official personnel files for executive and managerial and Civil Service employees; however, the HRO keeps a shadow file in the HRO during the employee's tenure at the College. In compliance with the Hawai'i Revised Statutes, Section 92F, Uniform Information Practices Act, all employees are able to see their own personal files upon request ([IIIA-134](#)).

### **Analysis and Evaluation**

The UH System establishes records retention policies, including security and confidentiality, in accordance with the law and collective bargaining agreements. While the records are kept secure and confidential at the College, each employee has access to view that employee's records.

### III.B. Physical Resources

#### III.B.1.

*The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.*

#### **Evidence of Meeting the Standard**

Leeward Community College (Leeward CC) has a main campus and an education center. The Pearl City campus is comprised of 18 primary buildings and several clusters of portables located on 49 acres of land. The education center, originally referred to as the Wai‘anae-Nānākuli Education Center, has been located in various leased locations in Wai‘anae. In fall 2017, it moved 1.7 miles to a permanent location in Mā‘ili and was renamed the Leeward CC-Wai‘anae Moku Education Center to reflect the geographic area the site serves.

The College constructs and maintains the physical resources at both the Pearl City campus and the Wai‘anae Moku Education Center to ensure access, safety, security, and a healthful learning and working environment. The vice chancellor of administrative services (VCAS) and the auxiliary and facilities service manager oversee campus compliance of all federal and state laws, statutes, and regulations.

The College ensures that its physical facilities at both the Pearl City campus and the Wai‘anae Moku Education Center are accessible to students, faculty, staff, and the general public. The State of Hawai‘i’s Disability and Communication Access Board reviews all plans and designs for construction and renovation-related projects that occur at either location. One of the board’s primary roles is to “review and provide recommendations on all State and County plans and specifications for buildings, facilities, and sites, as required under Hawai‘i Revised Statutes, Section 103-50, in order to ensure that they are designed and constructed to be accessible to persons with disabilities” ([IIIB-1](#)). The board must approve all construction and renovation plans for any campus facility improvement prior to the finalization of the project’s design plans.

Periodically, the College in conjunction and coordination with the University of Hawai‘i Community Colleges (UHCC) System office, undergoes an assessment and evaluation of facility accessibility. In 2018, the College and all UHCC campuses are undergoing an Americans with Disabilities Act assessment and evaluation through the use of external consultants. The consultants are scheduled to complete the assessment of the facilities in 2018 and provide a review with specific project recommendations in 2019. The College, through the UHCC System office, will then seek legislative funding of these projects shortly thereafter.

The College’s Emergency Operations Plan and Emergency Guides highlight accessibility evacuation points and routes ([IIIB-2](#)). The College updates these plans periodically and distributes them electronically and in hard-copy form to the campus community.

Two separate support offices provide access- and accommodation-related services for students and employees on a case-by-case basis. For students, the Kako‘o ‘Ike (KI) Program provides disability and accommodation services while employees work with the Affirmative Action/Equal Employment Opportunity unit within the HRO ([IIIB-3](#), [IIIB-4](#)).

Finally, the College’s updated Long Range Development Plan (LRDP) addresses the access, circulation, and parking improvements for both campuses ([IIIB-5](#), [IIIB-6](#)). The UH Board of Regents (BOR) reviewed the LRDP in spring 2018, which provides an updated blueprint for future facility improvements for the College ([IIIB-7](#), [IIIB-8](#)).

The College implements a three-pronged approach to ensure that physical facilities provide a safe learning and working environment. This approach provides the College with a structured process to regularly evaluate whether it has sufficient physical resources at all locations.

The first prong is the Operations and Maintenance unit, which is divided into three sub-units: maintenance, grounds, and janitorial. The maintenance staff maintains the physical facilities, air conditioning, electrical, and plumbing systems. The grounds staff maintains assigned landscaped areas, removes trash and materials from designated outdoor areas, assists with planting needs, and assists with event preparation, setup, and takedown. The janitorial staff is responsible for indoor and outdoor general cleaning, removal of trash and materials, support of campus recycling efforts, changing lights, coordinating movement requests, and assisting with event preparation, setup, and takedown. A computerized maintenance system, eFacilities AiM, tracks all submitted service requests ([IIIB-9](#)).

The second prong is ongoing monitoring and assessment of daily operations. The auxiliary and facilities services officer conducts a personal check of campus buildings and grounds. The manager sends prompt email notifications to all campus employees of construction, repair, and safety concerns.

The third prong consists of reports from specific units at the College. This third prong ensures that the College has a process by which all personnel and students can report maintenance and safety concerns. An important source is the campus security officers who are continuously on duty at both the Pearl City and Wai‘anae Moku Education Center. Security officers monitor and report physical resource safety concerns and maintenance issues. They regularly contact the Operations and Maintenance unit regarding safety concerns and necessary repairs. Another campus group that provides reports on campus facilities is the Academic and Institutional Support Committee, a standing committee of the Faculty Senate that seeks to improve the academic and institutional support services for faculty, staff, and students ([IIIB-10](#)). During 2016-2017, this committee brought forth concerns that included sidewalk safety, parking safety, and designated smoking areas ([IIIB-11](#)).

A centralized Environmental Health and Safety unit supports all community colleges in the UH System. It works collaboratively with the College to develop and administer a variety of health and safety training and awareness programs, many of which are directly related to the College’s physical resources. These programs include training and guidance on hazardous materials and waste management, asbestos and lead abatement, indoor air quality, fire safety, storm water discharge, and others. The College provides these training programs on a continuous basis to ensure that faculty and staff are familiar with the best practices in the

field and to make certain that the College maintains a safe learning and working environment.

The College has recently implemented several initiatives as part of its continued emphasis on providing a healthy learning and working environment. These initiatives include designated smoking areas, the Wai‘awa Mile Fitness Trail, a Mothers Room, and the College’s Wellness Committee.

The current campus smoking policy went into effect in 2013, and the College created designated smoking areas at both locations ([IIIB-12](#)). These measures support and are consistent with the UH Tobacco Products Policy whereby enforcement is not through disciplinary measures but through the “thoughtfulness, consideration and cooperation of smokers and nonsmokers” ([IIIB-13](#)).

The campus and community members worked together to complete the Wai‘awa Mile Fitness Trail and the installation of several outdoor pieces of fitness equipment in 2015 ([IIIB-14](#)). Participants who contributed to this project include the College’s Sustainability Committee, Student Life office, Student Government, Creative Services office, the Shade House, and a local Boy Scout troop.

To support parents who are either students, faculty, or staff and assist in their transition back to school or the workplace following the birth of a child, the College implemented Lactation Support Guidelines in August of 2013 by creating a Mother’s Room for nursing mothers at the Pearl City campus ([IIIB-15](#), [IIIB-16](#)). In January 2018, the UH System provided further support by the release of Executive Policy (EP) 1.205 on Inclusive Facilities. This policy sets forth standards and expectations for safe and accessible facilities that support a “campus community of diverse students, faculty, staff, and visitors inclusive of their gender identity and/or gender expression” ([IIIB-17](#)).

The College’s Health and Wellness Committee supports a healthful learning and working environment. This grassroots committee had its modest start in 2012 within the Student Services area and has quickly grown into a robust campus constituency. The committee’s mission is “to create a work/life balance by improving positive well-being through educational activities and information for individuals and groups” ([IIIB-18](#)). The many activities and programs sponsored by this committee include the Annual Health and Wellness Fair, participation in the Great Aloha Run, Instagram challenges, and regular speakers and presenters all geared toward health, fitness, and individual well-being ([IIIB-19](#), [IIIB-20](#), [IIIB-21](#)).

The College ensures that all facilities are secure. The main campus at Pearl City offers around-the-clock, comprehensive security services. The Campus Security office is located in the center of campus in the Language Arts Building, Room 238. On duty Campus Security personnel are available at (808) 455-0611 or by campus telephone extension 611 or through any of the emergency call boxes. The Security Services webpage includes a link to a map with the emergency call box locations and other safety and security information ([IIIB-22](#)). At the Wai‘anae Moku Education Center, security services are on duty during the facility’s operational hours. In addition, during business hours, Wai‘anae Moku Education Center members can report emergencies to designated on-site officials and Campus Security

Authorities. The Pearl City campus would also provide assistance with a coordinated emergency response should a need arise.

In addition to the College's security officer workforce, a contracted security firm, U.S. Security Associates, provides additional safety and security. These security guards provide supplemental resources and support at both locations on an as-needed basis. The College has an annual contract for this supplemental service which expired in May 2018 and was recently renewed. In order to renew a contract, the College must follow strict personnel and procurement guidelines for this outsourced service.

In recognition of the critically important role of safety and security on both campuses, the College in coordination with the UHCC System office has requested additional security officer staffing from the state legislature. The College's request is for the addition of four additional security officer positions and nearly \$140,000 in salaries. In fall 2017, the BOR approved this request, which is being considered during the 2018 state legislative session ([IIIB-23](#)).

### **Analysis and Evaluation**

The College provides safe and sufficient physical resources at both the Pearl City campus and the Wai'anae Moku Education Center while providing an accessible, secure, and healthy learning and working environment.

#### III.B.2.

*The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.*

### **Evidence of Meeting the Standard**

#### **Integrated Planning and Budgeting Process**

The College uses several mechanisms to ensure objectivity and transparency in decisions regarding the planning, budgeting, and requests for campus facilities and space needs. The Annual Report of Program Data (ARPD) process, initiated at the individual unit or division level, captures relevant facility and space data. Facility maintenance informs institutional planning and budgeting and is incorporated into the ARPD process. The College uses its strategic plan and LRDP as guides when making decisions about physical resources ([IIIB-6](#)). Each UHCC campus has an LRDP that serves as a blueprint for future development and drives all future projects. The College completed its most recent LRDP in December 2016. Refer to Standard [III.B.4](#) for a detailed discussion of the LRDP.

Similar planning processes are in place for capital improvement program (CIP) projects, minor CIP projects, and capital renewal and deferred maintenance projects. The College is in adherence with Regents Policy (RP) 10.201 and RP 10.202 on interests in and planning and management of real property ([IIIB-24](#), [IIIB-25](#)). To ensure safe and sufficient physical resources, the different levels of the UH System share facilities planning and management. The UHCC System Office of Facilities and Environmental Health manages projects that are

larger and typically require professional design consultants. This office, when appropriate, assigns its environmental safety specialist to investigate and recommend remediation of code and safety needs. This office prioritizes projects based on the needs of the UH System and UHCC System.

### **Physical Resources Support Programs and Services**

The VCAS oversees physical resources at both the Pearl City campus and the Wai‘anae Moku Education Center. The VCAS reports to the campus on approved and funded facility projects through the Auxiliary Services unit’s current project listing, updates to the Campus Council, convocation presentations, and construction advisory notices ([IIIB-26](#), [IIIB-27](#)).

The College considers program and service needs when planning and maintaining its physical resources. This is accomplished through the College’s ARPD and Integrated Planning and Budgeting Process where units and departments initiate requests for facility improvements. Once the College undertakes a facility improvement project, unit or department personnel are involved throughout the various phases of planning, design, and construction, and these representatives meet frequently with the College’s facility staff, consultants, contractors, and project managers during the course of the project. Between 2012 and 2017, the College undertook over 50 active renovation, modernization, deferred maintenance, and major construction projects through this process. Active involvement by unit/department representatives ensures that the College incorporates their programmatic and service-related requirements into the project.

An example of this type of project is the recently completed office and classroom building complex for the Office of Continuing Education and Workforce Development (OCEWD). The College constructed four new buildings, two new parking lots, two new motorcycle range lots, and a forklift training lot at no cost to the College due to the City and County of Honolulu’s rail project and the site of the College’s new rail station. Throughout the 18-month design and build process, OCEWD program coordinators worked with campus officials, consultants, and contractors on a weekly basis to properly design, configure, and construct facilities that would meet their specific programmatic requirements. The new OCEWD facilities opened in May 2016 ([IIIB-28](#)).

### **Equipment Requests in Support of Programs and Services**

The College is actively engaged in ensuring that its faculty, staff, programs, and services have adequate resources to fulfill their teaching and support roles. Campus members request new equipment through the College’s ARPD process, which requires a direct tie to specific College or unit goals. Requests that the College prioritizes are subject to College funding availability.

In fiscal year 2016-2017, the College, in conjunction and coordination with the UHCC System office, implemented an equipment replacement process. In the two years of its existence, the UHCC System provided the College with nearly \$1.5 million in equipment replacement funds for high priority needs. The College’s operational expenditure plan allocates nearly \$1.2 million annually to units and departments in support of modernization of its equipment, technology, smart classrooms, classroom furnishings, and library acquisitions ([IIIB-29](#)). These funds help the College support its programs and services that are working to achieve the mission.

### **Effective and Efficient Resource Utilization**

The Wai‘anae Moku Education Center project demonstrates effective and efficient resource utilization. Operating budget cost savings as a result of the College acquiring and renovating the Wai‘anae Moku facility is more than \$278,000 per year due to the expiration of lease payments at its previous facility. While some of these funds have been redirected to provide services and support to the new campus, the majority of these funds have been reallocated to meet the budget priorities identified through the College’s annual Integrated Planning and Budgeting Process. For further information, see Exhibit 8 in the College’s Operating Expenditure Plan for fiscal year 2017-2018 ([IIIB-29](#)).

Taking a balanced approach to facility-related improvements ensures that the College reduces operating costs wherever possible and supports the UH System and the state of Hawai‘i. This approach incorporates the College’s energy goals and *Strategic Plan 2015-2021* to “continue to execute energy reduction strategies and sustainability programs” ([IIIB-30](#)). Among the most visible and significant of these projects is the Energy Conservation Measures and Alternative Energy projects that the College implemented (Phase I) and is currently constructing (Phase II). Phase I, which was completed in 2015-2016, resulted in the College reducing its electrical power consumption by 29 percent and having solar production generate 14 percent of its power needs. Upgrades to campus lighting, chiller plant, and power production through solar energy led to more than \$830,000 in verifiable cost savings ([IIIB-31](#)). Upon completion of Phase II, the College will reach 97 percent of its net zero energy goal to produce as much renewable energy as it consumes. The College achieved this through a robust expansion of solar power generated and stored at the campus in addition to upgrading indoor and outdoor lighting and replacing electrical transformers ([IIIB-26](#)). The College is close to meeting its net zero energy goal well in advance of the state of Hawai‘i’s goal for the state and the UH System to be net zero by the year 2035.

### **Physical Resources Support the Mission**

A key element of facilities planning is connecting each new physical resource to the College mission. The College integrates the LRDP into the campus planning process to ensure effective use of campus physical resources. Using the ARPD, the Integrated Planning and Budgeting Process includes assessment, planning, and budgeting, while aligning to the strategic plan and LRDP. In the ARPD, division and support areas identify and justify equipment and facility needs, supporting them with evidence and alignment to campus goals and the strategic plan. Each division and support area ranks its needs based on agreed upon priorities. The Campus Council votes on institutional priorities. These procedures ensure effective utilization of resources to support programs and services while achieving the College mission.

The Hālau ‘Ike O Pu‘uloa (Hālau) renovation is a clear example of a successful facility plan aligning to the College mission, particularly its special commitment to Native Hawaiians ([IIIB-32](#)). In spring 2015, the faculty and staff of the Hālau moved into the newly renovated first floor space of the DA building ([IIIB-33](#)). The design includes improved student engagement spaces including a “Welina Mai” lounge and a separate room for “Quiet Study,” three renovated classrooms, and collaborative faculty and staff offices. The Hālau collaborates with Botany and Hawaiian Studies to increase student involvement with the Native Gardens and the shade house ([IIIB-34](#)). Fulfilling the mission statement and aligning

with the LRDP, the Hālau illustrates the effective utilization of space and alignment with campus goals.

The new Wai‘anae Moku Education Center provides another example of facility planning aligned with the institutional mission. The College identified development of a new location for the Wai‘anae facility as a long-term goal in the 2012 institutional self-evaluation. Based on a recommendation from the evaluation team and the facility’s priority in the LRDP, the state legislature appropriated funds for the project. In 2011, the state legislature reauthorized \$3 million in CIP funds to be used for the initial planning, design, renovation, and equipment of the facility and dedicated an additional \$2.5 million in UH revenue bonds for facility acquisition purposes. Phase I of the project replaced existing leased facilities with a new center of similar size, which opened in the fall of 2017. To continue the quality of the programming and increase student access to course availability, Phase II renovation plans will include a science lab, an additional classroom, enlarged meeting capabilities, and other amenities including additional restrooms, a Mother’s Room for nursing mothers, and food service options. Phase II construction is scheduled to begin late summer or early fall of 2018 and be complete by summer 2019. A Title III grant (federal funding for Native Hawaiian serving institutions) from the U.S. Department of Education provides the funding for Phase II ([IIIB-35](#)).

### **Analysis and Evaluation**

The College’s Integrated Planning and Budgeting Process directs the planning and development of physical resources, including facilities, equipment, land, and other assets. This process helps to ensure the effectiveness and quality of the College’s physical resources in supporting its mission.

According to the 2016 Employee Satisfaction Survey, 87 percent of the faculty and staff who responded agreed that they have the materials and equipment needed to do their work. In the same survey, almost 75 percent of the faculty and staff who responded agreed that the resources provided for their division, department, or unit are adequate ([IIIB-36](#)).

#### III.B.3.

*To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.*

### **Evidence of Meeting the Standard**

The College regularly assesses the use of its facilities and equipment and utilizes those assessment results to make improvements. Building tenants and custodial staff routinely assess the condition of facilities and report any needed repair or modification to the campus administration. The campus has a facilities manager in the Operations and Maintenance unit, who is the primary point of contact for campus facility needs. The College uses the computerized maintenance management system Sightlines to identify problem subsystems and their rate of recurrence. Additionally, the Operations and Maintenance unit uses eFacilities AiM, an online maintenance request and management system, for campus departments, units, and programs to submit a work request.

For ongoing facilities planning, the College uses the Facilities Renewal Resource Model, eFacilities AiM, the Event Management System, room utilization reports, and ARPDs ([IIIB-9](#)). In addition, the College uses the annual facilities renewal reinvestment model called Sightlines to record maintenance backlog and estimated annual funding required for ongoing capital reinvestment. The College monitors all facilities on a regular maintenance schedule, including planning for deferred maintenance, and establishes priorities for addressing both regular and deferred maintenance.

The VCAS tracks classroom usage, vacancy and fill rates, classroom equipment inventory, and campus facilities use. To identify trends, needs, and efficiency, the College compares its data to the data at the other UH System campuses. The VCAS uses current space utilization to identify current and projected needs by departments, units, and programs. This data, along with feedback from campus groups, impacts future decisions.

The College's Integrated Planning and Budgeting Process begins with the mission statement that all units use as a guide for prioritizing activities and projects. As part of the ARPD, units include outcomes assessment as an evaluation tool and identify any needed improvements in the ARPD. If the needed improvement requires resources, units include them in a resource request list, which is prioritized, vetted, and eventually voted on by the Campus Council.

Planned science labs at the Wai'anae Moku Education Center provide an example of using data to plan for future needs. The Wai'anae Moku Education Center's previous facility did not have science labs. A combination of the ARPD, alignment with campus mission, and a Title III grant will enable the new facility to include a science lab on-site ([IIIB-37](#)). This modernization will allow for multiple science courses at the Wai'anae Moku Education Center. Students will be able to fulfill science requirements for multiple certificate and degree programs such as the Associate in Arts (AA) in Liberal Arts and the AA in Teaching. The chemistry lab is part of Phase II renovations ([IIIB-6](#)).

Using systematic and regular inspection, assessment reports from programs, areas, and units, and Administrative Services data gathering, the College is able to accommodate the changing needs of the campus and plan for the future. Administration is active in providing information and updates to the College regarding construction projects and other works that impact physical resources.

### **Analysis and Evaluation**

The College uses a variety of planning and assessment tools on a regular basis to ensure that it effectively uses the institution's physical resources in support of its academic programs and support services. The ARPD process is the primary mechanism for evaluating facilities and identifying needed improvements.

According to the 2016 Employee Satisfaction Survey, the majority of faculty and staff who responded indicated that the cleanliness and maintenance of the buildings and grounds were adequate ([IIIB-36](#)). The overall satisfaction rate for the cleanliness of campus facilities has consistently improved since 2011 ([IIIB-38](#)). The Administrative Services unit conducted a

more detailed survey in fall 2017 to gather more data on areas to improve and evaluated the results in spring 2018.

#### III.B.4.

*Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.*

#### **Evidence of Meeting the Standard**

The College has three mechanisms in place to address long-range capital plans: the LRDP, EP 4.201, and the *Strategic Plan 2015-2021* ([IIIB-6](#), [IIIB-39](#), [IIIB-30](#)). Together they drive all long-range capital plans.

The LRDP is a comprehensive capital improvement and land use plan for the main campus in Pearl City and its Wai‘anae Moku Education Center. The LRDP identifies the physical development needed to support the College mission and strategic goals, and it guides the future expansion and growth of the College. The LRDP includes a Phase I plan addressing facility needs and campus improvement plans to be implemented within the near-term (within five to seven years) and an Ultimate Plan to guide campus development over the long term (20+ years). The College updates its LRDP every five to ten years, and the chancellor recommends it for approval by the UH System administration and the BOR.

The BOR reviewed the College’s current LRDP in spring 2018. The LRDP not only establishes space requirements and allocations as shaped by the long-term goals, but also provides the framework by which the College can request additional funding for capital improvement projects.

As a central component of the LRDP, Phase I acknowledges capital improvement funding realities and also responds to guiding principles, accomplishes design goals, and prepares the campus for the opening of the Leeward Transit Station, part of a new state mass transit rail system. With a five- to seven-year planning horizon, Phase I reflects near-term, foreseeable improvements such as streetscape, main entry, courtyard improvements, revitalized pedestrian mall linking the rail station with campus, and interior and exterior improvements to existing facilities. The LRDP also includes site, utility, landscape, and electrical improvements as well as replacing the roof overhang ([IIIB-6](#)).

A fundamental element in the cost estimation of any major CIP construction- or renovation-related project is the completion and submission of the Capital Project Information and Justification Sheet. This document includes the project’s scope of work and its direct planning, design, and construction cost projections. It also requires information on the need and assessment of existing conditions, alternatives that the College would undertake if the project is deferred, benefits associated with completion of the project, and future operating cost impacts of the project. By requesting this level of detail, the College, the UH System, and the state of Hawai‘i ensure that all facility construction projects factor in the total cost of ownership prior to the project receiving funding approval by the state legislature and the governor. The College is requesting a major CIP project for 2019 related to fascia and sidewalk improvements. This project received UH Board of Regent approval and is before the state legislature for funding consideration ([IIIB-40](#)).

The *UHCC Strategic Directions 2015-2021* is committed to developing a system of planned equipment replacement that accounts for the expected life of equipment, the cost of replacement, and a systemwide budget for capital equipment replacement ([IIIB-41](#)). This systematic approach regulates the influence of equipment replacement on campus budgets so that large items do not impact the budget in unexpected ways. The replacement schedule will also provide a clearer picture of the amount of deferred equipment within the system.

Using a portion of a recent tuition and fee increase and funds garnered from legislative appropriations, the UHCC System centralizes funds from the seven campuses in an equipment replacement pool that is then distributed to each campus on an annual basis. The College has received nearly \$1.5 million in equipment replacement funds using this process during the first two years of the program's inception ([IIIB-42](#)).

### **Analysis and Evaluation**

The College has established long-range capital plans that support its mission and institutional goals. Intentionally aligning long-range plans and institutional goals benefit both the campus and students. Long-range planning supports goals and prepares for the future. The College conducts long-range planning for capital improvement of new facilities and equipment that take into account the total cost of ownership.

### III.C. Technology Resources

#### III.C.1.

*Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.*

#### **Evidence of Meeting the Standard**

##### **Appropriate and Adequate Technology Resources**

The College ensures that it identifies its various types of technology needs and makes decisions about the use and distribution of technology services, facilities, hardware, and software based on these needs. These decisions include input from faculty, staff, and students.

The Information and Technology Group (ITG) maintains and manages all Apple and PC computers, nine computer classroom labs, institutional servers, the Voice Over Internet Protocol telephone systems, web servers, networking services, networked printers, information technology security, the Student Test Center, and Help Desk operations ([IIIC-1](#)).

The Educational Media Center (EMC) maintains 74 smart classrooms at the Pearl City campus and five smart classrooms at the Wai‘anae Moku Education Center. These classrooms are learning spaces with instructional technology that can be used to aid and enhance course instruction. The College developed smart classrooms over a period of time, which resulted in incremental equipment differences. At a minimum, each smart classroom has a lectern, dual-boot iMac (Mac and Windows OS), DVD, mixer/amplifier, speakers, projector, and screen or flat-screen monitor. In addition to the minimum equipment, many of the newest smart classrooms have a touch panel control, SMART Board, HDMI connector for laptops and other devices, Airplay, room microphone, and moveable tables and chairs. In addition to maintaining the smart classrooms, the EMC also operates technology equipment loans, professional development for learning with technology for teaching in the classroom and online, video production, and the Copy Center ([IIIC-2](#), [IIIC-3](#), [IIIC-4](#), [IIIC-5](#), [IIIC-6](#), [IIIC-7](#)). The EMC also has a portable cart with a set of 20 Chromebooks that are available for instructors to use in the classroom.

As part of a University of Hawai‘i Community Colleges (UHCC) System initiative, the College offers online tutoring services through Brainfuse, an online tutoring service that provides students with tutoring in math, writing, reading, anatomy and physiology, nursing, biology, chemistry, physics, organic chemistry, accounting, economics, finance, statistics, and Spanish ([IIIC-8](#)).

The Kāko‘o ‘Ike (KI) Program provides support and services to students with documented disabilities. The KI Program provides qualified students assistive technology, access to Kurzweil 3000 (audible scanned text), Dragon Speak (voice to text), and JAWS for visually impaired students ([IIIC-9](#)).

The Library's technology resources support instructional programs and teaching and learning. The Library provides over 65 desktop computers for students on the second and

third floors of the library facility. These computers include both PC and Mac as well as designated computers with specialty software needed by digital media students. In addition to the desktop computers, the Library has 30 laptops and 30 iPads that students can borrow for a four-hour interval and use anywhere on campus. Instructors can also borrow iPads to use in their classes. The Library provides two study rooms for students for collaboration and meetings. Each of these rooms is equipped with an Apple TV and Polycom/video conference equipment ([IIIC-10](#)).

The Library provides printer and scanning services for all students, staff, and faculty. Equipment includes two black-and-white printers, one color printer, one black-and-white printer/photocopier/scanner, and one black-and-white photocopier. Students can print from the Library's computers/laptops or from their own devices. Any computer in the library facility can print on any of the networked printers. The Library has one high-speed scanning station and two other scanners on the second floor and one printer/photocopier/scanner on the third floor for students to use ([IIIC-10](#)). At the Wai'anae Moku Education Center, there is one black and white printer, one color printer, a scanner, and one photocopy machine. Students can print from the Wai'anae Moku Education Center's desktop computers, laptops, or their own devices.

The Library provides access to 140 online databases for all faculty, staff, and students ([IIIC-11](#)). Faculty, staff, and students can access the resources from anywhere with an internet connection. The Library regularly works with instructional programs to supply access to databases that support their content.

The Library administers an information literacy exam that is required for English 100 students and optional for English 24/English as a Second Language 22 students. Through the Information Literacy program, students learn about how to access the many resources the Library offers such as the Hawai'i Voyager catalog and online databases ([IIIC-12](#), [IIIC-13](#)).

To ensure that current technology is adequately supporting operations, programs, and services at the College, the campus uses the Technology Support account and Smart Classroom account. In 2016-2017, the College allocated \$327,000 to the Technology Support account, \$20,000 to the Smart Classroom account, and an additional \$200,000 to the Academic Services units for technology requests. From the additional \$200,000 budgeted for Academic Services, \$130,000 goes to the Technology Support account, \$50,000 to smart classroom upgrades, and \$20,000 to the Library for electronic resources for students and faculty ([IIIC-14](#)). Overseen by ITG, the Technology Support account covers the maintenance, repairs, and upgrades for all computer classrooms, smart classrooms, faculty and staff computers, student computers, academic services, and technology infrastructure.

The Information and Computer Science (ICS) program coordinates the College's grant-funded The Hub, Leeward Student Help Desk, which is staffed by ICS student interns. The Hub provides student customers with technical assistance for their personal electronic devices. ICS faculty identify and make decisions about the technology services, facilities, hardware, and software at The Hub. Student interns and The Hub customers make additional recommendations for technology resources. The Hub adheres to clear policies to protect the privacy and security of students and the College ([IIIC-15](#)). Because The Hub is a troubleshooting environment, it is isolated in its own network to prevent an infected device

from infecting the campus network. Student interns do not back up a customer's information onto any of The Hub devices to prevent the storage of illegal materials.

### **Evaluation of Technology Resources**

The College regularly evaluates the effectiveness of its technology in meeting its range of needs. In accordance with the approved Integrated Planning and Budgeting Process, every division and unit completes an Annual Report of Program Data (ARPD) and generates resource request lists, which detail requested items. These items include technology resources needed by the division or unit. The Academic Services area has primary responsibility for evaluating technology resources for the campus. The Academic Services units review the instructional area resource request priorities and use this information to inform its Academic Services Area Prioritized Resource Request List. See Standard [I.B.9](#) for a detailed discussion of the Integrated Planning and Budgeting Process.

Until 2016, the Information Technology Standing Committee provided an additional review and recommendations on future technology needs to meet the current and future needs of the campus, instructional programs, support services, and students. The standing committee was comprised of the ITG coordinator, the dean of academic services, digital media and information and computer science faculty, the Help Desk coordinator, and the EMC coordinator ([IIIC-16](#)).

The Information Technology (IT) Standing Committee reviewed all of the resource request lists that College units and divisions develop through the ARPD. During the review process, the committee identified needs and examined future directions for IT. They presented a memo to the chancellor with recommendations for IT needs and resource implications. The administrative team and the Campus Council used these recommendations as part of the institutional prioritization of resource requests process ([IIIC-17](#)).

In fall 2016, the College disbanded the IT Standing Committee since it was the last standing committee that remained from the 2007 Planning Process. The current Ad Hoc Planning Process Review Committee is reviewing the need for an IT advisory committee and will make a recommendation in the 2018-2019 academic year.

In order to evaluate the effectiveness of its technology and identify needs of faculty, staff, and students, the College implements a variety of surveys on an annual basis. Faculty who teach in a smart classroom take the Smart Classroom survey to evaluate their satisfaction with the technology and the degree to which the technology supports their teaching. Faculty and students who have class in a computer classroom lab take the Computer Classroom Lab survey, which evaluates faculty and student satisfaction with the technology components of the Computer Classroom Lab and how they help or hinder their teaching or learning. The College uses the results of the Smart Classroom and Computer Classroom Lab surveys to identify technology needs of faculty and students and to gauge the effectiveness of the technology in improving student learning ([IIIC-18](#)).

To help identify technology needs in smart classrooms, computer classrooms, and with faculty computers, the Help Desk keeps a log of all trouble calls received and sends out a post-trouble call survey ([IIIC-19](#)). This log and survey help the EMC and ITG identify

technology need areas, which the units discuss in unit meetings in order to make recommendations and requests to the ITG for funding from the Technology Support account.

The College uses multiple methods for collecting data to assess and evaluate the technology needs for distance education (DE). Every semester the EMC sends a DE student survey to all DE students to assess their DE learning experience, which includes an evaluation of the technology, and posts survey results on the iTeach website ([IIIC-5](#)). The EMC collects evaluation data from each technology training session. The DE coordinator analyzes the results and feedback from the surveys and evaluations and includes any technology recommendations in the EMC ARPD in accordance with the approved Integrated Planning and Budgeting Process ([IIIC-20](#)).

### **Provisions for Reliability, Disaster Recovery, Privacy, and Security**

For privacy and security, the College uses network security appliances and its security bundle subscriptions to protect devices that are connected to the College's network. The Fortinet Fortiguard Security Bundle includes IPS and application control, antivirus, web filtering, endpoint-control, data leak prevention, DNS filter, and VPN. In addition to network security appliances and security bundle subscription, the College also provides McAfee Virus Scan Enterprise 8.8 at no charge to all faculty, staff, and students.

As part of the UH System, UH Information and Technology Services implements single sign-on, multi-factor authentication via the UH System's identity management system. This is an option available to all faculty, staff, and students at the College. Multi-factor authentication is implemented using Duo Security, a trusted third-party cloud-based authentication system, integrated with the UH System's web login system ([IIIC-21](#)). Widely adopted by higher education institutions, Duo Security is an excellent way to strengthen security by reducing the risks associated with standard password-based systems.

### **Analysis and Evaluation**

The College's numerous designated technology resources demonstrate its commitment to supporting technology infrastructure and services. The ITG, EMC, Library, and KI Program work together to ensure that technology services, facilities, and equipment adequately support all functions of the College.

#### III.C.2.

*The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.*

### **Evidence of Meeting the Standard**

The College has provisions to ensure that its technical infrastructure is robust, current, sustainable, secure, and reliable. As detailed in Standard [III.C.1](#), the ITG maintains a cluster of server equipment with uninterrupted power supply units to provide maximum reliability of the College's network. In order to maintain a reliable network, the ITG replaces network switches every five to eight years, battery backups every four or five years, and servers as needed ([IIIC-22](#)).

Wireless networking is available in 95 percent of all indoor areas including the Student Lounge, the Uluwehi Café, and the Learning Commons. All instructional spaces have wireless networking available. Outdoor coverage includes the courtyards, main concourse, and main parking lots. Wireless connectivity is available for students, faculty, and staff for campus and personal laptops and mobile devices.

The College has nine computer classroom labs. All hardware in the computer classrooms is on a four-year replacement plan. Additionally, the College upgrades software when necessary, through tuition and fee funds set aside for the Technology Support account, to meet the needs of technology-intensive programs (see Standard [III.C.1](#)). The upgrade schedules vary according to specific needs of individual divisions and units ([IIIC-23](#)). The Wai‘anae Moku Education Center has a new computer classroom lab that is on a four-year replacement plan.

The College has 79 smart classrooms with instructional technology that can be used to aid or enhance course instruction ([IIIC-24](#)). See Standard [III.C.1](#) for details on smart classrooms. The EMC manages the smart classrooms using \$20,000 annually from the Technology Support account to maintain them. In 2016-2017, the College allocated an additional \$50,000 to upgrade the technology in smart classrooms and to renovate and upgrade five rooms.

The College bases its technology decisions on the results of evaluation of program and service needs in accordance with the College’s Integrated Planning and Budgeting Process. Every division and unit at the College completes an ARPD and generates resource request lists, which detail requested items. These items include technology resources needed by the division or unit, an explanation of why they are needed, and the evidence to support those needs. Requests for technology items on a division or unit’s resource request lists follow the procedure in the approved planning and budgeting process. See Standard [I.B.9](#) for a discussion on the Integrated Planning and Budgeting Process.

The College has structured processes to prioritize needs when making decisions about technology purchases. Technology prioritization takes place in three different areas. First, for items over \$5,000, an instructional division or unit will include technology on its resource request list as part of its ARPD and the approved planning and budgeting process. Each division chair or unit head prioritizes purchases under \$5,000 and pays for them with an annual budget allocation. Secondly, the ITG prioritizes campus wide technology needs, such as servers, routers, WiFi access points, and cabling. The Technology Support account is used to pay for campus wide technology priorities, upgrades, and maintenance. Lastly, the Academic Services area evaluates all technology items on the ARPD’s resource request lists submitted by each division and unit and prioritizes the items as part of the Academic Services Area Prioritized Resource Request List ([IIIC-25](#)).

### **Analysis and Evaluation**

The ITG and EMC analyze the College’s technology infrastructure annually through the ARPD to ensure it is adequate to support its mission, operations, programs, and services.

### III.C.3.

*The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.*

#### **Evidence of Meeting the Standard**

The College ensures that technology resources at both the Pearl City campus and the Wai‘anae Moku Education Center are reliable, safe, and secure. The UH System Technology Infrastructure Office provides additional support for state wide connectivity among and between all UH System locations ([IIIC-26](#)). ITG and the EMC manage and maintain the same services at both locations. The process in which technology is prioritized and allocated, as detailed in Standards [III.C.1](#) and [III.C.2](#), applies to both the Pearl City and Wai‘anae Moku locations.

The College provides an appropriate system for reliability and emergency backup. The ITG performs a daily disc-to-disc backup of critical servers that are located in the server room and stores the discs in a secured facility. The server administrator conducts annual recovery drills. To ensure the reliability of the College’s network, the ITG maintains a cluster of servers housed in a secured room equipped with environmental controls and protected by rack-mounted uninterrupted power supply units installed in a separate secured room. As of spring 2017, the College has service contracts for 30 percent of servers for same-day replacement of server components in the event of hardware failure. Older servers do not have same-day replacement contracts, but as the College replaces them, it will do so with servers that have same-day replacement contracts.

The ITG has developed a disaster recovery plan in the event damage occurs to the campus server room or if there is a major campus wide power outage. The College has rack-mounted uninterrupted power supply units and a gas powered generator. During a power outage, the units can power essential critical servers for three to four hours. For longer power outages, the generator will be able to provide continuous power to the server room.

#### **Analysis and Evaluation**

The ITG ensures reliable access, safety, and security to technological resources at the Pearl City campus and Wai‘anae Moku Education Center.

### III.C.4.

*The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.*

#### **Evidence of Meeting the Standard**

The College allocates resources and provides appropriate instruction and support in the effective use of technology and technology systems related to the College’s programs, services, and operations. The EMC is the primary unit that provides those types of training. The mission of the EMC unit is to inspire, facilitate, and support teaching and learning using

technology ([IIIC-27](#)). The EMC has four full-time tenured educational technologist faculty members with one also serving as the EMC coordinator and another also serving as the DE coordinator. Having four full-time faculty dedicated to educational technology professional development and support for faculty, staff, students, and administrators demonstrates the importance of technology in teaching and learning at the College.

The educational technologists closely follow national trends in technology and teaching and create workshops to enrich the faculty, staff, students, and administrators. The educational technologists at the College have an annual \$5,000 budget to experiment with emerging technologies, which provides the means for the technologists to be informed of emerging technologies and their application in the classroom.

The EMC offers professional development opportunities and online learning resources for faculty, staff, and administrators using technology in the classroom (collectively referred to as Learning with Technology for Teaching) and online (collectively referred to as iTeach). Some of these opportunities include a set of regular workshops each semester to help faculty use UH System-supported technologies to enhance productivity and professional practice such as smart classrooms, Lulima (the UH System collaborative learning environment based on the Sakai platform), a visual syllabus, Gmail, and Google Docs. The EMC also offers other workshops and workshop series every year that focus on enhancing teaching and learning with technology in the classroom such as flipped classroom and course design. Particularly for DE faculty, the EMC offers an online workshop series each semester on how to teach online, the art of teaching online, and how to create an online course as well as a week-long professional development opportunity in the summer ([IIIC-4](#), [IIIC-20](#), [IIIC-28](#)). For further discussion of the professional development programs offered by the EMC, see Standard [III.A.14](#).

To support students with the effective use of technology, the EMC provides a collection of resources and tutorials known as iLearn. This website provides students with tools to evaluate their technology skills, an introduction to online learning, strategies for online success, tools for “getting tech ready,” a Lulima orientation, and other technology and DE resources ([IIIC-29](#)).

In addition to professional development workshops, Intec (part of the EMC) supports the effective use of technology through the Technology Equipment Loan program ([IIIC-3](#)). This program provides faculty and staff with technological equipment and instructions on how to properly use it in the classroom.

The Video Production unit offers faculty and staff production support with filming and creating videos for the classroom and the filming of cable courses (course instruction offered through cable television). All faculty and staff at the College may make use of these video production services ([IIIC-6](#)).

Although the primary role of the ITG is not related to professional development, the ITG has been hosting professional development workshops open to faculty, staff, and students such as “Protecting Your Identity Online” and “Tips to Maintain Your Computer and Mobile Devices” ([IIIC-30](#), [IIIC-31](#)). The ITG conducts these workshops as part of the Success Connection workshops offered by the Writing Center. Student feedback has been consistently

positive. For example, in spring 2017 and fall 2017, student feedback averaged 4.75 on a five-point scale that the workshops benefitted them academically or personally ([IIIC-32](#)).

The College regularly evaluates the training and technical support it provides for faculty and staff to ensure these programs are appropriate and effective. After completing a professional development workshop or series of workshops, each participant completes a survey to evaluate the effectiveness of the workshop. For workshops such as teaching online, which have multiple meetings over the course of a year, participants complete a formal evaluation and presentation of artifacts. Furthermore, the EMC has developed a badging system as a method to recognize professional development efforts and completion. These evaluations help the EMC ensure that the programs and workshops offered are appropriate and effective. For further discussion of how the College evaluates professional development programs that focus on information technology, see Standard [III.A.14](#).

### **Analysis and Evaluation**

Through the EMC and ITG, the College provides quality instruction and support for faculty, staff, students, and administrators in the effective use of relevant technology and technology systems.

III.C.5.

*The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.*

### **Evidence of Meeting the Standard**

The College has established policies and processes to make decisions about the appropriate use and distribution of its technology resources. As part of the UH System, the College is governed by the UH Systemwide Policies and Procedures Information System (PPIS) ([IIIC-33](#)). The purpose of this system is to establish system wide policies and practices for the acceptable use and management of all UH information technology resources. The PPIS defines and provides effective protection, equitable access, and administrative guidelines for the use of those resources. The PPIS also supplements existing laws, regulations, codes of conduct, agreements, and contracts that are currently in place. For a detailed discussion of the PPIS, see Standard [IV.C.7](#).

The PPIS covers responsible use, confidentiality and security of electronic information, ownership and disclosure information, privacy of student information, commitment to access, special responsibilities of system and network administrators, and due process.

In addition to the PPIS, the UH System has established policies on UH username practices, security and protection of sensitive information, and system and campus wide electronic channels of communicating with students. The ITG website posts publicly-accessible links to these policies ([IIIC-34](#)).

The College has a Personal Equipment Use on Campus Network policy governing the use of personal technology on the College's network ([IIIC-35](#)). The policy is applicable to all

faculty, staff, and students and sets forth policies for connecting personal equipment to the College network in order to protect technological resources.

The UH website publishes the PPIS and all UH System policies, and they are accessible to the public. The ITG website posts links to the PPIS, other UH System policies, and the Personal Equipment Use on Campus Network policy, and they are publicly available.

### **Analysis and Evaluation**

The College has well defined policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

### III.D. Financial Resources

#### III.D.1.

*Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)*

#### **Evidence of Meeting the Standard**

Leeward Community College (Leeward CC) and the University of Hawai‘i Community Colleges (UHCC) System are committed to supporting and sustaining student learning programs and services and improving institutional effectiveness. (For further discussion of the UHCC System’s allocation of resources, see Standard [IV.D.3.](#)) The College maintains sufficient revenue streams to cover base operations as well as to support initiatives that innovate and enhance programs and services. The College’s Integrated Planning and Budgeting Process identifies institutional priorities that align with strategic goals and objectives and determines sources of revenue to fund, to the extent possible, some of these institutional priorities. The College manages this inclusive process with integrity to ensure that it maintains financial stability.

The campus administration approved the College’s operating budget for fiscal year 2017-2018 with a projected \$41,603,055 in unrestricted revenue to fund an unrestricted expenditure budget of \$39,733,896 ([IIID-1](#)). Projected revenues exceed expenditures by \$1,869,159. Excess funds will be combined with internal budget reallocations to fund high priority resource needs that the College identified through the Integrated Planning and Budgeting Process. These funds will also be used to cover unanticipated or contingency-related expenditures. Reserve requirements exceed both the minimum five percent and targeted ten percent thresholds ([IIID-2](#)).

All of the UHCC campuses rely on state-appropriated revenues (general funds) to subsidize a significant portion of their operations in order to keep the cost of post-secondary education within reach of target student populations. The UH vice president for community colleges and the UHCC chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding. Current service funding is equal to the prior year general fund appropriation, plus any previously agreed upon collective bargaining augmentations, minus base budget reductions, plus funds for new initiatives (program change requests). Downturns in the state economy normally drive reductions in the general fund base budget; however, there have been no significant budget reductions since fiscal year 2010-2011.

The general funds received by the campuses combined with tuition generated from credit instruction comprise the general operating budget of the campuses. In 1995, the state legislature authorized the establishment of the Tuition and Fees Special Fund and permitted the UH System to retain and expend revenues from tuition in order to “maintain and improve the university’s programs and operations” ([IIID-3](#)). Prior to this action, the state retained

tuition revenues and the UH System received general fund appropriations for all of its general operating expenses. This change allowed the community college campuses to implement planned tuition increases designed to cover base operations as well as fund initiatives supporting educational improvement and innovation. In spite of consecutive tuition increases over the past 12 years, the community college campuses remain affordable. The 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education identified the UHCC campuses as the most affordable two-year public higher education institutions in the nation ([IIID-4](#)).

The funding of the operating budget through a combination of general funds and Tuition and Fees Special Fund has a significant stabilizing effect on campus operations. General fund allocations remain relatively stable even when enrollments go down, mitigating the impact of the loss of Tuition and Fees Special Fund revenue. Conversely, when enrollments grow, campuses generate additional revenue to meet increased costs. As mentioned previously, reductions to the general fund base itself usually coincide with downturns in the state economy; however, these periods often have increases in enrollment as students leave the workforce to further their education.

Other special and revolving funds finance certain aspects of campus operations. Unlike general funds and Tuition and Fees Special Fund that support general operations, these funding sources support specific program activities, including noncredit instruction, summer session instruction, conferences, and student activities. The individual funds, after being established by statute, operate on a self-sustaining basis. The programs must cover direct costs and generate an administrative cost fee to cover their equitable share of general campus operating expenses.

Extramural funds are project-based funds from federal, state, and private sources, which relate to research and training grants or contracts. The College obtains these funds through competitive grants or contracts and focuses the funds on specific improvements or on services provided to the contracting agency. The University Office of Research Services administers all extramural funds.

The UHCC System requires that each campus maintains adequate financial resources to ensure financial stability ([IIID-5](#)). All community college campuses maintain sufficient cash reserves to address emergencies (five percent minimum reserve) and other operating contingencies such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (ten percent targeted reserves) ([IIID-1](#)).

The UHCC System supports all campuses by securing and allocating capital improvement program (CIP) funding to fund major construction and renovation projects. The primary revenue source for UH System CIP projects comes from state-issued general obligation bonds where the state funds debt service payments to retire the bonds. Individual campuses do not pay for these long-term obligations.

The framework of financial planning begins with a comprehensive operating financial plan submitted to the UH Board of Regents (BOR) for its approval prior to the start of each fiscal

year. The financial plan provides the BOR with oversight to ensure that the UH System is managing its resources in a fiscally responsible manner.

The financial plan includes all appropriated funds including the operating budget and other special and revolving funds. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures. The College analyzes the budgets on a quarterly basis and must explain to the BOR at the close of each quarter variances exceeding established thresholds at the UHCC System level ([IIID-1](#)). As the third largest institution in the UH System, Leeward CC is able to effectively and efficiently deliver a quality educational experience for students while receiving the least amount of funding on a per student basis in the UH System ([IIID-6](#)).

The College's annual Integrated Planning and Budgeting Process, which is discussed in detail in Standard [I.B.9](#), culminates with an Operational Expenditure Plan for the College's annual operating budget. The College incorporates into the plan the institutional priorities that it develops through the completed Annual Report of Program Data (ARPD) templates. The plan is a more detailed and focused budget planning document than the operating budget that the BOR approves. The Operational Expenditure Plan articulates specific objectives that directly support student learning and improvements to institutional effectiveness using line item budget allocations, strategic reallocations, and incremental budget adjustments ([IIID-1](#)).

The UHCC System office provides additional funding allocations to the College for priority initiatives that support institutional improvements and strategic plan goals. The Hawai'i Graduation Initiative is an example of a high-priority strategic plan initiative. This initiative aims to increase the number of college graduates within the state. Its strategies reflect the UHCC System's commitment to expand workforce development opportunities across the state and to support increased student participation and completion, particularly for students from underserved populations and regions.

Performance-based funding is a strategy to generate greater institutional productivity, accountability, and educational attainment. Through funding incentives, performance-based funding encourages efficient resource allocation, greater awareness and attention to strategic priorities, and a results-oriented campus culture. The UHCC System and the seven community college campuses currently earmark approximately \$6.5 million of its base budget for performance-funding purposes. Starting in fiscal year 2015-2016, the UH System began providing performance-funding allocations that contributed an additional \$2.0 million to the performance-funding pool of resources. Combined, performance funding represents over four percent of the total operating budget. The College has historically performed well in achieving its performance-funding goals and has received nearly all of the possible performance-funding allocations over the last several years ([IIID-7](#)).

Performance-funding allocations support the Hawai'i Graduation Initiative by linking funding to the successful attainment of goals that promote the initiative. Performance measures related to increasing student participation and completion, particularly for students from underserved populations and regions, and expanding workforce development opportunities, are closely tied to the initiative's strategies.

The College uses innovation and strategic initiative funding allocations to address critical needs identified through the strategic planning process and support the goals of the Hawai'i Graduation Initiative. Some of the recent initiatives include subsidizing the cost of new classes associated with enrollment growth, reforming developmental education, improving retention and persistence through guided pathway and early intervention systems, expanding financial aid support, supporting Native Hawaiian student achievement, and replacing aging equipment. The UHCC System office holds the funds used to support these initiatives and distributes them on an annual basis to the community college campuses.

The campus fiscal officer enters all operating budgets and other special and revolving fund budgets into the financial management system at the individual account level and by major category of expenditure (regular payroll, lecturer payroll, casual hire payroll, student help payroll, other current expenses, and equipment). The College monitors the budgets in several ways: with monthly budget to actual financial reports that are available on the UHCC Budget website, through the UH System's online Kualii Financial System, and through various hardcopy financial reports that the College's Business Office distributes on a monthly basis ([IIID-8](#)).

Each account manager, such as division chairs and unit heads, monitors and adjusts the operating budgets (general funds and tuition and fees special fund) throughout the year as needed. For other special and revolving funds, the College monitors business and financial plans to track revenue and expenditure projections. Finally, the College follows best practices regarding budget and cash management to ensure that it can cover cash flow requirements, long-term obligations, and other unanticipated costs as they arise.

### **Analysis and Evaluation**

The College maintains positive cash flows and cash reserves to develop, support, and sustain student learning programs and services and improve institutional effectiveness. The budget and budgeting process is well documented. General funds, special and revolving funds, and tuition and fee funds provide adequate resources for programs and services. The College manages its funds efficiently and with integrity to ensure it provides a quality education to students at the lowest per student cost in the UHCC System.

#### **III.D.2.**

***The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.***

### **Evidence of Meeting the Standard**

The UHCC's mission and strategic goals are the foundation for all planning, including financial planning. Strategic goals drive budget priorities in an effort to achieve the outcomes directed by the BOR. The College aligns its mission and goals to the UHCC System mission and goals.

The UH System identified guiding principles in the document *UH Strategic Directions, 2015-2021*. This document, approved by the BOR in January 2015, provides the framework, objectives, and priority targets that the system campuses use to develop their own strategic plans ([IIID-9](#), [IIID-10](#), [IIID-11](#)). For further discussion of the *UH Strategic Directions 2015-2021*, see Standard [IV.C.8](#).

The timing of the financial planning process at the College is tied to the state and UH System budget processes. The UH System president prepares a budget for submission to the BOR.

Upon approval by the BOR, the UH System submits its budget to the governor for review and incorporation into the executive budget request. The state legislature considers the executive budget during its regular session in January. The legislature usually passes appropriations in May and transmits them to the governor for approval. After the governor approves them in June, the state sends allocation notices to the UH System, including any restrictions imposed on legislative appropriations. The president determines distributions of general funds including a UHCC-level distribution. The vice president for community colleges and the UHCC chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding.

The College's Integrated Planning and Budgeting Process begins with its mission and *Strategic Plan 2015-2021*. All programs and services complete a program review using the mission and strategic plan goals as a guide. The campus leadership meets in late summer to prepare and plan for the upcoming academic year. For a more detailed description of the planning process, see Standard [I.B.9](#).

The BOR conducts budget and financial reviews. Regents Policy (RP) 8.204 sets the UH System's fiscal management, budget process, legislative budget proposal, and preparation processes ([IIID-12](#)). The BOR follows best practices to establish policies that ensure that resources are strategically invested in the UH System's mission, vision, and plans.

The College disseminates information about the annual budget and operational expenditure plan via email upon final approval by the chancellor, usually at the beginning of each academic year, and the vice chancellor of administrative services (VCAS) provides budget updates to the campus community at convocation each semester. The VCAS posts these budget-related documents and convocation presentations on the College intranet ([IIID-13](#), [IIID-1](#)).

In addition, the College shares its budget and financial information on a quarterly basis with the College's Financial Management Group, which was created in fall of 2016. The role and purpose of the group is to "share, discuss, and review information, processes, and procedures related to matters involving the budget, financial management, and business-related functions of the College." The group, comprised of faculty, staff, and administrators who have budget, fiscal, and/or business-related responsibilities, is a continuous improvement initiative that the College's fiscal administrator and VCAS facilitate ([IIID-14](#)).

## **Analysis and Evaluation**

The College has a well-established Integrated Planning and Budgeting Process that begins with the mission and goals. The College aligns its mission and goals with the *UH Strategic Directions 2015-2021* and the *UHCC Strategic Directions 2015-2021*. Policies and procedures related to this process ensure sound financial practices and financial stability. The VCAS distributes budget and financial information to the campus community on a regular basis at the fall and spring convocations and upon final approval of the Operational Expenditure Plan. Additionally, the College shares quarterly updates related to the budget, fiscal, and business operations of the College with the Financial Management Group. All budget and financial information is available online on the College intranet.

### III.D.3.

*The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.*

## **Evidence of Meeting the Standard**

The UH System has clearly defined guidelines and processes for financial planning and budget development. The Budget Policy Paper and budget instructions outline the budget development process ([IIID-16](#)). The Budget Policy Paper provides the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The budget instructions establish the budget philosophy, major budget assumptions, expectations, and timeline. The budget instructions also explain the operating budget revenue and expenditure assumptions including enrollment and tuition revenue projections, payroll cost assumptions, and utility cost projections. Finally, the budget instructions provide assumptions for developing CIP revenue and expenditure projections and outlines expectations for increased efficiencies and productivity.

Budget development documents are available on the UH website ([IIID-15](#)). These documents include the Budget Policy Paper and budget instructions, a proposed budget request to the BOR, and the status of both operating and CIP budgets through the various stages of the budget development cycle ([IIID-16](#), [IIID-17](#), [IIID-18](#)).

The Budget, Planning and Finance office distributes UHCC System budget execution documents at monthly VCAS meetings and/or posted on the UHCC Budget and Planning and Finance website ([IIID-19](#)). These documents include general operating budget allocations, CIP projects, and consolidated financial statements ([IIID-20](#), [IIID-21](#), [IIID-22](#)).

The College uses the Integrated Planning and Budgeting Process described in Standard [I.B.9](#) to gather input from all campus constituencies before finalizing the budget for the following fiscal year. This process culminates with a list of Institutional Priorities that have been vetted through the primary campus governance groups, the Faculty Senate and the Campus Council, and then voted on by the Campus Council. The VCAS and the fiscal administrator refer to the Institutional Priorities after completing an initial draft budget. The draft budget uses information from UH System and UHCC System allocations, internal campus reallocations,

tuition and fee projections, and performance funding results offset by projected operational expenditures for the upcoming fiscal year. Once the VCAS and fiscal administrator draft the budget, the College allocates any remaining available funds based on the Institutional Priorities. An example is the Operational Expenditure Plan for fiscal year 2017-2018 ([IIID-23](#)). The College was able to fund the top five Institutional Priorities from the Operating Budget Requests ([IIID-24](#)).

### **Analysis and Evaluation**

The UH System and UHCC System offices have clear processes, policies, and procedures for budget development and financial planning, which the College follows. The College uses its Integrated Planning and Budgeting Process to ensure all campus constituencies have an opportunity to submit plans for future program growth development and request resources. This is a broad-based process that is driven by the mission and strategic plan.

#### III.D.4.

*Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.*

### **Evidence of Meeting the Standard**

Institutional planning at the College reflects a realistic assessment of resource availability and works towards the further development of resources to meet expenditure requirements and strategic goals. Tuition increase proposals balance the competing needs of keeping college affordable, meeting immediate campus needs, and achieving the goals in the College's *Strategic Plan 2015-2021* ([IIID-11](#)). The UHCC System has successfully maintained this balance by establishing a tuition rate schedule that ensures adequate resources for ongoing needs and new funding to meet strategic objectives while remaining affordable when compared to other two-year institutions.

The College has a proven track record of using its resources wisely and efficiently. In periods of declining enrollment, the College has made selective and strategic decisions and investments to ensure programs and services can continue to operate to meet the needs of its students such as re-allocating support positions to those areas that have the greatest need. Additionally, the College has been successful in diversifying its resource base by receiving UHCC System funding for various student success initiatives and federal grant funds that provide support for programs and services that align with the College mission and strategic plan. An example is the Title III grant, Part A and Part F, from which the College received a \$13.6 million award from the federal government (October 1, 2014, through September 30, 2019) to enhance services to Native Hawaiian students by renovating the Hālau 'Ike O Pu'uloa, several science labs, expanding space and services to the Wai'anae Moku Education Center, and modernizing and renovating the Shade House ([IIID-25](#), [IIID-26](#), [IIID-27](#)).

The UH System and UHCC System offices provide the College with access to several financial forecasting models, which are an integral component of assessing realistic financial resource availability for institutional operations and facility planning. The College makes use of multi-year financial models for tuition and fee revenue projections and financial projections related to campus operations across all fund types ([IIID-28](#)). To assist with

facility planning, the College has access to a six-year CIP plan, annually updated by the UH System, which provides construction-related project and funding details for all institutions (IIID-29). Additionally, the College's revenue-generating accounts annually complete business plans that document and forecast all sources of revenue and anticipated expenditure levels. These planning and financial models present data that the College uses to forecast revenue and expenditure requirements.

### **Analysis and Evaluation**

The College completes its financial planning using realistic projections of expected resources and anticipated expenditures by using several forecasting and planning models. As potential partnerships and grant opportunities become available, the College assesses each proposal's appropriateness and resource requirements as well as how the proposal aligns with the College mission and strategic plan.

#### III.D.5.

*To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.*

### **Evidence of Meeting the Standard**

The College uses several UH System administrative software systems to conduct the business affairs of the College. These systems provide the framework and structures for the College to manage financial resources and business processes. Systems include Banner for students, PeopleSoft for human resources and payroll, and Quali for financial management. The UH System manages these administrative systems, which are designed to segregate duties and responsibilities among end-users, financial managers, and approval authorities for all financial-related transaction revenue and expenditure processing.

The various administrative software systems provide scheduled, timely, and detailed data and reports. The College incorporates this information into the financial planning models and systems for budget and resource allocation as well as uses it for management purposes. The College uses the data to develop a formal budget, which it analyzes and reviews throughout the fiscal year (IIID-8).

UH, UHCC, and institutional-level policies and procedures provide the basis for sound financial management and business practices that include internal control mechanisms. A recent example of continuous improvements made in this area is the implementation of UHCC Policy (UHCCP) 8.200, Financial and Operational Oversight of Revenue Generating and Financially Self-Sustaining Programs. UHCC developed this policy following recommendations made by, and in concert with, the UH Office of Internal Audit and the community college campuses. Following an evaluation process, UHCC developed this policy to improve internal control systems and subsystems related to accounting, cash handling, reconciliation, billing, and inventory management practices for revenue-generating activities of the colleges (IIID-30). When the College implemented the policy requirements, it received
