a favorable opinion from the UH Office of Internal Audit in February 2017 following an audit of selective revenue-generating programs ([IIID-31](#)).

The College incorporates revenue and expenditure budgets for all funds and programs into the annual Integrated Planning and Budgeting Process. This process includes incremental budget adjustments to existing allocations, requests for new funding, and business plans for all revenue-generating activities. The College ties all financial decisions regarding existing allocations, reallocations, or requests for new funding to the strategic plans of the College, the UH System, and the UHCC System. Various supporting data, including outcomes assessment data or service-related outcome measures, help justify these financial decisions. See Standard [I.B.9](#) for more detailed information on the planning process.

External audits of the entire UH System financial statements further support the College's integrity and internal controls. On December 15, 2016, Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016 ([IIID-32](#)). The opinion read, "In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai'i, as of June 30, 2016 and 2015, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America." Additionally, the audit's management letter noted no material deficiencies following completion of the A-133 audit ([IIID-33](#)).

In the event of an audit exception or management advice item, the College would provide a prompt and timely response to ensure that corrective action is taken to prevent any future occurrence.

### **Analysis and Evaluation**

The College has appropriate internal control structure and mechanisms in place and disseminates financial information in a timely manner to support decision making. The College regularly reviews and updates financial management practices to improve internal control systems.

#### **III.D.6.**

***Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.***

### **Evidence of Meeting the Standard**

As stated in Standard [III.D.5](#), an external validation of the financial statements at the macro level ensures financial stability and cash flow position ([IIID-32](#)). To ensure accuracy and credibility of financial and budget related documents at the institutional level, the College, in consultation and coordination with the UHCC System office, utilizes various multi-year financial projection models, historical revenue and expenditure patterns, business plans, and enrollment forecasts to determine anticipated cash and fund balances, revenues, and expenditures. Additionally, the fiscal administrator and the VCAS perform internal and

independent reconciliation procedures to ensure accuracy and to maintain integrity in financial and budgeting planning ([IIID-34](#)).

The College provides direct support to student learning programs and services through the Integrated Planning and Budgeting Process as detailed in Standard [I.B.9](#). This program review process ensures that resource requests and subsequent investment of resources are aligned with program needs and activities and with the College's strategic plan goals and objectives.

### **Analysis and Evaluation**

The College has internal and external control and procedures in place to ensure accuracy and credibility in financial planning and budgeting documents. The College makes allocations based on the Integrated Planning and Budgeting Process to align financial resources with student learning programs and services and to ensure consistency with the goals and objectives of the strategic plan.

III.D.7.

*Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.*

### **Evidence of Meeting the Standard**

The College has not received any external audit findings or management letters of any material weaknesses or deficiencies during the last six years. Previous external audits are available on the College intranet ([IIID-35](#)).

Should the College receive an audit finding or management letter, the College would make timely and thorough corrective action to address the issue(s) ([IIID-33](#)). The College would discuss audit findings with affected departments to ensure clear communication of the reason for the finding and the regulations or requirements upon which the audit based the finding ([IIID-32](#)). Campus administrative officials and campus or system support departments would also receive the audit findings if they impact the officials or departments or if the officials or departments would be involved with corrective action.

Affected departments and administrative or support staff would discuss and develop corrective action plans which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, or implementation of new administrative software systems. The Destiny administrative software system is an example of a new administrative software system implemented at the UHCC System and campus level. This system, designed specifically for continuing education and noncredit programs, improves regulatory compliance, increases and enhances financial and programmatic data available for monitoring and decision-making, and improves internal controls.

The College would then communicate corrective action plans to the auditor in accordance with deadlines set by the auditor or coordinating office such as the Office of Research Services (A-133 audit corrective action plans). Corrective action plans would identify the

program, the individuals responsible for implementing the corrective action to address the audit finding, the actions taken to prevent reoccurrence, and the date corrective actions were taken.

### **Analysis and Evaluation**

External financial audits take place on a regular basis and procedures are in place to ensure that the College addresses and communicates its responses to audit findings or management letters in a timely and thorough manner. The College has not received any audit finding or management letter over the past six years. The College shares information regarding past external audits, institutional responses to external audits, and financial and resource planning with the campus community and posts the information on the College intranet.

III.D.8.

*The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.*

### **Evidence of Meeting the Standard**

Several external and internal agencies or departments evaluate and assess the UH, UHCC, and College's financial and internal control systems for validity and effectiveness on a regular basis.

External financial audits take place on an annual basis and include a report on internal control over financial reporting and compliance with respect to provisions of laws, regulations, contracts, and award agreements. This report describes the scope of testing of internal control and compliance. Noncompliance could have a material effect on the consolidated financial statements. The 2016 external audit reported on the internal control over financial reporting: "[W]e did not identify any deficiencies in internal control that we consider to be material weaknesses" ([IIID-32](#)).

The audit also provides a report on compliance for each major federal program and a report on internal control over compliance. The 2016 external audit reported on compliance for each major federal program: "In our opinion, the University complied, in all material respects, with the types of compliance requirements...that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2016." Finally, the same external audit reported on internal control over compliance: "We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses."

The State of Hawai'i's Office of the Auditor conducts additional reviews and audits of the UH, UHCC, and the College's funds and financial reports per the Hawai'i Revised Statutes. Section 23-12 of the Statutes requires that independent auditors review the UH special, revolving, and trust funds and accounts once every five years and that this review includes an evaluation of the original intent and purpose of the fund, the degree to which each fund achieves its purpose, and an evaluation of the fund's performance standards. Independent auditors completed the last report in December 2014 and stated that the UHCC Special Fund "continues to serve the purpose for which it was created..." ([IIID-36](#)).

The UH Office of Internal Audit performs audits and reviews of select programs and may identify internal control deficiencies and recommendations for improvements. The office reports findings and recommendations from internal audit reviews to the BOR Committee on Independent Audit to ensure appropriate oversight, management, and operating responsibilities. An example of action taken due to an audit comes from the internal audit review of the UHCC's revenue generating programs, which is highlighted in Standard [III.D.5](#). Through this audit review and a follow-up consultation process between the Office of Internal Audit, the UHCC System office, and the College, the UHCC System office developed UHCCP 8.200. The College took measured steps to improve and strengthen its internal control processes, implemented a formalized annual business plan process for revenue-generating programs, and established the Financial Management Group ([IIID-30](#), [IIID-14](#)).

The creation of the College's Financial Management Group in fall 2016 provides an additional level of accountability in support of this standard. The purpose of the group is to "share, discuss, and review information, processes, and procedures related to matters involving the budget, financial management, and business-related functions of the College," resulting in "more informed financial and business-related management practices, stronger internal controls, and increased access and reliability of financial information to assist in decision-making and the protection of financial assets." The group meets on a quarterly basis and is comprised of all faculty, staff, and administrators who have budget, fiscal, and/or business-related duties and responsibilities. A specific improvement area that came as a result of collaborative efforts between the group and the administration is an annual business plan that the College requires from all of its revenue-generating activities and programs. Each business plan provides revenue, expenditure, and cash flow estimates, and the College incorporates the plans into its overall financial planning forecasts and projections.

The College regularly undertakes an evaluation and assessment of its financial management and internal control procedures through the Integrated Planning and Budgeting Process as described in Standard [I.B.9](#). The College and the UHCC System campuses use various comparable measures to capture financial and internal control metrics. The College reviews and assesses these measures and ultimately includes them in the Administrative Services ARPD ([IIID-37](#)). This process helps administrative services develop strategies and action plans to improve efficiencies and performance.

### **Analysis and Evaluation**

The College has demonstrated through various external and internal audits and reviews, coupled with the College's own self-assessment and evaluation processes contained within the Integrated Planning and Budgeting Process and the Financial Management Group, that it regularly evaluates and assesses financial and internal control systems and uses the results to support continuous improvement efforts.

III.D.9.

*The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.*

## **Evidence of Meeting the Standard**

Consistent with the UHCCP 8.201 on Unrestricted Fund Reserve, the College maintains sufficient cash reserves in order to provide for financial stability ([IIID-5](#)). All community college campuses, including Leeward CC, meet both the five percent minimum reserve and the ten percent target reserve requirements of the policy. Meeting these cash balance reserve thresholds ensures that sufficient resources are available to meet unplanned contingencies, emergency response, and repair request needs ([IIID-38](#)).

The College has two primary sources of revenue to support its operating budget: state general fund appropriations and tuition revenue. The state legislature appropriates general funds to the community college campuses. The state provides approximately one quarter of the funding prior to the beginning of the fiscal year with the remaining full-year allocation made prior to the end of the first quarter. The College uses state general fund revenues almost exclusively to pay employee salaries. The College collects tuition prior to the beginning of fall and spring terms and expends these funds over the course of each term. Tuition revenue projections can be adjusted according to actual enrollments, and the College modifies the budget to reflect the adjustment. The College uses revenue from tuition to support salaries and other operational expenses. Unexpended tuition revenue is the primary source of the College's cash reserves.

Revenue-generating programs and activities maintain sufficient cash balances to accommodate working capital requirements. These programs provide annual business plans that project revenues, expenditures, and cash balances. Financial reports and the Quali Financial System regularly compare the budget to actual performance of these programs to prevent cash flow issues.

The state of Hawai'i, which includes the UH and its ten campuses, is self-insured and provides comprehensive oversight of insurance policies and coverages for all state agencies. The College has a delegated responsibility to review potentially high-risk programs and activities and to ensure that they properly assess these programs and activities to minimize or prevent liability concerns. The UH Office of Risk Management provides the College with oversight for all insurance-related requirements and issues. This office assists the College in identifying and managing risks in order to reduce losses, maintain financial stability, and protect resources ([IIID-39](#), [IIID-40](#)).

The projected unrestricted Tuition and Fees Special Fund cash balance of the College is \$2,418,871 for fiscal year 2017-2018 ([IIID-1](#)). In addition, campus reserves are 20.05 percent of the combined prior year expenditures of the General Fund and Tuition and Fees Special Fund. The College has direct access to these resources should a financial emergency occur or extraordinary financial obligations exist ([IIID-41](#)).

## **Analysis and Evaluation**

The College has sufficient cash flow and reserves to meet the needs of its programs and services. Appropriate strategies and realistic plans are in place to meet financial emergencies and unforeseen occurrences and to provide for appropriate risk management oversight.

### III.D.10.

*The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.*

#### **Evidence of Meeting the Standard**

The College uses a variety of financial management tools, reports, and models to plan, project, monitor, and assess its financial condition. The reports help to monitor extramural funds, loan funds, and non-extramural funds. These include quarterly expenditure reports, monthly budget status reports, monthly cash management reports, and the Quali Financial System.

Policies and procedures are in place to ensure financial management integrity at the College, regardless of the source of funds. These policies and procedures ensure that sufficient resources and fund availability (allocations, appropriations) exist, that the College reviews proper expenditure authorizations, and that the College is in compliance with all applicable statutes, rules, and regulations.

The College demonstrates compliance with Federal Title IV regulations and requirements in the following ways:

- Documentation to demonstrate compliance with regulations and requirements such as student eligibility based on need, financial aid awards that do not exceed unmet need, or maximum award limits
- Adjustment of awards when unmet need changes or student withdraws
- Repayment of federal program for over award/adjustments
- Reporting of awards, adjustments, and withdraws to federal agency
- Exit interviews for students with loans

As stated in Standard [III.D.5](#), Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016, and found the financial statements fairly presented the financial position and cash flows of the UH System ([IIID-32](#)). Over the past six years, the College has not been cited for any material weaknesses or deficiencies in compliance or internal controls from external audit findings.

The College has special fund accounts for campus units and activities that generate revenue, including student activities, noncredit programs, vending services, food services, and other programs that support the College. The external UH System annual financial and compliance audit and the legislative audit of special funds includes an audit and review of the College's special funds.

The UH Foundation manages monies from scholarships, fundraisers, and donations and has an internal control system to monitor the accounts. The UH Foundation has a responsibility to ensure that they properly process authorized transactions in a timely manner and that they make disbursements that are in compliance with account restrictions.

The UH Central Accounting Office and the Office of Research Services provide oversight, policies, and procedures for all grants to ensure that they are managed in compliance with all regulations, internal restriction, and laws governing the agreements. The College has a Grants Coordinator position that assists faculty, program directors/coordinators, principal investigators, and administration in the efficient use of grant funds, timely delivery of reports, and other post-award activities. Additionally, the grants coordinator assists in pre-award submissions for new proposals. The Business Office staff includes several professional positions that provide post-award grant accounting support to ensure proper recordation of revenues and expenditures and to coordinate and facilitate financial report preparation and distribution.

### **Analysis and Evaluation**

The College demonstrates through a variety of methods that it practices effective oversight of finances for all its programs including financial aid, grants, externally funded programs, and other organizations or foundations.

III.D.11.

*The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.*

### **Evidence of Meeting the Standard**

The College participates in short-term and long-term planning as noted in Standard [I.B.9](#) and [III.B.2](#). All financial planning and resource allocation decisions incorporate payments of long-term liabilities and future obligations, including debt service, system wide assessments, and any compensation-related adjustments ([IIID-34](#), [IIID-42](#)). The College uses the same type of financial planning and information in developing an annual budget, short-term planning, and other fiscal-related planning efforts.

The community college campuses do not issue debt for Other Post-Employment Benefits (OPEB), insurance costs or repairs, and maintenance projects, which the state funds. The items currently financed with long-term debt are projects that directly create revenue streams that offset debt service costs. Refer to Standard [III.D.14](#) for further discussion.

### **Analysis and Evaluation**

The College plans for the payment of liabilities and future obligations to ensure its short-term and long-term financial solvency.

III.D.12.

*The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.*

**Evidence of Meeting the Standard**

The state general fund pays the employer's share of OPEB obligations for general funded positions for all state agencies. Therefore, employer OPEB obligations for general funded positions are not part of the College's operating budget.

The College is obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the College. The College's contributions are calculated as part of the state's total contribution requirements and are reimbursed to the state's general fund as part of the fringe benefit rate on employees' actual salaries. The UH System's annual OPEB cost for non-general funded employees is calculated based on the annual required contribution of the employer, an amount actuarially determined in accordance with the Governmental Accounting Standards Board Statement No. 45. The annual required contribution represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The business and financial plans of the College's revenue-generating accounts and funds recognize and account for the employers' OPEB obligations for non-general funded positions ([IIID-43](#)).

As part of the annual audit of the UH System consolidated financial statements, the report of independent auditors conducts a review of the OPEB obligations at the UH System level. Financial statements reflect the UH System's liability for OPEB, but campuses do not budget for OPEB obligations since the state allocates and pays OPEB for general fund positions ([IIID-22](#)).

**Analysis and Evaluation**

The College is responsible for the OPEB for only a small number of non-general-funded positions. The College includes the OPEB costs associated with these positions in the fringe benefit rate on employees' salaries and factors them into the annual and long-term business and financial plans of the revenue-generating accounts and funds that are responsible for paying these costs.

III.D.13.

*On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.*

### **Evidence of Meeting the Standard**

The UHCC System, in coordination and consultation with the College, calculates the amount of the financial obligation associated with locally incurred debt instruments. The College transfers funds to the UHCC System on an annual basis for repayment of these debt instruments. The College used locally incurred debt instruments to fund energy conservation measure projects that have been implemented campus wide and to fund alternative energy (photovoltaic) projects. It used additional debt instruments to purchase the building and site for the College's Wai'anae Moku Education Center. The College includes these debt obligation payments in all budget and planning documents and, in fiscal year 2017-2018, used an estimated 1.7 percent of the College's operating budget to repay all locally incurred debt service ([IIID-34](#), [IIID-42](#)).

### **Analysis and Evaluation**

The College plans and budgets adequate resources to repay all locally incurred debt. The College's and UHCC System's planning and budget documents separately identify and account for each debt instrument.

III.D.14.

*All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.*

### **Evidence of Meeting the Standard**

As noted in Standards [III.D.5](#) and [III.D.10](#), the College manages its financial resources efficiently and with integrity including the management of funds associated with debt instruments, all revenue-generating activities, fund-raising, and extramural grants and contracts.

The College has long-term debt instruments (UH-issued revenue bonds) and used bond funds to purchase an existing building and site for the Wai'anae Moku Education Center. The College allocates and transfers funds for debt service to the UH System on an annual basis as part of the budget planning and execution process. The percentage of the College's operating budget used for this debt service is 0.5 percent.

The College and the UHCC System also have long-term debt instruments (UH-issued revenue bonds) for various energy conservation and alternative energy projects. They use bond funds to purchase and install new or replacement fixtures and equipment that consume less energy or generate electricity resulting in lower utility cost for the College. The UHCC pays the debt service and receives annual reimbursement from the College based on energy savings. The College's Integrated Planning and Budgeting Process annually allocates the funds for this debt service reimbursement. The percentage of the College's operating budget used for this debt service reimbursement is 1.4 percent.

UH System policies and procedures require that the funds be used in accordance with state and federal requirements, the mission and goals of the UH System, and the purpose of the funding source ([IIID-30](#), [IIID-44](#), [IIID-45](#)).

Auxiliary activities are revenue-generating programs and activities that provide non-instructional goods or services funded by a user charge or fee. Auxiliary activities, conducted for the benefit of students, faculty, and staff, include activities such as the bookstore, food service, and the copy center. The University of Hawai‘i at Mānoa (UH Mānoa) Bookstore unit administers the bookstore. The College annually reviews the other auxiliary activities as part of the College’s revenue-generating program planning and budget process. This process ensures that these activities actively engage in the financial management responsibilities of the enterprise and ensures the activities are financially solvent.

UH System policies and procedures require that the funds be used in accordance with state and federal requirements and the purpose of the funding source ([IIID-46](#)). UH System policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure that the College properly expends the funds in compliance with donor restrictions and the usual and common business and regulatory practices ([IIID-47](#), [IIID-48](#), [IIID-49](#), [IIID-50](#)).

### **Analysis and Evaluation**

The College uses all financial resources effectively and with integrity in a manner consistent with the intended purpose of the funding source in accordance with various federal, state, UH, UHCC, and College policies, procedures, and guidelines.

III.D.15.

*The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.*

### **Evidence of Meeting the Standard**

The College has a current student loan default rate of 16.5 percent ([IIID-51](#)). The student loan default rate has remained fairly consistent over the past four years hovering between 14.4 percent and 17.7 percent, which is well below the 30 percent federal guideline threshold that would require the creation of a student loan default prevention task force and the subsequent development and implementation of default prevention action plans ([IIID-52](#), [IIID-53](#), [IIID-54](#)).

The College’s financial aid manager is responsible for the management, oversight, and compliance with Title IV financial aid programs. The College does not award student loans during the initial packaging of financial aid. Upon financial aid award notifications, the College informs students that loans are available, and this process includes counseling students about their obligations to the grantor of the loan and responsibilities associated with being a responsible borrower. In addition, starting in 2018-2019, all financial aid staff will be trained to review and manage the cohort default rate data, so they can submit a challenge,

adjustment, or appeal to the U.S. Department of Education as needed to determine whether the College's cohort default rate is inaccurate. If these challenges, adjustments, or appeals are successful, the cohort default rate may be lowered, raised, or not impacted. If the U.S. Department of Education lowers the College's cohort rate, the College may avoid sanctions or become eligible for a benefit.

Alternative revenues for student financial aid conform with Executive Policy (EP) 6.204, Student Financial Assistance Program, whereby the College dedicates a minimum of 8.8 percent of its tuition revenues to need-based financial aid ([IIID-55](#)). In addition, the College's annual budget dedicates additional tuition revenues to other financial aid programs that serve need- and non-need based students ([IIID-1](#), [IIID-56](#)). In total, the College will dedicate more than 16 percent of its fiscal year 2017-2018 tuition revenue to student financial assistance programs.

### **Analysis and Evaluation**

The College monitors and manages its student loan default rates to ensure compliance with federal requirements. Programs are in place to counsel students on student loan responsibilities. The College's budget process identifies alternative revenue streams to maximize student financial assistance and minimize student dependence on loans.

III.D.16.

*Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.*

### **Evidence of Meeting the Standard**

The College's Administrative Services staff provides oversight of contractual agreements with external entities and follows several BOR, UH, and UHCC policies, procedures, and guidelines to review and approve all contracts prior to implementation. Some of the contractual agreements fulfill basic service-related functions of a campus, such as the beverage and snack vending contracts, food service concessions, facility use contracts, and facility service and maintenance contracts. Other contractual agreements meet an institution-related need identified through the planning process, student surveys, or other means. The integration of the contractual agreements with the Integrated Planning and Budgeting Process demonstrates the alignment of these agreements with the College mission and goals.

The College has a variety of contractual agreements, including purchase orders, service contracts, memoranda of agreements, concession contracts, affiliation agreements, sponsored class or sheltered class agreements with external agencies, consultant contracts, construction contracts, internships and externships, maintenance contracts, and lease agreements. Noting the need to standardize contractual provisions, establish clarity for approvals, and implement risk-reduction strategies, the BOR, in consultation with the UH System's colleges and universities through the UH Office of General Counsel, adopted 8.200 on Contracts and Signing Authority, which is applicable to all contractual agreements between the UH System and non-university entities. This policy went into effect November 1, 2017 ([IIID-57](#)).

Several other UH and/or UHCC policies and procedures address various types of contractual agreements for the College. For instance, Administrative Procedure (AP) 8.200 through AP 8.299 provide procurement guidelines for contracts and purchasing; UHCCP 8.102A covers memoranda of agreements for sponsored or sheltered class; Regents Policy (RP) 8.201 through RP 8.212 cover internships and externships; and AP 8.270 covers lease agreements ([IIID-46](#), [IIID-58](#), [IIID-59](#), [IIID-60](#)).

Examples of the contractual agreements include contracting for Student Health Center services with the UH Mānoa Student Health Center, the Xerox lease agreement for copy/duplicating services, and the memorandum of agreement with the Kapi‘olani Community College’s Nursing program. The VCAS and support staff review all contractual agreements with external entities for compliance with established codes, regulations, policies, and procedures. The College uses SuperQuote to request bids on purchase orders for any service or items costing more than \$2,500. For amounts under \$2,500, the unit or division head must approve the purchase order, submit it to the Business Office, and get approval from the fiscal officer prior to any commitment of funds.

To limit liability, the College utilizes the UH service contract that the UH General Counsel office approved ([IIID-61](#)). The appropriate dean or director must complete and approve UH service contracts prior to their review by the vice chancellor for academic affairs. The total amount of the contract determines final signing authority. For contracts up to \$25,000, the College’s fiscal administrator reviews and approves. For contracts over \$25,000, final approval is the responsibility of the UH System Office of Procurement and Real Property Management.

The UH service contract provides a termination clause which states, “UNIVERSITY shall have the right to terminate this contract upon TEN (10) days’ written notice at any time and for any reason.” AP 8.275 on Contract Formation and Administration provides provisions “to assure that the Contractor’s total performance is in accordance with its contractual commitments and that the obligations of the University are fulfilled” ([IIID-62](#)). It includes the monitoring and supervision of the contract actions from award of the contract to completion of the work required. This administrative procedure also provides guidelines for contract modification and termination.

### **Analysis and Evaluation**

Contractual agreements are subject to various BOR, UH, and UHCC System policies and procedures. UH and UHCC System staff provide oversight, ensuring that the College maintains its integrity in contractual agreements. The College monitors contracts to ensure consistency with the College’s mission statement and strategic goals. Efforts to improve institutional integrity in contractual agreements and to reduce risk to the UH System resulted in EP 8.200 on Contracts and Signing Authority that is applicable to all contractual agreements between the UH System and non-university entities. This policy went into effect November 1, 2017.

## STANDARD IV: LEADERSHIP AND GOVERNANCE

### Student Spotlight Keokolo Akina

I was inspired to take the plunge and be a part of Student Government. I think one of the most rewarding experiences was being a student representative at the many campus committees. It was such a wonderful feeling to know that the campus department heads, staff, and educators were so receptive and encouraging and took time to listen to what we had to say. I truly believe that student government played a big part in who I am today; I finally felt like I could face insecurities, challenge myself, and be open to learn from failure. Not only do I have a college education but through all those leadership skills gained, I have been able to secure a job that isn't a job at all; it's a hobby that I get paid to do.

## STANDARD IV: LEADERSHIP AND GOVERNANCE

*The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.*

### IV.A. Decision-Making Roles and Processes

#### IV.A.1.

*Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.*

#### **Evidence of Meeting the Standard**

##### **Innovation Initiatives**

Leeward Community College (Leeward CC) has formal and informal practices and procedures that encourage all campus constituents to bring forward ideas for institutional improvement.

The College's Office of the Vice Chancellor for Academic Affairs has set up Innovation Funds that provide small grants to fund innovative activities and professional development for faculty and staff ([IVA-1](#), [IVA-2](#), [IVA-3](#)). As stated in an email from the vice chancellor for academic affairs (VCAA), "Leeward Community College is committed to fostering innovation and supporting instructional improvement in the classroom to support student success. The College has set aside \$60,000 to provide support to faculty and staff members to try new strategies, implement new tools, and learn new methodologies in support of the success of our students" ([IVA-1](#)). As an example, in 2017 the Faculty Senate applied for and received funding for the \$20,328 annual campus site license to Turnitin, an online originality checking service ([IVA-4](#)).

Administrative leaders look for opportunities to encourage faculty and staff to innovate in the classroom. A recent example is the Acceleration Initiative, a system initiative that supports faculty leaders in their efforts to try innovative teaching strategies to either move students through the developmental education sequence faster or to develop a co-requisite

course to support identified students in college-level math and English courses. For a detailed discussion of the Acceleration Initiative, see Standard [I.B.6](#).

The Carl D. Perkins Vocational and Technical Education Act grants give career and technical faculty and staff opportunities to experiment with new teaching strategies and student support delivery services. These grant awards are specific to career and technical programs and encourage innovative pilot programs and strategies with initial grant funding ([IVA-5](#)). For example, the Job Prep Services received a Carl D. Perkins grant of \$51,000 to promote the use of the Job Center Online system that enables students to search and apply for job opportunities, manage multiple resumes and cover letters, and learn about career and recruiting events on campus ([IVA-6](#), [IVA-7](#)).

The College also supported a small team of faculty and staff to attend the 2014 Leading from the Middle professional development program. This team created the On Track cohort model for recent high school graduates ([IVA-8](#)). Now in its third year, the team continues to evaluate and improve the program in an effort to improve retention and completion rates.

The College rewards innovation and excellence through diverse campus and system awards. The College sponsors the Outstanding Service Award for civil service and administrative, professional, and technical (APT) employees; the Outstanding Lecturer Award for lecturers (adjunct); and the Innovative Online Teaching Award for distance education (DE) faculty. The College recognizes award recipients at the annual spring awards reception held on campus ([IVA-9](#)). The Open Educational Resources (OER) Campus Committee created an Open Educator Award to recognize faculty who promote or contribute to a culture of utilizing OER to reduce the financial burden on students and overall cost of a college education ([IVA-10](#)). The College gave this award for the first time at the spring 2018 awards reception.

The University of Hawai'i (UH) System sponsors the Regents' Medal for Excellence in Teaching for faculty, the Frances Davis Award for Excellence in Undergraduate Teaching for faculty, the Masaki and Momoe Kunimoto Memorial Award for Outstanding Contributions to Vocational Education for career and technical education faculty, the Willard Wilson Award for Distinguished Service to the University for UH System employees, and the President's Award for Excellence in Building and Grounds Maintenance for UH System employees ([IVA-11](#)).

The Wo Learning Champions, a University of Hawai'i Community Colleges (UHCC) system initiative, presents the Change Agent Award and the Community Building Award annually to recognize innovative programs at the community college campuses ([IVA-12](#), [IVA-13](#)).

The UH System's President's Emerging Leaders Program provides UH System employees with the opportunity to develop as future campus and system leaders ([IVA-14](#)). Each academic year, two Leeward faculty are nominated to participate in the program ([IVA-15](#)).

In fall 2017, the College's Innovation Center for Teaching and Learning Advisory Committee inaugurated the Kosasa Innovation in Teaching and Learning Award to support a project, event, or class activity that improves teaching, learning, or the operations of the

College. A current Leeward faculty member created and funded this program. This award encourages faculty, lecturers, and staff to find creative solutions that can make a positive difference at the College, new ways to improve the quality of services or instruction, novel approaches for completing work more effectively or efficiently, and workplace improvements that support the College's commitment to diversity, equity, and inclusion. The first recipient of this award will use the funds to redesign the Organic Chemistry laboratory sequence in order to innovate the curriculum in the field of Green Chemistry and create a safer laboratory environment at the College ([IVA-16](#)).

### **Systematic Participative Processes**

The College has established systems and participative processes for effective planning and implementation for program and campus improvement. The College builds collegiality by encouraging participation at every level from students, through faculty and staff, and up to administrative leaders. Established governance groups that contribute to participative processes include the Campus Council, the Faculty Senate, the Pūko‘a no na ‘Ewa Council (Nā ‘Ewa Council), and the Student Government.

The Campus Council serves as a recommending body to the chancellor on planning and budgeting issues. The council reviews and recommends the annual institutional budget priorities for the next academic year. The Revised Constitution and By-laws begin with a preface that states that the “Campus Council will serve as a recommending body to the chancellor for finalizing planning and budgetary matters particularly including but not limited to program reviews, area plans, budget structuring and prioritization of the College’s operational plan” ([IVA-17](#)).

The Campus Council includes 18 voting members representing all the campus constituencies. These members include division chairs and coordinators of the credit and noncredit instructional divisions and units as well as representatives of student services, academic services, auxiliary services, the Native Hawaiian Student Support Program, the Office of Continuing Education and Workforce Development, the Administrative Support (Clerical) Group, the APT Group, the Lecturers’ Group, the Nā ‘Ewa Council, and the Student Government. The Faculty Senate has two representatives on the council, typically the senate chair and vice chair. Administrators are also members in a nonvoting capacity.

The Faculty Senate is chartered by the UH Board of Regents (BOR) as the primary voice of faculty in the academic governance of the College. The Charter and Bylaws begin with a preamble stating that the “Faculty Senate provides through its Charter and Bylaws both an organizational structure and formal procedures by which the faculty of the University of Hawai‘i - Leeward Community College can carry out its collective responsibilities with administrative colleagues in reviewing, recommending, and advising on matters of academic policy that affect the College” ([IVA-18](#)).

The Faculty Senate is comprised of 22 senators elected at-large from instructional and non-instructional faculty with approximately half elected each year for a two-year term. Upon recommendation by the lecturers and approval by senate members, one lecturer may serve on the senate. One Student Government representative serves as a nonvoting member. To ensure that the senate represents all constituencies, the faculty senate chair

will solicit a recommendation for a senator to represent a constituency not represented by an elected senator ([IVA-18](#)).

The Faculty Senate has 11 standing committees ([IVA-19](#)). Membership on senate committees is open to faculty who are not senate members. Some of these committees regularly work with administration, Student Services units, and/or the Student Government to improve student learning programs and support services. The various committees present the senate with recommendations and relay resolutions to the relevant administrators through the senate chair.

The UH System is committed to serving the Native Hawaiian community. The Pūko‘a Council is the UH president’s advisory group “dedicated to increase the number of Native Hawaiian students, faculty, staff, and administrators in the university system to 23%, which mirrors the percentage of Hawaiians in Hawai‘i’s general population” ([IVA-20](#)). In order to represent the College’s Native Hawaiian interests and needs at the Pūko‘a Council, in 2002 the College established the Nā ‘Ewa Council, whose charter states it will “provide advocacy, leadership, and support for Native Hawaiians through higher education” ([IVA-21](#)).

The Nā ‘Ewa Council welcomes all faculty, staff, and students who are interested in Native Hawaiian issues and advocacy. Members and consultants draft position statements and program designs by consensus, which are taken to campus governance groups and administration as well as to the Pūko‘a Council.

The Student Government is the governing body of the Associated Students of the University of Hawai‘i-Leeward CC (ASUH-Leeward CC). The ASUH-Leeward CC Constitution begins with a preamble stating that the Student Government exists to “serve the needs, promote the welfare, encourage the active participation, and democratically represent a body of students within a curricular atmosphere” ([IVA-22](#)). The Student Government works to fulfill its mission, which is to “advocate and strive to represent the student body with leadership, honesty, and integrity while providing a positive learning experience and promoting active participation from student and the community” ([IVA-23](#)). For a more detailed discussion of ASUH-Leeward CC, see Standard [IV.A.2](#).

According to the 2016 Employee Satisfaction Survey, 61.5 percent of the faculty and staff who responded (n=200) agreed that the administrative team encourages an open exchange of ideas that foster institutional improvement. Of those surveyed, 23 percent were unsure and 14 percent disagreed or strongly disagreed ([IVA-24](#)).

To continually encourage an open exchange of ideas, the VCAA implemented Talk Story sessions (informal campus conversations) in 2016-2017 to encourage dialogue on system initiatives and critical issues for faculty and staff. These sessions will continue in 2017-2018. In addition, the College developed a format of breakout sessions at recent convocations. These breakout sessions include sessions facilitated by members of the administrative team and other campus leaders, and the sessions have been used to solicit feedback from faculty and staff as well as an opportunity for sharing ideas for improvement. For more discussion of these practices, see Standard [I.B.1](#).

When ideas for improvement have policy or significant institution wide implications, the College's Integrated Planning and Budgeting Process provides a systematic participative process. For further discussion of this planning and budgeting process, see Standard [I.B.9](#).

### **Analysis and Evaluation**

Campus leaders encourage and support innovation and institutional excellence through Innovation Funding, Perkins grants, professional development programs, and awards in excellence. The College builds collegiality by encouraging participation at every level through governance groups such as the Campus Council, the Faculty Senate, the Nā 'Ewa Council, and the Student Government, as well as the Integrated Planning and Budgeting Process.

#### IV.A.2.

*The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.*

### **Evidence of Meeting the Standard**

#### **Policies and Procedures for College Decision Making**

College policies and procedures describe the roles for each group in decision-making processes. These policies and procedures describe the official responsibilities and authority of the faculty and academic administrators in curricular and other educational matters.

The College's L1.201, Policy on Shared Governance, allows individuals and groups to provide views on issues important to them and ensures that administrative leaders demonstrate a willingness to incorporate faculty, staff, and student input into collegial decision-making especially as it relates to academic policies, procedures, and budgetary matters ([IVA-25](#)). Under shared governance, individuals and groups may voice opinions, vote, make recommendations, investigate, write reports, evaluate leaders, serve as consultants, lead forums, and attend forums. Shared governance empowers campus committees, governance groups, divisions, and units to make formal recommendations on College issues.

The College's L1.101, Policy on the Policy Development Process, requires organized involvement of all appropriate governing bodies ([IVA-26](#)). An objective of the policy is to promote shared governance by allowing administration, the Campus Council, and the Faculty Senate to review and approve all academic and non-academic policies and procedures at the College. The VCAA and the Faculty Senate review and approve all academic policies, and if an academic policy involves significant planning or budget allocations, the Campus Council also reviews and approves that policy. The vice chancellor of administrative services (VCAS) and the Campus Council review and approve non-academic policies. The chancellor provides final approval of all College policies.

The College's L4.100, Policy on Institutional Mission, specifies that the chancellor initiates the periodic review of the College's mission statement in consultation with campus governance groups. During the review, campus and community constituents can provide input. The policy states that the Campus Council, the Faculty Senate, the Student Government, and the chancellor approve the mission statement at the campus level before it is submitted to the BOR ([IVA-27](#)).

### **Evaluation of Decision-Making Policies and Procedures**

The College regularly evaluates whether policies and procedures are functioning appropriately. The Campus Council established the Shared Governance Policy Revision Ad Hoc Committee in fall 2017, which assessed L1.201. The College also established the Planning Process Review Ad Hoc Committee, a joint committee between the Campus Council and the Faculty Senate, to review and update the College's L5.202, Policy on Annual Program Review. For further discussion of this ad hoc committee, see Standard [IV.A.3](#).

### **Role of Students in College Decision-Making**

The College encourages student participation in matters that directly concern them and considers their views during decision-making. The College empowers the student voice through the Student Government, which the College's student body elects every spring semester. The Student Government Executive Board is comprised of a president, vice president, secretary, and treasurer. The Student Government also has five elected senators and one designated Wai'anae Moku Education Center senator. The Student Government represents the ASUH-Leeward CC to the campus administration and the UH System. It advocates for students' concerns and needs, and student representatives serve on a range of campus committees to ensure student input on institutional policies and plans. Its major responsibilities include the budgeting and management of the student activities fees, advocating student needs at the campus and system level, and the establishment of policies and programs for students. Student Government senators train over the summer to understand their roles as student leaders, to prepare themselves to be the voice for the students once the academic year is underway, and to learn about the campus organizational structure and the role of each campus committee. A key committee of the Student Government is the Budget and Finance Committee. This committee allocates funding for student organizations and campus divisions. Members of this committee train over the summer and review the guidelines for requesting and granting funds. During the academic year, this committee meets weekly to review funding requests.

To ensure that the student perspective is heard, student government representatives serve as members on 16 campus or system committees or groups and have voting rights in all except for the Faculty Senate ([IVA-28](#)). As voting members of various committees, student government representatives attend monthly or biannual meetings, engage in discussions, and vote on topics discussed. As a nonvoting member on the Faculty Senate and the Faculty Senate's Student Affairs Committee, the student representative attends scheduled meetings, participates in discussions, and provides feedback from a student perspective. The Wai'anae Moku Education Center's representative attends weekly student support and retention team meetings to ensure that the students' voices are heard. Student government committee representatives provide updates every week at student government senate meetings, and the secretary records the updates in the weekly minutes that are posted on the Student Life

website, the student government board outside of the office, and the Wai‘anae Moku Education Center’s bulletin board ([IVA-29](#)). Additionally, campus administrators regularly attend student government meetings and the student government president meets monthly with the chancellor to continue open dialogue and discussion.

### **Analysis and Evaluation**

The College’s policies on Shared Governance, Policy Development Process, and Institutional Mission authorize and specify procedures for administrator, faculty, and staff participation in decision-making processes. The College establishes ad hoc committees as needed to assess and update policies and procedures with respect to shared governance. The College empowers the student voice through Student Government where representatives serve on 16 campus or system committees or groups and have voting rights in all except Faculty Senate.

IV.A.3.

*Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.*

### **Evidence of Meeting the Standard**

College policies and procedures describe the roles for each group in governance, including planning and budget development. The College’s Integrated Planning and Budgeting Process, which includes program review and resource requests, is the primary method for recommending and implementing new innovations and improvements within divisions and units. As part of the process, the Campus Council serves as a recommending body to the chancellor on planning and budgeting issues. The council reviews and recommends the annual institutional budget priorities for the next academic year. For further discussion of the Integrated Planning and Budgeting Process, see Standard [I.B.9](#).

In spring 2017, the Campus Council sent out a survey to gather feedback about members’ experience in program review and the planning cycle. Eighty percent of those surveyed said that they understood how to use the data provided by the UH System. Almost 88 percent of the respondents reported that they knew how to make prioritization requests for their program or unit improvements ([IVA-30](#)).

To continually improve the College’s program review and planning processes, the Campus Council and the Faculty Senate executive members met with the College’s two vice chancellors in May 2017 to discuss the formation of the Ad Hoc Planning Process Review Committee, which is a joint committee between these two governance groups facilitated by the VCAA ([IVA-31](#)). The membership of the committee reflects individuals who are directly responsible and/or experienced in producing the Annual Report of Program Data (ARPD) and the Comprehensive Review and Evaluation (CRE). Nine of 16 members of the ad hoc committee are faculty. The committee will make recommendations for improvements on the Integrated Planning and Budgeting Process and review and update L5.202. The group will report on its progress to the Campus Council and the Faculty Senate at the end of 2017-2018.

Administrators have both formal and informal roles in governance at the College. Administrators have a decision-making role as part of their position descriptions. In terms of policy, administrators often have specific roles in the development and implementation of policy. An example is the College's L1.101, Policy on the Policy Development Process ([IVA-26](#)). This policy specifically provides approval authority to the VCAA or the vice chancellor of administrative services, depending on the type of policy being approved. As an administrator, the VCAA has responsibility for coordinating the Integrated Planning and Budgeting Process, and the VCAS has responsibility for developing and implementing the annual budget, Operating Expenditure Plan. Administrators also have an informal role in governance through their participation on Campus Council as nonvoting members and as conveners for committees that make recommendations on a range of topics. The VCAA is the convener and facilitator for the Ad Hoc Planning Process Review Committee outlined above. The VCAS convened the Sustainability Committee and continues to serve as a member in support of this cross-disciplinary group.

### **Analysis and Evaluation**

Through the policies and procedures of the integrated planning and budgeting process and governance committees, administrators and faculty have a substantive and clearly defined role in institutional governance. Administrators and faculty exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

According to the 2016 Employee Satisfaction Survey, 68 percent of the faculty and staff who responded (n=200) agreed that they participate in the planning processes of their division, department, or unit. Of those surveyed, ten percent were unsure and 17 percent disagreed. In the same survey, 57 percent of the faculty and staff who responded agreed that the planning effectively incorporates input from appropriate people or groups in the College, such as their division, department, or unit. Of those surveyed, 29 percent were unsure ([IVA-24](#)).

IV.A.4.

*Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.*

### **Evidence of Meeting the Standard**

UH System and College policies and procedures describe the official responsibilities and authority of the faculty and academic administrators in curricular and other educational matters.

Regents Policy (RP) 1.210, Faculty Involvement in Academic Decision-Making and Academic Policy Development, recognizes the critical role that faculty play in the academic governance of the UH System ([IVA-32](#)). A memorandum of agreement between the BOR and the bargaining agent for faculty, the University of Hawai'i Professional Assembly (UHPA), designates topics that the UH System will refer to faculty senates. This memorandum authorizes senates to advise campus administration on "matters impacting

and/or relating to the development and maintenance of academic policy and standards to the end that quality education is provided, preserved, and improved” ([IVA-33](#)).

The Curriculum Committee, a standing committee of the Faculty Senate, is responsible for the development, review, recommendation, and approval of new, modified, and deleted academic courses and programs. This committee suggests ways to strengthen curriculum and supports faculty in the review of new approaches to instruction. The committee’s website contains information including the formal procedures by which administration receives program, course, and other curricular matters through the Curriculum Committee and the full senate ([IVA-34](#), [IVA-35](#)). During 2017-2018, this committee reviewed 234 courses and programs. To put this in perspective, the committee reviewed 106 courses and programs in 2016-2017. Due to the enormous volume of courses and programs submitted for review, the Curriculum Committee met weekly to fulfill its obligations and ensure the Faculty Senate’s vital role in matters of curricula ([IVA-36](#)). For further discussion of the Curriculum Committee, see Standard [II.A.2](#).

The Assessment Committee, a standing committee of the Faculty Senate, reviews and makes recommendations to the Faculty Senate on policies and procedures relating to assessment. The committee also works with the administration and the Office of Planning, Policy and Assessment to facilitate the assessment process and establish a culture of assessment ([IVA-37](#)).

The DE Committee, a standing committee of the Faculty Senate, helps promote the development of DE courses to ensure that content and design are appropriate to DE delivery. This committee develops and recommends policies and procedures that provide technical and academic support to ensure success for DE students and faculty who teach DE courses. Membership consists of faculty from every instructional division who have experience teaching DE courses and at least one non-faculty member ([IVA-38](#)).

The DE Committee hosted a breakout session at the campus convocation in spring 2017 to inform faculty and staff of federal and Commission requirements regarding the definitions of DE and correspondence education and provided examples of instructor-initiated substantive interaction ([IVA-39](#)). At the convocation in fall 2017, the committee held a mandatory training session on federal and Commission requirements for faculty teaching a DE course ([IVA-40](#)). Participants at this training completed a self-evaluation survey on instructor-initiated interaction in their DE course ([IVA-41](#)). The DE Committee held additional training sessions during the fall 2017 semester at various dates and times ([IVA-42](#)). To ensure quality online courses, division chairs will refer those needing further assistance or training to their division’s DE liaison ([IVA-43](#)). In spring 2018, the DE Committee distributed a survey to faculty teaching DE courses to identify their needs. The committee will compile the results from both surveys and make general recommendations to the Faculty Senate ([IVA-44](#), [IVA-45](#), [IVA-46](#)).

Faculty Senate can have several ad hoc committees that focus on specific academic issues of short duration. Some of these committees work with administration, Student Services, and/or the Student Government to improve student learning programs and services. During 2016-2017 and 2017-2018, ad hoc committees focused on the revision of the College’s L5.201, Policy on Curriculum Review and Revision, a new course evaluation system, and an

alternative class schedule ([IVA-47](#)). The various committees presented recommendations to the senate and resolutions to the relevant administrators through the senate chair.

For example, the Faculty Senate Course Evaluation System Ad Hoc Committee has been working to ensure the College's compliance with the UH System's plans to implement the new course evaluation system for every student enrolled in a credit-based course in fall 2018. This ad hoc committee surveyed faculty and lecturers using an online ballot and shared the survey results with division chairs. To ensure full faculty input, the ad hoc committee administered a second survey through academic divisions. In spring 2018, the ad hoc committee worked with a designated campus administrator to create a central repository for existing survey questions and to arrange that these questions be accessible to faculty. The College is planning workshops for fall 2018 to train faculty on the new course evaluation system ([IVA-48](#)).

The VCAA, the dean of arts and sciences, the dean of career and technical education, and the academic coordinator of the Wai'anae Moku Education Center meet with the division chairs on a regular basis to discuss issues and concerns from their respective units at division chair meetings. Together, this group is able to serve as the liaison between their units and administration and make recommendations that directly affect student learning programs and initiatives ([IVA-49](#)).

The VCAA also meets with Student Services unit heads and Academic Services unit heads as needed to respond to curriculum-related recommendations. In 2017-2018, the implementation of the Online Five-Week Course Development Program resulted in ongoing meetings between the VCAA, division chairs, student services faculty, and academic services faculty ([IVA-50](#)).

### **Analysis and Evaluation**

Faculty Senate is authorized through UH Regent and UHPA policy to advise campus administration on matters impacting curriculum and student learning programs and services. The senate has a well-defined structure with ten standing committees responsible for recommendations about curriculum and student learning programs. Administrators, division chairs, and academic coordinators meet regularly to discuss instructional matters and work regularly with Academic Services and Student Services faculty and staff to make recommendations that directly affect student learning.

IV.A.5.

*Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.*

### **Evidence of Meeting the Standard**

The College's L1.201, Policy on Shared Governance, provides an overview of constituency roles in participatory governance processes ([IVA-25](#)). The policy guarantees that any individual or group of individuals has the right to provide their views on any issue of

importance. The policy specifies the decision-making role of faculty in areas of academic decision-making and policy development. For additional discussion of this policy, see Standard [IV.A.2](#).

Administrators are responsible for educating faculty and staff of their right to share diverse perspectives and for providing opportunities for faculty and staff to do so. L1.201 specifies that ample campus input should be incorporated into decision-making especially relating to academic policies, academic procedures, and financial and budgetary matters.

Data from the 2016 Employee Satisfaction Survey prompted the Executive Committee of the Campus Council to propose a review of L1.201 to determine if it reflects current needs, best practices, policy alignment, and Accreditation Standards. In 2017-2018, an ad hoc committee reviewed the policy and proposed amendments ([IVA-25](#), [IVA-51](#), [IVA-52](#), [IVA-53](#), [IVA-54](#)).

The College values diverse perspectives and considers those perspectives when setting institutional priorities. When decisions are contrary to the wishes of constituency groups and other recommending bodies, administrators and other decision-makers provide reasons for their decisions.

Various groups collaborate on campus improvements and document those efforts. Campus governance groups provide input based on their respective expertise and responsibilities. The Campus Council reviews non-academic policies and practices that pertain to the entire campus and then advises administration on decision-making. Examples of the Campus Council's contributions to campus improvements include discussions about revision to the College Integrated Planning and Budgeting Process, campus technology and duplicating contracts, the College's mission statement, and reviews of College policies on facilities access control and animals on campus ([IVA-55](#), [IVA-56](#), [IVA-57](#), [IVA-27](#), [IVA-58](#), [IVA-59](#)). Faculty Senate reviews academic policies and practices and then advises administration on decision-making. For example, the Faculty Senate Course Evaluation System Ad Hoc Committee has been working with administration to ensure the College's compliance with the UH System's plans to implement the new course evaluation system for every student enrolled in a credit-based course in fall 2018 ([IVA-48](#)). The Student Government reviews policies and practices that pertain to students and advises administration as needed. An example of this is their collaboration with administration to implement designated smoking areas and recycling bins. Finally, the Nā 'Ewa Council reviews policies and practices regarding Native Hawaiian issues and advises administration as needed. For example, the Nā 'Ewa Council's Ad Hoc Committee on Indigenizing Leeward is developing a biennium budget request for Hawaiian signage for division and unit offices ([IVA-60](#)).

### **Analysis and Evaluation**

The College's shared governance system ensures that the College appropriately considers the relevant perspectives of faculty, staff, and students on issues related to planning, decision-making, and curricular changes.

According to the 2016 Employee Satisfaction Survey, 59 percent of the faculty and staff who responded (n=200) agreed that their unit is adequately represented at the Campus Council

while 32 percent were unsure. When asked about participation in governance, 80 percent of the faculty and staff who responded (n=182) agreed that they participate in College committees ([IVA-24](#)). As campus leaders, the Campus Council members have the responsibility of including input and feedback from members of their constituencies.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about shared governance at the College. Participants discussed how the College meets Standard [IV.A.5](#) and how the College can improve in this area. They noted that the shared governance process is more transparent and that the VCAA shares budget priority lists. Some participants expressed interest in learning more about shared governance, perhaps with a blog or Frequently Asked Questions site ([IVA-61](#)).

IV.A.6.

*The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.*

### **Evidence of Meeting the Standard**

#### **Communication with the Campus Community about College Decision-Making**

The College has processes to document and communicate decisions throughout the institution. The College's campus communication system includes resources that are always available as well as periodic communication distributed at multiple levels. This system provides a process to document and administer communication on all decisions across the campus. It allows users to input news, events, activities, and announcements in one online form for distribution on one or more campus communication media, which includes the College website, *UH News* and the UHCC System website, on-campus digital signage system, campus bulletin, official College social media sites (Twitter and Facebook, for example), and media distribution through news releases. The College also emails the bulletin to everyone on the faculty and staff listserv and posts the bulletin on the College website.

Campus administrators present reports on new initiatives, policy changes, and issues of interest to the campus at convocation, which takes place before the start of each semester ([IVA-62](#), [IVA-63](#)). The College posts all documents shared at each convocation on the intranet for all faculty and staff to access. The VCAA holds regular Talk Story sessions on current topics that need campus discussion and input; Talk Story sessions are discussed in more detail in Standard [I.B.1](#). Additionally, the VCAA provides updates to the planning process throughout the academic year and sends email distributions of division or unit priorities ([IVA-64](#), [IVA-65](#)).

The Campus Council, the Faculty Senate, and Nā 'Ewa Council send out monthly meeting notices with an agenda ([IVA-66](#), [IVA-67](#), [IVA-68](#), [IVA-69](#)). The Campus Council webpage on the College intranet hosts agendas, minutes, and pertinent documents ([IVA-70](#)). The Faculty Senate website hosts agenda, minutes, and supporting documents in order to keep the campus community current on the business being considered ([IVA-71](#)). The Nā 'Ewa Council posts agendas and meeting minutes on the campus intranet, and the Student Government posts agendas and meeting minutes on its website ([IVA-72](#), [IVA-29](#)). Minutes from all governance meetings include records of discussions, votes, and other relevant information.

At the start of each semester, the College holds convocation at which time administrators distribute a detailed handout with updates and announcements about institutional efforts to achieve goals and improve learning ([IVA-73](#)). During convocation week, divisions and/or disciplines have meetings to discuss issues specific to them. Each semester, the UH vice president for community colleges gives a presentation to the campus on the status of system and college goals and achievements, which is also posted to the College intranet. For further discussion of the vice president's presentations, see Standards [I.B.3](#), [I.B.6](#), and [IV.D.6](#).

### **Communication with Students about College Decision-Making**

The College uses three digital messaging methods to communicate with students: an email messaging system called UH Announce, an emergency email and short message service system called UH Alert, and an early-alert retention system called Starfish to distribute various messaging to students ([IVA-74](#), [IVA-75](#), [IVA-76](#), [IVA-77](#)).

The College has used the UH Announce and UH Alert systems for several years. As part of UHCC System's Integrated Communications for Recruitment and Retention, the College launched the Starfish campaign in June 2016, which provides customized email messages to assist students from application through completion ([IVA-78](#)).

The College uses social media as an additional method to communicate with students. The College's Facebook page, Twitter account, and Instagram account are the primary digital channels used to share news, announcements, event information, and emergency messaging ([IVA-79](#), [IVA-80](#), [IVA-81](#)). The College uses the social media sites as a means for digital engagement, providing a forum for students to ask questions, connect to each other, and share concerns and comments.

The College communicates with students through weekly emails sent by the Student Life office and through updates on the Student Life website ([IVA-82](#), [IVA-23](#)). Digital signage provides reminders of Student Life activities and campus news at the Pearl City campus and the Wai'anae Moku Education Center.

The chancellor has regular meetings with executive members of Student Government. To further ensure that the student perspective is heard, student government representatives serve as members on 16 campus or system committees or groups and have voting rights in all except for the Faculty Senate. For further discussion of the role of Student Government in college decision-making, see Standard [IV.A.2](#).

The College uses UH Announce, which can be sent to all Leeward students, to disseminate the results of decisions that affect students. At the beginning of each semester, the VCAS uses UH Announce to send a recap of policies and campus announcements ([IVA-83](#)). The College sent an email message using UH Announce to inform the campus of Chancellor Cabral's impending retirement and the appointment of an interim chancellor ([IVA-84](#)).

### **Communication with the Public about College Decision-Making**

The College performs annual program reviews and publishes results on the UHCC ARPD website ([IVA-85](#)). ARPDs for each of the College's programs are available to the public. The

College requires each academic program, educational unit, and support area to complete a CRE every four years, which is available to the campus community.

The marketing staff uses social media, *UH News*, and the Leeward Communication's blog to share news and announcements with the public. The marketing staff sends news releases to the UH News distribution system, which posts articles on *UH News* (online webpages and emailed messages). News media, bloggers, and influencers also disseminate information. ([IVA-86](#)).

The homepage of the College website features Leeward Communication's blog entries ([IVA-87](#)). The posts share information, announcements, news, and feature articles. The College's social media accounts provide additional avenues to communicate with the public. Its Facebook page, Twitter account, and Instagram account are the most active of the social media accounts ([IVA-79](#), [IVA-80](#), [IVA-81](#)).

Many items shared on social media have a high engagement rate. The Facebook event post on February 21, 2018, had 2,200 views ([IVA-88](#)). The Facebook news post on December 18, 2017, had 26,000 views ([IVA-89](#)). The Facebook news post on November 27, 2017, had 1,700 views ([IVA-90](#)). The Facebook event post on November 2, 2017, reached 12,000 people with 4,600 views ([IVA-91](#)).

### **Analysis and Evaluation**

The College has an extensive communication system that ensures that the College effectively documents and communicates decision-making processes and resulting decisions. This system includes convocation, division and discipline meetings, campus intranet, emails from governance groups, the College and UHCC System websites, on-campus digital signage system, and the campus bulletin.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about campus communication and decision making at the College. Participants discussed how the College meets Standard IV.A.6 and how the College can improve in these areas. The faculty and staff recognize that the College has a decision-making process and many expressed interest in learning more about the process and possibly increasing their involvement in the process ([IVA-61](#)).

IV.A.7.

*Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.*

### **Evidence of Meeting the Standard**

#### **Evaluation of Institutional Governance and Decision-Making**

The College regularly evaluates its governance and decision-making policies and uses the results of those evaluations to make improvements, which it communicates to the campus community. For detailed discussion of how the College regularly evaluates its policies to

ensure their effectiveness, see Standard [IV.A.2](#). For further discussion of how the College communicates the results of evaluations, see Standard [IV.A.6](#).

### **Continuous Improvement of Institutional Governance and Decision-Making**

The College uses an employee satisfaction survey, which is discussed in detail in Standard [I.B.4](#), as a broad-based mechanism to evaluate its governance and decision-making procedures and processes. The College also uses this survey to evaluate its leadership roles.

According to the 2016 Employee Satisfaction Survey, 36 percent of the faculty and staff who responded (n=200) agreed that the Campus Council effectively carries out its role in governance. Of those surveyed, 55.5 percent were unsure. The survey indicated that 55.5 percent of the faculty and staff who responded agreed that the Faculty Senate effectively carries out its role in governance. Of those surveyed, 38 percent were unsure ([IVA-24](#)).

Given that 38 to 56 percent of respondents were unsure about the effectiveness of these governing groups, the chairs of the Campus Council and the Faculty Senate led a breakout session at convocation in January 2017 to solicit feedback on how to better improve the two organizations and improve communication about these governance groups ([IVA-62](#), [IVA-92](#)).

Administrative leaders discussed the results of the campus survey and determined that the Campus Council and Faculty Senate would create and administer additional surveys to gather more information from campus constituents about the integrity and effectiveness of these governance groups.

The Campus Council discussed the results of the campus survey at its meeting in February 2017 ([IVA-93](#)). During spring 2017, the council conducted its own member survey ([IVA-94](#)). According to the results, two-thirds of its membership responded that their knowledge of the council's role and function had increased during the academic year. The most common suggestions for improvement to the College's governance and planning processes included increased constituent engagement and more effective, timely communication to the campus community of the council's role and accomplishments. As a result, the council sends emails to announce their upcoming meetings, includes the agenda, and invites campus constituents to attend or contact current council members ([IVA-68](#)). Council members suggested starting in-person conversations with their constituents to solicit specific feedback ([IVA-95](#)). Additionally, because the College had not reviewed L1.201, Policy on Shared Governance, since its adoption in 2003, the council created an ad hoc committee in spring 2017 to review the policy and to propose best practices with current participatory governance practices ([IVA-25](#)).

The Faculty Senate discussed the results of the 2016 campus satisfaction survey at its August 2017 meeting and appointed the Elections Committee to design and administer its own satisfaction survey, which it distributed to the campus community ([IVA-96](#), [IVA-97](#)). In fall 2017, the committee evaluated the results (n=71) and suggested improvements ([IVA-98](#)). Results indicated that 77 percent of faculty agree that the Faculty Senate works on relevant issues and concerns. To improve faculty satisfaction, the Faculty Senate held a breakout session at convocation in fall 2017 to educate the campus community about the functions of

the senate and the issues that the senate faced the previous academic year. New and returning senators attended and were available to answer questions ([IVA-99](#)).

Survey results also indicated that 71 percent of faculty believe that the monthly blog, *News from Faculty Senate*, is an effective way to communicate with the campus. The Faculty Senate Executive Committee created the blog to increase communication about the senate and its role. According to its first posting, “Blog posts will share important news from the Faculty Senate to our core constituencies and the campus at large. This blog is not intended to replace the Faculty Senate website which is the official source for Senate meeting agendas, minutes, motions, and committee reports. Instead, this blog will serve as an up-to-date supplement sharing commentary, activities, and other news of importance to you” ([IVA-100](#)).

The Student Government consistently seeks feedback from students using a suggestion box outside of its office at the Pearl City campus and at the Wai‘anae Moku Education Center and through weekly Student Life emails indicating office hours, social media sites, and an email address for making suggestions ([IVA-101](#)). The Student Life office communicates the results of these suggestions to the campus community through email and on its website. In fall 2017, the Student Government conducted an effectiveness survey that will gain student, faculty, and staff perspectives ([IVA-102](#)). The office will share the results on the Student Life website and in an email to the campus community.

### **Analysis and Evaluation**

An employee satisfaction survey is the primary tool used to evaluate the integrity and effectiveness of the College’s governance and decision-making procedures and processes. The College shares findings from the survey with the entire campus community at convocation, and campus governance groups further discuss findings relevant to them. Administrative leaders and governance groups use these findings as the basis for improvement by collecting more data as needed, determining ways to increase constituent engagement, and diversifying communication methods.

The College demonstrates regular and thoughtful review of feedback within each of the governance bodies. The College shares results of campus surveys with the campus community at large and provides constituents an opportunity to offer suggestions for improvement. The governance bodies are currently reviewing L1.201, Policy on Shared Governance, and are encouraging all constituents to participate in the process of reviewing decision-making within a shared governance model.

## Changes and Plans Arising Out of the Self-Evaluation for Standard IV.A

<b>Accreditation Standards</b>	<b>Change or Plan</b>	<b>College Leads</b>	<b>Timeline</b>	<b>Achieved or Expected Outcome</b>
IV.A.2	Review L1.201, Policy on Shared Governance.	Campus Council	Fall 2017 - present	The revised Policy on Shared Governance has been shared with the campus. Feedback is being collected. Policy will be approved in spring 2018 or fall 2018.
IV.A.3 I.B.7	Conducted the Program Review and Planning Survey.	Campus Council	Spring 2017	Changes needed in program review and planning were identified. Ad Hoc Planning Process Review Committee was convened to make recommendations for changes.
IV.A.4 I.B.7	Reviewed L5.201, Policy on Curriculum Review and Revision.	Faculty Senate Ad Hoc Committee	Fall 2016- Spring 2017	Policy was approved in spring 2018.
IV.A.4 I.B.1 II.A.7	DE faculty attended training on faculty-initiated interaction.	DE Committee	Fall 2017- present	Faculty gained awareness of the requirements to document faculty-initiated interaction in DE courses and developed plans for integrating activities into their online course work.
IV.A.7	Conducted the Campus Council Members Survey.	Campus Council	Spring 2017	Feedback from survey used to improve Campus Council meetings and communication with the campus.

<b>Accreditation Standards</b>	<b>Change or Plan</b>	<b>College Leads</b>	<b>Timeline</b>	<b>Achieved or Expected Outcome</b>
IV.A.7	Conducted the Faculty Senate Campus Satisfaction Survey.	Faculty Senate	Spring 2018	Feedback from survey used to improve Faculty Senate meetings and communication with the campus.
IV.A.7	Created the Faculty Senate Blog.	Faculty Senate	Spring 2017	<i>News from the Faculty Senate</i> provides timely updates to the campus community.
IV.A.7	Conducted the Student Government Effectiveness Survey.	Student Life	Spring 2018	Feedback from survey used to improve Student Government effectiveness.
IV.A.3 I.B.1 I.B.7 I.B.9	Improve the Integrated Planning and Budgeting Process.	Ad Hoc Committee of the Campus Council and Faculty Senate	Fall 2017-present	The committee has begun work on recommending changes to the process and will continue their work in 2018-2019.
IV.A.3 I.B.1 I.B.7 I.B.9	Review L5.202, Policy on the Annual Program Review.	Ad hoc committee of the Campus Council and Faculty Senate	Fall 2017-present	The committee has forwarded a revised policy to Faculty Senate and Campus Council for review and approval.

## IV.B. Chief Executive Officer

### IV.B.1.

*The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.*

#### **Evidence of Meeting the Standard**

At Leeward Community College (Leeward CC), the current chancellor (college CEO) first assumed the position of interim chancellor in March 2007. In May 2008, the UH Board of Regents appointed the interim chancellor to the position of chancellor ([IVB-1](#)). He is the first faculty member of a University of Hawai‘i Community Colleges (UHCC) campus to assume the position of chancellor at his home campus and the first Native Hawaiian chancellor of the College ([IVB-2](#)). On March 29, 2017, the Native Hawaiian Education Association honored him as Native Hawaiian Educator of the Year 2017 ([IVB-3](#)). After more than 11 years, the chancellor will retire on July 1, 2018, and Suzette Robinson will assume the position of interim chancellor.

The chancellor’s duties as noted in the job listing for his position are as follows:

Under supervision of the vice president for community colleges and university president, provides leadership as the chief executive officer for the College and is responsible for the overall administration and management of the College’s instructional, student services, institutional support, academic support, continuing education and training programs and workforce development.

- Represents the University of Hawai‘i and acts on behalf of the College within the community.
- Serves as the College liaison officer to the president of the university and the president’s staff, the governing board, the vice president of community colleges, and the state legislature.
- Responsible for setting the institutional goals and mission, planning and forecasting courses of action, determining performance objectives and desirable results, developing strategies to achieve goals, allocating resources, developing policies, setting procedures, developing the budget, and so forth.
- Works with the campus program managers and various recommending and advisory groups in matters relating to the priorities for the direction of the College, especially with regard to staffing and budget planning and resource allocation.
- Responsible for the financial soundness of the College’s operations.
- Works with administrative staff members to direct, manage and supervise personnel responsible for academic and non-academic programs.
- Renders decisions on renewals, evaluations, disciplinary actions, appointments, and tenure and promotion applications.
- Establishes internal and external communication processes to handle transmittal of information.

- Articulates mission of the College to serve the campus and community at large.
- Responsible for institutional fundraising, marketing and public relations. ([IVB-4](#))

For further discussion of the selection of the chancellor and the newly drafted UHCC Policy (UHCCP) 9.210, Recruitment, Selection, and Appointment of Community College Chancellors, see Standard [IV.C.3](#).

The chancellor and his executive team regularly communicate institutional values, goals, and institutional-set standards to faculty and staff at each convocation, which is held before the start of each semester. Faculty and staff receive detailed handouts of the information covered at convocation; the College also posts the handouts on the College intranet ([IVB-5](#)). In addition to the convocation presentation, the chancellor regularly communicates updates, goals, and accomplishments to all faculty and staff through the campus electronic mailing list ([IVB-6](#)).

Through the approved Integrated Planning and Budgeting Process, the chancellor ensures that institutional research is linked to institutional planning and resource allocation. See Standard [I.B.4](#) for details.

### **Analysis and Evaluation**

The chancellor is responsible for the overall quality of every aspect of the College. The chancellor provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

According to the 2016 Employee Satisfaction Survey, 78 percent of the faculty and staff who responded (n=200) agreed that the chancellor provides effective leadership to the campus. Of those surveyed, 15.5 percent were unsure and 5.5 percent disagreed ([IVB-7](#)).

IV.B.2.

*The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.*

### **Evidence of Meeting the Standard**

The chancellor manages a team of seven executive and managerial positions and the Creative Services (Marketing and Public Relations) office ([IVB-8](#)). The chancellor maintains an open-door policy to his office and is often in communication, either in person, via phone, or via email on issues of importance with all of his administrative team. The chancellor has weekly scheduled meetings with the vice chancellor of administrative services (VCAS) and the vice chancellor for academic affairs (VCAA) and meets informally to discuss pressing issues with them on a daily basis. The chancellor has regularly scheduled monthly meetings with his entire administrative team. The chancellor delegates authority for academic initiatives to the VCAA and the administrative resources to the VCAS ([IVB-9](#), [IVB-10](#), [IVB-11](#)). The

chancellor believes in delegation of authority to the administrative team but intercedes when circumstances warrant a higher-level decision.

The chancellor makes the final decisions in the College's Integrated Planning and Budgeting Process. This process, described in Standard [I.B.9](#), incorporates assessment results into the Annual Report of Program Data (ARPD) template from all units, programs, and divisions to evaluate its programs and activities. The end result of this process is the generation of an institutional priorities list, which the College uses to establish an institutional plan. The Campus Council makes the final recommendation about the institutional priorities list to the chancellor, who has final decision-making authority on campus resource allocations.

### **Analysis and Evaluation**

The chancellor plans, oversees, and evaluates a team of seven executive and managerial positions that suit the institution's purpose and needs. The chancellor holds monthly meetings with the entire team and delegates authority for academic initiatives to the VCAA and authority for administrative resources to the VCAS.

#### IV.B.3.

*Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by: establishing a collegial process that sets values, goals, and priorities; ensuring the college sets institutional performance standards for student achievement; ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions; ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning; ensuring that the allocation of resources supports and improves learning and achievement; and establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.*

### **Evidence of Meeting the Standard**

In line with the *UHCC Strategic Directions 2015-2021* and goals, the chancellor guides the College in the annual Integrated Planning and Budgeting Process. This process is described in detail in Standard [I.B.9](#) and begins with a review of the mission statement and *Strategic Plan 2015-2021*. At an annual summer leadership retreat, the chancellor sets the focus for the coming year and initiates the annual planning process. Thereafter, campus constituents provide input into the Integrated Planning and Budgeting Process, which is driven by the College's common values, goals, priorities, and institution-set standards.

The Office of Planning, Policy, and Assessment (OPPA) provides the College with accurate data reports and facilitates program review, evaluation, and the planning process. The College integrates the data provided by the OPPA into the planning process and connects the resource request lists from the ARPD process to resource allocations. Resource requests are based primarily on program assessment and review data, such as factors indicating demand, efficiency, effectiveness, and degree completion.

The College's institution-set standards mirror the UHCC System's standards ([IVB-12](#)). See Standard [I.B.3](#) for further discussion.

The chancellor is responsible for institutional planning and supports the continual improvement of the planning process. The OPPA provides an Institutional Effectiveness Report to track progress toward campus goals and summarize the results of campus planning efforts as part of the Integrated Planning and Budgeting Process. The OPPA will also provide data and analysis to the chancellor, vice chancellors, and other campus leaders upon request.

### **Analysis and Evaluation**

The chancellor ensures the College achieves its mission through well-established policies and procedures that are collegial and evidence based. In line with the *UHCC Strategic Directions 2015-2021* and goals, the chancellor guides the College in the annual Integrated Planning and Budgeting Process. This process incorporates data driven input from all constituencies at multiple levels and is driven by the College's common values, goals, priorities, institution-set standards, and mission.

#### IV.B.4.

*The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.*

### **Evidence of Meeting the Standard**

The chancellor has responsibility to select the accreditation liaison officer (ALO). The ALO collaborates with the chancellor and facilitates the self-evaluation process. The ALO is primarily responsible for preparing the Institutional Self-Evaluation Report and guides all other accreditation efforts.

Every year, the chancellor oversees the annual reporting requirement to the Accrediting Commission for Community and Junior Colleges (ACCJC). The chancellor delegates responsibility for the Annual Report to the ALO and the Annual Fiscal Report to the VCAS ([IVB-13](#), [IVB-14](#)). The chancellor encourages administration and faculty participation on evaluation teams.

The chancellor has delegated authority for overseeing accreditation efforts to the director of planning, policy, and assessment, who works closely with the ALO. Administrative leaders ensure compliance with accreditation requirements in their respective areas and share updates with faculty and staff at convocation each semester. Through the Faculty Senate Curriculum and Assessment Committees, the faculty and staff ensure compliance with accreditation requirements regarding curriculum and student learning.

### **Analysis and Evaluation**

The chancellor has the primary responsibility to ensure that the College meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies, and oversees the annual reporting requirement to ACCJC. The chancellor selects the ALO who works closely with the VCAS. Together they create evaluation teams made up of administration and

faculty. Faculty, staff, and administrative leaders, including governance groups and program and division chairs, also have responsibility for assuring compliance with accreditation requirements within their respective areas.

IV.B.5.

*The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.*

### **Evidence of Meeting the Standard**

The chancellor ensures the College is complying with governing board policies by maintaining current knowledge of federal and state regulations, union policies and contracts, and UH System policies. Federal and state emails update the chancellor on new or revised regulations or laws as well as provide reminders on meeting compliance. The Council of Community College Chancellors meets with the UH vice president for community colleges to review compliance and state and federal laws that affect education as well as the College mission ([IVB-15](#)).

The VCAS receives updates at monthly system meetings on fiscal and Title IX regulations. The VCAS conveys this information to the campus during convocation and at various workshops and trainings throughout the year. The UH System Office of Institutional Equity created a mandatory online Title IX training that faculty and staff need to complete every two years.

The financial aid officer receives updates on financial aid regulations and ensures that all counselors are aware of new regulations.

In decision-making processes, the chancellor and the administrative team refer to UH System policies when making decisions or developing campus policies. Proposed policies must be in accordance with the institutional mission and meet applicable governing policies. They are vetted through the College's L1.101, Policy on the Policy Development Process ([IVB-16](#)).

The chancellor has various ways to ensure the College maintains effective control of the budget and expenditures. The College has employed a VCAS for over a decade who provides transparent fiscal information to the campus at every convocation and collaborates with the Campus Council and the Faculty Senate on budgetary matters. Once a year the VCAS shares the Operating Expenditure Plan with the campus in an email ([IVB-17](#)). The VCAS regularly discusses the budget with the chancellor, VCAA, deans, and the Business Office; the VCAS also discusses the budget in quarterly meetings with the Financial Management Group. The chancellor actively participates in the Campus Council, which reviews budget planning and recommends resource allocations.

### **Analysis and Evaluation**

The chancellor ensures College compliance with relevant statutes, regulations, and policies by maintaining current knowledge of federal and state regulations, union policies and contracts, and UH System policies. The chancellor maintains effective control of the budget

and expenditures primarily through the VCAS and the Integrated Budgeting and Planning Process. The chancellor and the College's administrative team ensure practices are consistent with the College's policies and mission through clearly defined processes.

IV.B.6.

*The CEO works and communicates effectively with the communities served by the institution.*

### **Evidence of Meeting the Standard**

The chancellor communicates with the communities served by the College in a number of ways. He represents the College and acts on its behalf within the community. The chancellor sends frequent emails through the facstaff email listserv sharing new partnerships and programs and utilizes social media to raise awareness across campus ([IVB-18](#)).

The chancellor connects with the community through various events like the Discovery Fair, L'ulu (Culinary Arts fundraiser), Geek Day, the Volunteer Income Tax Assistance Program, the Theatre, the annual luncheon for local high school principals, the Department of Education's Robotics Competition, and the Wai'anae Moku Education Center Graduate Recognition Ceremony ([IVB-19](#), [IVB-20](#), [IVB-21](#), [IVB-22](#), [IVB-23](#)). In 2013, Chancellor Cabral received the first Hawai'i State Science Olympiad Science, Technology, Engineering, and Math (STEM) Appreciation Award for "having the foresight to recognize the potential of the Science Olympiad program [and] how it could positively impact K-12 students and teachers throughout the State of Hawai'i" ([IVB-24](#), [IVB-25](#)). The chancellor is visible in the community and posts pictures of events on the College website and social media.

The chancellor understands his role as the spokesperson for the College and prioritizes building relationships with partners and community groups to showcase the College and educate the community about the College's goals and accomplishments. The chancellor is involved with the following partnerships and community groups:

- National Association for Community College Entrepreneurs
- Ka Lama Education Academy Advisory Board and Kululā'au (initiatives to provide teachers for the Leeward coast of O'ahu)
- Kamehameha Schools Education Council
- Lions Club, Rotary Club, and Business Clubs
- Kaua'i Filipino Chamber of Commerce
- American Association of Community College Conferences
- Hawai'i State Legislature
- Leeward CC Employers' Appreciation Dinner
- Aloha United Way
- Kauhale Youth Leadership Training
- Wai'anae Coast Comprehensive Health Center
- State of Hawai'i Department of Education partnerships
- James and Abigail Campbell Family Foundations
- Asian Pacific Islander Council
- InPEACE
- Hakuoh University

- Asian American and Native American Pacific Islander-Serving Institutions
- Military activities
- Community marches
- Neighborhood board meetings

In 2017, Kala'elo Partners, a community-focused electrical energy provider, gifted the College \$100,000 in scholarships ([IVB-26](#)). The chancellor partners with community organizations by attending meetings and community events. The chancellor actively seeks to create new relationships and cultivate existing relationships with businesses, institutions, and members of the community.

### **Analysis and Evaluation**

As the College's head representative, the chancellor works and communicates effectively with the communities served by the College. The chancellor sends frequent campus emails and connects with the broader community through numerous annual events. Understanding his role as the spokesperson for the College, the chancellor is involved in over 20 partnerships and community groups and actively seeks to create new relationships with businesses, institutions, and community members.

## IV.C. Governing Board

### IV.C.1.

*The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution. (ER 7)*

#### **Evidence of Meeting the Standard**

The University of Hawai‘i (UH) Board of Regents (BOR) is established under Hawai‘i Revised Statutes, Section 304A-104. The fifteen-member board is responsible for the general management and control of the UH System that incorporates all of public higher education, including the University of Hawai‘i Community College (UHCC) System. The regents (board members) are appointed to five-year terms (with one exception noted below) and represent either one of the four counties in the state or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the UH System. The student regent is appointed for a two-year term and may be reappointed ([IVC-1](#), [IVC-2](#)).

The governor appoints members of the BOR, who are drawn from a slate of nominees submitted by the Regents Candidate Advisory Council, and the state senate confirms them. The council consists of seven members, with four members appointed by the governor and one member each appointed by the president of the state senate, the speaker of the house, and the association of emeritus regents. The council solicits nominations for the regents, qualifies and screens the applicants, and presents to the governor a slate of nominees for each vacant regent position ([IVC-3](#), [IVC-4](#)).

The BOR bylaws include the specific organization and responsibility of the BOR and its committees for academic matters, financial oversight, and general control of the UH System. This authority is further delineated through board policies ([IVC-5](#), [IVC-6](#)). Several policies, including Regents Policy (RP) 4.201, Mission and Purpose of the University, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements ([IVC-7](#)). The BOR executes these responsibilities through regular reporting and deliberation at board and committee meetings. The BOR also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan ([IVC-8](#)).

#### **Analysis and Evaluation**

State statute establishes the governing board, which is appointed through a process of open recruitment for board member candidates followed by gubernatorial appointment and senate confirmation.

State constitution and statute establishes the authority of the BOR for the governance of the UH System, and the BOR has organized its bylaws, policies, and processes to carry out the full measure of board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.

The authority of the BOR encompasses all components of the UH System, including the UHCC System and the individual community colleges.

IV.C.2.

*The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.*

### **Evidence of Meeting the Standard**

The primary policy governing BOR interaction among board members and with the broader UH System community is RP 1.202, Relationship of the Board to Administration and University. Specifically, Section III.A.2.B of the policy states:

Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board's chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized. ([IVC-9](#))

The policy also delineates and structures the communication between the BOR and the UH System administration, including the requesting and providing of information to and from the BOR and the administration.

The BOR handbook that is made available to all incoming regents and published on the BOR website further emphasizes this policy. The handbook is based on best practices drawn from the Association of Governing Boards and includes expectations of regents, including the responsibility of individual regents to “serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree” ([IVC-10](#)).

The 2017 Board Self-Assessment includes several items focused on “acting as a unit.” Responses to the self-assessment questionnaire indicate that regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together” ([IVC-11](#), [IVC-12](#), [IVC-13](#)).

### **Analysis and Evaluation**

RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of board minutes did not disclose any instances of board members acting outside the policy guidelines.

#### IV.C.3.

*The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.*

#### **Evidence of Meeting the Standard**

As the governing body of the UH System, the BOR selects and evaluates the university president. RP 2.203, Evaluation of the President, establishes the evaluation protocols for the university president, including an annual self-assessment by the president, additional data collection by the BOR, a preliminary meeting between the BOR and the president, and a final evaluation after the president responds to the preliminary assessment ([IVC-14](#)).

There has not been a search for the UH vice president for community colleges (VPCC) since the position was re-established in 2005 and the current VPCC was appointed to oversee the reorganization of the community college system. Should the position of VPCC become vacant, the president would follow the recruitment and other procedures outlined in RP 9.212, Executive and Managerial Personnel Policies. In a two-step process that differentiates the functions of appointment and approval, the president would make a recommendation for VPCC to the BOR, which has the final approving authority for that position ([IVC-15](#)).

The VPCC manages the process for selecting the chancellor (CEO) of a college. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee, composed of representatives from various college constituencies and the community that the college serves. The VPCC solicits nominations for members of the screening committee from governance groups and determines the final composition of the committee based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of chancellors, UHCC Policy (UHCCP) 9.210, Recruitment, Selection, and Appointment of Community College Chancellors, was drafted in spring 2018, and vetted and approved by the chancellors and campus governance bodies ([IVC-16](#)). A detailed set of procedures, which has been used consistently for several years, has also been codified.

The VPCC has the authority for the appointment of the college chancellor with final approval of the appointment by the president of the university. A public announcement is made, and the selected candidate's appointment is also placed on the board's agenda to ensure that the regents are fully informed of the selection process and the selected candidate.

Regents conduct evaluations in executive session at a public board meeting with the summary results of the evaluation made public and included in board minutes. The posted agenda items and subsequent minutes for the past three presidential evaluations are provided as evidence ([IVC-17](#), [IVC-18](#), [IVC-19](#)).

The BOR delegates the evaluation of the VPCC to the university president and the evaluation of the individual college chancellors to the VPCC. Executive Policy (EP) 9.203, Evaluation of Board of Regents Appointees, and EP 9.212, Executive/Managerial Classification and

Compensation, govern the annual evaluation of both the VPCC and the chancellors ([IVC-20](#), [IVC-21](#)).

Executive policies establish an annual review of an executive's performance that includes a 360-degree assessment by the individual as well as peers, subordinates, and constituents. The individual's self-assessment also includes a review of accomplishments and goals set for the review year and the establishment of goals for the upcoming year. The supervisor and the executive being evaluated discuss the results of the evaluation, which impact both continued employment and compensation increases.

The UHCC System further refines the annual evaluation of executive personnel, including chancellors, through UHCCP 9.202, Executive Employees Performance Evaluation. This policy delineates the requirements for the respondents in the 360-degree assessment and also adds the college's attainment of its strategic goals as a component of the chancellor's evaluation ([IVC-22](#)).

The UH System office reviews the evaluation system on a periodic basis. In the 2016-2017 review, the office adopted two changes. First, the office added an additional item to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda ([IVC-23](#)). Second, the office changed the categories of performance rating to better reflect the gradations in overall performance. Each executive and managerial employee is now rated as exceptional, exceeds expectations, meets expectations, or does not meet expectations ([IVC-24](#)).

### **Analysis and Evaluation**

The procedures used to recruit and select the VPCC and the college chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The president of the university makes the final selection of the vice president, subject to approval by the BOR. The VPCC makes the final determination of the chancellor, subject to approval by the president.

The vice president and all college chancellors participate in annual evaluations involving 360-degree evaluations, assessment of goal attainment, and progress toward strategic goals. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and determine merit-based salary increases when available.

IV.C.4.

***The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure. (ER 7)***

### **Evidence of Meeting the Standard**

The autonomy of the UH System and related independent authority of the BOR is embodied in Article X of the state constitution. Section 6 of Article X specifically states:

There shall be a board of regents of the University of Hawai‘i, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawai‘i, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern. ([IVC-25](#))

In carrying out its responsibilities, the board leadership often testifies at legislative hearings on matters relating to the UH System and meets with key state legislators on various bills and budget matters. The BOR and the UH System’s administrative legislative coordinator manages these legislative communications.

### **Analysis and Evaluation**

The state constitution establishes the autonomy of the UH System. Given the authority of the legislature to enact laws of state wide concern, the BOR remains attentive to whether such laws might impede the UH System and the BOR from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for UH athletics led to extensive legislative hearings and bills introduced relating to management and control within the UH System. The BOR responded by creating an Advisory Task Group on Operational and Financial Controls Improvement to conduct its own audit of UH System operations. The task group, comprised of both regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in several areas for improvement. The BOR considered the reports and made governance and policy changes in accordance with some of those recommendations ([IVC-26](#), [IVC-27](#), [IVC-28](#), [IVC-29](#), [IVC-30](#)).

By taking the initiative to address the issues raised by the state legislature in a comprehensive and very public manner, the BOR exercised not only its responsibility for oversight and management of the UH System, but also its authority to act on matters relating to the UH System and protect the institution from undue influence and political pressure.

#### **IV.C.5.**

***The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.***

### **Evidence of Meeting the Standard**

Both by the structure of and responsibilities established for its standing committees, and by its board policies, the BOR acts to fulfill its responsibilities as the single provider of public higher education in the state. Board policies are aligned with strategic plans and both guide the UH System in fulfilling its overall mission. The role of community colleges within the UH System is further defined in RP 4.207, Community College System ([IVC-31](#)).

The BOR has modified the UH System mission statement twice in the past several years. In 2009 the regents adopted a change in the mission that made explicit the UH System's responsibility and commitment to the success of Native Hawaiian students and the desire for the UH System to be a model indigenous serving institution ([IVC-7](#)). In 2014, the regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the UH System. This subsequently led to the creation of a new policy, RP 4.208, Sustainability, illustrating the alignment of mission and policy ([IVC-32](#)). Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in RP 4.201, Section C.b, "The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality." RP 4.201, Section C.a also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements.

### **Analysis and Evaluation**

The BOR bylaws and policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system and reflect the broad compliance with the overall expectations of board management, quality control, and fiscal oversight.

IV.C.6.

*The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.*

### **Evidence of Meeting the Standard**

The BOR website includes links to the BOR bylaws and policies ([IVC-2](#)). The bylaws include sections defining the board membership and organization, the officers and duties of each officer, the standing committee structure of the BOR and the scope of each committee, the meeting requirements for both committees and the BOR, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the BOR. The bylaws also include the conflict of interest requirements for board members ([IVC-5](#)).

### **Analysis and Evaluation**

The bylaws are published and made available to the public and include all required elements of the standard.

#### IV.C.7.

*The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.*

#### **Evidence of Meeting the Standard**

The BOR reviews board policies on a staggered three-year cycle with current iterations posted at the BOR website. As a result of a recommendation from the previous institutional self-evaluation, the UH System and BOR developed and implemented the UH System wide Policies and Procedures Information System (PPIS). The PPIS documents all of the board policies and the related UH System executive policies and administrative procedures ([IVC-33](#)).

The features of the PPIS include the following:

- Description of the PPIS with frequently asked questions on the PPIS website
- Easy public access to all policies, including from the BOR website
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While board policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related board policy
- Automatic notification to interested parties of any change in policy ([IVC-34](#)).

When the UH System and the BOR implemented the PPIS in 2014, they re-codified all policies to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1 through 4, August 2018 for Chapters 5 through 9, and August 2019 for Chapters 10 through 13 ([IVC-35](#)).

The BOR began reviewing the 28 policies in Chapters 1 through 4 in summer 2017. They reviewed the policies for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. The committee made recommendations as to whether a policy would remain unchanged, be subject to editing for clarity or alignment with current practice, undergo substantive review and modification, or be repealed. Based on this assessment, the committee determined that one policy will be repealed and six will undergo substantive review. One new policy may be created. The BOR will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on November 1, 2017, and subsequently provided to the BOR at its meeting on November 16, 2017 ([IVC-36](#), [IVC-13](#)). The committee provided a further update on April 5, 2018 ([IVC-37](#)).

The review cycle for Chapters 1 through 4 began as scheduled in summer 2017 and resulted in the review of 28 policies. Six policies were substantially updated through the review process. All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as

needed. A review of board minutes confirmed that board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawai‘i Revised Statutes, the public employee collective bargaining law.

### **Analysis and Evaluation**

The board policies are publicly available through the BOR website and are managed through the comprehensive PPIS system. This system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

IV.C.8.

*To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.*

### **Evidence of Meeting the Standard**

The BOR has established strategic goals for the UH System and its component colleges in four key areas.

- Hawai‘i Graduation Initiative focusing on student success
- Hawai‘i Innovation Initiative focusing on research and innovation and commercialization of UH System research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the UH System’s role as the single system of public higher education in the state.

These key goals, endorsed by the BOR in 2015, are further articulated in and aligned with the strategic goals of the UHCC System and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures ([IVC-38](#), [IVC-39](#), [IVC-40](#), [IVC-41](#)).

The BOR regularly receives updates on the UH System’s progress in meeting these strategic goals through data on established metrics and trends and presentations at either board meetings or meetings of the academic and student affairs committee. The BOR has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the BOR has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways ([IVC-42](#)).

The BOR meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda. Leeward Community College hosted the board meeting on January 21, 2017 ([IVC-43](#)).

### **Analysis and Evaluation**

The BOR has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

IV.C.9.

*The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.*

#### **Evidence of Meeting the Standard**

All new BOR members receive a full-day orientation that consists of two major components. The first is an introduction to UH System functions, governance, and strategic directions. The second component deals with board governance, processes, ethics, and conduct. All new board members receive a copy of the BOR General Overview as a part of the orientation as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, the BOR pairs new board members with a more experienced board member, who serves as a mentor to the incoming member ([IVC-5](#), [IVC-44](#), [IVC-10](#)).

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees ([IVC-45](#)).

The BOR also organizes training for its members as a part of regular board retreats or board committee meetings. For example, during 2016-2017, the UH external auditor conducted a four-part training session for the BOR independent audit committee, drawn from the American Institute of Certified Public Accountants handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management ([IVC-46](#)). The vice president for budget and finance also provides an overview of the state budget as it pertains to the UH System ([IVC-47](#)).

#### **Analysis and Evaluation**

New board members receive a comprehensive orientation and related materials and are paired with a mentor from among the experienced board members. Attendance at national board professional association conferences and training at board meetings provides board members with professional development.

In 2017, the BOR updated its committee structure to modify the personnel committee to also include board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to board service is provided for board members.

IV.C.10.

*Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality*

*and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.*

### **Evidence of Meeting the Standard**

RP 2.204 establishes the process for board self-evaluation. In 2017, the BOR amended its bylaws to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance with explicit responsibility for managing the board evaluation process ([IVC-48](#), [IVC-49](#)).

Pertinent to the current institutional self-evaluation cycle, the BOR conducted annual evaluations since 2014 ([IVC-50](#), [IVC-51](#), [IVC-11](#)). Additionally, in 2012-2013, the BOR undertook a comprehensive audit of the UH System operations, including board functions and structure, and implemented significant changes in response to the audit recommendations ([IVC-26](#), [IVC-27](#), [IVC-28](#), [IVC-29](#), [IVC-30](#)). The BOR has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations ([IVC-52](#)).

### **Analysis and Evaluation**

The BOR uses the results of its evaluation to improve its operations. For example, in 2015 the board evaluation included an assessment of whether the board committee structure adequately aligned with the strategic directions of the UH System. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in uncoordinated conversations about student success. After debate and consultation, the BOR consolidated the three committees and focused the committee responsibilities on the student success agenda. At the same time, the BOR created a committee on research and innovation in alignment with the UH System's strategic directions ([IVC-5](#)).

While the BOR has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the BOR acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

IV.C.11.

*The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution. (ER 7)*

## **Evidence of Meeting the Standard**

Article X of the BOR bylaws establishes the conflict of interest policies and procedures for regents. Regents are informed of the ethics requirements during their initial orientation ([IVC-5](#)).

RP 2.206, Regents as Employees, also describes the conflicts of interest that may arise when regents are also active employees of the UH System and the conditions under which such regents need to recuse themselves from actions impacted by their employment status ([IVC-53](#)).

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The BOR has included an educational presentation by the State Ethics Commission executive director as an agenda item at its regular meetings ([IVC-54](#)).

## **Analysis and Evaluation**

The BOR is subject to both state ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. The BOR informs its members of the ethics requirements through their initial orientation and through regular professional development.

The BOR routinely identifies potential ethics concerns during board meetings and the regent in question is either recused from action and deliberation on the agenda item or the potential conflict is determined not to preclude participation. The UH System general counsel is available at board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for board members having acted in a manner inconsistent with the established ethics bylaws and policies.

IV.C.12.

*The governing board delegates full responsibility and authority to the CEO to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.*

## **Evidence of Meeting the Standard**

RP 2.202, Duties of the President, clearly documents the relationship between the BOR and the UH System president and establishes the authority of the president to implement and administer board policies ([IVC-55](#)).

The general policy on duties of the president is further refined in specific actions. For example, RP 9.218, Delegation of Personnel Actions, describes those hiring actions reserved by the BOR, those delegated to the president, and those that may be further delegated by the president ([IVC-56](#)).

The structure of the UH System establishes this line of authority with the UH System president and through the president to the VPCC and the individual college chancellors.

When the BOR does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. The chairperson may establish task groups upon authorization by the BOR and with such powers and duties as determined by the BOR. The tenure of a specific task group shall expire at the completion of its assigned task.

For example, the BOR formed a task group to create an Integrated Academic and Facilities Plan for the UH System ([IVC-57](#), [IVC-58](#)). The task group included both board members and UH System administrative officials. The task group held several meetings that led to the final recommendation to adopt a plan governing academic program planning and related facilities construction across the ten-campus UH System ([IVC-59](#), [IVC-8](#), [IVC-11](#)).

### **Analysis and Evaluation**

While the BOR maintains its responsibility for establishing overall strategic direction, UH System policies, and fiduciary management of the UH System, the BOR does not actively engage in direct or detailed management of the community colleges or individual campuses.

IV.C.13.

*The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.*

### **Evidence of Meeting the Standard**

The community colleges routinely inform the BOR about the status of their accreditation.

In preparation for the 2018 institutional self-evaluation report (ISER), the VPCC presented the BOR Committee on Academic and Student Affairs with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the BOR acted to create a permitted interaction group to assist in the evaluation of board-related standards ([IVC-60](#)). A permitted interaction group is comprised of a subset of the board members and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger board or one of its committees. The permitted interaction group included board leadership, the chair and vice chair of the academic and student affairs committee, and board members representing all the islands with community colleges. The VPCC provided the BOR with a further briefing on preparing for accreditation at its meeting on March 8, 2017 ([IVC-61](#)).

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017 and met with representatives from the community colleges (accreditation liaison officers and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was

provided a final opportunity to review this section, pertaining to the governing board, before the six campuses presented their completed ISERs for review by the Committee on Academic and Student Affairs, the BOR, and the UH president in early summer 2018.

### **Analysis and Evaluation**

The BOR was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

## IV.D. Multi-College District or Systems

### IV.D.1.

*In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.*

### **Evidence of Meeting the Standard**

The University of Hawai‘i (UH) System is the sole provider of public higher education in the state of Hawai‘i. Regents Policy (RP) 3.201, Major Organizational Units of the University of Hawai‘i, establishes the overall structure of the UH System. The ten-campus UH System as a whole includes the University of Hawai‘i Community College System (UHCC) System, which is comprised of seven community colleges (see Figure 9). RP 4.207, Community College System, further establishes the UHCC System. The University of Hawai‘i Maui College is accredited by the Western Association of Schools and Colleges, Senior Division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges and function as the multi-campus system now being evaluated ([IVD-1](#), [IVD-2](#)).

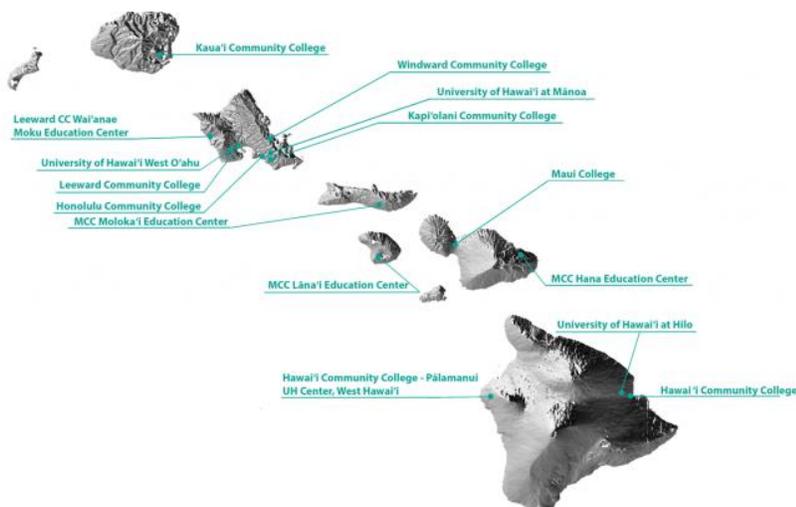

Figure 9. The University of Hawai‘i System.

The vice president for community colleges (VPCC), the chief executive officer (CEO) of the system, now provides the overall leadership of the UHCC System, an outcome of a reorganization in 2005. The VPCC is a member of the senior administration of the UH System, reporting directly to the UH System president ([IVD-3](#)). The UHCC System office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O‘ahu at a central site near the flagship campus in Mānoa. The VPCC works with an associate vice president for academic affairs and an associate vice president for administrative affairs to ensure support for the effective operation of the colleges at the system level ([IVD-4](#), [IVD-5](#)).

The VPCC further works with the chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership ([IVD-6](#)). (See also Standard [IV.D.4](#).) The chancellors may report through the VPCC to the president of the UH System for system wide policy-making and decisions affecting all campuses and to the VPCC for leadership and coordination of community college matters. This flow of communication preserves the actions of the UH Board of Regents (BOR) in supporting both individual campus autonomy and system wide coordinated operations ([IVD-7](#)).

The UHCC System's functional map summarizes the delineation of functions and the differentiation of responsibilities between system and campus level. The community colleges most recently reviewed and updated the map in fall 2017. The functional map shows alignment with both the major accreditation topics as well as the detailed parts of the Accreditation Standards ([IVD-8](#)).

### **Analysis and Evaluation**

Established policies and procedures clearly identify the positions of CEO for both the UHCC System (the VPCC) and individual campuses (chancellors) and identify their authorized roles in providing leadership at multiple levels.

#### IV.D.2.

***The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.***

### **Evidence of Meeting the Standard**

The VPCC provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office and through several bodies comprised of campus representatives.

Two associate vice presidents who coordinate centralized support services in the areas of academic affairs and administrative affairs oversee the operations of the Office of the Vice President for Community Colleges (OVPCC). The associate vice president for academic affairs provides leadership in operational policy-making pertinent to the development and implementation of UHCC System wide academic plans, goals, and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment, and policy analysis; career and technical education; and student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives ([IVD-9](#)).

The associate vice president for administrative affairs provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications ([IVD-10](#)). Facilities management is one area that requires an additional level of coordination and prioritization. The UH Office of Capital Improvements (now designated as the Office of Project Delivery), established by the BOR, manages capital improvement program (CIP) projects for all campuses. The associate vice president for administrative affairs manages general UHCC repair and maintenance and minor CIP projects, and individual colleges have responsibility for routine maintenance and health and safety issues. Individual colleges have Long Range Development Plans (LRDPs), which the UHCC and UH Systems use to develop and justify minor and major CIP ([IVD-11](#), [IVD-12](#)).

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: the Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community Council of Native Hawaiian Chairs ([IVD-13](#), [IVD-14](#), [IVD-15](#), [IVD-16](#)).

Each campus also mirrors the system-level structure in having executive leadership for academic affairs and administrative affairs. Where the associate vice president for academic affairs coordinates student services functions at the system level, the colleges maintain separate executive management for student services with either vice chancellors or deans. Vice chancellors for academic affairs, vice chancellors for administrative affairs, and vice chancellors for student affairs or deans for student services also meet with their counterparts from other campuses on a regular basis, extending the network of collaborative planning and decision-making and mutual support ([IVD-17](#)). For further discussion of the College's executive team, see Standard [IV.B.2](#).

In addition to these councils based on administrative positions, the UHCC System has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC System having joined the Achieving the Dream Initiative in 2006 ([IVD-18](#)). The system-level council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission. For a discussion of these campus-based activities, see Standards [I.B.6](#) and [II.C.5](#).

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are sustainability and distance education. Executive Policy (EP) 4.202, Sustainability, and new RP 4.208, Sustainability Policy, signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time,

recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the UHCC System level, which will require renewed and proactive commitment from the UHCC System office and the individual campuses ([IVD-19](#), [IVD-20](#), [IVD-21](#)).

### **Analysis and Evaluation**

The UHCC System is well structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC, while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the councils that meet with the VPCC, the committees of vice chancellors, and the system-level initiatives such as the Student Success Council.

IV.D.3.

*The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditures.*

### **Evidence of Meeting the Standard**

State law, primarily Chapter 37 of the Hawai‘i Revised Statutes, governs the UH System’s budget preparation and receipt of and further distribution of resources ([IVD-22](#)). The UH System provides biennial budget requests, financial plans, and program performance reports to the governor and the state legislature in odd-numbered years; the UH System may also submit supplemental budget requests to amend any appropriation for the current fiscal biennium in even-numbered years. Major organizational units, including the UHCC System, appropriate operating and CIP funds for the UH System.

The UHCC System office, under the guidance of the associate vice president for administrative affairs, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH System, the UHCC System, and the individual college strategic plan ([IVD-23](#)). The UHCC Strategic Planning Council is the primary body for ensuring system wide participation in the UHCC strategic planning process. The membership of the council includes the chancellor, faculty senate chair, and student government chair from each college and the vice president and the associate vice presidents for the community colleges ([IVD-24](#)). The council provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC strategic plan goals and objectives. UHCC Policy (UHCCP) 4.101, Strategic Academic Planning, codifies the guiding principles of the community college Strategic Academic Planning Process, which defines the role of the council. The VPCC has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges ([IVD-25](#)).

Each college develops its own budget request (as described in more detail in Standard [III.D](#)). At the UHCC System level, the seven UHCC chancellors, with support from the associate vice presidents and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level but are consolidated at the UHCC System level for purposes of further integration in the overall UH System budget, which is ultimately submitted to the state legislature.

While state general funds, allocated by the legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Each college may also generate and retain other sources of internal and extramural funds. UHCCP 8.000, General Fund and Tuition and Fees Special Fund Allocation, and UHCCP 8.201, Unrestricted Fund Reserve—General, Special, Revolving Funds guide the management of sources of funding other than general funds. Each college's budget reflects a different combination of revenue sources and expenditures; all campuses maintain the reserve required by accreditors ([IVD-26](#), [IVD-27](#), [IVD-28](#)).

Campuses have also had access to additional funds from the OVPCC and more recently from the office of the UH president, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives ([IVD-29](#)). Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. The OVPCC redistributes unallocated funds for other campus or system initiatives, such as those associated with student success.

In addition to fiscal resources, the UHCC System has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy, UHCCP 9.495, Long-Term Vacancy, created a system pool of those positions from which campuses may request reallocation based on documented need ([IVD-30](#)).

With reference to effective control of expenditures, recent actions taken between 2013 and 2016 provide an example of the controls in place to ensure accountability and sound fiscal management as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit conducted operational reviews of the Culinary Arts programs at Leeward Community College and Kapi'olani Community College. The reports identified operational and financial risks and presented recommendations relating to the inventory management, financial analysis and reporting, and other aspects of these programs. In spring 2014, the Office of Internal Audit conducted follow-up reviews to ensure implementation of recommendations ([IVD-31](#)). The Internal Audit report was on the agenda of the May 12, 2015, meeting of the BOR Committee on Independent Audit. Subsequent to

the December 15, 2016, meeting of that same committee, findings from the internal audit report were included in the UH System's Annual Report on Material Weaknesses and Fraud, presented to the 2017 state legislature ([IVD-32](#), [IVD-33](#), [IVD-34](#)). As one outcome of this case, the OVPCC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs ([IVD-35](#)).

### **Analysis and Evaluation**

Clearly established policies guide allocation of key resources particularly funding and personnel. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that the colleges use resources most effectively to support their missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

IV.D.4.

*The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.*

### **Evidence of Meeting the Standard**

The UH System has a president, a VPCC (among several vice presidents responsible for differentiated areas of UH System functions), and chancellors for each of the ten universities or colleges in the system. The VPCC is the CEO of the system of the seven UHCC campuses. Each college has a chancellor, the CEO of the institution. RP 4.207 established the community college system in 2002, although the colleges have been functioning since 1965 as part of the UH System ([IVD-2](#)). In 2005, the BOR approved the reorganization of the community college system and created the new executive position of VPCC ([IVD-36](#)). A subsequent memo to the college chancellors provided detailed organizational charts as well as a functional statement for the OVPCC ([IVD-37](#)). Key among the major functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of community college chancellors for the overall management and governance of their campuses is further affirmed in EP 1.102, Authority to Manage and Control the Operations of the Campus, which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads” ([IVD-38](#)). UHCCP 8.000 also specifies the chancellor's responsibility “to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission” ([IVD-26](#)). EP 9.112 Attachment B delegates responsibility for a broad range of personnel actions to the chancellors ([IVD-39](#)).

In line with the need for accountability in the fulfillment of their duties, chancellors and other executive-managerial personnel are subject to annual performance evaluation with final assessment by the VPCC. UHCCP 9.202, Executive Employees Performance Evaluation, thoroughly codifies this process ([IVD-40](#), [IVD-41](#)).

### **Analysis and Evaluation**

Several policy and procedural documents clearly document that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC System. The trend of delineation and delegation has generally given more autonomy to the chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

IV.D.5.

*District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.*

### **Evidence of Meeting the Standard**

The community colleges in the Hawai‘i state wide system of public higher education operate within a three-tiered system: the UH System as a whole; the UHCC System; and the individual community college campuses located on the four major islands in the state. The community colleges and the University of Hawai‘i Maui College manage satellite learning centers, providing additional outreach across the state (see Figure 9). A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

There are multiple structures in place at the UH- and the UHCC-system level that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive strategic plan that provides the conceptual guidance for mid-range planning. These currently include the *UH Strategic Directions 2015-2021*, the *UHCC Strategic Directions 2015-2021* that was developed to be aligned with the overall UH plan, and the individual campus strategic plans, developed in alignment with the UHCC plan ([IVD-40](#), [IVD-41](#), [IVD-42](#)). For further discussion of the College’s strategic plan and its alignment with the UHCC strategic plan, see Standard [I.A.2](#).

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration ([IVD-23](#)). In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the UHCC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in Standard [IV.D.3](#) ([IVD-29](#)).

Most recently, on April 20, 2017, the BOR approved the Integrated Academic and Facilities Plan for the UH System. Recognizing the critical interdependence between the academic

missions of the ten campuses and the physical and other resources required to support those missions, the plan states that it is “intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH System is addressed without undue duplication or inter-campus competition” ([IVD-45](#)). The plan provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three UH universities and the seven UHCC campuses, which function as a single major unit) and affirms the further integration of planning in noting that “the principles of this plan will be incorporated into biennium budget planning, annual operating budgets, six-year CIP plans and academic program approvals and reviews” ([IVD-45](#)).

### **Analysis and Evaluation**

The UH System, the UHCC System, and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that the UH System, the UHCC System, and the individual community colleges use as the basis of evaluating institutional and system effectiveness.

#### IV.D.6.

*Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.*

### **Evidence of Meeting the Standard**

Multiple modes and avenues of communication exist in the UH System to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the VPCC and the administrative staff in the OVPC are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH president’s senior leadership team as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the administrative representative to the BOR Committee on Academic and Student Affairs. When the colleges forward items to the BOR for approval such as strategic plans and institutional self-evaluation reports, they do so under the signature of the VPCC. In addition to publicly posted minutes of board committee and board meetings, the VPCC receives memos summarizing board-approved actions ([IVD-46](#)). The Policies and Procedures Information System notifies campuses of updates to the policies and procedures that constitute the institutional infrastructure ([IVD-47](#)).

The VPCC meets regularly with three councils representing different aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Each council documents its meetings and completes an annual self-assessment ([IVD-13](#), [IVD-14](#), [IVD-15](#)).

The VPCC makes semi-annual visits to each UHCC campus with information pertinent to both UHCC System and individual campus performance. Typically, fall semester visits focus on major initiatives and budget for the current academic year as well as campus scorecards in the context of performance-based funding based on data from the prior academic year ([IVD-48](#)). Spring semester visits generally provide a summary as well as a prospective view of upcoming work ([IVD-49](#)).

The community colleges function within a three-tiered system: The UH System, the UHCC System, and the individual community colleges. Communication between the top two tiers, the UH System and UHCC System, is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. The UHCC System is taking specific steps to improve timely access to information that documents discussion and decision-making at the system level such as agendas and minutes of councils and other deliberative bodies. The UHCC System committees will provide orientations as needed to those serving as campus representatives to system committees so they are more fully aware of their reporting duties. Additionally, the OVPCC will update its website to enhance the accessibility and currency of the information posted there.

### **Analysis and Evaluation**

Just as the VPCC serves as an important point of connection between the UH System and the UHCC System, and between the OVPCC and the individual colleges, the chancellors of the individual colleges are responsible for coordinating with the OVPCC and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC recognizes the need to maintain access to up-to-date documentation of system-level meetings and is updating its own website to ensure better access to that information.

#### IV.D.7.

*The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.*

### **Evidence of Meeting the Standard**

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to set standards of best practices and minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly

reviewed, new policies are created when needed, roles and responsibilities are delineated in the functional map, and personnel are regularly evaluated on their performance in supporting and achieving educational goals ([IVD-50](#), [IVD-51](#)).

Of specific importance in this last context is the role of the UHCC System's Strategic Planning Council, the primary body for assuring system wide participation in the UHCC strategic planning process, as codified in UHCCP 4.101. The policy identifies roles and responsibilities in the process of campus academic planning, which provides much of the critical infrastructure for the effective functioning of the colleges ([IVD-25](#)).

### **Analysis and Evaluation**

Established policies and procedures as well as documentation of governance and decision-making that operationalize those policies and procedures are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

# QUALITY FOCUS ESSAY

## Introduction

As part of Leeward Community College (Leeward CC)'s continuing efforts to improve student learning and achievement as well as demonstrate a commitment to excellence, the Self-Evaluation Core Team used the self-evaluation process to reflect on the College's successes as well as areas that need improvement. Over the course of two years, the team remained open regarding what the Quality Focus Essay (QFE) topics would be. In fact, particular effort was made to not select topic areas too early in order to allow the self-reflective nature of the institutional self-evaluation report (ISER) to uncover those larger areas of focus for the College.

In fall 2017, the first topic became clear as the campus embraced a single goal to drive campus initiatives. This goal is known as the Wildly Important Goal (WIG) and provides a unifying vision for the many campus initiatives currently underway to increase student retention.

The second topic developed out of a breakout session at the convocation in spring 2018. These breakout sessions were focused on the areas of improvement that had been identified during the writing of the ISER. One area attracted much attention, and this led to the second QFE topic that focuses on improving student learning by making outcomes assessment more meaningful for faculty and staff.

The WIG and the efforts surrounding assessment will help "provide the institution with multi-year, long-term directions for improvement of student learning and student achievement and demonstrate the institution's commitment to excellence" ([Q-1](#)).

## Action Projects

1. Increase student retention by keeping the students the College already has.
2. Improve student learning by making outcomes assessment more meaningful for faculty and staff.

***Action Project 1: Increase student retention by keeping the students the College already has. (Standard [I.B.3](#))***

## Background

The College operates as part of a community college network in the state of Hawai'i. As one of seven community colleges, and one of ten colleges in the University of Hawai'i (UH) System, Leeward CC plays a critical role in preparing students for the workforce and for transfer to a four-year college. The University of Hawai'i Community Colleges (UHCC) System coordinates the efforts of the community colleges, ensuring alignment and focused movement on key initiatives. The UHCC System has initiated several system wide projects in the past five years including a coordinated effort to accelerate students' progress through developmental education courses, the implementation of a pathway-driven registration

system, and the creation of common exploratory majors to guide students' selection of coursework. The College goals and plans are guided by these system efforts.

The core team's review of the data indicated that retention is a gap area that has shown little movement despite the implementation of these system initiatives. Additionally, faculty and staff had begun to experience "initiative fatigue" with so many initiatives needing attention. In spring 2017, the UHCC System hosted a biannual Community College Survey of Student Engagement (CCSSE) workshop. At this workshop, the College's vice chancellor for academic affairs (VCAA) met Dr. Tonjua Williams from St. Petersburg College in Florida who discussed St. Petersburg's implementation of *The Four Disciplines of Execution: Achieving Your Wildly Important Goals* by Chris McChesney, Sean Covey, and Jim Huling.<sup>5</sup> The VCAA was intrigued with the idea of focusing on one goal – one WIG. After distributing the book to administrators and campus leaders, the College selected its WIG of "Keeping the Students We Have." Specifically, the goal is to increase retention and persistence by ten percent in 2017-2018. As one faculty member commented, "It was like a breath of fresh air." The College would have one goal that drives everything it does.

The VCAA introduced the WIG to campus leaders at a leadership retreat in August 2017. A presentation on retention by Pam Cox Otto enhanced the discussion of the WIG, and the retreat concluded with an introduction of the theme for the year, "The Student Experience." The VCAA communicated the WIG to the campus community at the convocation in fall 2017.

The Counseling and Advising unit created additional goals that aligned with the WIG and created four subcommittees to develop specific strategies to pursue. One of the unit's strategies was to encourage continuing students to register for the spring 2018 semester early. The Counseling and Advising unit recruited faculty and staff to assist with this effort by creating the #IGotClass campaign. Faculty and staff wore stickers with the #IGotClass hashtag and asked their students if they had registered for upcoming classes before winter break. By registering early, students can also get their preferred courses, class times, and instructors. In one month, the campus community encouraged and assisted more than 3,100 students to register for spring 2018 ([Q-2](#), [Q-3](#)).

In addition, the College's campus co-leads for the UHCC Student Success Committee convened the WIG Design Team. The WIG Design Team is similar to a strategic planning group; it will lead and guide the College's efforts to implement the WIG and the UHCC System initiatives. The WIG Design Team is comprised of representatives from all areas of the campus. The team first convened in December 2017. By May 2018, the team completed an initial review of institutional data, identified the areas to focus on in the coming year, and created three "keys" or values that the College will use to guide future work on implementing the WIG. The team will work with existing committees and/or convene work teams as this initiative is further deployed.

### Goals and Outcomes

- Increase student retention and persistence by ten percent in 2018-2019.

---

<sup>5</sup> McChesney, C., Covey, S., & Huling, J. (2012). *The four disciplines of execution: Achieving your wildly important goals*. New York: Free Press.

- Increase the sense of belonging at the College through activities that connect and support students.
- Increase the four-year graduation rate to 25 percent by 2020-2021.

Timeline

<b>2018-2019 Strategies</b>	<b>Responsible Parties</b>
Continue to meet and develop plans for the implementing the WIG at the unit and division levels.	WIG Design Team
Evaluate #IGotClass initiative and plan for new initiatives to support the WIG in the current year.	Counseling and Advising Unit
Develop recommendations for faculty communication and actions at identified times during the semester. Based on the work of Pam Otto-Cox, this program will empower faculty and lecturers with phrases, actions, and intentions to encourage their students to improve retention and success in their classes.	Faculty Communication Committee
Create a workshop series on how the College can improve student retention by creating more student-centric learning experiences through design thinking strategies. Through participatory workshops, immersive design exercises, and presentations, faculty and lectures will learn about, experience, and practice effective, engaging teaching approaches for new and meaningful curricula.	Olin Summer Institute Team
<b>2019-2020 Strategies</b>	<b>Responsible Parties</b>
Evaluate efforts since 2017 and determine future plans for the implementation of the WIG.	WIG Design Team
Work with Student Services to further implement <i>The Four Disciplines of Execution</i> principles in the other Student Services' units including Admissions and Records, Financial Aid, Student Life, and Job Prep Services.	WIG Design Team and Student Services Unit Heads
Work with Academic Services to implement <i>The Four Disciplines of Execution</i> principles in Academic Services' units including the Library, the LRC Content Tutoring, the Writing Center, and the Kāko' o 'Ike Program.	WIG Design Team and Academic Services Unit Heads

Evaluate efforts and determine future plans for the implementation of the WIG.	WIG Design Team

***Action Project 2: Improve student learning by making assessment more meaningful for faculty. (Standard [II.A.3](#))***

Background

A second area in need of improvement is learning outcomes assessment. Since 2010, the College has made use of Tk20, which is a comprehensive online assessment planning, data management, and reporting system. In 2013, the Office of Policy, Planning, and Assessment (OPPA) created the handbook *Sustaining Assessment: Three-Year Plan to Maintain and Enhance Assessment of Learning Outcomes at Leeward Community College* to provide the campus with assessment terminology and processes and to set forth future plans for assessment at Leeward. The College made good progress with implementing Tk20 as the repository for learning outcomes assessment. However, faculty and staff did not find Tk20 intuitive or easy to use. Tk20 has become a deterrent to meaningful dialogue about assessment instead of a supportive tool.

At Leeward CC's convocation in spring 2018, faculty and staff gathered at moderated roundtable discussions to participate in conversations about the College and how it meets and can improve in various Accreditation Standards. An area that generated much discussion is assessment and Tk20. The roundtable facilitator for discussions about Standard II.A.3 noted, "A lot of the discussion centered around how TK20 wasn't very intuitive and how there should be more tutorials or training. Another area of discussion focused on mentoring or specifically, the lack of mentoring that we have at the College. We had several lecturers and tenured faculty in both sessions that mentioned the need for mentoring." Other roundtable attendees echoed the facilitator's comments in written feedback. Based on this feedback, the Self-Evaluation Core Team is setting a goal to further train faculty in assessment and Tk20 to make outcomes assessment more meaningful while at the same time have the College determine the best assessment tool to suit its needs.

To help with Tk20 training and support, the College has the Faculty Senate's Assessment Committee, which is made up of representatives from the five main organizational areas and one nonvoting representative from the administration or OPPA ([Q-4](#)). The committee's mission is as follows: "COMMUNICATE -Review and make recommendations to the Faculty Senate on policies and procedures relating to assessment. FACILITATE -Work with

the Administration and Office of Planning, Policy and Assessment to facilitate the assessment process and establish a culture of assessment” (Q-5).

The committee gives between four and seven Tk20/assessment training sessions per semester to provide faculty and staff with assistance in these areas. Additionally, the committee encourages the campus constituents to contact their assessment representative for any assistance.

In November 2017, the assessment specialist and the Faculty Senate Assessment Committee chair began a new Assessment Think Tank for the campus. This group is charged with the task of developing, recommending, and implementing concepts and strategies that will help to establish a culture of assessment that carries the College beyond the fall 2018 accreditation visit. The Assessment Think Tank works in conjunction with the Assessment Committee and serves as a voice for a much broader pool of communal stakeholders. The participants are enthusiastic about fostering wider acceptance of and engagement in the assessment process.

In March 2018, the VCAA hosted a Talk Story on assessment. At this session, participants gave feedback on how to further engage the campus in reflection and dialogue on assessment. Discussion centered on clarifying assessment terminology and having a user-friendly tool to report assessment. The assessment specialist demonstrated a prototype reporting tool he designed to collect assessment results. Participants provided additional feedback on the tool, and these suggestions will be incorporated before the tool is implemented in the fall 2018 semester as a pilot.

#### Goals and Outcomes

- Provide faculty and staff with training assessment practices by way of learning and collaborative engagement opportunities with colleagues.
- Improve quality of outcomes assessment evidence in the College’s database of assessment results.
- Increase faculty and staff satisfaction with the process for reporting assessment results.

#### Timeline

<b>2018-2019 Strategies</b>	<b>Responsible Parties</b>
Develop more individualized training sessions for faculty and staff.	Assessment Specialist and Faculty Senate Assessment Committee
Create a one-stop website for assessment policies, procedures, and tutorials.	Assessment Specialist and Faculty Senate

	Assessment Committee
Take actionable steps toward “closing the loop” within the assessment process. Align assessment data with the curriculum so assessment results are meaningful and useful. Emphasize operationalizing the data findings for effective pedagogic improvement, programmatic adjustments, and resource allocations.	OPPA and Faculty Senate Assessment Committee
Pilot an alternative assessment collection database with a clear, easy-to-use interface.	Assessment Specialist
Conduct an evaluation session on the continued use of Tk20 versus the home-grown alternative assessment collection database.	Assessment Think Tank
<b>2019-2020 Strategies</b>	<b>Responsible Parties</b>
Connect course and program assessment to ARPD with redesigned ARPD template. Train program coordinators and unit heads on how to report assessment results that support program improvements and resource allocations.	Ad Hoc Planning Process Review Committee
Fully implement the alternative assessment collection database or identified assessment software by May 2020.	Assessment Specialist
Implement initiative to create a culture of learning founded on motivational interest and active engagement.	Assessment Specialist and Faculty Senate Assessment Committee
Continue to train faculty and staff on assessment strategies that are engaging and meaningful.	Assessment Specialist
<b>2020-2021 Strategies</b>	<b>Responsible Parties</b>
Complete an evaluation of efficacy of implemented changes and identify areas of needed improvement.	OPPA
Develop a long-term plan for program review and assessment that engages the campus community and focuses on long-term goals for continuous improvement.	Ad Hoc Planning Process Review Committee

To: Accrediting Commission for Community and Junior Colleges,  
Western Association of Schools and Colleges

From: Douglas Dykstra, Chancellor  
Windward Community College  
45-720 Kea'ahala Road  
Kāne'ohe, Hawaii 96744

This Institutional Self Evaluation Report is submitted to the ACCJC for the purpose of assisting  
in the determination of the institution's accreditation status.

I certify there was effective participation by the campus community, and I believe the Self  
Evaluation Report accurately reflects the nature and substance of this institution.

## History of Windward Community College

Windward Community College (Windward CC) is located in Kāneʻohe on the island of Oʻahu at the base of the Koʻolau mountains. It primarily serves residents from Waimānalo on the East Shore to Kahuku on the North Shore. Its offerings further appeal to students throughout the University of Hawaiʻi System (UH System) and its online classes are available to students everywhere. Established in 1972, the College is situated on approximately 64 acres of land and is composed of 10 primary buildings that are either renovated former Hawaiʻi State Hospital buildings or part of the College's newer construction projects.

Situated on lush, tropical lands, the College's physical infrastructure not only supports the beauty of the surroundings, but also the strong educational foundation that Windward CC provides for the communities it serves. Most recently, the Student Support Services (Hale Kakoʻo), Hawaiian Studies (Hale Aʻo), Social Sciences (Hale Naʻauao), and Language Arts (Hale Manaleo) buildings have been renovated to create more optimal learning spaces. Our most recent new construction project, the Library Learning Commons (Hale Laʻakea), completed in Fall 2012, has become the core for many of the College's educational support and outreach activities including housing tutoring services, the Hawaiian collection, and writing, speech, and math labs. Moreover, the College has also sought to increase student persistence and retention rates by enhancing its tutoring, counseling, and student support efforts through participation in the Achieving the Dream initiative ([I-1](#)), University of Hawaiʻi Community College (UHCC) Student Success Initiative ([I-2](#)) and in federal programs such as Upward Bound Educational Support Services ([I-3](#)) Educational Talent Search ([I-4](#)), and Student Support Services ([I-5](#)).

### Recent Major Developments

In order to attract more students, Windward CC has expanded its curricular offerings, distance education opportunities, classroom space, student support services, and offered significant coursework at target high schools to better serve the local community, the State of Hawaiʻi, and others living outside the State. The College has also embraced pedagogical innovations, including learning communities and supplemental instruction, as well as added new forward-thinking disciplines such as Creative Media.

The College has developed the following degrees and concentrations from 2012-2017:

- Associate of Arts in Liberal Arts ([I-6](#))
- Associate in Arts in Hawaiian Studies ([I-7](#)).
- Associate in Arts degree in Liberal Arts with a concentration in Visual Arts ([I-8](#)).
- Associate in Arts degree in Liberal Arts with a concentration in Performing Arts ([I-9](#), Fall 2018).
- Associate in Science in Natural Sciences with a concentration in Biological Sciences ([I-10](#)).
- Associate in Science in Natural Sciences with a concentration in Physical Sciences ([I-11](#)).
- Associate in Science in Natural Sciences with a concentration in Engineering ([I-12](#)).

- Associate in Science in Natural Sciences degree with a concentration in Pre-Computer Science ([I-13](#)).
- Associate in Science in Veterinary Technology ([I-14](#)).
- Certificate of Achievement in Veterinary Assisting ([I-15](#)).
- Certificate of Achievement in Agripharmatech ([I-16](#)).
- Certificate of Competence in Information Security ([I-17](#)).

These offerings enable students to earn associate degrees and certificates, which grant them the opportunities to develop basic skills, transfer to Hawai‘i and nationwide baccalaureate institutions, and gain career and technical proficiency to become active members of a global society.

### **Meeting Distance Education Needs**

Distance learning provides students with access to education through a network of various technologies. Instructor and students interact at a distance without having to be physically present in the same location. Distance learning provides students greater flexibility in achieving their educational goals through audio, video, and computer technologies ([I-18](#), [I-19](#)).

Although the seven UHCCs were originally envisioned to serve defined local populations, that perception has changed as each campus has created unique classes and programs that are in demand throughout the State. Owing to the geographic separation of campuses, commuting between UHCCs can be economically and logistically unfeasible. As a result, most of the UHCCs have developed a robust Distance Education curriculum.

Working collaboratively, the UHCC System offers courses leading to an Associate in Arts degree through cable TV, the Internet, and interactive television. Students may choose to earn their AA degree through a combination of distance delivered and on-campus courses. Windward CC is no exception. In AY 2015-2016, the campus offered 120 classes online ([I-20](#)), and almost 30% of registered students are home-based on other campuses ([I-21](#)). These large enrollment numbers challenge us to manage and provide quality services but also benefit the campus by allowing Windward CC to offer more sections of high-demand courses and a fuller curriculum than what might be expected of other small community colleges. This is the basis for the Distance Education Student Achievement Quality Focused Essay.

Windward CC has also led the System in converting its highly popular Certificate of Achievement (CA) in Veterinary Assisting, into a hybrid delivery format for residents of the Neighbor Islands. Students in this program complete lecture classes online and satisfy hands-on portions of the program by participating in fast-track labs which are held at satellite facilities outside of O‘ahu ([I-22](#)). The hybrid CA program was offered on the island of Maui in AY 2015-2016 and is being offered on Hawai‘i Island in AY 2017-2018. Demand for hybrid-delivered programs is growing; a total of 15 students (75% program capacity) enrolled in the Veterinary Assisting program on Maui, and, the following year, 20 students (100% capacity) have enrolled on Hawai‘i Island. As a result of this, the College is evaluating the efficacy of converting other degree and certificate programs to a DE format.

Therefore, to accommodate the high demand for DE classes, the University of Hawai‘i has devoted substantial resources to support distance education. Technology support is shared by the UH System for major enterprise systems and for the UH technical infrastructure and by the colleges for on-campus support for students and staff using college technology resources. The UH System has also created a very high-speed digital network connecting all campuses, learning centers, libraries, and DOE schools.

To ensure equal access for these students, the College and UHCC System have acquired several resources, including:

- Laulima and Canvas Learning Management Systems ([I-23](#)).
- BrainFuse online tutoring system ([I-24](#)).
- Distance Education Proctoring Services ([I-25](#)).
- Blackboard Virtual Classrooms ([I-26](#)).
- HITS Classroom ([I-27](#)).
- Web Access to Online Library Resources ([I-28](#)).

The UHCC community colleges assess all of their internal campus networks to assure that they provide the required high-speed connectivity to the teaching and learning space, to the business operations, and to the students in general. Necessary upgrades are implemented based on this assessment.

The College also assesses its delivery of DE education through SLO analysis ([I-29](#)), student engagement surveys ([I-30](#)), departmental reports and program analyses ([I-31](#), [I-32](#), [I-33](#)). Currently, success rates for online classes (65%) are slightly lower than that of conventional face-to-face classes (70%; [I-32](#)), though in the area of Veterinary Technology, online success rates actually surpass face-to-face classes ([I-31](#)). In instances when these analyses uncover deficiencies, faculty and staff can request additional DE resources via the Planning and Budget Process ([I-34](#)). See section III.B.3 for more details on this process. The Distance Education Student Achievement Quality Focused Essay is the Colleges attempt to remedy the lower success rates ([I-35](#)).

### **The Students Windward Community College Serves: Student Trends**

By State law, Windward CC has an open-door admission policy that includes, but is not limited to, residents who have completed high school or who are 18 years of age or older. In its 45 years, Windward CC has grown from a small collection of aging buildings that were once the home of the Hawai‘i State Hospital into a vibrant community college that meets the educational needs of its students, specifically in terms of degrees and transfers, and reaches out to the community with events and performances at the Palikū Theater ([I-36](#)), Imaginarium ([I-37](#)), Gallery ‘Iolani ([I-38](#)), and the Ho‘olaule‘a festival ([I-39](#)).

The College also participates in programs that extend College access to high school students, non-resident members of the military, international students, and other non-residents. Outreach efforts are focused on the Windward side of O‘ahu, with special attention paid to underserved and minority populations. The College’s institutional mission and values ([I-40](#)) mirror the communities that it serves as shown in the Community College Survey of Student

Engagement results (I-30), and the diversity of its students, as shown in Table 1 below, is representative of the Ko‘olau districts of O‘ahu.

Nonetheless, enrollment at Windward CC has decreased from a headcount of 2741 students in Fall 2012 to a headcount of 2511 in Fall 2016 (See Table 1), mostly because the economic conditions of the area have improved. This headcount is still significantly higher than historical headcounts.

## Major Demographic Trends

The mean age of our students is 25 with the median age being 25 ([I-41](#)). Students primarily are from the two Ko‘olau districts of O‘ahu as defined below. Table 1 above shows that the student body at Windward CC is diverse. In Fall 2016, Native Hawaiians (NH) comprised the largest percentage of any race or ethnicity (41%). In addition to NH, Windward CC’s student body consisted of 19% Asian, 18% Caucasian, 16% 2 or more races, 2% Hispanic, 1% Pacific Islander, Black, Alaskan/American Indian and Other/Unknown students. On average, 62% of students are female while 38% are male, and 35% receive Pell Grants, pointing towards relatively high levels of financial need. When comparing these demographics with those of Honolulu County, Windward District ([I-42](#)), they are representative. albeit a bit higher, for some ethnicities and a bit lower for others. The need to appropriately serve the Native Hawaiian population is noted in our mission and strategic plan, and is reflected in our Quality Focus Essay on Native Hawaiian Student Achievement Parity.

According to the 2016 US Census American Community Survey, ([I-43](#)), the demographics of the Kāne‘ohe area indicate an older population. This may be one of the reasons why

Windward CC has a majority of students over 25 years old. This MAPS Table (I-44) shows that the number of students who enter directly from high schools has gone down during the reporting period. Windward CC is trying to reverse this downward trend through its Early College, Upward Bound, and recruitment programs described in Standard II.C.3.

Table 1 above also shows that the percentage of Windward CC’s students enrolled in 12 or more credits per semester has fluctuated during the reporting period. In Fall 2012, 47% of students enrolled in more than 12 credits per semester, whereas in 2016, 51% were enrolled in more than 12 credits per semester. This increase in the percentage of full time enrollment may be due to the UH System 15 to Finish (I-45) initiative that encourages students to graduate in 2 years. Promoting full-time and higher course loads has also been a feature of several initiatives at Windward CC such as Hūlili (I-46) and Paipai o Ko‘olau (I-47), which are discussed in detail in Standards I.B.1 and II.C.2. As discussed in detail in Standards II.A.6 and II.C.2, Windward CC has also embraced dedicated student success pathways in STAR (I-48) and advised students accordingly.

### The Community Windward Community College Serves: The Ko‘olau Regions

The windward side of O‘ahu is made up of two districts: Ko‘olauloa (long Ko‘olau) to the north, and Ko‘olaupoko (short Ko‘olau) to the south. These districts are bordered on the west by the entire ridge of the Ko‘olau Mountain range. Ko‘olaupoko extends from Makapu‘u Point on the southeast to Ka‘ō‘io Point on the north. Included within the Ko‘olaupoko district are the largest Windward towns of Kāne‘ohe, Kailua, and Waimānalo. Ko‘olauloa extends from Ka‘ena Point to Kahuku Point, and includes Kahuku, Laie, and Hale‘iwa.

**Table 2: Ko‘olaupoko Median Age: 2016**

## Presentation of Student Achievement Data and Institution-set Standards

As described in detail in Standard I.B.3, Windward CC follows University of Hawai'i Community College (UHCC) Policy 4.203 ([I-58](#)) on Institution-Set Standards for student achievement. The policy requires each standard have a baseline level of achievement and an aspirational target that aligns with strategic plan targets and are valid across programs and courses no matter what the modality of instruction.

The eight strategic plan targets are: Course Completion, Degrees and Certificates Awarded, Native Hawaiian Degrees and Certificates Awarded, Pell Recipient Degrees and Certificates Awarded (see table 10), Transfer to Baccalaureate Institutions (see tables 11 and 12), Integrated Postsecondary Education Data System (IPEDS) and Student Success Rate (see tables 11 and 12). Licensure and Certification Examination, and Job Placement baseline and aspirational targets are available on pages 4-7 of Policy 4.203 ([I-58](#)).

**Table 10: Windward Community College Degrees and Certificates Awarded Fiscal Year**

Data Source: ODS - IRAO Freeze Tables - IRO\_DEGREE\_UH, EOS, MTT\_ACCOUNT\_DETAIL (Pell received with 'WPEL' - Win Fed Pell Grant only)

Windward CC has met its graduation metrics for performance based funding from the UHCC System and UH System as discussed in Standard III-D until this year. The College is trying to remedy this situation with its Quality Focused Essay on Native Hawaiian Student Achievement Parity. Enrollment also decreased during this period and that trend appears to be continuing to the 2017 academic year.

**Table 11: IPEDS Graduation and Persistence Rates  
Fall 2012 Cohort**

Windward Community College - Fall 2012 Cohort	Percentage
<b>Graduation Rate – 150% of normal time to completion</b>	17%
<b>Gender</b>

Student who did not receive either a Pell Grant or a subsidized Stafford Loan	23%
<b>Persistence Rate – Still Enrolled after 150% of normal time</b>	14%
<b>Transfer Out Rate</b>	16%

A pound sign (#) denotes any cohort/subcohort with fewer than 10 students.

This information is provided for the Student Right-to-Know Act, Public Law 101-542. It provides a partial description of the graduation and enrollment patterns of students. It should not be used to infer or predict individual behavior.  
Institutional Research and Analysis Office, University of Hawai'i, February 2016

Table 11 above shows that Windward CC's IPEDS Student Success Rate (Graduation in 150% of normal time to completion) was 17% in 2015. Table 12 below shows that the

Success Rate dropped to 16% in 2016 primarily because 3% more of Windward CC's students transferred out.

**Table 12: IPEDS Graduation and Persistence Rates

A pound sign (#) denotes any cohort/subcohort with fewer than 10 students.

This information is provided for the Student Right-to-Know Act, Public Law 101-542. It provides a partial description of the graduation and enrollment patterns of students. It should not be used to infer or predict individual behavior.

Institutional Research and Analysis Office, University of Hawai'i, February 2017

Most students enrolled at Windward CC complete the classes that they enrolled in. However, Table 13 below shows that the rate has modestly decreased since 2013. Windward CC is trying to mitigate this by providing more proactive advising, Supplemental Instruction, and other interventions that will help students stay enrolled as discussed in Standards IIB and II.C.

*ODS - IRAO Freeze Tables - IRO\_REGS\_UH (CENSUS), OVPCC\_DIAD\_SEMESTER*

*ODS - IRO\_REGS\_UH (End of Semester)*

Persistence from semester to semester is an important factor when measuring the success of an educational institution. As seen in Table 14 below, our persistence rates have remained fairly consistent with a 2-3% drop in 2015. Native Hawaiian and students of 2 or more races, as well female students display larger decreases than Asian, White and male students. This data helped to inform our decision to center one of Windward CC's Quality Focus Essays on Native Hawaiian Student Achievement Parity. Furthermore, students taking one or more totally online distance education class(es) persist at a lower rate than those taking face-to-face classes. This and lower student achievement scores and SLO assessments by students taking online classes has led to Windward CC's other Quality Focused Essay (QFE) centered on Distance Education Student Achievement Parity. Both QFEs are attached to this report.

## **Organization of the Self Evaluation Process**

### *Accreditation Steering Committee*

- Jan Lubin, Assistant Professor, Director of Planning and Program Evaluation, Accreditation Liaison Officer, Accreditation Steering Committee Convener.
- Douglas Dykstra, Chancellor.
- Ardis Eschenberg, Vice Chancellor for Academic Affairs, editing and Co-lead Native Hawaiian Student Parity in Student Achievement.
- Amy Rozek, Vice Chancellor for Student Affairs, Co-lead Native Hawaiian Student Parity in Student Achievement, editing.
- Brian Pactol, Vice Chancellor for Administrative Services, editing.
- Michael Moser, Director Office of Career and Community Education, editing.
- Charles Sasaki, Dean of Academic Affairs, Division II, Co-lead Parity in Distance Education and Face-to-Face Student Achievement Quality Focus Essay, editing.
- Colette Higgins, Dean of Academic Affairs, Division I, Co-lead Parity in Distance Education and Face-to-Face Student Achievement Quality Focus Essay, editing.
- Sarah Sur, Head Librarian, Ke Kumu Pali (Native Hawaiian Advisory Board) Chair, Co-lead Native Hawaiian Student Parity in Student Achievement.
- Robert Barclay, Professor, English, Editor.
- Laura Sue, Instructor, Documentarian.
  
- Nalani Kaun, Institutional Analyst, Standard I, Writer.
  - Kahea Tani, Secretary.
  - Erin Mattos Harrell, Secretary.
  - Makaanani Sala, Instructor, Hawaiian Studies.
  - Mark Hamasaki, Professor, Art and Humanities Department Chair.
  - Kamuela Kimokeo, Instructor and Director of the Hawai'i Music Institute.
  - Michael Kato, Instructor, Computer Science.
  - Leighton Villa, Title III Evaluator.
  - Kalawaia Moore, Assistant Professor, Hawaiian Studies.
  - Ivan Wu, IT Specialist
  - Michael Moser, Director Office of Career and Community Education
  - Dorene Niibu, Chancellor's Secretary.
  - Robert Barclay, Professor, Language Arts.
  - Bonnie Beatson, Director, Marketing and Publications.
  - Jamie Boyd, Associate Professor and Health Programs Coordinator, Office of Career and Community Education.
  - Ardis Eschenberg, Vice Chancellor for Academic Affairs.
  - Kathleen French, Associate Professor, Sociology.
  - Sam Geiling, Assistant Professor, Animal Science.
  - Colette Higgins, Dean of Academic Affairs, Division I.
  - Jeff Hunt, Director, Office of Institutional Research
  - Jan Lubin, Director, Office of Planning and Program Evaluation.
  - Kacie Nishioka, Facilities Specialist.
  - Frank Palacat, D.Ed, Associate Professor, Psychology and Social Science Department Chair.

- Dawn Poh, Health Programs Manager .
- Amy Rozek, Vice Chancellor for Student Affairs.
- Tara Severns, Professor, Librarian.
- Lance Uyeda, Associate Professor, English and Curriculum Committee Chair.
- Kathleen Zane, Counselor.
  
- Kathleen French, Associate Professor, Sociology, Standard IIA Writer.
  - Christine Pang, Secretary.
  - Sara Hadmack, Associate Professor, Religion.
  - Kimberlee Bassford, Instructor, Creative Media Chair, and Ka ‘Ohana Faculty Advisor.
  - Kevin Morimatsu, Evaluation and Curriculum Specialist.
  - Susan St. John, Instructor, Language Arts.
  - Christian Palmer, Instructor, Social Sciences.
  - Jean Okumura Professor, Math-Business Department Chair.
  - Clayton Akatsuka, Professor, Math.
  - Malia Lau Kong, Associate Professor, History.
  - Jody-Lynn Storm, Assistant Professor, Math.
  - Jenny Kelly, Assistant Professor, Animal Science and Veterinary Technology Program Director.
  - Kathy Helfrich, HINET Student Support Specialist.
  - Lisamarie Bensman, Instructor, Psychology
  - Michael Moser, Director Office of Continuing and Community Education
  - Charles Sasaki, Dean Division II.
  - Hong Wei Li, Instructor, Microbiology.
  - Kalani Meinecke, Professor, Hawaiian Language.
  
- Tara Severns, Professor, Librarian, Standard IIB and IIIC, Writer.
  - Dani Carico, Instructor and Veterinary Assisting Online Coordinator
  - Pavica Srsen, Instructor, Oceanography.
  - Annette Priesman, Instructor and Writing Center Coordinator.
  - Sarah Sur, Head Librarian and Ke Kumu Pali (Native Hawaiian Advisory Board) chair
  - Kevin Takayama, Instructor, Math.
  - Christy Lawes, Librarian, Access Service Manager.
  - Akiko Swan, Lecturer, Language Arts.
  - Soledad Lencinas, Librarian.
  - Scott Sutherland, Ho‘onui ‘Ike (Peer Coaching) Coordinator - Title III
  - Ku‘ulei Miranda, Native Hawaiian Counselor.
  - Anne Lemke, Disability/Admissions and Early Admit and Running Start Counselor.
  - Jenny Webster, Instructor, Language Arts.
  - Mike Tom, Professor, Computer Science and Computing Services Coordinator.
  - Elizabeth Ratliff, Associate Professor, Media Specialist.
  - Carolyn Yamada, Marketing Specialist, Office of Career and Continuing Education.

- Pearl Nakagawa, Institutional Support, Office of Career and Continuing Education.
  - Jesse Soileau, Academic Support, Testing Center.
  - Brian Tokuda, IT Specialist.
  - Alex Parisky, Title III STEM Developer.
  - Audrey Badua, Instructor, Speech.
  - Mariko Kershaw, Assistant Professor and Technical Services Librarian.
  - Dorene Niibu, Chancellor's Secretary.
  - Amelia Shibata, Institutional Support, Business Office.
- Kathleen Zane, Assistant Professor, Counselor, Standard IIC, Writer.
    - Christine Akiona, Secretary.
    - Cyndy Masatsugu, MySuccess Point of Contact.
    - Sarah Akina, Paipai Project Director.
    - Ha'aheo Pagan, Pu'uhonua, Project Director.
    - Kirk Ishida, College Planning Advisor, TRiO, Educational Talent Search.
    - Heipua Ka'opua, Professor, Academic Counselor.
    - Gina Lewis, Learning to Grow.
    - Danielle Grimes, Student Services Specialist.
    - Carla Rogers, Student Parent Counselor.
    - Jordan Lewton, Evening and Online Coordinator.
    - Puanani Kama, Hānai a ulu Child Care Center, Director.
    - Patti Chong, Professor, Counselor.
    - Koren Fiefia, Early College Counselor.
    - Amy Rozek, Vice Chancellor for Student Affairs.
    - Gwen Demitria De Leeuw, Upward Bound Program Assistant.
    - Kayleen Sur, Upward Bound Guidance Advisor.
    - Wendy Mow-Taira, Director, TRiO Educational Talent Search.
    - Matt Chong, Assistant Data Analyst.
    - Ka'ahu Alo, Counselor.
    - Kathy Helfrich, HINET Student Support Specialist.
    - Michael Moser, Director, Office of Continuing and Community Education.
- Ross Langston, Ph.D, Associate Professor, Biology, Standard IIIA and B, Writer.
    - Colleen Watanabe, Office Assistant, Academic Affairs.
    - Carol Okimi, Secretary.
    - Jane Uyetake, Coordinator, Office of Continuing and Community Education.
    - Michelle Matsumoto, Human Resources Specialist.
    - Jake Hudson, Instructor, Coordinator NASA Flight Training AEL, and Imaginarium Technician.
    - Tom Doi, Assistant Professor, Counselor.
    - Andy Li, Facilities Manager.
    - Dave Krupp, Professor, Biological and Marine Sciences and Natural Sciences Department Chair.
    - Angela Choy, Learning To Grow Senior Outreach Program Specialist
    - Stacie Sato, Personnel Officer.
    - Laura Sue, Instructor, Computer Science.

- Bryce Myers, Instructor, Art.
- Kacie Nishioka, Facilities Specialist.
- Dorene Niibu, Chancellor's Secretary.
- Michael Moser, Director, Office of Continuing and Community Education.
- Leticia Colmenares, Ph.D, Professor, Chemistry, Standard IIID, Writer.
  - Elizabeth Hale, Cashier.
  - Sean Moroney, Lecturer, Astronomy.
  - Tatiana Santiago, Early College Counselor.
  - Sharon Nakagawa, Fiscal Administrator.
  - Kawai Shapiro, Office Assistant, Business Office.
  - Allison Beale, Lecturer, Pharmacology.
  - Laura Hashimoto, Administrative Associate, TRiO, Educational Talent Search.
  - Brian Pactol, Vice Chancellor for Administrative Services.
  - Wendy Yamamoto, Secretary.
  - Ardis Eschenberg, Vice Chancellor of Academic Affairs.
  - Dorene Niibu, Chancellor's Secretary
  - Donna Camvel, Lecturer, Hawaiian Studies.
- Frank Palacat, D.Ed, Associate Professor, Psychology and Social Science Department Chair, Standard IV, Writer.
  - Sam Geiling, Assistant Professor, Animal Science.
  - Navtej Singh, Associate Professor, Math.
  - Karla Silva-Park, Instructor, Mental Health Counselor.
  - Jan Lubin, Assistant Professor, Director of Planning and Program Evaluation.
  - Kehau Iwashita, Title III Administrative Coordinator.
  - Dorene Niibu, Chancellor's Secretary.

### **Organizational Information**

As shown in Standard III.A and Standard IV, Windward CC is a semi-autonomous college in the University of Hawai'i System ([I-59](#)) with sufficient administrators, faculty, and staff. The College is subject to the authority of the vice president for community colleges (VPCC) ([I-60](#)), the UH System president ([I-61](#)), and the Board of Regents of the University of Hawai'i (UH BOR) ([I-62](#)), a state-appointed board that governs all 10 campuses in the UH System. It is committed to continuous improvement based on a variety of feedback measures and a commitment to shared governance as shown in its Organizational Chart ([I-63](#)) which includes each major function and title of the individuals holding each position.

### **System-College Functional Map**

The governance structure of the College and both the UH and UHCC Systems is based on a commitment to shared governance and transparency, balancing the need for broad input and for effective administrative oversight and responsibility. As discussed in Standard IV, the Functional Map ([I-64](#)) shows the degree to which each unit is involved as related to the Standards.

## **Certification of Continued Institutional Compliance with Eligibility Requirements**

### ***1. Authority***

Windward CC is in compliance with Eligibility Requirement 1: Authority. Windward CC is in its 44th year of service, is accredited by the Accrediting Commission of Community College's (ACCJC) ([I-65](#)) of the Western Association of Schools and Colleges (WASC) ([I-66](#)), and is recognized as an accredited 2-year community college by the UH System, UHCC System, the United States Department of Education (USDOE) ([I-67](#)), and the Veteran's Administration (VA) ([I-68](#)).

The College was first accredited by the ACCJC of the WASC in 1977 and has been fully accredited since that time. The College has the authority to award degrees and certificates under the auspices of the UH BOR.

### ***2. Operational Status***

Windward CC is in compliance with Eligibility Requirement 2: Operational Status. Windward CC was first accredited in 1977 and has maintained continuous accredited status ever since. Students are enrolled full-time and part-time in credit and noncredit programs. All courses offered at the College are published in the credit and noncredit schedule of classes and are posted on the College's website.

### ***3. Degrees***

Windward CC is in compliance with Eligibility Requirement 3: Degrees. The College's credit and noncredit offerings combine a global approach to learning with a particular sensitivity to Hawaiian values that connects liberal arts with career exploration, technological skills and literacy, and community involvement.

The College currently offers four Associate of Arts (AA) degrees: an AA degree in Liberal Arts (I-6), which is the primary transfer degree for students moving on to 4-year colleges, as well as an AA degree with concentrations in Visual Arts (Fall 2018) (I-7), an AA degree in Performing Arts (Fall 2018) (I-8), an AA degree in Hawaiian Studies (I-9), an Associate of Science (AS) degree in Natural Sciences (ASNS) with concentrations Biological Sciences (I-10), Physical Sciences (I-11), Pre-Engineering (I-12), and Pre-Computer Science (I-13) degree, and an AS degree in Veterinary Technology (I-14).

In addition to the associate degrees, the College offers the following certificates:

- **Certificate of Achievement (24 to 45 credits):**
  - Veterinary Assisting ([I-15](#)).
  - Agripharmatech ([I-16](#)).
- **Academic Subject Certificates (12 credits or more):**
  - Art: Drawing and Painting ([I-69](#))
  - Bio-Resources and Technology: Bio-Resource Development and Management ([I-70](#)).
  - Business ([I-71](#)).

- Hawaiian Studies ([I-72](#)).
- Psycho-Social Developmental Studies ([I-73](#)).
- **Certificates of Competence (4 to 10 credits):**
  - Agricultural Technology ([I-74](#) stopped out August 2016).
  - Plant-Food Production and Technology ([I-75](#)).
  - Sustainable Agriculture ([I-76](#) stopped out August 2016)
  - Web Support ([I-77](#)).
  - Information Security ([I-17](#)).
- **Other**
  - Marine Option Program ([I-78](#)).
  - Certified Nurse's Aide (non-credit [I-79](#)).
  - A planned certificate in Creative Media ([I-80](#)).

Students enrolled full-time can complete the degree requirements in two academic years and a certificate in less time. Details on graduation unit requirements ([I-81](#) pp. 38-39), scholarships ([I-81](#) p. 22), competencies ([I-81](#) pp. 29-32), residency ([I-81](#) pp. 10-11), and course descriptions ([I-81](#) pp. 58-128) are included in the Windward CC Catalog ([I-81](#)). Additional information regarding transfer ([I-81](#) p. 29), major departmental requirements ([I-81](#) pp. 38-57), and courses that satisfy lower-division general education requirements ([I-81](#) p. 38) at any UH baccalaureate campus, are also listed. Pathways that lead to completion of a higher degree at a UH baccalaureate institution ([I-81](#) p. 42) are also presented. Pathways are also available from the non-credit Certified Nurse's Aide Program to completion of a Licensed Vocational Nursing (LVN) or Registered Nursing (RN) degree ([I-82](#))

#### *4. Chief Executive Officer*

Windward CC is in compliance with Eligibility Requirement 4: Chief Executive Officer. Standard IV.B goes into this area in detail. The UH BOR hires the chancellor as a full-time employee of the College. Douglas Dykstra ([I-83](#)) was appointed chancellor, the Chief Executive Officer, of Windward CC Community College in 2009. Prior to his official appointment, Mr. Dykstra served as vice chancellor of Academic Affairs at Hawai'i Community College (2004-2009) interim vice chancellor of Academic Affairs at Leeward Community College (2000-2004), and assistant dean of instruction (1999-2000) at Leeward Community College. The affairs of Windward CC constitute his full-time responsibilities as is the authority to administer UH BOR Policies.

#### *5. Financial Accountability*

Windward CC is in compliance with Eligibility Requirement 5: Financial Accountability. As discussed in Standard III.D.5 (pp. 159-162), every fiscal year, the UH System conducts a financial audit of its financial statements in order to receive federal aid and contracts and grants. If a cost item is questionable, then the auditing agency notes it under its Summary of Findings and Questioned Cost section. In that section, the questioned cost is noted as well as the source campus. The UH System then submits a Corrective Action Plan that addresses the questioned costs as listed in the audits. Most recently, the Financial and Compliance Audit as of June 30, 2016, was performed by Accuity LLP, CPAs. ACCJC has accepted the

University of Hawai‘i’s Consolidated Financial Statements in lieu of a separate audit report for Windward Community College since separate audit reports are not done for each of the UH campuses.

The 2008 Higher Education Act ([I-84](#)) and Section 668.23 of Title 34 of the Code of Federal Regulations ([I-85](#)) require all institutions participating in the Federal Student Assistance Programs to have annual audits conducted by an independent auditor. While the audits are “System” implemented, auditors meet and review records for all 10 campuses, but report their results as a whole are for the “System.” The A-133 report is a cumulative report for all federal funds, i.e., grants, financial aid, etc. Not all sources of funding at the College are audited. Funds such as tuition do not get audited unless it is called for by the UH Administration.

Fiscally, the College meets its financial obligations and maintains adequate cash reserves. Although the College has never gone into deficit spending in any of the years since its last accreditation, it has been able to implement only some of the new initiatives suggested because of reductions and restrictions in the State general fund allotment. The College has, therefore, developed strategies to secure additional funds through federal grants and other grant sources to enhance teaching and services in Hawaiian Studies, the Natural Sciences, and the Office of Career and Community Education as well as assessment of general student learning outcomes, such as Title III ([I-86](#)), USDA ([I-87](#)), NSF ([I-88](#)), Perkins Grants for CTE ([I-89](#)), and NASA ([I-90](#)). The College also has the services of a fund developer through the auspices of the University of Hawai‘i Foundation and is in the process of hiring a full-time grant writer. Thus, the College has maintained continuous compliance with all Title IV requirements.

### **Certification of Continued Institutional Compliance with Commission Policies and Federal Regulations**

Windward CC, as part of the self-evaluation process, evaluated its continued compliance with the ACCJC policies aligned with Federal Regulations as well as those embedded within the standards. The College focused on the policies specific to the College’s mission and activities.

For policies embedded in the Standards, the College has provided evidence of compliance within the Evidence of Meeting the Standard section of the Institutional Self-Evaluation Report and the Analysis and Evaluation section for each relevant standard. Policies relevant to the accreditation process were noted in the same way, specifically in Standard I.C, and in other standards as appropriate.

For the policies requiring separate coverage, Windward CC has prepared the following section to demonstrate both continued policy compliance and evidence of meeting the requirements of the Commission Checklist.

### **Public Notification of an Evaluation Team Visit and Third Party Comment [Regulation Citation: 602.23(b)]**

\_\_\_x\_\_\_ *The institution has made an appropriate and timely effort to solicit third party*

*comment in advance of a comprehensive evaluation visit.*

The entire Institutional Self Evaluation Report was placed on the College's online discussion board on August 28, 2017 for a period of 2 weeks and March 12 for 10 days for comment. It is still posted for people to read as of now. All College faculty and staff have access to the discussion board and can comment anonymously. Pertinent modifications to the document were also made via a feedback activity involving the entire campus during Spring Convocation ([I-91](#)). The document was also vetted in the Faculty Senate, Staff Senate, discipline and college-wide advisory groups, and placed on the discussion board again prior to submission to the ACCJC in August 2018.

  x   *The institution cooperates with the evaluation team in any necessary follow-up related to the third party comment.*

The College has not received any notification of third-party comments other than those described above and remains poised to work with the visiting team and with the Commission should any new third-party comments of concern come to light.

  x   *The institution demonstrates compliance with the Commission Policy on Rights and Responsibilities of the Commission and Member Institutions as to third party comment.*

Windward CC has provided the correct link to the College community and to the public so that third-party comments can meet the Commission requirements ([I-92](#)). Additionally, Chancellor Dykstra has communicated in meetings this expectation to inform the public in ample time for adequate comment before the Commission—5 weeks before the scheduled Commission consideration.

**Standards and Performance with Respect to Student Achievement [Regulation Citations: 602.1(a)(1)(i); 602.17(f); 602.19(a-e)]**

  x   *The institution has defined elements of student achievement performance across the institution, and has identified the expected measure of performance within each defined element. Course completion is included as one of these elements of student achievement.*  
*Other elements of student achievement performance for measurement have been determined as appropriate to the institution's mission.*

Successful course completion is one of the measures of analysis. The College has also set standards of institutional performance for fall-to-fall persistence, degrees and certificates awarded, and transfer to 4-year colleges and universities. All measures are pertinent to all courses and programs across the College regardless of mode of instruction, and have a baseline and stretch goal. This is discussed more thoroughly in Standard I.B.3.

  x   *The institution has defined elements of student achievement performance within each instructional program, and has identified the expected measure of*

*performance within each defined element. The defined elements include, but are not limited to, job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers.*

Windward CC's institution-set standards for student achievement at the program level were established in 2004 with the establishment of its Program Review Policy. This policy has been revised since that time, the last time being in 2016. Program-level student achievement standards also appear in the UHCC Annual Report of Program Data (ARPD). Job Placement rates and licensure are two aspects of the ARPD. This is discussed more thoroughly in Standards I.B.4, I.B.5, and I.B.6.

*\_\_x\_\_ The institution-set standards for programs and across the institution are relevant to guide self-evaluation and institutional improvement; the defined elements and expected performance levels are appropriate within higher education; the results are reported regularly across the campus; and the definition of elements and results are used in program-level and institution-wide planning to evaluate how well the institution fulfills its mission, to determine needed changes, to allocating resources, and to make improvements.*

As discussed in Standards I.B.3, I.B.5, and III.A.5, Windward CC evaluates progress in fulfilling its mission and meeting the goals and outcomes of its Strategic Plan in the Planning and Budget Council (PBC). The PBC evaluates and discusses the College's performance on the goals and outcomes and makes recommendations to the chancellor on budget and equipment needs. Student performance metrics are also included in Annual Assessments and 5-Year Program and Unit Reviews to determine the viability of programs.

As discussed in Standards I.B.3, I.B.5, III.A.5, and all standards covering Eligibility Requirement 11, student performance metrics are included in Annual Assessments and 5-Year Program and Unit Reviews. Programs are evaluated on the extent to which they have aligned with the College's Strategic Plan, analyzed student performance, and results of learning assessment in order to determine their viability.

*\_\_x\_\_ The institution analyzes its performance as to the institution-set standards and as to student achievement, and takes appropriate measures in areas where its performance is not at the expected level.*

As discussed in Standards I.B.3, I.B.5, III.A.5, and all standards covering Eligibility Requirement 11, student performance metrics are included in Annual Assessments and 5-Year Program and Unit Reviews. Programs are evaluated on the extent to which they align with the College's Strategic Plan, analyze student performance, and determine the viability of learning assessments.

**Credits, Program Length, and Tuition [Regulation Citation: 602.16(a)(1)(i); 602.17(f); 602.19(a-e)]**

*\_\_x\_\_ Credit hour assignments and degree program lengths are within the range of good practice in higher education (in policy and procedure).*

As discussed in Standards II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, and II.A.12, as well as those standards related to Eligibility Requirements 9, 10, and 12, awarding of credits and degree program lengths are within the range of good practice in higher education. UH BOR Policy codifies minimum accepted program length for associate degrees as 60 semester units of course credit in a selected curriculum. Additionally, the College has written policies and procedures in place for determining a credit hour that meets commonly accepted academic expectations.

  x   *The assignment of credit hours and degree program lengths is verified by the institution, and is reliable and accurate across classroom based courses, laboratory classes, distance education classes, and for courses that involve clinical practice (if applicable to the institution).*

As discussed in Standards II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, and II.A.12, as well as those standards related to Eligibility Requirements 9, 10, and 12, all programs and courses are approved by the College Curriculum Committee, a subcommittee of the Faculty Senate, using a curriculum approval process that takes into consideration the federal regulations and Title IV expectations for financial aid. The Committee reviews all new degree proposals as well as degree revisions and confirms that the degrees meet the minimum 60-unit requirement.

  x   *Tuition is consistent across degree programs (or there is a rational basis for any program specific tuition).*

As discussed in the Standards related to Eligibility Requirement 11, and touched on in Standards I.C.2 and I.C.6, tuition at the College is a uniform rate per unit as set by the UH BOR. As year-round programs, tuition for the Associate of Science in Veterinary Technology and the Certificate of Achievement in Veterinary Assisting are based on a different tuition schedule, also approved by the UH BOR.

  x   *Any clock hour conversions to credit hours adhere to the Department of Education's conversion formula, both in policy and procedure, and in practice.*

The College does not offer clock-hour based courses.

  x   *The institution demonstrates compliance with the Commission Policy on Institutional Degrees and Credits.*

Windward CC conforms to a commonly accepted minimum program length of 60 semester credit hours awarded for achievement of an associate degree as discussed in Standards II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, and II.A.12 as well as those standards related to Eligibility Requirements 9, 10, and 11. The College has written policies and procedures in place for determining a credit hour that meet commonly accepted academic expectations. UH BOR

Policy codifies minimum accepted program length for associate degrees as 60 semester units of course credit in a selected curriculum

### **Transfer Policies**

   x    *Transfer policies are appropriately disclosed to students and to the public.*

As discussed in Standard II.A.10, and those standards related to Eligibility Requirement 20, policies and administrative procedures on the transfer of credit are available on the UH System, UHCC System, and College websites.

The College Catalog describes the evaluation process and the necessary forms to complete the process, and the College website provides students with the Transcript Evaluation Application Form and a list of approved Transcript Evaluation Agencies. Students are encouraged at every stage in the process to meet with a counselor for evaluation.

   x    *Policies contain information about the criteria the institution uses to accept credits for transfer.*

As discussed in Standard II.A.10 and responses to Eligibility Requirement 20, College policies require courses awarded as credit to satisfy degree requirements to be from an institution accredited by either the U.S. Department of Education or the Council on Postsecondary Accreditation. Furthermore, administrative procedures specify the policies and criteria for the transfer and award of credit between the College and other institutions of higher learning and define the guidelines for acceptance of degree-applicable coursework completed at other colleges and for military service transfer credit.

   x    *The institution complies with the Commission Policy on Transfer of Credit.  
[Regulation citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii).]*

The institution demonstrates compliance with the Commission Policy on Transfer of Credit to evaluate and grant transfer credit, College faculty, counselors, students, and staff use a common articulation system to determine course-to-course articulation for general education and major requirements.

As noted in Standard II.A.10 and responses to Eligibility Requirement 20, the University of Hawai'i Common Course Numbering System is used to articulate the College's courses with the UH System baccalaureate campuses and to streamline transfer among UHCC institutions. College counselors use the articulation database for coursework taken within institutions of higher education in the United States.

### **Distance Education and Correspondence Education**

   x    *The institution has policies and procedures for defining and classifying a course as offered by distance education or correspondence education, in alignment with USDE definitions.*

The dean of Division I oversees and supports online instructional programs and support services, including online, hybrid, and web-enhanced instruction for credit courses. The Office of Career and Community Education (OCCE) oversees and supports the non-credit classes. The College also has an authentication process through the learning management system, Lulima, which maps to the College's LDAP directory and requires students to input a unique username and password for credit courses. The same type of authentication process is used for non-credit courses in Canvas (The UH System is currently looking at a new system-wide learning management system and, since Windward CC has used Canvas extensively for its online non-credit courses, Windward CC is now piloting the use of Canvas for the UH System in this effort).

See responses to Standards II.A.1, II.B.1, and II.C.1 and Eligibility Requirements 9, 15, and 17 for the discussion of how all of the College's class offerings, regardless of delivery, follow the same template for their syllabus, which includes the SLOs for the course and the program. The assessment of these outcomes as well as the inclusion of success and enrollment metrics are disaggregated for online as well as face-to-face modes of delivery in the Annual Assessment, 5-Year Program Review or Unit Review completed by the program's department chair (See Standard I.B.6).

*\_\_\_x\_\_\_ There is an accurate and consistent application of the policies and procedures for determining if a course is offered by distance education (with regular and substantive interaction with the instructor, initiated by the instructor, and online activities are included as part of a student's grade) or correspondence education (online activities are primarily "paperwork related," including reading posted materials, posting homework and completing examinations, and interaction with the instructor is initiated by the student as needed).*

See responses to Standards II.A.1, II.B.1, and II.C.1 and Eligibility Requirements 9, 15, and 17 for the discussion of how all class offerings, regardless of delivery mode, follow the template to formulate their syllabus. Discipline faculty in academic programs complete SLO assessments and assist department chairs in compiling data in Department or Unit Annual Assessments and 5-Year Program Reviews which include success and enrollment metrics disaggregated for online as well as face-to-face modes of delivery. Dialog regarding these data for online and face-to-face courses takes place during faculty meetings; in discussions between coordinators, deans, and the Institutional Effectiveness Committee (IEC); and in the Distance Education Committee, and form the basis for the Quality Focused Essay on Distance Education Student Achievement Parity.

x   *The institution has appropriate means and consistently applies those means for verifying the identity of a student who participates in a distance education or correspondence education course or program, and for ensuring that student information is protected.*

See responses to Standards II.A.1, II.B.1, and II.C.1 and Eligibility Requirements 9, 15, and 17 to see the discussion of how the College currently uses Lulima as its learning management system for online, hybrid, and web-enhanced classes. Lulima and Canvas, which Windward CC is piloting for System-wide use, both provide secure login for both faculty and students.

  x   *The technology infrastructure is sufficient to maintain and sustain the distance education and correspondence education offerings.*

See the discussion in Standard III.C and the Quality Focus Essay on Distance Education Student Achievement Parity in Student Achievement to see how the College has a fully interactive web presence and distance learning program that assures that the online infrastructure, financial, student, and academic support are present and ready for future needs and advancements.

  x   *The institution demonstrates compliance with the Commission Policy on Distance Education and Correspondence Education.[Regulation citations: 602.16(a)(1)(iv), (vi); 602.17(g); 668.38.]*

As reported in Standard III.A.6, the dean of Division I oversees and supports online instructional programs and support services, including online, hybrid, and web-enhanced instruction for credit classes. OCCE oversees and supports the College's non-credit classes. The dean supports professional development for the College's learning management system (currently Lulima) and effective strategies in online learning through workshops given by the Title III Specialist. Moreover, the dean of Division II and the College's ALO have prepared 2 substantive changes regarding the new Certificate of Achievement in Veterinary Assisting cohorts on Maui and Hawai'i (the Big Island) during the reporting period that have been approved by the ACCJC Substantive Change Committee.

### **Student Complaints**

  x   *The institution has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the college catalog and online.*

As described in the College's response to Eligibility Requirement 21, policies and administrative procedures are accessible on the UH System, UHCC System, and College websites, and Windward CC is in compliance with the Commission Policy on Representation of Accredited Status and the Policy on Student and Public Complaints Against Institutions and the Checklist.

Board of Regents Executive Policy 7.208\_System-wide Student Conduct Code ([I-93](#)), Executive Policy 7.205, System-wide Student Disciplinary Sanctions ([I-94](#)), and Interim Regents Policy 1.204, Rights and Responsibilities of the University Community ([I-95](#)), define key terms for the complaint process (e.g., complaint and discrimination) and use terms under federal and state laws and the categories of discrimination. In addition to prohibited discrimination, other student complaints and grievances are described and available online at the College's website.

*The student complaint files for the previous 6 years (since the last comprehensive evaluation) are available; the files demonstrate accurate implementation of the complaint policies and procedures.*

As described in response to Eligibility Requirement 21, if there are any student complaint files for the previous six years since the last comprehensive evaluation, they are available in the Office of the Vice Chancellor of Student Affairs for the team to review.

*The team analysis of the student complaint files identifies any issues that may be indicative of the institution's noncompliance with any Accreditation Standards bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.*

As discussed in Eligibility Requirement 21, the College is prepared for any questions that the team members may have about complaint files, procedures, or policies.

*The institution posts on its website the names of associations, agencies, and governmental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.*

Discussion on Eligibility Requirement 21 shows that the College lists all of the required information from the ACCJC on the College's website. It lists all of the programmatic accreditors and organizations that accredit, approve, or license the institution and identifies links for any student complaints ([I-92](#)).

*The institution demonstrates compliance with the Commission Policy on Representation of Accredited Status and the Policy on Student and Public Complaints Against Institutions. [Regulation citations: 602.16(a)(1)(ix); 668.43.]*

Discussion on Eligibility Requirement 21 stipulates that policies and procedures are accessible on the UH System, UHCC System, and College websites. Board of Regents Executive Policy 7.208\_System-wide Student Conduct Code ([I-93](#)), Executive Policy 7.205, System-wide Student Disciplinary Sanctions ([I-94](#)), and Interim Regents Policy 1.204, Rights and Responsibilities of the University Community ([I-95](#)), define key terms for the complaint process (e.g., complaint and discrimination) and use terms under federal and state laws and the categories of discrimination. In addition to prohibited discrimination, other student complaints and grievances are described online at the College's website.

To facilitate the complaint process, the policies and procedures on complaints are found in the College Catalog. The language in the College Catalog describes the purpose of student grievances and directs a student to contact the appropriate party.

### **Institutional Disclosure and Advertising and Recruitment Materials**

  x   *The institution provides accurate, timely (current), and appropriately detailed information to students and the public about its programs, locations, and policies.*

See Windward CC's responses to Standard I.C.2, II.C.4 and Eligibility Requirement 21 to see how the College assures its integrity through having multiple people across the College review major documents such as the College Catalog and Class Schedule. The College Catalog was a 2-year catalog for several years, but starting in 2017 has been revised to be an annual Catalog. The Class Schedule is published twice per year (summer/fall and spring). Inaccuracies and ambiguities are corrected promptly with errata noted. Additionally, subject experts review publications and advertising pertaining to specific areas.

Moreover, the College Catalog accurately provides the College's official name, address, telephone number, and website address as well as the College mission, vision, and core values statements and entrance requirements and procedures. The College's official name, address, telephone number and website address are also provided in the Class Schedule. Entrance requirements and procedures are found on the Admissions Office webpages. College staff and faculty who are well versed in the College admissions procedures and programs handle student recruitment.

  x   *The institution complies with the Commission Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status.*

See the College's responses to Standard I.C.1, I.C.2, I.C.5, I.C.13 and Eligibility Requirement 21 for a more thorough discussion on how Windward CC demonstrates compliance with the Commission Policy on Institutional Advising and Recruitment and Representation of Accredited Status. Moreover, the College ensures all publications and advertising disseminated to the public are clear, accurate, and free of any misrepresentations. All documents and webpages are reviewed for accuracy and completeness.

The use of the term "accredited" is used in compliance with ACCJC Policy on Institutional Advertising, Student Recruitment, and Representation on Accredited Status. It is stated accurately and fully in a comprehensive statement that identifies the accrediting body by name. One program, The Associate of Science in Veterinary Technology (which includes the Certificate of Achievement in Veterinary Assisting) is referred to as "this program is accredited."

  x   *The institution provides required information concerning its accredited status as described above in the section on Student Complaints.[Regulation citations: 602.16(a)(1))(vii); 668.6.]*

The discussion in the College's Self Evaluation of Standard I.C.12 and Eligibility Requirement 11 shows that the College lists all of the required information from the ACCJC on the College's website.

#### **Title IV Compliance**

  x   *The institution has presented evidence on the required components of the Title IV Program, including findings from any audits and program or other review activities by the USDE.*

Windward CC complies with the Commission Policy on Contractual Relationships with Non-Regionally Accredited Organizations and the Policy on Institutional Compliance with Title IV. As discussed in Standard III.D.15 and Eligibility Requirement 5, the College ensures compliance with Title IV responsibilities and expectations through an internal system of oversight and with several quality improvement strategies with professional development of financial aid staff.

  x   *The institution has addressed any issues raised by the USDE as to financial responsibility requirements, program record-keeping, etc. If issues were not timely addressed, the institution demonstrates it has the fiscal and administrative capacity to timely address issues in the future and to retain compliance with Title IV program requirements.*

The Financial Aid Office staff conducts compliance requirement checks on an annual basis by following the US Department of Education's (USDE) Federal Student Aid assessment guide. Financial Aid Office staff also attend regular conferences, workshops, and web trainings offered by the State of Hawai'i and the federal government.

  x   *The institution's student loan default rates are within the acceptable range defined by the USDE. Remedial efforts have been undertaken when default rates near or meet a level outside the acceptable range.*

Discussion in Standard III.D.15 and Eligibility Requirement 5 also show that the College's default rates have been monitored and are within the federal guidelines. The College's 3-year Cohort default rate is 21.5 percent which meets the federal requirement (<30 percent). Default rates for fiscal year 2012, fiscal year 2013, fiscal year 2014 and fiscal year 2012 are 19.6 percent, 21.8 percent, 23.1 and 23.1 percent (III.D.15, p. 177).

  x   *Contractual relationships of the institution to offer or receive educational, library, and support services meet the Accreditation Standards and have been approved by the Commission through substantive change if required.*

For further discussion on how the College's has contract relationships to offer and receive educational, library, and student support services appropriate for an institution of higher education, see Standard II.B.5, III.D.16 and Eligibility Requirement 5. The College purchases subscriptions from the UH Library Consortium, and the College renews formal

membership agreements on an annual basis. These and other contracting practices and agreements support the College mission, Strategic Plan, and these priorities and are in compliance with UH and UHCC System policies and regulations. These system regulations ensure the integrity of such agreements.

Purchasing practices are reviewed as part of the annual audit and Program and Unit Annual Assessments and 5-Year Program and Unit Review processes. There have been no exceptions cited for contractual agreements with external agencies.

*\_\_x\_\_ The institution demonstrates compliance with the Commission Policy on Contractual Relationships with Non-Regionally Accredited Organizations and the Policy on Institutional Compliance with Title IV. [Regulation citations: 602.16(a)(1)(v); 602.16(a)(1)(x); 602.19(b); 668.5; 668.15; 668.16; 668.71 et seq.]*

See the College's responses to Standards III.D.15, III.D.16, and Eligibility Requirement 5 to see how Windward CC ensures compliance with Title IV responsibilities and expectations through an internal system of oversight and with several quality improvement strategies with professional development of financial aid staff.

For fiscal years 2010-11 through 2014-15, the College received an unmodified opinion over federal awards. There were no material weaknesses or significant deficiencies identified in the results of Student Financial Aid Assistance Cluster (Title IV) audits.

The College also has designated personnel with signing authority for contracts and such contracts include details regarding the work to be performed or the services to be provided, the period of the agreement, and delineate responsibilities for the College and the contracted organization

## **Standard I: Mission, Academic Quality and Institutional Effectiveness and Integrity.**

**The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.**

### **Standard I.A.1**

---

*The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement (ER 6).*

---

### **Evidence of Meeting the Standard**

Windward CC's mission is related to the University of Hawai'i Community College's mission ([IA-1](#)) and was re-endorsed in 2017 following a series of open forums, discussion board postings, and meetings with campus governance bodies led by the Mission, Vision, and Core Values Task Force. Windward CC's mission is clearly defined, and was approved by the University of Hawai'i Board of Regents (UH BOR) as required by Windward CC's Mission policy ([IA-2](#)) (ER6). The mission statement is presented in both Hawaiian and English.

As with the mission statement, the vision and core values are presented in both Hawaiian and English. The vision of Windward CC is Ka Mālamalama o ke

Ko'olau (Enlightening Ko'olau). Students and community members will be enriched by "the light of knowledge" through quality programs and able to lead full, productive lives in a rapidly changing world ([IA-3](#)). The core values of Windward CC demonstrate a commitment to student learning and achievement by emphasizing Windward CC's commitment to creating meaningful curricula and diverse learning experiences, working collaboratively and inclusively, serving and supporting with aloha, striving for excellence, and caring for Hawai'i and the planet ([IA-3](#)).

'O keia ka wā kūpono e ho'onui ai ka 'ike me ka ho'omaopopo i kō Hawai'i mau ho'oilina waiwai. Aia nō ho'i ma ke Kulanui Kaiāulu o ke Ko'olau nā papahana hou o nā 'ike 'akeakamai a me nā hana no'eau. Me ke kuleana ko'iko'i e ho'ohiki ke Kulanui e kāko'o a e ho'okumu i ala e hiki kē kōkua i ka ho'onui 'ike a nā kānaka maoli. Na mākou nō e ho'olako, kāko'o a paipai i nā Ko'olau a kō O'ahu a'e me nā hana no'eau ākea, ka ho'ona'auao 'oihana a me ka ho'onui 'ike ma ke kaiāulu — hō'a'ano a e ho'oulu i nā haumāna i ka po'okela.

Windward Community College offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai'i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide O'ahu's Ko'olau region and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence.

## **Commitment to Student Learning and Achievement (ER 6)**

Windward CCs commitment to student learning and achievement is found in the College's mission statement, vision statement, and core values. The mission statement highlights the "opportunities to gain knowledge and understanding of Hawai'i and its unique heritage" and encourages "lifelong learning in a supportive and challenging environment—inspiring students to excellence" (IA-3). The vision statement discusses enriching the lives of students and the community by providing quality programs (IA-3). The first 4 core values detail the College's commitment to student learning and achievement by talking about creating meaningful curricula and diverse learning experiences, working collaboratively and inclusively, serving and supporting with aloha, and striving for excellence.

## **Broad Educational Purpose and Degrees Offered**

The mission statement directly states the broad educational purpose that "Windward CC offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai'i and its unique heritage" (IA-3). The mission statement is guided by the College's vision that "Students and community members will be enriched by 'the light of knowledge' through quality programs and able to lead full, productive lives in a rapidly changing world." The final core value of caring for Hawai'i also defines the college's broad educational purpose.

## **Intended Student Populations**

Windward CC primarily serves the diverse population of Oahu's Ko'olau region. As shown in Table 1 of the Introduction of this report, Windward CC's student population includes recent high school graduates, returning students, a large Native Hawaiian population, and at-risk students, demonstrating the College's commitment to an open-door admissions policy. Addressing the unique needs of the College's students is among the highest priorities expressed through the mission, vision, and core values statements (IA-4 p. 2).

The mission statement notes that Windward CC "provide(s) Oahu's Ko'olau region and beyond with liberal arts, career and lifelong learning..." (IA-3). The "beyond" portion of the mission statement addresses students enrolled in distance education (DE) courses, and demonstrates the College's commitment to those students. As shown in Tables 1, 4, and 5 of the introduction, approximately 30% of Windward CC's student population is enrolled in online courses, which includes many students not home-based at Windward CC. While this "and beyond" statement may seem small, it speaks to a significant portion of the College's population that is not always treated with the same scrutiny as our other populations. As such, it was decided that DE will be addressed in one of Windward CC's Quality Focus Essays (QFEs) (IA-5).

## **Analysis and Evaluation**

The College meets this standard. Guided by the College's vision statement and core values, the College's mission statement describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its

commitment to student learning and student achievement. The mission, vision, and core values are prominently displayed on the College's website ([IA-3](#)).

While the mission statement does everything that the standard requests, it was noted that the campus does not focus enough attention and resources on the student population not located in the Ko'olau region. The College has understood the need for online and distance education, but has not looked at options to maintain quality for a significant subsection of students. This will be addressed in the college's DE QFE ([IA-5](#) p. 1).

## **Standard I.A.2**

---

*The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.*

---

### **Evidence of Meeting the Standard**

Instructional department chairs and non-instructional department heads at Windward CC submit Annual Reviews to the Office of Academic Affairs. Annual Reviews include program analyses and proposed action plans ([IA-6](#) pp. 4-7, 9-12, 14-15, [IA-11](#) pp. 3-10, [IA-8](#) pp. 2-30, 33) to determine how effectively each department is accomplishing its mission and if the mission is directing institutional priorities. Windward CC Policy 4.4 highlights that the focus of the Annual Reviews is to determine how effectively it is accomplishing its mission ([IA-9](#)).

Windward CC also uses a strategic planning process to ensure that the College is meeting the requirements of its mission. The 2015-2021 Strategic Plan states that strategic planning is "the core process that allows the College to effectively meet the requirements of its mission" ([IA-10](#) p. 3). It is used to determine performance-based funding (see discussion in Standard III.D of this report) distributed by the Office of the Vice President of Community Colleges (OVPC) and the UH System. To assure transparency leading to the performance-based funding allocation, the vice president for community colleges (VPCC) visits Windward CC every semester to review and evaluate initiatives—including baseline data, and suggested performance targets in Windward CC's Strategic Plan ([IA-10](#) pp. 3-4).

### **Analysis and Evaluation**

The College meets this standard. Windward CC uses data to evaluate how successfully it is accomplishing its mission and meeting students' educational needs. Strategic Plan data is collected and studied annually, and this is the primary way the college evaluates how well it is meeting its mission, and the primary way the OVPC evaluates its performance-based funding initiative ([IA-10](#) p. 3).

The College also uses Annual Reviews to help assess mission achievement. While less direct than the Strategic Plan data, Annual Review quantitative data is a secondary method the College uses to evaluate how it meets its mission ([IA-9](#)). Annual Reviews discuss how efficiently and effectively departments are serving the needs of the campus ([IA-11](#) pp. 6-25, [IA-12](#)). Each report also includes an action plan for addressing any deficiencies.

One specific area of the mission statement addressed in both the Strategic Plan and Annual Review data is Windward CC's "special commitment to support the access and educational needs of Native Hawaiians." Addressed in enrollment and graduation data for the Strategic Plan, as well as in demand, effectiveness and efficiency data for the Annual Review, this emphasis on Native Hawaiian access needs is repeatedly addressed. However, a critique of the Annual Reviews and Strategic Plan data has been that the data is not fully disaggregated to enable discussions of Native Hawaiian parity ([IA-13](#) p. 4). This will be addressed in Windward CC's second Quality Focus Essay (QFE) on Native Hawaiian parity, as the mission specifically mentions a commitment to Native Hawaiian students.

### **Standard I.A.3**

*The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.*

### **Evidence of Meeting the Standard**

#### *Programs and Services Alignment*

Each program at Windward CC has program learning outcomes (PLOs) that align with (or support) the College's mission. PLOs, especially in terms of course and College outcomes, are assessed every 5 years ([IA-14](#) pp. 8-9). All programs and program learning outcomes are listed in the College Catalog and on Windward CC's website.

Non-instructional academic support services also support the College's mission, and some offices and committees directly address the College's mission in their list of charges or mission statements. Examples are: The Office of Academic Affairs ([IA-15](#)), Administrative Services ([IA-6](#) pp. 1, 14), Business Office ([IA-6](#) p. 4), The Chancellor's Office ([IA-16](#) p. 6), Human Resources ([IA-6](#) p. 6), Office of Career and Community Education ([IA-17](#) p. 27-28), Operations and Maintenance ([IA-6](#) p. 9), Recruitment and Outreach ([IA-18](#) p. 3), and TRIO ([IA-18](#) pp. 9-11). Other services on campus directly support the mission without specifically listing Windward CC's mission statement as one of their charges. Some examples are: Admissions and Records ([IA-18](#) p. 4), Center for Aerospace Education ([IA-19](#) p. 4), Counseling ([IA-18](#) p. 7), Financial Aid ([IA-18](#) p. 6), Library ([IA-20](#) p. 1), Marketing and Public Relations ([IA-16](#) p. 25), Media and

#### *Degrees:*

- Associate in Arts in Liberal Arts ([IA-4](#) pp. 38-41).
- Associate in Arts in Hawaiian Studies ([IA-4](#) pp. 42-43).
- Associate in Science in Natural Science ([IA-4](#) pp. 44-45).
- Associate in Science in Veterinary Technology ([IA-4](#) pp. 46-47).

#### *Certificates of Achievement:*

- Agripharmatech ([IA-4](#) p. 53).
- Veterinary Assisting ([IA-4](#) p. 54).

- Plant-Food Production and Technology ([IA-4](#) p. 55).
- Sustainable Agriculture ([IA-4](#) p. 56 - stopped out August 2016).
- Web Support ([IA-4](#) p. 55).

#### *Other:*

- Marine Option Program (MOP) ([IA-4](#) p. 57).
- Certified Nurse's Aide (CNA) ([IA-16](#) pp. 6, 7, 9, 18).

Duplication Services ([IA-7](#)), Office of Institutional Research ([IA-16](#) p. 18), Office of Planning and Program Evaluation ([IA-16](#) p. 11), Office of Safety and Security ([IA-6](#) p. 12), Palikū Theater ([IA-21](#), p 7), Private Fundraising ([IA-16](#) p. 33), Student Life ([IA-18](#) p. 8), Technology Resources ([IA-22](#)), Testing Service ([IA-23](#)), TRIO ([IA-18](#) pp. 9-11), and Tutoring Services ([IA-24](#)).

### *Decision Making, Planning, and Resource Allocation*

Windward CC's mission statement guides decision making, planning, and resource allocation through the Planning and Budget Council (PBC) process. The PBC is a representative group of faculty, administrators, and staff who “reviews all program reviews, annual assessments, departmental reports, and other assessments to prioritize items for budget consideration and/or to modify the Strategic Plan” ([IA-27](#) p. 3). The PBC handbook directs all members to consider Windward CC's mission, vision, and core values in all the decisions that they make ([IA-29](#) p. 4).

### *Institutional Goals for Student Learning and Achievement*

Windward CC's mission guides institutional goals for student learning and achievement. As previously noted, the mission drives the Strategic Plan. The 2015-2021 Strategic Plan contains the following elements that directly impact student learning and achievement: increasing graduation rates—with specific attention to Native Hawaiian students ([IA-10](#) p. 9), transfer rates ([IA-10](#) p. 12), eliminating access and success gaps ([IA-10](#) p. 13), reduction in time to degree ([IA-10](#) pp. 14-15), student retention and credit accumulation ([IA-10](#) pp. 15-16), developing a robust workforce ([IA-10](#) pp. 16-18), and student year-to-year retention ([IA-10](#) pp. 32-33). These efforts will benefit from improved disaggregation of data by race and ethnicity, a focus of the College's Native Hawaiian Parity QFE. ([IA-14](#)).

### **Analysis and Evaluation**

The College meets this Standard. All of Windward CC's instructional and non-instructional programs and services are aligned with and support the College's mission, and are regularly assessed in their ability to do so. Additionally, the college's mission guides institutional decision-making, planning, and resource allocation via the College's Strategic Plan and the PBC process ([IA-27](#) p. 4). The QFE for Native Hawaiian Parity specifically underscores this commitment to mission by reviewing and refining the data we have for this target population and creating specific steps to effectively utilize the improved data ([IA-13](#) pp. 6-8).

### **Standard I.A.4**

---

*The institution articulates its mission in a widely-published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary (ER 6).*

---

### **Evidence of Meeting the Standard**

The College's mission statement was approved by the University of Hawai'i's Board of Regents (UH BOR) on May 11, 2011 ([IA-28](#) p. 12). According to Policy 4.5, Windward CC

“will review, and revise as needed, the mission statement every 6 years in the fourth year following a self-study for Accreditation” ([IA-2](#) pp. 1-2). This process ensures that Windward CC’s educational mission is clearly defined and highlights the college’s institutional commitment to student learning and achievement (ER6).

The mission was recently reviewed by the campus under the leadership of the Mission, Vision, and Core Values Task Force (MVCV). In Fall 2015, the MVCV created a survey to determine campus satisfaction with the mission statement ([IA-29](#)). In Spring 2016, the MVCV distributed the survey to the campus and found that 80% of Windward CC faculty, staff, and administrators were satisfied with the current mission statement. The MVCV then reviewed a draft of Windward CC’s 2015-2021 Strategic Plan to ensure the mission was aligned. After consulting with respective departments on campus, the MVCV created 2 new mission statements for the College to review. The current mission statement, and the 2 new drafts were posted on the campus online Discussion Board for 2 weeks. The College overwhelmingly supported the current mission statement. As a last step, the MVCV held an open forum where the campus community again voiced their support for the current mission statement. The MVCV determined that the College had ample time and opportunity to review and change their mission statement ([IA-30](#), [IA-29](#)). In the Fall 2016, the MVCV conducted a similar review of the College’s Vision and Core Values ([IA-30](#), [IA-29](#)).

### **Analysis and Evaluation**

The College meets this Standard. Through a far-reaching and transparent process, Windward CC’s mission statement was reviewed and endorsed by the campus community in Spring 2016. It is published on Windward CC’s website ([IA-3](#)) and in the Course Catalog ([IA-4](#) p. 2). The mission statement is highly visible—appearing on course syllabi and posters around campus. Windward CC’s mission statement centers the campus and is at the heart of all programs and services provided to students.

## **Standard I.B.1**

---

*The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.*

---

### **Evidence of Meeting the Standard**

#### *Student Learning Outcomes*

Since the last Accreditation Self Study, the College has continued and expanded its dialogue about student learning outcomes (SLOs). Dialogue occurs in department meetings, campus convocations, New Faculty Orientations, Lecturer Evaluations, Contract Renewals, Tenure/Promotion Dossiers, and workshops conducted by the Institutional Effectiveness Committee (IEC) Subcommittee on Professional Development in Assessment (SPDA).

Evidence of significant departmental dialogue on SLO and SLO assessment is embedded in Annual Reviews. Departments discuss course SLOs, and a summary of those conversations is found in Part III of each Annual Review. In that section, the department chair identifies which courses have been assessed in the current academic year, the analysis of the assessments completed in the current academic year, and the courses that will be assessed in the next academic year ([IB-1](#) p. 32, [IB-2](#) pp. 18-19, [IB-3](#) pp. 22-24, [IB-4](#) pp. 27-28, [IB-5](#) pp. 34-36, [IB-6](#) pp. 23-24, [IB-7](#) pp. 33-34, [IB-8](#) pp. 32-34, [IB-9](#) pp. 29-30, [IB-10](#) pp. 33-34, [IB-11](#) pp. 21-25, [IB-12](#) pp. 15, [IB-13](#) pp. 26-27, [IB-14](#) pp. 20-21, [IB-15](#) pp. 27-28).

Workshops and breakout discussions on SLOs occurred at the Spring 2013, Fall 2013, Spring 2014, Spring 2015, and Fall 2015 convocations ([IB-16](#)). All Windward CC staff, faculty, and administrators are encouraged to participate in campus convocations so these SLO conversations are truly collegial. general education learning outcomes (GELOs) and SLO assessments are also discussed during New Faculty Orientation that occurs every Fall and Spring, ensuring that new faculty are introduced to learning outcomes at the beginning of their tenure at the College ([IB-17](#) pp. 5-11).

SPDA has helped maintain self-reflective dialogue among faculty, staff and administration about the continuous improvement of student learning outcomes by providing professional workshops and convening meetings on learning outcomes ([IB-18](#)).

#### *Student Equity*

A key portion of Windward CC's mission statement mentions its "special commitment to support the access and educational needs of Native Hawaiians" ([IB-18](#)). Since the College's mission specifically points to supporting the needs of Native Hawaiian students, many of the College's interventions address disparities between Native Hawaiian and Non-Hawaiian students.

This commitment to Native Hawaiian students is reflected in the College's 2008-2015 Strategic Plan. Seven action outcomes of Windward CC's 2008-2015 Strategic Plan were focused on Native Hawaiian student success ([IB-19](#) pp. 9-10). Every semester the vice president for community colleges (VPCC) visits the campus to present data related to its

Strategic Plan progress. Every member of the campus is encouraged to attend these presentations and the PowerPoint version is available online for those not able to attend (IB-20).

Looking forward, the 2015-2021 Strategic Plan extends the conversation on student equity by expanding its commitment to Native Hawaiian students through: establishing a Native Hawaiian Success Center, increasing the number of Native Hawaiian faculty, staff, and administrators, and increasing enrollment of students from Hawaiian culture-based schools (IB-21 p. 11). Additionally, the 2015-2021 Strategic Plan includes a focus on increasing enrollments and success rates for students from other underrepresented groups including Filipinos, Micronesians, and Pacific Islanders (IB-21 p. 11). While these conversations are still in the preliminary stage, they show a dedication to student equity. Additionally, the 2015-2021 Strategic Plan and programs like Early College High School, Title III grant projects, Paipai o Ko'olau, TRiO SSS, and Frosh Cohorts expand student equity discussions beyond Native Hawaiian students.

Several programs at Windward CC address student parity. The College's Paipai o Ko'olau Program aims to increase college enrollment and graduation rates for community members who don't think college is possible (e.g. due to financial hardships, lack of social support, lack of academic preparedness). Priority is given to individuals who have substantial financial need, are of Native Hawaiian ancestry, from Windward O'ahu, and are either out of the academic pipeline, never attended college, or aged out of the foster care system (IB-22). From this and other Windward CC programs, the campus has been able to pilot and institutionalize best practices for all students, especially those underrepresented (IB-23).

Another program at Windward CC that addresses student parity is the Federal TRiO program. TRiO Student Support Services (SSS) provides services to disadvantaged students (e.g. low-income, first-generation, students with disabilities). The goal of TRiO SSS is to increase the college retention and graduation rates of its participants and help students make the transition from one level of higher education to the next. Each semester, TRiO SSS visits over 60 classes to talk to both faculty and students about their program. Through their conversations with faculty and students, TRiO SSS creates a dialogue throughout the campus on student equity (IB-24).

Unlike Paipai or TRiO, Windward CC's Frosh Cohorts target all incoming full-time freshman with a developmental need; these are not specifically targeting Native Hawaiian or economically disadvantaged students. However, the underlying principles of these cohorts are specifically chosen to be cohesive with Native Hawaiian cultural values and knowledge building. Discussions of Frosh Cohort success center on student equity due both to the cultural foundations of this intervention, the disproportionate representation of Native Hawaiian and Pell eligible students in developmental education, and the original funding source for these programs (i.e. Title III Native Hawaiian Serving Institutions funding). Program success rates have been consistently disaggregated to look at Native Hawaiian success versus the success of non-Hawaiian students (IB-25 pp. 2-4).

With so many programs focusing on Native Hawaiian parity, the college would benefit from consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis. This will help improve the quality of dialogue on parity measures, and

decision-making and allocation of resources to promote parity—especially given the college’s commitment to Native Hawaiian students. This will be addressed in the colleges Native Hawaiian Parity QFE (IB-26 p. 3).

### *Academic Quality*

Windward CC’s Staff Development Committee (SDC) is tasked with planning and coordinating faculty and staff development activities by issuing grants, planning professional development opportunities, and fundraising for those activities (IB-27). 68 awards have been provided to faculty and staff since Fall 2014 which have allowed faculty and staff many opportunities for discussions about academic quality throughout the world (IB-28). The knowledge gained is brought back to Windward CC unofficially and via Post Grant Reflection reports (IB-29). The Chancellor’s Office increased the budget for the SDC from \$14,000 to \$18,000 in 2017 when the committee chair requested an increase to find more development opportunities (IB-30). The SDC is a key source of discussions of academic quality on campus.

Additionally, the Office of Academic Affairs and the Faculty Senate are 2 governing committees on campus that mention academic quality as one of their goals. The Office of Academic Affairs’ mission statement notes that their “office promotes and ensures academic quality and academic freedom (IB-31).” The Curriculum Committee (a subcommittee of the Faculty Senate) leads the campus conversations about SLO currency, course proposals and modifications, and course currency (IB-32 p. 5). The Faculty Senate Constitution notes that it was established “to provide formal faculty involvement in educational decision-making, academic policy, and program development. The purpose of this formal faculty involvement is to ensure that quality education is provided, preserved, and improved at Windward Community College and in the University of Hawai‘i System in general” (IB-33).

### *Institutional Effectiveness*

Dialogue on institutional effectiveness has been largely coordinated by the IEC, which:

- Plans and oversees an institutional schedule to ensure a systematic, comprehensive, and ongoing assessment of the credit programs, non-credit programs, and other units identified in the Program Review Policy.
- Develops and sustains a culture of assessment throughout the institution.
- Provides the necessary training and skills for units to assess themselves.
- Maintains materials and reports related to all assessment activities (IB-34).

Since the last Accreditation Self Study, the College has continued and expanded its dialogue about institutional effectiveness through workshops, college-wide forums, and Subcommittee on Professional Development in Assessment trainings.

### *Continuous Improvement of Student Learning and Achievement*

At Windward CC, student achievement and learning are measured in the 2005-2015 and 2015-2021 Strategic Plan by graduation rates, transfer rates, retention rates, credit accumulation, enrollment, and successful course completion rates. All discussions about the

Strategic Plan mentioned above and in Standard IV, are conversations specific to student learning and achievement. The evidence listed above on conversations about student learning outcomes, Student Equity, Academic Quality, and Institutional Effectiveness show Windward CC's dedication to continuous improvement of student learning and achievement across the institution.

### **Analysis and Evaluation**

The College meets this standard. Through convocations, committee meetings, department meetings, orientations, evaluations, dossiers, and professional development activities, Windward CC administrators, faculty, and staff participate in substantive dialog focused on student outcomes, equity, academic quality, institutional effectiveness, program development, and the continuous improvement of student learning and achievement.

In an effort to continually improve and provide better a better education experience to our students, the college will focus a QFE on Native Hawaiian parity.

### **Standard I.B.2**

---

*The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services (ER 11).*

---

### **Evidence of Meeting the Standard**

#### *Instructional Program Student Learning Outcomes (SLOs)*

Instructional Program Learning Outcomes (PLOs) are vital to the program creation process. That process can be found on the Curriculum Committee's website (IB-35). PLOs are created by faculty or groups of faculty after consulting with departments and other faculty within the University of Hawai'i System. Faculty can also use the Program Outcome Guide (IB-36) found on Windward CC's Assessment webpage to help create PLOs for their proposed programs. PLOs are then submitted to the Curriculum Committee in a Program Proposal for review (IB-37). The Curriculum Committee Coordinator posts the proposal on the campus-wide discussion board so all faculty, staff, and administrators can review and give feedback on the proposed program (IB-38), (IB-39). The final PLOs are reviewed by the Curriculum Committee and Faculty Senate, and then given for final approval to the deans, vice chancellors, and the chancellor. Through this process, Windward CC has clearly defined outcomes for all of its instructional programs. This includes all Associate in Arts (AA) Degrees, the Associate in Science (AS) Degrees, the Certificates of Achievement (CA), the Academic Subject Certificates (ASC), Certificates of Competence (CO), and the Certified Nurse's Aide (CNA) Program offered at the College.

PLOs for all of the College's degrees and certificates are prominently listed in their Annual Reviews and can be found on the College's website: AA in Liberal Arts (IB-40), AA in Hawaiian Studies (IB-41), AS in Natural Science (IB-42), AS in Veterinary Technology (IB-43), CA in Agripharmatech (IB-44), CA in Veterinary Technology (IB-45), ASC in Art (IB-46), ASC in BioResources and Technology: Bio-Resource Development and Management (IB-47), ASC in Business (IB-48), ASC in Hawaiian Studies (IB-49), ASC in Psycho-Social

Developmental Studies (IB-50), CO in Agricultural Technology (IB-51), Plant-Food Production and Technology (IB-52), Sustainable Agriculture (IB-53 p. 3), Web Support (IB-54), CNA (IB-55 pp.11-13), and OCET (IB-126 pp. 3, 24).

Instructional PLOs are reviewed either annually, every 2 years, or every 5 years (IB-57). The University of Hawai'i Community Colleges Instructional Annual Reports of Program Data (ARPD) tracks which PLOs have been assessed for the AA, AS, and CA Degrees (IB-58). The ARPD data show the PLOs for Agricultural Technology, Agrapharmatech, Hawaiian Studies, Liberal Arts, Natural Science, and Veterinary Technology have been assessed during this current accreditation cycle (IB-59 p. 5, IB-60 p. 7, IB-61 p.4, IB-62 pp.4-5, IB-63 p. 5, IB-64 p.4).

PLO assessments for the ASCs, COs, and the CNA (as well as the AA, AS, and CA) can be found in Part III of the Annual Departmental Reports (IB-65 pp. 20-21, IB-66 p. 56-59) or Part IV of the Annual Reviews (IB-67 pp. 11-13). Further evidence of PLO assessment can be found in Windward CC's assessment database (IB-68, IB-69). PLO achievement is also used as evidence in the Planning and Budget Council's resource allocation process if a PLO assessment demonstrates a need for additional funds to improve student learning (IB-70, IB-71, IB-72).

### *Student Services SLOs*

In the winter of 2012 Windward CC's Student Affairs Division created and adopted a single overarching Student Affairs SLO: *Students will access appropriate information and resources to support their academic journey.* All of the departments in the Student Affairs Division then linked at least one of their learning outcomes to the division-wide SLO to help assess the unit as a whole and create a list of 13 PLOs for Student Affairs (IB-73 pp. 5-6). The SLOs in the Student Affairs Division are from: Recruitment and Outreach, Admission and Records, Financial Aid, Counseling, Student Life, TRiO, Career and Transfer, Disabilities Services, Supplemental Instruction, Frosh Camp STAR Workshops, and the Office of the Vice Chancellor for Student Affairs.

All 13 of the PLOs were assessed in the 2013 Student Affairs Annual Reports of Program Data (ARPD), and it was decided that future assessments would occur on a rotating basis (IB-74). In 2014 and 2015, the PLOs (and their associated departments) were assessed on a rotating schedule, and those assessments and results are listed in the Student Affairs Annual Report of Program Data (IB-75, IB-76).

### *Learning Support Services*

As detailed in II.B.3, Windward CC defines and assesses library and other learning support service outcomes in their Annual Reviews. Data from sources such as embedded learning assessments, surveys, and service logs are used to assure their adequacy in meeting identified student needs, and drives program improvement as required.

## **Analysis and Evaluation**

The College meets this standard. Learning outcomes for Windward CC's instructional programs, student services, and learning services are clearly defined, published, and are regularly assessed. The results of these assessments are used by faculty and staff to modify programs and services, and to make budget requests to help improve their programs and services. This ensures that students who complete programs can achieve the identified outcomes (ER 11).

### **Standard I.B.3**

---

*The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information.*

---

### **Evidence of Meeting the Standard**

The University of Hawai'i Community College system has established Policy 4.203 to specifically address institution-set standards. The purpose is to ensure that both ER11 and Standard I.B.3 are met. This policy covers all of the evaluation items listed in the "Standards and Performance with Respect to Student Achievement" on the Federal Regulations Checklist (IB-77 p. 2). Policy 4.203 requires each institution-set standard have a baseline level of achievement and an aspirational goal, these goals aligning with Strategic Plan targets. The 8 Strategic Plan standards are: Course Completion, Degrees and Certificates Awarded, Native Hawaiian Students Receiving Degrees and Certificates Awarded, Pell Recipient Degrees and Certificates Awarded, Transfer to Baccalaureate Institutions, Integrated Postsecondary Education Data System (IPEDS) Student Success Rate, Licensure and Certification Examination, Success Rate, and Job Placement Rate (IB-78 p. 1-2). Baseline and aspirational targets are available on pages 4-7 of Policy 4.203. These are Windward CC's defined standards of student achievement, and performance is assessed against each standard (ER11). Per Policy 4.203, the Office of the Vice President for Community Colleges (OVPCC) is responsible for an Annual Review that compares baseline to target values, and will publish those results on the OVPCC website. Each campus is then responsible for reviewing the results and using them in planning and resource allocation (IB-78 p. 2-3).

When an institution-set standard is not met, Windward CC does not receive all performance funding monies available, and then takes measures to achieve the goal in the following Fiscal Year. For example, the results for FY 2018 show that Windward CC did not meet the baseline goals for Degrees and Certificates Awarded to Native Hawaiian Students (IB-79). This deficiency will be addressed in one of the college's Native Hawaiian Parity QFE (1B-122). The Native Hawaiian Parity QFE considers Windward CC's mission statement, specifically the special commitment to support the educational needs of Native Hawaiian students to address the college's focus on Native Hawaiian parity (1B-122 pp. 1-2). Distance Education (DE) courses are included in the 8 standards listed above, and are not treated as their own entity. The Distance Education QFE will delve into this to ensure achievement across modalities—particularly by targeted professional development to faculty and

improved online support services (IB-80 p. 1). Student achievement standards are consistent across programs and courses no matter the modality of instruction.

### **Analysis and Evaluation**

The College meets this standard. The College has published its established institution-set standards for student achievement at both the baseline and aspirational levels. Windward CC is in full compliance with University of Hawai‘i Community College Policy 4.203 on Institution-Set Standards for student achievement (IB-78). However, both of the College’s QFEs will help Windward CC improve performance on institution-set standards (IB-26, IB-80).

### **Standard I.B.4**

---

*The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.*

---

### **Evidence of Meeting the Standard**

Windward CC uses assessment data to organize its institutional processes to support student learning and student achievement. This includes:

- Under the 2005-2015 Strategic Plan time-frame, the OVPCC provides Annual Performance Data to Windward CC each Spring so the College can determine how well we are accomplishing our Strategic Plan goals (IB-81). Under the current Strategic Plan, the VPCC has presented data to the College in his Fall campus visits for planning purposes (IB-82).
- UH System Institutional Research and Analysis Office (IROA) provides data on enrollment, applications, initiatives, degrees and certificates earned, faculty and staff, financial aid, and student tracking so the College can quickly access information. These reports are found via their website (IB-83) and their Data Access Portal (IB-84).
- The Windward CC Office of Institutional Research provides quantitative data and analysis to faculty, staff, and administrators to strengthen and improve courses, programs and services. Students and the public can view and retrieve Windward CC data on the OIR website. (IB-85 pp. 19-22, IB-86).
- The Community College Survey of Student Engagement (CCSSE) is administered to Windward CC students every even numbered year. Results are used by the Administrative Staff (IB-87), Student Affairs (IB-76 p. 2-3), Computing Services, and the Media and Duplication Center (IB-88 p. 3-6) to improve student services and support. For example, Student Affairs has used CCSSE results to help justify funding requests for a Supplemental Instruction Program (IB-70), program equipment (IB-71), and a counselor (IB-72).

- The IEC now conducts institutional surveys every other year to see what improvements can be made on campus for students, faculty, and staff. The results from the Student Institutional Survey are posted on Windward CC's Accreditation Documents page (IB-89),(IB-90). As of Spring 2017, the IEC is in the process of re-writing these surveys, and expect the surveys to be administered during the Fall 2017 semester.
- The Windward CC Title III Data Analyst provides data to administrators and faculty on Title III funded activities such as Freshman Learning Cohorts. A report was presented at Fall 2015 convocations that determined that there needed to be a sustained support for Freshman throughout their entire first year of school (IB-91).
- Student Learning Outcome (SLO) assessment results are used for course, department, and program improvement. SLO data are input into the College's assessment database at the instructor and department chair levels. The instructor forms show results and analysis of the course and program SLO assessments, changes needed to support student learning, and steps the department can take to assist (IB-119). The Annual Reviews submitted are records of department-level dialogue on SLO assessment and set department-wide plans to improve student learning (IB-69). SLO achievement is also used as evidence in the Planning and Budget Council's resource allocation process (IB-70, IB-71, IB-72). See Standard II.A.3 for additional discussion on SLO assessment.

### **Analysis and Evaluation**

The College meets this standard. The College uses assessment data from various sources to support student learning and achievement. As noted in 1.B.3, the college's DE courses are not treated as their own entity and are often included in the assessment data discussed above. One of the goals of the DE QFE is to align institutional practices so the college can complete an assessment of current practices related to online course evaluations (IB-80 p. 6). Once completed, this will be another piece of assessment data used to support student learning and student achievement.

## **Standard I.B.5**

---

*The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.*

---

### **Evidence of Meeting the Standard**

#### *Annual Reviews and Five-Year Program Reviews*

Every organizational unit of the College completes an Annual Review and a Comprehensive Program Review every 5 years. These reports:

- Systematically assess instructional programs, student support services and administrative services using quantitative, qualitative, and student learning data.
- Assess the degree to which programs and services effectively support the Mission and Strategic Plan.
- Influence curriculum, college planning, decision-making, and resource allocation.
- Promote collaboration and dialogue across campuses and disciplines.

The Annual Reviews and 5-Year Program Reviews are part assessment, part evaluation, and part recommendation. These reports describe the process by which academic programs, student service programs, and administrative units assess their effectiveness. The different areas of the College then use the data presented in the report to recommend changes to improve their effectiveness (IB-92 p. 9).

Annual Reviews are typically completed by the end of the fall semester every academic year, and are posted on the college's Planning and Budget Council (PBC) page. Examples are:

- Natural Sciences 2012-2013 Annual Departmental Report (IB-2).
- Student Affairs 2014 Annual Review (IB-75).
- Chancellor's Office Annual Review (IB-85).
- Career and Community Education and Facilities Assessment (1B-26).

The 5-Year Program Review schedule (IB-57) ensures that programs are thoroughly reviewed once an accreditation cycle. Examples are:

- Associate of Arts-Liberal Arts Five-Year Program Review 2012-2016 (IB-93).
- Academic Support Five-Year Program Review 2012-2017 (IB-94).
- Chancellor's Office Annual Review (IB-95).

### *Strategic Plan*

The Strategic Plan promotes continuous improvement by explicitly stating strategic goals and objectives for the College to address (IB-92 p.9). As noted in I.A.2, strategic planning is the core process that allows the College to effectively meet the requirements of its mission (IB-18 p. 3). Strategic Plan data is collected annually. Refer to I.A.2 for additional discussion on how the Strategic Plan measures the accomplishment of Windward CC's mission.

### *Student Learning Outcomes*

Windward CC has 3 types of learning outcomes: general education (GELO), program (PLO), and course (SLO). All outcomes are aligned with the college's mission, and most course and program outcomes can be linked to one of these GELOs:

- Global and Cultural Awareness.
- Critical Thinking and Creativity.
- Communication.
- Information Literacy (IB-96).

Windward CC assesses GELO achievement through the course SLO assessment process, and all 4 have been assessed during this accreditation cycle. All SLO assessment results are recorded in the college's assessment database, and screenshots of those databases can be found in the following evidence: (IB-97, IB-98, IB-99, IB-100). Assessment results are used to determine how well Windward CC is accomplishing its mission by determining if students have acquired the GELO skills during their tenure at the college (IB-97 pp. 1-2, IB-98 pp. 1-2, IB-99 pp. 1-2, IB-100 pp. 1-2)

As of Spring 2017, the Institutional Effectiveness Committee is in the process of creating a subcommittee to assess the GELOs and another committee to checking the current course, program, and general education outcomes links for accuracy (IB-101 p. 2). Subcommittee conclusions and Windward CC's subsequent actions will be posted here when available.

### *Analysis and Evaluation*

The College meets this standard. Windward CC's Mission centers the campus, and serves as a guide for institutional processes. Mission success is measured via Annual Reviews, Five-Year Program Review, Strategic Plan data, and SLO assessments. As noted in I.A.2, the College would benefit from additional annual data that simply disaggregates measures found in the Annual Reviews and Strategic Plan by Native Hawaiian and non-Hawaiian students. This will be addressed in Windward CC's Native Hawaiian Parity QFE.

## Standard I.B.6

*The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal, and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.*

### Evidence of Meeting the Standard

The Office of Institutional Research has run a Distance Education (DE) report covering course count, enrollment, student performance data, and degree and transfer rates for DE courses since 2014 (IB-102, IB-103, IB-104). This report compares DE students to face-to-face students disaggregated by Native Hawaiian ancestry. Throughout the reports, face-to-face students have had higher course completion rates and success rates, and lower withdrawal rates than students in online courses (IB-105 p. 6). Windward CC will address this disparity in the DE QFE by focusing on the following: DE professional development, coordinating student support, and aligning institutional practices to make DE course offerings comparable to face-to-face options.

In addition to the previous report, Windward CC has been able to preliminarily disaggregate SLO achievement data for face-to-face and DE courses:

**Table I.B.1 Face to Face versus Distance Education SLO Achievement  
Fall 2012 through Fall 2016**

Course property	FALL 2012	SPRING 2013	FALL 2013	SPRING 2014	FALL 2014	SPRING 2015	FALL 2015	SPRING 2016	FALL 2016	SPRING 2017	Grand Total
Face to Face	89.7%	82.5%	85.2%	83.7%	84.4%	86.1%	84.4%	90.1%	87.7%	100%	<b>86.0%</b>
Online	86.5%	78.3%	76.7%	80.5%	76.9%	82.0%	84.0%	91.0%	87.0%		<b>82.0%</b>
Hybrid, Cable, Other DE	70.0%	85.0%			64.5%	79.5%					<b>77.2%</b>
Grand Total	<b>88.8%</b>	<b>82.3%</b>	<b>83.8%</b>	<b>83.2%</b>	<b>83.0%</b>	<b>85.3%</b>	<b>84.4%</b>	<b>90.2%</b>	<b>87.6%</b>	<b>100.0%</b>	<b>82.2%</b>

This table is the College's initial attempt to disaggregate learning outcome data, and simply points out the percentage of students who meet the course learning outcomes by instruction type. This data does indicate that face-to-face and DE courses have reached parity for SLO achievement.

The College has devoted significant resources to online education in the past 5 years. These include a Title III grant project, Hanaiaulu: Feed and Grow, which provides significant resources to renovating the online classroom through a curriculum development position, acquisition of lecture capture resources, and improved infrastructure (IB-106). Workshops have also been conducted at each convocation since Fall 2014 on use of online learning management systems and other online teaching topics (IB-107 pp. 8,10-14). These efforts

have resulted in increasing parity between online and face-to-face classes, which will be built upon by the upcoming DE QFE.

### **Analysis and Evaluation**

The College meets this standard. Distance Education is becoming an important modality of teaching for Windward CC. The College has allocated significant resources and implemented robust strategies to address online parity. The College will further strive to reach parity between face-to-face and DE in the methods outlined in the DE QFE. The QFE will aim to strategically increase DE courses to improve degree completion rates and close the achievement gap between those taking DE courses and those taking face-to-face courses in terms of success, completion, and withdrawal rates.

### **Standard I.B.7**

---

*The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.*

---

### **Evidence of Meeting the Standard**

#### *Instructional Programs and Student and Learning Support Services*

Windward CC systematically reviews and assesses its evaluation mechanisms. The Annual Reviews and Five-Year Program Reviews are one of the college's primary methods of evaluating its effectiveness. Most recently, the Annual Reviews were evaluated through focus groups conducted by the Institutional Effectiveness Committee (IEC) Subcommittee on Professional Development in Assessment (SPDA). These results were provided confidentially to the appropriate offices so changes could be made to the report.

#### *Resource Management*

A primary responsibility of Windward CC's Planning and Budget Council (PBC) is to review, evaluate, prioritize, and make recommendations to the chancellor regarding the use of resources in the College's budget requests, and regarding resource requests for future funding (IB-108 pp. 2). The PBC also conducts a self-assessment of its processes every 2 years. Responses to that survey are discussed by the PBC and posted on the PBC summary page (IB-108 p. 6, IB-109). This was formally done through a Governance Assessment Survey which is no longer conducted at Windward CC. In the future, PBC assessments will be covered by the SPDA's Meta Assessment, the PBC member assessment, and institutional surveys.

#### *Governance*

In the Spring of 2013, a new Governance Assessment Committee (GAC) was created as a subcommittee of the Institutional Effectiveness Committee (IEC). The GAC was composed of 7 members of Windward CC's faculty and staff (IB-110). This committee constructed

surveys on Survey Monkey that were distributed to the governing structures on campus, the entire campus community, and to the students. The committee was disbanded, and its responsibilities will be covered by the IEC Meta Assessments and Institutional Surveys.

### **Analysis and Evaluation**

The College meets this standard. Policies and Practices for instructional programs, student and learning support services, and resource management are evaluated yearly to assure their effectiveness in supporting academic quality and accomplishment of mission. Governance policies and processes are assessed every 2 years. This is per Windward CC's Policy on Policies which notes that an ad hoc committee will review all campus policies every 5 years for currency, coherence, consistency, and relevance to the college's mission (IB-111 p. 3).

### **Standard I.B.8**

---

*The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.*

---

### **Evidence of Meeting the Standard**

Course Student Learning Outcome (SLO) and institutional SLO assessments are conducted by individual faculty, discussed in departmental meetings, and documented both in Annual Reviews (IB-15 pp. 27-28, IB-9 p. 30, IB-112 p. 14) and in the college's assessment database (IB-113). Program, department, and unit assessments are posted yearly on the PBC webpage (IB-114, IB-115). These assessments are used to set campus budget priorities in the PBC process. All divisions are required to support their budget requests using the course and program-level data and analyses from their Annual Reviews.

The Institutional Effectiveness Committee's Subcommittee on Professional Development in Assessment (SPDA) has provided 48 assessment workshops during the accreditation cycle (IB-17). During 2016, SPDA conducted Meta Assessment focus groups for all governance committees on campus. SPDA asked the groups the following questions:

- What's working?
- What's not working?
- What can be improved concerning the [group] process?
- How are the [group] results used?
- How does the [group] relate to the Windward CC mission?

The results were sent back to the governance groups so that the groups could have an understanding of their strengths and weaknesses, and could make any needed changes. Examples of changes made can be found in group meeting notes (IB-116 p.1, IB-116 p. 3).

Windward CC's Strategic Plan data are collected by the OVPCC's Academic Data, Assessment and Policy Analysis (APAPA) office and presented to the campus community annually by the VPCC (IB-117, IB-118). These presentations are e-mailed to the campus and also posted online on the OVPCC website (IB-119). Those data are used by faculty, staff, and administrators to determine trends, assess institutional needs, establish benchmark

comparisons and track advancements in reaching the stated goals and objectives. As of Fall 2016, the OVPCC is using some of the Strategic Plan elements as performance funding measures which is presented to the campus and posted on the OVPCC website (IB-120 p. 12). Similarly, the University of Hawai'i System was given \$6.3 million to create a performance funding system, and the College's progress on those measures can be found online (IB-121). The performance funding indicators tie to some of the UH Strategic Directions Measures, and those results are listed online as well (IB-122). Windward CC sets their goals and action items to meet Strategic Plan and Performance Funding measures (IB-123 pp. 10,-12, 14-19, 21, 23, 25-32, IB-124 p. 14).

### **Analysis and Evaluation**

The College meets this standard. Windward CC assessment and evaluation results are either emailed to the campus community or posted online. Through Annual Reviews, IEC-SPDA, the Strategic Plan, and yearly visits from the VPCC, Windward CC keeps the campus community informed so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

### **Standard I.B.9**

---

*The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology and financial resources.*

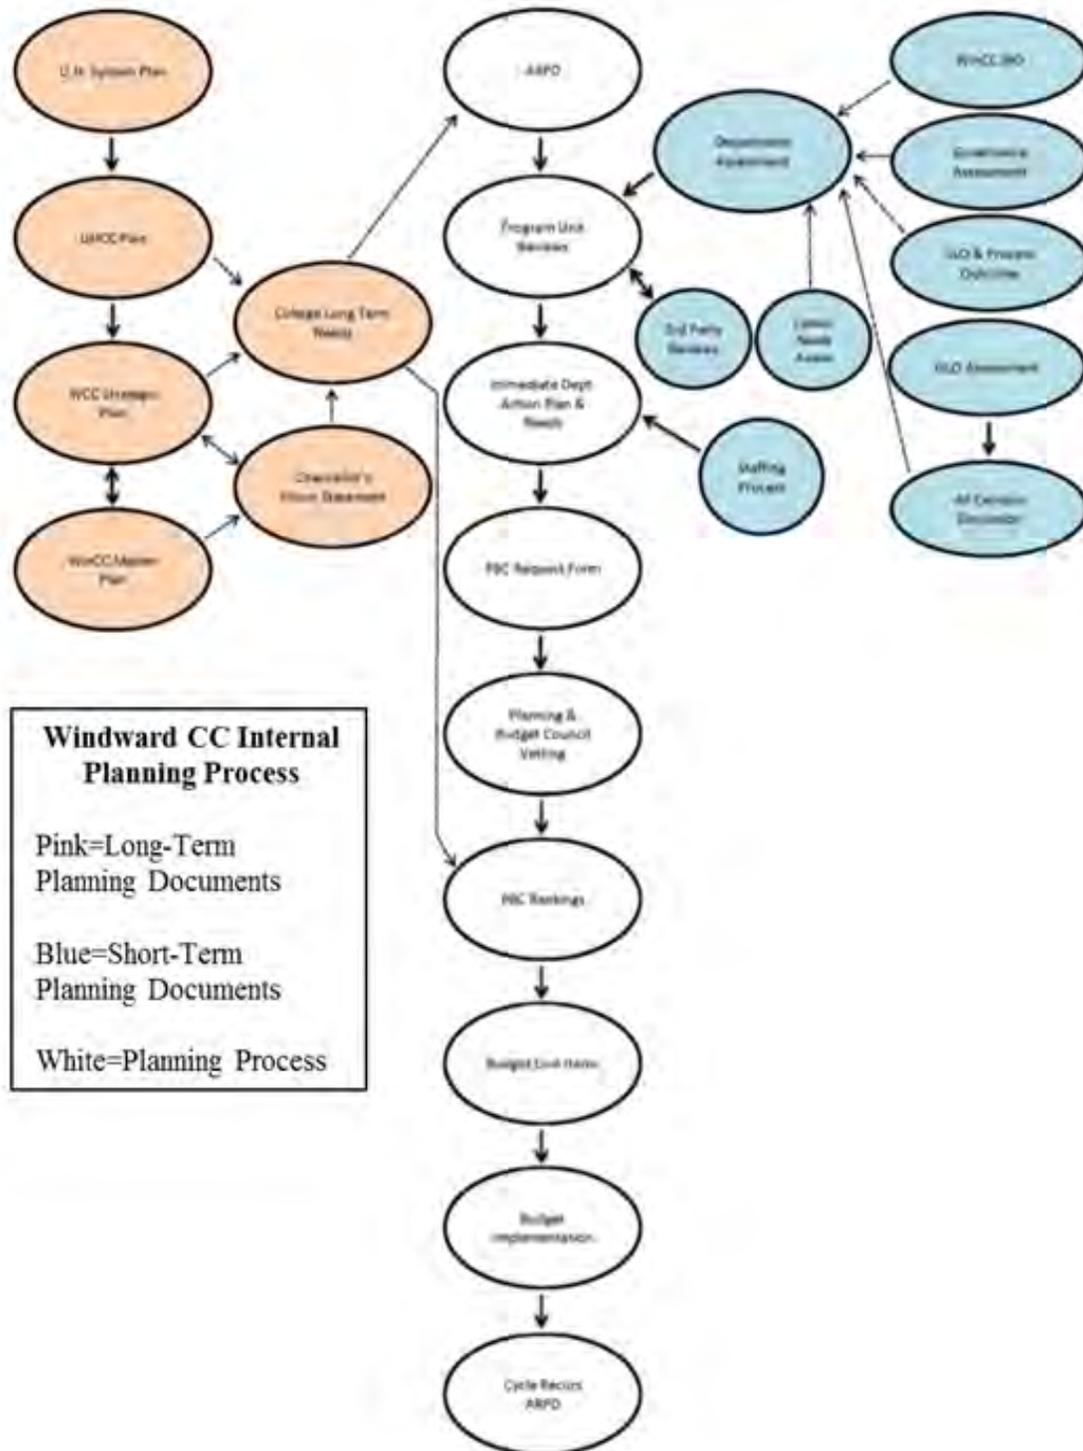

---

### **Evidence of Meeting the Standard**

The PBC is an advisory group to the chancellor that uses assessment, analysis, and evidence of community needs to regularly review and update the College's Strategic Plan and prioritize the budget (IB-125 p. 3). The PBC is composed of constituents from all units of the College (IB-125 p. 4). A list of former and current members may be found under the "Membership" column on the PBC's summary page on the PBC website (IB-126).

The following figure is from the PBC handbook (IB-125 p. 9) and illustrates the PBC process, which is linear in nature (white bubbles). Blue and pink bubbles further identify documents and evidence which connect the short-term and long-term needs of the college to the overall PBC planning process.

**Figure I.B.1 Windward Community College Planning Process**

The white column shows that the PBC planning process uses Annual Reports of Program Data (ARPD) (IB-127) and Annual Reviews (IB-15) to generate PBC requests (IB-128). Note that the pink and blue columns show how long-term and short-term needs of the

College are considered in multiple stages of the PBC process. To ensure that PBC requests lead to accomplishment of the College's mission (and improve institutional effectiveness and academic quality), requestors need to show how their request aligns with the Strategic Plan and course, program, or general education learning outcomes (IB-128 p. 1). The plan outlined in the College's Native Hawaiian Parity QFE will be instituted so as to ensure the data related to ARPD's and strategic plan outcomes is more accurate. This will help to further elucidate such key measures as Native Hawaiian enrollment, persistence and graduation, which will support requests that appropriately target this population and strategic measures related to it.

Over the course of the academic year, the committee members read the PBC requests, listen to a department representative explain the requests, and then anonymously rank the requests which is tabulated into a PBC Request Ratings survey (IB-129). PBC members are directed to consider the following factors when ranking requests: System Priorities, College Goals and Priorities for the Fiscal Calendar, Assessment Data to Support the Request, Immediacy, Health and Safety, and Level of Impact (IB-125 p. 23). Those results are posted on the PBC webpage for the campus community to read and the link is emailed to PBC members. The PBC process occurs annually, and shows that Windward CC engages in continuous, broad based, systematic evaluation and planning.

### **Analysis and Evaluation**

The College meets this standard. The College integrates program review, planning, and resource allocation in a systematic and transparent fashion (ER19). Evidence of this can be found in the College's Planning and Budget Council (PBC) process discussed more thoroughly in Standard IV.A.1 and IV.A.3.

## **Standard I.C.1**

---

*The institution assures the clarity, accuracy and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.*

---

### **Evidence of Meeting the Standard**

#### *Mission Statement*

As mentioned in I.A.4, Windward CC's Policy 4.5 states that the college "will review, and revise as needed, the mission statement every 6 years in the fourth year following a self-study for Accreditation" (IC-1 p. 1-2). The mission was reviewed in the Fall of 2016 by the Mission Vision, and Core Values Task Force. The task force determined (with campus input) that mission statement accurately represented the college.

#### *Learning Outcomes (IC-2)*

Windward CC's Curriculum Committee works with the vice chancellor of Academic Affairs' (VCAA) Advisory Committee to ensure that course student learning outcomes (SLOs) are assessed for currency at least once every 5 years (IC-3). The VCAA Advisory Committee, which includes all department chairs, also engages in a top-down survey of course SLOs for currency and accuracy (IC-4).

#### *Educational Programs and Student Support Services (IC-5)*

Students primarily receive information about programs and services via the Windward CC Catalog, website, email, brochures, and College orientation (new student orientation, mandatory advising appointment, Frosh camp, and other events). Materials are reviewed on an annual and/or semester basis. The VCAA leads the Catalog and schedule review, and the vice chancellor of Student Affairs (VCSA) reviews student services materials.

#### *Accreditation Status*

Windward CC gives accurate information to students and the public about its accreditation status on its accreditation webpage (IC-6). Accreditation documents are prominently listed on that webpage so users can quickly access accreditation status information (IC-7, IC-8, IC-9).

### **Analysis and Evaluation**

The College meets this standard. Windward CC makes every effort to give accurate information to students and the public. Information provided to students is listed prominently on the campus' webpage (IC-6, IC-7, IC-8, IC-9), and is regularly reviewed for clarity and accuracy by Task Forces, Advisory Committees, the VCAA, and the VCSA.

## **Standard I.C.2**

---

*The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the (ER 20).*

---

### **Evidence of Meeting the Standard**

The Catalog is available for download on the college's website. The Catalog is a comprehensive document that provides students with all facts, requirements, policies, and procedures listed in the ACCJC Catalog Requirements (IC-10). Locations or publications where other policies may be found are accessed by clicking hyperlinks throughout the Catalog (IC-11).

### **Analysis and Evaluation**

The College meets this standard. The College provides an online catalog that is available on the College's website and can be downloaded by current and prospective students (IC-11, IC-12). The Catalog is precise, accurate, current, and is reviewed annually (IC-13).

## **Standard I.C.3**

---

*The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public (ER 19).*

---

### **Evidence of Meeting the Standard**

#### *Communication of Student Learning Outcomes*

Instructors are directed to list course (SLOs on course syllabi (IC-14). All course syllabi can be found on the College's Academics webpage (IC-15). Standard I.B.1 discusses SLO dialogue on campus, and evidence of SLO dialogue and assessments are found in Part III of the Annual Departmental Reviews. Refer to Standard I.B.1 for the links and page numbers to the documented SLO assessments. These assessments communicate matters of academic quality to Windward CC faculty, staff, and any other interested party on an annual basis. This demonstrates that Windward CC systematically evaluates and publishes how well and in what ways it is assessing SLOs (ER19).

#### *Communication of Student Achievement*

Documented assessment of Windward CC student achievement data is primarily found from the following sources: the Office of the Vice President for Community Colleges, the University of Hawai'i System's Institutional Research and Analysis Office, and Windward CC Office of Institutional Research. Examples of the data those offices supply are found in Standard I.B.4. The data those offices provide are made public so that the academic quality of the College is transparent, and demonstrate that Windward CC makes decisions regarding improvement through an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and re-evaluation (ER19).

## **Analysis and Evaluation**

The College meets this standard. Student learning and achievement data are well documented and posted online to communicate matters of academic quality to appropriate constituencies through Windward CC's Annual Reviews listed in the Student Learning Outcomes section of I.B.1 and other documented evaluations and reports such as the Office of the Vice President for Community College's Annual Performance Data, the Community College Survey of Student Engagement, and the Institutional Effectiveness Committee's institutional surveys (which are all detailed in I.B.4). These assessments are available to faculty, staff, current and prospective students, and the public.

### **Standard I.C.4**

---

*The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.*

---

#### *Evidence of Meeting the Standard*

Current and prospective students can easily find program, certificate, degree, and course descriptions and expectations via program websites, the Catalog, and course syllabi. All certificate and degree requirements, content, and learning outcomes are listed in the Catalog and on program webpages (IC-11 pp. 38-56, IC-16). Course learning outcomes are listed in the Catalog and in each course syllabus (IC-11 pp. 59-125, IC-15).

## **Analysis and Evaluation**

The College meets this standard. The College clearly describes the purpose, content, course requirements, and all expected learning outcomes for its certificates and degrees both in the Catalog and on the front page (or one click away from) of program websites (IC-11 pp. 38-56, IC-16). Course learning outcomes are also listed in the Catalog and in each course syllabus (IC-11 pp. 59-125, IC-15).

### **Standard I.C.5**

---

*The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representation of its mission, programs, and services.*

---

#### **Evidence of Meeting the Standard**

##### *Integrity of the Mission*

According to Policy 4.5, Windward CC "will review, and revise as needed, the mission statement every 6 years in the fourth year following a self-study for Accreditation" (IC-1 pp. 1-2). The integrity of the mission statement is discussed in more detail in I.A.4.

##### *Integrity of Programs*

According to the Curriculum Policies and Procedures the college curriculum is composed of the credit courses and programs required to meet the educational needs of the students and

the mission of the College (IC-17 p.2). The Office of Academic Affairs is responsible for ensuring that curriculum conforms to University of Hawai'i and Windward CC policies and goals (IC-17 p.1).

### *Integrity of Services*

Student services are reviewed in the Academic Support and Student Affairs Annual Reviews (IC-18),(IC-19). These reports can be found from 2009 to present on the College's Planning and Budget Council's webpage (IC-20).

### **Analysis and Evaluation**

The College meets this standard. Windward CC Policies, procedures and publications are regularly reviewed by various members of the campus community ensuring that information presented is current and accurate. The Policy Formation Process states that the chancellor will establish an ad hoc committee to review all campus policies at least every 5 years. Policies are reviewed for coherence, consistency, and relevance to Windward CC's mission (IC-21). Since Windward CC is part of the larger Community College and University of Hawai'i system, the College is also responsible for following applicable policies created by the University of Hawai'i Community College System and University of Hawai'i Board of Regents. However, Windward CC is not responsible for reviewing those policies.

### **Standard I.C.6**

---

*The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.*

---

### **Evidence of Meeting the Standard**

The College publishes information on resident and non-resident tuition, fees, and refund information in the Windward CC Catalog (IC-11 pp.19-20). Current and historical tuition information is also published on the College's Tuition website (IC-22). Students can preview the cost of and comparison shop for their textbooks on the Windward CC Bookstore website (IC-23).

### **Analysis and Evaluation**

The College meets this standard. All relevant information necessary for current and permanent students is published online and is accessible.

### **Standard I.C.7**

---

*In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students (ER 13).*

---

## **Evidence of Meeting the Standard**

The Windward CC Catalog states:

Windward Community College embraces those aspects of academic freedom that guarantee the freedom to teach and the freedom to learn. Free inquiry and free expression for both students and faculty are indispensable and inseparable. As members of the academic community, students are encouraged to develop a capacity for critical judgment and to engage in a sustained and independent search for truth (IC-11 p. 6).

The Office of Academic Affairs provides further proof of a campus atmosphere that supports academic freedom by including a specific commitment to academic freedom in their office's mission statement (IC-24). The faculty also have the University of Hawai'i Community College's Policy (UHCCP) #5.211 Statement on Professional Ethics (Faculty) as a guide. The policy states that faculty protect the academic freedom of their students (IC-25 p. 2). Standard III.A.13 discusses professional ethics policies in more detail.

## **Analysis and Evaluation**

The College meets this standard. The Windward CC Catalog includes a statement about the Academic Rights and Freedoms of Students that fosters the atmosphere of intellectual freedom for both faculty and students. This ensures that faculty and students are free to examine and test all knowledge appropriate to their discipline, and the institution maintains an atmosphere in which intellectual freedom and independence exist (ER13).

## **Standard I.C.8**

---

*The institution establishes and publishes clear policies and procedures that promote honesty, responsibility, and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty, and the consequences for dishonesty.*

---

## **Evidence of Meeting the Standard**

The Catalog informs students that a copy of the Student Code of Conduct is available in the Office of the vice chancellor for Student Affairs and provides a link to the System-wide Student Conduct Code (IC-11 p. 15). A link to this is also provided on Windward CC's Policies, Procedures, and Guidelines webpage (IC-26, IC-27 p. 2). The Student Code of Conduct EP 7.208 defines the types of behaviors that violate the Student Code of Conduct, and the consequences for violations (IC-26 pp. 6-11).

## **Analysis and Evaluation**

The College meets this Standard. The Student Code of Conduct section in the College Catalog suggests that students familiarize themselves with the Code of Student Conduct, and that their enrollment at Windward CC comes with the expectation that they will conduct themselves accordingly. The Catalog further discusses impermissible behavior, academic dishonesty, cheating, and plagiarism.

### **Standard I.C.9**

---

*Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.*

---

#### **Evidence of Meeting the Standard**

Article IV of the 2015-2017 Collective Bargaining Agreement between the University of Hawai‘i Professional Assembly and the Board of Regents of the University of Hawai‘i states, “In giving instruction upon controversial matters, Faculty Members are expected to set forth justly and without suppression the differing opinions of other investigators, and in their conclusions provide factual or other scholarly sources for such conclusions” (IC-28 p. 1). All new faculty are provided copies of this agreement.

The faculty also have the University of Hawai‘i Community College’s Policy (UHCCP) #5.211 Statement on Professional Ethics (Faculty) as a guide. Specifically, the policy mentions that faculty members “accept the obligation to exercise critical self-discipline and judgment in using, extending, and transmitting knowledge. They practice intellectual honesty” (IC-25 p.2). This policy states that it is the chancellor’s responsibility to provide a copy of UHCCP #5.211 to all new faculty. Standard III.A.13 discusses professional ethics in more detail.

#### **Analysis and Evaluation**

The College meets this standard. The College follows the guidelines of faculty professionalism outlined in Article IV of the 2015-2017 Collective Bargaining Agreement Between the University of Hawai‘i Professional Assembly (UHPA) and the Board of Regents of the University of Hawai‘i. Both of those dictate that faculty will practice intellectual honesty—presenting data fairly and objectively.

### **Standard I.C.10**

---

*Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or worldviews, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.*

---

This standard is not applicable as Windward CC is an open, public institution that does not require that staff, faculty, administrators, or students have specific beliefs or worldviews.

### **Standard I.C.11**

---

*Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.*

---

This Standard is not applicable as Windward CC does not operate in any foreign locations.

## **Standard I.C.12**

---

*The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.*

---

### **Evidence of Meeting the Standard**

Windward CC is responsive to the directives of ACCJC, and evidence can be found on the College's accreditation website (IC-25). This evidence shows that the College has followed the Federal Checklist requirements listed under "Public Notification of an Evaluation Team Visit and Third Party Comment" (IC-29 p.1). Additional evidence of the College's willingness to work with ACCJC is that our Accreditation Liaison is currently serving on the ACCJC Substantive Change Advisory Group (IC-30).

### **Analysis and Evaluation**

The College meets this standard. The College has continuously complied with all Eligibility Requirements, Accreditation Standards, Commission Policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes (ER21).

## **Standard I.C.13**

---

*The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public (ER 21).*

---

### **Evidence of Meeting the Standard**

I.C.1 notes where ACCJC accreditation status and other information can be found for the campus. The Veterinary Technology webpage clearly mentions its accreditation status, and has a clear link to the AVMA, and additional information is provided at information sessions (IC-31).

The Certified Nurse's Aide program is certified and approved by the State of Hawai'i, Department of Human Services, Social Services Division. The program is re-certified every 2 years, and students can find the approved program certificate posted in the CNA classroom. All printed materials and website information states that the course is a state approved training program (IC-32, IC-33).

### **Analysis and Evaluation**

The College meets this standard. Windward CC demonstrates honesty and integrity in its relationships with external agencies and complies with all regulations and statutes. The

College consistently describes itself to the ACCJC, the American Veterinary Medical Association (AVMA), and the State of Hawai'i, Department of Human Services, Social Services Division (ER 21).

### **Standard I.C.14**

---

*The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.*

---

### **Evidence of Meeting the Standard**

As mentioned in 1.A.2 and I.A.3, Windward CC's mission statement guides the campus. Everything from instructional programs to student services, strategic planning, and budgeting is focused on providing "innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai'i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide O'ahu's Ko'olau region and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment — inspiring students to excellence" (IC-34).

### **Analysis and Evaluation**

The College meets this standard. The Office of the Vice President for Community College's financing webpage notes that community colleges are the state's "open-door entry points to higher education...to maintain its open door access, the Community Colleges rely on state revenues to finance a significant portion of its operations" (IC-35 p.1). Windward CC is a non-profit, state-funded teaching organization, and its commitment to high quality education, student achievement, and student learning is paramount to any other objective on campus.

## Standard II: Student Learning Programs and Support Services

The institution offers instructional programs, library and learning support services, and student support services that are aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

### Standard II.A.1

---

*All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs (ER 9 and ER 11).*

---

### Evidence of Meeting the Standard

#### *Programs, Degrees, and Certificates*

The College's instructional programs are consistent with the Mission (IIA-1) by providing the following fields of study to the surrounding Ko'olau communities and beyond ([IIA-2](#) pp. 34, 35):

Two Associate of Arts (AA) degrees:

- AA degree in Liberal Arts, with concentrations in:
  - Visual Arts (Fall 2018)
  - Performing Arts (Fall 2018).
  - AA degree in Hawaiian Studies.

Two Associate of Science (AS) degrees:

- AS degree in Natural Sciences (ASNS) with concentrations in:
  - Biological Sciences
  - Physical Sciences
  - Engineering
  - Information and Communications Technology.
- AS degree in Veterinary Technology.

The College also offers the following certificates, which may lead to employment and transfer to other higher education programs:

- Certificate of Achievement (24 to 45 credits):
  - Veterinary Assisting
  - Agripharmatech.
- Academic Subject Certificates (12 credits or more):
  - Bio-Resources and Technology: Bio-Resource Development and Management
  - Business
  - Hawaiian Studies
  - Psycho-Social Developmental Studies
  - ART: Drawing and Painting.
- Certificates of Competence (4 to 10 credits):
  - Agricultural Technology (admissions stop out August 2016).
  - Plant-Food Production and Technology
  - Sustainable Agriculture
  - Web Support
  - Cybersecurity.

The College also offers remedial/developmental pathways in math and English to prepare students for college-level work ([IIA-2](#) p. 105), as well as articulation agreements for transfer to 4-year institutions ([IIA-3](#)). Please see Standard I.A.1; I.A.2.

### *Learning Outcomes and the College Mission*

The College's course and program student learning outcomes are consistent with its mission and are appropriate for higher education ([IIA-4](#)) (ER 9, ER 11):

- Every course and program has specific and measurable SLOs that are aligned with the College's general education learning outcomes and included in the College Catalog ([IIA-2](#)).
- The College's general education learning outcomes (GELOs) represent the institutional learning outcomes (ILOs).
- Every SLO is provided on syllabi for all classes ([IIA-4](#)).
- Course and program SLOs are approved through the curriculum approval process ([IIA-5](#)).
- Distance education courses ([IIA-6](#)) meet the same SLOs as their face-to-face equivalents.
- The College's program review process ensures that programs are high-quality and consistent with the mission ([IIA-5](#)).
- The College's program review process uses student achievement data to improve instruction ([IIA-7](#)).
- The Planning and Budget Council (PBC) guides resource allocation ([IIA-8](#)) and bases decision-making on SLO attainment, relationship to the College mission, learning outcomes, and institutional priorities.

### **Analysis and Evaluation**

The College meets this standard. The College's program review process ensures that instructional programs in all delivery formats are consistent with the mission and are of high-

quality. To ensure that instructional practices are aligned for online delivery, the distance education Quality Focus Essay recommends the following 3 steps for improvement.

- Complete an assessment of current practices related to online course evaluations.
- Provide online courses in an orderly sequence to help students complete their AA degree online.
- Commit to a master schedule of online course offerings that meet graduation requirements.

All course and program student learning outcomes are approved through the curriculum approval process, communicated to the College community via the Catalog and course syllabi, and regularly assessed as part of the program review process. The College meets regularly to discuss student learning and achievement assessment results and to identify instructional interventions appropriate for each program to improve instruction.

## **Standard II.A.2**

---

*Faculty, including full time, part time, and adjunct faculty, regularly engage in ensuring that the content and methods of instruction meet generally accepted academic and professional standards and expectations. In exercising collective ownership over the design and improvement of the learning experience, faculty conduct systematic and inclusive program review, using student achievement data, in order to continuously improve instructional courses and programs, thereby ensuring program currency, improving teaching and learning strategies, and promoting student success.*

---

## **Evidence of Meeting the Standard**

### *College-wide Curriculum Review Participation*

Faculty, including full-time and part-time, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations through the curriculum approval process ([IIA-5](#)). The formal approval process begins with the sponsoring department, and then a thorough review of each proposal occurs on the College Discussion Board ([IIA-9](#)) to ensure transparency and solicit feedback on the quality of a proposal, including feedback on course SLOs ([IIA-10](#)), before it is discussed at the Curriculum Committee. Once the Curriculum Committee approves a proposal, the Faculty Senate must then review and approve it ([IIA-11](#)). Finally, all curriculum proposals are reviewed and approved by the administration, to ensure the content and methods of instruction meet accepted academic and professional standards across the UHCC System. All approved curriculum proposals are then entered into the Quali Student Curriculum Management (KSCM), the UHCC System's curriculum database.

Faculty members submit proposals to create, modify, or deactivate a course/program through this process. The curriculum form contains required elements from the UHCC System as well as elements from the College's Faculty Senate ([IIA-12](#)) to ensure compliance with accepted academic and professional standards and expectations. All required questions on the proposal form are answered equally, regardless of course delivery modality. Additionally, faculty follow College guidelines for writing clear and measurable student learning outcomes (SLOs) ([IIA-13](#)).

### *Curriculum Review Process*

Faculty are required to review and maintain the quality of their courses and programs through the Annual Assessment and 5-Year Program Review processes ([IIA-7](#)). These processes draw on data sent by the UHCC System that documents the status of all programs, as well as institutional data on learning outcome attainment and other data, in order to help assess the quality of the program. Using these assessments as a guide, faculty also ensure quality content by creating and assessing innovative programs, such as the development of associate transfer degrees in Liberal Arts and Natural Sciences ([IIA-14](#)), and Certificates of Achievement in Agripharmatech ([IIA-2](#) pp. 34, 35) and Hawaiian Studies ([IIA-15](#)), as well as a Career Technical Education program associate degree in Veterinary Technology ([IIA-16](#)).

The Office of Career and Community Education also uses national industry standards and employer advisory boards to review curriculum in Health, Culinary Arts, Hospitality, Ocean Safety, Business, Leadership, Computer Skills, and Facilities Maintenance programs.

### *College-wide Student Learning Outcome Assessment Participation*

Assessment is listed as an assigned duty for all full-time teaching faculty ([IIA-17](#)) and lecturers ([IIA-18](#)). Teaching faculty are expected to “update and assess SLOs and develop appropriate assessment instruments” ([IIA-17](#)). Lecturers are not expected to design or revise SLOs, but they are required to submit a periodic self-evaluation which describes the “degree of attainment of student learning outcomes in the classes taught” ([IIA-18](#)).

Assessment is also included as an assigned duty in job descriptions for all academic administrators, including the chancellor ([IIA-19](#) p. 4), vice chancellor for Academic Affairs ([IIA-20](#) p. 3), and dean for Division I ([IIA-21](#) p. 3) and dean for Division II ([IIA-22](#) p. 3). Examples of administrative assessment duties include:

- Oversee curriculum development, review, and assessment.
- Direct annual reports and assessments of assigned units.
- Participate in institution-wide strategic planning and assessment.
- Evaluate and assess ongoing instructional programs and student learning outcomes.
- Integrate educational planning with resource planning and distribution.

Therefore, all teaching faculty are required to assess all SLOs for their courses in a 5-year cycle. The schedule for course-level assessments is set by the Director of Planning and Program Evaluation (DPPE) and is communicated to faculty via the department chairs and the college’s website ([IIA-23](#)). Please see Standard II.A.6.

Course-level assessments may be embedded (i.e., part of a course exam, assignment, or practicum) or administered as stand-alone evaluations. Regardless of which type of assessment is used, the instructor must objectively evaluate student performance for each SLO and compare it to a predetermined “benchmark for success,” typically 70%. As part of the assessment, the instructor must formulate a plan for improvement and describe how s/he will implement the changes over the next academic year. The completed assessment, including methods, analysis, plan, and evidence, is then uploaded to the College’s assessment

database ([IIA-24](#)) where it is reviewed by the DPPE, academic dean, department chair, and faculty within the department.

### *Program Learning Outcome Assessment*

Program Coordinators are responsible for the assessment of program learning outcomes (PLOs), which are done simultaneously with SLO and GELO assessments. Individual outcomes may be assessed in several courses, or they may all be assessed in a single “capstone course” which has been designed to demonstrate mastery in all areas of the program. As with course-level assessments, PLO assessments must include an objective analysis of outcomes data and a detailed plan for improvement. The completed assessment is posted to the assessment database ([IIA-24](#)).

In addition to PLO assessments, all BOR-recognized programs (including AA and AS degrees and Certificates of Achievement) are annually evaluated via the Annual Report of Program Data (ARPD) process. In October of each year, the UHCC System provides the College with quantitative data for each of its programs. These data include indicators of demand, efficiency, and effectiveness (e.g., [IIA-25](#)) as well as program scores for individual performance measures (e.g., number of degrees and certificates awarded). Each indicator is analyzed using a standardized rubric ([IIA-26](#)) to determine a “health call” for each. A program can receive a “cautionary” or “unhealthy” designation if the number of majors-to-FTE faculty is excessive or if the class fill-rates drop below a set threshold. Please see II.A.11; II.A.12.

### *Changes Made as a Result of Learning Outcome Assessment*

The discipline or program coordinator is responsible for analyzing these data and forming an action plan to address any deficiencies. As part of this action plan, s/he must discuss any resources needed to implement the plan, describe the results of PLO assessments, and establish a timeline for implementing any changes. The completed ARPD reports ([IIA-25](#)) are evaluated by College and UHCC administration and posted on a public website. The College also has a robust system of professional development resources and grants through the Staff Development Committee ([IIA-27](#)), which provide opportunities for faculty to engage in conversations about teaching and learning and best practices.

### **Analysis and Evaluation**

The College meets this Standard. The College uses the curriculum and program review processes to systematically assess, maintain and improve courses and programs in order to ensure that the professional and academic standards required by the UHCC System and the College are met. Required elements, such as contact hours, prerequisites, SLOs, instructional, and evaluation strategies are found in all proposed or modified curriculum and these elements are discussed, evaluated, and made transparent to the College and the community through the College Discussion Board, Quali, and annual department reports. Faculty maintain their instructional expertise by taking advantage of multiple professional development opportunities provided by the College and the UH and UHCC Systems.

Assessment is listed as an assigned duty in job descriptions for all teaching faculty and academic administrators and is also included as an assigned duty in lecturer contracts. The College has implemented a culture of assessment, in which courses, programs, and general education (institutional) learning outcomes are regularly and systematically evaluated. It uses the annual assessment/program review process and community needs to drive curricular decisions by both improving existing programs and developing new and innovative ones.

### **Standard II.A.3**

---

*The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.*

---

### **Evidence of Meeting the Standard**

#### *Student Syllabi and Learning Outcomes*

The Office of Academic Affairs requires that all faculty make available to students a syllabus which includes approved student learning outcomes. These syllabi are posted on the Credit Courses webpage ([IIA-4](#)), thereby making accessible current and past course syllabi to students and to the community. Faculty create course syllabi using the Curriculum Committee approved course content and methods of instruction, using a model provided by the Office of Academic Affairs ([IIA-28](#)).

#### *The Curriculum Review Process*

The Curriculum Review Process requires that SLOs are developed and vetted at several approval levels to ensure clear and measurable learning outcomes. Various resources are available for faculty to develop their SLOs ([IIA-29](#)). The College's GELOs are developed through Institutional Effectiveness Committee processes and involve College-wide participation as described in Standard I.B.2, and SLOs are communicated as described in Standard I.C.3. As noted in Standards I.B.5 and I.C.2, all instructional programs have established SLOs which are published in the Catalog ([IIA-2](#)). Course SLOs are present on course syllabi and are also on several places on the College website ([IIA-30](#)).

#### *Curriculum Assessment Procedure and Schedule*

The Assessment Plan requires that 20% of the active courses in any department at the College be assessed every year for course, program, and general education (institutional) learning outcomes ([IIA-31](#)). Therefore, each semester, each department chair is informed by the director of Planning and Program Evaluation which courses need to be assessed for that semester and respective faculty are directed to the College's online assessment database to submit their course assessments. This database allows faculty to indicate the specific SLOs being assessed along with particular program and general education outcomes. The database also enables faculty to upload anonymous student examples of assignments that both meet

and do not meet the expected level of achievement, and asks the faculty to use the SLO data to create a plan for improving the percentage of students who meet the outcomes ([IIA-32](#)).

### **Analysis and Evaluation**

The College meets this Standard. The College has established procedures to systematically identify, communicate, and assess learning outcomes as part of the curriculum and program review process. Course syllabi reflect the information approved through the curriculum process and syllabi are widely shared for both students and the community. All program and course SLO documentation are updated and reviewed for currency and revision on an ongoing and systematic basis, and formally every 5 years ([IIA-5](#)). The College's Annual Assessment/Program Review Process and timeline ensures that all SLOs are systematically assessed.

### **Standard II.A.4**

---

*If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.*

---

### **Evidence of Meeting the Standard**

The College is committed to robust and appropriate developmental curriculum such as those in math and English, designed to meet the learning needs of students. A standard numbering system used across the UHCCs identifies developmental curriculum with courses numbered 01-99 and college-level credit courses are numbered from 100-299. The College Catalog includes descriptions of both college-level as well as developmental courses ([IIA-2](#)).

Since November 2016, based on cognitive assessment options and recommendations from the UHCC Student Success Council, the College uses high school grades, ACT Exam scores, and placement exams to place students into appropriate English and math courses ([IIA-33](#)). For students who take the placement exams, 86% place into developmental math courses, and 52% into developmental English courses ([IIA-34](#)).

The UHCC system implemented an acceleration strategy at all 7 community colleges to improve success and completion rates for underrepresented students, especially for students placed in developmental math and English courses. The College studied data for developmental students and learned that less than 5% of math students complete college level math because it takes up to an additional 2 years for them to finish their developmental math courses.

### ***Math Developmental Curriculum Redesign***

In response to these data-identified needs, math faculty redesigned the developmental curriculum:

- Beginning in Fall 2016, the math department replaced their 8 developmental math courses with 2 developmental math pathways for students.

- The first pathway is Math 75X, the only general developmental math course offered, which is open to anyone. If students pass Math 75X with a C grade or higher, they move into transfer-level college math ([IIA-35](#)).
- The second pathway begins with Math 82, which requires a higher ACT Math composite score ([IIA-35](#)).
- Beginning in Spring 2017, the math department created 2 co-requisite classes: Math 78 that is co-requisite with Math 100 and Math 88 that is co-requisite with Math 103, which are geared towards students placing just below transfer level math.

### *Math Developmental Curriculum Redesign Results*

In Fall 2016, 22% of the students that were placed one-level below college, completed college-level math after 2 semesters ([IIA-36](#)). In comparison, in Fall 2013, 15% of the students completed college-level math after 2 semesters, and only 36% completed college-level math after 4 semesters. Therefore, there was a 7% increase in college-level math completion after 2 semesters. This data appears to be encouraging.

Students who placed 2 or more levels below college-level in Fall 2016, 15% completed college-level math after 2 semesters. In comparison, in Fall 2013, 4% completed college-level math after 2 semesters and 8% completed college-level math after 4 semester. Therefore, there was a 11% increase in college-level math completion after 2 semesters. For the Fall 2016 cohort, college-level math completion after 2 semesters was even higher than college-level math completion after 4 semesters for the Fall 2013 cohort. This appears to be a more dramatic increase ([IIA-36](#)).

### *English Developmental Curriculum Redesign*

Substantial revisions to the procedure for placing students in first-year English courses, as well as to the developmental English course sequence as a whole, were implemented in AY 2016-17:

- English faculty redesigned developmental English curriculum by eliminating standalone reading courses and creating a single developmental course pathway. The pathway consists primarily in a corequisite offering, ENG 100/ENG 100X, which students with moderate developmental needs complete within one semester ([IIA-37](#)).

A new class being proposed, ENG 100W, is planned to replace 100X, providing students increased contact time with their instructor and a blended class population (half developmental, half college ready). Students with more serious developmental needs must complete a standalone course in reading and writing, ENG 23, before enrolling in the 100-level corequisite course.

### *English Developmental Curriculum Redesign Results*

Fall 2016 data indicates that 26% of the students placed into developmental writing courses. Compared with the 2013-2014 academic year, 47% of the students placed into developmental reading, and 57% placed into developmental writing. This reduction in developmental English placements likely reflects recent revisions to the placement procedure as described above ([IIA-33](#)).

In the first year of the corequisite model (2016-2017), 40% of students who placed one level below college completed English 100 on time. Before the corequisite model, only 29% of students who were one level below college level completed English 100 on time. Preliminary analysis of the corequisite offering shows that this model benefits students who place one level below English 100, and the current offering increases their percentage of English 100 completion ([IIA-38](#)).

### *Support Services for Students in Developmental Courses*

Appropriate supports are also provided throughout developmental education pathways. For math, the college has supported Supplemental Instruction as a successful program in advancing student success through peer supported group tutoring and classroom support ([IIA-39](#)). Math is also supported through the Math Lab ([IIA-40](#)), Brainfuse online tutoring ([IIA-41](#)), and the Online Learning Academy ([IIA-42](#)). English is supported through Supplemental Instruction, the Writing Center ([IIA-43](#)), as well as Brainfuse and the Online Learning Academy. Currently, through a US Department of Education Title III project called Kahua Na'auao, Windward CC is developing a Peer Coaching model to further support non-cognitive needs of developmental education students in both math and English ([IIA-44](#)).

### **Analysis and Evaluation**

The College meets this Standard. The College Catalog ([IIA-2](#) p. 59) distinguishes pre-collegiate level curriculum from college-level curriculum through its numbering system. Pre-collegiate courses are offered in English and math. Disaggregated student performance outcome data have been analyzed by course level and student enrollment status every year in Annual Performance Data Reports (ARPD) compiled by the UHCC System. The results of this assessment have resulted not only in curricular redesign, but also in additional supports for students in developmental education courses.

Consideration of this data alongside instructors' qualitative reflections has led to an evaluation process that takes place in stages every year among discipline and department faculty, the Developmental Education Committee, counselors, administrators, Achieving the Dream data coaches, and, starting in 2015, the UHCC System Subgroup on English. These discussions have led to a revision of Windward CC's developmental English and math curriculum.

## **Standard II.A.5**

---

*The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level (ER 12).*

---

### **Evidence of Meeting the Standard**

The Curriculum Committee, composed of representatives elected from each credit Faculty Senate unit, is a standing subcommittee of the Faculty Senate and is the principal reviewing and recommending body on all aspects of the educational curricula. It adheres to UHCC policies ([IIA-5](#)) to ensure that the curriculum review process produces curriculum with appropriate length, breadth, depth, rigor, course sequencing, time to completion, and allows synthesis of learning to occur. This process of establishing and modifying courses and programs is described in Article V, Section A, subsection 1 of the Faculty Constitution ([IIA-45](#)). See Standard II.A.2 for a more in-depth discussion of the process.

### ***Graduation Requirements***

The graduation requirements for associate degrees are set forth in UHCC Policy #5.203 ([IIA-46](#)). To earn an AA degree, Windward CC students must complete 60 credits in courses numbered 100 or above with a grade point average of at least 2.0. Students who are awarded an AA degree from a UH Community College must have a community college cumulative GPA of 2.0 or higher for all course work taken in fulfillment of AA degree requirements. Concentrations (available in some degrees) include no fewer than 9 credits of related coursework. The College also adheres to a rigorous curriculum review and assessment process and engages in discussions of assessment results (ER 12).

### **Analysis and Evaluation**

The College meets this Standard. In accordance with the University of Hawai'i Community College's (UHCC) AA degree ([IIA-46](#)) and general education policy ([IIA-47](#)) the College develops curriculum to ensure appropriate breadth, depth, and rigor. The College follows UHCC credit hour system policy ([IIA-48](#)) ([IIA-50](#)) to ensure that the amount of work represented in intended student learning outcomes and evidence of student achievement is reflected in the number of course hours. The UHCC System data shows data for each college on the successful completion of degrees and certificates ([IIA-49](#), [IIA-50](#)).

## Standard II.A.6

---

*The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education (ER 9).*

---

### Evidence of Meeting the Standard

#### *Degree Pathways*

To ensure that students attain certificates and degrees in a timely manner, Windward CC has adopted degree pathways. From Fall 2015 through Spring 2017, select instructional faculty were trained in pathways and then visited each department to review and refine the pathways based on degree requirements. These pathways guide students to achieve their degree in a more efficient manner, recommending courses to fulfill requirements and providing error messages, which can be overridden, when the student chooses courses that do not help them progress to a degree (ER 9).

The pathways account for pre- and co-requisites as well as remediation needs for students. The pathways default to comply with University of Hawai‘i’s Strategic Directions’ Hawai‘i Graduation Initiative’s “15 to Finish” initiative ([IIA-51](#)). At Windward CC, students are encouraged to take 15 credits to maintain progress toward their degree (e.g. 60 credits for an AA degree in 4 semesters). However, students can override recommendations and take fewer (or more) courses ([IIA-52](#)).

#### *Scheduling Courses to Improve Efficiency*

Additional insight into scheduling has been gained through a STAR Velocity analysis, which considered each degree pathway, how efficiently students were progressing, and how scheduling might increase the ability to graduate in a timely manner ([IIA-53](#)). This analysis resulted in an effort to add Writing Intensive courses to ensure students could progress toward their degree. Scheduling was also considered through a study by Ad Astra ([IIA-54](#)), which noted that Windward CC utilized buildings very efficiently during peak hours and could not easily add more classes ([IIA-55](#)).

Courses are scheduled based on student need and enrollment. The Academic Affairs Advisory Council is responsible for course scheduling decisions and is made up of chairs of the academic departments, the unit heads of the library, Media Services, and Computing Services, the deans of Academic Affairs, and the vice chancellor for Academic Affairs ([IIA-56](#)). In 2017-18, the College began to pilot the development of a master schedule. Academic deans and department chairs reviewed 3 years of enrollment data for each of the 646 active credit courses offered by the institution to make data-driven decisions about course offerings. The master schedule, when fully implemented, will allow the College to better anticipate student course needs. The process entails:

- Discipline coordinators, in consultation with department chairs, submit class schedules to the department at the start of the previous semester ([IIA-57](#)).
- Division deans review the class schedules of their respective departments.

- Class schedules from each department are submitted to the Academic Affairs Advisory Council.
- The Academic Affairs Advisory Council, with representation from Student Affairs, reviews the College’s class schedule and makes final decisions to ensure that a sufficient number of diverse classes are offered in the afternoons, evenings, and online so that non-traditional students will be able to earn a degree.
- Low-enrolled course meetings occur, where department chairs, counselors, and administrators make cancellation decisions for low-enrolled courses.

### *Analysis and Evaluation*

The College meets this Standard. Windward CC has adopted degree pathways which are implemented via the STAR Guided Pathway System (GPS). Windward CC’s schedule is based on these pathways. The College schedules courses in a manner that allows students to complete certificate and degree programs in a period consistent with what has been established for higher education. In Spring 2014, The Academic Affairs Advisory Council articulated priorities and values related to scheduling ([IIA-53](#)), which are referred to for decision-making. These note that the first goal in scheduling classes is to “Offer courses students need for efficient progress to graduation.” Other scheduling priorities include “Degree pathways: provide courses in sequence and times needed to promote degree attainment,” and cancellation decision-making including factors such as whether another class is available at that time of the class being canceled which can fulfill the same degree requirement ([IIA-58](#)).

### **Standard II.A.7**

---

*The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.*

---

### **Evidence of Meeting the Standard**

#### *Professional Development to Support Changing Needs of Students*

The College’s Staff Development Committee offers faculty numerous professional development workshops to improve instructional strategies and delivery of instruction to the College’s diverse student population ([IIA-27](#)). These workshops include an 8-week workshop for developing scenarios online, workshops on acting and games in the classroom, strategies to address Native Hawaiian achievement gaps ([IIA-59](#)), strategies for online learning, understanding students with autism disorder, and interactive strategies in the classroom ([IIA-60](#)). Faculty also have the opportunity to attend the Hawai‘i Great Teachers Seminar to inspire good teaching and exchange ideas with other instructors ([IIA-61](#)). The College is systemizing professional development for online education. Please see the QFE on Distance Education for further details.

Professional development opportunities have been offered at each convocation since Spring 2015. During the semester, the College’s Title III STEM developer ([IIA-62](#)) provides individualized help to STEM faculty, the media specialist provides individualized help to

Liberal Arts/Hawaiian Studies faculty, and the CA in Veterinary Assisting online coordinator provides help to neighbor island Veterinary Technology faculty and students.

In addition, the College offers Windward Staff Development Hui. These informal groups, or hui, share common interests and knowledge, which encourage faculty and staff to come together and improve teaching in certain areas. For example, hui form to discuss online teaching and technology, Reading Across the Disciplines, and Hawaiian Culture and Values ([IIA-63](#)). In addition, the Staff Development Committee provides funding for a variety of development activities such as attending a conference or putting on a workshop. To support new faculty, the College offers an orientation workshop ([IIA-64](#)) (IIA-72) as well as guidance from their respective department chair ([IIA-65](#)).

Furthermore, professional development activities such as attending national conferences are regularly pursued by Windward CC faculty.

### *Distance Education Supporting the Changing Needs of Students*

The Distance Education Committee and the Office of Institutional Research (OIR) provide comparisons between success and withdrawal rates for face-to-face and distance education classes as well as specific student demographic information on indigenous and underserved populations ([IIA-66](#)). As reported in the College's 2016 Executive Summary ([IIA-62](#)), 120 Distance Education (DE) classes were offered in 2015-16, compared to 108 in 2014-15 and 96 in 2013-14. The fill rate is over 80% for distance education classes in all degree programs except for Veterinary Technology (60%). The AA in Hawaiian Studies, in particular, has a 98% fill rate for distance education, providing information to the College that more classes should be added. Persistence has decreased in Liberal Arts to 43% (c.f. 49% AY15, 48% AY14). This low persistence rate likely reflects the large number of students from other campuses taking online classes here when it is convenient. This is reflected in Windward CC's large percentage of "home campus-other" students.

The 2016 Executive Summary also reports that DE success at Windward CC is also increasing. For Veterinary Technology, the success rate for DE classes is better than that of the face-to-face classes (i.e. 100% vs. 87%). For Hawaiian Studies and Liberal Arts, the difference between success in the traditional face-to-face format vs. DE classroom is only 5%. This compares to a 16% differential in 2010-11 ([IIA-62](#)). These improved outcomes have been accomplished by intentional, planned faculty and student support. The College's distance education QFE details action steps that will enable the college to better serve the needs of online students.

### *Support Services for Academic Success*

The College offers a variety of support services to ensure academic success as discussed in Standard II.B.

- To support students with disabilities, the College offers disability services such as assistive technologies ([IIA-67](#)).

- To support incarcerated students, the College has begun its Pu‘uhonua initiative, which includes academic advising, peer mentoring, and credit coursework at 2 facilities ([IIA-68](#)).
- To support low-income students, the Office of Continuing Education enrolls students in the State’s SNAP program for assistance with food, transportation, childcare, and educational costs ([IIA-69](#)).
- To support all students, the College offers Supplemental Instruction ([IIA-39](#)), Peer Coaching ([IIA-44](#)), Ka Piko Student Success Services ([IIA-70](#)), Library Learning Commons ([IIA-71](#)), and TRIO ([IIA-72](#)), and STAR Graduation Pathway System (GPS) ([IIA-73](#)).
- To support online students, the College offers Brainfuse online tutoring ([IIA-41](#)) and access to the Online Learning Academy, a service of UH Mānoa.
- To support non-credit students, the Matsuda Center at the College offers non-credit courses ([IIA-74](#)).
- To support science students, the College offers PaCES ([IIA-75](#)).
- To facilitate student/teacher interaction for student success, the College has My Success ([IIA-76](#)).
- To assist students with writing assignments, the College has The Writing Center ([IIA-43](#)).
- To provide assistance for math courses, the College has the Math Center ([IIA-40](#)).
- To help students with their speech courses, and speech assignments in all classes, the College has the Speech Lab ([IIA-77](#)).

## **Analysis and Evaluation**

Windward Community College meets this Standard. The College effectively uses a variety of delivery modes and teaching methodologies to support the success of all its students. The College’s Staff Development Committee offers faculty numerous professional development workshops to improve instructional strategies and delivery of instruction to the College’s diverse student population. The Distance Education Committee and the Office of Institutional Research support faculty by providing data on the effects of student success in various delivery modes. The College offers a variety of support services to ensure the academic success for students.

### **Standard II.A.8**

---

*The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.*

---

## **Evidence of Meeting the Standard**

### *Prior Learning Assessment*

The College has recently begun to implement Prior Learning Assessment (PLA). Students with life and work experience can shorten the path to a college degree by applying for PLA, a process through which students earn college credit by identifying and documenting college-level learning acquired through life experiences. Students with such life experiences may

choose to validate their expertise through a number of evaluation procedures. Awarding of credits at Windward CC applies ONLY to degrees and/or certificates a student is enrolled in at this institution ([IIA-2](#) p. 29).

In Fall 2017, the first 2 instances of PLA credit awarding occurred. Students with prior knowledge of Hawaiian language were tested for proficiency using the final exam administered to students in Hawaiian 101. Students were given materials to review such as the syllabus, including learning outcomes, and course textbook to allow them to prepare. All students taking the test passed. The discipline coordinator reviewed the exam and results to ensure reliability. Prior Learning was also given to students who took a high school course in botany which was similar to preparation for our college level botany course. The College's instructor met with the high school instructor to discuss what additional outcomes and rigor needed to be met and formed a plan for additional assessment. The students completed additional projects beyond the high school course requirements to demonstrate meeting the college level outcomes. Their work was reviewed by our discipline coordinator and assessed to determine whether it met the same outcomes as the college course. All students completing these advanced projects were given credit.

### *Credit By Exam*

Students who present evidence of having achieved course objectives through prior experience may also apply for credit by exam ([IIA-78](#)). Credit by exam is not available for all courses. Students are advised to check with individual instructors and the department chairperson on a course-by-course basis. Credit may also be awarded to students who have taken Advanced Placement courses and the affiliated test during high school by presenting a transcript from the College Board.

Students must be officially enrolled in at least one course at the College, other than the course they wish to receive credit by exam for, during the semester in which credit by exam is attempted. The credit by examination form must be filed with the Admissions and Records Office prior to the end of the late registration period ([IIA-78](#)). Students are charged for credit by exam courses at the prevailing tuition and fees rate regardless of the outcome of the examination ([IIA-79](#)).

### **Analysis and Evaluation**

The College meets this standard. Prior learning assessments are offered, such as Credit-by-Institutional-Exams, as well as portfolio-based assessment projects to award college credits.

### **Standard II.A.9**

---

*The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions (ER 10).*

---

## Evidence of Meeting the Standard

Standard II.A.5 discusses how the College follows policies and practices common to higher education to ensure that all degrees and certificates developed are based on student attainment of learning outcomes ([IIA-46](#)). The College's general education policy is designed to incorporate the College's general education learning outcomes of Global and Cultural Awareness, Critical Thinking and Creativity, Communication, and Information Literacy into the curriculum ([IIA-47](#)).

### *Credit-Hour Policy*

According to the UHCC Policy 5.228 on credit hours ([IIA-48](#)), a credit hour is an amount of work represented in intended student learning outcomes and verified by evidence of student achievement. The policy defines a credit hour as 50 minutes to one hour of class or faculty instruction and a minimum of 2 hours of work per week outside of class over approximately 15 weeks. Across the UHCC System, a credit is defined as 45 hours of direct and indirect instructional, student work within a standard semester or equivalent term of study (accelerated terms, summer terms, etc.). In general, this reflects the expected work a student, prepared for the class, would need to achieve the intended student learning outcomes (ER 10).

The credit hour policy is described in the Catalog ([IIA-2](#)), the College's Curriculum Policies ([IIA-5](#)), within the AA degree/GE policy ([IIA-47](#), [IIA-46](#)), and within the Course Credit policy ([IIA-48](#)).

## Analysis and Evaluation

The College meets this Standard. Course credit, degrees, and certificates are awarded based on student attainment of learning outcomes. Faculty develop course learning outcomes to reflect the course objectives that students should demonstrate upon successful completion of the course. These learning outcomes are vetted by faculty through the curriculum approval process to ensure that the outcomes are clear and measurable, and that assignments directly indicate student learning. The College's general education policy is designed to incorporate the College's general education learning outcomes of Global and Cultural Awareness, Critical Thinking and Creativity, Communication, and Information Literacy into the curriculum ([IIA-47](#)). In addition, the College follows UHCC System credit-hour policy ([IIA-48](#)) and that academic credit hours awarded follow the Carnegie Unit, which is a widely followed practice to ensure that the amount of work represented in student learning outcomes and evidence of student achievement is reflected in the number of course hours.

## Standard II.A.10

---

*The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission (ER 10).*

---

## **Evidence of Meeting the Standard**

### *Transparency of Transfer of Credit Policies*

The procedures to transfer credits from other institutions are available to students in the Catalog ([IIA-2](#) p. 29), through the Office of the Vice Chancellor of Student Affairs, through academic counselors, and on the College's website. To ensure that transferred courses are comparable to the College's courses, counselors conduct transcript evaluations in which they match course descriptions with other institutions' course descriptions and consult with discipline faculty. While counselors strive for consistency in matching learning outcomes, the course descriptions from other institutions may or may not include them.

According to the Acceptance of Credits in Transfer Policy, counselors accept credits if the College has the same or a similar course. If the College does not teach the same course, transfer credit will be approved whenever possible to fulfill related degree "Core" (Foundation/Diversification) requirements or elective options. Only those credits that apply to the student's degree objective will be approved for transfer ([IIA-80](#)). Additionally, students in the UH System may also use the UH System Course Transfer Database ([IIA-81](#)), an online resource that explains how courses transfer between institutions.

### *Supporting Articulation Agreements in the UH System*

The College has taken steps to facilitate transfer to the baccalaureate institutions in the UH System. The UH System formalized a General Education Articulation Agreement ([IIA-3](#)) to facilitate the immediate and unencumbered transfer of general education core requirements, which include the Foundations/Basic and Diversification/area requirements. Graduates from any of the 7 UHCC System colleges are automatically admitted to any of the 3 UH System baccalaureate institutions. In accordance with UHCC Reverse Transfer Policy ([IIA-82](#)), students who transfer to one of the 3 UH 4-year universities without receiving a degree are reviewed through the reverse transfer process to determine if the courses they took at the 4-year university will complete degree requirements for an Associate of Arts or Natural Science degree ([IIA-83](#), p. 3) (ER 10).

## **Analysis and Evaluation**

The College meets this standard. The College facilitates students' academic progress through its transfer-of-credit and articulation policies. Students who present evidence of having achieved course objectives through prior experience may apply for credit by exam and advanced placement. The College has taken steps to facilitate transfer to the baccalaureate institutions in the UH System. The College has clearly identified associate degrees for transfer and approved courses. Information for transfer of credit and articulation are clearly stated in its College Catalog and on its website. These resources, along with counselors, help facilitate the transfer of credit process.

## **Standard II.A.11**

---

*The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative*

*competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.*

---

## **Evidence of Meeting the Standard**

### *Program and General Education Learning Outcomes*

As a result of broad discussion and campus-wide efforts to review the appropriateness and effectiveness of the College's GELOs and PLOs, they were rewritten, approved, and implemented in 2012. The College's GELOs are Global and Cultural Awareness; Critical Thinking and Creativity; Communication; and Information Literacy ([IIA-84](#)), and serve as the College's institutional learning outcomes (ILOs). Quantitative competency has been ensured by math degree requirements to date (this will be replaced by the Foundations requirement in Quantitative Reasoning (FQ), effective in Fall 2018). The math degree requirement and FQ are part of the GELO Critical Thinking and Creativity. Program learning outcomes are listed on the College website and published in the College print and online Catalog for all degrees and certificates ([IIA-2](#), [IIA-84](#), [IIA-85](#)).

### *Assessment of Learning Outcomes and College-wide Dialogue*

SLOs, PLOs, and GELOs are assessed simultaneously by faculty teaching a particular course. All course assessment results are entered and stored within the College's assessment database, where individual course SLOs are mapped directly with their corresponding GELOs. After these individual course assessments are complete, departments meet to discuss the results, and decide what resources are needed in order to better facilitate student success ([IIA-86](#)). After these department discussions, the Institutional Effectiveness Committee (IEC) facilitates College-wide dialogues where faculty meet to discuss the GELO results in order to decide what actions will be taken to improve student learning ([IIA-87](#), [IIA-88](#)) (ER 12).

## **Analysis and Evaluation**

The College meets this standard. The College's GELOs and PLOs have been revised to address the College's commitment to institutional effectiveness and now include Global and Cultural Awareness, Critical Thinking and Creativity, Communication, and Information Literacy. PLOs are listed on the College website, and published in the College print and online Catalog for all degrees and certificates. All learning outcomes are assessed on a schedule as discussed in Standard II.A.3 above, and the College facilitates College-wide dialog to discuss and act on the results of learning outcome assessment.

## **Standard II.A.12**

---

*The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible*

*participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences (ER 12).*

---

## **Evidence of Meeting the Standard**

### *General Education Curriculum Rooted in General Education Philosophy*

The College follows UHCC General Education Policy 5.200, which requires a general education component for all degree programs ([IIA-47](#)). The policy delineates the general education philosophy followed by the College, that students should have “an understanding of the basic content and methodology of the major areas of knowledge,” including the humanities and fine arts, the natural sciences, and the social sciences ([IIA-47](#) p. 2).

All credit programs of study at the College require sufficient depth in the discipline/field as well as achievement of breadth in the 2, required general education areas of “diversification and foundation.” The diversification requirement allows students to examine different domains of academic knowledge such as arts, humanities, literature, natural sciences, and social sciences. Foundation courses, such as written, global and multicultural perspectives and symbolic reasoning, provide students with the basic skills for higher education.

Courses are regularly reviewed for their connection to diversification and foundation hallmarks through the curriculum review process. Each course added to the curriculum at the College is required to list the specific SLOs as well as the GELOs and PLOs during the proposal process. This learning outcome mapping is reviewed by the Curriculum Committee, Faculty Senate, and Administration (ER 12).

The College General Education Mission Statement is clearly articulated in the College Catalog, along with an explanation of all degrees, programs, and certificates ([IIA-2](#) pp. 34, 35).

## **Analysis and Evaluation**

The College meets this Standard. The general education requirements as well as diversification and foundation requirements are published in the College Catalog. The curriculum process ensures that SLOs and PLOs are aligned to the College’s GELOs.

## **Standard II.A.13**

---

*All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.*

---

### **Evidence of Meeting the Standard**

#### *Programs, Concentrations, and Certificates*

The College offers degree programs with both general education requirements and an area of specialization. Students can earn an Associate of Arts in Liberal Arts or Hawaiian Studies, or an Associate of Science in Natural Sciences and Veterinary Technology ([IIA-46](#)). In addition, the AA in Liberal Arts degree program has an interdisciplinary core that prepares students for transfer to a 4-year college with a significant introduction to broad areas of knowledge, theories, and methods of inquiry, along with the College's diversification requirements. The AA Liberal Arts degree has an available concentration in Visual Arts, and the ASNS degree has concentrations in Engineering, Biological Sciences, Physical Sciences, and Information and Computing Technology.

The College also offers 4 Academic Subject Certificates (ASCs) which enable students to acquire training and instruction in career paths that typically require a bachelor's degree or above for employment, including Bio-Resources and Technology: Bio-Resource Development and Management, Business, Hawaiian Studies, and Psycho-Social Development Studies ([IIA-2](#) p. 52). These ASCs allow students to focus on their area of special interest and prepare graduates for immediate employment in specific career areas. The College also offers 2 Certificates of Achievement: Agripharmatech and Veterinary Assisting, and 5 Certificates of Competence: Information Computer Science-Web Support, Information Security, Agricultural Technology, Plant-Food Production and Technology, and Sustainable Agriculture—the last 3 having been stopped out.

Additionally, the Office of Career and Community Education (CCE) offers courses and employment training in Health, Ocean Safety, Hospitality, Finance, Construction, and Business. The CCE has actively engaged businesses to develop new and relevant courses reflecting workplace competencies identified by employers. Students enrolled in the College's Health, Hospitality, and Safety sectors take industry exams leading to State or National certifications ([IIA-69](#)).

The College's Curriculum and Program Review processes require that faculty in charge of each interdisciplinary core develop and assess program student learning outcomes that demonstrate students' proficiency in a particular area of specialization. As discussed in Standard IIA-2, during the curriculum approval process, course and program learning outcomes are developed and approved and then specifically mapped to those program and general education learning outcomes by the department teaching the course. This process ensures that program graduates achieve the outcomes necessary to be successful for transfer or employment.

## **Analysis and Evaluation**

The College meets this Standard. Each degree, including the Associate of Arts in Liberal Arts, includes a focus of inquiry that reflect the knowledge and skills required for that particular interdisciplinary area. Each degree develops program student learning outcomes that are aligned with appropriate course content and are assessed regularly through the program review process to ensure that each degree maintains appropriate rigor to prepare students for transfer or employment opportunities.

### **Standard II.A.14**

---

*Graduates completing career technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.*

---

### **Evidence of Meeting the Standard**

#### *Career-Technical Programs*

The College includes a small number of credit career-technical programs: Agripharmatech, Plant Landscaping/Agricultural Technology (admissions stop out August 2016), Subtropical Urban Tree Care (stopped out, August 2016), Veterinary Assisting, and Veterinary Technology that meet industry standards and external licensure and certification, and are designed to train students for direct employment into various industries. As discussed in Standard II.A.13 above, the College offers 4 Academic Subject Certificates which enable students to acquire training and instruction in career paths that typically require a bachelor's degree or above for employment as well as 5 Certificates of Competence. The College's non-credit unit, CCE, offers a Certified Nurse Aide training program leading to a certification from the State of Hawai'i Department of Health. More recently, this program has been expanded to become Hawai'i's first CNA Apprenticeship program in partnership with local healthcare businesses. The CCE's hospitality courses are aligned with American Culinary Federation competencies and lead to various credentials with the National Restaurant Association. The CCE recently joined a finance sector steering committee to co-develop a competency based training, named Universal Banker. Please see Standard II.A.16 for further discussion.

#### *Assessing Career-Technical Programs*

The credit and non-credit curriculum review processes require that all program goals are based upon labor market needs assessments and that program student learning outcomes reflect published industry standards as well as the College's general education learning outcomes. For example, classes created for the AS degree in Veterinary Technology and Certificate of Achievement in Veterinary Assisting were designed using the essential skills checklist published by the American Veterinary Medical Association.

In addition, each career-technical program utilizes advisory committees which include faculty and industry representatives to ensure that the training offered at the College is current and meets workforce needs and complies with industry standards. Finally, program

coordinators assess their programs annually through the Annual Assessment/Program Review Process ([IIA-89](#)). These mechanisms help to ensure that program graduates meet industry standards and can quickly enter the workforce.

For example, in spring of 2017, a gainful employment survey was conducted for Fall 2014 – Fall 2016 graduates of the CA in Vet Assisting program ([IIA-90](#)). The purpose of the survey was to assess graduates’ job placement rate, conveyed as the percentage of respondents who self-reported employment related to their education within 6 months of graduating Windward CC, and to publish these findings to allow prospective students the ability to make informed decisions regarding their educational endeavors. All graduates with an email on record received an invitation to complete the survey, along with 4 reminder emails. All graduates with a current, valid mailing address received a hard copy survey as well. A link to the survey was also posted on a Facebook page for vet graduates. Of the 70 graduates sent surveys, 32 graduates responded (45.7% response rate). Of the responders, 78.1% (25 of 32) were employed in a job related to their Windward CC education within 6 months of graduating from Windward CC. This data is now provided on the Windward CC website, and the procedure will be repeated yearly with all new CA in Vet Assisting graduates ([IIA-90](#)).

### **Analysis and Evaluation**

The College meets this Standard. The College’s career-technical programs are developed to meet industry standards and align with the general learning outcomes of the College through the College’s credit and non-credit curriculum review process. These standards are maintained through the Annual/Assessment/Program Review Process, advisory board feedback, labor needs assessment and student completion rates to ensure that graduates are prepared to enter the workforce successfully.

### **Standard II.A.15**

---

*When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.*

---

### **Evidence of Meeting the Standard**

#### *Supporting Students After Changes in Programs*

The College’s curriculum review process ensures that when programs are eliminated, or if program requirements are significantly changed, the College makes appropriate arrangements so that enrolled students may complete their education in a timely manner ([IIA-5](#)). Once a credit or non-credit program has been eliminated, the College informs students through the Catalog, the College website, open forums, newspaper articles, and advising sessions with counselors, and stops accepting new students.

For example, an assessment of the Annual Reports of Program Data for the Agricultural Technology program demonstrated low retention, weak graduation, and poor rates of job placement. This data and the retirement of the single Agriculture faculty member led the College to implement a 2-year “admissions stop out” in 2016. All declared students were

notified of the stop out by email and/or registered letter. Individual meetings with the academic dean were scheduled to determine the courses students needed for graduation and to determine a timeline for their completion. Support services were offered by counselors and the academic dean, and individualized courses were scheduled for all declared Agricultural Technology and Subtropical Urban Tree Care students. This effort resulted in the conferral of 12 certificates between 2014 and 2017. Currently there are no students enrolled in these programs and the institution is now assessing the curriculum, working to engage the industry, hiring faculty, and ultimately redesigning the Agriculture programs to better meet current and emerging industry needs ([IIA-91](#)).

### **Analysis and Evaluation**

The College meets this standard. The College's Curriculum Review Process ensures that the elimination of any program will not be approved by the Curriculum Committee unless accommodations are provided to ensure that students already in the program complete their education in a timely manner. The College communicates the elimination of a program to students through various modalities provides individual assistance to all students declared in these programs, designs a program to ensure that the program of study may be completed, and provides the courses needed by these students.

### **Standard II.A.16**

---

*The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.*

---

### **Evidence of Meeting the Standard**

#### *Evaluating and Improving Instructional Programs*

The College systematically evaluates and improves all instructional programs to maintain high quality and currency of courses and programs in order to support student learning outcomes and achievement. As discussed in Standard IIIA.1 and Standard IIIA.2, the development of quality programs begins with the hiring of quality faculty whose focus is on effective teaching, professional development, and service to both the College and community. As discussed in Standard III.A.14, the faculty review process provides feedback to faculty on any areas needing improvement, which then allows faculty to seek professional development to improve their effectiveness ([IIA-27](#)).

The College maintains the high quality and currency of its courses and programs through its Curriculum and Program Review Process. As discussed in Standard II.A.2, the Curriculum Review Process ensures that all new courses or modifications to courses, programs, degrees, and certificates reflect both College and UHCC system policies, and that student learning outcomes align at the course, program, and institutional level outcomes. As discussed in Standard IIA.3, the College uses the Annual Assessment/Program Review Process to

maintain its high-quality curriculum as well as its student support programs, to ensure that students are satisfying the College's learning outcomes and achieving their academic goals.

### *Continuing Education and Training Unit and Non-credit Training and Courses*

The College also offers a variety of non-credit training and courses through its Continuing Education and Training Unit (OCET) within the Office of Career and Community Education (OCCE). This unit is committed to providing education and training to meet the needs of the state's workforce and community enrichment ([IIA-69](#)). Since 2013, the OCCE has actively engaged industry partners, resulting in a 300% growth for the unit. The unit has responded by creating 2 mainstay programs servicing the Health ([IIA-92](#)) and Ocean Safety ([IIA-93](#)) sectors and 4 new units: Hospitality and Food Service ([IIA-94](#)), Business and Leadership ([IIA-95](#)), Computer Skills ([IIA-96](#)), and Facilities Maintenance.

One of the OCCE's new initiatives is a partnership with the Hawai'i Banker's Association (HBA) and a few of Hawai'i's major Banks: First Hawaiian Bank, Bank of Hawai'i, Hawai'i National Bank, Central Pacific Bank, American Savings Bank, and Territorial Savings. The Bank HR Departments are redefining their teller positions to transform to new positions entitled "Universal Bankers" ([IIA-97](#)). HBA and Bank Executives have been meeting with OCCE to define these new job duties and identify the new skills sets and competencies needed in their new roles. OCCE is now developing the courses, defining learning outcomes, assessment measures, and instructional resources to retrain Hawai'i's current tellers. The final curriculum will be certified by both the College and the Hawai'i Banker's Association as an industry-driven and approved training. The courses will also be offered to the public and high schools in order to provide a better-prepared employment pool for the banks. This new career pathway is intended for Statewide delivery through all 7 campuses and began its pilot offering in July 2017 ([IIA-98](#)).

The OCCE also seeks to improve the quality of life for community members and provide employment training assistance to individuals, businesses, and government offices. Traditional courses for community members include Tai Chi, Photography, Music, Ikebana, Writing, Arts and Crafts. These personal enrichment offerings have been in response to community interest and will typically change in schedule or content based on community input ([IIA-69](#)).

Additionally, over the past 17 years, the OCET has partnered with the State of Hawai'i Department of Boating and Recreation to offer community certification training required by the State in Ocean Safety. ([IIA-93](#)). Annually, over 300 community members receive their State certifications through these courses offered at Windward CC.

### **Analysis and Evaluation**

The College meets this standard. The College's hiring practices, faculty evaluation system, professional development opportunities, and the curriculum and program review processes ensure that high quality curriculum is developed and maintained to help facilitate student success. Workforce training and community education are also offered to provide additional opportunities for everyone in the College's community to achieve their personal, professional, and academic goals.

## Standard II.B.1

---

*The institution supports student learning and achievement by providing library and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and learning support services (ER 17).*

---

### Evidence of Meeting the Standard

Information and learning support services at Windward CC are provided primarily through the Office of Academic Affairs, which oversees the Academic Support division—comprising the Library, Computing Services, Media Services (recently reorganized into Media & Technology Services and Instructional Development), the Testing Center, and Ka Piko Student Success Center ([IIB-1](#), [IIB-2](#)).

Additional learning support services, including TRiO Special Student Services, operate under the auspices of the Office of Student Affairs ([IIB-3](#), [IIB-4](#) p. 16).

#### *Library*

The Library is open 61 hours per week in a contemporary, 69,000-square foot facility constructed in 2012. It houses nearly 50,000 items — including a 5,500-volume Hawaiiana collection — and provides authenticated access to over 160,000 ebooks, 50,000 videos, 27,000 of e-periodicals, and hundreds of e-reference resources ([II-5](#) p. 2). The count of circulations, e-books used, and full-text articles downloaded per student and faculty FTE numbered 42.1 in FY 2017 ([IIB-6](#)).

Half of library users have reported using the physical Course Reserves service during the semester ([IIB-7](#) p. 2). Most UH libraries offer patron-initiated, reciprocal borrowing privileges and will transfer circulating items to any other UH campus for users to borrow free of charge. Windward CC offers a patron-initiated, authenticated article request service via OCLC's WorldShare ILL ([IIB-8](#)).

Librarians provide reference and research consultation services 56 hours per week by phone, email, and in person. Collaborative curricular support is provided through assistance to faculty in integrating information literacy instruction into courses, creation of online pathfinders and tutorials, identification of and facilitated access to primary and supplemental instructional materials, and facilitation of learning activities tailored to specific classes and assignments ([IIB-9](#) pp. 8-9, [IIB-10](#) p. 3, [IIB-11](#), [IIB-12](#), [IIB-13](#)). All ENG 100 courses assign the Library's information literacy curriculum, and librarians offer live workshops to traditional and remote classes (in person or via Polycom for dual-enrollment courses), and via screencasts for online courses ([IIB-14](#), [IIB-15](#)).

## *Information and Educational Technologies*

The Library, Computing Services (CS), Media Services (MS)—recently reorganized into the Instructional Development (ID) and the AV & Technology Services (AVTS) departments—the Professional Development Committee, and the University of Hawai‘i’s Information Technology Services (UH ITS), provide equipment and other resources, support, and user training in computing and learning technologies for on campus, remote, and distance learning as detailed in section IIIC.

The CS, ID, and AVTS departments proactively provide, maintain, and support technology resources in the College's shared learning facilities ([IIB-16](#) pp. 1-4, [IIB-17](#) pp. 3-11, [IIB-18](#), [IIB-19](#)). UH ITS, UHCC, or the College variously license and administer learning management systems (LMS) ([IIB-17](#) p. 9), teleconferencing technologies, instructional technology services, online tutoring programs ([IIB-20](#)), and productivity software ([IIB-21](#), [IIB-22](#), [IIB-23](#), [IIB-24](#)).

The College’s learning support units use a variety of technology hardware, software, services, and technical support resources. These include student retention and guided pathways registration systems ([IIB-25](#), [IIB-26](#)), online testing and tutoring services, telecommunication platforms ([IIB-27](#), [IIB-28](#), [IIB-29](#)), and the computers, peripherals, e-content, and assistive technologies in the library and learning labs ([IIB-22](#), [IIB-30](#), [IIB-31](#), [IIB-32](#)).

### *Testing*

The Testing Center has a main room for 36 people with a second room for 28 more during peak periods. It serves any academic institution or community member with walk-in testing and proctoring for courses, college placement, basic education, pre-employment, and professional certification exams ([IIB-33](#), [IIB-34](#) p. 2, [IIB-35](#) p. 2). For students who cannot use the Testing Center due to hospitalization, deployment, geographic isolation, etc., the College has an agreement with ProctorU as an option for instructors to provide authenticated, secure, and monitored remote-testing ([IIB-36](#) p. 1).

### *Tutoring*

Tutoring services are offered by a variety of programs, which have proliferated in recent years due to several grant initiatives. In Fall 2016, most were consolidated into the Academic Services division’s Ka Piko Student Success Center—a loose affiliation comprising the Writing Center, Math and Speech Labs, the Supplemental Instruction program, and the Ho‘onui ‘Ike academic assistance program ([IIB-36](#) p. 1). The Peer Mentoring program and the federal TRiO programs, including TRiO Student Support Services ([IIB-37](#) p. 5), remain under the auspices of the Office of Student Affairs.

In AY2016, the Writing Center and Math and Speech Labs were open 30-42 hours a week and served 23, 17, and 16 percent of enrolled students, respectively ([IIB-36](#) p. 4). The Supplemental Instruction (SI) program employs a full-time grant-funded coordinator to hire, train, and schedule the SI leaders for gatekeeper and historically difficult courses. SI leaders are former course completers who attend class and lead structured study sessions ([IIB-37](#) p.

2, [IIB-36](#)). 30 percent of students enrolled in developmental education classes have made use of the Writing Center, Math Lab, or Supplemental Instruction ([IIB-37](#)).

Like the SI program, Ho‘onui ‘Ike similarly supports students in developmental courses by providing peer coaches to give individual and group tutoring ([IIB-38](#)), staff the student Writing Lounge in the Language Arts building ([IIB-39](#)), and will soon provide walk-in and teleconferenced sessions for night and distance education students ([IIB-40](#)).

The Federal TRiO Special Student Services program works with disadvantaged students (first-generation, Pell-eligible, or disabled). Its learning support services include individual and small group tutoring, and training in study and financial literacy skills ([IIB-3](#)). TRiO SSS tutored students in 50 courses in AY 2016 ([IIB-41](#) p. 26). The Peer Mentoring Center helps with registration, new student orientations, Frosh Camp, and offers some peer tutoring ([IIB-4](#)).

In 2013, UHCC acquired a license with Brainfuse to provide authenticated-access to online tutoring services for gateway courses ([IIB-22](#)). In AY 2016, Windward CC students had the third highest usage in the System ([IIB-37](#) p. 5).

UH Mānoa’s Online Learning Academy (OLA) provides additional free online one-on-one tutoring in writing and STEM subjects to any UH or Hawai‘i DOE student. It also offers an online EdReady college entrance and placement exam preparation program ([IIB-42](#)).

Although we have no data on its use by Windward CC students, some faculty recommend OLA in their syllabi ([IIB-43](#), [IIB-44](#)).

## **Analysis and Evaluation**

The College meets this standard by providing the information and learning support services it needs to support its mission and instructional programs (**E17**).

The Library’s collections and services are robust and are continuously shaped to meet the needs of the College’s mission and programs. For example, concurrent with its mission-driven mission to serve Native Hawaiians, Windward CC has increasingly incorporated indigenous ways of knowing and learning into its curricula, adding Hawai‘i-related courses and Hawaiian Studies programs ([IIB-45](#)). Accordingly, the College has created and funded a Hawaiian Specialist Librarian to start in fall, 2018 ([IIB-31](#) p. 3) whose duties will include supporting efforts to improve access, support, and success for Native Hawaiian Students ([IIB-46](#) p. 1).

The College has identified a need to fortify the support it offers in instructional design and educational technologies and has recently reorganized its Media Services department into 2 new units, upgrading several staff positions and freeing the faculty Media Specialist from managerial tasks in favor of instructional development activities:

1. Media & Technology Services, concentrating on meeting the technology infrastructure, equipment, and support needs for digital and classroom instruction, and
2. Instructional Development, focusing on the production, development and duplication of materials, and strategies and technologies to augment and deliver instruction ([IIB-25](#) p. 3,

[IIB-2](#), [IIB-47](#)).

As detailed in Section III.C, the multi-tiered provision of technology infrastructure, services, and support has helped to ensure that Windward CC's information technology services, facilities, hardware, and software are appropriate and adequate to support its operations and programs.

The College's testing services can meet the needs of its instructional programs during typical and peak periods for most traditional and distance courses.

Tutoring services are plentiful, effective, and used by about 40% of students ([IIB-36](#) pp. 3-4), yet several areas for improvement exist. By institutionalizing funding and coordination, the College could offer more consistent training, quality, access, assessment, and planning. This could, for example, facilitate identification of learning and service gaps, and ensure improved access and quality of services for students in distance learning and evening courses, Native Hawaiian students, or other populations ([IIB-36](#) p. 5, [IIB-48](#), [IIB-49](#), QFE: DE, QFE: NH).

The College has identified several ways it might enhance its library services to distance and remote students ([IIB-50](#), QFE: DE), expand its instructional development services, offer more educational technologies training and support ([IIB-9](#) p. 16, IIB-27 p.6, IIB-33 pp. 4-7, IIB-34 pp. 7-8, QFE: DE), and more closely coordinate its tutoring services (IIB-41, IIB-80, IIB79, QFE: DEP, QFE: NHP). In addition to benefits to all learners, these changes could potentially assist in meeting the goals of academic parity for distance learners and Native Hawaiian students (QFE: DE).

## **Standard II.B.2**

---

*Relying on the appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.*

---

### **Evidence of Meeting the Standard**

#### *Library*

The library has 8 full-time, permanent employees: 4 faculty librarians and 4 professional staff committed to providing services that enhance teaching and learning (IIB-3 pp. 3-4, IIB-5 p. 3). In support of Windward CC's Mission, the librarians serve as discipline liaisons and routinely consult faculty in selecting library resources to support the curricula (IIB-14 pp. 19-21, IIB-15 p. 11). A Collection Management Librarian was hired in 2016 to improve the library's support of student learning through the systematic assessment and development of information resources (IIB-3 p. iii). A librarian with specialized training leads preservation workshops for library staff, maintains an Emergency Procedures and Response Plan, and maintains an inventory of related equipment and supplies (IIB-57, IIB-58). A new Hawaiian Specialist Librarian position will provide the subject expertise needed to enhance the library's Hawaiiana collection in support of an ongoing trend toward curricular indigenization and the growth in the Hawaiian Studies programs (IIB-106).

### *Information and Educational Technologies*

Computing Services' mission is to facilitate meeting College needs for highly effective information technology resources, support, planning, and management (IIB-63). It comprises 5 full-time employees: a faculty Coordinator and 4 professional IT Specialists who work with faculty and staff to identify, acquire, and maintain the equipment, software, and services they need (IIB-33 p. 1, IIB-46). For example, to support new courses and a planned certificate in Creative Media, the department outfitted a classroom with new furniture, computers, and software. They also provided computing resources and technical consulting to facilitate the transfer of the Hawai'i State's Learning to Grow program and staff to the campus (IIB-34 p. 6-7).

Through AY2017, the Media Services department had 4 full-time employees with the mission to provide up-to-date media technology and efficient and congenial services to sustain and support the effective learning environment of the College (IIB-62 p. 1); a permanent faculty Media Specialist (analogous to a department chair) and a professional staff comprising a Distance Education Technician, a Distribution Manager, and a temporary, casual-hire Electronics Technician, along with 2.0 FTE student assistants (IIB-33 p. 2). Though now in separate units following reorganization, they continue to use a collaborative team approach, working closely with faculty and other Academic Support units to meet the audio-visual and instructional technology needs of the College (IIB-33 p. 4).

The Testing Center has a full-time professional staff that participates in selecting equipment and services such as security cameras and assessment instruments for academic placement (IIB-12 p. 3).

### *Academic Disciplines*

Faculty and staff subject experts determine specific technology or equipment needs within their disciplines or programs. For example, faculty in the Veterinary Health programs sought funding 2016 for equipment required for training students and maintaining accreditation requirements (IIC-81). Similarly, other individual departments plan and acquire technology resources needed for their disciplines or programs (IIB-94 p. 29-30, IIB-95, IIB-96, IIB-85 pp. 33-36, IIB-92).

### **Analysis and Evaluation**

The College meets this standard by employing qualified learning support personnel who use their expertise to select and maintain educational equipment and materials, to support student learning, and to enhance the achievement of the mission. As the College continues to expand into online education and to grow new programs, evolving staffing requirements and funding for equipment and technological infrastructure will need thoughtful consideration.

As the College pivots toward increased offerings of online courses, additional permanent personnel with the expertise to select appropriate materials and equipment will prove important, especially in efforts to achieve parity in academic success for distance learners (DE QFE).

### **Standard II.B.3**

---

*The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.*

---

#### **Evidence of Meeting the Standard**

##### *Library*

The Library's annual Action Plan outlines measurable operational and learning outcomes and their means of assessment. Methods include review of circulation and database usage counts, a biennial user survey, instruction evaluations, and embedded learning assessments (IIB-4, IIB-6). Data analysis guides the outcomes, targets, and actions for the following year (IIB-3 p. 28). For example, a student learning outcome that fell well short of its goal in AY15 led to an overhaul of instructional materials, with subsequent assessment showing the target exceeding the AY 2015 goal (IIB-3 pp. 20-22). Instruction librarians use student and faculty feedback to guide changes to future sessions (IIB-7), and data on resource usage informs decisions about renewing periodical and database subscriptions (IIB-44 p. 2).

##### *Computing*

The CS department's assessment methods include the CCSSE, in-house surveys of faculty and students, analysis of infrastructure outage and support request logs, periodic review of hardware deployments by location and age, and careful consideration of software upgrade deployments (IIB-33 p. 6). The department's analysis of assessment data guides its priorities for replacing equipment and software, improving infrastructure, increasing the staff's technical competence and skills, and improving customer service (IIB-34 pp. 5-9).

##### *Media and Educational Technologies*

The ID, AVTS, and former MS departments use annual surveys along with analyses of troubleshooting, training, and AV setup logs to evaluate the effectiveness of their services, identify campus needs, and inform their equipment and staffing plans (IIB-27 p.2; pp. 6-7). For example, the Fall 2015 CS survey indicated that the inclusion of multimedia is a factor in student selection of online classes, prompting the department to step up its training efforts (IIB-28 p. 1). A drop in faculty satisfaction following 2 vacancies provided justification to hire permanent staff and add new positions (IIB-27 p. 2).

In 2016, while UH ITS began its review of Sakai/Laulima and other LMS platforms (IIB-50), Windward CC's Office of Career and Community Education also conducted an LMS review, contracting with Canvas to serve its unique programmatic needs (IIB-102, IIB-103 p. 6). That year, the MS department also migrated online astronomy and Japanese courses from Sakai/Laulima to the Canvas LMS in a small pilot program (IIB-63 p. 5). Due to increased rates of student success seen in those courses, the pilot has been expanded to 30 credit courses to begin in Fall 2018 (QFE: DE).

### *Testing*

The Testing Center evaluates its services and needs yearly, identifying and responding quickly to changing needs. For example, it implemented the College Board's ACCUPLACER test to replace the COMPASS test during the Fall 2016 semester (IIB-12 p. 3). The Center's in-house survey (IIB-24) serves to guide continual improvement; such as the time a comment prompted room modifications to improve the acoustic environment (IIB-12 pp. 2-3).

### *Tutoring*

The effectiveness of tutoring services, including Supplemental Instruction (IIB-13 pp. 3-5, IIB-100), the academic learning labs (IIB-32, IIB-8), Ho'onui 'Ike (IIB-75), TRiO SSS (IIB-9 p. 18), and Brainfuse (IIB-10) are primarily assessed by tracking and comparing course completion and grades of tutored vs. untutored students, while annual CCSSE and in-house surveys also gauge student engagement and satisfaction with tutoring services (IIB-29, IIB-30, IIB-31). These data have been used to guide changes toward improving and expanding services, including as evidence to justify continuation or expansion of funding for staffing (IIB-79, IIB-98).

### **Analysis and Evaluation**

The College meets this standard by regularly assesses its learning support services to ensure they meet student needs and to improve their direct and indirect contributions toward student success. For some of the direct learning services or resources, such as Supplemental Instruction or the choice of the Learning Management System, quantitative data have demonstrated a clear positive correlation with the attainment of student success measures. These data have supported efforts to increase access to tutoring or new educational technologies (IIB-9 p. 26, IIB-13 pp. 3-6, IIB-32, QFE: DE). Though the library has lacked data for such correlative studies due to technical limitations (IIB-108, IIB-109), a 2019 migration to a new Library Services Platform, and a possible adoption of a single sign-on authentication system (IIB-107, IIB-110 p. 2), may allow collection of more useful information in the future.

Several gaps or problems in assessment data have been noted in the Quality Focus Essays, including a flaw in the analysis of Native Hawaiian student success measures, and inconsistent assessment of online learning technologies and courses.

Qualitative assessments have allowed several learning support services to identify areas for improvement. Most of the Academic Support departments have identified needs to strengthen their service offerings to distance education students. These are reflected in the plans outlined in both of the Quality Focus Essays, which actively involve the learning support services and resources.

### **Standard II.B.4.**

---

*When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents*

*that formal agreements exist and that such resources are utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual agreement. The institution regularly evaluates these services to ensure their effectiveness.*

---

## **Evidence of Meeting the Standard**

### *Library*

The UH Library System Office holds consortial contracts for its Library Services Platform (LSP), link resolver, and discovery service. In FY 2015, the UH Library Council-appointed Review of Integrated Library Systems (RILS) committee conducted a thorough assessment of the Ex Libris Voyager LSP, the SFX link resolver, and the Primo discovery service (IIB-48), resulting in the planned adoption of a new LSP in Fall 2019 (IIB-107).

The Windward CC Library participates in the Hawai‘i Library Consortium (HLC) (IIB-20), which operates to increase, enhance, and facilitate cooperation among libraries in the state by licensing databases, training, and support for its members (IIB-21). HLC members share costs for a shared suite of databases (currently from EBSCO), with optional databases offered at discounted rates (IIB-22). HLC's Database Review Committee conducts an assessment of its contracted products and services, arranges trial subscriptions and vendor presentations, evaluates vendor packages, and makes recommendations to its Governing Board, most recently in 2016 (IIB-101). The Hawai‘i State Public Library System serves as HLC's business agent and provides administrative and technical support for products and services purchased for all HLC members. The State Fiscal Offices handle monies and billing as directed by the Governing Board on behalf of the HLC (IIB-23 pp. 7-8).

Contracted library services are also assessed at the College level. For example, the UH Library Council negotiated a discovery service for all campus libraries in 2011 (IIB-104). The Windward CC librarians opted out of the deal at the first opportunity after they judged the service a bad fit due to its incompatibility with 80% of the subscribed databases, its poor user interface, and the Library's lack of personnel with time and expertise enough to contrive workarounds (IIB-105).

### *Technology*

Windward CC's CS, ID, and AVTS departments have software licenses and hardware/software maintenance contracts, such as with Xerox Print Services and desktop-as-a-service virtual desktop infrastructure setups from System Metrics (IIB-46 p. 3) and the Canvas LMS (IIB-49 p. 9).

## *Testing*

The UHCC administers licenses and agreements related to testing services. For example, it has a Memorandum of Agreement with the Hawai'i Department of Public Safety (PSD) on providing pre-employment testing of job applicants to PSD positions (IIB-25 p. 1) and another regarding bulk purchases of placement tests (IIB-45). The Office of Academic Affairs has signed an agreement with ProctorU to facilitate online test proctoring (IIB-43 p. 1).

## *Tutoring*

The UHCC System and Windward CC have contracted with Brainfuse to provide online tutoring services to students who cannot make use of on-campus tutoring (IIB-34). In 2016, the UHCC System analyzed the use, efficacy, and cost-benefit of the Brainfuse Tutoring services (IIB-10).

## **Analysis and Evaluation**

The College meets this standard by ensuring access to sufficient information and learning support services needed for its instructional programs. This is accomplished, in part, through numerous formal, documented agreements and contracts with other institutions and vendors made at the departmental, campus, UHCC, and UH System levels (**E17**). The provided products and services are monitored and evaluated using an array of criteria including use, relevance, reliability, effectiveness, security, maintenance, and reliability.

## **Standard II.C.1**

---

*The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution (ER 15).*

---

### **Evidence of Meeting the Standard**

Windward CC regularly evaluates the quality of student support services and demonstrates that these services support student learning and enhance the accomplishment of our mission. Through a culture of assessment (IIC-1) inspired by the core values of the College's Mission (IIC-2), Windward CC is committed to regularly scheduled assessment, all-campus involvement in analyzing and interpreting data, and using outcomes generated from the analysis to improve programs and enhance student learning (IIC-3).

### ***Program Review***

The primary systematic assessment and improvement process for integrated support services comes from the Annual Report of Program Data (II-C 4) and department program reviews which analyze quantitative and qualitative data for all Student Affairs units. Each unit—Recruitment and Outreach, Admissions and Records, Financial Aid, and Counseling, including Services for Students with Disabilities, Mental Health and Wellness, Student Life, TRiO Student Support Services, TRiO Upward Bound, and TRiO Educational Talent Search (IIC-5, IIC-6, IIC-7, IIC-8)—uses a template to review its services and goals, form action plans for improvement, and make requests for resources to be presented to the Planning and Budget Council. Within the report, each branch has individual assessment procedures. Results of surveys frequently used to evaluate the quality of student support services are included in the unit's analysis (IIC-9, IIC-10). Student learning outcomes (IIC-11) are also assessed within the comprehensive ARPD.

Other methods of evaluation include the measure of student satisfaction, quality of service, and student learning. Counseling services are measured by individual counselor evaluation (IIC-12, IIC-13). For example, question 5 on the counseling survey evaluates student learning by assessing if the student is ready to take the next steps. Point of service surveys are conducted regularly at events and activities sponsored by Student Services, and their results are reviewed and assessed to improve the students' holistic experience of learning and enhance the College's mission in future events and activities (IIC-14). Moreover, all units within Student Affairs participate in quarterly meetings to share initiatives and best practices and discuss learning and process outcomes.

In even-numbered years, assessment of student services is conducted via the Community College Survey of Student Engagement (CCSSE) For the 2016 CCSSE cohort (IIC-15), Windward CC was considered a Top Performing College and student satisfaction of services was positive, as it was in previous cohorts (ARPD 2015, p.3) (IIC-16). The CCSSE survey is analyzed in the ARPD of the corresponding year. Other assessments of student services by students, faculty, and staff are conducted in odd-numbered years. Most recently, the College

administered the Gallup-Strada Core Student Survey to help inform ways to improve the College ambiance and the student experience (IIC-17).

### *Grants and Other Initiatives*

TRiO and Title III federal programs require additional assessment and external review through annual

performance reports, including a federal and state requirements analysis. The assessment processes for other TRiO programs—Upward Bound and Educational Talent Search—are mandated by their grant agencies, and while not identical in format, provide essential data for decision making (IIC-18, IIC-19; IIC-20, IIC-21)

Admission and Records supports student achievement by providing information and services such as the implementation of multiple measures for placement, mandatory new student orientation, and assigned advisors. As some students seemed confused about the steps necessary to enroll (IIC-22) Admissions and Records implemented a quality enhancement by developing a Getting Started: Pre-registration Steps checklist (IIC-23, IIC-24, IIC-25). Another process was refined when Admissions and Records re-assessed incomplete application data for determining residency. They eliminated the redundant Military Verification form and developed the ability to “mass” accept students based on certain criteria of residency. ( IIC-26).

A sub-unit of Student Affairs, Recruitment and Outreach supports student learning by engaging thousands of area high school students in various outreach activities and events. After participating in an outreach activity or event, surveys show an increase of 17% in the number of students who knew their next steps on their educational journey (IIC-7 p. 7-9, IIC-27, IIC-28, IIC-29).

Windward CC Student Life coordinates student government, all student organizations and clubs, and a variety of extracurricular activities for students. Participation numbers, attendance lists, and student evaluations are collected at selected student life events, the results of which are used to modify future events (Interview Kaahu Alo).

The Office of Career and Community Education (OCCE) conducts surveys that collect information used to develop non-credit courses of interest to the entire community. (IIC-30) Due to a downward trend in registration and class offerings in personal enrichment courses (IIC-31, IIC-32), in 2014, the OCCE surveyed community members to assess their general satisfaction with the variety of courses offered, their delivery, and interest in online courses. Results indicated 2 new growth areas: workforce development and online offerings. In addition, labor market research completed in 2015 that focused on employment sectors in demand or exceeding 5% growth (IIC-33) led to the development of courses in Health, Culinary (Hospitality), Business, and Ocean Safety. These new courses have realized a 68% increase in student instructional hours (Interview Michael Moser).

### *Evening and Distance Education*

The number of distance education (DE) courses offered by Windward CC has almost doubled over the past 5 years. As a result, the College examined the student population for online courses and determined that these courses attract more students who were “home based elsewhere” than any other UHCC campus. This expansion of online students aligns with the College’s mission to serve the diverse educational needs of the Ko‘olau region of O‘ahu and beyond. An additional analysis for rates of completion, successful completion, and withdrawal indicated for the 5 past academic years that distance education students had consistently lower success rates than face-to-face students (See Figure 2 in QFE on Distance Education). Gaps in support services for online students were identified in areas of readiness assessment, student orientation, availability of counseling and other student support opportunities, and a Learning Management System (LMS) that supports interactive pedagogy.

A task force reviewed many best practices including how online classes and hybrid classes support adult learners. Their work created a list of methods to assist adult learners (specifically in transitioning to online classes). The Title III Kahua ‘oihana grant project (IIC-36) seeks to build resources to increase access and success in post-secondary education for working adults and also provides for support of online learners. An Evening and Online Coordinator was hired to coordinate this effort. The position also provides orientation, counseling, and advising for students in this cohort. Online tutoring is conducted via Brainfuse and is evaluated through monthly usage and qualitative feedback reports from the vendor (IIC-37). One-on-one tutoring online for Math, Science, Writing, and College Readiness is also available through the Online Learning Academy for all Hawai‘i Department of Education (DOE) and University of Hawai‘i System students and accessible from the Windward Evening and Online Education webpage (<https://windward.hawaii.edu/online/>).(IIC-38)

### *Student Learning Support*

Findings from program reviews of the achievement of SLOs and the assessment of PLOs are used to plan initiatives and interventions that ensure the continuous improvement of student learning, with a special emphasis on decreasing the disparities between Native Hawaiian and Non-Hawaiian students. Examples include the transfer and application interventions of the Hulili program (ended in 2017), cohort-based programs such as Paipai o Ko‘olau, the IS103 (Introduction to College) Learning Communities, and the Learning Community for Evening Students.

### **Analysis and Evaluation**

The College meets this standard. Windward CC systematically assesses the quality of its student support services and their ability to support student learning and accomplish the institutional mission, regardless of location or mode of delivery. The College encourages a culture of assessment for determining how effectively it achieves its goals, and uses assessment results to improve student learning, one example being the hiring of a dedicated coordinator for the evening and online students, with counseling available online through

video chat services. Another example is the provision of dedicated counseling staff to the Early College program. Also, with continued growth of Windward CC's online course offerings, and the implementation of active measures proposed by the Distance Education Committee in response to this growth, Windward CC is preparing to further develop student support services to meet the needs of this population (IIC-39). These and other endeavors directly address the institutional mission to provide learning excellence to the Ko'olau region of O'ahu and beyond with support for the needs of its Native Hawaiian population as described in Strategic Plan Action Outcomes 2015-2021 and the Quality Focus Essay on Native Hawaiian Parity. They aim to eliminate access and success gaps for targeted populations in support of the Hawai'i Graduation Initiative (IIC-40).

Another gap in achievement is the lack of parity in success for DE learners as compared to face-to-face learners, as evidenced in I.B.6. Steps to assess and address this gap are proposed in the College's DE QFE.

### **Standard II.C.2**

---

*The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and Services.*

---

### **Evidence of Meeting the Standard**

Windward CC employs learning support and student learning outcomes in providing student support services and uses assessment data to improve its programs and its services. At the December 2015 quarterly meeting, Student Affairs faculty and staff reviewed and refined all process and student learning outcomes. Subsequently, Student Affairs learning outcomes and process outcomes are identified and assessed (IIC-41) in the Annual Report of Program Data (IIC-42, IIC-43, IIC-44, IIC-45) in which all Student Affairs programs participate. Required assessment regarding the Student Affairs Learning Outcome that students will access appropriate information and resources to support their academic journey (IIC-46) in each program's ARPD is accompanied by an Action Plan.

One example of improvement through the assessment process can be seen within the Admissions and Records Office. Admissions officers examine the number of complete, accurate applications as an indicator of students' demonstrating mastery of the online application process. The Registrar's input on the ambiguity and errors in the Residency section provided for improved language on the application. In the future, a UHCC Centralized Admissions process is expected to provide even more consistent and accurate services to students, including uniform dates and deadlines (Interview, Geri Imai)(IIC-47).

The Counseling department reflects the mission of the college in its student learning outcomes (IIC-48, IIC 49, IIC 50, IIC 51):

- Students will access accurate and appropriate information with regard to Academic Status, Resource Availability and their Next Step in their Educational Plan.
- Student engagement will be fostered through the counseling process.

- Students will develop critical thinking skills through Identifying Resources, Evaluating Options, Establishing Priorities, Designing Education Plans and Implementing Actions.

Based on Fall 2016 multiple measures data (IIC-52), the First-Year Experience, including New Student Orientation, Frosh Camp, and the Learning Communities with IS103 (Introduction to College) course (IIC-53, 54), has been embedded with Student Success Pathway (SSP) (IIC55-) concepts and process improvements. This allows for a better onboarding experience for students through integrated advising. Using multiple measures has increased the number of students placing into college-level coursework. The innovations in use are STAR GPS (IIC-56, IIC-57, IIC-158), multiple measures for placement (IIC-59, IIC-60), math pathways (IIC-61), exploratory majors, and My Success-Early Alert (IIC-62). In response to best practices for increasing student self-efficacy, Student Affairs and Academic Affairs partnered to offer growth mindset workshops (IIC-63) at Frosh Camp.

At the conclusion of the grant funded Hulili Transfer Program (IIC-64, IIC-65) in September 2016, data for the program for both semesters showed higher rates of success, credits earned, retention and persistence (IIC-66 p.16). Best practices learned from Hulili's success have been incorporated into the First Year Experience and into an initiative to extend the cohort system to subsequent semesters, and for online and evening students (Interview Amy Rozek) IIC-67).

The Paipai o Ko'olau program for non-traditional learners has a strong focus on Native Hawaiians and encourages student enrollment, particularly with regard to adult learners and those who may not be in college due to extensive barriers (IIC-68, IIC-69, IIC-70). Additional services for this program include:

- Summer Bridge courses in Developmental Math and other subjects.
- Participation in a Learning Community and Cohort.
- Mandatory monthly meetings with the Paipai o Ko'olau coordinator/counselor.

Paipai o Ko'olau enrollment and retention rates have demonstrated such successful outcomes over the 5 grant-funded years (IIC-71), that the UHCC has institutionalized the program with a full time counselor/coordinator and is using it as a model for each of the UH Community Colleges (IIC-72, IIC-73, (Interview Sarah Akina):IIC-74).

### **Analysis and Evaluation**

The College meets this standard. Windward CC assesses student learning support outcomes - to provide appropriate student support services and uses resulting data to improve its student support programs. Process outcomes and student learning outcomes are assessed annually in the ARPD, as well as through other processes such as department surveys. Results of the assessments help improve programming and decision making throughout the department and focus on increasing student success.

Counseling is taking the next steps to provide students with a purpose first model that aligns student academic interests and personal strengths, as well as further implement best practices as defined through Integrated Student Support (IIC-485=75). Target areas include career

counseling and counseling of veterans and transfer students. In conjunction with holistic support services such as the Hawaiian-language Childcare Center, and the TRiO SSS initiatives—Summer Bridge math courses, VITA Tax service, and 24/7 access to study space—the College seeks to remove barriers for Native Hawaiians and other underserved populations.

### **Standard II.C.3**

---

*The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.*

---

#### **Evidence of Meeting the Standard**

Windward CC provides appropriate student support services to foster learning and development of all its students within the context of its mission and regardless of service location or delivery method. All student support services are located and available during the day on the Kāneʻohe campus. Online registration is available to all students through the STAR GPS system implemented in Fall 2017 (IIC-75). Evening and online students have email and phone access to counseling and advising services. The Counseling program also provides evening service hours in the library through the Title III Kahua Naʻauao project's Online and Evening Coordinator hired in Summer 2017 (IIC-76) who keeps evening office hours and employs an online video and chat service (IIC-77). Extended hours for the Math and Speech labs and the Writing Center are offered at high demand periods during the semester (IIC-78). Brainfuse, an online tutoring service, is highly rated in an assessment by students in which 93% rated it easy to use; 94% recommended it; and 93% used a tutor (IIC-79, IIC-80). The creation of an evening cohort schedule (IIC-81), an evening recruitment reception (IIC-82), and appointing a counselor for student parents (IIC-83) further supports the needs of working adults and student parents.

At Windward CC, with its open-door policy, equitable access through means of delivery or location also entails offering outreach services to students who may have less experience in using more traditionally structured support services, perhaps because of their first generation, nontraditional, or probationary status. Some counselors have begun to meet their assigned students in locations outside their offices through working half-day shifts in the offices of the TRiO Student Support Services. A weekly Aloha Bar in the library conducted by counselors and administrators provides students in a highly trafficked location with information on programs and resources and the opportunity to chat with the chancellor, vice chancellors, and deans (IIC-84). Evening students have access to a counselor some evenings and online, and are recipients of special services to promote engagement such as free snacks before class (IIC-85).

Also offering services and resources for the holistic needs of students, TRiO Student Support Services provides a week of 24/7 services in their offices during exams and offers Saturday hours during the registration period (IIC-86). They also offer math placement workshops (IIC-87) and, in cooperation with general counseling, have developed support strategies for developmental prerequisite and co-requisite coursework (IIC-188) such as Early Registration (IIC-189) and exam prep workshops (IIC-90). OCCE's participation in the HINET

(Hinethawaii.org) IIC-91 program brings SNAP benefits to both credit and non-credit students. These benefits include food subsidies and assistance with transportation, childcare, and educational expenses (IIC-92 IIC-93).

Disability accommodation services are arranged by the counselor for students with disabilities and include special test accommodations, enlargement of printed material, readers, note takers, sign-language interpreters on an as-needed basis, and adaptive equipment or materials in alternate formats (IIC-94, IIC-95, IIC-96). Assistive technologies are made available through a part-time staff position (IIC-97) in Student Affairs. In addition, the mental health counselor provides in-office counseling by appointment available on MySuccess or walk-in, and crisis counseling while the College is open. After hours mental health issues are referred to national and local resources which are listed on the mental health counseling webpage and in widely distributed printed materials (IIC-99, IIC-100, IIC-101). Visitors to the Mental Health and Wellness website may take a confidential online screening with results and resources (IIC-102) (<http://screening.mentalhealthscreening.org/windward>).

The Early College Program enrolls students in public and public charter high schools throughout Windward O‘ahu, with priority given to first-generation college and low-income students. In addition to offering free tuition, this program provides additional support to learners through the services of a coordinator and 2 counselor positions for Castle, Kahuku, and Kailua High Schools (IIC-103, IIC-104). The US DOE Title III Pu‘uhonua project serves students at Olomana School, Hawai‘i Youth Correctional Facility, and Women’s Community Correctional Center (IIC-105) with counseling and credit coursework (IIC-106). These early college programs specifically target Native Hawaiian, first generation, and low income students to address underserved populations.

Through on-campus tours, college planning nights, and college fairs, as well as special events at off-campus sites, the Recruitment and Outreach **unit** provides information about college access, financial aid resources, specific requirements, and pathways (IIC-107, IIC-108, IIC-109, IIC-110, IIC-111). These events emphasize Native Hawaiian success initiatives that are supported by data on Native Hawaiian persistence that indicate Native Hawaiians, particularly males, are not systemically succeeding (IIC-112 IIC-113). The College’s QFE on Native Hawaiian parity uses disaggregated data to better understand where there may be gaps in access for Native Hawaiians and support initiatives that address these gaps such as Early College and outreach events.

### **Analysis and Evaluation**

The College meets this standard. Windward CC provides appropriate, comprehensive, and reliable services to its students. Equitable access to these services by means and method of delivery and through outreach initiatives for traditionally underserved groups is ensured for all sectors, regardless of location and delivery method, by Student Affairs in support of the Student Affairs Student Learning Outcome that students will access appropriate information and resources to support their academic journey (IIC-114, IIC-115, IIC-116, IIC-117, IIC-118, IIC-119). With its robust increase in distance education and online courses, Windward CC is poised to further develop student support services to meet the needs of this population (IIC-120). The DE QFE helps to provide a plan to do so using best practices.

## Standard II.C.4

---

*Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound Educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.*

---

### Evidence of Meeting the Standard

Windward CC's co-curricular programs are responsibly offered in alignment with its mission and contribute to its students' socio-cultural and educational experience. In the nature of a small community college serving disadvantaged populations, with a mandated emphasis on Native Hawaiian students and culture, Windward CC has no formal intercollegiate athletics program but does offer informal participation in intramural sports leagues and broad exposure to socially and culturally diverse programs that enhance its students' holistic college educational experiences.

All Registered Independent Organizations (IIC-121)—Associate Students of the University of Hawai'i at Windward CC (ASUH-WCC) clubs, Ka 'Ohana the student newspaper, Pueo the literary and art journal (IIC-122), and intramural athletics—are supervised by faculty advisors who are responsible for mentoring and providing feedback and resources to its student members. Student activity fees fund ASUH-WCC and Student Life activities (IIC-123). These budgets are approved by the VCSA and the chancellor. Clubs request funding through ASUH-WCC and their club advisor. Publications-based money that funds Pueo, Ka 'Ohana, and the Student Planner comes from the annual budget, overseen by the Board of Publications (IIC-124, IIC-125, IIC-126).

ASUH-WCC, under the direction of the ASUH faculty advisor, executed student-driven initiatives (IIC-127, IIC-128, IIC-129, including a "Talk Story" with Hawai'i State Governor David Ige (IIC-130). Student leaders also crafted a resolution adopted by the Windward CC Faculty Senate and later presented in the local media in support of the Windward CC land swap with the Hawai'i State Hospital. (IIC-131, IIC-132).

Prior to the beginning of each academic year, faculty advisors provide ASUH-WCC leadership trainings in a Student Life Training/Retreat for student Peer Mentors and Student Life student assistants (IIC-133, IIC-134). UH-System advisors trained participants on ways to increase decision-making confidence, teamwork critical thinking, and methods for sharpening leadership skills. Student leaders also participated in a leadership conference with 9 other campus life divisions (including all UH-System colleges, Chaminade University, and Hawai'i Pacific University), where they learned about diversity, conflict resolution, teamwork, personal initiative, and culturally-based values (Interview Kaahu Alo, IIC-135).

In lieu of intercollegiate athletics, a system-wide intramurals league is co-coordinated with other UH community colleges intramural faculty and students (IIC-136 IIC-137, IIC-138, IIC-139, IIC-140, IIC-141, IIC-142, IIC-143). This league offers students a platform to play dodge ball, football, basketball and volleyball and socially network with their peers (Interview Kaahu Alo IIC-144). In addition to the intramurals league, an annual Makahiki (IIC-145, IIC-146, IIC-147, IIC-148, IIC-149, IIC-150) is held at the College to which other

colleges and local high schools are invited. Sponsored by ASUH-WCC, Ke Kumu Pali, and the Hawaiian Studies department, the Makahiki celebrates the beginning of the Hawaiian New Year with a contest of traditional Hawaiian sports and games.

RISOs on campus in 2016-2017 included the Windward Gaming Club, the Speech and Debate Club, the Writing Club, and the Sustainability Club (IIC-151)

One example of club emphasis on leadership through service learning and community service is Ku Pono (IIC-152) the Hawaiian Club, whose volunteer projects (IIC-153) include the construction and maintenance of lo‘i kalo at sites on campus and volunteering in the community at the Po‘ailani Dual Diagnosis Treatment Program and the Women’s Community Correctional Center, caring for the local fishponds, and leading campus events such as Welcome Back, Thanksgiving imu turkeys, an annual volleyball tournament, and film panels (IIC-154). Other student clubs, such as Phi Theta Kappa (IIC-155, IIC-156), encourage civic responsibility through managing recruitment for the semi-annual campus blood drive (IIC-157, cleaning Waikalua Loko Fishpond, and assisting with the Kalihi Stream environmental group and the Kāne‘ohe nature preserve.

Other Windward CC student clubs and organizations from 2013-present are linked here (IIC-158, IIC-159), as are other Windward CC Student Activities and Events including Welcome Back events, Ohana Day, and the Food Pantry (IIC-160).

College activities that also encourage personal responsibility as well as intellectual, cultural and personal development for students are Service Learning (IIC-161), tutoring, Supplemental Instruction (SI), and working as a Peer Mentor or as a student assistant/employee or volunteer in the Math Lab, Speech Lab, TRiO Student Support Services, or the Writing Center. Formal training is provided for tutors and evaluations are conducted with feedback from students, faculty, staff and administration (IIC-162).

Student-produced publications are the Windward CC monthly newspaper, Ka ‘Ohana (IIC-163, IIC-164) and the literary and art journal, Pueo [named Rain Bird prior to 2015] (IIC-165, IIC-166), both winners of national awards (IIC-167, 168). Other publications include video documentaries created by Journalism and Creative Media students (IIC-169)([https://www.youtube.com/channel/UC\\_4j9whGu7KYvOp1YH5yxQQ](https://www.youtube.com/channel/UC_4j9whGu7KYvOp1YH5yxQQ)), and creative films created by the student film club (IIC-170) ([https://www.youtube.com/user/WccFilmClub/videos?view=0&sort=dd&shelf\\_id=1](https://www.youtube.com/user/WccFilmClub/videos?view=0&sort=dd&shelf_id=1)).

Furthermore, all student employees attend an annual professional development workshop that trains them in customer service, leadership, communication skills, and Title IX issues (IIC-171, IIC-172). Since 2016, there has been an annual Student Employee of the Year celebration during National Student Employment Week with the winner chosen on the basis of 5 criteria: quality of work, reliability, initiative, professionalism and exceptional service (IIC-173).

Study Abroad experiences (IIC-174, IIC-175, IIC-176, IIC-177, IIC-178) that included cultural learning with academic study in Spring 2017 were Hawaiian Studies 296: Encounter Traditions in Polynesia (8 days in New Zealand) (IIC-179) and a 2-week intensive experience in the United Kingdom in Summer 2017 for theater students, funded through a capacity building grant awarded by the U.S. State Department’s Partners Across Americas

initiative (IIC-180). For the academic year 2017-2018, study abroad experiences include Shakespeare theater study in England (IIC-181) and travel in Costa Rica, linked to an anthropology course on tourism and conservation. International Week (IIC-182 IIC-183) employs a different theme each year to offer samplings of international food, music, art, social science lectures, and activities to familiarize students with world cultures.

Other on-campus co-curricular activities linked to academic learning to enhance students' cultural and aesthetic life and emphasizing Native Hawaiian culture were presented at the 'Iolani Gallery, the Palikū Theater (IIC184, IIC-185, IIC-186), the Hokulani Imaginarium (IIC-187, IIC-188), the Lanihuli Observatory, the Library Learning Center, and Hale A'o, the Hawaiian Studies facility. Examples include The Smithsonian travelling show, "Roots of Wisdom: Native Knowledge, Shared Science" in Spring 2017 (IIC-189), and in conjunction, a lecture series focusing on bridging traditional indigenous knowledge with modern science to solve the environmental challenges we face locally, these lectures having been augmented by exhibits at Gallery 'Iolani on Polynesian ocean navigation, "Voyaging: The Art of Wayfinding," (IIC-190) and "Two by Two," showcasing Hawaiian wood carving and classical drawings (IIC-191). Other art exhibits on diversity are linked here: (IIC-192).

### **Analysis and Evaluation**

The College meets this standard. Direction, advising, and finances of its co-curricular activities is responsibly managed. These activities engage, enrich and motivate students to achieve academic and personal goals in keeping with the mission of the College, in particular, its emphasis on Native Hawaiian cultural learning and service to the Ko'olau community. Cultural and aesthetic experiences in co-curricular activities are closely connected to and enhance classroom learning. Such opportunities for service, leadership, volunteerism, and self-awareness through co-curricular activities are available to nurture and reinforce motivation toward the practices of lifelong learning and civic responsibility, in accordance with the Windward CC mission to encourage life-long learning, its vision to enrich the lives of students and the community, and its values of creating diverse learning experience, working collaboratively and inclusively, and serving and supporting with aloha (ER6).

### **Standard II.C.5**

---

*The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.*

---

### **Evidence of Meeting the Standard**

Windward CC offers professional counseling and academic advising to support student success with accurate information about academic requirements and provides professional development to advisors. Counseling and academic advising programs supporting student development and success include First-Year Experience, Ka'ie'ie Transfer Program, Ka Piko

Student Success Services, Peer Mentors, Mental Health and Wellness, and Services for Students with Disabilities. All home-campus Windward CC students are assigned to a specific counselor at an average ratio of fewer than 280 students per counselor. In part reflecting the College's small size, counselors are not assigned to academic departments but are generalists who work to support the student's personal and academic growth and to assist students with decision-making in the exploration of their educational, career, and personal goals (IIC-193).

In 2014, the counselors adopted a casework model of assigned counselors employing intrusive, proactive, appreciative strategies of advising to enhance student retention and completion. The implementation of the Starfish Retention program, customized as Windward CC's My Success (IIC-194) allows for strategic collaboration among resources dedicated to an individual student's success and facilitates the relationship between the student and the assigned counselor. The use of the STAR GPS system for registration improved clarity of requirements, timing, and sequence of courses to define pathways for students. Coordinating an advising syllabus and program process outcomes in alignment with the UHCC Student Success Pathway (SSP) initiative promotes a purpose first counseling process. SSP provides a framework of intentionally designed, clear and structured experiences for students from point of interest through graduation to transfer or career. The department engages in many different programming initiatives to support the students' journey on their pathway.

### *First-Year Experience*

The First-Year Experience program (IIC-195) is coordinated by a designated counselor and consists of a mandatory New Student Orientation session (IIC196), attendance at Frosh Camp (IIC-197) and the required placement (for first-time full-time students with a developmental need) in a Learning Community and in appropriate math and English coursework (IIC-198- IIC-199). Frosh Camp is open to non-freshman, but is required for all first-time freshmen as stated in the Registration Guide (IIC-200). Additionally, the First-Year Experience, through registration holds, mandates that new students meet with their assigned counselor for registration during the first 2 semesters.

The Ka'ie'ie program is a degree pathway program with the University of Hawai'i at Mānoa (UHM), coordinated by the Mānoa Transfer Coordination Center (MTCC) to facilitate the transition of transfer students from UH system community colleges (IIC-201, IIC-202). A Ka'ie'ie transfer specialist is available 2 full days a week at Windward CC (IIC-203). The first Ka'ie'ie program cohort from Windward CC was accepted in Spring 2015 and the number of students who have successfully transferred to UH Mānoa increases every year (IIC-204, IIC-205). Other transfer information and assistance are available through on-campus visits by college representatives (IIC-206, IIC-207) and transfer fairs (IIC-208, IIC-209).

### *Ka Piko - Student Success Services*

Ka Piko (IIC-210) is comprised of a Welcome Center with computer and free printer access where New Student Orientations are held, and Peer Mentors (IIC-211) are available to assist students with online registration, setting up My UH accounts, and answering procedural questions (IIC-212). They play key roles in producing Frosh Camp and New Student Orientation. Support services included in Ka Piko are the Writing Center, Speech Lab, Math

Lab, Testing Center and the office of the evening and online coordinator/counselor. The description of each service is on the website and compiled into a single flyer (IIC-213, IIC-214, IIC-215, IIC-216, IIC-217, IIC-218).

### *Career Explorations and Advising*

With the advent and adoption of the UHCC Student Success Pathways (SSP) initiative (IIC-219), career explorations and connections have been dramatically restructured according to the best practice of the “purpose first” model, initiating a career or major goal in an agenda that consists of 4 phases moving from connection to career, graduation, and transfer (IIC-220, IIC-221). SSP is an integrated, institution-wide framework for student success modelled on integrating major and career planning at the forefront of the student advising process.

Following the departure of the counselor who coordinated the job preparation services of the Career and Employment Center and with the prolonged medical leave of the recently retired career counselor, all counselors, in understanding and promoting the student experience as a continuum, have assumed responsibility for career advising as part of a counseling session (IIC-222, IIC-223).. Although there has not been a physical Career Center since Spring 2015, its absence has been partially compensated by the move to a faculty and counselors integrated model for counseling in conjunction with the Purpose First initiative, and the development by the Counseling department of an Advising Syllabus (IIC-224) as part of an advising toolkit (IIC-225). Some functions of career advising and job skills preparation are serviced by other sectors in the college, such as the English discipline, the Speech discipline and the Debate Club that collaborate to deliver workshops on job interviewing, resume preparation, and writing personal statements. Other career and job preparation workshops have been delivered by the Peer Mentors who developed presentations on professional demeanor and dress (Interview L. Gillis-Davis, IIC-226) and by the Phi Theta Kappa sponsorship of presenters on potential careers (IIC-227, IIC-228).

Thus, all counselors are now tasked with prioritizing career counseling as part of their conferences with students. Using the model of Integrated Student Support (ISS), counselors and instructors will ideally collaborate on developing strategies to integrate career planning within the academic curriculum and to weave career advising into their interactions and relationships with students. Training in career advising is provided through access to webinars and planned seminars by dedicated career counselors as the College has taken steps to provide pathway counseling toward careers early in a student’s academic journey. Hokupa’a, the Windward CC student success task force comprised of counselors, instructors and staff, is leading the efforts to redesign career counseling methods for incorporation as everyone’s responsibility and as crucial to transformational counseling (IIC-229).

### *Mental Health Services*

A task force of faculty, staff, and students funded by Mental Health America established a working group, the Windward CC Huliau (IIC-230), as a training initiative to develop presentations on mental health awareness in classrooms and in workshops. As a result of advocacy and surveys by Huliau, as well as data provided by the Paipai o Ko’olau program on the relationship between retention and mental health factors (IIC-231), a tenure track mental health counselor position was funded in September 2015 (IIC-232). Additionally, a

domestic violence prevention counselor from the Domestic Violence Action Center (DVAC) is available 2 days weekly on campus (IIC-233).

### *Services for Students with Disabilities*

A handbook for Students with Disabilities is available on the website (IIC-234). The counselor for students with disabilities provides accommodations and raises awareness on campus about the rights of persons with a disability, reasonable accommodations to which they are entitled, and the accommodations available at Windward CC (IIC-235).

### *Professional Development and Training*

Internal training is provided for counselors through programs such as Nuts & Bolts (IIC-236, IIC-237, IIC-238) or the Dossier Workshops (IIC-239) where one or more counselors are assigned to do the training, or through workshops conducted by UHCC trainers (IIC-240, IIC-241, IIC-242, IIC-243, IIC-244). A New Counselor Orientation accessible on Google Docs for Counseling Matters for on-boarding of new Counselors (IIC-245) includes shadowing and reverse shadowing in one-on-one appointments. Professional development is also supported through attendance at the Academic Advisors Transfer Network conference (IIC-246), Integrated Advising training, such as the Hokupa'a Success committee, as well as an annual subscription with webcast access to Academic Impressions. Counselors and other Student Affairs staff attend such national conferences as Complete College America (IIC-247, IIC-248, IIC-249), On Course, and Achieving the Dream. State-wide conferences include Hawai'i Success Strategy Institute (HSSI) (IIC-250, IIC-251) and Windward CC has hosted international conferences on topics such as indigenous pedagogies (IIC-252, IIC-253). Note that professional development is often centered on social justice and equity building (e.g. Hokupa'a committee, Achieving the Dream, HSSI) to address gaps in access and success for Native Hawaiian students. The Native Hawaiian QFE proposes improved access to disaggregated data so as to better assess the results of and need for Native Hawaiian equity building professional development.

Counseling staff regularly also attend UHCC and UH counselor conferences on transfer and graduation requirements, curricular changes, the use of technology in counseling, and other issues of concern to counselors in each system. At Windward CC, counselors attend department meetings twice a month with alternate week professional development activities, an annual retreat for faculty counselors, and Title IX Training (IIC-254, IIC-255).

Training in career advising is provided through access to webinars and planned seminars by dedicated career counselors as the College has taken steps to provide pathway counseling toward careers early in a student's academic journey. In the July 2017 Counselors' Retreat, a career counselor from UH-Mānoa presented on models for Career Counseling and a team from a community agency presented on financial literacy pedagogy (IIC-256). In Fall 2017, counselors received training in the use of Focus 2, a career counseling instrument implemented by the College in Fall 2017 to aid in administering the instrument, interpreting the results, and advising students on educational and career choices and pathways (IIC-257).

## **Analysis and Evaluation**

Counselors have successfully moved to a casework model of assigned counselors employing intrusive, proactive, appreciative strategies of advising to enhance student retention and completion. The implementation of the Starfish Retention program, customized as Windward's My Success (IIC-258), allows for strategic collaboration among resources dedicated to an individual student's success and facilitates the relationship between the student and the assigned counselor. The use of the STAR GPS system for registration improved clarity of requirements, timing, sequence of courses, to define pathways for students. The alignment with the UHCC Student Success Pathway of an advising syllabus and program process outcomes promotes a purpose first counseling process providing a framework of intentionally designed, clear and structured experiences for students from point of interest through graduation to transfer or career. The adoption of Focus 2 as the career assessment tool enhances the capabilities of counselors and faculty to participate in integrated advising and allows students to do self-assessments and compare industrial trends and salaries in a variety of careers. Nonetheless, an emphasis on professional development and training in career counseling is emerging as an area of serious need for counselors in alliance with instructors.

A similar emphasis on the provision of online support services and professional training of counselors in online counseling methodologies is warranted as noted in the Quality Focus Essay on Distance Education. With the increase in online classes at Windward CC, more disability issues will need to be addressed such as closed-captioned videos, audio descriptions of processes, and tutors. The number of students with disabilities cuts across demographics, and their needs for such technology as the "Smart Pen" similarly could benefit all students. Standardized approaches to providing accommodations throughout the UH system would help to facilitate an assured compliance of Windward CC and the entire UH system with federal laws (II3-259).

### **Standard II.C.6**

---

*The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals.*

---

### **Evidence of Meeting the Standard**

The College has an open door general education mission that adheres to the UHCC System admissions and nondiscrimination policies, as detailed in fourteen languages and posted outside each unit's doorway (UHCC Nondiscrimination Policy). Admission is open to students 18 years and older or to those who have earned a U.S. high school diploma, GED or equivalency (IIC-260). It offers special admission to high school students to take college courses either at the college (Running Start) or in a Hawai'i public high school (Early College). Hawai'i private high school and home schooled students may also attend college classes (Early Admission) (IIC-261, p 8). Furthermore, Senior Citizen Visitor Passes (SCVP) allow seniors to "visit" Windward CC credit courses free of charge with no credit awarded (IIC-262, p. 10). International students may be enrolled in approved SEVIS

programs via student visa status (F1 or M1) and must comply with all regulations of U.S. Department of Homeland Security and the University of Hawai'i policies and procedures. These include the English proficiency requirement, international student health insurance acknowledgement, student visa, health clearances (TB/MMR), transcripts in English, UH system application and supplementary information form, registration in resident classes for at least 12 credits. (IIC-263, p. 9).

The Office of Admissions and Records reviews for completeness and processes all applications, then sends out a Registration Guide with letters of acceptance outlining all steps to complete enrollment. Through New Student Orientation (NSO) and Frosh Camp, information about programs and support services is reiterated and reinforced. Peer Mentors and professional counselors/academic advisors are available to assist prospective and enrolled students in navigating the application and registration processes. The Catalog includes a list of the required courses, descriptions of programs and possible associated career pathways, and program learning outcomes (PLOs).

Pathways to complete degrees and certificates are listed for each program with its graduation, foundation, diversification, and elective requirements specified in the Catalog, on program sheets prepared by the Counseling department (IIC-264, IIC-265, IIC-266) and on the website. In a program with additional admission requirements, such as the Veterinary Technician Associate of Science, processes of selection are partially based on a first-come, first served and space availability basis, formal attendance at an orientation session held several times throughout the year, and course/certificate completion (IIC-267) to minimize bias and subjective selection criteria. As a result of the College's implementation of the STAR GPS as an online registration tool, each student's pathway is indicated, updated, and reconfigured as it progresses and is a subject discussed in consultation between the student and the assigned counselor even as it permits students to independently navigate procedures on their path to completion.

### **Analysis and Evaluation**

The College meets this standard. The College's admission and graduation or completion policies are clearly defined as consistent with its mission as an open admissions college and students are advised on the pathways to complete their academic goal through a combination of counseling, New Student Orientation, a variety of printed materials, also available on the website, such as the Catalog, program sheets and brochures, and the STAR GPS system. The need to appropriately serve the Native Hawaiian population is noted in our mission and strategic plan, and is reflected in our Quality Focus Essays on Native Hawaiian Parity and Online Distance Education.

### **Standard II.C.7**

---

*The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.*

---

## **Evidence of Meeting the Standard**

Admissions and placement instruments and practices are evaluated for effectiveness and minimal bias.

Systemic policies and procedures govern admissions and influence placement practices.

### *Admissions*

All applications for admission are completed online and are standardized within the UH System (IIC-268). All students must meet State of Hawai'i Department of Health clearance requirements (IIC-269). Moreover, the enrollment of non-residents and international students is determined by the Board of Regents policy (IIC-270).

The UHCC registrars' group meets quarterly and frequently discusses the online application to adjust the form to better serve students. One such adjustment occurred when the UHCCs began a new policy to accept multiple measures for placement which minimizes bias. The online application was modified to allow self-reported SAT/ACT test scores and self-reported high school grades/courses (IIC-272, IIC-273). The UHCC's are also in the process of developing a new "smart" online application that automatically adapts on the basis of how students answer questions. (Interview G. Imai, IIC-271)

To better accommodate Hawai'i high school graduates, the Windward CC Office of Admissions and Records mailed out Fall 2017 acceptance letters.. Admissions and Records also instituted a roll-over practice by which students who have stopped out within one year (a sequential combination of a spring and a fall semester) may re-activate their applications by contacting A & R. (roll-over policy).

### *Placement*

An expansion of placement criteria, or Multiple Measures, is related to the UHCC System redesign of developmental course sequencing which subscribed to the best practices theory of shortening the time of academic progress toward graduation promoted in the UH System Hawai'i Graduation Initiative Fifteen to Finish (IIC-272). As an integral part of the Student Success Pathway system, STAR GPS provides updated academic planning and pathways for progressive transition toward degree completion and transfer. The goal of using Multiple Measures for placement, based on evidence showing first year performance in college is best predicted by high school performance (in terms of GPA, and levels of math and English attained), is to place students at the highest level possible. Developmental courses in math and in English were subsumed into one pre-collegiate level and one co-requisite remediation course was designed to provide extra academic support (IIC-273, IIC-274). In math, remedial courses were configured into pathways for those continuing in math- or science-related fields and pathways for those not needing algebra in their future study. These modifications were based on Fall 2016 Data on New Methods for Placement and Math and English (IIC-275).

In November 2016, Windward CC's Testing Center ceased using the COMPASS placement test and began using another instrument, ACCUPLACER (IIC-276) to place students in math and English courses. In anticipation of the discontinuation of the COMPASS test, in March

2016, Windward CC's criteria for assessment of placement into English and math included information from high school transcripts, such as prior achievement in specific mathematics courses, Smarter Balanced Assessment scores, as well as GED scores, transfer coursework from another college, and the Windward CC-sponsored placement test (IIC-277). Self-reported scores as well as official reports from SAT, ACT, and high school transcripts are also accepted (IIC-278, IIC-279).

### **Analysis and Evaluation**

The College meets this standard. Windward CC evaluates and maintains effective bias-free admissions and placement practices, many defined and regulated by the UH and UHCC Systems. Recommended modifications to enrollment processes are assessed in an appropriate time frame. The online application process for admissions is standardized for all colleges within the University of Hawai'i System. Best practices indicate that high school performance and experience are more predictive of college success than placement testing. By using multiple measures, the processes for placement are bias free, relying on no single indicator to ensure whether a student is ready for college classes. Non-cognitive assessment tools have begun to be reviewed to further ensure effective and bias-free admissions and placement practices.

### **Standard IIC.8**

---

*The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student Records.*

---

#### *Maintenance of Student Records*

Windward CC permanently, securely and confidentially maintains student records as published and follows policies established for release of student records (IIC-280 pp 12-13). The UHCCs use BANNER as their integrated student information system. Students' records are created when they apply online using the UH standardized application form. Student identification numbers are then randomly generated and assigned. (IIC-281) to protect the security of their Social Security numbers. Permanent record cards (PRCs) or Pre-BANNER records are kept on a UH System-wide file server, accessed via the F drive, and backed up by the Chief Information Officer of the UH system (Interview G. Imai IIC-282). Financial aid records are created in BANNER after students file their FAFSAs with the federal government and release this information to the College. Student records in Banner and other systemwide information systems are backed up by UH ITS, and the College's Computing Services unit securely backs up data stored on faculty/staff computers and the shared FSFiles file server (Interview M. Tom IIC-283). In 2018, Banner is moving to Multi-Factor Authentication (MFA) with Banner 9 to strength security of the student information system (IIC-284).

Increasingly, counselor notes are entered online in MySuccess and in STAR. There is an initiative to digitize all future counselor notes (Interview A. Rozek IIC-285). Information entered into MySuccess and STAR is only accessible to those with an educational need to

know and permissions for access are secured by the vice chancellor for Student Affairs. Student conduct records are kept in locked file cabinets in the VCSA Office. In February 2018, the UH System president required the data storage in the Title IX Case Management System (CMS), a centralized and standardized information system, by all title IX Coordinators and related staff in cases of sex discrimination and gender-based violence (IIC-286).

Student grievance procedures are stipulated in the Catalog on pp 16-17 and contained in the Windward CC Policy Guidelines Manual, No. 4-6 that is available on the Windward CC website under Policies, Procedures, and Guideline (Academic Affairs), in the library, and in the offices of the VCSA and the VCAA. Records of complaints or informal grievances are stored in locked file cabinets in the VCAA's office, and any complaint not satisfactorily resolved must be filed as a written grievance with the Academic Grievance Committee and is stored in the office of Human Resources in locked confidential personnel files (Interview A. Rozek IIC-287).

For all TRiO programs (SSS, UB, and ETS), student files are kept in locked cabinets, and only opened to review or at the beginning or ending of a term (Interview W. Mow-Taira IIC-288). Recruitment event files include only a student's last name, first name, high school, class, email and phone and are kept in a secured drive on the Outreach and Recruitment Coordinator's office computer (Interview G. Cobb-Adams IIC-289). Attendance lists of Student Life activity participants are limited to sign in sheets using Usernames (Interview K. Alo IIC-290).

### *Release of Student Information*

Student educational rights and privacy are addressed on pages 17-18 of the Windward CC Catalog 2017-2018. Institutional policy and procedures required under the Family Educational Rights and Privacy Act of 1974 and the FERPA Addendum (FERPA) are published as Administrative Procedure AP 7.022. Student information is accessible only to the student, unless the student has officially requested in writing its release to a third party. Students may access their own academic and registration records through STAR by using a password-protected login.

Furthermore, requests for transcripts from the college, for transcript evaluations, verification of enrollment, and changes in major or permanent address must be signed by the student and made directly through the Office of Admissions and Records. To receive information or conduct transactions affecting their records, students must show a current, government-issued photo identification card. Student data are protected by the student information system and employee access to this data is based upon administrative approval. An employee's level of access, based on the nature of the position, is established at hiring. To identify the access needed, employees complete an authorization form which

is approved by the administrative supervisor, and sent to the IT supervisor to open or deny access. The University may, however, at its discretion and according with applicable state law, disclose directory information to the public, unless the student opts out of disclosure as set forth in A7.022. Directions for removing oneself from the UH Online Directory of email addresses, accessible only to those with a valid UH email address, are given on p. 18 of the

Catalog. The description of information from a student's education record as "directory information" is listed on p. 17 of the Catalog.

### **Analysis and Evaluation**

The College meets this standard. Windward CC maintains permanent, secure and confidential student records with provision for secure backup and follows published policies for their release. Student data are protected by the student information system and employee access to this data is based upon administrative approval. Through its observation of published procedures for limiting access to, safe storage maintenance of, and the restricted release of student records and information, the College is committed to maintaining the privacy of personal and confidential information.

## Standard III: Resources

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

### Standard III.A.1.

---

*The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.*

---

### Evidence of Meeting the Standards

Policies governing the qualifications, advertisement, and selection of new personnel are set by the State of Hawai‘i, UH System, and UHCC System with input from collective bargaining units (where appropriate). The College and UHCC system are responsible for ensuring that these policies are followed, and that job descriptions align to the institutional mission and accurately reflect position duties, responsibilities, and authority ([IIIA-1](#), p. 24).

#### *Linkage of Positions to College Mission*

Windward CC has developed comprehensive mission, vision, and core values (MVCV) statements ([IIIA-2](#)) which are evaluated every 5 years by an ad-hoc committee of faculty, staff, and students to ensure currency. Many of the assigned duties and qualifications of job descriptions align with elements of the MVCV statements ([IIIA-3](#)), thus assuring that these positions are compatible with the mission of the College and the campuses’ student-centered teaching philosophy.

#### *Classification of College Personnel*

Personnel at the College and University are classified into one of 4 categories ([IIIA-4](#), [IIIA-5](#)) including Executive & Managerial (E/M), faculty, administrative professional and technical (APT), and civil service positions. Administrators (chancellor, vice chancellors, director & deans) are included in the E/M category whereas instructors, lecturers, librarians, and counselors are classified as faculty. The APT category includes lab technicians, IT personnel, and human resources specialists, whereas CS positions include janitors, clerical staff, and groundskeepers. See [IIIA-6](#) for sample duties and responsibilities for each position.

### *Qualifications by Position Type*

Each position type has posted hiring criteria ([IIIA-7](#)), including minimum and desired qualifications (MQs and DQs). These qualifications include required education, work, and/or leadership experience. In some cases, MQs may include professional licensure or certification. The University posts guidelines for the classification and compensation of each position type. These reference documents, which are available via the UH and Windward CC websites, are used as a basis for creating new job descriptions.

### *Procedures for Recruitment of New Personnel*

The UH Office of Human Resources (OHR) has established clear procedures for the recruitment and selection of Faculty, E/M, and APT personnel ([IIIA-8](#), [IIIA-9](#)). Included in these procedures are:

- Identification of the unit or person responsible for filling the position.
- Guidelines for reviewing and updating position descriptions.
- Type of search required (local vs. national).
- Minimum posting duration and location.
- EEO Responsibilities.
- A description of the screening and interview process.
- Recordkeeping requirements.

Each of these procedures are posted on the UH and UHCC System websites, and most are publicly viewable.

In contrast, the hiring of civil service employees is governed by State of Hawai‘i Policies ([IIIA-10](#)). As part of these policies, the State publishes a template for the creation of new civil service job descriptions ([IIIA-11](#)). This template includes fields for the duties and responsibilities, required licenses or certificates, and recommended skills, knowledge, and educational experience. Users of the template must also identify the supervisor and describe the nature of supervisory control and oversight.

### *Job Descriptions Accurately Reflect Position Duties, Responsibilities, & Authority*

Job descriptions published by the College include a comprehensive list of duties and responsibilities, which are specific to position type ([IIIA-6](#)). Prior to advertising vacant positions, the duties and responsibilities are reviewed by the College and updated as necessary ([IIIA-9](#)). This ensures that posted job descriptions accurately reflect the current responsibilities and duties of the position. Where appropriate (e.g., for executive positions), the job description also indicates the departments or staff who will be supervised by the appointee. Finally, because it is impossible to envision *all* duties required for a given position, all job descriptions published by the College include, “other duties as assigned” as a stated duty. Non-stipulated duties covered by this proviso typically do not exceed 5% of position workload.

### *Advertisement of New Positions*

Job openings for each of the 4 position classifications are published in publically-accessible periodicals or on websites in accordance with UH System and State of Hawai'i procedures ([IIIA-8](#), [IIIA-9](#)). All positions are posted on the WorkatUH website ([IIIA-12](#)). Most executive positions are also posted in the Chronicle for Higher Education (e.g., [IIIA-13](#)) in order to garner a national pool of applicants. Civil service jobs are initially advertised internally. If no suitable applicants are found, these positions are then advertised on the State of Hawai'i government jobs website ([IIIA-14](#)).

The minimum recruitment period for nationally advertised positions (e.g., executive positions) is 15 working days whereas the minimum application period for statewide recruitment (e.g., faculty & APT) is 10 days. In cases where an affirmative action search is warranted (see section III.A.12), the search period may be extended and ads may be distributed to other organizations in order to encourage a more diverse pool of qualified applicants. Casual Hire positions are advertised on HireNetHawaii ([IIIA-15](#)). These positions are short-term (not to exceed 89 days).

### *Selection of Successful Applicants*

Faculty and staff play a significant role in the selection of new employees by serving on ad hoc screening committees. Screening committees for faculty and APT positions typically consist of 3 to 5 members with a mix of gender, ethnicity, and job classifications. Screening committees for E/M positions are typically composed of 6 to 12 individuals and many include representatives from the local community and/or UH System ([IIIA-16](#)).

Once convened, the screening committee develops the interview questions based on the minimum and desired qualifications outlined in the position description. These questions are used to assess the qualifications and abilities of applicants. All interview questions and activities are vetted by a Human Resources representative prior to start of the interview process.

Once the interview questions are approved, the committee reviews the applications and selects those which meet the minimum qualifications for future interview. During the interviews, the committee often uses an approved rubric ([IIIA-17](#)) to objectively evaluate the applicants' qualifications.

The screening committee submits its findings and recommendations to the appropriate vice-chancellor or director, who may elect to hold follow-up interviews. They then make a recommendation to the chancellor. As a practice, finalists for most E/M positions are also required to participate in a campus-wide forum where faculty, staff, and students are permitted to ask questions of the applicants related to their educational background, experience, and qualification for the position. The attendees are encouraged to provide feedback on each applicant via an anonymous online system. The chancellor or designee reviews these submissions along with the selection committee's recommendation(s) prior to selecting the most qualified candidate. Technically, the UH president or BOR is the approving authority for all personnel hired by the College. In practice, however, this authority is delegated to the Windward CC chancellor (for faculty, APT, & dean

appointments) or the vice chancellor of community colleges (for higher-level E/M positions; [IIIA-18](#)).

The quality and effectiveness of the hiring process was evaluated in a 2018 institutional survey: 89% of respondents were satisfied with the level of faculty & staff involvement in the process and 73% were satisfied with the overall quality of the hiring process ([IIIA-19](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC ensures the quality and integrity of its programs and services by hiring faculty and staff who have the appropriate educational background and experience for each position. The College adheres to published UHCC and UH System policies in setting the minimum qualifications for all position recruitments, thus ensuring that faculty, staff, and administrators have the educational and professional experience necessary to succeed in their respective positions. The procedures for recruitment and selection of new personnel are clearly and publicly stated on the UH and UHCC System websites. All job descriptions include a comprehensive list of assigned duties and responsibilities, which are specific to position type. Job descriptions are evaluated prior to publication to ensure that they accurately reflect the current duties and responsibilities of the position.

### **Standard III.A.2.**

---

*Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)*

---

### **Evidence of Meeting the Standard**

The UH Community Colleges collectively establish the minimum qualifications for instructors in each discipline ([IIIA-1](#), p. 25). A master's degree is required for most liberal arts and science, technology, engineering, and mathematics (STEM) disciplines ([IIIA-20](#)); however, some disciplines (e.g., remedial mathematics, business technology, and veterinary technology) do not require a master's degree. In these cases, bachelor's or associate degree plus appropriate professional experience are required.

Faculty at the College are expected to demonstrate excellence in their instructional duties and provide service and leadership within the College and community. They are also expected to develop and update their course materials to ensure that curriculum and programs offered by the College remain current and responsive to students' learning needs (ER 14). Faculty must also maintain an approved program of professional self-development. Finally, instructional faculty are expected to routinely assess learning outcomes and use this data to improve their courses (ER 14). As such, each of these duties are included in vacancy announcements for all teaching faculty at the College ([IIIA-21](#)).

## **Analysis and Evaluation**

The College meets this standard. Windward CC adheres to posted Minimum Qualifications set by the UHCC system. For most disciplines, a master's degree is required. Curriculum development and evaluation of student learning outcomes are included as assigned duties for all teaching faculty. Applicants for new positions are evaluated by a faculty search committee, which includes a subject expert in the discipline. Through the interview process, applicants are evaluated on their level of subject mastery, teaching experience and methodology, and other qualities which support the College's Mission, ensuring that successful applicants are compatible with the College's student-centered teaching philosophy and are prepared to succeed in their assigned instructional and non-instructional duties.

### **Standard III.A.3.**

---

*Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.*

---

## **Evidence of Meeting the Standard**

Guidelines for developing duties, academic qualifications, and job descriptions, are established at the UH System level for all administrators (E/M) and professional support personnel (APTs; [IIIA-1](#), p. 25). As stated in III.A.I, these policies include provisions for the recruitment and selection of executives ([IIIA-8](#)), faculty and staff ([IIIA-9](#)) and include minimum qualifications for each. Candidates for most executive positions must have a master's degree in a relevant field and have attained the academic rank of associate professor or demonstrated a record of comparable professional experience ([IIIA-22](#) p. 2). Faculty in most disciplines must have a master's degree ([IIIA-20](#)). Administrative, professional, and Technical (APT) personnel must hold a bachelor's degree in a relevant field or have an equivalent combination of education, training and/or workforce experience ([IIIA-23](#)). Most civil service positions at the College are not directly involved with instruction. These policies ensure that administrators and other employees responsible for educational programs possess both the necessary qualifications and experience needed to succeed in the position.

## **Analysis and Evaluation**

The College meets this standard. The UHCC and UH systems have established numerous policies (including minimum qualifications) to ensure that personnel responsible for educational programs and services have the necessary qualifications to perform duties required to sustain institutional effectiveness and academic quality. See Standard III.A.1 above.

### **Standard III.A.4.**

---

*Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non- U.S. institutions are recognized only if equivalence has been established.*

---

## **Evidence of Meeting the Standard**

The UH System has established clear guidelines and policies that govern the evaluation of required degrees ([IIIA-1](#), p. 25). To satisfy minimum qualifications, required academic degrees must be from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established by the National Association of Credential Evaluation Services (NACES). NACES is an association of independent, nongovernmental organizations who provide credential evaluation services to individuals who have completed part or all of their education outside the United States ([IIIA-24](#)).

## **Analysis and Evaluation**

The College meets this standard. UH System policies and practice are consistent with the standard and colleges must comply with the policy. Required degrees must be from institutions accredited by recognized U.S. accrediting agencies. Applicants who hold degrees from foreign institutions must have their transcripts evaluated by NACES or an equivalent agency before they can be considered for a position with the College.

## **Standard III.A.5.**

---

*The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

---

## **Evidence of Meeting the Standard**

Policies and procedures for the evaluation of personnel are established by the State of Hawai'i (for civil service positions) and by the UH and UHCC systems (all other positions). The College is responsible for complying with these policies ([IIIA-1](#), p.26).

### *Evaluation of Executive and Management (EM) Personnel*

UHCCP Policy #9.202 ([IIIA-25](#)) requires that administrators are evaluated annually using the 360 evaluation tool. This evaluation is administered by the UH System, and is distributed to peers and subordinates of the person being evaluated during the month of April. The pool of evaluators must include a minimum of 10 evaluators, which may include colleagues, subordinates, and constituents, including permanent faculty under the administrator's jurisdiction. The assessment evaluates the person in 8 broad categories including leadership, relationships with others, problem-solving abilities, planning, and adherence to EEO policies ([IIIA-26](#)). In some cases, it may also evaluate the person on specific performance metrics which are aligned to UH System goals. Once the evaluators complete the assessments, the individual rankings and comments are compiled and sent to the chancellor for appropriate action. However, if the chancellor is the person being evaluated, his/her results are sent to the vice-president of community colleges (VPCC). The chancellor or VPCC uses these results to

create a written evaluation of the subordinate administrator. In May, s/he then meets with the evaluatee to discuss the results of the evaluation. As part of the process, the evaluatee may be asked to draft a plan for improvement.

Unlike most other employees at the College, executive personnel do not receive contractual appointments nor are they covered under any collective bargaining agreement. Instead, they are considered “at will” employees who serve at the pleasure of the UH BOR. As such, they can be terminated with or without cause, and the termination is not appealable ([IIIA-27](#) p. 5). If terminated for cause, the employee may be dismissed immediately. If terminated without cause, the employee must be given written notice between 3 and 6 months before the termination date, depending on how long they have held the position. However, administrators who have return rights to a faculty position can be relieved with only 30-days’ notice after which their salary and duties will revert to that of the former position ([IIIA-27](#) p. 5).

### *Evaluation of Faculty (Excluding Lecturers/Adjuncts)*

The evaluation of UH BOR faculty appointees is covered under Regents Policy 9.213 ([IIIA-28](#)) and the University of Hawai‘i Professional Assembly (UHPA) Collective Bargaining Agreement ([IIIA-29](#)). At minimum, each full-time faculty member must be formally evaluated every 5 years. The evaluation of adjunct faculty (lecturers) is discussed separately in section III.A.8.

### *Contract Renewals*

New faculty are considered probationary until they receive tenure, which is typically sought at the beginning of the fifth year of service. Probationary faculty are required to submit contract renewals ([IIIA-30](#)) at 2-year intervals for the first 4 years of service. As part of the contract renewal process, the applicant must create a dossier ([IIIA-30](#), [IIIA-31](#)) which describes the applicant’s primary responsibilities, outlines their teaching philosophy, and discusses the impact of any leadership, professional development, and campus and community service activities. The dossier should also include analyses of peer and student evaluations ([IIIA-32](#), [IIIA-33](#)) and student learning outcomes (SLO) data (ER 14).

Once submitted, the dossier is reviewed sequentially by the Division Personnel Committee (DPC) ([IIIA-34](#)), department chair (DC), and division dean following a strict timeline and guidelines ([IIIA-31](#), [IIIA-35](#)). Each reviewing body evaluates the dossier according to published guideline ([IIIA-30](#)) and prepares a report of the applicant’s strengths and weaknesses. The DPC also votes for or against contract renewal, sometimes using a secret ballot. Finally, the chancellor conducts his/her own analysis and draws upon recommendations of the DPC, DC, and dean in order to decide whether a contract renewal is merited. If an application does not meet the standards of the review process, the chancellor may elect to terminate the employee by providing them written notice by the end of January. If the applicant has completed less than 2 years of probationary service, they will be discharged at the end of their current probationary period. If the applicant has completed more than 2 years of service, they are issued a terminal one-year contract, commencing the following August ([IIIA-29](#) p. 23).

### *Tenure and Promotion*

Most faculty complete 2 contract renewals prior to applying for tenure and promotion. The UHCC System has created detailed guidelines ([IIIA-36](#)) for preparing tenure and promotion applications. The dossier submitted for tenure or promotion is typically expected to be at a much higher caliber than that submitted for contract renewal. In order to be considered for promotion, the application must show that the applicant is performing at or beyond the next faculty rank ([IIIA-36](#) p. 16).

The review process for tenure and promotion applications is similar to that of contract renewal, although the review operates by separate timelines ([IIIA-37](#)) and using different criteria ([IIIA-36](#)). It also includes an additional level of review via a Tenure & Promotion Review Committee (TPRC). This committee is composed of faculty from a University-wide Faculty Personnel Panel, with at least 50 percent of the committee composed by faculty from the same campus as the applicant. Members appointed from other campuses must be from the same discipline of the applicant or from related disciplines ([IIIA-29](#) p. 35). Finally, all faculty who vote on the TPRC must be of equal or higher rank to which the applicant has applied ([IIIA-29](#) p. 18).

The TPRC evaluates the application in conjunction with published guidelines ([IIIA-38](#)) and the Faculty Classification Policy. The committee then drafts a single report, which includes applicant strengths and weaknesses, the committee recommendation, number of votes for and against tenure/promotion, and any minority view(s).

Upon completion of the TPRC review, the dossier and committee recommendations are forwarded to the chancellor, who decides whether or not tenure and promotion should be granted. Applicants who receive negative tenure actions still have significant recourse. They can request to examine the document and reports and submit additional information to the TPRC. They may also elect to appeal the decision if they believe that the posted guidelines and procedures were not followed ([IIIA-29](#) p. 26-28). Even if the appeal is unsuccessful, the candidate is granted a final 1-year contract before being terminated.

Once a faculty member is tenured and granted promotion to assistant professor, s/he can elect to apply for additional rank (associate and full professor) after 3 years in rank, or if the chancellor has approved a reduction of time in rank. The process for applying for promotion is identical to that used to applying for tenure except that the DPC and TPRC are not required to submit an up-or-down vote on whether or not promotion should be granted (i.e., they may simply submit a list of strengths or weaknesses).

In some cases, a tenured faculty member may elect to defer applying for promotion until they gain more experience in their current position. Despite this, they are still required to submit a formal review at 5-year intervals, even if they are not applying for promotion ([IIIA-39](#)). This rule also applies to full professors.

### *Evaluation of APTs*

The evaluation of APT personnel is covered under Regents Policy 9.213 ([IIIA-28](#)), Administrative Procedure A9.170 ([IIIA-40](#)), and the Hawai'i Government Employee's

Association (HGEA) Unit 8 Contract ([IIIA-141](#)). New hires are considered probationary for the first 3 years of service. During this time, they are evaluated at 12-month intervals ([IIIA-40](#) p. 3). At the beginning of each evaluation period, the supervisor meets with the employee to review the official job description, work assignments, and discuss the supervisor's expectations ([IIIA-40](#) p. 6). At the close of each evaluation period, the supervisor again meets with the employee to discuss his/her assessment and files the official evaluation using the APT Electronic Personnel Evaluation (APT EPE) form ([IIIA-42](#)). This form allows the supervisor to rank the employee in the areas of competency, quality, and productivity, and also includes an overall ranking. Once submitted, the evaluation form and attachments are filed in the employee's personnel file ([IIIA-40](#) p. 7).

Employees who receive satisfactory evaluations in all categories enter a new evaluation cycle. If an employee receives an unsatisfactory rating, the supervisor must include supporting rationale in the review document. In such cases, the supervisor can initiate appropriate action (e.g., termination) immediately ([IIIA-40](#) p. 11) if the employee is still probationary. In contrast, if the employee has employment security, the supervisor must grant the employee 6 months to improve their performance. If the employee has not achieved satisfactory performance by the end of the improvement period, the supervisor may then opt to terminate the employee.

APT personnel who demonstrate exceptional performance may be nominated for a Special Compensation Adjustment (SCA; [IIIA-40](#) p. 11) by their supervisor. The nomination must include certification that the employee meets SCA criteria, supporting documents, and certification that funding is available. The SCA request is then evaluated by the chancellor. If approved, this award is paid as a single lump-sum stipend based on the monthly salary multiplied by a set percentage; however, the award may not exceed 8% of the evaluatee's annual salary.

### *Evaluation of Civil Service Personnel*

The evaluation of civil service personnel is covered under the State of Hawai'i Performance Appraisal System (PAS) ([IIIA-43](#)). Supervisors are required to evaluate each employee on an annual basis. New employees are considered probationary for a period of 6 months; however, this may be extended to a period of up to one year for entry-level or trainee positions.

The PAS system consists of 3 phases (see reference [IIIA-44](#) or [IIIA-43](#)). During the first phase, the supervisor meets with the new employee to discuss the duties of the job and the supervisor's expectations. During the second phase the supervisor provides guidance and support so that the employee can make improvements prior to formal evaluation. During the final phase, the employee's performance is formally evaluated and ranked into one of 3 categories (exceeds, meets, or does not meet expectations).

As part of the evaluation, the supervisor meets with the employee to discuss the results. During the meeting, the employee is encouraged to provide feedback. The employee may provide a written rebuttal to any ranking they believe is inaccurate. The employee is then asked to sign the form, after which they are given a copy for their own records. The original form and any attachments is routed to the personnel officer for review and chancellor for signature. The document is subsequently placed in the employee's official personnel file.

Civil service employees who score at or above levels of expectation enter Phase I of the next annual review period. In cases where an employee's performance is deemed sub-standard, the employee must be given a reasonable period - up to 3 months - to improve performance to a satisfactory level. If, at the end of the improvement period, the employee still fails to meet expectations, the supervisor should discuss the problem with the Office of Human Resources. This office will advise the supervisor of appropriate actions, including transfer, demotion, or termination. After this, the supervisor then enters his/her ranking and initiates the appropriate action.

The effectiveness of personnel evaluation processes was evaluated in several questions in a 2018 institutional survey; 83-84% of personnel expressed satisfaction with the overall evaluation process and 74% of faculty were satisfied with the tenure and promotion process ([IIIA-19](#)).

### **Analysis and Evaluation**

The College meets this Standard. All personnel at the College are evaluated at regular intervals in order to assure their effectiveness. Although the format and frequency of evaluation differs among the 4 position types, each assessment is designed to objectively evaluate the person based on established criteria. Each of the 4 assessments includes a mechanism for constructive feedback in order to encourage improvement. Any employee actions undertaken as a result of an assessment (e.g., promotion, probation, or termination) are formally documented and follow regulations of the collective bargaining agreement (for APT, CS, and Faculty Positions) or UH BOR policy.

### **Standard III. A.7.**

---

*The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes (ER 14).*

---

### **Evidence of Meeting the Standard**

The College is responsible for ensuring that it employs sufficient faculty to meet programmatic goals and fulfil the institutional mission. While no formal policy governs the ratio of full-time (BOR Appointees) to part-time faculty, the College and UHCC system annually monitor this ratio to ensure compliance with the standard ([IIIA-1](#), p. 26, ER 14).

#### *Current Staffing Levels*

The College employs 75 full-time and 70 part-time faculty in over 30 disciplines ([IIIA-45](#)). In AY 2015-2016, full-time faculty taught approximately 58% of the 600+ class sections offered by the College. Part-time (adjunct) faculty taught the remaining 42%. A recent review ([IIIA-48](#)) of the College's 5 major degree and certificate programs indicates that faculty numbers are sufficient to ensure maximal efficiency for 4 of 5 programs (ER 14). In addition, the College ensures an optimal and safe learning environment by limiting class sizes for lecture-and lab/studio classes to 35 and 20 students, respectively.

### *Evaluation of Faculty Numbers*

Each year, unit leaders (department chairs and program directors) conduct a systematic review (e.g., [IIIA-53](#)) of their respective departments and programs to evaluate resource sufficiency (ER 14). This review includes an analysis of quantitative data provided by the Windward CC Institutional Research Office (IRO) ([IIIA-47](#)) and the UHCC System ([IIIA-54](#)). These data include information on program demand, efficiency (including student-to-faculty ratios), and effectiveness. The unit leaders use these data to identify possible staffing and/or equipment needs. The leaders then present the completed review(s) ([IIIA-53](#), [IIIA-55](#)) to their departments for discussion and ranking. Each unit submits its top priorities, in the form of position or equipment requests (e.g., [IIIA-56](#)), to the Planning and Budget Council ([IIIA-57](#)) for consideration.

The PBC consists of College administrators, faculty (department chairs), and staff representing each division or unit ([IIIA-58](#)). The members of the PBC review and rank each request based on 6 criteria: 1) Alignment to System Priorities, 2) Alignment to College Goals, 3) Quality of Supporting Data, 4) Link to Health and Safety, 5) Immediacy of Need, and 6) Level of Impact. The Council tabulates and ranks the requests based on member votes ([IIIA-59](#)). The chancellor uses these data to determine which positions should be funded during the next academic year.

The number of permanent faculty and staff positions allocated to the UHCC system is controlled through legislative appropriation ([IIIA-1](#), p.27). The College can elect to reallocate vacated positions to different disciplines. It can also appeal to the UHCC System to have positions held in its long-term vacancy pool reassigned to the College ([IIIA-60](#)). If no positions are available for reassignment, the College can request additional general funded positions through the UH budgeting process. Finally, the College may also opt to create new unbudgeted positions, which are funded entirely by the College on a temporary basis.

### **Analysis and Evaluation**

The College meets this standard. Windward CC currently employs 75 full-time faculty and 70 part-time faculty. Full-time faculty teach the majority (58%) of the 600+ class sections offered by the College. Lecture and lab classes are limited to 35 and 20 students, respectively in order to maintain an optimal student-to-faculty ratio. The College and UHCC system annually evaluate program data to ensure that faculty numbers are sufficient to maintain academic quality and promote the mission and goals of the College.

### **Standard III.A.8.**

---

*An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.*

---

## Evidence of Meeting the Standard

Windward CC annually employs about 60-70 adjunct faculty (lecturers) who teach approximately 42 percent of all class sections offered by the College ([IIIA-45](#)). During AY 2015-2016, lecturers taught 850 TE ([IIIA-61](#)), which is equivalent to the workload of 31.5 full-time faculty. As such, they are viewed as equal and essential members of the teaching faculty. The College and UHCC system have instituted policies and programs to facilitate the orientation, oversight, evaluation, and professional development of these important faculty members ([IIIA-1](#), p.27).

All new faculty, whether part-time or full-time, are encouraged to attend a new faculty orientation session. These sessions are held during the beginning of each semester and are designed to give new faculty an overview of the mission, programs and services of the College. They also cover topics essential to successful teaching such as syllabus construction, classroom management, FERPA considerations and submission of grades ([IIIA-62](#), [IIIA-63](#), [IIIA-64](#)).

Lecturers are supervised by the division dean with assistance from the department chairs ([IIIA-46](#)). Upon appointment, lecturers must sign a contract ([IIIA-65](#)) and meet with the DC to discuss expectations (e.g., office hours, SLO assessment), departmental resources, and the lecturer assessment process ([IIIA-65](#), [IIIA-66](#)). The DC is also responsible for reviewing syllabi created by adjunct faculty and may assign a peer-evaluator as part of the lecturer evaluation process (see below).

The evaluation of lecturers is outlined in UHCC Policy #9.104 ([IIIA-67](#)). The frequency of evaluation varies from 1-4 years, depending on the cumulative number of credits the faculty member has taught ([IIIA-68](#), [IIIA-69](#)). For each year in which an evaluation is required, lecturers must submit a self-analysis containing the following:

- A discussion of SLO assessments conducted during the contract period ([IIIA-67](#)).
- An evaluation of instructional strategies.
- Results from peer-evaluations ([IIIA-32](#)).
- An analysis of student evaluation data collected through the eCafe assessments ([IIIA-33](#)).

Once submitted, the self-assessments are reviewed by both the DCs and dean using a standardized rubric ([IIIA-70](#)). The DC and dean then provide written feedback to the faculty member and may meet with them to discuss the results and suggestions for improvement.

The College encourages all faculty to participate in professional development. Most professional development opportunities available to full-time faculty (with the exception of sabbatical leave) are also available to part-time faculty. These activities are discussed in detail in III.A.14.

Lecturers are encouraged (but not required) to participate in other aspects of campus life, such as attending departmental meetings, serving on campus committees, and participating in commencement. Additionally, lecturers teaching half-time or more are covered by the faculty union ([IIIA-29](#)) and are eligible to enroll in health insurance through the College. Finally, the College recognizes exceptional adjunct instructors with the Meritorious Lecturer Award ([IIIA-71](#)).

### **Analysis and Evaluation**

The College meets this standard. Adjunct faculty (lecturers) teach a significant proportion of the classes offered by the College and are considered equal and essential members of the teaching faculty. As such, Windward CC and the UH System have instituted clear policies for their orientation, evaluation, and professional development. The College also welcomes lecturers to participate in many campus committees and activities, thus enabling them to become fully integrated into the life of the institution.

### **Standard III.A.9.**

---

*The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution (ER 8).*

---

The College employs a total of 77 full-time staff (excluding administrators), including 30 Administrative, Professional, and Technical (APT) positions and 47 civil service staff ([IIIA-72](#)). Civil Service positions include janitors, secretaries and security guards ([IIIA-73](#)), whereas APT positions include registrars, educational specialists and IT specialists ([IIIA-74](#)).

Prior to hire, each staff member must meet minimum qualifications set by the State of Hawai‘i, UH and UHCC systems (see section III.A.1 and reference [IIIA-7](#)). This ensures that all staff have the degrees and/or work experience necessary to succeed in their respective positions (ER 8).

The number of staff positions allocated to the colleges in the UHCC system is controlled through legislative appropriation. The UHCC system periodically reallocates positions that have gone unfilled by campuses within the system. Colleges may also reallocate positions within their authorized number of position counts in order to meet institutional needs. While no formal staffing ratios are established, the staffing levels for various classifications of employees are periodically reviewed and compared across the colleges in the system ([IIIA-1](#), p. 27). Additionally, departmental analyses (e.g., [IIIA-53](#), p.29) or comparisons of efficiency indicators among campuses (e.g., [IIIA-75](#)) can be used to identify staffing needs (ER 8).

Once a potential staffing need is identified, it is then submitted as a formal request (e.g., [IIIA-76](#)) to the PBC for evaluation and prioritization (see section III.A.7 for a description of the evaluation process). The Council collectively ranks the requests based on the votes of the members ([IIIA-59](#)). The chancellor uses this ranking as a guide in determining which requests are most vital to the campus. S/he may then elect to reallocate vacant positions to the requested position(s). Alternatively, s/he may request reallocation of vacant positions held elsewhere in the UHCC system ([IIIA-60](#)). Finally, if no positions are available, the

chancellor may elect to temporarily fill the position using campus funds via the casual hire process ([IIIA-77](#)). Full-time casual hire positions may not last longer than 89 days.

### **Analysis and Evaluation**

The College meets this standard. Windward CC employs a total of 77 staff, including 30 APT positions and 47 civil service personnel. The campus adheres to minimum qualifications, in accordance with civil service & UH policies & procedures, to ensure each of these staff have the degrees and/or work experience necessary to be effective in their respective positions. The College and UHCC system periodically analyze and compare system and institutional data (including workload) to identify potential staffing needs. The College utilizes the PBC process to prioritize staffing requests. The chancellor may then reallocate vacant positions or use the casual hire process to fill the needed position(s) on a temporary basis. This process ensures that the campus is able to address critical and emerging staffing needs in a timely manner, thus ensuring the campus can continue to fulfill its mission and goals.

### **Standard III.A.10.**

---

*The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes (ER 8).*

---

### **Evidence of Meeting the Standard**

The campus currently employs 7 full-time administrative staff ([IIIA-78](#)). These executives oversee the College's 5 main offices ([IIIA-86](#)) and are collectively responsible for overseeing the College's academic programs, supervising faculty and staff, implementing the College's mission and vision, managing budgets, and overseeing the day-to-day operation of the campus.

As discussed in IIIA.1, UH and the UHCC systems collectively establish the minimum qualifications for executive positions ([IIIA-22](#) p. 2, [IIIA-7](#)). At minimum, candidates for academic administrative positions must have a master's degree and attained a rank of full professor or have demonstrated a record of comparable experience ([IIIA-22](#)). This ensures that the administrative staff have the preparation necessary to provide effective leadership and services in support of the institutional mission and goals (ER 8).

Like faculty and staff positions, the number of administrative positions is controlled through legislative appropriation ([IIIA-1](#) p.27). However, the College may appeal to the UHCC system for vacated positions, if needed.

In addition to the 7 full-time executive staff, the College delegates some administrative duties to senior faculty, including department chairs, discipline coordinators, and program coordinators ([IIIA-87](#), [IIIA-89](#)). These individuals work to coordinate faculty teaching schedules, select textbooks, conduct program reviews, and ensure open communication between faculty and the administration. Most of these faculty receive a reduction of teaching load commensurate with their administrative duties ([IIIA-88](#) p. 6).

Finally, the College also employs 2 FTE faculty and 2 full-time APT to staff the Office of Institutional Research (IRO) and Office of Planning and Program Evaluation (OPPE). These offices are responsible for establishing timelines for course- and program evaluation ([IIIA-90](#), [IIIA-91](#)). They also collect, analyze, and report institutional data on the College, its students, and programs. These data ([IIIA-92](#)) are used to evaluate the institution's effectiveness at fulfilling its mission. Lastly, the IRO and the OPPE also coordinate the assessment of learning outcomes and issue periodic surveys to evaluate the effectiveness of the various units on campus.

In a 2018 institutional survey, the majority of faculty and staff (82.5%) indicated the campus administration structure was adequate and effective ([IIIA-19](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC employs 7 full-time administrators who are collectively responsible for supervising faculty and staff, implementing the College's mission and vision, managing budgets, as well as overseeing the day-to-day operation of the campus. Each of the current administrators has the requisite education (master's degree or higher) and work experience necessary to succeed at their respective duties. In addition, some administrative duties are distributed among other personnel on campus, including the Office of Institutional Research, department chairs, and discipline and program coordinators. The line-of-authority between administrators and all other Windward CC employees is clearly delineated in the College's organizational chart ([IIIA-46](#)).

### **Standard III.A.11.**

---

*The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

---

### **Evidence of Meeting the Standard**

Personnel policies are established and published at multiple levels, including State of Hawai'i, UH and UHCC systems, and the College ([IIIA-1](#) p. 28). Examples of State, UH and UHCC system policies include:

- State of Hawai'i Department of Human Resources & Development Policies and Procedures ([IIIA-93](#)).
- Board of Regents Personnel Policies ([IIIA-94](#)).
- UH System-wide Administrative Procedures, Volume III- Personnel ([IIIA-95](#)).
- UH System-wide Executive Policies- Personnel ([IIIA-96](#)).
- UHCC System Policies ([IIIA-97](#)).

In addition, the College has created a few policies and procedures that are specific to the Windward CC campus. These include:

- Windward Community College Policies, Procedures, and Guidelines ([IIIA-98](#)).
- Office of Academic Affairs Guidelines, Policies, and Procedures ([IIIA-99](#)).

Finally, employees that are unionized are also covered by policies set forth in their respective Bargaining Agreements. These include:

- UHPA 2015-2017 Collective Bargaining Agreement (for Faculty; [IIIA-29](#)).
- HGEA 2013-2015 Collective Bargaining Agreement (for APTs; [IIIA-41](#)).
- UPW Collective Bargaining Agreement (for Civil Service; [IIIA-100](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC adheres to published personnel policies, which are readily available to the public on the UH System, UHCC System, State of Hawai‘i, and Windward CC websites. These policies are fair and are equitably and consistently administered.

### **Standard III.A.12.**

---

*Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.*

---

### **Evidence of Meeting the Standard**

Windward CC is home to a diverse body of students, faculty, and staff. The College’s commitment to equity and diversity are reflected in its mission statement, which affirms “a special commitment to support the access and educational needs of Native Hawaiians,” and its core value of, “A‘ohe hana nui ke alu ‘ia.” (Working collaboratively and inclusively).

A formal EEO/Affirmative action analysis is conducted by the UHCC system office on a regular basis and is incorporated into the recruitment/hiring processes ([IIIA-1](#) p. 28).

Prior to initiating employee recruitment, the campus EEO/AA coordinator must refer to the Affirmative Action Plan (Available from Office of Human Resources) to determine if there is underutilization in the job group for which recruitment is to be carried out. If there are underrepresented groups, affirmative recruitment efforts are implemented ([IIIA-9](#)). Examples of good faith recruitment efforts include:

Specifying a longer recruitment period to encourage a broader applicant pool.

Including members of underrepresented groups on committees for recruitment, screening, interviewing and selection.

Encouraging members of underrepresented groups to apply for higher-level positions.

Sending copies of advertisements to organizations which may bring the available positions to the attention of minorities, as identified by the underutilization analysis.

Furthermore, according to the UH System AA/EEO Statement:

The University of Hawai‘i is an equal opportunity/affirmative action institution and is committed to a policy of nondiscrimination on the basis of race, sex, gender identity and

expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, national guard absence, status as a covered veteran, pregnancy, and domestic or sexual violence victim status ([IIIA-101](#)).

The College also adheres to a comprehensive list of Equal Employment Opportunity and Affirmative Action policies which helps to ensure fair hiring practices and support its diverse personnel ([IIIA-102](#)). These policies cover 6 broad areas:

- Anti-Discrimination ([IIIA-103](#)).
- Sexual Harassment ([IIIA-104](#)).
- Sexual Assault, Domestic Violence, Dating Violence, & Stalking ([IIIA-104](#)).
- Consensual Relationships ([IIIA-105](#)).
- Disability Access ([IIIA-106](#), [IIIA-107](#)).
- Recruitment and Hiring ([IIIA-9](#)).

The College and University also hosts several groups and organizations ([IIIA-108](#)) that promote equity and support diverse body of faculty, staff, and students. In fact, in 2014, Windward CC was ranked as the single-most diverse campus in the nation by the Chronicle of Higher Education ([IIIA-114](#)). Finally, results from a 2018 institutional survey indicate that most (90.7%) faculty and staff believe the College's policies are adequate and appropriate to ensure equity and diversity on campus ([IIIA-19](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC adheres to a comprehensive list of Equal Employment Opportunity and Affirmative Action policies that helps to ensure fair hiring practices and support its diverse personnel ([IIIA-102](#)). The College and University also organize and support groups and organizations that promote equity and support diversity among faculty, staff, and students. The UH and the UHCC Systems regularly assess their record of employment equity and have created an Affirmative Action Plan to address any areas of underutilization.

### **Standard III.A.13.**

---

*The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

---

### **Evidence of Meeting the Standard**

As public employees, UH faculty and staff are governed by ethics policies established by the State of Hawai'i and University of Hawai'i system ([IIIA-1](#) p. 28).

The State of Hawai'i Code of Ethics ([IIIA-115](#)) prohibits state employees from receiving gifts from potential vendors or lobbying groups, knowingly engaging in conflicts of interest, disclosing confidential information, and using state facilities and equipment for personal financial gain. To ensure that these rules are followed, the State of Hawai'i offers periodic training sessions at all UH campuses ([IIIA-115](#), [IIIA-116](#)).

In addition to the State of Hawai‘i ethics policies, there are many university policies and procedures that define expected and prohibited employee behavior in specific contexts, including:

- EP 1.203 Policy on Consensual Relationships ([IIIA-105](#)).
- RP 1.205 Policy on Nondiscrimination and Affirmative Action ([IIIA-103](#)).
- EP 1.204 Interim Policy on Sex Discrimination and Gender Based Violence ([IIIA-104](#)).
- EP 2.210 Use and Management of Information Technology Resources ([IIIA-117](#)).
- EP 2.214 Security and Protection of Sensitive Information ([IIIA-118](#)).
- EP 2.215 Institutional Data Governance ([IIIA-119](#)).
- EP 2.216 Institutional Records Management & Electronic Signatures ([IIIA-120](#)).
- EP 7.205 System wide Student Disciplinary Sanctions ([IIIA-121](#)).
- EP 7.302 Preferred Name Policy ([IIIA-122](#)).
- EP 8.207 Risk Management ([IIIA-123](#)).
- EP 8.208 Travel ([IIIA-124](#)).
- EP 9.112 Delegation of Authority for Personnel Actions ([IIIA-125](#)).
- EP 9.210 Workplace Non-Violence ([IIIA-126](#)).
- EP 10.102 Use of Tobacco Products ([IIIA-127](#)).
- EP 10.201 Use of University-Owned Facilities ([IIIA-128](#)).
- EP 10.206 Free Expression on University Campuses ([IIIA-129](#)).
- EP 11.201 Illegal Drugs, Alcohol and Substance Abuse ([IIIA-130](#)).
- EP 12.211 Policy for Responding to Allegations of Scholarly Misconduct ([IIIA-131](#)).
- EP 12.214 Conflicts of Interest and Commitment ([IIIA-132](#)).
- EP 12.301 Protection of Human Participants ([IIIA-133](#)).
- RP 9.205 Political Activity ([IIIA-134](#)).
- RP 2.205 Policy on Whistleblowing and Retaliation ([IIIA-135](#)).
- RP 4.208 Sustainability Policy ([IIIA-136](#)).
- RP 5.210 Distance Education and Offsite Instruction ([IIIA-137](#)).
- RP 9.204 Employment of Relatives ([IIIA-138](#)).
- RP 9.207 Outside Employment ([IIIA-139](#)).
- RP 11.204 Selling and Soliciting ([IIIA-140](#)).
- RP 11.207 Hazardous Materials Management ([IIIA-141](#)).
- RP 12.201 Ethical Standards for Research and Scholarly Activities ([IIIA-142](#)).

Where appropriate, these policies also include consequences for violation and/or methods for correcting violations. For example, staff who violate the state ethics code may be fined or terminated. Also, Faculty or staff who seek public office are placed on a leave of absence while campaigning and are required to terminate employment before assuming elective office.

In addition to following the above rules, faculty must also abide by the American Association of University Professors (AAUP) Statement on Professional Ethics ([IIIA-143](#), [IIIA-144](#)). Among others, this policy requires faculty to practice intellectual honesty, foster an atmosphere of mutual respect with their colleagues, and encourage the free pursuit of learning among their students.

Based on a 2018 institutional survey, 83.6% faculty and staff feel that the College effectively promotes ethical standards among its employees ([IIIA-19](#)).

### **Analysis and Evaluation**

The College meets this standard. As public employees, UH faculty and staff must adhere to the State of Hawai'i Code of Ethics and comply with 30+ policies created by the University of Hawai'i system. Faculty members are also governed by rules, set forth by the AAUP, which guides many aspects of teaching and scholarship as well as interactions with students. Where appropriate, these policies also include consequences for violation and/or methods for correcting violations.

### **Standard III.A.14.**

---

*The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.*

---

### **Evidence of Meeting the Standard**

The College is primarily responsible for providing appropriate Professional Development (PD) to its faculty and staff, though several PD opportunities are also available through the UH and UHCC systems ([IIIA-1](#) p. 28).

Examples of PD offered by the UH and UHCC systems are described in [IIIA-145](#) and include:

- Scenarios Online: Teaching in a Learning College ([IIIA-146](#)).
- Hawai'i National Great Teachers Seminar ([IIIA-147](#)).
- Writing Across the Curriculum ([IIIA-148](#)).
- Community College Leadership Champions ([IIIA-149](#)).
- Hawai'i Strategy Institute ([IIIA-150](#)).
- Wo Learning Champions ([IIIA-151](#)).
- UHCC Online Andragogy Symposium ([IIIA-152](#) p. 19).

Each of the above PD opportunities emphasize the collaborative and inclusive nature of effective teaching, thus promoting 2 of the College's Core Values ([IIIA-58](#)). In addition, the Hawai'i Strategy Institute specifically addresses strategies to increase student retention, boost graduation rates, institute innovative teaching practices, and increase enrollment and success of underrepresented groups. These initiatives link directly with several action outcomes from the Windward CC and UHCC strategic plans ([IIIA-153](#)).

Within the College, the Staff Development Committee ([IIIA-154](#)), Office of Career and Community Education ([IIIA-155](#)), and Academic Support Division ([IIIA-156](#)) organize many on-campus professional development activities.

Examples of professional development opportunities offered by the College are described in [IIIA-157](#) and include:

- New Faculty Orientation ([IIIA-62](#), [IIIA-63](#), [IIIA-64](#)).
- Orientation to the My Success System ([IIIA-162](#)).
- “Clicker” training ([IIIA-163](#), [IIIA-164](#)).
- Training with new Learning Management Systems ([IIIA-165](#), [IIIA-166](#), [IIIA-167](#)).
- Dossier Hui Workshops ([IIIA-161](#)).
- Incorporating a Sustainability Component in your courses ([IIIA-168](#)).

These workshops provide faculty with the tools needed to create innovative and meaningful curricula, foster student success and personal growth, and emphasize the College’s commitment to the success of Native Hawaiians and preserve Hawai‘i’s unique environment. These initiatives link directly to several aspects of the College Mission ([IIIA-58](#)) and Strategic Plan ([IIIA-153](#)).

### *Professional Development Scholarships*

The Staff Development Committee ([IIIA-154](#)) offers small grants ([IIIA-169](#)) so that employees may attend off-campus PD. These grants are typically used to cover conference registration and associated travel costs. Applications ([IIIA-170](#)) are evaluated principally on their benefit to the College and linkages to its mission. Recipients are required to file a completion report ([IIIA-171](#)) upon conclusion of their PD activity, and are eligible to reapply on a biennial basis. During AY 2015-2016, 10 grants were awarded ([IIIA-172](#)) totaling \$7,786. The average amount received was \$779 and the success rate among qualified applicants was 100% (i.e., all applications were funded).

### *Tuition Waivers*

Tuition waivers are available to all faculty and staff (or spouses) employed at least half-time with the College. These waivers allow users to enroll in up to 6 credits per-semester at any UH campus free-of-charge ([IIIA-173](#)).

### *Sabbatical Leave*

Sabbatical leave enables faculty to engage in scholarship or professional development activities. All BOR-appointed faculty are eligible to apply for sabbatical leave after 6 years or 12 semesters of full-time creditable service. Eligible faculty may apply for a 1-year sabbatical leave at half pay, or a one-semester sabbatical at full pay ([IIIA-174](#)). The chancellor received 12 sabbatical requests over the past 6 years, all of which were funded ([IIIA-175](#)).

### *Professional Development Groups*

There are a number of standing committees and groups on campus that offer professional development opportunities. These include:

- Staff Development Committee: The Staff Development Committee is tasked with identifying professional development needs and planning and implementing professional development activities. The committee also offers individual travel grants (see above) which enable staff to attend conferences and training opportunities on the mainland ([IIIA-154](#)).
- The Subcommittee for Professional Development in Assessment ([IIIA-176](#)): As a subcommittee of the Institutional Effectiveness Committee, the SPDA is tasked with developing training sessions related to student learning outcomes (SLO) and program learning outcomes (PLO) assessment. The SPDA offers workshops on a regular basis (typically 2-3 times a year) in order to foster a culture of continual assessment. Typical training sessions include: Creating meaningful SLOs, SLO assessment strategies, program assessment, and use of the Windward CC assessment database.

### *Evaluation and Assessment of Professional Development Activities*

Most of the professional development programs offered by the College are routinely evaluated in order to ensure they meet the needs of the faculty and staff. For example, the Staff Development Committee and Office of Career and Community Education (CCE) administer surveys following professional development workshops in order to evaluate the effectiveness of the presenter and determine future professional development needs ([IIIA-152](#)). The Staff Development Committee publishes the results of these surveys in its annual report ([IIIA-177](#)).

Applications for Staff Development scholarships and sabbatical leave are also evaluated by campus committees (e.g., [IIIA-178](#)) to determine the merit of each request and ensure that the proposed activities will benefit the students and/or campus. Awardees must submit completion reports upon their return, describing how they will integrate their experience into their courses or job (e.g., [IIIA-179](#)).

Finally, the College issues periodic institutional surveys to faculty and staff which specifically query members about the adequacy and appropriateness of the College's professional development activities ([IIIA-19](#)). Based on the results of these surveys, 91.5% of Windward CC employees are satisfied with the level of campus support for professional development.

### **Analysis and Evaluation**

The College meets this standard. Windward CC and the UHCC system ensure that faculty and staff are able to grow their level of expertise in their respective disciplines and implement effective teaching strategies by providing them with appropriate professional development (PD) opportunities which are consistent with the College's Mission and Strategic Plan. These PD activities are routinely assessed to ensure that they are effective and meet the needs of faculty and staff.

### **Standard III.A.15.**

---

*The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.*

---

### **Evidence of Meeting the Standard**

Records retention policies, including security and confidentiality, are established by the UH system in accord with state law and collective bargaining agreements. The College is responsible for maintaining records under their control in accord with these policies ([IIIA-1](#), p. 29).

Administrative Procedure A9.075 ([IIIA-180](#)) establishes a uniform system for the creation and maintenance of personnel records for all BOR-appointed employees (faculty, APTs, and E/M and lecturers). Included in this policy are:

- A description of the required components of the personnel file.
- A discussion of security requirements for access and storage.
- Additional security requirements for sensitive files.
- A mechanism for transferring records to other campuses within the system
- Guidelines for long-term archival of personnel files once the employee has resigned or is terminated.

Additionally, Policy A9.025 ([IIIA-181](#)) clearly establishes the employee's right to examine their personal records and sets-forth procedures for requesting a review. Included in this policy are:

- A standardized form for requesting access.
- A 10-day timeline for granting such a review.
- A description of materials that can be legally withheld from the employee.
- A mechanism for correcting erroneous information in the personnel record.

### **Analysis and Evaluation:**

The College meets this standard. Windward CC maintains the security and confidentiality of personnel records while simultaneously ensuring that employees have access to their personal records in accordance with the law. Records for UH BOR-appointed personnel are stored in secured file cabinets in a locked room. Only chancellor-designated personnel (typically HR staff) have routine access to these files. Particularly sensitive materials (e.g., worker's compensation claims, allegations of misconduct, and academic grievances) are stored in separate, secured files. Personnel files are archived or destroyed in accordance with State of Hawai'i, Department of Accounting and General Services, and General Records schedules. Finally, the College has established procedures for employees to view their personnel records and, if necessary, correct any erroneous information.

### **Relationship of Standard III.A to Quality Focus Essays**

As part of this Institutional Self Evaluation Report, the College has identified 2 areas for improvement. These include:

- Pursuit of Native Hawaiian parity in campus performance measures including enrollment, persistence, graduation, and transfer.
- Redesign and expansion of online course offerings to increase success rates and meet increasing demand.

Both of these initiatives will likely require additional personnel and physical resources (equipment, software, and facilities). These needs can be addressed through the Planning and Budget Council (sections III.A.7, III.A.9, & III.B.2) and MAPSAC committee (sections III.B.3). Given that both initiatives are strongly linked to the College Mission and Strategic Plan, it is quite likely that the campus will prioritize funding and resources to meet these goals during the upcoming academic year(s).

## Standard II B. Physical Resources

### Standard III.B.1.

---

*The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.*

---

#### Evidence of Meeting the Standard

##### *Facilities Overview*

Established in 1972, Windward CC was initially housed in facilities vacated by the Hawai'i State Hospital after it relocated. The College now consists of 22 buildings (13 instructional) totaling 369,444 GSF which are distributed across a picturesque 64 acre campus ([IIIB-1](#), [IIIB-2](#)). When grouped by function, the majority of building space is devoted to credit instruction (44%) and student support and library services (37% combined). The remainder is used for administrative services (9%), Career and Community Education (5%) and operations and maintenance (3%). The College does not have any off-campus facilities.

##### *Facilities Quality & Sufficiency*

The campus assesses the quality sufficiency of its facilities through a variety of methods, including institutional surveys and space-use studies. Two classroom-use studies, conducted in the last 4 years ([IIIB-3](#), 113-121 and [IIIB-4](#)) indicate that overall classroom utilization is low (24%) and additional classes can easily be accommodated with strategic scheduling. Similarly, a parking study conducted at the same time found that the campuses parking spaces can accommodate ca. 94% of student demand, but that an additional 38 spaces would be needed to fully meet students' needs ([IIIB-3](#), p.29). Results of a 2018 institutional survey corroborate the above studies; of the 63 campus employees completing the survey, 85.5% indicated that physical resources (including parking, facilities, and equipment) were adequate or exceptional ([IIIB-5](#)). See section III.B.3 for more assessments of facilities sufficiency.

##### *Assuring Access*

Facilities use on campus is governed by EP 10.201 ([IIIB-6](#)). Campus facilities may be reserved by campus- or non-campus groups through the Office of Continuing and Community Education ([IIIB-7](#)). Priority is given to educational functions and faculty and student organizations. The campus also provides assistance with event planning ([IIIB-8](#)).

All new or renovated campus facilities are designed and constructed to ensure access and meet regulatory standards. The UHCC system Facilities and Environmental Health office, in collaboration with the UH system, provide consultant services for projects that are deemed invasive or require a more thorough renovation of existing structures. These consultants assist with technical design specifications and ensure safe ingress and egress and compliance with ADA and OSHA standards ([IIIB-9](#)). Windward CC has also formulated an ADA access plan as part of its Master Plan ([IIIB-3](#)) and provides disabilities services to students who need

it ([IIIB-10](#)). Results from a 2018 institutional survey indicate that 73.6% of faculty and staff are satisfied with the level of campus accessibility and accommodation for people with disabilities ([IIIB-5](#)). Unfortunately, there are still some areas of ADA non-compliance, particularly for wheelchair access (e.g., [IIIB-3](#), p. 42, [IIIB-11](#)). In part, this is due to the age (1930s) of many campus buildings, but is also complicated by State Historic Preservation Division (SHPD) policies, which regulate placement of walkways in historic areas of the campus. Despite this, campus accessibility continues to increase as older buildings are updated or remodeled. 10 of the 22 buildings on campus have been renovated or constructed within the last 10 years ([IIIB-1](#)). Finally, the campus expects to complete construction of ADA-compliant pathways by 2020 ([IIIB-3](#) p. 170).

### *Ensuring a Safe, Secure, and Healthful Learning Environment*

The Office of Safety and Security is responsible for ensuring the campus is a safe and secure learning environment. This office is staffed by a safety and security manager, a staff supervisor, and 6 full-time security officers ([IIIB-12](#), p.13). These personnel collectively provide 24/7 security for the campus and ensure compliance with UHCC security standards ([IIIB-13](#)). These standards ([IIIB-14](#)) were molded from the International Association of Campus Law Enforcement Administrators, a leading authority for campus public safety ([IIIB-15](#)). The department maintains close working relationships with local police, fire-, and EMS personnel to ensure a timely and efficient response in the event of a campus emergency. The Safety and Security Manager also conducts twice-daily inspections of campus facilities to identify and correct any potential fire, security, or ADA violations ([IIIB-13](#)).

The campus is equipped with high-definition closed-circuit video cameras which record most of the outdoor areas of the campus ([IIIB-16](#)). The Safety and Security office also maintains a campus webpage ([IIIB-16](#)) which includes links to several useful resources. These include:

- Emergency Response Guidebook ([IIIB-17](#)).
- Guidelines for Active Shooter scenarios ([IIIB-18](#)).
- Links to incident report forms ([IIIB-19](#)).
- Locations of Automatic External Defibrillators ([IIIB-16](#)).
- Campus Crime Statistics and Annual Security Report ([IIIB-20](#)).
- Instructions for signing up for Safety and Security Text Alerts ([IIIB-21](#)).

Finally, in accordance with the Clery Act, the College maintains a Campus Security Authority committee ([IIIB-22](#)). Individuals selected for the committee have significant responsibilities in the areas of student- and campus activities. Members of the committee receive training from the security manager and are responsible for reporting potential threats to campus security and/or law enforcement.

The effectiveness of the Office of Safety and Security is routinely assessed through campus surveys ([IIIB-5](#)) and annual program reviews ([IIIB-12](#)). The campus also assesses its preparedness for active shooter scenarios by participating in simulation exercises, which are led by HPD ([IIIB-23](#)).

Windward CC is also committed to meeting Environmental Health and Safety standards. It has established a Hazard Communication Plan ([IIIB-24](#)), Hazardous Waste Management

Plan ([IIIB-25](#)), and Blood-borne Pathogen Plan ([IIIB-26](#)). Staff who work with potentially hazardous materials are required to undergo annual training, which is provided by the UHCC Office of Facilities and Environmental Health ([IIIB-27](#)). This office also conducts annual inspections of campus facilities to ensure they are compliant with UHCC and OSHA guidelines (e.g., [IIIB-28](#)).

### *Campus Maintenance*

The campus is maintained by a team of 21 Operations and Maintenance (O/M) staff ([IIIB-12](#), p.8). As part of their duties, these individuals monitor the campus on a daily basis, carry out routine maintenance, and perform minor repairs to campus buildings, grounds, and infrastructure. The College utilizes a Computerized Maintenance Management System (CMMS) to document and track campus work requests. Users can access the system and enter new requests via the campus website ([IIIB-29](#)). The CMMS enables campus administration to identify problem sub-systems and track their rate of malfunction ([IIIB-30](#)). The VCAS prioritizes work requests based on urgency; typically requests related to health and safety receive highest priority, whereas requests related to facilities upkeep and modernization receive slightly lower priority ([IIIB-9](#)).

Minor repairs and maintenance are performed by the O/M staff ([IIIB-12](#), p.8). Larger projects, typically requiring professional design consultants, are managed by the UHCC Office of Facilities and Environmental Health (FEH, [IIIB-27](#)). The FEH, when appropriate, assigns an environmental safety specialist to investigate and recommend remediation of code and safety needs. The FEH informs the UHCC administration of the projects' scope, cost estimate, and schedule.

The College participates in the annual update of the Facilities Renewal Reinvestment Model (FRRM). This process documents the backlog of maintenance and estimates the annual funding required for on-going capital reinvestment ([IIIB-31](#)). As part of this analysis, a facilities condition index (FCI) is calculated for each campus in the UH system. This index represents the proportion of campus buildings that are in need of repair or replacement. Based on the most recent analysis (2016), *approximately 4% of WCC facilities are in need of replacement or significant remodel* ([IIIB-31](#), p.6-7). This is much lower than the UH system average (8%), indicating that the College, UH, and UHCC systems are doing a good job in maintaining and replacing campus facilities. The processes for evaluation, planning, and funding major maintenance projects are discussed in section IIIB.2 & IIIB.4.

As with other physical resource factors, the campus periodically assesses the effectiveness of campus maintenance programs. Based on a 2018 institutional survey, the majority of faculty and staff were satisfied with the maintenance of grounds (82.3%) and campus buildings (65.6%), although only 34.5% were satisfied with the timeliness of completion for campus work orders ([IIIB-5](#)). These results will be used by administration to improve campus maintenance programs.

### **Analysis and Evaluation**

The College meets this Standard. Windward CC is committed to providing students with a safe, accessible, and modern learning environment. Campus buildings are constructed or

renovated in accordance with ADA and other regulatory standards. Maintenance and minor repairs are performed by the College's 21 O/M staff and major repairs and renovations are overseen by the UH and UHCC systems. The Office of Safety and Security provides 24/7 security and performs daily inspections of facilities to ensure they are safe, secure, and accessible. The UHCC Office of Environmental Health and Safety provides staff with appropriate hazardous materials training and annually inspects lab facilities to ensure a safe and healthful learning environment. The institution routinely assesses its facilities, security and maintenance programs to ensure that facilities meet student and programmatic needs.

### **Standard III.B.2.**

---

*The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.*

---

### **Evidence of Meeting the Standards**

Long range building and land use planning is managed by the UH and UHCC systems with input from the College ([IIIB-32](#), p. 29). The College and UHCC system are responsible for the acquisition, evaluation, and replacement of equipment.

#### *Facilities Planning*

The physical development of each campus is guided by a Long Range Development Plan (LRDP). This LRDP has 2 parts: the Plan Review Use application (PRU) and Master Plan. The PRU is essentially a zoning permit which guides the master through the approval process as it relates to zoning. It evaluates the effects of a proposed campus expansion on critical infrastructure (e.g., traffic flow patterns, parking, wastewater discharge) and on the local environment. In contrast, the Master Plan guides development of the campus based on data from the PRU and facilities use studies, input from campus stakeholders, and goals outlined in the institutional Mission ([IIIB-33](#)) and the UHCC Strategic Plan. It may also evaluate the relative costs and merits of various development scenarios. The last PRU and Master Plan were completed in 1992 ([IIIB-34](#)). Under the direction of this plan, the campus constructed 4 new buildings, renovated 5 old ones, and expanded the student headcount from 1,500 FTE to over 2,500 FTE.

The College began work on a new LRDP in 2012 and completed a draft of the document in Fall of 2017 ([IIIB-3](#)). This document should be finalized by December 2018 ([IIIB-35](#)). As part of this plan, the College will develop a long-range site utilization plan ([IIIB-36](#)) and pursue the following goals ([IIIB-3](#), pp.170-171):

- Construct a childcare facility (in progress).
- Develop an ADA accessible pathway between campus buildings.
- Vacate Hale 'Iolani, returning the property to the Hawai'i State Hospital.
- Clear and grade campus forested area in preparation for future development.
- Install an amphitheater adjacent to Hale Hokulani.
- Expand parking and agricultural plots in the NE corner of the campus.

- Relocate current shop facilities to the grounds of Hale Awa.
- Relocate vocational programs to the old maintenance yard.

### *Renovation Projects are Data-Driven*

The UHCC System supports campus planning by acquiring and allocating Capital Improvements Program (CIP) funding for the planning and implementation of construction projects ([IIIB-37](#)). These are discussed in III.B.4. The UHCC system has requested a total of \$299.4 M for capital improvements over the next 6 years ([IIIB-38](#), p. 10). The main goals will be to reduce deferred maintenance, increase facilities efficiency, and implement design standards that reflect a modern teaching environment. The budget includes \$ 8.8 million for renovation of Hale Alaka‘i. This building is primarily used for administration, and has undergone only minor renovations since it was built in the 1930’s. As part of the overhaul, the building will be rewired and the air conditioning systems will be tied into the campus’s chill water loop. These changes will increase energy efficiency and bring the building up to code. The renovation of Hale Alakai, and that of other buildings identified in the CIP plan, is data driven; these facilities were selected for remodel because FRRM analysis indicates that they are energy inefficient and have multiple failing or out-of-date sub-systems ([IIIB-31](#)).

### *Equipment Planning and Acquisition*

The College is primarily responsible for the planning and acquisition of equipment and other physical resources. Equipment needs are typically identified at the department level based on user input and data from annual or program reports ([IIIB-39](#)). The needs are ranked within each department and then submitted as formal requests (e.g., [IIIB-40](#)) to the College’s Planning and Budget Council (PBC) ([IIIB-41](#)). The Council includes representatives from each division of the College ([IIIB-42](#)). The Council discusses each request and ranks them using a standardized rubric ([IIIB-43](#)). The chancellor uses the ranking provided by the PBC ([IIIB-44](#)), along with other data, to decide which requests will be funded. S/he then publishes the list of successful requests on the PBC website ([IIIB-45](#)).

Once approved, requests for equipment purchase or replacement are normally funded through the College’s discretionary budget, although some may also be funded through the UHCC system ([IIIB-46](#)). All purchases must meet UH System procurement rules ([IIIB-47](#)), and items over \$2,500 must go out for competitive bid via the State’s SuperQuote system ([IIIB-48](#)).

Based on a 2018 institutional survey, the majority (67.9%) of faculty and staff were satisfied with the maintenance and replacement of campus equipment ([IIIB-5](#)).

### **Analysis and Evaluation**

The College meets this standard. Facilities construction and renovation are overseen by the UH and UHCC systems. New construction is guided by the campus LRDP which is aligned to the College Mission and UHCC strategic plan. This document draws upon facilities utilization data, demand data, and stakeholder input in order to ensure that new construction will effectively meet institutional needs. Funding for Capital Improvements is provided by the UHCC system and state legislature. The campus uses the computer-based Facilities

Renewal & Reinvestment Model and CMMS to decide when facilities are in need of renovation or replacement. Acquisition and replacement of other physical resources are overseen by the College and are guided by the PBC process.

**Standard III.B.3.**

*To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.*

**Evidence of Meeting the Standard**

*Assessment of Physical Resources*

The College uses several types of evidence to assess the quality, safety and sufficiency of existing campus facilities. Most of these assessments were discussed in previous sections and are summarized in *Table 1*.

**Table III.B.1. Summary of data and analyses used to evaluate facilities and equipment.**

Assessment	Qualities Assessed	Frequency	Resource Assessed	References
Inspections by O&M and Security Staff	Safety, Security, Operation	Daily	Facility	<a href="#">IIIB-13</a> , <a href="#">IIIB-12</a>
Frequency of Work Orders	Operation	Annual	Facility	<a href="#">IIIB-12</a> p. 19, <a href="#">IIIB-29</a>
Facility Renewal Reinvestment Study	Adequacy	Annual	Facility	<a href="#">IIIB-31</a>
Program & Departmental Reports	Adequacy, Suitability	Annual	Facility Equipment	<a href="#">IIIB-39</a>
PBC Requests	Adequacy, Safety, Operation, Suitability	Annual	Facility Equipment	<a href="#">IIIB-49</a> , <a href="#">IIIB-40</a>
Facilities Use Studies	Adequacy	2-3 years	Facility	<a href="#">IIIB-3</a> p. 112-121, <a href="#">IIIB-4</a>
Third-Party Inspections	Safety, Adequacy, Suitability	6 months-5 years	Facility Equipment	<a href="#">IIIB-11</a> , <a href="#">IIIB-50</a> , <a href="#">IIIB-51</a> , <a href="#">IIIB-28</a>
Institutional & Program Surveys	All	5-7 Years	Facility Equipment	<a href="#">IIIB-5</a> <a href="#">IIIB-52</a>
Focus Groups	All	Varies	Facility	<a href="#">IIIB-3</a>

Requests for new or remodeled facilities typically require the campus to pursue CIP funding (see sections 2 & 4) and may also necessitate a modification to the campus Master Plan as discussed in IIIB.1. Requests for new or repurposed facilities are evaluated by the Master Planning and Space Allocation Committee ([IIIB-53](#)). The committee is tasked with

evaluating requests for the use of current facilities and also plans for new construction and renovation ([IIIB-54](#)). The committee is chaired by the VCAS and includes representation from all major College departments ([IIIB-55](#)). New requests (e.g., [IIIB-56](#) & [IIIB-57](#)) may be submitted throughout the academic year. These requests are evaluated by the committee based on perceived need and alignment with the College Mission and system goals. The committee may also solicit input from other faculty and staff through the campus discussion board ([IIIB-58](#)). The requests are voted on by the committee, after which the chair issues a recommendation to the chancellor ([IIIB-59](#)).

Facility construction or remodel requests must also be evaluated by the Windward CC Aesthetics Committee ([IIIB-60](#)). This committee is tasked with ensuring that new facilities comply with the aesthetic standards of the campus and are congruent with the LRDP ([IIIB-61](#)). Most requestors meet with the committee early in the process to discuss the location and general scope of the construction or remodel. Once the project consultants complete an initial design and rendering (e.g., [IIIB-62](#) & [IIIB-63](#)), the requestor submits an application to the committee for evaluation. The committee evaluates the request using design guidelines ([IIIB-64](#)), developed through the Master Planning process. It may then approve the request, or recommend design changes, which must be addressed by the consultants prior to completing final design. This process ensures that new construction complies with the LRDP and meets campus aesthetic design standards.

### **Analysis and Evaluation**

The College meets this standard. Windward CC regularly assesses its physical resources in order to determine its feasibility of upkeep and effectiveness in supporting institutional programs and goals. In particular the College uses the FRRM model to determine feasibility of long-term facilities upkeep. Facilities which do not meet programmatic needs or have reoccurring systems failures are prioritized for remodel or replacement, which is accomplished through CIP funding. The College utilizes the MaPSAC committee, Aesthetics Committee, and LRDP to guide new construction and ensure that it is congruent with the aesthetic standards of the campus.

### **Standard III.B.4.**

---

*Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.*

---

### **Evidence of Meeting the Standard**

Planning for new facilities, including total cost of ownership is managed by UHCC and UH Systems ([IIIB-32](#), p. 30). Major capital projects are managed by the UH system, whereas minor ones are managed by the UHCC system ([IIIB-37](#)).

## *Budgeting for Capital Improvements*

In accordance with state law, UH submits a biennium budget request to the State legislature for consideration every odd-numbered year. A portion of awarded funds are allocated to the UHCC system ([IIIB-37](#)), which conducts an annual budget meeting to allocate CIP funds. These funds are allocated to each of the 7 campuses based on perceived need (e.g., FRRM data), remediation of safety and code violations, and alignment to campus- and system goals.

CIP funds are appropriated by the Legislature in 3 categories: 1) Capital Renewal and Deferred Maintenance, 2) Minor CIP, and 3) Major CIP.

- 1) Capital Renewal and Deferred Maintenance (CRDM): The CRDM project category is comprised of 2 parts: (1) Capital Renewal and (2) reduction of Deferred Maintenance.
  - a) Capital Renewal – All buildings are comprised of different sub-systems (e.g., roofs, HVAC systems, & finishes) that have predictable lifetimes. The Facilities Renewal Reinvestment Model (FRRM) identifies these sub-systems and formulates an appropriate schedule for their replacement. In essence, Capital Renewal requirements are sub-systems that are at the end of their useful lives and need to be replaced. Failure to implement Capital Renewal projects results in a commensurate increase to the deferred maintenance backlog.
  - b) Deferred Maintenance – Buildings with Deferred Maintenance are facilities that have failing sub-systems or sub-systems that are operating beyond their useful lifetime. The FRRM separately identifies backlogs in building and infrastructure, code and safety, and other one-time needs. Working with the UHCC system, the VCAS formulates a prioritized list of CRDM projects. Funds for CRDM are appropriated as a “lump sum” to the UHCC System. The UHCC reviews the campus priorities and places special emphasis on projects to remediate or eliminate the code and safety needs of the campuses.
- 2) Minor Capital Improvement Funding: Minor CIP implies that projects are relatively small in scope (i.e., less than \$5 million). This category includes funds for the modernization of classrooms and other critical learning environments. These renovations focus on maximizing the efficient use of space in existing facilities. The veterinary technology annex, constructed in 2014, is an example of a minor CIP project which was undertaken to meet an emerging workforce needs. See [IIIB-65](#) for a list of recent Minor CIP projects on the Windward CC campus.
- 3) Major CIP/Line Item Projects: New construction and renovations of existing facilities exceeding \$5 million are typically budgeted and appropriated as line item projects. As an example, Hale La‘akea, the library learning commons, was constructed using major CIP funds.

In 2013 the University of Hawai‘i Board of Regents imposed a moratorium on new construction projects ([IIIB-66](#)). The goal of the moratorium is to redirect the priorities of the University to reduce its deferred maintenance prior to initiating new Line Item Projects.

The UHCC System developed a 6-year CIP plan for fiscal biennium 2017-2019. This plan emphasizes health and safety needs, reduction of deferred maintenance, and modernization of existing facilities ([IIIB-38](#)). This plan includes \$8.8 M for renovation of Hale Alaka'i (see [IIIB.2](#)).

In planning for these long-range capital projects, the UHCC system uses a budgeting model that incorporates the *total cost of ownership (TCO)*. Calculating TCO takes into account an item's purchase cost, but it also considers related costs, such as subsequent use and maintenance and future energy consumption ([IIIB-67](#)). The UHCC Facilities and Environmental Health Office considers the TCO when implementing projects and incorporates design specifications that ensure that campus facilities are cost effective, efficient, and serviceable for long-term use. Examples of TCO reduction measures include:

- A more efficient campus cooling system. Instead of each building having a separate air conditioning system, “chill water” is now generated in a single central location and circulated to other campus buildings with using an insulated chill water loop.
- Retrofitting of windows with a tinted film to minimize heat absorption and reduce energy use.
- A contract with Johnson Controls to implement several Energy Conservation Measures to reduce energy consumption around campus ([IIIB-68](#)).
- Construction of new campus buildings to meet LEED standards ([IIIB-69](#)).

### **Analysis and Evaluation**

The College meets this standard. Long-range capital planning for Windward CC is provided by the UH and UHCC systems. Allocation of CIP funds is guided by the campus LRDP, campus and UHCC goals, and facilities health data. A major goal of the current CIP plan is to reduce deferred maintenance by renovating buildings with multiple failing subsystems. The Facilities Environmental Health Office ensures that new construction incorporates design features that minimize TCO.

### **Relationship of Standard III.B to Quality Focus Essays**

As part of this Institutional Self Evaluation Report, the College has identified 2 areas for improvement. These include:

- Pursuit of Native Hawaiian parity in campus performance measures including enrollment, persistence, graduation, and transfer.
- Redesign and expansion of online course offerings to increase success rates and meet increasing demand.

Both of these initiatives will likely require additional personnel and physical resources (equipment, software, and facilities). These needs can be addressed through the Planning and Budget Council (sections III.A.7, III.A.9, & III.B.2) and MAPSAC committee (sections III.B.3). Given that both initiatives are strongly linked to the College Mission and Strategic Plan, it is quite likely that the campus will prioritize funding and resources to meet these goals during the upcoming academic year(s).

## Standard III.C. Technology Resources

### Standard III.C.1

---

*Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.*

---

#### Evidence of Meeting the Standard

##### *Management and Operational Functions*

The University of Hawai'i's ITS department provides, maintains, and supports a high-speed inter-campus networking infrastructure and essential administrative and business systems for management and operational functions. These include the Banner student information system, the eTravel management system, Quali Coeus for grant administration, the Quali Financial System, PeopleSoft for human resources, and SuperQuote for managing bids on goods and services ([IIIC-1](#)). Windward CC's Computing Services (CS) department oversees the campus networking and telephony infrastructure ([IIIC-2](#) pp. 1-2).

##### *Academic Programs, Teaching, and Learning*

Based on instructional and programmatic needs, Windward CC's Computing and Media Services (MS) departments proactively provide, maintain, and support technology resources in the College's shared learning facilities including computer classrooms, the learning labs, and the library ([IIIC-3](#) pp. 1, 3-4). Most classrooms have permanent multimedia equipment with mobile equipment available for labs and other specialized learning spaces ([IIIC-4](#) pp. 3-5). Other facilities include a classroom equipped with the Hawai'i Interactive Video System ([IIIC-4](#) p. 7), and instructional video and audio production studios ([IIIC-4](#) p. 9). A Windward CC staff grant-funded initiative has also upgraded the UH System's teleconferencing infrastructure to add several remote sites, including several used for Windward CC's Early College program ([IIIC-5](#)).

##### *Software and Services*

Windward CC uses Learning Management Systems (LMS) and conferencing technologies licensed and administered by the UH ITS, UHCC, and the College. Credit programs primarily use UH ITS-administered Sakai/Laulima, while Windward CC's non-credit programs primarily use the locally administered Canvas LMS ([IIIC-4](#) p. 9). UH ITS manages a suite of Google Apps for all UH students and personnel, including communication, productivity, and collaboration applications ([IIIC-6](#)). It has also licensed instructional technology services for UH personnel, such as a web-based survey and assessment tools, a web conferencing system, software for creating online study activities and learning games ([IIIC-7](#)), and online tutoring programs and services ([IIIC-8](#)). Windward CC's CS department has installed MS Office suite the computers it supplies ([IIIC-2](#)), provides the Microsoft 365 software suite to students through a site license ([IIIC-9](#)), and administers a print management system for students and personnel ([IIIC-10](#)).

## *Support Services*

Support services at Windward CC are assisted and enhanced by technology hardware, software, services, and support. The UHCC has provided for the development, implementation, maintenance, and assessment of the MySuccess/Starfish student retention and STAR-GPS guided pathways registration systems ([IIIC-11](#), [IIIC-12](#)). The College supports secure online testing via ProctorU, augments its tutoring services with Brainfuse, and expands its reach for peer-coaching and other support services with teleconferencing platforms such as Zoom and Blackboard Collaborate ([IIIC-13](#), [IIIC-14](#), [IIIC-15](#)). Library services rely on technology hardware, software, and services such as the Ex Libris Library Services Platform, the LibApps CMS, OCLC WorldShare ILL, and numerous content providers ([IIIC-16](#), [IIIC-17](#)). The CS department equips the learning labs and the Library—the College’s primary student computer lab—with dozens of iMacs, Windows desktops, thin clients, and loaner laptops, plus scanners, printers, and assistive technology equipment and software ([IIIC-2](#), [IIIC-18](#)).

## **Analysis and Evaluation**

The College meets this standard. Windward CC relies on several tiers of technology infrastructure, services, training (III.C.4) and support to ensure its information technology services, facilities, hardware, and software are appropriate and adequate to support its management and operational functions, academic programs, teaching and learning, and support services.

With both technologies and curricular offerings in constant development, keeping up is an ongoing pursuit of professional development, resource allocation, assessment, planning, and adaptability. As the College pivots toward more online offerings, most areas of management, operations, and instruction will involve technology-related considerations.

## **Standard III.C.2**

---

*The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.*

---

## **Evidence of Meeting the Standard**

Technology planning and provisioning occur at multiple organizational levels, from the University of Hawai‘i System to specific programs and departments. The College provides the majority of support for its technological infrastructure and equipment with ongoing resource and personnel ([IIIC-2](#) p. 3, [IIIC-4](#) p. 3, [IIIC-19](#), [IIIC-20](#), [IIIC-21](#)).

The UH ITS department assesses, plans for, and provides inter-campus technology infrastructure. It is guided by its *IT Strategic Plan* ([IIIC-22](#)), a mission statement ([IIIC-23](#)), and a website that reflects IT strategies, changes in the technology environment, application development, and timelines for projects in active development ([IIIC-24](#)). This infrastructure comprises the inter-campus network, telephony, and teleconferencing capabilities, Internet connectivity, and enterprise applications ([IIIC-25](#)).

UH ITS has continually updated the Sakai/Laulima LMS since its 2007 adoption ([IIIC-26](#), [IIIC-27](#)). In 2016, ITS began a review of LMS platforms based on current needs with the aim to implement the chosen system in AY2019 ([IIIC-28](#)). The process stalled in RFP2017 from a lack of funding ([IIIC-29](#)).

Although former UHCC and Windward CC Strategic Plans made little or no mention of technology ([IIIC-30](#), [IIIC-18](#)), their current plans outline goals and strategies to ensure access to modern teaching and learning environments ([IIIC-31](#) pp. 25-26, [IIIC-32](#) pp. 22-25). The UHCC Strategic Directions commits to developing a system of planned equipment replacement, similar to the building maintenance plan discussed in Standard III.B.4 that accounts for the expected life of equipment, the cost of replacement, and a system-wide budget for capital equipment replacement ([IIIC-33](#), [IIIC-34](#)).

The Computing Services department has the responsibility for planning, purchasing, and management of most of the computing devices. The Media Services (MS) department—recently reorganized into Media & Technology Services (M&TS) and Instructional Development (ID)—handle the College’s shared duplication, audiovisual, and classroom instruction equipment. The College enjoys a uniformity in technology across the campus that reduces training and maintenance time and reduces costs through economies of scale and resource sharing ([IIIC-5](#) p. 1).

Departments plan for equipment maintenance and replacement through assessment mechanisms that inform their action plans and priorities for the AY (e.g., [IIIC-32](#) p. 24, [IIIC-35](#) p. 9, [IIIC-4](#) pp. 12-1).

Although these units do receive regular and direct funding from administration to cover anticipated ongoing equipment and supplies costs, they typically request additional funds via the PBC process when equipment is nearing the end of its anticipated lifespan ([IIIC-21](#) p. 1). For example, in 2014, a member of the Media Services department received a technology grant to provide licensing and hardware upgrades to enhance the Polycom Video Conferencing system for the UH System and to support community access to educational opportunities such as Windward CC’s Running Start dual-enrollment program ([IIIC-36](#), [IIIC-37](#)).

Personnel with disciplines and departments evaluate additional equipment, technology, and software for purchase or replacement and, as appropriate, include the relevant information in their annual reports and funding requests (i.e., [IIIC-38](#), [IIIC-5](#)).

### **Analysis and Evaluation**

The College meets this standard. The 2015 UHCC Strategic Plan called for the creation of a Modern Facilities Task Force (MFTF) by 2016. Among other charges, it is to establish standards for learning spaces — including digital and media requirements—and to facilitate UHCC campus and inter-campus high-speed connectivity upgrades ([IIIC-31](#) pp. 25-26 [IIIC-34](#) p. 44, [IIIC-32](#) p. 24). Though the MFTF has not yet formed, Windward CC has itself committed to upgrade all wired and wireless campus network equipment by 2020, develop virtual classrooms, and seek financial aid or funding to support a computer-ownership requirement for students ([IIIC-32](#) pp. 22-23).

The College continually plans for, updates, and replaces technology to ensure that its technological infrastructure, quality, and capacity are adequate to support its mission, operations, programs, and services. However, the technology services departments saw significant workload increases in recent years from a variety of factors. This has pushed out the timeline for some planned upgrades ([IIIC-35](#) pp. 8-9; [IIIC-4](#) pp. 4-3, 9-10).

One outcome of the Quality Focus Essay on Distance Education, to provide faculty with instructional technologies that best support effective instruction, follows in part from this self-assessment.

### **Standard III.C.3**

---

*The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to ensure reliable access, safety, and security.*

---

#### **Evidence of Meeting the Standard**

The UH System has policies, technologies, and procedures to protect sensitive data, maintain college operations, protect against cyber-attacks and unauthorized access, provide data backup and recovery, sufficiently monitor and respond to malicious network traffic, and enforce compliance with laws, policies, and regulations ([IIIC-39](#), [IIIC-40](#)). It has created a high-speed digital network connecting all campuses. Windward CC's CS department has prepared to maintain continued functioning during hardware failures by keeping spares ready, including an extra workstation in the classrooms, and by configuring staff computers with secondary print locations. Campus servers have fault-tolerant components such as RAID storage, ECC memory, and dual power supplies to avoid downtime in the event of a single component failure. The CS department also purchases 3-year to 5-year extended warranties for most equipment ([IIIC-20](#) p. 2).

Uninterrupted power supplies maintain functionality during short power interruptions to the campus servers, network switches, PBX, and Ethernet-connected wireless access points and telephones. A portable generator can keep the College's Internet connection, PBX, web server, and file servers running during extended power outages ([IIIC-20](#) p. 2).

UH ITS provides software, services, and technical support to protect the UH community against computer viruses and security threats ([IIIC-41](#)). It has site-licensed anti-virus software for personnel and students, plus programs for employees to prevent data leaks and secure sensitive information ([IIIC-42](#)). To recover lost data in the event inadvertent change or deletion, hard disk failure, computer loss or theft, or compromise by ransomware, the faculty/staff computers continuously and automatically back up to the campus file servers via CrashPlan Pro. The physical media holding nightly incremental/differential backups and periodic full backups rotate to separate buildings weekly to limit data loss from a catastrophic event ([IIIC-20](#) p. 2).

UH ITS provides several methods and tools for secure data transfer and authentication, including Secure Shell and Secure Sockets Layer protocols, multi-factor authentication, an LDAP server, and other measures ([IIIC-43](#), [IIIC-44](#), [IIIC-45](#)).

Windward CC's Computing Services department has deployed Dell Data Protection | Endpoint Security Suite Enterprise software for data encryption and advanced threat protection, plus McAfee antivirus and Symantec PGP for some applications. Many PCs have self-encrypting hard drives, FileVault encryption is standard for new Macs ([IIIC-2](#) p. 7, [IIIC-30](#), [IIIC-20](#) p. 2), and CS has implemented FortiGate 600D/ FortiClient security appliances ([IIIC-35](#) p. 8).

### **Analysis and Evaluation**

The College meets this standard. The UHCC Strategic Directions commit the UHCC's to assess its inter-campus ) and internal campus networks to assure that they provide the required high-speed connectivity to teaching and learning spaces, to business operations, and to students, and to implement necessary upgrades ([IIIC-33](#) p. 45).

The College also meets this standard by assuring that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to ensure reliable access. It also recognizes a need increase security through training, resources, and staffing so it can adequately defend against and respond to malicious attacks and ransomware ([IIIC-2](#) p. 7-8).

### **Standard III.C.4**

---

*The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.*

---

### **Evidence of Meeting the Standard**

Personnel and students receive technology instruction and support at several organizational levels, including the UH System, the UHCC system, and the College.

The UH System also offers a variety of support and resources for its constituents in all areas of service, including support tools, servers, instructional technologies, and infrastructure through its Help Desk ([IIIC-46](#), [IIIC-47](#)). The UH ITS Help Desk provides phone and support to all UH students and personnel daily from 7:00 am to 11:00 pm including holidays ([IIIC-46](#)), walk-in support (at UH Mānoa), and an extensive online knowledgebase ([IIIC-47](#)). Technical assistance includes setup, troubleshooting, and basic operation of supported computing devices, software, operating systems, hardware, UH servers, ITS-managed online services, and network connectivity. The ITS Help Desk will also attempt "Best Effort" problem resolution for up to one hour for unsupported operating systems, software, and devices ([IIIC-48](#)).

The Teaching and Learning with Electronic Networked Technologies (TALENT) program from UH ITS provides faculty and students on all campuses with manuals, tutorials, a knowledgebase, and other resources ([IIIC-49](#), [IIIC-50](#)), including a \$20/yr. site license for Lynda.com tutorials for employees and students ([IIIC-51](#)). The University offers technology workshops to UH personnel on its operational platforms, including those for travel, purchasing, financial services, human resource management, facilities management,

conferencing, and others ([IIIC-52](#), [IIIC-53](#), [IIIC-54](#)). This is augmented by technical support from the UH Library Systems Office (UH LSO) to Windward CC's library for its Library Services Platform, link resolver, and proxy server ([IIIC-55](#)). Other vendors, through the UH L S O ([IIIC-56](#)) and the Hawai'i chapter of the Ex Libris Users of North America, provide related training ([IIIC-57](#), [IIIC-16](#), [IIIC-58](#)) to library users.

Grants from UHCC's Wo Learning Champions program have provided free registration to UHCC personnel to attend the annual Technology & Colleges and Community Conference ([IIIC-59](#), [IIIC-60](#), [IIIC-61](#)). The Windward CC Staff Development Committee (SDC) offers technology-related workshops each year ([IIIC-62](#) pp. 2, 4, 8, 9, 11, 13, 15), with recent offerings focused on productivity suites and computer security ([IIIC-63](#)). The committee also awards grants to individuals and groups from the chancellor's staff development fund ([IIIC-64](#)). The ID and AV&T (formerly MS) departments offer workshops, individual training, and support in creating and using audiovisual materials, using classroom and duplication equipment, and audio-visual technologies ([IIIC-4](#) pp. 7, [IIIC-65](#), [IIIC-66](#), [IIIC-8](#) p. 5).

The Windward CC CS department provides user support services by email and its Help Line for Windward CC employees, and for anyone encountering campus wireless network and account issues ([IIIC-10](#)). Library personnel assist computer users with familiar tasks and problems, referring more difficult matters to the UH ITS Help Desk ([IIIC-67](#) p. 3-4).

### **Analysis and Evaluation**

The College partially meets this standard. Although the College and its parent systems provide generally adequate instruction and support for personnel and students in the effective use of technology and systems related to its programs, services, and operations, several areas need improvement.

Faculty and staff, while satisfied with the response time and quality of assistance from the CS department, report a relatively low rate of satisfaction with technology training. Increased demand for support has limited the time available to devote to technology instruction and mentoring ([IIIC-68](#) p. 1, [IIIC-2](#)).

Walk-in technology support for students is minimal. Library personnel provide most of the hands-on computer assistance outside the classroom, but often lack experience with the applications used for many courses. The College has intermittently funded a student employee to give computer help in the library during peak hours. However, the employee's supervisor is unqualified to provide technology training or higher-level support ([IIIC-67](#) p. 3-4).

The College has identified insufficiencies in the availability of support staff, evening and weekend service hours, and faculty training to meet a growing demand for distance education services ([IIIC-69](#) p. 1).

The 2017 restructuring of Media Services into 2 units, (a.) Media & Technology Services and (b.) Instructional Development ([CIII-70](#) p. 3), has begun to address some of these issues, as it redefined roles to allow the Faculty Coordinator and the upgraded position of Instructional Technologies Services Coordinator to focus on their specific areas of expertise ([IIIC-71](#) p. 3).

The UH System's Distance Learning Advisory Council is in the process of creating a UH Distance Learning Strategic Plan ([IIIC-72](#), [IIIC-73](#)). Windward has also set among its Strategic Outcomes plans to increase training and resources for instructors who teach online courses and to offer resources for students in need of learning assistance ([IIIC-32](#) pp. 24-25). Departmental plans reveal efforts to address training needs through increased staffing and staff development ([IIIC-2](#) pp. 7-9, [IIIC-35](#), p. 9, [IIIC-38](#), [IIIC-4](#) pp. 9-10, [IIIC-11](#) p. 9).

Assessment and planning documents spanning several years reveal the need to expand technology instruction and support. The QFE on Distance Education reflects on and brings together plans to address this need, particularly for preparing our faculty to teach as effectively online as they do in the classroom.

### **Standard III.C.5**

---

*The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.*

---

### **Evidence of Meeting the Standard**

The University of Hawai'i System holds anyone using its technology resources responsible for complying with the posted UH policies, state laws, and external standards and regulations. Collectively, these govern a broad range of considerations, including the use and management of information technology resources, data security and governance, student conduct, privacy, identity protection, and copyright (IIIC-28, IIIC-29).

Several UH System policies guide the use of technologies in teaching and learning:

- UH EP 2.210 — Use and Management of Information Technology Resources (IIIC-92).
- UH EP 5.204 — Distance and Online Learning (IIIC-93).
- UH BOR 5.210 — Distance Education and Offsite Instruction (IIIC-91).
- UH ITS Computer Support Policy (IIIC-33).
- The WCC Library Computer and AV Equipment Use Policy (IIIC-34).

### **Analysis and Evaluation**

The College meets this standard. Windward CC follows policies and procedures that guide the appropriate use of technology in teaching and learning.

## Standard IIID. Financial Resources

### Standard III.D.1

---

*Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)*

---

#### Evidence of Meeting the Standard

The UH System and Board of Regents (BOR), the University of Hawai‘i Community Colleges (UHCC) and Windward Community College are committed to supporting and sustaining student learning programs and services and improving institutional effectiveness. The UH System and BOR approve the UH request for general funds submitted to the Hawai‘i State Legislature, set reserve policies, tuition rates, and approve the annual operating budget of the 7 community colleges, and Office of the Vice President for Community Colleges, that make up the UHCC system. The UHCC system allocates general funds and manages the collection of tuition and fees for all 7 colleges, including Windward CC. The colleges are involved in the system budget planning, including adhering to all reserve requirements established by the BOR. Each college is responsible for the budget execution of general funds and tuition and fees with regard to campus fiscal year operational expenditures. See Functional Map ([IIID-1](#)).

Windward CC receives general fund support from the Hawai‘i State Legislature through biennial and supplemental year requests as a portion of general funds allocated to the UH system, and not on an FTE or other formula basis from the Legislature. The resource allocation model and oversight provided by the UHCC System to all 7 campuses is well-established and ensures stability. Developed in 2013, this model includes 2 sources: State of Hawai‘i’s General Fund (GF) and Tuition and Fees Special Funds (TFSF). The College’s annual GF allocation remains relatively stable even when enrollments go down, mitigating the impact of the loss of TFSF revenue. Conversely when enrollment grows, campuses generate additional revenues to meet increased costs. The methods and procedures to make these allocations are described in UHCCP #8.000. ([IIID-2](#)).

#### *Supporting Programs and Services*

The College documents a funding base, financial resources, and plans for financial development adequate to support student learning programs and services, to improve institutional effectiveness, and to assure financial stability (III.D.1; ER18). The FY17 Operating Budget ([IIID-3](#)) shows that the College’s total available funds in the unrestricted general fund covers all projected expenses and exceeds both minimum 5% and target 10% reserve thresholds required in the UHCCP Policy #8.201 ([IIID-4](#)) and 16% requirement set by the UH BOR ([IIID-5](#)).

The College GF allocation has increased from \$9.2M to \$11.8M in the last 5 years as shown in Table 3D-1 ([IIID-6](#)). The TFSF reached its peak at \$5.0M in AY 2015 and slightly

decreased to \$4.8M in AY 2017 due to a state-wide decline in enrollment. The tuition increase has helped offset the declining enrollment. The GF combined with the TFSF comprise the “unrestricted operating budget” and this has increased by 22% over the 5-year period.

**Table III.D.1 General Fund and TFSF Allocations from FY 2013 to 2017.**

	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017
<b>General Fund Allocation*</b>	9,227,334	10,236,289	10,417,468	11,117,281	11,868,550
<b>Tuition &amp; Fees SF Revenue**</b>	4,467,691	4,807,782	5,043,150	4,809,153	4,798,219
<b>Total</b>	13,695,025	15,044,071	15,460,618	15,926,434	16,666,769

*\*GF allocation before funding mix*

*\*\*TFSF revenue is cash basis all years*

Other special and revolving funds supplement the College available resources. These are used to support specific program activities, such as career and community education, non-credit instruction, summer session instruction, conference facilities and student activities. The individual funds are established by statute and operate on a self-sustaining basis. In addition to covering direct costs, programs are required to generate an administrative cost fee (10%) to cover their equitable share of general campus operating expenses. The College special and revolving funds displayed in Table 3D-2 ([IIID-7](#)) have remained stable over the last 5 years.

**Table III.D.2 Special and Revolving Funds from FY 2013 to 2017.**

	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017
<b>Other Special Fund Revenue</b>	929,238	1,212,945	1,229,701	1,173,845	1,312,514
<b>Revolving Fund Revenue</b>	207,600	336,964	302,322	266,656	222,656
<b>Total</b>	1,136,838	1,549,909	1,532,023	1,440,501	1,535,170

The College is highly successful in securing extramural funds from federal, state, and private sources through competitive grants. These funds are used to supplement needs for supplies, equipment, facilities and personnel and have helped improve institutional effectiveness. In FY14-15 alone, the College was awarded \$6,235,610 in grant funding, which is higher than either UH West Oahu or Kapi‘olani CC. All extramural funds are administered through the University Office of Research Services (ORS). The 4-year total extramural fund expenditures for FY 2013 to 2016 is over \$20 million ([IIID-8](#)) as shown in Table 3D-3.

**Table III.D.3 General Fund and TFSF Allocations from FY 2013 to 2016**

	FY 2013	FY 2014	FY 2015	FY 2016
<b># Extramural Grants (ORS data)</b>	20	16	20	15
<b>Extramural Grant Awards (ORS data)</b>	6,164,799	2,161,043	6,235,610	5,313,299
<b>Extramural Fund Expenditures (UHCC data)*</b>	6,720,489	5,837,974	4,300,404	4,923,580

*\*Excludes appropriated federal funds (Federal Work Study, Career & Technical Education)*

The College has been extremely successful in meeting almost all performance targets, in obtaining additional funding from the State through the UHCC performance funding and innovation and strategic initiative funding allocations. As discussed in IB.8, the UHCC system has a performance funding formula in place to allocate a portion of funding based on performance indicators such as degrees and certificates awarded, number of low-income students participating the Federal Pell program and number of transfers to the baccalaureate campuses. The UHCC system also has innovation and strategic initiative funding allocations that are used to address critical needs identified through the strategic planning process that includes subsidizing the cost of new classes, reforming developmental education, improving retention and persistence through guided pathway and early intervention systems, expanding financial aid support, supporting Native Hawaiian achievement, and replacing equipment, etc. These resulted in additional funding from the State, shown in the Table 3D-4. ([IIID-9](#), [IIID-10](#)).

**Table III.D.4 Performance and Strategic Initiative Funds from FY 2013 to 2017.**

	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017
<b>WCC Performance Funding</b>	197,161	755,090	904,714	1,046,859	935,507
<b>Strategic Initiatives Allocations</b>	207,291	422,985	569,627	223,295	310,252

***Integrity and Stability***

The College ensures that the distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. As discussed in Standard I.B.9, the Integrated Planning Model requires that all departments review, identify and prioritize its resource needs to enhance its programs and services. All funding requests, equipment, operating initiatives, facility improvements, and position requests, are forwarded to the Windward CC Planning and Budget Council (PBC) for review, ranking, and consideration. Funding requests are prioritized based on program needs linked to student learning outcomes, annual program review, campus strategic plan goals and benchmarks. Funds for student services, curriculum development and assessment, and technology are prioritized based on the results of program reviews. The chancellor approves funding requests based on the PBC rankings and on the availability of funds, as discussed in III.D.6. Upon final approval, the Chancellor’s Office sends notification to the requesting unit that their items may now be purchased or positions filled ([IIID-11](#), [IIID-12](#)). To ensure that

the resource allocation process is transparent and effective, the PBC updates the status of its funding initiatives on a yearly basis on the PBC website ([IIID-13](#), [IIID-14](#)).

The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. All general operating and other special and revolving fund budgets are entered into the software, Kuali Financial System (KFS). Throughout the year, the College manages the financial resources with integrity. These budgets are monitored monthly to actual reports that are posted to the UHCC Budget website ([IIID-15](#)). General funds lapse at the end of the year. The College adheres strongly to the State's prohibition of deficit spending. The UH BOR exercises general oversight over the University's financial resources to ensure that financial management is carried out in a fiscally responsible manner. The College, along with all the other colleges in the UHCC system, is audited annually by independent external auditors. One audit report is published for the UHCC system as a whole. ACCJC has accepted supplemental information provided in the system audit report as evidence of financial integrity. As reported in the annual audit, the UHCC has had unmodified opinions over financial reporting all throughout this accreditation period. The College maintains cash reserves to ensure financial stability to address emergencies and other operating contingencies such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation See Standard III.D.9.

### **Analysis and Evaluation**

The College meets this standard. Windward CC has sufficient resources to maintain and improve student learning programs and services and improve institutional effectiveness. The College plans and implements a budget within its allocations and anticipated revenue projections and makes judicious corrections throughout the year as needed. The Operating Expense Plan for FY 11-12, FY 12-13, FY13-14, FY15-16 and FY16-17 reflect the College's strong but conservative financial position. Despite a state-wide decline in enrollment, the College remained fiscally solvent. Moreover, the financial resources have been sufficient to support and sustain student learning programs and services. Improvements to institutional effectiveness have been achieved through extramural grants and performance-based funding.

Importantly, the College follows the UH BOR and UHCC policies and administrative procedures for sound fiscal planning and management of financial resources. Strong internal control mechanisms for all funding sources are imbedded in KFS. All special and revolving fund programs implement cost center based budgeting for revenues and expenses. The process of distribution of resources in the College through the PBC is transparent. The College adheres to the State policy of no-deficit spending. Further, the College has met all UHCC and UH BOR reserve requirements to ensure stability. Finally, the UHCC system has unmodified opinions reported in the annual audits consistently throughout this period. Windward CC has sufficient resources to maintain and improve student learning programs and services and improve institutional effectiveness.

In the Quality Focus Essays, the College has identified 2 major areas for improvement: expanding distance education and increasing Native Hawaiian parity in enrollment, persistence, graduation and transfer. These 2 areas not only address critical student

populations, but also performance funding benchmarks, such as enrollment and graduation. The College has resources to initiate these projects but needs to investigate ways to secure additional funding that may be needed in the future.

### **Standard III.D.2**

---

*The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.*

---

### **Evidence of Meeting the Standard**

#### *UH and UHCC System*

The UHCC's mission is to broaden access and promote success in quality postsecondary programs with a strong commitment to Native Hawaiian students. The UHCC goals identified in the UHCC Strategic Plan ([IIID-16](#)) are in alignment with the UH Strategic Directions. The UH Strategic Directions for 2015-21, approved by the BOR in January 2015, include: [Hawai'i Graduation Initiative](#), [Hawai'i Innovation Initiative](#), [21st Century Facilities](#) and [Developing High Performance Mission Driven Systems](#) ([IIID-17](#)). The goals identified in the UH Strategic Directions and UHCC Strategic Directions are supported by annual funding allocations (performance funding) to the 7 member colleges as follows ([IIID-18](#)):

UH-Level performance funding goals:

- Degrees and certificates awarded.
- Degrees and certificates awarded to Native Hawaiian students.
- Degrees and certificates awarded to students in Science, Technology; Engineering, and Math (STEM) fields.
- Degrees and certificates awarded to Pell Recipients.
- Transfers from the community colleges to UH baccalaureate campuses.
- Success rates (150% time-to-degree).

UHCC-Level performance funding goals:

- Degrees and certificates awarded.
- Degrees and certificates awarded to Native Hawaiian students.
- Degrees and certificates awarded to students in Science, Technology, Engineering, and Math (STEM) fields (including UHCC students that go on to receive UH awarded baccalaureate degrees).
- Degrees and certificates awarded to Pell Recipients.
- Transfers from the community colleges to UH and non-UH baccalaureate campuses.

Institutional standards for achievement and the methods of assessing these standards are set by UHCCP # 4.203 ([IIID-19](#)). Budget priorities are established based on the achievement and advancement of strategic planning goals. Oversight to the process is provided by the Community Colleges Strategic Planning Council (SPC) ([IIID-20](#)). The SPC consists of the 7

chancellors, 7 faculty senate chairs, 7 student government leaders from each of the campuses and vice president and associate vice presidents for the community colleges ([IIID-21](#)).

### *Windward CC*

The Windward CC mission is similar to the UHCC mission (see IA.3). The College mission and goals are widely communicated throughout the College ([IIID-22](#)). As part of the financial planning process, the Planning and Budget Committee (PBC) reviews and updates the mission and goals in the fall. The strategic actions are prioritized based on program reviews and department annual reports. In the spring, the PBC makes recommendations to the chancellor regarding priorities and allocations for the operating budget, new and replacement equipment budget, and new and replacement position authorization ([IIID-23](#)). The chancellor makes the final decision and disseminates the Annual Expenditure Report Memo to the PBC at the start of the next fiscal year.

At the department level, the College mission and goals are used as basis for the development of the department's goals and objectives ([IIID-24](#)). Each year, the departments review their performance and assess quantitative data and trends generated by the Office of Institutional Research and SLO assessments to develop and update department goals. These goals are then used as basis for the development of department budget requests ([IIID-25](#)). See I.A.1, Mission.

All budget requests include documentation on how the request aligns with the College mission and Strategic Plan, SLOs, and process outcomes (for non-instructional units), and analysis of departmental/unit annual reports and program reviews (See IB.9). Initiatives to achieve long-term goals must include additional documentation, such as the UHCC Master Plan, UHCC Strategic Directions, 5-Year Program Reviews and Strategic Outcomes: Goals and Actual ([IIID-26](#), [IIID-27](#), [IIID-28](#), [IIID-29](#), [IIID-30](#)). All department members participate in the discussion and prioritization of department funding requests.

Windward CC's Integrated Planning Model describes the connection between short-term department planning with the long-term Strategic Plan, Chancellor's Vision and Facilities Master Plan planning processes ([IIID-31](#)). The College, through the PBC, ensures that resources are allocated according to an integrated planning process following established procedures ([IIID-32](#) p. 8, [IIID-33](#), [IIID-34](#), [IIID-35](#)). See, I.B.2: Institutional Effectiveness.

Each department presents their budget requests at regularly scheduled PBC meetings. Each PBC voting member uses the Planning and Budget Rubric ([IIID-36](#)) to rate each PBC request, and relies on supporting documents such as department annual reports, SLO assessment reports, and program reviews to rate the request (See IB.9). The rating survey results are tabulated and published on the PBC website ([IIID-37](#)). The chancellor uses the PBC rankings as a starting point in making resource allocation decisions for the next fiscal year. All the agenda and minutes of the PBC meetings are posted on the website. All financial documents and information are transmitted to various academic departments and administrative/support units by representatives on the Council and through the PBC website ([IIID-38](#)).

There is strong evidence that priorities voted by the PBC have supported the achievement of goals for performance measures that are tied to funding ([IIID-39](#)). One of Windward CC's strategic action plans is to increase Native Hawaiian (NH) graduation. In FY 18, the PBC prioritized the requests for a Native Hawaiian counselor, Hawaiian Studies instructor, and Hawaiian Specialist librarian. Another Windward CC strategic action plan is to increase STEM workforce. In FY 18, the chancellor approved the requests for a Vet Tech distance coordinator/instructor, Plant Science/Agriculture instructor and a laboratory technician based on PBC prioritized requests ([IIID-40](#)). See Standard III.D.6.

The goals in the QFEs, to achieve NH parity and increase access through expanded distance education (DE), are rooted in the College mission. Even before the QFEs were formally written, the PBC requests for personnel to help achieve NH parity ([IIID-41](#), [IIID-42](#)) and for DE ([IIID-43](#), [IIID-44](#)) were already forwarded to the PBC and are currently being vetted for prioritization. These requests are consistent with Action Plan #3 (QFE-NH) Allocation of resources to promote parity, and Action Plan #1 (QFE-DE) Create a Faculty Center/Multimedia laboratory for training and support of distance education classrooms. These are additional evidences of how the College mission and goals are integrated throughout the program review process and resource allocation process.

### *Policies and Procedures*

The Budget Policy Paper issued by the University president during the biennium budget cycle provides the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget ([IIID-45](#)). Budget and financial reviews are conducted by the University of Hawai'i Board of Regents. Board Policy 8.204 sets the University's fiscal management, budget process, legislative budget proposal and preparation processes ([IIID-46](#)).

At the UHCC and campus levels, the policies involved in budget preparation, budget execution and fiscal management are available at the UHCC website ([IIID-47](#)). At the College, the PBC Handbook contains decision-making procedures, criteria and rating rubric for resource allocation. Administrative Procedures Chapter 8 on Business and Finance provide sound, ethical financial policies and procedures that College personnel employ to maintain effective operations and internal controls ([IIID-32](#)). For long-term stability, the College maintains sufficient cash reserves, over 30% of prior year's expenditures. See Standard III.D.9.

### *Dissemination of Financial Information*

Appropriate financial information is disseminated in a timely manner throughout the College through the PBC website. The College's Operating Expenditure Plans (OEPs), PBC Handbook, membership, meeting agendas and minutes are available and regularly updated in the PBC website. Windward CC personnel authorized to make decisions for their programs and grants have immediate access to real-time financial information through the UH integrated database system, Kualii Financial System (KFS). At the UHCC level, all budget documents are available through the UHCC Budget and Finance website.

## **Analysis and Evaluation**

The College meets this standard. The College's mission and goals are the foundation of financial planning. First, the College's mission and goals are developed following the UH and UHCC overall direction and performance benchmarks, and, are broadly communicated throughout the College. Second, the College's mission and goals are integrated throughout the financial planning and resource allocation process. Resource funding requests from the departments are routinely linked to the College's goals and priorities. Third, the open and inclusive budget development process employed by the PBC uses the College mission and strategic plan as the primary documents for prioritizing all discretionary expenditures (personnel, equipment, supplies, technology, etc). Additionally, policies and procedures are in place to ensure sound and transparent financial practices as well as financial stability. Finally, appropriate financial information is disseminated to the community through reports on the PBC website.

### **Standard III.D.3**

---

*The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.*

---

### **Evidence of Meeting the Standard**

#### *UH Budget*

The UH strategic planning process provides the direction and the focus for the budget development process. The current biennium budget development process is outlined in the Budget Policy Paper which emphasizes proposals that can be framed to support the major strategic directions of the University (see III.D.2). The UH president prepares a budget which includes all elements of the university for submission to the BOR. Upon approval by the BOR, the University's budget is submitted to the State governor for review and incorporated into the executive budget request. The executive budget request for the State is then submitted to the Legislature in December for consideration in the regular session of the legislature in January. Appropriations by the legislature are usually passed in May and transmitted to the governor for approval. Upon approval by the governor in June, allocation notices are transmitted to the University, including any restrictions imposed on legislative appropriations. The UH president determines distributions of general funds including a UHCC level distribution.

#### *UHCC Budget*

In accordance with BOR RP 8.204, the UHCC Budget, Planning and Finance Office provides clearly defined guidelines and instructions on financial planning and budget development (IIID-46) of the different budgets: biennium budget (during odd-numbered years), supplemental budget during even-numbered years and for capital improvement, repairs and maintenance budgets with the different community colleges.

The vice president for community colleges and the community college chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding. The UHCC Budget Office allocates the money for each campus around August of each year following the operating budget allocation process described in UHCCP Policy # 8.000 ([IIID-2](#)).

Operating budget revenue is made up of State general funds, student tuition and fees, and other non-state revenue sources. (see Section III.D.1) Approximately one-quarter of general funds are provided by the State prior to the beginning of the fiscal year and the remaining full year allocation is provided prior to the end of the first quarter. Tuition is collected prior to the beginning of fall and spring terms and is expended over the course of each term. A budget monitoring report is presented to the BOR quarterly to keep the Board apprised of the current status of the budget.

### *Windward CC Budget*

The timing of the financial planning process at Windward CC is tied to the State budget and UH budget processes. The Windward CC vice chancellor of Administrative Affairs (VCAS) drafts the initial College budget using data provided by the UHCC system, such as GF allocations, TFSF projections, salaries, benefits, salary adjustments resulting from collective bargaining, utilities, cash reserves, risk management and expected variable costs for the upcoming fiscal year. Examples are the FY Operational Expenditure Plan (OEP) ([IIID-48](#)) and Allocation Report ([IIID-49](#)).

Monthly VCAS meetings are held to review detailed analysis of revenue budget to actuals, expenditure budget to actuals, cash balances and end of year cash projections. Documents such as the operating budget allocations and tuition and fee projections ([IIID-50](#)), general operating budget financial plans ([IIID-51](#)), general operating budget status reports, monthly budget reports ([IIID-52](#)) and other financial information are updated, distributed and/or posted on the UHCC website on a monthly basis with secure login. After these meetings, the VCAS updates and posts the updated OEP on the PBC website ([IIID-38](#)).

As discussed in Sections I.B.9, III.D.1 and III. D. 2, the College has clear guidelines on how to allocate unencumbered funds. The PBC uses the Integrated Planning process to make resource allocation recommendations to the chancellor. The PBC is composed of 27 members representing the various units of the College, including student government and Native Hawaiian advisory board, Ke Kumu Pali ([IIID-32](#) p. 6). Procedures and timelines in the PBC Handbook are followed to ensure full constituent participation. All Windward CC constituents are invited to participate in the all-campus annual assessment summit to discuss SLO assessments and program reviews and to prioritize action plans. The action plans are included as evidences to support budget requests to the PBC ([IIID-53](#)). Also, any constituent may submit additional budget requests through the department or unit to the PBC ([IIID-31](#)). As described in III.D.1 and III.D.2, the PBC prioritizes these requests using established criteria and rubrics and, then recommends these to the chancellor for final approval. Upon approval, the approved funding proposals will become a budget item for the following year. As discussed in III.D.1, the status of these budget items is monitored, and is published on the PBC website.

## **Analysis and Evaluation:**

The College meets this standard. The College adheres to a well-defined integrated planning and budget development process. In the first place, the PBC follows the procedures and timelines in the PBC Handbook to prioritize funding requests for the whole college. Importantly, the College provides all constituencies opportunities to participate in financial and budgetary matters. Institutional planning takes place in department meetings, in the all-campus assessment summit, and, through a variety of committees, including the PBC, which has a widely diverse representation. Finally, the College follows clearly defined guidelines as well as projections for budget development from the UHCC Budget Office. The College adheres to a well-defined integrated planning and budget development process.

In order to promote NH parity (QFE-NH), the College plans to improve the dialogue and presentation of the NH parity measures in the PBC. The College will provide accurate disaggregated outcomes data on NH versus other learners to identify strategies that have positive impact on NH students. Ke Kumu Pali will review the data and create an Annual Report and Action Plan, and submit funding requests to the PBC to support such strategies. Currently, only departments and programs create Annual Reports and Program Reviews. The plan is to modify the process to conform with existing procedures in the PBC.

### **Standard III.D.4**

---

*Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.*

---

## **Evidence of Meeting the Standard**

### *Performance based funding*

Institutional planning at the UHCC reflects a realistic assessment of resource availability as well as the further development of the resources to meet expenditure requirements and strategic goals. In 2008, HB 2978 mandated that UH develop incentive and performance based funding to align with the goals and priorities of the State of Hawai‘i. As discussed in III.D.2, the UHCC System allocated an annual pool of \$6.5 million in performance funding to its 7 community colleges. As discussed in III.D.1, the College has received its full share of funding earmarked for strategic initiatives and strategic initiatives allocation annually.

### *Tuition*

On October 26, 2011, the University’s Board of Regents (BOR) approved a new tuition increase schedule for Fall 2012 through Spring 2017 ([IIID-54](#)) to offset the rising cost of education and a decrease in state support. The tuition increase had buffered the College from net losses due to enrollment declines for the last 4 years ([IIID-55](#)). In spite of consecutive tuition increases, the Community Colleges remain affordable. According to the 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education, the UHCC campuses were identified as the third most affordable 2-year public higher education institutions in the nation ([IIID-56](#)).

### *Extramural Funding*

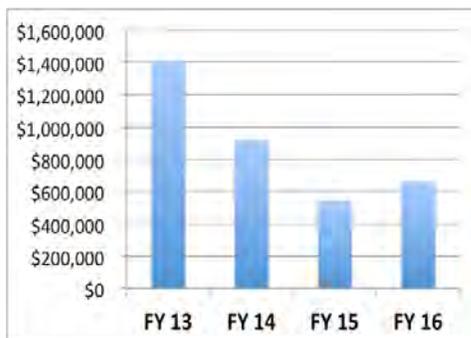

The College leads the other UHCC campuses in securing extramural funding: a total of 71 grant awards (over \$26 million) from 2012 to the present ([IIID-57](#)). Some examples are: US Department of Agriculture (Distance Learning Initiative, \$259K) ([IIID-58](#)); U.S. Department of Education (DOE) Title III Grant, \$9.9M (Hānai a ulu: Feed and Grow—Nurturing student parents and STEM); Student Parent Center (child care) and renovation of outdoor, indoor and virtual learning environments, with enhanced technology, data access and laboratory experience focusing on the needs of Native Hawaiian students ([IIID-59](#)); Kahua Ho‘ona‘auao: Foundations of Knowledge Building (Title III, \$3.99M), and Mala A‘oa‘o Kaiaulu: Growing a garden of speakers in our community (Title III, \$2.44M) ([IIID-60](#), [IIID-61](#))s.

Additionally, the College has partnered with other UHCC campuses in securing funds for NH student internships, such as the Indigenous Knowledge in Engineering II, (NSF, \$494K) ([IIID-62](#)) and NSF Partnerships for Geoscience Education grant (Hālau Ola Honua, \$822K) ([IIID-63](#)). Moreover, the Office of Career and Continuing Education (OCCE) has also obtained contract education grants, such as the Department of Public Safety “tiny shelter construction” and “MS Word” certificate courses for inmates at the Women’s Community Correctional Center (WCCC) ([IIID-64](#)). Furthermore, the local business community has stepped up its support of the College through the annual Windward Ho‘olaule‘a, a joint project with the Kāne‘ohe Business Group, which helps raise funds for Windward CC student scholarships and for Windward CC’s Advancement Fund ([IIID-65](#)).

### *Fund-raising*

The University of Hawai‘i Foundation (UHF), a nonprofit organization, raises private funds and manage private investments to support all 10 campuses of the University of Hawai‘i System ([IIID-66](#)). The College has a UH Foundation major gifts officer assigned to work closely with the College. She meets with the chancellor to identify priorities for private giving, naming opportunities, and projects that would appeal to donors ([IIID-67](#)). Chart 3D shows a summary of gift totals for Windward CC from FY13 to FY16. See III. D. 10 for more details.

**Chart III.D.1 Annual total gifts**

### *Key Expenditure Requirements*

The College regularly monitors key expenditure requirements, which include utilities, cash flow, reserve, maintenance cost and any other requirements or standards that facilitate strong fiscal health. In FY09, the College's electricity bill amounted to over \$1.4 M, the second largest expenditure next to salaries (IIID-68). The College decided to adopt the \$38M energy conservation project in partnership with Kapi'olani CC, Honolulu CC and Leeward CC (completed on September 11, 2015) to bring the cost to a manageable level (IIID-69). The UHCC System entered into a performance contract with Johnson Controls, Inc. The agreement identified energy conservation measures that enabled the campuses to pool their resources and energy savings. The College is now tracking and managing its electricity consumption through the Battle of the Buildings, an energy conservation challenge that pits campus buildings against one another to see which can reduce its energy consumption the most. Through this competition, students, faculty and staff learn more about energy conservation and use this knowledge to reduce their consumption (IIID-70).

To address maintenance costs, the BOR adopted a new tuition schedule for FY19 and FY20 for the sole purpose of funding deferred maintenance and modernization at each campus (IIID-71). As discussed in Standard III.B.4, the UHCC Strategic Directions commits to developing a system of planned equipment replacement schedule, building maintenance plan and a system-wide budget for capital equipment replacement. This will reduce the impact on campus budgets and provide students with facilities that are safe, sustainable and supportive of modern practices in teaching, learning and research.

### *Analysis and Evaluation*

The College meets this standard. The College exhibits a realistic financial assessment of its revenues. First, the College's planning reflects a realistic assessment of available financial resources and ability to develop new revenue streams to meet expenditure requirements. Increased funding has been achieved by meeting performance goals, increasing tuition fees, securing grants and gifts and developing partnerships. Second, reducing utility costs has helped in maintaining a viable financial condition for the College. A realistic assessment of expenditure requirements has led the College and the University to use revenue bonds to finance the energy conservation project involving the 4 UHCC campuses located in Oahu. Finally, the UHCC system has successfully maintained a delicate balance by establishing a tuition rate schedule that ensures adequate resources for ongoing needs, new funding to meet strategic objectives and yet remain affordable when compared to other 2-year institutions. The College exhibits a realistic financial assessment of its revenues.

The College has already received several extramural grants related to DE expansion and NH parity (QFEs). The first 2 grants mentioned above focus on virtual learning environments and technology while the others address support services for NH student success. As mentioned in III.D.1, the College has financial resources to initiate the projects included in the QFEs, however, to move forward, additional funding through attainment of extramural resources will be needed in the future.

### **Standard III.D.5**

---

*To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.*

---

#### **Evidence of Meeting the Standard**

##### *UH System*

The UH BOR has fiduciary obligation to ensure that the university is managing its resources in a fiscally responsible manner. As mentioned previously, RP 8.204 sets the policy on fiscal management and the budget preparation process. Windward CC submits to the BOR a comprehensive operating financial plan for approval prior to the start of each fiscal year. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures. These budgets are broken down on a quarterly basis and variances exceeding established thresholds at the Community College System level must be explained to the BOR at the close of each quarter ([IIID-3](#)).

Executive Policy EP 8.204 establishes guidance relating to University audits. The vice president for Budget and Finance/chief financial officer (CFO) is appointed to work with the Audit Committee of the BOR and the Internal Auditor in the planning and coordination of internal and external audits, and, to provide leadership in the development of financial controls and financial statements ([IIID-46](#)). Section 304A-321, Hawai'i Revised Statutes ([IIID-72](#)) requires the BOR Audit Committee to submit an annual report to the BOR and the Legislature no later than twenty days prior to the convening of each regular session of the Legislature on matters that include all instances of material weakness in internal control, including the responses of university management; and all instances of fraud, including the responses of university management ([IIID-73](#)).

The internal auditor (OIA) reports functionally to the BOR, and is supported administratively by the CFO. The OIA serves as a liaison between UH management and the external auditors. When a potential finding is discovered, the OIA communicates the results of the independent audit to the appropriate department, and gathers comments/questions by the department for review of proposed corrective action. It is the UHCC System and the chancellors, or their designees, who are responsible for responding to and/or for addressing and correcting any identified weaknesses. The OIA evaluates corrective action plans in response to audits and investigates incidents of possible fraud ([IIID-74](#)).

The I-133 audit is a rigorous, system-wide examination of an entity that expends \$750,000 or more of federal funds for its operation. The independent external auditors provide opinions on the compliance and financial statements of the UH system by testing and evaluating the usage of federal funds, operations and compliance with rules and regulations. The I-133 audit reports from FY 2012 to FY2017 did not identify any material weaknesses in the financial

statements for the UH and UHCC system but some internal control deficiencies were identified, as will be discussed in III.D.7.

The Internal Auditors conducts its own periodic internal audits for the different campuses. The OIA prepares a flexible annual plan that is approved by the BOR Committee on Audit. The audit plan is adjusted as needs arise and focus on specific program areas, such as P-card purchasing, petty cash, travel completions, auxiliary programs and culinary arts program. UH internal auditors do on-site visits to the different campuses and at the conclusion of internal audits make recommendations to improve processes and procedures ([IIID-75](#)). This led to the adoption of UHCCP 8.200 to provide guidance on executing financial and operational oversight of revenue generating programs ([IIID-76](#)).

Hawai'i Revised Statutes §23-12 requires the State of Hawai'i's Office of the Auditor to conduct a review of UH special, revolving, and trust funds and accounts once every 5 years. The Office of the Auditor's Report 14-18, examined 65 UH special funds, revolving funds, trust funds, and trust accounts. The report was completed in December 2014. Report 14-18 stated that the Community Colleges Special Fund, established by §304A-2162, "continues to serve the purpose for which it was created, but it functions as, and meets the criteria for, a revolving fund and should be reclassified as such." Report 14-18 was presented to the 2015 Hawai'i State Legislature; however, the Legislature, through further consultation with the UHCC System, determined that the special fund classification was appropriate ([IIID-77](#)).

The UH Financial Management Office (FMO), under the CFO, regularly evaluates and updates policies, financial management practices, and internal controls to ensure financial integrity and the responsible use of its financial resources ([IIID-78](#)). Internal controls are built in the UH System-wide Policies and Procedures Information System (PPIS) found on the UH website ([IIID-79](#)). The UH System centrally manages all extramural funds and all contracts in accordance with system-wide policies and state procurement laws. See Functional Map.

Internal control mechanisms are also built in the UH System-wide financial software, Kualii Financial System (KFS) ([IIID-80](#)). The KFS records and manages all of the financial transactions and fiscal activity for all of the UH campuses. KFS is used by the academic unit deans, directors, extramural grant managers and principal investigators, revolving and auxiliary fund managers, and business office staff to initiate, review, manage or approve procurement, payment documents and other financial transactions. Controls, in the form of limited permissions and required approvals, are in place to ensure financial integrity and accountability. KFS users receive proper training of the software and controls, and, can only enter or approve requisitions for their own assigned departments ([IIID-81](#)).

To ensure a continuous assessment of financial management, UH had launched in June 2016, a whistleblower hotline. UH students, faculty and staff now have a resource to confidentially report violations of laws, rules, regulations and UH policies. This further advances the university's commitment to encourage and enable any member of UH or the general public to make good faith reports of misconduct related to legal and policy violations ([IIID-82](#)).

## *UHCC System*

As mentioned in III.D.2, UHCCP # 8.000 documents the operating budget allocation process at the UHCC System to provide a fair and transparent distribution of resources to support campus operations and meet UHCC strategic plan goals. This process includes the distribution of new funding and reductions, allocation of performance-based funding, internal funding reallocations, and distribution of restrictions and assessments during the course of a fiscal year. Allocation documents are posted on the OVPCC website to provide greater transparency and understanding. The budgets are monitored via monthly budget to actual reports that are posted to the UHCC Budget website. General operating budget status reports are reviewed at monthly VCAS meetings.

## *Windward CC*

The chancellor is responsible for directing all aspects of the administration and development of the College in order that the College fulfills its mission. As discussed in I.C.5, III.A.5, III.A.8 and III.A.9, III.D.1, the chancellor issues campus policies and guidelines governing the activities of the College, approves the hiring, tenuring, promotion, leave-taking, and termination of personnel, submits the recommended biennial and supplemental budgets, and approves all discretionary fund requests. As discussed in III.D.1, all requests are reviewed and prioritized by the PBC, which is chaired by the chancellor ([IIID-83](#) pp. 1-2).

The Office of Administrative Services is headed by the VCAS, who reports directly to the Office of the Chancellor and supervises the Business Office, Human Resources, Campus Safety & Security and Operations & Maintenance ([IIID-83](#) pp. 8-10). The VCAS oversees all financial matters and reporting requirements, such as the development of the biennial and annual budget and the development and management of the OEP. The College generates budget status reports to evaluate its financial decisions and allocation of resources. As mentioned in IIID.3, financial information is updated and disseminated through PBC and posted on the PBC website. The actual budget is managed at the UHCC Budget Office.

The College has internal controls for its handling of financial transactions. The Fiscal Administrator (FA) oversees the College's fiscal operations and heads the Business Office that performs cashiering, purchasing, and disbursing ([IIID-84](#)). The College implements separation of duties among staff so no one employee has complete control of accounting transactions. All payment/purchase requests are prepared by the Unit account clerk and approved by the unit head (dean/director/vice- chancellor/chancellor) or project PI before final approval by the FA. The FA assumes responsibility for the proper execution of administrative duties while the unit head and/or PI is ultimately responsible for the proper administration of the Unit/project account. The segregation of duties is also imbedded in KFS. KFS users are not authorized to approve any document that they initiate. In cases where the FA submits adjustments on their own accounts, account delegates are assigned to approve these transactions so that there is a review by a second person ([IIID-85](#), [IIID-86](#)).

The Human Resources Office is responsible for the human resource management, record-keeping and personnel transactions for the College and is headed by the Personnel Officer (PO) ([IIID-87](#)). As mentioned in IIIA.15, personnel files are maintained in locked filing cabinets in areas/rooms which are accessible only to authorized individuals. Physical barriers

are in place in the Human Resources Office to discourage theft. New hires, changes, and terminations are submitted by the PO to the UH System Payroll Office (under FMO) where processing of payroll for all campuses within the UH System is centralized. Actual payments are processed by the State of Hawai'i Department of Accounting and General Services (DAGS) ([IIID-88](#)).

The approval of extramural grant proposal is done through MyGrant that is interfaced with KFS. The proposal is approved by the proposer, followed by the head of office, the Business Office, the Chancellor, then by the ORS. The UH System centrally manages all extramural funds through the ORS. Extramural funds, including Financial Aid, are audited annually as part of the consolidated financial statement audit and A-133 compliance audit. Extramural funding agencies may perform program or financial audits of grants or contracts at any time during or after the funding period for any reason, including normal programmatic or financial monitoring or in the event of suspected fraud or criminal activity. Some funding agencies, such as the NSF, will not issue an award to an organization that cannot demonstrate good internal controls, e.g., that the accounting system segregates costs by project or award ([IIID-89](#)). The College has several NSF grant awards.

### **Analysis and Evaluation**

The College meets this standard. The College has well-established control mechanisms to ensure integrity. First, the BOR provides effective oversight by monitoring all financial activities of the university through audits. The A-133 Audit Reports, which are broadly communicated to the university and to the community, provide opinions on compliance and internal control deficiencies. Second, the internal audits and the State Auditor Office provide additional levels of audits or reviews of specific programs. Third, the College has internal control in the organizational structure and in the KFS database system that is used by all budget managers and staff who receive proper training. Finally, the College disseminates dependable and real-time financial information through the KFS. All these create transparency around financial data and enhance accountability.

### **Standard III.D.6**

---

*Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.*

---

### **Evidence of Meeting the Standard**

#### *UH and UHCC*

All financial documents, including the budget, have a high degree of credibility and accuracy. Every fiscal year, all funds within the UH System, with the exception of the UH Foundation, are fully audited by an independent auditing team, Accuity LLP. The financial statement covers the entire UH System, with a supplemental section (Schedules I and II) covering the entire UHCC system. There were no material weaknesses nor any significant deficiencies noted on the financial statements from FY 2012 to FY 2016 ([IIID-90](#), [IIID-91](#), [IIID-92](#), [IIID-93](#), [IIID-94](#)) as shown in the corresponding audits ([IIID-95](#), [IIID-96](#), [IIID-97](#),

[IIID-98](#), [IIID-99](#)). All the financial statements and audits are presented to the BOR and publicly available online ([IIID-95](#), [IIID-96](#), [IIID-97](#), [IIID-98](#), [IIID-99](#), [IIID-100](#), [IIID-101](#)).

The budget development process is transparent and budget documents have a high degree of credibility and accuracy. Budget development documents are publicly posted on the UH System Budget Office website ([IIID-102](#)). These documents include the following: Budget Policy Paper and budget instructions ([IIID-45](#)), proposed budget request to the BOR ([IIID-103](#)), status of operating and CIP budgets through the various stages of the budget development cycle ([IIID-104](#)). The UHCC system budget execution documents are distributed during monthly VCAS meetings and/or posted on the UHCC website. These documents include the following: General operating budget allocations ([IIID-50](#)), General operating budget financial plans ([IIID-51](#)) and General operating budget status reports ([IIID-105](#))

### *College Documents*

The College's financial documents, including budgets, are accurate and reflect adequate resources to support instruction and services. The College Annual Operational Expenditure Plan (OEP) identifies what its resources are and how it plans to expend those resources. The VCAS develops and widely disseminates the OEP to the PBC and the whole campus on the PBC website. The OEP reflects the planned expenditures, that include salaries, as well as the requisite reserves, risk management, etc.

Programs are provided with their allocations, student help, supplies/others and equipment and they are responsible in managing their budget allocations to fund student learning programs and services. The units/programs are Instruction, Career and Community Education (CCE), Academic Support, Student Services, and Institutional Support. In the Allocation Report, the allocations are broken down further to the different departments within each unit/program to achieve the College's goals for student learning ([IIID-49](#)). The vice chancellor of Administrative Services reviews the status of all funds periodically and reports any concerns to the area/program heads. At the end of the fiscal year, the Budget Status Report is prepared showing each allocation, total expenditure and the balance/deficit ([IIID-106](#)).

As mentioned in III.D.3, unencumbered funds at the end of the fiscal year are allocated by the chancellor based on the recommendations of the PBC. The approved requests for funding in FY17 and FY 18 ([IIID-107](#), [IIID-108](#)) are displayed in Table 3D-5. This is evidence that the College ensures adequate budget for instruction and academic support.

**Table III.D.5 Approved PBC Requests in FY 2017 and FY 2018.**

Approved PBC Requests	Operating	Equipment	Personnel
FY 2016	\$100,604 for Supplemental Instruction, Testing Center, Speech Lab	\$556,796 for computer replacement, media studio, generator/ultrasound, ceramics wood carving, photo, music	Personnel Officer, Vet Tech Support, Math Instructor
FY 2017	\$171,678 for Tutoring, Testing, Writing, SI, various Lab equipment	\$228,100 for computer, media, anatomical models, secure locks	NH counselor, Grant Writer, Hawaiian Studies Instructor, Librarian, Vet Tech Instructor, Lab Technician

The financial resources and allocations reported in the Chancellor’s Memo to the PBC, Allocation Report, and the Operational Expenditure Plan are consistent with one another ([IIID-48](#)). These are reliable and have credibility with the constituents.

College budget managers responsible for the development and management of their unit/program/grant budgets have access to their budgets built into the KFS and can review their budgets anytime. Budget managers can monitor, review and make timely decisions and report any discrepancies that need adjustment. Controls imbedded in the database systems promote credibility over compliance with federal and state laws and university regulations and policies. KFS is interfaced with other UH system databases, such as Banner (Student), PeopleSoft (Human Resources), eTravel, Destiny (Career and Community Education) and myGrant (Office of Research Services). Interfacing BANNER with KFS allows accurate monitoring/reporting and disbursement of financial aid funds to support our students.

**Analysis and Evaluation**

The College meets this standard. The College financial documents are accurate and show adequate resources to support student learning programs and services. The consolidated financial statements of the UH system and UHCC are audited annually. Importantly, there are no deficiencies nor irregularities identified. Moreover, internal controls over compliance with federal programs are also regularly evaluated and assessed through both external and internal audits. Finally, the audits are broadly communicated to the community.

**Standard III.D.7**

---

*Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.*

---

**Evidence of Meeting the Standard**

The University undergoes an external audit annually. It has contracted Accuity LLP to conduct the consolidated financial statement audit and the federally mandated A-133 compliance audit for the entire University system. The auditors are responsible for providing opinions on the University’s consolidated financial statements, University Bond System’s financial statements and compliance with requirements of major federal programs ([IIID-109](#) pp. 6-7). The independent audits include a combined balance sheet and income statement of

the community college system as supplemental information to the University's consolidated financial statements. Windward CC does not receive a separate financial statement audit. The A-133 Financial and Compliance Audits and Consolidated Financial Statements are available on the UH OVPBF website (OVPBF) ([IIID-101](#)) as well as the UHCC website ([IIID-110](#)).

The A-133 Audit from FY 2012 to FY 2016 did not identify any material weaknesses nor significant deficiencies on the University and UHCC System financial statements. The UH System has received unqualified opinions for bond performance during the reporting period ([IIID-111](#) pp. 163, 164, 173, 197). Neither the UHCC System nor the College manages bond funds. The UHCC participates only in annual surveys to ensure that revenue bond expenditures and uses of spaces improved by revenue bonds remain consistent with regulatory and legal restrictions.

The A-133 Audit also includes an assessment of the University's internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs and financial reporting. The internal control deficiencies are listed under its Summary of Findings Section, typically Section III of the A-133 Audit, with their respective campus and department. The department then develops and submits a Corrective Action Plan (CAP) that addresses the deficiencies listed in the audits. When the CAP is implemented and the deficiency is resolved, it is noted in the audit report for the following year under the A-133 Prior Audit Findings section.

All campuses, including Windward CC, are audited for internal control based on financial records and documents in the KFS. As mentioned in III.D.5, the audit activities are coordinated by the OIA Director, who communicates the results of the independent audit to the appropriate departments. The College has received audit findings. In the 2016 audit, there was one significant and 2 minor deficiencies. In the 2015 and 2014 audits, there were 2 minor findings related to financial aid. All audit findings were examined and reviewed by the affected unit following an established procedure. In each instance, a corrective action plan (CAP) was promptly prepared and implemented in a timely manner. All the responses were communicated appropriately and timely to the auditors, and, included in the audit report ([IIID-99](#) Section 5 p. 3, [IIID-98](#) Section 3 p. 34, Section 5 p. 6, [IIID-97](#) Section 3 p. 35, Section 5 p. 8). The Department of Education acknowledged the College's corrective action plans in a letter to the UH president ([IIID-112](#)).

### **Analysis and Evaluation**

The College meets the standard. The College reviews and responds to external audit findings promptly and appropriately. Windward CC had received findings on internal control over compliance that were promptly addressed in the Corrective Action Plan. Subsequent audit reports confirm that all corrective action plans were implemented.

## Standard III.D.8

*The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.*

---

### Evidence of Meeting the Standard

The University evaluates system-wide financial and internal control systems annually through the external audits to ensure validity and effectiveness. The OIA reports the auditors' findings directly to the Board of Regents' Audit Committee to ensure appropriate oversight, management and operating responsibilities. Results from the external audits are used for improvement. As discussed in III.D.7 2 control deficiencies in financial aid were identified in providing timely exit counseling and in updating the status of student loan recipients in the Windward CC Financial Aid Office (FAO). In response, the College in partnership with the System Financial Aid Office, implemented corrective action plans to prevent reoccurrence, and re-evaluated its practices. Financial aid compliance findings related to inadequate monitoring of Pell recipients were resolved by improving procedures so that the exit interviews can be done on a timely manner. This made monitoring and reporting more centralized ([IIID-97](#) Section 5 p. 8). In the 2016 Management Letter, the auditors recommended that the University continue to form the System FAO to centralize many of the compliance monitoring and reporting functions to ensure a consistent review of compliance requirements for all 10 campuses ([IIID-113](#) p. 6).

The 2016 Audit identified Windward CC with one significant (conflict service contract) and 2 internal control deficiencies, untimely submission of travel completion reports and untimely execution of purchase orders ([IIID-99](#) Section 5 p. 3, [IIID-114](#) pp. 271, 276). The College FA responded promptly by giving a refresher training to personnel in the affected units on the policies and procedures. Additionally, during Convocation at the start of the Spring 2017 semester, the Business Office presented a break out session on travel procedures ([IIID-115](#)). As a follow-up, the BO arranged for the UH Disbursing Office to present hands-on eTravel training ([IIID-116](#)). In the following semester, Fall 2017, the BO provided KFS Training (including purchasing policies and procedures) to the college secretaries and administrative assistants ([IIID-117](#)). This provided helpful tips on purchasing and requisition preparation, overview on the different types of account codes, and provide actual hands on training on navigating in KFS to view account balances and transactions. The feedback for all workshops were positive and the BO will continue to provide similar training in other areas to improve campus processes ([IIID-118](#) p. 7). Procedures have improved. Travel completion reminders through eTravel and automated reports of outstanding travel completion documents are now being implemented ([IIID-119](#)). In conducting its annual program review the Business Office/Administrative Services department analyzed Comparable Measures compiled by the UHCC System Office to set goals for improvement ([IIID-120](#)).

The UH System also evaluates its financial and internal control systems on a continuous basis through the internal auditors (OIA). As mentioned in Standard III.D.5, the UH OIA ([IIID-121](#)) conducted an audit of income generating programs of the UHCC system in 2014, particularly Kapi'olani CC and Leeward CC. In 2015, the OIA audited OCET across the board of all CC programs. The results of OIA's evaluation and recommendations led to the

implementation of UHCC Policy #8.200 in April 2016. The policy provides additional guidance to UHCC campus administrators in carrying out financial and operational oversight of self-sustaining programs ([IIID-76](#)). The Windward CC Business Office fiscal administrator (FA) and VCAS increased their review of special funded program's cash control and account receivable processes and procedures for compliance with the policy. They conducted the required annual review by meeting with each revenue generating program head individually. The UHCCP prescribed instituting an administrative cost fee on all revenue generating programs, providing monthly financial reports, reconciling accounts on a monthly basis, instituting improvements to programs with the need to keep physical inventory, and monitor programs to ensure accountability with yearly business plans.

The UH system-wide offices, such as the Financial Management Office (FMO), regularly evaluate their own management practices and make revisions to the policies and procedures, as needed, to improve internal control systems. During FY 2015-2016, designated teams from the UH FMO Fiscal Services Office (FSO) visited business office staff on each of the 10 campuses for feedback on user satisfaction with KFS and eThority (financial data query tool). Their suggestions for improvement are found online ([IIID-122](#)). In January 2018, KFS was upgraded to version 6.0.1, where some of the suggestions were implemented to improve efficiency and internal controls. The UH fiscal staff across the UH system are informed about the changes through newsletters and training workshops are conducted ([IIID-123](#)).

As discussed in III.D.5, internal controls are imbedded in the software system. Effective July 1, 2012, the entire UH System have switched from the old Fiscal Management Information System (FMIS) to the Kuali Financial System (KFS) to electronically process and approve real-time financial documents, provide web accessible and digital archiving, and create dashboards of financial reports to help make better decisions ([IIID-124](#)). The UH Office of Internal Audit (OIA) conducts independent internal audits to ensure the adequacy of the University's internal controls over financial reporting, including computerized information system controls and security.

### **Analysis and Evaluation**

The College meets this standard. Windward CC's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement. First, the University's financial and internal control systems are evaluated annually by external and internal auditors. Second, the College proactively responded to audit findings on internal control and provided on-going education and training of personnel. Third, system-wide dialogue in Financial Aid resulted in a more centralized management system. Next, detailed procedures have been developed to improve the oversight to revenue generating operations, as in the adoption of UHCC Policy 8.200. Finally, system-wide upgrading of the KFS and improvement of management practices are routinely taking place.

### **Standard III.D.9**

---

***The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.***

---

#### **Evidence of Meeting the Standard**

##### ***Cash Flow***

The College has no cash flow problems and ends with a balanced budget every year. According to the Windward CC fiscal administrator (IIID-125), the College had no cash flow problems for the entire accreditation review period. Cash balances are projected and reviewed to ensure compliance with reserve policy requirements. The College TFSF financial projection shows an ending balance of \$2.4M in FY 2016 and \$2.1M in FY2017 (IIID-51). In the 2016 ACCJC Annual Fiscal Report, the UHCC system reported an increasing unencumbered cash balance of \$28M, \$32M and \$46M for FY 14, FY15 and FY 16, respectively (IIID-126). If ever the campus will have any cash flow problems, the UHCC system will use the funding mix (GF + TFSF) or inter-fund borrowing among the different campuses. GF funds, which covers salaries, overloads, fringe, student help and utilities, must be spent down within the fiscal year period. All other special and revolving fund programs implement cost center based budgeting for revenues and expenses through the development of financial plans (IIID-127).

All tuition and fees are recorded and managed within BANNER. BANNER maintains accountability of each student's account and interfaces with KFS. This is under the purview of the UH Budget Office and the actual money is deposited in bank accounts. The accounts for each unit (UHCC) are separately recorded and each holds several sub-accounts. The UHCC Budget Office uses KFS to track data and provide updated monthly reports to the College that include enrollment trends, carryforward cash balances, reserve balances, and cash projections to college staff at various levels. Information is communicated via written memoranda, reports, or meetings at beginning of year during development of budget, and periodically during the year to monitor financial status, to assess the need for budget adjustments due to changes to initial plans, unanticipated savings, or new requirements and to revise projections if necessary. The College has been successful in carefully monitoring revenues, expenditures, and cash to prevent cash flow problems.

##### ***Reserves***

Financial sustainability and integrity is upheld through the maintenance of adequate cash reserves. In January 2009, UHCC Policy #8.201 was implemented requiring each campus to set aside a minimum cash reserve of 5% (of prior year expenditures) and a target cash reserve of 10% (of prior year expenditures) (IIID-4). If campus cash reserve balances fall below the minimum reserve level of 5%, the campus will be required to prepare a financial plan that details how minimum reserve levels will be restored.

The need for adequate reserves is reinforced by the standards of the Accrediting Commission for Community and Junior Colleges (ACCJC), which require that accredited institutions

maintain adequate financial resources to ensure financial stability. In November 2013, the BOR Executive Policy 8.210 recommended that System-wide operating reserves be raised to 16%, sufficient to provide for continued operations for 2 months ([IIID-5](#)).

Between FY2008 and FY2013, the College experienced financial challenges while dealing with the high cost of electricity and the need to set up an emergency reserve fund. However, as a result of enrollment growth funding and budgeting austerity, the College is now in compliance with both UHCC and BOR policies. Windward CC's total cash reserve levels at the end of each fiscal year is increasing as shown in Table 3D-6 ([IIID-128](#)). It has consistently met and exceeded both the minimum and targeted reserve, amounting to roughly 30% of the projected expenditures and encumbrances of the previous year.

The cash reserve is defined as unrestricted funds set aside to ensure the long-term financial stability of programs by providing resources to address emergency situations, unanticipated shortfalls in revenue, increases in expenditures and other one-time funding opportunities that help campuses meet goals for continuous improvement. Table 3D-6 displays the cash reserves from FY15 to FY17.

**Table III.D.6 Cash Reserves from FY 2015 to FY 2017.**

	FY 2015	FY 2016	FY 2017
<b>5% Target</b>	778,901	838,893	902,128
<b>10% Target</b>	1,557,802	1,677,785	1,804,257
<b>16% Target</b>	2,492,483	2,684,456	2,886,811
<b>Total Needed</b>	4,829,186	5,201,134	5,593,196
<b>Actual Reserve Total</b>	4,535,730	5,251,493	5,285,370

***Risk Management***

Executive Policy 8.207 ([IIID-129](#)) established the Risk Management Program of the UH System. The College utilizes appropriate risk management strategies, guidelines and procedures in accordance with A8.400 ([IIID-130](#)) to avoid financial emergencies. As an example, the College minimizes its risk by securing maintenance and service contracts on various systems and equipment to avoid costly repairs and replacement. Windward CC helps fund the University of Hawai'i Risk Management Special Fund (RMSF) that was created by Act 186, Session Laws of Hawai'i 2003, to finance a self-insurance program at the University of Hawai'i. The fund pays for expenses associated with the administration of the risk management program, insurance premiums, retention payments, settlements, litigation and judgment payments. The program is funded by annual assessments to each campus. Each campus's assessment is based on factors such as number of employees, student enrollment, loss history, and specialized facilities. The College's allocations to the RMSF from FY 2013 to FY 2017 are shown in Table 3D-7. This is verified by the FY17 OEP that reflects an allocation of \$23, 326 for this purpose. The annual total assessment for the entire UH System

is \$2M ([IIID-131](#)). The University’s Office of Risk Management is responsible for administering and maintaining the RMSF fund.

**Table III.D.7 Risk Management Fund Allocations from FY 2013 to FY 2017.**

	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017
<b>WCC RMSF Allocation</b>	18,658	18,713	19,388	21,326	23,459

**Analysis and Evaluation**

The College meets the standard. The College has sufficient cash flow, cash reserves, risk management strategies and contingency plans to maintain stability and avoid financial emergencies. First, the College has built up its reserves to its highest point ever, approximately 30% of the projected expenditures and encumbrances of the previous year. Second, the College has had no cash flow problems ever. Third, Windward CC utilizes the services of the UH System-wide Office of Risk Management to review programs or situations to avoid financial risks. Finally, the College participates and contributes annually to the University of Hawai‘i Risk Management Special Fund (RMSF), a self-insurance program of the University system. The College has sufficient cash flow, cash reserves, risk management strategies and contingency plans to maintain stability and financial emergencies.

**Standard III.D.10**

---

*The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.*

---

**Evidence of Meeting the Standard**

*UH System Oversight*

The UH Board of Regents provides effective oversight of the UHCC and the College’s finances, starting with the budget. The UH System president prepares a budget for the entire university, submits to the BOR for approval, then to the State, as discussed in III.D.3. The UH System also provides oversight by establishing policies and procedures related to grants and externally funded programs, including financial aid ([IIID-132](#), [IIID-133](#), [IIID-134](#), [IIID-135](#)), foundations ([IIID-136](#)), auxiliary organizations ([IIID-137](#)), revolving funds ([IIID-76](#)), institutional investments ([IIID-138](#)), procurement ([IIID-139](#), [IIID-79](#)), contracts (see III.D.16) and maintenance of financial reserves ([IIID-4](#)) that are implemented system-wide. See III.D.1. The University has maintained well-integrated financial and information systems to enable fund managers to monitor and control the receipt and disbursement of the College’s financial resources ([III-138](#)).

### *UHCC System Oversight*

The UHCC System practices effective oversight and management of the College's budgeting, budget execution, facilities planning and other administrative, logistical and technical services. The UHCC Budget Office develops revenue projections, and manage the budget of the 7 campuses. The UHCC follows a budget development timeline, which ensures full engagement of the colleges.

As discussed in III.D.5, the UHCC provides guidance and allocates resources to the College based on UHCCP #8.000. At the UHCC System level, financial plans and reports are generated by specialized staff to provide budgets, historical or current year revenues, expenditures, transfers, legislative or executive restrictions, enrollment trends, carryforward cash balances, reserve balances, and cash projections to the campuses related to GF, TFSF, and all other special and revolving funds ([IIID-140](#)). The information is communicated to the vice chancellor of Administrative Services, who exercises internal oversight of the funds and expenditures.

The UHCC system supports all campuses by securing and allocating Capital Improvements Program (CIP) funding. The primary source of revenues for University CIP projects come from state issued general obligation bonds where debt service payments to retire the bonds are funded by the state. Individual campuses are not obligated to pay for these long-term obligations. Windward CC's VCAS oversees the capital improvement projects in the campus.

### *Extramural Funds*

The UH System Office of Research Services (ORS) centrally manages all extramural funds ([IIID-141](#)) and coordinates the establishment of accounts for contracts and grants which are serviced by the Research Corporation of the University of Hawai'i (RCUH) ([IIID-142](#)). The principal investigator (PI) of each grant maintains oversight and control of funds, and is responsible in reviewing purchases and authorizing personnel hires within the scope of the contract/grant. Externally funded programs have staff members dedicated to assist the PI's with their grant reports and budget issues. Financial status monitoring is available online using budget to actual authority reports and KFS ([IIID-124](#)) available balance screen. The College administrative officer (AO), meets with PI's quarterly to provide grant support, help monitor grants, meet report deadlines and assist in pre-award submissions of new proposals.

### *Financial Aid*

The UH System Financial Aid Office ([IIID-143](#)) coordinates the different campus financial aid offices. The College's Financial Aid Officer manages financial aid, monitors loan funds, available funds, loan repayments and others using KFS and Banner ([IIID-83](#) p. 7). BANNER, is used to store financial aid information and financial transactions information. The Higher Education Act of 1965 (HEA) and Section 668.23 of Title 34 of the Code of Federal Regulations (CFR) require all institutions participating in the Federal Student Assistance Programs to have annual audits conducted by an independent auditor ([IIID-144](#)). The audits are implemented System-wide in that the auditors meet and review records for all 10 campuses, and report their results as a whole for the "UH System." This audit revealed some

weaknesses which were promptly addressed in collaboration with the UH System Financial Aid Office. See III.D.8. The College maintains documentation to demonstrate compliance with regulations and requirements such as student eligibility based on need, financial aid awards that do not exceed unmet need or maximum award limits, adjustment of awards when unmet need changes or student withdraws, repayment of federal program for overaward/adjustments, reporting of awards, adjustments, exit interviews for students with loans, etc.

### *Auxiliary Programs*

Auxiliary activities are self-supporting activities that provide non-instructional goods or services funded by a user charge or fee. The campus coffee shop, vending services and bookstore are the only ancillary services in our campus. However, the college bookstore operations are administered by the Mānoa Bookstore unit. The coffee shop and vending machine activities are managed by the VCAS. Payments are received by the Business Office and entered in the KFS system. Guidelines and procedures related to concessions are set by the OPRPM in Policy and Procedure A8.350 ([IIID-145](#)). In order to comply with State regulations in the vending of foodstuffs, the approval of each vending location, machine installation, and general operating procedures must be obtained from VCAS.

### *Self-Sustaining Programs*

Revenue generating self-sustaining programs are subject to internal audit policy, UHCCP #8.200 ([IIID-76](#)). The OCCE Director has direct oversight to 12 income generating programs, each headed by a staff/manager. Each program is assigned a separate account code and transactions are recorded in Destiny that is integrated with the KFS ([IIID-146](#)). Guidelines and procedures on invoicing, revenue collection, inventory control system, profit/loss documentation, invoice & payment tracking systems and daily sales reports are in place. The College FA and VCAS provide review of cash control and account receivable processes and procedures for compliance with the policy. UHCCP #8.200 assigns responsibility to the Business Office to conduct regular cash handling and deposit audits of all programs.

### *Fund-raising*

The UH Foundation (UHF) is the fund raising arm of the University of Hawai‘i. The details of the Memorandum of Understanding (MOU) and service agreement entered between UH and UHF are stated in AP8.620 ([IIID-147](#)). UHF has their own financial management system and policies and procedures on managing their resources. The UHF is audited annually by its own external auditors. No findings were reported. The audited financial statements are found online ([IIID-148](#), [IIID-149](#), [IIID-150](#), [IIID-151](#)). The Windward CC chancellor is the overall person responsible for all UHF accounts for Windward CC. As mentioned in III.D.4, the chancellor meets monthly with UHF Staff to monitor events and transactions.

## **Analysis and Evaluation**

The College meets this standard. The College practices effective oversight of finances, including grants, management of financial aid, revolving funds, auxiliary activities and

foundations. First, the College is in compliance with UH system-wide policies and procedures, state laws and federal regulations. Second, the College and the UHCC have personnel dedicated to providing oversight of the different financial activities. Third, the University has integrated different database systems with KFS to effectively manage the different financial resources. Lastly, audits have provided the College with tools to sustain and improve areas that need improvement.

### **Standard III.D.11**

---

*The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.*

---

### **Evidence of Meeting the Standard**

The College has only one long-term debt, the energy conservation project. The UH community colleges do not issue debt for OPEB (funded by the State), insurance costs (operating budget item) or repairs and maintenance projects (funded by the State). The items currently financed with long-term debt are limited to projects that directly create revenue streams that offset debt service costs.

In previous years, electricity was the second largest operating cost next to personnel. In FY 2008 alone, electrical consumption amounted to over \$1.1M, and in FY 2009, it was \$1.402M ([IIID-68](#)). To finance the energy conservation and efficiency project, the University of Hawai'i sold revenue bonds, Series 2010B Bonds ([IIID-152](#)). The energy conservation project has been helping the College reduce the cost of utilities. As an example, the College had reduced its KWH consumption by gross square ft. from 18.93 in 2006-07 to 12.96 in 2012-13 ([IIID-153](#)). In FY 16 and FY 17, the cost of electricity was \$1.1M ([IIID-51](#)).

The UHCC System budget staff provides the College with actual valuations on the debt service on an annual basis. The College is paying its share yearly for the debt service on the revenue bonds. This amount constitutes approximately 1% of the college annual budget. The College allocates payment of the debt service cost when developing the annual OEP. In the FY2017 OEP, an amount of \$167,009 was budgeted ([IIID-154](#)).

Phase II of the energy conservation project is under way. For AY 2017-2018 and AY 2018-19, our campus goal for energy efficiency is to reduce our fossil fuel energy consumption by 90% through a combination of energy efficiency measures and new solar PV production on the campus. Financial resources saved from the reduction of electricity purchased from the utility company will go back to financing the debt service to fund the efficiency measures. This initiative will significantly reduce our campus expenditures to address deferred maintenance, allowing us to concentrate our limited financial resources on student success ([IIID-118](#) p. 4).

Non-discretionary obligations, such as insurance costs (Risk Management Assessment) and UHCC Reserves are also considered before programming budgets for discretionary items. These are reflected as line items in the OEP. In the FY2017 OEP, the amounts budgeted were \$21,326 and \$44,774, respectively ([IIID-154](#)). The annual assessments to each campus is found in the Risk Assessment Memo ([IIID-155](#)).

Liabilities, such as fringe benefits and other post-employment benefits (OPEB), are funded and managed by the State of Hawai‘i, and not by the College nor by the University. See IIID-12. The UHCC System adheres to well-considered reserve and fiscal management policies, which are based on the Strategic Plan, and ensure financial solvency in the short- and long-term and has maintained a history of positive net position. As mentioned in III.D.9, the prior fiscal year unencumbered cash balance has been increasing the past 3 years.

### **Evaluation and Analysis**

The College meets this standard. The College considers its long-range financial priorities when making short-range financial plans to assure financial stability. First, the College has no long-range debt other than the debt service for the revenue bonds used for the energy conservation project. Second, the College allocates payment for the debt service, risk management assessment (insurance), and UHCC reserves in the annual budget planning process before programming budgets for discretionary items. The College has maintained a strong financial position as a result of this practice.

### **Standard III.D.12**

---

*The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.*

---

### **Evidence of Meeting the Standard**

The University of Hawai‘i share of OPEB obligations for general funded positions is centrally paid for by the State general fund for all State agencies. As such, employer OPEB obligations for general funded positions are not part of the University of Hawai‘i operating budget.

The 2014 Financial Consolidated UHCC Schedules states, “In accordance with University policy, the University’s liability for other postemployment benefits (“OPEB”) is not allocated internally to individual departments, funds and campuses ([IIID-92](#), [IIID-156](#)). Accordingly, no liability for OPEB is reflected in these schedules.” It also states, “In accordance with University policy, the University’s liability for pension benefits, deferred outflows and deferred inflows of resources related to pensions (“pension benefits”) are not allocated internally to individual departments, funds and campuses. Accordingly, pension benefits are not reflected in these schedules” ([IIID-93](#), [IIID-157](#)).

The 2017 Financial Consolidated Statement states, “The State absorbs the fringe benefit cost for employees paid from State and federal appropriations.” The State appropriates the funds

to the Department of Budget and Finance to pay for the fringe benefit costs on behalf of the University ([IIID-158](#) p. 65).

The University is, however, obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the University. The employers' OPEB obligations for non-general funded positions are fully recognized and accounted for in the College financial plans.

The College allocates a vacation liability fund for compensated employee absences. Compensated absences are absences for which employees will be paid, such as vacation, sick leave, and sabbatical leave attributable to past service. This is in compliance with Governmental Accounting Standards Board 16 (GASB 16), Accounting for Compensated Absences. GASB 16 requires the College to accrue vacation leave and other compensated absences covered in collective bargaining for employees as a liability. In FY 2017, an amount of \$114,924 was budgeted under "Vacation Assessment" in the College's GF and TFSF Financial Projections ([IIID-51](#)). A9.380 sets the policies and procedures for vacation and sick leave ([IIID-159](#)). Employees may view their vacation and sick leave and submit leave requests through the Leave Online System at <http://www.hawaii.edu/leave>.

The College allocates for workers' compensation and unemployment insurance compensation costs. Workers' compensation is a form of insurance providing wage replacement and medical benefits to employees injured in the course of employment. Act 328, SLH 1997 transfers the budgetary responsibility from the State of Hawai'i to the University to pay effective July 1, 1997 ([IIID-160](#)). The GF and TFSF Financial Projection for FY 2017 shows line item allocation for 'WC/UIC Fringe Assessment' in the amount of \$102,049 for this expense ([IIID-51](#)). This amount also includes the OPEB obligations for non-general funded positions.

The UHCC system supports all campuses by securing and allocating Capital Improvements Program (CIP) funding ([IIID-161](#)). The primary revenue source for University CIP projects comes from State issued general obligation bonds where debt service payments to retire the bonds are funded by the State. Individual campuses are not obligated to pay for these long-term obligations.

### **Analysis and Evaluation**

The College meets this standard. Windward CC plans for and allocates appropriate payment of liabilities and future obligations, including compensated absences and other employee-related obligations. First, the OPEB obligations for general funded positions (health care and life insurance benefits to retired employees) are centrally paid for by the State general fund for all State agencies. Hence, the College allocates payment for only a very small number of non-general funded positions. Second, the College allocates payment of accrued vacation as well as workers' compensation and unemployment insurance in the annual College financial plan. These allocations are shown as line item budgets in the College OEP, which is broadly disseminated in the PBC website.

### **Standard III.D.13**

---

*On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.*

---

### **Evidence of Meeting the Standard**

As discussed in III.D.11, the College has only one long-term debt and that is the Energy Conservation Project in collaboration with Kapi‘olani CC, Honolulu CC, and Leeward CC that was completed in 2015. Revenue bond funds were used to purchase and install new and replacement fixtures and equipment that consume less energy resulting in lower utilities cost. Savings from the reduction of electricity cost is being used to finance the debt.

Debt service is paid centrally by the UHCC System-wide Support (CCSWS) with annual reimbursement from campuses based on energy savings for each campus ([IIID-162](#)). Windward CC allocated 1.2% of its AY 2015 and 1.1% of its AY 2016 budget for payment ([IIID-163](#)).

The College allocates funds for debt service reimbursement annually as part of the budget planning process. The College OEP shows that the College has allocated money for debt service payment since FY15 to the present ([IIID-164](#), [IIID-165](#), [IIID-154](#), [IIID-48](#)):

**Table III.D.8 Debt Service Allocations from FY 2013 to FY 2017.**

	FY 2014	FY 2015	FY 2016	FY 2017
Debt Service	108,341	166,994	167,009	167,009

### **Analysis and Evaluation**

The College meets the standard. The College assesses and allocates funds for the repayment of its share of the UHCC debt service on an annual basis. The College allocates approximately 1.2% of the annual budget to pay for the Energy Conservation Project. Windward CC is fiscally responsible in meeting this obligation.

### **Standard III.D.14**

---

*All financial resources, including short-and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.*

---

### **Evidence of Meeting the Standard**

#### *Long Term Debt*

The College’s long term debt instrument for an energy conservation project was used with integrity. Along with the other Oahu based community colleges, the College entered into a performance contract with Johnson Control on June 30, 2011 ([IIID-166](#)). As discussed in III.D. 11, revenue bond funds were used to purchase and install new or replacement fixtures

and equipment that consume less energy or generate electricity resulting in lower utilities cost for the College. The funds were used for the original intent of the project ([IIID-167](#)) and the project was successful in reducing utility costs for the College.

The University Bond System (UBS) Office oversees the administration and accounting of the bond system activity and provides managerial oversight to ensure compliance with federal and state requirements ([IIID-168](#)). Bond proceeds and debt repayment obligations are monitored and are reported in annual bond compliance audits, conducted by Accuity LLP ([IIID-100](#) Section 6 pp. 53-55). The UH System has received unmodified opinions for bond performance during the reporting period.

### *Auxiliary Activities*

The College abides by the “Ceded Land Receipt Reporting Parameters (Act 178)” ([IIID-169](#)), an agreement between UH and the Office of Hawaiian Affairs (OHA) in regards to vending machine revenues. It states, “Commission payments will be recorded in the University financial system-KFS using object code 0633, Commission, Vending Machines.” Revenues from the coffee shop concession is NOT part of Act 178, and are used by the College to cover utilities and other related programmatic needs.

### *Self-Sustaining Activities*

Revenue generating self-sustaining activities at Windward CC include the ‘Uala Leaf Café, Center for Aerospace Education, Palikū Theater, Facilities Use, Hospitality, Health programs, Ocean Education Academy, Computer & Business, Personal Enrichment, Miscellaneous workforce, HINET-SNAP services and OCET, but not the Windward CC Bookstore (administered by the Mānoa Bookstore). As discussed in III.D.10, these activities are required to follow guidelines and procedures set in UHCCP Policy #8.200 and implement cost center based budgeting. The OCCE Director monitors and coordinates the different activities in monthly meetings ([IIID-146](#)). All purchase requests and travel require pre-approval to ensure funds are used in accordance with the intended purpose, and that activities are not operating at a deficit or accumulating excess cash or profits. Revenues from each activity are reported in KFS and deposited in separated accounts with the Business Office. To ensure integrity, all campus auxiliary programs are required to undergo regular cash handling and deposit audits by the Business Office.

### *Fund-raising*

University policies and procedures (RP 8.209, RP 8.210, EP 8.209, AP 8.620) govern acceptance of gifts and fundraising activities, and, provide guidelines to ensure funds are properly expended in compliance with donor restrictions and the usual and common business and regulatory practices ([IIID-170](#), [IIID-136](#)).

As discussed in III.D.10, the University of Hawai‘i Foundation is a not-for-profit corporation established to raise funds for the university. Funds procured through fund-raising efforts are deposited and expended with the University of Hawai‘i Foundation. Section 8.4 of the UHF ByLaws ([IIID-171](#)) requires its Board of Trustees to arrange an audit of the books and records by a certified public accounting firm at the end of each fiscal year. Private funds or

donations obtained through the University of Hawai'i Foundation (UHF) received a full external audit on an annual basis. The UHF audits conducted by KPMG LLP cover all its programs, including Windward CC funds (see III.D.4). The UHF's annual audit reports indicated that there have not been any negative audit findings from FY2013-2016. All the audits are publicly available on the website ([IIID-172](#)).

### *Extramural Grants*

Extramural grants, including financial student aid, are administered through the University Office of Research Services and follow audit requirements in Circular No. A-133 ([IIID-173](#)). As a System, grant monies are audited on an annual basis and the findings are reported in the A-133 Audit Report. Since 2006, the UH Consolidated Financial Statements have included supplemental information on the UHCC System colleges ([IIID-174](#)). Throughout this accreditation period, the external auditors' opinions over federal awards have been without any material weaknesses.

Policies and procedures regarding Research Training and Revolving Funds (RTRF) are stated in Executive Policy 12.216 ([IIID-175](#)). RTRF funds can only be used for research and training purposes which may result in additional research and training grants and contracts, facilitating research and training; and further deposit into the discoveries and inventions revolving fund and the University of Hawai'i housing assistance revolving fund. The College adheres to this policy.

All financial resources of the College are managed and administered in compliance with UH Administrative Procedures, State and Federal requirements, and with the intended purpose of the funding source ([IIID-176](#)). The Office of Procurement and Real Property Management (OPRPM) is responsible for the system-wide administration of policies and procedures for the acquisition of goods, services, and construction and the processing of transactions involving real property ([IIID-177](#)). All disbursements of funds require dual approvals: first by the PI, and second by a Fiscal Officer to ensure compliance with established policies and procedures and availability of funds. Employees who perform fiscal and administrative functions must follow segregation of duties and the responsibilities delineated in administrative policy AP 8.025 ([IIID-178](#)). The UH System Property and Fund Management Office (PFMO) performs an annual physical inventory of equipment and reconciles results to inventory records on an annual basis ([IIID-179](#)). To assure financial integrity, control mechanisms, such as segregation of account costs for all funding sources are imbedded in the Kualii Financial System ([IIID-80](#)). The UH Office of Internal Audit (OIA) is authorized by the Board of Regents Audit Committee to review and evaluate compliance issues with policies, procedures, statutes, and regulations of any University activity, program or function.

### **Analysis and Evaluation**

The College meets this standard. The financial resources of the College are used with integrity in accordance with University policies and with the intended purpose of the funding source. First, extramural grant funds are used in accordance with federal guidelines. Second, funds from auxiliary activities are used in accordance with State laws. Third, all financial

resources are processed and/or recorded in the KFS. Finally, annual audits by external and internal auditors evaluate the College's compliance with these laws.

### **Standard III.D.15**

---

*The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.*

---

#### **Evidence of Meeting the Standard**

The Windward CC Financial Aid Office (FAO) ensures that the College is in compliance with all federal requirements with respect to student loans. Programs authorized under Title IV of the Higher Education Act are the only sources of federal student aid (FSA) in the College ([IIID-180](#)). The FAO processes financial student aid applications and disburses the funds to students through the KFS. The Business Office processes the refund for any financial aid that is in excess of the tuition and fees (revenues) due to Windward CC. The electronic refunds are done through the system called TouchNet ([IIID-181](#)). The College uses the FSA guidelines and works with the ORS in monitoring the financial aid accounts and revenues to ensure those funds are used for the benefit of the students for whom they are intended ([IIID-182](#)).

The [Single Audit Act of 1984](#) (with amendment in 1996) and [OMB Circular A-133](#) ("Audits of State, Local Governments, and Non-Profit Organizations") require schools to have an external auditor conduct an annual compliance audit and financial statement audit ([IIID-183](#)). No negative findings on the University System financial statements were noted in the A-133 Audit performed annually by Accuity LLP, CPAs. Only minor findings involving no exit counseling (in 2014) and untimely exit counseling (in 2015) were noted ([IIID-97](#) Section 3 p. 35, [IIID-98](#) Section 3 p. 34) in Section 3 of the A-133 Reports. The corresponding corrective action plans that address the findings were included in Section 5 of the A-133 Report ([IIID-97](#) Section 5 p. 8, [IIID-98](#) Section 5 p. 6). A letter from the DOE dated August 11, 2016 confirms that the College has resolved each and every deficiency noted by the auditor ([IIID-184](#) p.11). No other deficiency was noted.

The College submits the Fiscal Operations Report and Application to Participate (FISAP) to the US Department of Education annually ([IIID-185](#)). The College also closely monitors the cohort default rates (shown in Table 3D-9). Each of the annual rates meets federal requirement (must be less than 30%) ([IIID-186](#)). However, the numbers are increasing, and the College has taken steps to reverse the trend. The FAO improved its website ([IIID-187](#)) to communicate relevant information ([IIID-188](#), [IIID-189](#)) and developed a Debt Management and Default Prevention Plan ([IIID-190](#)). The office has also increased its collaboration with the UH System Financial Aid Office to review and perform exit counseling to students in a timely manner.

**Table III.D.9 Default Cohort Rate from FY 2012 to FY 2014.**

	FY 2012	FY 2013	FY 2014
Official Cohort Default Rate	19.6	21.8	23.1

### **Analysis and Evaluation**

The College meets this standard. The College monitors and manages student loan default rates to ensure compliance with federal requirements, and comes into compliance when deficiencies are identified. First, the most current cohort default rates are all within federal guidelines (below 30). Second, the external auditors' opinions over federal awards have been unmodified, identifying no material weaknesses or significant deficiencies. Each and every minor internal control deficiencies have been corrected. Finally, the College has a default prevention plan to ensure default rates remain within acceptable standards and has strengthened collaboration with the UH System Financial Aid Office to improve reporting.

### **Standard III.D.16**

---

*Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.*

---

### **Evidence of Meeting the Standard**

Windward CC has various academic agreements, affiliation agreements, sponsored class or sheltered class contracts with external agencies, funded research agreements, fee-for-service type contracts, facilities use agreements, contractual agreements for procurement of goods or services, and lease agreements.

#### *Academic Agreements*

The College abides by UHCCP Policy #8.102 ([IIID-191](#)) in the execution of affiliation agreements and/or memoranda of understanding (MOUs) for sponsored class or sheltered class contracts with external agencies. The department or unit drafts agreements and memoranda using standardized agreement templates approved by legal counsel. Draft agreements are reviewed and endorsed by the dean or director. This review considers whether a project is appropriate and supports the College's mission and goals. The chancellor examines if the agreement is in compliance with all applicable UH policies and approves the agreement or memorandum. A report of the affiliation agreement or MOU is submitted to the associate vice president for Administrative Affairs. The Office of Vice President for Community Colleges conducts post-audit reviews of the agreements and reports to ensure compliance with all administrative policies and that these agreements are consistent with the academic/instructional direction of the UH community colleges. One example is the MOA between Windward CC and Maui College ([IIID-192](#)) to deliver Veterinary Assisting Program in Maui.

### *Extramural Grants*

The College adheres to the UH system-wide procedures for the preparation of extramural grant proposals and the approval requirements for sponsored agreements provided in A8.910 ([IIID-193](#)). The Principal Investigator (PI) or Project Director (PD) prepares a proposal and budget and uploads these and other supporting documents to myGRANT, the UH electronic grants management system. After the myGRANT Proposal is completed by the PI/PD, it is reviewed by the College's administrative officer to ensure that all costs are properly identified and realistically estimated. Then the chancellor/dean/director evaluates and approves all aspects of the proposal application for substance, merit, academic appropriateness, desirability and compatibility with the mission of the unit. The final institutional review is done by ORS ([IIID-194](#)) to ensure conformity with UH, State, Federal, and sponsoring agency's policies and procedures, and all applicable laws, rules and regulations. This office executes legal agreements, recommends and issues UH policies and procedures relating to extramurally sponsored projects and reports on sponsored research to the UH Board of Regents (BOR) and the Office of the President.

The ORS is designated as Authorized Organizational Representative (AOR) for all proposals to external sponsors. The ORS submits electronic copies of the proposal to the prospective sponsor. It follows up, negotiates and monitors the status of the proposal with the sponsoring agency. Official notification from the sponsor is directed to ORS for formal acceptance by the UH. ORS is responsible for the final institutional review for all business, financial and legal matters pertaining to contracts, grants and cooperative agreements. The vice president for Research and Innovation is the authorized signatory for all external grant funds for the UH System ([IIID-195](#)). The ORS reports all external awards to the UH Board of Regents on a monthly basis. Policies and procedures on grant management are in place and available on the ORS website ([IIID-196](#)). Extramural funds are audited annually as part of the consolidated financial statement audit and compliance audit. Policies and procedures regarding ethical standards of conduct in research and scholarly activities are in place ([IIID-197](#)).

The College has been successful in receiving federal grants to strengthen the goals and Strategic Action Outcomes set by the College while adhering to the standards and policies set forth by the ORS and the OPRPM. One example is the Title III Grant from the US Department of Education, The project, Mala a'oa'o kaiaulu: Growing a garden of speakers in our community, is to create a Hawaiian language based curricular pathway, which includes both a short-term certificate credential for Hawaiian language and an associate's level credential, which can lead to baccalaureate transfer. The grant award notification (GAN) contains the terms and conditions for the grant award ([IIID-198](#)).

### *Goods and Services*

The College follows the UH system-wide guidelines in the procurement of goods and services. Procedure A8.225 paragraph 2 requires that the College does not accept goods or services without a fully executed contract in place ([IIID-199](#)). The University Disbursing Office will not process requests for payment of goods and services acquired prior to the existence of a valid contract. According to EP 8.107, the chancellor and his designee (fiscal

administrator) have authority to execute contracts to procure goods, services, and construction less than \$25,000 ([IIID-200](#)). Purchase orders for any service or goods costing more than \$2,500 are placed on SuperQuote for bids. For amounts under \$2,500, the purchase order must be approved by the PI/department chair and submitted to the Business Office. The fiscal administrator examines if the transaction is appropriate, if funds are available and if the transaction is in compliance with UH, State and Federal rules before approving the purchase order. Then the purchase order documents are submitted to the UH Disbursing Office for final review and processing of the payment/check ([IIID-201](#)).

The vice president for Administration or designee has the signature authority for purchase contracts above \$25,000 and for granting concessions and cooperative agreements ([IIID-202](#)) and the UH Office of Procurement and Real Property Management, OPRPM, is responsible for the system-wide acquisition of goods, services, construction and transactions involving real property ([IIID-203](#)). BOR policies, executive policies and administrative policies and procedures on business and finance are in place and available on the OPRPM website ([IIID-204](#)). It provides procedures for goods and services contracts ([IIID-203](#)), such as the Procedure A8.350 on concessions ([IIID-205](#)). One example is the coffee shop concession agreement ([IIID-206](#)). This contains provisions for termination in the event the contractor fails to meet any of its commitments to meet the required quality standards.

### **Analysis and Evaluation**

The College meets this standard. All contractual agreements with external entities are consistent with the College's mission, goals and policies, and, contain provisions to maintain the integrity and quality of its programs, services and operations. First, contractual agreements for extramural grants are centralized throughout the UH System for legal support and contract advisement. Second, all contractual agreements are governed by University policies to maintain the integrity of the institution. Finally, all contracts contain appropriate provisions to provisions maintain the integrity and quality of its programs, services and operations.

## Standard IV: Leadership and Governance

**The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal Stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and Services and improve institutional effectiveness, while acknowledging the designated Responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.**

### Standard IV.A.1

---

*Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.*

---

### Evidence of Meeting the Standard

The College has a well-defined process that encourages innovation leading to institutional excellence. Through the shared governance planning process, Ke Kumu Pali, Windward CC's Planning and Budget Council (PBC), Faculty Senate, Staff Senate, and the Institutional Effectiveness Committee (IEC) have an opportunity to put forward initiatives that improve practices, programs, and services ([IVA.17](#)).

Windward CC's Planning and Budget Council is the largest college governance body, where shared governance takes place between faculty, staff, students, and administrators from all major departments, units, and committees. "The Planning and Budget Council provides advice and counsel to the chancellor regarding forces that are currently or will have impact on the College's plan of action that is designed to accomplish specific goals. Initiatives to achieve these goals are justified by assessment, analysis, and evidence of community needs. A major outcome of the of PBC's work is regular review and updating of the Strategic Plan and the prioritization of the College budget requests" ([IVA-2](#)).

Annual assessments and 5-year program reviews conducted by the divisions of Academic Affairs, Student Services, and Administrative Services encourage innovative ideas for consideration in the PBC ([IVA-4](#)). This has led to a number of changes and improvements including the hiring of faculty and staff as well as the purchasing of equipment and furniture for new buildings. Examples of programmatic changes that have been made through PBC requests and allocation by the chancellor are supplemental instruction, tutoring services, and mental health services for students ([IVA-5](#)).

An example of the College encouraging innovation within the goals of the Strategic Plan occurred when Windward CC Veterinary Technology faculty recommended that the Certificate of Achievement in Veterinary Assisting be extended to Maui CC ([IVA-1 p. 2](#)). Nine students graduated from this program in May 2017, and based on this success a similar program was recently started on the Big Island ([IVA-3](#)). This shows shared governance within the University of Hawai'i System, through a program that was industry driven in line with a State of Hawai'i and UHCC directive to improve the employability of Veterinary Assistants and students graduating with Science, Technology, Engineering, and Mathematics (STEM) degrees on all islands.

An example of improvement through a systematic participatory process is the College's Meta-Assessment focus groups. Conducted with selected governance committees, these groups have initiated several changes in the assessment process at the College, and will revisit and revise, as necessary, its general education student learning outcomes rubrics as well as look at its online assessment forms/database to incorporate new rubrics, programs, and matrices ([IVA-6](#) need to upload documents to web). Another example would be Ke Kumu Pali serving as a vehicle through which Native Hawaiian faculty, staff, students, and administrators of Windward CC participated in creating the Quality Focus Essay on Native Hawaiian Parity ([IVA.35](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC's shared governance process allows the opportunity to create and encourage innovative ideas, practices, and programs within the goals of the College, the System, and their missions. Additionally, ideas for improvement from Department, Unit, and Program Reviews are evaluated through the campus's major committees' (Planning and Budget Committee, Faculty and Staff Senate) systematic participative processes to assure effective planning and implementation, augmented by focus groups and surveys.

### **Standard IV.A.2**

---

*The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.*

---

### **Evidence of Meeting the Standard**

Windward CC is part of the University of Hawai'i System, and is governed by the UH Board of Regents (BOR) policies and procedures ([IVA-9](#)). As a State of Hawai'i public institution, it is also governed by all Hawai'i Revised Statutes ([IVA-10](#)). Some policies have been developed at the Community College (UHCC) System level as well as the College level to assure consistency when appropriate ([IVA-7](#)).

The College has established policies and procedures for broad participation in decision making. The College Policies Formation Process offers the basic framework for the creation,

assessment, and modification of all campus policies, and establishes a shared vocabulary, format, and filing system for policy documents (IVA-8). Furthermore, Windward CC's Associated Students of the University of Hawai'i (ASUH-WCC) constitution and by-laws outlines students' role in serving on all shared governance planning committees (IVA-14).

The special purpose committees involved in shared governance of the College are the Institutional Effectiveness Committee (IEC), Faculty Senate, Staff Senate, Master Planning and Space Allocation Committee (MaPSAC), Ke Kumu Pali, and the PBC (IVA-4). In addition to these special purpose committees, the chancellor's administrative staff council provides input in the shared governance process (IVA-36). The IEC sets policies to plan and oversee an institutional schedule to ensure a systematic, comprehensive, and ongoing assessment of the credit programs, non-credit programs, and other units (IVA-11). Faculty Senate sets the policies for educational decision-making, academic policy, and program development (IVA-12) while Staff Senate sets college policies that promote the general welfare of the College through advocacy and inclusion of staff perspective (IVA-13). MaPSAC sets policies to make recommendations concerning short, mid and long term facilities use, and plans for renovation of existing facilities and construction of new facilities (IVA-15). ASUH-WCC students participate in shared governance committees such as the PBC, where the ASUH-WCC president serves, and the Institutional Effectiveness Committee (IEC), where a student representative serves.

### **Analysis and Evaluation**

The College meets this standard. Windward CC has established policies and procedures for administrators, faculty, students, and staff to participate in a participatory governance process and its decision-making process. First, policies and procedures set by the UH system and the Board of Regents provide a structure for governance. Second, Windward CC established college level policies and procedures that allow faculty, students, and staff to participate in the governance and decision-making process. Individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.

### **Standard IV.A.3**

---

*Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.*

---

### **Evidence of Meeting the Standard**

Shared governance committees provide administrators and faculty a substantive and clearly defined role in institutional governance. Windward CC's PBC, Faculty Senate, Staff Senate, Ke Kumu Pali, and IEC are several groups that provide faculty, staff, students, and administrators an opportunity to provide input in policies, procedures, and planning (IVA-17). Full participation of faculty, administrators, staff, and students is further evidenced by the Annual Assessments and 5-Year Program Reviews and their use in the planning and budgeting processes. Requests ranked by individual departments and units are forwarded to the PBC for consideration; the PBC reviews these recommendations and submits the prioritization of all requests to the chancellor. The chancellor then selects which requests will

be funded, and in a presentation to the PBC explains his reasoning if the prioritization submitted by the PBC is modified ([IVA-16](#)).

In the development of the 2015-2021 Strategic Plan, the chancellor created 9 sub-committees ([IVA-18](#)) within the PBC, each assigned a portion of the Strategic Plan. These sub-committees developed Windward CC action items that would align with those of the UH and UHCC Systems. Refinements to these action items were the result of input provided by the Faculty and Staff Senates, Ke Kumu Pali, ASUH-WCC, and members of the Administrative Team. On April 28, 2017, the PBC approved the 2015-2021 Strategic Plan.

### **Analysis and Evaluation**

The College meets this standard. Through policy and procedures, administrators and faculty have a substantive and clearly defined role in institutional governance and have significant input in institutional policies, planning, and budgets that relate to their areas of responsibility and expertise. A good example is the passing of the “Clarification of the communication lines for shared governance between Campus Administration and the Faculty, Staff, and Students of Windward Community College” resolution ([IVA-38](#)). This resolution demonstrates the role and the input by which the faculty and staff senate is able to make changes to improve the College.

### **Standard IV.A.4**

---

*Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.*

---

### **Evidence of Meeting the Standard**

The shared governance process is the primary mechanism by which all campus constituents participate in decision making. The shared governance committee structure chart illustrates the lines of communication and decision-making ([IVA-20](#)).

Full-time faculty have a professional responsibility to participate in Windward CC and University-System committees (Article IV B, [IVA-37](#)). Furthermore, all committees enjoy sufficient administrative presence and/or support (i.e. the Faculty Senate chairs report back to the chancellor and bring up questions that have occurred during the Faculty Senate meetings).

Faculty and academic administrators make recommendations about curriculum and student learning programs through the Curriculum Committee and Faculty Senate. In AY 2016-2017, the Curriculum Committee reviewed and worked with proposers on a range of individual course proposals, including new courses, course modifications, and course deactivations. The committee handled several program/policy modifications and multi-course prerequisite updates, including reviewing and working on new associate degree concentrations in pre-computer science, theater, and visual art, and a new certificate of competence in cybersecurity ([IVA-21](#)).

Recommendations about Academic Support and Student Affairs units occur through their Annual Assessments and 5-Year Program Reviews as well as the unit's Annual Report of Program Data (ARPD) ([IVA-22](#), [IVA-23](#)), and recommendations concerning staff occur through the Staff Senate end of year report ([IVA-24](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC faculty and academic administrators, through policy and procedures, and through well-defined structures, participate in institutional decision making through a shared governance process, wherein faculty, staff, and students sit on a number of governing committees such as Faculty Senate, Staff Senate, and ASUH. Recommendations about curriculum and student learning programs are conducted through the Curriculum Committee, and lastly, recommendations about Student Affairs are provided through annual and 5-year assessments.

### **Standard IV.A.5**

---

*Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.*

---

### **Evidence of Meeting the Standard**

Membership in shared governance committees is designed to ensure the inclusion of relevant perspectives and required expertise in the consideration of key campus issues. (See discussion above in Standard IV.A). The following shared governance committees oversee institutional plans and budgeting, policies, institutional effectiveness, space allocation, and curricular changes:

- The Curriculum Committee is a subcommittee of the Faculty Senate and is the principal reviewing and recommending body on all aspects of the educational curricula. This subcommittee oversees comprehensive review of course and program proposals and modifications ([IVA-25](#)).
- The Staff Senate promotes the general welfare of the College through advocacy and inclusion of staff perspectives ([IVA-13](#)).
- The Planning and Budget Council provides advice and counsel to the chancellor regarding economic, political, industry, and programmatic forces that are currently or will have impact on the College's plan of action that is designed to accomplish specific goals. Initiatives to achieve these goals are justified by assessment, analysis, and evidence of community needs. A major outcome of the PBC's work is regular review and updating of the Strategic Plan and the prioritization of the College Budget ([IVA-26](#)).
- The Institutional Effectiveness Committee is charged to plan and oversee an institutional schedule to ensure a systematic, comprehensive, and ongoing assessment of the credit programs, noncredit programs, and other units identified in the Program Review Policy, to develop and sustain a culture of assessment throughout the

- institution, to provide the necessary training and skills for units to assess themselves, and to maintain materials and reports related to all assessment activities ([IVA-11](#)).
- The Master Planning and Space Allocation Committee makes recommendations concerning short, mid and long term facilities use, and plan for renovation of existing facilities and construction of new facilities ([IVA-15](#)).
  - The Faculty Senate provides formal faculty involvement in educational decision-making, academic policy, and program development. The purpose of this formal faculty involvement is to ensure that quality education is provided, preserved, and improved at Windward CC and in the University of Hawai‘i System in general ([IVA-12](#)).

The Windward CC chancellor recognizes the Faculty Senate as the representative of faculty opinions and as a consulting body on curriculum development through its Curriculum Committee. This Faculty Senate sub-committee oversees curriculum development ([IVA-27](#)). Moreover, the IEC oversees the development of procedures and evaluation criteria for reviewing the College’s mission, priorities, and effectiveness ([IVA-28](#)). The PBC is the recommending body that oversees the coordination of institutional planning and budgeting ([IVA-26](#)). Finally, the University of Hawai‘i Board of Regents oversees the coordination of the University System (See Standard IVC).

### **Analysis and Evaluation**

The College meets this standard. The University of Hawai‘i Board of Regents (UH BOR) policies inform the structure of shared governance. First, institutional governance is embodied in the Planning and Budget Council structure and the annually updated Strategic Plan. Second, college plans, policies, curricular changes, and other key considerations occur through the Curriculum Committee and college planning documents. Finally, appropriate consideration of relevant perspectives and decision-making is reflected in shared governance committees’ membership.

### **Standard IV.A.6**

---

*The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.*

---

### **Evidence of Meeting the Standard**

The College makes documents relevant to processes and decisions readily available to its constituents and general public through presentations given to the campus, and State of the College presentations given during Convocation. Spring 2017 Convocation, for example, provided opportunities for a variety of campus reports and workshops ([IVA-29](#)), and the chancellor communicated important campus messages via all campus email ([IVA-34](#)). Additionally, a campus discussion board was created for individuals and groups at the College to solicit feedback to inform curriculum and policy decision-making ([IVA-33](#)).

Planning decisions are identified in the Strategic Plan and posted on the College website ([IVA-19](#)) with PBC action items shared electronically on the College website ([IVA-26](#)), disseminated via faculty representatives to their respective departments and units ([IVA-31](#)),

and via email through the College face/staff listservs. Minutes, agendas, and action items generated in shared governance committees are accessible on the College website and through Google docs ([IVA-32](#)).

### **Analysis and Evaluation**

The College meets this standard. The processes and results of governance decisions are documented and widely communicated. The chancellor documents and communicates the processes for decision-making and resulting policies via email, web, campus forums, the discussion board, and college convocation. Governance groups and committees post results and decisions via the College website.

### **Standard IV.A.7**

---

*Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.*

---

### **Evidence of Meeting the Standard**

The College utilizes a number of survey instruments and focus groups to assess the integrity and effectiveness of its shared governance committee structure. Faculty/staff surveys revealed a positive view of decision-making processes, but also highlighted the necessity for improved training in collegial governance. Student focus groups conducted in 2016 indicated the need for further participation by student leaders in shared governance. These assessments of shared governance were submitted to the IEC fostered dialog on how the College could modify its current processes to ensure improvement of shared governance and decision-making processes.

### **Analysis and Evaluation**

The College meets this standard. Evaluations of governance and decision-making policies, procedures, and processes are conducted regularly. The effectiveness of shared governance is appraised by the IEC on an annual basis when each shared governance committee undergoes an annual self-evaluation. Moreover, the College conducts surveys and focus groups to evaluate governance and decision making, communicates the results of these evaluations, and uses them as the basis for improvement.

## Standard IV.B.1

---

*The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.*

---

### Evidence of Meeting the Standard

Windward CC's chancellor working with the Chancellor's Administrative Staff Committee ([IVB-1](#)), PBC, Staff Senate, Faculty Senate, Staff Development Committee, MaPSAC, and the IEC, maintains primary authority over planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness ([IVB-2](#)).

The PBC provides advice and counsel to the chancellor regarding forces that are currently or will have impact on the College's plan of action. Initiatives to achieve these goals are justified by assessment, analysis, and evidence of community needs. A major outcome of the of PBC's work is regular review and update of the Strategic Plan.

A primary function of the PBC is to review, evaluate, prioritize, and make recommendations to the chancellor regarding the use of resources in the College's budget, and regarding resource requests for future funding. These recommendations are based on the PBC's review of all program reviews and annual assessments. A prioritized list of items for budget consideration is provided to the chancellor for the operating budget, equipment budget, lectureship budget, and student assistants' budget ([IVB-3](#)).

The chancellor participates in the UH System's Council of Community College Chancellor's (CCCC) meetings. The CCCC advises the vice president of Community Colleges (VPCC) on matters of academic policy, quality, and standards; bring to the VPCC's attention academic and institutional issues potentially impacting the community colleges; and collaborate with the VPCC and others in policy development, in establishing and refining operational procedures and practices, and in strategic and facilities planning and budgeting for the UHCC System. ([IVB-5](#)).

The chancellor works with the Chancellor's Administrative Staff Committee to ensure that the College adheres to all State, Union, and System hiring guidelines. Standard III.A.10 provides an analysis of how the college "maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes."

Furthermore, the chancellor works with the vice chancellor of Academic Affairs (VCAA), Faculty Senate, Staff Senate, and the University of Hawai'i Professional Assembly (UHPA) in matters related to professional development, faculty evaluation, and the promotion and tenure process ([IVB-4](#)). Standard III.A.7 provides an analysis of how the college "maintains a sufficient number of qualified faculty to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes." The chancellor is vested with the final decision for all personnel hires with the exception of executive/managerial direct reports to the chancellor who are approved by the vice president of community colleges on recommendation of the chancellor.

The chancellor provides leadership in planning and assessing institutional effectiveness. The IEC reports to the chancellor and provides recommendation on assessment and, with the Office of Institutional Research (OIR) on Program Review, reports to the chancellor on matters that affect the entire institution ([IVB-6](#)).

In addition to an Executive Employees Performance Evaluation conducted by the UHCC System office ([IVB-7](#)), the chancellor is rated by College employees in an institutional survey. The results of the 2015 survey indicate that the majority of faculty and staff find the chancellor effective along various dimensions ([IVB-10](#)). The chancellor uses the Institutional Surveys and the UH System 360 evaluation of his Administrative staff and their respective unit heads to make changes or adjustments to satisfy the College needs ([IVB-8](#)).

### **Analysis and Evaluation**

The College meets this standard. Windward CC's chancellor has primary responsibility for the quality of the institution. Given Windward CC's small size, the chancellor provides effective leadership in planning, organizing, budgeting, and assessing institutional effectiveness, and in assessing and selecting personnel.

Standard IV.B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

### **Evidence of Meeting the Standard**

The chancellor is responsible for the orderly and proper functioning of Windward CC. The chancellor is also responsible for directing all aspects of the administration and development of the College in order for the College to fulfill its mission. Furthermore, the chancellor delegates authority over specific projects to campus administrators and others consistent with their responsibilities.

Windward CC is divided into 4 units, Academic Affairs, Student Affairs, Administrative Services, and Career and Community Education. Academic Affairs, Student Affairs, and Administrative Services are each headed by a vice chancellor while a director organizes and manages Windward CC's Office of Career and Community Education. The vice chancellor of Academic Affairs supervises and delegates authority to the respective deans. The deans manage and coordinate the instructional and academic support functions of their respective programs. ([IVB-9](#)).

The chancellor manages and evaluates the College's administrative structure and delegates authority to the director and vice chancellors for the supervision and day-to-day operations of their respective units. The chancellor conducts an annual basic evaluation and 360 performance review of the director, vice-chancellors and their respective deans ([IVB-8](#)). Further information can be found in Standard III.A.5.

The chancellor participates in weekly meetings with the chancellor's administrative staff to share information on system and college issues and remain abreast of various campus

operations. In addition, the chancellor holds individual meetings with the administrative staff to review their respective unit goals, as well as any problematic issues that may have arisen ([IVB-1](#)).

The College's organizational structure reflects its purpose, size, and complexity ([IVB-9](#)). More information can be found in Standards III.A.7- III.A.10 on the College's faculty, staff, and administrative structure and how it reflects the purpose, size, and complexity. The unit heads or department chairs evaluate their personnel and departments efficiency using the College's annual assessment, 5-year program review, and UHCC Annual Report of Program Data (ARPD).

### **Analysis and Evaluation**

The College meets this standard. Windward CC's chancellor plans, oversees, and evaluates the administrative structure in relation to the institution's purposes, size, and complexity and delegates authority to administrators in a manner consistent with their responsibilities as displayed in the organizational chart.

### **Standard IV.B.3**

---

*Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:*

- a. establishing a collegial process that sets values, goals, and priorities;*
  - b. ensuring the College sets institutional performance standards for student achievement;*
  - c. ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;*
  - d. ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;*
  - e. ensuring that the allocation of resources supports and improves achievement and learning; and*
  - f. establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution*
- 

### **Evidence of Meeting the Standard**

The chancellor, through established policies and procedures, guides institutional improvement of the teaching and learning environment in the following ways:

- A major outcome of the PBC's work is the regular review and updating of the Strategic Plan and the prioritization of the College Budget ([IVB-3](#)). The PBC is the chief collegial governance body on campus that advises the chancellor on long-range objectives that satisfy the goals of Windward CC's Strategic Plan. The chancellor convenes the PBC which provides advice and counsel regarding economic, political, industry, and programmatic forces that are currently impacting or will impact on the College.
- Performance standards are developed and assessed by discipline faculty within a framework set forth by the IEC and validated through the program review process ([IVB-6](#)).

- The chancellor’s role in improving the teaching and learning environment at the College is, in part, through providing assigned time to department chairs for the responsibility of overseeing learning outcome assessment in their departments. The department chairs have become an integral part of the assessment process in part through their participation on the IEC ([IVB-13](#)).

The chancellor is involved with evaluation and planning processes that rely on high quality research and analysis of external and internal conditions:

- The chancellor, with the support of the director of planning and program evaluation, sets annual institutional performance standards and aligns them with the UH-system, UHCC-System and College strategic goals and priorities ([IVB-19](#)).
- Data collected on student achievement, student learning, and institutional performance inform college planning processes and include external indicators related to job placement, labor market analyses, and enrollment and performance data of K-12 schools located in the College’s service area ([IB-6](#)).
- The Windward CC Ambassadors, a group of community members, meet bi-monthly. Programs and initiatives in need of support are presented to the group and the Ambassadors in turn provide feedback on where funding might be secured as well as making introductions of prominent community members to the chancellor as part of the “friend raising leads to fundraising” nexus ([IVB-20](#)).
- The chancellor, his administrative staff, and faculty attend meetings at the UHCC and UH System-level. The chancellor attends monthly meetings of the Council of Community College Chancellors as well as monthly meetings of the UH System Council of Chancellors and Vice Presidents. There are also monthly meetings for all deans, vice chancellors of Academic Affairs, vice chancellor for Administrative Services, and vice chancellors of Student Affairs. Additionally, there are monthly meetings with System-level Faculty Senate personnel. In addition, all Native Hawaiian chairs meet at the Council of Community College Native Hawaiian Chairs. All of these groups offer places where external and System-wide challenges can be identified and discussed ([IVB-21](#), [IVB-22](#), [IVB-23](#), [IVB-24](#), [IVB-25](#)).
- As with all people who are part of the College, the chancellor is accessible to members of the community. Appointments to meet with the chancellor can be made simply by calling his office.
- The chancellor frequently meets with Hawai‘i State legislators, which allows him to identify significant external challenges to the College such as those connected to the State’s budget, education policy, and other legislation. When the legislature is in session, the chancellor and others will meet with the local representatives or attend legislative hearings to deliver testimony as appropriate.

The chancellor is involved with the integration of educational planning with resource planning and allocation to support student achievement and learning:

- Windward CC has a systematic process of assessment, program review, strategic planning, and budget allocation which coalesces around the PBC. The chancellor connects institutional, program, and course assessment to the Strategic Plan, Mission, and goals of the College and the UH and UHCC Systems ([IVB-12](#)).

- Programs and units produce Annual Reports that include a discussion of challenges and possible solutions. Every 5 years, programs and units are responsible for doing a more in depth longitudinal analysis to foster sustainable, continuous improvement ([IVB-11](#)).

Ensuring that the allocation of resources supports and improves learning and achievement:

- The College is performing adequately in assessing SLOs at the course, program and Institutional Levels. Standard I.B.5 provides an analysis of the Windward CC assessment process in fulfilling the college mission.
- All courses taught at the College are assessed in a 5-year cycle. All courses have been mapped to both program (AA degree) SLOs and institutional (general education) SLOs; therefore, when assessing course SLOs, faculty were also implicitly assessing program and institutional SLOs ([IB-52](#), [IB-53](#), [IB-54](#), [IB-55](#)).
- As ex officio Chairman of the PBC, the chancellor ensures that the departments link Course-level SLO Assessment to Departmental Budgetary Requests. For example, departments requesting an increase in Supplemental Instruction must now support their requests with SLO assessment data ([IVB-27](#)).

The chancellor is involved with establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution:

- Programs and units produce Annual Reports that include a discussion of challenges and possible solutions. Every 5 years, programs and units are responsible for doing a more in depth longitudinal analysis to foster sustainable, continuous improvement ([IVB-11](#)).
- Any challenges that the College faces are identified and addressed primarily through the committee structure, which allows College concerns to be transmitted to the appropriate governance channels. In addition to formal interactions, the chancellor's door is open to all students, staff, and faculty.
- The College's Discussion Board allows proposals to be transmitted to the College for discussion and feedback ([IVB-14](#)).
- Units are required to submit a comprehensive Program Review every 5 years. The PBC reviews every Annual Assessment and Program Review and prioritizes budget requests for equipment, supplies, and positions based on the needs of the College. Budget requests are linked to the Strategic Plan, Annual Assessment and Five-Year Program Review, and the Mission and goals of the College ([IVB.15](#)).
- The vice president for Community Colleges presents twice a year on relevant data related to the Windward CC constituents on the current strategic plan and UHCC performance based funding initiative ([IVB-16](#)).

### **Analysis and Evaluation**

The College meets this standard. The chancellor guides institutional improvement in relation to its values, goals, and priorities by leading the process to develop and update the college strategic plan. He ensures that institutional performance standards are set annually and evaluated rigorously by means of his oversight of the IEC and his ex-officio chairmanship of the PBC. He also ensures that evaluation and planning rely on high quality research and

analysis of external and internal conditions by virtue of his oversight of the Institutional Research Office on campus. Moreover, the chancellor establishes the linkage of educational planning with resource planning and allocation to support student achievement and learning by means of his oversight of the IEC and his ex officio chairmanship of the PBC.

#### **Standard IV.B.4**

---

*The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.*

---

#### **Evidence of Meeting the Standard**

The chancellor's ongoing participation in the Accreditation Steering Committee (ASC) and oversight of other accreditation-related activities signals the institution's sustained commitment to an inclusive and thorough self-evaluation process and adherence to eligibility requirements ([IVB-29](#), [IVB-30](#)). The ASC is a committee of faculty, staff, and administrators that is chaired by the accreditation liaison officer (ALO) and tasked with the oversight of the accreditation effort. The ALO, a post currently held by the director of planning and program evaluation, reports directly to the chancellor and keeps the College abreast of all revisions to ACCJC standards, procedures, and eligibility requirements. The committee meets bi-monthly to provide guidance on evidence gathering, and to ensure that the self-evaluation accurately reflects the institution's performance ([IVB-17](#)). The 2017 writing team consists of 7 writers, an editor and documentarian ([IVB-28](#)). Each writer researched, interviewed, and/or emailed essential faculty, staff, and administrators pertaining to the Standard in which they were responsible. The College as a whole reviews and provides feedback on each of the Standards in forums, on the discussion board, and in selected committee reviews.

The chancellor's weekly Administrative Staff meetings with his executive staff provides a venue for the review of policies, procedures, and operations for the College's 4 divisions and serves as a means to ensure ongoing compliance with accreditation standards and eligibility requirements. The chancellor routinely disseminates information on College, UH-System, and UHCC-System policies during cabinet meetings and discusses strategies for the development of follow-up reports and implementation of ACCJC recommendations ([IVB-31](#)).

#### **Analysis and Evaluation**

The College meets this standard. The Windward CC chancellor holds the primary responsibility for accreditation, actively participates in the Accreditation Steering Committee (ASC), and provides the necessary resources and support to facilitate an accurate self-assessment of the College's programs and full compliance with eligibility requirements.

## **Standard IV.B.5**

---

*The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.*

---

### **Evidence of Meeting the Standard**

The chancellor receives communications from the vice president of community college regarding UH-System and UHCC-System policy changes and procedures. Monthly Council of Community College Chancellors' meetings provide another venue for deep dialogue at the system level ([IVB-5](#)). All administrative regulations modified or adopted by the chancellor are communicated locally at the chancellor's administrative staff meeting, in shared governance committees, and during the bi-annual Windward CC convocation's Chancellors State of the College speech.

The effective control of budget and expenditures at Windward CC is largely the result of authority delegated to the vice chancellor of Administrative Services and to the Fiscal Officer. The chancellor meets bi-weekly with the vice chancellor of Administrative Services to review College expenditures and to project ending balances for the fiscal year.

The Operational Expenditure Plan (OEP) is essentially the College's operating budget for a given fiscal year, July 1-June 30. The OEP identifies sources of income and planned expenditures for the fiscal year. For Windward CC, sources of income are derived from general funds (GF), tuition and fees special funds (TF SF), and research and training revolving funds (RTRF)—more commonly known as the return of indirect cost from contracts and grants.

Expenditures are categorized by personnel or payroll costs, and other current expenditures. Personnel costs are broken down further by types of employees. Other current expenditures include, but are not limited to, electricity, water, equipment maintenance, educational and office supplies, software licenses, training fees, airfare, consultant services, travel, janitorial supplies, computers, and equipment. The chancellor makes fiscal adjustments as necessary to establish a positive end of year balance for the College. Updates on these meetings are shared with the chancellor's administrative staff ([IVB-1](#)) and the PBC on a regular basis ([IVB-18](#)).

The Business Office and in particular the fiscal administrator, is responsible for ensuring that the expenditures follow State and University policies and procedures. Significant issues are reported to the vice chancellor of Administrative Services and, if necessary, to the chancellor. Given the formal structure of the accounting system, problems of this nature do not happen on campus. The primary issues are minor concerns related to compliance with purchasing rules, especially related to grants.

Furthermore, the chancellor delegates minor budget decisions to other administrators. Minor departmental expenditures that occur within the established budget, for instance, are authorized by the appropriate dean of Academic Affairs, while larger instructional purchases are authorized by the vice chancellor of Academic Affairs. Effective oversight in these instances occurs within the context of broader budget allocations tied to the specific goals of

the office. The chancellor is, thus, not overly burdened with minor decisions and can focus on exerting a broader oversight of the budget.

The chancellor also holds bi-weekly, one-on-one meetings with the staff under his immediate supervision: The directors of Marketing and Public Relations, Institutional Research, Planning and Program Evaluation, the vice-chancellors of Academic Affairs, Administrative Services, Student Affairs, and the director of the Office of Career and Community Education. These meetings are used as an opportunity for these officials to raise issues that need to be addressed, and for the chancellor to ensure that all units under his control are functioning properly.

### **Analysis and Evaluation**

The College meets this standard. The Windward CC chancellor oversees the implementation of State statutes and regulations and UH System and UHCC-System governing policies while assuring effective control of budget and expenditures.

### **Standard IV.B.6.**

---

*The CEO works and communicates effectively with the communities served by the institution.*

---

### **Evidence of Meeting the Standard**

The identification and response to communication challenges is based on fostering an open, transparent, and proactive communication system where some groups have a formal responsibility and other groups and people have an informal, but often encouraged, ability to identify challenges. The College likewise has a formal and informal system to produce solutions to those challenges, whether through the committee structure, the College's discussion board, or informal conversations with stakeholders. Evidence of this communicative system can be found in the committee structure, program reviews, and the use of communication technologies such as e-mail and an electronic discussion board ([IVB-2](#), [IVB-14](#)).

Challenges that the College faces are identified and addressed primarily through the committee structure, which allows College concerns to be transmitted to the appropriate governance channels. In addition to formal interactions with the Governance Committees the chancellor's door is open to all students, staff, and faculty.

Additionally, the student government is encouraged to bring forth concerns about the College to the chancellor through the Student Life coordinator, who is the faculty liaison between the students and the institution. Many Student Senate representatives serve on various College committees. An ASUH-WCC student representative, as well as a student delegate from Phi Theta Kappa serve on the PBC as an example ([IVB-32](#)). Therefore, they have a significant voice in College decision-making.

Typically, the chancellor does not attend departmental meetings except when invited or when a major announcement must be made. Developments of departmental and staff meetings are reported to the chancellor via the vice chancellors and through minutes that are posted on the

web ([IVB-33](#)). The chancellor also uses the College's facstaff listserv as an important tool to communicate with both stakeholders and communities served by the institution. Any issues that come up are also reported at the administrative staff meetings.

Campus facilities such as the Palikū Theater, Gallery 'Iolani, and the Hōkūlani Imaginarium have served as popular venues to attract community members to the campus. In addition, the meeting rooms in Hale 'Ākoakoa have been used by numerous community groups and non-profit agencies for meetings and gatherings at affordable rates. Community-based committees (including Friends of Lanihuli, Friends of WCC and Kokua Palikū) support the above-related activities. These efforts are important for Windward CC because, again, the college mission is to provide the communities served with liberal arts, career and lifelong learning ([IVB-36](#), [IVB-37](#), [IVB-34](#), [IVB-35](#)).

A new effort to enhance the educational relationship with communities was the addition of the Lanihuli Observatory, and renovation of the Hōkūlani Imaginarium. This enhances the educational relationship with the communities served by connecting K-12 school students with science and higher education at Windward CC. This connection is further strengthened through DOE participation at the NASA Flight Training Center, and the Aerospace Exploration Lab ([IVB-38](#)).

Since 2004, the Chancellor's Office has managed marketing and private fundraising with the assistance from various College staff and faculty. The University of Hawai'i Foundation, the 501(c) 3 fundraising arm of colleges in the UH System has assigned one development officer, to assist in Windward CC's fund raising efforts. This officer also reports to the chancellor. As indicated in the Chancellor's Office 2015 Annual Report, the office's external leadership functions include: meeting with the public, attending public functions and events, analyzing and presenting information to various constituencies, gaining politicians' support, and building rapport and relationships with community leaders. An example of this is the annual Windward Ho'olaule'a. This event, which provides free entertainment and other activities, attracts 10 to 15 thousand community members to the Windward CC campus every year, and also allows the College to reach out to the community and showcase its programs and services to potential students and community groups ([IVB-39](#)).

The Marketing and Public Relations Office (MPRO) staff reports directly to the chancellor. MPRO's mission is to promote public awareness and understanding of the College, its programs, policies and services to internal and external constituencies including prospective students, the news media, the community, potential donors, current students, faculty and staff ([IVB-39](#)).

The chancellor regularly attends meetings of community groups such as the Kāne'ōhe Business Group ([IVB-41](#)), the Kailua Chamber of Commerce ([IVB-48](#)), Hawai'i Council for the Humanities, Kāne'ōhe Rotary Club ([IVB-40](#)), and the Kāne'ōhe Neighborhood Board. He has served a 2-year term as chairman of the board, as well as a one year term as chair of the proposal review committee, a one year term as secretary-treasurer, and a one year term as chair of the partnerships committee on the Hawai'i Council for the Humanities, a 3-year term as a member of the Board of Directors of the Kailua Chamber of Commerce, and a 2 year term as Speakers Bureau chair for the Rotary ([IVB-26](#)).

## **Analysis and Evaluation**

The College meets this standard. The Windward Community College chancellor works effectively and communicates well with communities served by the institution. As a member of several community groups the chancellor is able to integrate community needs into the college plan.

## **Standard IV.C.1**

---

*The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.*

---

### **Evidence of Meeting the Standard**

The Board of Regents (BOR) of the University of Hawai‘i is established under Hawai‘i Revised Statutes HRS§304A-104. The fifteen-member board is responsible for the general management and control of the University that incorporates all of public higher education, including the University of Hawai‘i Community College System. The Regents are appointed to five-year terms (with one exception noted below), and represent either one of the four counties in the State or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the University. The student regent is appointed for a two-year term, and may be reappointed. [IV.C.1.1] [IV.C.1.2]

Members of the Board, drawn from a slate of nominees submitted by the Regents Candidate Advisory Committee (RCAC), are appointed by the Governor and confirmed by the State Senate. The RCAC consists of seven members, with four members appointed by the Governor and one member each appointed by the President of the State Senate, the Speaker of the House, and the Association of Emeritus Regents. The RCAC solicits nominations for the Regents, qualifies and screens the applicants, and presents to the Governor a slate of nominees for each vacant Regent position. [IV.C.1.3] [IV.C.1.4]

The By-Laws of the Board of Regents include the specific organization and responsibility of the Board and its committees for academic matters, financial oversight, and general control of the University. This authority is further delineated through Regents Policies (RP). [IV.C.1.5] [IV.C.1.6] Several policies, including *RP 4.201: Mission and Purpose of the University*, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements. The Board executes these responsibilities through regular reporting and deliberation at Board and committee meetings. The Board also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan (IAFP). [IV.C.1.7] [IV.C.1.8]

### **Analysis and Evaluation**

The college meets the standard.

The governing board is established in State statute and the Board is appointed through a process of open recruitment for Board member candidates followed by gubernatorial appointment and Senate confirmation.

The authority of the Board for the governance of the University is established in the State constitution and statute, and the Board has organized its by-laws, policies, and processes to carry out the full measure of Board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.

The authority of the Board encompasses all components of the University, including the University of Hawai‘i Community College System and the individual community colleges.

### **Standard IV.C.2**

---

***The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.***

---

#### **Evidence of Meeting the Standard**

The primary policy governing board interaction among board members and with the broader University community is Regents Policy, *RP 1.202: Relationship of the Board to Administration and University*. Specifically, Section III.A.2.B of the policy states that:

“Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized.”

The policy also delineates and structures the communication between the Board and the University administration, including the requesting and providing of information to and from the Board and the administration. [IV.C.2.1]

The policy is further emphasized through the Board of Regents handbook that is made available to all incoming Regents and published on the Board website. The handbook is based on best practices drawn from the Association of Governing Boards, and includes expectations of Regents, including the responsibility of individual Regents to “Serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree.” [IV.C.2.2]

The 2017 Board Self Assessment includes several items focused on “Acting as a Unit.” Responses to the self-assessment questionnaire indicate that Regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together.” [IV.C.2.3] [IV.C.2.4] [IV.C.2.5]

#### **Analysis and Evaluation**

The college meets the standard.

As noted, Board policy RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of Board minutes did not disclose any instances of Board members acting outside the policy guidelines.

### **Standard IV.C.3**

---

*The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.*

---

#### **Evidence of Meeting the Standard**

As the governing body of the University of Hawai‘i System, the Board of Regents selects and evaluates the University President. *RP 2.203: Policy on Evaluation of the President*, establishes the evaluation protocols for the University President, including an annual self-assessment by the President, additional data collection by the Board, a preliminary meeting between the Board and the President, and a final evaluation after the President responds to the preliminary assessment. [IV.C.3.1]

#### *System CEO Selection*

There has not been a search for the Vice President for Community Colleges (VPCC) since the position was re-established in 2005, and the current Vice President was appointed to oversee the re-organization of the community college system. Should the position of Vice President become vacant, the President would follow the recruitment and other procedures outlined in *RP 9.212: Executive and Managerial Personnel Policies*. In a two-step process that differentiates the functions of appointment and approval, the President would make a recommendation for VPCC to the Board of Regents, which has the final approving authority for that position. [IV.C.3.2]

#### *Campus CEO Selection*

The process for selecting the Chancellor (CEO) of a college is managed by the Vice President for Community Colleges. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee (CSAC), composed of representatives from various college constituencies and the community that the College serves. Nominations for members of the screening committee are solicited from governance groups. The Vice-President determines the final composition, based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of Chancellors, *UHCCP 9.210: Recruitment, Selection, and Appointment of Community College Chancellors*, was drafted in Spring 2018, and vetted and approved by the Chancellors and campus governance bodies. [IV.C.3.3] A detailed set of procedures, which has been used consistently for several years in this process, has also been codified.

The authority for appointment of the college Chancellor is delegated to the Vice President for Community Colleges, with final approval of the appointment by the President of the University. A public announcement is made, and the selected candidate is also placed on the agenda of the Board of Regents to ensure that the Regents are fully informed of the selection process and the selected candidate.

### *UH CEO Evaluation*

Evaluations are conducted in executive session at a public Board meeting with the summary results of the evaluation also made public and included in Board minutes. The posted agenda items and subsequent minutes for the past three Presidential evaluations are provided as evidence. [IV.C.3.4] [IV.C.3.5] [IV.C.3.6]

### *UHCC and CC Campus CEO Evaluation*

The Board delegates the evaluation of the Vice President for Community Colleges to the University President, and the evaluation of the individual college Chancellors is further delegated to the Vice President for Community Colleges. The annual evaluation of both the Vice President for Community Colleges and the Chancellors is governed by Executive Policies, *EP 9.203: Evaluation of Board of Regents Appointees*, and *EP 9.212: Executive/Managerial Classification and Compensation*. [IV.C.3.7] [IV.C.3.8]

Executive Policies establish an annual review that includes a 360-degree assessment by the individual, as well as his/her peers, subordinates, and constituents, of the executive's performance. The individual self-assessment also includes a review of accomplishments and goals set for the review year, and the establishment of goals for the upcoming year. The evaluation information is then discussed between the supervisor and the executive being evaluated. The results of the evaluation impact both continued employment and compensation increases.

The University of Hawai'i Community Colleges system further refines the annual evaluation of executive personnel, including Chancellors, through *UHCCP 9.202: Executive Employees Performance Evaluation*. This policy delineates the requirements for the respondents in the 360 evaluation, and also adds the college's attainment of its strategic goals as a component of the Chancellor's evaluation. [IV.C.3.9]

The evaluation system is reviewed on a periodic basis. In the 2016-2017 review, two changes were adopted. First, an additional item was added to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda. [IV.C.3.10] Second, the categories of performance rating were changed to better reflect the gradations in overall performance. Each executive/managerial employee is now rated as exceptional, exceeds expectations, meets expectations or does not meet expectations. [IV.C.3.11]

## **Analysis and Evaluation**

### *CEO Selection*

The college meets the standard.

The procedures used to recruit and select the Vice President for Community Colleges and the college Chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The President of the University makes the final selection of the Vice

President, subject to approval by the Board of Regents. The Vice President for Community Colleges makes the final determination of the Chancellor, subject to approval by the President.

### *CEO Evaluation*

The college meets the standard.

Annual evaluations involving 360 evaluations, assessment of goal attainment, and progress toward strategic goals have been conducted for the Vice President and all college Chancellors each year. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and in determination of merit-based salary increases, when available.

### **Standard IV.C.4.**

---

*The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.*

---

### **Evidence of Meeting the Standard**

The autonomy of the University and related independent authority of the Board of Regents is embodied in Article X of the State Constitution. Section 6 of Article X specifically states that:

“There shall be a board of regents of the University of Hawaii, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawaii, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern.” [IV.C.4.1]

In carrying out its responsibilities, the Board leadership often testifies at legislative hearings on matters relating to the University, and meets with key State legislators on various bills and budget matters. These legislative communications are coordinated and consistent between the Board and the University's administrative legislative coordinator.

### **Analysis and Evaluation**

The college meets the standard.

The autonomy of the University is established in the State constitution. Given the authority of the Legislature to enact laws of statewide concern, the Board remains attentive to whether such laws might impede the University and Board from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for University athletics led to extensive legislative hearings and bills introduced relating to management and control within the University. The Board of Regents responded by creating an Advisory Task Group on Operational and Financial Controls Improvement (ATG) to conduct its own audit of University operations. The ATG, comprised of both Regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in several areas for improvement. The Board considered the reports, and made governance and policy changes in accordance with some of those recommendations. [IV.C.4.2] [IV.C.4.3] [IV.C.4.4] [IV.C.4.5] [IV.C.4.6]

By taking the initiative to address the issues raised by the Legislature in a comprehensive and very public manner, the Board exercised not only its responsibility for oversight and management of the University, but also its authority to act on matters relating to the University, and protecting the institution from undue influence and political pressure.

#### **Standard IV.C.5.**

---

*The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.*

---

#### **Evidence of Meeting the Standard**

Both by the structure of and responsibilities established for its standing committees, and by its Regents Policies, the Board acts to fulfill its responsibilities as the single provider of public higher education in the State. Board policies and strategic plans are aligned and guide the University in fulfilling its overall mission. The role of community colleges within the University System is further defined in *RP 4.207: Community College System*. [IV.C.5.1]

The board has modified the University mission statement twice in the past several years. In 2009 the Regents adopted a change in the mission that made explicit the University's responsibility and commitment to the success of Native Hawaiian students and the desire for the University to be a model indigenous serving institution. [IV.C.5.2] In 2014 the Regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the University. This subsequently led to the creation of a new policy on Sustainability, *RP 4.208*, illustrating the alignment of mission and policy. [IV.C.5.3] Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in *RP 4.201*, Section C.b, "The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality." Policy

RP 4.201, Section C.a also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements.

### **Analysis and Evaluation**

The college meets the standard.

Board of Regents Bylaws and Policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system, and reflect the broad compliance with the overall expectations of Board management, quality control, and fiscal oversight.

### **Standard IV.C.6.**

---

*The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.*

---

### **Evidence of Meeting the Standard**

The Board of Regents home page (<http://www.hawaii.edu/offices/bor/>) includes links to the Board Bylaws and Policies. The Bylaws include sections defining the Board membership and organization, the officers and duties of each officer, the standing committee structure of the Board and the scope of each committee, the meeting requirements for both committees and the Board, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the Board. The Bylaws also include the conflict of interest requirements for Board members. [IV.C.6.1] [IV.C.6.2]

### **Analysis and Evaluation**

The college meets the standard.

The Bylaws are published and made available to the public, and include all required elements of the standard.

## **Standard IV.C.7.**

*The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.*

---

### **Evidence of Meeting the Standard**

Board of Regents policies are reviewed on a staggered three-year cycle, with current iterations posted at the Board's home page. As a result of a recommendation from the previous comprehensive accreditation review, the University and Board developed and implemented the UH Systemwide Policies and Procedures Information System (PPIS). The PPIS documents all of the Board policies and the related University Executive Policies and administrative procedures. [IV.C.7.1]

The features of the PPIS include:

Description of the PPIS with frequently asked questions on the PPIS home page

Easy public access to all policies, including from the Board of Regents home page

Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While Regents Policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle

Links from the executive policy and/or administrative procedure to the related Regents policy

Automatic notification to interested parties of any change in policy [IV.C.7.2]

When the PPIS was implemented in 2014, all policies were re-codified to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1-4, August 2018 for Chapters 5-9, and August 2019 for Chapters 10-13. [IV.C.7.3]

The review of Chapters 1-4 was conducted beginning in Summer 2017 with a review of the twenty-eight policies included in those chapters. Policies were reviewed for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. Recommendations were made as to whether a policy would a) remain unchanged; b) be subject to editing for clarity or alignment with current practice; c) undergo substantive review and modification; or d) be repealed. Based on this assessment, one policy will be repealed and six will undergo substantive review. One new policy may be created. The Board will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on November 1, 2017, and subsequently provided to the Board at its November 16, 2017 meeting. [IV.C.7.4] [IV.C.7.5] A further update was provided to the Committee on April 5, 2018. [IV.C.7.6]

### **Analysis and Evaluation**

The college meets the standard.

The Board policies are publicly available through the Board of Regents home page and are managed through the comprehensive PPIS. The PPIS system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

The review cycle for Chapters 1-4 was initiated as scheduled in Summer 2017 and resulted in the review of twenty-eight policies. Six policies were substantively updated through the review process.

All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of Board minutes confirmed that Board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawaii Revised Statutes, the public employee collective bargaining law.

#### **Standard IV.C.8.**

---

*To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.*

---

#### **Evidence of Meeting the Standard**

The Board has established strategic goals for the University and its component colleges in four key areas:

- Hawai'i Graduation Initiative focusing on student success
- Hawai'i Innovation Initiative focusing on research and innovation and commercialization of University research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the University's role as the single system of public higher education in the state.

These key goals, endorsed by the Board in 2015, are further articulated in and aligned with the strategic goals of the UH Community College system and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures. [IV.C.8.1] [IV.C.8.2] [IV.C.8.3] [IV.C.8.4]

The Board regularly receives updates on the University's progress in meeting these strategic goals through data on established metrics and trends, and presentations at either board meetings or meetings of the academic and student affairs committee. The Board has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the Board has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways. [IV.C.8.5]

The Board meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda.

## **Analysis and Evaluation**

The college meets the standard.

The Board has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

### **Standard IV.C.9.**

---

*The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.*

---

### **Evidence of Meeting the Standard**

All new Board members receive a full-day orientation that consists of two major components. The first is an introduction to University functions, governance, and strategic directions. The second component deals with Board governance, processes, ethics, and conduct. All new Board members receive a copy of the Board of Regents General Overview as a part of the orientation, as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, new Board members are paired with a more experienced Board member, who serves as a mentor to the incoming member. [IV.C.9.1] [IV.C.9.2] [IV.C.9.3]

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees. [IV.C.9.4]

The Board also organizes training for its members as a part of regular Board retreats or Board committee meetings. For example, during the 2016-2017 academic year, the University external auditor conducted a four-part training session for the Board independent audit committee, drawn from the American Institute of Certified Public Accountants (AICPA) handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management. [IV.C.9.5] The Vice President for Budget and Finance also provides an overview of the State of Hawai'i budget as it pertains to the University system. [IV.C.9.6]

## **Analysis and Evaluation**

The college meets the standard.

New Board members are provided with a comprehensive orientation and related materials, and with a mentor from among the experienced board members. Professional development is provided through attendance at national board professional associations and through training provided at Board meetings.

In 2017 the Board updated its committee structure to modify the personnel committee to also include Board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to Board service is provided for Board members.

#### **Standard IV.C.10.**

---

*Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.*

---

#### **Evidence of Meeting the Standard**

Regents Policy (RP) 2.204 establishes the process for Board self-evaluation. In 2017, the Board bylaws were amended to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance, with explicit responsibility for managing the Board evaluation process. [IV.C.10.1] [IV.C.10.2]

Pertinent to the current accreditation cycle, the Board has conducted annual evaluations since 2014 [IV.C.10.3] [IV.C.10.4] [IV.C.10.5] Additionally, in 2012-2013, the Board undertook a comprehensive audit of the University operations, including Board functions and structure, and implemented significant changes in response to the audit recommendations. [IV.C.10.6] The Board has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations. [IV.C.10.7]

#### **Analysis and Evaluation**

The college meets the standard.

The Board uses the results of its evaluation to improve its operations. For example, in 2015 the Board evaluation included an assessment of whether the Board committee structure adequately aligned with the strategic directions of the University. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in un-coordinated conversations about student success. After debate and consultation, the Board acted to consolidate the three committees and focus the committee responsibilities on the student success agenda. At the same time, the Board acted to create a committee on research and innovation, also in alignment with the University's strategic directions. [IV.D.10.10]

While the Board has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the Board acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of Board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

#### **Standard IV.C.11.**

---

*The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.*

---

### **Evidence of Meeting the Standard**

Article X of the Board of Regents Bylaws establishes the conflict of interest policies and procedures for Regents. Regents are informed of the ethics requirements during their initial orientation. [IV.C.11.1]

Regents Policy. *PR 2.206: Policy on Regents as Employees*, also describes the conflicts of interest that may arise when Regents are also active employees of the University and the conditions under which such Regents need to recuse themselves from actions impacted by their employment status. [IV.C.11.2]

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The Board has also included a Board education presentation by the State Ethics Commission Executive Director as an agenda item at its regular meetings. [IV.C.11.3]

### **Analysis and Evaluation**

The college meets the standard.

The Board is subject to both State ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. Board members are informed of the ethics requirements through their initial orientation, and through regular Board professional development.

Potential ethics concerns are routinely identified during Board meetings and the Regent in question is either recused from action and deliberation on the agenda item, or the potential conflict is determined not to preclude participation. The University General Counsel is available at Board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for Board members having acted in a manner inconsistent with the established ethics bylaws and policies.

## **Standard IV.C.12.**

---

*The governing board delegates full responsibility and authority to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.*

---

### **Evidence of Meeting the Standard**

Regents Policy, *RP 2.202: Duties of the President*, clearly documents the relationship between the Board of Regents and the University system President, and establishes the authority of the President to implement and administer Board policies. [IV.C.12.1]

The general policy on duties of the President is further refined in specific actions. For example, Regents Policy, *RP 9.218: Delegation of Personnel Actions*, describes those hiring actions reserved by the Board, those delegated to the President, and those that may be further delegated by the President. [IV.C.12.2]

The structure of the University of Hawai'i System establishes this line of authority with the University System President, and through the President to the Vice President for Community Colleges, and the individual college Chancellors.

When the Board does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. Task groups may be established by the chairperson upon authorization by the Board, and with such powers and duties as determined by the Board. The tenure of a specific task group shall expire at the completion of its assigned task.

An example of such a task group was focused on creating an integrated academic and facilities plan (IAFP) for the University System. [IV.C.12.3] The task group included both Regents and University administrative officials. Several meetings were held that led to the final recommendation to adopt a plan governing academic program planning and related facilities construction across the ten-campus University system. [IV.C.12.4] [IV.C.12.5] [IV.C.12.6] [IV.C.12.7]

### **Analysis and Evaluation**

The college meets the standard.

While the Board maintains its responsibility for establishing overall strategic direction, university policies, and fiduciary management of the University system, the Board does not actively engage in direct or detailed management of the community colleges or individual campuses.

### **Standard IV.C.13.**

---

*The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.*

---

#### **Evidence of Meeting the Standard**

The Board is routinely informed about the status of accreditation at each of the community colleges.

In preparation for the 2018 Institutional Self Evaluation Report (ISER), the Board Committee on Academic and Student Affairs was presented with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the Board acted to create a permitted interaction group to assist in the evaluation of board-related standards. [IV.C.13.1] A permitted interaction group is comprised of a sub-set of the regents and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger Board or one of its committees. The permitted interaction group included Board leadership, the chair and vice chair of the Committee on Academic and Student Affairs, and Regents representing all the islands with community colleges. A further briefing on preparing for accreditation was provided to the Board at its March 2017 meeting. [IV.C.13.2]

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017, and met with representatives from the community colleges (ALOs and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the Governing Board, before the completed ISERs from the six campuses were presented for review by the Committee on Academic and Student Affairs, the Board of Regents, and the President of the University of Hawai'i in early Summer 2018.

#### **Analysis and Evaluation**

The college meets the standard.

The Board was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

## Standard IV.D Multi-College Districts or Systems

---

*In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.*

---

### Evidence of Meeting the Standard

The University of Hawai'i (UH) system is the sole provider of public higher education in the state of Hawai'i. The overall structure of the UH system is established in Board of Regents policy, *RP 3.201: Major Organizational Units of the University of Hawai'i*. The ten-campus UH system as a whole includes the University of Hawai'i Community College System (UHCC), which is comprised of seven community colleges. The UHCC is further established in Regents policy *RP 4.207: Community College System*. UH Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as the multi-campus system now being evaluated. [IV.D.1.1] [IV.D.1.2]

As an outcome of the reorganization in 2005, overall leadership of the University of Hawai'i Community College System is now provided by the Vice President for Community Colleges (VPCC), the CEO of the system. The VPCC is a member of the senior administration of the UH system, reporting directly to the UH system President. [IV.D.1.3] The UHCC office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O'ahu at a central site near the flagship campus in Manoa. The VPCC works with an Associate Vice President for Academic Affairs and an Associate President for Administrative Affairs to ensure support for the effective operation of the colleges at the system level. [IV.D.1.4] [IV.D.1.5]

The VPCC further works with the Chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership. (See also IV.D.4.) [IV.D.1.6] The CC Chancellors may report through the Vice President for Community Colleges to the President of the UH System for University system-wide policy-making and decisions affecting all campuses; and to the Vice President for Community Colleges for leadership and coordination of community college matters. This flow of communication preserves the Board of Regents' actions in supporting both individual campus autonomy and system-wide coordinated operations. [IV.D.1.7]

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC-System Functional Map, most recently reviewed by the community colleges, and updated in Fall 2017. The Functional Map shows alignment with both the major accreditation topics [IV.D.1.8], as well as the detailed parts of Standards. [IV.D.1.9]

## **Analysis and Evaluation**

As part of the University of Hawai'i system, the College meets this Standard.

Established policies and procedures clearly identify the positions of CEO for both the UHCC system (Vice President for Community Colleges) and individual campuses (Chancellors), and identify their authorized roles in providing leadership at multiple levels.

### **Standard IV.D.2**

---

*The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system-provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.*

---

### **Evidence of Meeting the Standard**

The Vice President for Community Colleges (VPCC, the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions, and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office, and through several bodies comprised of campus representatives.

The operations of the Office of the Vice President for Community Colleges (OVPC) are overseen by two Associate Vice Presidents who coordinate centralized support services in the areas of Academic Affairs and Administrative Affairs. The Associate Vice President for Academic Affairs provides leadership in operational policy-making pertinent to the development and implementation of CC system-wide academic plans, goals and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment and policy analysis; career and technical education; student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives. [IV.D.2.1]

The Associate Vice President for Administrative Affairs provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications. [IV.D.2.2] Facilities management is one area that requires an additional level of coordination and prioritization. Capital improvement projects (CIP) for all campuses are managed at the UH-system level through the UH Office of Capital Improvements (OCI; now designated as the Office of Project Delivery), established by the Board of Regents. General CC repair and maintenance and minor CIP projects are managed by the Associate Vice President for Administrative Affairs, and individual

colleges have responsibility for routine maintenance, and health and safety issues. Individual colleges have Long Range Development Plans (LRDP), which are used by the CC and UH systems to develop and justify minor and major CIP. [IV.D.2.3] [IV.D.2.4]

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: Council of Community College Chancellors [IV.D.2.5]; Community College Council of Faculty Senate Chairs [IV.D.2.6]; and Community Council of Native Hawaiian Chairs. [IV.D.2.7] [IV.D.2.8]

Each campus also mirrors the system level structure in having executive leadership for academic affairs and administrative services; where student services functions are coordinated under the Associate Vice President for Academic Affairs (AVPCCAA) at the system level, the Colleges maintain separate executive management for Student Services with either Vice-Chancellors or Deans. Vice-Chancellors for Academic Affairs (VCAAs), Vice-Chancellors for Administrative Services (VCASs), and Vice-Chancellors for Student Affairs (VCSA) or Deans for Student Services (DOSS) also meet with their counterparts from other campuses on a regular basis, extending the network of collaborative planning and decision-making, and mutual support.

In addition to these councils based on administrative positions, the CC system has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC system having joined the Achieving the Dream Initiative in 2006. [IV.D.2.9] The system-level Council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) Sustainability and b) Distance Education. With reference to Sustainability, an Executive Policy (EP 4.202) and a new Regents Policy (RP 4.208) signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the CC system level, which will require renewed and proactive commitment from the CC system office and the individual campuses. [IV.D.2.10] [IV.D.2.11] [IV.D.2.12]

## **Analysis and Evaluation**

As part of the University of Hawai'i system, the College meets this Standard.

The UHCC System is well-structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand, and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC (see also Standard III), while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the Councils that meet with the VPCC, the committees of Vice-Chancellors, and the system-level initiatives such as the Student Success Council.

### **Standard IV.D.3**

---

*The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures.*

---

### **Evidence of Meeting the Standard**

The University system's budget preparation and receipt of and further distribution of resources are governed by State law, primarily Chapter 37 of the Hawaii Revised Statutes (HRS). [IV.D.3.1] Biennial budget requests, financial plans and program performance reports are provided to the Governor and the Legislature in odd-numbered years; supplemental budget requests (to amend any appropriation for the current fiscal biennium) may also be submitted in even-numbered years. Operating and Capital Improvement Projects (CIP) funds for the UH system are appropriated by major organizational units, of which the UH Community College system is one.

The UHCC System Office, under the guidance of the Associate Vice-President for Administrative Services, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH system, the UHCC system, and the individual College Strategic Plan. [IV.D.3.2] The Community College Strategic Planning Council (SPC) is the primary body for ensuring system-wide participation in the UHCC strategic planning process. The membership of the SPC includes the Chancellor, Faculty Senate Chair, and Student Government Chair from each college; and the Vice President and the Associate Vice Presidents for the community colleges. [IV.D.3.3] The SPC provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC Strategic Plan goals and objectives. The guiding principles of the Community College Strategic Academic Planning Process, which defines the role of the SPC, are codified in *UHCCP #4.101: Strategic Academic Planning*. The Vice President for Community Colleges has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges. [IV.D.3.4]

Each college develops its own budget request (as described in more detail in Standard III.D.) At the UHCC system level, the seven CC Chancellors, with support from the Associate VPs and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level, but are consolidated at the UHCC system level for purposes of further integration in the overall UH system budget, which is ultimately submitted to the State Legislature.

While State general funds, allocated by the Legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Other sources of internal and extra-mural funds (e.g., Special funds, Revolving funds, grant funds, UH Foundation) may also be generated and retained by each college. The management of sources of funding other than general funds is guided by two UHCC Policies: *UHCCP # 8.000: General Fund and Tuition and Fees Special Fund Allocation*, and *UHCCP # 8.201: Unrestricted Fund Reserve—General, Special, Revolving Funds*. Each College's budget reflects a different combination of revenue sources and expenditures; all campuses maintain the Reserve required by accreditors. [IV.D.3.5] IV.D.3.6] [IV.D.3.7]

Campuses have also had access to additional funds from the OVPCC, and more recently from the Office of the UH President, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives. [IV.D.3.8] Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the OVPCC for other campus or system initiatives, such as those associated with Student Success.

In addition to fiscal resources, the UHCC system has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another, in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC Policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy created a system pool of those positions, from which campuses may request reallocation, based on documented need. [IV.D.3.9]

With reference to effective control of expenditures, recent actions taken between 2013-2016 provide an example of the controls in place to ensure accountability and sound fiscal management, as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit (OIA) conducted operational reviews of the Culinary Arts programs at two community college campuses. The reports identified "operational and financial risks" and presented recommendations relating to the inventory management, financial analysis and reporting and other aspects of these programs. In Spring 2014 OIA conducted follow-up reviews to ensure implementation of recommendations. [IV.D.3.10] The Internal Audit report was on the agenda of the May 12, 2015 meeting of the Board of Regents' Committee on Independent Audit. Subsequent to the December 15, 2016 of that same committee, findings from the Internal Audit report were included in the UH system's

Annual Report on Material Weaknesses and Fraud, presented to the 2017 Legislature. [IV.D.3.11] [IV.D.3.12] [IV.D.3.13] As one outcome of this case, the OVPCC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs. [IV.D.3.14]

### **Analysis and Evaluation**

As part of the University of Hawai`i system, the College meets this Standard.

Allocation of key resources (particularly funding and personnel) is guided by clearly established policies. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that resources are used most effectively to support colleges' missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

### **Standard IV.D.4**

---

*The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.*

---

### **Evidence of Meeting the Standard**

The University of Hawai`i System has a President, a Vice President for Community Colleges (among several Vice Presidents responsible for differentiated areas of UH-System functions), and Chancellors for each of the ten universities or colleges in the system. As noted, the Vice-President for Community Colleges (VPCC) is the CEO of the system of the seven UH community colleges. Each college has a Chancellor, the CEO of the institution. Board of Regents Policy BP 4.207 established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System. [IV.D.4.1] In 2005, the Board of Regents approved the reorganization of the Community College System and created the new Executive position of Vice President for Community Colleges [IV.D.4.2] A subsequent memo to the college Chancellors provided detailed organizational charts as well as a Functional Statement for the Office of the Vice President for Community Colleges (OVPCC.) [IV.D.4.3] Key among the Major Functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of Community College Chancellors for the overall management and governance of their campuses is further affirmed in *Executive Policy 1.102: Authority to Manage and Control the Operations of the Campus*, which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads.” [IV.D.4.4] University of Hawai`i Community Colleges Policy, *UHCCP # 8.000: General Fund and*

*Tuition and Fees Special Fund Allocation*, also specifies the Chancellor’s responsibility “...to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission.” [IV.D.4.5] Responsibility for a broad range of personnel actions has also been delegated to the Chancellors in Executive Policy 9.112 (Attachment B). [IV.D.4.6]

In line with the need for accountability in the fulfillment of their duties, Chancellors (and other Executive-Managerial personnel) are subject to annual performance evaluation, with final assessment by the VPCC. This process is thoroughly codified in *UHCCP #9.202: Executive Employees Performance Evaluation*. [IV.D.4.7] [IV.D.4.8]

## **Analysis and Evaluation**

As part of the University of Hawai`i system, the College meets this Standard.

It is clearly documented in several policy and procedural documents that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC system. The trend of delineation and delegation has generally given more autonomy to the Chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

## **Standard IV.D.5**

---

*District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.*

---

## **Evidence of Meeting the Standard**

The community colleges in the Hawai`i statewide system of public higher education operate within a three-tiered system: the University of Hawai`i (UH) system as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community College system; and the individual community college campuses located on the four major islands in the state. Satellite Learning Centers, providing additional outreach across the state, are managed by the community colleges and UH-Maui College. [IV.D.5.1] A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

As noted, there are multiple structures in place at the UH- and the CC-system level (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive Strategic Plan that provides the conceptual guidance for mid-range planning. These currently include the *UH Strategic Directions 2015-2021*, the *UHCC Strategic Directions 2015-2021* (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan. [IV.D.5.2] [IV.D.5.3] [IV.D.5.4]

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration. [IV.D.5.5] In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in IV.D.3. [IV.D.5.6]

Most recently, on April 20, 2017, the Board of Regents approved the Integrated Academic and Facilities Plan (IAFP) for the University of Hawai`i System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is "...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH system is addressed without undue duplication or inter-campus competition." (p. 2) [IV.D.5.7] The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the CC system) and affirms the further integration of planning in noting that "The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews." (p. 18)

### **Analysis and Evaluation**

As part of the University of Hawai`i system, the College meets this Standard.

The UH System, the UHCC System and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that are used as the basis of evaluating institutional and system effectiveness.

### **Standard IV.D.6**

---

*Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.*

---

### **Evidence of Meeting the Standard**

Multiple modes and avenues of communication exist in the UH system to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the Vice President for Community Colleges (VPCC) and the administrative staff in the Office of the Vice President for Community Colleges (OVPC) are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH President's senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the Board of Regents (BOR) Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for BOR approval (e.g., Strategic Plans, Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of BOR committee and Board meetings,

the VPCC is provided with memos summarizing BOR approved actions. [IV.D.6.1]  
Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through notification from the Policies and Procedures Information System (PPIS). [IV.D.6.2]

The VPCC also meets regularly with three Councils representing different aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Meetings of these Councils are documented, and each Council completes an annual self-assessment. [IV.D.6.3] IV.D.6.4] IV.D.6.5]

The VPCC makes semi-annual visits to each CC campus, with information pertinent to both CC-system and individual campus performance. Typically, Fall semester visits focus on major initiatives and budget for the current academic year as well as campus score-cards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work. [IV.D.6.6]

As noted, the community colleges function within a three-tiered system: The UH system, the UHCC system and the individual community colleges. Communication between the top two tiers (UH system and UHCC system) is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings (e.g., the Councils identified above, or meetings of functional counterparts such as Vice-Chancellors for Academic Affairs) will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. With the goal of improving timely access to information documenting discussion and decision-making at the system level (e.g., agendas and minutes of Councils and other deliberative bodies), specific steps have been taken to address communication-related concerns: 1) as needed, orientation is provided to those serving as campus representatives to system committees so they are more fully aware of their reporting duties; and 2) the OVPCC is engaged in a comprehensive update of its own website to enhance accessibility and currency of the information posted there.

### **Analysis and Evaluation**

As part of the University of Hawai'i system, the College meets this Standard.

Just as the VPCC serves as an important point of connection between the UH System and the CC System (OVPCC), and between the OVPCC and the individual colleges, the Chancellors of the individual colleges are responsible for coordinating with the OVPCC, and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC has recognized the need to maintain access to up-to-date documentation of system-level meetings, and is updating its own website to ensure better access to that information.

### **Standard IV.D.7**

---

*The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.*

---

### **Evidence of Meeting the Standard**

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing, in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to a) set standards of best practices; and b) minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly reviewed [IV.D.7.1], new policies are created when need is recognized (e.g., new UHCC policy on selection process for Chancellors), roles and responsibilities are delineated in the Functional Map, and personnel are regularly evaluated on their performance in supporting and achieving educational goals. [IV.D.7.2]

Of specific importance in this last context is the role of the Community Colleges' Strategic Planning Council (SPC), the primary body for assuring system-wide participation in the UHCC strategic planning process, as codified in *UHCCP #4.101: Strategic Academic Planning*. The policy identifies roles and responsibilities in the process of campus academic planning, which provides much of the critical infrastructure for the effective functioning of the colleges. [IV.D.7.3]

### **Analysis and Evaluation**

As part of the University of Hawai'i system, the College meets this Standard.

Established policies and procedures as well as documentation of governance and decision-making that operationalize those policies and procedures are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

# Quality Focus Essay #1

## I. Native Hawaiian Parity

During the accreditation self-evaluation process, Windward Community College (Windward CC) engaged in reflective and deliberate discussions to identify action projects that support college efforts to improve student learning and student achievement.

After careful deliberation and through sharing with all campus constituencies at public forums and meetings of specific areas, the campus chose topics for the Quality Focus Essay (QFE) that would align with our mission and underscore our values while creating a plan to significantly impact these. The mission of Windward CC is:

‘O keia ka wā kūpono e ho‘onui ai ka ‘ike me ka ho‘omaopopo i kō Hawai‘i mau ho‘oilina waiwai. Aia nō ho‘i ma ke Kulanui Kaiāulu o ke Ko‘olau nā papahana hou o nā ‘ike ‘akeakamai a me nā hana no‘eau. Me ke kuleana ko‘iko‘i e ho‘ohiki ke Kulanui e kāko‘o a e ho‘okumu i ala e hiki kē kōkua i ka ho‘onui ‘ike a nā kānaka maoli. Na mākou nō e ho‘olako, kāko‘o a paipai i nā Ko‘olau a kō O‘ahu a‘e me nā hana no‘eau ākea, ka ho‘ona‘auao ‘oihana a me ka ho‘onui ‘ike ma ke kaiāulu — hō‘a‘ano a e ho‘oulu i nā haumāna i ka po‘okela.

Windward CC offers innovative programs in the arts and sciences and opportunities to gain knowledge and understanding of Hawai‘i and its unique heritage. With a special commitment to support the access and educational needs of Native Hawaiians, we provide O‘ahu’s Ko‘olau region and beyond with liberal arts, career and lifelong learning in a supportive and challenging environment—inspiring students to excellence.

Windward CC’s 5 Core Values are:

- Ka lama kū o ka na‘auao. Creating meaningful curricula and diverse learning experiences.
- ‘A‘ohe hana nui ke alu ‘ia. Working collaboratively and inclusively.
- He punawai kahe wale ke aloha. Serving and supporting with aloha.
- Kulia i ka nu‘u. Striving for excellence.
- He ali‘i ka ‘āina, he kauwa ke kanaka. Caring for Hawai‘i and the planet.

Windward CC’s mission includes a special commitment to serve Native Hawaiian (NH) students. We are proud to be an indigenous serving institution with over 40% of our enrollment comprised of NH students. This mission and commitment is evident in the resources we provide for Native Hawaiians, both institutionally and through attainment of extramural resources. For example, since 2009, the College has annually committed \$51,000 of its institutional funds to support NH initiatives on campus. Ke Kumu Pali (KKP), Windward CC’s NH Council, comprised of faculty and staff, administers these funds. This commitment to serving NH students propelled our decision to focus this QFE on NH parity. A focus on NH parity also resonates with our core values concerning diverse learning experiences, working collaboratively and inclusively, serving and supporting with aloha, and striving for excellence.

This focus on NH parity is evident during annual reporting of program data and within departmental annual reports, wherein faculty and staff engage in a reflective analysis of data such as student enrollment trends, demographics, and success rates to assess the effectiveness of programs or services. Strategic planning at the institutional level involves setting goals and objectives to enhance institutional effectiveness. Programs and services also develop strategic plans, aligned with institutional plans, in order make improvements identified from program review. SLO assessment is another indicator of institutional effectiveness, as it measures student learning at the course, program, or institutional level.

The following QFE sections are based on the ACCJC Guide for Improving Institutions (July 2015). This essay will first discuss the process of selecting the action projects, anticipated outcomes, and alignment with accreditation standards. Then, the action projects will be described, including the project's purpose and goals. Tables identify action steps for each project goal and then detail the action projects' measure of progress, responsible parties, and timeline. Next, resources needed to implement and sustain the action projects are described. Finally, the essay concludes with the plan for assessing the outcomes and effectiveness of the projects.

### **Identification of and Campus Input into Action Projects**

Windward CC began discussion of potential action projects topics in January 2017 at the Accreditation Steering Committee meetings. The Academic Affairs Advisory Committee reviewed topics in February 2017. In May 2017, the Administrative Staff narrowed down the topics in preparation for the June Accreditation Steering Committee meeting. The Student Affairs Division October 2017 quarterly meeting included presentations on potential quality focus essay topics. After careful deliberation and through sharing with all campus constituencies at public forums and meetings of specific areas, the campus chose topics for the QFE that would align with our mission and underscore our values while creating a plan to significantly impact these.

In July 2017, the accreditation liaison officer, vice chancellor for Academic Affairs, vice chancellor for Student Affairs, and the chair of KKP considered specific NH parity parameters for the August 2017 convocation presentation. This group continued to meet throughout the fall semester to draft the plan.

The Windward CC community then participated and provided input into this QFE through an established process of sharing at the spring convocation and posting on the College's discussion board. Input from KKP was solicited and incorporated into the final product. NH parity was examined in the context of enrollment, persistence, graduation, and transfer, which then became action projects. The alignment of these projects to the standards for accreditation are shown Table 1.

**QFE1 Table 1. Action Projects' Anticipated Outcomes and Alignment with Standards**

Action Project/Integrated Action Project*	Alignment with standards
<b>Disaggregation of data by race/ethnicity</b> Systematize the disaggregation of data by race/ethnicity for enrollment, course success, persistence, graduation, and transfer.	IA2, IB5, IB9, IIC5, IIID3
<b>Enrollment</b> Within the institutional enrollment management plan, identify and prioritize strategies at the institution which positively impact NH enrollment parity across the institution and within degrees/certificates.	IB9, IIC3, IIC6, IIID1,
<i>Persistence*</i> Identify and prioritize strategies at the institution which positively impact NH persistence.	IA3, IB9, IIC1, IIID1, IVB3,
<b>Completion</b> Identify and prioritize strategies at the institution which positively impact NH graduation and transfer	IA3, IB3, IB9, IIA1, IIA10, IIC1, IIC5, IIC6, IIID1, IIID2, IVB3

\*The action plan for persistence is integrated within the disaggregation of data by race/ethnicity and enrollment plans.

## II. Action Projects

### A. Action Project: Disaggregation of Data by Race/Ethnicity

#### *Description*

The College will systematize the disaggregation of data by race/ethnicity for enrollment, course success, persistence, graduation, and transfer.

#### *Purpose*

In order to consider NH parity, the College must have accurate data on key measures which is disaggregated by race/ethnicity. While disaggregated data has been used at the College for many years, not all measures have been disaggregated and often this disaggregation is not unduplicated. For example, most institutional data is provided for categories of “NH” and “all.” However, “all” includes Native Hawaiians. As Native Hawaiians are a large percentage of learners at Windward CC, this skews the “all” to be closer to “NH” attainment of a measure (see Appendix 1. Analysis of Graduation Rate Data). Thus, to have accurate discussion of NH parity, data must distinguish between NH and all other learners.

Annual Reports of Program Data (ARPD) for degree programs provide numbers specific to NH for enrollment and graduation, from which one can create comparison disaggregated data. Individual writers and evaluators may or may not choose to make these comparisons. No disaggregation is provided for persistence and course success measures, which are measures of progress toward degree. Distance Education measures are also not disaggregated

for NH vs. others. The Student Affairs ARPD does contain information of NH fall to spring persistence, but does not disaggregate this data, utilizing the categories of all students and NH students, which is duplicative. For effective and mission-driven program analysis, disaggregation of these metrics must occur.

Windward CC's mission specifically emphasizes our commitment to Native Hawaiians, which propels specific goals for NH learners and for parity between learners. Institutional funding is allocated through our Planning and Budget Committee (PBC), which prioritizes funding based on ties to UH Strategic Directions 2015-2021, Windward CC Strategic Plan Action Outcomes, program learning outcomes, general education learning outcomes, student learning outcomes, process outcomes and health and safety. This action project will enhance our planning and budgeting review processes, basing them on accurate data which demonstrates best where parity has been achieved and where greatest needs are. It also leads to better evaluation of which initiatives and activities have promoted parity, allowing them to be prioritized for funding.

### *Goals*

1. Provide valid, consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis.
2. Improve quality of dialogue on parity measures.
3. Improve quality of decision-making and allocation of resources to promote parity.

## **B. Action Project: Enrollment**

### *Description*

Within the institutional enrollment management plan, the College will identify and prioritize strategies at the institution which positively impact NH enrollment parity across the institution and within degrees/certificates.

### *Purpose*

In order to consider NH parity, fulfill the Hawai'i Papa o Ke Ao benchmarks, and stay true to the institutional mission, Windward CC must strive to establish and/or maintain enrollment parity of NH students in the annual headcount as well as within the different academic programs. These efforts must be specific, meaningful, and thoughtful.

The percentage of Native Hawaiians enrolled at Windward CC has increased and reached parity with our community demographics. According to the last U.S. Census, the NH population in Kāne'ōhe, Hawai'i is 42%. This is comparable to our percentage of NH students (Appendix 2, Table 1), which has increased and remained at about population parity since 2010.

Two degree programs, the Associate of Arts Hawaiian Studies and the Associate of Arts Liberal Arts show enrollment well above population parity (Appendix 2, Table 2). However, our STEM and CTE programs (i.e. Associate of Science in Natural Science, Certificate of

Achievement in Agripharmatech, and Associate of Science in Veterinary Technology) are below parity. This has motivated Windward CC to pursue National Science Foundation sponsored projects in engineering (Indigenous Knowledge in Engineering II 2016-2019 \$494,922) and environmental science (Hālau Ola Honua 2016-2021 \$822,523).

Creation of a robust enrollment management plan will guide institutional efforts to achieve NH parity across the College in all areas. Enrollment management efforts at the UH System and UHCC level focus on the Hawai'i Graduation Initiative and the 13th Year Initiative (implemented as Paipai O Ko'olau Project at Windward CC). Target populations from the system include high school graduates, GED recipients, working adults, Pacific Islanders, and International students. While strategies and tactics have been identified and implemented for these student groups, a Windward CC plan will merge these ideas with focused attention on NH students so that enrollment mirrors population.

### *Goals*

- 1) Establish a systematic, evidence-based enrollment management plan for overall enrollment.
- 2) Delineate within the overall plan specific goals, actions, and activities for individual certificate and degree programs.
- 3) Allocate resources to strategies which positively impact NH enrollment.
- 4) Maintain overall enrollment at parity with population.
- 5) Attain parity with population for each individual degree program.

### **C. Integrated Action Project: Persistence**

#### *Description*

Based on accurate, disaggregated data, the College will identify and prioritize strategies at the institution which positively impact NH persistence, which positively impacts enrollment.

#### *Integrated Purpose*

When considering NH persistence, targeted strategies and funding to support such strategies must be identified and prioritized in order to positively impact NH persistence. At Windward CC, student persistence rates from fall to spring for NH students are slightly higher than the persistence rates for all students (Appendix 3, Table 1). It must be noted that the persistence rate only considers retention from the first to second semester. Fall to Fall persistence rates should also be considered to better understand the progression from enrollment to graduation/transfer. This disaggregation is integrated into the Action Project: Disaggregation of Data by Race/Ethnicity.

Improved, disaggregated data related to persistence allows for analysis to discover historical and current disparities in persistence. Strategies to impact disparities can then be identified and prioritized to eliminate these disparities and promote persistence for NH students. As continuing students are the majority of enrolled students, increasing persistence increases

enrollment. Goals for improving persistence are inherently part of goals for improving enrollment. Therefore, goals for planning, implementation, and assessment of persistence will be integrated into those of Action Project: Enrollment.

### *Integrated Goals*

The goals for persistence are integrated into the goals for data disaggregation and enrollment. These relevant action steps needed to achieve these integrated goals are also integrated in the action steps for these action projects. How the goals are integrated in other action project goals is delineated below:

#### **Action Project: Disaggregation of Data by Race/Ethnicity**

**Goal 1:** Provide valid, consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis.

**Integrated Persistence goal:** Disaggregate NH Fall to Fall persistence.

#### **Action Project: Enrollment**

**Goal 1:** Establish a systematic, evidence-based enrollment management plan for overall enrollment.

**Integrated Persistence Goal:** Establish a systematic, evidence-based enrollment management plan which considers persistence.

**Goal 3:** Allocate resources to strategies which positively impact NH enrollment.

**Integrated Persistence Goal:** Allocate resources to strategies which positively impact NH persistence.

**Goal 4:** Maintain overall enrollment at parity with population.

**Integrated Persistence Goal:** Maintain parity with population for persistence.

#### **D. Action Project: Completion**

##### *Description*

The College will identify and prioritize strategies at the institution which positively impact NH completion (graduation and transfer).

##### *Purpose*

When considering overall attainments of degrees and certificates, NH students are earning degrees and certificates at a percentage rate similar to their enrollment rate (Appendix 4, Table 1). However, this is not true for all individual degree programs. For example, NH attainment of STEM degrees and certificates is below enrollment (Appendix 4, Table 2). This motivated Windward CC to join a UH Community College consortium National Science

Foundation grant project to grow NH engineers. It further propelled Windward CC to write as the lead college for a consortium project with UH Mānoa and 2 other community colleges to develop an environmental science pathway from associate to baccalaureate degree.

As noted in the section on data disaggregation, ARPDs for degree programs provide numbers specific to NH for enrollment and graduation, from which one can create comparison disaggregated data but do not provide the comparison itself. Our action project to create disaggregated graduation data will make this comparison more salient. Based on this improved data for graduation as well as Fall to Spring and Fall to Fall persistence, we can better determine where implementation of initiatives to increase NH graduation is necessary. These can then drive budgeting decisions to support such initiatives.

Currently, NH students are transferring to UH 4-year campuses at rates equal to or well above population parity (Appendix 5). In order to assure that transfer remains at or above parity while incorporating strategies to increase persistence and graduation, it is recommended that this measure also be considered as an action project although currently parity exists.

**Goals**

- 1) Implement strategies to promote NH graduation and transfer.
- 2) Allocate resources to strategies which positively impact NH graduation and transfer.
- 3) Overall graduation rates at or above parity with population.
- 4) Graduation rates within specific degrees at or above parity with population.
- 5) Transfer rates at or above parity with population.

**III. Action Plans to Attain Action Project Goals**

Action plans to implement the action projects and attain goals are provided in the below tables, which designate responsible parties and provide measurable deliverables and timelines.

**QFE1 Table 2: Action Plan: Disaggregation of data by race/ethnicity**

<b>GOAL 1: Provide valid, consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Meet with Institutional Research Office (IRO) to form data plan to disaggregate by race/ethnicity	Creation of "Institutional Research Request Form"	IRO QFE writers	July 2018	Request created

Create report of data disaggregated by race/ethnicity, include NH Fall to Fall persistence	Creation of Data Report	IRO	August 2018	Report created by IRO
Disseminate report via email to leadership groups (i.e. KKP, Faculty Senate, Staff Senate, Associated Students of UH, Administrative Team)	Report emailed  Report reviewed and discussed by groups during business meetings as documented by agenda and meeting minutes	IRO	September 2018	Email  Minutes of leadership bodies  Revised IRO request based on input
Hold online and in person forums to discuss data report and receive input as to any needed revisions	Report is posted on College online forum with ample time for review by campus constituency  Fac/Staff Email invitation to forum  Student Email invitation to forum  One (1) in-person forum is scheduled and held	KKP Faculty Senate Staff Senate ASUH Admin Team	January 2019	Email invitations to forum  Online Discussion comments  Forum notes Revised IRO request based on input

**GOAL 2: Improve quality of dialogue on parity measures**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
Provide data report annually to KKP to create Annual Report and Action Planning for NH Students	Data report sent in September with Department Reports  KKP annual report submitted in December	IRO	September 2019, annually thereafter	KKP annual report submitted to PBC
Provide data report to EMG	Data report sent  EMG utilizes data in decision-making	IRO	September 2019, annually thereafter	EMG meeting minutes

**GOAL 3: Improve quality of decision-making and allocation of resources to promote parity**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
KKP presents resource request(s) in context of annual report at PBC	Report posted on PBC website  Resource requests posted on PBC website	KKP PBC	February 2020, annually thereafter	PBC Minutes
PBC decision-making utilizes	Resources ranked by PBC	PBC	Spring	PBC ranking

KKP reporting	include KKP items	Chancellor	2020, annually thereafter	
Institutional funds distributed based on informed decision-making	Chancellor allocation of resources	Chancellor	Fall 2121, annually thereafter	PBC minutes

### QFE1 Table 3. Action Plan: Enrollment

<b>GOAL 1: Establish a systematic, evidence-based enrollment management plan for overall enrollment</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Form cross-institutional EMG	Charge from Chancellor	Admin	September 2018	Email Meeting agenda and minutes
Review UH and UHCC enrollment management plans and WCC draft document	Reports are reviewed and discussed by groups during business meetings as documented by agenda and meeting minutes	EMG	October 2018	EMG meeting minutes
Review draft NH data report created by IRO via Action Project 1	Report reviewed	EMG	Fall 2018	EMG meeting minutes
Identify and prioritize strategies which positively impact NH enrollment and persistence parity <u>across the institution</u>	Discussion of strategies at joint Enrollment Management-KKP meeting	EMG KKP	Fall 2018	EMG-KKP joint meeting minutes
Revise WCC Draft Enrollment Management plan	Revised plan creation	EMG	Spring 2019	Draft document for campus review
Submit plan for campus approval via regular campus approval process (i.e. discussion board, Faculty Senate review etc.	Campus approval process steps taken	EMG	Late Spring 2019	Online discussion comments  Fully approved plan
<b>GOAL 2: Delineate within the overall plan specific goals, actions, and activities for individual certificate and degree programs.</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Identify and prioritize strategies which positively impact NH	Meetings with each degree coordinator and	EMG	Fall 2019	Reports from meeting back to

enrollment parity <u>within</u> <u>degrees/certificates</u>	relevant disciplines with one member of EMG and one member of KKP to guide	KKP Disciplines		EMG in meeting minutes
Creation of degree/certificate specific sub-plans in Enrollment Management Plan	Incorporation of degree sub-plans into Enrollment Management Plan	EMG KKP Disciplines	Spring 2020	EMG meeting minutes  Revised Enrollment Management Plan

**GOAL 3: Allocate resources which positively impact NH enrollment.**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
Share identified strategies to improve enrollment and persistence with leadership groups to address in their annual reports and PBC requests.	Identified strategies delineated clearly and provided as overview to leadership groups	EMG	AY 19-20	Enrollment Management Report  PBC Requests
Share identified strategies with PBC to support informed decision-making.	Identified strategies delineated clearly and provided as overview to PBC	EMG	AY 19-20	Email to Chancellor for PBC dissemination  PBC receipt of strategies

**GOAL 4: Maintain overall enrollment at parity with population**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
Implement Enrollment Management Plan as developed	Identified strategies prioritized by appropriate groups	EMG Student Affairs Academic Affairs Marketing Faculty Senate Staff Senate KKP	AY 19-20, annually thereafter	EMG meeting minutes
Assess impact on enrollment, including that of continuing (persisting) students	EMG reviews NH Parity Data report	EMG IRO	Fall 2020, annually thereafter	EMG meeting minutes
Review and revise plan based on assessment	EMG revises plan as needed	EMG	Fall 2020, bi-annually thereafter	EMG meeting minutes

Disseminate revised plans	Plan provided via email to leadership groups, departments, and campus (via website)	EMG	Spring 2020, bi-annually thereafter	Emails Website posting
<b>GOAL 5: Attain parity with population for each individual degree program</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Implement Enrollment Management degree/certificate sub-plans as developed	Identified strategies prioritized by appropriate groups	EMG Student Affairs Academic Affairs Marketing Faculty Senate Staff Senate KKP	AY 20-21, annually thereafter	EMG meeting minutes
Assess impact on enrollment	EMG reviews NH Parity Data report	EMG IRO	Fall 2021, biannually thereafter	EMG meeting minutes
Review and revise sub-plan based on assessment	EMG revises plan as needed	EMG	Fall 2021, bi-annually thereafter	EMG meeting minutes
Disseminate revised plans	Plan provided via email to leadership groups, departments, and campus (via website)	EMG	Spring 2021, bi-annually thereafter	Emails Website posting

#### QFE1 Table 4. Action Plan: Completion

<b>GOAL 1: Implement strategies to promote NH graduation and transfer</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Review disaggregated data for NH graduation and transfer	Reports are reviewed and discussed by groups during business meetings as documented by agenda and meeting minutes	KKP Hökūpa'a	September 2018	Group meeting minutes
Identify and prioritize strategies which positively impact NH graduation	Research of best practices Meetings with each leadership group and division	KKP Hökūpa'a	October 2018	Group meeting minutes Documentation of strategies

Identify and prioritize strategies which positively impact NH transfer	Research of best practices Meetings with each leadership group and division	KKP Hökūpa'a	October 2018	Group meeting minutes Documentation of strategies
Share identified strategies with EMG to include in subplan for completion	Identified strategies included in Enrollment Management subplan	KKP Hökūpa'a EMG	November to December 2018	Enrollment Management plan subplan for completion
Implement identified strategies	Identified strategies prioritized by appropriate groups	Student Affairs Academic Affairs Marketing Faculty Senate Staff Senate KKP Hökūpa'a	AY 19-20, annually thereafter	Group meeting minutes

**GOAL 2: Allocate resources to strategies which positively impact NH graduation and transfer**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
Share identified strategies with leadership groups to address in their annual reports and PBC requests.	Identified strategies delineated clearly and provided as overview to leadership groups	KKP Hökūpa'a EMG	November 2018	KKP Annual Report PBC requests
Share identified strategies with PBC to support informed decision-making.	Identified strategies delineated clearly and provided as overview to PBC	KKP Hökūpa'a EMG	February 2019	Presentation of strategies at PBC by KKP  Receipt of PBC requests

**GOAL 3: Overall graduation rates at or above parity with population**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
Assess impact on graduation	Leadership groups reviews NH graduation and transfer data	Admin KKP Hökūpa'a IRO	Fall 2021, biannually thereafter	Group meeting minutes
Review and revise sub-plan based on assessment	EMG revises plan as needed	EMG	Fall 2021, bi-annually thereafter	EMG meeting minutes

**GOAL 4: Graduation rates within specific degrees at or above parity with population**

Action Steps	Measures of Progress	Responsible	Timeline	Assessment
--------------	----------------------	-------------	----------	------------

Asses impact on graduation rates within specific degrees	Leadership groups review degree specific NH graduation data	Admin KKP Hökūpa‘a IRO	Fall 2021, biannually thereafter	Group meeting minutes
Review and revise sub-plan based on assessment	EMG revises plan as needed	EMG	Fall 2021, bi-annually thereafter	EMG meeting minutes
<b>GOAL 5: Transfer rates at or above parity with population</b>				
<b>Action Steps</b>	<b>Measures of Progress</b>	<b>Responsible</b>	<b>Timeline</b>	<b>Assessment</b>
Assess impact on transfer rates	Leadership groups review NH transfer data	Admin KKP Hökūpa‘a IRO	Fall 2021, biannually thereafter	Group meeting minutes
Review and revise sub-plan based on assessment	EMG revises plan as needed	EMG	Fall 2021, bi-annually thereafter	EMG meeting minutes

#### **IV. Resources Needed**

The majority of potential cost generating measures in this proposal are dependent on the strategies prioritized to increase parity. Thus, these will be determined during the project and funded through the campus resource allocation processes currently in place (i.e. Planning & Budget Council).

For successful implementation, committees and leadership groups must be in place and meet regularly with time given to this project. KKP and Hökūpa‘a must meet regularly and devote time to this project, as must degree coordinators and Administrators. IRO must prioritize providing data and planning for regular data sharing. Marketing is key in ensuring wider and more accessible dissemination. An Enrollment Management Group (EMG) must be created at Windward CC, empowered to create change, and meet regularly. Thus, the majority of resources will come in the form of devotion of time and thought by existing campus entities and formation of a new entity utilizing existing personnel.

#### **V. Assessment of QFE Implementation**

Each action plan within the QFE has iterative action steps for implementation, evaluation, revision and implementation of revised strategies, which are discussed within the above (Tables 2-4). The implementation of these action steps should cumulate in increasing devotion of resources to parity and, ultimately, increased parity. This increased parity would be evidenced through the NH Parity Data report which KKP will receive and analyze each year. KKP’s assessment will be shared with the campus through regular annual report processes and procedures via the PBC. This will result in iterative evaluations, suggestions for improvements, revisions, implementations and further evaluation.

## Appendix 1. Analysis of Graduation Rate Data by Race & Ethnicity

QFE1 Chart 1. Graduation Rates of Native Hawaiians vs. All graduates

**QFE1 Chart 2. Student Right to Know Data: (Graduation Rates) Data disaggregated**

For graduation rates, NH reached parity with the 2011 cohort and since then has been slightly below overall graduation rates (Table 1). The disparities in the last 2 cohorts for which we have data (2012, 2013) are smaller than that in 2010. However, when this graduation data is disaggregated by individual race, disparities are much more evident (Table 2). While NH graduation rate is lower (12%) than all students (16%), it is significantly lower than that of Asian students (24%) and white students (23%). Students reporting 2 or more races graduated at the overall rate. This disparity underscores both a need to focus on promoting NH graduation and also a need to disaggregate all data by individual race, not just NH vs. All. That is, as NH students are included with “all students” are a high percentage (40%) of the “all students category,” this skews the data for the category of “all.”

## Appendix 2. NH enrollment data

## Quality Focus Essay #2

### Distance Education Parity

#### The Problem

Students receiving distance education at Windward CC *do not achieve academic parity* with those receiving face-to-face education at Windward CC.

#### The Goal

Students receiving distance education at Windward CC *will achieve academic parity* with those receiving face-to-face education at Windward CC.

#### *Need for a Systematic Approach to Distance Education*

Windward Community College has been committed to offering distance education courses since 2006 in response to our students' need for flexible schedules and to increase access for students living in rural communities. Our approach to scheduling online courses has primarily been ad hoc and solely based on faculty interest. In 2016, the College launched its first online Degree or Certificate program in Veterinary Assisting, largely to serve students on the neighbor islands. This ad hoc approach to online course offerings, while less than ideal to meet the growing demand from students, has nevertheless served to stabilize the College's enrollment numbers during a time when other UH campuses have experienced steady declines.

Recent data (AY 2017-18) indicates that 21% of our course offerings were completely online and that approximately 28% of Windward CC students SSH (Student Semester Hours) is derived from our online courses. With over a quarter of tuition dollars being generated from a fifth of our total course offerings, this is a strong indicator of high student demand for online courses. Notably, 50% of all students are taking at least one online course. This indicates the high demand for online courses among both traditional and non-traditional students. In AY 2017-18, Windward CC's student population consisted of 28% who were "home based elsewhere," larger than any other UHCC campus. Of those students, 81% were enrolled in at least one online course, indicating that our online courses are attracting a considerable number of students from other campuses in the UH system and beyond.

While the leaders at the College have recognized the need for distance education to fulfill the College's mission, our ad hoc decision-making approach lacks intentional planning to sustain growth and maintain quality. This Quality Focus Essay (QFE) provides a roadmap to grow and improve distance education in 3 major areas:

- 1) Provide faculty who teach online with expert training and support. Our limited course selections have not kept pace with the increased student demand. This is partly due to a hesitancy by faculty to teach online courses because they are unfamiliar with distance education pedagogy.

- 2) Provide equivalent support services to online and face-to-face students. Our distance education students lag behind the face-to-face students in success measures (completion, success, withdrawal rates) in part because online student support services have been less effective.
- 3) Align institutional and programmatic practices for online instruction. Our relatively rapid growth in distance education enrollment coincides with a steady decline in face-to-face enrollment, however, our institutional policies and procedures have not kept pace with this shifting paradigm.

With greater scrutiny for quality in distance education coming from the College, UH System level and national level, our ad hoc decision-making approach to distance learning is no longer tenable. To meet growing student demand for online courses while maintaining a quality educational experience, the College needs to provide targeted professional development to faculty and improved online support services to students. Additionally, institutional practices will need to be adjusted to shift from ad hoc decision making to intentional planning.

**QFE 2 Table 1: Action Plan Strategies and Alignment with Standards**

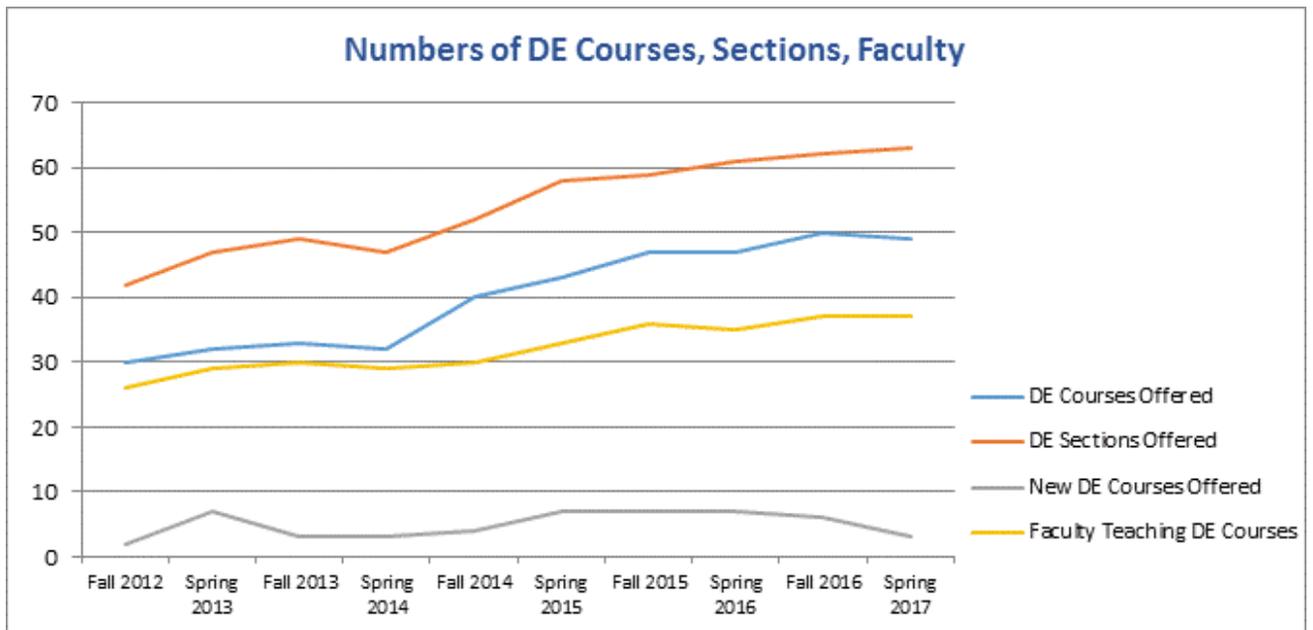

Strategies	Objectives	Alignment with standards
Provide faculty who teach online with expert training and support	Ensure adequate staffing to provide training and support to faculty who deliver distance instruction Ensure adequate facilities to provide training and support to faculty who deliver distance instruction Provide timely training and assistance to faculty who deliver distance education Foster peer support and mentoring among faculty and staff who deliver and assist with distance education Provide faculty with instructional technologies that best support effective instruction	IB1, IIA2, IIA7, IIIA2, IIIA8, IIIA14, IIIC1, IIIC4, IIIC5, IVA4, IVB3
Provide equivalent support services to online and face-to-face students	Institutionalize and centralize tutoring services for all students regardless of course format or location Extend and enhance student support services for distance learners	IB6, IIA7, IIB1, IIC1, IIC3, IIC5, IVB3
Align institutional and programmatic practices for online instruction	Provide sufficient distance education courses to allow timely completion of degrees Ensure that the assessment of distance education courses is adequate and equivalent to face-to-face course evaluation	IB4, IIA1, IIA6, IVA3, IVA4, IVB3

**QFE 2 Chart 1: Comparison of DE course offerings**

## Provide faculty who teach online with expert training and support

To date, the growth of distance education enrollment has been in large part due to increasing the number of sections of the same courses taught by faculty who are currently teaching online. To meet student demand, we need to offer a variety of courses that will lead them to degree completion. To do that it is essential that we attract additional faculty to online teaching.

The key to attracting more faculty to distance education is a robust and engaging professional development experience for them. Windward CC has a limited number of faculty who have many competing demands on their time. In addition to the focused and regularly scheduled professional development workshops on technology and quality course design, a more promising model would be for faculty to mentor each other. Thus, developing a distance education learning community (Distance Education Hui or group) that creates a cohort of tech savvy, pedagogically sound, experienced DE instructors willing to share and mentor other interested faculty will be an important element of a restructured professional development program. To complement the DE workshops and DE Hui, personal one on one sessions with instructional support staff in a multimedia laboratory would provide additional training of a more technological nature.

### QFE 2 Table3: Success Measure Comparison between DE and F2F Courses 2012-2017

Course Completion Rates (CRates)	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
DE Courses	89.0%	91.3%	90.4%	89.2%	87.8%
Face to Face Courses	92.5%	93.8%	93.4%	92.8%	92.6%

*Course Completion Rates: The percent of students who completed a course. Excludes students who earned a W, Credit by Exam (CE), No Credit by Exam (NCE), and Audit (L).*

Successful Completion Rates (SRates)	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
DE Courses	58.7%	62.4%	64.7%	65.6%	65.4%
Face to Face Courses	71.5%	72.4%	72.4%	73.1%	74.6%

*Successful Completion Rates: The percent of students who earned an A, B, C, CR, P. Excludes students who earned Credit by Exam (CE), No Credit by Exam (NCE), Audit (L), and RD (Record Delayed).*

Withdrawal Rates (WRates)	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
DE Courses	11.0%	8.7%	9.6%	10.8%	12.2%
Face to Face Courses	7.5%	6.2%	6.6%	7.2%	7.4%

*Withdrawal Rates: The percent of students who earned a W. Excludes students who earned Credit by Exam (CE), No Credit by Exam (NCE), and Audit (L).*

## Provide equivalent support services to online and face-to-face students

The disparity in student success rates between online and face to face courses could be explained by a couple of key factors: the Learning Management System (LMS) and student support services. There is compelling circumstantial evidence that the rising withdrawal rates and falling completion rates reflect, in part, student frustration with an aging and inadequate online Learning Management System (LMS) called Laulima. In Fall 2016, in response to student complaints and concerns about the existing LMS accessibility standards, it was decided to run an informal pilot of the Canvas LMS with 10 classes. While most of these were previously undeveloped courses, 2 classes were converted from Laulima to Canvas in order to address issues in course delivery that were highly problematic in Laulima. The impact on the student success rate was dramatic, with one course, Japanese 101, jumping from a success rate of 54.5% in Spring 2016 in Laulima to 80.6% in Spring 2017 in Canvas. It was the same content taught by the same instructor, so the only difference was the use of a newer and more stable LMS that could handle the extensive use of interactive videos required in this course. Not as dramatic, but still notable was the Astronomy 110 course, that was converted from Laulima to Canvas in order to address the instability of the interactive simulation software used in a portion of the course. The success rate improved from 40.0% in Spring 2016 on Laulima to 58.3% in Spring 2017 on Canvas. Again, the only significant difference was the LMS platform's ability to deliver the interactive content to the students more reliably and with better accessibility features. This data strongly suggests issues with the current LMS which has prompted the College to further evaluate the need for a new LMS by planning a formal pilot in Fall 2018 with 30 courses in Canvas.

The lower success rates for students in online classes could also be a reflection of limited online student support services. Currently, traditional face to face students have a variety of services available to them, including in-person tutoring, small group supplemental instruction sessions, counseling, test proctoring and access to library services. In a 2015 survey, online students were asked how attractive the following services were for their online courses. Their responses below, which indicate combined percentages for "fairly important" and "very important," confirms the need to provide similar student support services to online students.

### QFE 2 Table 4: Online Students' Survey Results (2015)

86%	Getting feedback from my instructor within 24 hours.
86%	Access to online supplemental course materials such as tutorials.
85%	Being able to get answers to technical questions within 24 hours.
84%	Access to online library services.
83%	Getting regular status updates on course performance.
73%	Access to online supplemental instruction in real time.
70%	Access to online laboratories or simulations.
69%	Access to online test proctoring services.
64%	Access to 24 hour tutoring services. (24% neutral)
57%	Getting online degree counseling or career counseling. (26% neutral)
54%	Being able to meet with my instructor online in real time. (27% neutral)
54%	Being able to meet with counselors online in real time. (28% neutral)
46%	Online disabilities counseling and accommodations. (28% neutral)

While there are challenges to achieving parity for online students, much can be achieved by providing online students with access to resources and disseminating that information to students through an online orientation or student guidance program.

### **Align institutional and programmatic practices for online instruction**

In conjunction with professional development there needs to be clear guidelines on how to develop, design, assess and approve distance education courses. The College has a Distance Education Committee that has started to develop a faculty handbook, a peer evaluation form, and a course design process. The DE Committee will be tasked with completing an assessment of current practices related to online course approvals, making recommendations for changes, and assisting in the development of an approval process for online courses. In order to solicit feedback and share information with colleagues this committee should have a permanent member on the Faculty Senate Curriculum Committee and/or Faculty Senate.

### **Action Plan for Distance Education**

The ultimate goal for this QFE is the adoption of a systematic approach to DE at the College. Moving from ad hoc decision making to intentional planning should improve student success measures and close the gap between online and face-to-face students. To accomplish this, we will utilize following objectives to reach our goal.

Objectives for Strategy One: Provide faculty who teach online with expert training and support:

- Ensure adequate staffing to provide training and support to faculty who deliver distance instruction.
- Ensure adequate facilities to provide training and support to faculty who deliver distance instruction.
- Provide timely training and assistance to faculty who deliver distance education.
- Foster peer support and mentoring among faculty and staff who deliver and assist with distance education.
- Provide faculty with instructional technologies that best support effective instruction.

Objectives for Strategy Two: Provide equivalent support services to online and face-to-face students:

- Institutionalize and centralize tutoring services for all students regardless of course format or location.
- Extend and enhance student support services for distance learners.

Objective for Strategy Three: Align institutional and programmatic practices for online instruction:

- Provide sufficient distance education courses to allow timely completion of degrees.
- Ensure that the assessment of distance education courses is adequate and equivalent to face-to-face course evaluation.

## Windward CC's Action Plan for Distance Education

The Problem: Students receiving distance education at Windward CC do not achieve academic parity with those receiving face-to-face education at Windward CC.

The Goal: Students receiving distance education at Windward CC will achieve academic parity with those receiving face-to-face education at Windward CC.

### QFE 2 Table 5: Strategies

<b>Strategy One: Provide faculty who teach online with expert training and support</b>				
<b>Objectives</b>	<b>Actions</b>	<b>Responsible Parties</b>	<b>Timeline</b>	<b>Measures of Success</b>
Ensure adequate staffing to provide training and support to faculty who deliver distance instruction	Request a position for a new Multimedia Studio Technician Request a position for a new Educational Communications & Technology Developer Request a position for a new Video Studio Manager / Technician Request a position for new Technology Graduate Assistants for Canvas	Media Technology Services Staff	AY 2018-2019, request annually until funded	DE faculty will report satisfaction with availability of personnel to provide training DE faculty will report satisfaction with availability of personnel to provide support Requests for support will be resolved in a timely fashion
Ensure adequate facilities to provide training and support to faculty who deliver distance instruction	Submit funding request for equipment and furniture to modify Laakea 110 for use as a faculty training center and multimedia laboratory Equip, furnish, staff, and utilize the faculty training center and multimedia laboratory	WCC Instructional Development Staff	AY 2018-2019, request annually until funded	DE faculty who receive training and support will report satisfaction with the facilities Instructional Development staff who provide training and support will report satisfaction with the facilities
Provide timely training and assistance to faculty who deliver distance education	Offer monthly workshops on DE topics (i.e. online learners and online pedagogy, course redesign, technology tools, ADA compliance, etc.) Provide staff to monitor a virtual help desk for faculty and students	WCC Instructional Development Staff, UHCC Instructional Development Task Force	start in AY 2018-2019, continuous thereafter	DE faculty will report satisfaction with the availability of training for their DE courses DE faculty will report satisfaction with the quality of training they receive DE faculty will report satisfaction with the timeliness of assistance with their DE courses DE faculty will report satisfaction with the quality of assistance with their DE courses

Foster peer support and mentoring among faculty and staff who deliver and assist with distance education	Revive the Distance Education Hui (or group) for DE faculty and staff Schedule regular DEH meetings (F2F and virtual) Provide an online discussion board for DE faculty and staff Provide logistical facilitation for peer-evaluations and mentoring of DE faculty	WCC Instructional Development Staff	start in AY 2018-2019, continuous thereafter	DE faculty will report feeling supported by their peers Faculty who teach online for the first time will receive a peer evaluation that semester
Provide faculty with instructional technologies that best support effective instruction	Complete and assess WCC's Canvas LMS pilot Advocate for the University of Hawai'i to complete its LMS Review project Seek funding for Canvas LMS licenses for DE courses that cannot be delivered effectively in Lulima LMS	WCC Instructional Development Staff, UHCC Instructional Development Task Force	Pilot in AY 2018-2019, LMS decision and funding in AY 2019-2020	Faculty report satisfaction with the Learning Management System they use for their courses Faculty will report satisfaction with the educational technologies or digital learning objects they use for their courses
<b>Strategy Two: Provide equivalent support services to online and face-to-face students</b>				
<b>Objectives</b>	<b>Actions</b>	<b>Responsible Parties</b>	<b>Timeline</b>	<b>Measures of Success</b>
Institutionalize and centralize tutoring services for all students regardless of course format or location	Request a new position and funding to hire a permanent Ka Piko Coordinator to provide centralized oversight, training, scheduling, assessment, budgeting, and logistical support for tutoring service for all students Implement a standing budget allocation to provide staffing for all internally-funded tutoring programs	Dean of Academic Support	AY 2017-2018, request annually until funded	Students will report satisfaction with the availability of tutoring services Students will report satisfaction with the timeliness of tutoring they received Students will report satisfaction with the quality of tutoring they received Highly-effective grant-funded tutoring programs will become institutionalized within 2 years of grant termination
Extend and enhance student support services for distance learners	Implement a mandatory orientation for first-time DE enrollees to include a readiness diagnostic linked with preparatory interventions such as tutorials and academic coaching Extend Student Success interventions (i.e. Supplemental Instruction, Peer Tutoring, Peer Coaching, FYE, Early Alert interventions, etc.) to online students Extend library services for DE	Distance Education Committee,  Student Support Staff,  Librarians	AY 2020-2021	DE students will report having realistic expectations at the beginning of their DE course DE students will report receiving support with their DE course when they needed it DE students who received support for their DE course will report satisfaction with the support

	students and faculty (i.e. Digital Reserves, remote delivery, video or chat reference, and copyright compliance) Request a new position and funding for a Distance Education / Digital Resources Librarian			
<b>Strategy Three: Align institutional and programmatic practices for online instruction</b>				
<b>Objectives</b>	<b>Actions</b>	<b>Responsible Parties</b>	<b>Timeline</b>	<b>Measures of Success</b>
Provide sufficient distance education courses to allow timely completion of degrees	Conduct a gap analysis to identify courses lacking DE offerings to complete degrees Recruit faculty to teach DE courses Establish a master schedule of online course offerings Publish the master schedule of online courses in the College Catalog Market programmatically-required, historically low-enrolled courses widely	Instructional Development Staff,  Academic Affairs Office,  Marketing Staff	Gap Analysis AY 2017-2018, Start recruiting faculty AY 2018-2019 Master Schedule & Marketing AY 2019-2020	Online course offerings are sufficient for students to earn an AA in Liberal Arts, AA in Hawaiian Studies, or ASNS degrees at WCC within three years Students will report satisfaction with the availability of DE courses needed for their program of study
Ensure that the assessment of distance education courses is adequate and equivalent to face-to-face course evaluation	Assess current practices of DE course evaluations and make recommendations for improvement Implement changes to assessment and evaluation instruments, procedures, and policies, as necessary	Distance Education Committee (Peer Evaluation)  Course Evaluation Committee (Student Evaluation),  Academic Affairs Office (Assessment)	AY 2018-2019	Peer evaluations adequately assesses online instruction Student evaluations are completed at the same rate for DE and F2F courses Course-level assessments are completed for DE and F2F courses at the same frequency

# Academic Program Proposal Process

Donald O. Straney, Vice President for Academic Planning and Policy  
Academic and Student Affairs Committee  
May 18, 2018

# Current Program Proposal Process

UNIVERSITY of HAWAII  
**KAUA'I**  
COMMUNITY COLLEGE

UNIVERSITY OF HAWAII  
BOARD OF REGENTS

18 MAY 10 P6:02

RECEIVED

March 22, 2018

**MEMORANDUM**

'18 MAY 10 P5:13

**TO:** Jan Naoe Sullivan  
Chair, Board of Regents

UNIVERSITY OF HAWAII  
PRESIDENT'S OFFICE

**VIA:** David Lassner  
President

**VIA:** Donald O. Straney  
Vice President for Academic Planning and Policy

**VIA:** John Morton  
Vice President for Community Colleges

**FROM:** Helen Cox  
Chancellor, Kaua'i Community College

**SUBJECT:** REQUEST APPROVAL TO CHANGE FROM PROVISIONAL TO ESTABLISHED STATUS, CERTIFICATE OF ACHIEVEMENT IN MEDICAL ASSISTING

**SPECIFIC ACTION REQUESTED:**

Request approval to change from provisional to established status for the Certificate of Achievement in Medical Assisting

**RECOMMENDED EFFECTIVE DATE:**

Fall 2018

**ADDITIONAL COSTS:**

None

**PURPOSE:**

Board of Regents Policy Section 5-1 b (3) states that "the Board shall determine whether the program is to be awarded established status or terminated..." The purpose action is for Board of Regent approval for permanent establishment of the Certificate of Achievement in Medical Assisting.

Jan Naoe Sullivan

March 22, 2018

Page 2

### **BACKGROUND INFORMATION:**

The Medical Assisting program (MEDA) at Kaua'i Community College is 42-credit certificate of achievement (CA). Program courses combine classroom and intensive hands on clinical laboratory experiences in both administrative and clinical competencies. In addition, students participate in clinical hours in community ambulatory care setting that allows them to apply their new healthcare skills in a real world setting and also serves as a bridge to future employment on Kaua'i. The MEDA CA program obtained provisional status approval from the Board of Regents in spring 2014 and launched in fall 2015. In January 2018 the program received initial accreditation from the Commission on Accreditation of Allied Health Education Programs (CAAHEP). CAAHEP accreditation is a mark of quality and a powerful marketing tool for student recruitment. It also assures local employers that program graduates will be high quality medical assistants.

**Significance/Contribution of this degree (address the need of the program):** The Kaua'i Community College MEDA CA program has been designed to target nontraditional students, part time and working students, and students who test into remedial/developmental courses. These students often have family and work responsibilities that require programs designed to accommodate their needs. The MEDA CA provides students with a high level of support that accelerates student progress. The high level of program satisfaction is due in part to a close collaborative partnership between the MEDA program and community employers. The MEDA CA program is very effective. Course completion and persistence rates remain consistently at or above 90%. Graduation rates are also excellent; 100% of students who persist into the spring semester graduate. The MEDA programs certification exam pass rate is 100% which is well above the national pass rate of 63%. Students succeed and persist while taking a 12-15 credit semester course sequence. In addition, this course sequence increases the speed with which students get to graduation. This collaborative partnership ensures that the MEDA program has met, and continues to meet a critical workforce need on Kaua'i.

**Demand projections:** Demand for the program is good as work force demand for medical assistants is increasing. Manual tracking of advertised jobs by MEDA program coordinator ensures accurate data for Kaua'i. This data supports the projected need for 10-12 graduates each year to meet the ongoing and critical need on Kaua'i without market saturation. In addition, a need assessment conducted in 2016 indicated the sustained need for medical assistants on Kaua'i, which is supported by the growing number of advertised MA positions.

**Accreditation impact (if any):** None

**Examples (2-3) of similar models from peer institutions:** On Oahu: Remington College, Hawai'i Technology Institute. Since the closure of Heald College on Oahu in

Jan Naoe Sullivan  
March 22, 2018  
Page 3

2015 there is an increased and urgent need for the UH system to produce more medical assistants to meet community workforce demands.

**Similar programs at other UH campuses:**

Kapi'olani Community College is currently the only other school in the UH system that offers a CA in medical assisting. Kaua'i Community College students do not have the financial resources to relocate to Oahu to complete the Kapi'olani Community College program. The MEDA CA enables Kaua'i Community College to respond to student needs and meet a critical workforce demand on Kaua'i.

**Statement from campus administration of new program's strategic value within the UH System and campus mission, and the Integrated Academic and Facilities Plan.**

Under the campus mission and the UH Systems Integrated Academic and Facilities Plan the UH Community Colleges are identified as playing a major role in providing for workforce needs across the state. This certificate program meets the workforce needs on Kaua'i that cannot be easily met otherwise. Kaua'i students cannot afford to relocate to Oahu for this training and Kaua'i employers have difficulty recruiting qualified Medical Assistants from off island.

**Cost and resource allocation/reallocation implications:**

There are no additional costs associated with moving the certificate of achievement in medical assisting from provisional to established status.

**ACTION RECOMMENDED:**

Recommend approval to change from provisional to established status, Certificate of Achievement in Medical Assisting, Kaua'i Community College

## Background

The Medical Assisting program (MEDA) at Kaua'i Community College (KCC) is 42-credit certificate of achievement (CA). Program courses combine classroom and intensive hands on clinical laboratory experiences in both administrative and clinical competencies. In addition, students participate in clinical hours in community ambulatory care setting that allows them to apply their new healthcare skills in a real world setting and also serves as a bridge to future employment on Kaua'i. From fall 2012-fall 2014 a 23-credit certificate of competence (CO) in Medical Assisting was offered. The MEDA CA program obtained provisional approval in spring 2014 and launched in fall 2015.

## Is the Program organized to Meet its Outcomes?

### Mission

The mission of the Kaua'i Community College Medical Assisting (MEDA) program is:

To prepare students for employment as medical assistants by providing them with an accessible and engaging learning environment that enables them to gain the clinical knowledge and skills to contribute to the communities' health in ambulatory healthcare settings on Kaua'i.

### Program Goals

The MEDA Program goal is to prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

The main objectives of the program are to:

1. Improve access to healthcare related programs for students on Kaua'i.
2. Provide students with a college education that enables them to earn a living wage.
3. Meet the Kaua'i community work force needs for medical assistants in ambulatory care.

### Admissions and Advising

Students are admitted as a cohort in the fall each year. The program application period is open from December 1 through February 1. Acceptance is on a first qualified, first applied basis. Progression onto the spring semester requires passing of all required program courses in the fall.

Health clearance must be completed prior to admission into the MEDA program and remain current throughout the students' enrollment in the program. These include proof of immunizations, TB clearance, and technical standard clearance. A licensed health care provider must document that the student meets the technical standards for the program. In order to participate in the MEDA programs required clinical activities all MEDA program students must carry malpractice insurance. This malpractice insurance must be current throughout enrollment in the MEDA program. In addition, all MEDA students must have an active healthcare provider Basic Life Support (BLS) CPR certification.

## Program Course Prerequisites

Table 1: Program Prerequisites

Course Code	Title	Credit Hours
<b>HLTH 140</b>	Introduction to Human Body Systems and Related Medical Terminology	3
<b>ENG 100</b>	Composition I	3
<b>MATH 75 or higher</b>	Fundamentals of Mathematics	3-4
<b>Any Diversified Social Science(DS) course</b>	Any Diversified Social Science course from a UH campus	3
<b>ACC 124</b>	Principles of Accounting I	2
	<b>Prerequisites Total</b>	<b>15-16</b>

Table 1 lists the program prerequisites. Based on two cohorts of students the Mathematics and English program prerequisites adequately prepare students and support student success in the MEDA program. Although students can choose a social science course there has been no evidence of any one social science discipline better preparing students. It has however become apparent that some students are having difficulty retaining and using knowledge gained in HLTH 140 and need additional review in this area once in the program itself. A curricula change to replace HLTH 155 with a Medical Assisting science course has been initiated to address this problem.

A change to the course sequencing was approved in spring 2017 and will be implemented in fall 2018. ACC 124 moved from a program support course to become a program prerequisite thus requiring it is completed prior to entry into the program. This sequencing change was made as it became apparent that taking ACC 124 during the final spring semester was adding additional stress as students also complete 12-15 hours of clinical experience each week in addition to classroom and laboratory work. Also by taking ACC 124 as prerequisite students will be better prepared for MEDA 143 thereby reducing academic stress in the first fall semester.

## Program Course Schedule

The MEDA program targets nontraditional students, part time and working students, and students who test into remedial/developmental ENG and MATH courses. The program course schedule works to support these students.

Nontraditional students often have family and work responsibilities that require a program designed to accommodate their needs. The MEDA CA program runs a block schedule three days a week in the afternoons and evenings to improve and open access for these students. In addition, adult-learning methodologies incorporated into the curriculum support adult learners' success. The course schedule supports a 15 credit student load with classes on three days a week.

Traditional students are also a targeted population. These students are under 25 of age and are enrolled in college for two or more years without graduating or have dropped out of college altogether. In Hawai'i, these students are often also working adults and with family responsibilities. The MEDA CA provides an achievable academic goal for these students that also lead to gainful employment within three semesters.

## Curriculum

The MEDA program curriculum has undergone some minor revisions since implementation in fall 2015. A normal student credit load in the MEDA program is 15 credits in fall and 12 credits in spring semester. In spring 2017 two new courses were proposed to align an alpha and number with Kapi'olani CC MEDA CA and address an emerging issue with student preparation. These new courses are currently in the campus curriculum approval process. Table 2 illustrates the course sequencing. Course descriptions can be found in [Appendix A](#).

Table 2: Course Sequencing

	Course	Course Credits	Lecture Credits	Lab Credits	Contact Hours
Fall	HLTH 155 Introduction to the Study of Diseases	3	3	0	3
	MEDA 105 Introduction to Medical Assisting	3	3	0	3
	MEDA 120 Clinical Medical Assisting I	3	2	1	5
	MEDA 143 Administrative Medical Assisting I	3	2	1	5
	MEDA 176 Administration of Medications	3	2	1	5
	Total Semester	15	12	3	21
	Spring	Course	Course Credits	Lecture Credits	Lab Credits
HLTH 240 Medical Law and Professional Ethics		2	2	0	2
MEDA 123 Clinical Medical Assisting II		3	2	1	5
MEDA 165 Administrative Medical Assisting II		2	2	0	2
MEDA 220 Medical Assisting Externship		4	0	4	12
MEDA 210 Medical Assisting Certification Review		1	1	0	1
Total Semester		12	7	5	22

### Is the Program Efficient?

The Annual Program Review Data (ARPD) for the program can be found in [Appendix B](#). Program efficiency continues to be good. The cautionary health call is related to the lack of a

BOR FTE MEDA faculty. One full time faculty member is assigned to the program. Analytic faculty is provided by one lecturer who is assigned one 3 credit course in the fall and one 3 credit course in the spring. This results in a program graduate to full time faculty ratio of 1:10 or higher. UH efficiency indicators evaluate the student /faculty ratio using the number of majors to BOR appointed faculty. In contrast to other health care programs there is no faculty to student ratio mandate. The pedagogy and nature of the hands on learning that takes place during the lab sessions requires that the class size be limited to support student success. However, program fill rate based on program capacity is robust. Class size has increased and the fill rate remains at 75% or higher for MEDA courses. However, fill rate for the HLTH courses which include non-majors are also included in the program data and are variable.

## **Program Quality**

### **Program Evaluation**

Two processes are used to evaluate the MEDA program. The MEDA program, along with all other programs within the UH system is required to submit an annual program review (APRU) in October each year. This review is based on annual review of program data and undergoes review by Kaua'i CC college council members. In 2016-2017 and 2017-2018 no significant recommendations for improvement were made.

### **Accreditation**

In spring 2015 the MEDA program applied for initial accreditation from the Medical Assisting Education Review Board (MAERB) is a Committee on Accreditation (CoA) of the Commission on Accreditation of Allied Health Education Programs (CAAHEP). MAERB makes accreditation recommendations for the status of accreditation of medical assisting programs. Accredited programs are then subject to ongoing review of program compliance and achievement of outcome thresholds.

In spring 2017 MAERB site surveyors' visited the program and conducted an on-site survey. The survey went very well and the program was commended in a number of areas. The program submitted documents in September 2017 to correct one area of citation. A final positive decision was made in January 2018. The MEDA CA program is now fully accredited until 2023.

CAAHEP accreditation is a mark of quality and a gold standard for Medical Assisting programs. It entails rigorous ongoing annual program evaluation and comparison of program outcomes against set benchmarks. A discussion of this evaluation of program outcomes follows.

## Program Satisfaction

Program surveys evaluate program satisfaction from a number of major stakeholders. CAAHEP accreditation requires an annual evaluation of graduate and employer satisfaction. In addition, students evaluate clinical sites and program resources. Results indicate all stakeholders are satisfied with the MEDA program. An example of a program satisfaction survey can be found in [Appendix C](#). Surveys are sent out at various times through the year and response rate has been excellent.

Stakeholders' comments also indicate a high level of satisfaction with the program. Hawai'i Pacific Health (HPH) is the major employer of medical assistants in the state of Hawai'i and on Kaua'i. Letters of support from both the director of workforce development, who is based on Oahu, and the Vice President for Kaua'i Medical Clinic (KMC) can be found in [Appendix D](#). The high level of program satisfaction is due in part to a close collaborative partnership between the MEDA program and community employers. This collaborative partnership ensures that the MEDA program has met, and continues to meet a critical workforce need on Kaua'i.

## Advisory Committee

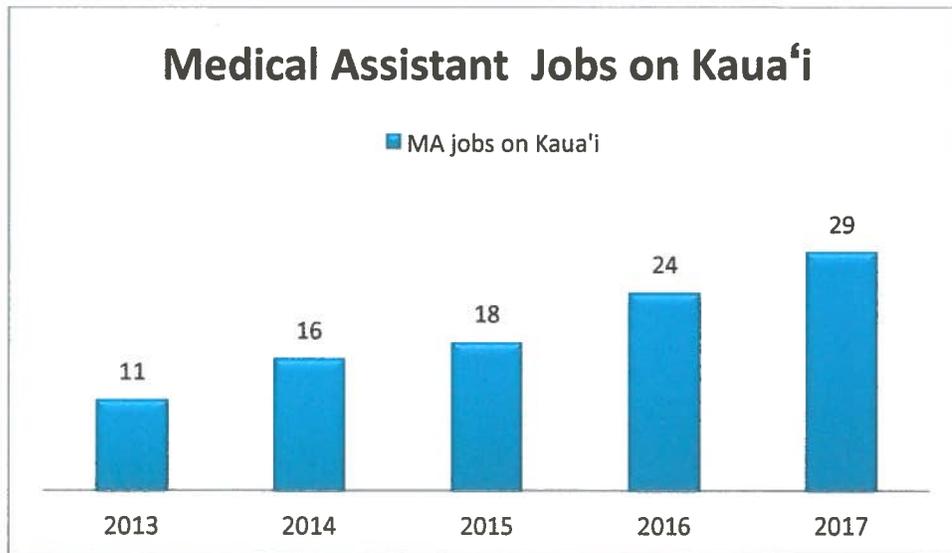

A MEDA program advisory program committee was established in spring 2014. This committee consists of major program stakeholders and meets CAAHEP accreditation requirements for its composition. A full list of members can be found in [Appendix E](#). Meetings take place once a year in spring. During the recent on site accreditation visit the MEDA advisory committee was identified as one of the strengths of the program. Input from the MEDA advisory committee has been positive and no major changes have been recommended. In 2016 an advisory satisfaction survey revealed high satisfaction with the MEDA program.

## Program Outcomes

### Program Demand

The unhealthy health call is related to a discrepancy between ARPD new and replacement positions and actual advertised jobs. Manual tracking of advertised jobs by MEDA program coordinator ensures accurate data for Kaua'i. This data supports the projected need for 10-12 graduates each year to meet the ongoing and critical need on Kaua'i without market saturation. Figure 1 below illustrates the number of MA new and replacement positions advertised on Kaua'i. In addition, a need assessment conducted in 2016 indicated the sustained need for medical assistants on Kaua'i, which is supported by the growing number of advertised positions.

Figure 1: Medical Assistant Advertised Positions on Kaua'i

### Evidence of Student Learning and Student and Program Success

The MEDA CA program is very effective. Course completion and persistence rates remain consistently at or above 90%. Graduation rates are also excellent; 100% of students who persist into the spring semester graduate. Students succeed and persist while taking a 12-15 credit semester course sequence. This is significant as many of these students have a poor academic history in courses or other programs or completion of a large number of credits over a number of years without graduating. In addition, this course sequence increases the speed with which students get to graduation. For most of these students the MEDA CA continues to be their first experience of success and subsequent graduation at Kaua'i CC.

Using both direct and indirect measures for evaluation the purpose of the program evaluation of the MEDA program at Kaua'i CC is to:

1. Improve the MEDA program process and implementation methods.
2. Determine the effect the MEDA program has on meeting short, middle and long-term outcomes.

Program evaluation results are used for program improvement, accountability and reporting program outcomes and impact. Program evaluation methodology can be found in Appendix F.

The specific questions the program evaluation plan answers are:

1. Is the curriculum adequate to meet entry level job requirements?
2. Are student's satisfied with the program curriculum and implementation methods?
3. Are employers satisfied with Kaua'i CC MEDA program graduates preparation for employment?
4. Does the Kaua'i CC MEDA attrition rate meet or exceed the national benchmark?
5. Does the Kaua'i CC MEDA graduation rate meet or exceed the national benchmark?
6. Do Kaua'i CC MEDA graduates meet or exceed national benchmarks for obtaining employment?
7. Does the MEDA program impact the Kaua'i CC campus student attrition rate?
8. Does the MEDA program impact the Kaua'i CC campus student graduation rate?

## Outcome Measures

CAAHEP accredited programs must annually track and report a number of program outcomes and publically display a five year weighted average for at least one of these outcomes. The MEDA program displays these outcomes on the program web site. As the MEDA CA has two years of data, the weighted average is currently a two-year average. The benchmarks are set by CAAHEP and the MEDA program has met and exceeded all benchmarks as illustrated in Table 3.

**Table 3: Weighted Averages of Program Outcomes**

	Retention	Positive Job Placement	Graduate Survey Participation Rate	Graduate Survey Satisfaction Rate	Employer Survey Participation Rate	Employer Survey Satisfaction Rate	Certification Exam Participation Rate	Certification Exam Pass Rate
<b>Benchmark</b>	60%	60%	30%	80%	30%	80%	30%	60%
<b>2 Year Weighted Average</b>	88%	100%	95%	100%	95%	100%	100%	100%

## Persistence

Persistence rates from fall to spring are consistently good. The MEDA program is highly structured and uses a three days a week block scheduling this allows students to work and attend classes. This reduces a potentially major financial stressor. In addition, the students receive a face to face counseling from program faculty that helps them cope with the rigors of the program and personal stressors. If withdrawal from the program occurs it is often due to personal reasons.

## Number of Majors

Demand for the program is good as work force demand for medical assistants is increasing. As a large number of program graduates are working in the local community the “coconut grapevine” has become a powerful marketing tool for the program. Although the program did not fill in 2017 this was due to three qualified applicants rescinding their applications; one due to pregnancy, the other the sudden death of a girlfriend, and the third to failing to obtain a passing grade in a program prerequisite course.

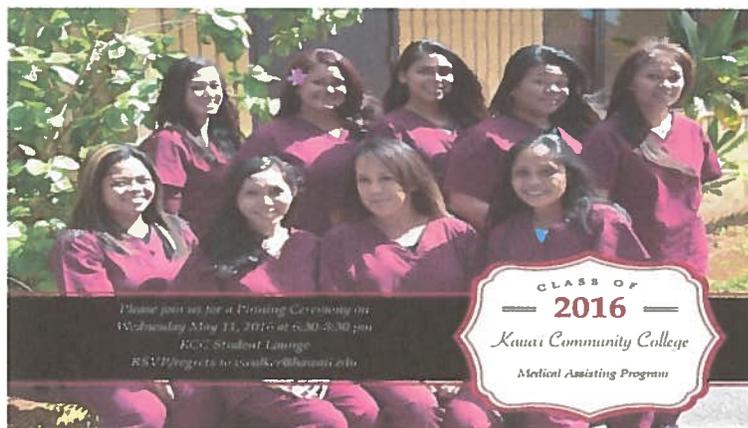

## Certification Exam Passage

Certification exam results are excellent. MEDA program students take a certification exam from the National Center for Competency Testing (NCCT) in May each year. Students take this national exam on campus at the Kaua’i CC testing center and Kaua’i CC is an official test site for this exam. This has a significant impact on reducing cost and testing anxiety as students do not have to fly to Oahu to take the exam. The exam is incorporated into a review course, which is part of the MEDA programs required courses. Active preparation starts mid spring semester and culminates in taking the certification exam. This student centered supportive format is highly effective in preparing students to pass the exam.

## Graduation

Graduation rates are also consistently excellent. Persistence from fall to spring is a good indicator of a successful graduation from the program. Data on persistence and graduation rates can be found in the APRD in [Appendix B](#). The small cohort model enables a strong peer-to-peer bond to develop within the cohort, which increases the amount of social support the student receives. This peer-to-peer bond is also actively promoted by the program coordinator and faculty. This is a critical factor in student graduation rates, in addition to a highly structured program with a high level of program faculty support. The MEDA program has particularly high rates of graduates from low income and underserved populations as a result. A student organized pinning ceremony takes place each year in May to celebrate graduation and transition to the medical assisting profession as seen in Figure 2.

Figure 2: Photo of the MEDA Graduates Pinning Ceremony Invitation

## Job Placement

Job placement is exceptional. In May 2016 and 2017 all MEDA graduates who applied for a job were hired the Monday after graduation. Kaua'i Medical Clinic (KMC) is the major employer of graduates; however, Kaiser Permanente also employed a graduate in 2017. Due to the critical need for MAs on Kaua'i it is anticipated that all 2018 graduates will also be hired soon after graduation. The collaborative relationship with KMC to develop the workforce of MAs on Kaua'i has generated an interview day, which resulted in the rapid hiring of the graduates. Kaiser Permanente interviewed their employee prior to graduation, which resulted in that graduate having a job offer prior to graduation.

Students receive a lot of support and guidance in job placement. This starts with resume development in fall and spring as part of course work. Discussion of employment and employment attributes occurs frequently throughout the program. This culminates in assistance with employment applications. In addition, students are provided guidance on dressing for interview and prepared in interview skills. Managers from KMC come onto campus at the end of spring semester and provide mock interviews. The high levels of support and guidance from program faculty means students are well prepared for the job seeking process in addition to being well prepared for their new role as MAs, and are therefore highly sought after employees.

## Learning Outcomes

The MEDA program uses both direct and indirect methods to collect data on student learning in addition to the methods listed under measuring program quality outcomes.

The MEDA program student learning outcomes (PSLO) are listed below.

Students will be able to:

1. Demonstrate effective communication skills with all members of the healthcare team (*affective*).
2. Demonstrate ethical and legal behavior to maintain patient safety and confidentiality (*affective*).
3. Apply medical office business, financial and administrative concepts and practices (*cognitive*).
4. Apply critical thinking skills and concepts of medical assisting to maintain quality patient care and efficient administrative procedures (*cognitive*).
5. Perform clinical and administrative medical assisting skills appropriate for entry-level practice in an ambulatory care setting (*psychomotor*).

A curriculum map indicating when PSLOs are introduced, reinforced and mastered can be found in [Appendix G](#). The MEDA program is a one year program and all PSLOs are assessed annually. Results of the assessment of PSLOs are good and can be found in [Appendix H](#).

The variety of assessment methods used to assess student learning accommodate different student learning styles and ways of knowing. They also incorporate both individual and group based

assessments that support the wide range of student cultures and ethnic backgrounds. In addition, development of student assessment methods considers age and gender. These methods provide meaningful information to enable the program to support student achievement of learning outcomes and are listed in Table 4.

**Table 4: Examples of Assessment Methods**

Classroom		Laboratory/Clinical
Social ; Aural; Visual ;Verbal; Physical	Solitary ; Read /write	Solitary & Social; Verbal; Physical; Visual
Oral Presentations (Group & Individual)	Written papers (Individual)	Laboratory Practical Exams (Individual)
Case Studies (Group)	Tests & Quizzes(Individual)	Clinical Rotations (Individual)
Skill Teaching(Individual)	External exam (Individual)	Laboratory Demonstrations (Group)
		Laboratory Peer evaluations(Group)

Methods to assess student-learning outcomes (SLOs) for each course in the MEDA program are included in all course syllabi. Course level SLOs (CSLOs) for each course link with the MEDA Program learning outcomes (PSLOs). Within each course syllabus, specific assessment methods used in a course are embedded within each course and specified in each course syllabus. These methods may be formative or summative in nature. Rubrics ensure that students know what they will be expected to learn, how they will be assessed, and how they will be evaluated for their overall performance. This assessment process allows students to monitor and understand their own development, and receive feedback from program faculty. Accreditation cognitive, psychomotor and affective competencies are also assessed each semester. Accreditation competencies are linked to CSLOs and cross-walked for students. An example of this cross walk can be found in [Appendix I](#).

Students in the MEDA program consistently meet the student learning outcomes assessed in each course using a variety of the above methods. Most courses include both solitary and social assessment methods as well as indirect and direct methods of assessment. 70% or higher indicates that students have met the CSLO expectation.

## **Are Program Outcomes Still Appropriate Functions of the College and University?**

### **College**

Program PSLO and CSLO alignment with college institutional student learning outcomes (ISLOs) can be found in [Appendix J](#). Kaua'i CC aligns its strategic goals with the UHCC Strategic Directions.

## UH System

### Program Articulation

The only other Medical Assisting program within the UH system is at Kapi'olani Community College (Kapi'olani CC). Kapi'olani CC has both a Certificate of Achievement (CA) and an Associate Degree (AS) in Medical Assisting. In 2017, a program graduate on Kaua'i requested transfer to the Kapi'olani CC AS program. This was the first request of its kind and unusual, as Kaua'i students usually cannot move to Oahu to attend college. This student had a boyfriend on Oahu and was a traditional student without significant financial or family obligations; which was also unusual. In spring 2017 this request prompted the MEDA program coordinator to facilitate acceptance and transfer of the student into the Kapi'olani AS degree program after she graduated with a CA from Kaua'i CC. It also led to the development and submission of an articulation agreement with Kapi'olani CC. This articulation agreement was approved by Kaua'i CC VCAA Dire and we are now awaiting a response from Kapi'olani CC though Kapi'olani CC Dean of Health Sciences Hagan. It is anticipated that the number of students requesting transfer will be very small due to geographic barriers even though the number of students interested in an Associate Degree in Medical Assisting is strong and growing as the market for MAs evolves.

### Course Alignment

In spring 2017 two new courses, MEDA 201 and MEDA 150 were submitted to curriculum committee for approval to align with Kapiolani CC. These fulfil the mandate from UHCC VP Morton to align course numbers and alphas across campuses. These new courses will replace the existing HLTH 240 and HLTH 155. They will also address an emerging issue with student preparation for the program by requiring concurrent enrollment with other MEDA program courses.

## UHCC Strategic Directions 2015-2020

### *Hawai'i Graduation Initiative (HGI)*

*Increasing the number of graduates and transfers and on the momentum to get students through to graduation and transfer more quickly.*

The MEDA program aligns with and makes significant contribution towards the following goals.

1. Increase the number of graduates
2. Increase the number of native Hawaiian graduates
3. Increase the number of low income(Pell Grant recipients) student graduates
4. Eliminate access and success gaps for targeted populations
  - a. Native Hawaiian
  - b. Filipino

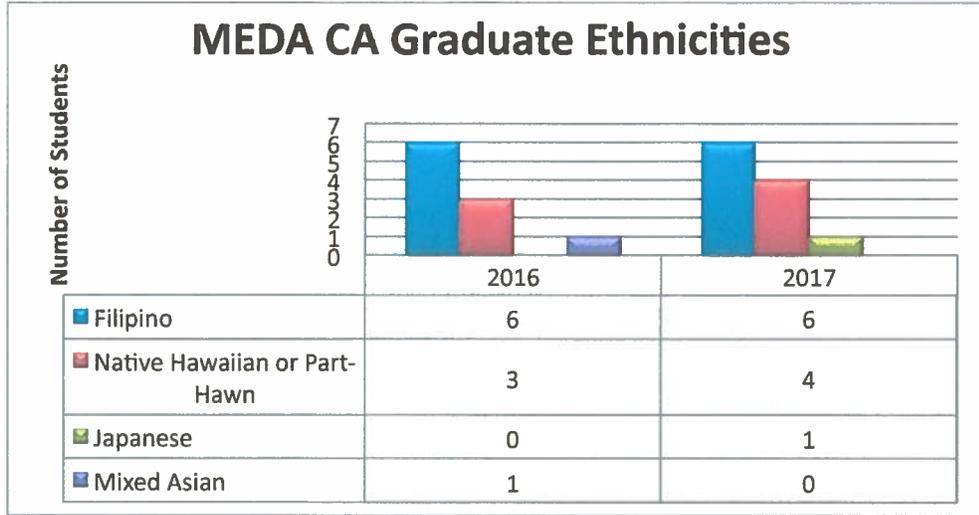

- c. Pacific Islander
  - d. Low-income (Pell recipients)
5. Reduction in time to degree
- a. Student retention and credit accumulation

Table 5: MEDA Program Numbers Aligned with HGI Goals

	2015-2016	2016-2017
<b>Number of Graduates</b>	10	11
<b>Number of Certificates of Achievement</b>	91%	91%
<b>Number of Certificates: Native Hawaiian</b>	30%	36%
<b>Number of Certificates: Filipino</b>	60%	55%
<b>Number of Certificates: Pacific Islander</b>	0	0
<b>Number of Pell Recipients</b>	70%	64%

In the MEDA CA program 90% of students complete and graduate from one or more targeted populations. Students in the MEDA program take 12-15 credits for both fall and spring semesters depending on their needs. In the academic year prior to beginning their program courses they complete 12-15 credits of prerequisite courses. This course scheduling significantly reduces time to graduation and credit accumulation but retains students from spring to spring. Through the above measures the MEDA program also contributes to the performance funding Kaua'i CC receives, as these measures are also performance measures. Figure 3 illustrates the ethnicities of MEDA CA graduates.

Figure 3: MEDA Program CA Graduate Ethnicities

**Hawai'i Innovation Initiative**

*Workforce development linked to developing emerging sectors in Hawai'i's economy while simultaneously providing a stable workforce for the traditional employment sectors.*

Table 6 illustrates the projected state and national job openings for medical assistants. Medical Assisting is an emerging sector in the existing healthcare employment sector in Hawai'i. The comparison to Licensed Practical Nurses (LPN's) is provided as an aid in evaluating the data. In the ambulatory care sector of the healthcare market LPNs and MAs perform the same duties.

Table 6: State and National Job Opening

United States	Employment		Percent Change	Projected Annual Job Openings *
	2014	2024		
Medical Assistants	591,300	730,200	+24%	26,210
Licensed Practical and Licensed Vocational Nurses	719,900	837,200	+16%	32,220
Hawai'i	Employment		Percent Change	Projected Annual Job Openings *
	2014	2024		
Medical Assistants	2,910	3,230	+11%	90
Licensed Practical and Licensed Vocational Nurses	1,270	1,380	+9%	50

\* Projected Annual Job Openings refers to the average annual job openings due to growth and net replacement.

 State Data Source: [State of Department of Labor and Industrial Relations, Research and Statistics Office](#)

## ***Modern Teaching and Learning Environments***

*Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments.*

Although the current laboratory environment is functional, it is due for a renovation. Campus renovations will create a modern teaching and learning environment and are projected to start in 2019.

## ***High Performance Mission-Driven System***

*Practices and policies that capitalize on the University of Hawai'i being a single system of higher education in the state that can provide students with smooth transitions from K-12 through the community colleges to the baccalaureate institutions in the most productive, cost-effective, and results-oriented manner possible.*

The MEDA program is a small agile program that performs at a high level. The MEDA program aligns with and makes significant contribution towards the following goals.

1. Improving time to degree
2. Eliminate cost as a barrier to education

The MEDA program graduates students after completion of a three semester CA. This is well within the three years IPEDS measure and therefore the MEDA program contributes to the IPEDS goal of 60%. The majority of students in the MEDA program have either returned to campus after completing some college credits without graduation or have persisted in taking college credits each semester for a number of years without graduation. The MEDA program gives these students a clear academic goal and a structured pathway to achieve that goal thus improving time to degree.

Cost as a barrier to education is reduced and eliminated in the MEDA program through a number of ways. First, high persistence and graduation rates reduce credit accumulation and time to degree. The number of prerequisite and general education courses is comparatively small. These courses have to be completed prior to beginning program courses, which provides students with an incentive to timely completion. The block scheduling and afternoon and evening classes also enable students to continue to work and continue to meet their financial obligations outside of college. The majority of MEDA students are Pell grant recipients, which largely eliminates the tuition costs as a barrier. Other scholarships through community organizations like Workwise Kaua'i also eliminate tuition costs for some students.

## Enrollment

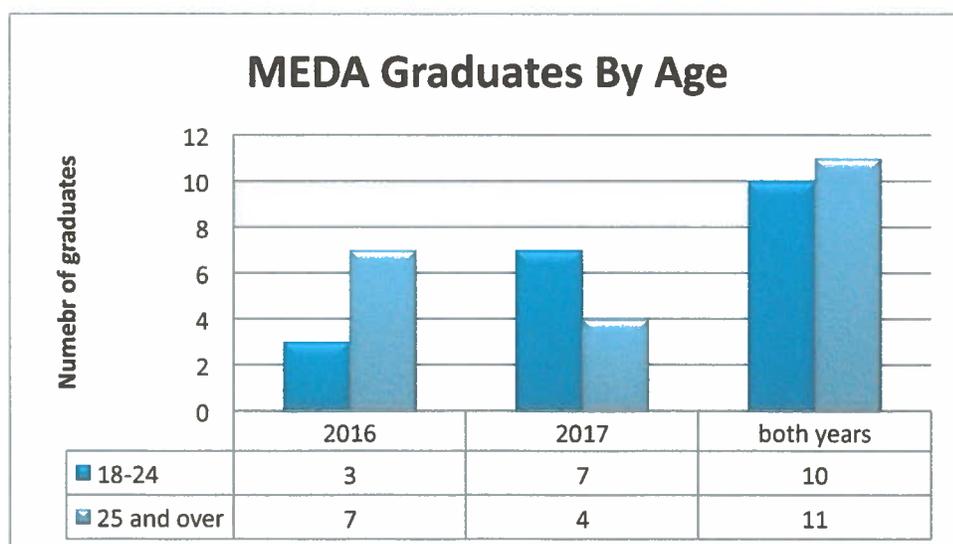

The identification and goals for targeted currently underserved populations.

The MEDA program aligns with and makes significant contribution towards the following goals.

1. Working Age Adults
2. Persistence

UH System defines working adults as those 25 and over who work. However, in Hawai'i most adults under 25 also work. In addition, those MEDA graduates in the 18-24 range work part time while in the program and have spent at least two years working full time since graduating from high school. The age of the youngest graduate was 20 and there has only been one graduate at that age. In fact, of those students 25 or under many are them are 23 or 24. This is significant, as the program has to meet the need of its working adults even though many do not meet the current UH classification. The community employers also value working adults; as a recent comment on the needs survey indicated "more slots, particularly for mature working adults". The MEDA program also contributes to overall college enrollment as many of its graduates have reenrolled in college in order to complete the MEDA program. Figure 4 illustrates MEDA graduate ages over the past two years.

Figure 4: MEDA Graduates by Age

**Are Program Resources Adequate?**

A cost revenue

template can be found in [Appendix L](#).

## Program Coordinator

The MEDA program coordinator is qualified to manage the program and meets the CAAHEP accreditation requirements. Assigned time of 1.5 credits per semester is currently provided for program coordination. In addition to program coordination duties, the program coordinator also provides clinical coordination for the MEDA program and students.

## Facilities and Equipment

MEDA program uses existing laboratory and classroom facilities. Renovation of the laboratory space, which was previously used by the nursing program, is scheduled for 2019. A renovated and flexible laboratory space will enable the learning environment to meet and continue to adapt to future needs of students. Classroom space is adequate to meet current and future needs of the MEDA program.

Laboratory equipment and supplies have been purchased through professional fees, and program allocated budget funds of \$4000 per year. In addition some equipment has been obtained through community donations of used equipment e.g. exam tables. These sources of funding are adequate to meet the programs needs for equipment and supplies.

## Faculty

One faculty member teaches fulltime in the MEDA program, workload also includes two health courses. Therefore, program size is capped at 12 majors. This faculty member also developed the program and is the program and clinical coordinator. One lecturer teaches one course per semester in the MEDA program. A second MEDA lecturer, who is also a MEDA program graduate, has recently been added to the MEDA lecturer pool. Table 7 illustrates faculty credentials. All faculties meet the UH minimum qualifications (MQ's) for Medical Assisting, which were revised in 2016 to better align with national accreditation standards. A copy of the MQ's can be found in [Appendix K](#).

Table 7: Teaching Faculty Credentials

	Faculty	Credentials
Faculty	Victoria Mathis	Master's Degree in Nursing (MS) Bachelor's Degree in Nursing (BS) Certified Medical Assistant (RMA)
Lecturers	Daphne Ottoman	Associate of Applied Science in Medical Assisting(AAS) Certified Medical Assistant (CMA)
	Apryl Shimitsu	Bachelor's Degree in Nursing (BS) Certificate of Competence in Medical Assisting(CO) Certified Medical Assistant (NCMA)

## Appendices

## Appendix A: Program Course Descriptions

**MEDA 105:** This course provides an introduction to medical assisting. It focuses on the concepts of effective communication and protective practices related to health and safety to prevent illness and injury. Basic nutritional concepts and therapeutic diets will also be discussed.

**MEDA 120:** This course introduces the basic clinical skills and procedures required to function as a medical assistant. Topics include integrated clinical procedures, and assisting with specialty exams and procedures.

**MEDA 123:** This course introduces basic specimen collection techniques including the preparation and examination of samples for diagnostic purposes. Advanced techniques and procedures for specialty examinations in the ambulatory care setting will also be included.

**MEDA 143:** This course introduces basic concepts of administrative medical assisting including client scheduling, maintaining of client records, and medical insurance. Communication and confidentiality in relation to administrative duties will also be discussed.

**MEDA 176:** This course will provide an introduction to basic pharmacology and medication administration. Students will learn the basic classification of medications and use applied mathematics and clinical techniques to safely prepare and administer medications in the medical office setting.

**MEDA 165:** This course focuses on the concepts of administrative medical assisting including medical office coding, billing, insurance claims processes, and medical office management.

**MEDA 210:** This course focuses on reviewing medical assisting concepts in preparation for a medical assistant certification exam. Certification test taking skills and preparation will also be discussed.

**MEDA 220:** This course will provide students with supervised clinical experience and the opportunity to integrate medical assisting skills into a real life setting. Clinical experiences will take place in medical offices.

**HLTH 155:** This course provides an introduction to the general concepts and characteristics of disease processes. Etiology, signs and symptoms, diagnostic tests and treatments of selected diseases from major body systems will be discussed.

**HLTH 240:** This course focuses on the legal implications and ethical considerations that impact health care. Students will analyze medical legal issues and relate ethical concepts to the professional practice of an allied health professional.

**KAUA'I**  
COMMUNITY COLLEGE

### Medical Assisting Program Program Evaluation Satisfaction Survey- Graduate

Please take a few minutes to complete this survey about the KCC MEDA program.  
Your input is very important to us.

Are you currently working as a Medical assistant?

If Yes complete question 1 below.

If No, complete question 2.

#### 1. Employment Status

Current employers name and address:

Kaua'i Medical Clinic  
3-3420 Kuhio Highway, Suite B  
Lihue, HI 96766-1098

Other: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Initial start date of your position (month/year) as a MA: \_\_\_\_\_

Certification/Registration Status:

- NCMA (NCCT)
- RMA (AMT)
- CMA (AAMA)
- CCMA (NHA)

#### 2. Other Status

- Enrolled in educational program
- Military service
- Other: \_\_\_\_\_

Please turn over

MEDA Program Evaluation Survey- Graduate

All graduates please complete the following by placing a check in the box that best reflects your answer.

**3. Educational preparation in the KCC MEDA program for work as a MA**

<b>Please indicate your level of agreement with the following statements about the MEDA program</b>	<b>Strongly Agree (5)</b>	<b>Agree (4)</b>	<b>Neutral (3)</b>	<b>Disagree (2)</b>	<b>Strongly Disagree (1)</b>
<b>COGNITIVE</b>					
I acquired the medical assisting knowledge appropriate to entry level training.					
I was prepared and encouraged to apply for and pass my professional credentialing exam.					
<b>PSYCHOMOTOR</b>					
I am prepared to collect patient data effectively.					
I am prepared to perform appropriate diagnostic and medical procedures.					
I am prepared to use sound clinical judgment for functioning in the healthcare setting.					
I am prepared to perform all clinical skills appropriate to entry level medical assisting.					
I am prepared to perform all administrative skills appropriate to entry level medical assisting appropriate to entry level medical assisting.					
<b>AFFECTIVE</b>					
I am prepared to communicate effectively in the healthcare setting.					
I am prepared to conduct myself in an ethical and professional manner.					
I am prepared to manage my time efficiently while functioning in the healthcare setting.					
<b>Overall</b>					
The MEDA program prepared me very well to do entry level medical assisting					

**4. Satisfaction with the KCC MEDA program**

	<b>Very Satisfied</b>	<b>Satisfied</b>	<b>Dissatisfied</b>	<b>Very dissatisfied</b>
Overall, how satisfied are you with the MEDA program at KCC in preparing your for work as a MA?				
How satisfied are you with the post-graduation job placement guidance and support?				

<b>Based on your experience as a graduate of the KCC MEDA program</b>	<b>Highly recommend</b>	<b>Recommend</b>	<b>Would not recommend</b>
Would you recommend the KCC MEDA program to others?			

Please add any additional comments or suggestions to help us improve? Please add them below.

**Thank you for taking the time to complete this survey.**

MEDA Program Evaluation Survey- Graduate

## Appendix D: Program Satisfaction

### Graduate Comments

Thank you Victoria for being a wonderful instructor!  
You have helped me grow in this new career and become a  
Great medical assistant!

Gain the knowledge and confidence to apply it in a real work environment. I am  
very satisfied and happy with my new career. ☺

Overall it was a GREAT PROGRAM that allowed  
me to grow & learn alot about MAG as well as  
myself. I would recommend this program to  
anyone interested in the healthcare.

I've immensely enjoyed learning throughout this program. As a person, I've grown to  
be more confident in myself and learn to strive to be the best MA that I can be.  
This program has more than prepared me to be out in the real world.

The MEDA program was one of the best programs I have been  
in. The instructor is an awesome teacher because she knows  
what she teaches and makes sure we understand as well.

Being in the MEDA program has helped me find a career that I  
will be happy with and be able to provide a stable foundation  
for my family. This program is very well structured.

I don't think there are any comments/suggestions in regards to improvement.  
I strongly believe Victoria is doing an excellent job in teaching and helping  
her students become the best they can be in order to become a great M.A.  
It's also great that she helps after the program is done w/ finding a  
job. My daughter also does a great job as a teacher as well. They are  
both incredibly talented & ambitious in what they do. Being a student &  
having them as a teacher, I truly admire them both & I'm very blessed &  
Thank you for taking the time to complete this survey.

MEDA Program Evaluation Survey- Graduate

Thankful to KCC  
for giving me such  
opportunity ☺

## Letters of Support

### *Hawai'i Pacific Health Workforce Development Director*

KAPI'OLANI  
PALI MOMI  
STRAUB  
WILCOX

[hawaiiipacifichealth.org](http://hawaiiipacifichealth.org)

September 20, 2017

Board of Regents  
Kaua'i Community College  
3-1901 Kamuali'i Highway  
Lihue, HI 96766

Dear Board of Regents:

We are pleased to offer this letter of support and our commitment to a continued partnership with Kaua'i Community College's MEDA Program.

The current MEDA Program has provided graduating students on Kaua'i with a solid foundation and relevant experience essential for today's healthcare workforce. We have not only hired many of these individuals, but allowed them to remain on island with their families and support systems. I believe the students have done so well in transitioning from the classroom to worksite because of this.

The program is also a respected career option for those interested in health care, which is, and will continue to be, in high demand throughout the state of Hawai'i and across the nation. As the future focuses on population health outcomes, increased physician support will require competent, well trained Medical Assistants to fill this need.

As a mission driven organization, our hospitals, clinics, physicians and staff are committed to creating a healthier Hawai'i. The MEDA Program blends with our goals of improving the health of our patients/community, improving the overall quality of care, enhancing the patient/family experience and enhancing the sustainability of the overall care delivery system.

Hawai'i Pacific Health (HPH) is one of the largest health care systems in the state, currently employing close to 7,000 residents. The rapidly changing health care workforce landscape compels us to partner with successful community organizations such as the Kaua'i Community College and it's MEDA Program to offer on-site clinical experiences for their students and our future care team members.

We thank you for your continued partnership and for developing this great program that is providing a solid workforce pipeline for our health care community.

Sincerely,

A handwritten signature in black ink that reads "Carl W. Hinson".

Carl W. Hinson  
Director, Workforce Development  
Hawai'i Pacific Health

Cc: Victoria Mathis, Associate Professor

Hawai'i Pacific Health | 55 Merchant Street, 27th floor | Honolulu, Hawai'i 96813

*Kaua'i Medical Clinic Vice President*

September 19, 2017

Board of Regents  
Kaua'i Community College  
3-1901 Kaunualii Hwy  
Lihue, Hawaii 96766

Dear Board of Regents,

Last year, I wrote a letter supporting the Medical Assisting Program at Kaua'i Community College. As Vice President, I oversee all operational aspects for Kaua'i Medical Clinics, which is part of Wilcox Health and Hawaii Pacific Health. With over 90 providers and 135 employees, we provide training opportunities for students in various disciplines, and we value our partnership with the school. I am also fortunate to serve as a member of the Advisory Committee for the program.

Victoria Mathis, Program Coordinator with Kaua'i Community College, has enabled us to build a partnership that has allowed us to open our doors and provide training opportunities for the students from the Medical Assisting Program. We have been extremely impressed with the quality of students emerging from this program and have been able to offer jobs to the majority of graduates.

Our staff enjoys working with the students and we find them academically prepared for their clinical rotations and transition to employment with our clinics.

As Medical Assistants continue to be a critically needed program to support our future health care demands, the need to maintain this program is essential. As the industry continues to move into population health, physicians require increased support.

I have worked intimately with community colleges in two other states. I have found the quality of students, instruction and faculty to be equal or exceeding those institutions on the mainland. I consider Kaua'i Community College in general and Victoria Mathis in particular, to be a partner, not only in creating excellent health care employees but also in delivering excellent health care for our community.

We will provide our continued support for the Medical Assisting Program at Kaua'i Community College to become a permanent option for our Island's students.

Please feel free to contact me with any questions or any additional information I can provide and thank you for your consideration.

Sincerely,

Margaret A. Bungamer  
Vice President, Kaua'i Medical Clinics

Kaua'i Medical Clinic | 3-3420 Kuhio Highway, Suite B | Lihue, Hawaii 96766

**Provisional Program Resource Template Details**

A. Headcount Enrollment. Headcount enrollment of majors each Fall semester. Located at URL: <https://www.hawaii.edu/institutionalresearch/enrReport.action?reportId=ENRT00> Campus data may be used when majors are a subset of enrollment reported in IRAO reports.

B. Completion. Provide counts of the number of degrees/certificates awarded annual (fall, spring, summer). Located at URL: [https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS\\_DEG\\_TOC](https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS_DEG_TOC)

C. Courses, Sections, SSH. Provide annual count (fall, spring, summer) or courses offered, number of sections offered and SSH. <https://www.hawaii.edu/irodr/login.do?>

D. Resources/Funding. Data should come from the College/Department's Administrative Officer using the most current information available.

E. Academic Personnel. Instructional costs without fringe. Provide direct salary cost for faculty and lecturers teaching in the program for provisional period and current year.

F. Ongoing Operational Costs. Include recurring costs related to program operations, including lab equipment, maintenance costs, accreditation fees, etc.

G. Facilities. Indicate if any new facilities (classrooms, labs, buildings, etc.), including off-campus facilities, are needed to support the continuation of the program.

H. Additional Anticipated Cost. Address whether significant additional resources (human, administrative, legal, etc.) anticipated beyond the years listed in the New Program Resource Template.

I. Funding for Anticipated New Resources. Explain how the department will fund any anticipated costs beyond the current year. If reallocating resources, indicate the source and impact of the reallocation.

FROM: *Lui Hokoana*  
Lui Hokoana  
Chancellor

SUBJECT: REQUEST TO CHANGE THE BACHELOR OF APPLIED SCIENCE  
DEGREE IN ENGINEERING TECHNOLOGY AT UNIVERSITY OF  
HAWAII MAUI COLLEGE FROM PROVISIONAL TO ESTABLISHED  
STATUS

SPECIFIC ACTION REQUESTED:

University of Hawaii Maui College (UHMC) requests approval to change the Bachelor of Applied Science degree (BAS) in Engineering Technology (ENGT) from provisional to established status.

RECOMMENDED EFFECTIVE DATE:

Upon Board of Regents approval.

ADDITIONAL COSTS:

There are no additional costs associated with changing the BAS in ENGT degree from provisional to established status.

**PURPOSE:**

The purpose action is for Board of Regent approval for permanent establishment of the Associate in Business. Board of Regents (BOR) Policy RP Section 5.201, III.B.2. states, "Each provisional program shall be reviewed at the end of its first full cycle. The request to the board for "established" program status shall be submitted in the academic year following the end of the program's first full cycle." The mission of the ENGT program is to prepare graduates to be productive technologists with a broad array of skills in a variety of areas such as telescope operations, high performance computing for scientific and engineering applications, energy production and distribution, and system administration in a variety of industries. The average annual salary of ENGT graduates is \$70,000.

**BACKGROUND:**

Board of Regents (BOR) Policy RP Section 5.201, III.B.2. states, "Each provisional program shall be reviewed at the end of its first full cycle. The request to the board for "established" program status shall be submitted in the academic year following the end of the program's first full cycle."

**Significance/Contribution of this degree:**

The BAS in ENGT program addresses one of the major shortcomings identified by Maui County high technology businesses and organizations that have recruited employees from the U.S. mainland and elsewhere: employees who stay in Hawai'i for less than two years. The BAS in ENGT program addresses this problem by providing local engineering technology education to enable Hawai'i residents to fill these high-paying technical positions. Moreover, the BAS in ENGT program is unique in that it is the only engineering technology baccalaureate degree offered in the State of Hawai'i.

**Demand projections:**

- **Current Workforce:** 100% of ENGT graduates are employed with 79% working in high technology careers (68% on Maui).
- **Future Workforce:** There is a local high tech hub that is hiring BAS in ENGT graduates. New facilities under construction on Maui (such as the Daniel K. Inouye Solar Telescope atop Haleakalā and the related expansion of the Institute for Astronomy, Maui) will need high-qualified technicians and technologists, all positions that BAS in ENGT graduates are well prepared to fill.
- **Student Demand:** The number of majors has remained steady with an average of 3-4 students graduating per year over the last six years. The BAS in ENGT is by design a low-enrolled program that addresses a specific technical education niche on Maui.

**Accreditation Impact:**

On May 9, 2009, the Board of Regents provisionally approved the BAS in ENGT program, which led to Maui Community College moving its accreditation from the Accrediting Commission for Community and Junior Colleges (ACCJC) to the Accrediting Commission for Senior Colleges and Universities (ACSCU).

At the February 18, 2010 meeting, the Board of Regents approved the name change of Maui Community College to University of Hawai'i Maui College.

In July 2014, UHMC was granted reaccreditation for eight years, through June 2022, from the WASC Senior College and University Commission (WSCUC, formerly ACSCU). In its report, the Commission noted that "student achievement at the upper division level for baccalaureate degrees is verified with each academic program."

**Similar programs at other UH campuses:**

The BAS in ENGT degree program is unique in that it is the only engineering technology baccalaureate degree offered in the State of Hawai'i.

**Cost and resource allocation/reallocation implications:**

None. The BAS in ENGT program is already well established in the UHMC budget.

**Impact of a new program/program change request on campus budget allocations and mission priority:**

None.

**ACTION RECOMMENDED:**

Recommend approval to change the Bachelor of Applied Science degree in Engineering Technology, University of Hawai'i Maui College, from provisional to established status.

**ATTACHMENT**

A Proposal to Change from Provisional to Established Status: Bachelor of Applied Science (BAS) in Engineering Technology (ENGT)

c: Executive Administrator and Secretary of the Board of Regents Oishi.

## PROGRAM OVERVIEW

The Bachelor of Applied Science in Engineering Technology (BAS in ENGT) program is one of three baccalaureate programs mentioned in the recently approved "Integrated Academic and Facilities Planform the University of Hawai'i System". This University of Hawai'i Maui College (UHMC) program is training graduates for highly specialized and well-paying technology positions in Maui County that would otherwise be filled by out-of-state recruitments. Moreover, as the only Bachelor of Applied Science in Engineering Technology baccalaureate program offered in the state of Hawai'i, providing a career path for high school, transfer and returning adult students.

Initiated in Fall 2010, the BAS in ENGT is an integrated two plus two-degree program: the BAS in ENGT program builds on the Associates in Science (AS) Electronics and Computer Engineering Technology (ECET) program. The AS ECET program provides the lower division courses and the BAS in ENGT the upper division courses necessary for the students to graduate with a baccalaureate degree. Due to this relationship, the BAS in ENGT program is far more efficient than a full four-year baccalaureate program since it only requires hiring faculty and lecturers to teach upper division class sections.

Maui County high technology companies and organizations have frequently been frustrated when hiring employees from the mainland who often move away in less than two years. This creates a revolving door which is costly and detrimental to the viability of local companies and organizations. According to Pacific Defense Solutions Head of Business Operations, *"Benefits [from the BAS in ENGT program] are also seen directly by the local companies such as ours in that they are not encumbered with high relocation costs to bring in technical staff from the mainland"*.

The BAS in ENGT program addresses this concern by growing a locally trained and highly skilled workforce. The University of Hawaii Maui College BAS in ENGT program provides graduates with specific Engineering Technology skills thereby filling local high-paying technical positions with Hawai'i residents. As of today, 79% BAS in ENGT graduates have found a job as technicians, technologists, or systems engineers. Of those graduates, 68% of them found employment on Maui with average salaries of \$70,000. Recently, two BAS in ENGT graduates have been offered a 3-month internship with a high technology company who has representation on the programs Advisory Committee with the possibility of full- time employment upon completion of the internship. The Bachelor of Applied Science in Engineering Technology program provides Maui County with an affordable degree option leading to a well- paying career.

### 1. PROGRAM OBJECTIVES AND ORGANIZATION

#### *Program Objectives*

The BAS in ENGT program is designed to prepare graduates to be productive technologists with a broad array of skills in a variety of areas such as telescope operations, high performance computing for scientific and engineering applications, energy production and distribution, and system administration in a variety of settings. The program mission is aligned with the mission of University of Hawaii Maui College to:

*"Inspire students to develop knowledge and skills in pursuit of academic, career, and personal goals in a supportive educational environment that emphasizes community engagement, lifelong learning, sustainable living, Native Hawaiian culture, and global understanding."*

The BAS in ENGT curriculum follows the requirements of the Accreditation Board for Engineering and Technology (ABET). Although the BAS in ENGT program is well established in the local high technology community, it is UHMC's intention to seek ABET accreditation upon the BAS in ENGT program being changed to established status. Toward this end, the BAS in ENGT Program Learning Outcomes (PLOs) are already aligned with ABET Student Outcomes for Engineering Technology programs as shown in Table I below.

Table I. BAS in ENGT and ABET Student Outcomes

BAS in ENGT Program Learning Outcomes	2017-2018 ABET Student Outcomes*
Analyze, design, and implement electro-optic systems, control systems, instrumentation systems, communication systems, computer systems, or power systems	An ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives
Apply project management techniques to electrical/electronic(s) and computer systems	An ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities
Utilize integral and differential calculus, or other appropriate mathematics above the level of algebra and trigonometry to solve technical problems	An ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies
Demonstrate critical engineering technology skills and experiences such as: making existing technology operate, creating/selecting new technology, troubleshooting, calibrating, characterizing, and optimizing	An ability to conduct standard tests and measurements to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes
Demonstrate engineer's way of thinking, analyzing technology as systems	An ability to identify, analyze, and solve broadly-defined engineering technology problems
Demonstrate engineer professional skills such as communication and managing projects	An ability to function effectively as a member or leader on a technical team
Demonstrate proficiency in the general education college core requirements: creativity, critical thinking, oral and written communication, information retrieval, quantitative reasoning	An ability to apply written oral, and graphical communication in both technical and non-technical environments; and an ability to identify and use appropriate technical literature
Demonstrate a recognition of the need for, and an ability to engage in lifelong learning	A knowledge of the impact of engineering technology solutions in a societal and global context
Demonstrate an ability to understand professional, ethical and social responsibilities	An understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity
Demonstrate a respect for diversity and a knowledge of contemporary professional, societal and global issues	An understanding of the need for and an ability to engage in self-directed continuing professional development
Commit to quality, timeliness, and continuous improvement	A commitment to quality, timeliness, and continuous improvement

### Program Curriculum

As has already been mentioned, the BAS in ENGT is an integrated two plus two-degree program that builds upon the AS ECET program degree. The AS ECET program covers the first two years and the BAS in ENGT program the junior and senior years of the four-year program. The BAS in ENGT curriculum was designed to prepare graduates for careers with local high technology companies. The major emphasis of the BAS in ENGT curriculum is the application of engineering technology to a variety of topics such a robotics, power systems, control systems, remote sensing, signal processing, optics, electro-optics, and system integration. Students gain competence with software programs widely used in the industry, such as LabVIEW, MATLAB, Zemax, and 3D CAD design software. The curriculum includes a strong interdisciplinary Liberal Arts core as recommended by the Western Association of Schools and Colleges' (W ASC) Senior College and University Commission (WSCUC). Upper-division English, Philosophy, and Communication courses have been offered as writing intensive courses.

BAS in ENGT faculty meet regularly with the BAS in ENGT Advisory Committee to ensure that the program prepares students to meet current and emerging community and workforce needs and opportunities. (As of today, 8 out of 19 BAS in ENGT graduates have been hired by companies represented by BAS in ENGT Advisory Board members). As a result, the original curriculum and course sequence have sustained changes since the implementation of the BAS in ENGT program to more adequately serve the needs of the industry. The current BAS in ENGT program map is shown in Table 2 below.

Table 2. BAS in ENGT program map (64 credits)

#### First Year

First semester (Fall)		Credits
MATH205	Calculus I	4
ETRO 305	Engineering Computing	4
ETRO 310	Applied Robotics	3
ETRO 340	System Integration	4
ENG 316	Advanced Research Writing	3
Total		<b>18</b>

Second semester (Spring)		Credits
PHYS 219	Physics for Engineering	3
ETRO 315	Project Management	3
ETRO 350	Power Systems	3
ETRO 360	Signals and Systems	4
PHIL 323	Professional Ethics	3
Total		<b>16</b>

#### Second Year

Third semester (Fall)		Credits
ETRO 320	Intermediate Optics	4
ETRO 450	Signal Processing	4
ETRO 497	Capstone Project I	3
HUM 400	Changes & Choices	3
Total		<b>14</b>

Fourth semester (Spring)		Credits
ETRO 370	Optoelectronics	3
ETRO455	Remote Sensing	4
ETRO 460	Control Systems	3
ETRO498	Capstone Project II	3
COM459	Intercultural Communication	3
Total		<b>16</b>

### *Program graduation requirements*

The basic curriculum requirements for graduation with the BAS in ENGT program are as follows (125 credits total\*):

- Path to BAS in ENGT in the AS ECET program: 61 credits with a cumulative GPA of 2.5 or higher in all courses attempted. The AS ECET program map can be found in Appendix A.
- Engineering Technology Upper Division Coursework: 39 credits
- Engineering Technology General Education: 19 credits
- Capstone Course: 6 credits

(\*Note: UH Manoa's BS in Civil, Computer and Mechanical Engineering require each a minimum of 125 credits, and the BS in Electrical Engineering 123 credits).

### *Program admission requirements*

For admission into the UHMC BAS in ENGT program, students must first meet the UHMC admissions requirements. Admission to UHMC does not guarantee admission into the BAS in ENGT program. The following is a listing of the program admission requirements:

- A. A student may apply for admission as a classified student in the BAS in ENGT program upon successful completion of the one of the following admission requirements:
  - a. Completion of UHMC AS ECET program with a 2.5 GPA or higher in all courses attempted; or
  - b. Completion of an Associate in Arts (AA), Associate in Applied Science (AAS, or Associate in Science (AS) from an accredited institution with a cumulative GPA of 2.5 or higher in all courses attempted, and completion of (or approved equivalent for) coursework of the BAS in ENGT path AS ECET degree from an accredited institution.
- B. A student may apply for admission as a provisional student in the BAS in ENGT program upon successful completion of the following admission requirements:
  - a. Completion of 40 or more transferable semester credits from an accredited institution with a cumulative GPA of 2.5 or higher in all courses attempted. Classified status will be assigned with completion of the BAS in ENGT path for the AS ECET course requirements (or approved equivalent coursework from an accredited institution).
  - b. Approval of BAS in ENGT committee.

### *Graduation Requirement*

To be awarded a BAS in ENGT degree, students must have at least a 2.0 UHMC cumulative GPA, as well as a 2.5 GPA in courses required for the BAS in ENGT major. Grade Cor better is required in all upper division BAS in ENGT courses.

### *Advising and Counseling*

Students majoring in the BAS in ENGT program are advised by counselors from the Office of Student Services at UHMC. Furthermore, students meet regularly with the BAS in ENGT program coordinator for follow-up on their academic progress. These efforts are designed to ensure that students complete the BAS in ENGT program in a timely manner. Finally, program faculty members working with local employers provide students with employment information and opportunities.

## 2. MEETING LEARNING OBJECTIVES

The BAS in ENGT program's learning outcomes (PLOs) guide the assessment of student learning in the program. Additionally, the BAS in ENGT program is actively involved with the assessment of College Wide Academic Student Learning Outcomes (CAS LOs). Multiple samples of student work are assessed using PLO and CASLO rubrics and reviewed by program faculty, Liberal Arts faculty, and the business community to continually review how well graduates are satisfying program learning expectations. Methods to assess student-learning outcomes (SLOs) for each course in the BAS in ENGT program are included in all course outlines. Course level SLOs link with BAS in ENGT PLOs and CASLOs at the course level. Using the course outline as a guide, specific assessment methods used in a course are embedded within each course and specified in each course syllabus. These methods may be formative or summative in nature. Rubrics or other scoring mechanisms have been developed to ensure that students know what they will be expected to learn, how they will be assessed, and how they will be evaluated for their overall performance. This assessment process allows students to monitor and understand their own development, receive feedback from Instructors and monitor the progression of the entire class. These data provide faculty with a tool to analyze and validate the curriculum, as well as identify areas of possible improvement.

### *Program Learning Outcomes (PLOs)*

Regular assessment of PLOs has been instrumental in the curriculum review process, triggering changes in course pre-requisites and sequencing, and developing new courses. Input from the Advisory Committee and community partners prompted changes in the upper-division program map in Fall 2015, merging two courses and developing a new one, still maintaining rigor and quality instruction. Each semester, BAS in ENGT courses are carefully chosen to assess specific PLOs and CASLOs. A timetable of PLOs assessment is shown in Appendix B (PLOs for the BAS in ENGT program are listed in Table 1 page 2). The results are included in the Annual Report of Program Data (ARPD). Over a 5-year time period, from Fall 2011 through Spring 2016, all eleven PLOs have been assessed at least once. Homework, laboratory experiments, tests, and projects are tools used to assess student learning. Table 3 below shows the program assessment rubric used to weight the expected level of achievement.

Table 3. Assessment Rubric

Expectation	Exceeds	Meets	Needs Improvement	Insufficient Progress
Percentage	80% <sub>≥</sub>	70% <sub>≥</sub>	60% <sub>≥</sub>	≤59%

Overall students meet or exceed the level of expectations for all PLOs.

### *College-wide Academic Student Learning Outcomes (CASLOs)*

CASLOs are a set of core competencies in critical thinking, creativity, oral and written communication, information literacy, and quantitative reasoning that students develop across the curriculum through coursework in each program of study at UHMC. Each program of study at UHMC integrates curriculum that develops these skills. Students demonstrate these skills at a level appropriate for their degrees through varied coursework or a "capstone" project. A different CASLO is assessed each year. The analysis of results allow faculty along with Advisory Committee members to

identify areas where there are deficiencies and prompts faculty to review and adjust the content and requirements of the courses, the sequence of courses, and the program map.

As an example, following assessment of the CASLO "quantitative reasoning":

- The AS ECET program strengthened the math pre-requisite for admission into the program from MATH 25 to MATH 82 (Accelerated Algebraic Foundations) in Fall 2014, to MATH 103 (College Algebra) in Fall2015. As Table 4 below shows, the retention rate increased.

Table 4. AS ECET Improvements

Math pre-requisite	MATH25	MATH 82	MATH 103
	Prior to 2014	Fall2014	Fall2015
Retention rate after 1 year	53%	64%	64%

- At the lower division level, MATH 119 (Engineering Pre-Calculus) was developed to combine MATH 135 (Pre-Calculus) and MATH 140 (Trigonometry) and has been offered since Fall 2015.
- At the upper division level, the traditional MATH 205 (Calculus I) replaces the customized MATH 219 (Calculus for Engineers, which combined Calculus I, II, and III) that was originally developed for this specific degree.

### 3. PROGRAM RESOURCES

#### *Faculty Resource Requirements*

The BAS in ENGT program benefits from a mix of full-time faculty and part-time lecturers who bring a diverse set of experiences for the benefit of the students. UHMC currently has one full-time faculty member and one part-time faculty member in the BAS in ENGT program (50% of the time is devoted to the AS ECET program); faculty members from other departments bring their own expertise in their respective areas. The existing mix of faculty and lecturers ensures that all courses required for the baccalaureate degree are offered each semester so that students can complete the BAS in ENGT program within the four years recommended for graduation.

Some of the faculty and lecturers teaching in the program and their areas of expertise are listed below:

- Jung Park, Ph.D., Assistant Professor, Electronics
- Elisabeth Dubuit, Ph.D., Instructor, ENGT&ECET Program Coordinator
- Amirhossein Amiraslani, Ph.D., Assistant Professor /Mathematics
- Buddhi Raj, Ph.D., Instructor/Physics
- Jeffrey Yopez, Ph.D., Lecturer, Quantum Computing and Simulation
- Nathan Withers, Ph.D., Lecturer, Electronics
- Duane Bud Clark, Ph.D., Assistant Professor/ Philosophy and Religion
- Communication Faculty representative
- English Faculty representative
- Humanities Faculty representative

### *Advisory Committee*

The BAS in ENGT Advisory Committee consists of high technology companies and organizations on Maui, and program alumni. The Advisory Committee meets at a minimum of twice each year to offer advice to the program curriculum and provide input on industry trends, employment opportunities, and external resource opportunities. Three of the companies represented by BAS in ENGT Advisory Board members have hired program graduates: As of today, 8 out of the 19 BAS in ENGT students who have graduated have been hired by those companies, and 2 are completing an internship prior to being hired into permanent positions. As has already been mentioned, the Advisory Committee participates in the evaluation of students' work as they progress through the program and play a key role in the evaluation of the work students submit in the senior capstone project. Moreover, members of the Advisory Board have donated expensive equipment currently supporting student work in program laboratories. For example, Maui Innovation Group has donated an Optical Workstation with optical components (\$1 0,000). For testimonials from the Advisory Board see Appendix C.

Advisory committee members are listed below:

Ned Davis	Maui Innovation Group
Wes Frewald	Pacific Defense Solutions
Thomas Glesne	Shafer Pacific Operations
Steve Griffin	Boeing
Lisa Hunter	Institution for Scientists and Engineering Educators, UCSC
Joe Janni	Air Force Research Laboratory
Wayne Lewis	Cisco Academy Training Center
Victor Livengood	Consultant
Mike Mayberry	Institute for Astronomy, University of Hawai'i
Sharon Mielbrecht	Pacific Disaster Center
Dan O'Connell	HNU Photonics
John Valliant	Boeing
Laura Ulibarri	US Air Force

### *Budget and Sources of Funds*

- Government and tuition funds provide the salary resources for all full-time faculty and lecturers.
- Tech Fee committee has funded the program for software license renewals.
- Extra-mural funds and UHCC allocations allowed purchasing of all materials such as optics workstations, lasers and optical educational kits, Lego Mindstorms kits, electronics equipment, software programs, a 3D printer, a solar PV troubleshooting learning system, and a protolaser printed circuit board machine.

### *Facilities and Equipment*

Through strong and active partnerships with the University of Hawai'i Institute for Astronomy and local industry, as well as legislative support for new facilities, the program has been able to provide students and faculty with current and adequate technology. As a result, BAS in ENGT students benefit from a physics lab, an electro-optics lab, an astronomy lab, and a machine shop. The labs are located in 'Ike Le'a, the new science building which opened in 2013 and in the Ka'a'ike building. The laboratories are equipped with state-of-the-art equipment, computers, and software programs to keep up with the ever-changing technology. Students and faculty also benefit from library support in 'Ike Le'a and the UHMC Library.

#### 4. PROGRAM EFFICIENCY

The BAS in ENGT program is relatively efficient compared to other bachelor degree programs since it is built upon a long-standing and successful lower division two-year AS ECET program. The Cost and Revenue template reflects the small program size (See Appendix D). Moreover, the BAS in ENGT program allows Maui-based students to earn a valuable baccalaureate degree leading to a high paying job on Maui. At the same time, Maui County high technology leaders are provided the workforce they can count on.

#### 5. PROGRAM QUALITY

##### *Annual Program Review*

The BAS in ENGT program participates in UHMC's annual program review process that includes continuous and systematic evaluation of PLOs, CAS LOs, as well as demand, efficiency and effectiveness standards. The BAS in ENGT Program Review follows UHMC's Self-Study Guide for Annual Assessment and Comprehensive Program Reviews that aligns with University of Hawai'i Executive Policy E5.202.

##### *Job Placement*

The primary indicator of the quality of the program is job placement. Toward this end, 79% of BAS in ENGT graduates from 2012 to 2017 (15 out of 19) have found a family-waged job. As indicated in Table 5 below, out of those 15 graduates, 11 have been hired at the Maui Research and Technology Center (MR TC), and one student has been accepted into graduate school.

Table 5. Job placement for BAS in ENGT graduates

Engineering Technology (15)					
MRTC (11)		Other (3)		Graduate School (1)	
Akimeka	1	General Assembly, SF	1	Master's degree ((UCLA)	1
Ardent Management	1	Sheraton, Maui	1		
Boeing	2	WZ Engineering Maui	1		
CSRA, Inc.	1				
Pacific Defense Center (PDC)	1				
Pacific Defense Solutions (PDS)	5				

\*: CSRA: Systems Research and Applications Corporation

Some BAS in ENGT graduates did share with us some details in regard to their job position/title and salary as shown in table 6 below.

Table 6. Jobs details

Graduated	First Employment				Current Position		
	Hired	Company	Position/Title	Salary	Company	Position/Title	Salary
5/12	11/12	PDS	Junior Engineer	55k	PDS	System Engineer	70k
5/12	11/12	PDS	Junior Engineer	50k	PDS	Engineer	75k
5/12	5/12	Boeing	Electronics & Electrical	55k	Boeing	Electronics & Electrical Design	72k
5/13	6/13	Ardent MC	Software	60k	Ardent MC	Software	75k
5/14	6/14	PDC	Technical Writer	45k	PDC	General Engineer	60k
5/14	6/14	Fresenius	Biomedical	35k	Sheraton	General Engineering	65k
5/15	3/15	CSRA Inc.*	Systems	65k	CSRA Inc.	Systems Engineer	66k

\*: CSRA: Systems Research and Applications Corporation 8

These salaries have a multiplier effect throughout the Maui County economy contributing to the state and local tax base and the typical expenditures related to living and working on Maui. This impact is significant over time, with an increasing number of graduates and long-term employment of those graduates in well-paying jobs with local companies.

The type of duties that BAS in ENGT alumni were well prepared to perform when they were hired cover the following sectors of activities: Electronics, Optics, Systems Engineering, Project Management, Mechanical Engineering, Small Telescope Operations, Large Telescope Operations, Sensor Development, Lead Deployment, IT Security, Opto-Electro-Mechanical system design/ Development and Implementation, Program Management/ Proposal Writing. working with super computers, Dedicated Short Range Communications, and Space Situational Awareness.

#### *Demand for graduates*

The 2010 Standard Occupational Code (SOC) that best describes the ENGT program is 17-3029 (Engineering Technicians, except drafters, all other). Hawai'i is the fifth state in the nation with the highest concentration of jobs and the fourth top paying state in this occupation (<https://www.bls.gov/oes/current/oes173029.htm>). This occupation has a bright outlook and is considered a new and emerging occupation (<https://www.onetonline.org/find/quick?s=17-3029>).

#### *CanSat competition*

For the past few years UHMC BAS in ENGT students have participated in the CanSat competition. This annual design-built-launch competition, organized by the American Astronomical Society and American Institute of Aeronautics and Astronautics, and funded by NASA, is open to colleges and universities from all over the world. UHMC students working closely with faculty prepare yearlong to compete in this design build and launch engineering competition. In academic year 2015-2016, the first time UHMC participated, 67 teams were admitted in the competition; 40 teams were selected to compete as finalists in Texas in June 2016 where UHMC BAS in ENGT student team finished in 16th place. In academic year 2016-2017, 80 teams were admitted in the competition; 40 teams were selected to compete as finalists in Texas in June 2017 where UHMC BAS in ENGT student team finished in 27th place. Many of the competing universities were tier one research institutions from across the country and worldwide. UHMC's Hawai'i Space Grant Consortium grant directed by Dr. Jung Park funds this initiative.

## **6. PROGRAM OUTCOMES**

The mission of the BAS in ENGT program is to prepare graduates to be productive technologists with a broad array of skills in a variety of areas such as telescope operations, high performance computing for scientific and engineering applications, energy production and distribution, and system administration in a variety of industries. Graduates of the program provide the highly skilled workforce indispensable to address local and regional needs. As of today, 19 BAS in ENGT majors have graduated since 2012, with an average of 3-4 graduates per year: 79% have found a job as technicians, technologists, or systems engineers, with 68% staying on Maui.

#### *Number of majors*

The small number of majors in the BAS in ENGT program is by design and allows the right balance between number of graduates and the needs of the local workforce. Table 7 below lists the historic and anticipated numbers of AS ECET and BAS in ENGT majors.

Table 7. Number of AS ECET and BAS in ENGT majors, 2010-2020

	Historic numbers							Anticipated numbers				
Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
	-	-	-	-	-	-	-	-	-	-	-	-
	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
#ECET Majors*	57	55	59	60	37	33	27	27	27	28	28	28
#ENGT Majors**	8	17	17	13	13	13	12	13	14	14	14	14

\* Only those who meet the pre-requisites to the AS ECET program

\*\*Source: <https://www.hawaii.edu/institutionalresearch>

The number of BAS in ENGT majors shows a steady pace which was not affected when the number of AS ECET majors dropped starting in 2014: The AS ECET program strengthened the math pre-requisite for admission into the program, thus became more rigorous. As a consequence, fewer students are now being admitted into the AS ECET program. However, AS ECET graduates are now far better prepared for success in the BAS in ENGT program.

The program is willing to accept students from other UH Community Colleges that offer programs that are similar to the AS ECET program. For example, Kauai Community College already offers an AS ECET degree that articulates with the UHMC BAS in ENGT program. Looking to the future, Leeward Community College and Hawai'i Community College already have lower division degree programs that are similar to the AS ECET program and we are currently exploring articulation opportunities.

#### Number of graduates

A total of 19 students (49% of the students who enrolled in the ENGT program) have completed the graduation requirements for the BAS ENGT over the period 2012-20 17; and 13% are still in the program as part time students and planning to graduate.

Table 8 below lists the historic and anticipated number of BAS in ENGT graduates from 2012 to 2022.

Table 8. Number of BAS ENGT graduates, 2012-2022

	Historic numbers*						Anticipated numbers				
Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
#BAS ENGT graduates	3	4	4	3	4	1**	5	5	6	6	6

\*Source: <https://www.hawaii.edu/institutionalresearch>

\*\*Low graduation number reflects personal issues that resulted in ENGT majors dropping the program.

All BAS in ENGT majors are not full-time students; they are often non-traditional students, with a family and/or a job interfering with following the two-year program map. Therefore, graduation for these students can be delayed. Between Spring 2012 and Spring 2017, 19 BAS in ENGT majors have graduated: 72% in 2 years, 14 % in 3 years, and more than 3 years for the remaining 14%.

Moreover, the BAS in ENGT is a rigorous program and as a result 38% of program majors have dropped out of the program. It is anticipated, that the new more rigorous Math requirement in the BAS in ECET program will result in fewer than the historic number of 38% of BAS in ENGT majors dropping out of the program. The anticipated number of BAS in ENGT graduates takes into account different factors, among which the number of AS ECET graduates enrolling into the BAS in ENGT each year, the average time it takes for BAS in ENGT majors to graduate, and the number of BAS in ENGT majors still in the program who haven't yet graduated.

The BAS in ENGT is a 2+2 degree. Students earn an AS ECET degree prior to enrolling in the BAS in ENGT program. In Fall 2017, most of the students who will start the BAS in ENGT program as juniors will have graduated with the AS in 2 years. According to the table above, we can anticipate that 72% will have completed a bachelor's degree in 4 years (2015-2019), which is higher than the national average. According to the National Center for Education Statistics, the 4-year graduation rate for first-time, full-time undergraduate students who began seeking a bachelor's degree at a 4-year degree-granting institution in Fall 2009 was 40%.

[https://nces.ed.gov/programs/digest/d16/tables/dt16\\_326.10.asp](https://nces.ed.gov/programs/digest/d16/tables/dt16_326.10.asp).

#### *Employment of graduates*

The BAS in ENGT program is addressing the specific engineering technology needs of Maui County while placing graduates into high-paying technical positions on Maui. This addresses the problem with mainland hires that frequently stay in these high skilled positions for less than two years. According to the Rural Development Project (an organization that conducted an assessment of the need on Maui for an BAS in ENGT program):

*"A Bachelor's Degree Program in Engineering Technology, based on Maui and focused on the specific engineering needs of these facilities, will be able to fill these high-paying technical positions with Hawaii residents. This strategy will address one of the major shortcomings expressed by each of these operations, that the people recruited on the mainland seldom stay longer than two years. This is costly and detrimental to the viability of these organizations. "*

Table 5 on page 8, and Table 6 on page 9, show that 79% of the students who graduated between 2012 and 2017 were employed in their field, and 68% were hired on Maui in a high-tech company, with an average salary of \$52K at the time of hiring, and \$70K at the time of this writing. As of today, the Daniel K. Inouye Solar Telescope (DKIST) atop Haleakala and a new building for the Institute for Astronomy (IFA) in Pukalani are under construction. Both facilities are already recruiting for high-qualified technicians, technologists, and systems engineers; all positions BAS in ENGT graduates are well prepared to fill. It is also worth noting that the BAS in ENGT program is an important part of Maui County efforts to build a stronger high technology economy.

## **7. RELATIONSHIP TO UH MAUI COLLEGE AND UH SYSTEM**

The Bachelor of Science in Engineering Technology program is one of the three applied baccalaureate programs offered at the University of Hawai'i Maui College within the University of Hawai'i Community Colleges, as mentioned in the recently approved "Integrated Academic and Facilities Plan for the University of Hawai'i System":

- The only Bachelor of Science in Engineering Technology program in the UH system providing a unique degree option leading to a well-paying career.
- The program is fiscally sound since it is built upon a long standing and successful lower division two-year AS ECET degree program therefore costing far less than a full four-year baccalaureate program.
- BAS in ENGT graduates are diverse, thereby not only adding diversity to the UH student body but also adding diversity to the workforce.
- Through strong and active partnerships with the University of Hawai'i Institute for Astronomy, UHCC System, and local industry the program has been able to maintain current and adequate technology.
- Consistent with this plan UH Maui College has been and will continue to be committed to support the BAS in ENGT program.

### **CONCLUSION**

This report has demonstrated that the BAS in ENGT program is meeting its objectives, producing graduates who are prepared for further study or the workplace, has adequate resources, and meets the needs of Maui County. The BAS in ENGT program is instrumental in providing the local growing STEM businesses and organizations with a reliable high skilled workforce. Therefore, UH Maui College requests that the BAS in ENGT program be changed from provisional to established status.

# APPENDIX A: ECET PROGRAM MAP

## APPENDIX C: LETTERS OF SUPPORT

8/20/2017

To: Chancellor Hokoana  
University of Hawai'i Maui College  
310 W. Ka'ahumanu Ave  
Kahului, HI 96732-1617  
(808) 984-3500

From: Wesley Freiwald  
Head of Business Operations, Pacific Defense Solutions, LLC (PDS)  
535 Lipoa Parkway Suite 101, Kihei HI, 96753  
(808) 268-9119 (Cell)

Dear Chancellor Hokoana,

I wanted to take the opportunity to write this letter of support for UHMC's BAS ENGT program. My company, based in the Maui Research and Technology Park has worked very closely with the UHMC faculty and have hired several of the students that have graduated from the program. These students have a strong technical foundation, an excellent work ethic, and we are pleased we can give them a professional career opportunity here on Maui.

I strongly endorse UHMC's BAS ENGT program, as it provides organic home grown talent to the expanding technology base on Maui, which is critical to the island's economic diversity (outside of tourism and agriculture). Benefits are also seen directly by the local companies such as ours in that they are not encumbered with high relocation costs to bring in technical staff from the mainland.

If you have any questions, please feel free to give me a call anytime.

Sincerely,

Wesley Freiwald  
*Head of Business Operations, Pacific Defense Solutions, LLC (PDS)*

"Fostering Disaster-Resilient Communities through Information, Science, Technology, and Exchange"

August 21, 2017

Dr. Lui Hokoana  
Chancellor, University of Hawai'i Maui College  
310 Ka'ahumanu Ave  
Kahului, HI 96732

Dear Chancellor Hokoana:

This correspondence serves as Pacific Disaster Center's strong support to the University of Hawaii Maui College (UHMC) to transition the Bachelor of Applied Science (BAS) in Engineering Technology (ENGT) from provisional to established status.

Working hand-in-hand with our partners in more than twenty countries, Pacific Disaster Center (PDC) is developing solutions based in the latest science, technology, and data/information to help reduce disaster risk, loss, and suffering around the world.

The PDC supports UHMC's commitment to provide new talent for Maui's high technology work force, and its ongoing efforts to enhance and sustain current programs. UHMC's endeavor to transition the BAS ENGT clearly demonstrates its continued commitment to understanding Hawaii's current workforce needs, and anticipating future industry needs. This curriculum will continue to prepare local students for the emerging positions within Hawaii's growing science and technology sector.

About 20% of our stable technical workforce has studied at UHMC and has joined our center after completing internships. Graduates of the BAS ENGT program have already made valuable contributions to PDC projects and activities. Therefore, PDC remains an active supporter of UHMC programs that build and strengthen the local high-technology workforce.

We look forward to our continued partnership with UHMC, and working with emerging graduates from the BAS ENGT program in the years to come.

Sincerely,

Ray Shirkhodai

Executive Director, Pacific Disaster Center

Kihei, HI 96701-6502

Chancellor Hokoana c/o  
Elisabeth Dubuit, mail box #109  
310, W. Kaahumanu Avenue  
Kahului, HI 96732

25 August 2017

Chancellor Hokoana,

It is with great pleasure that I write this letter in support of the University of Hawaii (UH) Maui College, Bachelor of Applied Science (BAS) in Engineering Technology (ENGT) Program. Boeing on Maui has had a long association with the UH Maui College, and the UH Institute for Astronomy due to our work at the Maui Space Surveillance Site (MSSS) with the United States Air Force (USAF) on Mt. Haleakala. This work is important to the defense of our nation providing critical Space Situational Awareness (SSA) information to the USAF. Boeing supports the USAF SSA mission by providing operations, engineering, scientific, and technical services associated with the large optical telescopes at MSSS; and has done so on Maui for well over 30 years.

More recently, we have worked directly with the University of Hawaii to help formulate aspects of the BAS ENGT Program so that its graduates would be equipped with skills and knowledge that would make them excellent candidates for employment on our Maui team. This endeavor has been successful! Boeing currently employs 2 graduates from the BAS ENGT Program, John Valiant and Diana Agdeppa, and we recently hired Greg Balinbin who will join our team in the near future. John joined our team in 2012, and Diana joined us in 2016. Both John and Diana have been outstanding employees who have achieved much in their tenures with our team.

John Valiant has recently completed 5 years of service with Boeing, and as part of the first graduating class from BAS ENGT, has definitely proven his worth and shown the value of this UH Program. In his time with Boeing, John has become involved in a number of important mission areas, in particular that of small telescope operations, maintenance, and data collections. This work has involved a wide range of engineering disciplines including electronic, optical, mechanical, software, Information Technology, and systems engineering. John's outstanding contributions have demonstrated that the skills and knowledge that he gained from BAS ENGT have been put to very good use, and are of high value to Boeing and the USAF.

The Boeing Maui team is committed to maintain this symbiotic relationship with UH and the BAS ENGT Program, as its benefits are clear to Boeing and our USAF customer. Additionally, Boeing is a committed member of the Maui community, and we are always interested in hiring locally when our needs match the skills and knowledge of available local candidates. With the BAS ENGT Program at UH Maui College, this commitment to the community, the USAF, and defense of the nation and can continue to be met.

Very Respectfully,

Bob Lytle *Robert E Lytle*

The Boeing Company  
Maui Site Manager  
550 Lipoa Parkway  
Kihei, HI 96753

## APPENDIX D: RESOURCE TEMPLATE

### PROVISIONAL PROGRAM RESOURCE TEMPLATE

This template identifies resources needed to support the provisional program and its relationship to the existing departmental/division resources. Please include an explanation of this analysis in your established-status request narrative.

Campus: Maui

Provisional Degree/Certificate: BAS in Engineering Technology

Date of BOR Approval: May 9, 2009

College/Department/Division: College/Department/Division STEM

Other Programs offered by the College/Division: AS in Natural Science, AS in Electronic and Computer Engineering Technology, AS in Creative Media,

BAS in Sustainable Science Management, AS in Agriculture and Natural Resources. STEM also supports general education requirements for all UHMC programs.

<b>Part I: Program Overview</b>		Provisional Years: 2 yrs for Certificates; 3 yrs for Associates and Master's; 5 yrs for Doctorates; 6 yrs for Bachelor's							
<b>A. ENROLLMENT (Fall Headcount)</b>		2011/2012	2012/2013	2013/2014	2014/2015	2015/2016	2016/2017	Current Year	Comments

G. Indicate whether new facilities are needed to support the continuation of the program (Include any off-campus facilities) None

H. Indicate if there are other significant resources anticipated beyond the current year. None

I. Explain how any new program resources will be funded (e.g., reallocation, grants, contracts) None

J. ADDITIONAL COMMENTS:

**Part III: Approvals**

By signing below, I have reviewed and approve the Provisional Program Resource Template. (printed name, signature and date)

Department/Division Chair: *SEAN CALDER*  12/1/2017

College/Department Administrative Officer: N/A

Dean: N/A

Vice Chancellor for Academic Affairs: *John McKee*  12-6-17

Vice Chancellor for Administration:  12/6/17

reviewed by CCAO 4/26/17 for use starting Fall 2017

## Provisional Program Resource Template Details

- A. Headcount Enrollment. Headcount enrollment of majors each Fall semester. Located at URL: [https://www.hawaii.edu/institutional\\_research/enrReport.action?reportId=ENRTOO](https://www.hawaii.edu/institutional_research/enrReport.action?reportId=ENRTOO) Campus data may be used when majors are a subset of enrollment reported in IRAO reports.
- B. Completion. Provide counts of the number of degrees/certificates awarded annual (fall, spring, summer). Located at URL: [https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS\\_DEG\\_TOC](https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS_DEG_TOC)
- C. Courses, Sections, SSH. Provide annual count (fall, spring, summer) or courses offered, number of sections offered and SSH. <https://www.hawaii.edu/irodr/login.do?>
- D. Resources/Funding. Data should come from the College/Department's Administrative Officer using the most current information available.
- E. Academic Personnel. Instructional costs without fringe. Provide direct salary cost for faculty and lecturers teaching in the program for provisional period and current year.
- F. Ongoing Operational Costs. Include recurring costs related to program operations, including lab equipment, maintenance costs, accreditation fees, etc.
- G. Facilities. Indicate if any new facilities (classrooms, labs, buildings, etc.), including off-campus facilities, are needed to support the continuation of the program.
- H. Additional Anticipated Cost. Address whether significant additional resources (human, administrative, legal, etc.) anticipated beyond the years listed in the New Program Resource Template.
- I. Funding for Anticipated New Resources. Explain how the department will fund any anticipated costs beyond the current year. If reallocating resources, indicate the source and impact of the reallocation.

UNIVERSITY

RECEIVED

**MEMORANDUM**

'18 MAY -1 P12:43

TO: Jan Naoe Sullivan  
Chair, Board of Regents

VIA: David Lassner  
President

UNIVERSITY OF HAWAII  
PRESIDENT'S OFFICE

VIA: Donald O. Straney  
Vice President for Academic Planning and Policy

FROM: David Lassner  
Interim Chancellor  
University of Hawaii'i at Mānoa

Marcia Sakai  
Interim Chancellor  
University of Hawaii'i at Hilo

SUBJECT: Request Approval to Change from Provisional to Established Status the  
Doctor of Nursing Practice Degrees at the University of Hawaii'i at Hilo and  
the University of Hawaii'i at Mānoa

**SPECIFIC ACTION REQUESTED:**

It is requested that the Board of Regents approve established status for the Doctor of  
Nursing Practice degrees at the University of Hawaii'i at Hilo and the University of  
Hawaii'i at Mānoa.

**RECOMMENDED EFFECTIVE DATE:**

Effective upon Board approval.

**ADDITIONAL COSTS:**

No additional costs are associated with this request.

**PURPOSE:**

The Doctor of Nursing Practice is a professional doctorate integrating evidence-based  
practice, quality improvement, and systems leadership to prepare experts in specialized  
advanced nursing practice.

18 MAY 23 6:25

RECEIVED

**BACKGROUND INFORMATION:**

Board of Regents Policy RP5.201, 3(b) 1-3 states that "Each provisional program shall be reviewed at the end of its first full cycle... Following its review, the board shall determine whether the program is to be awarded established status or terminated."

With 11,000 licensed nurses working in state, nursing is the largest segment of the healthcare workforce in Hawai'i. As state healthcare needs evolve, the UH has responded by developing innovative educational delivery models and diverse clinical placement opportunities to ensure a pipeline of competent nurses across the state. Nursing is an applied discipline and by Hawai'i Board of Nursing regulation at least 40% of curriculum must be provided in a clinical (health care delivery). Thus, the six UH system nursing programs provide degree access across the state. UH Mānoa and Hilo offer baccalaureate, master's, and doctoral degrees in nursing, while the community colleges (Kapi'olani, Hawai'i, and Kaua'i) and Maui College offer associate degrees in nursing. As health care delivery is transformed by new federal and state payment models, statewide collaboration among the nursing programs is increasingly critical to ensuring a well prepared entry and advanced practice nursing workforce.

Currently, the UH nursing programs partner via the UH Statewide Nursing Consortium, formed in 2005, to support of seamless academic progression, while decreasing the time to degree and cost of obtaining a degree. Academic partners meet together twice a year and quarterly via calls/Skype to share expertise and resources that enrich programs and create cost efficiencies.

On May 19, 2011, the Board of Regents gave provisional approval to the Doctor of Nursing Practice (DNP) degrees at the University of Hawai'i at Hilo and the University of Hawai'i at Mānoa. Demonstrating our success in functioning as a System, these programs provide two differentiated pathways that build on the strengths of each campus, support workforce development for rural and urban populations in the islands, and maximize resources. Each campus recognizes each other's credit, faculty have taught across programs, and students can enroll in courses that best meet their interests regardless of home campus. Since obtaining provisional approval the two programs have continued to modify the programs in response to continuing provider shortages, changes in our state and health care delivery system, and demand for the degree.

UH Hilo offers the Doctor of Nursing practice with an emphasis on providing education to improve the quality of life for diverse and rural community populations. The health care needs of persons living in rural Hawai'i was the inspiration for the UH Hilo School of Nursing DNP Program. The degree prepares nurses with practice doctorates to address significant health care issues and resource shortages created by the lack of primary care physicians in these rural communities.

The UH Mānoa DNP program's focus is an interdisciplinary and practice partnership addressing the needs for primary care in a variety of settings. The emphasis is on increasing access to primary care services in community settings and acute care services in hospital settings while creating health care leaders and change agents. The geographic location primarily addresses workforce needs for employers and health systems located on O'ahu.

***Significance/Contribution of this degree:***

The 2010 Institute of Medicine Report, [\*The Future of Nursing: Leading Change, Advancing Health\*](#), took a strong position by recommending a doubling of the number of nurses with a doctorate degree by 2020 and expanding the role of nurse practitioners.

In a 2015 Hawai'i State Center for Nursing [Workforce Report](#), 90% of the 1,312 advanced practice registered nurses licensed in Hawai'i reported the master's degree as the highest degree held. There is a strong need to expand educational opportunities for Hawai'i students in this new role.

The 2017 Hawaii State Center for Nursing report shows that Hawaii has doubled its number of APRN's, increasing the State's Supply of Primary care Providers. More than half of these providers are in a primary care specialty of family health, pediatrics and mental health and are working in remote or rural areas where there are the severest provider shortages in the state.

Nationally, the exponential growth of DNP programs speaks to the continued need for the program. In 2010, there were 153 DNP programs with an additional 106 programs in the planning stage. By 2016, there were 289 DNP programs with an additional 128 new DNP programs in the planning stages.

***Demand projections:*** Several trends indicate increased and continued demand for DNP graduates. The health care industry can expect: (1) ever-increasing lifespans, or the greying of America, with corresponding need for chronic illness management, (2) shifts in health care provision from acute care facilities to the community, (3) direct reimbursements for autonomous care, (4) expanded prescriptive privileges, and (5) nursing leadership roles requiring a terminal degree.

The [Hawai'i Workforce Infonet website](#) is a powerful labor market information system specifically designed for employers, job seekers, researchers and analysts, and others seeking economic and workforce information. As of October 2017, the site identified 732 job openings for registered nurses at an average annual salary of \$78,051. In addition, there were 25 job openings for Nurse Practitioners (NP) at a salary range of \$87,000 to \$131,810. The site noted medium demand for the NP going forward. The anticipated job openings for Nurse Practitioners is expected to increase as there is an increasing physician shortage of 747 medical doctors statewide. Current physician practices are swamped and not accepting new patients. NP's are a logical addition to these practices and to develop stand-alone practices in rural areas.

As of fall 2017, as a System we have awarded 50 DNP degrees: 25 from UHM and 25 from Hilo. Fall 2017 enrollment is currently 117 (UH Mānoa: 85; UH Hilo: 32)

A strong focus of the Manoa program is to prepare DNPs as executive leaders to work in hospitals and large regional health care systems. The majority of UH Mānoa DNP graduates are employed in healthcare organizations on the island of O'ahu and the U.S. mainland, followed by schools of nursing across the UH System and in California. Employers represent O'ahu's major healthcare systems and a Federally Qualified Health Center. Graduates are also employed in state and federal system organizations including the Department of Health and VA on O'ahu, as well as non-profit organizations. Of the 25 UH Mānoa DNP graduates to date, 71% changed positions or were promoted, and 71% received an increase in salary upon completion of the degree. Furthermore, 82% noted that their employer provided tuition support while enrolled in the program.

In contrast, the Hilo program prepares DNPs to work as primary health care providers and in rural health care clinics. Graduates of the UH Hilo DNP are almost exclusively employed in areas that are federally designated as rural under the Health Resources Service Administration (HRSA) and that qualify as medically underserved areas. They are also employed in small health clinics, local doctor's offices, as faculty members in higher education in rural health areas and as sole health care providers in small communities. The UH Hilo DNP program is clearly successful in producing graduates who want to serve rural Hawai'i. Employers of UH Hilo DNP graduates include numerous Federally Qualified Health Centers on Hawai'i Island, the Hawai'i Health Systems Corporation, and across the UH System where graduates are serving as faculty members.

**Accreditation impact (if any):** In 2014, the UH Mānoa and UH Hilo DNP programs were each accredited by the Commission on Collegiate Nursing Education (CCNE) for five years (the maximum for new programs). Both programs will be reviewed again in 2019.

***Examples (2-3) of similar models from peer institutions:***

**UH Mānoa:**

- University of Arizona – Tucson, College of Nursing, DNP
- University of Illinois – Chicago, College of Nursing, DNP
- University of New Mexico – Albuquerque, College of Nursing, DNP

**UH Hilo:**

- University of Wyoming, School of Nursing, DNP
- South Dakota State University, School of Nursing, DNP
- Medical University of South Carolina, College of Nursing, DNP

***Similar programs at other UH campuses (if there is duplication, why is this program necessary):*** The nursing programs across the UH System collaborate and coordinate efforts via the UH Hawai'i Statewide Nursing Consortium. UH Mānoa and UH Hilo are the only campuses that award the bachelor degree and graduate degrees in nursing. UH Mānoa Nursing partners with the nursing programs at three UH community colleges to offer a seamless Associate Degree (AD) to Bachelor of Science (BS) program on Maui, Kaua'i, and with Kapi'olani Community College on O'ahu. UH Hilo and Hawai'i Community College work closely together to support nursing program articulation and progression from AD to BS for students on Hawai'i Island. The DNP programs on O'ahu and Hawai'i Island have created pathways that allow these graduates to progress from the BS to the DNP.

The UH Manoa and UH Hilo DNP programs have marked differences in courses and learning outcomes, which are complementary. The two programs emphasize different aspects for their DNP programs. The UH Manoa program provides graduates with the skills to work in large hospital settings and in healthcare management. The UH Hilo program trains graduates to function as individual practitioners or primary care providers in small clinics in rural environments. The practicum courses for these two programs have very different needs and requirements that are best managed by two distinct programs. The total number of resources required would not decrease if the programs were combined, but it would be difficult to retain the unique emphases that serve a wide variety of health care needs across the state.

***Statement from campus administration of new program's strategic value within the UH System and campus mission, and the Integrated Academic and Facilities Plan.***

Nursing education is recognized in the Integrated Academic and Facilities Plan as an area where must continue to meet the professional workforce needs of Hawai'i.

The UH Mānoa and UH Hilo DNP programs reflect our commitment to leveraging efficiencies across the UH System to meet the needs of our State. The collaborative efforts support local nursing workforce development, with an emphasis on increasing access to primary care services in the community setting, acute services in the hospital setting, strengthened public health nursing and education of nursing leaders.

***Cost and resource allocation/reallocation implications:***

BOR has approved differential graduate nursing tuition for both programs. The increased tuition revenues provide support for accreditation, clinical placement and faculty costs.

## **UH Hilo**

The UH Hilo School of Nursing which encompasses the DNP and undergraduate BSN program receives a total of 1.7 million dollars in allocation from a combination of General and Special/Tuition funding and Program/Course Fees. The allocation for the school has increased from approximately 1.3 million to 1.7 million over the last 6 years. The increase reflects the hiring of additional tenure track faculty to teach in the DNP program along with doubling the lecturer budget for the School of Nursing. During this period course fees have increased from 73 thousand dollars to over 100 thousand dollars.

Costs are kept at a manageable level by leveraging existing interdisciplinary courses and faculty members to teach in the DNP program as well as by 160 MD or APRN trained clinical preceptors and numerous community agencies across the state who open their practices to provide clinical training and guest lectures for students.

The UH Hilo DNP program has been self-supporting and with the change to established status will require no additional resources to be reallocated by the campus.

## **UH Mānoa**

The UH Mānoa School of Nursing and Dental Hygiene \$11 million budget allocation, which includes general, tuition and fee funding, has remained consistent over the past five years. The Department of Nursing instructional budget of \$6.1 million provides support for the 46 faculty FTEs that teach across the Mānoa undergraduate and graduate nursing program offerings including the Hawaii Statewide Nursing Consortium Curriculum supporting seamless articulation from the community college campuses. The department manages resources effectively by ensuring minimum class size for courses and cohorts and leveraging resources among interdisciplinary and community partners. The interdisciplinary courses are taught by faculty from the Communication and Information Sciences Program, Political Science, Public Health, Shidler College of Business, and William S. Richardson School of Law. In addition to compensated faculty, the school has more than 200 adjunct (uncompensated) faculty with graduate preparation and maintains affiliation agreements for field work and clinical laboratories with over 200 healthcare agencies. The program has also leveraged existing resources through its membership in the Nursing Education Exchange (NEXus), a collaboration of doctoral nursing programs, that allows our students to enroll at member colleges and universities to take courses that may not be offered at UHM or UHH.

The UH Translational Health Science Simulation Center, located on the third floor of Webster Hall, is used for learning and pre-clinical experiences for the DNP students. The Center hosts the majority of interprofessional education activities with students from medicine, social work, public health and pharmacy. There is no need for immediate future facilities updates. Classrooms, conference rooms, and faculty offices in Webster Hall were updated in 2014. and include comfortable seating, state of the art audiovisual equipment in each classroom.

The UH Mānoa DNP program has been self-supporting and with the change to established status will require no additional resources to be reallocated by the campus.

Accreditation by the Commission on Collegiate Nursing programs (CCNE) documents the institutional support and that both programs have the program has sufficient faculty, physical, and fiscal resources available to meet program outcomes to meet their unique learning outcomes.

***Impact of program change request on campus budget allocations and mission priority.*** There are no additional costs associated with the request for established status.

The UH Systemwide Nursing Consortium program offerings at multiple campuses and entry points provides a complete portfolio that supports local access for students from Associate Degree to the Doctoral Degree. Present and future workforce demand support the need for two DNP degrees in the UH System. This approach provides for pipeline entry and progression to advanced practice nursing leadership roles to meet the professional nursing workforce needs of the state.

**ACTION RECOMMENDED:**

It is recommended that the Board of Regents approve established status for the Doctor of Nursing Practice degrees at the University of Hawai'i at Hilo and the University of Hawai'i at Mānoa.

### **Executive Summary**

The proposal for provisional status for the University of Hawai'i at Hilo School of Nursing (UH Hilo SON) Doctor of Nursing Practice (DNP) Program was submitted to the Board of Regents (BOR) in October 2010. Provisional status was granted by the BOR in May 2011. The first class of DNP students was admitted to the UH Hilo School of Nursing (SON) in August 2012.

The UH Hilo DNP program was granted full accreditation by the Commission on Collegiate Nursing Education (CCNE) for the program in April 2014.

The strength of the UH Hilo SON DNP program is a result of the initial collaborative efforts between the Hawai'i Island community and the UH Hilo SON. The community voiced a need for primary care access for residents in rural Hawai'i in the face of inadequate and dwindling primary care provider resources. Using this support, the UH Hilo SON was able to develop and implement a DNP program that trained qualified local RNs for advanced practice roles in their communities. Nurses holding the Doctor of Nursing Practice degree are also well prepared for future roles in health care policy, population health, administration and teaching. The program has grown and become established over the past 5 years, and the quality of the program and its graduates have been recognized by health care agencies across the state. Students list the quality of the degree program, individualized attention, and the rural/transcultural tenets as primary reasons for their interest in the program.

The UH Hilo SON DNP program is focused on providing education to improve the quality of life for diverse and rural student and community populations by:

- Improving local students' access to higher education,
- Increasing the range of opportunities for our students, and
- Contributing to Hawai'i's overall economic future by creating an innovative program that meets educational and health care needs of our rural Hawaiian communities.

It is respectfully requested that the Board of Regents approve the change of status from "provisional" to "established" for the UH Hilo SON DNP program.

## **1. Program Organization**

### ***1.1 Vision and Mission***

The UH Hilo SON is dedicated to supporting the mission and vision<sup>1</sup> of UH Hilo in providing a learning environment that is responsive to the needs of a diverse student population and that stresses rigorous high-quality education in a caring, personalized atmosphere. This educational experience is designed to encourage student-faculty interactions and offer hands-on learning and leadership opportunities.

All UH Hilo SON programs produce workforce ready nurses and nurse practitioners to serve rural populations in Hawai'i. Programs emphasize lifelong learning and teach students to deliver culturally congruent nursing care designed for rural environments. The DNP program emphasizes UH Hilo Strategic Plan Goal 2: to inspire excellence in teaching, research and collaboration, and Goal 5: to strengthen UH Hilo's impact on the community, island and state of Hawai'i.

The UH Hilo mission, the SON mission and the DNP mission support academic achievement for all students, are dedicated to inspiring learning, creativity, and exploration inside and outside the classroom, and value the improvement of quality of life for the community.

The UH Hilo SON DNP mission is consistent with professional nursing standards and guidelines for the preparation of nursing professionals. These professional standards below are also the foundation for the program goals, program learning outcomes (PLOs) and the curriculum described later.

- The Essentials of Doctoral Education for Advanced Nursing Practice<sup>2</sup> (AACN, 2006)
- The Essentials in Master's Education in Nursing (AACN, 2011)
- National Task Force on Quality Nurse Practitioner Education's Criteria for Evaluation of Nurse Practitioner Programs (2012)<sup>3</sup>

---

<sup>1</sup> UH Hilo Strategic Plan: <https://hilo.hawaii.edu/strategicplan/2011-2015plan.php>

<sup>2</sup> The Essentials of Doctoral Education for Advanced Nursing Practice <http://www.aacnursing.org/Portals/42/Publications/DNPEssentials.pdf>

<sup>3</sup> Criteria for the Evaluation of Nurse Practitioner Programs (NTF) 4th edition, 2012 <https://c.ymcdn.com/sites/nonpf.site-ym.com/resource/resmgr/docs/ntfevalcriteria2012final.pdf>

The DNP Program goals are:

- Provide doctoral level education utilizing scientific knowledge and clinical research for safe nursing practice in hospitals and communities and which addresses the growing concerns regarding the quality and safety of patient care delivery.
- Educate and train primary care providers (family nurse practitioners) who are grounded in community on population-based health care and health promotion with an emphasis on rural healthcare.
- Educate and train graduates to address health disparities and improve community health outcomes.
- Conduct community based research aimed at engaging community members to address health needs and concerns, health care finance, and policy development within a transcultural framework.
- Provide and develop organizational and leadership management skills to strengthen practice and health care delivery.
- Provide education in health care policy, development, and education.
- Participate in interdisciplinary collaboration for improving patient and population health care outcomes.

In summary, the overarching goal is to prepare nurses with practice doctorates to address significant health care issues and resource shortages in local communities. This goal is accomplished by using scientific knowledge to improve the quality and safety of care by engaging communities to improve health care using health policy strategies and health economics, by training graduates to recognize health disparities, by providing leadership skills to strengthen health care delivery systems, by serving as health educators for clients within rural communities, and by using interdisciplinary collaboration to improve healthcare outcomes.

### ***1.2 Admission Requirements***

The UH Hilo Graduate Office processes all applications to the DNP program. As part of the application process, the graduate office ensures all UH Hilo graduate program requirements are met. All completed applications are reviewed by the DNP Program Coordinator for any discrepancies and forwarded to the DNP Admissions Committee. Applications are reviewed and the Admissions Committee conducts interviews. Highest scoring applicants based on the grading rubric are offered positions in the program. Once applicants accept the position, the DNP Program Office arranges for completion of health requirements, checks licensure status and notifies applicants regarding dates for the Orientation and Summer Institute.

Applicants must meet UH Hilo admission criteria for graduate students, and must hold a valid Registered Nurse (RN) license in the State of Hawai'i. Specific admission criteria can be found on the UH Hilo DNP website.<sup>4</sup>

Additional application documents are required of international applicants in order to qualify for a U.S. State Department student visa.

---

<sup>4</sup> UH Hilo DNP Website: <https://hilo.hawaii.edu/depts/nursing/dnp/>

### ***1.3 Curriculum and Tracks***

The DNP curriculum and program goals at UH Hilo SON are derived from the American Association of Colleges of Nursing “Essentials of Doctoral Education for Advanced Nursing Practice” (the “Eight Essentials”) (AACN, 2006) and National Organization of Nurse Practitioner Faculties Nurse Practitioner Core Competencies<sup>5</sup> (NONPF, 2012). Both documents serve as the blueprint for curriculum development, content mapping, course implementation, and evaluation of program outcomes. In particular, the DNP curriculum is consistent with the two conceptual components advocated in the “Essentials of Doctoral Education for Advanced Nursing Practice”:

1. The program is based on the Eight DNP Essentials.
2. The program prepares the DNP graduate for specialty practice and leadership roles for population-focused family nursing practice (FNP) .

The crosswalk or connections between the DNP Essentials and the course objectives are mapped across the UH Hilo SON DNP curriculum. The curriculum is congruent with national standards for graduate level and Advanced Practice Registered Nursing (APRN).

The career trajectory for nurses is to begin with a Bachelor of Science in Nursing degree. Upon completion of the degree, the BSN graduate takes a state licensure test to become a Registered Nurse (RN). RNs are not licensed to diagnose or prescribe medications, but act as leaders in healthcare teams under the direction of a physician. RNs who want to practice at a level beyond the RN state license may enroll in either a Master of Science in Nursing (MSN) graduate program or a DNP program. There are a number of educational, technical and clinical specializations possible in MSN programs as there are with DNP programs. MSN and DNP graduates may become licensed as Advanced Practice Registered Nurses (APRN). APRNs function as nurse practitioners, clinical nurse specialists, nurse anesthetists, and nurse midwives and play a pivotal role in U.S. health care. One APRN specialization is that of Family Nurse Practitioner (FNP), FNP APRNs are often primary care providers and are at the forefront of providing preventative care to the public. APRNs function independently from physicians.

The terminal practice degree in nursing is the DNP. In Hawai‘i, DNPs who are prepared as nurse practitioners practice independently, and by state licensure are able to diagnose illness and prescribe medications, as do physicians. DNPs, by scope of education in population health evidence-based practice, leadership, and health policy, are prepared to participate in improving healthcare delivery by serving as primary care providers and by providing leadership to help affect positive changes in health care policies and practice.

UH Hilo SON elected to offer the terminal degree rather than the MSN because it will position our graduates to assume advanced roles as national standards evolve in favor of the DNP. The UH Hilo SON DNP program provides the FNP curricula to BSN to DNP entry students, as well as establishing a path for MSN prepared nurses to attain the highest practice degree. UH Hilo’s DNP program gives students specializations in rural health care with a transcultural focus. Our students may add specializations by selecting program electives specific to their interests and career goals.

---

<sup>5</sup> Nurse Practitioner Core Competencies: <http://www.nonpf.org/?page=14>

The National Task Force (NTF) Criteria (NONPF 1995-1997) for Evaluation of Nurse Practitioner Programs is used to guide the population focused Family Nurse Practitioner (FNP) framework embedded within the BSN to DNP program. These criteria are used to determine necessary faculty credentials, curriculum, resources, and program administration. In order to achieve the DNP Program goals, the SON developed DNP program learning outcomes (PLOs) consistent with relevant professional nursing standards and guidelines. Development of the PLOs was guided by the DNP Essentials document (AACN, 2006) and the Practice Doctorate Nurse Practitioner Entry-Level Competencies (NONPF, 2006) and builds on advanced practice guidelines. Below is a list of the nine PLOs or terminal outcomes of the DNP program.

By graduation, students in the DNP Program are expected to demonstrate the following program learning outcomes:

- Synthesize theoretical knowledge and research evidence in designing primary care delivery for diverse populations across the lifespan in rural contexts.
- Use best practices and technology to improve care delivery for diverse individuals, families and communities within the continuum of primary, secondary, and tertiary care.
- Collaborate with multidisciplinary professions, multi-sectoral agencies, and lay communities to influence social and health policies impacting rural population health.
- Assume leadership roles in organizational systems to improve rural population health in local and regional communities.
- Promote adherence to professional and ethical-legal standards of practice by individual professionals and organizations.
- Integrate cultural competence and social justice in addressing health disparities in rural populations.
- Examine research evidence in design, implementation and evaluation of policies and programs for population health in rural communities.
- Create educational programs to develop culturally competent practice and education of the Nursing workforce.
- Design educational programs and evaluation programs to enhance rural community empowerment for health.

The UH Hilo SON DNP program was designed from inception to be an online hybrid program. Most coursework is completed using an online asynchronous format. DNP students are only required to come to campus during the Orientation (for new students), which is combined with the Summer Institute in August, and the Spring Institute residencies each year. There are four residencies for the students progressing from the BSN level to DNP and three residencies for students progressing from MSN to DNP. When DNP students are on campus for orientation and institute residency classes, seminars and workshops are held in the learning lab, seminar rooms or Mookini Library depending upon the nature of the class (need for video conferencing, student presentations, procedure workshops, etc.). Although many students live outside the Hilo area, we find even local students prefer video conferencing and the asynchronous learning format. Many free platforms are also used for student access including Skype, Google Hangout, Zoom and Hālāwai broadcasts.

The DNP Program was developed as a full-time only program of study and at this time there is no part time enrollment option. The full-time study requirement is published on the website and in the

DNP Program Guidelines, applicants are made aware of the full-time study requirement during the admission interview, and it is reviewed during the Orientation/Summer Institute. UH Hilo SON understands that personal or professional challenges may interfere with the student's ability to progress successfully in a full-time course of study. The option for a Leave Of Absence without academic consequence is available to all students. If a student appears to be in academic jeopardy, has not met progression requirements, or is struggling to keep up with classes, the DNP Program Coordinator will contact the student and provide program-planning options.

All students must complete the core nursing requirements for the DNP track. The 10 core courses incorporate the DNP Essentials, PLOs, and course objectives. The DNP theory courses provide the foundational competencies necessary to develop the critical thinking and leadership skills essential to providing informed population-based health care and to advance the nursing profession. The 11 Family Nurse Practitioner-specific content courses follow the NTF guidelines. These courses address the specific content necessary for the nurse practitioner role and include population health content in adult health, pediatrics and women's health. In addition, clinical courses are distributed over 5 semesters with students accruing 675 supervised clinical hours. Content specific theory and clinical hours are required for program accreditation as well as for individual certification to practice as an FNP. NURS 606 Rural Health Promotion is a content specific course for this rural focused program. One elective course in the program allows students to explore a tangential field or topic, develop expertise in a focused area, or contribute to the knowledge base necessary to complete their specific scholarly work. Popular elective courses include advanced psychology, psychopharmacology and ethics.

The *Practice Portfolio* is a student-maintained diary that serves as an inventory representing the learning events that support the goals of the student and the program outcomes. As the DNP student progresses and the learning processes continue, the Practice Portfolio reflects the growth and achievement of the student. Review of the Practice Portfolio entries is done by course faculty at the end of each semester if course assignments relevant to practice are assigned, by the Program Coordinator and/or advisor if the student participated in outside events related to accomplishment of DNP Essentials or PLOs, and by the Practice Inquiry Project (PIP) chair while working on the various projects associated with the development and implementation of the PIP. During Practice Portfolio reviews, gaps in educational opportunities or achievement of DNP practice hours toward the 1000 hours required for FNP certification can be assessed and plans to improve any deficiencies recommended.

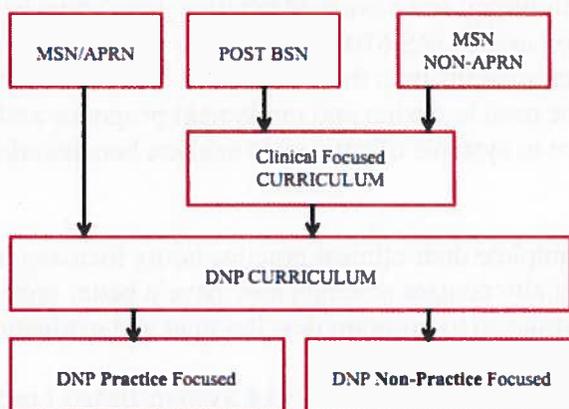

The philosophy of the UH Hilo SON faculty is that practice inquiry begins at the time of admission to the program and culminates with the achievement of the PIP. Each course throughout the program of study is designed to add value to the PIP. Population based advanced practice courses assist the student to define an area or population of interest for the project. Therefore, while the culminating course work is assigned to NURS 617 Practice Inquiry/Project, students progress through the program with the objective of completing aspects of the PIP across the program trajectory. Successful students will defend the project and provide their final written document in NURS 617.

The *Practice Inquiry Project (PIP)* is the culminating DNP project, serving to demonstrate the synthesis of the student's academic and practice endeavors exemplifying critical thinking. The PIP is tangible evidence of the achievement of the PLOs and serves as the foundation for future scholarly

work. The development of the proposal outlined in NURS 612 Evidence Based Practice provides the basis for the PIP for both tracks. Completion requires development and oral defense of a proposal, implementation of the project, an oral defense of the project results, and a final written manuscript. Dissemination of the PIP occurs at the annual DNP Symposium during the Spring Institute. Local dissemination is through the UH Hilo SON Symposia (open to the community beginning in 2015) which is part of the Spring Institute, where graduating DNPs present their projects to fellow students, faculty and outside guests. PIP Chairs encourage students to actively seek conferences for submission of abstracts or podium presentations of the PIP. Finally, DNP students are encouraged to publish their projects in relevant journals. See [Appendix B](#) for a list of PIPs, and [Appendix C](#) for a list of presentations in the community. See Section 5 below for a discussion about the relevance of the program to the University and Community.

The DNP program has two entry tracks: BSN to DNP and MSN to DNP. The DNP Progression Schematic below depicts the entry tracks and pathway to the DNP curriculum and DNP outcome based on track. Both tracks provide strong preparation in social aspects of health, transcultural nursing, rural health care, and evidence-based practice. Both are distance learning programs supported by residencies – the Orientation/Summer Institute and Spring Institutes. The strategy to place both BSN and MSN cohorts together in courses as well as at Institutes has yielded an interactive milieu that strengthens relationships among the cohorts and provides knowledge sharing from both the novice perspective and the mastery perspective.

DNP Progression Schematic for BSN and MSN Entry

### 1.3.1. BSN to DNP

Students admitted to the BSN to DNP program are required to have a BSN degree from an accredited University and have an RN license in the state of Hawai'i. The program meets the family/across the lifespan population-focused nurse practitioner competencies set forth by the NTF (2013). Students admitted to the BSN to DNP program begin with the DNP core courses in the first semester followed by the advanced practice nursing core and population focused specialty courses. Once the advanced practice specialty courses are completed students resume the DNP core courses and progress to the PIP. Students enroll in the program full-time and take the courses in the sequence outlined in the BSN to DNP program map. The aim of the BSN to DNP track is to seamlessly enter students into an advanced degree program that will culminate in the attainment of the highest practice degree nursing. BSN to

DNP students obtain the necessary academic credentials to take the Family Nurse Practitioner (FNP) certification examination upon completion of the program.

Post baccalaureate students largely come to the DNP program with a perspective developed as practicing nurses. For the most part, they view health and wellness on a patient-by-patient basis and their role as providers of care is typically one of attending to a patient and family in hospital or primary care settings. The first semester of the BSN to DNP track curriculum exposes students to population based health disparities through NURS 601 Social Aspects of Health and NURS 612 Evidence Based Practice. NURS 618 Epidemiology/Environmental Health provides epidemiological perspectives and the statistical techniques to analyze them. With an expanded view of health care and population needs, the students move to the core elements of advanced practice including advanced pathophysiology, pharmacology and health assessment. Using the foundational thread of rural health care and cultural diversity (embedded in the Mission and Goals of UH Hilo and UH Hilo SON), students spend semester 3 analyzing and applying rural health theory while simultaneously being exposed to rural health practice environments.

Beginning in year 2, fourth semester, students embark on population-based specialty advanced-practice content by engaging in theory and practice courses aimed at identifying and treating adults and older adults in primary care. The focus on practice this semester is further linked with coursework learned previously in NURS 612 Evidence Based Practice. This course hones critical thinking skills necessary to identify and clarify concepts necessary for understanding how evidence-based practice is used in developing practice guidelines.

Semester five of year 2 continues with theory and advanced practice population-based specialty courses in NURS 609 Primary Care of Women and NURS 610 Primary Care of Children. NURS 611 Advanced Research Methods provides students with the skills to use analytical methods to critically appraise existing literature that will be used to design and implement programs and evaluate outcomes related to practice, patterns of practice in systems of care, or to analyze benchmarks to determine variances in care.

During the sixth semester students complete their clinical practice hours focusing on older adults. With the completion of the population-specialty courses students now have a better understanding of family-based primary care needs and are introduced to program development and evaluation in NURS 613 Program Development/Evaluation.

During year 3, the final year of study, students take NURS 614 System-Based Leadership. In this course they are able to analyze and synthesize knowledge related to leadership theories for use in enactment of the DNP role in health care organizations or to use leadership skills to improve practice, patient outcomes or to influence policy. Concomitantly, students are engaged in NURS 615 Health Policy: Local to Global, a course where students are expected to actively participate in creating, analyzing or advocating for health care policy development or reform.

In the last semester of the BSN to DNP track, students use economic and finance theories to develop a business plan in NURS 616 Health Economics. NURS 617 Practice Inquiry Project is completed in this final semester under the guidance of the PIP Chair and committee.

**Table 1.3.1 BSN to DNP Program Map**

Semester 1 Fall		Credits	Semester 2 Spring		Credits
NURS 601	Social Aspects of Health	3	NURS 603	Advanced Clinical Pharmacology	3

***Implementation of Clinical Practice Experiences***

In addition to the core courses, practice experiences involving skill preparation and mastery are required and enable students to engage in development of new knowledge. BSN to DNP students complete the population-focused clinical courses in a family practice setting. The 675 clinical hours accrued through the clinical lab courses NURS 605 Advanced Health Assessment, NURS 606L Rural Health Promotion Lab and NURS 610L Primary Care of Children Lab are under the guidance of preceptor supervision with oversight by the clinical course faculty. These hours are documented using the Typhon tracking system completed by the student at the end of each semester and reviewed by the clinical course faculty and DNP Program Coordinator. The Typhon summaries are filed in the student's record and used to verify clinical hours for the student's completion of the 1000 practice hours required by CCNE for FNP certification.

Since travel to other islands is prohibitive to students who are on limited budgets, alternative partnerships have been made available via our more than 100 MOUs across Hawai'i, Lāna'i, O'ahu, and Kaua'i. These clinical experiences are culturally rich and have helped make rural health care experiences a reality for DNP students. Independent physicians who were initially reluctant to precept DNP students are now asking for students in their practices, thus opening up new areas of clinical experience. All clinical courses are evaluated by the clinical faculty and are documented in the student's record.

### ***1.3.2. Post-Master's Degree MSN to DNP***

The Post-Master's Degree MSN to DNP track offers nurses with master's degrees a doctoral program, which expands their level of evidence-based practice expertise. The MSN to DNP track to date has attracted nurse practitioners, hospital administrators, and educators.

Students admitted to the MSN to DNP program are required to have an MSN from an accredited university with a concentration in advanced practice, leadership or education. Students are accepted to the program for full-time enrollment and take the courses in the sequence outlined in the program map. (Table 1.3.2)

The objective of the MSN to DNP track is for students to acquire advanced knowledge and leadership experience by building on the foundation of prior master's degree work in order to attain the highest practice degree in nursing. The MSN to DNP track at UH Hilo SON is offered over five semesters.

During the first semester students are enrolled in NURS 601 Social Aspects of Health, NURS 612 Evidence Based Practice, NURS 602 Information Systems and Technology and NURS 618 Epidemiology/Environmental Health. MSN to DNP students participate in these courses along with the BSN to DNP students. For the MSN to DNP students these courses may add or refine existing knowledge or provide new knowledge. Our experience has shown that the MSN to DNP students expand their knowledge of health disparities, epidemiology, and technology while continuing to be challenged in analysis and application of the statistics presented in NURS 618.

During semester three, MSN to DNP students take NURS 613 Program Development/Evaluation and NURS 606 Rural Health Promotion. In the fourth semester, MSN to DNP students gain further skills in NURS 614 System-Based Leadership, NURS 615 Health Policy: Local to Global and NURS 611 Advanced Research Methods, strategically designed to assist students to increase hours in their Practice Portfolios, the method by which students catalogue their activities in learning environments supporting learning goals in leadership, policy, program evaluation and other experiences (see Section 4). In the fifth and final semester, students are enrolled in NURS 616 Health Economics and NURS 617 Practice Inquiry/Project. Conceptually, courses are arranged to build knowledge and skills that once accomplished result in production of a high quality PIP and culminate in achievement of the program objectives.

**Table 1.3.2 MSN to DNP Program Map**

Semester 1 Fall		Credits	Semester 2 Spring		Credits
NURS 601	Social Aspects of Health	3	NURS 611	Advanced Research Methods	3

***1.4 Changes made since the Provisional Program was Approved***

The following changes have occurred in the College of Arts & Sciences:

June 2017 - The leadership for the UH Hilo SON changed to Dr. Alice Davis, PhD, GNP-BC, ACNP-BC, FNP-BC from Dr. Katharyn Daub.

The following changes have occurred in the DNP Program:

August 2015 – Using the formal UH Hilo curriculum approval process, the MSN to DNP track was changed effective for students entering the track in August 2016. The change consisted of the addition of one semester, from 4 semesters to 5 semesters and with the addition of a required course, NURS 606 Rural Health Promotion.

Two major concerns were identified as the students in the MSN to DNP track progressed through the program. The first and most obvious was the lack of a rural health course, which was a significant focus of the program and part of the original PLOs. The addition of NURS 606 Rural Health Promotion as a required course improved the structure of the MSN to DNP track and provided the necessary foundation in rural health that was expected of all UH Hilo SON DNP graduates. The second concern was the unrealistic timing of the PIP project which had to be accomplished in 16 months in order to graduate. The solution was to add an additional spring semester to the second year of study. The response from students was overwhelmingly positive. It allowed them to take more time to research and implement their PIP projects. In addition, the changes created space for an elective of benefit to the student, and has allowed efficient use of program planning that eliminated teaching NURS 617 and NURS 615 twice.

### ***1.5 Advising and Counseling***

A primary goal of the onsite Fall Orientation/Summer Institute is to support students academically, familiarize them with program support, and to provide cohort networking opportunities through informal dinners, receptions, and formalized sessions that facilitate relationship building with their peers and faculty. Prior-cohort DNP students present a Q & A panel during orientation to help new students better understand the academic pathway before them.

During Fall Orientation/Summer Institute, new students meet with the DNP Program Coordinator to review Program Guidelines, Practice Guidelines, and PIP Guidelines in addition to receiving an introduction to the sequence of courses, and to UH Hilo and SON academic services. During the Fall Orientation/Summer Institute students also meet with fall semester faculty either in person or online (for faculty who are not present in Hilo) for introductions to the courses and sometimes for initial class lectures. This gives students the opportunity to understand expectations and ask questions of the faculty.

New MSN to DNP students are encouraged to review faculty CVs and discuss ideas for PIP projects with the DNP Coordinator and other faculty in anticipation of submitting their request for PIP chair advisors in their second semester.

UH Hilo campus and student resources are reviewed and students are encouraged to access services as needed. All support services provided to on-site graduate and undergraduate students are available to DNP students.

DNP program support includes the DNP Program Coordinator and the program assistant. The DNP Program Coordinator serves as the program advisor to all students. A plan of study is mapped for each student during the DNP Orientation/Summer Institute. This is especially important for the BSN to DNP students who need placement in practice sites to meet clinical requirements for certification organizations in advanced practice, and community networking in environments that will develop new knowledge, allow them to grow in new practice areas, and challenge them to meet career goals. The DNP program assistant mentors students one-on-one as needed with technological issues. UH Hilo SON faculty are available for consultation and guidance.

## **2. Program Resources**

The UH Hilo and SON provide sufficient academic support services for all students. Support services are interactive and equivalent to on-campus services as described in the UH Hilo Distance Learning Policy<sup>6</sup>, with UH Hilo and SON resources integral to the quality of support and student success. The support from UH Hilo has not changed from the time of the approval of the program in 2011.

### ***2.1 Number and Distribution of Faculty***

*Faculty:* The SON employs 13 full time faculty: nine (9) full time tenure-track faculty, three (3) instructors and one (1) full time junior specialist lab coordinator (See **Appendix D**). Three additional instructors were also hired as part of a Title III grant collaboration to serve a cohort of BSN students

---

<sup>6</sup> UH Hilo Distance Learning Policy: <https://hilo.hawaii.edu/policies/documents/uhh/vcaa/DEPolicyFINAL10.20.17.pdf>

at UH West O‘ahu. This program will run from 2016-17 through 2019-20. Full time faculty employment equivalency (FTE) at UH Hilo is defined as 9 credits per semester for tenure track faculty which includes a 3 credit release for scholarly activities. For non-tenure track faculty, an FTE is considered as 12 credits per semester. The lab instructor and the Director are 11-month appointments; the remainder of the faculty have nine month appointments.

There are 12 part time faculty lecturers who teach DNP courses in their areas of specialization and expertise. (See [Appendix D](#)).

*Clinical supervision:* The SON faculty-student ratio is in compliance with the Hawai‘i State Board of Nursing (BON) and the practitioner education (NTF) criteria for clinical supervision and evaluation. Clinical courses have 7-9 students at any given time. One clinical faculty member is assigned to the clinical course, who is responsible for clinical site visits or teleconferencing with the student and the preceptor. On occasion, UH Hilo-based faculty attend program planning meetings or clinical site visits with students off island when other meetings require in-person attendance on O‘ahu or other islands where student practicum sites are located.

## 2.2 Faculty Areas of Expertise

The educational background and clinical expertise of the full time and part time faculty is shown in [Appendix D](#). Both UH Hilo SON tenure track and instructor faculty cross teach in the undergraduate programs (BSN, RN-BSN) and the DNP program based on their academic and clinical expertise and to increase interdisciplinary and social diversity. This distribution allows for the most efficient academic and fiscal use of the small UH Hilo SON.

All faculty are prepared minimally at the master’s level, and 80% are prepared at the doctoral level. All faculty teaching in the DNP program have the academic credentials and the practice credentials that qualify them to teach the courses they have been assigned. For the PIP, the SON DNP policy requires two doctoral-prepared UH Hilo SON faculty to be on the committee; one is the chair of the committee and the second is a committee member. Outside committee members are encouraged if their backgrounds contribute to the project focus.

Practice is the vehicle whereby theoretical knowledge and evidence-based knowledge are transformed to influence healthcare outcomes for patients, community populations and health care systems. Practice experience for DNP students is designed to provide exposure through clinical practice, mentorship, leadership and healthcare policy opportunities. Since the goal of practice experiences or “practicums” is to apply, synthesize and exercise critical thinking and decision-making skills, the practicum site and preceptor are key to the learning experience.

In keeping with the NTF criteria, faculty responsible for teaching in advanced practice clinical courses must themselves meet certification and practice requirements.

### *Preceptors:*

In addition to faculty, partnerships have been established among healthcare providers including physicians and community-based advanced practice nurses (APRNs) to help mentor the students to reach practice goals. Preceptors are the core group who teach practice skills outside of the classroom.

They are chosen based on their academic qualifications and their practice expertise, including in health care systems, leadership roles and health care policy positions. Securing preceptor sites is the responsibility of the DNP student, with oversight by the DNP Program Coordinator, and is outlined in detail in the DNP Practice Guidelines. The guidelines provide the process for preceptor selection by students. This process has worked well especially for neighbor island students. All potential preceptors and sites are reviewed by the DNP Program Coordinator to evaluate educational preparation, work experiences and overall qualifications of preceptors, and to ensure that preceptors can support student achievement and expected outcomes. Potential preceptors identified by a DNP student meet (virtually) with the DNP Program Coordinator to understand their role, clinical practice objectives, and expected student outcomes. Roles of the preceptor with respect to teaching, supervision, and evaluation are provided in the DNP Practice Guidelines.

### **2.3 Budget and Sources of Funds**

The UH Hilo School of Nursing has sufficient fiscal resources to support the mission of the school and the goals of DNP and BSN programs. Funding provided G-fund and TFSF fund allocations along with course fees. (See [Appendix A](#))

Funding for the School of Nursing has increased from approximately 1.3 million dollars in the first year of the DNP program to an average operating cost of 1.6-1.7 million over the past 6 years. The increase reflects the hiring of additional tenure track faculty to teach in the DNP program along with doubling the lecturer budget for the School of Nursing. During this period, course fees have increased from 73 thousand dollars to a little over 100 thousand dollars.

### **2.4 Support for Faculty**

Numerous UH Hilo venues are available to faculty seeking support for professional development, research, and scholarly interests. The UH Hilo Research Council provides competitive travel awards, seed grants, and research relations funds available to faculty to support their research. The SON includes a faculty development fund in its annual budget and additional funds are available from the UH Hilo Chancellor's Professional Development Fund. Approximately 80% of SON faculty have received support for conferences or scholarly work.

Consistent with the mission and goals of UH Hilo and UH Hilo SON, faculty demonstrate high achievements in many areas: teaching, research, and scholarship, service, leadership and clinical practice. The expertise of SON faculty members fosters and supports an environment for student success of expected program outcomes. SON faculty have presented at the national and international level, have published research and evidence-based articles, and have provided services in key professional associations and boards. These activities assure that DNP students are exposed to current evidence-based knowledge through coursework and mentorship.

### **2.5 Facilities and Equipment**

The UH Hilo SON has excellent facilities to support both the BSN and DNP programs. All full time faculty are assigned a private office and lecturers share space as needed based on their semester-to-semester commitments.

Teaching facilities include classrooms, a common workspace, a large student computer room, a learning laboratory, a simulation lab and viewing room (with interactive, technologically advanced manikins that simulate live patient situations from neonatal to adult), and a seminar/kitchen space. A conference room is available for faculty and advisory board meetings and retreats. The learning lab is network ready and equipped with state of the art audio/video technology and a 75-inch plasma TV screen. This space is reserved by faculty for their courses or meetings as needed, for the DNP Orientation/Summer Institute and at various times during DNP Spring Institutes. The Learning Lab is staffed by a full time Lab Coordinator (faculty member) who is responsible for coordinating lab space, ordering supplies, and conducting classes as needed. The Learning Lab is also equipped with the accessory equipment needed to care for patients in clinic and urgent care settings. The Mookini Library housing a vast complex of resources and teaching/learning environments, including multimedia classrooms, and small seminar and study rooms are also available.

## **2.6 Collaborative Opportunities**

The strength of our educational resources lie in the communities that we serve and our many established relationships with diverse agencies across the state who actively collaborate with us.

### **2.6.1 Cooperating Agencies**

Many of the liaisons on neighbor islands (Maui, Lāna‘i, Kaua‘i, and O‘ahu) were previously established as partners in our RN to BSN program. At this time, UH Hilo SON has more than 100 agreements (MOAs or MOUs) with healthcare agencies across the state and on the mainland. These include hospitals, ambulatory care settings, the VA Pacific Islands Healthcare System, extended care facilities, and private physician offices. In addition, SON students are also placed in the UH Hilo student medical services clinic that provides a full range of primary and urgent care services. The populations that these agencies serve have diverse needs and concerns. The SON is well respected in the community and has a strong reputation of service thereby attracting numerous agencies across the state seeking our assistance with program development and implementation.

A list of agreements (MOUs) can be found in **Appendix E**.

### **2.6.2 Other Community Resources**

Some non-health care agencies or businesses who contribute to the success of the DNP program include KTA Super Stores, various elementary, middle and high schools on Hawai‘i Island, service organizations and community outreach programs such as the US Army Reserve, County of Hawai‘i Mayor’s Office and the State of Hawai‘i Department of Health. The DNP program through partnerships with these agencies and offices has received support through advisory roles and food commitments (KTA Super Store), space for community health screening (Laupahoehoe Charter School), opportunity to work hand in hand with the Hawai‘i County Mayor's office to deliver wellness programs across the county, and preceptors for DNP students from US Army Reserve providers during Tropic Care, 2016.

### **3. Program Efficiency**

#### **3.1 Cohort Model & Size of Classes**

Students are admitted by cohort in the fall semester every year. Cohort size is twelve students. Each cohort consists of both BSN to DNP and MSN to DNP students. Typically there are more applicants for the BSN to DNP track, thus they represent a higher percentage of the cohort. Class sizes do not exceed twelve to fifteen students depending on the progression of students from previous cohorts, leaves of absence (LOA) and subsequent return, delays in academic progression, etc. Except for the initial cohort of ten, up to twelve students have been offered admission each year.

**Table 3.1.1: Demographics for students admitted into the UH Hilo DNP program since 2012**

<b>Year</b>	<b>Male</b>	<b>Female</b>	<b>Total</b>
<b>2012</b>	2	8	10
<b>2013</b>	0	12	12
<b>2014</b>	3	6	9
<b>2015</b>	0	8	8
<b>2016</b>	1	10	11
<b>2017</b>	1	11	12
<b>Total</b>	7	55	62

#### **3.2 Program Productivity**

To date, UH Hilo SON has enrolled six DNP cohorts and has successfully graduated three cohorts. Table 3.2.1 below shows the DNP enrollment for the first six cohorts. Of the three cohorts admitted to the program (total of 32 students), 5 were lost to attrition or failure to progress. Of the 27 who continued in the program, 25 of 27 have graduated (93%) and an additional 7% (2 of 27) are active students as of December 2017. Therefore, accounting for the attrition rate in the three cohorts eligible for graduation, 84% of students admitted to the program have either graduated or are still active in the program (graduation/active).

Five students were lost to attrition or withdrawal from the program. Of the five students who left the program, two students withdrew during their first semester stating academic demands were not compatible with family responsibilities, a fourth student dropped in his fifth semester citing a change in career plans, and one student was unable to progress due to academic issues.

**Table 3.2.1 DNP Enrollment and Graduation Rates**

	Start	Enroll	All Grad	Active	Drop	Grad %	Grad/Active %
1	Fall 2012	10	7	1	2	70%	80%
2	Fall 2013	13	12	1	0	92%	100%
3	Fall 2014	9	6	0	3	67%	67%
	Subtotal	32	25	2	5	78%	84%
4	Fall 2015	8	1	7	0	12%	100%
5	Fall 2016	11	0	11	0	0%	100%
6	Fall 2017	12	0	12	0	0%	100%

Table 3.2.2 below shows the recognition rate for BSN to DNP graduates achieving the FNP certification that allows APRN licensing in the state of Hawai‘i. There have been twenty-four graduates eligible to take their FNP certification exam among the first four cohorts. Twenty-two of the graduates (85%) have passed the FNP certification exam. DNP graduates are licensed to practice as APRNs in the states of Hawai‘i, Nevada and California.

\* Three students, one from the class of 2013 and 2 students from class of 2014 have not taken the certification exam. All three are expected to take the FNP exam in 2018.

**Table 3.2.2 BSN to DNP Graduation and FNP Professional Certification Rates**

	Cohort Start	Active in Program	BSN to DNP Graduated	APRN Licensure	APRN Licensure %
1	Fall 2012	1	7	7	100%
2	Fall 2013	0	10	9*	90%
3	Fall 2014	0	6	4*	60%
4	Fall 2015	0	1	1	100%
	Total	3	24	22	88%

Master’s prepared RNs enroll in the DNP program to obtain the terminal practice degree. The DNP is a requirement to secure employment in academia or to advance in health care agencies. DNP core courses in program development, leadership, health policy and health economics prepare the DNPs for leadership positions in health care agencies, third party reimbursement venues, and population health program development.

The number of MSN to DNP admissions is smaller in comparison to the BSN to DNP program. To date, twelve MSN to DNP students have been admitted to the program and three have graduated. The remaining nine are active in course work or completing the PIP. The three graduates are currently employed in colleges and universities in rural Hawai‘i (Kaua‘i and Hawai‘i).

Many of the MSN to DNP-eligible students have masters degrees (MBA, MSN) but have not taken the coursework for the certification as a FNP. Therefore, they have chosen to pursue the BSN to DNP track.

The MSN to DNP graduates were local students who are continuing in jobs that require a DNP for academic advancement. These graduates contribute in their rural communities by improving the pipeline of well-prepared nurses.

### ***3.3 Cost per Student Relative to Comparative DNP Programs***

Its challenging to find a truly peer institution to UH Hilo for the DNP. The table below was constructed based on CCNE Accredited programs at institutions with a program focus on rural health. Although the below are mainly larger institutions with low overall graduate tuition. Even with the relatively high tuition at UH Hilo the application demand currently exceeds available seats in the programs. (See section 3.7 below)

**Table 3.3.1 Comparative DNP Programs for the 2017-2018 Academic Year  
(\$ per credit hour & FT semester)**

Location	Resident		Non-Resident	
	Credit Hr.	Semester	Credit Hr.	Semester
UH Hilo <sup>7</sup>	781	9,372	1,558	18,696
UH Manoa <sup>8</sup>	1,001	12,012	1,896	22,752
South Dakota State University <sup>9</sup>	315	NA	605	NA
University of Wyoming <sup>10</sup>	251	4,518	750	13,500
Medical U of South Carolina <sup>11</sup>	835	8,116	985	9,553

### ***3.4 SSH per Faculty***

Full time Tenured or Tenure Track Faculty at UH Hilo have a teaching load of 9 credits per semester, while Instructors and Lecturers may teach up to 12 credits per semester at maximum.

<sup>7</sup> UH Hilo Tuition Rates: [https://hilo.hawaii.edu/uhh/bo/cashier/tuition\\_schedule.php/#2017-2018](https://hilo.hawaii.edu/uhh/bo/cashier/tuition_schedule.php/#2017-2018)

<sup>8</sup> UH Manoa Tuition Rates: <http://www.catalog.hawaii.edu/tuitionfees/regtuition.htm>

<sup>9</sup> South Dakota State University Tuition Rates: <https://www.sdstate.edu/graduate-school/tuition-and-funding>

<sup>10</sup> University of Wyoming: <http://www.uwyo.edu/admissions/graduate/cost-of-attendance.html>

<sup>11</sup> Medical University of South Carolina: [http://academicdepartments.musc.edu/nursing/administration/student-services/tuition\\_fees.htm](http://academicdepartments.musc.edu/nursing/administration/student-services/tuition_fees.htm)

### **3.5 Student Funding**

Students admitted to the program are eligible for federal financial aid. Loan deferment post education opportunities are available through several agencies such as the National Health Service Corps<sup>12</sup>.

### **3.6 FNP Certification for BSN to DNP Students**

The first three cohorts of BSN to DNP students who graduated in May 2015, 2016, and 2017 (Table 3.2.1 and Table 3.2.2 above) were eligible to take the population based FNP certification examination offered either by the American Nurses Credentialing Center (ANCC) or the American Association of Nurse Practitioners (AANP)). Information about the FNP certification examination is provided in the DNP Practice Guidelines, and population content is given and reinforced throughout the family population-focused theory and clinical courses. An 80% certification pass rate was anticipated for Cohort 1. The actual pass rate was 100% for Cohort 1 and 88% cumulative, to date, through Cohort 3. This first-time takers pass rate is consistent with the AACN Standards of Accreditation<sup>13</sup> for baccalaureate and graduate programs (2013).

MSN to DNP students who enter the program have earned a MSN in leadership, education or in a practice specialty such as FNP. Since they have already earned an advanced degree, they are not included in the certification statistics.

### **3.7 Recruitment and Student Demand**

The UH Hilo SON DNP program is gaining state recognition for quality. Much of the success of the DNP program at UH Hilo SON is through word of mouth or encounters with DNP students in their clinical practica. Preceptors see the quality of students and their abilities to diagnose and treat patients. The preceptor network is expanding and students are meeting program outcomes in rural health clinics throughout the state. Consequently, the demand for admission into the program is equal to 220% of the original class (22 vs. 10). In addition, recruitment is done through open houses which are conducted live and via Zoom each fall semester, on the UH Hilo SON DNP site which includes contact information for the DNP Program Coordinator, and by students who provide testimonials to other potential students on the benefits of the program. We have found student satisfaction, success in the program, and individualized communication through email inquiries are the catalysts for the increased number of applicants to the program.

## **4. Student Learning and Student and Program Success**

Effectiveness of the program can be judged by the ability of graduates to obtain FNP board certification and other Advanced Practice qualifications. Over 80% of the BSN to DNP graduates obtained these credentials. Ultimately the program will be defined by graduates securing jobs appropriate to their new skills, reductions in community wait times to see a healthcare worker who

<sup>13</sup> AACN Standards of Accreditation: <http://www.aacnnursing.org/Portals/42/CCNE/PDF/Standards-Amended-2013.pdf?ver=2017-06-28-141019-360>

can provide quality care, alleviation of pressure on existing health care clinics and hospitals, and reduced morbidity and mortality caused by delayed or lack of access to health care.

#### **4.1 Program Quality & Effectiveness**

*Program Expectations.* The UH Hilo SON has developed DNP PLOs consistent with relevant professional nursing standards and guidelines as stated earlier to assure the quality of the DNP program goals. Development of the PLOs was guided by the DNP Essentials document (AACN, 2006) and the Practice Doctorate Nurse Practitioner Entry-Level Competencies (NONPF, 2006) and builds on advanced practice guidelines. Students in the DNP Program are expected to demonstrate the program learning outcomes outlined in Section 1.3 Curriculum.

A program assessment plan that includes both formative and summative evaluation embedded in direct and indirect assessment has been adopted to ensure that the set of nine broad PLOs are accomplished. Specifically, the plan addresses methods to evaluate, revise, or improve the DNP program based on feedback from our students, faculty, and community. Determining the effectiveness and improving the program serves not only current and future graduates but also the university and community where our students learn and will ultimately practice.

*Learning Domains and Styles.* The UH Hilo SON faculty recognizes that students learn from a variety of experiences. Faculty are committed to teaching using methods that respond to the needs of the adult learner while incorporating primary learning styles and domains of adult learning (andragogy) in order to provide all students with the opportunity to not only excel in their preferential style or domain but to experience successful learning in styles or domains less natural for them. The DNP curriculum employs three main types of teaching-learning: visual, auditory, and kinesthetic, providing cognitive, affective, and behavioral experiences to students. In this way, integration of individual learning and achievement of PLOs occurs. Development of a learning community, a salient feature noted in the UH Hilo SON teaching-learning practices, provides a milieu where students and faculty can engage in technology-driven experiences, cohort bonding activities and one-to-one mentoring.

To accommodate the different learning styles of DNP students and to challenge their preferences, a variety of teaching strategies are employed. These include readings, demonstrations, stories, exemplars, and brainstorming, which are used during the Institutes and with synchronous and asynchronous teaching methods. Student assignments may include creating PowerPoint presentations with voice over and weekly posting with responses. Occasionally, faculty require students to produce videos of their work. For example, in NURS 605 Advanced Health Assessment, videos of history and physical exams are requisite assignments before students are cleared for clinical rotations. Required online assignments and discussions engage students using visual and auditory learning styles. Assignments include both individual work and group work fostering student comfort with their own teaching and learning styles and to learn the importance of engaging others.

*Delivery of coursework.* Due to Hawai'i's unique geography, travel to schools on other islands is only possible by air. Consequently, the online distance format was determined to be most beneficial for the UH Hilo SON community because it meets the needs of our potential student constituents who desire an advanced education available in their state or near their home. The exceptions to this are clinical courses that require practice with a preceptor and the required residential institutes mentioned previously, The

DNP distance-learning (DL) infrastructure consists of designated Polycom, computer servers, and distance-learning-capability classrooms, and a simulation lab. Instructional Technology and User Service (ITUS) at UH Hilo manages all technical aspects required for the DNP program. The UH Hilo SON DNP DL program is in compliance with the UH Hilo Quality Online Course Design Guidelines. Online Course design guidelines and tutorial assistance are available for faculty use.

The UH Hilo SON has been very successful in recruiting and training faculty who are now skilled in online course development and delivery. Many innovations in courses have emerged over the last few years and students have been very receptive to the format. Synchronous learning environments with real time visual and auditory interface using web-conferencing expand the teaching-learning methods available to students. This interface allows for lively discussions, presentations, and clarification of content from asynchronous sessions. Synchronous sessions are creatively used by faculty for “simulated patient interviews” or “ask the expert” telephone conferencing. These types of synchronous interfaces may be one-to-one faculty/student sessions or may involve several students with faculty.

Asynchronous learning environments are the primary teaching-learning strategy used in the UH Hilo SON DNP program. Using the Lulima platform, students engage in learning activities at their convenience through the posted lectures (voice over powerpoints), video productions by faculty or students, student case studies, student presentations, and many other innovative teaching activities. Through Lulima, faculty and students can post up to 100 MB of content. If the content exceeds the Lulima storage capacity, a secure file drop option is available which allows delivery of larger files. Specific course assignments can also be graded and posted through Lulima.

Applied and Synchronous learning are learning or practice experiences that support the kinesthetic learning style and affective and behavioral domains. The quintessential model for applied learning is the clinical practicum where BSN to DNP students engage in history taking and physical examination to develop a plan of care. Simulation has also been used to reinforce theories, skills, and practice guidelines.

SimMan® is an interactive technologically advanced manikin allowing learners to practice the emergency treatment of patients, which significantly increases the possibilities for students to practice their hands-on skills and develop their pre-clinical experiences before encountering live patients in clinic and hospital settings. Simulation exercises are included during Institute residencies.

The most powerful part in teaching-learning practices is the Annual Workshop during the Spring Institute. Topics are decided on by the DNP Coordinator based on national agenda items, curriculum gaps or student requests. The workshop is a full day and all DNP students regardless of year are required to attend. Workshop topics have included Statistics (2013), Quality Improvement (2014), Genetics (2015), Complementary & Alternative Therapies (2016), and Evidence-based Practice (2017). Nationally recognized faculty are invited to present at the symposium. The most distinguished Workshop presenter was Dr. Marita Titler in 2017. Her evidence-based workshop captured the attention of students, faculty and community guests. Dr. Titler, who implemented the Iowa Model of evidence-based practice to promote excellence in healthcare, is the premier expert in evidence-based practice in nursing.

*The Culminating Project.* UH Hilo SON has determined that successful completion of the PIP by the student represents achievement of the PLOs. Faculty investment in the student's successful achievement of the PLOs is critical and begins in the first semester. The curriculum is designed to identify concepts and ideas in NURS 612 Evidence-Based Practice and NURS 601 Social Determinants of Health that students can use to further develop in other courses or for use in projects once their PIP chair is assigned. A first draft of a PIP is required in NURS 612. For that reason, PIP chairs are assigned early in the academic journey for the MSN to DNP students (Semester 2, Year 1: January) and at a pivotal crossroad between clinical and theory courses for the BSN to DNP students (Semester 2, Year 1: May). Dialogue occurs during the Spring Institute when students have the opportunity to discuss their ideas with faculty. These academic forums allow the students to present their ideas to faculty and classmates for feedback, thereby enhancing review and oversight opportunities.

A major concern for the program is the timely completion of the PIP project. Many students, including those who have a clear idea for the project and are highly motivated, have been delayed in completing the PIP. Analysis of the issue has yielded several stumbling blocks to the timely completion of the PIP:

- Delay in formation of the problem
- Delay in assignment of a PIP chair
- Full time study demands
- Family and employment conflicts resulting in delays in progression
- Failure to meet graduation deadlines
- Processing of the IRB application for human studies

The following measures have been taken:

- Change in faculty for NURS 612 now provides strong mentorship in developing the problem statement, aims and objective for the PIP, compiling a review of literature and writing a PIP draft (Chapters 1 & 2 of the PIP)
- PIP chairs are assigned in semester 2, first year (moved up by a full semester)
- All faculty are encouraged to add an assignment that further refines the PIP idea. NURS 611 Advanced Research Methodology has facilitated the focus on the PIP through the poster project (an assignment in NURS 611, presented at the annual Symposium)
- Increasing support for students who have family responsibilities

As of 2017, UH Hilo Graduate Council now requires PIP defenses to be completed by April or November of the graduation semester or students cannot participate in commencement (walking with their cohort has been a strong motivation this year). Because of the strong cohort model, this should help to compel students to complete PIPs on time and with their classmates.

A timeline proposed by the student with the assistance of the PIP chair aids in accomplishing the PIP in a timely manner. All courses contribute in some way to the development of the PIP. In the mentor role, the PIP chair also assists the student to choose additional committee members who can enhance

and facilitate the ideas of the project. Often these committee members have access to sites, information or policies that are helpful to the development or implementation of the PIP. These members could also be specialists in a field of interest and provide substantive knowledge to inform the project. All written and defended proposals must be submitted to the University of Hawai'i Institutional Review Board (IRB) prior to implementation.

#### **4.2 Student Learning Outcomes**

*Evaluation of Student Progress.* An evaluation matrix is used to guide the evaluation plan. The plan identified in the Matrix has two assessment components: formative and summative. The goal of these assessments is to assure positive student learning outcomes.

*Formative and Summative Evaluation.* A feedback loop of evaluation between student and faculty is embedded in courses to enhance both student success and program improvement. Student input has been valuable in addressing inefficiencies in both overall program design and delivery of individual courses, and feedback from faculty and preceptors has assisted students to strengthen their study skills and to enhance higher level understanding of course materials. Students are afforded opportunities to provide feedback to the Program Coordinator and to the Curriculum Committee throughout the program.

*Formative assessment.* Monitoring student learning is the goal of the formative assessment process. In the formative level of assessment, faculty and preceptors provide feedback to students through evaluation of course assignments and projects, selected course reviews by course faculty, and clinical practice evaluation of students by preceptors and clinical faculty. Evaluations are given throughout the semester and during the Institute. For example: evaluations of student clinical performance are completed by the clinical faculty during site visits arranged during the semester, providing clinical faculty the opportunity to evaluate and discuss the student's progress with the preceptor and with the student following patient encounters.

*Summative assessment.* Students were surveyed regarding their evaluation of program quality and effectiveness. Summative data on the DNP program completed through 2017 is found below in Tables 4.2.1 and 4.2.2. Table 4.2.1 provides student means for evaluation of courses. Items queried include: was the class beneficial, was the class valuable, was the faculty involved, were course objectives met, were faculty prepared and overall course evaluation. All items for NURS 616 were given scores under 4 with an overall course mean of 3.5. The DNP Program Coordinator and Curriculum Committee revised the courses and faculty teaching the courses based on student feedback. For Spring 2018, a new faculty member who is a DNP with a business background will be teaching the course. Table 4.2.2 shows aggregate data from 2017 related to DNP benchmarks. The response range was between 0-10, with 10 being excellent.

**Table 4.2.1 Average DNP Student Evaluation of Program Courses (2017)**

<b>Course NURS</b>	<b>Overall Rating</b>	<b>Valuable Experience?</b>	<b>Faculty Involvement?</b>	<b>Faculty Meet Objectives?</b>	<b>Faculty Preparation?</b>	<b>Course Overall?</b>
601 Social Aspects of Health	9.4	8.8	9.1	9.6	9.5	9.3

<b>Entire Program</b>						<b>8.2</b>

**Table 4.2.2 Average DNP Student Overall Program Evaluation**

<b>How well did the Institute prepare you for the entirety of the DNP program?</b>	<b>Rate satisfaction - how well your educational goals were met by the DNP program.</b>	<b>Was Program Coordinator helpful in assisting you during the year?</b>	<b>Was Academic Support helpful in assisting you in the process of the year?</b>
7.9	8.4	8.6	8.6

Student achievement of PLOs is also linked to direct assessment. Each student's progress is assessed and monitored throughout the academic experience. Assessment of program quality is ascertained by student performance in signature assignments from select courses that align with one or more of the nine PLOs and eight DNP Essentials. Additionally, Institutes, clinical experiences and other practice opportunities provide ongoing evaluation of program effectiveness.

*Grading criteria.* Graduate students must pass each class with a grade of B or better, and must have a cumulative GPA of at least 3.0 to graduate.

Criteria used to assess student progress are clearly defined for each course, communicated to students via the syllabus and other means, such as grading rubrics, and are applied consistently. Evaluation of a student's work in a course is based on achievement of course objectives as defined by faculty teaching the course. Students have access to all course material including the syllabus and criteria for evaluation through the Lualaba portal for the specific course. Notification of grades for individual or group assignments can be done by student email, Lualaba email, through the assignment setting on Lualaba, through the gradebook setting on Lualaba or another method chosen by faculty teaching the course. Faculty inform students of any performance deficiencies throughout the course. Both student and faculty may schedule a meeting to discuss the issues or concerns of the faculty or the student. Faculty may provide a variety of strategies to assist students to be successful in meeting the evaluation criteria for the course, including but not limited to extra time for exams and project submission, special assistance or timelines for ESL students, extra reading material, or tutoring sessions. In NURS 603 Advanced Clinical Pharmacology, a course taught out of the College of Pharmacy, study guides were made available prior to each exam by the instructor to assist students with difficult concepts. Faculty or student may request advice or assistance from the DNP Program Coordinator at any time.

In designing assessment rubrics, a variety of traditional and innovative assignments may be chosen based on the nature of the course, whether theory or clinical in nature. Evaluation of papers, presentations, videos, case study analyses, patient presentations, online threaded discussions, multiple choice questions, development of education tools or modules, or computer-based assignments may all be employed to determine the final course grade. Often multiple teaching-learning strategies are used in a course to keep students engaged in learning and also to provide a variety of opportunities to be successful.

*Clinical Course Evaluation.* Clinical course grades are awarded either Credit or No Credit. Practice evaluation criteria are set forth in the DNP practice guidelines provided to the students, which includes definitions of successful performance. Evaluation may include clinical site visits with patients, evidence-based learning opportunities with case studies, telephone interviews, posted case studies and responses, summary evaluation of clinical experience, student self-evaluation of achievement of personal objectives, and final evaluation with preceptor and clinical faculty related to performance and achievement of course-specific PLOs.

*Non-Clinical Course Evaluation.* Course faculty and mentors also evaluate selected practice activities embedded in non-clinical courses. Students use the Practice Portfolio, based on the DNP Essentials, to catalogue their activities in learning environments supporting learning goals in

leadership, policy, program evaluation and other experiences. In specific courses NURS 613 Program Development/Evaluation, NURS 614 System-Based Leadership, and NURS 615 Health Policy: Local to Global, students work with healthcare leaders, policy makers and educators to expand knowledge in these areas. Specific practice experiences embedded in these courses are evaluated by the faculty and the preceptor.

#### **4.3 Program Accomplishments**

The DNP program was granted accreditation by the Commission on Collegiate Nursing Education (CCNE) for the program in April 2014 well before the planned graduation of the first cohort in May 2015. The impact of early accreditation for the program meant that new DNP graduates could progress seamlessly to certification as family nurse practitioners. Both the ANCC and the AANP certification boards require students to be graduates of an FNP-accredited program in order to apply for certification.

##### **4.3.1 Prescriptive Authority and Improvement in Access to Medical Care**

Prescriptive authority is based on state licensing laws. UH Hilo SON DNP graduates are currently practicing in three states: Hawai'i, Nevada and California. Hawai'i and Nevada state laws allow APRNs to prescribe without physician oversight. Prescriptive authority in California requires a collaborating physician. Whether independent or collaborative, graduates from UH Hilo SON DNP program are able to prescribe medication in all three states, an important factor in health care delivery, especially in rural areas. Thus, APRN graduates from UH Hilo are improving access to care by virtue of job placement and their prescriptive authority.

##### **4.3.2 Contributions to Financial, Health System Policy and Leadership Needs in the State in Improving Delivery of Cost-Effective Health Care**

The contribution of UH Hilo SON DNP graduates is impressive given the nature of the evidence based practice projects (PIPs) they have completed. Many of the completed PIPs have addressed health care issues that have led to legislative initiatives, have identified problems that require additional support to improve access to care, or have helped to improve cost effectiveness. A full list of PIPs can be found in **Appendix B**. Completed projects have been uploaded to HOKU, the open access repository at the Mookini Library. Three graduates have chosen leadership positions that have led to changes in care coordination, insurance reimbursement, and greater understanding of needs in underserved groups. In addition, NURS 615 Health Policy: Local to Global requires active participation by students in health care issues around the state. NURS 614 System-Based Leadership and NURS 616 Health Economics provide them with foundational and experiential knowledge to contribute to improving population health at the local, state or national level. A list of DNP student activities, including presentations, is listed in **Appendix C**.

##### **4.3.3 Contributions to Education to Improve Care of Selected Health Issues**

As of fall 2017, eight of the 24 (32 %) DNP graduates are employed as faculty in the University of Hawai'i education system or in another state. As faculty, they are teaching in undergraduate programs at the university and community college level and in graduate programs at the university

level. Some graduates are counted in both the APRN statistics as well as in educational environments because APRN faculty must accrue clinical practice hours to maintain their APRN certification in the state where they are working. As educators, they are addressing selected health care issues in their areas of specialty thereby heightening awareness of the health care needs of diverse populations for the new generation of healthcare providers.

In 2006 the AACN recommended that the terminal practice degree would be the gold standard for practice. Graduates of DNP programs who decide to enter academia are essential if this recommendation is to be realized. Studies have shown a severe shortage of doctoral-prepared nurses in university settings. The UH Hilo SON DNP program actively seeks to help fill this need in Hawai'i.

#### ***4.4 Student Post-Graduation Placement***

Graduates of the UH Hilo SON DNP are almost exclusively employed in areas that are federally designated as rural under the Health Resources Service Administration (HRSA) and that qualify as medically underserved areas. The UH Hilo SON DNP program is clearly successful in producing graduates who want to serve rural Hawai'i. The types of positions held by the graduates meet several of the program goals:

- Educate and train graduates to address health disparities and improve rural community health.
- Educate and train primary care providers (family nurse practitioners) who are grounded in community on population-based health care and health promotion.
- Provide and develop organizational and leadership management skills to strengthen practice and health care delivery.
- Participate in interdisciplinary collaboration for improving patient and population health care outcomes.

Graduates are effectively serving rural populations by obtaining positions as Faculty members in academic Institutions in rural areas (5 graduates), Federally Qualified Health Centers (3 graduates), in the Hawaii Health System Corporation (3 graduates) and in Private Practice locations in rural communities (3 graduates). Table 4.4.1 details employment locations below.

**Table 4.4.1 Employment Locations of DNP Graduates**

<b>Employer</b>	<b>Employer Island/State</b>	<b>HRSA Rural</b>	<b>Medically Underserved</b>	<b>Shortage Area</b>	<b>Public</b>
Bay Clinic Inc.	Hawai'i Island	Y	Y	Y	N
Hawai'i Community College Faculty	Hawai'i Island	Y	Y	N	Y
Hawai'i Health Systems (HHSC)	Hawai'i Island	Y	Y	N	Y
Hawai'i Island Family Health Center (HIFHC)	Hawai'i Island	Y	Y	N	Y
Hilo Medical Center (HMC)	Hawai'i Island	Y	Y	N	Y

Advanced Practice					
Independent Physicians Association	Hawai'i Island	Y	Y	N	Y
University of Hawai'i at Hilo Faculty	Hawai'i Island	Y	Y	N	Y
UH Hilo Student Health Center	Hawai'i Island	Y	Y	N	Y
Kapa'a Family Physicians	Kaua'i	Y	Y	N	N
Residency Program-Wai'ānae	O'ahu	Y	Y	Y	Y
Northeastern Rural Health Clinic	California	Y	N	N	N
Federally Qualified Health Center (FQHC)-Nurse Practitioner	California	Y	Y	Y	Y
United Health Services	Nevada	N	Y	N	N

**4.4.1 Contributions to Workforce Needs in Rural Areas and to the Health of Hawaiian People including the Islands of Kaua'i, Maui, Lāna'i, O'ahu as well as Hawai'i Island**

The UH Hilo SON DNP Program employment sites for the three graduating classes are presented in Table 4.4.1 above. Of the total number of graduates (24), twenty have been certified as FNPs and received their APRN state recognition. Of these, 17 received their APRN recognition from the state of Hawai'i, two from California and one from Nevada. Of those who are eligible to practice as APRNs in Hawai'i, seven (41%) are currently employed in rural, medically underserved, shortage areas, or a combination of these designations in the state of Hawai'i. Several of the graduates from the class of 2017 are currently working on their credentialing with the hope of future employment in the state as APRNs.

**5. Program Appropriateness for the School and University**

UH Hilo SON DNP program is congruent with the mission and goals of the University. It met WASC benchmarks in 2012 prior to the admission of the first cohort. The program is recognized on campus as contributing to the needs of the university and the community. As a graduate program it is well respected within the UH Hilo Graduate Council.

The UH Hilo SON DNP program is complementary to the DNP program that is offered by the University of Hawai'i at Mānoa (UHM). The UHM and UH Hilo programs have different foci and offer students options for specialization, with UH Hilo's program specializing in rural healthcare in underserved areas. Both programs were approved as provisional programs in 2011 and are seeking established status concurrently. By offering quality nursing programs, the University of Hawai'i can ensure that future workforce needs are and will continue to be met in the future.

**5.1 Relevance to the Health Care Needs of Hawai'i Island**

The UH Hilo SON is entrenched in community service. The community of interest is broad, encompassing many internal and external constituents. The reputation of the SON in the community is

built on its service contributions. It is through the community of interest (our stakeholders) that common goals are shared and thoughts and ideas are exchanged. It is because of the community of interest that the DNP program focuses on outcomes related to rural health and transcultural aspects of care, and as needed, we revise the mission, goals and objectives to reflect the needs of the community of interest, and we will revise again as those needs change. The relationship between the SON and the community is dynamic and beneficial to all.

The purpose of our university 'ohana/family as outlined in the UH Hilo Strategic Plan is "to challenge students to reach their highest level of academic achievement by inspiring learning, discovery and creativity inside and outside the classroom. Our kuleana/responsibility is to improve the quality of life of the people of Hawai'i, the Pacific region and the world." The UH Hilo SON feels the DNP program is aligned with and meeting the goals of the strategic plan.

The health care needs of persons living in rural Hawai'i was the inspiration for the UH Hilo SON DNP Program. Much collaboration occurred between community constituents and the UH Hilo SON during the development phase of the DNP Program. Community leaders, health care organizations, legislators, and UH Hilo SON faculty all recognized the need for more primary care providers. The UH Hilo SON community of interest is closely linked to the school's advisory board, which is comprised of community stakeholders including a former State legislator, UH Hilo University Relations, a Public Health Nurse Administrator, local business professionals, and other strong community leaders. The advisory board meets twice a year with the UH Hilo SON faculty who report on program development and curricular development, and seek advice on community health care needs. The advisory board also assists with discussions on workforce needs in nursing.

*Demand for the DNP Program in the Hilo Community.* During early planning of the DNP program in 2008, over 20% of graduates of associate degree and BSN programs on Hawai'i Island indicated that higher education in nursing was not available locally. Later, in 2010, 325 professionals were queried related to a DNP program on Hawai'i Island. The surveys were distributed to various members of healthcare teams in hospital and healthcare settings, at nursing conferences, and other organizations where nurses were employed. Of the 139 respondents (43% return) the key points of the survey indicated need and interest to prepare nurses at the DNP level. Such an educational endeavor could meet the practice demands of the increasingly complex healthcare system needs in rural areas facing the island of Hawai'i.

Critical issues that emerged from the community of interest were categorized as needs for potential students and needs for the community. The community focus was on:

1. The need to recognize the uniqueness of rural health care
2. Access to care begins with adequate numbers of primary care providers
3. Leadership in health care system design, finance and policy development

Critical aspects driving the development of the DNP program for potential students were:

1. A need for an educational pipeline that provides advanced nursing education to local nurses
2. An educational format allowing constituents to stay at home to be educated while serving the community in which they live.

It was clear from the surveys that an online delivery of courses would better serve students and communities. With mandatory residencies for orientation and institutes, students are able to establish

critical cohort bonding, access university resources, meet with faculty and engage in real time simulation with actor patients and the simulation family. Hawai‘i and especially Hawai‘i Island is credited with having a large culturally diverse population. This diversity includes the nursing professionals who have come here from the Philippine Islands, Micronesia, China, Korea, and other countries, as well as from the rest of our island state. Because UH Hilo SON embraces a transcultural focus, students with English as a second language (ESL) are welcomed. Of the 10 students in Cohort 1 admitted August 2012, two were ESL students whose native languages were Chinese and Tagalog.

Moreover, the program specifically recruits students from Hawai‘i who want to study in the same place they live and want to give back to the local communities once they have earned their degrees and have the necessary credentials to care for those in their home communities.

In further keeping with the needs of the community, the program has dedicated theoretical and clinical courses in rural health care issues. The curriculum has a family population focus enabling students to obtain certification as a FNP thereby adding to the cadre of primary care providers so desperately needed in rural Hawai‘i. The DNP core courses in leadership, health care finance, and policy development support the need to provide much needed health care system redesign as suggested by the community of interest.

### **5.2 Relevance to the Health Care needs of the State and the Country**

UH Hilo SON DNP graduates—and students—serve Hawai‘i residents in many communities around the state, particularly in rural, underserved areas. Our collaboration with the Wai‘ānae Health Clinic is a prime example of how UH Hilo DNP students fill a need in communities outside of Hilo and Hawai‘i Island. Several of our students practice in their home communities in other states to contribute to the health care needs of those areas, and students yet to graduate have expressed the desire to practice in their home communities on Maui and Kaua‘i. The need for more primary health care providers is a severe problem across the country, especially in rural areas and where often people have fewer resources to access care, especially if they must leave their communities for medical treatment.

### **5.3 Relevance as a Necessary Supporting Discipline**

Our graduates are educated to work in interdisciplinary environments. As APRNs they interface with multiple health care providers including physicians, pharmacists, optometrists, podiatrists, social service caseworkers, mental health services providers, health care agencies, and insurance providers. Each patient encounter in primary care has multiple layers requiring interdisciplinary collaboration.

The Integrated Academic and Facilities Plan for the University of Hawai‘i System states that “UH Hilo efforts at the postgraduate level will focus on ensuring the quality, relevance and enrollment level of its current graduate programs, including providing professional opportunity for residents of Hawai‘i Island.” Due to its unique, culturally relevant and successful placement of graduates in rural health care settings, the DNP program provides an irreplaceable approach to improving healthcare access and delivery within the state and the country, and also provides advanced professional

opportunities for nurses currently practicing on Hawai'i Island and in other rural areas of the State.

### ***Summary***

The UH Hilo SON DNP program is an accredited program that compliments the mission and vision of the University of Hawai'i system generally and UH Hilo specifically. A transcultural caring focus for rural communities is the foundation of the UH Hilo SON programs. This focus is consistent with the UH Hilo strategic goal. With three graduating classes, the overarching goal to prepare nurses with practice doctorates to address significant health issues has been met by achievement of the program outcomes and placement of students in rural and underserved areas within the state of Hawai'i and other areas of the country.

This program is exemplary in that it ascribes to human interaction and cultural diversity in rural settings. Health disparities as reflected in rural population health settings provide the foundation for the core courses. These core concepts are indemnified through relevant applied learning in rural health clinics guided by rural health policies and by addressing access to care through patients and health policy. Most importantly, the DNP program has a unique curriculum focusing on rural and transcultural care, both essential elements for delivery of quality health care in our state.

The DNP Program supports personalized planning of student placement to optimize their practice experiences and provide the necessary exposure to identify system issues as well as individual patient care issues. In an effort to meet student outcomes and enhance the teaching and learning process, student placements in clinical sites are individualized through a program plan geared toward the student's past experiences and future goals as a DNP. The program plan is a joint effort between the student and the DNP Program Coordinator.

In recognition of the University of Hawai'i at Hilo School of Nursing Doctor of Nursing Practice's accomplishments and successes since its inception in 2012, we request your support to grant advancement of this program from provisional to established status.

G. Indicate whether <b>new facilities</b> are needed to support the continuation of the program (include any off-campus facilities)	No new facilities are needed to support the continuation of the program.
---	--

H. Indicate if there are other significant resources anticipated beyond the current year.	No significant resources required.
---	------------------------------------

I. Explain how any new program resources will be funded (e.g., reallocation, grants, contracts)	N/A
---	-----

**J. ADDITIONAL COMMENTS:** Section D, E, F. The figures presented are a shared budget for the entire School of Nursing. Operational budget and faculty SSH are divided accordingly between the BSN and DNP programs.

### Part III: Approvals

By signing below, I have reviewed and approve the Provisional Program Resource Template. (printed name, signature and date)

Department/Division Chair: Alice E Davis  11-14-17

College/Department Administrative Officer: Darren K Higa  11/14/17

Dean: Michael Bitter  11/15/17

Vice Chancellor for Academic Affairs: Kenneth A Hon  11/15/17

Vice Chancellor for Administration: Kalehi'iikapoli Rapoza  11/15/17

### Provisional Program Resource Template Details

A. Headcount Enrollment. Headcount enrollment of majors each Fall semester. Located at URL: [https://www.hawaii.edu/institutional\\_research/enrReport.action?reportId=ENRT00](https://www.hawaii.edu/institutional_research/enrReport.action?reportId=ENRT00) Campus data may be used when majors are a subset of enrollment reported in IRAO reports.

B. Completion. Provide counts of the number of degrees/certificates awarded annual (fall, spring, summer). Located at URL: [https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS\\_DEG\\_TOC](https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS_DEG_TOC)

C. Courses, Sections, SSH. Provide annual count (fall, spring, summer) or courses offered, number of sections offered and SSH. <https://www.hawaii.edu/irodr/login.do?>

D. Resources/Funding. Data should come from the College/Department's Administrative Officer using the most current information available.

E. Academic Personnel. Instructional costs without fringe. Provide direct salary cost for faculty and lecturers teaching in the program for provisional period and current year.

F. Ongoing Operational Costs. Include recurring costs related to program operations, including lab equipment, maintenance costs, accreditation fees, etc.

G. Facilities. Indicate if any new facilities (classrooms, labs, buildings, etc.), including off-campus facilities, are needed to support the continuation of the program.

H. Additional Anticipated Cost. Address whether significant additional resources (human, administrative, legal, etc.) anticipated beyond the years listed in the New Program Resource Template.

I. Funding for Anticipated New Resources. Explain how the department will fund any anticipated costs beyond the current year. If reallocating resources, indicate the source and impact of the reallocation.

## APPENDIX C

### DNP Student Activities in the Community

#### Presentations:

1. The Importance of Timely Documentation for Legality- Tripler Army Medical Center
2. Improving Care Coordination and Care Management While Improving the Capture of Pay for Quality Requirements- Independent Physicians Association
3. Introduction to Lifestyle Medicine

#### Conferences:

1. Archived Monthly Oncology Tumor Boards: A Multidisciplinary Approach to Individualized Patient Care
2. The National Comprehensive Cancer Network
3. CDC Updates Surgical Site Infection Guidelines
4. Counseling Patients About Germline BRCA Mutations
5. Obesity Treatment – Diet, Exercise, Drugs & Surgery
6. American Association of Nurse Practitioners
7. NCCN Guidelines® Updates: Breast Cancer - New Approaches to Endocrine Therapy
8. Systemic Management of Colorectal Cancer
9. Preventing Post-Operative Complications
10. CMI Education Institute Inc. (PESI)
11. Recognizing and Caring for the Patient with Acute Liver Failure
12. American Association of Nurse Practitioners
13. Opioid Prescribing: Safe Practice, Changing Lives 2017
14. PCP View: ACC/AHA Guidelines: Role of Moderate Intensity Statins
15. Medscape
16. Cancer Survivor Screening and Prevention Strategies and Genetic Testing for Patients, Families, and
17. National Comprehensive Cancer Network
18. Motivating Millennials: 3 Unexpected Reasons Why First Year Students Drop Out
19. Every Nursing Program is Unique: Learn How to Optimize Yours
20. Successful Models & Resources to Support Opioid Abuse Prevention and Treatment
21. Improving Diabetes Self-Management Curriculum in Hilo, Hawaii, A Transcultural Approach to Secondary Prevention of Pressure-Related Foot Injury in Micronesian Migrants in Hawaii with Type 2 Diabetes Mellitus
22. Improving Early Screening and Detection of Anorexia and Bulimia by Developing a Structured Guideline for the Primary Care Physician
23. Development of an Evidence-Based Program for Nursing Faculty
24. Homeless Medical Respite Care Post-Hospitalization Awareness of Health Professionals and Homeless Persons in a Rural Hawaii Community
25. 14<sup>th</sup> Annual Asian American Pacific Islander National Association (AAPINA) National Conference: East Meets West in Global Health- Nursing Research, Practice, and Leadership
26. Transcultural Nursing Symposium
27. Integrating Pacific Island Course Content
28. Coaching Skills for Leaders

**Meetings:**

1. Monthly meetings- Micronesians United on the Big Island

**Publications:**

1. Pacquiao, D. & Fried, D. (2016). Social determinants of youth homelessness. *Journal of Nursing Practice Applications and Reviews of Research*, 6(1), 31-38.
2. Hensley, P. & Pacquiao, D. (2014). Social Determinants of Health Disparities Affecting Micronesian Migrants in Hawaii. *The UPNAAI Nursing Journal*. 10(1). 22-30.

**Poster Presentations:**

1. Micronesian Migrant Health Disparities in Hawaii-AAPINA

**Teaching:**

1. Assistant Professors, Instructors, and Lecturers for the University of Hawai'i (UH Hilo) School of Nursing (SON)
2. Bachelor of Science in Nursing (BSN) Coordinator for UH Hilo SON
3. Registered Nurse (RN) to BSN Coordinator for UH Hilo SON
4. Hawai'i Community College Instructors

**Community Service:**

1. Ladies Night Out- Hui Mālama
2. Annual Health Fair- Life Care Center of Hilo
3. Summer Academy- Upward Bound
4. Basic Life Support (BLS) courses taught
5. BLS for Health Care Providers taught
6. National Diabetes Awareness Month Community Health Fair
7. Relay for Life- American Cancer Society
8. Big Island Substance Abuse Council
9. Evidence Based Practice Champion
10. UH Hilo SON Sigma Theta Tau International (STTI) Committee
11. Representative to Hawaii State Center for Nursing
12. Blue Zones, Hawaii
13. US Military Health Screening
14. Daniel K. Inouye College of Pharmacy Annual Health Fair
15. Health Fest

*Dr. Alice Davis  
Director of School of Nursing  
Director of Doctor of Nursing Practice*

Aloha Dr.Davis,

I write on behalf of Dr. Noemi Arzaga, in support of your Doctor of Nursing/Family Nurse Practitioner program.

Noemi was the first graduate of your DNP/FNP program of UH-Hilo and were fortunate to have gained her as one of our provider in our busy medical oncology clinic. She serve as the link between myself and our patients who are receiving active oncologic treatments and highly performs within her score of practice.

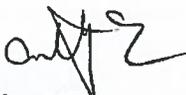

There is a great need of providers most especially in the rural areas of the Big Island where patients have to travel long distance to seek medical oncologic care. Many flies to other islands or go to the Mainland but for majority of the population, serving the underserved, they remain here and receive treatment in the island.

We're the only Oncology Center in the East Hawaii Region and have always been one of the busiest HMC clinic. As the only Medical Oncologist in East Hawaii, I have to make sure that all patients receiving oncologic care have access to medical services and support that our patient needs during and after their oncologic journey. Having Noemi as one of the nurse practitioner working with me side by side, I feel assured that our patients are receiving safe oncologic care and are receiving timely diagnostic and therapeutic services from the beginning of their therapy to the end.

As a partner of a graduate of your program, Dr. Noemi Arzaga, I highly support your nurse practitioner program in bridging the gap of medical access and quality of care, cost-effectivity of care, and it's whole intent of meeting the demand of our growing rural population, to serve as primary care providers (PCPs) in the Island. I hope to see younger nurse practitioners or providers who lives and remain in the island like Noemi to be able to provide, serve, and address the ever increasing medical needs and health care access in our community. I am fortunate to have Noemi chose us and glad to work with her as she continue to serve the medical oncologic needs of our community.

Should you have any question, please let me be informed.

Sincerely,

Dr. Anthony Lim, MD  
Medical Oncologist, Hawaii Pacific Oncology Center

*You're Someone Special*

To: University of Hawaii Board of Regents

From: Derek Kurisu

Re: Doctor of Nursing Practice Program at UHH

Esteemed Board of Regents Members

I am Derek Kurisu, Executive Vice President of KTA Super Stores, located on the Island of Hawai'i. KTA has a long-standing relationship with the University of Hawai'i School of Nursing (UHH SON). I have served on the SON Community Advisory Committee for many years and have been actively involved in supporting the programs offered by the SON, most recently the DNP program. The purpose of this letter is to provide community support for transition of the DNP program from provisional to permanent status.

Early in the development phase of the UHH SON DNP, community leaders like myself were asked what are the major health care concerns facing Hawai'i Island. There was unanimous agreement that the shortage of primary health care was ever present and getting worse. Although there have been many attempts to keep primary care physicians on the island, these efforts have not been sustained. The UHH SON DNP is a critical component of providing primary health care to our local residents across rural Hawai'i Island and other rural areas of the state.

Graduates of the UHH SON DNP program are well prepared to care for the needs of the rural and underserved populations of our state. They have been hired as primary care providers in many rural health clinics as well as state sponsored health clinics (Hilo Medical Center.) The value of the DNP education is being recognized by individuals who seek the care of an NP as well as by physician providers who are hiring DNPs to expand their practice and relieve their workload.

My personal physician, has a nurse practitioner (NP) to help serve his many patients. On most of my last minute doctor visits, I am served by this NP. I am grateful to be being treated and cured by a professional whom I trust. Due to the shortage of physicians on our island, we need more NP to help improve our health care shortage.

To date, the feedback from community groups and individuals is positive. The UHH SON DNP program is making an impact on health care in rural Hawai'i. This DNP program at UHH SON is unique to the needs of rural and underserved Hawaiians and cannot be lost.

Thank you,

Derek Kurisu

### Executive Summary

In May 2011, the UH Board of Regents provided provisional approval to the School of Nursing and Dental Hygiene (SONDH), UH Mānoa (UHM) to offer the Doctor of Nursing Practice (DNP) degree. Enrollment began in fall 2012 and as of fall 2017, we have awarded the DNP degree to 25 students. The fall 2017 student enrollment is 85.

The guiding framework for the program continues to be *The Essentials of Doctoral Education for Advanced Nursing Practice* (the American Association of Colleges of Nursing (AACN), 2006) and the *DNP: Current Issues and Clarifying Recommendations* (AACN, 2015). The DNP Program was accredited by the Commission on Collegiate Nursing Education (CCNE) for five years in 2014. The program will be reviewed again during the SONDH accreditation site visit scheduled for March 2019.

In response to community requests to increase access to the DNP degree, the program was revised in 2015. Two additional post-Master of Business Administration (MBA) pathways and two post-baccalaureate pathways to the DNP are now offered.

The DNP program's focus is interdisciplinary and practice partnership, and draws on faculty within the Department of Nursing (DON) as well as from across the UHM campus. The interdisciplinary courses are taught by faculty from the Communication and Information Sciences Program, Political Science, Public Health, Shidler College of Business, and William S. Richardson School of Law.

During provisional years one to three, the average class size was 10 students. In the 2016-17 year with increased program enrollment, the program increased efficiency noting an average class size of 18 students. The number of DON faculty teaching in the DNP program has increased from .75 FTE in 2012-2013 to 4.25 FTEs in 2016-17. The program continues to be funded using existing general fund and tuition revenues; no additional funds are needed. In 2016-17, the DNP program generated 665 student semester hours (SSH) with an instructional cost of \$605/SSH. With the exception of the first year (due to low initial enrollment), program costs are in balance with the tuition revenue and program budget. The physical resources in Webster Hall available to the program are adequate to meet the needs of the program.

The DNP program uses a systematic process to determine program effectiveness as demonstrated by aggregate student, faculty, and program outcomes using the DON Evaluation Matrix. The DNP program data shows an average completion rate of 74% and retention rate of 79%. The length of time from enrollment to graduation was two years in 2017. Assessment results indicate students are satisfied with their classes, faculty and would recommend the program to a colleague. Alumni are employed in a range of care delivery and academic settings.

### Provisional Program Review Narrative

#### **1) Is the program organized to meet its objectives?**

*(Discussion of curriculum, requirements, admissions, advising and counseling, and other aspects of the program, with reference to its program outcomes. Identify any differences to the program from what was approved by the Board of Regents.)*

The Doctor of Nursing Practice (DNP) program at the University of Hawai'i at Mānoa (UHM) School of Nursing and Dental Hygiene (SONDH) is designed to meet our statewide demand for a highly competent nursing workforce equipped with the skills to ensure the delivery of safe, quality nursing care in Hawai'i. The DNP is designed as a professional (practice) doctorate integrating evidence-based practice, quality improvement, and systems leadership to prepare experts and leaders in specialized advanced nursing practice.

The program outcomes align directly with [\*The Essentials of Doctoral Education for Advanced Nursing Practice\*](#) (AACN, 2006). The program learning objectives prepare graduates who are skilled as novice clinicians, change agents, and systems leaders, capable of integrating evidence to improve the quality of health care.

The DNP graduate is prepared to:

1. Integrate nursing science with knowledge from ethics, the biophysical, psychosocial, analytical and organizational sciences.
2. Demonstrate leadership in organizations and health care systems to promote safe, efficient care delivery to both individuals and populations.
3. Assume a leadership role in the translation and application of research and clinical practice models to improve outcomes to meet health care needs of culturally diverse populations.
4. Utilize technology and informatics to improve health care and to implement change in health care systems.
5. Design, influence, and implement health care policies that affect health care financing, practice regulation, access to care, safety, quality, and efficacy of care.
6. Collaborate with interdisciplinary professionals and teams to improve patient and population health outcomes.
7. Demonstrate health promotion and population health as a priority in improving health care delivery.
8. Demonstrate safe, effective and efficient practice in a defined area of advanced nursing practice.

#### **Curriculum**

The *Essentials of Doctoral Education for Advanced Nursing Practice* is the guiding framework for the DNP program (AACN, 2006). These eight *Essentials* (competencies) are endorsed by both the Commission on Collegiate Nursing Education and the National Academy of Medicine (formerly the Institute of Medicine). In addition to the AACN DNP *Essentials*, the UH Mānoa DNP program goals, learning outcomes, and

## UHM DNP Provisional Academic Program Review for Established Status

curriculum are aligned with the National Task Force on Quality Nursing Practitioner Education (NOPF) *Criteria for Evaluation of Nurse Practitioner Programs*, 2016.

For post-master's students, the curriculum is offered via distance education, enabling students across the state and Pacific Region to access the program. Exceptions to online offerings include nurse practitioner courses that require hands-on skill development (physical assessment and precepted clinical practicum) and courses taught by other colleges.

Specialty Pathways. The SONDH offers the two-year, part-time [Master's to DNP](#) pathway (map) as presented in Appendix A.

Following the attainment of Provisional Status, subsequent community input led to the development of new pathways and specialty areas:

1. Advanced Practice Registered Nurse (APRN) pathways in August 2015:
  - a. The [Adult Gerontology Primary Care Nurse Practitioner](#) (AGPCNP) and
  - b. The [Family Nurse Practitioner](#) (FNP), and
2. MBA-to-DNP Pathway effective August 2017.

*Advanced Practice Registered Nurse (APRN) Pathways.* In 2014, the Department of Nursing (DON) conducted a community assessment including DNP-prepared and other faculty, advanced practice nursing graduate students, and our community partners specific to the uptake of the DNP program. We noted that Hawai'i has a shortage of primary care providers and there is increasing demand for APRNs with clinical skill and competence in system design. Faculty reported that the master's curriculum was not designed to include depth in systems content. The input from these stakeholders indicated a need for post-baccalaureate and Graduate Entry to Nursing<sup>1</sup> pathways directly into the DNP Program. After careful analysis, and with the full support of the faculty, the DON created post-baccalaureate- and Graduate Entry to Nursing pathways directly to the DNP for students selecting the Adult-Gerontology Primary Care and Family Nurse Practitioner tracks. With the addition of post-baccalaureate pathway options for the DNP, the SONDH stopped out the Family Nurse Practitioner, Adult Gerontology Nurse Practitioner, and Nursing Executive Leadership specialties in the master's of science and graduate certificate programs, effective fall 2014. The APRN program maps (pathways) are presented in Appendix B and C.

*MBA-to-DNP Pathways.* Subsequent community input led to the development of the post-MBA in Healthcare pathway and the post-MBA pathway. Individual courses and the curriculum of the two new pathways were developed by faculty based on national trends, input provided by the local community, and engagement with UHM's Shidler College of Business. The first post-MBA students will enroll in fall 2018.

---

<sup>1</sup> For those with degrees in fields other than Nursing and who do not have a Registered Nurse license.

## UHM DNP Provisional Academic Program Review for Established Status

**Eligibility for National Specialty Certification.** The curriculum of the two APRN pathways is designed to ensure eligibility for national certification. Graduates are eligible to sit for national certification by either the American Nurses Credentialing Center or the American Academy of Nurse Practitioners. Future post-MBA graduates from our program who meet the experience criteria will be eligible to sit for national certification in executive nursing practice by the American Organization of Nurse Executives.

### **Requirements**

The basic requirements have not changed since the program's inception. Each student is required to attend summer intensive(s); pass each course in their specialty pathway; develop, implement, and evaluate a DNP Project that makes a significant contribution to healthcare; complete a total of 1,000 hours of academically-supervised practicum; and successfully present their DNP Project proposal and results.

The **Master's to DNP** specialty area requirements have changed slightly over the past five years, from 37 credits to a minimum of 36 up to 53 credits (to meet the 1,000 hour requirement). Course content remains consistent with the *Essentials and NOPF Criteria*. The post-baccalaureate/Graduate Entry to Nursing student completes 77 credits. The requirements for the newly approved specialty areas, **AGPCNP, FNP, MBA-HC, and MBA**, vary by coursework and total number of credits for graduation.

**Table 1: DNP Pathway Credit Requirements**

Pathway	Specialty	Credits Required	Study Options (Program Length)
<a href="#"><u>Bachelor's to DNP*</u></a> <a href="#"><u>Graduate Entry (GEPN) to DNP*</u></a>	Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP)	77	Full-time (3 years) Cohort model
	Family Nurse Practitioner (FNP)	77	Full-time (3 years) Cohort model
<a href="#"><u>Master's to DNP</u></a>	Organizational Leadership	36 - 53	Part-time (2 years) Cohort model
<a href="#"><u>MBA to DNP</u></a>	Organizational Leadership	29 (minimum)	Part-time (3 semester minimum) Cohort model

*\*Post-Baccalaureate and GEPN students must complete the pre-licensure year and obtain the RN license by the end of the first semester of the specialty track coursework.*

### **Admissions**

The admission requirements and process have undergone modification for increased efficiency and effectiveness. We revised our explicit [admission criteria](#) for each specialty area, implemented the use of a software package for application management, Nursing's Centralized Application Service, and standardized a rolling admission process. More information on admissions criteria may be found online. <http://www.nursing.hawaii.edu/graduate/dnp/howtoapply>

**Cohort Model.**

Another significant change was the implementation of a cohort model. The curriculum is based upon a sequential progression, where each course builds upon previous course work to facilitate the development, implementation, and evaluation of the DNP Project. Students enroll and progress as a cohort. We have found this to be an effective strategy to engage adult learners.

**Advising & Counseling**

Roles and responsibilities of key DNP Program personnel have evolved over the past five years. Preadmission advising is provided by the DNP Program Coordinator. As they progress through the program, each student receives advisement, counseling, and support from the (1) Program Director, (2) Program Coordinator, (3) Project Team of Chair, Content Expert, Faculty Member, and (4) Specialty Track Director.

**2) *Are program resources adequate?***

*(Analysis of number and distribution of faculty, faculty areas of expertise, budget and sources of funds, and facilities and equipment.)*

The DON resources including faculty, funding and facilities are sufficient to achieve the mission, goals, and expected student and faculty outcomes for the DNP Program.

**Faculty**

Faculty member mix is sufficient to achieve the mission, goals, and expected DNP student and faculty outcomes. Faculty leading and teaching in the DNP program are ethnically, culturally, and linguistically diverse. The DNP program's focus on interdisciplinary and practice partnership draws on faculty within the DON as well as from across UH and the healthcare community. The interdisciplinary courses are taught by faculty from the UHM Communication and Information Sciences Program, Political Science, Division of Public Health, Shidler College of Business, and William S. Richardson School of Law. See Appendix D for a listing of faculty available for the DNP program.

There are a sufficient number of faculty members available to ensure quality clinical experiences for APRN students. APRN faculty have academic responsibility for the supervision and evaluation of AGPCNP and FNP students and for oversight of the clinical learning environment. The faculty/student ratio for NURS 675 Advanced Practice Clinical is 1:8, which is sufficient to ensure adequate supervision and evaluation of APRN students. Faculty to student ratios comply with Hawai'i Board of Nursing regulations.

In addition to compensated faculty members, the DON has more than 200 adjunct (non-compensated) faculty members. Each volunteer faculty has graduate preparation and commits to providing at least 40 hours per year to the department. Some adjunct faculty members precept the Advanced Practice students, some provide

## UHM DNP Provisional Academic Program Review for Established Status

guest presentations in didactic courses, while others participate in simulation activities in the THSSC, and serve on DON committees.

In 2014, SONDH joined the [Nursing Education Exchange \(NEXus\)](#), a collaboration of doctoral nursing programs that allows our students to enroll at member colleges and universities to take courses that may not be offered at UHM. At the same time, we offer enrollment in certain SONDH courses to students of NEXus participating programs.

### **Budget & Sources of Funds**

The budget for the DNP Program is included in the SONDH overall resources, funding and operational costs are shown in Appendix E. The program continues to be funded using existing general funds and tuition revenues; no additional funds are needed.

### **Facilities & Equipment**

The physical resources in Webster Hall available to the program have not changed since the initial application and are adequate to meet the needs of the program. A majority of the courses continue to be online and SONDH's technology services and the Multimedia Instructional Design team continue to offer state-of-the-art support to faculty, staff, and students.

### **Community Collaboration and Affiliation**

UH Mānoa Nursing partners with the nursing programs at three UH community colleges to offer a seamless Associate Degree (AD) to Bachelor of Science (BS) program on Maui, Kaua'i, and with Kapi'olani Community College on O'ahu. Close to 50% of AD graduates are completing the one additional year of study with clinical placements on their home island. By increasing access to the BS, we have created a pathway for graduates of this program to progress to the BS to DNP program.

Hawai'i Keiki, the school partnership with the Department of Education, was developed to increase academic success of keiki through improved student and campus health. We have a nurse in each Complex Area throughout the state to provide campus based services and participate in career readiness activities. These sites are available for clinical learning of the DNP students.

Students learn through field work and clinical laboratories statewide. The school maintains affiliation agreements with over 200 healthcare agencies and relationships with the clinical faculty, clinical preceptors, and agency placement coordinators to ensure quality clinical experiences for students. Moreover, the importance of the students obtaining experiences in rural, culturally diverse, medically underserved areas of the State (including areas on O'ahu) is emphasized. Responses from students about these experiences are overwhelmingly positive; and the preceptors have indicated their ongoing commitment to the education of our students.

## UHM DNP Provisional Academic Program Review for Established Status

Many of our graduates hold adjunct faculty appointments and serve as clinical preceptors for our students, thereby continuing their support of the School's endeavor to increase the nursing workforce. Clinical practicum sites include Community Health Centers/Federally Qualified Health Centers (FQHC) on O'ahu such as Kalihi Palama Health Center and Waianae Coast Comprehensive Health Center, and on Neighbor Islands such as Lanai Community Health Center, Community Clinic of Maui and Hilo Bay Clinic. Wahiawa Center for Community Health in rural O'ahu has signed a partnership agreement with the school to serve as a site for APRN faculty practice and clinical placement for BS and graduate students. In a typical year, students and faculty provide over 100,000 hours of service to community organizations.

Foundations from throughout the state as well as individual philanthropists provide support for programs and most important, provide scholarships for students.

### **3) Is the program efficient?**

*(An assessment of productivity and cost/benefit considerations within the overall context of campus and University "mission" and planning priorities. Include quantitative measures comparing, for example, SSH/faculty, average class size, cost per SSH, cost per major with other programs in the college, on the campus and, as appropriate, similar programs on other UH campuses. Analysis of numbers of majors, graduates, SSHs offered, service to non-majors, employment of graduates, enrollment in graduate programs, etc.)*

### **Mission & Development Plans**

The School mission, vision, strategic imperatives, and expected student outcomes are congruent with the UHM vision, mission, strategic imperatives, and expected student outcomes. The [University of Hawai'i System's Strategic Directions, 2015-2021](#) will shape the actions taken by the UH System for the foreseeable future. The Mānoa plan for 2015-2021 aligns the plan with the next comprehensive re-accreditation visit from the Western Association of Schools and Colleges (WASC) as well as with the System's Strategic Directions. The DNP program objectives align with and are in support of Mānoa's Strategic Goals.

### **Student Semester Hours**

Each of the DNP pathways vary in length and require varying numbers of credits to meet the *Essentials*. In 2016-17, the DNP program generated an estimated 665 Student Semester Hours (SSH). The SONDH overall annual SSH during this period was 11,330 (see Appendix E).

### **Cost/Benefit Analysis**

During provisional years one to three (2012, 2013, and 2014), new student enrollment was 10, 12, and 6 students respectively. The DNP instructional faculty FTE during this period was 1.25 FTE with two courses offered by other units in years one and two, and three in year three, which are not reflected in the SSH or DON program cost. The average DNP class size during this period was 10 students, which is the adequate enrollment amount for didactic course efficiency in the DON. Other program costs included .50 FTE of a program coordinator, the NEXus Academic Collaborator

## UHM DNP Provisional Academic Program Review for Established Status

Fee (described below), and costs to host the annual summer DNP student intensive. With the exception of year one start-up, program costs for subsequent years were in balance with tuition revenue and the program budget.

The increased program enrollment with an average DNP class size of 18 students has increased efficiency. The clinical courses, due to accreditation and licensing standards, are maximized to an enrollment of 8 students. The graduate nursing differential tuition revenue covers a large share of program costs. The current DNP instructional faculty FTE is 4.25 with three courses offered by interdisciplinary partners at UHM (not included in FTE or SSH). The current Instructional Cost with Fringe per SSH for the DNP is estimated at \$605, which is comparable to other clinically-based program costs such as medicine. The SONDH projects that program costs will continue to be in balance with tuition revenue and the program budget.

### **Service to Non-Majors**

DNP students are fortunate to take UHM courses with students beyond the nursing major. The final year of the program affords the students opportunities for inter-professional collaboration with colleagues across campus (e.g., business, informatics, law, political science, and public health). Students benefit by sharing perspectives unique to their own discipline and enhanced understanding. These more complex courses also enable further refinement of the implementation and evaluation of the DNP Project.

### **4) Evidence of student learning and program success**

*(Assessment of whether or not students are meeting the program outcomes and a summary of the evidence used to reach this conclusion. Data on time to degree trends, retention and actions to increase retention and on time graduation. Indicators of program quality, e.g. accreditation or other external evaluation, student performance on external exams, student employer satisfaction, alignment with Hawai'i economic demand, employment/graduate school trends of graduates, awards to faculty and students, etc.)*

The accomplishments of graduates and strong student, alumni, and employer satisfaction attest to the effectiveness of the program. The regular and formal collection and use of aggregate student outcome data determines program effectiveness and fosters ongoing program improvement.

### **Accreditation Findings**

The DNP Program was accredited by the Commission on Collegiate Nursing Education in 2014. The evaluators reported no compliance concerns with the four standards and 28 criteria, including: *Program Quality* criteria for Mission and Governance, Institutional Commitment and Resources, and Curriculum and Teaching-Learning Practices; and *Program Effectiveness* criteria for Assessment and Achievement of Program Outcomes. To satisfy the five-year requirement, a Continuous Improvement Progress Report was submitted in June 2017 and is currently under review by the Commission on Collegiate Nursing Education.

UHM DNP Provisional Academic Program Review for Established Status

**Student Performance**

Student performance continues to be assessed in accordance with the DON Evaluation Matrix using formative and summative measures. These measures continue to include end-of-course evaluations (done each semester), end-of-program evaluations, and direct measures of student learning.

**Course Evaluations.** Course evaluations provide student perceptions of success in meeting course objectives (mapped to program outcomes). The minimum expectation is a score of 3.5 on a 5-point Likert scale for all items and total mean scores. End of Course Evaluations from 2014 to 2016 indicate that we met or exceeded our benchmark of  $\geq 3.5$  mean score for student perceptions of success in meeting learning outcomes, and instructor effectiveness.

**Table 2. DNP Course Evaluation Survey Results, 2014-2017**

Year	Course	SLO* Mean	Overall Mean
2014	NURS 730	4.4	4.55
	NURS 750	4.3	4.25
	NURS 761	4.6	4.47
2015	NURS 613	3.3	3.63

	NEXus NURS 658	4.0	4.29
	NEXus NURS 5015	4.1	4.00

\*Student Learning Outcome

Direct Measures of Student Learning. In 2015, Direct Measures of Student Learning were mapped to the DNP Program Learning Objectives, and the *Essentials*. These measures focus primarily on the DNP (Capstone) Project, which provides a strong indicator of whether or not students have mastered skills as change agents and system leaders to improve the quality of health care. Faculty assess the development, implementation, and evaluation of the DNP Project during the proposal and final defense.

The DNP Project development is an example of how the curriculum and teaching-learning practices consider the needs and expectations of students. Each student identifies a clinical issue or problem that s/he is passionate about, is pertinent to community need, and/or is amenable to resolution using an evidence-based practice approach. The DNP Projects are embedded in the community and are designed to directly meet the needs of organizations with diverse cultures across the State and in other communities. Per our assessment results, graduates of the program have gained the knowledge and skills of change agents and systems leaders, capable of integrating evidence to improve the quality of health care.

**Student Satisfaction**

The annual Student Experience Survey is a formative annual evaluation of experiences while a DNP student. The minimum expectation is a score of 3.5 on a 5-point Likert scale for all items and total mean scores. In 2015, the survey was reviewed and shortened to focus on four key areas, including overall school experience, Office of Student Services, courses, and clinical/field work learning experiences.

The responses for 2014 through 2016 indicate that we have met our benchmark of  $\geq 3.5$  satisfaction with the school experience. The highest mean score ratings were related to the responsiveness of the School regarding issues that affect learning, advising by the Office of Student Services during the application process, quality of faculty instruction, and the use of technology for courses. See Table 3.

UHM DNP Provisional Academic Program Review for Established Status

**Table 3. DNP Annual Student Experience Survey Results, 2014 – 2016**

	Mean Score 2014-2015	Mean Score 2015-2016
<b>Overall School Experience</b>		
Degree to which my overall experiences in the program facilitates achievement of my career goals.	4.2	4.0
The responsiveness of the UHM Nursing School to issues that affect my learning.	4.0	4.1
Degree to which each course prepared me for subsequent courses.	3.9	3.7
Quality of my program's curriculum.	4.2	3.5
<b>Office of Student Services</b>		
OSS advising during the application process	5.0	4.5
OSS advising throughout the program	3.9	3.3
Processes of student support services (i.e. scholarship applications, graduation, leave of absence)	3.8	3.7
OSS ability to direct me to appropriate UH services (i.e. financial aid, scholarships, learning assistance center, libraries, counseling)	4.4	3.5
<b>Courses</b>		
Quality of faculty instruction	4.1	4.0
Accessibility of faculty outside of class time	3.9	4.1
Faculty responsiveness to issues that affect my learning.	3.9	3.7
Feedback from the faculty (other than grades) you received in your classroom courses.	4.0	3.9
Coordination among instructors for courses with multiple sections	3.9	3.8
Use of Lulima as a teaching platform for your courses	4.3	4.2
Use of technology for online courses	4.4	4.1
<b>Clinical/Field Work learning Experiences</b>		
Degree to which clinical experiences/field work supports successful progression through the program	3.9	4.2

**End-of-Program Evaluations.** A summative evaluation of the experience as a DON student is collected in the final semester for each graduating student. The minimum expectation is a score of 3.5 on a 5-point Likert scale for all items and total mean scores. Although the data is limited, the results indicate the program is meeting or exceeding the benchmark. Results from spring 2017 reflect student ratings that range from 4.7 to 5.0 on achievement of program outcomes and whether or not students would recommend the UHM Nursing program based on their overall DNP experience (mean score rating of 4.7). See Table 4.

UHM DNP Provisional Academic Program Review for Established Status

**Table 4. DNP Annual End-of-Program Survey Results, Spring 2017  
with scale of 1 (lowest) to 5 (highest)**

Item	Mean Score
<b>Overall School Experience</b>	
Degree to which my overall experiences in the program facilitates achievement of my career goals.	4.0
The responsiveness of the UHM Nursing School to issues that affect my learning.	3.3
Degree to which each course prepared me for subsequent courses.	4.0
Quality of advising from faculty or advisor or program director	4.3
Quality of my program's curriculum.	4.0
Availability of required courses	1.6
Process for course registration	3.3
Timeliness of information about the next semester's schedule of courses	2.3
<b>Office of Student Services</b>	
OSS advising for progression through the program	4.3
Processes of student support services (i.e. scholarship applications, graduation, leave of absence)	3.3
OSS ability to direct me to appropriate UH services (i.e. financial aid, scholarships, learning assistance center, libraries, counseling)	3.3
<b>Courses</b>	
Quality of faculty instruction	4.0
Accessibility of faculty outside class time	3.3
Faculty responsiveness to issues that affect my learning.	3.3
Feedback from the faculty (other than grades) you received in your classroom courses.	3.7
Coordination among instructors for courses with multiple sections	2.3
Use of technology for online courses	3.3
<b>Program Outcomes</b>	
Integrate nursing science with knowledge from ethics, the biophysical, analytical and organizational sciences.	5.0
Demonstrate leadership in organizations and health care systems to promote safe, efficient care delivery to both individuals and populations.	5.0
Assume a leadership role in the translation and application of research and clinical practice models to improve outcomes to meet health care needs of culturally diverse populations.	5.0
Utilize technology and informatics to improve health care and to implement change in health care systems	4.7
Design, influence, and implement change in health care policies that affect health care financing, practice regulation, access to care, safety, quality, and efficacy of care.	4.7
Collaborate with interdisciplinary professionals and teams to improve patient and population health outcomes.	5.0
Use advanced nursing practice competencies to improve health outcomes for underserved populations, particularly Native Hawaiians and Pacific Islanders.	4.7
<b>Overall DNP Program Experience</b>	

UHM DNP Provisional Academic Program Review for Established Status

Item	Mean Score
I would recommend UHM Nursing to a close friend	4.7
I would recommend the DNP program to a close friend	4.7
The nursing school provided a positive academic experience	3.7
I was challenged to do my best academic work	4.7
I was motivated to do my best academic work	5.0
The information I learned is applicable to my future career	5.0

**Completion Rates**

To date, the only pathway with graduates is the Master's to DNP pathway. DNP completion rates are 60% for students admitted in 2012, 92% for those admitted in 2013, and 67% for students admitted in 2014 and 2015. The average completion rate is 74%. The retention rate of all cohorts admitted to the Master's to DNP pathway is 79%.

*Table 5. Master's to DNP Student Enrollment, Graduation & Retention*

Term/Year of Admission	# Students Admitted/Enrolled	# Students Withdrew	# Students Currently Enrolled	# and % Students Graduated	% Retention Rate
2012-13	10	3	1	6 / 60%	70%
2013-14	12	1	0	11 / 92%	92%
2014-15	6	2	0	4 / 67%	67%
2015-16	6	2	0	4 / 67%	67%
2016-17	2	0	2	-	100%
2017-18	3	0	3	-	100%
TOTAL	39	8	6	25 / 74%	79%

With the addition of the specialty pathways, student enrollment in the DNP has increased and the retention rate for these cohorts is 85% and above. Table 6 below shows the enrollment and retention of students in the specialty pathways, which includes students pursuing the DNP degree via the GEPN and post-baccalaureate students. The first cohort of DNP specialty students are scheduled to graduate in spring 2018 of which 14 are projected to graduate.

*Table 6. Specialty Pathway DNP Student Enrollment & Retention*

Term/Year of Admission	# Students Admitted/Enrolled	# Students Withdrew	# Students Currently Enrolled	% Retention Rate
2014-15	13	2	11	85%
2015-16	26	3	23	88%
2016-17	22	1	21	95%
2017-18	24	0	24	100%
TOTAL	85	6	79	93% average

UHM DNP Provisional Academic Program Review for Established Status

**Employment of Graduates**

The DNP program demonstrates achievement of required outcomes regarding employment rates. As of fall 2017, 25 DNP students have graduated from our program. These graduates were master's-prepared registered nurses and were all working full-time upon entry to the program. A survey of DNP graduates indicated that after receiving the DNP degree, 71% of graduates changed positions or were promoted and 71% received an increase in salary. Furthermore, 82% of graduates noted that their employer provided tuition support while enrolled in the program.

The majority of DNP graduates are employed in healthcare organizations on the island of O'ahu and the U.S. mainland, followed by schools of nursing across the UH System and in California. Employers represent O'ahu's major healthcare systems and a Federally Qualified Health Center. Graduates are also employed in state and federal system organizations including the Department of Health and VA on O'ahu, as well as non-profit organizations.

**Table 7. DNP Graduate Employers & Location**

<b>Employer Organization</b>	<b>Employer Island/State</b>
<b>Healthcare Organizations</b>	
Advantage Health Care Provider, Inc.	O'ahu
Adventist Health Castle	O'ahu
Kaiser Permanente	O'ahu
Pali Momi Medical Center, Hawai'i Pacific Health	O'ahu
The Queen's Medical Center West O'ahu	O'ahu
Straub Medical Center, Hawai'i Pacific Health	O'ahu
Wai'anae Coast Comprehensive Health Center (FQHC)	O'ahu
Chico Enloe Hospital	California
Kaiser Permanente	California
Mission Health System	North Carolina
<b>Universities and Colleges</b>

California State University	California
<b>State/Federal Systems</b>	
Hawai'i State Department of Health, Public Health Nursing Branch	O'ahu
Spark M. Matsunaga VA Medical Center	O'ahu
U.S. Air Force	Georgia
<b>Non-Profit Organizations</b>	
CHOW Project (Hawaii Statewide Syringe Program)	O'ahu
Life Foundation	O'ahu

### **Placement & Employer Satisfaction**

As a result of the required DNP Project, students have the opportunity to fully integrate didactic coursework in practice settings with an end goal of significantly influencing healthcare outcomes. The DNP Project meets the needs of students while simultaneously meeting the needs of the community, creating a win-win for both parties.

DNP Project sites vary across the healthcare continuum: from acute to long-term care, public and private institutions, and profit and non-profit organizations. Additionally, the growth of the program is requiring an increase in the number of DNP Project sites. In 2016, we sent a request to our community stakeholders asking them to identify topics that DNP students could assist them with. Fortunately, positive experiences with previous DNP students have engendered community support and accommodation for these additional students and their Projects. Additionally, DNP graduates in our community are generous with their support of the program and agree to serve as mentors (content experts) for the students.

### **Awards to Faculty & Students**

Three DNP faculty members are Fellows in the American Academy of Nursing and one in the American College of Nurse-Midwives. One DNP student has been awarded the Jonas Veterans Healthcare Program scholarship. This scholarship is a component of the Nurse Scholar Program that aims to increase the number of advanced practice nurses and faculty who are trained specifically in the unique needs of our veteran population. Several graduates have published their DNP project results in peer reviewed national journals.

### **5) Are program objectives still appropriate functions of the college and university?**

*(Relationship to University and campus mission, Strategic Plan and the Integrated Academic and Facilities Plan, evidence of continuing need for the program, projections of employment opportunities for graduates, etc.)*

*"UH Mānoa must also continue to meet the professional workforce needs of Hawai'i in areas such as education, medicine, nursing, law, business, social work and engineering. Work must continue to integrate education, innovation and scholarship, across disciplines, and to develop the next generation of Hawai'i's leaders."*

*- [UH Integrated Academic & Facilities Plan](#)*

In 2011, both the University of Hawai'i at Hilo and UHM DNP degree programs were approved as provisional programs. The two DNP programs complement each other and provide students a range of pathways and focus areas. The UHM Hawai'i Keiki site at Mountain View School on the Island of Hawai'i is a clinical site for UH Hilo DNP students. As the public university system for the State, the quality, educational nursing programs offered by UH ensure access to care by preparing the DNP workforce to improve the health of residents of Hawai'i.

UHM DNP Provisional Academic Program Review for Established Status

**Need for Continuance**

Hawai'i has a shortage of primary care providers and there is increasing demand for advanced practice nurses (APRN) with clinical skill and competence in system design. With the addition of the post-baccalaureate/Graduate Entry in Nursing pathways, applicants to the DNP program exceed the available seats (see Table 8) and it is anticipated that this trend will continue based on increased demand for the advanced skills necessary for needed improvements in the quality of health care. In the provisional application, it was anticipated that 24 part-time students would be enrolled in the program each August. As of fall 2015, the program has met and exceeded this enrollment projection.

**Table 8. DNP Program Applicants and New Enrollments**

Fall Semester Start	Number of Applicants		Number of New Enrollments	
	Post-Master's DNP	Specialty DNP	Post-Master's DNP	Specialty DNP
2012	34	N/A	10	N/A
2013	27	N/A	12	N/A
2014	15	95	6	13
2015	21	112	6	26
2016	24	125	2	22
2017	11	162	3	24

Several trends indicate increased and continued demand for DNP graduates. The health care industry can expect: (1) ever-increasing lifespans, or the greying of America, with corresponding need for chronic illness management, (2) shifts in health care provision from acute care facilities to the community, (3) direct reimbursements for autonomous care, (4) expanded prescriptive privileges, and (5) nursing leadership roles requiring a terminal degree.

The [Hawai'i Workforce Infonet website](#) is a powerful labor market information system specifically designed for employers, job seekers, researchers and analysts, and others seeking economic and workforce information. As of October 2017, the site identified 732 job openings for registered nurses at an average annual salary of \$78,051. In addition, there were 25 job openings for Nurse Practitioners at a salary range of \$87,000 to \$131, 810. The site noted medium demand for the NP going forward.

**Employment Opportunity Projections**

As stated above, there are several trends that indicate employment opportunities for DNP graduates will increase. Additionally, it is projected that specialty nursing organizations and possibly insurance companies will require the DNP degree of all APRNs; it will become required for entry into practice.

**Relevant Contribution**

The DNP program provides the pathway for graduate- and bachelor's-prepared nurses to continue formal education and access a program targeted to the needs of

their practice area. It continues to support workforce development for nursing, with an emphasis on increasing access to primary care services in community settings and acute care services in hospital settings while creating health care leaders and change agents. The program ensures access to the requisite education for advanced practice nursing, contributes to the development of a stronger primary health care system, and improves the health of the residents of the State of Hawai'i.

### **National Needs**

The 2010 Institute of Medicine Report, [\*The Future of Nursing: Leading Change, Advancing Health\*](#), took a strong position by recommending a doubling of the number of nurses with a doctorate degree by 2020 and expanding the role of nurse practitioners.

In a 2015 Hawai'i State Center for Nursing [\*Workforce Report\*](#), 90% of the 1,312 APRNs licensed in Hawai'i reported the Master's degree as the highest degree held. We have a need to expand educational opportunities for local students in this new role. Hawai'i's diverse population and geographic location offers an opportunity to educate APRNs who provide culturally-tailored, quality health care to the people of this region.

### **International Needs**

Nursing clinical roles, education levels, administrative responsibilities, and expectations for scholarship vary across the globe. The United States, by far, has the highest standards for the nursing profession. A master's degree is attainable in some Pacific region nursing programs, but employment opportunities do not often utilize the role to its fullest extent. That said, a minority of nurses are educated in the United States and return to their home of record to practice. The School's DNP program is perfectly situated to meet the expanding interest in and need for higher nursing education across the region.

### **Educational Needs**

Nationally, the exponential growth of DNP programs speaks to the continued need for the program. In 2010, there were 153 DNP programs with an additional 106 programs in the planning stage. By 2016, there were 289 DNP programs with an additional 128 new DNP programs in the planning stages; 62 of those are post-baccalaureate and 66 are post-master's programs. Between 2014 and 2015, the number of students enrolled in DNP programs increased from 18,352 to 21,995 and the number of graduates increased from 3,065 to 4,100. SONDH is experiencing this same level of interest in the DNP program.

## PROVISIONAL PROGRAM RESOURCE TEMPLATE

This template identifies resources needed to support the provisional program and its relationship to the existing departmental/division resources. Please include an explanation of this analysis in your established-status request narrative.

Campus: UH Manoa

Provisional Degree/Certificate: Doctor of Nursing Practice (DNP)

Date of BOR Approval: May 2011, Effective Fall 2012

College/Department/Division: School of Nursing and Dental Hygiene

Other Programs offered by the College/Division: BS in Nursing (BSN), MS in Nursing (MSN), PhD in Nursing, BS in Dental Hygiene

<b>Part I: Program Overview</b>		<b>Provisional Years: 2 yrs for Certificates; 3 yrs for Associates and Master's; 5 yrs for Doctorates; 6 yrs for Bachelor's</b>

**G. Indicate whether new facilities are needed to support the continuation of the program (include any off-campus facilities)**

None. The physical resources in Webster Hall available to the program have not changed since the initial application and are adequate to meet the needs of the program.

**H. Indicate if there are other significant resources anticipated beyond the current year.**

No other significant resources anticipated

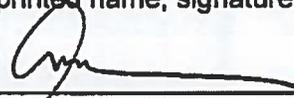

**I. Explain how any new program resources will be funded (e.g., reallocation, grants, contracts)**

If new program resources are identified for the future, costs would be funded from reallocation within school budget (source: graduate differential tuition).

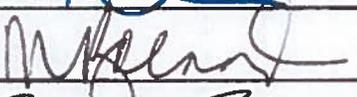

**J. ADDITIONAL COMMENTS:**

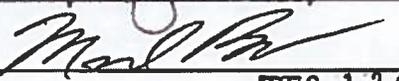

**Part III: Approvals**

By signing below, I have reviewed and approve the Provisional Program Resource Template. (printed name, signature and date)

Department/Division Chair: *Alice Tse, PhD, APRN, RN, FAAN, Department of Nursing Chair*  12/5/17

College/Department Administrative Officer: *Christopher Kanehiro, Administrative Officer*  12/5/17

Dean: *Mary G. Boland, DrPH, RN, FAAN, Dean, School of Nursing and Dental Hygiene*  12/6/17

Vice Chancellor for Academic Affairs:  12/19/17

Vice Chancellor for Administration:  

## **Provisional Program Resource Template Instructions**

- A. Headcount Enrollment.** Headcount enrollment of majors each Fall semester. Located at URL: <https://www.hawaii.edu/institutionalresearch/enrReport.action?reportId=ENRT00> Campus data may be used when majors are a subset of enrollment reported in IRAO reports.
- B. Completion.** Provide counts of the number of degrees/certificates awarded annual (fall, spring, summer). Located at URL: [https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS\\_DEG\\_TOC](https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS_DEG_TOC)
- C. Courses, Sections, SSH.** Provide annual count (fall, spring, summer) or courses offered, number of sections offered and SSH. <https://www.hawaii.edu/irodr/login.do?>
- D. Resources/Funding.** Data should come from the College/Department's Administrative Officer using the most current information available.
- E. Academic Personnel.** Instructional costs without fringe. Provide direct salary cost for faculty and lecturers teaching in the program for provisional period and current year.
- F. Ongoing Operational Costs.** Include recurring costs related to program operations, including lab equipment, maintenance costs, accreditation fees, etc.
- G. Facilities.** Indicate if any new facilities (classrooms, labs, buildings, etc.), including off-campus facilities, are needed to support the continuation of the program.
- H. Additional Anticipated Cost.** Address whether significant additional resources anticipated beyond the years listed in the New Program Resource Template.
- I. Funding for Anticipated New Resources.** Explain how the department will fund any anticipated costs beyond the current year. If reallocating resources, indicate the source and impact of the reallocation.

President

VIA: *Donald O. Straney*  
Donald O. Straney  
Vice President for Academic Planning and Policy

VIA: *John Morton*  
John Morton  
Vice President for Community Colleges

FROM: *for* Manuel J. Cabral *Della Teraska*  
Chancellor

SUBJECT: REQUEST APPROVAL TO CHANGE FROM PROVISIONAL TO ESTABLISHED STATUS, LEEWARD COMMUNITY COLLEGE, ASSOCIATE IN SCIENCE IN HEALTH INFORMATION TECHNOLOGY

SPECIFIC ACTION REQUESTED:

It is requested that approval to change from provisional to established status, Associate in Science in Health Information Technology (HIT) be granted.

RECOMMENDED EFFECTIVE DATE:

Upon Board of Regents approval.

ADDITIONAL COST:

None.

PURPOSE:

Leeward CC has the only HIT Program in the University of Hawai'i Community Colleges (UHCC) System. In May 2017, the HIT Program was awarded accreditation by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). Leeward CC students are now eligible to take the Registered Health Information Technician (RHIT) national certification that leads to higher paying jobs.

BACKGROUND:

Board of Regents (BOR) Policy, RP 5.201, III.B.2 states: Each provisional program shall be reviewed at the end of its first full cycle. The request to the board for "established" program status shall be submitted in the academic year following the end of the program's first full cycle.

The Leeward CC Associate in Science (AS) in HIT is a 61-credit stackable degree, which includes a Certificate of Competence (16 credits) and a Certificate of Achievement (31 credits). The HIT Program provides classroom instruction that integrates both lectures and practical applications, professional practice experience (practicum), and study preparation for the RHIT. The HIT Program received its provisional program approval by the University of Hawai'i (UH) BOR on May 17, 2012.

The Bureau of Labor Statistics, U.S. Dept. of Labor, *Occupational Outlook Handbook* states: Employment of health information technicians is projected to grow 13 percent from 2016 to 2026, faster than the average for all occupations. Job Prospects: Prospects will be best for those with a certification in health information, such as the RHIT or the Certified Tumor Registrar (CTR). Source: <https://www.bls.gov/ooh/healthcare/medical-records-and-health-information-technicians.htm#tab-6>

The HIT Program received CAHIIM accreditation in May 2017. Six students have passed the RHIT national certification.

ACTION RECOMMENDED:

Recommend approval to change from provisional to established status, Associate in Science in Health Information Technology be granted.

# HEALTH INFORMATION TECHNOLOGY PROGRAM

## BACKGROUND

The Business Technology (BTEC) Program created and executed a Certificate of Completion (CC) in Health Information Technology (HIT) with the Wai'anāe Coast Comprehensive Health Center (WCCHC) in 2007. WCCHC was awarded an Alu Like Grant for the Native Hawaiian Career and Technical Education Programs (NHCTEP) from the Department of Health and Human Services (DHHS) to offer a HIT certificate. The BTEC Program's Business and Industry Advisory Board (April 2010 meeting) encouraged the program to expand the CC in HIT to an associate degree because of the upcoming need for HIT professionals. Most entry-level HIT professionals are responsible for medical coding, which is the transformation of healthcare diagnosis, procedures, medical services, and equipment into universal medical alphanumeric codes. The diagnoses and procedure codes are taken from medical record documentation, such as transcription of physician's notes, laboratory and radiologic results, etc. In the 2012 New Program Proposal, Leeward CC modified its Certificate of Completion in HIT and included it in a stackable, 64-credit associate degree program.

The University of Hawai'i (UH) Board of Regents (BOR) granted provisional approval to Leeward CC's Business Division to offer the HIT Program in May 2012. Although the Program anticipated 20 majors, there were 28 HIT majors in its first year. Between 2012 to present, there have been 630 declared HIT majors.

At the time of the BOR's approval, Heald College was the only associate degree Health Information Technology (HIT) Program accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). In April 2015, Heald College ceased its operations; now Leeward CC has the only CAHIIM accredited associate degree program in the State of Hawai'i.

## PROGRAM ORGANIZATION

### Leeward CC Mission Statement

*At Leeward Community College, we work together to nurture and inspire all students. We help them attain their goals through high-quality liberal arts and career and technical education. We foster students to become responsible global citizens locally, nationally, and internationally. We advance the educational goals of all students with a special commitment to Native Hawaiians.*

### Program Vision

Leeward's Mission Statement inspired the Business Division to create the HIT Program that included:

- High-quality career and technical education.
- Careers in high-growth areas.

- High professional wages in Hawai'i.
- Opportunities for students in underserved populations.
- Profession with job opportunities, especially federal, around the world to provide our active military/veterans and its families a stable career.
- Careers with upward mobility.
- Nationally-recognized accredited program.
- Path for students to transfer to a bachelor's degree program.
- Prior Learning Assessment (PLA) opportunities for returning adults.
- Path from Leeward CC's Office of Continuing Education and Workforce Development's (OCEWD) non-credit coding program to the credit HIT Program.

### Program Learning Outcomes (PLOs)

- Perform basic coding tasks and maintain accurate reimbursement systems including the preparation of patient access, registration, and patient accounting statements.
- Access, analyze, and interpret data to solve basic health information coding, patient accounting, and supervisory problems.
- Organize, prioritize, and perform work tasks to meet deadlines and schedules.
- Apply health information, records management, and patient financial/patient accounting laws; and code basic cases with industry reimbursement procedures by patient insurance type.

### Advising

The Business Division has a dedicated academic counselor that works with the Academic Specialist to recruit, register, and retain all HIT students. The counselor has been recognized by students and faculty for her dedication to this program, and especially, for helping students to graduate with all of the necessary courses despite a change in curriculum. In addition, the counselor was a key person, along with the Program Coordinator, that helped transition the Heald College students into the Leeward CC HIT Program. In addition to the Business Division counselor, other general counselors are available to advise students.

### Curriculum

The 2012 HIT Program Provisional Proposal (below) included a stackable associate degree (64 credits), which also included a Certificate of Completion (17 credits) and a Certificate of Achievement (34 credits).

Certificate of Completion (17 credits)			First Semester		
Course Alpha/No.	Course Title	Credits			
BUS 101	Business Computer Systems	3

HWST 107	Hawai'i: Center of the Pacific (DH/HAP)	3			

The HIT Program integrated existing Business Division courses in Fall 2012 and created experimental HIT-specific courses as advised by CAHIIM for its 2012 associate degree standards.

Through the direction of CAHIIM and its 2016 associate degree standards, the HIT curriculum was changed and approved through Leeward’s program and course modification process, and it became effective Fall 2016. The HIT sequence of courses lead students toward a Certificate of Competence (16 credits), a Certificate of Achievement (31 credits), and an Associate in Science degree (61 credits). The original Certificate of Completion was changed to a Certificate of Competence. The HIT Industry Advisory Committee has reviewed the curriculum changes to ensure that the student learning outcomes appropriately address the CAHIIM standards, course content, and industry standards.

Three modes of delivery (in person, hybrid, and online) are used to present the HIT curriculum on a rotation basis. The Program also offers the classes at different times of the day and evening in order to address the schedule needs of full-time day students, as well as part-time or evening students.

The Professional Practice Experience and RHIT Study Prep (HIT 192) provides students with an opportunity to simulate a coder’s duty through the HIT Simulated Worksite, as well as practice under the supervision of a community RHIT professional. Below is a snapshot of the current HIT Program. The student advising sheet (Appendix A) also highlights various jobs and certifications available to the students while working toward his/her associate degree and RHIT certification.

### HIT Program, Effective Fall 2016

Certificate of Competence (16 credits) First Semester				Associate in Science (16 + 15 + 15 + 15 = 61 credits) Third Semester			
Course Alpha/No.	Course Title	Credits	Online	Course Alpha/No.	Course Title	Credits	Online
HIT 101	Healthcare Delivery Systems <i>Experimental course known as HIT 197A, effective Fall 2016</i>	3	✓	HIT 115	Reimbursement Methodologies <i>Formerly known as BUSN 115</i>	3	✓
HIT 102	Health Data, Records, and Documentation <i>Formerly known as Introduction to Health Information Technology; name change effective Fall 2016</i>	3	✓	HIT 208	Advanced Coding I <i>Formerly known as Advanced Diagnostic Coding</i>	3	
BUS 101	Business Information Systems <i>Formerly known as Business Computer Systems</i>	3	✓	HIT 209	Advanced Coding II <i>Formerly known as Advanced Procedure Coding</i>	3	
BIOL 130	Anatomy and Physiology (DB)	4	✓	HIT 215	Quality Management	3	
BIOL 130L	Anatomy and Physiology Lab (DY)	1		HIT 220	Healthcare Computing and EHR <i>Experimental course known as HIT 197D</i>	3	✓
HLTH 110	Medical Terminology	2	✓	Fourth Semester			
Certificate of Achievement (16 + 15 = 31 credits) Second Semester				Course Alpha/No.	Course Title	Credits	Online
HIT 108	Introduction to Diagnosis Coding	3	✓	HIT 176	Statistics with Healthcare Science Applications <i>Experimental course known as BUSN 198B, Healthcare Statistics</i>	3	✓
HIT 109	Introduction to Procedure Coding	3	✓	HIT 225	HIM Supervisory Management	3	✓
HIT 171	Health Data, Information, Law and Ethics <i>Formerly known as BUSN 171, intro. to Medical Records Health Information Management (HIM) Law and Ethics; name change effective Fall 2016</i>	3	✓	HIT 192	Professional Practice Experience and RHIT Study Prep (160 hrs. min.) <i>Replaced BUSN 192V, Business Practicum; effective Fall 2016</i>	3	
HIT 200	Disease Pathology and Pharmacology <i>Experimental course known as BUSN 179 and HIT 197C</i>	3		ECON 130 or 131	Principles of Microeconomics or Principles of Macroeconomics (DS)	3	✓
ENG 100	Composition I (FW)	3	✓	HWST 107	Hawaii: Center of the Pacific (Arts & Humanities elective) (DH/HAP)	3	✓

Four students have participated in the Prior Learning Assessment (PLA) Program using Credit by Institutional Exam (CBI); they all passed with over 80 percent. Three passed HIT 106, *Introduction to Medical Coding*; and one passed HIT 171, *Health Data, Information, Law and Ethics*.

The Office of Continuing Education and Workforce Development (OCEWD) has an American Health Information Management Association (AHIMA) accredited Health Technology (HLTH)

Program which prepares students for the Certified Coding Specialist (CCS) national certification. Seven non-credit courses have been identified as having the same student learning outcomes and content; and students have an opportunity to use these courses toward the credit HIT Program.

## PROGRAM RESOURCES

### Business Division

HIT is one of four programs within the Business Division. The Business Division Chair has the responsibility of overseeing the day-to-day operations of the Division and ensures that the faculty have the necessary supplies, equipment, and resources to support teaching and learning. In addition, faculty and students have many resources offered through Academic Services that include Laulima training and course design, technology assistance, content tutoring, photocopying services, library materials, etc. Students with disabilities are referred to the Kāko'o 'Ike (KI) Office, which addresses the necessary student accommodations. The annual CAHIIM accreditation fee (\$2,500) will be paid by the Business Division out of its general budget.

Through Leeward CC funding, the Division has one full-time Secretary II and two part-time student help. The Division Secretary has been extremely helpful to the HIT Program. She took on additional responsibilities that accompanied the building of a new program that included Perkins grant funding.

### Perkins Grants

Since HIT is a Career and Technical Education (CTE) program, the HIT faculty submitted requests for Perkins grants and were awarded three grants.

#### Grant No. 1 - Accreditation and Growth of Health Information Technology Program

Awarded \$53,542 – 2013-2014 AY, grant awarded June 2013. This grant provided the resources to build nine (9) online courses in Laulima. In addition, a special online HIT Program Orientation video was filmed.

This grant help fund the creation of online courses and set the foundation for the HIT Program. An orientation video was created and filmed; all HIT students are required to view this orientation video.

#### Grant No. 2 – Health Information Technology Support

Awarded \$17,894 – 2013-2014 AY, 2012-2013 Title I CTE Carryover Funds, grant awarded October 2013.

This grant help fund the first Health Information Technology Student Society (HITSS) Conference. In conjunction with the HIT faculty, the HITSS created a free two-day conference and invited three national speakers to be the keynote speakers. Break-out sessions using local industry professionals provided an opportunity for the students to network with future employers and learn more about the health information management profession. In order to entice the local professional to attend this two-day conference, AHIMA continuing education credits were provided to the participants. A continental breakfast, snacks, and lunch were provided. This conference has been institutionalized with the support of the Business Division and the Office of

Continuing Education and Workforce Development (OCEWD); however, a nominal fee is now charged to cover the cost of food.

Grant No. 3 – Enhancing the Health Information Technology Program

Awarded \$81,197 – 2013-2014 AY, 2013-2014 Title I CTE Carryover Funds, grant awarded October 2013.

This grant helped fund the HIT Simulated Worksite. The Leeward administrators were supportive in designating a classroom for the HIT Program and provided the networking needed to run this simulated worksite. Additional online courses were developed.

### **HIT Faculty**

There are two full-time faculty in the HIT Program.

1. Patrice Jackson, RHIA, RHIT, CHP, CCS, CHTS-TR, CHTS-IM, CHTS-PW, CMRS  
Instructor and HIT Program Coordinator (CAHIIM: HIT Program Director)
2. Kathleen Cashman, RHIT, CCS  
Instructor

Currently, there are three lecturers that teach in the HIT Program.

1. Darcy Apao, RHIT
2. Rose Bumanglag, RHIT, CCS
3. Phyllis Emerson-Salyers, RN

## **PROGRAM EFFICIENCY**

### **Number of Majors**

The Leeward CC HIT Program had 28 majors in its first academic year, and the number of majors have exceeded the projected numbers. From Fall 2012-present, there have been 630 HIT majors (non-duplicated count).

From 2012-2016, the number of HIT majors increased every academic year; but in 2016-2017, the number of HIT majors decreased. The Business Division counselor had detected that some students with goals of entering into nursing or other allied health fields did not understand the new HIT Program. With the assistance of the counselors and the New Student Orientation (NSO) staff, efforts were made to clarify the HIT profession and to properly advise the students into their correct majors.

When Heald College closed its doors, Leeward CC and other area colleges were invited to attend a special college fair for Heald students. Leeward CC attended the two-day college fair with a team of 17 faculty and staff. The Business Division created a special information sheet for the students that listed the Heald and Leeward classes. Not only were the Heald students appreciative of being able to meet and talk with the faculty, not just college recruiters, they were extremely happy to learn about the possibility that some of their coursework might be eligible for transfer credit. The HIT Program also hosted an information session at Leeward on May 27, 2015, for potential students; its agenda included the application process, counseling appointments, financial aid, One Stop, and the HIT Program.

The Heald College students started enrolling at Leeward in Fall 2015, which was reflected in the increase in majors. Since Heald College courses were aligned with the CAHIIM associate degree standards, the Leeward CC Business Division counselor and HIT Program Coordinator worked together to map Heald's required courses to Leeward's required courses. The Business Division counselor went above and beyond in meeting with the Heald students multiple times to ensure that they were awarded the appropriate credits toward their certificate and/or degree. Since many of the Heald College students entered Leeward CC with completed courses, their graduation period would have been reflected beginning in the 2016-2017 academic year. One former Heald student success story is Lani Alcayde, who wrote a letter of support for the HIT Program. In her letter (Appendix B), Lani stated: "Leeward came to my rescue when I needed it. I was able to transfer all my credits from Heald and picked up where I left off, which was good for me too, because it was closer to home, without traffic." Lani is now a Registered Health Information Technician (RHIT) at Kahi Mohala Hospital.

HIT Majors		
AY	Projected	Enrolled
2012-2013	20	28
2013-2014	40	104
2014-2015	40	135
2015-2016	60	190
2016-2017	80	144

**HIT Courses and Sections**

### Courses, SSH, Fill Rate

As the number of majors increased, the number of sections also increased. In order to offer all the required courses in a rotation schedule, the Business Division hires lecturers to deliver the classes so the students can complete their program.

COURSES, SECTIONS, SSH	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
No. Courses Offered	9	15	16	16	16
No. Sections Offered	9	15	19	23	22
SSH Program Majors in Program Classes	75	273	276	816	981
SSH Non-majors in Program Classes	51	96	201	111	66
SSH in All Program Classes	126	369	477	927	1,047
FTE Enrollment in Program Classes	4	12	16	31	35

According to the Perkins Health Indicators (PHIs) from 2012-2017, the average class size has increased each year from 10.5 to 16.6 (2016-2017). The fill rate has also increased from 65.6 percent to 83 percent (2016-2017).

CLASS SIZE, FILL RATE, COST PER SSH	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
Average Class Size	10.5	12.3	13.3	15.5	16.6
Fill Rate	65.6%	61.5%	66.2%	83.5%	83.0%
Cost per SSH	\$236	\$219	\$274	\$177	\$192

## Accreditation

Prior to the CAHIIM accreditation, the HIT Program conducted an in-depth self-study. It cross walked the CAHIIM 2016 associate degree standards to the Leeward HIT course student learning outcomes and content. According to CAHIIM's website, it states:

The Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) is an independent accrediting organization whose Mission is to serve the public interest by establishing and enforcing quality Accreditation Standards for Health Informatics and Health Information Management (HIM) educational programs.

A graduate is required to have completed an accredited CAHIIM program in order to be eligible to take the exam and become certified. CAHIIM accredited programs are quality programs that provide professionally required knowledge and skills, and employment marketability. Graduating from a CAHIIM accredited program offers employers assurance that you have the expected professional knowledge and skills, and have experienced a curriculum that is relevant to today's electronic health record (EHR) environment. Source: <http://www.cahiim.org/accreditation/accreditation.html>

Leeward CC embarked on a journey to obtain the CAHIIM accreditation. Upon the BOR's provisional program approval, the HIT Program submitted an application to CAHIIM and provided evidence that the 2012 CAHIIM associate degree standards were being met in Leeward CC's HIT and business courses. At the onset, Leeward CC was encouraged to use its existing business courses and create only the needed HIT-specialized courses. In addition, the CAHIIM Executive Director stated that Leeward CC could employ lecturers as its second designated HIT instructor.

Leeward was granted "Candidacy Status" in May 2013. This was an important step for current students. While in Candidacy Status, graduates became eligible to take the RHIT certification once Leeward's HIT associate degree program was accredited. In Fall 2014, CAHIIM asked Leeward to change to the new 2016 CAHIIM standards. Rather than using existing business courses, CAHIIM requested HIT-specific courses be created. In addition, a second full-time HIT instructor became required. Based on the Business Division and HIT's annual review of program data (ARPD) and planning list, the top priority for personnel was for a second HIT instructor; this also rose to the top of Leeward's personnel requests. In Spring 2015, the second full-time HIT instructor was hired. As the number of majors and sections have grown, additional courses have been taught by lecturers.

Due to the increase in requests for new associate degree programs throughout the nation, CAHIIM was slow in its response for an accreditation site visit. On March 16 and 17, 2017, Leeward welcomed the CAHIIM Site Visit Team. The HIT Program was awarded its initial accreditation from CAHIIM (Appendix C) on May 11, 2017—the news arrived just in time to celebrate with the HIT graduates. As an accredited HIT Program, CAHIIM annually requires Leeward CC to submit an Annual Program Assessment Report (APAR) and accreditation fee. On November 16, 2017, Leeward CC submitted its Annual Program Assessment Report (APAR), as well as the final Survey Team and Board Review (Progress Report). Both documents (Appendix D and E) were approved by CAHIIM on February 7, 2018.

The health information profession has undergone many changes in recent years—the most significant was a change from International classification of disease-clinical modification,

Version 9 (ICD-9-CM) to International classification of disease-clinical modification, Version 10, Procedure Coding System (ICD-10-CM/PCS). Students enrolled at Leeward CC first started learning ICD-9-CM but quickly transitioned to ICD-10-CM/PCS. Due to the change in CAHIIM standards from 2012 to 2016, Leeward CC offered a free review course to its graduates. Eight HIT graduates chose to take the exam in December 2017 before the RHIT BETA exam version started in January 2018. Out of the 8 students, 6 passed which represented a 75 percent passing rate, which exceeded the national rate of 70 percent. Many of the HIT graduates have opted to wait until the BETA exam version has concluded (estimated to be April 2018).

### **Industry Advisory Committee**

The HIT Program is very grateful to its Industry Advisory Committee. These individuals have reviewed the HIT courses, attended the HITSS Conference, participated as HITSS Conference keynote or breakout session speakers, provided guidance to the HIT Program, and testified on the HIT Program's behalf during the CAHIIM Site Team Visit. A few letters of support for the HIT Program have been included (Appendix F) from individuals who represent private and public sectors, as well as a HIT associate degree graduate and one of the first Leeward students to earn her RHIT.

Michael D. Green, CTR, Registry Director  
University of Hawai'i, Hawai'i tumor Registry

Brandon Ho, CIPP, Lead Consultant  
Hawai'i Privacy Assurance Associates, LLC

Marlisa Coloso, RHIA, CCS, HIM Administrator  
Kauai Veterans Memorial and Samuel Mahelona Memorial Hospital

Marguerite Kono, RHIT, CHCO, WRNC HIM Coordinator, HIPAA Privacy Officer  
Wahiawa General Hospital  
Leeward HIT associate degree graduate

Additional HIT Program Industry Advisory Committee members.

Ann Botros, PhD, RHIA, President  
Professional Health Care Consultants

Donna Conner, Director, Clinical Informatics  
Aloha Nursing and Rehab Centre

Jean Kailiawa, RHIA, Data Manager  
Hawai'i Health Information Corporation

Lauren Reyes, RHIA, HIM Manager  
Rehabilitation Hospital of the Pacific

John Nagamine, RHIA, Interim Director, HIM  
Kuakini Health System

Lucy Sequeira, RHIT, MLT, CHTS-TR, Medical Records Librarian III  
State of Hawai'i/Department of Public Safety/Health Care Division/Oahu Community  
Correctional Center, Health Information/Medical Records Section

## Industry Demand

Graduates of the HIT Program are prepared for employment as Medical Records and Health Information Technicians who compile, process, and maintain medical records of hospital and clinic patients in a manner consistent with medical, administrative, ethical, legal, and regulatory requirements of the health care system. Graduates also have many job avenues, other than coding, that include specialized areas such as: cancer registry, data governance, HIPPA privacy, registration specialist, and insurance biller. Evidence for the demand of HIT professionals is provided in the Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*.

**Job Outlook:** Employment of health information technicians is projected to grow 13 percent from 2016 to 2026, faster than the average for all occupations.

An aging population will require more medical services, and health information technicians will be needed to organize and manage the older generations' health information data. This will mean more claims for reimbursement from insurance companies.

Additional records, coupled with widespread use of electronic health records (EHRs) by all types of healthcare providers, will lead to an increased need for technicians to organize and manage the associated information in all areas of the healthcare industry.

Cancer registrars are expected to continue to be in high demand. As the population ages, there will likely be more types of special purpose registries because many illnesses are detected and treated later in life.

**Job Prospects:** Prospects will be best for those with a certification in health information, such as the Registered Health Information Technician (RHIT) or the Certified Tumor Registrar (CTR). As EHR systems continue to become more common, health information technicians with computer skills will be needed to use them.

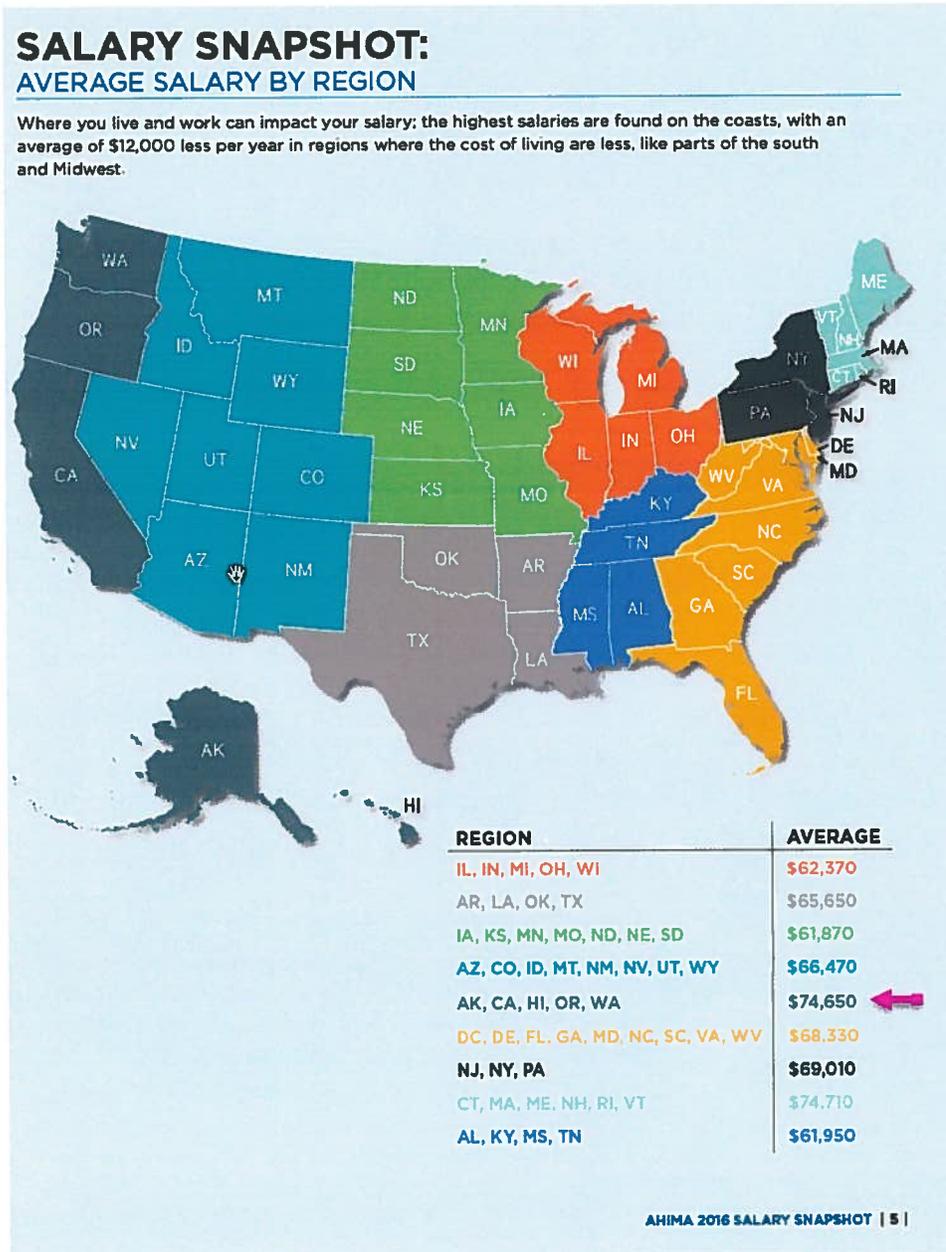

Source: <https://www.bls.gov/ooh/healthcare/medical-records-and-health-information-technicians.htm>

Evidence for the demand of HIT professionals is also provided in EMSI's Q1 2018 Data Set at <http://www.economicmodeling.com>. Employment of Medical Records and Health Information Technicians in Hawai'i is projected to grow 10.2 percent from 2015 to 2026, have annual job openings of 45, and a median average salary of \$44,512. Additionally, in the period from January 2015 to February 2018, there were 8,749 total job postings in Hawai'i of which 2,310 were unique, which is an average of 61 monthly postings that resulted in average monthly hires of 23. This means that there was approximately 1 hire for every 3 unique job postings.

Medical Records and Health Information Technicians are still an emerging occupation in Hawai'i with a median annual salary that is 14 percent higher than the Nation. The following table compares Hawai'i trends with the Nation. Source: <http://www.economicmodeling.com/>

2015-2026	Base	Projected	Change	% Change	Median	
					Hourly Wage	Annual Wage
Hawai'i	685	755	70	10.2%	\$21.40	\$44,512
U.S.	203,994	241,009	37,015	18.1%	\$18.30	\$38,064

According to the American Health Information Management Association (AHIMA), *AHIMA's Salary Snapshot: HIM Professionals in 2016*, Hawai'i is one of the states in the western region with the highest average salary.

## STUDENT LEARNING AND PROGRAM SUCCESS

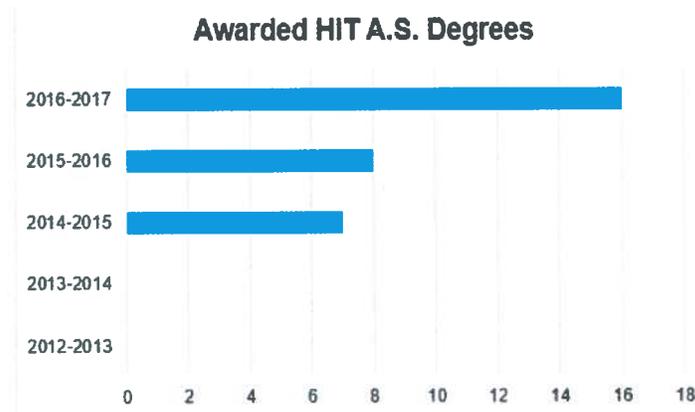

Through the association with CAHIIM, Leeward CC HIT students are receiving the necessary courses that will prepare them for the RHIT. The Business Division has been fortunate to have a dedicated program counselor that works with a Perkins funded Academic Specialist. This Academic Specialist helps the program faculty to address the retention needs of the Division.

Along with his Peer Mentors, they contact the students that need help and provide them with the resources to become successful. The Business Division has a One Stop which is opened weekdays from 1:30-4:30 p.m. The Academic Specialist and the Peer Mentors staff the One Stop.

The successful completion rate with an equivalent of C or higher, is extremely high. In 2016-2017 AY, the HIT Program students met the goal with 96 percent. Persistent rates are low and the faculty continue to work with the counselor and Academic Specialist to improve this rate.

### Graduates

The number of associate degree graduates from 2015-2016 to 2016-2017 increased from 8 to 16. In the Fall 2017 semester, three associate degrees were earned and it is predicted that a total of 16 HIT students will graduate this academic year. Students are also earning their Certificate of Competence and Certificate of Achievement while working toward their Associate in Science degree.

Perkins Performance Measures	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017
Number of Degrees	0	0	7	8	16
Number of Certificate of Achievement	0	0	8	8	30
Other Certificates Awarded	1	2	11	15	41
Number of Degrees and Certificates Native Hawaiian	0	0	3	6	8
Number of Pell Recipients <sup>1</sup>	19	61	82	108	32
Number of Transfers to UH 4-yr	0	0	1	5	13

The HIT Program has also attracted a few high school students who attended Leeward through the Jump Start Program. One student received the Certificate of Competence and another student received both the Certificate of Competence and the Certificate of Achievement.

One major skill set learned within the first year of the HIT Program is electronic health record document management. Some students have obtained employment with local hospitals as Documentation Clerks. These clerks are responsible for scanning and indexing documents to be archived electronically. Many of these positions pay between \$18-20 per hour. Some students leave with the expectation of returning for their HIT associate degree; however, many were part-time students with multiple jobs. Since the unemployment is low in the state, some Documentation Clerks are recruiting former and current classmates.

The HIT Program attracts many military spouses and even active military; however, some are not able to complete the certificate and/or degree before being relocated. When active military members are deployed, many military spouses cannot afford the child care costs or attend evening classes. The HIT Program has many online classes and is working toward offering its entire program online to address this problem. Once the program is totally online, Leeward CC will investigate options to include other interested campuses such as Hawai'i Community College and University of Hawai'i Maui College in hopes of creating a certificate for its campuses; then students could have the option of transferring to Leeward CC to complete the associate degree.

### RHIT National Certification

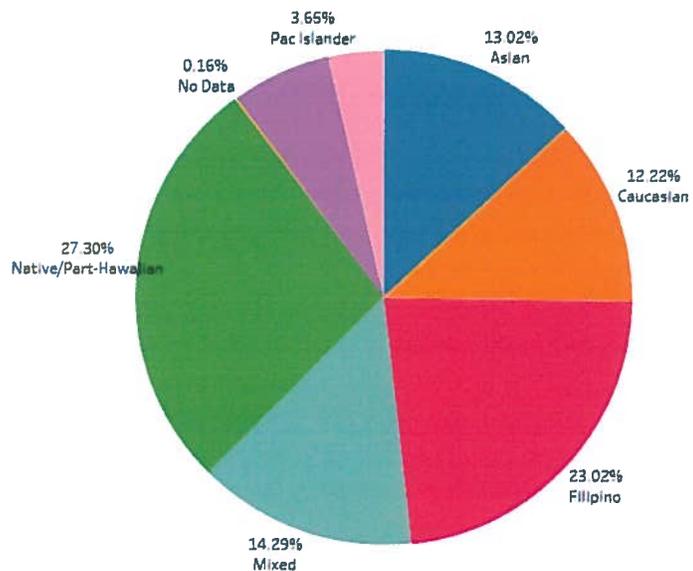

The first group of Leeward HIT associate degree graduates took the RHIT exam in December 2017, and 6 out of 8 passed the exam. Leeward's passing rate of 75 percent is above the national average of 70 percent. After the BETA version of the RHIT exam ends in approximately April 2018, the HIT Program expects that the remaining graduates will be ready to take the exam based on the 2016 CAHIIM standards.

### HIT Student Population

The Leeward CC Mission Statement specifically speaks to recruiting underserved populations and a special commitment to Native Hawaiians. The HIT Program has a diverse group of 630 majors from 2012-Present, and the largest ethnic groups are Native and Part Hawaiian and Filipino.

Ethnic Distribution	
Native and Part Hawaiian	172
Filipino	145
Mixed	90
Asian	82
Caucasian	77
Other	43
Pacific Islander	23
No data	1

What's their ethnic distribution (%)?

% of Total Distinct count of PIDM and ETHNCAT. Color shows details about ETHNCAT. Size shows % of Total Distinct count of PIDM. The marks are labeled by % of Total Distinct count of PIDM and ETHNCAT. Percents are based on each column of each pane of the table.

The majority of the students attend part time, with females representing 530 out of the 630 HIT majors.

Students	Fall 2012	Spring 2013	Fall 2013	Spring 2014	Fall 2014	Spring 2015	Fall 2015	Spring 2016	Fall 2016	Spring 2017	Fall 2017
Full Time	5	21	45	40	60	62	86	74	67	38	54
Part Time	8	23	72	50	73	74	112	108	102	81	74

### Transfer to a Four-year Institution

HIT associate degree graduates that earn their RHIT could further their potential earnings by obtaining a bachelor's degree. Whereas, the RHIT with a bachelor's degree in management will provide a path into health information management positions. Many of the Leeward graduates are hoping that the University of Hawai'i-West O'ahu (UH West O'ahu) will offer a Health Information Management (HIM) bachelor's degree. If UH West O'ahu seeks CAHIIM accreditation according to its bachelor's degree standards, its graduates would be eligible for the Registered Health. Information Administrator (RHIA) exam.

## What are they majoring in at the 4-year campus?

## Appendix B: Letter of Support, Former Heald College Student

February 13, 2018

To Whom It May Concern:

I'm a recent graduate of Leeward Community College in Pearl City, Hawaii majored in Health Information Technology. Due to the closure of Heald College in April 2015, I was not able to finish this program. Thank God to Leeward Community College and the staff, it was the only school in Hawaii that had it, so I strongly support the HIT program. Leeward came to my rescue when I needed it. I was able to transfer all my credits from Heald and picked up where I left off, which was good for me too, because it was closer to home, without traffic. Leeward had all the classes for me that were available at my convenience even though I was working full-time. Where will our current and future students go, except an online study, if this school was not around? Where will students go if they want face to face interactions with instructors and help from other students? I did both online and on campus study, and to me, the on campus study was much easier.

I am now a Registered Health Information Technician at Kahi Mohala Hospital and thanks again to Leeward Community College, with their recent accreditation, I was able to get this credential and making more money.

Sincerely,

Lani Alcayde

May 18, 2017

Manuel Cabral, Chancellor  
University of Hawaii, Leeward Community College  
96-045 Ala Lke Street  
Pearl City, Hawaii 96782

Dear Chancellor Cabral:

The Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) is pleased to inform you of its vote on **May 11, 2017** to award **Initial Accreditation to the Health Information Management Associate Degree Program at University of Hawaii, Leeward Community College.**

The comprehensive review conducted by the Health Information Management Accreditation Council and the CAHIIM Board of Directors recognizes the program's substantial compliance with the nationally established *CAHIIM Accreditation Standards*.

**Progress Report Requirement:** In order to maintain accreditation status the program must submit a progress report that satisfies the remaining Standard deficiencies that resulted from the review process. The attached Board Report reflects the current Not Met or Partial Met *Standard* deficiencies that require the institution's attention and provides guidelines for resolution in order to achieve full compliance for the program. The following *Standards* are Partially Met: #24–Curriculum and #28- Professional Practice Experience.

CAHIIM requests that a **Progress Report** be completed by **November 20, 2017** that documents the manner in which these deficiencies have been resolved and includes evidence of implementation. The program director will continue to submit this information in the CAHIIM Accreditation System. Failure to submit this report by the due date may place the program on Administrative Probationary Accreditation. An unsatisfactory progress report or a Substantive Change in Program Director during the progress report process may result in a Focused Review of the program.

The program will continue to participate and submit annually, outcomes information using the *CAHIIM Annual Program Assessment Report (APAR)* process. Please note that a new APAR system will be launched later this year with formal notification to all accredited programs. The program will be invoiced for the Annual Accreditation Fee for 2018 in the fall.

The Commission recognizes you and your colleagues for your commitment to continuous quality improvement in higher education, as demonstrated by your participation in programmatic accreditation.

Sincerely,

Judith Warren, PhD, RN, BC, FAAN, FACMI, CAHIIM Chair

noreply@cahiim.org <noreply@cahiim.org>

Thu, Nov 16, 2017 at 3:24 PM

To: pmj3318@hawaii.edu

Dear Patrice Jackson,

The 2017 Annual Program Assessment Report (APAR) submitted on behalf of University of Hawaii, Leeward Community College has been reviewed and accepted.

This serves as confirmation by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) that the degree program offered by your institution has completed the most recent Annual Program Assessment Report as required by the CAHIIM Accreditation Standard(s). The report was accepted as submitted and the program remains in good standing and will maintain accreditation.

The Commission recognizes you and your colleagues for your commitment to continuous quality improvement in higher education as demonstrated by your participation in program accreditation.

Thank you,  
CAHIIM Staff

Patrice Jackson, BS, RHIA, CHP, CCS, CHTS-IM/PW/IM  
Program Director, Health Information Management  
University of Hawaii, Leeward Community College  
96-045 Ala Ike  
Pearl City, Hawaii 96782

Dear Ms. Jackson:

The Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) reviewed the Progress Report submitted on behalf of the Health Information Management Associate Degree Program. The Program has satisfactorily addressed the issues cited and the Progress Report has been accepted.

The program is eligible to participate in the Annual Program Assessment Report (APAR) process and is required to be in compliance under the CAHIIM Accreditation Standards and all associated processes. The Board of Commissioners commends the program for its continuing efforts towards compliance and program improvement.

Sincerely,

Angela Kennedy, EdD, MBA, RHIA  
Chief Executive Officer, CAHIIM

December 8, 2017

Ms. Patrice M Jackson, RHIA, RHIT  
Health Information Technology Program Director  
University of Hawai'i Leeward Community College.  
Ala 'Ike, BE 215  
Pearl City, Hawai'i 96782

Aloha Ms. Jackson:

Thank you for your commitment and service to our health information community in Hawai'i. Without your personal commitment I would not be able to express my unwavering support of the Leeward HIT Program, and the opportunity to provide this letter in support of the much needed expansion of education programs for health information professionals in Hawai'i at the University of Hawai'i, Leeward Community College.

As you know, the need for credentialed HIT professionals and ongoing continuing education is of great importance to our program and our cancer registry personnel. In addition, with the LCC program's expansion, the option to obtain specialty credentials including the CTR is a significant achievement and of specific interest to the state central cancer registry and the multiple approved hospital cancer programs in our state.

As you know, HTR has enthusiastically supported the expansion of technical education and training efforts for HIT students at Leeward CC, and we have hosted multiple students from the Leeward HIT Program for their practicum at Hawai'i Tumor Registry. The opportunity for us to host engaged students interested in pursuing the certified tumor registrar (CTR) at our program offices has been most satisfying and beneficial for both myself, our staff and the hosted students, and we look forward to further opportunities to host additional students in the future.

As scientific and medical breakthroughs are realized so frequently, it is critical for tumor registry operations to grow the technical expertise and knowledge of our current and future staff to accommodate our ability to enhance data collection and analysis activities that are relevant in the war against cancer in Hawai'i and the nation.

HTR's interactions with the Leeward HIT Program and students has been and will continue to function as a critical and essential component for the successful career development of our current and future certified tumor registrars.

Again, my many thanks for allowing us to support this initiative and be a part of the expansion of HIT education opportunities for students in Hawai'i.

Sincerely yours,

Michael D. Green, CTR  
Registry Director

Ms Patrice Jackson, RHIA, RHIT  
Health Information Technology Program Director  
University of Hawaii, Leeward Community College  
Ala Ike, BE 215  
Pearl City, Hawaii 96782

Aloha Ms Jackson,

The emerging landscape in Healthcare is a continued migration toward accommodating a complex health care system with electronic systems that attempt to simplify the processes to deliver quality care. No one has been able to solve that issue yet. One thing that most healthcare professionals do agree on is the need for Health Information Technology professionals to support the health care providers while they deliver the quality care that we expect from our health care systems. A lack of those qualified professionals is one of the greatest roadblocks toward modernizing our health care industry.

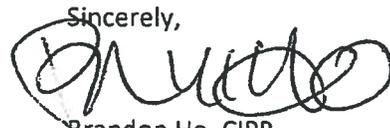

The HIT program at Leeward Community College is a program that provides quality education and training. As a result, it produces a quality workforce that contributes to the delivery of healthcare in a continuously more complex environment. In my experience as a Health Insurance Portability and Accountability Act (HIPAA) professional, I see the need for a workforce that can not only provide the skillsets needed to assist with the delivery of care but also provide the Privacy and Security needed to ensure the total care of all patient records and documentation. It has been my experience that students coming from the LCC HIT Program are fully qualified and have the appreciation of total quality care delivery for all patients.

When looking for a qualified, competent workforce, I would look no further than students who have received their training and education from the HIT Program from Leeward Community College. Hopefully, this program will be fully funded and will continue to thrive and provide the Hawaii healthcare community with the trained, professional workforce all patients need and deserve.

Our deepest and sincerest gratitude should be extended to all of the faculty and staff at the Leeward Community College HIT program.

Please feel free to contact me at anytime to discuss our most sincere and deep Aloha for this program at (808) 277-8231 or by e-mail: [brandon@aldt.net](mailto:brandon@aldt.net).

Sincerely,

Brandon Ho, CIPP

February 15, 2018

**TO:** CAHIIM

**FROM:** Marlisa Coloso, RHIA, CCS, HIM Administrator for  
Kauai Veterans Memorial and Samuel Mahelona Memorial Hospitals

**RE:** Letter of Support for Leeward Community College HIT Program

There are many reasons to support the HIT Program at Leeward Community College. As a person born and raised in Hawaii, there are many obstacles as well as opportunities in obtaining higher education here in Hawaii. Oahu as the main island to provide a greater variety and availability of education, the outer islands, which are very rural, does not have those same opportunities. The one constant is the University of Hawaii and their community colleges throughout the islands.

Having a state college HIT Program will offer more benefits to the state of Hawaii. In my current position and my 30 years of experience in the health information field, I have seen the difficulties toward obtaining HIT education and the added expense of such, as well as hiring qualified and experienced HIT professionals.

Working in healthcare my whole life has shown me that this field is ever growing, ever changing, and the need for education to be offered here in Hawaii is not only to provide opportunity to potential students but also to provide the state with an improved workforce in HIT, it can only benefit Hawaii's healthcare.

Being a state college HIT Program will benefit in the cost of education toward potential students. This also means keeping funds within our state supporting local teachers and educators. This translates to a win / win situation.

When processing resumes and applications, the benefit of having more qualified new hires really translates to cost. The employer will not have to perform extensive training. This means production is not as affected and workflow is smoother for overall function of the business.

Hawaii needs to offer this program to the state and it is a plus that Leeward Community College has chosen to move in this direction to offer quality education for those seeking it.

Please accept my letter of support.

Thank you very much,

A handwritten signature in black ink, appearing to read "Marlisa L. Coloso". The signature is fluid and cursive, with a long horizontal stroke at the end.

Marlisa L. Coloso, RHIA, CCS, HIM Administrator

Aloha,

I am writing this letter of support for the Leeward CC Health Information Technology program for consideration to become a permanent part of the curriculum offered at the college. Leeward CC recently became accredited through the Commission on Accreditation for Health Informatics and Information Management (CAHIIM). Patrice Jackson put in many years of hard work for the college to achieve this designation and it would simply seem foolish to not go forward with the HIT program. Leeward CC will now be the only educational institution to offer this accredited program and allow for the graduates to sit for the Registered Health Information Technician (RHIT) exam/credential. The healthcare industry requires knowledgeable and credentialed employees and the demand for these employees is very high.

The HIT program is prepared to offer classes online so everyone, neighbor islands included, can advance themselves or their career with earning a degree in HIT. Furthermore, the tuition rates at Leeward CC are quite reasonable. This means that a large population of an underserved community can take advantage of this wonderful chance to go to college. Leeward CC also works with the Office of Continuing Education and Workforce Development (OCEWD) program. OCEWD offers, among other things, the Certified Coding Specialist (CCS) program and is also credentialed through the American Health Information Management Association (AHIMA). The CCS and RHIT are powerful credentials to attain for all HIT professionals.

I myself am a former student of Leeward's HIT program and also serve on the Advisory Board for the HIT program. Serving on the board allows me to give back to and support a program that has gotten me to where I am now in my career in the HIT profession. So, implore you, please transition the HIT program from provisional to permanent. The HIT program is growing with new students every year and can only grow larger. Leeward CC has the opportunity to become known as the HIT/HIM staple in education.

**PROVISIONAL PROGRAM RESOURCE TEMPLATE**

This template identifies resources needed to support the provisional program and its relationship to the existing departmental/division resources. Please include an explanation of this analysis in your established-status request narrative.

Campus: Leeward Community College

Provisional Degree/Certificate: Associate in Science, Certificate of Achievement, and Certificate of Competence in Health Information Technology (HIT)

Date of BOR Approval: May 17, 2012

College/Department/Division: Leeward Community College, Business Division

Other Programs offered by the College/Division: Accounting, Business Technology, and Management.

Part I: Program Overview	Provisional Years: 2 yrs for Certificates; 3 yrs for Associates and Master's; 5 yrs for Doctorates; 6 yrs for Associate in Science Degree						Current Year	Comments
	2012-2013	2013-2014	2014-2015	2015-2016	2016-2017			
<b>A. ENROLLMENT (Fall Headcount)</b>

Other (\$ Advisors, Lab Techs, etc.)	0	0	0	0	0	0	
NOTE: E. Personnel - Since HIT students took existing business classes, the salary could not be determined since there were multiple teachers assigned to the same class.							
<b>F. OPERATIONAL COSTS (Equipment, etc.)</b>							
Supplies, equipment, travel, prof. dev.	\$8,000	\$8,000	\$8,000	\$8,204	\$8,397	\$8,784	Business Division

<b>G. Indicate whether <u>new facilities</u> are needed to support the continuation of the program (include any off-campus facilities)</b>	No additional facilities are needed to support this program.
<b>H. Indicate if there are other significant resources anticipated beyond the current year.</b>	A third full-time HIT instructor is needed for the growing program instead of relying on lecturers.
<b>I. Explain how any new program resources will be funded (e.g., reallocation, grants, contracts)</b>	Perkin's grants were awarded to help the HIT Program establish online classes and its HIT Worksite Simulation (BE-106). Accreditation fees were paid by the administration, and the annual CAHIIM required fee will be paid by the Business Division through its general fund allotment. The second HIT instructor was hired as part of the annual review process, which the campus ranked the HIT second full-time position as its number one priority.
<b>J. ADDITIONAL COMMENTS:</b> During its provisional program years, the HIT Program was successful in obtaining Perkin's grants to fund support for online course development and the equipment/furniture for the HIT simulated worksite located in BE-106.	

**Part III: Approvals**

By signing below, I have reviewed and approve the Provisional Program Resource Template. (printed name, signature and date)

Department/Division Chair: Business Division Chair, Shelley Ota *Shelley Ota 3/12/18*

Dean: Ron Umehira *Ron Umehira 3/12/18*

Vice Chancellor for Academic Affairs: Della Teraoka *Della Teraoka 3/13/2018*

Vice Chancellor for Administration: Mark Lane *Mark Lane 3/12/18*

**Provisional Program Resource Template Details**

- A. Headcount Enrollment. Headcount enrollment of majors each Fall semester. Located at URL: <https://www.hawaii.edu/institutionalresearch/enrReport.action?reportId=ENRT00> Campus data may be used when majors are a subset of enrollment reported in IRAO reports.
- B. Completion. Provide counts of the number of degrees/certificates awarded annual (fall, spring, summer). Located at URL: [https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS\\_DEG\\_TOC](https://www.hawaii.edu/institutionalresearch/degreeReport.action?reportId=MAPS_DEG_TOC)
- C. Courses, Sections, SSH. Provide annual count (fall, spring, summer) or courses offered, number of sections offered and SSH. <https://www.hawaii.edu/irodtr/login.do?>
- D. Resources/Funding. Data should come from the College/Department's Administrative Officer using the most current information available.
- E. Academic Personnel. Instructional costs without fringe. Provide direct salary cost for faculty and lecturers teaching in the program for provisional period and current year.
- F. Ongoing Operational Costs. Include recurring costs related to program operations, including lab equipment, maintenance costs, accreditation fees, etc.
- G. Facilities. Indicate if any new facilities (classrooms, labs, buildings, etc.), including off-campus facilities, are needed to support the continuation of the program.
- H. Additional Anticipated Cost. Address whether significant additional resources (human, administrative, legal, etc.) anticipated beyond the years listed in the New Program Resource Template.
- I. Funding for Anticipated New Resources. Explain how the department will fund any anticipated costs beyond the current year. If reallocating resources, indicate the source and impact of the reallocation.

SUBJECT: REQUEST APPROVAL TO RE-DESIGNATE THE ESTABLISHED  
ASSOCIATE IN ARTS IN TEACHING DEGREE AS AN ESTABLISHED  
ASSOCIATE IN SCIENCE IN TEACHING DEGREE AT LEEWARD  
COMMUNITY COLLEGE

SPECIFIC ACTION REQUESTED:

Request approval to re-designate the established Associate in Arts in Teaching (AAT) degree as an established Associate in Science in Teaching (AST) degree at Leeward Community College.

RECOMMENDED EFFECTIVE DATE:

Fall 2018

ADDITIONAL COST:

None

BACKGROUND INFORMATION:

Board of Regents Policy RP 5.201C states "Any significant change to a program once granted established status or deviations from the original intent, purpose, or design of the program shall be approved by the board."

The change in designation will provide more accurate data for the Annual Report of Program Review (ARPD) where workforce needs will be calculated into the quantitative indicators. The AAT is currently being evaluated like a General Pre-Professional program, whose sole demand indicator is a 3% annual growth rate. The rubric for demand states that the Teaching program needs to keep up with the college headcount but does not take into consideration the high demand for para-educators in the HIDEOE. The re-designation to an AS in teaching degree will provide the ability to apply for Carl Perkin's Funds to support initiatives that will positively impact the preparation of future teachers. The mission, vision, program learning outcomes and coursework for the AST will remain the same as the AAT aligning with the Division goals, College Strategic Plan and the College Mission Statement.

Upon approval, the AAT degree will be stopped out to begin the termination process and all current students will be given the option to switch to the AST degree or complete the AAT degree. The AAT degree will be terminated once all students have completed.

Significance/Contribution of this degree:

The AST is designed to prepare students for employment in career and technical fields, and/or transfer to a baccalaureate granting institution. The degree will consist of 62 semester credits (the minimum for an AS degree is 60) which provides students with skills and competencies for gainful employment as para-educators. Many AAT graduates seek employment as para-educators and complete their baccalaureate degree at universities who offer courses online or afternoon/evenings.

Demand projections:

Currently, there are more than 400 students attending Leeward CC who are declared majors and have indicated education as their career goal. Given these sources of students for the AST, it is anticipated that about 100 students will apply to the college each year with the academic goal of working toward a degree in education. At full capacity, the program would graduate approximately 70 students per year. Of this number, some will seek employment as educational assistants with the DOE (terminal degree) and others will seek employment, as well as, transfer to programs leading to a bachelor's degree in education.

**Accreditation impact (if any):**

The AAT degree is not professionally accredited, and the AST degree would also not be professionally accredited. Since the AAT and AST do not lead to state licensure, neither program requires consultation with the Hawai'i Teachers Standards Board. This change will not instigate a substantive change with our regional accreditor, ACCJC.

**Examples (2-3) of similar models from peer institutions:**

According to the Peer and Benchmark Comparison Groups for Leeward CC, Brookhaven College offers an Associate in Arts in Teaching, Cuesta College offers an Associate in Science in Teaching in Early Childhood, and Highline Community College offers an Associate of Applied Science in Educational Para educator.

**Similar programs at other UH campuses:**

Leeward Community College is the only UH campus that offers the AAT.

**Statement from campus administration of new program's strategic value within the UH System and campus mission, and the Integrated Academic and Facilities Plan:**

The AAT is a valuable addition to the College's efforts to meet the statewide workforce needs in Hawai'i. As with the first education courses developed in collaboration with the Hawai'i Department of Education (HIDOE) for the AAT degree, the AST program has been designed to be accessible to students statewide. The program core requirements as well as all electives are delivered in class and via distance education. The UH Community Colleges already have the capacity to provide courses leading to an AA degree via distance education, so a neighbor island student could complete the general education requirements of the AST on a neighbor island community college campus or via distance education.

**Cost and resource allocation/reallocation implications:**

No additional costs to be incurred

**Impact of new program/program change request on campus budget allocations and mission priority:**

Aligned with the Leeward CC Mission Statement, the AST addresses a growing industry need for para-educators, a category which includes educational assistants, part-time teachers, and paraprofessional tutors.

Jan Naoe Sullivan  
May 9, 2018  
Page 4

**ACTION RECOMMENDED:**

Recommend approval to re-designate the established Associate in Arts in Teaching (AAT) degree as an established Associate in Science in Teaching (AST) degree at Leeward Community College.

**Attachment:**

1. Degree Change Request for Leeward Community College
- c: Executive Administrator and Secretary of the Board Oishi

## **Degree Change Request Leeward Community College**

**Current Degree:** Associate in Arts in Teaching

**Proposed Degree:** Associate in Science in Teaching

**Proposed Effective Date:** Fall 2018

### **Justification**

This request is to re-designate the established Associate in Arts in Teaching (AAT) degree to an established Associate in Science in Teaching (AST) degree. The AAT program is housed in a Liberal Arts Division (Social Science) and therefore classified as a General Pre-Professional program (GPP). The degree actually functions like a Career and Technical Education (CTE) program: students are prepared for employment directly upon graduation as para-educators, a category which includes educational assistants, part-time teachers, and paraprofessional tutors.

The Associate in Science degree is designed to prepare students for employment in career and technical fields, and/or transfer to a baccalaureate granting institution. The AST will consist of 62 semester credits (the minimum for an AS degree is 60) which provides students with skills and competencies for gainful employment as para-educators. Many AAT graduates seek employment as para-educators and complete their baccalaureate degree at universities who offer courses online or afternoon/evenings.

The change in degree designation will provide more accurate data for the UHCC Annual Report of Program Data (ARPD) where workforce needs will be calculated into the quantitative indicators. The AAT is being evaluated like a General Pre-Professional program, whose sole demand indicator is a 3% annual enrollment growth rate. The rubric for demand states that the Teaching program needs to keep up with the college headcount but does not take into consideration the high demand for para-educators in the HIDEOE. The change to an AST degree will provide the program the ability to apply for Carl Perkin's Funds to support initiatives that will positively impact the preparation of future teachers. The mission, vision, program learning outcomes and coursework for the AS in Teaching will remain the same as the AA in Teaching, aligning with the Division goals, College Strategic Plan and the College Mission Statement.

### **Curriculum**

There will be no change in the curriculum from the AAT to the AST degree. The AST degree provides the opportunity for students to jump start their professional teaching career path by offering education courses embedded with field experiences in education which blends theory with practical application. The AST degree is 62 credits, which includes a rigorous core of pre-professional education and general education courses, development and presentation of a teaching portfolio aligned with the Hawai'i Teacher Standards Board (HTSB) standards demonstrating effective teaching practice. The AST program is designed to be flexible with courses offered statewide via distance learning and in person at the Leeward CC Pearl City and Leeward CC Wai'anae Moku campuses.

***Program Requirements (62 credits):***

Education Core (13 credits):

- ED 285 Classroom Management within the Instructional Process (3 cr)
- ED 290 Foundations of Education (3 cr)
- ED 291 Developing Language and Literacy I (3 cr)
- ED 294 Introduction to Multicultural Education (3 cr)
- ED 295 Field Experience in Education (1 cr)

Education Electives (9 credits):

Select 3 electives from approved list of courses.

General Education Foundations (25 credits):

- Written Communication/FW (3 cr)
- Symbolic Reasoning/FS (3 cr)
- Global Multicultural Perspectives/FG (6 cr)
- Diversification Arts/DA (3 cr)
- Diversification Social Sciences/DS, not from PSY (3 cr)
- Diversification Natural Sciences/DB, DP, and DY (7 cr)

Graduation Requirements (15 credits):

- ENG 200 Composition II (3 cr)
- HWST 107 Hawai'i: Center of the Pacific (3 cr)
- PSY 100 Survey of Psychology (3 cr)
- PSY 240 Developmental Psychology 3 cr) or
- FAMR 230 Human Development (3 cr)
- Oral Communication (3 cr)

This degree change will not require any curriculum changes. There are no similar programs within the UH System.

**Accreditation**

The AAT degree is not professionally accredited, and the AST degree would also not be professionally accredited. This change will not instigate a substantive change with our regional accreditor, ACCJC.

**Impact on Current Students**

There will be no impact on enrollment due to the re-designation of the degree. Currently, there are more than 400 students attending Leeward CC who are declared majors and have indicated education as their career goal. Given these sources of students for the AST, it is anticipated that about 100 students will apply to Leeward CC each year with the academic goal of working toward a degree in education. At full capacity, the program would graduate approximately 70 students per year. Of this number, some will seek employment as educational assistants with the DOE (terminal degree) and others will seek employment, as well as, transfer to programs leading to a bachelor's degree in education.

Effectiveness of the program will be assessed externally, by employment statistics of graduates, through student perception and exit surveys administered in the capstone ED 295 (Field Experience in Education) course, and through employer surveys that can track career and employer satisfaction.

The trend of majors in the program is as follows as reported on the ARPD:

<b>Academic Year</b>	<b>Number of Majors/Native Hawaiian Majors</b>	<b>Number of Graduates</b>
<b>2011-2012</b>	377/129	55
<b>2012-2013</b>	387/117	59
<b>2013-2014</b>	395/123	87
<b>2014-2015</b>	369/110	69
<b>2015-2016</b>	408/126	59
<b>2016-2017</b>	417/135	74

The AAT program has continuously exceeded projected student enrollment and graduation rates. Student satisfaction surveys are given to all graduating students and follow-up surveys also administered to program alumni to ensure program effectiveness. Continued growth is expected for the AST degree.

Current students have been consulted about the change in the degree designation. Those students consulted did not have a preference for the degree. In addition, there will be no impact on financial aid availability or the ability of students to transfer to a 4-year school, if they so desire.

***Teach-out Plan***

Once approved, all new incoming students applying for fall 2018 would select AST on their applications. We would work with Admissions and Records to identify and move over all existing AAT majors to an AST major designation at one time. Conversion of current AAT to AST is anticipated for Fall 2018. The AAT degree will be terminated by Spring 2020, once all current students have moved over to AST degree.

**Costs**

There are no costs associated with this change. The re-designation of the AAT to an AST will not require additional resources. The program is fully operational with faculty and staff who are housed in the new Education Building on Leeward CC campus. The building provides ample office space and classroom space allowing room for continued growth.

As with the first education courses developed in collaboration with the Hawai'i Department of Education (HIDOE) for the AAT degree, the AST program has been designed to be accessible to students statewide. The program core requirements as well as all electives are delivered in class and via distance education. The UH Community Colleges already have the capacity to provide courses leading to an AA degree via distance education, so a neighbor island student could complete the general education requirements of the AST on a neighbor island community college campus or via distance education.

**Consultation**

All instructional and non-instructional faculty members in the department been consulted on the proposed change, and all are in support of the change.

**Timeline**

The following timeline will be implemented:

Spring/Summer 2018	Present proposal for approvals Request Banner code for new degree
Fall 2018	Effective date for AST degree AST degree is published in the Catalog Implement program change in STAR GPS Prepare recruitment materials Recruit students into new AST degree Communicate degree change to AAT students Begin contacting AAT students to move them to AST degree
Fall 2019	Follow up with any students remaining in AAT program to move them to AST degree.
Spring 2020	Terminate AAT degree, once all students have been moved

UNIVERSITY

UNIVERSITY OF HAWAII  
BOARD OF REGENTS

University of Hawai'i at Hilo Administration  
Office of the Chancellor

18 MAY 10 P6:02

DTS 18850

RECEIVED

May 7, 2018

'18 MAY -9 P1:35

**MEMORANDUM**

UNIVERSITY OF HAWAII  
PRESIDENT'S OFFICE

TO: Jan Naoe Sullivan  
Chair, Board of Regents

VIA: David Lassner  
President *David Lassner*

VIA: Donald O. Straney  
Vice President for Academic Planning and Policy *Donald O. Straney*

FROM: Marcia Sakai *Marcia Sakai*  
Interim Chancellor, University of Hawai'i at Hilo

SUBJECT: Request approval to re-designate the established Bachelor of Arts (B.A) degree as an established Bachelor of Science (B.S.) degree in Chemistry at the University of Hawai'i at Hilo (UH Hilo).

**SPECIFIC ACTION REQUESTED:**

Request approval to re-designate the established Bachelor of Arts (B.A) degree as an established Bachelor of Science (B.S.) degree in Chemistry at the University of Hawai'i at Hilo (UH Hilo).

**RECOMMENDED EFFECTIVE TERM/YEAR:**

Fall 2018

**ADDITIONAL COSTS:**

No additional costs

**BACKGROUND INFORMATION:**

Board of Regents Policy RP 5.201C states "Any significant change to a program once granted established status or deviations from the original intent, purpose, or design of the program shall be approved by the board."

Jan Naoe Sullivan  
May 7, 2018  
Page 2

The change in designation is a student driven change. The degree change will provide increased opportunities for students interested in Graduate or Professional Schools and to acknowledge the rigor of the current degree program.

In 2013, students began to inquire why our chemistry degree was only a B.A. and not a B.S. They felt that the Chemistry degree is just as rigorous and requires as many courses as some of the B.S. degrees offered at UH-Hilo, such as Astronomy, Marine Science, and Biology. The current UH Hilo Chemistry B.A. degree is comparable to UH-Mānoa (see Appendix 1) as well as other B.S. programs across the country. We wish to change perception of students, potential employers, and graduate schools that the current B.A. degree is deficient or less rigorous, when compared to a Chemistry B.S. degree from other institutions. In fact the current degree is a fully rigorous chemistry degree worthy of a B.S. designation and the B.A. designation is an anachronism in need of correction.

Upon approval, the B.A. degree will be stopped out to begin the termination process and all current students will be given the option to switch to the B.S. degree or complete the B.A. degree. The B.A. degree will be terminated once all students have completed.

**Significance/Contribution of this degree:**

The re-designation from B.A. to B.S. in Chemistry will require no curriculum change. The requirements specific to the Chemistry B.S. degree consist of 41 credits of Chemistry courses and 24 credits from related science curriculum. An additional 65 credits outside of the major requirements are needed to meet the General Education and other graduation requirements of UH Hilo.

Chemistry graduates pursue graduate studies in Chemistry and professional studies primarily in the Daniel K. Inouye College of Pharmacy, and also go on to Medical and or Dental Schools.

**Demand projections:**

Chemistry is a moderately sized program with approximately 64 currently declared majors. There has been past evidence that students have pursued other programs in the past due to the degree being designated as a B.A. We anticipate a small increase in our enrollment since earning a B.S. will provide an added incentive for our students in their quest for employment or admission to graduate or professional school.

**Accreditation impact (if any):**

The B.A. degree is not professionally accredited, and the B.S. degree would also not be professionally accredited. This change will not instigate a WASC substantive change.

Jan Naoe Sullivan  
May 7, 2018  
Page 3

**Examples (2-3) of similar models from peer institutions:**

- Coastal Carolina University: B.S. Chemistry
- Delaware State University: B.S. Chemistry
- University of North Carolina Asheville: B.S. and B.A. Chemistry

**Similar programs at other UH campuses:**

UH Mānoa currently offers a B.A. and B.S. in Chemistry

**Statement from campus administration of new program's strategic value within the UH System and campus mission, and the Integrated Academic and Facilities Plan:**

The B.S. in Chemistry is a core science program which prepares students for graduate and professional school, supports other sciences, and feeds students into the Daniel K. Inouye College of Pharmacy. Due to the heavy laboratory component, this degree is not offered via Distance Learning. The program has a general education core aligned with the other UH system campuses which allows transfer opportunities for UH Community College Students.

The Chemistry department occupies modern teaching and learning spaces in the Science and Technology building that is adequate for future needs. The designation of Bachelor of Science will help to increase retention and graduation rates for students pursuing Chemistry at UH Hilo.

**Cost and resource allocation/reallocation implications:**

No additional costs to be incurred

**Impact of new program/program change request on campus budget allocations and mission priority:**

There will be no change to budget allocations and mission priority with this request.

**ACTION RECOMMENDED:**

Request approval to re-designate the established Bachelor of Arts (B.A) degree as an established Bachelor of Science (B.S.) degree in Chemistry at the University of Hawai'i at Hilo (UH Hilo).

**Attachment(s):**

Degree Change Request

c: Kendra Oishi, Executive Administrator and Secretary, Board of Regents

## Degree Change Request

*(Maximum 5 pages)*

Current Degree:     B.A.    

Proposed Degree:     B.S.    

Proposed Effective Date:     Fall 2018    

### **Justification**

Describe the need for the change.

One goal of the faculty and administration at UH-Hilo is to provide our Chemistry graduates with the best possible chance at employment or admission to graduate or professional schools. We believe a change in designation of our current program from a Bachelor of Arts (B.A.) to a Bachelor of Science (B.S.), with no change in curriculum, is the foundation of this goal and we fully support this student-driven request.

In 2013, students began to inquire why our chemistry degree was only a B.A. and not a B.S. They felt that the Chemistry degree is just as rigorous and requires as many courses as some of the B.S. degrees offered at UH-Hilo, such as Astronomy, Marine Science, and Biology. In fact, our current degree is comparable to UH-Mānoa (see Appendix 1) as well as other B.S. programs across the country. We wish to change student's perception that the current B.A. degree is deficient or less rigorous, when in fact it is a fully rigorous chemistry degree worthy of a B.S. designation.

An external review report of our program in the fall of 2014 stated that the absence of a B.S. degree option was a deterrent to students choosing to major in chemistry; the reviewer stated that our current program is mislabeled as a B.A. and he suggested a degree change to a B.S. designation should be a top priority for UH-Hilo. In 2015, steps were taken to implement this change beginning with approval by UH-Hilo's Faculty Congress on November 11, 2015 and the VCAA's office on December 21, 2015.

### **Curriculum**

- Compare and contrast the existing degree with the desired degree (i.e, B.A. vs. B.S.)

The curriculum will remain the same; no new courses will be added and no courses will be removed.

- Will course requirements change? Please describe.

Course requirements will not change.

- Are there similar programs within the UH System?

UH Mānoa currently offers both a B.A. and B.S. in Chemistry.

## Accreditation

- Is the program professionally accredited?

Our program is not accredited by the American Chemical Society due to its small size.

- If so, have you consulted with the accrediting agency? Please discuss.

Not Applicable.

- Will the new degree receive professional accreditation? If so, what is the timeline?

There is no plan to apply for accreditation.

- Is the proposed change related to recommendations from a recent accreditation review? If so, explain.

This request is not related to a recent accreditation review.

- Will the proposed degree change require a WSCUC/WASC ACCJC Substantive Change Review?

This change in designation from B.A. to B.S. will not require a WSCUC/WASC ACCJC Substantive Change Review.

## Impact on Current Students

- What effect do you anticipate the degree change will have on program enrollment?

We anticipate a small increase in our enrollment since earning a B.S. will provide an added incentive for our students in their quest for employment or admission to graduate or professional school.

Current Enrollment Trends:

<b>Academic Year</b>	<b>Number of Majors</b>	<b>Number of Graduates</b>
2011-2012	82	10
2012-2013	98	5
2013-2014	89	6
2014-2015	105	6
2015-2016	78	8
2016-2017	70	12

- Have current students been consulted?

Yes, our students have been consulted.

- If so, how many of current students would rather receive the new degree than the existing degree?

100% of all students consulted would rather receive the new B.S. degree than the existing B.A. degree. They believe this will help them attain their future goals, whatever they may be.

- Will the proposed change affect financial aid availability for current students?

The change from B.A. to B.S. will not affect financial aid availability for our students.

- Discuss teach-out plans for the existing degree program.

Upon approval of the B.S. degree designation, it is our plan to enact a 6-year stop out of the B.A. in Chemistry. Students entering UH Hilo in Fall 2018 and in future years will enter on the new B.S. degree and existing students will be given the opportunity to elect to the new B.S. option (see Timeline section) or complete in the B.A. option if desired. Upon completion of the stop out UH Hilo plans to terminate the B.A. in Chemistry.

### Costs

- Are there costs associated with changing the degree? If so, will the department or college cover the costs involved?

There are no costs associated for the degree change.

### Consultation

- Have faculty members in the department been consulted on the proposed change?

Yes, all of the faculty in the Chemistry Department have been consulted on the proposed change.

- Are faculty members in support of the change?

The Chemistry Department faculty are unanimous in their support for the degree change.

This proposal has also gone through the standard process for revisions to established programs and was approved unanimously by the UH Hilo Faculty Congress Curriculum Review Committee, which grants final approval on behalf of the Faculty Congress.

## Timeline

Please discuss your proposed timeline. Include plans to update the catalog, STAR, and recruitment materials, and proposed timeline to stop-out admission and terminate the current degree program.

June 2018: Anticipated BOR Approval

### Updates to Catalog:

Will be completed within 2 weeks of the anticipated BOR approval date. The UH Hilo catalog is primarily an online catalog and changes can be implemented immediately.

### Updates to STAR:

Will be completed prior to start of the Fall 2018 term. The UH Hilo STAR Coordinator will be notified as soon as possible following approval to amend the Fall 2018 STAR planner to change the degree designation. Students who were admitted for the Fall 2018 catalog that declared Chemistry as a major will automatically be switched over to the new designation.

### Recruitment Materials:

Brochures, pamphlets, and websites describing the Chemistry program will be updated by replacing the B.A. designation with the new B.S. designation.

### Program Coding, Stop Out, Termination of Existing BA-CHEM:

Upon approval the program code of BS-CHEM will be requested from system IRAO. At the same time, we will also request to enact a 6-year stop out of admission to the BA-CHEM effective from Fall 2018- Summer 2025. Upon completion of the stop out period, the BA-CHEM will be terminated.

### Current Student Opt In:

Current declared B.A. Chemistry students will be given a two-year period from the date of BOR approval of the B.S. degree (Fall 2018-Summer 2020) to elect to opt up to the Fall 2018 catalog and become a declared B.S. Chemistry major on the Fall 2018 catalog. The VCAA office and the Office of the Registrar have worked out a process for these students that is specific to this degree change. Outside of this period, current B.A. students also have the option to declare the B.S. degree option at the time of graduation using their graduating catalog year.

**Committee on Academic and Student Affairs**  
 Annual Review for the 2017-18 Academic Year

New committee by-laws were established at the October 5, 2017 meeting

	Committee <b>DUTIES</b> per Bylaws	2017-18 <b>ITEMS DISCUSSED/APPROVED</b>
1	Review the academic mission and strategic direction of the system and its major units	<b>Acceptance of Community College Institutional Self-Evaluation Reports</b> (To be discussed: May 18, 2018)
2	Periodically review to what extent programs support the mission and strategic direction of the University	<p><b>Enrollment Update</b>            Vice President Straney provided an update on Fall 2017 undergraduate and graduate enrollment by unit &amp; selected populations, and percentage difference between targets &amp; actuals. (October 5, 2017)</p> <p><b>Update on Systemwide Enrollment Management</b>            Vice President Straney provided an update on systemwide enrollment management that included UH System goals, defining the roles of System and units/campuses, factors affecting undergraduate enrollment, college participation rates of Hawai'i public high school graduates, and 2018-2021 unit enrollment goals. UHM, UHH, UHWO, and UH Community Colleges each presented enrollment management reports which included a 2017 assessment, and strategies and targets for the next three academic years. (March 8, 2018)</p> <p><b>Dual Credit Update</b>            Hawai'i P-20 Executive Director Stephen Schatz provided a presentation on the dual credit update on the increase in the number of early college classes; and impact on college enrollment, low income students, and UH System enrollment. (October 5, 2017)</p>

		<p><b>STAR Registration Update</b> UHM Associate Vice Chancellor of Undergraduate Education Dr. Ron Cambra provided a history of STAR, its origination, where the system is today, and next steps for improvement. Director of Advanced Technologies Gary Rodwell gave a live demonstration of the STAR interface. (December 14, 2017)</p> <p><b>Distance Learning Plan</b> Interim Associate VP for Student Affairs and Director of Academic Technologies Hae Okimoto provided an overview on the distance learning plan that included a historical timeline of distance learning at UH; courses and registrations by technology type for Fall 2017; distance learning course taking trends at UH; the impact of online courses on persistence and graduation rates; trends for UH community college transfers with many choosing institutions with online program offerings; UH’s intentional focus on adult distant learners and online degree pathways; how UH is rethinking academic support services from application to graduation; how UH is rethinking programs via pathways; and goals for Fall 2020. Discussion regarding possible need for future policy changes and additional resources to ensure high-quality online degree programs. (March 8, 2018)</p>
3	Monitor the quality and effectiveness of educational programs	<p><b>Annual Report on Program Actions &amp; Small Programs</b> An overview of the Academic Program Actions Report for Academic Year 2016-2017 as required under RP 5.201, EP 5.201, and EP 5.229. There were 4 new academic programs approved by the board; 11 authorizations to plan new academic programs; 15 provisional programs granted established status; 45 ongoing provisional programs; and no termination of provisional programs. For programs with small number of degrees/certificates of achievement awarded: UHM had 54; UHH had 15; UHWO had 0; HawCC had 24; HonCC had 16; KapCC had 9; KauCC had 22; LeeCC had 9; UHMC had 27; and WinCC had none. For programs removed from the small programs list: UHM and HonCC each had 4; LeeCC had 3; KauCC had 2; HawCC, KapCC, and UHMC each had 1; and UHH, UHWO, and WinCC each had none. (December 14, 2017)</p>

4	Develop and maintain policies governing academic and student affairs	<p><b>Program Approval Process Overview</b>  Vice President Straney presented an overview of the new three step program approval process and new department focused program resource template, with the goal being a process that maintains academic integrity and affordability while increasing agility and responsiveness to state needs within the context of each campus and the entire system. Discussion regarding the need to eventually revise Regents Policy 5.201, Instructional Programs (October 5, 2017)</p> <p><b>Policy Revisions</b>  RP 9.211 Health Fund, Retirement, and Other Benefits (December 14, 2017)  RP 9.218 Delegation of Personnel Actions (December 14, 2017)</p> <p><b>New Regents Policy</b>  5.219 Emeritus/Emerita Title (December 14, 2017)</p> <p><b>Implement a Mandatory Student Fee to Provide all Kapi'olani Community College Students With a U-Pass for TheBus</b> (To be discussed: May 18, 2018)</p>

5	Review actions proposed by the President which fall under current Board policies and procedures, including requests for exceptions.	<p><b>Provisional Status for New Programs:</b></p> <ul style="list-style-type: none"> <li>• Master of Landscape Architecture at the University of Hawai‘i at Mānoa (October 5, 2017)</li> </ul> <p><b>Provisional to Established Status:</b></p> <ul style="list-style-type: none"> <li>• Certificate of Achievement in Medical Assisting at Kaua‘i Community College (To be discussed: May 18, 2018)</li> <li>• Bachelor of Applied Science Degree in Engineering Technology at University of Hawai‘i Maui College (To be discussed: May 18, 2018)</li> <li>• Doctor of Nursing Practice Degrees at the University of Hawai‘i at Hilo and the University of Hawai‘i at Mānoa (To be discussed: May 18, 2018)</li> <li>• Leeward Community College, Associate in Science in Health Information Technology (To be discussed: May 18, 2018)</li> </ul> <p><b>Changes to Established Programs:</b></p> <ul style="list-style-type: none"> <li>• Doctor of Public Health (DPH) to Doctor of Philosophy in Public Health (PhD) at the University of Hawai‘i at Mānoa (October 5, 2017)</li> <li>• Associate in Arts in Teaching Degree to the Associate in Science Teaching Degree at Leeward Community College (To be discussed: May 18, 2018)</li> <li>• Bachelor of Arts (B.A.) in Chemistry to Bachelor of Science (B.S.) Degree in Chemistry at the University of Hawai‘i at Hilo (To be discussed: May 18, 2018)</li> </ul>
---	---	--
