Report Preparation

Preparations for the Midterm Report formally began in Spring 2021 (RP 1) with monthly meetings of the UHCC (University of Hawai‘i Community College) Accreditation Liaison Officers (ALO) organized by the Office of the Vice President for Community Colleges (VPCC). An email invitation requesting help with the report was sent to Leeward Community College’s (CC) faculty and staff listserv by the ALO on April 21, 2021. Requests to various campus constituents to assist with the report were presented at Campus Council, October 15, 2021 (RP 2). The College’s ALO began the drafting process, identifying needs for the development of the report. The first draft was shared with Chancellor Peñaloza and the Administrative Team on November 29, 2021 for input. The Administrative Team consists of the Chancellor, Vice Chancellor of Academic Affairs (VCAA), Vice Chancellor of Administrative Services (VCAS) and the Deans of Arts and Humanities, Career and Technical Education, Student Services, and Academic Services.

On December 2, 2021 (RP 3) the ALO sent the second draft to all faculty and staff and asked them to provide substantive input to the document for accuracy and currency with numerous people responding. A second draft of the report was worked on by the Administrative Team in February and the third draft was shared with the campus on March 1, 2022. The final draft was sent to the College’s four governance groups (Faculty Senate, Campus Council, Pūko’a no nā ʻEwa Council and Student Government) for review and approval on April 6, 2022. Completion of the Midterm Report followed Leeward’s institutional governance processes and drew upon the knowledge and expertise of individuals in specific functional areas.

Responses to “Plans Arising Out of the Self-Evaluation Process” established in the College’s last Institutional Self-Evaluation Report (ISER) (RP 4) were assigned to the appropriate areas and college leaders identified in the ISER. Response to “Recommendations for Improvement” outlined in the External Evaluation Team Report (RP 5) from ACCJC was provided by the Office for Planning, Policy and Assessment (OPPA), the Faculty Senate Assessment Committee, the Office of the Chancellor, and the Office of the VPCC. Input for “Reflections on Improving Institutional Performance” came from the Faculty Senate Curriculum Committee, Campus Council, OPPA, Faculty Senate Assessment Committee, English Assessment Coordinator, Liberal Arts AA Degree Program Coordinator, and Disability Services Office. Information specifically on student achievement data, including institution set standards was provided by the Dean of Student Services, Dean of Arts and Humanities and the Dean of Career and Technical Education. Fiscal reporting information was provided by the Office of the VCAS. Finally, input for the “Outcomes of the Quality Focus Essay” came from the appropriate areas and College leads identified in the 2018 Quality Focus Essay (QFE). The Faculty Senate Student Affairs Committee and Dean of Academic Services provided evidence for the QFE Action Plan 1 and the Faculty Senate Assessment Committee provided evidence for the QFE Action Plan 2.
## Plans Arising Out of the Self-Evaluation Process

<tr>
<td>I.A.4</td>
<td>Perform a comprehensive review of Leeward’s Mission Statement.</td>
<td>Chancellor, VCAA, VCAS, OPPA &amp; Governance Groups</td>
<td>The College’s Mission Statement was last reviewed and approved without changes in Spring 2017. As stated in the College’s Policy on Institutional Mission (<a href="#">PA 1</a>), an extensive review will be done during our next strategic planning process. Strategic Planning preparations were announced by the Chancellor at the Fall 2021 Convocation (<a href="#">PA 2</a>). The process was initiated in Spring 2022 with the appointment of a Strategic Planning Coordinator. A Vision and Mission (<a href="#">PA 3</a>) review committee was formed with a tentative timeline for competition at the end of the Spring 2022 semester.</td>
<td>Spring 2022</td>
<td>Due to COVID-19, the Strategic Planning Process for the College and UH System was delayed with the existing strategic plan being extended until the end of Fall 2022. A comprehensive review of our mission statement is currently underway.</td>

<tr>
<td>I.B.1</td>
<td>Improve the College’s Integrated Planning and Budgeting Process (IPBP) and increase transparency.</td>
<td>VCAA, VCAS, OPPA, Campus Council &amp; Faculty Senate</td>
<td>Between Fall 2017 and Fall 2019, the Ad Hoc Planning Process Review Committee (PA 4), whose members reflect wide campus representation, reviewed and clarified roles within the annual IPBP, reviewed and revised the College’s planning templates including the resource request form and the Annual Report of Program Data (ARPD), and strategized on “closing the loop.” A need to expand inclusion of and responsiveness to student voices within Leeward’s planning process was identified.</td>
<td>Data from the 2016 and 2019 Employee Satisfaction Survey (PA 5) show some improvement with the Campus’ understanding of the planning process (a 2% to 7% increase, see questions 6-8). As the College strives for continuous improvement in this area, we hope more gains will be reflected in the 2022 Employee Satisfaction Survey. The Chairs for each governing body, along with the VCAA and OPPA will form an ad hoc committee in Spring 2023 to review and identify.</td>

no nā ‘Ewa and Student Government. Additionally, the institutional priorities list is now disseminated campus-wide ahead of finalization and recommendation from Campus Council (PA 7).

To increase transparency on the College’s budget development process, the VCAS began sending out regular fiscal updates in Fall 2018.

To increase transparency, during the height of the COVID-19 pandemic, the Chancellor held 10 campus updates to the College between April 2020 and October 2021 via Zoom (PA 8) to keep campus constituencies informed on the status of the UH System budget.

opportunities for improvement.

<td>I.B.1</td>
<td>Provided required training on faculty-initiated interaction in distance education (DE) courses.</td>
<td>EMC &amp; DE Committee</td>
<td>In the 2017-2018 academic year (AY), 100% of DE instructors (n=138) and 43% of all instructors (n=198 faculty and 120 lecturers) completed a mandatory “DE Federal Requirements Training.” This was a temporary solution until Leeward developed and implemented the current DE best practice process which incorporates the DE Federal Requirements. Between 2017 and 2021, the EMC and DE Committee offered over 30 workshops with 308 of the 631 participants (49%) earning a digital badge demonstrating workshop outcome attainment. Evaluation data showed that 83-100% of participants found the workshops useful (PA 9). In AY 2018-2019, the DE Committee created new DE Guidelines (PA 10), a DE Guidelines Self-Assessment (PA 11), and a DE Peer Evaluation (PA 12)</td>
<td>Fall 2022</td>
<td>By the end of the three-year evaluation cycle, 100% of DE instructors will have cycled through a Self-assessment process. The process will be reassessed at the end of Fall 2022.</td>
</tr>
</tbody>
</table>
form to reflect best practices to provide instructors with a framework for creating high-quality DE courses. These assessments are based on nationally recognized Quality Matters standards for online learning. The Faculty Senate unanimously approved the new DE Guidelines and Evaluations for adoption in March 2019.

A three-year pilot project was implemented in AY 2019-2020 with the goal of all DE instructors completing a self-assessment every three years. The 2019-2020 and 2020-2021 AYs had a 94% completion rate for DE instructors cycling through the self-assessment process (64 out of 68 instructors). The current completion rate for AY 2021-2022 is 80% (28 out of 35 instructors) (PA 13).

<td>I.B.2</td>
<td>Clarify the relationship between General Education Learning Outcomes (GELO) and Institutional Learning Outcomes (ILO).</td>
<td>Liberal Arts AA Program Coordinator &amp; Dean of Student Services</td>
<td>The GELO-ILO relationship was clarified in Fall 2020. The College’s GELOs are identical to the Associate of Arts (AA) Liberal Arts Program Learning Outcomes (PLO), which are regularly assessed and mapped to ILOs (<a href="#">PA 14</a>). After review by the Interim Student Services Program Officer, all references to Leeward’s GELOs were removed from the College catalog, website and policies (<a href="#">PA 15</a>). The UH System is redesigning its General Education curriculum (<a href="#">PA 16</a>) (Summer 2021 to Fall 2025). This redesign may have implications for the College’s ILOs.</td>
<td>Relationship was clarified.</td>

<tr>
<td>I.B.5</td>
<td>Published the College’s Institutional Effectiveness Report (IER).</td>
<td>OPPA</td>
<td>In 2011, the College proposed publishing an IER every four years. The first was done in 2012 and the second in Spring 2018 (<a href="#">PA 17</a>). However, these reports have not been used in a meaningful way. The College plans to replace the IER by implementing a systematic evaluation of the Strategic Plan outcomes, starting with closing the loop on our existing Strategic Plan as we move toward creating our new plan (<a href="#">PA 18</a>). The new Strategic Plan will incorporate systematic reporting of effectiveness.</td>
<td>Spring 2023</td>
<td>Systematic reporting of Strategic Plan outcomes beginning with our 2023-2028 Strategic Plan.</td>

<td>IV.A.7</td>
<td>Conducted the Campus Council (CC) Members Survey.</td>
<td>Campus Council</td>
<td>A 2017 CC Members Survey ([PA 34](PA 34)) found that two-thirds of members said their knowledge of the CC’s role and function increased during the past year. The CC also implemented a Program Review &amp; Planning Process Survey with ARPD authors about their needs. Respondents said they: would like more data and greater access to analytical support, they lack confidence in the accuracy of the UHCC System data, and they find the ARPD template difficult to use. To address these issues, in 2018, UHCC System: simplified the ARPD template, started releasing draft data so that users can find discrepancies and alert them to making corrections, and for the first time, in September 2021, the UHCC System provided workshops ([PA 36](PA 36)) to help ARPD authors better understand the data.</td>
<td></td>
<td>The College will use the findings from CC-related questions on our 2022 Employee Satisfaction Survey ([PA 35](PA 35)) (questions 13 and 14) to identify further corrective actions as needed.</td>
</tr>
</tbody>
</table>
Conducted the Faculty Senate (FS) Campus Satisfaction Survey. Faculty Senate (PA 37)

The Employee Satisfaction Survey was used to address this. Question 16 on the Survey (PA 38) asks respondents if they believe, “The Faculty Senate effectively carries out its role in governance.” Findings indicate that for applicable respondents, slightly more people agreed with this statement in 2019 (59%) compared to 2016 (57%). Given the findings from both surveys and recognition of needed improvement, the following activities were implemented:

The FS Blog was initiated in 2017 and converted to the FS News (PA 39) in Spring 2019 to better inform campus constituents of the Senate’s activities. In 2020, FS News began to include summary annual reports for the academic year.

The College will use the findings from our 2022 Employee Satisfaction Survey to see if trends have improved and to identify further corrective actions as needed.
Between 2018 (PA 40) and 2020 (PA 41), FS worked to ensure the development of systems and processes to keep the Senate’s work organized.

In Fall 2020 (PA 42) and Fall 2021 (PA 43), FS held “Talk Story Sessions” at Convocation for faculty and staff to learn more about the Senate.

The FS Charter and Bylaws were revised in Spring 2019 and again in Fall 2019.

FS added to the Vice Chair’s duties: To review and, if necessary, update the Charter and Bylaws every two years. Hence, the Bylaws were revisited and revised again in Spring 2021 (PA 44).

Response to Recommendations for Improvement

There were two college specific recommendations to improve quality and one system recommendation.

ACCJC College Recommendations to Improve Quality #1

“To ensure academic quality and improve institutional effectiveness, the College should improve efforts to analyze, disseminate and discuss assessment results of all outcomes across the campus to improve student learning. (I.B.1, I.B.8)”

(Note: for this section see QFE Action Plan 2 below for additional information and evidence.)

The College has been engaged in continuous assessment, which is core to the College’s planning process, as well as faculty tenure, promotion and periodic review. However, the College has experienced a number of challenges with respect to providing a purposeful, visual and more broadly disseminated analysis of learning outcomes assessment results. For more than five years, Leeward CC used TK20 for assessment collection and reporting. Due to the limited functionality of TK20, the Assessment Specialist developed a homegrown assessment management system (AMS) solution known as Knack, which was lower in cost, easier to use, and offered flexibility for future growth. However, it was determined Knack was not FERPA (Family Educational Rights and Privacy Act) approved; thus, another option had to be identified. Serving as a free, scalable, and user-friendly interim measure, a Google Form was adopted to capture instructional student learning outcomes (SLO).

In September 2019, an Ad Hoc Assessment Committee, with wide campus representation, began reviewing potential AMS platforms for the College. After reviewing and evaluating three AMS platforms, the Ad Hoc Assessment Committee settled on Anthology (formerly known as Campus Labs). However, the University of Hawai‘i (UH) System COVID-19 pandemic budget freeze delayed the College’s ability to purchase the AMS until the end of 2020. After a lengthy onboarding process to initialize Anthology, the College began training early adopters in November 2021. Our previous assessment platforms were limited with respect to service area outcomes (SAO) data collection and analysis and Anthology should rectify this.

The Anthology Outcomes and Planning platforms allow all assessment leads from each instructional division, department, discipline, section, and course to manage their own outcomes assessment process. Similarly, all assessment leads from support units (e.g., administrative services, academic affairs, student services) will be able to input SAO data. The AMS will allow Leeward to have a centralized repository for data collection and analysis that will allow division chairs and unit heads to disseminate aggregated data reports with
stakeholders with the goal of increasing discussions around continuous improvement for teaching, student learning and student success.

While the College waited for Anthology to be fully functional, the Office of Planning, Policy and Assessment (OPPA) analyzed the SLO achievement data collected on the Google Forms and presented the findings to Division Chairs (RR 1) for discussion. First, a pilot test (RR 2) using a non-random sample of social sciences courses was implemented to disaggregate SLO outcomes by gender, ethnicity, Pell status and age; this function is not available in Anthology, and this type of disaggregation of SLO assessment data on a wide scale would be an enormous undertaking for instructors. The purpose of the pilot test was to see if this type of analysis is, in fact, useful. However, disaggregation at the SLO level based on the pilot test findings did not appear to add to what we already know about student success. Therefore, it was determined that implementing efforts to desegregate SLO data campus-wide is likely unnecessary to improve student success. An SLO attainment (RR 3) study was also done, breaking down findings by divisions and correlating them with gatekeeper classes. Student achievement based on 70% passing with C or better for all course learning outcomes was demonstrated in over 90% of classes, with areas for improvement noted for a handful of specific courses and instructors.

In Fall 2019, the College began wide-spread use of Tableau, a data visualization tool to facilitate the analysis, dissemination and discussion of assessment results. OPPA started developing dashboards for regularly requested metrics, implementing individual and group training, and disseminating information to the campus. Tableau has allowed Division Chairs, Deans and Unit Heads with a fast way to access and analyze individualized and program specific data to improve student learning, retention and services. In Spring 2021, OPPA started “Fast Fact Fridays” with monthly Tableau generated data sheets that feature different topics being sent to the entire campus. As the College is engaged in its next five-year strategic planning process, the Spring 2022 Fast Fact Fridays series focused on “Closing the Loop” for our previous strategic plan.

Efforts to disseminate and discuss assessment results of all outcomes across campus continue. The Vice Chancellor for Academic Affairs (VCAA) is working with all the Deans to close the loop on our annual reports, which include student learning, program learning and service area outcomes assessment and analysis. The goal of such efforts is to create a space for faculty, campus leadership, and administration to reflect on outcomes and engage in meaningful discussions related to increasing student learning and achievement outcomes. Additionally, the goal is to organize annual Assessment Showcase events during Convocation where each of the campus areas (instructional, support, and administrative) can share their best practices and
strategies campus-wide with respect to meeting the College mission and improving student success.

ACCJC College Recommendations to Improve Quality #2

“In order to improve effectiveness, the team recommends that the College develop a mechanism to inform the College community about the college governance structure, membership and responsibilities of committees, pertinent policies and the college decision-making process. (IV.A.6)”

Since submitting our last ISER in 2018 (RR 4), the College’s Shared Governance Policy (RR 5) was revised in 2019 to clarify responsibilities and procedures. Additionally, the Faculty Senate, Campus Council and Pūkoʻa no nā ʻEwa Council now send monthly meeting agendas and minutes to the campus personnel listserv, facilitating a broader reach and visibility on planning and shared governance. A positive outcome of virtual meetings due to the COVID-19 pandemic has been increased campus attendance at governance group meetings. Periodic “Exec to Exec” meetings were re-instituted with Chancellor Peñaloza in 2019. These meetings include the Chancellor, Vice Chancellors and executive officers from the Faculty Senate, Campus Council, Pūko’a no nā ʻEwa Council and, depending on the issues, Student Government. Meetings focus on how to best collaborate and communicate with campus constituencies about institutional matters. This includes concerns arising from any campus area, strategizing on how to address concerns and identifying the when, where and how to best support the College’s mission. Most recently, Strategic Planning and Facilities Management have been important topics addressed by the Exec to Exec.

The College relied heavily on shared governance during the 2020-2021 academic year as we engaged in campus and system level planning discussions related to COVID-19 pandemic budget challenges. On October 12, 2020, the UHCC Organizational and Resource Planning (RR 6) document outlined campus ideas and considerations to address the impending budget shortfall for Fiscal Year 2022 and beyond. Tasked with reviewing and vetting the document with the campus community, Leeward CC formed a Campus Council Ad Hoc Committee to assist in gathering feedback and creating an official response to the Office of the Vice President for Community College (OVPCC). Topics in the Organizational and Resource Planning document were organized into three surveys (Consolidation of Operational Units and Personnel Changes, Campus Space Commercialization and Revenue Generation, and Instructional and Programmatic Considerations). Through these surveys, all campus employees were encouraged to provide points of consideration, proposal advantages and disadvantages, implications, and what additional data or questions needed addressing. Survey results were collected, categorized, and summarized in a preliminary report that was then sent to potentially impacted units and individuals for a second review. Feedback from those potentially impacted was
requested to clarify points that were unclear or inaccurate, provide additional information that could help guide decision-making, and determine if any critical facts were missing in the report. Subsequently, the comprehensive draft report was presented at the Campus Council (RR 7) meeting on Friday, November 6, 2020, for a third round of input. The final report (RR 8) was submitted to the OVPCC for inclusion into the UHCC System’s Organizational and Resource Planning for 2022 and Beyond.

While the College has structures in place to support vibrant and engaged participation in decision-making, information about governance bodies, committees and related policies are currently neither centrally located, nor are the relationships between the college governance entities, processes, and structures easy to understand. The College’s antiquated website has been a barrier to providing clear and easily accessible information about our governance structure, membership and responsibilities of committees, pertinent policies or the College decision-making processes in general. This issue is core to our website redesign plans, which are expected to be completed in Summer 2022. The Marketing and Communications Office will work with campus governance groups to create a “one-stop” shared governance page for the College by Fall 2023. In anticipation of this, the College leadership has been engaged in discussions about our governance structures, reviewing and updating bylaws and proposing visual aids to facilitate broader understanding of the Leeward CC governance structures.

Data from the College’s 2016 and 2019 Employee Satisfaction Survey (RR 9) show that about half of the campus was still unsure if Campus Council (46%) and Pūkoʻa no nā ʻEwa (56%) effectively carried out their role in shared governance, with 36% being unclear about Faculty Senate. In March 2022 (RR 10), the Chancellor presented at Campus Council to clarify the role of Campus Council in relation to the College’s other governance groups and how to improve the Council. Hopefully, this process, along with the effects from the shared governance entities’ efforts to circulate meeting information, conduct workshops, and other improvements will be reflected in our 2022 Employee Satisfaction Survey.

**ACCJC System Recommendation to Improve Quality**

“In order to improve institutional effectiveness, the team recommends that the system develop and implement an assessment process to measure the effectiveness of role delineations, governance and decision-making processes to ensure their integrity. (IV.D.7)”

The UH System includes three universities, seven community colleges and community-based learning centers across Hawai‘i. The seven community colleges comprise the UHCC System and are led by the VPCC.
To respond to the System Recommendation, the VPCC convened the six campus ALOs that represent the UHCCs accredited by ACCJC and began holding monthly meetings. UH Maui College (UHMC) is accredited by the WASC (Western Association of Schools and Colleges) Senior College and University Commission, and their ALO did not participate in responding to the ACCJC recommendation.

In early meetings, discussion centered around the External Evaluation Team Report (RR 11). The report noted, “While assessment of system-wide role delineation, governance and decision-making is ‘organic and ongoing,’ a formalized structure for assessment does not exist.” Based on this statement, the VPCC, Interim Director of Academic Programs, and ALOs began work on developing a formalized assessment process. After much discussion, the group determined a baseline system-wide survey was needed. The UH/UHCC Shared Governance survey was disseminated to all seven community colleges, including UHMC, and the UHCC System Office as the goal of the UH/UHCC Shared Governance Survey is to provide feedback to the UHCC System Office and the colleges as a whole.

Survey Design
The survey solicited feedback on communication, role delineation, and shared governance across the UH System. At UH there is a three-tiered system of governance - the UH System, the UHCC System, and each college’s own governance structure. While the UHCC System is part of the UH System, the offices have different roles and responsibilities, although there is some overlap. Chancellors have a dual reporting authority to the VPCC as well as to the UH President. See the organizational chart below.
To address the two tiers of system governance, the same survey statements were repeated for the UH System and UHCC System separately. The goal is to understand if there are differences in how faculty and staff perceive communication and governance at the UH System level versus the UHCC System level. Additionally, the structure of the survey is designed to address the specific elements mentioned in the recommendation for improvement: Communication, Shared Governance, and Decision-Making.

The Interim Director of Academic Programs reviewed other community college surveys and drafted a UH/UHCC Shared Governance Survey. The draft survey was shared with the ALOs to garner feedback and suggestions for revisions. Over a period of several months, with feedback from the ALOs, a revised survey was produced. The survey was then shared with the seven community college chancellors and further revised. By early October 2021, a final Shared Governance Survey (RR 12) was completed.

**Survey Results**

The survey was conducted in October 2021 over a period of two weeks. Each chancellor invited their faculty and staff to participate in the survey. There were 318 survey respondents from the seven community colleges and the UHCC System Office, representing a 15% response rate for the 2,135 positions in the UHCC System. Of the 318 survey respondents, 102 respondents (32%) provided written comments that are summarized in the sections below.

The survey results (RR 13) indicate that the diversity of respondents accurately reflects the various campus functions. The number of respondents is evenly distributed across the campuses, though not proportional with the size of each college. About one-third of the respondents have participated on a systemwide committee and should have some understanding of how these committees function.

**Communication**

Quantitative results indicate that more respondents agree or strongly agree than disagree (about 43% vs. 34%) that the UH System and UHCC System provide timely and accurate information. There is also agreement that the UH System website and the UHCC System website are reliable sources of information; however, respondents noted that most do not use either website on a regular basis.

With respect to communication, the most frequent theme found in the qualitative comments is related to a lack of quality and timely communication. Some responses indicate a lack of communication at a specific college or branch campus. There are also several comments about the need to improve the UHCC website and provide more timely information.
Shared Governance
Perceptions about the effectiveness of system committees indicate that one-third of participants agree and another one-third disagree about their effectiveness. In response to whether the system assists the college with meeting educational goals for student achievement and learning, more respondents agree than disagree with this statement for both the UH System (34% vs. 29%) and the UHCC System (39% vs. 27%).

The statement regarding the role delineation between the UH System, UHCC System and the college shows about the same percentage of respondents agree that roles are clear as the percentage that disagree (39% each respectively).

Several themes emerged from the qualitative comments with two overarching themes of Decision-Making and Leadership.

Decision-Making
The largest number of comments were centered on the use of systemwide committees and the perception that administrators do not actually use the committees’ recommendations. Several respondents believe the administration is using the system-wide committees to “check the box” and often will make decisions without getting feedback at all or by simply ignoring the feedback.

Another area that was represented in the feedback was a concern that “[w]hile the ability to dialogue with colleagues on a systemwide committee is very valuable, the individuals who represent the campus on those committees are not always the most effective representatives.” The concern about appropriate representation on system wide committees appeared in several comments.

Several respondents also mentioned a perception of bias with decision-making in favor of the four-year institutions and against the community colleges. Lastly, there is support for more collaboration to better serve students but also an opposing concern that colleges have become too centralized.

Leadership
Under the theme of Leadership, the most mentioned area was the lack of strong leadership and management experience in administration. A specific comment was, “There are too few senior leaders at the system and cc [sic] system who have recent campus leadership/management experience.” A few comments also mentioned a lack of vision.

Some respondents commented on the lack of role delineation. One response noted, “There is no clear delineation between the purview of individual campuses, the UHCC system, and the UH system. This yields a scenario in which campuses are expected to act as if they are part of
the same body, while in fact, they are competing in many regards for limited enrollment potential and resources.”

It was also suggested that it “would be nice if the Vice President of the CC’s would engage more directly with each campus.” And one respondent suggested, “I think it would be important to have administrators placed in permanent positions vs interim.”

**Plans and Timeline**

1. Share the survey results with the faculty and staff in the UHCC System.
   a. The VPCC will share the results at the regular college meetings in Spring 2022.
   b. The UHCC System Office will distribute online feedback forms with the survey results for constituents to include additional suggestions for improvement by May 2022.

2. To address Communication:
   a. The UHCC System Office will review the UHCC System website during Summer 2022 for accuracy and currency and revise by the beginning of the fall semester.
   b. The UHCC System Office will email systemwide committees annually every September to improve availability and accessibility of all systemwide committees meeting minutes.

3. To address Shared Governance:
   a. During Fall 2022, the VPCC and chancellors will discuss feedback regarding a need for a clarified definition of shared governance and recent changes in role delineations.
   b. The UHCC System Office will disseminate a survey to systemwide committees to get more in-depth feedback on ways to improve shared governance and communication across the community colleges during the 2022-2023 academic year.

4. The UH System and UHCC System are currently reviewing the strategic plan. The UHCC System Office will look to integrate appropriate actions related to this recommendation into the 2023-2028 Strategic Plan.

5. The UHCC System Office will conduct the UH/UHCC Shared Governance Survey annually in the fall semester to gauge progress toward improving areas of concern.

**Reflection on Improving Institutional Performance**

**Student Learning Outcomes**

Since our last comprehensive self-study, the College has made great strides in defining and assessing student learning outcomes for instructional programs and student support services. The College’s Faculty Senate Curriculum Committee ([SLO 1](#)) review process is one of the
College’s strengths as faculty ensure quality course content and instructional methods through a rigorous curriculum approval process. Course and program outlines including SLOs and PLOs are reviewed every five years. The Curriculum Committee’s vetting process is enhanced by a Learning Outcomes Subcommittee, which reviews all new and revised learning outcomes. While the College has a clear process in place for creating and reviewing learning outcomes, the ability to easily collect and analyze them has been challenging over the years. Until recently, our various assessment platforms have not been user friendly and have not been designed for SAO collection and analysis. As detailed in our Quality Focus Essay (QFE) Action Plan 2, the College has acquired Anthology, which will allow us to collect, analyze and disseminate findings related to SLOs, PLOs and SAOs, and map them to our institutional learning outcomes (ILO) (SLO 2).

Another strength is the College’s Annual Review of Program Data (ARPD) process, where all instructional programs, student support, and academic/administrative services programs annually review their progress, including assessment of learning and service outcomes. To understand their longitudinal impact and long-term planning needs, program leaders in these areas also conduct a Comprehensive Review and Evaluation (CRE) every five years. The ARPDs allow for program reflection and plans for continuous improvement. These reviews are supplemented by other assessment activities including the Employee Satisfaction Survey, Community College Student Survey of Engagement (CCSSE) and other program or unit-specific evaluations.

The College fell behind in ensuring that all learning support programs had updated SAOs. Over Summer 2021, 10 units within Student Services, Academic Support Services and Administrative Services worked with OPPA to revise and/or develop program specific SAOs. Out of the 24 units within Student Services, Academic Support Services and Administrative Services, in Summer 2022, OPPA will work with the eight remaining units who need to revise and/or develop their SAOs. In Fall 2020, the Curriculum Committee (SLO 3) followed up with courses and instructional programs behind on their five-year course and program reviews. When SLO assessments fell behind in 2019, the Faculty Senate Assessment Committee worked with Division Chairs and individual instructors to bring the course SLO assessment rate up from 32% to 95% (SLO 4).

Areas of growth remain ensuring the use of Anthology campus wide (see QFE Action Plan 2 below), initiating discussions on how to use assessment findings, and improving Leeward’s culture of assessment by making more meaningful connections between all aspects of assessment (e.g., SLO, PLO, SAO, ILO, ARPD, etc.). The College will also have to consider alignment efforts while the UH System is in the process of revising its strategic plan, which may affect the College’s mission and ILOs. Additionally, the UH System is undergoing a revision of its General Education requirements (SLO 5), which may affect Leeward’s PLOs.
Below are a few examples of where course, program, or service improvements have occurred based on outcomes assessment.

**Developmental English**
Every semester the Developmental English Assessment Coordinator collects a random sample of student essays from each instructor. Student and instructor data are redacted and English faculty members do “blind readings” of the essays. They complete a rubric created collectively by all English instructors to determine if the selected essays meet a given SLO. A pass/no pass percentage is calculated and discussed among English instructors. In Spring 2021, the assessment process found that ENG 22 SLO 3 "Incorporate appropriate source material" had a pass rate of only 45%, which sparked discussions on how research skills were taught. These discussions led to a planning process for the division to create a basic Style Guide to promote consistency.

**Liberal Arts AA Degree**
Given the wide spectrum of courses and divisions that contribute to the College’s AA degree in Liberal Arts, this degree’s PLOs assessment has been challenging over the years. Program assessment was conducted by collecting artifacts from a sampling of courses and scoring those artifacts against rubrics designed specifically for the assessment. The process required the work of a committee composed of nearly a dozen faculty from various disciplines and support areas and allowed for the assessment of only one or two outcomes annually. This time-consuming method was highly inefficient and did not provide timely or comprehensive assessment data that could be readily and meaningfully used for program improvement. To improve the assessment process itself with the ultimate goal of program improvement, in 2020 the AA Program Coordinator along with the College’s ALO devised an assessment method that mapped the College’s required Foundations, Diversification and Focus courses to the AA degree PLOs. Student course success rates based on the course Foundation, Diversification and Focus designations can easily and readily capture a broad and comprehensive view of how well students meet the program learning outcomes (see Liberal Arts 2021 ARPD (SLO 6) and CRE (SLO 7).

**Disabilities Services Office**
The Disability Services Office (DSO) sends out semesterly satisfaction surveys to students who use their services. The DSO is continuously faced with the expectations of their clients and how they understand classroom accommodations including how the services students receive in the high school setting compare with those in the college setting. Additionally, the DSO 2021 ARPD (SLO 8) showed the office is undeserving the population of potentially eligible students. In order to address these concerns, in 2021, the DSO office increased its outreach to Hawaii’s Department of Education (DOE). DSO staff attend transition meetings coordinated by DOE.
transition counselors with the expected outcome of improving new student understandings of how DSO services are provided and to help increase program access for eligible students (see List of outreach efforts [SLO 9]).

**Recruitment and Outreach Office**

Over the last five years, yield rate data showed a steadily widening gap between the number of students admitted to the College each semester compared to the number that actually enrolled. Although this rate was already concerning, traditionally standing at 50%, it fell further in Fall 2019 to an all-time low of 42%. The rate was particularly concerning for our direct-from-high school students, which went from 47.8% to 35.5%. In response to this trend, in Fall 2020 the Recruitment and Outreach Office changed the focus from outreach (i.e., large-scale events and workshops to raise awareness about the College) to case managing admitted students through an onboarding pipeline. As a result, the College saw a 7% jump in the overall yield rate in Spring 2021. In Fall 2021, the yield rate of our direct-from-high school students jumped 17.7%.

**Counseling**

Student retention data consistently showed a steady loss in the number of continuing students who register for the subsequent semester. On average, the College loses about 5% of continuing students from Fall to Spring, and 7% from Spring to Fall. This rate is even larger for students who do not perform well academically; traditionally, the College loses about 50% of all students who are placed on Academic Warning. In response, Counseling began to send registration “nudges” to continuing students during the registration season. These nudges are done by Signal Vine, which is a two-way texting platform. Students receiving the messages can text back their questions or concerns, which Counseling then responds to, providing them with just-in-time information and support. Counseling will also be launching an initiative to intervene with all Academic Warning students in Fall 2022. These interventions will be assessed in the Student Services unit 2022 ARPDs.

**Institutional Set Standards**

The UHCC System establishes the College’s institutional and aspirational standards for student achievement, which align with the College’s Mission Statement and Strategic Plan. The College develops metrics and goals that are, in part, informed by those of the UHCC System to regularly assess our progress in the pursuit of continuous improvement. The College informs its constituents of this information in a variety of ways, including an annual fall semester presentation by the VPCC and regular discussions at monthly Admin Team and Division Chair meetings. The College’s ALO also emails the ACCJC Annual Reports to the campus faculty and staff listserv. Additionally, the campus community and general public have access to our
The tables below are the Institution Set Standards data as reported in the ACCJC Annual Report. See Appendix I for the full 2021 Annual Report.

The College has met its floor standards and achieved its aspirational goals for course completion rates. A wide variety of College initiatives facilitate course completion rates along with retention and persistence. For example, program counselors, who work with specific instructional programs such as career and technical education, teacher education, business, and developmental math and English have a close relationship with division faculty and regularly interact, in real time, with students as needed.

Several cohort programs offer wrap around services for students. Campus cohort programs include Lauhoe (formerly Lanakila), G2FO, On-Track, Online AA 5-Week and ATE (Access to Education), all of which are embedded with dedicated counselors, who track and monitor student success. HINET (Hawaii Nutrition Employment and Training) also offers support to eligible students pursuing a workforce credential. Until Summer 2021, Leeward CC had a campus wide early alert system known as Maka’ala, which allowed instructors to notify the Counseling Unit of students in need of additional support. However, the UHCC System retired Starfish, the software which allowed for this intervention.

Currently, Cohort 5 (ISS 2) of Leeward CC’s Leadership Excellence Program is taking the Early Alert system on as a project. Additionally, Leeward CC’s multidisciplinary Behavioral Intervention Team, intercedes in situations where a student’s behavior negatively affects themselves or other students around them. The College has also increased its mental health services to assist with course completion, persistence and retention. We now have our own Mental Health professional and continue to partner with the mental health services offered at the nearby UH West O’ahu campus.

</table>

The College has exceeded its floor standards and aspirational goals for certificate completion. Between fiscal years 2018-2019 and 2019-2020, the College met its floor standards at 99% for degrees awarded and achieved its aspirational goals at over 77%. In fiscal year 2020-2021, the college exceeded the floor standard for degrees awarded and met the aspiration goal at over 89%.

Initiatives in Student Services have greatly contributed to successful certificate and degree completion outcomes. These initiatives include auto-conferral, reverse-transfer and outreach to 100% completers. Auto-conferral automatically confers degrees and certificates to students upon completion of requirements. Leeward CC is doing this across all degrees and certificates because of the strength of our STAR team and STAR build (STAR is an online advising system). Reverse-transfer is the process where a student does not complete their credential, transfers within the UH system, and then completes the requirements there. Those credits are transferred back to Leeward CC and we confer the certificate/degree. Counseling also regularly identifies students who have already completed credentials and reaches out to them, encouraging them to submit a graduation application.
### Transfer Rates

The College has exceeded its transfer rates floor standards for the past three years. The College’s initiatives to improve transfer rate outcomes include the Ka’ie’ie Program (a degree pathway partnership with UH Mānoa) and auto-admit procedure (which automatically admits completing students to the UH System four-year campuses) along with the aforementioned reverse transfer initiative.

### Outcomes of the Quality Focus Essay (QFE)

The College proposed two QFE Action Projects in our 2018 ISER ([QFE 1](#)):  
1. Increase student retention and persistence by keeping the students the College already has, and  
2. Improve student learning by making outcomes assessment more meaningful for faculty and staff.

Although we have made significant progress on Action Project 2, the COVID-19 pandemic campus closures interrupted Action Project 1, forcing the College to dramatically pivot our initial plans. Below is a summary of our progress.

### Action Project 1: Increase student retention and persistence by keeping the students the College already has. (Standard I.B.3)

#### Goals and Outcomes
- Increase student retention and persistence by 10% in 2018-2019.  
- Increase the sense of belonging at the College through activities that connect and support students.  
- Increase the three-year graduation rate from 16% to 22% by 2020-2021

</thead>
</table>
| Continue to meet and develop plans for the implementing the WIG (Wildly Important Goal, i.e., Action Project 1) at the Unit and Division levels. | WIG Design Team (QFE 2) | A cross-campus WIG Design Team was created to ensure a holistic view of student retention, issues related to retention, and solutions to retention-related problems. The team met biweekly in 2018 and three key objectives were identified:  
  - Personalize the Experience  
  - Promote Purpose in All Students  
  - Provide the Means to Succeed  
WIG Design team members were assigned to implement these objectives with: Instructional Divisions/Faculty, Admissions & Records, Financial Aid, Recruitment, Counseling, and the Waiʻanae Moku campus. |
| Evaluate #IGotClass initiative and plan for new initiatives to support the WIG in the current year. | Counseling and Advising Unit | Implemented #IGotClass campaign (QFE 3) in 2017 and 2018 to help continuing students register for classes using incentives. Once incentives ended the number of students registering early dropped off and the unit voted to do away with the initiative in Fall 2019. |
Subsequently, based on discussions about student barriers to success at WIG meetings ([QFE 4](#)), a multi-pronged approach with a variety of initiatives evolved over the next few years, which included addressing onboarding processes with a Welcome Center, improving the student purge process with a Participant Verification procedure, revising the Unsatisfactory Academic Progress Policy ([QFE 5](#)), and addressing part-time student needs with an Integrated Student Support ([QFE 6](#)) initiative.

| The Faculty Communication Committee develops recommendations for faculty communication and actions at identified times during the semester. Based on the work of Dr. Pam Otto-Cox, this program will empower faculty and lecturers with phrases, actions, and intentions to encourage their students to improve retention and success in their classes. | Faculty Communication Committee | Tips were emailed to faculty over the Fall 2018 semester on how to promote student retention. August 2018 ([QFE 7](#)) November 2018 ([QFE 8](#)) December 2018 ([QFE 9](#)) |
Olin Summer Institute Team creates a workshop series on how the College can improve student retention and persistence by creating more student-centric learning experiences through design thinking strategies. Through participatory workshops, immersive design exercises, and presentations, faculty and lectures will learn about, experience, and practice effective, engaging teaching approaches for new and meaningful curricula.

Workshop offered in Spring 2019 and week-long “Design to Humanize” track offered at the Pacific Region Learning Summit in Summer 2019 (QFE 11).

| Increased Mental Health Specialist personnel available to assist student mental health needs:  
  - Secured pandemic related federal funding to hire two Mental Health Care professionals from Fall 2021 to Summer 2022.  
  - Hired full-time Behavioral Specialist (QFE 38) in Fall 2021.  
  - Awarded a 2.5 million Title III AANAPISI (American and Native American Pacific Islander-Serving Institutions) grant to create an integrated, cross-campus mental health care system for students over the next five years (2021-2026). | Campus Services Work Group             |
| Provided students with critically needed financial aid to assist with tuition and cost of living expenses. | Campus Services Work Group             |
- Awarded 2,455 applications (duplicated count) representing $1,780,771 in both pandemic related federal funds and private foundation dollars to provide urgent student relief/emergency aid (QFE 39).
- Forgave $1,230,691 in debt for 1,615 students in July 2021 using pandemic related federal funds (QFE 40).

Augmented/enhanced library resources and services to assist with teaching and student learning under pandemic conditions including:

- Hired OER (Open Educational Resources) Librarian to improve quality of remote learning
- Purchased streaming film access for instruction
- Created digitization system for lending of Hawai‘i-Pacific and Course Reserve print materials and self-service scanning
- Purchased a Mental Health ebook collection for use by students and campus mental health services
- Expanded digital ebook collection with digital magazine collection for instruction
To date the outcomes for Action Project 1 are hopeful. For our first goal/outcome, we did not increase student retention and persistence by 10% in 2018-2019. Fall to Spring persistence has remained steady at 68% since 2017. However, Fall to Fall persistence increased slightly from 44% in 2017 to 45% in 2019, successful course completion rates increased from 74% in 2016 to 78% in 2020, and the average number of semesters to graduate fell from 8.6 semesters in Summer 2016 to seven semesters in Fall 2021.

As for our second goal/outcome, “to increase the sense of belonging at the College through activities that connect and support students,” this is not measurable and we have decided to drop it from our plan. We will focus on the persistence and graduation measures.

For our third goal/outcome, the College was successful in increasing the three-year graduation rate from 16% to 22% by 2020-2021. Since there is a three to four-year lag for this data, the actual rate was 17.3% (2013) at the time Leeward’s 2018 ISER (QFE 41) was written. Leeward’s three-year graduation rates have steadily improved to 28.7% (2018). The UH System has adopted the Hawai‘i Graduation Initiative, which called for an aspirational goal of a 50% graduation rate by 2020-2021. Given the multiple year lag for these data, the College hopes to reach this rate and outcomes will be reported in our 2025 ISER.

As the College moves forward in the post pandemic environment, we will need to revisit our WIG process and strategies, especially as we move forward with the development of our new five-year strategic plan.

**Action Project 2: Improve student learning by making assessment more meaningful for faculty. (Standard II.A.3)**

**Goals and Outcomes**

- Provide faculty and staff with training assessment practices by way of learning and collaborative engagement opportunities with colleagues.
- Improve quality of outcomes assessment evidence in the College’s database of assessment results.
- Increase faculty and staff satisfaction with the process for reporting assessment result

<tr>
<td>Develop more individualized training sessions for faculty and staff.</td>
<td>Assessment Specialist &amp; Faculty Senate Assessment Committee</td>
<td>In 2018 (<a href="#">QFE 42</a>) an open campus forum was held to discuss promoting a positive culture of assessment on campus. This provided insights and ideas to the Faculty Senate led assessment committee for consideration and adoption into the campus culture. Group and one-on-one training sessions were held on the use of a new, homegrown Assessment Management System (AMS) known as Knack. In 2019 (<a href="#">QFE 43</a>) Knack was determined to be not FERPA approved by the UH System. A stop gap measure using Google Forms (<a href="#">QFE 44</a>) was instituted as the campus worked to find an acceptable AMS. In 2021 members of the Faculty Senate Assessment Committee (<a href="#">QFE 45</a>) created individualized data collection forms using Google Docs (<a href="#">QFE 46</a>) for courses missing SLO assessment data on the Google Forms and worked with individual instructors and Division Chairs. Assessment data was submitted for an additional 184 SLOs bringing the college’s assessment rate up from 33% to 95% (<a href="#">QFE 47</a>).</td>
</tr>
<tr>
<td>Create a one-stop website for assessment policies, procedures, and tutorials.</td>
<td>Assessment Specialist &amp; Faculty Senate Assessment Committee</td>
<td>This strategy will be part of the completion of the College’s website redesign (<a href="#">QFE 48</a>). The website overhaul and redesign are scheduled to be completed in Fall 2022. The goal is for this strategy to be completed by Fall 2023.</td>
</tr>
</tbody>
</table>
Take actionable steps toward “closing the loop” within the assessment process. Align assessment data with the curriculum so assessment results are meaningful and useful. Emphasize operationalizing the data findings for effective pedagogic improvement, programmatic adjustments, and resource allocations.

| OPPA & Faculty Senate Assessment Committee | With our new AMS (Anthology) the college hopes to make assessment more meaningful and useful. Currently, the Outcomes module is being used by a handful of volunteer “Early Adopters” (Fall 2021 and Spring 2022). This module allows individual instructors to assess SLO outcomes for their classes over time. It allows Division Chairs to view assessment data for courses in their department. The AMS will be able to map SLOs to PLOs allowing program coordinators to assess program level outcomes. The College’s next undertaking is to implement the Planning module of the AMS (Fall 2022), which will allow support programs to assess SAOs and report on academic, student and instructional program level outcomes. Programs and units will be able to use the information in their ARPDs should facilitate the College’s ability to further operationalize findings for effective pedagogic improvement, programmatic adjustments, and resource allocations.

Additionally, with the development of the 2023-2028 Strategic Plan and its embedded systematic evaluation, data and outcomes will be aligned in a more holistic way to reinforce use of data to inform decision-making at the college level, establishing a stronger purpose for sustained evaluation, and sharing of outcomes. |

| Assessment Specialist | For more than five years, Leeward CC used TK20 for assessment data collection and reporting. Due to the limited functionality of TK20 and dissatisfaction of faculty, the Assessment Specialist developed a homegrown AMS (QFE 49) that was lower in cost, easier to use and provided more features, however it was determined not to be FERPA approved by the UH System. As of Fall 2021, the college is using our newly acquired Anthology AMS. |

| Pilot an alternative assessment collection database with a clear, easy-to-use interface. | |
Conduct an evaluation session on the continued use of Tk20 versus the home-grown alternative assessment collection database.

Faculty Senate Assessment Ad Hoc Committee

Leeward’s original AMS (TK20) was not renewed. OPPA created a home-grown solution, which was utilized successfully; however, it was determined that it was not FERPA compliant. In September 2019, a Faculty Senate Ad Hoc Assessment Committee (QFE 50) reviewed different AMS platforms over a three-month period, settling on Anthology in 2020.

<tbody>
<tr>
<td>Connect course and program assessment to ARPD (Annual Report of Program Data) with redesigned ARPD template. Train program coordinators and unit heads on how to report assessment results that support program improvements and resource allocations.</td>
<td>Ad Hoc Planning Process Review Committee</td>
<td>As discussed under the “Plans Arising Out of the Self-Evaluation Process”, between Fall 2017 - Fall 2019, the Ad Hoc Planning Process Review Committee (QFE 51), reviewed and clarified roles in the planning process, reviewed and revised planning document templates including the resource request form and ARPD. Between Fall 2020-Fall 2021 (QFE 52), the VCAA revised the IPBP (integrated planning and budgeting process) two years in a row making the process clearer and more meaningful. In Fall 2020 and Fall 2021 the VCAA and OPPA held multiple training sessions for division chairs and program coordinators along with a revised Planning Process Overview (QFE 53). Data from the Employee Satisfaction Survey (QFE 54) show some improvement with the campus’ understanding of the planning process. As the College strives for continuous improvement, we will reflect on the findings in the 2022 Employee Satisfaction Survey.</td>

<tr>
<td>Fully implement the alternative assessment collection database or identified assessment software by May 2020.</td>
<td>Assessment Specialist</td>
<td>The COVID pandemic delayed our ability to purchase new assessment software due to the UH System’s budget freeze. A special Request for Exemption was made to the UH President to purchase the software. The new timeline for full campus-wide implementation is Fall 2022.</td>
</tr>
<tr>
<td>Implement initiative to create a culture of learning founded on motivational interest and active engagement.</td>
<td>Assessment Specialist &amp; Faculty Senate Assessment Committee</td>
<td>This activity is currently underway. Early adopters from each of the College’s divisions were identified and trained to use our new AMS <em>(QFE 55)</em>. In Spring 2022 we will recruit and train “Assessment Ambassadors” <em>(QFE 56)</em> to serve for two years in their respective divisions to train and support all instructional faculty with SLO assessment and using the system.</td>
</tr>
<tr>
<td>Continue training faculty/staff on engaging and meaningful assessment strategies.</td>
<td>Assessment Specialist</td>
<td>As discussed in this section of the Midterm Report, faculty training is currently underway for the Outcomes module of the AMS and faculty and staff training for the Planning module is expected in Fall 2022.</td>
</tr>
<tr>
<td>2020-2021 Strategies</td>
<td>Campus Leads</td>
<td>Measure of Progress</td>
</tr>
<tr>
<td>Complete an evaluation of efficacy of implemented changes and identify areas of needed improvement.</td>
<td>OPPA</td>
<td>This was delayed by the COVID pandemic. OPPA will complete an evaluation of the College’s assessment services and practices in 2022 to establish baseline data. The evaluation will be replicated annually to determine areas for improvement.</td>
</tr>
<tr>
<td>Develop a long-term plan for program review/assessment that engages the campus focusing on long-term goals for continuous improvement.</td>
<td>Ad Hoc Planning Process Review Committee</td>
<td>The Ad Hoc Planning Process Review Committee ended in Spring 2019 and the Faculty Senate Assessment Committee <em>(QFE 57)</em> has taken the lead on this in conjunction with the Assessment Specialist, OPPA, and the VCAA. As the College implements and evaluates its new AMS and assessment processes the above campus leads will develop a long-term plan by Fall 2024.</td>
</tr>
</tbody>
</table>
The College has made progress on our first goal/outcome to “Provide faculty and staff with training assessment practices by way of learning and collaborative engagement opportunities with colleagues”. Recent training on assessment practices include:

- Fall 2020 and Fall 2021 training sessions for division chairs and program coordinators on developing their Annual Report of Program Data and Comprehensive Review and Evaluation.
- Dossier Writing 101 Workshop Series (QFE 58), Summer 2021.
- Convocation Workshops on Assessment in 2018, 2019, Spring 2021 (QFE 59), Fall 2021
- Two hands-on training for Anthology Early Adopters, (Fall 2021) where participants (QFE 60) shared their screens on Zoom and practiced assessing their courses.
- We will hold Train-the-Trainer workshops for our Assessment Ambassadors (QFE 61) (Spring 2022) to assist peers in their department on using the new AMS.
- Future ideas (QFE 62) for more campus engagement include Assessment Champion incentives modeled after the College’s OER Champion initiative.

Progress has been made on our second goal/outcome to “Improve quality of outcomes assessment evidence in the College’s database of assessment results”. The Outcomes and Planning platforms for our new Anthology AMS allows for each instructional division, department, section and course to be able to manage their own outcomes assessment process. Each support unit (administrative, academic, and student affairs) will be able to capture their data as well. Anthology allows us to have a centralized method of data collection and analysis allowing us to share reports and data with key stakeholders and drive continuous improvement for teaching, student learning and student success. The ability to share information with key stakeholders will help with transparency and collaboration.

A related institutional endeavor is using Tableau for data visualization and analytics. Since Fall 2019, the UHCC System and College has provided 27 Leeward CC administrators and personnel with Tableau Creator, Explorer and Viewer licenses. OPPA started developing dashboards, implementing training, and disseminating information among the Administrative team. Tableau has allowed Division Chairs, Deans and Unit Heads a fast way to access and analyze individualized and program specific data in order to improve student learning, retention and services in the changing educational landscape created by COVID-19.

For our third goal/outcome to “Increase faculty and staff satisfaction with the process for reporting assessment results”, OPPA will complete an evaluation of the College’s assessment services and practices in 2022 to establish baseline data for satisfaction levels. The evaluation will be replicated annually to determine areas for improvement. Additionally, planning process questions from the College’s Employee Satisfaction Survey will continue to be monitored.

Shared Drive with Resources

Timeline

System Recommendation
Feedback on assessment options

Erika shared there was a similar recommendation in a past self evaluation. She was thinking of creating a delineation of duties chart to show how the three levels work - UH System, UHCC System, Campus. This could be a guide for how it works and then also create an assessment.

Groups: System Faculty Senate Chairs, Native Hawaiian Councils, Strategic Planning Council

This year we will create a pilot plan for the assessment process that will be used to show how/if we continually improve. UHCC System will create the system response that everyone will use in their midterm reports. System response will be sent to campuses by January 1, 2022.

Create a survey to get input on how system communication is working. System will work on a sample survey and share with ALOs to see if it meets the need. Then we can pilot the survey to see if it works as intended.
Campus Plans for the Midterm Report

Jeff asked about the institution-set standards. Strategic plan is under discussion. Should campuses use the same institution-set standards that were in the previous plan? Current Policy on Institution Set Standards includes the required elements through 2021. Pandemic has had an impact and will need to be addressed. Midterm Report is based on 2021 results.

Also student learning outcome assessment is now reported on in the Midterm Report as well. Question about disaggregating SLO assessment data. Jeff shared that he is on an evaluation team and there was a big debate. Erika said you need to indicate your rationale and what you are disaggregating on. It appears that most campuses are not currently collecting assessment data at the student level. Also, the manual refers to I.B.2. for SLOs.

Erika recommends this group continue to meet monthly to share how the work is going. She will also look at recent Midterm Reports to see how they addressed the SLO issue.

At a future meeting, campuses can share how they are doing with responding to their recommendations.

What's on your mind?

How are you doing with Quality Focus Essay projects? Some have started with working on it but some disruption due to COVID.

Erika brought up the most recent Biden relief package and the large amount of funding that will be available. It would be good if there were system technologies that everyone could adopt such as an assessment system or some other software. This is a good opportunity to purchase large budget items that can support innovation on all of the campuses. One idea is a call center to support students applying to campuses or outreach efforts.

Honolulu is just getting eLumen off the ground to allow disaggregation by student for SLOs. Leeward purchased Campus Labs/Anthology. Windward is using Aqua, but it may be changed. Kapiolani is using a home-grown spreadsheet that rolls up to a dashboard. Kauai is using Watermark Via and looking for a different solution.

Some discussion on the use of Clean Catalog. Some campuses like it, but some are less enthusiastic. Recommendation for Clean Catalog users to share. CCSSE, websites, catalog, NC SARA reporting are all common issues. NC-SARA reporting is due in May and based on IPEDS. Questions about external licensing.
Midterm Report to ACCJC

Campus Council, October 15, 2021
Midterm Report Expectations

● Due October 2022 but need BOR signatures by May 2022
● Evidence must be provided to support our responses
  ○ We need help gathering information and evidence in the following 13 areas:

1. Response to ACCJC Recommendations for Improvement:
   ○ “To ensure academic quality and improve institutional effectiveness, the College should improve efforts to analyze, disseminate and discuss assessment results of all outcomes across the campus to improve student learning.”
Midterm Report Expectations

2. Discuss Student Learning Outcomes
   ○ Describe our process that helps to lead improvements in teaching and learning
   ○ Areas to improve and refine an authentic culture of assessment
   ○ Examples where course, program, or service improvements occurred based on assessment data

3. Discuss Institution Set Standards
   ○ Reflect on trend data on institution-set standards for course completion, certificate completion, degrees awarded, and transfer.
Midterm Report Expectations

4. Discuss Outcomes of our Quality Focus Projects
   ○ Project #1 Increase student retention and persistence by keeping the students the College already has (i.e. WIG)
   ○ Project #2 Improve student learning by making assessment more meaningful for faculty.

5. Provided required training on faculty-initiated interaction in DE courses
   ○ List of workshops provided?
   ○ How addressed online conversions due to COVID?
   ○ Sample of extensive 3-year evaluation form. How many courses assessed? What is done with the information? Etc.
Need Help With Information and Narrative For

6. Conduct the Employee Satisfaction Survey
7. Conduct Administrative Services customer Satisfaction Survey
8. Conduct student focus groups on counseling and advising services
9. Conducted the Faculty Senate Campus Satisfaction Survey
10. Conducted the Student Government Effectiveness Survey

For the items above:

- Was this done? Dates?
- Copy of survey tool and/or methodology.
- Report of findings?
- How did we address findings?
Need Help With Information and Narrative For

11. Create a disability services training program for faculty and staff at the College.
   - Was training program created? What does it look like?
   - Dates offered, number of people trained.
   - Training program evaluation and feedback.

12. Examples and evidence for where course, program, or service improvements occurred based on assessment data.

13. Examples and evidence for all of the things we did due to COVID to address our WIG (keeping the students we have).
Next Steps

● Hoping to mobilize Campus Council constituents to help collect needed info, evidence & proof read (Midterm Report Committee)
  ○ OPPA will compile information and create drafts for review

● Timeline
  ○ 10/15/21: Create a Midterm Report Committee to begin drafting report
  ○ 11/15/21: Campus begins sharing draft report and collecting feedback
  ○ 3/15/22: Finalize Midterm Report
  ○ 4/14/22: Report to campus governance groups and others for signatures
  ○ 5/1/22: Submit report to VPCC Lacro for final signatures (President, BOR)
Aloha Everyone,

Attached is the first draft of our Midterm Report to the Accrediting Commission for Community and Junior Colleges (ACCJC). This report follows up on the activities we said we would do in our 2018 Institutional Self Evaluation Report. It also addresses ACCJC’s recommendations for improvement made to the College after their 2018 site visit (see External Evaluation Report).

At this time, I am requesting substantive feedback about the content of our Midterm Report (typos, formatting, etc. can be addressed later). Please review the report to ensure the information is accurate and clear. Please suggest any additions to the activities discussed along with supporting evidence. You can email me directly or make comments to this document. Please give me your feedback by Friday, January 7, 2022.

While the final report is not due until October 2022, our timeline is as follows given that the Board of Regents do not meet over the summer.

WELCOME

The oli komo, or welcoming chant, is a gift offered to those who visit our home. “Hālau Puʻuloa” tells of the beauty and abundance of our lands of Waiʻawa and the harbor of Puʻuloa (Pearl Harbor). The area possessed fishponds teeming with marine life and natural springs that fed the lush vegetation that ‘Ewa is known for. It speaks of the refreshing winds that cool and the guardian of the bay who protects. The oli extends all the riches of Puʻuloa to our guests as we invite them into our home.2

Hālau Puʻuloa

Hālau Puʻuloa he awa lau no ‘Ewa
He awa lau moana na ke Kēhau
He kiʻowai lua he muliwai no ‘Ewa
No ua ‘āina kai (iʻa) hāmau leo
E hāmau ana ka leo o ke kanaka
‘O pānea mai auaneʻi hila hila
Keʻeo ua iʻa la i loko o ke kai
O ke kai puakai ‘ula ai ke kai o Kuhia – e
He mai, he mai
Eia no mākou nei.

Translation
Expansive is Puʻuloa a harbor for ʻEwa
An extensive harbor belonging to the Kēhau breeze
An abundant, overflowing estuary for ‘Ewa
To this land belongs the iʻa that silences voices
The voices of people will be silenced
Yet, a response is always given lest there be shame
The aforementioned iʻa fills the sea
from the sacred reddish sea to the sea of Kuhia
Greetings, please enter
For here we are to welcome you.

Leeward Community College - Waiʻanae Moku Education Center also has an oli that is specific to that location. “Hālau Waiʻanae” is a traditional chant that is used to celebrate the Waiʻanae Moku area.

Hālau Waiʻanae

Hālau Waiʻanae molale i ka lā
Ala panoa ke kula o kūmanomano

1 ‘Ewa refers to the leeward or west side of the island.
2 Source: “Translation and Transcription of ‘Hālau Puʻuloa’” (W-1).
Kūnihi ka noho a Mauna Lahilahi
Hoʻomaha aku i ka wai o Lualualei
Lei ana Nuʻuanu i ke kāmakahala
I paukū ‘ia me ka ʻāhihi
I hoʻohihi nō hoʻi au
Naʻu nō hoʻi ʻoe
ʻO koʻu kuleana paʻa nō ia
He ʻike haole,
E lūlū lima ke aloha ē

Translation
_Waiʻanae is like a house that shimmers in the sun_
_An dry direct path that leads to the plain of kūmanomano grass_
_Steep is the stance of Mauna Lahilahi_
_We would rest near the waters of Lualualei_
_Nuʻuanu is adorned by the lei kāmakahala_
_Compared with the lei ʻāhihi_
_My admiration is yours_
_And yours is indeed mine_
_You are bound to me as one_
_When meeting the stranger_
_Extend the hand in the greeting of love_
INTRODUCTION

History and Description of Leeward Community College

The Hawai‘i archipelago presents a unique challenge and many opportunities for the seven community colleges of the University of Hawai‘i (UH) System. With seven campuses on four islands serving the state of Hawai‘i, the University of Hawai‘i Community Colleges (UHCC) must find ways to serve a wide range of students who may or may not reside on the same island as the colleges. In addition to the challenge of distance, there are many opportunities with the diverse cultures and ethnicities that reside in the islands. The UH System and Leeward Community College (Leeward CC) have made a special commitment to Native Hawaiians, the indigenous people of the islands. This commitment is demonstrated in the program offerings, support services, and the Wa‘ianae Moku Education Center operated by Leeward CC.

Leeward CC is the second largest of the seven UHCC campuses, and the College is located on the island of O‘ahu along with three other UHCC campuses. The campus of Leeward CC sits in the ahupua‘a (sub-district) of Wai‘awa overlooking the harbor of Pu‘uloa (Pearl Harbor). Centuries ago, Pu‘uloa harbor was the aquacultural center of O‘ahu. It was lined with fishponds and provided a significant portion of the island’s food supply. The surrounding freshwater springs and streams allowed for an abundant agricultural yield for all of the area’s residents.

Today, Pearl City is known for its proximity to the inland side of the Pearl Harbor military base, and it is considered a central point between Honolulu and the west side of the island, the Wai‘anae coast. From this location, Leeward CC has one of the largest service areas of the UHCC campuses (see Figure 1).

![State of Hawai‘i, by Geographic Region](image)

*Figure 1. Geographic region.*
History of Leeward Community College

Leeward CC was established in 1968 as the first community college in the state of Hawai‘i without a connection to a pre-existing technical school, nine years after statehood was granted. In the first year, there were 1,640 students who were ready to explore the community college experience, more than twice the anticipated number of students. Shortly thereafter, in 1971, the College was accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges (WASC). The College’s original guiding principles emphasized innovation and accessibility to higher education.

Since those beginnings, enrollment has grown to place Leeward CC among the largest of the seven public two-year community colleges in the UHCC System with approximately 7,000 students enrolled each fall semester in liberal arts, career and technical education, and noncredit programs.

In 1972, Leeward CC took over the Waiʻanae-Nānākuli Education Center as the operating agency. In 1977, this center was fully integrated into Leeward’s operations and organization. The Waiʻanae-Nānākuli Education Center was renamed the Leeward CC - Waiʻanae Moku Education Center in fall 2017 in conjunction with its recent move to a permanent facility. The Waiʻanae Moku Education Center offers credit and noncredit courses and a full range of learning and student support services. In fall 2017, it had a headcount enrollment of 417 students.

While the College primarily serves students in the Leeward coast and Central O‘ahu, a geographical region containing approximately a third of the state’s population, students from all parts of the island attend Leeward. One constant over the past 50 years has been Leeward’s focus on student learning as its motto makes clear: “To help people learn.”

Major Developments

New Instructional Programs
Leeward CC continues to look for new programs that will meet the workforce needs of the community. Since its institutional self-evaluation in 2012, the College has developed four new career and technical education degrees including the following: Associate in Science (AS) in Plant Biology and Tropical Agriculture, AS in Integrated Industrial Technology, Advanced Professional Certificate in Special/Inclusive Education, and a certificate program in Alternative Certification for teachers in career and technical education secondary programs. The College has also successfully moved two programs to established status. These programs are the AS in Natural Science and the Associate in Arts in Hawaiian Studies. Finally, the College received program accreditation for the AS in Health Information Technology. The Board of Regents approved this program for established status in June 2018.

Facilities and Infrastructure
Leeward CC has received a number of grants and system funding to complete, renovate, and refurbish facilities at the Pearl City campus. Shortly after the last self-evaluation visit in 2012, the College completed the Ka ʻImi ʻIke Education Building, a facility on the Pearl City
campus that is the home of Leeward CC’s Teacher Education program. Designed and built to meet the Leadership in Energy and Environmental Design’s silver certification, Ka ʻImi ʻIke has features such as photovoltaic panels, rainwater collection for irrigation, water bottle refilling stations, natural lighting, and a hybrid air conditioning system that incorporates natural ventilation. Additionally, the College completed the planned renovation of the Learning Commons, which involved re-envisioning the Library building as a one-stop shop for academic support services for students. The College also finished a renovation project of the Hālau ʻIke O Pu‘uloa that provides a larger collaboration space for students, additional offices, and renovated classroom spaces. Finally, the College relocated its Office of Workforce Development and Continuing Education due to the new public rail station being built in the campus parking lot. The new portable buildings form a small campus environment on the Diamond Head (east) side of the Pearl City campus.

In addition, the College finalized the move of its education center from Waiʻanae town to a neighboring community. The previous Waiʻanae site leased 9,680 gross square feet on the first and second floors of a two-story commercial building. The new location, located 1.7 miles from the previous site, is a building of 38,600 gross square feet that is being renovated in multiple phases, dependent upon funding availability. The main building is named Hale Kāiāulu. The word kāiāulu has a dual meaning: kāiāulu means “community” and is also the name of celebrated gentle trade winds unique to the area. Currently, the Waiʻanae Moku Education Center operates in the Phase I space of 11,000 gross square feet. Students are able to utilize three general classrooms, a math lab/classroom, a computer lab/English classroom, a testing center, a student lounge, and a conference room. The Waiʻanae Moku Education Center also includes program support spaces such as offices and meeting rooms for administrators, faculty, counselors, lecturers, and security personnel. This new location is expected to provide the College an opportunity to expand the population served in this historically underserved area.

**System Initiatives**

The UHCC System has coordinated a number of initiatives and provided funding to address the changing needs of students. Some of the implemented initiatives include the following:

- **Acceleration Initiative.** Provides accelerated and co-requisite models for helping students move through developmental education classes more quickly. Leeward began its efforts in this area before the UHCC System initiative and has scaled up quickly with dramatic results.

- **Early College (Dual Enrollment).** Provides high school students with the opportunity to take college-level courses and earn both high school and college credits at the same time. Among the seven UHCC campuses, Leeward offers the most Early College courses. In spring 2018, Leeward was the first UHCC campus to have 12 Early College students graduate from two different high schools having also earned an associate degree.

- **Open Educational Resources (OER).** Offers courses that do not require students to purchase a textbook. Most OER courses provide online resources free of charge. Leeward has taken a lead role in developing OER courses in the UHCC System,
which is especially important to the College’s underserved student populations.

- **STAR and Guided Pathways.** Links undergraduate student pathways to registration using the UH System’s newly launched STAR Guided Pathway Selection (GPS) registration system. Leeward’s STAR team has become the trainers for the rest of the campuses in setting up the pathways and ensuring students are able to complete their program pathways as efficiently as possible.

**College Demographic Data**

*Service Area Demographic Information*
Leeward CC is located on the island of O‘ahu in the state of Hawai‘i and serves communities on the north and west shores of the island. The College’s service area contains approximately 30 percent of the state’s population, which in 2010 was 1,360,301.

*Brief Overview of Student Demographic Information – Fall 2017*
In fall 2017, there were 6,805 students enrolled at the College. Of those students, 41 percent attended full time and 59 percent attended part time. The ratio of female to male students has remained consistent at about 3:2 over the last five years. Females constitute close to 60 percent and males about 40 percent of the total student population.

There were 417 students enrolled at the Wai‘anae Moku Education Center in fall 2017. Of those students, 62 percent were Native Hawaiian.

The average age of a Leeward student is 25 years old. However, the majority of students are less than 21 years old indicating that most students are entering the College soon after graduating from high school.

In fall 2017, 66 percent of Leeward’s student population identified as either Native Hawaiian, Filipino, or Asian. Within that group, 26 percent identified as Native Hawaiian, 23 percent as Filipino, and 17 percent as Asian. The next two largest groups were those that identified with more than one ethnicity (16 percent) followed by Caucasian (ten percent). The remaining eight percent of the student population identified as either Pacific Islander, African American, Hispanic, American Indian, or Alaska Native.

The number of students who receive financial aid in the form of Federal Pell Grant funds has remained steady at approximately 26 percent over the last five years, or 1,808 students receiving Pell Grant funds out of 6,805 total enrollment in fall 2017.

**Instructional Sites**
Leeward CC has two instructional sites (see Figure 2). The College’s main campus is located in Pearl City, O‘ahu. Its other site, the Leeward CC - Wai‘anae Moku Education Center, was originally located in Wai‘anae town and moved 1.7 miles to a new location in fall 2017.

Specialized and Programmatic Accreditation

The College offers four programs that are accredited by external agencies.

- The Automotive Technology program is accredited by the National Automotive Technicians Education Foundation.
- The Culinary Arts program is accredited by the American Culinary Federation Foundation Accrediting Commission.
- The Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management.
- The Teacher Education Alternative Certification for Career and Technical Education program is accredited by the Council for the Accreditation of Educator Preparation.

Presentation of Institution-Set Standards and Student Achievement Data

Institution-Set Standards
The University of Hawai‘i Community Colleges Policy (UHCCP) 4.203, Institution-Set Standards, established seven institution-set standards that apply to the colleges within the UHCC System. Each standard has a baseline, or minimum level of achievement, and an aspirational target for improvement.

Student Achievement Data

**Enrollment**

The College headcount has decreased by 15 percent since 2013 when the College achieved a record high enrollment of 7,976 students. The percentage of part-time students is consistently around 59 percent while the percentage of full-time students remains steady at about 41 percent.

Ethnicity

Leeward CC tracks 17 ethnicities, three mixed ethnicity categories, and three “Other” categories. The table below is a condensed representation of the ethnic makeup of Leeward students with particular attention to three special populations as recognized in the College mission and strategic plan: Native Hawaiians, Filipinos, and other Pacific Islanders.

Note. Spreadsheet rounding errors may result in total percentages that do not equal 100 percent. Retrieved from OPPA Data Extraction, ODS, IRO_BASE_UH.

In fall 2017, 26.1 percent of Leeward CC’s student population identified as Native Hawaiian or part-Hawaiian, the largest ethnic group. Filipinos follow at 22.9 percent and Other Asians (Asian Indian, Chinese, Japanese, Korean, Laotian, Thai, Vietnamese, Mixed Asian, and other Asian not listed) make up the third largest group at 17.3 percent of the population.

Those who identify with two or more ethnicities make up 15.7 percent of the population. The next largest group, listed as “Other,” is African American or Black, American Indian or Alaskan Native, Caucasian or White, Hispanic, and those who provided no data. They represent 15.3 percent of the student population. Other Pacific Islanders (Guamanian and Chamorro, Micronesian, Samoan, Tongan, Mixed Pacific Islander, and Other Pacific Islanders) are the smallest group with 2.7 percent. Table 8 shows the distribution of all categories of ethnicity at Leeward CC.

First-Term, Degree-Seeking Students

Over the last five years, approximately 21 percent of the student population were first-time, degree-seeking students. Of that group, over 60 percent sought an Associate in Arts degree, 20 to 30 percent sought an Associate in Science degree, three to nine percent intended to work towards an Associate in Applied Science degree, about two to three percent sought a Certificate of Achievement, and three to six percent sought a Certificate of Completion or Certificate of Competence.

Distance Education

Approximately 40 percent of students at Leeward have taken at least one distance education (DE) course. The data over the last five years show a slight but consistent rise in the ratio of students who take DE courses. As the College makes more classes available in a DE format
and as more students become familiar with the delivery system, the College expects this number will continue to grow in the next few years.

**Successful Course Completion**

**Overall**

The successful course completion rate is the percentage of students receiving a grade of C or better in a course. For the denominator, the calculation uses the number of students who receive valid grades, including W, at the end of the semester. The institution-set target value is 70 percent. In the past five years, the successful completion rate has increased slightly each year. At around 75 percent, it has gone up about two percentage points since 2013.

Distance Education vs. Face-to-Face Courses by Ethnicity

Successful course completion rates for Native Hawaiian and Filipino students enrolled in DE courses have been comparable to those in face-to-face courses.

Pacific Islander students have had inconsistent successful completion rates in DE classes compared to face-to-face classes. In 2017, the completion rate for DE courses was slightly better in DE classes than face-to-face classes.

Persistence of Students from Term to Term

All Students

Leeward CC’s student persistence from fall to spring semesters is holding steady at around 68 percent. Full-time students have better persistence than part-time students, typically a little over 18 percentage points higher.

Progression to College-Level Courses

The UHCC System implemented the Acceleration Initiative at all seven campuses to alleviate success gaps and enhance the graduation rate for underrepresented students. As part of the Acceleration Initiative, the College has accelerated learning tracks in math and English. These tracks are designed to move students into college-level courses within one semester or one year, depending on the student’s readiness. These efforts are intended to increase college-level math and English completion rates and streamline the developmental math and English sequence. The Catalog provides descriptions of the available tracks (I-2). For further discussion, see Standard II.A.4.

English

The English faculty created two options to address student needs. The first option compressed the four developmental education courses into a single 6-credit English 24 course. Students can complete English 24 in one semester and take English 100 in their second semester. For students who are almost ready for English 100, the Accelerated Learning Program (ALP) accelerates students into English 100 and enrolls them in a co-requisite course, ALP English 22.

For students that place two levels below college-level English, English 24 is helping them complete their developmental preparation more quickly. However, students who place in the ALP model successfully complete English 100 at a rate of almost 70%. This is a significant improvement over the past five years.

**Math**

Math faculty moved to an Emporium model for pre-collegiate math classes starting in 2010. The success of this model has led to the use of the Emporium model in some college-level math classes as well. In fall 2016, the College created three different tracks for developmental math: College Algebra, College Math, and Quantitative Methods (QM). Each track has co-requisite courses, which shortened the course sequence and reduced students’ time in remedial/developmental math. The tracks help to guide students through the pathways to meet their graduation requirements.

Table 25.

Degrees and Certificates Awarded

Curriculum Category

Leeward CC has 15 degree programs: four general and/or pre-professional and 11 career and technical degree programs.

**General and/or Pre-Professional Degrees**
1. Associate in Arts in Liberal Arts
2. Associate in Arts in Teaching
3. Associate in Science in Natural Science
4. Associate in Arts in Hawaiian Studies

**Career and Technical Education Degrees**
1. Accounting
2. Automotive Mechanics Technology
3. Business Technology
4. Culinary Arts
5. Digital Media Productions
6. Health Information Technology
7. Information and Computer Sciences
8. Integrated Industrial Technology
9. Management
10. Plant Biology and Tropical Agriculture
11. Television Production

From 2013-2016, approximately 75 percent of Leeward students declared an intention to pursue a general and/or pre-professional degree and about 25 percent a degree in a career or technical program. However, there is a change in 2017 with more students declaring an intention to pursue a career and technical program.

Distance Education

Overall

Between 2013 and 2017, the number of degrees and certificates awarded to students who had taken at least one DE course increased by 42 percent.

Students Earning a Degree or Certificate with 12 Credits Minimum Earned from DE Courses by Native Hawaiian, Filipino, and Other Pacific Islander.

The College regularly tracks three ethnicities: Native Hawaiian, Filipino, and Other Pacific Islander. Of those ethnicities, more Native Hawaiian students received degrees or certificates with at least 12 credits earned from DE courses.

**Degrees and Certificates Awarded by Native Hawaiian Students**

The goal of the Hawai‘i Graduation Initiative is to increase the percentage of working age adults with two- or four-year degrees to 55 percent by 2025. In the *UHCC Strategic Directions 2015-2021*, the UH System identifies Native Hawaiians as one of three featured target groups. (The other two groups identified are low-income students and those from underserved regions and populations in Hawai‘i.) Leeward CC’s *Strategic Plan 2015-2021* aligns with the UH System plan by committing to increase the number of Native Hawaiians who receive a degree and/or certificate from the College. Since 2013, the number of degrees and certificates awarded to Native Hawaiian students has increased by 36 percent.
Table 38.

Transfers with at Least 12 Credits from Distance Education Courses by Native Hawaiian, Filipino, and Pacific Islander

About eight percent of those who transfer with an associate degree and about ten percent of pre-degree transfers with at least 12 credits earned from DE courses are Native Hawaiian or part-Hawaiian students. About six percent of students who transfer to a UH baccalaureate institution and about seven percent of students who transfer with an associate degree are Filipino. About one percent of students who transfer to a UH baccalaureate institution and
about 0.7 percent of students who transfer with an associate degree are from the Pacific Islands.

**Job Placement Data**

*Student Job Placement*

The Job Prep Services office offers job placement assistance to all Leeward students and graduates. These services include resume assistance, interview preparation, employment strategies, and labor market information.

The Carl D. Perkins Vocational and Technical Education Act provides funding to states and other grantees to develop academic, career, and technical skills of secondary and postsecondary students. As an awardee, Leeward CC tracks placement rates of students enrolled in career and technical education programs.

Table 44 shows the job placement rate for 2013-2017. A job placement rate is calculated by dividing the number of students who have stopped program participation and who are retained in employment, military service, or an apprenticeship program following program completion by the number of students who have stopped program participation.
### Table 44.

### Organization of the Self-Evaluation Process

**Timeline**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer 2016</td>
<td>● The accreditation liaison officer (ALO) identified the self-evaluation co-chair and members of the self-evaluation core team.</td>
</tr>
</tbody>
</table>
| Fall 2016    | ● The UH vice president of community colleges met with the ALOs from all seven community college campuses to discuss the self-evaluation process and efforts being done at the system level.  
               ● The ALO, core team, and administrators participated in a two-day accreditation workshop conducted by consultant Dr. Robert Pacheco for all community college campuses.  
               ● The ALO, core team, and administrators met with Dr. Pacheco at the Pearl City campus to design tactics and create a timeline.  
               ● The core team worked to better understand the Accreditation Standards and began to collect evidence. |
| Spring 2017  | ● Faculty, staff, and administrators participated in breakout sessions on accreditation topics at the College’s spring convocation.  
               ● The core team continued to collect evidence, began to identify possible changes and plans, and wrote the narrative for the Evidence of Meeting the Standard sections. |
| Summer 2017  | ● Five members of the core team met to analyze, evaluate, and revise the Evidence of Meeting the Standard sections.  
               ● Standard IV team leads participated in the UHCC System task force to compose system response to Standard IV.C and IV.D. |
| Fall 2017    | ● The ALO distributed the first draft of the institutional self-evaluation report (ISER) to the campus.  
               ● The campus community provided feedback on the draft.  
               ● The campus community engaged in dialogue about the ISER findings.  
               ● Standard IV team leads continued to participate in the UHCC System task force. |
| Spring 2018  | ● The core team collected broad campus input at convocation through structured roundtable discussions on accreditation topics.  
               ● The ALO distributed the second draft of the ISER to the campus.  
               ● The ALO, co-chair, and editor finalized the report and the evidence.  
               ● The ALO distributed the final draft of the ISER to the campus.  
               ● Campus governance groups approved the ISER. |
| Fall 2018    | ● The evaluation team visits in October.                                                                                               |
For Standards IV.C and IV.D, the UHCC System convened teams with representatives from each of the six community colleges; the UHCC System office; and, for Standard IV.D, representatives from the Board of Regents. The system teams worked on the Standards starting in summer 2017 until April 2018. The teams agreed upon the content for both Standards through consensus, and the appropriate individuals provided evidence. The teams standardized the text for inclusion in the six UHCC institutional self-evaluation reports. Additionally, UHCC System representatives provided text and evidence for system-related information in Standard III. For a discussion of the governing board’s participation in the accreditation process, see Standard IV.C.13.

Organizational Information

Organization of Leeward Community College

Leeward CC most recently reviewed and updated its organization charts and functional statements on July 1, 2017 (L3, L4).
Functional Responsibilities of the UH System, the UHCC System, and the College by Major Accreditation Topic

<table>
<thead>
<tr>
<th>Accreditation Topic</th>
<th>UH System/UHCC System</th>
<th>College</th>
</tr>
</thead>
<tbody>
<tr>
<td>I.A. Mission</td>
<td>The UH System mission is adopted by the Board of Regents (BOR) and reflected in UH policy. All colleges are expected to conform their mission statements to the UH mission.</td>
<td>Individual college missions are derived from the UH System mission and approved by the BOR. Colleges are responsible for disseminating the mission statement and ensuring that college planning and resource allocation decisions reflect the mission statement.</td>
</tr>
<tr>
<td>I.B. Academic Quality</td>
<td>The UHCC System establishes system wide institution set-standards as well as system metrics and goals to achieve student success. System student success metrics are used in planning and resource allocation at the UHCC System level.</td>
<td>Colleges manage the process of establishing course- and program-based learning outcomes and assessment and are responsible for using the assessment information to improve student learning.</td>
</tr>
<tr>
<td>I.B. Institutional Effectiveness</td>
<td>Both the UH System and the UHCC System provide data analytics to measure student success including differentiating the outcomes by targeted student populations. The UHCC System also provides data to the colleges in support of program review and accreditation compliance.</td>
<td>Colleges use data analytics provided by the UH System and the UHCC System along with their own analysis of assessment results to improve student success. Data is disaggregated to allow analysis of sub-populations.</td>
</tr>
<tr>
<td>I.C. Institutional Integrity</td>
<td>The UH System and the UHCC System publish information for prospective students including cost of attendance. Some policies regarding institutional integrity exist in UH System policies or system wide collective bargaining agreements.</td>
<td>Colleges are primarily responsible for communicating accurate information including accreditation information to students, prospective students, and the general public.</td>
</tr>
<tr>
<td>II.A. Instructional Programs</td>
<td>The UHCC System establishes policies relating to degrees and certificates in alignment with UH Executive and BOR policies. All degree and certificate programs require BOR approval after review by the college, the UHCC System, and the UH System. The UH System and the UHCC System establish internal UH articulation agreements, general education core agreements, and transfer policies.</td>
<td>Colleges are responsible, through their internal curriculum processes, for approving all courses and programs, including course and program learning outcomes and assessment, and ensuring that both programs and courses meet commonly understood higher education standards.</td>
</tr>
<tr>
<td>Accreditation Topic</td>
<td>UH System/UHCC System</td>
<td>College</td>
</tr>
<tr>
<td>-----------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>II.B. Library and Learning Support</td>
<td>The UH System provides a common library services software and shared services agreements to all ten UH System campuses. The UH and/or the UHCC System provide some learning support services such as course management software and online tutoring to all students.</td>
<td>Colleges establish the on-campus library and learning support services, assess their effectiveness, and improve services as appropriate.</td>
</tr>
<tr>
<td>Services</td>
<td></td>
<td></td>
</tr>
<tr>
<td>II.C. Student Support Services</td>
<td>The UHCC System provides shared services for back office financial aid and coordinates other delivery of student support services.</td>
<td>Colleges are responsible for on-campus student support services including establishing service-level outcomes, assessment, and analysis of the services for different sub-populations. All co-curricular services are based at the colleges. UHCC campuses have no athletic programs.</td>
</tr>
<tr>
<td>II.A. Human Resources</td>
<td>The UH System, the UHCC System, and applicable collective bargaining agreements determine human resource policies and classifications. The UHCC System establishes faculty academic qualifications for both regular and adjunct faculty. The UH System and the UHCC System act as appeal levels on human resource-related matters. System and colleges share professional development responsibilities.</td>
<td>Colleges implement the applicable human resource policies and collective bargaining contracts. Most hiring and other human resource decisions are based on the campus. Selected higher-level appointments and classifications require system approval.</td>
</tr>
<tr>
<td>III.B. Physical Resources</td>
<td>Development of long-range physical plans and implementation of capital improvement plan projects are the responsibility of the UH System and the UHCC System.</td>
<td>Colleges provide input into plans and priorities for capital improvement plan projects. Colleges are responsible for regular maintenance of the physical plant at the college.</td>
</tr>
<tr>
<td>III.C. Technology Resources</td>
<td>The UH System manages technology resources including network infrastructure and enterprise software systems. The UH System and the UHCC System plan and coordinate system wide online learning support and program delivery.</td>
<td>Colleges are responsible for on-campus networks, technology resources, and technology support.</td>
</tr>
<tr>
<td>Accreditation Topic</td>
<td>UH System/UHCC System</td>
<td>College</td>
</tr>
<tr>
<td>------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>III.D. Financial Resource Planning</td>
<td>The UH System and the BOR set reserve policies, approve the annual operating budgets, and approve the UH System request for new operating funds submitted to the state legislature. The development of the budget and budget request are based on a policy paper derived from the strategic plan and approved by the BOR. The UHCC System is appropriated funds by the state legislature and allocates those funds to the colleges. The UHCC System does not receive funds on a full-time equivalent or other formula basis from the legislature.</td>
<td>Colleges are involved in the system budget planning including adhering to all reserve requirements established by the BOR. Colleges are responsible for internal allocation of funds based on the allocations and revenue generated by the colleges.</td>
</tr>
<tr>
<td>III.D. Financial Resource Stability</td>
<td>The UH System manages university fiscal systems. Regular audits are conducted of the UH System, including separate schedules for the UHCC System. The UH internal auditor conducts several audits per year focusing on internal controls and management processes. The UH System centrally manages all extramural funds.</td>
<td>Colleges implement fiscal systems in accord with university system fiscal policies. When audits identify weaknesses or needed improvements, colleges respond with improvement plans that are incorporated into the audit reports.</td>
</tr>
<tr>
<td>III.D. Financial Resource Liabilities</td>
<td>The UH System does not manage or fund fringe benefits, including post-retirement pensions and other post-retirement benefits. These expenses and liabilities are funded and managed by the state of Hawai‘i. The UH System manages all UH debt obligations.</td>
<td>Colleges monitor loan default rates and implement action plans as appropriate.</td>
</tr>
<tr>
<td>III.D. Financial Resource Contractual Agreements</td>
<td>The UH System establishes and manages all contracts in accordance with state procurement laws.</td>
<td>Colleges adhere to UH System policies and practices in the procurement of all contracts for goods, services, and professional services.</td>
</tr>
<tr>
<td>IV.A. Decision-Making Roles and Responsibilities</td>
<td>Board policy establishes a commitment to shared governance. The UH System and the UHCC System confer regularly with college governance groups. State statute governs formal consultation with collective bargaining units.</td>
<td>Colleges implement shared governance policies and processes for internal college decision-making.</td>
</tr>
</tbody>
</table>
### IV.B. Chief Executive Officer (CEO)

<table>
<thead>
<tr>
<th>Accreditation Topic</th>
<th>UH System/UHCC System</th>
<th>College</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The UH System and the UHCC System delegate to the college CEO authority for college operations within the policy limits of the UH System.</td>
<td>College CEOs are responsible for all college actions, subject to UH System policies and delegation of authority as reflected in board policy, UH executive policy, and UHCC System policies.</td>
</tr>
</tbody>
</table>

### IV.C. Governing Board

<table>
<thead>
<tr>
<th>Accreditation Topic</th>
<th>UH System/UHCC System</th>
<th>College</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The BOR is established by statute. Members are selected by the governor with the consent of the Senate from a list recommended by a review committee. Board policies are regularly reviewed and posted. BOR bylaws govern board and board member behavior. All board actions are subject to state open meeting and public information laws and regularly published.</td>
<td>Colleges submit action items to the BOR through the vice president for the UHCC System and the UH System.</td>
</tr>
<tr>
<td></td>
<td>The vice president for the UHCC System acts as the liaison to the BOR for all UHCC matters including accreditation.</td>
<td></td>
</tr>
</tbody>
</table>

### IV.D. Multi-College Districts or Systems

<table>
<thead>
<tr>
<th>Accreditation Topic</th>
<th>UH System/UHCC System</th>
<th>College</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The BOR appoints the UH System president who is responsible for the entire ten campus system of higher education in Hawai‘i. The UH president appoints the vice president for community colleges who is responsible for the seven-campus community college system. The vice president appoints and supervises the individual community college chancellors. The UH System is responsible for UH executive policies, UH System planning and coordination, and for selected system wide support services such as financial services and facilities planning. The UHCC System is responsible for UHCC wide policies, UHCC budget and resource allocation, UHCC system planning and coordination, and selected system services.</td>
<td>Colleges operate within the policy and planning framework established by the UH System and the UHCC System.</td>
</tr>
</tbody>
</table>

The UHCC System’s detailed functional map summarizes the delineation of functions and the differentiation of responsibilities between system and campus level. The community colleges reviewed and updated the map in fall 2017 (I-5).
Certification of Continued Institutional Compliance
with Eligibility Requirements

1. Authority
The institution is authorized or licensed to operate as a post-secondary educational institution and to award degrees by an appropriate governmental organization or agency as required by each of the jurisdictions or regions in which it operates.

Leeward Community College is a public, postsecondary institution of the University of Hawai‘i Community Colleges (UHCC) operating under the authority of the state of Hawai‘i and the UH Board of Regents (BOR) to award academic degrees and certificates (I-6). The College is accredited by the Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges (I-7).

2. Operational Status
The institution is operational, with students actively pursuing its degree programs.

The College has been in operation since 1968 with students actively pursuing degree and certificate programs during the fall and spring semesters and summer sessions. In fall 2017, the College enrolled 6,805 credit students down from 7,976 students enrolled in fall 2013. The College awarded 770 degrees and certificates in 2013 with an increase to 1,019 in 2017. A current schedule of classes is available on the College website (I-8).

3. Degrees
A substantial portion of the institution’s educational offerings are programs that lead to degrees, and a significant proportion of its students are enrolled in them. At least one degree program must be of two academic years in length.

A substantial portion of the College’s educational offerings are programs that lead to degrees. The Catalog 2017-2018 lists 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence (I-9, I-10). Data on degrees and certificates awarded by program can be found on the Institutional Research Data webpage of the College intranet (I-11). The largest program awarding degrees is the Associate in Arts in Liberal Arts. The College also provides noncredit certificates for students to acquire skills for job placement directly into the workforce through the Office of Continuing Education and Workforce Development (I-12).

4. Chief Executive Officer
The institution has a chief executive officer appointed by the governing board, whose full-time responsibility is to the institution, and who possesses the requisite authority to administer board policies. Neither the district/system chief executive officer nor the institutional chief executive officer may serve as the chair of the governing board. The institution informs the Commission immediately when there is a change in the institutional chief executive officer.

The chief executive officer of a UHCC campus is the chancellor, who is appointed by the BOR. The College’s chancellor is Manuel J. Cabral, who the board officially appointed in
May 2008 (L13). Prior to his appointment, he served as the College’s interim chancellor since March 2007, division chair of the Mathematics and Natural Sciences Division since 1988, and math instructor since 1980. The chancellor provides leadership in planning and setting priorities for the College, managing resources, and ensuring implementation of statutes, regulations, and policies (L14). After more than 11 years, the chancellor will retire on July 1, 2018, and Suzette Robinson will assume the position of interim chancellor.

5. Financial Accountability

The institution annually undergoes and makes available an external financial audit by a certified public accountant or an audit by an appropriate public agency. Institutions that are already Title IV eligible must demonstrate compliance with federal requirements.

An independent certified public accounting firm annually audits the UH System’s financial statements. The UH Administrative Procedures, which are located on the Policies and Procedures Information System website, outline internal control procedures (L15). The auditing procedures provide objective third-party review of internal controls and procedures. The results and recommendations of the audit are presented to the BOR. Other major campus audits include the required Federal Compliance Audit or A-133, the Vocational Education Act Audit, the Financial Aid Audit, various legislative audits, and unscheduled and unannounced audits performed by the UH Office of the Internal Auditor (L16).

Eligibility Requirements 6 through 21 are addressed in the responses to the following Accreditation Standards:

Certification of Continued Institutional Compliance with Federal Regulations and Commission Policies

### Public Notification of an Evaluation Team Visit and Third Party Comment

[Regulation Citation: 602.23(b)]

Leeward Community College has made an appropriate and timely effort to solicit third-party comment in advance of its comprehensive evaluation visit.

- The College posted a draft of its institutional self-evaluation report on the College website in spring 2018 (I-17).
- The College’s accreditation webpage also includes the visit dates and provides a link to an online feedback form (I-17).
- See responses to Standards LC.12, LC.13, IV.B.4, and Eligibility Requirement 21.

The College cooperates with the Accrediting Commission for Community and Junior Colleges (ACCJC) evaluation team in any necessary follow-up related to the third-party comment.

- The College has received no third-party comments. The College will cooperate with the evaluation team in any necessary follow-up related to third-party comment.
- See responses to Standards LC.5, LC.12, and Eligibility Requirement 21.

### Standards and Performance with Respect to Student Achievement

[Regulation Citations: 602.1(a)(1)(i); 602.17(f); 602.19(a-e)]

The College has defined elements of student achievement performance across the campus and has identified the expected measure of performance within each defined element. Course completion is included as an element of student achievement.

- The College has established institution-set standards for student achievement based on the University of Hawai‘i Community Colleges Policy (UHCCP) 4.203, Institution-Set Standards, and the UHCC Strategic Directions 2015-2021 (I-1, I-18). These standards are aligned with the College’s mission statement and Strategic Plan 2015-2021 (I-19).
- Successful course completion is one of the institution-set measurements.
- See Presentation of Institution-Set Standards and Student Achievement Data.
- See responses to Standards LA.1, LB.3, and Eligibility Requirement 11.

The College has defined other elements of student achievement performance for measurement that have been determined as appropriate to the College mission.

- The other measurements of student achievement include, but are not limited to, degrees and certificates awarded, transfer to baccalaureate institutions, Integrated Postsecondary Education Data System Student Success Rate, licensure and certification examination success rate, and job placement rate (I-1). See Presentation of Institution-Set Standards and Student Achievement Data.
- See responses to Standard LB.3 and Eligibility Requirement 11.

The institution-set standards for programs and across the College are relevant to guide self-evaluation and institutional improvement; the defined elements and expected performance
levels are appropriate within higher education; the results are reported regularly across the campus; and the definition of elements and results are used in program-level and institution wide planning to evaluate how well the College fulfills its mission, to determine needed changes, to allocate resources, and to make improvements (I-20).

- The College reports institution-set standard data to ACCJC in its annual report (I-21).
- The College’s annual integrated planning process includes assessments at the course, program, and institutional level (I-22).

The College analyzes its performance as to the institution-set standards and as to student achievement, and the College takes appropriate measures in areas where its performance is not at the expected level.

- The College regularly assesses learning outcomes for courses, programs, academic services, and student services units (I-23).
- Student achievement data are integral to the College’s planning process (I-22).

### Credits, Program Length, and Tuition

[Regulation Citations: 602.16(a)(1)(i); 602.17(f); 602.19(a-e)]

Credit hour assignments and degree program lengths are within the range of good practice in higher education in policy and procedure.

- The College’s course credit hour conforms to the Carnegie Unit as well as to federal and state guidelines that define a course credit hour.
- The UHCC Policy UHCCP #5.228, Credit Hour, defines a credit hour as 50 minutes to one hour of class or faculty instruction and a minimum of two hours of work per week outside of class over approximately 15 weeks (I-24).
- Alternately, a credit hour can be earned through an equivalent amount of work for other activities such as distance education (DE) instruction, laboratory work, studio work, and internships.
- See responses to Standard II.A.9 and Eligibility Requirements 9, 10, and 12.

The College verifies the assignment of credit hours and degree program lengths, ensuring they are reliable and accurate across classroom-based courses, laboratory classes, DE classes, and courses that involve clinical practice, if applicable.

- UHCCP 5.203, Program Credentials: Degrees and Certificates, sets graduation requirements for associate degrees and certificates (I-25). These requirements include the completion of 60 baccalaureate-level semester credits, the evaluation of the student’s work, and the fulfillment of stated outcomes with a cumulative 2.0 grade point average or higher for all courses needed to meet the degree requirements.
- All programs are vetted through the College’s curriculum approval process, which is in compliance with the College’s Policy L5.201, Curriculum Review and Revision (I-26).
- See responses to Standard II.A.9 and Eligibility Requirements 9, 10, and 12.
Tuition is consistent across degree programs (or there is a rational basis for any program-specific tuition).

- The base tuition at the College is consistent across all degree programs. The Catalog and the College website list any additional fees when relevant or appropriate (I-27, I-28, I-29, I-30).
- See responses to Standard LC.6 and Eligibility Requirement 11.

Any clock hour conversions to credit hours adhere to the State of Hawai‘i Department of Education’s conversion formula in policy, procedure, and practice.

- The College does not offer clock-hour based courses.
- See response to Standard II.A.9.

The institution demonstrates compliance with the Commission Policy on Institutional Degrees and Credits.

[Regulation Citations: 600.2 (definition of credit hour); 602.16(a)(1)(viii); 602.24(e), (f); 668.2; 668.9]

- The College ensures that all programs are sufficient in content, breadth, and length through the Curriculum Committee’s approval process (I-31). The College offers a variety of programs of various lengths of study to meet the needs of students pursuing educational goals at the College. All programs have published learning outcomes developed by the faculty within the program. Program-level learning outcomes are assessed as part of ongoing assessment processes at the College (I-32). The University of Hawai‘i (UH) Board of Regents (BOR) reviews and approves all programs.
- See responses to Standards II.A.5; II.A.9; and Eligibility Requirements 9, 10, and 12.

Transfer Policies

[Regulation Citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii)]

Transfer policies are appropriately disclosed to students and to the public.

- The Admissions and Records office and counselors distribute the College’s transfer of credit policies.
- The College website and the Catalog list the transfer of credit policies, and these policies are discussed in transfer workshops held throughout the semester (I-33, I-34).
- The UH System Course Transfer Database, searchable by students, includes course evaluations and equivalencies for UH campuses and other institutions (I-35).
- See responses to Standard II.A.10 and Eligibility Requirement 20.

Policies contain information about the criteria the College uses to accept credits for transfer.

- Executive Policy (EP) 5.209, Student Transfer and Inter-Campus Articulation, provides guidelines for student transfer and inter-campus articulation within the UH System (I-36).
- See responses to Standard II.A.10 and Eligibility Requirement 20.

The College complies with the Commission Policy on Transfer of Credit.
The UH System Course Transfer Database, the UH System Transfer site, and transfer information provided in the Catalog and on the College website as well as the response to Standard II.A.10 provide evidence of the College’s compliance with this policy (I-33, I-34).

See responses to Standard II.A.10 and Eligibility Requirement 20.

Distance Education and Correspondence Education

The College has policies and procedures for defining and classifying a course as offered by DE in alignment with U.S. Department of Education (USDE) definitions.

- The College has a DE coordinator who provides DE support with iLearn (for students), iTeach (for instructors), as well as through workshops for campus constituents who teach both credit and noncredit courses (I-37).
- The College’s Faculty Senate has a DE Committee that informs faculty and staff of federal and Commission requirements regarding the definitions of DE and correspondence education and provides examples of instructor-initiated substantive interaction (I-38).
- See responses to Standards II.A.1; II.B.1; III.C.1; III.C.4; IV.A.4; and Eligibility Requirements 9, 15, and 17.

There is an accurate and consistent application of the policies and procedures for determining if a course is offered by DE (with regular and substantive interaction with the instructor, interaction initiated by the instructor, and online activities that are included as part of a student’s grade) or correspondence education (online activities that are primarily “paperwork related,” including reading posted materials, posting homework, completing examinations and interaction with the instructor that is initiated by the student as needed).

- Faculty teaching a course taught in a DE format must complete three additional fields and discuss DE components as part of the curriculum approval process before the course can be offered in a DE format. The three required fields include the following questions:
  1) “What methods will be employed to ensure timely and effective interaction between faculty and students and student to student? What technological skills will students need to succeed in this course? How will the instructor execute and ensure the rigor and breadth of the course through electronic delivery?”
  2) “What type of academic support and technology training will be required to ensure pedagogical development of the instructor for this course?”
  3) “How will specific technology be integrated into the course, and how will its use be appropriate to the nature and objectives of the course?” (I-39)
- The College’s program review process includes success and enrollment metrics disaggregated for online and face-to-face modes of delivery to ensure comparable course quality (I-40).
- All faculty teaching in the DE format must complete training on the requirements of faculty-initiated interaction to be in compliance with federal regulations.
- The College does not offer correspondence courses.
- See responses to Standards I.C.8; II.A.7; III.C.1; III.C.2; III.C.3; III.C.4; and Eligibility Requirements 9, 15, and 17.
The College has appropriate means and consistently applies those means for verifying the identity of a student who participates in a DE or correspondence education course or program and for ensuring that student information is protected.

- The College uses Laulima, a Sakai-based learning management system, for online, hybrid, and web-enhanced classes. Laulima provides secure login for both faculty and students (I-41).
- See responses to Standards I.C.8; III.C.1; III.C.2; III.C.3; III.C.4; and Eligibility Requirements 9, 15, and 17.

The College’s technology infrastructure is sufficient to maintain and sustain the DE offerings.

- The College’s Information Technology Group (ITG) maintains and manages all computers, computer labs, institutional servers, Voice Over Internet Protocol telephone systems, web servers, networking services, networked printers, information technology security, the Student Test Center, and Help Desk operations (I-42).
- The Educational Media Center (EMC) maintains smart classrooms and a portable cart with Chromebooks that are available for instructors to use in the classroom. They also operate technology equipment loans, professional development for learning with technology and for teaching online, video production, and the Copy Center, which serve faculty, staff, and students (I-37).
- The ITG and EMC analyze technology infrastructure through program review to ensure that their infrastructure is adequate to support their mission, operations, programs, and services (I-22).
- See responses to Standards I.C.8; III.C.1; III.C.2; III.C.3; III.C.4; and Eligibility Requirements 9, 15, and 17.

Student Complaints

[Regulation Citations: 602.1(a)(1)(ix); 668.43]

The College has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the Catalog and online.

- All policies affecting students are printed in the Catalog and on the Policies webpage of the College website and the Services for Students webpage (I-43, I-44, I-45, I-46, I-47, I-48).
- These policies include, but are not limited to, academic dishonesty, student conduct code, academic rights and freedom, student academic grievance procedures, discrimination complaints, sex discrimination and gender-based violence, and nondiscrimination and affirmative action.
- See responses to Standard I.C.2 and Eligibility Requirement 21.

Student complaint files for the previous six years (since the last institutional self-evaluation) are available; these files demonstrate accurate implementation of the complaint policies and procedures.

- Student complaint files for the previous six years (since the last institutional self-evaluation) are available in the Office of the Dean of Student Services or in the relevant division/unit office for the evaluation team to review (I-49).
- See response to Eligibility Requirement 21.
The team analysis of student complaint files identifies any issues that may be indicative of the College’s noncompliance with any Accreditation Standards.

- Analysis is to be determined by the evaluation team during the accreditation visit.
- See responses to Eligibility Requirement 21.

The College posts on its website the names of associations, agencies, and governmental bodies that accredit, approve, or license the College and any of its programs, and the College provides contact information for filing complaints with such entities.

- The College website identifies ACCJC/WASC as the accrediting organization overseeing the College’s compliance with Eligibility Requirements, Accreditation Standards, and Commission policies. The website also identifies program accreditation information and provides contact information for filing complaints with such entities (I-17).
- The Catalog contains the same accreditation information as the College website.
- The College published its past institutional self-evaluation report on its website in order to inform the public of its good standing (I-17).
- See response to Eligibility Requirement 21.

The College demonstrates compliance with the Commission Policy on Representation of Accredited Status and the Policy on Student and Public Complaints Against Institutions.

- The College’s marketing officer coordinates all marketing and public relations materials in order to ensure consistency, quality, and integrity in College publications. These materials include promotional materials for student recruitment and the publicizing of campus events in the community. Documentation represents the College appropriately and includes required information on the College’s current accredited status by ACCJC/WASC (I-17).
- See response to Eligibility Requirement 21.

### Institutional Disclosure and Advertising and Recruitment Materials

[Regulation Citations: 602.16(a)(1)(vii); 668.6]

The College provides accurate, timely (current), and appropriately detailed information to students and the public about its programs, locations, and policies.

- The Catalog 2017-2018 includes the College’s official name, main campus address, telephone number, and website address, and the College’s education center address and telephone number. It also provides the mission statement, core values, institutional learning outcomes, history and accreditation status with ACCJC and programmatic accreditors, programs of study (degrees and certificates offered including learning outcomes for programs and degree and program lengths), special programs, description of course offerings, academic calendar, academic rights and freedom policy, student financial aid information, learning resources, and the names and degrees of its administrators and faculty including the names of the regents (I-50).
- See responses to Standard LC.2 and Eligibility Requirement 21.

The College complies with the Commission Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status.
The College’s marketing officer coordinates all marketing and public relations materials in order to ensure consistency, quality, and integrity in College publications (1-51, 1-52).

- These materials include promotional materials for student recruitment and the publicizing of campus events in the community.
- Documentation represents the College appropriately and includes required information on the College’s current accredited status by ACCJC/WASC (1-17).
- See responses to Standards I.C.1, I.C.2, and Eligibility Requirement 21.

The College provides required information concerning its accredited status as described above in the section on Student Complaints.

- The College website includes information related to its mission statement, learning outcomes, educational programs, and student support services. An accreditation webpage provides students and the general public with information about the College’s accreditation status with all its accreditors (1-53).
- See responses to Standards I.C.1, I.C.2, and Eligibility Requirement 11.

**Title IV Compliance**

[Regulation Citations: 602.16(a)(1)(v); 602.16(a)(1)(x); 602.19(b); 668.5; 668.15; 668.16; 668.71 et seq.]

The College has presented evidence on the required components of the Title IV Program, including findings from any audits and program or other review activities by the USDE.

- An independent certified public accounting firm annually audits the UH System’s financial statements. The UH Administrative Procedures outline internal control procedures (1-15).
- The auditing procedures provide objective third-party review of internal controls and procedures.
- The results and recommendations of the audit are presented to the BOR (1-16).
- Other major campus audits include the required Federal Compliance Audit or A-133, the Vocational Education Act Audit, the Financial Aid Audit, various legislative audits, and unscheduled and unannounced audits performed by the UH Office of the Internal Auditor.
- See responses to Standards III.D.10, III.D.15, and Eligibility Requirement 5.

The College has addressed any issues raised by the USDE as to financial responsibility requirements, program record-keeping, and so forth. If the College does not address issues in a timely manner, the College demonstrates it has the fiscal and administrative capacity to do so in the future and to retain compliance with Title IV requirements.

- The USDE has not identified any issues with the College’s financial responsibility.
- See responses to Standards III.D.10, III.D.15, and Eligibility Requirement 5.

The College’s student loan default rates are within the acceptable range defined by the USDE. The College undertakes remedial efforts when default rates near or meet a level outside the acceptable range.

- The College has a current student loan default rate of 16.5 percent, which is well below the 30 percent federal guideline threshold that would require the creation of a student loan default prevention task force and the subsequent development and
implementation of default prevention action plans (I-54).

- The College monitors its student loan default rates to ensure compliance with federal requirements.
- See responses to Standards III.D.10, III.D.15, and Eligibility Requirement 5.

Contractual relationships of the College to offer or receive educational, library, and support services meet the Accreditation Standards and have been approved by the Commission through substantive change if required.

- Contractual agreements are subject to various UH System policies and procedures. UH System staff provides oversight of the agreements, thereby ensuring that the College maintains its integrity in contractual agreements. Contracts are consistent with the College’s mission statement and goals.
- The Library and learning support services certify, purchase, and maintain contractual agreements with other institutions to support student success.
- Administrative Services staff follow EP 8.200, Administrative Procedure (AP) 8.270, UHCCP #8.102A, Regents Policies in Chapter 8, and Administrative Procedures in Chapter 8 to ensure the review and approval of all contracts on multiple levels prior to implementation (I-55, I-56, I-57, I-58, I-59).
- See responses to Standards III.D.10, III.D.15, III.D.16, and Eligibility Requirement 5.

The College demonstrates compliance with the Commission Policy on Contractual Relationships with Non-Regionally Accredited Organizations and the Policy on Institutional Compliance with Title IV.

- The College does not participate in any contractual relationship with a non-regionally accredited organization.
- See responses to Standards III.D.10, III.D.15, and Eligibility Requirement 5.

STANDARD I: MISSION, ACADEMIC QUALITY AND INSTITUTIONAL EFFECTIVENESS, AND INTEGRITY

Student Spotlight
Bernie Mack

As a Native Hawaiian student, I found great success at Leeward Community College. In particular, Hālau 'Ike O Pu'uloa supported my academic journey as a Native Hawaiian. For example, they provided academic and career counseling services. In addition, Hālau 'Ike O Pu'uloa provided cultural enrichment workshops and activities, which allowed for hands-on immersion into Hawaiian culture. Finally, Hālau 'Ike O Pu'uloa provided me with membership into their Ke Ala 'Ike Native Hawaiian Achievement Program, which helped to support my academic success and achievement at Leeward CC.
STANDARD I: MISSION, ACADEMIC QUALITY AND INSTITUTIONAL EFFECTIVENESS, AND INTEGRITY

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

I.A. Mission

I.A.1.

The mission describes the institution’s broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. (ER 6)

Evidence of Meeting the Standard

Mission of Leeward Community College
Leeward Community College (Leeward CC)’s mission presents the College’s broad educational purposes, its intended student population, the types of degrees and credentials the College offers, and its commitment to student learning and achievement. Below is the College’s mission statement and accompanying core values (I.A-1). In alignment with the University of Hawai‘i Community Colleges (UHCC)’s commitment to becoming a model indigenous-serving institution, the Leeward CC mission statement is presented in English and Hawaiian language.

Mission Statement
At Leeward Community College, we work together to nurture and inspire all students. We help them attain their goals through high-quality liberal arts and career and technical education. We foster students to become responsible global citizens locally, nationally, and internationally. We advance the educational goals of all students with a special commitment to Native Hawaiians.

Ke Ala Nuʻukia
Ma ke Kulaniu Kaiaulu o ‘Ewa, alu like mākou ma ka mālama a me ke kīpapai i nā haumāna. Kōkua ‘ia nā haumāna ma ka huli a loa’a kā lākou mau pahuhopu ma o nā polokalamu hana no’eau laulā a me nā polokalamu ‘oihana pākōlea like ‘ole. Paipai ‘ia nā haumāna i ka lilo i hoa makaʻāinana pono ma ke kaiāulu, ma ke aupuni, a ma ke kauʻāina. Kākoʻo o ‘ia nā pahuhopu hoʻonaʻauao a nā haumāna a pau me ke kūpa’a nō hoʻi i nā ‘ōiwi Hawaiʻi.
Core Values

Community: We value cooperation, collaboration, social responsibility, and concern for others as crucial elements in building a sense of community inside and outside of the institution.

Diversity and Respect: We value individual differences and the contributions they bring to the learning process. We believe that our students are enriched through a diverse intellectual and social environment, where learning occurs through exposure to world cultures, and through interaction with peoples of diverse experiences, beliefs, and perspectives.

Integrity: We value personal and institutional integrity by fostering a culture of continuous improvement to open pathways to student success. We hold ourselves accountable for providing a high-quality academic experience.

Open Access: We value all students. We seek to meet their needs, as well as those of the community, by offering a diversity of courses, degree and certificate programs, and training opportunities, through traditional and distance education modes of delivery.

Nā Kahua Hana

Kaiāulu: He mea nui loa ke alu a me ka hana like me ka mālama nō hoʻi i ke kanaka ma ke kūkulu kaiāulu i loko a i waho aʻe o ke kahua kulanui.

Kākoʻo a Hōʻihi i nā kānaka like ‘ole: He mea nui loa ke kākoʻo i nā kuanaʻike like ‘ole a he waiwai nō ia ‘ike i ke aʻo pono. Pōmaikaʻi nā haumāna i ke komo i ke kaiāulu o nā ‘ike like ‘ole, o nā ‘ike moʻomeheu like ‘ole o ke ao nei nō hoʻi kekahi, a me ka launa pū me nā poʻe o nā moʻolelo like ‘ole.

Kūpono: He mea nui loa ka hana pono o neʻi nei a hōʻike ‘ia ma o ka hoʻomōhala a hoʻoikaika mau i nā ala pono hele ‘ia e ka haumāna. Hoʻohiki ‘ia nō ka pōʻaiapili aʻo pono loa.

Kūākea: He mea nui loa nā huamāna a pau. Hoʻokō ʻia nā mea e pono ai ka haumāna a me ke kaiāulu ma o ka hoʻomākaukau i ka papa, ke kekelē, a me ka papahana palapala ma ke aʻo ‘ana i ke kahua kula a ma o nā ‘enehana like ‘ole. (IA-1)

Broad Educational Purposes and Commitment to Native Hawaiians

The mission clearly defines the broad educational purposes of the College. The first sentence of the mission statement articulates the College’s purpose to “nurture and inspire all students.” The third sentence of the statement describes the College’s purpose to “foster students to become responsible global citizens locally, nationally, and internationally.”

The College’s mission statement articulates its commitment to “advance the educational goals of all students with a special commitment to Native Hawaiians.” This commitment is aligned with the University of Hawai‘i (UH) System’s Regents Policy (RP) 4.201, Mission and Purpose of the University. The policy states
As the only provider of public higher education in Hawai‘i, the University embraces its unique responsibilities to the indigenous people in Hawai‘i and to Hawai‘i’s indigenous language and culture. To fulfill this responsibility, the University ensures active support for the participation of Native Hawaiians at the University and supports vigorous programs of study and support for the Hawaiian language, history and culture. (IA-2)

RP 4.201 identifies that the UH System fulfills its commitment to Native Hawaiians in the following ways, which the College incorporates in its mission:

1. Support for programs and services for Native Hawaiians
2. Increased representation of Native Hawaiians
3. Full participation of Native Hawaiians in all initiatives and programs
4. Consultation from the Native Hawaiian community and specifically the Pūkoʻa Council, the system wide council of Native Hawaiian faculty, staff, and students that serves as advisory to the UH System president
5. The use of the Hawaiian language
6. Support for the study of Hawaiian language, culture, and history
7. Encouragement of Native Hawaiians to practice their language, culture, and other aspects of their traditional customary rights in Hawaiian environments and facilities.
8. Outreach for the education needs of Native Hawaiians, the state of Hawai‘i, and the world at large in the areas of Hawaiian language, culture, and history (IA-2)

For further discussion of RP 4.201 and the UH System’s responsibility and commitment to the success of Native Hawaiian students, see Standard IV.C.5.

Leeward’s commitment to Native Hawaiians is evident in the establishment of the Waiʻanae-Nānākuli Education Center in 1972. This center, which was relocated and renamed the Waiʻanae Moku Education Center in 2017, is located in the heart of the Waiʻanae coast where the highest percentage of Native Hawaiians reside within Leeward’s service area (IA-3, IA-4). Based on data from the 2010 Census, Waiʻanae is 60.8 percent Native Hawaiian, and Nānākuli is 71.5 percent Native Hawaiian (IA-5). At the Pearl City campus, Leeward has focused efforts on improving Native Hawaiian attainment of degrees and certificates with the Hālau ʻIke o Puʻuloa (Hālau), the College’s Native Hawaiian student support program. The Hālau focuses on providing cultural and student support services to Native Hawaiian students and to any student interested in participating in the program (IA-6).

The College also fulfills its commitment to Native Hawaiians through the governance group Pūkoʻa no na ʻEwa Council (Nā ʻEwa Council), which represents the College at the UH System’s Pūkoʻa Council. The mission of Nā ʻEwa Council is to “provide advocacy, leadership, and support for Native Hawaiians through higher education” (IA-7). An ad hoc committee of Nā ʻEwa Council is focusing on ways to indigenize the College, including cultural training through the creation of a College oli (chant) (IA-8, Item VI). For a detailed discussion of the role of the Nā ʻEwa Council, see Standard IV.A.1.

Finally, in support of its commitment to Native Hawaiians, the College has an Associate in Arts (AA) in Hawaiian Studies, an Academic Subject Certificate in Hawaiian Studies, and an Academic Subject Certificate in Hawaiian Language to provide an opportunity for all
students to pursue an instructional program with a focus on Native Hawaiian culture, history, and language.

**Intended Student Population**
The College’s mission statement identifies its intended student population as “all students,” and the core value of “Open Access” clarifies the broad range of students the College serves. As a comprehensive community college, students who attend Leeward CC are recent high school graduates, students returning to college to improve workforce skills, nontraditional students entering higher education for the first time, students transitioning to college-level work, students advancing their education after fulfilling military service, and students pursuing career and technical advancement. The majority of Leeward students are Hawai‘i residents with other students originating from the U.S. continent and foreign countries.

The College mission is aligned with RP 4.201, which affirms that the UH System “is committed to diversity within and among all racial and ethnic groups served by public higher education” (IA-2). Ethnically, the College’s diverse student population includes Native Hawaiian (26.1 percent), Filipino (22.9 percent), Other Asian (17.3 percent), mixed ethnicities (15.7 percent), Caucasian (10.3 percent), other Pacific Islander (2.7 percent), and other ethnicities (5.0 percent) (IA-9).

The College has 26.1 percent Native Hawaiian students enrolled in its overall student population with 1,779 students in fall 2017. The College educates the most Native Hawaiian students of the seven campuses in the UHCC System.

Distance education (DE) is another means by which the College broadens access for all students to enter quality educational programs. Currently, 23 percent of all enrollment (duplicated counts) at the College is in DE courses, which translates to approximately 40 percent of total student headcounts (unduplicated) enrolling in at least one DE class each semester. (IA-10). The College expanded its DE course and program offerings as a means to serve students regardless of location and in support of those who cannot attend face-to-face classes. Students served through DE include working adults, parents with young children at home, students who live in outlying areas, and students with disabilities that prevent them from physically attending a campus. The College provides student support services online and face-to-face to ensure comparable access to needed services. See Standard II.B.1 and II.C.2 for more detailed information.

**Types of Degrees, Certificates, and Credentials**
The College mission describes the types of degrees, certificates, and credentials the College offers, which are appropriate to a degree-granting institution of higher education. The second sentence of the mission statement specifies that the College provides “high-quality liberal arts and career and technical education.” These degrees and certificates are supported by the core values for integrity and open access.

The College’s mission statement is in accordance with RP 4.201, which mandates that all UHCC campuses “offer two-year college transfer and general education programs; two and four-year career and technical education programs; semiprofessional, career and technical, and continuing education programs, and such other educational programs and services appropriate to community colleges” (IA-2).
The College offers 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence. In fall 2017, 73 percent of its classified students were enrolled in transfer programs, and 27 percent were enrolled in career and technical education programs (IA-11).

Leeward began as a liberal arts college and expanded its general and pre-professional degrees to address student needs. In fall 2011, the College started an Associate in Science (AS) in Natural Science degree to support students interested in transferring into a Science, Technology, Engineering, and Math (STEM) major. In fall 2012, all of the UHCC campuses started an AA in Hawaiian Studies to support transfer of graduating students to the Hawaiian Studies programs at the four-year institutions.

Leeward has added several career and technical education (CTE) programs in direct response to community needs. These include the Associate in Science (AS) in Health Information Technology and the AS in Integrated Industrial Technology. Both programs seek to address anticipated workforce shortages in the state of Hawai‘i (IA-12). The College also addresses workforce demands through its noncredit offerings from the Office of Continuing Education and Workforce Development (OCEWD). Both the AS in Health Information Technology and the AS in Integrated Industrial Technology programs began on the noncredit side. OCEWD quickly develops and offers noncredit programs in direct response to workforce demands. OCEWD also addresses short-term training needs in the health field including training for nurse aides and pharmacy technicians.

The mission statement articulates the College’s commitment to fostering global citizens and is aligned with RP 4.201, which recognizes that the UH System is a “global leader and model” within a “unique geographical location” (IA-2). This commitment led the College to create the Academic Subject Certificates in Philippine Studies and Global Studies.

Commitment to Student Learning and Achievement
The mission emphasizes the College’s commitment to student learning and achievement. This commitment is demonstrated in the language of the mission statement: “we work together to nurture and inspire,” “we help them attain their goals,” and “we advance the education goals of all students with a special commitment to Native Hawaiians.” This commitment is supported in the College’s three institutional learning outcomes for critical thinking and problem solving; written, oral communication, and use of technology; and values, citizenship, and community (IA-13).

As part of its mission to focus on student learning and achievement, the College has identified three institutional learning outcomes (ILOs).

**Critical Thinking and Problem Solving**
Our graduates are able to examine, integrate, and evaluate the quality and appropriateness of ideas and information sources to solve problems and make decisions in real world situations.

**Written, Oral Communication and Use of Technology**
Our graduates are able to use written and oral communication and technology to
discover, develop, and communicate creative and critical ideas, and to respond effectively to the spoken, written, and visual ideas of others in multiple environments.

**Values, Citizenship, and Community**
Our graduates, having diverse beliefs and cultures, are able to interact responsibly and ethically through their respect for others using collaboration and leadership. Our graduates are able to engage in and take responsibility for their learning to broaden perspectives, deepen understanding, and develop aesthetic appreciation and workforce skills.

These three ILOs encompass the seven general education learning outcomes and are critical components of all of the College’s programs. Learning outcomes are discussed further in Standard LB.2.

**Analysis and Evaluation**

The College’s mission statement is clearly defined and describes its broad educational purposes, target student population, degrees and credentials offered, and commitment to student learning and achievement as appropriate for an open-door community college.

I.A.2. *The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.*

**Evidence of Meeting the Standard**

**College Mission and Program Review**
The College uses the program review process to determine how effectively it is accomplishing its mission. All instructional programs, educational units, and support areas at the College complete an Annual Report of Program Data (ARPD), or program review. The ARPD includes quantitative metrics, assessment results of program learning outcomes, qualitative analysis, plans for future directions, and a list of resources required for the future needs of a program or unit. In addition, every program, educational unit, and support area is required to complete a Comprehensive Review and Evaluation (CRE) at least once every four years. The CRE requires that the program’s mission is aligned with the College mission, vision, and values. For example, the Hālau’s 2014-2016 CRE includes this statement:

**Program Mission:**
The primary function of Hālau ‘Ike o Pu‘uloa is to increase Native Hawaiian student success outcomes by providing a full array of services for our Native Hawaiian students and by sharing ‘ike Hawai‘i with all students so that Hawaiian culture and wellbeing will flourish in our homeland.

Our mission states, “The faculty, staff, and students of Hālau ‘Ike o Pu'uloa direct our work and cultivate partnerships in ways that inspire excellence, promote growth, and advance opportunities for Native Hawaiians.” (IA-14)
The College also uses the program review process to demonstrate whether the mission directs institutional priorities in meeting the educational needs of its students. The final step in the program review process is the resource request list. The campus prioritizes items on the resource request lists and uses this prioritization to determine campus funding for the next academic year. For further discussion of the program review process, see Standard I.B.5.

**College Mission and Strategic Plan Goals**

The College uses strategic planning to determine how effectively it is accomplishing its mission and institutional priorities. In 2015, the College revised its strategic plan to align with the *UHCC Strategic Directions 2015-2021*, which is discussed in Standard IV.D.5 (IA-15). The resulting document is the College’s *Strategic Plan 2015-2021* (IA-16). The plan contains five goals, which the College aligned with its mission:

- **Hawai‘i Graduation Initiative**: Increasing enrollment and completion rates while reducing time to completion
- **Increase Enrollment of Target Populations**: Increasing enrollment and year-to-year retention of recent high school graduates, high school non-completers, General Equivalency Diploma recipients, Pacific Islanders, working adults, and international students
- **Hawai‘i Innovation Initiative**: Developing and delivering programs and training needed for a qualified workforce in existing and emerging careers
- **Modern Teaching and Learning Environments**: Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments
- **High Performance System of Higher Education**: Providing students with smooth transitions from K-12 through the community colleges to the baccalaureate institutions in a cost-effective manner

The College’s *Strategic Plan 2015-2021* emphasizes its commitment to Native Hawaiian student success through enrollment, retention, and graduation (IA-16). Based on data from the UHCC System, the College has exceeded its goal in graduating Native Hawaiian students (IA-17, IA-18). As part of this commitment, the College supports the Hālau by using a combination of state resources, federal grants, community partnerships, and private donations. In addition to the College’s responsibility to meet the educational goals of Native Hawaiian students, the *Strategic Plan 2015-2021* targets other student populations using data of recent high school graduates, high school non-completers, GED recipients, other Pacific Islander students, working adults, and international students (IA-16, IA-19).

**College Mission and Institution-Set Standards**

The College uses data to determine how well it is accomplishing its mission through the UHCC System’s institution-set standards for student achievement (IA-20). The UH vice president for community colleges reviews the College’s attainment of institution-set standards at a campus visit each year. This review process assists campus administration with identifying institutional priorities for the coming year. For further discussion on the College’s institution-set standards, see Standard I.B.3.
Analysis and Evaluation

The College collects and analyzes data on student achievement, student learning, and institutional outcomes in order to evaluate progress toward meeting its mission. The mission is at the heart of the College’s planning process. The processes used to evaluate progress are grounded in the ARPD and in annual updates from the UHCC System office.

I.A.3.
The institution’s programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.

Evidence of Meeting the Standard

Alignment of Mission with Programs and Services
The College’s programs and services are aligned with its mission. In support of the mission, “(w)e help them attain their goals through high-quality liberal arts and career and technical education.” The College offers 15 associate degrees, comprising four transfer programs and 11 CTE programs. Additionally, the College offers one CTE certificate program in Substance Abuse Counseling. The transfer programs include the AA in Liberal Arts, the AA in Teaching, the AA in Hawaiian Studies, and the AS in Natural Science. All four programs are articulated with four-year degree programs in the state of Hawai‘i with particular attention to ensure seamless transfer to the UH four-year campuses. The remaining 12 CTE programs target community needs for workforce demand. These career and technical education programs include Accounting, Automotive Technology, Business Technology, Culinary Arts, Digital Media, Health Information Technology, Integrated Industrial Technology, Information and Computer Science, Management, Plant Biology and Tropical Agriculture, Television Production, and Substance Abuse Counseling.

The Office of International Programs (OIP) is dedicated to facilitating “a greater appreciation of cross-cultural relations and international issues in order to assist the College with meeting its mission of fostering students to become responsible global citizens locally, nationally, and internationally” (IA-21, IA-22). The OIP offers a range of programs to support students who want to study abroad, coordinates programs for visiting international groups, provides instruction for those needing English language preparation, and takes leadership roles in international initiatives on campus. The College also offers two academic subject certificates targeted to this section of the mission statement – Global Studies and Philippine Studies.

The College’s mission statement affirms, “We advance the educational goals of all students with a special commitment to Native Hawaiians.” To meet this goal the College provides specific support programs for the Native Hawaiian population through the Hālau, the Wai‘anae Moku Education Center, and the Ho‘oulu Project (IA-6). In 2015, the College established Kapunawai, the Hawai‘i Pacific Resource Room, in the Library as a dedicated Hawaiian place of learning. Kapunawai provides access to prominent Hawai‘i-Pacific resources within a multi-functional space (IA-23). The word kapunawai translates to “spring, well, fountain,” which guide the purpose and function for this space as a spring of inspiration, a well of resources, and a fountain of knowledge. Since 2015, a Title III grant (federal funding for Native Hawaiian serving institutions) has funded a Hawai‘i-Pacific
resource librarian position, which allows the Library to provide dedicated on-site support and services. In terms of instructional programs, the College offers a Hawaiian Studies program and a certificate in Hawaiian language (IA-24, IA-25).

The Library strives to educate students, faculty, staff, and the public about a variety of social issues in order to accomplish the College mission and fulfill the ILOs on critical thinking, social responsibility, and global citizenship. For example, since 2014, the Library has partnered with the Educational Media Center to identify Open Educational Resources (OER) for faculty to review. They also deliver training to faculty transitioning to open, no-cost, or affordable textbooks and other learning materials (IA-26, IA-27). OER courses often rely on online resources, which means the students have access from any location as long as they have an internet connection. The institutionalization of OER is part of system and campus initiatives to reduce or eliminate the cost of textbooks for students (IA-15, IA-16). In spring 2017, 279 classes had a “Textbook Cost: $0” designation (23 percent of all classes offered), which benefited 5,121 students. To date, OER has saved Leeward students $2,087,575 (IA-28).

Alignment of Mission with Decision-Making, Planning, and Budgeting
The College mission guides decision-making, planning, and resource allocation. The College’s Integrated Planning and Budgeting Process for programs and services is driven by the College mission and Strategic Plan 2015-2021. Figure 6 illustrates how the College mission and strategic plan are the beginning point for the creation of a program or unit and the ending point to measure a program’s or unit’s alignment.

Integrated Planning and Budgeting Process

Figure 6. Integrated Planning and Budgeting Process.
The College mission informs institutional goals for student learning and achievement. An example of this alignment is the piloting and implementation of a program to increase the retention rate of students taking pre-collegiate courses. In fall 2016, the Acceleration Initiative offered accelerated math and English courses to shorten students’ time at the pre-collegiate level and to encourage students to continue their studies. For further discussion of this initiative, see Standards I.B.6 and II.A.4.

Analysis and Evaluation

The College’s Integrated Planning and Budgeting Process for programs and services is aligned with and driven by the College mission and Strategic Plan 2015-2021. Both the mission and strategic plan are the beginning point for the creation of a program and the ending point to measure a program or unit’s alignment. The College consistently strives to improve student learning and achievement through the planning and resource allocation of programs, pilot programs, and support services.

I.A.4.  
The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary. (ER 6)

Evidence of Meeting the Standard

Publication of Mission Statement
The College articulates its mission in a widely-publicized mission statement approved by the UH Board of Regents (BOR) consistent with its legal authorization. The College’s mission statement is posted in key locations on the Pearl City campus and at the Wai‘anae Moku Education Center including classrooms, labs, high-traffic open spaces, and conference rooms. Additionally, the College publishes its mission statement in the Catalog and on the College website (IA-1, IA-29).

Review of Mission Statement
The College periodically reviews its mission statement and updates it as necessary. The College reviews its mission statement in accordance with the College’s L4.100, Policy on Institutional Mission, which calls for periodic review every six years (IA-30). This review period is shorter in duration than the suggested ten-year requirement of RP 4.201 (IA-2).

Review Process
In spring 2017, the chancellor tasked the Campus Council, which serves as the recommending and advisory group in matters relating to campus priorities, to facilitate a review of the College’s mission statement because the council’s membership is representative of the entire campus (IA-31, Item 5.a). This review process was done as a “committee as a whole” where representatives solicited campus wide input. At the council’s March 2017 meeting, the interim vice chancellor for academic affairs led a discussion on the mission statement and Accreditation Standard I.A.4. Based on stakeholder input and strategic priorities, the council unanimously approved the current mission without changes (IA-32, Item a). The Faculty Senate, which is the primary voice of faculty in academic governance,
also reviewed the College’s mission statement in spring 2017. This group did not have any changes but noted that the senate will participate in the next review of the College mission (IA-33, Item III.B.1). For a more detailed discussion of the role of the Campus Council and the Faculty Senate, see Standard IV.A.1.

For the 2017 review, the Campus Council did not use data and assessment because the numbers for student achievement and student learning remained the same since the establishment of the UHCC Strategic Directions 2015-2021 and the Strategic Plan 2015-2021, both of which occurred after the last mission review in 2012. The College will use data and assessment as part of its next comprehensive review process. Previously, the College took two years to complete a comprehensive review of its mission statement.

Since there were no changes to the language of the mission statement, the College did not need approval from the BOR. The board approved the mission statement that the College revised in 2012 (IA-34, p. 17).

Analysis and Evaluation

The College’s L4.100, Policy on Institutional Mission, suggests a periodic review of the mission statement every six years. The College last reviewed the mission in 2017 and, after receiving input from the campus community, determined that the mission did not need to be changed. The College widely publicizes its mission statement through physical postings across the campus, in the Catalog, and on the College website.

I.B. Assuring Academic Quality and Institutional Effectiveness

Academic Quality

I.B.1.

The institution demonstrates a sustained, substantive and collegial dialogue about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

Evidence of Meeting the Standard

Dialogue on Student Outcomes and Improvement of Student Learning and Achievement

The College has structured dialogue about student outcomes through learning outcomes assessment at the course and program level in addition to the annual program review process. The College uses assessment data to evaluate student learning and student achievement. Analysis of assessment data helps the College to continuously improve programs and services. For instructional areas, dialogue on assessment results begins at the discipline and program level as part of course assessment discussions. Course assessment is an ongoing process, and faculty submit documentation of assessment results and plans by entering the information into Tk20, the campus assessment software. Programs also report on course assessment results and the impact on program outcomes as part of the annual program review process known as the Annual Report of Program Data (ARPD).

The Assessment Committee, a standing committee of the Faculty Senate, facilitates structured dialogue about student outcomes (IB-1). The committee reviews and makes recommendations to the Faculty Senate on policies and procedures relating to assessment such as the College’s L5.210, Policy on Assessment, and the Prior Learning Assessment Manual. The committee has created an interactive PDF document that demonstrates the Integrated Planning and Budgeting Process and its relationship to assessment (IB-2). The committee works with the administration and the Office of Planning, Policy, and Assessment (OPPA) to facilitate the assessment process by conducting two Tk20 assessment workshops each month and establishing a culture of assessment through such efforts as the Assessment Think Tank (IB-3, IB-4). The membership of the committee is made up of instructional division area representatives, support area representatives, and one nonvoting member from the administration or OPPA (IB-5).

The College has also been actively assessing its general education learning outcomes (GELOs) through a cross-disciplinary task force that reviews artifacts from a range of courses and evaluates the artifacts using a rubric. This group has had rich discussions on the student work and has used the results to improve its assessment process and refine the GELOs. For a more detailed discussion of the assessment of the College’s GELOs, see Standard II.A.3.

Support area units play a key role in institutional dialogue during the annual program review process by submitting their own ARPD. Support areas rely more heavily on student achievement data, but some areas use learning outcome data when appropriate. Constituents in each support area come together to discuss results, devise an action plan, and identify
resources needed for improvement. These discussions often lead to dialogue on institutional effectiveness. For more information on the ARPD, see Standard LB.4.

**Dialogue on Student Equity and Improvement of Student Learning and Achievement**
The College engages in substantive dialogue about student equity in order to identify performance gaps and implement strategies to mitigate those gaps. Broad-based discussion on student equity often takes place at open forums. For example, starting in fall 2016, the vice chancellor for academic affairs (VCAA) held periodic Talk Story sessions (informal campus conversations) on student success topics such as the early alert and intervention system Makaʻala, the University of Hawaiʻi Community Colleges (UHCC) Student Success Pathways Framework, and the Guided Pathways and Exploratory Majors in order to explain these initiatives and obtain feedback from faculty and staff (IB-6).

In addition to discussing student equity through the ARPD, the College has made many strides to close the gap for underrepresented students with a variety of programs including the Hālau ʻIke O Puʻuloa (Hālau), the Pacific Islander summer cohort program, and focused efforts at the Waiʻanae Moku Education Center.

The Waiʻanae Moku Education Center participates in institutional discussions while also facilitating their own dialogue on similar issues at their location. Faculty and staff hold regular meetings to review how well students are performing and advocate for changes when needed. The faculty and staff also hold training events to address issues that are specific to the community they serve.

**Dialogue on Academic Quality and Institutional Effectiveness**
The College engages in collegial dialogue about academic quality and institutional effectiveness through a variety of campus activities. The goal of these activities is to develop plans for improvement.

In fall 2016, the Faculty Senate provided feedback to improve the College’s Integrated Planning and Budgeting Process and increase transparency (IB-7, Item V.D.3). As a result, the VCAA updates the campus on prioritized planning at each stage. These updates provide details regarding how a specific resource request is prioritized and where that request ends up on the final institutional priorities list. (For further discussion of the VCAA’s updates, see Standard IV.A.6.) Additionally, in spring 2017, the Campus Council made recommendations for improving the planning process and forwarded the recommendations to the Ad Hoc Planning Process Review Committee.

Another campus event that provides an opportunity for dialogue on academic quality and institutional effectiveness is the campus forum with the University of Hawaiʻi (UH) vice president for community colleges (VPCC) each semester (IB-8). At this forum, the VPCC shares information on the College’s progress towards institution-set standards and presents data on the College’s initiatives and Strategic Plan 2015-2021 (IB-9, IB-10, IB-11). Attendees can ask questions and make comments on the issues at hand. Additionally, administration later meets to discuss the information provided by the VPCC and develop strategies for improvement. For further discussion of the VPCC’s forums, see Standards LB.3 and LB.6.
Governance groups including the Campus Council, the Faculty Senate, the Pūkoʻa no na ʻEwa Council (Nā ʻEwa Council), and the Student Government meet regularly to engage in collegial dialogue (IB-12, IB-13, IB-14, IB-15). For example, as a standing committee of the Faculty Senate, the Distance Education (DE) Committee supports institutional dialogue about the continuous improvement of distance learner success. This committee serves as the primary voice on matters relating to DE. Its membership includes faculty and staff from instructional divisions, support area units, as well as the campus DE coordinator and an educational technologist (IB-16). In spring and fall 2017, the DE committee led well-attended breakout sessions at convocation to facilitate discussion of federal and Commission requirements regarding DE (IB-17).

For issues of interest to all campus constituents, the College holds a convocation at the beginning of each semester for faculty, staff, and administrators to discuss critical issues (IB-18). The College has adopted the practice of organizing focused breakout sessions after the general meeting so campus constituents can discuss topics that concern student learning and achievement, academic quality, and institutional effectiveness (IB-19).

At the convocation in spring 2018, the College sought broad campus input on essential topics that emerged from the draft of the Institutional Self-Evaluation Report (IB-20). Participants engaged in structured dialogue about how the College is meeting specific Accreditation Standards and Eligibility Requirements and how the College can improve in those areas (IB-21). Table 45 lists the roundtable discussion topics and corresponding references to the Accreditation Standards and Eligibility Requirements.

Table 45.

</table>
Of those participants who evaluated this convocation (n=118), 100 percent agreed that the roundtable discussions were productive (IB-22). Among the comments received were the following:

- “I like the opportunity to discuss and learn from other faculty and administrators across campus.”
- “I enjoyed the breakout sessions. It was great hearing from other departments/units.”
- “I learned a lot at the breakout sessions. Very interesting to hear comments from each individual.”

Meaningful, productive dialogue occurs when administrators, division chairs, unit heads, and other campus leaders meet for retreats. In February 2013, campus leaders held a mini-retreat to review the proposed planning template and timeline, and they made suggestions for improvement (IB-23). Campus leaders held a retreat in July 2013 to focus on using data to support resource requests and to determine how the College was performing in areas of financial health and academic achievement (IB-24). Leaders held a retreat in July 2014 to discuss and evaluate the Student Success Committee, which was created in 2010 (IB-25). In July 2015, the Leadership Excellence program designed a summit to strengthen campus leadership (IB-26). In August 2017, a leadership retreat focused on “The Student Experience” at the College (IB-27).

**Analysis and Evaluation**

The College engages in a wide variety of ongoing, meaningful dialogue on student outcomes, student equity, academic quality, institutional effectiveness, and the improvement of student learning and achievement through a variety of methods including convocations, retreats, information sessions, governance groups, and the ARPD.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about institutional dialogue and continuous improvement at the College. Participants discussed how the College meets Standard I.B.1 and how the College can improve in these areas. They said that the College provides numerous opportunities for dialogue including convocations, division meetings, and professional development opportunities like the Excellence in Education conference and Teaching Squares. Faculty are enthused about the idea of further opportunities for dialoguing and provided several suggestions for how to add opportunities for dialogue (IB-21, pp. 1-2).
I.B.2.
*The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services.* (ER 11)

**Evidence of Meeting the Standard**

**Mapping of Learning Outcomes**

At the College, learning outcomes are organized into a hierarchy in order to map the College mission, *Strategic Plan 2015-2021*, and levels of learning outcomes. At the course level, faculty teaching a course develop its course learning outcomes (CLOs) to identify what students are expected to learn by the end of the course.

CLOs align with program learning outcomes (PLOs) and GELOs. Program faculty define the PLOs, which identify what students are expected to learn by the completion of the program. CLOs support the attainment of PLOs. A small group of faculty representing the specific learning outcome developed the GELOs; the GELOs have been revised since their origination.

Support areas develop support area outcomes (SAOs) that are specific to the area. Support areas may also develop learning outcomes if appropriate. SAOs that are learning outcomes, PLOs, and GELOs support the attainment of ILOs.

The alignment model continues with learning outcomes and SAOs supporting the strategic plan goals and the College mission.

![Diagram of learning outcomes hierarchy](image)

*Figure 7. Mapping of learning outcomes.*
As Figure 7 illustrates, assessment of learning outcomes is performed at both the course and the program level. Through curriculum maps located in the assessment reporting software Tk20, individual CLOs are linked directly to PLOs. The College publishes in the Catalog each program’s expected learning outcomes and any program-specific achievement outcomes. GELOs are assessed at the program level and are linked to the College’s mission statement, the Strategic Plan 2015-2021, and the UHCC Strategic Directions 2015-2021.

Institutional Learning Outcomes and General Education Learning Outcomes
The College developed ILOs in 2009 as summary learning outcomes of the skills representing the GELOs. The College soon after wrote overarching GELOs to encompass the required skills for each individual outcome. The Assessment Committee has been considering the removal of the ILOs in favor of using the GELOs to represent both learning outcomes for general education and the institution since Leeward is a community college and requires GELOs in all degree programs. This discussion is ongoing. In current practice, the faculty are assessing and evaluating the GELOs on an ongoing basis with the understanding that the GELOs further align with the ILOs.

The College annually reports on its GELOs in the ARPD that is posted online (IB-28). The Faculty Senate discusses the assessment results of the GELOs and recently made some recommendations regarding a further refinement of the outcome language that will be updated in the Catalog 2019-2020.

Instructional Course and Program Learning Outcomes
Faculty work together to establish clear, measurable outcomes of student learning for all courses and programs including credit and noncredit instruction. All learning outcomes undergo systematic, ongoing assessment in both face-to-face and DE delivery modes. Through assessment, the College demonstrates that students who complete programs, no matter where or how they are offered, achieve the identified outcomes (IB-29).

Faculty enter learning outcome statements into the Kuali Student Curriculum Management database where they go through an approval process. The Curriculum Committee, the Faculty Senate, and administration review and approve learning outcomes as part of a formal five-year curriculum review and revision process. This process allows for widespread dialogue to provide input on needed changes to improve student learning (IB-30). For further discussion of the curriculum review and revision process, see Standard ILA.2.

Outcomes assessment is the basis for regular evaluation of all courses and programs. The Assessment Committee’s division area representative is responsible for running a multi-year report in Tk20 to determine which courses need to be assessed in his or her division (IB-31). For each learning outcome statement, instructional faculty from their respective division enter into Tk20 the measures to assess that learning outcome, the criteria for success, assessment results, recommendations, and actions for improvement (IB-32).

Faculty use the results of course assessment, which are mapped to PLOs in Tk20 and integrated into program review, to analyze the strengths and weaknesses of a course or
program. Subsequently, faculty create an action plan and a resource request list based on the needs of a course or program, and then they use the plan and list to make improvements.

Program review often leads to improvements in courses and programs. For example, faculty in the Associate in Arts (AA) in Teaching program assessed the PLO on lesson planning in multiple education courses using signature assignments as an assessment strategy and instrument. Seventy percent of students in the program needed to reach developing proficiency on all signature assignments in order to meet the program’s expected level of achievement. Assessment results indicated that 80 percent of face-to-face students scored 70 percent or above, and 75 percent of DE students scored 70 percent or above (IB-33). Although 70 percent of education majors met the developing proficiency for this PLO, Teacher Education faculty discussed strategies to make lesson planning more consistent among the various courses. They identified common elements in lesson planning and agreed to create a standardized template. The intent was to have students spend less time focusing on technical aspects and more time on creating effective, engaging lessons.

The Office of Continuing Education and Workforce Development (OCEWD) offers noncredit courses and short-term programs that address community workforce needs and provide training in high demand areas. Certificate programs have defined PLOs that OCEWD faculty regularly assess to ensure program effectiveness.

**Learning Support Services and Student Support Services Outcomes**

Learning support services and student support services define and assess learning outcomes. At the College, support services consist of Academic Services areas, Student Services areas, Administrative Services areas, and Institutional Support areas. The College also has four educational units: International Programs, the Native Hawaiian Student Support Programs, the Office of Continuing Education and Workforce Development, and the Wai‘anae Moku Education Center.

All units in the Academic Services and Student Services areas have SAOs, and some units such as the Library, the Learning Resource Center, and the Writing Center have learning outcomes. The units regularly assess the learning outcomes using qualitative and quantitative data (IB-31). Each unit uses assessment results to determine how well the unit is meeting its expectations and then develops action plans. Units include plans that have the highest priority in resource requests. The College allocates funding to maintain effective support or make improvements. See Standards II.B.3 and II.C.2 for more information.

Outcome evaluation has led to improvements in support services. For example, the Student Services area included as a priority a resource request for 12 student assistants to help meet unit goals and maintain services, and this request was one of the top institutional priorities to receive funding in 2016-2017 (IB-34, IB-35, IB-36).

**Analysis and Evaluation**

The College has defined standards for student achievement and regularly assesses its performance against those standards. Each instructional credit course has clear and measurable learning outcomes at the course and program level regardless of delivery method.
All Academic Services and Student Services units have regularly assessed learning outcomes and/or SAOs. Non-credit programs also regularly assess learning outcomes.

I.B.3. *The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information. (ER 11)*

**Evidence of Meeting the Standard**

**Establishment of Institution-Set Standards**
The UHCC System established the College’s eight institution-set standards for student achievement including course completion, program completion, job placement rates, and key metrics used in the U.S. Department of Education (USDE) College Scorecard. These standards align with UHCC Policy (UHCCP) 4.203 on Institution-Set Standards, the *UHCC Strategic Directions 2015-2021*, the College’s mission statement, and the College’s *Strategic Plan 2015-2021* (IB-37, IB-38, IB-39). The College uses ongoing assessment to determine how well it is achieving these standards.

Each institution-set standard has a minimum level of achievement and an aspirational target for improvement. Aspirational targets are aligned with the *UHCC Strategic Directions 2015-2021*. The institution-set standards as defined in UHCCP 4.203 are

1. Course Completion
2. Degrees and Certificates Awarded
3. Degrees and Certificates Awarded to Native Hawaiian Students
4. Federal Pell Grant Recipient Degrees and Certificates Awarded
5. Transfer to Baccalaureate Institutions
6. Integrated Postsecondary Education Data System Student Success Rate
7. Licensure and Certification Examination Success Rate
8. Job Placement Rate

These metrics both monitor and challenge institutional performance. The UHCC System office established these metrics using historical performance data to set the benchmarks and the strategic plan goals for aspirational targets. Some of the institution-set standards developed out of the performance funding initiative that the UHCC System implemented in 2010. (Note: The College does not offer licensure or certification examinations.)

Leeward has not set college-specific institution-set standards; however, the College does set College goals. In 2017-2018, the College goal, or Wildly Important Goal (WIG), was to increase student retention and persistence by ten percent over the previous year. This goal is also known as “Keeping the Students We Have” and is the focus for the year’s theme of “The Student Experience.” For example, the WIG’s #IGotClass initiative in fall 2017 encouraged students to register before the end of the semester, and in one month the campus community encouraged and assisted more than 3,100 students to register for spring 2018 (IB-40, IB-41). In spring 2018, the College formed the sixteen-member WIG Design Team consisting of administrators, faculty, and other support positions. The team’s first task was to gain a better understanding of how and where the College loses students and then develop an integrated network of people, policies, processes, and practices that will increase retention and
persistence (IB-42). The College also held a professional development event, the Wildly Important Gathering, in March 2018 (IB-43, IB-44, IB-45). For further discussion of the WIG implementation, refer to the College’s Quality Focus Essay.

Assessment of Student Performance against Institution-Set Standards
The College annually reviews student-achievement data to assess performance against its institution-set standards. The College reports this data to the Accrediting Commission for Community and Junior Colleges (ACCJC) in its annual report (IB-46). The UH Office of the Vice President for Community Colleges (OVPCC) produces an annual update of the baseline values and aspirational goals of the institution-set standards set within the UHCC Strategic Directions 2015-2021. The VPCC shares the results with the campus during an annual fall semester visit (IB-9, IB-11).

To ensure that the campus community has a broad understanding of the institution-set standards and their outcomes, the College publishes the VPCC’s presentation in the Bulletin on the College intranet (IB-47). The UH System has similar measures as part of the UH performance-based funding initiative and annually publishes information on how well the College is achieving the performance-based funding metrics on the Hawai‘i Graduation Initiative website (IB-48).

The institution-set standards developed out of the requirements for reporting to ACCJC in the Annual Report and the UHCC performance-based funding metrics that have been in place for over six years. Four of the institution-set standards are performance-based funding metrics including associate degrees and certificates of achievement awarded, Native Hawaiian degrees and certificates awarded, Federal Pell Grant recipient degrees and certificates awarded, and transfer to baccalaureate institutions. Table 46 identifies the UHCC Performance-Based Funding Metrics.

Table 46.
UHCC Performance-Based Funding Metrics

The performance-based funding metrics are based on the strategic plan goals.

**Continuous Improvement to Achieve or Exceed Institution-Set Standards**

There is a broad-based understanding of the College’s priorities and actions to achieve or exceed its institution-set standards. When the College does not meet its own standard, it establishes and implements plans for improvement that will enable it to reach that standard. Assessment results of the College’s level of achievement for each institution-set standard in 2016 show that the College surpassed all of the baseline values set by the UHCC System. Furthermore, the College exceeded four out of eight aspirational targets. For a summary of data, see the Presentation of Institution-Set Standards and Student Achievement Data.

**Analysis and Evaluation**

The UHCC System established the College’s eight institution-set standards based on the *UHCC Strategic Directions 2015-2021*, and these standards are aligned with the College’s *Strategic Plan 2015-2021* and mission. In pursuit of continuous improvement, each standard has baseline and target values, which the College annually assesses, shares with the campus community, and publishes on the college and system websites.

I.B.4. *The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.*

**Evidence of Meeting the Standard**

**Use of Data and Processes to Support and Improve Student Learning and Achievement**

Assessment data drives campus planning to support and improve student learning and achievement. The CLO/SAO assessment template includes the following directions for reporting assessment data in Tk20:

1. **Outcome**: Choose ONE course learning outcome (CLO) or support area outcome (SAO) that you want to assess and analyze.
2. **Measure(s)**: List an assessment or assignment that measures the outcome.
3. **Measure Type**: Is the measure direct or indirect? Is the measure scored with a rubric or answer key? How many students assessed? Does number of students represent all students or a sample?
4. **Criteria for Success**: List the criteria for what you would consider success on the assessment. Provide breakdown of points or grades for assessment (or assignment).
5. **Results**: List the overall results. List the breakdown of the results.
6. **Analysis/Action**: Analyze the results and describe any specific actions or teaching strategies that you will implement in the future (if any) to increase success on this particular assignment. List any resources that you will need to support that implementation (if any). ([IB-32](#))

At the program level, the College’s ARPD template requires data and analysis. Along with the ARPD, planning and budgeting documents include the Resource Request List, Comprehensive Review and Evaluation (CRE), and the Institutional Effectiveness Report ([IB-49](#)). These documents include data related to the achievement of CLOs, PLOs, and SAOs. For a detailed discussion of the Integrated Planning and Budgeting Process, see Standard [IB-5](#).

**Analysis and Evaluation**

Program coordinators and unit heads use CLO and SAO assessment data as part of their program review process to support student learning and achievement. The CLO/SAO assessment template and the ARPD program review template require data and analysis. The College’s annual Integrated Planning and Budgeting Process uses a wide variety of assessment data to support student learning and achievement. This process is well defined and clearly organized.

**Institutional Effectiveness**

**I.B.5**

*The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.*

**Evidence of Meeting the Standard**

**Program Review Process and College Mission**

The College uses program review to assess how well its programs and services accomplish the College mission. In the ARPD template, qualitative analyses require that the program, area, or unit reflect on how its previous year’s action plan and current action plan align with the College mission and strategic plan goals ([IB-50](#)). The CRE template requires that the program, area, or unit provide an overview analysis that includes a discussion of how its mission is aligned with the College mission. The CRE template also requires that the program, area, or unit explains how its action plans and resource requests are aligned with the College mission ([IB-51](#)).

The College also assesses the accomplishment of its mission through the evaluation of its strategic plan goals and institution-set standards as discussed in Standards [IA.2](#) and [IB.3](#), respectively.
Role of Program Review in Planning and Budgeting
The College has an integrated planning and budgeting process that collects input from all campus levels. The program review process starts at the program, area, or unit level when faculty and staff review and evaluate data metrics and other assessment information. They collaborate on an analysis and evaluation of the data in order to make recommendations for improvement. If faculty and staff determine a need for additional resources, they make the requests at the program, area, or unit level. Higher levels, including instructional or unit heads, the administration team, Campus Council, and Faculty Senate, review and prioritize the resource requests until they develop a final institutional priority list, which they recommend to the chancellor. This entire cycle is called the College’s Integrated Planning and Budgeting Process; its development is discussed in Standard I.B.9.

Planning and budgeting documents include the following items:

- **Annual Report of Program Data (ARPD).** Each academic program, educational unit, and support area annually completes a program review. The ARPD is the central planning document for the campus.
- **Resource Implications Template (Resource Request List).** Each academic program, educational unit, and support area annually completes the template to request resources.
- **Comprehensive Review and Evaluation (CRE).** Every four years, each academic program, educational unit, and support area completes a CRE.
- **Institutional Effectiveness Report.** Every four years, the College produces an institutional effectiveness review.

*Annual Report of Program Data (ARPD)*
Each academic program, educational unit, and support area annually completes an ARPD and submits it to the OPPA. The ARPD template requires the following fields of information:

- Program/Area/Unit Description
- Part I. Quantitative Indicators
- Part II. Analysis of Program/Area/Unit
- Part III. Action Plan
- Part IV. Resource Implications
- Program/Area/Unit Outcomes and Assessment ([IB-52](#))

The ARPD template includes a section of achievement data for programs, units, and areas based on quantitative indicators for demand, efficiency, and effectiveness. These indicators receive scores of “healthy,” “cautionary,” and “unhealthy,” which the UHCC Health Call Scoring Rubric defines ([IB-53](#)).

Each program, unit, or area is expected to analyze the quantitative data by providing qualitative written analysis in Part II of the template. Part III requires a written narrative identifying the actions plans that will be pursued in the next year. Part IV requires a brief summary of the resources needed to implement these action plans ([IB-52](#)). If a program has PLOs, there is additional reporting of assessment results.
**Resource Implications Template (Resource Request List)**

Each academic program, educational unit, and support area completes a resource implications template that lists prioritized resource needs ([IB-54](#)). Each instructional division completes a resource implications template to incorporate resources needed that are not identified by a program.

Prioritization occurs by vote and within each overarching area. For instructional prioritization, voting representatives at the prioritization meeting include one representative from each of the six instructional divisions, the Waiʻanae Moku Education Center coordinator, the Native Hawaiian student support program coordinator, and the OCEWD program coordinator. Each representative has one vote for determining the priorities for instruction. For non-instructional prioritization, voting representatives are the unit heads for each of the Academic Services, Student Services, and Administrative Services units. Each representative has one vote for determining the priorities for support services.

Once all overarching areas have prioritized their resource request lists, administration makes an institutional resource request list and provides a draft of the list to the Campus Council and the Faculty Senate for review. Representatives of these governance groups take the draft to their constituencies for review and comment. The Campus Council makes a final recommendation to the chancellor regarding resource request items on the final institutional priorities list for resources.

**Comprehensive Review and Evaluation (CRE)**

Each academic program, educational unit, and support area completes a CRE at least once every four years on a staggered schedule ([IB-51](#)). The CRE identifies long-term goals that can be used to direct efforts and create action plans. This requirement ensures that the College meets UHCCP 5.202, Review of Established Programs ([IB-55](#)). A program, unit, or area completing a CRE does not complete an additional ARPD, as ARPD elements are included in the CRE. The College reviews all CREs, which provide information on how well programs, units, and areas are meeting the College mission and strategic plan.

**Institutional Effectiveness Report**

The approved planning process includes the publication of the Institutional Effectiveness Report every fourth year. The 2017-2018 Institutional Effectiveness Report is a comprehensive report that examines the College’s progress towards meeting institutional goals and the overall impact of plans made within instructional programs, educational units, and support areas. This report provides the College with an opportunity to determine how it is progressing. In the 2017-2018 report, the College evaluated its progress in increasing enrollment for Pacific Islander students, international students, dually enrolled students, and DE students ([IB-42](#)). Administration reviews the report and identifies areas to target in the coming years. This report is under review as part of the Ad Hoc Planning and Budgeting Process Review committee.

**Use of Disaggregated Data by Program Type and Delivery Mode**

The OVPCC disaggregates data for each program’s ARPD by major for Native Hawaiian students, full-time students, and part-time students; by enrollment trends; by persistence, success, and retention rates; by degrees and certificates awarded; and by delivery mode. Program faculty analyze these factors in the ARPD.
To expand on quantitative data, faculty and staff analyze and discuss relevant information for each program. The OPPA provides qualitative feedback to faculty and staff during the ARPD process so they can make modifications before final submission.

If applicable, the ARPD can include data on DE, Perkins funding, and performance funding. In addition, the ARPD integrates assessment of PLOs. Through the ARPD, faculty and staff use disaggregated data to analyze a program, develop an action plan to implement modifications, and request resources to make improvements.

In addition to the ARPD, the College uses longitudinal student achievement data to assess how well it fulfills its mission. A more detailed discussion about the use of disaggregated data is in Standard I.B.6.

Analysis and Evaluation

The ARPD is the main planning and assessment document used to accomplish the College mission. Each academic program, educational unit, and support area completes the ARPD, which includes program review and evaluation of goals and objectives, learning outcomes, and student achievement data. Each program’s ARPD, where applicable, is disaggregated by major for Native Hawaiian, full-time, and part-time students; enrollment trends; persistence, success, and retention rates; degrees and certificates awarded; delivery mode, Perkins funding; and performance funding. In addition to the ARPD, the College uses longitudinal student achievement data to assess how well it fulfills its mission.

I.B.6.

The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

Evidence of Meeting the Standard

Use of Disaggregated Data for Student Subpopulations

In coordination with the UHCC System, the College disaggregates and analyzes learning outcomes and student achievement data for specific student populations. When the College identifies performance gaps, it implements strategies and may allocate resources to mitigate those gaps. As part of continuous improvement, the College evaluates the effectiveness of those strategies.

The UHCC System has identified performance gaps for Federal Pell Grant recipients and three underrepresented student populations, which are Native Hawaiian, Filipino, and Pacific Islander (IB-38, IB-9). The College uses disaggregated student achievement data to evaluate these student populations. For the past three semesters, data results for each of these student populations have remained consistent in terms of retention rate, persistence rate, and successful completion rate (IB-56).

The College uses disaggregated data to better understand where achievement gaps exist and to subsequently develop action plans. Instructional programs include action plans in the
ARPD, which also includes disaggregated data. The College utilizes the Institutional Effectiveness Report to highlight equity gaps (IB-42). Administration uses this report to identify areas to focus on in the upcoming years. For further discussion of the Planning Process Effective Review, see Standard I.C.5.

**UHCC System Initiatives for Student Subpopulations**

To monitor performance gaps for underrepresented students and enhance the graduation rate for all students, the UHCC System coordinates efforts at all seven community college campuses. The two primary initiatives implemented in 2016-2017 were the Acceleration Initiative and the Student Success Pathway framework.

**Acceleration Initiative**

At the College, pilot projects to accelerate students through remedial/developmental courses have been ongoing for several years. The UHCC System provided funding in 2016-2017 and 2017-2018 to all the campuses to support the scaling up of these pilot projects. For the Acceleration Initiative, remedial/developmental math and English faculty shortened the course sequence and adopted a co-requisite model to expedite students through developmental courses within one year. In 2015, the College funded requests for equipment, learning support, and professional development, which the developmental math and English ARPDs identified in the resource implications section (IB-57, IB-58, IB-59). In fall 2016, developmental math and English faculty fully implemented co-requisite courses in which students enroll in one level below a college-level math or English course with a college-level math or English course in the same semester.

For math, three different tracks (College Algebra, College Math, and Quantitative Methods) with co-requisite courses reduce students’ time through graduation. Students in the College Math track who are placed two levels below a college-level math course are given the opportunity to complete a college-level math course with no additional cost. In 2016-2017, over 25 percent of students who placed two levels below college-level math completed a college-level math course in one semester rather than two semesters (IB-60).

For English, the Accelerated Learning Program provides support for students who place one step below a college-level English course through concurrent enrollment in English 22 (Introduction to Composition) and English 100 (Composition I). Students who place two steps below college level may enroll in English 24 (Reading, Reasoning, and Writing) or English 24C for career and technical students. Whereas students who place at the lowest level previously needed to take and pass up to six courses prior to enrolling in college-level English, the course sequence in place facilitates acceleration and success. Students placing at the lowest level can complete English 100 within one year if they pass English 24 and English 100. For more discussion of this initiative, see Standard II.A.4.

**Student Success Pathway Framework**

To increase student retention and help eliminate identified performance gaps, the College implemented the UHCC Student Success Pathway framework, which is designed as a clear and structured pathway from point of entrance through graduation to transfer and career. The UH System developed and implemented STAR (brand name), which is a web-based tool designed to assist students stay on track to graduation. Students, counselors, and faculty use STAR to help students achieve academic goals in a timely manner. A recent addition to
STAR is STAR Guided Pathway Selection (GPS) Registration, which shows students the courses they need to take in their program of study each semester until graduation. STAR GPS also helps prevent students from taking unnecessary courses that delay graduation and incur additional costs. For a more detailed discussion of the pathway framework, see Standard II.C.6.

Campus Initiatives for Student Subpopulations
In addition to UHCC System initiatives, numerous efforts are in place at the College to monitor performance gaps for Native Hawaiian, Filipino, and other Pacific Islander students and Federal Pell Grant recipients.

To support Native Hawaiian students, the College has operated an education center in Wai‘anae since 1972. The Wai‘anae Moku Education Center has embraced the Native Hawaiian culture through its curriculum, programs, mission statement, and community groups. In addition, the Wai‘anae Moku Education Center created the Going to Finish On-Time program for students who aspire to graduate within two to three years with an associate degree. This program offers academic, personal, and financial support for students who want to commit to full-time status in order to graduate on time. In addition, the UH Foundation-sponsored Access to Education program, which is discussed in Standards II.A.7 and II.C.3, also serves this student subpopulation.

The College also created the Hālau with the main goal of eliminating academic achievement gaps among Native Hawaiians. The College received numerous grants to assist in these goals and established the Hālau on the Pearl City campus, where Native Hawaiian students benefit from a variety of support services, learning tools, study space, welcoming and nurturing staff, and peer engagement. The Hālau coordinates the Lanakila First-Year Cohort, the Ho‘oulu Career Development program, and the Native Hawaiian STEM Scholars program (IB-61, IB-62, IB-63, IB-64). Additionally, as a means of increasing graduation rates, the program developed the Native Hawaiian Excellence program, Ke Ala ‘Ike, to inspire Native Hawaiians and all those who embrace the Hawaiian culture to commit personal excellence toward their academic and cultural pursuits (IB-65). Since its inception, Ke Ala ‘Ike has been collaboratively managed and improved by faculty from many disciplines who all share the goal of eliminating academic achievement gaps among Native Hawaiians. At the commencement exercises in May 2017, 20 students earned their Ke Ala ‘Ike Scholars kīhei (IB-66). The College actively recruits Wai‘anae Moku students into Ke Ala ‘Ike demonstrating a coordination between the Pearl City campus and the Wai‘anae Moku Education Center in assisting Native Hawaiian students.

To increase the success of Filipino students, Philippines studies faculty applied for and received grants that led to the creation of the Dap-ayan room. The indigenous Cordillera word dap-ayan refers to a place where community members can meet, learn, and resolve issues and conflicts. This room, which is equipped with computers, printers, and supplies, is critical for students of Filipino descent to come together and build rapport.

Additionally, the College has had a memorandum of agreement with Waipahu High School to provide Early College classes. This school’s student body is 67.8 percent Filipino (and 8.4 percent Native Hawaiian and 14.0 percent other Pacific Islander) (IB-67). In fall 2017, 142 Waipahu High School students enrolled in the College’s Early College classes. One of these
students was the first Early College student in the state of Hawai‘i to complete her associate degree before graduating from high school (IB-68). In spring 2018, the College inducted 28 of Waipahu High School’s Early College students into its Phi Theta Kappa chapter (IB-69).

In summer 2016, the College developed a summer cohort for Pacific Islander students. As a cohort, 14 students enrolled in Philosophy 110 while receiving additional support from peer mentors in the class. All these students continued at Leeward during 2016-2017 and received additional support that included working with the Writing Center; having use of a campus-purchased laptop through the spring semester; and having a faculty advisor, a club advisor, and a student support advisor available.

In summer 2017, the College organized another summer bridge opportunity for 21 Pacific Islander students. This summer bridge program enrolled students in Learning Skills 110 (College Success Strategies). This course included brush-up work in math and English, exposure to Pacific Island history, and development of college success skills. These students became acquainted with the College and its services, explored career options, and met with a designated counselor to plan their academic paths. The College purchased additional laptops for these students to use during the fall semester. If the program is successful, the College will continue to allocate funds for this program (IB-70).

To increase the number of students who receive financial aid, especially Federal Pell Grant recipients, the College’s Financial Aid office reviewed its current financial aid process and is working with the Banner Central financial aid lead, the UH System’s four-year schools, and fellow UHCC campuses to create best practices and simplify the financial aid process. This office has also been instrumental in providing training to student employees at the Wai‘anae Moku Education Center to assist students to complete the Free Application for Federal Student Aid application. In 2017-2018, the UHCCs received additional funding from the state legislature for Hawaiʻi Promise scholarships (IB-71, IB-72). Hawaiʻi Promise scholarships are intended to ensure that students with unmet financial need can get the financial support they need to attend college.

**Use of Disaggregated Data for Distance Education Students**
Disaggregated student achievement data show that DE students are performing just as well as students taking face-to-face courses at the College (IB-73). The College continues to monitor student success in DE courses. The Educational Media Center provides ongoing training and professional development for online instructors. As of spring 2018, the College provided instructors the opportunity to take online professional development courses through Quality Matters (IB-74). The College offered these workshops in addition to the campus activities and events to further ensure faculty are prepared to address student issues specific to DE.

**Analysis and Evaluation**

The College uses disaggregated student achievement data to evaluate student subpopulations. Rates for retention, persistence, and completion are disaggregated by ethnicity for Native Hawaiians, Filipinos, and other Pacific Islanders, and by Federal Pell Grant recipients. Numerous projects and programs exist to reduce identified performance gaps including an acceleration initiative, student success pathways, support and evaluation for DE classes, and programs targeting specific ethnicities. While the College consistently exceeds
institutionally-set targets for Pell Grant recipients, the number of such recipients has remained steady over the past several years and efforts are underway to increase that number.

I.B.7.  
The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.

Evidence of Meeting the Standard

Evaluation of Institutional Policies and Procedures
The College exists within a multi-campus system, so the UH Board of Regents (BOR) is responsible for the regular evaluation of regent policies, the UH System is responsible for the executive policies and administrative procedures, and the UHCC System is responsible for UHCC policies.4

The College publishes its policies on the College website (IB-75). Table 47 identifies the College policies and their effective dates. During 2016-2017, a Faculty Senate ad hoc committee reviewed L5.201, Policy on Curriculum Review and Revision (IB-76). During 2017-2018, an ad hoc committee of the Campus Council and the Faculty Senate reviewed L5.202, Policy on Annual Program Review. During 2017-2018, the Faculty Senate Assessment Committee reviewed L5.210, Policy on Assessment (IB-77, IB-78). During 2017-2018, the Campus Council and the Faculty Senate reviewed L4.100, Policy on Institutional Mission, and L1.201, Policy on Shared Governance. For a more detailed discussion of these efforts by the governance groups, see Standard IV.A.7.

Some policies have not been recently reviewed. OPPA has been understaffed for 2017, and the office is in the process of filling vacant positions. Once the office has been fully staffed, all policies will be reviewed for currency and revisions made if needed.

**Evaluation of Program Review, Planning, and Budgeting**

The Integrated Planning and Budgeting Process is the College’s primary means of evaluating its programs, support services, and resources. In spring 2017, the Campus Council surveyed authors and reviewers of the ARPD, including instructional discipline coordinators, program coordinators, unit heads, and administrators, and asked them how the program review and planning process might be improved (IB-79). Survey results indicate that over 80 percent agreed that they understood how to use the data provided by the UH System. Almost 90 percent agreed they know how to make prioritization requests for program or unit improvements. Approximately 55 percent were neutral or disagreed that the program review process motivates them to make programmatic or unit improvements. An ad hoc committee convened in fall 2017 to develop recommendations for improving the Integrated Planning and Budgeting Process. College leaders will use these results to improve program review and planning practices.

The College completes the Institutional Effectiveness Report every four years as a comprehensive review of the College. The review examines the College’s progress toward institutional goals and the overall impact of plans made within instructional programs, educational units, and support areas (IB-42).

The College administers an institutional assessment every two to three years to determine areas of strength and improvement. In fall 2016, the second cohort of the Leadership Excellence program collaborated with the OPPA to administer an employee satisfaction survey (IB-80). The cohort’s goal was to better understand employee morale, satisfaction, and engagement (IB-81).

In 2014, the College administered a lengthy employee satisfaction survey that contained 86 questions (IB-82). The cohort reviewed these questions and researched other instruments to determine how best to measure employee satisfaction. In an effort to maximize the quality and quantity of responses, the cohort decided to develop a concise survey that addressed four categories: mission, goals, priorities, and planning; resources; governance and leadership; and work environment. The cohort added open-ended questions to invite employees to share what they liked best about the College and offer suggestions as to how the College could create a better workplace. The cohort distributed the survey through the faculty and staff listserv, which included both active and retired employees.

The cohort presented to the campus community the 2016 survey results as well as data trends based on the employee satisfaction surveys administered in 2011 and 2014 and sent out an analysis report, which was posted on the College intranet (IB-83, IB-84, IB-85). Administrative leaders discussed the survey results and determined that the Campus Council and the Faculty Senate would create and administer additional surveys to gather more information from campus constituents.

Additionally, individual units and areas will conduct more in-depth surveys. For example, in fall 2017 the vice chancellor of administrative services (VCAS) conducted a survey of administrative services’ functional areas and support units (IB-86). The survey results will help identify specific improvement areas that can support continuous improvement efforts and will be incorporated into the Integrated Planning and Budgeting Process as part of each unit’s short- and long-term improvement plans (IB-87).
Analysis and Evaluation

Through the Integrated Planning and Budgeting Process, ARPD, Institutional Effectiveness Report, and governance groups, the institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to ensure academic quality. Leeward Community College evaluates its policies on a five-year cycle. The College completed an evaluation of the program review and planning process in spring 2017 and an ad hoc committee will develop recommendations for improving the Integrated Planning and Budgeting Process.

I.B.8.

*The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.*

Evidence of Meeting the Standard

Communication of Results through Course Assessment

The College broadly communicates assessment results and evaluation activities through course assessment. The results of course assessment are shared broadly through the posted ARPDs (IB-88). Programs include in their ARPDs a discussion of PLOs that covers which courses they assessed and information about the results of those assessments. If programs make significant changes to curriculum, they may note it in the PLO section. Programs report on their course and program assessments at advisory board meetings, which are held at least annually for each of the CTE programs. Programs also include course assessments in Tk20; however, Tk20 has not proven to be a reliable method for communicating assessment results.

Communication of Results through Program Review

The College broadly communicates assessment results and evaluation activities through the program review process. The College uses the ARPD to report annually on demand, efficiency, and effectiveness data for all CTE programs, developmental education programs, the associate degree, and support areas such as Academic Services, Student Services, Administrative Services, OCEWD, and the Wai‘anae Moku Education Center. Deans, program coordinators, and faculty analyze data to assess programs, develop action plans for the coming year, and create resource allocation lists. They assess program health using standard benchmarks that the UHCC System has defined and set. Each academic program, educational unit, and support area uses the strengths and weaknesses identified in the ARPD to set priorities. The OVPCC reviews and summarizes the completed ARPDs and reports results to the BOR and the Federal Office of Vocational and Adult Education. The USDE is informed about program performance and requirements of Perkins funding. The UHCC System website posts the ARPDs so the campus community can review them (IB-88). The College posts all the ARPDs on its website (IB-89).

The College uses the CRE to identify long-term goals (IB-51). Each academic program, educational unit, and support area completes a CRE at least once every four years. Program coordinators use the CRE to review a program and identify strengths and weaknesses based
on the analysis of data. An academic program, educational unit, or support area uses the strengths and weaknesses to complete a resource request and set priorities. The College publishes the CRE reports on its website (IB-89).

**Communication of Results through Campus Presentations**

The College broadly communicates assessment results and evaluation activities through campus presentations. Regular communication of its assessment and evaluation provides the campus community with a shared understanding of the College’s strengths and weaknesses and allows the College to set appropriate priorities. The VPCC visits the College each semester to provide an update on progress towards UHCC System strategic plan goals, performance benchmarks, and UHCC System initiatives. These presentations are an opportunity for faculty and staff to ask questions and get feedback on how well the College is performing. Additionally, the College provides updates about campus progress at fall and spring convocations.

The OVPCC uses data from the Community College Survey of Student Engagement (CCSSE) when reporting to the BOR on the UHCC System’s progress. This national survey, which is coordinated every two years by the Center for Community College Student Engagement and the Community College Leadership program at the University of Texas at Austin, provides the College with data on student satisfaction and student engagement (IB-90). The ARPDs include some CCSSE results.

**Analysis and Evaluation**

Assessment takes place at the College through numerous methods to ensure the College is meeting its mission and goals. The College broadly reports these assessments to internal and external stakeholders, which include the BOR, the UHCC System, and the campus community.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about campus communication and priorities at the College. Participants discussed how the College meets Standard I.B.8 and how the College can improve in these areas. They said that the College communicates with its constituents through its weekly bulletin, its website, and through email listservs. Funding opportunities and safety notices, for example, are often sent to the campus listserv to ensure that all campus members get notified. The College strives to further increase its web and social media presence to more effectively communicate with students. A particular challenge is to keep program-specific pages on the website current (IB-21, pp 2-3).

I.B.9.

**The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources.** (ER 19)
Evidence of Meeting the Standard

Revision of Planning and Budgeting Process
The College engages in continuous, broad-based systematic evaluation and planning. This comprehensive process integrates program review, planning, resource allocation, implementation, and re-evaluation. The College designed this process to support its mission and improve academic quality and institutional effectiveness. By the 2012 institutional self-evaluation, however, the process had become overly complex and cumbersome. Faculty and staff felt overburdened by the work required in the Annual Program Review (APR) process, which included a comprehensive review each year. Instructional programs and some support area programs also submitted an ARPD template to the UHCC System website annually. The following section details the implementation, evaluation, and revision of the College’s Integrated Planning and Budgeting Process from 2012 to 2017.

The College convened an ad hoc committee in fall 2012 to review the APR process and make recommendations for improvement (IB-91, IB-92, IB-93). The ad hoc committee created a proposed template and shared it with the leadership group at a mini-retreat in February 2013 (IB-94, IB-23, IB-95). The leadership group provided feedback and the committee slightly modified the timeline based on the feedback (IB-96). Additionally, in April 2013, the Campus Council distributed a survey on the APR process. This was a repeat of the survey conducted in 2011. Some of the findings included a need to revise the APR template (IB-97). Based on the ad hoc committee recommendations and the survey results, the Campus Council approved a new planning process in May 2013, which would go into effect in the following year.

In 2013-2014, the College introduced a shorter template titled Annual Review and Resource Allocation (ARRA) template (IB-98). All instructional programs still needed to complete the ARPD template for the UHCC System website. These two annual templates created confusion, and feedback indicated it was still a duplicative process.

In 2014-2015, the OPPA decided to continue using the Resource Request template, but to discontinue using the ARRA template since this form needed to be submitted in conjunction with the ARPD reports submitted to the UHCC System (IB-99). The Campus Council approved a new proposal for changing the planning process in May 2015 for the following year (IB-100). The College used this Integrated Planning and Budgeting Process in 2015-2016 and 2016-2017.

In May 2017, the Campus Council distributed a survey to program coordinators, unit heads, and division chairs to get feedback on the current Integrated Planning and Budgeting Process. The Campus Council discussed the feedback at their meeting on May 1, 2017 (IB-101, Item 4.a). Feedback indicated that there continues to be frustration with the UHCC System site and the late release of data for the ARPDs. Survey respondents recommended that the College reduce reliance on the UHCC System data and identify data that will be more meaningful to the specific programs and units. While the Integrated Planning and Budgeting Process will primarily stay the same, the College will encourage the programs and units to include their own data or data supplied by the OPPA for the analysis of their program/unit. The College later supported this discussion with the decision to convene an ad hoc committee to review the Integrated Planning and Budgeting Process.
Current Integrated Planning and Budgeting Process

The Integrated Planning and Budgeting Process for the year begins with a leadership retreat. At the retreat, all administrators, instructional division chairs and unit heads, academic services unit heads, student services unit heads, and administrative services unit heads discuss institutional issues and determine what the focus for the next planning cycle will be. The goal of the retreat in August 2017 was to review campus initiatives and develop a cohesive understanding of where the College would focus its efforts for the next year. The focus for 2017-2018 was placed on “The Student Experience” with a goal of increasing student retention and persistence by ten percent over the previous year. Refer to Standard LB.3 for further discussion.

Program Review

The administration disseminated an overview and timeline of the Integrated Planning and Budgeting Process for 2017-2018 to the campus in September 2017 (IB-102). Instructional programs, educational units, and support areas receive system data in September and begin the process of analyzing the data. Outcomes assessment at the course and program levels is an ongoing process. Each academic program, area, and unit includes outcomes assessment data and results in the ARPD/CRE templates. Sections in the instructional ARPD template include prompts for program learning outcomes that were completed in the previous year.

In addition to using outcomes assessment data, the academic programs, areas, and units use institutional research data to complete the ARPD template, including student achievement data, such as demographic information and disaggregated data comparing DE and face-to-face classes. Each academic program, area, and unit completes the template with input from its constituents. Through the process of completing the templates, the programs, areas, and units review a wide range of data and evaluate its effectiveness.

The College uses results of assessment and analysis in decision making to align institution wide practices to support and improve student learning. Once programs, areas, and units complete their ARPD, each creates a resource request list and indicates priority items for resource allocations. Instructional divisions also complete a resource request list. For example, the Learning Resource Center provides content tutoring and writing support each year. In 2016-2017, assessment data indicated a need to provide additional tutoring and peer mentoring support. The College approved the request for additional funding for student help for a range of student support areas for 2017-2018 (IB-36).

Resource Request Prioritization

The College has a process to consolidate the resource request lists from multiple divisions and units into a combined plan. The instructional unit heads (instructional division chairs and educational unit heads) discuss and prioritize each of their resource request lists into a single Instructional Priorities List (IB-103). The support areas, which include Student Services, Academic Services, and Administrative Services, complete their resource request lists and prioritize as well. The administrative team reviews all of the prioritized lists and compiles them into a draft institutional priorities list for the College. Prioritization is based on common criteria: alignment with strategic goals and outcomes, scope of impact, evidence of measurable outcomes, and impact on health and safety.
The administrative team presents the draft of institutional priorities to the Campus Council for review, discussion, and re-prioritizing, if needed. The Faculty Senate also reviews the institutional priorities and can make recommendations for re-prioritizing, if needed. The Campus Council approves a final institutional priorities list as a recommendation to the chancellor (IB-101, Item 4.b).

Resource Allocation
Each year the VCAS reviews the operating budget and prepares a proposed budget for the upcoming year based on planned increases in revenues and changes in expenditures. If the VCAS identifies available funds, the College uses the institutional priority list to guide decision-making on updating the budget. Refer to Standard III.D.3 for further discussion.

In addition to informing the operating budget, the institutional priorities list is used to develop the biennium budget request and the supplemental budget request for the UH System. The institutional priority list includes funding requests that the College may submit to the UHCC System, which compiles strategic funding requests from all community colleges. The UHCC System’s centralized funding priorities are, in turn, submitted to the UH System and combined with the strategic funding requests from the UH baccalaureate campuses. The UH president and staff prepare a formal budget request of the UH ten-campus system, which the president presents for approval to the BOR in the fall of each year. Following approval by the board, the president submits the budget request to the governor for review and incorporation into the executive budget request. State law requires that the governor's executive budget request be released by December of each year and submitted to the state legislature. The state legislature convenes in regular session each January to begin deliberations regarding the upcoming biennial budget or supplemental budget.

Division chairs and unit heads also use their respective priority lists to determine expenditures in the coming year. The College provides each division and unit with an annual operating budget to spend on ongoing expenses. The instructional divisions also have an additional budget provided from summer school offerings. The VCAA determines these allocations as a profit-sharing plan to split summer school tuition and fee revenues with the instructional divisions. Since implementing this plan, the instructional divisions have offered more summer school classes that are in high demand and reduced low-enrolled summer school classes.

            | ● Developed the CRE template.                                               
            | ● The Campus Council approved the revised Integrated Planning and Budgeting Process. |
| 2015-2016  | ● Introduced the revised process including the ARPD template and/or CRE template.  
            | ● Continued to use the Resource Request template.                           |
| 2016-2017  | ● Expanded the use of the ARPD template to all units and areas, even those not included in the UHCC ARPD. 
            | ● All remaining programs, units, and areas completed the CRE template.       |
| 2017-2018  | ● New cycle of the CRE template to begin.                                    
            | ● Move towards better use of data in the ARPD process with less reliance on UHCC System data. 
            | ● An ad hoc committee will review and evaluate the Integrated Planning and Budgeting Process. |

As Table 48 demonstrates, institutional planning and budgeting happens on a regular basis and follows a consistent process. This process includes wide participation across the campus community and uses valid data sources.

**Long-Range Planning Process**
Institutional planning addresses the short-term and long-term needs of the College. The College requires each academic program, educational unit, and support area to complete a CRE every four years and uses the CRE to identify long-range goals that direct efforts and create action plans. The comprehensive template includes data sets that the academic program or support area defines. The College reviews the CREs to determine how well the program, unit, or area is meeting the College mission and strategic plan goals. For more information about the CRE, see Standard [IB-5](#).

In accordance with Eligibility Requirement 19, the College makes public how well and in what way it is accomplishing its mission, including assessment of learning outcomes. All ARPDs report on program learning outcomes and the results of assessments. The College provides the ARPDs on the UHCC ARPD website and the College website ([IB-88](#), [IB-89](#)).

**Analysis and Evaluation**

The College has a well-established, broad based, and comprehensive cycle of evaluation, integrated planning, resource allocation, and implementation that addresses both the short- and long-term needs required to accomplish its mission.

The College evaluated its planning and budget cycle in 2016 and received feedback from 200 faculty and staff. When asked if the College planning process resulted in improvement, 60.5 percent of respondents agreed that the process results in improvements of programs and
services and 34 percent were unsure (IB-81). Based on this finding, the College is currently
working to better communicate the results of program improvements to the campus
community. In fall 2016, the VCAA shared an overview of the Integrated Planning and
Budgeting Process with the campus. In spring 2017, the VCAA shared the ranked priorities
for each area (Instruction, Academic Services, Student Services, and Administrative
Services) during March and April. In 2017-2018, the College convened an Ad Hoc Planning
Process Review Committee to explore ways to improve the planning and budgeting process.

During the roundtable discussions at the convocation in spring 2018, faculty and staff
expressed their opinions about the College’s Integrated Planning and Budgeting Process.
Participants discussed how the College meets Standard I.B.9 and how the College can
improve in this area. They said that the College’s Integrated Planning and Budgeting Process
helps faculty to plan for and request budget items that support outcomes assessment. While
the College annually communicates this process, some faculty and staff are still unclear how
the process works and how to request funding for their specific needs. They cited that the
Campus Council and Faculty Senate convened a joint ad hoc committee to review the
planning and budgeting process and make recommendations for improvement. The work of
the ad hoc committee is ongoing, but one change is the ability for any individual or group to
add an institutional resource request into the process. This revision provides an additional
avenue for resource requests that impact the College but are not prioritized and forwarded
from a division, unit, or area (IB-21, pp. 3-4).

</table>
I.C. Institutional Integrity

I.C.1.  
The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.

Evidence of Meeting the Standard

The College’s Catalog, website, and campus communication system provide clear and accurate information about the College’s mission statement, learning outcomes, educational programs, student support services, and accreditation status to current and prospective students, campus employees, the public, and the College’s accreditors. The College regularly reviews the information to ensure clarity, accuracy, and integrity (IC-1, IC-2, IC-3, IC-4, IC-5, IC-6, IC-7, IC-8, IC-9, IC-10).

The College provides a print and an electronic version of the Catalog for its constituencies with precise, accurate, and current information (IC-11, IC-12). The print version is available for a nominal fee at the campus Copy Center, and the electronic version is available to view and/or download on the College website. Designated campus members review portions of the Catalog annually to confirm accuracy and currency. The College updates corresponding information on the website and in the Catalog to ensure consistency and transparency. For more information, see Standard IC-2.

In fall 2016, the Creative Services (Marketing and Public Relations) office redesigned the College website to use a responsive template that lends itself to easy browsing on a mobile device. This office also incorporated feedback from students and leveraged usage data to modernize the website (IC-13, IC-14).

The Creative Services office oversees the campus communication system (IC-15). This system regularly updates many of the information dissemination channels including the Catalog, campus bulletin boards, on-campus digital signage system, weekly email bulletin (redesigned in fall 2015 and in fall 2017), and official College online sites on Facebook, Twitter, YouTube, Instagram, Flickr, and Pinterest (IC-16, IC-17, IC-18, IC-19, IC-20, IC-21, IC-22). The Creative Services office ensures consistency and clarity in communication by providing centralized support for all College communication, graphic design, and marketing services (IC-23).

Analysis and Evaluation

The Creative Services office oversees the campus communication system and ensures the clarity, accuracy, and integrity of information provided to all campus constituencies and stakeholders through varied dissemination channels. The College clearly and accurately describes itself to stakeholders through its website, which includes information related to its mission, learning outcomes, educational programs, and student support services. An
The accreditation webpage provides students and the general public with information about the College’s accreditation status with all its accreditors.

I.C.2. The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements.” (ER 20)

**Evidence of Meeting the Standard**

The College provides a print and online version of the Catalog that is easily accessible to current and prospective students. Every academic year, the College updates and publishes its Catalog in hard copy available for purchase at the Leeward Copy Center and as a downloadable electronic version free of charge on its website (IC-11). The table of contents guides students quickly to the information they seek whether they are potential, new, or continuing students.

The Catalog has precise, accurate, and current information on all facts, requirements, policies, and procedures in accordance with Eligibility Requirement 20 (Integrity in Communication with the Public). Table 49 lists the page numbers from the Catalog 2017-2018 that correspond to the catalog requirements of the Accrediting Commission for Community and Junior Colleges (ACCJC) (IC-12).

All student policies can be found on the Policies webpage of the College website and the Services for Students webpage (IC-24, IC-8).

The Catalog describes the instructional delivery modes applied in distance education (DE) courses, programs, and degree offerings. The three different DE modes are televised courses, two-way interactive video courses, and internet courses. The Catalog explains how DE courses differ from traditional, face-to-face courses (IC-25). The Catalog and course syllabi describe the expected interaction between faculty and students and the accessibility of faculty and staff to students enrolled in DE courses.
The College has established protocols to ensure that the Catalog presents accurate and current information on the College’s programs, policies, and locations. The approach to maintaining accuracy in the Catalog is collaborative and team based. The Office of Planning, Policy, and Assessment (OPPA) coordinates catalog revisions and bases the annual catalog revision schedule on the Faculty Senate’s curricular deadlines, student registration dates, and STAR Guided Pathway Selection (GPS) input requirements (IC-26). The catalog revision team includes a wide cross-section of the campus faculty and staff. The team is composed of a revision coordinator, curriculum editors, and a production coordinator. In addition, division chairs, program coordinators, unit heads, dean of student services, vice chancellor for academic affairs (VCAA), and human resources staff review, revise, and proofread the catalog manuscript.

**Analysis and Evaluation**

Every academic year, the College updates and publishes its Catalog in alignment with ACCJC’s Eligibility Requirement 20. Hard copies are available for a nominal fee at the campus Copy Center and a PDF version is available on the College website. The table of contents guides students quickly to the information they seek whether they are potential, new, or continuing students. The catalog revision team includes a wide cross-section of the campus faculty and staff to ensure clarity and accuracy.

I.C.3.

*The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)*

**Evidence of Meeting the Standard**

The College collects and uses assessment data on student learning to communicate matters of academic quality to current and prospective students and the public. The College develops learning outcomes for courses, programs, certificates, and degrees, which the Curriculum Committee vets, approves, and then houses in an online database, Kuali Student Curriculum Management. (For more detailed discussion of the Curriculum Committee, see Standard II.A.2.) The College publishes program learning outcomes (PLOs) for programs, certificates, and degrees in the Catalog where students and the general public can see them. The Catalog is available to the public in an electronic format on the College website (IC-11).

The College collects and uses assessment data on student achievement to communicate matters of academic quality and makes its data and analysis public. The College provides access to the program review documents by posting them publicly on the College website (IC-27). Program review includes quantitative and qualitative data including program outcomes assessment results. The Annual Report of Program Data (ARPD) template provides the public with an evaluation of the program quality and recommendations for improvement. For further discussion on the ARPD, see Standard LB.5.

The College uses Tk20 software to collect and analyze assessment information. The OPPA manages Tk20 by assisting users, uploading course and faculty data, developing reports and
new functionalities, and offering training sessions (IC-28, IC-29). Program coordinators extract and summarize data from Tk20 to demonstrate learning outcome attainment. The College uses assessment results in the annual Integrated Planning and Budgeting Process. For additional discussion on Tk20, see Standard I.B.2.

Analysis and Evaluation

The College uses Tk20 software, managed by the OPPA, to collect and analyze outcomes assessment information to demonstrate student achievement. Learning outcome creation and assessment are done at least every five years to ensure quality. The College publicly posts program review documents on their website. Program reviews contain quantitative and qualitative data including outcomes assessment results. The ARPD template also provides an evaluation of the program quality and recommendations for improvement.

I.C.4. The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.

Evidence of Meeting the Standard

The College clearly describes its certificates and degrees in the Catalog in terms of their purpose, content, course requirements, and expected learning outcomes. The College offers three types of degrees: Associate in Arts (AA), Associate in Science (AS), and Associate in Applied Science (AAS). The Catalog 2017-2018 lists these degrees in the Programs of Study section (IC-3). In addition, the College website lists the degrees and certificates that students can receive through DE (IC-30).

For all degrees, students must complete a set number of the general education courses. The AA degree requirements also include four foundation courses and five focus courses. The Catalog lists an explanation of the general education requirements (IC-31, IC-32, IC-33). The College expects graduating students to meet seven general education learning outcomes (IC-31).

The College offers three types of certificates: certificate of achievement, certificate of competence, and academic subject certificate. The Catalog lists information on the 25 certificates offered, including a description of the program of study, PLOs, and the number of courses needed to receive a certificate (IC-34, IC-4).

The College’s L5.201, Policy on Curriculum Review and Revision, requires that all syllabi must include the course alpha and number designation, course title, number of credits, prerequisites, catalog course description, learning outcomes, instructor information (name, office location, office hours, phone number, and email address), course information (course section number, classroom location, course meeting days and times, and a list of required textbooks and supplies), the instructor’s grading policy, and the College’s academic dishonesty policy (IC-35).

Division chairs and discipline/program coordinators ensure that all course syllabi have learning outcomes and other pertinent information. The instructor makes the course syllabus
available to students at the beginning of each term, and a copy is also on file at the
instructor’s division office. The College recognizes that learning outcome creation and
assessment are ongoing processes and, therefore, continually reviews learning outcomes to
ensure academic quality.

Analysis and Evaluation

The Catalog clearly describes the institution’s degrees and certificates with respect to their
purpose, content, course requirements, and expected learning outcomes.

I.C.5.
The institution regularly reviews institutional policies, procedures, and publications to
assure integrity in all representations of its mission, programs, and services.

Evidence of Meeting the Standard

The College regularly reviews and evaluates its policies, procedures, and publications to
ensure the integrity of its mission, programs, and services. The College’s L1.101, Policy on
the Policy Development Process, provides direction for developing and maintaining College
policies (IC-36). The University of Hawai‘i (UH) Board of Regents (BOR), campus
governance groups, and administration regularly review and evaluate respective policies and
procedures, which are discussed in more detail in Standard I.B.7.

The Creative Services office regularly reviews publications according to recommendations of
campus committees and representatives responsible for programs and services. The office
also regularly reviews and updates its website to ensure integrity, consistency, and
transparency, which is discussed in Standard I.C.1.

Analysis and Evaluation

The College has several mechanisms in place to regularly review institutional policies,
procedures, and publications in order to ensure accuracy and integrity of programs and
services with alignment to its mission. These include policy, governance groups, and the
Creative Services office.

I.C.6.
The institution accurately informs current and prospective students regarding the total cost
of education, including tuition, fees, and other required expenses, including textbooks, and
other instructional materials.

Evidence of Meeting the Standard

The College publishes accurate information on the total cost of education, including tuition,
fees, and other required expenses such as textbooks and other instructional materials. The
Catalog publishes student fees and costs. It lists the tuition and associated enrollment fees in
an easy-to-read table with the following categories: resident, nonresident, and nonresident
Pacific Island jurisdiction. The Catalog highlights other costs such as late registration fee, transcript fee, and installment payment plan fee (IC-37).

The College website provides current and prospective students with accurate information on tuition, fees, and required textbook and instructional material costs (IC-38, IC-39, IC-40). In addition, the online Leeward Bookstore allows students to compare textbook prices (IC-41, IC-42).

The College has undertaken an Open Educational Resources (OER) initiative since 2016 (IC-43). Courses that offer OER or no cost textbooks include the statement “Textbook Cost: $0” on the Course Availability webpage and in STAR GPS (IC-44, IC-45). For further discussion of OER, see Standard I.A.3.

**Analysis and Evaluation**

The Catalog and website accurately inform current and prospective students about the total cost of education. The Catalog publishes student fees and costs including fees for late registration, transcripts, and installment payment plans. The College website includes information related to tuition and fees as well as textbook and instructional material costs.

I.C.7. 
*In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)*

**Evidence of Meeting the Standard**

The College uses and publishes institutional policies on academic freedom and responsibility in order to communicate its commitment to the free pursuit and dissemination of knowledge. The College supports an atmosphere in which intellectual freedom exists for students and faculty. According to the *Catalog 2017-2018*, “Leeward Community College embraces those aspects of academic freedom that guarantee the freedom to teach and the freedom to learn. Free inquiry and free expression for both students and faculty are indispensable and inseparable” (IC-46). All members of the campus community are free to examine and test all knowledge appropriate to their discipline or area of study.

As part of a state public university system, the College does not seek to instill specific beliefs or worldviews on its students. The College’s mission statement found in the Catalog clearly delineates the school’s focus and areas of emphasis (IC-1). In addition, the Catalog contains the Academic Rights and Freedoms of Students (IC-46).

The University of Hawai‘i Community Colleges (UHCC) Policy (UHCCP) 5.211, Statement on Professional Ethics (Faculty), outlines the academic freedom and responsibility for faculty (IC-47, IC-48). This policy is easily accessible on the UHCC System Policies website and reviewed on a regular basis (IC-49). The VCAA reminded faculty of the policy in an email sent in fall 2017 (IC-50).
Article IX of the 2017-2021 Agreement between the University of Hawai‘i Professional Assembly and the UH Board of Regents protects academic freedom for faculty (IC-51, IC-52). This collective bargaining agreement is easily accessible on the University of Hawai‘i Professional Assembly (UHPA) website (IC-53).

**Analysis and Evaluation**

The College is committed to fostering a campus environment in which students and faculty are supported in the free pursuit and dissemination of knowledge. This is explicitly stated in the Catalog and supported by UHCCP 5.211 and Article IX of the Agreement between the University of Hawai‘i Professional Assembly and the UH Board of Regents.

I.C.8.

*The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.*

**Evidence of Meeting the Standard**

The College has policies and procedures approved by the BOR on student academic honesty and student behavior, which it clearly communicates to current and prospective students. The College’s Student Conduct Code and Student Conduct Code Procedures are based on Executive Policy (EP) 7.208, Systemwide Student Conduct Code (IC-54, IC-55, IC-56). The executive policy discusses academic honesty and student behavior such as class disruptions and conduct that is threatening or infringing on the rights of other members of the academic community whether on or off campus. In 2018, the UH System reviewed EP 7.208 in order to create greater alignment with all UH System campuses in terms of the conduct code and procedures.

The College website includes the Student Conduct Code in two different documents on the Policies webpage: Student Conduct Code and Student Conduct Code Procedures. Additionally, the Catalog publishes the Student Conduct Code and other full policies relevant to Leeward students (IC-57, IC-58). Some of the policies included in the Student Conduct Code include academic probation and suspension, sex discrimination and gender-based violence, and academic rights and freedom (IC-24, IC-58).

The College has approved policies on the faculty’s responsibility on academic honesty and integrity. When policies exist at the UH System level and the UHCC System level, the College does not duplicate that policy but refers to the system policy. UHCCP 5.211 guides the behavior and responsibilities of the faculty regarding academic honesty and integrity. The primary responsibility of faculty is the intellectual honesty in which they approach their studied field. As teachers, they must encourage “the free pursuit of learning” for their students (IC-47).
The Hawai‘i Administrative Rules, Section 20-2, Statement on Rights and Responsibilities of the University of Hawai‘i Community, guides UHCCP 5.211, which is based within the context of the Hawai‘i Revised Statutes (IC-48).

The Faculty and Staff For Your Information (FYI) Guidebook reminds faculty of their rights of academic freedom and their responsibilities as educators. Excerpts are from the agreement between the UHPA and the BOR (IC-59, p. 36).

The College promotes academic integrity and honesty in the delivery of online courses through student identity and verification processes. See the Certification of Continued Institutional Compliance with Federal Regulations and Commission Policies for a discussion of the College’s compliance with ACCJC’s Distance Education and Correspondence Education Policy.

**Analysis and Evaluation**

The College establishes and publishes clear policies and procedures that promote honesty, responsibility, and academic integrity that apply to both students and faculty. These are based on system policies related to student conduct, professional ethics for faculty, and rights and responsibilities of faculty. These policies and their related procedures can be found on the UHCC Policies webpage, in the Catalog, and in the Faculty and Staff FYI Guidebook.

I.C.9.  
*Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.*

**Evidence of Meeting the Standard**

At the College, there is a clear expectation that faculty distinguish between personal conviction and professionally accepted views in a discipline, and the College expects faculty to present data and information fairly and objectively. UHCCP 5.211 adopted the American Association of University Professors’ statement on professional ethics that outlines academic freedom and responsibility for faculty (IC-47, IC-60). The policy informs faculty on their primary responsibility to be effective teachers and scholars.

The Faculty Senate Curriculum Committee reviews learning outcomes to ensure that the outcomes are free from personal conviction and contain professionally accepted views. The College requires that each course follow a formal five-year curriculum review and revision process. The process allows for widespread dialogue to ensure courses meet content requirements while allowing academic freedom through Article IX of the 2017-2021 Agreement between the University of Hawai‘i Professional Assembly and the Board of Regents of the University of Hawai‘i, which allows faculty flexibility to present content in a fair and objective manner (IC-51, IC-52). For a more detailed discussion of the curriculum review and revision process, see Standard II.A.2.
Analysis and Evaluation

The College and system policies on professional ethics inform faculty on institutional expectations to distinguish between personal conviction and professionally accepted views in a discipline. Above all else, faculty are to be effective teachers and scholars, which includes presenting data and information fairly and objectively. The Faculty Senate Curriculum Committee reviews learning outcomes and course outlines to ensure that they are free from personal conviction and contain professionally accepted views for their respective disciplines.

I.C.10. Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.

Evidence of Meeting the Standard

As a publicly-funded institution within the state’s ten-campus public higher educational system, the College does not promote specific beliefs or worldviews in accordance with state law. Hawai‘i Administrative Rules, Section 20-2, Statement on Rights and Responsibilities of the University of Hawai‘i Community, provides the College with guidance on codes of conduct. It states that no member of the academic community may interfere with another person’s convictions or academic freedom. More specifically, this statement clarifies that “a member of the academic community may not behave toward another member, even in the name of personal convictions or rights to academic freedom, in a manner denying or interfering with another member’s expression of convictions, right to academic freedom or the performance of legitimate duties or functions” (IC-48).

Analysis and Evaluation

The College is a public, open-access institution following state laws and UH System policies that cover codes of conduct for its employees as well as for students. As a public state-funded institution, the College does not prescribe specific beliefs or world views.

I.C.11. Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

Evidence of Meeting the Standard

The College operates a main campus in Pearl City, Hawai‘i, and an education center in Wai‘anae, Hawai‘i. The College does not operate in foreign locations and has not requested authorization from ACCJC to operate in foreign locations.
Analysis and Evaluation

The College does not operate in foreign locations.

I.C.12.

The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. (ER 21)

Evidence of Meeting the Standard

The College complies with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. The College submitted its most recent annual fiscal report to ACCJC on March 29, 2018, and its most recent annual report on April 3, 2018 (IC-61, IC-62). The College meets requirements and reporting deadlines set by the Commission and discloses information required by the Commission to communicate matters of educational quality to the public.

In the Catalog, the College identifies ACCJC as the accrediting organization overseeing the College’s compliance with Eligibility Requirements, Accreditation Standards, and Commission policies (IC-2).

The College website carefully details its relationship and recent history with ACCJC and its efforts to maintain its accreditation standing. The Accreditation webpage on the College website demonstrates that it meets ACCJC’s reporting deadlines (IC-10).

The College published its past institutional self-evaluation report on its website in order to inform the public of its good standing (IC-10).

The accreditation liaison officer (ALO) regularly contacts ACCJC when clarifications are needed regarding the writing of the Institutional Self-Evaluation Report and to obtain advice on possible substantive change proposals. In fall 2017, the ALO sought feedback on the creation of new degree programs and the possible need for a substantive change request. The ALO provided ACCJC with information on the degree programs, and the College received a letter of confirmation that ACCJC did not need the College to submit a substantive change request. The ALO also sought feedback on the need for a substantive change proposal regarding the recent move of the Wai‘anae Moku Education Center. The location change required a substantive change proposal, which the ALO submitted to ACCJC on January 24, 2018, and ACCJC approved on March 2, 2018 (IC-63, IC-64).

Analysis and Evaluation

The College complies with Eligibility Requirements, Accreditation Standards, and Commission Policies. The College publishes clear and accurate information regarding
educational quality and effectiveness for public review on its website. In addition, the College responds in a timely manner to all requirements set by ACCJC.

I.C.13.
The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)

Evidence of Meeting the Standard

The College communicates and complies with external agencies with clarity, honesty, and integrity. The About Leeward webpage of the College website lists the four programs that hold external accreditation:

- The Automotive Technology program is accredited by the National Automotive Technicians Education Foundation.
- The Culinary Arts program is accredited with Exemplary Program status by the American Culinary Federation Education Foundation Accrediting Commission.
- The Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management.
- The Teacher Education: Alternative Certification for Career and Technical Education program is accredited by the Council for the Accreditation of Educator Preparation. (IC-9)

The College complies with regulations and statutes communicating any changes in its accredited status to stakeholders. The College publicly shares its current accreditation status on the College website (IC-10).

Analysis and Evaluation

The College strives at all times to act with honesty and integrity in its relationships with external agencies by complying with their respective regulations and statutes. The College makes every effort to describe itself in identical terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and public. The publicly accessible College website and the Catalog list all programs that hold external accreditation and the current accreditation status of the College.

I.C.14.
The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.
Evidence of Meeting the Standard

The College has developed policies and practices that ensure high quality education for all students who enroll in the College and supports their objectives to be successful in learning and reaching their academic goals. Policies and practices demonstrate that delivering high-quality education is paramount to other objectives including financial decisions.

The Strategic Plan 2015-2021 puts the College mission into actionable goals such as increasing graduation rates, focusing on targeted student populations, preparing students for the workforce, teaching students about sustainability, and providing a smooth transition from high school through community college and into a four-year institution of higher education (IC-65).

The program review process guides the decisions to distribute and allocate annual funds to different programs and proposals. The College mission guides the financial decision-making for all campus projects including the use of external contributions and support of financial interests.

Additionally, UHCCP 5.211 supports a high-quality educational experience where faculty and students can freely exchange ideas, which creates an intellectual space for student learning and achievement (IC-47).

Analysis and Evaluation

The College places its educational responsibility above all other objectives including external contributions and financial interests.

Student Spotlight
Michelle Clark

The technical expertise and appropriate application of skills from the Leeward classes I completed combined with the concept and theories I gained at the bachelor and master’s degree level allows me to understand not only the high-level concepts in my field but exactly how everything works and what outcome we should expect. I was surprised how many people struggled with simple tasks like filling out a payroll tax form, one of many valuable assignments I recall from Leeward. I also gained exposure to different perspectives in the multi-cultural communication class that continues to instill a spirit of open-mindedness and respect for people from all walks of life and corners of the world. I feel I am better prepared for most situations in my career given the education and personal experiences from UH Leeward that have deeply enriched my character and created a path for success.
STANDARD II: STUDENT LEARNING PROGRAMS AND SUPPORT SERVICES

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution’s programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

II.A. Instructional Programs

II.A.1.
All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution’s mission, are appropriate to higher education, and transfer culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs. (ER 9)

Evidence of Meeting the Standard

Instructional Programs and College Mission
Leeward Community College (Leeward CC)’s mission statement is focused on providing all students with a “high-quality liberal arts and career and technical education” (IIA-1). Leeward is a liberal arts college with strong transfer programs that align with the programs at the University of Hawai‘i (UH) four-year institutions. In 2017, the College awarded 1,019 degrees and certificates. Of those, 67 percent were transfer degrees. The remaining 33 percent of degrees and certificates awarded were for career and technical education (CTE) programs, which may include a transfer option but are intended to lead to employment in the workforce (IIA-2). The College offers 15 associate degrees, 12 certificates of achievement, and 34 certificates of competence (IIA-3, IIA-4).

The College offers instructional programs in fields of study that are consistent with its mission. The instructional programs meet a high standard that is appropriate for higher education regardless of location or delivery mode. The College is committed to supporting its students by offering a range of delivery options including face-to-face courses, hybrid courses, and distance education (DE) courses and programs given that the College serves a large area, including remote areas on the Leeward coast of O‘ahu. The College has an education center on the Wai‘anae coast, Leeward CC - Wai‘anae Moku Education Center. Students can earn their Associate in Arts (AA) in Liberal Arts and other certificate programs on-site. Many students take classes at both the Pearl City campus and Wai‘anae Moku Education Center or in combination with online courses.
High school students participating in the dual-enrollment programs Jump Start, Running Start, and Early Admit take credit courses at the College (IIA-5). Additionally, the College offers Early College courses at eight local high schools: Campbell High School, Leilehua High School, Mililani High School, Nānākuli High School, Pearl City High School, Sacred Hearts High School, Wai‘anae High School, and Waipahu High School. For all these programs, students who participate are dually enrolled at both their high school and the College. Through some of these programs, students earn dual credit (credit that can be applied to both their high school diploma requirements and their college degree requirements), and in other programs they earn single credit (credit that is only applied to their college degree requirements). The Early College Memorandum of Agreement program is a specific type of dual-enrollment program where the College offers college classes to students through a partnership with a high school (IIA-6).

In addition to credit programs, the College offers noncredit courses and programs in the Office of Continuing Education and Workforce Development (OCEWD), the Office of International Programs (OIP), and the English Language Institute (ELI). OCEWD is aligned with the College mission to enhance quality of life and strengthen economic stability and growth by providing lifelong development and personal enrichment. OCEWD provides a variety of continuing education programs, public service, consulting services, and cultural programs. Programs support human resource and economic development, job training, and classes for small and large businesses and aspiring entrepreneurs (IIA-7).

The OIP and ELI align with the College’s mission statement to “foster students to become responsible global citizens locally, nationally, and internationally.” The OIP creates programs to meet the needs of international students wanting academic preparation and Hawai‘i students seeking an international educational experience in a foreign country. Study abroad programs provide Leeward students course content in an international setting. The ELI provides academic preparation in English for international students.

The College mission affirms “a special commitment to Native Hawaiians” (IIA-1). In support of this section of the mission statement, the College has an AA in Hawaiian Studies, an Academic Subject Certificate in Hawaiian Studies, and an Academic Subject Certificate in Hawaiian Language to provide an opportunity for all students to pursue an instructional program with a focus on Native Hawaiian culture, history, and language.

**Evaluation of Student Progress and Learning Outcomes**
The College assesses whether students’ progress through and complete degrees and certificates, gain employment, and/or transfer to four-year institutions in several ways. The primary means of evaluation at the institutional level begins with a review of institution-set standards and progress made toward aspirational goals (IIA-8). The UH vice president for community colleges (VPCC) shares this information at an annual fall semester campus forum (IIA-9, IIA-10). Attendees can ask questions and make comments on the issues at hand. (For further discussion on the VPCC visits, see Standard IV.D.6.) Additionally, administration later meets to discuss the information provided by the VPCC and develop strategies for improvement. Administration also uses these key indicators to identify areas to focus on in the coming year.
At the program level, the program review process provides an opportunity for review and reflection by instructional programs regarding students’ progress, completion and transfer data, and employment rates. Through the Annual Report of Program Data (ARPD), programs evaluate their program health and provide recommendations for improvement. The Board of Regents Committee on Academic and Student Affairs annually reviews programs with a low number of graduates and asks colleges to perform a specific review of these programs and provide a report of future plans (IIA-11, Article II.D.2.a).

The College assesses programs for currency, appropriateness within higher education, teaching and learning strategies, and learning outcomes. For a more detailed discussion of course revision and review, see Standard II.A.2.

The College assesses learning outcomes at the course level and the program level. (See Standard I.B.2 for a more detailed discussion of the College’s hierarchy of learning outcomes.) All courses have measurable course learning outcomes (CLOs) that the College uses to assess student learning. The same CLOs are used for all courses regardless of location or delivery mode. The College assesses program learning outcomes (PLOs) through various methods. These include but are not limited to capstone projects, student portfolios, or alignment with CLO assessment data. For program review, the College uses the ARPD template to analyze demand, efficiency, effectiveness, and outcomes of an academic program. The College uses assessment results for course and program improvements for all locations and delivery modes and uses ARPD results to plan improvements and prioritize resource requests. For a more detailed discussion of course assessment, see Standard II.A.16.

**Analysis and Evaluation**

All of the College’s instructional programs, regardless of location or means of delivery, are offered in fields of study consistent with the institution’s mission to provide high-quality liberal arts and career and technical education programs. The College offers a range of associate degrees and certificates through various delivery options including face-to-face and DE courses at two locations. The College also offers credit courses to high school students through its dual-enrollment programs.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and instructional programs. Participants discussed how the College meets Standard II.A.1, Eligibility Requirement 9, and how the College can improve in these areas. They said that the College regularly assesses what the local community needs and creates programs to meet those needs. To reach more students, the College has increased its delivery modes including DE courses and dual-enrollment courses. As the number of programs develop, the College strives to increase its publicity of the types of programs and the different delivery methods in order to make them all successful (IIA-12, pp. 4-5).

II.A.2.

*Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional*
courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.

Evidence of Meeting the Standard

Review of Content and Methods of Instruction
At the College, faculty ensure that the content and methods of instruction meet accepted academic and professional standards. Faculty, including full-time and part-time employees, initiate curriculum proposals and modifications after a collaborative discussion with faculty in their respective discipline or program. Faculty ensure that the quality of courses, regardless of delivery mode, adheres to the College’s L5.201, Policy on Curriculum Review and Revision (IIA-13). Faculty also follow the process approved by the Faculty Senate Curriculum Committee for course and program proposal, review, and modification (IIA-14, IIA-15).

To conduct curriculum review and revision, the College uses the Kuali Student Curriculum Management (KSCM) database, an online curriculum management system, which houses all approved course and program outlines (IIA-16, IIA-17, IIA-18). In the KSCM database, course outline requirements include learning outcomes and a discussion of how course content is appropriate, relevant, and covered in sufficient depth as well as how it reflects current theory and practice in the content area (IIA-19, IIA-20). All CLOs must connect to course content, PLOs, and the College mission.

In the KSCM database, program outline requirements include the program’s PLOs, mission and objectives, program curriculum plan, target (if any), resources, efficiency, and effectiveness (IIA-19, IIA-21).

The College’s L5.201 and L5.202, Policy on Annual Program Review, require faculty to regularly review all curriculum (IIA-13, IIA-22). In order for a course or program to be created, modified, or deleted, it must be approved by the division faculty, division chair, Curriculum Committee, the Faculty Senate, instructional dean, and the vice chancellor for academic affairs (VCAA). For further discussion, see Standard IV.A.4.

There are six steps in the College’s curriculum approval process.

Step 1: Faculty initiate all new curriculum proposals and all curriculum modifications after a collaborative discussion with discipline faculty and advisory boards. Once faculty and/or advisory boards identify a curriculum change, the faculty proposer enters the new or modified curriculum proposal into the KSCM database.

Step 2: Faculty in the division review and approve the proposal. Once approved, the division chair submits the proposal for review by the Curriculum Committee.

Step 3: The Curriculum Committee chair assigns proposals to subcommittees for thorough review. If needed, the subcommittees suggest changes to the proposer. Once the proposer updates the proposal, the full Curriculum Committee membership votes on it.
Step 4: After the Curriculum Committee approves a proposal, the Faculty Senate reviews it. At this time, the Faculty Senate may request additional changes or approve the proposal.

Step 5: The Faculty Senate forwards approved proposals to the appropriate instructional dean for review and approval.

Step 6: The VCAA performs the final review and approval. Upon final approval, the College publishes the new or revised curriculum change in the next Catalog.

At any step in the process, the reviewer can deny the proposal or return it to the proposer for further updates and changes.

DE courses follow the same curriculum review and revision procedure as courses delivered face-to-face. The College encourages all faculty members interested in teaching in a DE format to attend training for Laulima, the UH System’s collaborative learning environment based on the Sakai platform. The Educational Media Center (EMC) regularly offers additional training classes on effective online instructional design and online facilitation. For a discussion of the College’s compliance with the Accrediting Commission for Community and Junior Colleges (ACCJC)’s Distance Education and Correspondence Education Policy, see the Certification of Continued Institutional Compliance with Federal Regulations and Commission Policies.

The OIP and the faculty member who will lead a study abroad trip work together to select courses to offer to participating students during the trip. They select the host institution based on its ability to provide courses that are consistent with the College’s CLOs. The division offering the courses assesses the actual course content and CLOs in the program review process. Site visits by faculty and student evaluations conducted at the end of study abroad programs help the OIP determine the other components of the program, such as services, location, and housing.

The Language Arts Division offers ELI courses. Although the courses are noncredit, faculty developed the courses and followed the Curriculum Committee process for new course approval. ELI students receive eighteen hours of English instruction per week in reading, writing, listening, speaking, grammar, pronunciation, and U.S. culture. To meet the needs of students at all levels of English proficiency, the ELI offers four levels of instruction: beginning, low intermediate, high intermediate, and advanced. ELI faculty regularly assess these courses.

Continuous Improvement through Program Review
Faculty continuously improve instructional courses and programs through the annual program review process. All instructional programs follow the program review process regardless of the program type and delivery mode. Through program review of each academic program and educational unit, faculty evaluate a program’s relevance, appropriateness, currency, and achievement of learning outcomes. The program review process includes the assessment results of CLOs and PLOs as well as an analysis of demand, efficiency, effectiveness, and course and program completion data.
Analysis and Evaluation

Faculty ensure that the quality of courses, regardless of delivery mode, adheres to the College policies on curriculum development and review. Both new and revised curricula go through an extensive process to ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about faculty and curriculum development at the College. Participants discussed how the College meets Standard II.A.2 and how the College can improve in these areas. They said that the College has numerous faculty and curriculum development programs. The Teaching Excellence Program, the EMC training, assessment workshops, and workshops during convocation week are a few of the opportunities available for faculty professional development. For curriculum development, faculty use peer and student evaluations to make improvements. Faculty expressed a need for more professional development and more opportunities to collaborate with colleagues. Suggestions include online professional development, professional development at the Wai‘anae Moku Education Center, and more division-level opportunities (IIA-12, pp. 5-7).

II.A.3. The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution’s officially approved course outline.

Evidence of Meeting the Standard

Assessment of Learning Outcomes

The College has identified learning outcomes for all courses, programs, certificates, and degrees. The College established L5.210, Policy on Assessment, which requires systematic assessment of outcomes for all areas of the College, including the establishment of appropriate learning outcomes and other outcome measures, the administration of assessment tools, the analysis of results, and the use of such results to inform and improve instructional practices and institutional effectiveness (IIA-23). The Assessment Committee and the Office of Planning, Policy, and Assessment (OPPA) work together to ensure that all learning outcomes adhere to L5.210.

Faculty are responsible for developing, reviewing, and revising all learning outcome statements. The College’s L5.201, Policy on Curriculum Review and Revision, requires each division to ensure that all disciplines review and assess their courses at least once in a five-year cycle (IIA-13). This review must include an assessment of learning outcomes. If a course requires modification, faculty submit a modified curriculum proposal for discussion and approval using the process outlined in Standard II.A.2. The review process also helps the College identify which courses are obsolete and should be removed from the Catalog, which ensures that course offerings are current.
Below is the Assessment Committee’s course assessment status for 2017-2018 (see Table 50). The average total is 81 percent, which meets the College’s goal of 80 percent. In previous years, the College reported on course assessment for courses taught in the academic year. However, the reporting denominator did not include courses that were in the Catalog but not being taught. For the 2018 ACCJC Annual Report, the VCAA changed the reporting denominator to include all courses in the Catalog which led to a drop in the percentage in courses assessed from 90.4 percent to 81.2 percent (IIA-24). The VCAA asked all divisions to review courses listed in the Catalog for currency and relevance and to delete courses that are no longer taught.

Table 50.
Course assessment status for 2017-2018.

Faculty regularly assess learning outcomes at the course and program levels. The College conducts program reviews annually using the ARPD, which analyzes student attainment of PLOs as well as other factors such as demand, efficiency, effectiveness, and degree and/or certificate completion. Every four years, the College requires that each academic program, educational unit, and support area complete a Comprehensive Review and Evaluation (CRE). During the year that a program, unit, or area completes a CRE, it does not need to complete a separate ARPD since elements of the ARPD are included in the CRE.

In 2016, the College completed a CRE for the AA in Liberal Arts degree, which assessed the general education learning outcomes (GELOs) (IIA-25). The AA Degree Program Review Task Force submitted a report that provided information about the assessment of GELOs for written communication, critical thinking, and cultural diversity (IIA-26). Results indicated that 58 percent of students met or exceeded proficiency in written communication, 56 percent of students met or exceeded proficiency in critical thinking, and 30 percent of students met or exceeded proficiency in cultural diversity. Assessment results indicate that there is an overall need for improvement for these GELOs. Specific areas that need improvement are developing a perspective on an issue or problem, developing and gathering appropriate content and credible sources, and analyzing and evaluating an issue or problem.
To ensure ongoing assessment of the GELOs of the AA in Liberal Arts degree, the task force recommended to the Faculty Senate that writing-intensive instructors who participated in the study should review the results, discuss different strategies to make improvements, select and implement a strategy, and re-assess student learning in written communication and critical thinking. The task force also recommended that the College identify additional courses in the associate degree program that address cultural diversity and locate better assignments or student work to measure cultural diversity because the sample size was lower than expected. In 2017-2018, the AA degree task force revised the PLOs for oral communication, quantitative reasoning, information literacy, arts and humanities, and social sciences (IIA-27). The task force plans to assess the PLOs in the next academic year.

Learning Outcomes in Course Syllabi

All approved and current course outlines include learning outcome statements. In accordance with L5.201, all course syllabi, regardless of delivery mode, must include standardized and approved elements such as course title, description, learning outcomes, instructor contact information, course number, location, times, and relevant policies (IIA-13).

Students receive a course syllabus that includes learning outcomes from the College’s official course outline. Discipline and program coordinators and division chairs review syllabi for compliance with course outline requirements. The College expects all instructors to include approved learning outcomes in their syllabi and to provide syllabi to all students in their courses. Additionally, the VCAA reminds faculty at the beginning of each semester of the required syllabi content and the need to disseminate syllabi to students (IIA-28).

Analysis and Evaluation

Two established institutional procedures, the ARPD and the CRE, ensure the regular assessment and approval of learning outcomes for every course, program, certificate, and degree. Regardless of delivery method, students in every class section receive syllabi that include the officially approved learning outcomes. Discipline and program coordinators and division chairs review syllabi for compliance with course outline requirements each semester. In 2016, the College assessed three of the GELOs for the AA in Liberal Arts degree. Only 30 to 58 percent of students met or exceeded outcomes for the GELOs assessed, indicating a need for improvement. In their 2016 report on assessing the AA in Liberal Arts, the AA Degree Program Review Task Force made recommendations to Faculty Senate on strategies for improvement and is currently assessing the remaining GELOs (IIA-26).

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about course assessment and program assessment at the College. Participants discussed how the College meets Standard II.A.3 and how the College can improve in these areas. They said that all course syllabi contain the learning outcomes, which have been approved by the Curriculum Committee. Course assessments are on a five-year review process which ensures currency. Tk20 offers some challenges because it is not intuitive. Additionally, faculty seek sample assessment material and mentoring and support (IIA-12, pp. 7-9). For further discussion of Tk20 and outcomes assessment, refer to the College’s Quality Focus Essay.
II.A.4.

*If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.*

**Evidence of Meeting the Standard**

**Pre-Collegiate Level Curriculum**

The College offers pre-collegiate level curriculum in math, English, ELI, and English as a Second Language (ESL). Pre-collegiate courses are numbered below 100. College-level credit courses are numbered from 100-299. Pre-collegiate level courses go through the same curriculum approval and review process as college-level courses. Faculty are responsible for making decisions in regard to credit type, location, and delivery mode of pre-collegiate courses. The Catalog provides a complete listing of pre-collegiate level courses (IIA-29, IIA-30, IIA-31, IIA-32).

**Alignment of the Pre-Collegiate Level Curriculum and College-Level Curriculum**

The College provides students enrolled in pre-collegiate level courses with clear and efficient pathways so that they are able to learn the knowledge and skills necessary to advance to and succeed in college-level courses. The University of Hawai‘i Community Colleges (UHCC) system implemented the Acceleration Initiative at all seven campuses to alleviate success gaps and enhance the graduation rate for underrepresented students. This initiative is aligned with the *UHCC Strategic Directions 2015-2021*, UHCC Policy (UHCCP) 5.213, *Time to Degree: Co-Requisite*, and the College’s *Strategic Plan 2015-2021* (IIA-33, IIA-34, IIA-35). As part of the Acceleration Initiative, the College has accelerated learning tracks in math and English, which are designed to move students into college-level courses within one year. The College expects the initiative to increase college-level math and English completion rates and streamline the developmental math and English sequence. The Catalog provides descriptions of the available tracks (IIA-36).

Math and English faculty from each of the seven UHCC campuses participated in discussions in summer 2015 about course content and course numbering. The system formed an ad hoc committee for grading options to determine the appropriate grading options for co-requisite courses for math and English (IIA-37). Math and English disciplines implemented these system agreements by offering an appropriate number of course sections to meet the anticipated student demand.

Math and English faculty regularly collaborate to discuss curricula and frequently provide and participate in professional development activities so they can respond to student needs. At the College, English instructors in the Accelerated Learning Program designed and facilitated two summer workshops to address curricular and non-cognitive issues including accommodating students with special needs, integrating updated technological tools, and utilizing authentic learning to increase global, real-world application of learning outcomes. Developmental education instructors attend local as well as national conferences as part of their ongoing training and meet regularly to make decisions about their courses.
The ELI offers eighteen hours per week of English language instruction for international students who seek academic English preparation for college-level coursework and study (IIA-38). The mission of the ELI is to provide high quality ESL instruction and orientation in U.S. culture to international students, professionals, and other English language learners by means of an intensive English program (IIA-39). Additionally, the Language Arts Division offers 12 pre-collegiate ESL courses to meet the needs of beginning to advanced English language learners and prepare students for college-level courses (IIA-40). The courses are sequenced so that each course builds upon the linguistic knowledge and skills taught in previous courses.

**Evaluation of Student Progress and Learning in Pre-Collegiate Level Courses**

One of the strategic plan goals is to increase college-level math and English completion rates. Results of the fall 2016 cohort are very positive. For math, college-level completion rates increased by over 20 percent from fall 2013 to fall 2016 for students who placed one level below college level. In addition, eight percent of students who placed more than one level below college-level math completed a college-level math course (IIA-41). English college-level completion rates increased by over 40 percent for students who placed one level below college level. For students who placed more than one level below college level, there were no students who completed college-level English in fall 2013, whereas 38 percent completed college-level English in fall 2016 (IIA-41).

Pre-collegiate level courses go through the same assessment process as college-level courses. Since 2012, math faculty have assessed all CLOs for each developmental math course. The grading policy for each developmental math course requires that a student demonstrate proficiency in all CLOs in order to earn credit for the course. The overall results show that developmental math students have demonstrated acceptable levels of mastery of each CLO. Pre-collegiate level English courses are aligned with college-level English courses in agreed upon CLOs (IIA-42). Each semester, Accelerated Learning Program instructors engage in assessment of specific CLOs to assess English 22 sections in the program. Instructors assess these students’ pre- and post-writing samples and discuss changes to curriculum.

The developmental math and English programs go through the same program review process as all campus instructional and support programs. Results of the 2016 Remedial/Developmental Math ARPD indicate that the program is improving (IIA-43). Although the program did not meet all the UHCC System benchmarks, persistence and success rates from one-level below college level to college level showed an increase from the previous year. With the shortened course sequence and math pathways, which the College fully implemented in fall 2016, the developmental math program expects a more significant increase in persistence and success rates.

The 2016 ARPD developmental English results demonstrate significant improvements in the program (IIA-44). Retention for all levels of developmental English courses hold consistent at over 90 percent. Successful completion of the developmental English courses for students placing one-step below college level show an annual increase of three percent from 2013-2016, the period covered by the 2016 ARPD. Given the streamlined pre-college pipeline and curricular modifications to facilitate effectiveness, English faculty expect increases in persistence, retention, course completion, and subsequent student success for all who enter the College at the developmental level.
The OIP conducts the following three assessments and report results through the ARPD process: front desk inquiries, study abroad inquiries and applications, and international student applications. In 2016, the OIP staff resolved 87 percent of the front desk inquiries, which is a 42 percent increase in the satisfaction of the service provided. For study abroad, eight percent of the inquiries and appointments converted to study abroad enrollments; the low number is partly due to a canceled study abroad trip. Finally, 80 percent of the international student applications converted to enrollment in credit programs, which is a four percent increase from the previous year (IIA-45).

For ELI courses, ELI instructors conduct assessment and report results through the ARPD process. From 2013 to 2017, the ELI faculty assessed CLOs of all 16 classes offered in ELI at least once (IIA-46). The OIP also assesses the ELI’s program efficiency by looking at enrollment, data collected from ELI students’ enrollment in a credit program, and the percentage of ELI students who successfully complete ESL 21/22. At the end of each session, the OIP conducts a student survey for each student exiting the ELI program and uses the data to analyze and improve services. Faculty also analyze the persistence and completion rates of ELI students as well as the success rate of students exiting the ELI program and entering the degree program until their graduation and/or transfer (IIA-47).

ESL faculty regularly assess pre-collegiate ESL courses using multiple measures, including tests of students’ reading rates and comprehension, rubrics for multi-draft writing assignments, grammar pre-tests and post-tests, listening comprehension tests, and rubrics for oral presentations. To earn credit and advance to the next course in the sequence, students must demonstrate proficiency in all CLOs for the course. The course assessment results indicate that outcomes are consistently met. ESL faculty use data from course assessments to inform discussions of curriculum and student achievement in the sequence of ESL courses.

Analysis and Evaluation

Committed to open access and student success, the College recognizes the diverse needs of its student population by offering developmental education curricula that promotes acceleration to and preparation for college-level courses. Pre-collegiate level courses are numbered below 100 to distinguish them from college-level courses.

II.A.5.

The institution’s degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)

Evidence of Meeting the Standard

Policies and Procedures for Institutional Quality

The College follows practices common to American higher education in order to demonstrate the quality of its degrees and programs. L5.201 defines these practices (IIA-13). The policy requires each discipline to review its own courses once every five years “ensuring accuracy
of core outlines and their academic rigor, integrity and currency; and continued articulation of courses in the UHCC System, should that be the case” (IIA-13).

**Curriculum Review Process**
Faculty in the appropriate discipline use approved criteria to decide the breadth, depth, rigor, sequencing, time of completion, and synthesis of learning for a course. During curriculum review, faculty address specific questions on breadth, depth, rigor, and sequencing (IIA-20, IIA-48, IIA-49). To ensure the appropriate sequencing of courses, guidelines require in the absence of prerequisites that the proposer provide evidence that the skills learned earlier in the course are reinforced and enhanced by later activities (IIA-49).

To ensure that students complete courses in their program in a timely manner, the curriculum review process asks the proposer of a program to provide a program curriculum plan that lists all the courses and credits within the program (IIA-50). The program curriculum plan also indicates the suggested course sequence for students to take each semester to finish the degree or certificate within the planned length of the program. The Catalog includes the course sequences, which the College uses to define the pathways in STAR Guided Pathway Selection (GPS). To ensure that a program demonstrates a synthesis of learning, the proposer lists the PLOs of the program being modified or proposed (IIA-51).

A DE course follows the same curriculum review procedures as a face-to-face course but requires additional evidence to demonstrate that the course maintains rigor and breadth, pedagogical development, and technology integration through electronic delivery. The proposer must state the methods used to ensure timely and effective interaction that follows the College’s DE Guidelines (IIA-52, IIA-53). The proposer also must state the technological skills students will need, the academic support and technology training the instructor will need, and how the course will integrate and use technology (IIA-53, IIA-54, IIA-55).

After the proposer has provided supporting evidence that the course or program demonstrates breadth, depth, rigor, sequencing, time to completion, and learning outcomes, the proposer sends the course outline to the division chair. Next, the Faculty Senate Curriculum Committee reviews the course or program in subcommittees and then at regular meetings. During a meeting, members discuss the evidence provided by the proposer to evaluate whether the course or program represents high-quality and appropriate instruction as determined by the curriculum review guidelines. If the Curriculum Committee requires revisions, the subcommittee sends the proposal back to the proposer who makes the modifications necessary for approval. The Curriculum Committee chair sends approved proposals to the Faculty Senate for further approval (IIA-56, IIA-57). For a detailed discussion of the Curriculum Committee, see Standard IIA-2.

All degree programs require a minimum of 60 semester credits at the associate level including general education coursework. The College publishes degree programs and program requirements in the Catalog (IIA-58). Degree credits are consistent with levels of quality and rigor appropriate to higher education.
Analysis and Evaluation

To ensure the College’s degrees and programs follow practices common to American higher education, L5.201, Policy on Curriculum Review and Revision, has a well-established process on how to develop and revises curricula. This process includes specifically addressing issues related to length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. As identified in the Catalog, all degrees require a minimum of 60 semester credits.

II.A.6.  
*The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education.* (ER 9)

Evidence of Meeting the Standard

The College has made great strides with the development of program pathways and ensuring students can take the required courses needed for a certificate or degree in a timely manner. Beginning in 2013, the Catalog included two-year degree plans for most degrees, and with STAR GPS registration, all degrees have a preferred program pathway.

Course Scheduling Process

The College schedules courses in alignment with program pathways so that students can complete a degree or certificate program within a period of time consistent with established expectations for higher education. The Catalog includes program maps, or suggested courses by semester, for a student to take and earn a certificate and/or degree in a timely manner (IIA-59). In addition, the UH System uses STAR, a web-based tool that provides students with information about courses that they have completed and identifies courses that students still need to complete for a certificate or degree (IIA-60, pp.2-3). Students can see their progress towards degree completion by selecting the Academic Journey tab.

In 2016, the UH System designed and implemented STAR GPS, an online registration system, to show students which courses should be taken next to assist with their program completion (IIA-61). STAR GPS is a web-based tool that supports students in reaching their academic goals by tracking degree requirements, describing different pathways and majors, and charting progress toward graduation. If a student registers for an unnecessary course and/or takes a course out of sequence, STAR GPS notifies the student and recalculates the time to completion. For a more detailed discussion of STAR GPS, see Standard IIC.6.

In addition, STAR GPS has a dashboard available to administrators and division chairs. The dashboard, which is updated daily, shows any courses that are at capacity that students need to complete their program. It also indicates how many students have attempted to register for the course. This provides just-in-time information regarding which courses are in high demand so division chairs can add an additional section.

As an open access community college, the College regularly accepts students who require developmental education. Therefore, students may take longer than the prescribed two years to complete a certificate, degree, or academic goal. To address this issue, developmental
education efforts in math and English have moved into self-paced acceleration, which is discussed in more detail in Standard II.A.4.

Division chairs are responsible for creating the schedule of classes based on the needs of students (IIA-62). The College schedules classes to meet the needs of the diverse student population. Classes are held during the day, evening, weekends, at two locations, and through DE. Classes begin as early as 7:30 a.m. and end by 8:45 p.m.

**Evaluation of Course Scheduling**
The College uses data to evaluate the degree to which course scheduling allows students to complete each level of a course sequence or program. In fall 2016, the UHCC System provided all of the campuses with a course scheduling and space utilization evaluation with an outside consultant Ad Astra (IIA-63). The College’s evaluation indicated that the College was scheduling its classes in an appropriate manner. Classroom usage was relatively high, and class fill rates were also within an appropriate range.

STAR GPS is being designed to provide additional analysis on course scheduling and its impact on student completion rates. Currently, the dashboard provides just-in-time information on areas that need adjustment in the upcoming semester.

The Faculty Senate Alternate Class Schedule Ad Hoc Committee gathered and analyzed data from students, discipline coordinators, and faculty on the viability of shifting the College’s class offerings to a four-day schedule with 75-minutes classes primarily scheduled on Monday and Wednesday and Tuesday and Thursday. The analysis resulted in the Faculty Senate approving a motion that flexible scheduling be implemented in spring 2019 (IIA-64, IIA-65; IIA-66, pp. 5-6). This alternate schedule will still offer once-a-week lab classes on Friday. This motion is currently under advisement with administration.

**Analysis and Evaluation**

The Catalog includes program maps to help students earn a certificate and/or degree in a timely manner. In 2016, the UH System designed and implemented STAR GPS, a new online registration system to expedite program completion. The College offers DE, day, evening, and weekend classes at two sites to facilitate student success. Since the College regularly accepts students requiring developmental education, some students may take longer than the prescribed two years to complete a certificate, degree, or academic goal. The College is considering the implementation of flexible scheduling in spring 2019.

II.A.7.
*The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.*

**Evidence of Meeting the Standard**

**Students Assessed Below College-Level Math and English**
As an open-access institution, the College has more than 50 percent of currently enrolled students testing below college level for math and/or English. To address the situation, the
College has worked for several years to develop accelerated programs. The College scaled up these programs in 2016-2017 as part of the Acceleration Initiative, which is discussed in detail in Standard II.A.4.

Use and Evaluation of Delivery Modes
The College utilizes a wide range of delivery modes in order to meet the needs of its diverse student populations. These delivery modes are face-to-face, hybrid, and online. At the Pearl City campus, face-to-face courses account for 70 percent of all course offerings in a semester. The College has emphasized the development of DE courses and programs with 24 percent of course sections offered online and six percent offered in a hybrid format. The College also maintains the Wai‘anae Moku Education Center, which offers six percent of all of the College’s courses to meet the needs of this specific rural student population.

Faculty consider student demand, course fill rates, course evaluations, and other program and course review data to determine which modes are most effective for students and most appropriate for the program. In addition, some programs have identified the use of DE as the primary means of delivering the program’s courses. For example, the College’s AA in Teaching, the only associate degree of its kind in the UHCC System, delivers its program primarily through DE to meet the needs of students across the state interested in pursuing teaching (IIA-67). The Business programs have also found high demand for online course delivery. Finally, the College created the Health Information Technology program with online offerings as part of its development plan.

In 2017-2018, the UH System announced its intention to develop five-week online courses to target the working adults in Hawai‘i. Leeward will be taking a lead role in the development of this model due to its strong DE course offerings and support services (IIA-68).

Use and Evaluation of Teaching Methodologies
Faculty effectively use teaching methodologies to support the success of the College’s diverse student populations. Faculty in the appropriate discipline use approved criteria to decide each program’s breadth, depth, rigor, sequencing, time of completion, and synthesis of learning. During the curriculum review process, faculty address a course’s methods of instruction, a content area that appears in the KSCM database (IIA-69). Additionally, faculty have access to a variety of programs, tools, and committees dedicated to helping them adapt their teaching methodology to address students’ different learning styles. For a more detailed discussion of these professional development opportunities, see Standard III.A.14.

For those teaching DE courses, the DE Committee created a mandatory DE training session, which includes an instructor self-evaluation survey on practices used for interaction and collaboration with students (IIA-70). In addition, the DE Committee developed best practice guidelines regarding course design, interaction and collaboration, and learner support services and implemented the DE Liaison program to help faculty connect with campus resources and other colleagues who regularly teach online (IIA-52). In 2018-2019, the DE Committee plans to revise the DE peer evaluation form to provide feedback on regular and substantive interaction. The iTeach website provides professional development and learning resources to facilitate quality online learning (IIA-71). For further discussion of these professional development opportunities, see Standard III.A.14.
Leeward’s Innovation Center for Teaching and Learning focuses on providing quality workshops for instructional faculty for curriculum development, curriculum improvement, and access to new tools and resources (IIA-72). For example, in November 2017 the TGIF: Teaching Guidelines and Issues for Faculty workshop series conducted a workshop on teaching techniques and technology tips (IIA-73). For further examples of workshops for instructional faculty on teaching methodologies, see Standard III.A.14.

A recent faculty-driven initiative is Open Educational Resources (OER) and no cost textbooks courses. Faculty have participated in professional development workshops and work with the EMC faculty and librarians to identify, revise, or develop textbook resources for their courses that are no cost to the students. For further discussion of OER, see Standards I.A.3.

**Use and Evaluation of Learning and Student Support Services**

The College supports the success of all its students by identifying the diverse needs of its student populations and providing appropriate learning support services. The EMC provides resources for students in DE and face-to-face classes (IIA-74). For example, the EMC manages a website called iLearn that is dedicated to DE (IIA-75). Additionally, students have access to online tutoring support through the Learning Resource Center and through Brainfuse, an online tutoring service. The Pasefika Passion Pipeline aims to introduce Pacific Islander students to higher education and to support their success within the UH System (IIA-76, IIA-77). The Access to Education program at the Wai’anae Moku Education Center works with students who were formerly incarcerated and/or in recovery from substance abuse. When recruitment was first underway for this program, it became clear that many prospective students had not obtained a high school diploma, making them ineligible for financial aid and scholarships, so the Access to Education program assists the prospective students navigate these issues (IIA-78). The Wai’anae Moku Education Center temporarily suspended recruitment into this program at the end of 2017 with the resignation of the program counselor. See Standard IIB for more information on the College’s learning support services and Standard IIC for more information on the College’s student support services.

**Analysis and Evaluation**

The College continuously evaluates the effectiveness of all instructional delivery methods and teaching methodologies and adjusts accordingly to changing student needs through innovative educational programs and support services. The College’s wide variety of learning and student support programs demonstrates its commitment to support equity for all students.

II.A.8. *The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.*
Evidence of Meeting the Standard

The College does not use department wide course and/or program examinations.

The College provides students with opportunities to demonstrate competency and earn course credits through various options such as exams and portfolios. The College’s Prior Learning Assessment (PLA) Program identifies these opportunities (II.A-79, II.A-80). The PLA Manual Committee has met several times in 2017-2018 to continue updating the PLA Manual and PLA scoring guide (II.A-81). The PLA Manual Committee has met with the Counseling and Advising unit to inform them of the PLA process and options (II.A-79). In addition, the committee developed a portfolio-based assessment course on Laulima for any student in the UH System to earn course credit by documenting life/work experience. This course was part of a pilot project funded by the UH System office.

The pilot program for PLA uses a portfolio-based assessment course to award college credits for incoming students’ life experiences. The UH System has provided funding support for instructional faculty to develop portfolio-based assessment courses and assess the work submitted by students. The UH System also provides a stipend to students to fund the tuition cost of the course through a Perkins grant. The Teacher Education program agreed to pilot this new assessment method in spring 2017. The program faculty recruited 14 educational assistants from the Leeward area and had them attempt portfolio-based assessments for two education courses in the Certificate of Competence in Special Education. At the end of the spring semester, 13 of the students had successfully completed the portfolio-based assessment and earned credit for at least one of the education courses (II.A-82). These students are now enrolled in additional education courses and are on track to earn this certificate with some planning to work towards an AA in Teaching degree.

Analysis and Evaluation

The College does not use department wide course and/or program examinations. The College has processes in place to ensure reliability for prior learning assessments and continues to evaluate current procedures for effectiveness.

II.A.9.

The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)

Evidence of Meeting the Standard

Awarding of Credits, Degrees, and Certificates

The College awards course credits based on student attainment of learning outcomes. The College awards degrees and certificates based on student attainment of PLOs. Each instructor is responsible for assessing students’ success in meeting the learning outcomes in the approved course outline in KSCM. Instructors design evaluation methods such as exams, papers, and projects to measure student success in meeting these outcomes.

In addition,
instructors embed ongoing assessment of learning outcomes in each course. For detailed discussion of outcomes assessment, see Standards LB.2, II.A.3, and II.A.16.

The College ensures that academic credit hours awarded conform to the Carnegie Unit, which is a commonly accepted practice in American higher education and accepted by ACCJC. Course outlines, corresponding syllabi, and class schedules provide evidence that faculty assign an appropriate amount of work in order to conform to the Carnegie Unit. In addition, the College adheres to federal and state guidelines that define a course credit hour.

Policies on Awarding of Credits, Degrees, and Certificates

UHCCP 5.203, Program Credentials: Degrees and Certificates, sets graduation requirements for associate degrees and certificates (IIA-83). These requirements include the completion of 60 baccalaureate-level semester credits, the evaluation of the student's work, and the fulfillment of stated outcomes with a cumulative 2.0 GPA or higher for all courses needed to meet the degree requirements.

UHCCP 5.228, Credit Hour, guides the awarding of course credits, degrees, and certificates (IIA-84). The policy defines a credit hour as 50 minutes to one hour of class or faculty instruction and a minimum of two hours of work per week outside of class over approximately 15 weeks. Alternately, a credit hour can be earned through an equivalent amount of work for other activities such as DE instruction, laboratory work, studio work, and internships.

Analysis and Evaluation

The College awards course credit, degrees, and certificates based on student attainment of learning outcomes. UHCCP 5.203 sets graduation requirements for associate degrees and certificates that reflect accepted norms in higher education. The College academic credit hours awarded conform to the Carnegie Unit, which is a commonly accepted practice in American higher education and accepted by ACCJC.

II.A.10. The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)

Evidence of Meeting the Standard

Policy and Procedures on Transfer of Credit

The College adheres to Executive Policy (EP) 5.209, Student Transfer and Inter-Campus Articulation, regarding the transfer of classes from and to other UH System campuses. The policy states that students who have earned an articulated associate degree from a UHCC campus shall be accepted as having filled the general education core requirements at all other UH System campuses (IIA-85).
The College has transfer-of-credit procedures that it clearly communicates to its students. The UH System Course Transfer Database, searchable by students, includes course evaluations and equivalencies for UH System campuses and other institutions (IIA-86). Students receive notice of credit transfer policies from the Admissions and Records office, counselors, the College website, and transfer workshops held throughout the semester (IIA-87). The Catalog provides clear information for credit transfer (IIA-80). Options for prior learning assessment include credit by institutional exam, credits earned at foreign colleges and universities, college transfer credits, equivalency examinations, portfolio-based assessment, and non-collegiate sponsored education credit. Students can request a transcript review via the College website (IIA-88). The transfer information section in the Catalog provides information for students who are planning to transfer to a UH four-year institution or an institution outside the UH System. Additionally, the College website provides information on prior learning assessment (IIA-89).

The University of Hawai‘i at Mānoa (UH Mānoa) created a dual-admission, dual-enrollment program, Ka‘ie‘ie, for students who are pursuing a four-year undergraduate degree, but choose to begin their degree at Leeward CC or one of the other UHCC campuses (IIA-90). Ka‘ie‘ie focuses on students successfully transferring from UHCC campuses to the Mānoa campus while completing their academic degrees.

A similar transfer agreement, Mānanawai, exists with the University of Hawai‘i-West O‘ahu (UH West O‘ahu). This agreement provides for a smooth transfer between Leeward CC and UH West O‘ahu with a focus on dual-admission and dual-enrollment (IIA-91).

The College certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses when transfer credits fulfill degree requirements. When accepting transfer credits to fulfill degree requirements that fall outside of the UH System or articulation agreements, the College certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses by reviewing and comparing syllabi, which is normally done by academic advisors. When academic advisors are unsure, a transcript evaluation request form is sent to the appropriate division or discipline for review and determination.

Articulation Agreements
The College develops articulation agreements where patterns of student enrollment exist. The College has multiple articulation course and program agreements across the UH System (IIA-92). For example, students who complete the associate degree with an Academic Subject Certificate in Plant Bioscience Technology at the College may transfer as classified students to the Bachelor of Science in Tropical Plant and Soil Science at UH Mānoa (IIA-93). Students who complete the Associate in Science (AS) degree with a pre-engineering concentration at the College may transfer as classified students to the Bachelor of Science in Engineering at UH Mānoa (IIA-94). Similarly, students who complete the AA in Teaching degree at the College are eligible to apply to baccalaureate Teacher Education programs at UH Mānoa, UH West O‘ahu, and Chaminade University (IIA-95).
Analysis and Evaluation

The College provides clearly stated transfer-of-credit information from a variety of sources including the Admissions and Records office, counselors, the College website and Catalog, a course transfer database, and transfer workshops. A procedure is in place to ensure that learning outcomes for courses transferred to the College are comparable. To further facilitate student success, an associate degree from the College fulfills the general education core requirements at all other UH System campuses. Additionally, the College has multiple articulation course and program agreements across the UH System and with some private colleges.

II.A.11.
The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

Evidence of Meeting the Standard

Programmatic Learning Outcomes and Competencies in the Accreditation Standard

The College includes seven specific learning outcomes in all its instructional programs in addition to other program-specific learning outcomes. These outcomes, which the College identifies as GELOs, are critical thinking; technology and information literacy; oral communication; quantitative reasoning; arts, humanities, and sciences; cultural diversity and civics; and written communication (IIA-96). Each GELO is accompanied with a list of academic skill standards. Table 51 demonstrates how the College’s GELOs correspond to the competencies identified in this Accreditation Standard.

Table 51.
Alignment of GELOs and Competencies in Standard II.A.11

<table>
<thead>
<tr>
<th>GELO</th>
<th>GELO Statement</th>
<th>Competency in Standard II.A.11</th>
</tr>

</tbody>
</table>

All students in a degree program at the College must meet minimum general education credit requirements. This requirement ensures that all students are exposed to the College’s GELOs, which represent the minimum outcomes expected of students who have completed their general education experiences. Each course included in the general education curriculum should address at least one of that GELO’s academic skill standards.

**Assessment of Programmatic Learning Outcomes**

The course assessment process ensures that each course in the general education curriculum addresses at least one of the GELOs. In addition, courses are mapped to the PLOs and GELOs in Tk20. The College has focused mapping efforts on CTE programs and those courses that are most commonly taken for the AA in Liberal Arts degree. For an in-depth discussion of how the College assesses its GELOs through the AA degree, see Standard II.A.3.

Faculty establish CLOs for each course included in the general education core and assess them on a regular basis. CLOs demonstrate how the course meets competencies described in the GELOs. Course core outlines, which are located in the KSCM database, list the course CLOs (IIA-97). New courses as well as those that have already been designated as fulfilling a foundation or diversification requirement must demonstrate how they meet the hallmarks established for their respective designations. (See Standard II.A.12 for a discussion of these requirements.) In addition, foundations and diversification courses are subject to review by their respective review boards (IIA-98).
The College engages in a systematic evaluation of CLOs established for every course in the curriculum. This process ensures that the College is providing a high-quality education to students and that students are learning. Assessment of CLOs requires that assessors evaluate the collected data and use the results as a basis for change when indicated. Each instructional division and support area integrate course and program assessments into an annual ARPD. The ARPDs are instrumental in making campus wide decisions pertaining to resource allocation as well as ensuring a high quality of education. For further discussion of the assessment of CLOs, see Standards I.B.2, II.A.3, and II.A.16.

**Analysis and Evaluation**

To meet the minimum general education credit requirements at the College, all students must demonstrate competency in the areas of communication, information, ethics, analytic inquiry, quantitative reasoning, and the ability to engage diverse perspectives. The College ensures level-appropriate learning outcomes through the curriculum revision and review process.

II.A.12.  
*The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student’s preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.*

(ER 12)

**Evidence of Meeting the Standard**

**Rationale for General Education**

The College has a carefully considered general education philosophy that it publishes in the Catalog. This philosophy asserts that “general education provides students the opportunity to develop understandings, abilities, values, and attributes which enable them to apply the knowledge, skills, and talents to make judicious decisions and analyze and solve human problems within a multicultural community” (IIA-96). The College adheres to UHCCP 5.200, General Education in All Degree Programs, and Regents Policy (RP) 5.213, General Education (IIA-99, IIA-100).

**General Education and Degree Requirements**

The College’s rationale for general education serves as the basis for inclusion of instructional courses in the general education core curriculum. All degree programs at the College require a component of general education. The College divides its general education core requirements into two categories: foundations and diversification. The foundations requirement is intended to give students the skills and perspectives that are fundamental to undertaking higher education. Courses in the foundations category are in written communication, symbolic reasoning, and global and multicultural perspectives. The diversification requirement is intended to ensure that students have a broad exposure to
different domains of academic knowledge, while at the same time allowing flexibility for students with different goals and interests. Courses in the diversification category are in the arts, humanities, and literature; social sciences; and natural sciences.

In order to graduate with an associate degree, students must also fulfill focus requirements that identify important additional skills and discourses necessary for living and working in diverse communities. Students must complete five courses with the focus designation. These include two classes designated as writing intensive and one class in each of the following three focus requirements: Hawaiian, Asian, and Pacific issues; contemporary ethical issues; and oral communication.

Faculty determine the appropriateness of each course in the general education curriculum to ensure breadth of knowledge and promote intellectual inquiry. In order to ensure rigor in the general education requirements, the College maintains six faculty-led curriculum boards to review and analyze applications for courses to receive the appropriate designation: Foundations Focus Board; Diversification Focus Board; Writing-Intensive Focus Board; Hawaiian, Asian and Pacific Focus Board; Ethics Focus Board; and Oral Communications Focus Board. Each board reviews and approves courses in its respective area according to specified hallmarks and learning outcomes. Five of the six curriculum boards maintain a website that publishes information on its application process, hallmarks, and list of designated courses (IIA-101, IIA-102, IIA-103, IIA-104, IIA-105). The Faculty Senate General Education Committee reports to the senate on the progress of these curriculum boards but does not manage the boards in terms of membership or function (IIA-98).

The Catalog clearly states the requirements for each associate degree and the courses included in the general education curriculum for each associate degree. The College offers a wide range of general education courses through DE.

- The structure of the AA in Liberal Arts degree is explained in the Catalog (IIA-106). Graduates must have 12 credits in foundations, 19 credits in diversification, and five focus courses. The Catalog lists the qualifying general education courses (IIA-107).
- The AA in Hawaiian Studies degree is comprised of 31 credits of general education core and 3 credits of graduation requirements. The remaining 26 credits of the AA in Hawaiian Studies degree focus upon core and elective Hawaiian studies requirements (IIA-108).
- The AA in Teaching degree is comprised of 25 credits of general education core requirements and 15 credits of graduation requirements. The remaining 22 credits of the AA in Teaching degree focus upon core and elective education course requirements (IIA-109).
- All AS and AAS degrees require a component of general education. Each program determines program requirements that include at least 15 credits of general education requirements that typically include 3 credits of arts/humanities/literature, 3 credits of natural science, 3 credits of social science, and 3 credits of oral communication. The Catalog lists the courses that meet general education requirements for these degrees and specific degree requirements for CTE programs (IIA-110).
- The AS in Natural Science degree is comprised of general education core requirements of 29 to 33 credits and concentration requirements for the remaining credits up to 60 credits (IIA-111). The program provides a pathway for students
planning to transfer into a Science, Technology, Engineering, and Math (STEM) program at UH Mānoa.

General education courses in specific disciplines support the institutional learning outcome for values, citizenship, and community and can be used to satisfy a general education requirement. Philosophy, global studies, political science, and education courses focus on ethical principles. Psychology, sociology, communication, and speech courses focus on civility and interpersonal skills.

Anthropology, Asian studies, theater, East Asian language and literature, Hawaiian studies, and humanities courses support cultural diversity. Art, music, dance, drama, literature, and history courses provide students with historical and aesthetic sensitivity.

American studies, political science, interdisciplinary studies, and women’s studies courses emphasize civic, political, and social responsibilities. These courses provide students with opportunities to develop as ethical and global citizens.

Through relationships with partner entities abroad, the Office of International Programs brings short-term groups of students to the College, which provides direct interaction opportunities for Leeward students with their counterparts from another country and culture. These short-term programs include maximum interaction for students from both institutions and learning experiences about each other’s cultures. Through partnerships with host institutions for study abroad programs, the College offers students the opportunity to live and study in another culture. As students gain experiences along the continuum of global competency, from coursework at home to study abroad, they become increasingly more successful with intercultural interactions and more culturally sensitive (IIA-112).

**Analysis and Evaluation**

The College requires a substantial component of general education in all of its degree programs. Foundation, diversification, and focus requirements help students develop in the areas of written and oral communication; symbolic reasoning; ethics; global and multicultural perspectives; the arts, humanities, and literature; social and natural sciences; and Hawaiian, Asian, and Pacific Issues. Faculty expertise on the diversification, foundations, and focus boards determines appropriate courses for the general education curriculum and ensures levels of quality and rigor appropriate to higher education.

II.A.13.

*All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.*

**Evidence of Meeting the Standard**

All degree programs at the College require focused study in at least one area of inquiry or established interdisciplinary core. Faculty identify specialized courses in an area of inquiry or
interdisciplinary core based on learning outcomes, competencies, and mastery of key theories and practices within the field of study at the appropriate certificate or associate degree level.

Of the 15 associate degrees offered, four are identified as transfer programs: the AA in Liberal Arts, the AA in Hawaiian Studies, the AA in Teaching, and the AS in Natural Science. Each of these degree requirements includes general education courses, elective courses in a chosen field, and graduation requirements. CTE degree programs include a specialized focus of study depending on the career track alignment.

As noted in Standard II.A.12, the Catalog clearly states the course requirements for each associate degree. In addition to the general education requirements, program faculty design the program curriculum based on CLOs and ensure the PLOs will be met at the appropriate competency level. CTE faculty design their programs to include stackable certificates such as the Certificate of Competence and the Certificate of Achievement. Students develop higher-level competencies and mastery of key practices as they move through the certificates to the associate degree. An example of this is the AAS in Automotive Technology. Students can earn a Certificate of Competence in the first 15 credits and a Certificate of Achievement in 30 credits. The remaining 33 to 34 credits take students beyond the introductory courses and into a mastery level of automotive competencies with the earning of the AAS in Automotive Technology (IIA-113).

**Analysis and Evaluation**

Within the College’s degree programs, students concentrate on a field of study or discipline grounded in relevant learning objectives, theories, principles, and applications. The College’s programs all require focused study in at least one area of inquiry or in an established interdisciplinary core. Each of the 15 associate degrees’ requirements include three major parts: general education courses, electives in a chosen field, and graduation requirements. The 11 CTE associate degree programs all include a specialized course of study depending on the career track alignment.

II.A.14.

*Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.*

**Evidence of Meeting the Standard**

The College ensures that students who complete CTE certificate and degree programs will be able to meet employment standards and licensure and certification as required in their field of study. The College offers credit-based CTE certificates and degrees in 12 program areas (IIA-59). These areas are accounting, automotive, business technology, culinary arts, digital media, health information technology, information and computer sciences, integrated industrial technology, management, plant biology and tropical agriculture, television production, and substance abuse counseling. Additionally, OCEWD offers noncredit certificates in seven industry categories. These categories are business and professional studies, computers and technology, education and career planning, healthcare and caregiving services, healthcare technology, industrial technology, and transportation (IIA-114).
The College determines technical and professional competency levels and learning outcomes based upon national standards and input from industry representatives. Faculty who are experts in their field teach credit and noncredit courses to prepare students for today’s competitive job market (IIA-115). The College hires CTE and OCEWD instructors based on their educational credentials in the field and/or related industry work experience based on their level of education credential. For example, all Accounting program faculty meet minimum hiring requirements of a master’s degree in accounting, a master’s degree in business administration including 18 credits in accounting, or a bachelor’s degree and three years of related work experience in accounting. All Automotive Technology program faculty meet minimum hiring requirements of a bachelor’s degree in automotive engineering or industrial education, an associate degree and five years of related work experience, or 15 college credits and seven years of related work experience, which are the minimum qualifications for faculty positions. For a detailed discussion on the minimum requirements for faculty positions, see Standard III.A.1.

All noncredit courses offered through OCEWD have learning outcomes that undergo the same assessment process as credit instructional courses. Outcomes are based on national standards or state certification for certain industry licenses. Some of the programs that base outcomes on national standards are Medical Billing (American Medical Billing Association Standards), Pharmacy Technician (Pharmacy Technician Certification Board Standards), and Medical Coding (American Health Information Management Association Standards). Some of the programs that base outcomes on state licensure requirements are Nurse Aide, Adult Residential Home Care, and Commercial Motor Vehicle (IIA-116).

OCEWD assessment of outcomes follows the same process as assessment of course outcomes for credit programs. Faculty use exams, quizzes, projects, and other assessment instruments to measure outcomes as the student progresses through the course. Additionally, a capstone assessment is generally a standardized test. Course, instructor, and program evaluations take place at the completion of each course.

The College has two types of CTE and workforce development programs: those that are reviewed by an external accrediting agency and those that are not. Table 52 indicates the accreditor for credit and non-credit programs that have an external accrediting body.
Table 52.

The above accrediting agencies have specific competencies for students to achieve. The faculty in these programs integrate these competencies or learning outcomes in the curriculum and develop a process to evaluate the students through various assessments such
as quizzes, exams, group projects, research papers, and hands-on activities to ensure that they have achieved the required competencies.

The College verifies that career-technical disciplines maintain currency of employment opportunities and other external factors. All 12 CTE credit programs offer cooperative education, externship, internship, or practicum courses that integrate academic preparation and career interests with work experience. CTE and workforce development programs that do not have a programmatic accrediting agency consult with industry employers and professional organizations to develop knowledge and skills that are relevant to the workplace.

All 12 CTE credit programs and the Industrial Technology noncredit program have advisory committees made up of industry representatives. These programs schedule between one to two advisory committee meetings per year to develop learning outcomes, assess technical and professional competencies, update course content, recommend equipment and curriculum changes, provide feedback on program reviews, validate program direction and vision, provide current labor market demand, and discuss emerging industry needs. Minutes of advisory committee meetings are available within each program.

Analysis and Evaluation

The College implements a variety of measures to facilitate success for graduates completing career-technical certificates and degrees. Both the credit and noncredit programs hold regularly scheduled advisory committee meetings to discuss learning outcomes, assess technical and professional competencies, recommend equipment and curriculum changes, provide feedback on program reviews, validate program direction and vision, provide current labor market demand, and discuss emerging industry needs. All credit and noncredit CTE programs offer some type of cooperative education, externship, internship, or practicum courses that require evaluative feedback and input by the participating employers. Four of the credit programs hold external accreditation. All OCEWD workforce noncredit certificate programs are recognized by their respective industry association.

II.A.15.
When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

Evidence of Meeting the Standard

The College has a policy and procedures regarding program elimination such that enrolled students are able to complete their education in a timely manner with a minimum of disruption. RP 5.201, Instructional Programs, states, “Provisional and established programs deemed out-of-date or nonproductive based on a program review or other internal assessments may be terminated by the president” (IIA-117). Additionally, “Commitments to students already officially enrolled in such programs shall be met and limited for up to two years for associate degrees at community college programs and four years for baccalaureate degrees. No new program admissions shall take place.”
The College notifies students of the program elimination and modifies the registration system to not allow future students to enroll. However, current students can continue their studies and complete the degree for up to two years after the program’s elimination.

The College clearly communicates to students procedures for program elimination. Counselors notify students when their certificate or degree program is being eliminated and advise them on their option to continue in the program if they can complete it in two years. Counselors also provide other possible majors that are available if students want to change majors.

In 2013, the UHCC System modified UHCCP 5.203, Program Credentials: Degrees and Certificates, to eliminate the Certificate of Completion and identify all certificates with 4 credits to 24 credits as the Certificate of Competence (IIA-83). This change prompted the College to review all Certificates of Completion and Competence and make decisions regarding modifying or eliminating certificate programs. In 2014-2015, the College converted 17 Certificates of Completion to Certificates of Competence and eliminated four Certificates of Completion. As noted in the summary document, 2012-2017 Program Eliminations, the program faculty continually review program curriculum and eliminate programs that are no longer in demand or not in alignment with current program outcomes (IIA-118).

**Analysis and Evaluation**

In the event of programmatic change or dissolution, the College follows established policies and procedures to ensure that students receive the necessary information. The College makes appropriate arrangements so enrolled students may complete their education in a timely manner with minimum disruption.

II.A.16.

*The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.*

**Evidence of Meeting the Standard**

**Evaluation of Instructional Courses and Programs**

The College regularly evaluates the effectiveness of all its courses and programs through its program review process regardless of location and delivery mode. UHCCP 5.202, Review of Established Programs, requires instructional programs to complete an ARPD, which the College uses for its program review (IIA-119). The ARPD is an assessment of a program’s demand, efficiency, effectiveness, DE, degree and certificate completion, transfers, how the program met the Perkins IV Core Indicators from the previous year, how the program met the College’s Performance Measures, and other relevant factors. The UHCC website makes available completed reports (IIA-120).
Credit and noncredit programs with external accrediting bodies as indicated in Standard II.A.14 go through an annual review process, midterm report, self-evaluation and site visit during each accreditation cycle. The external accrediting bodies require additional information, such as licensure and job placement rates.

All instructional programs, including collegiate, pre-collegiate, career-technical, and continuing and community education, consistently follow the program review process. The criteria used in program review include relevancy, appropriateness, currency, achievement of learning outcomes, and planning for the future. The ARPD report requires an analysis of the previous year’s performance and the current year’s data in terms of demand, efficiency, and effectiveness. As a result of this analysis, program coordinators create an action plan for the coming year and determine resource implications based on the action plan (IIA-121). The ARPD directly informs program resource requests and helps unit heads and administrators to prioritize requests. Once every four years, the College requires every program to complete a CRE that includes the ARPD data from the previous three years (IIA-122). For more information about the ARPD and the CRE, see Standards II.B.5 and II.B.9, respectively.

**Continuous Improvement of Instructional Programs**

The results of program evaluation guide institutional planning, and programs have improved as a result of program evaluations. The College uses data and analysis accumulated in the ARPDs, CREs, and Perkins Performance Indicators Data to implement necessary improvements. For example, the Waiʻanae Moku Education Center ARPD identified plans to improve pass rates by requesting funding for additional student tutors and peer mentors (IIA-123). In 2016-2017, the institutional prioritization list ranked this request second, which resulted in the College allocating appropriate resources to fulfill those plans (IIA-124).

The Perkins Performance Indicators Data that is provided by the UH Institutional Research Office and complied in a table format by the College’s dean of career and technical education provides a means to compare and analyze various indicators between the CTE programs at the College and can also compare similar programs across the UHCC campuses (IIA-125, IIA-126). This report identifies where each program met or exceeded the performance standards and where it did not; this is based on the benchmarks established by the state CTE director’s office. For 2016-2017, four of the six performance standards exceeded the state standard, one performance standard was met at 99.6 percent, and one performance standard was met at 82.6 percent (IIA-125).

Program faculty use the Perkins Performance Indicators Data to make improvements in their programs. For example, the Management program was not meeting the standard for the 2P1 indicator of completion of certificates and degrees since 2008-2009. Therefore, the program created and offered a two-semester certificate of achievement of 30 credits in fall 2012. After several years of students becoming better aware of this step-laddered certificate that leads to the AS degree, the Management program exceeded the standard of 2P1 in 2016-2017.

**Analysis and Evaluation**

The College annually evaluates collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location.
The College uses the ARPD and CRE to systematically improve programs and courses to enhance learning outcomes and achievement. As improvements are made, the College conducts the evaluation process again to ensure the improvements had the intended result.

II.B. Library and Learning Support Services

II.B.1. The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)

Evidence of Meeting the Standard

Leeward Community College supports student learning and achievement by providing numerous library and learning support services under the Academic Services area (IIB-1). These services include library collections and instruction, learning centers and tutoring, disability services, computer laboratories and technical assistance, and testing services. At the Pearl City campus, the three-story Learning Commons building provides a user-friendly space for students, faculty, and staff to access the Library; Kapunawai, the Hawai‘i-Pacific Resource Room; the Learning Resource Center (LRC), which includes the LRC Content Tutoring Center, the Writing Center, and the Kākoʻo ‘Ike Program for disability services; the Help Desk; and the Test Center. The Learning Commons also provides resources including desktop, laptop, and tablet computers; printing, copying, scanning, and charging stations; individual study carrels; and group study rooms (IIB-2). At the Waiʻanae Moku Education Center, the Student Resource Center and adjoining offices provide a number of learning support services (IIB-3).

The College provides comparable library and learning support services to students and appropriate personnel regardless of service location or means of delivery, including distance education (DE). As Table 53 indicates, comparable services are available at the Pearl City campus; the Waiʻanae Moku Education Center; and online, via phone, or at other University of Hawai‘i (UH) locations.
Table 53.

</table>

In addition to the library and learning support services units provided by the Academic Services area, the College has the Math Lab, which the Mathematics and Natural Sciences Division coordinates, and the grant-funded The Hub (Leeward Student Help Desk), which the Information and Computer Science program coordinates.

Library Services
The Library is open a sufficient number of hours to meet the needs of campus students ([IIB-4](#)). During the two weeks before final exams, the Library remains open later to accommodate students and hosts a variety of special sessions ([IIB-5](#)). Since the College’s last institutional self-evaluation in 2012, the Library increased its Monday through Thursday operational hours by seven hours per week (13.7 percent) and its Friday operational hours by two hours per week (4.7 percent). According to the 2017 Library User Survey, 93 percent of students (n=129) agreed that they were satisfied with the Library’s hours, indicating that the hours of operation at the Library are sufficient in quantity ([IIB-6](#)).

The Library’s collections of print and video materials are located at the Pearl City campus ([IIB-7](#)). Students can hold or request items at another library in the UH System through an online intra-system loan request and items can be routed to the Pearl City campus or Wai‘anae Moku Education Center ([IIB-8](#), [IIB-9](#)). Students can retrieve items from the Pearl City campus Library Circulation Desk or at the Wai‘anae Moku Education Center by selecting their pick-up location ([IIB-10](#)).

Students and campus personnel can remotely access the Library’s digital collections 24 hours a day through the Library website, which includes the Hawai‘i Voyager online catalog, 141 electronic periodical databases, online guides, electronic books, and relevant websites ([IIB-11](#)).
Library faculty and staff have an established collection development process to ensure that the library collections are sufficient in quantity, currency, depth, and variety to support educational programs. Librarians are assigned subject areas with the responsibility for selecting materials using criteria that include relevance to the curriculum, perceived demand, availability and currency of existing holdings, cost, and access (IIB-17, IIB-18). The Library solicits recommendations for materials from instructional faculty through direct contact, at division and program meetings, and using an online request form as well as initiates limited-time trial access to new online research databases and other electronic resources for evaluation by faculty and staff (IIB-19, IIB-20). The Library collects feedback and uses it along with the Collection Development Policy guidelines to select and acquire new electronic resources (IIB-21). Collections maintenance is key to providing relevant and current materials. Periodically, materials are de-selected and withdrawn based on the criteria that apply to new purchases plus other factors such as wear and usage (IIB-18).

The Library has updated but not expanded its collection of print materials at the Pearl City campus. The total book volume count declined by 2.3 percent between 2012 and 2016 while print periodical titles declined by 33.5 percent. During the same period, electronic book titles increased by 37.7 percent, and electronic journal titles increased by 120 percent. In 2015, 75 percent of the Library’s total resource expenditures supported online resources, and in 2017 the Library had nearly 70 database subscriptions (IIB-22, IIB-23, IIB-24).

Library faculty and staff support student learning and achievement by providing library services to students and instructional faculty. At the Pearl City campus, library faculty and staff provide in-person assistance at the circulation desk, reference desk, and Kapunawai during regular hours of operation. At the Wai`anae Moku Education Center, library faculty provide in-person reference services at least twice a week and when requested by Wai`anae Moku instructors. Library faculty and staff provide comparable library services to all Leeward students using email, phone, text, and online chat (IIB-25). They communicate with instructional faculty by attending division and discipline meetings, serving as librarian subject liaisons, and maintaining a weblog (IIB-17, IIB-26).

Library faculty provide ongoing instruction for students. In 2015-2016, they scheduled 301 classroom sessions reaching 4,868 students at the Pearl City campus and the Wai`anae Moku Education Center (IIB-22). Sessions focused on library resources, information literacy, search techniques, and researching skills. They use active learning techniques including group activities, “flipped” classrooms, and peer-to-peer learning. According to students who were surveyed in spring 2017, 83.7 percent agreed that these library sessions increased their ability to do research and use library resources (IIB-6).

**Learning Support Services**

Faculty and staff in the learning support services units have an established evaluation process to determine whether their services are sufficient in quantity, currency, depth, and variety regardless of location or means of delivery.

**LRC Content Tutoring Center**

The LRC Content Tutoring Center operating hours are sufficient to accommodate students (IIB-27). The LRC assists students with content courses across the curriculum. The content tutoring is sufficient in quantity, currency, depth, and variety. Each semester, students use tutoring in approximately 50 to 60 courses (IIB-28). In 2016-2017, the LRC provided 1,299 individual tutoring sessions to 472 students and 653 group visits by 194 students with each individual student’s attendance at a group counting as one visit. For example, one meeting of a group of five students would count as five visits. As these figures indicate, many students are repeat users of LRC tutoring. This fact, as well as consistently positive feedback from students, indicates they value this service.

The LRC encourages tutors to meet with instructors for the courses they support so that they are familiar with instructors’ expectations and requirements. The LRC also encourages instructors to add course tutors to their Laulima sites (online course management system) so that tutors can view current assignments. Since the College offers many courses online and some students seldom come to campus, the LRC also offers online tutoring for some courses in addition Brainfuse, a commercial online tutoring service. In spring 2018, content tutoring was available through Skype for 11 courses (IIB-29). Students can make a tutoring appointment in person, by phone, or online from the LRC website.

The LRC offers tutoring for diverse subjects in business, computer skills, languages, humanities, social science, and sciences. Most content tutoring is one-to-one, but the LRC offers various group sessions, including popular weekly language conversation groups led by native speaker tutors or volunteers; review sessions before exams for some social science and science courses; and large workshops on science success skills led by teams of science tutors.

The LRC offers drop-in and in-class tutoring for a wide range of courses. In addition to tutoring appointments, drop-in help is available for general computer skills and a few other subjects during most of the Center’s operating hours. Students who are new to college, especially nontraditional students, find this service especially helpful. The LRC also provides study space, including a small group study room, success skills handouts, and videos (IIB-30, IIB-31).

**Writing Center**

The Writing Center provides learning support to develop writing, reading, and college success skills and works with faculty to provide support in the Writing Center as well as in instructional classes. Students can work with writing consultants on class assignments for any class, scholarship essays, grammar review, reading comprehension, critical thinking, placement and exam preparation, time management, learning strategies, critical thinking, and annotation skills.

The Writing Center’s scope of services and current hours are sufficient in quantity, currency, depth, and variety in meeting the needs of campus and DE students (IIB-32). For example,
During each semester in 2016-2017, the Writing Center provided services in a variety of modes to more than ten percent of all enrolled students assisting them with success skills development and assignments from approximately 100 courses representing every division. In response to student and faculty demand, writing consultants (peer tutors) worked with students in more than 400 workshops. Feedback from both students and faculty has been consistently positive (IIB-33). During the two weeks before final exams, the Writing Center offers additional workshops and extended hours (IIB-5).

The Writing Center offers its services in a variety of modes of delivery. Students can work with writing consultants in person in the Writing Center both individually and in groups, by phone, and online with Skype on either a drop-in or an appointment basis. Students’ use of the Writing Center’s drop-in availability for “just-in-time” support has averaged 45 percent of all Writing Center sessions for the last three academic years. The Writing Center website includes an online option to schedule appointments to support DE and on-campus students (IIB-32). Writing consultants facilitate workshops focused on specific writing, reading, and college success skills and, upon request from instructors, provide direct curriculum support during class sessions with in-class workshops. The Writing Center coordinator regularly confers with instructional faculty regarding sessions and workshops. Under the Writing Center’s coordination, faculty and staff present campus workshops on writing skills, success skills, and campus resources (IIB-34, IIB-35, IIB-36).

Kāko‘o ‘Ike Program
The Kāko‘o ‘Ike (KI) Program provides a range of support services for students with disabilities (IIB-37). The program’s name means “support for learning” and the program strives to enable students with disabilities to maximize their independence. Services include pre-admission counseling, classroom accommodations, assistive technology, exam proctoring, and alternative text formats. The KI staff consists of two disability specialists and several student employees, called paraprofessionals, who are available to answer questions regarding KI services, schedule appointments, and provide students with assistance on how to use KI technology services. The staff makes adjustments to staffing in order to accommodate exam proctoring for students attending evening classes.

A disability specialist visits students at the Wai‘anae Moku Education Center every other week of the fall and spring semesters. The schedule of visits, which is posted near the counselors’ office, is responsive to students’ needs. When requested, a disability specialist visits the Wai‘anae Moku Education Center during the summer session to assist students.

In 2016, the KI Program had a total of 252 students, and in 2017 the population increased to 260. In 2016-2017, the KI Program had a total of 46 requests for note taker services. The program was able to provide note takers for 36 out of the 46 requests (78 percent). For unfilled note taker requests, KI staff advised students to record their lectures in order to access the information that their instructor shared in class. In 2016-2017, the KI Program had a total of 15 requests for alternative text and one request for an American Sign Language interpreter and filled 100 percent of those requests (IIB-38).

The KI Program is currently updating its intake procedures and workflow to include the electronic distribution of accommodation letters directly to instructors. This new distribution
method will be used to notify course instructors of appropriate accommodations for students whether the course is taught face-to-face or through DE.

**Tutoring at the Student Resource Center, Wai‘anae Moku Education Center**

At the Wai‘anae Moku Education Center, tutoring services in math and English are available in the Student Resource Center during hours that ensure that services are available at convenient times for students.

Tutors work with students on a one-to-one or one-to-two ratio. During high traffic hours, this ratio may increase to one-to-five with students sitting at computers working on writing or math assignments while the tutor works individually with each student. There is one math tutor integrated into each math class. In these classes, the instructor and tutor are able to provide assistance on a one-to-six to one-to-ten ratio. The Student Resource Center hires additional tutors based on an instructor’s request to assist in other subject areas such as Hawaiian studies, philosophy, and psychology. For these classes, the ratio of tutors assisting students is approximately one-to-five. The low ratio of tutor to students and long hours of operation allow tutors to provide students with sustained, in-depth assistance. Students can request as many sessions as needed, with each session lasting anywhere from five minutes to two hours, thus ensuring quality and consistency of tutoring services.

The Student Resource Center hires tutors through recommendations from the math and English instructors based on appropriate class performance and interpersonal communication skills. The Center hires content course tutors as needed. For example, in fall 2016 and spring 2017, the Center hired Hawaiian language tutors to work closely with the instructor; the tutors were available prior to classes to help students. Furthermore, content instructors provide a training orientation and serve as site supervisors to help monitor quality of work and to be available to help tutors troubleshoot any challenges they may encounter when assisting students. When tutors were asked to evaluate their training and supervision, 95 percent of tutor respondents (n=87) rated their training and supervision as “excellent” with the remaining 5 percent rating their support as “good” (IIB-39).

Over the past five years, the Wai‘anae Moku tutoring team serviced approximately 40 percent of students enrolled in math and English classes, and in some semesters they serviced as many as 56 percent of the students enrolled in these classes. In fall 2014, the Office of Planning, Policy, and Assessment (OPPA) examined the impact that these tutors have had on student success. While the sample size for English tutors was too small to make a clear conclusion, the sample size and success rates of tutored and non-tutored students in Math 22 and Math 103 were large enough to conclude that students who worked with the math tutors were more likely to succeed in a math class (IIB-40).

In 2014, the Community College Survey of Student Engagement (CCSSE) results indicated that 79 percent of respondents from the Wai‘anae Moku Education Center (n=34) felt that tutoring was important (IIB-41, Item 13.3d). In student evaluations collected through math and English classes from spring 2012 to fall 2016, 95 percent of student respondents who used tutoring services consistently rated the tutors as useful. When asked what the tutors did well, students indicated the following: effectively teach specific technical skills, explain concepts and instructor feedback in understandable ways, demonstrate patience, build
trusting relationships, and coach specific mindsets such as staying calm in the face of stress and anxiety, not giving up, and feeling confident in one’s abilities (IIB-39).

**Brainfuse Online Tutoring**
The College provides additional tutoring for its DE students, Early College students, and those who are unable to obtain services at the Pearl City campus or the Wai‘anae Moku Education Center. Students can obtain live tutoring and writing assistance in numerous academic subjects through Brainfuse, a professional online tutoring service that is contracted through the University of Hawai‘i Community Colleges (UHCC) system and available to students through a link from their MyUH Services portal (IIB-42, IIB-43). The UHCC System’s contract with Brainfuse expires in August 2018, so the system has convened a multi-campus committee to review options for continuation or replacement of this service.

**Online Learning Academy**
All UH System students have access to the UH Online Learning Academy, which provides free online peer tutoring in math, English, and science (IIB-44). This service provides an additional resource for DE students and Early College students to get off-campus support.

**Help Desk**
The Help Desk supports students, faculty, and staff experiencing computer or network-related problems at both the Pearl City campus and the Wai‘anae Moku Education Center’s Student Resource Center (IIB-45). Help Desk staff are available to assist via phone and email. At the Wai‘anae Moku Education Center, a lab assistant helps students with computer and laptop use. The Help Desk conducted a satisfaction survey in 2017 that indicated that 98 percent of respondents were highly satisfied (n=414) with the services provided (IIB-46). Additionally, the UH Information Technology Services Help Desk provides phone and email support (IIB-47). Students using the UH System course management system Laulima are able to submit an assistance request from the login page (IIB-48).

The Help Desk provides computer support services for on-campus events such as Geek Day, the Career and Technical Education Business Fair, and the Hawai‘i Strategy Institute. The Help Desk also offers installation and assistance with campus-supported hardware and software, relocation of computer equipment and peripherals, and Voice Over Internet Protocol telephone set up. Additionally, the Help Desk staff works closely with the Wai‘anae Moku Education Center’s information technology staff to resolve computer and network issues.

**Test Center**
The Test Center at the Pearl City campus provides students with Accuplacer placement testing and proctoring services. These services include online and written tests for DE courses, make-up exams for campus courses, and out-of-state DE tests (IIB-49). Effectiveness indicators show a consistent 94 percentile of high satisfaction with the hours of operation for the past three years (IIB-50). The Test Center user survey conducted in 2017 demonstrated that students are highly satisfied with the Test Center’s atmosphere, the service provided by the staff, and the timely and efficient manner in which staff administers exams (IIB-51).
Testing Center, Student Resource Center, Waiʻanae Moku Education Center
The Testing Center at the Waiʻanae Moku Education Center provides students with Accuplacer placement testing and proctoring services. These services include online and written tests for DE courses and make-up exams for campus courses. Students attending the Pearl City campus can arrange with their instructors to use the Waiʻanae Moku Education Center for testing. Likewise, Waiʻanae Moku students may also seek services at the many UH System test centers throughout the state (IIB-52).

Math Lab
The Math Lab at the Pearl City campus provides students with tutoring in math and quantitative methods. It also loans textbooks and calculators, provides access to computers and other learning tools, and offers the use of individual and group study areas (IIB-53, IIB-54). Tutors can assist students with math software such as ALEKS, MyMathLab, and MyStatLab. The Math Lab website provides resources to help students prepare for math placement testing (IIB-55).

The Hub
The Hub, Leeward Student Help Desk, provides Leeward students with technical assistance for their personal electronic devices including installing new software, upgrading hardware, removing malware, recovering passwords, troubleshooting network issues, and consulting on the purchase of computers and compatible accessories (IIB-56). The Hub also provides Leeward student interns who are majoring in Information and Computer Science (ICS) an opportunity to gain troubleshooting experience, networking skills, and customer service skills as they work independently.

Since its inception, The Hub has served many students in different capacities by holding several events. For example, at a “WiFi Passthrough” event, interns set up a table outside the cafeteria to help students set up the WiFi in their devices so their computer or mobile device automatically logs into the UH System network on any of the ten campuses. Students appreciate this service and learn about The Hub’s services and location. The Hub is funded by the Trade Adjustment Assistance Community College and Career Training Grants and implemented by the U.S. Department of Labor’s Employment and Training Administration (IIB-57). In order to provide ICS student interns with a more realistic work environment, a manager supervises student employees, assigns duties and responsibilities, and coordinates a work schedule. The Hub Handbook, written by the first group of student interns under the guidance of ICS faculty, codifies its policies (IIB-58).

Analysis and Evaluation
The College’s commitment to student learning and achievement is clearly demonstrated by its variety of quality learning support services for students, faculty, and staff. These services include the Library, the LRC, the KI Program, the Help Desk, the Test Center, the Math Lab, and The Hub. Services are available at the Pearl City campus, the Waiʻanae Moku Education Center, and online or by phone. Technical assistance and testing services are also available at other UH System locations.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College’s Library and learning support services.
Participants discussed how the College meets Standard II.B.1 and Eligibility requirement 17 and how the College can improve these services. They said that the Library has a thriving information literacy program and resources that are current and available to both face-to-face and online learners. Tutoring through the LRC and Writing Center is comprehensive and well utilized by students. The growth of dual-enrollment programs with high schools brings the additional challenge of providing those students access to the library and tutoring services. Also, online students need more access to tutoring (IIB-59, pp. 9-12).

During the roundtable discussions, the following issues were brought up regarding the KI office: increased communication, collaboration between the KI office personnel and instructional faculty, and training regarding procedures on how students access disability services. As a result, the KI staff plans to create a training program for faculty and staff to include a certification component. Initially, the training module will be presented in person but eventually be accessible to faculty online.

II.B.2. 
**Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.**

**Evidence of Meeting the Standard**

**Library Equipment and Materials**
The College relies on library faculty and staff, along with the consultation of instructional faculty, to select and maintain the Library’s materials and equipment and apply technology to enhance access. Through these efforts, the Library enhances the achievement of the College mission by providing a variety of accessible materials and equipment that promote the effective use of scholarly information and student learning.

The Library’s materials include books, periodicals, online resources, and audiovisual media as part of six collections with general and special access guidelines. Access to the Library’s online resources is available through the Library website (IIB-11). In February 2017, the Library held 74,442 print books, periodicals, microfilm pieces, and audiovisual items. Through a combination of consortia agreements and individual purchases, the Library provides access to 53 databases, 30,537 streaming videos, 29,766 e-journals, and 147,053 e-book titles (IIB-60, IIB-7).

Each of the library faculty is assigned to specific instructional divisions and is responsible for engaging in ongoing discussions with faculty from those divisions about needed resources for students and suggestions for the purchase of books, periodicals, and audio/visual materials (IIB-17, IIB-19). Library faculty also select resources based on their knowledge and expertise in subject areas, professional library journals and book review sources, publisher alerts and catalogs, course syllabi review, and by helping students find materials for their research. Library faculty identify new electronic resources as potential resources supporting subject areas or disciplines. The Library initiates limited-time trials and promotes them to faculty through general announcements, blog posts, attending division meetings, and word-of-mouth communication. The Library solicits and uses faculty feedback for decision-making about acquisitions (IIB-61, IIB-62).
The Library provides students use of 65 desktop computers and 30 wireless laptops with a networked suite of office software as well as 30 iPads. Students can also use two scanners and three printers that are connected to the library print system (IIB-63). Students are able to study in two rooms with table seating for groups up to four. Student feedback is essential to maintain a student-centered learning environment, so the Library gathers feedback during annual online user surveys and through point of experience survey tablet devices (IIB-6, IIB-64). Librarians review survey responses and identify user needs. The Library acquired or implemented mobile device printing, digital scanning, additional power options, mobile device charging stations, and authenticated computer use to support student technology needs. Modification of furniture layout and new uses of space helps support a variety of learners and their needs (IIB-65). Library faculty attending professional conferences bring back ideas for new products and services (IIB-66). The Library also relies on its relationships with the other UH System campus libraries for ideas for learning space improvements. Meetings of the UH Library Council, consisting of library directors, is another forum for the exchange of ideas. Library staff interactions with students also inform the acquisition of new technology. For example, based on students’ requests to improve the reservation process for booking group study rooms, the Library implemented an online reservation system in January 2018. Students can now view room availability and book rooms online.

Annual user survey results show that 96 percent of students indicated that they usually find enough books from the Library’s collections and articles from the library databases to meet their class needs (IIB-67). When asked if the computer resources in the Library contribute to their success at the College, 100 percent of students responded in the affirmative (IIB-67). While the annual survey is a useful tool and satisfaction rates are routinely in the upper 90 percentile range, the number of responses is relatively modest (n=145) because it is completed on a voluntary basis (IIB-6). The Library subscribes to the SurveyApp online point of experience customer satisfaction platform to collect ongoing feedback. Timely feedback allows the Library to immediately respond to issues or problems. The Library also engages students in a more informal manner to gather feedback. In fall 2017, librarians positioned a mobile whiteboard in a highly trafficked area with the question “What do you think we need in the Library?” and encouraged students to write their wish list items on the board (IIB-68). As a result, the Library recently purchased comfortable bean bag chairs for students.

**Learning Support Equipment and Materials**
The College relies on learning support services professionals to select and maintain educational materials and equipment to support student learning and enhance the achievement of the College mission.

**LRC Content Tutoring Center**
The LRC Content Tutoring provides students with four desktop computers that are connected to the Learning Commons print system. All computers include standard MS Office software, and one includes Adobe software used in Digital Art and Digital Media courses. To support DE as well as on-campus students, the LRC website provides access to the online scheduling software TutorTrac, which allows students to schedule tutoring appointments (IIB-69). The website features information about tutors, subjects tutored, and other LRC events and services; a study skills materials section of the website is currently under development (IIB-
The LRC also provides a comfortable study area and a small group study room that fits up to seven people.

The LRC Content Tutoring Center is operated by a faculty coordinator with 27 years of experience in the center and ten years of prior instructional experience. The coordinator communicates frequently with instructional faculty, whose students the center serves, to ascertain what materials and equipment are needed to support students. Examples of requests from faculty that have been supported include a microphone that French students can use to record their voices and tablets that computer programming students can use for their work. The LRC also purchased a short-throw projector that is used during tutor training and that tutors can use for group sessions, especially in the language conversation group meetings. The Information Technology Group (ITG) maintains and replaces the LRC computers. All of the LRC’s materials and equipment enhance the achievement of the College mission by providing students with a high-quality education and support for them to advance their educational goals.

Writing Center

The Writing Center’s learning-centered layout, equipment, and resources support student learning and enhance achievement of the College mission. The Writing Center provides a comfortable study area for both individual and group study, and the Writing Center’s six desktop computers, which are connected to the Learning Commons print system, are situated to provide space for collaborative study. The Writing Center has one desktop computer on a wheelchair-accessible table; that computer is equipped with the adaptive software Dragon Naturally Speaking and Kurzweil 3000 and is attached to a scanner. The Writing Center added the assistive technology software and scanner in 2017.

Students participating in the Writing Center’s focused workshops use the Writing Center’s iPads to move through and, as needed, refer back to the workshop material. The writing consultants and Writing Center coordinator created and continue to update these workshops, which include opportunity for collaborative practice of reading, writing, and college success skills to foster student learning and engagement in keeping with the College mission. Student feedback has been consistently positive. For example, in 2016-2017, student feedback averaged 4.9 on a 5.0-point scale that the workshops benefitted them academically or personally.

The Writing Center provides writing, reading, and success skills handouts and online resources. The writing consultants regularly incorporate the handouts and use the Writing Center’s staff laptops to refer to the online resources in sessions and workshops. These writing consultants often use the online resources in phone and online sessions. The Writing Center coordinator works with the writing consultants, reviews session and workshop data and feedback, and consults with instructional faculty to update and add to these handouts and online resources. For example, the Writing Center added its latest online resource, a grammar guide, to the Writing Center website in fall 2017. The Writing Center coordinator reviewed student feedback and session data and worked with the writing consultants to develop this resource. She also sought feedback from writing faculty regarding content and worked with the ITG to add a user-friendly menu to make the resource more accessible for students.
Kāko‘o ‘Ike Program
The KI Program has four low-distraction assistive technology computer workstations to support student learning. The workstations are equipped with computers and scanners that offer adaptive software including Dragon Naturally Speaking, Kurzweil 3000, JAWS, Zoomtext, and CCTV. The office provides a large number of informational handouts about success skills for college students, teaching strategies for faculty, and disabilities information for the public. KI staff are available to consult with faculty when they have questions about appropriate accommodations for students with disabilities.

Help Desk and Test Center
The ITG manages and maintains the Help Desk and Test Center, both of which support student learning through their various roles. The ITG also purchases computers for the College Computer Labs classrooms, which can be used for all instructional programs with priority given to Information and Computer Science and Business Technology courses that require computers (IIB-72). Computers in a few classrooms are configured and purchased according to program specific software needs; the remaining classrooms have a basic minimum hardware configuration (IIB-73, IIB-72). The Help Desk is staffed by one full-time employee and student employees (IIB-45). The Help Desk provides quotes to Pearl City or Wai‘anae Moku faculty and staff for faculty and staff or student use computers and recommends computer systems based on the minimum hardware requirements needed (IIB-74).

The Test Center has 44 computers available for students to take placement tests and proctored online and written exams. The Test Center offers placement tests to incoming students and returning students as well as to students who are required to take a placement test for out-of-state colleges. Other proctoring services include make-up exams for campus face-to-face courses, UH System DE online and written exams, and out-of-state DE online and written exams (IIB-49).

Math Lab
Math faculty work directly with the Math Lab to ensure the lab provides students with the support they need to be successful in math classes. The lab provides internet access to computer-based programs used in all math courses. The lab has 29 computers and 9 laptops for students to use while doing course work and receiving assistance from tutors (IIB-75). The lab also has study areas where students can work individually or in groups. To help students with their studying, the Math Lab provides formula sheets ranging from algebra to calculus. Students can also borrow graphing and scientific calculators and current and previous editions of math textbooks. The math discipline continually reviews current textbooks to maintain course content and relevance. When math faculty adopt new textbooks, the math discipline gives multiple copies of the textbook and solution manual to the Math Lab. The solution manual provides students with step-by-step solutions to help them gain a better understanding of how a problem should be solved.

The math lab manager reviews and updates supplemental handouts, which include formulas, conversion tables, and procedures on topics that are common problem areas for students. In addition, the lab manager maintains scientific and graphing calculators as well as the TI-Nspire CASE, which provides students with a deeper understanding of abstract concepts. Since all math courses require computer-based homework, the computer room in the Math
Lab underwent remodeling in 2017 as part of the Acceleration Initiative. The College upgraded the computers and furniture in the Math Lab to provide students with more computers and additional work space. All of the services provided by the Math Lab, including its materials and equipment, help strengthen students’ math ability and understanding, which enhances the College’s achievement of its mission.

The Hub
The ICS program coordinates The Hub, which is staffed by student interns enrolled in the program’s credit-based cooperative education course (IIB-56). From its inception, The Hub has relied on the expertise of ICS faculty. To enhance the achievement of the College mission, The Hub provides an in-house internship opportunity that benefits students in need of free technical support for their electronic equipment and provides ICS students with hands-on job experience to prepare them for the workforce.

The Hub interns, managers, and supervisors select and maintain standard, up-to-date equipment and materials most commonly used in the industry in order to provide a service to Leeward students that supports their learning. Given the diversity of electronic equipment that college students use, The Hub has equipment to diagnose and fix a variety of mobile devices ranging from phones, tablets, laptops, and desktops. Student interns also fix monitors and storage devices such as hard drives and flash drives. The Hub has tools and hardware to use for general repairs as well as a basic computer repair kit and more advanced kits.

Student Resource Center at Wai‘anae Moku Education Center
The Wai‘anae Moku Education Center provides students with equipment and materials to enhance their learning experience. The study and testing center includes student workspace and a computer testing room. The previous testing center had 5 desktop computers while the new facility has 15 computers. The new computer lab/classroom has 30 desktop computers whereas the previous location had 17 computers. The facility also has 25 laptops available for students to borrow as well as handouts on various topics such as handling test anxiety, taking notes, and learning study techniques (IIB-3).

Analysis and Evaluation

Library, support services, and instructional faculty and staff collaborate to select and maintain educational equipment and materials that best address students’ learning needs to enhance the College mission.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and learning support services. Participants discussed how the College meets Standard II.B.2 and how the College can improve in these areas. They said that the Library, LRC, Math Lab, Writing Center, Help Desk, and Test Center all meet students’ needs. They have appropriate and sufficient equipment and materials. The College will continue to inform new faculty and new students about the campus resources (IIB-59, p. 12).

II.B.3.
The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes
Evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

Evidence of Meeting the Standard

Academic Services units evaluate the Library and learning support services to ensure that they are meeting the needs of students, faculty, and staff. Each unit uses a variety of methods to assess its support area outcomes (SAOs) and learning outcomes when appropriate. (For further discussion of the assessment of SAOs, see Standard LB.2.) The Library and all learning support services annually submit a program review by completing the Annual Report of Program Data (ARPD) to report on a unit’s demand, efficiency, and effectiveness.

Evaluation of Library Services

The Library regularly evaluates its services through multiple mechanisms to ensure that it adequately supports student learning needs and contributes to the attainment of outcomes. The Library conducts an ARPD to assess its performance, which includes assessment of learning outcomes (IIB-76). In 2016, the Library updated its mission and learning outcome 2 and converted the previous goals to support area outcomes (IIB-77). The Library also identified measurements for attainment of the learning outcomes (IIB-78).

The Library uses the Information Literacy Exam to assess students in English 100 and English 24 for learning outcome 1 (IIB-79). Results show that 2,006 students completed the exam for English 100. The average score was 81.6 percent and the pass rate was 93.4 percent. The average score increased by 1.4 percent and the pass rate increased by 1.6 percent from the previous year. The Library revised the information literacy tutorials in 2013. In January 2016, the Association for College and Research Libraries Framework for Information Literacy released new standards for information literacy instruction in higher education, so a revision of the existing tutorials is necessary to align the information literacy program with the new standards (IIB-80). In 2017, the instructional librarian coordinated an assessment of learning outcome 2 using 63 anonymized research papers collected from English 100 instructors. The assessment revealed that just 67 percent of the papers achieved learning outcome 2 (IIB-81). Based on this information, the instructional librarian changed the English 100 library instruction to devote additional time to teaching citations.

The Library conducts and posts its annual survey of Leeward students, faculty, and staff and uses the results to improve services and resources, including new print and online collections, furniture, laptops/computers, chat reference services, databases, and headsets (IIB-6, IIB-65). For example, excess noise was an ongoing concern for library staff, and survey comments revealed that noise was a concern for students too. In response, the Library designated quiet and silent study spaces (IIB-82). Survey results show that 95 percent of students indicated that they feel comfortable being in the Library (IIB-67). Additionally, the Library requested and received $20,000 in additional funds for electronic resources that enabled the Library to acquire and/or subscribe to more resources and content (IIB-83).

The Library regularly maintains usage statistics including circulation, gate counts, database usage, reference requests, circulation requests, and library instruction sessions (IIB-22, IIB-84). The Library compiles these statistics and adds them to the UH Library Council Annual Report, which includes data from all UH System campus libraries. The comparison of
Leeward’s data against the two-year campuses is a useful measure of how well the College is doing and helps to justify resource requests (IIB-85). For example, the total library expenditure was $14 to $15 per full-time student from 2012-2015. This was substantially lower than the UHCC average of $27 per student. Reallocation of the Library’s budget to purchase more online databases plus an additional $20,000 from the College for resources has closed the spending gap from 33 percent to six percent in three years.

**Evaluation of Learning Support Services**

The LRC regularly evaluates its services through multiple mechanisms to ensure it adequately supports student needs and contributes to the attainment of SAOs and learning outcomes. The LRC conducts an ARPD to assess its performance (IIB-86). According to the LRC 2016 ARPD, although the number of students served has shown little increase, the number of tutoring sessions increased by 12 percent, indicating an increase in repeat sessions. Demand for Writing Center services remained steady in both breadth and depth, and writing consultants worked with students taking courses from every division on campus.

The LRC maintains statistics on its tutoring sessions and workshops and uses student surveys for additional feedback (IIB-86). With continued high enrollment, expanded/diversified services, and the attractive setting of the Learning Commons, demand for both LRC and Writing Center services remain strong. Student responses to the CCSSE indicate a growing demand for tutoring and increased perception of its value (IIB-87, Items 13.1d, 13.2d, 13.3d). Additionally, tutors give students a feedback form at the end of every tutoring session for students to provide anonymous feedback on the session (IIB-88).

The LRC’s Content Tutoring Center and Writing Center assess two learning outcomes for tutoring, comparing pass rates and persistence rates for students who have used tutoring services with other students in the same course who have not used tutoring. For example, the success rate of students using individual tutoring in summer 2015, fall 2015, and spring 2016 was 82.1 percent. In contrast, the success rate of students who took the same course and did not use tutoring was 72.8 percent (IIB-86). As shown in the ARPD, this learning outcome has been met consistently. The other learning outcome that focuses on how tutoring contributes to student learning is new and will be included in the next ARPD. After each tutoring session, students complete a feedback form that includes questions addressing these learning outcomes. In 2015-2016, 100 percent of the students who attended an individual content tutoring session (n=1,165) agreed that the tutor improved their understanding of the subject and that the session was a positive and helpful experience. In the same academic year, 100 percent of the students who attended an individual writing session (n=2,228) agreed that the writing consultant helped them to improve their writing and/or their understanding of the work discussed. They also agreed that working with the writing consultant helped them plan how to work independently on their essays (IIB-86). As a result of the positive feedback from students, the LRC Content Tutoring Center and the Writing Center will continue to provide and assess diverse, peer-delivered academic support services that meet current student and campus needs. Student feedback from individual sessions and group in-class workshops demonstrates high levels of engagement and satisfaction as students interacted with writing consultants.

To ensure that they are meeting students’ needs, the KI Program regularly evaluates its services in a variety of ways: student and faculty surveys; data collection on student visits to
the KI office; percentage of filled accommodation requests; and satisfaction surveys. The KI Program ARPD uses this information to assess and analyze its performance and plan for future directions for the program. The efficiency and effectiveness of the KI Program have mostly remained consistent between fall 2013 and fall 2016. Between spring 2015 and fall 2016, overall student satisfaction declined from 92 to 85 percent. A possible explanation is that beginning in fall 2015, the College employed only one faculty disability specialist, so some students may have had longer waits to receive some services. The second disability specialist position has since been filled. In an ongoing effort to improve services, the KI program is developing a survey for faculty to provide specific data on faculty perception of the program’s effectiveness in providing information and support.

The Math Lab regularly evaluates its services through student surveys to ensure that it is meeting its mission to develop students’ proficiency in math (IIB-89). The lab also gathers statistics on tutoring sessions, computer use, and textbook and calculator loans (IIB-90). Since the Math Lab is under the Mathematics and Natural Sciences Division, it has neither SAOs nor completes an ARPD. However, the lab manager provides the developmental math coordinator with tutoring contact data to include in the developmental math ARPD’s action plan and resource implications (IIB-91). Although the results for the Math Lab evaluations are positive, the number of students being tutored is declining. To address this issue, the lab manager visits math classes in the beginning of the semester to inform students of the availability of the Math Lab and the resources it provides. The lab manager also continuously promotes the lab by reminding instructors to encourage students to visit the lab if they need assistance or a convenient place to study.

The Test Center conducts an ARPD to assess its performance and its SAOs. The center regularly surveys students, faculty, and staff about their satisfaction with computer lab services, equipment, and furniture. The assessment results of the SAO to provide high-quality testing services to students and members of the community indicate that 90 percent of respondents found that the center’s services are highly satisfactory. Additionally, 94 percent found that the center’s hours meet the needs of students (IIB-92).

Although the Help Desk does not assess SAOs, the Help Desk surveys both students and faculty to confirm that it meets students’ needs. Help Desk satisfaction surveys indicate that users are satisfied with the services provided. Out of 414 surveys collected in fall 2016 and spring 2017, 98 percent of respondents indicated satisfaction with the services received from the Help Desk (IIB-93).

The Hub has served many students. In 2016, The Hub serviced 315 computer-related problems. The Hub received 184 service calls in spring 2016, 16 calls in summer 2016, and 115 calls in fall 2016 (IIB-94). In spring 2016, The Hub assisted 185 students at a “WiFi Passthrough” event. In spring 2016, The Hub also set up a satellite help desk in the Library where interns assisted 70 students with computer or printing problems on site (IIB-94). To ensure that it adequately supports student customers, The Hub evaluates its services through a customer satisfaction survey and keeps written surveys on file (IIB-94). An example of how The Hub uses evaluation results to make improvements concerns the open sign. A customer commented, “The Hub open sign is not too visible, especially for the students with disability. You need a sign that is more visible and appealing to students.” To address this
problem, The Hub purchased a light-emitting diode sign so all students can easily locate The Hub.

Every two years, the College uses the CCSSE to assess learning support services. Specifically, the survey examines how satisfied students are with campus services and their educational experience. The survey also examines how engaged students are in their classes, in extracurricular activities, and with the faculty, campus staff, and their peers. Student engagement is closely related to persistence and achievement, so the CCSSE results help the College develop a clearer picture of its students. Average benchmark scores have improved continuously since the College first administered the survey in 2008 (IIB-95, IIB-87). These scores suggest that the College is making strides in improving student learning and achievement. Among the CCSSE indicators, many students identified that the College provides support to help them succeed and that they use campus computers for their academic work. In addition, students indicated that they are somewhat satisfied with the services that the College provides (IIB-87, Item 13.2).

**Analysis and Evaluation**

To ensure adequacy in meeting student needs, the College uses a variety of assessment tools including information literacy exams, surveys, usage data, feedback forms, student satisfaction, and the CCSSE to evaluate the Library and learning support services. The Library, LRC, KI Program, and Test Center conduct ARPDs to assess their performance. The ARPDs include the assessment of outcomes in order to make correlations between services and their impact on learning, and the Library, LRC, KI Program, and Test Center use these assessment results as the basis for improvement.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about program review for the Library and learning support services. Participants discussed how the College meets Standard II.B.3 and how the College can improve in this area. They said that the Library and LRC provide students with the academic help, support, and coaching to help students more successfully understand and meet learning outcomes for the different courses they are enrolled in. The Library may consider developing assessment tools that measure effectiveness in terms of quality rather than quantity. The Library already counts how many students they serve but has more difficulty in measuring how well they are served (IIB-59, pp. 12-13).

II.B.4.  
When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution’s intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)
Evidence of Meeting the Standard

The College relies on collaboration with other institutions and other sources for library and learning support services. These services and resources are adequate for the College’s intended purposes, are easily accessible, and are utilized.

The Library is part of the UH Library Council. This group is formally recognized with bylaws adopted in 2003 and is comprised of head librarians from the ten UH System campuses (IIB-96). It is responsible for the purchase and implementation of a system wide shared library integrated management system, Hawai‘i Voyager, which facilitates library lending operations, collection management and utilization, cross-campus library usage, and system wide resource sharing (IIB-8). The UH Library Council subscribes to the Primo Discovery cross-platform research system and the SFX link resolver system.

The Library is part of the Hawai‘i Library Consortium that includes members from academic, public, private, and special libraries in Hawai‘i (IIB-97). Through this consortium, the Library purchases full-text, web-based databases suitable for academic libraries such as Opposing Viewpoints, Issues and Controversies, and the Kanopy streaming video service.

The Library has contracts for services and resources including a variety of full-text, web-based, non-consortia databases that are individual to the College. The Library subscribes to the web-content platform LibGuides used by librarians to post webpages on particular topics. Additionally, the Library has contracts with the Pharos library printing system and 3M security gates.

The LRC, including the Writing Center, contracts with TutorTrac, a database program used for logging services and recording tutoring appointments (IIB-98).

The KI Program contracts with either Isle Interpret or Hawai‘i Interpreting Service for American Sign Language services depending on which service has the lower cost and also contracts with Access Text Network and various publishers for alternative text needs. The KI office is a member of the Association of Higher Education and Disability, which provides training and guidance on best practices for providing services to students with disabilities. As a member of this organization, the KI Program has access to training materials, journals, and professional resources (IIB-99). The annual conference allows KI staff to meet and collaborate with disabilities specialists from other institutions and gain knowledge about changing trends in the field of disability services. Both of the College’s disability specialists are active participants in a national listserv made up of other individuals at various higher education institutions. The listserv provides the opportunity to discuss issues and receive updates on changes to disability laws and regulations. On a bi-annual basis, the KI staff participates and attends a disability service providers meeting held at the University of Hawai‘i at Mānoa. During this meeting, they discuss issues surrounding disability services within the UH System, the community, as well as those trending nationally.

The College contracts with Accuplacer, a placement assessment that measures academic skills in order to place students accurately into math or English classes. The College, as part of the UHCC System, contracts with Brainfuse, an online tutorial system.
The College ensures security by the use of Fortinet Security subscription to protect the campus network. The Fortinet firewall monitors and protects the campus network from virus, malware, intrusion, and attacks from the internet. The proactive monitoring of the networks allows the College to find and remove any potential system that might compromise the computer environment on the campus network. In addition to network security, all College computers have installed a suite of anti-virus, anti-malware, and anti-ransomware software.

The College regularly evaluates the quality and effectiveness of its collaboration with other institutions and contractual agreements for library and learning support services.

**Analysis and Evaluation**

The College relies on collaboration with other institutions and other sources for library and learning support services. These services and resources are adequate for the College’s intended purposes, are easily accessible, and are utilized. The Library and learning support services certify, purchase, and maintain contractual agreements with other institutions to support student success.

II.C. Student Support Services

II.C.1. The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER 15)

Evidence of Meeting the Standard

Leeward Community College (Leeward CC) recognizes the importance of providing a broad range of student support services to ensure that students can meet their educational and career goals. The Student Services units include Admissions and Records, Counseling and Advising, Financial Aid, Job Prep Services, Recruitment, Student Life, the Student Health Center, and Mental Health Services. The University Health Services manages the Student Health Center under a memorandum of agreement between the University of Hawai‘i at Mānoa (UH Mānoa) and Leeward CC. A mental health counselor who is funded through this memorandum with the Counseling and Student Development Center at UH Mānoa staffs the Mental Health Services. The College has units that provide support services to specific student populations. These units include the Veterans Resource Center, the Hālau ‘Ike O Pu‘uloa (Hālau), and the Office of International Programs (OIP). For a description of each unit, see Standard II.C.3.

The College provides comprehensive student support services at its Pearl City campus, the Wai‘anae Moku Education Center, and the Office of Continuing Education and Workforce Development (OCEWD). The College also provides support services to high school students participating in its dual-enrollment programs such as Early College.

Alignment with College Mission

Student support services are aligned with the College mission and core values that include Open Access and Diversity and Respect (IIIC-1). As the student population has changed, the College has developed new student support services to meet student needs such as requiring mandatory advising, the development of the STAR Guided Pathway Selection (GPS) system, and integrating support services through technology with MySuccess, a software platform of the University of Hawai‘i Community Colleges (UHCC) System, the University of Hawai‘i-West O‘ahu (UH West O‘ahu), and the University of Hawai‘i at Hilo. The College created a mandatory New Student Orientation (NSO) in response to the needs of students who were unaware of services and to provide an initial support system for new students utilizing the MySuccess software. The College created the Veterans Resource Center to support its increasing veteran and active military population. The center provides a place for students to meet a designated counselor and receive assistance with Veterans Affairs benefits and services.

In support of the College’s commitment to Native Hawaiian students, Leeward established the Hālau as an academically rigorous and culturally relevant pu‘uhonua (place of refuge) that houses academic and student support programs to inspire excellence, promote growth, and advance opportunities for Native Hawaiians. The Hālau also serves all students, staff,
and faculty who wish to increase their knowledge of Hawaiian culture, language, and history (IIC-2).

The OIP supports and promotes communication and cultural exchange among local and international students of diverse backgrounds. The OIP recruits and hosts F-1 visa-holding students pursuing higher education in the United States. Through the OIP, the international student advisor informs fulltime students regarding their F-1 visa status and helps students understand and follow F-1 immigration rules and regulations. The OIP provides an orientation for international students, assists with determining each student’s initial English placement, helps students secure accommodations, and advises students continuously on academic, cultural, and practical concerns to support their success at the College (IIC-3, IIC-4).

Evaluation of Student Services for Quality
The College has regular evaluation processes in place to measure the quality of its student support services. Student Services units engage in several means of evaluation. The primary tool for evaluation is the Annual Report of Program Data (ARPD), which is part of the College’s Integrated Planning and Budgeting Process. The ARPD has common metrics to evaluate demand, effectiveness, and efficiency, which the units use to complete a narrative analysis of their unit, develop an action plan, and request resource needs. In the years that Student Services units complete a Comprehensive Review and Evaluation (CRE), they do not complete a separate ARPD because the CRE includes elements of the ARPD. The College requires each support unit to complete a CRE at least once every four years. Results of the Student Services’ 2014-2016 CRE show that the College is supporting students’ needs through a wide range of services (IIC-5). Demand, efficiency, and effectiveness indicators have either increased or remained constant. Student Services units have used the CRE to identify improvements for designated areas, and the College has included plans for implementation of some of the improvements in its resource allocations. A number of units have requested new positions. The Student Services area will need to reallocate vacant positions as they become available to ensure those areas with the highest needs receive additional support. For more information about the College’s ARPD and CRE, see Standards LB.5 and LB.9, respectively. For detailed discussion of the efforts made by the Student Services units to use assessment data for continuous improvement, see Standard IIC.2.

In an ongoing effort to address the needs of students, the College participates in Community College Survey of Student Engagement (CCSSE), which it administers every two years. Among CCSSE indicators, student frequency, satisfaction, and importance scores all appear to be remaining fairly constant over a three-year period (IIC-6, Items 13.1, 13.2, 13.2). Data also indicate that students view academic advising, career counseling, and financial aid advising as among the most important services that the College provides. The ARPD and CRE templates include CCSSE program quantitative indicators (IIC-7).

As an instructional support unit, the Hālau participates annually in the ARPD process and every fourth year in the CRE process (IIC-8). Like all other programs, the Hālau measures its demand, efficiency, and effectiveness using data from its participants in structured programs. Using a strategic enrollment management framework, Hālau staff developed programs such as Lanakila First-Year Cohort; Ho’oulu Career Development; Native Science, Technology, Engineering, and Math (STEM) Scholars; and Ke Ala ‘Ike that aim to deliver the “right
touch” in the “right dosage” at each stage of a student’s academic journey. The Hālau adapted the metrics for its review from the UHCC System’s metrics for student services programs; however, rather than reporting the outcomes of the general student body, the Hālau works annually with the Office of Planning, Policy, and Assessment (OPPA) to extract the performance of each metric by the program’s participants. Using this evaluation process, Hālau staff can annually reflect on the quality and effectiveness of each strategy and determine how they can alter its design, delivery, or resource commitment for improved effect.

The OIP submitted an ARPD in fall 2016. Since this unit is unique in the UHCC System, the unit identifies which data metrics to collect. In the ARPD, the OIP focused on an action plan for improving the evaluation of the office while maintaining the current level of services provided (IIC-9).

The Waiʻanae Moku Education Center regularly evaluates its student services through student surveys and student and faculty comments. It uses CCSSE results, which are disaggregated by location, in its evaluation and completes an ARPD to assess its performance and support area outcomes (SAOs) and to develop plans for improvement (IIC-10, IIC-11). The Waiʻanae Moku Education Center is halfway through a Title III grant (federal funding for Native Hawaiian serving institutions) that supports the implementation of a cohort program called Going to Finish On-Time. This cohort model has shown early success with strong completion rates of students. With the move to the new location, the faculty and staff are eager to serve more students and evaluate if this program continues to show success.

OCEWD evaluates its services annually and reports the results in the ARPD (IIC-12). The ARPD describes its assessment of learning outcomes and its alignment with the Strategic Plan 2015-2021. OCEWD has seen strong enrollment gains in its noncredit courses and programs. OCEWD conducts regular student evaluations to ensure the courses and programs offered are meeting the needs of its students.

Analysis and Evaluation

In keeping with its mission, the College has an annual assessment process to determine that student support services at various sites and delivered through different modalities meet students’ needs.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College mission and student support services. Participants discussed how the College meets Standard II.C.1 and Eligibility Requirement 15 and how the College can improve in these areas. They said that the Student Services units provide needed services to Leeward students. Student Services may not be evident to students, though, so roundtable participants recommended a one-stop shop for services like the one provided by the Hālau. They also said that Student Services units should continue to find ways to communicate the resources available to students (IIC-13, pp. 13-15).

II.C.2.
The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those
outcomes. The institution uses assessment data to continuously improve student support programs and services.

Evidence of Meeting the Standard

Assessment of Learning Outcomes for Student Services Units
The Student Services units engage in assessment and program review in order to ensure the effectiveness of their programs and services. Admissions and Records, Counseling and Advising, Financial Aid, Job Prep Services, Recruitment, Student Life, and the Student Health Center have identified and recently updated SAOs (IIC-14). Each of these units assesses its SAOs and reports the results of those assessments in its ARPD or CRE. The Mental Health Services and the Veterans Resource Center do not complete their own ARPD because their assigned counselors function as part of the Counseling and Advising unit (IIC-15). Although not a separate unit, the Early College program completes an ARPD and a CRE (IIC-16, IIC-17).

The Student Services units use SAOs to determine the metrics to be evaluated. Financial Aid, Job Prep Services, Recruitment, Student Life, and the Student Health Center have students, prospective students, or clients complete a survey after each workshop, appointment, or service to determine satisfaction with services received. The units use those evaluation results to continuously improve student support services (IIC-18, IIC-19, IIC-20, IIC-21, IIC-22). The Counseling and Advising unit uses the UHCC’s Starfish software platform called MySuccess for student tracking reports and aggregate counseling evaluations that students complete online to determine trends, workflow, and effectiveness of services. The Counseling and Advising unit reviews this data to determine if and where improvements to service delivery need to take place (IIC-23).

Continuous Improvement of Student Support Services
Admissions and Records
The Admissions and Records unit provides a clear example of how the College regularly evaluates the quality of its student support services. In 2017-2018, the Admissions and Records office set three goals to support its SAOs (IIC-14). The first goal is that students who contact the Admissions and Records office for assistance will receive the desired service as quickly and efficiently as possible and be able to articulate that the service meets or exceeds expectations. The second goal is that student academic records will be maintained according to applicable state and federal guidelines. The third goal is that the Admissions and Records office will contribute to the College’s Wildly Important Goal (WIG) of keeping the students already enrolled at Leeward. For additional discussion of the College’s WIG, see Standard LB.3.

The Admissions and Records office improved its admissions-related processes (IIC-24). Beginning with the processing of summer 2015 applications, all College acceptance notifications are being sent through email rather than hard-copy letter. This has enabled the Admissions and Records office to spend more time processing applications, which increases the number of accepted students for each day of application processing.

Another improvement to Admissions and Records services concerns residency status. In order to expedite acceptance to the College, the Admissions and Records office updated its
procedures in spring 2016 for reviewing residency. The College no longer requires that students have their residency status for tuition purposes finalized before being accepted to the College. The Admissions and Records office instead works with new students to finalize residency information after accepting the student but prior to the student registering for classes.

Beginning with spring 2018 application processing, the Admissions and Records office has ended the practice of placing a miscellaneous admissions hold on every new or returning student’s record to prevent students from registering for courses during the priority registration period. The goal of this change is to allow both new and returning students, if eligible, to register for courses based on their number of earned credits. The Admissions and Records office implemented this change specifically to address the College’s WIG of keeping Leeward students enrolled.

The Admissions and Records office has sought to improve services for students by adding an online option for official transcript requests. The College is partnering with the National Student Clearinghouse to offer an online option to request official transcripts from the College without having to submit the request form by mail or make the request in person at the Admissions and Records office. Additionally, the Admissions and Records office will implement FileDrop, a UH file sharing service, to allow additional options for document submission to the office by students and/or applicants (IIC-25). Doing so will improve services by allowing for a more secure method of document delivery that will help protect students’ personally identifiable information.

Counseling and Advising
With its mission and the Counseling Process model as the foundation, the Counseling and Advising unit created its learning outcomes and aligned SAOs. The unit worked closely with the OPPA to develop SAOs that will support and align with the College’s WIG for student retention, the new Counseling Process (see Standard II.C.5), and the missions of the Counseling and Advising unit, Student Services, and the College (IIC-14). In 2017-2018, the unit decided to target its assessment efforts on the SAO to “foster a safe, supportive, and caring counseling environment.” The unit formed four subcommittees to facilitate the development of a counseling “culture of care” that promotes care for students, care for others in the unit, and self-care. Subcommittees present their initiatives and activities to the larger counseling group, seeking input and participation. These committees also report on their progress and assessment measures at counseling meetings on a bi-monthly basis. For further discussion of the Counseling and Advising unit, see Standard II.C.5.

Financial Aid
The Financial Aid unit strives to improve its financial advising services and uses assessment data such as the CCSSE to identify areas for improvement (IIC-18). According to 2016 CCSSE results, Leeward students saw financial aid advising as “somewhat” important, were “somewhat” satisfied with these services, and were “somewhat” likely to use these services (IIC-6, Items 13.1g, 13.2g, 13.3g). This unit’s outcomes now state that the Financial Aid office will increase the number of students receiving financial aid and will comply with regulatory requirements necessary to participate in federal and state programs. The SAOs focus on increasing Leeward students’ ability to recognize the Financial Aid office as a source for educational
financial assistance as well as increasing financial aid recipients’ recognition of important financial aid terms, definitions, and aid programs such as the Free Application for Federal Student Aid (FAFSA) and Federal Pell Grant (IIC-14).

To support its SAOs, the Financial Aid unit strives to increase students’ awareness about its services by conducting workshops and presentations and participating in campus activities such as NSO, the Financial Literacy Fair, and the College Bash. The Financial Aid office assists students in researching financial aid opportunities off- and on-campus, helps students complete the FAFSA and submit other forms necessary to complete their file, and maintains the scholarship bulletin board and recommended scholarship websites. As discussed in Standard LB.6, the Financial Aid office reviewed its current financial aid process and is working with the Banner Central financial aid lead, the University’s four-year schools, and UHCC campuses to create best practices and simplify the financial aid process, particularly in light of the state legislature for Hawai‘i Promise scholarship that is intended to ensure that students with unmet financial need can get the financial support they need to attend college (IIC-26, IIC-27). The office has also provided training to student employees at the Wai‘anae Moku Education Center to assist students to complete the FAFSA application.

Job Prep Services
The Job Prep Services unit participates in the ARPD process to assess its performance and SAOs (IIC-14). The unit measures its services based on how well students and employers view the demand, efficiency, and effectiveness of the services being offered (IIC-19). The unit collects quantitative data through the MySuccess software for appointments, the Job Center Online for job postings, and participant evaluations at workshops. For 2016-2017, the number of students who placed in jobs remained the same and all other quantitative indicators increased (IIC-19).

To support students as they prepare for employment, Job Prep Services staff assists students with job application materials. To help students with finding career information, Job Prep Services provides access to career resources through the online Career Coach and the Job Center Online. Both resources provide students with information on jobs and careers in various occupational areas. The reports generated from these websites in 2016-2017 indicated an increase in student usage of Career Coach by 84 percent and the Job Center Online by 13 percent (IIC-19).

Job Prep Services provides students with opportunities to meet employers in person at the on-campus recruitment tables in the concourse area or at job fairs every semester. In 2016-2017, employers came onto the campus for a total of 35 days to recruit. Additionally, 50 to 60 vendors participated in the Fall Job Fair and almost 100 vendors participated in the Spring Job Fair (IIC-28, IIC-19). Although many employers attended, they commented that they wanted to see more Leeward students since the flow of traffic at the events was very low (IIC-29). In response to this feedback, in spring 2017 Job Prep Services organized two specialized mini job fairs, one for the Automotive Technology program and one for the Culinary Arts program. These two mini fairs had excellent student attendance since faculty required students to attend. Evaluations from each event were positive (IIC-30, IIC-31).

The Job Prep Services unit provides opportunities for students to apply for jobs so that they can secure employment. Its staff works with all types of employers for recruitment needs and
offers on-campus recruitment opportunities such as recruitment tabling and job fairs. Job Prep Services staff screens each new employer and job posting for legitimacy based on UHCC System criteria. The Job Prep Services office worked with the OPPA to extract data on fall 2017 and summer 2017 graduates using the Outcomes Survey (IIC-32). Job Prep Services will use this data to provide an overview of recent graduates and to plan post-graduation activities.

Recruitment
The Recruitment unit’s mission is to encourage, motivate, and inspire students to pursue a higher education. This unit’s SAOs focus on providing students with information about higher education so they can identify the benefits of attending college, familiarizing prospective students with Leeward CC so they can identify programs and resources, and providing prospective students with application assistance so they can apply to the College (IIC-14). The current priority of this unit is to increase campus enrollment and financial aid participation.

In 2014-2015, there was a transition period in the Recruitment unit because the recruiter position was vacant. Then the position was filled for a year, but the recruiter moved to another position at the College. In October 2017, the College hired a new recruiter. During the transition period, the College did not hold certain recruitment events, which resulted in a decrease in campus tour requests and college workshops offered. The new recruiter has reinstated the activities and events previously offered. Currently, the Recruitment office is staffed by one full-time recruiter and five student peer mentors. The unit holds monthly team meetings and one-to-one peer mentor meetings to discuss upcoming activities, evaluate current activities, and plan for new, innovative ways to help increase enrollment to the College (IIC-33). In fall 2017, the Recruitment unit hosted a luncheon for high school counselors to familiarize them with the College’s programs and resources (IIC-34). In spring 2018, peer mentors helped high school students through the entire application process that included applying to the College, creating a UH username, signing up for a NSO session, submitting a health clearance form, and taking the Accuplacer placement test. In addition, the recruiter assists high schools at their FAFSA nights and peer mentors assist prospective students complete the FAFSA. The Recruitment unit has also been working closely with the Wai‘anae Moku Education Center coordinator and faculty to help increase the enrollment of Native Hawaiian students (IIC-20).

Student Life
The Student Life unit’s SAOs focus on providing leadership training for students, promoting active student engagement through events, and running NSO (IIC-14). Student Life has a structured student leadership training series for all its programs to prepare students for leadership roles. Faculty and staff from various UHCC campuses also participate (IIC-35). In addition to these retreats, Student Life consistently provides True Colors and Safe Zone trainings for Student Life leaders to improve communication between teams and to highlight the importance of inclusivity.

To promote active student engagement through events, the Student Life office works with the Love Pono committee, which consists of a counselor, instructional faculty, a domestic violence prevention advocate, and students. The mission of Love Pono is to provide a safe environment to help the college community “build and maintain healthy relationships
through education, intervention, campus and community resources, and counseling” (IIC-36). The Love Pono committee holds workshops and events such as the “Power of Love” and “Respect the Line” at both the Pearl City campus and the Wai‘anae Moku Education Center. In 2016-2017, 99 percent of all Love Pono workshop attendees (n=101) indicated that they were more aware of available resources after participating in the workshop (IIC-37).

The Student Life unit conducts an evaluation after each NSO session to continuously improve the program (IIC-38). Since the College’s last institutional self-evaluation, NSO has improved by utilizing the MySuccess software to streamline communication and reduce manual inputting of information. MySuccess automatically emails students necessary information based on established guidelines. In 2013, NSO began hosting workshops to educate the campus on the use of MySuccess and how it can help students. For further discussion of the Student Life unit, see Standard II.C.5. For further discussion of NSO, see Standard II.C.6.

Student Health Center
The Student Health Center’s SAOs focus on providing medical services to students, maintaining students’ health clearances, and promoting a healthy lifestyle (IIC-14). Each semester, the Student Health Center conducts a client survey to assess satisfaction of current services and demand for other services (IIC-39). The Student Health Center monitors the number and types of visits using an electronic medical record system (IIC-22). The center promotes its services at NSO, through participation in campus events, and on posters that are displayed around the campus. The center partners with Student Life to provide guidance, health education, and first aid services for campus events.

The Student Health Center collaborates with the Admissions and Records office to improve the Health Clearance process through use of Banner and Star software. The College informs the students of health requirements through direct communication, NSO, its website, and the health clearance form. The center uses the Star software to measure the number of students with TB/MMR holds per semester and is working to decrease the number of health clearance deficiencies by ten percent by providing more education on the requirements. The center will continue to work with local high schools to comply with health clearance requirements for dually enrolled students. Storing the immunization records in the electronic health record system aids in a smoother transition when students transfer to other post-secondary institutions. Through its services, the Student Health Center aids in retention by assisting students in maintaining and improving their health. The College encourages students to have health insurance and the center provides students with information regarding the student plan.

Mental Health Services
The Mental Health Services, which is funded through a memorandum of agreement with UH Mānoa, does not complete its own ARPD because the mental health counselor functions as part of the Counseling and Advising unit. The Mental Health Services presence at the College, however, is a result of the College identifying the needs of its student population and then using assessment data to continuously improve its services. In 2015, the College participated in the College Mental Health Project’s survey. Approximately 400 students, faculty, and staff took the survey in order for the College to get a baseline of the campus constituents’ knowledge of, attitudes toward, and experience with mental health and mental
illness. Respondents showed a good baseline level of knowledge about mental illness. Of those who responded (n=405), 79 percent believed that mental health should be a priority on the campus (IIC-40, IIC-41).

The Student Services’ 2014-2016 CRE identifies a “more sustainable and permanent offering of mental health services” as a focus area in the coming three years because the memorandum of agreement with UH Mānoa provides for a mental health counselor only on an annual basis (IIC-5). The Student Services Resource Requests for 2016-2017 includes as a priority a full-time mental health psychologist (IIC-42).

**Analysis and Evaluation**

In order to continuously improve student support programs and services, each of the College’s student support programs has identified learning support outcomes, which are annually assessed through the ARPD. When the assessment data identifies areas of improvement the College develops strategies for improvement.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about the College’s student support services. Participants discussed how the College meets Standard II.C.2 and how the College can improve these services. They are proud of the number of campus services that are available for students. These services have helped support retention. Participants would like to see more services for distance education (DE) students as well as have faculty provide information about these services to their students each semester (IIC-13, pp. 15-16).

II.C.3.
*The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.* (ER 15)

**Evidence of Meeting the Standard**

**Equitable Access to Student Support Services**

The College ensures equitable access to all of its students by providing appropriate, comprehensive, and reliable student support services regardless of service location or delivery method. Table 54 demonstrates that comparable student services are available at most campus locations and for all types of students.
Table 54.

* Students attending classes at the Wai‘anae Moku Education Center are able to use the services at the Student Health Center on the Pearl City campus and may submit their health clearance form via facsimile.
** International students enrolled in the English Language Institute attend classes at the Pearl City campus.

Admissions and Records
The Admissions and Records unit processes all admission applications and accepts students to the College (excluding international applications), maintains all student academic records for the College, certifies all students receiving Veterans Affairs benefits, evaluates all transfer credit requests, provides official transcripts and enrollment verifications for students, and confers all degrees and certificates awarded by the College. The College website
includes easily accessible ways for students to apply, whether they are first-time students or international students (IIC-43). The website includes an online application, academic deadlines, admission requirements, registration information, and financial aid information.

_Counseling and Advising_
The Counseling and Advising unit provides initial and ongoing academic advising and counseling for all students, prospective students, and graduates (IIC-44). This unit provides individual and group appointments, drop-in counseling, college-success courses and workshops, university transfer information sessions, informative and just-in-time messaging, and a counseling email for general advising inquiries. Counselors have a caseload of students for whom they assume professional responsibility, including monitoring and intervening as needed. Half of the counselors are program counselors who work with specific instructional programs such as career and technical education, teacher education, business, and developmental math and English (IIC-45). General counselors work primarily with liberal arts and undecided majors. The Counseling and Advising unit also works with specific populations such as dual-enrollment students, Native Hawaiian students, and veteran students. In spring 2018, the Counseling and Advising Unit expanded their services by offering Express Counseling two nights a week in the Learning Commons (IIC-46).

The Counseling and Advising unit uses a number of methods for providing support to students. Some examples include a mandatory NSO for all students new to the College, instruction in the use of STAR (brand name) as a degree planning tool for students, intrusive counseling for students who demonstrate a need for additional support, and alternative delivery methods to address students who are not readily available for in-person advising and counseling. Counselors are trained to use alternative delivery methods including Skype and Google Hangouts to support and facilitate online counseling sessions during the day and evening (IIC-47). Webcams and headsets are available for counselors to use during online student appointments. For a comprehensive discussion of the Counseling and Advising unit, see Standard III.C.5.

_Financial Aid_
The Financial Aid unit is committed to providing access to higher education by assisting students and families to seek, obtain, and manage financial aid resources necessary to pursue their higher educational goals (IIC-48). The Financial Aid unit has provided training to students who are peer mentors at the Wai`anae Moku Education Center.

_Job Prep Services_
The Job Prep Services unit supports students with their career development (IIC-49). The unit helps students understand the job search process, organize their employment documents, prepare for job interviews, and create employment strategies. JPS organizes weekly events such as recruitment tables to inform students about upcoming employment opportunities. Staff share their workforce knowledge with students and offer employment preparation workshops for faculty and staff. In spring 2017, JPS added the Hawai`i Nutrition, Employment, and Training program that supports eligible Leeward students in workforce training programs to receive food stamps and reimbursement for books and transportation. JPS participates in most campus activities to promote its services and co-sponsors events such as the Employment Expo (IIC-50).
Recruitment

The Recruitment unit provides outreach to area high schools and community organizations and works closely with the Creative Services office to promote an awareness of the College and its programs and services (IIC-51). The Recruitment unit coordinates outreach activities, participates in college fairs, and organizes campus tours and special events to help attract prospective students (IIC-52). The college recruiter coordinates a group of peer mentors who provide one-to-one assistance to students from area high schools and who give classroom presentations at a teacher’s request on topics related to college aspiration, financial literacy, and college success. In addition, the college recruiter works closely with other members of Student Services to implement dual-enrollment programs (IIC-53, IIC-20).

Student Life

The Student Life unit provides leadership and co-curricular learning opportunities outside of the academic classroom (IIC-54). Some of these opportunities include shared governance positions, intramural sports, student employment, student organizations, and a variety of enriching events. Campus involvement enables students to gain life skills, increase civic responsibility, and enhance personal and professional development.

Student Health Center

The Student Health Center unit, an extension of the University Health Services at the UH Mānoa campus, provides students, faculty, and staff at the College with health care services that include but are not limited to health education, disease prevention, family planning, and treatment for acute episodic illness (IIC-55, IIC-56). This unit works with the Admissions and Records to ensure that the College meets mandated health requirements for entrance to a post-secondary institution. Health clearance forms and medical record release forms are available for download on the Student Health Center website and may be file-dropped using secure email for evaluation and stored in an electronic medical record system. The center’s website contains helpful information regarding health requirements and services (IIC-55).

Mental Health Services

The Mental Health Services unit provides individual therapy, couples therapy, case management, emergency/crisis intervention, client-centered consultation, outreach and workshops, and relevant resources. All services to Leeward students are voluntary, free of charge, confidential, and do not affect their academic standing. The mental health counselor (referred to as a “personal counselor”) is available to meet with students four days a week at the Pearl City campus and one day a week at the Wai‘anae Moku Education Center. This counselor holds a full-time position that is funded through a memorandum of agreement with the Counseling and Student Development Center at UH Mānoa (IIC-57, IIC-58). This memorandum is the first of its kind at UH Mānoa to stipulate a full-time commitment of mental health services to Leeward CC.

Veterans Resource Center

The Veterans Resource Center offers services for the College’s current and prospective students who are veterans, active duty, reservists, National Guard members, and military dependents (IIC-59, IIC-60, IIC-61). An assigned counselor helps these students with program and graduation requirements and Veterans Affairs educational benefits, tuition assistance, and dependent benefits. The counselor assists students with transferring military service for equivalent credits, usually through the Joint Services Transcript. The center refers
students to appropriate organizations regarding other related services and benefits such as health and homelessness services. The center serves as a lending library so that students can borrow certain textbooks prior to receiving initial payment of Veterans Affairs benefits. The center is an approved Veterans Affairs Work Study site, which provides student employment and supervisory experience. The center offers a student lounge, computer/laptop use, a group study area, and information on veteran-focused resources. The center provides personnel support for the VetSuccess on Campus program, which includes having a counselor from the U.S. Department of Veterans Affairs on campus three days a week (IIC-62). The center provides personnel support for the Veterans Integration to Academic Leadership program, which provides veterans on campus with mental health services by appointment with a clinical psychologist (IIC-63). The Veterans Resource Center also partners with community organizations such as the Vet Center Mobile Truck service.

**Wai‘anae Moku Education Center**
The Wai‘anae Moku Education Center is staffed with two full-time general counselors assigned to its student population in addition to one counselor who is on a federally funded Title III grant for its Going to Finish On-Time program and the UH Foundation-supported Access to Education program (IIC-64). The Going to Finish On-Time program recruits students who agree to enroll in college full-time and for the first year agree to enroll in a predetermined sequence of courses as a cohort. In support of the program, the College provides this dedicated counselor and peer mentors to help monitor student progress and provide additional academic support (IIC-65). The Access to Education program consists of individuals recruited from drug-treatment programs along the Wai‘anae coast and those who were recently incarcerated. Some of the students in the Access to Education program are also participating in the Going to Finish On-Time program. The College also provides peer mentor support for this student population.

**Office of International Programs**
The OIP provides services for inbound and outbound students and provides support for internationally-related matters between local, national, and international institutions (IIC-66). For short-term inbound students, the OIP provides study tours that are customized to the partner institutions’ goals and preferred CLOs (IIC-67). This includes accommodations, English as a Second Language classes, and excursions. For long-term international students, the OIP provides immigration/visa counseling, academic counseling, housing assistance, and scholarship and/or transfer advising (IIC-68). For Leeward students, the OIP offers faculty-led study abroad programs and provides advising on study-abroad programs and scholarships (IIC-69). The OIP organizes the College’s annual International Education Week for the entire campus community (IIC-70). OIP posts its informational flyers at both the Pearl City campus and the Wai‘anae Moku Education Center, and OIP is currently planning International Education Week events at the Wai‘anae Moku Education Center.

**Office of Continuing Education and Workforce Development**
Students enrolled in OCEWD noncredit programs receive counseling and academic guidance from the College’s Counseling and Advising unit. In addition, OCEWD program coordinators act as academic advisors for their programs at student’s entry and for the duration of the student’s enrollment. Noncredit students are eligible to access other support services such as Job Prep Services and the Kāko‘o ‘Ike Program.
Early College and Other Dual-Enrollment Programs

Since 2015, the College has partnered with eight high schools to run the Early College program and has dedicated three counselors to serve as liaisons. Through Early College, high school students are able to have dual credit whereby credits earned count toward high school and college requirements (IIC-71). This program allows for greater academic success, greater transition from high school to college (“college-going”), increased cost effectiveness for students and their families, and better preparation for the rigors of higher education (IIC-72).

At two partner schools, students have completed their Associate in Arts degree at the same time that they graduated from high school. All of the College’s dually enrolled students are considered Leeward CC students; therefore, all services available to the College’s regular student body are available to these students.

The Early College program acts as the liaison between the various student services offices within the College and the partnering high schools, providing the school partners with information about students’ applications, testing, and course eligibility statuses so that the high schools can relay information to potential students and provide them with necessary support. The Recruitment office and three Leeward counselors designated for Early College are available to provide direct support to Early College students completing the admission and registration processes at the Pearl City campus. One counselor at the Wai‘anae Moku Education Center provides assistance to the high schools participating in Early College courses along the Wai‘anae coast. The Early College counselors regularly hold office hours at their assigned high school campuses and make themselves available to students through email, phone, and Google Hangouts.

High school students who do not attend a partner high school can also participate in the College’s other dual-enrollment opportunities using three other programs: Running Start, Early Admit, and Jumpstart. Students who participate in these programs typically pursue the opportunity on their own with the support of their sponsoring high school, and they take classes offered on the College’s campus rather than their high school campus. The College’s Early College counselors directly support these students’ efforts to enroll in the College and register for classes.

Counselors work, sometimes in tandem with partner high schools and Early College instructors, to intervene with students who experience difficulty in their classes and/or who are identified as needing an intervention through the College’s Maka‘ala and No Show programs. These counselors provide academic advising and career counseling to students as they advance in their accumulation of college credit as well as train students in the use of STAR, which is a UH System-developed, degree-audit software program. Dually enrolled students have access to all technological tools including STAR, MySuccess, and Laulima.

In spring 2016, the College was given an Experimental Sites Initiative designation by the federal government, which allowed the campus to award Federal Pell Grants to dually enrolled students (IIC-73). This designation provides the College with a mechanism to ensure that low-income, dually enrolled high school students have access to coursework that is relevant and applicable to their intended college degrees. The College assists interested students in completing their application for admission as well as their FAFSA and are fully advised on the benefits, risks, and obligations associated with using federal financial aid to support Early College coursework. Students who qualify for the Pell Grant have 100 percent
of their tuition, fees, and book charges covered regardless of the amount of their Pell Grant award.

Assessment of Student Needs for Student Support Services
The College assesses student needs for student support services regardless of location or mode of delivery and allocates resources to provide for those services. Resource implications in 2014-2016 identified the Early College program as an area that needs more support (IIC-42). Approved resource request for funding support in the 2017-2018 Operating Expenditures Plan provides the Early College program with reimbursement of mileage costs and funds for supplies (IIC-74, p. 9).

Analysis and Evaluation
In its efforts to provide mission-driven student support services that foster equitable access to all of its students, the College provides appropriate, comprehensive, and reliable services to all students. The student services units regularly evaluate services to ensure equitable access to all students.

II.C.4.
Co-curricular programs and athletics programs are suited to the institution’s mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

Evidence of Meeting the Standard
Co-Curricular Programs and College Mission
The College determines what co-curricular programs are appropriate to its mission and students. These programs advance the College’s mission statement in that they “foster students to become responsible global citizens locally, nationally, and internationally” (IIC-1). They also advance the College’s core values of diversity and respect in that they provide a “diverse intellectual and social environment, where learning occurs through exposure to world cultures, and through interaction with peoples of diverse experiences, beliefs, and perspectives” (IIC-1).

The Student Life office, through the advisement of the Student Life coordinator, facilitates co-curricular experiences through the Student Government, the Student Activities Board, campus clubs, the Budget and Finance Committee, Ka Mana‘o (student magazine), NSO, and IM LeeSports (Intramural Leeward Sports). The coordinator manages the Board of Student Communications, commencement ceremonies, and Love Pono (campus violence prevention program). Student Life staff manage student identification cards, discounted movie tickets, the student lounge, the senate chambers meeting room, and campus bulletin boards.

Policies and procedures are in place to oversee the effective operation of the Student Life’s co-curricular programs and to ensure the College conducts these programs with sound educational policy and standards of integrity. In terms of financial responsibilities, the Student Government, the Student Activities Board, and the Budget and Finance Committee
approve all fiscal purchases using student activities fees. The Board of Student Communications approves all fiscal purchases with board fees.

The Student Government is the governing body of the Associated Students of the University of Hawai‘i-Leeward CC (ASUH-Leeward CC) (IIC-75, IIC-76). An executive board comprised of a president, vice president, secretary, and treasurer manages the governing body. The executive board oversees five senators who are elected by the ASUH-Leeward CC and one senator who is elected by students enrolled in at least one credit at the Wai‘anae Moku Education Center. Its major responsibilities include managing student activities fees and establishing policies and programs for students. For further discussion of the Student Government, see Standard IV.A.2.

The Student Government advocates for students. It partnered with local food truck vendors to address limited food options on campus, collaborated with the Information Technology Group to increase WiFi usage for outdoor areas, collaborated with administration to implement designated smoking areas and recycling bins, increased funding for the Wai‘anae Moku Education Center, and partnered with faculty to produce a speaker series on various professions.

The Student Activities Board strives to promote student ideas and engagement (IIC-77). The purpose of the board is to provide fun, educational, and diverse programs and events for the student body. Events include video game tournaments, poetry slams, live entertainment, and cultural events. The board is a separate entity of the Student Government that operates with its own charter and bylaws recognized by the UH Board of Regents (IIC-78).

Registered independent student organizations, commonly called clubs, are consistent with the College mission in their commitment to nurture and inspire students by providing co-curricular activities that enable students to gain life skills, increase civic responsibility, and develop leadership skills that enrich their personal and professional development. In 2017-2018, the College had 16 registered clubs (IIC-79). The Student Life coordinator created the Registered Independent Student Organizations Handbook as a resource guide to assist in developing and registering official student organizations (IIC-80).

The Budget and Finance Committee is a committee of the ASUH-Leeward CC (IIC-81). This committee focuses on allocating funding to registered clubs and campus entities that co-sponsor educational and social events and programs outside the classroom at both the Pearl City campus and the Wai‘anae Moku Education Center (IIC-82). Student Government established this committee to appropriately allocate student activity fees through an equitable, organized process.

Although the UHCC System does not have official athletics programs or teams, students at the College are active in a number of intramural sports offered year round. In fall 2011, Student Life inaugurated the intramural sports program IM LeeSports (IIC-83, IIC-84). The mission of IM LeeSports is to provide students with opportunities to grow, learn, and develop respect for others through a positive experience in organized sports. The activity itself is friendly yet competitive, but the underlying goal is to foster an inclusive community of students who find commonality through their love for sports. IM LeeSports is offered in two programs: a non-competitive campus sports program and a competitive program called IM
LeeSports League, which includes all the UHCC campuses on O‘ahu and UH West O‘ahu. In order to provide adequate funding for the IM LeeSports program, the College increased student activities fees and charges the other campuses fees for each team they enter into the league. The IM LeeSports League program received an honorable mention for the Wo Endowment’s Community Building Award in spring 2016 (IIC-85).

The College offers numerous co-curricular programs that are sponsored by academic disciplines and programs within the Instructional Divisions that are suited to the College mission and core values in that they foster global citizenship and exposure to world cultures. For example, the Global Studies Lecture Series brought a speaker to discuss indigenous activism and slam poetry, the Hawaiian Studies Program brought speakers to discuss indigenous approaches to governance, and the Mauka to Makai: Political Science Lecture Series brought a speaker to discuss the Dakota Access Pipeline (IIC-86, IIC-87, IIC-88). Every year, the College’s Office of International Programs sponsors a variety of cultural activities during the annual International Education Week (IIC-70).

Additionally, the College offers co-curricular clubs that promote the College’s mission statement and core value of integrity by fostering a “culture of continuous improvement to open pathways to student success” (IIC-1). Phi Theta Kappa, Leeward’s chapter of Alpha Lambda Gamma, recognizes and encourages scholarship, leadership, and service among community college students (IIC-89). Another example is the Phi Beta Lambda/Enactus Business Club, which coordinates the annual Spring Fair and Fall Fair to promote student entrepreneurship and the Dress for Success clothing drive (IIC-90, IIC-91, IIC-92).

Evaluation of Co-Curricular Programs
The College regularly evaluates the quality and effectiveness of its co-curricular programs. Survey results indicate that students appreciate and enjoy events sponsored by the Student Activities Board (IIC-93, IIC-94, IIC-95). Survey results for IM LeeSports show that 70 percent of the participants surveyed (n=230 in 2015-2016, n=166 in 2016-2017) enjoyed playing against other colleges, 62 percent of the students surveyed enjoyed meeting new students, 41 percent of the students surveyed enjoyed being in school because of intramural sports, 82 percent of the students surveyed were encouraged to maintain a 2.0 GPA because of the program’s GPA requirement, and 83 percent of the students surveyed indicated that they would participate again (IIC-96).

Analysis and Evaluation
The College’s co-curricular and athletic programs are suited to its mission and play an important role in the social and cultural development of Leeward students. Programs include a student government and activities board, clubs, budget finance committee, and intramural sports. Through designated faculty and staff, the College’s Student Life unit takes fiscal and programmatic responsibility for these programs and conducts them with sound educational policy and integrity.

II.C.5.
The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they
understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

Evidence of Meeting the Standard

The College provides counseling and academic advising programs to support student development and success. These programs help students understand the requirements related to their programs of study and ensure that students receive timely, useful, and accurate information about relevant academic requirements including graduation and transfer policies. The College also offers personal counseling to help students resolve any problems that are interfering with their ability to concentrate and complete their assignments. For a description of the Counseling and Advising unit, see Standard II.C.3.

Programs to Help Students Understand Requirements and Receive Accurate Information

To promote consistency in the delivery of services and information to students, the Counseling and Advising unit developed a Counseling Process model that identifies eight stages in the “Leeward student experience” and the counselor’s responsibility in each stage. The eight-stage process includes Prospective Student, Admissions, Mandatory NSO, Mandatory New Student Advising (NSA) Appointment, First Semester, Second Semester, Continuing Semester, and Graduation. The Counseling Process model provides a uniform standard that each counselor follows when working with students (IIC-97).

To be further responsive to the needs of students and their identified academic goals, the Counseling and Advising unit has program counselors in the areas of teacher education; automotive technology; digital media; culinary arts; television production; business; plant biology and tropical agriculture; and Science, Technology, Engineering, and Math (STEM). In addition, the College has identified special populations of students who may need extra support. These populations include Native Hawaiians, veterans, those who place into developmental math and English, and the dually enrolled population who begin taking college courses while they are high school students.

In some cases, program counselors assigned to certain majors or student demographics also service other programs related to their primary student group focus. For example, the developmental English counselor also supports the OIP students who begin their academic journey at the College usually enrolling in English as a Second Language courses. Counselors also provide program and student support services for the College’s noncredit division, OCEWD.

The Counseling and Advising unit provides mandatory NSA for all incoming students to introduce them to the support resources available at the college, degree requirements, registration procedures, and career exploration tools. Based on the major a student indicates on the college application, that student is assigned a counselor who conducts this initial meeting. This not only ensures accurate communication of program services and degree requirements, but also allows for rapport building between the student and the assigned counselor. According to the counseling evaluations from 2012-2017, which assessed students’ achievement of the Counseling and Advising unit’s CLOs, over 90 percent of the
respondents (n=2,709) felt that after meeting with their counselor they could identify
degree/career options, outline an academic/degree plan, were aware of obstacles that might
affect their academic success, could identify next steps toward their college success, and
were aware of the resources and information that would help them succeed (IIC-98). Over 90
percent of the respondents, which included new students, indicated that they were satisfied
with how the counselor addressed their questions and concerns and felt comfortable meeting
with the counselor for academic or personal counseling in the future (IIC-99).

Mandatory advising occurs in both individual and group settings. Certain programs, such as
Business, have opted to offer “A Session on Program Information and Registration”
(ASPIRe) sessions in lieu of individual appointments. These sessions fulfill the same
objectives as the individual advising appointments with an added component of community
building among the majors with their peers and program support staff. The results of ASPIRe
evaluations for 2016-2017 indicated that 75 percent of the respondents (n=79) felt that
attending the group session increased their understanding of how to register for classes (IIC-
100).

The Counseling and Advising unit developed an ASPIRe program in fall 2017 for Liberal
Arts majors to give these students an opportunity to develop connections with Liberal Arts
counselors, build community with peers, and learn about general registration information and
procedures. Included in the group NSA session is an icebreaker, video, and breakout
registration sessions by exploratory major (Business, Health, Arts and Humanities, and
Social Sciences). Initial evaluations of the group NSA sessions were positive and the
Counseling and Advising unit has decided to continue this initiative with suggested
improvements by the participating counselors.

In fall 2016, the UHCC System implemented exploratory majors and tasked all UHCC
System campuses to create an exploratory model and major selection system for their
students declaring a Liberal Arts major. The College implemented four exploratory Liberal
Arts majors: Business, Health, Arts and Humanities, and Social Sciences. From spring to
summer 2017, the Leeward STAR team worked on developing the degree templates for each
exploratory major in STAR. By spring 2018, Liberal Arts exploratory major options
appeared on the common application form, counselors organized mandatory NSA sessions by
exploratory majors, and the College assigned students to their respective exploratory major
counselors. Similar to program counselors, Liberal Arts counselors now operate with specific
major groups in mind.

The College administers a campus wide early alert system each semester known as Makaʻala
to support student success and to help facilitate communication between instructional faculty
and the Counseling unit. Makaʻala gives instructors the opportunity at specific points in the
semester to either affirm students’ positive classroom performance or identify students who
need more support (IIC-101). MySuccess, a student retention software, sends electronic
surveys to all instructors on predetermined dates so they can provide feedback to students
(IIC-102). Students who are given positive affirmations or who are noted as a concern by
their instructors receive instantaneous feedback in an email. Students who are identified as
needing more support in the surveys are either asked to contact their instructor for more help,
are given information about the College’s tutoring services and are encouraged to contact
them, or are contacted by their assigned counselor (IIC-103).
During the third week of the semester, the Maka'ala period ends and the counselors use MySuccess to view which students in their assigned population have been referred for poor attendance, not attending class, or behavioral issues. Counselors make two attempts to contact the student by phone and/or email to further discuss the referred issue. Counselors encourage the students to come in to talk about their situation, but phone conversations and email correspondence are also available. Through these conversations, counselors and students talk about what issues may be hindering the student’s success and what resources are available to help the student or what actions can be done to resolve them. Referrals close at the fifth week of the semester.

The Maka'ala Program sends faculty a Consider Withdrawing survey prior to the College’s withdrawal deadlines in order to provide students with adequate opportunity to withdraw from class if they feel this is the best course of action for themselves (IIC-104).

For the past several years, the Career and Technical Education (CTE) Retention Team has been sending CTE students email communications notifying them when they have reached certain degree completion benchmarks. Students receive communications through MySuccess when they have completed 25 percent, 50 percent, and 75 percent of their required coursework. These once-a-semester email messages help students gauge their progress towards degree completion and encourage them to seek academic advising in order to confirm their progress and to plan for their continued progression as well as their eventual completion.

**Programs to Support Student Development and Success**

The UHCC System began the Integrated Student Support (ISS) initiative in summer 2017. The Student Success Council coordinates this initiative (IIC-105). As part of the initiative, Student Services units collaborated to assist with the Returning Student Initiative (IIC-106). The College invited students who were close to graduating to return to complete their degree; this included one class at no cost upon their return in spring 2018. The College contacted 123 eligible students by email, mail, and phone to share more information about the project. A counselor then emailed the students individually with what to expect, next steps, and what classes they still needed to take to graduate. The counselors contacted the students a second time through email after Admissions and Records admitted the student and registration became available. At the beginning of the spring 2018 semester, 23 students or 19 percent registered for a course to begin the journey to complete their degree. This initiative will be repeated for fall 2018.

Some CTE programs have student peer mentors and retention specialists, which are funded through external sources such as Perkins funding. These student services personnel work closely with the program counselors to develop a comprehensive support system for CTE majors which includes newsletters, tutoring, student success workshops, academic coaching, and routine progress checks.

Counselors refer students to the Job Prep Services unit for employment assistance, including career assessment through Career Coach (IIC-107). Counselors also refer students to this unit for assistance with the Hawai'i Nutrition, Employment, and Training program to qualify for
food stamps and other reimbursements. Counselors teaching student success courses use Job Prep Services as a resource for developmental employment and career information.

In fall 2017, the Counseling Leadership team consisting of the Student Services coordinator and Counseling and Advising unit head began meeting with the student government officers on a monthly basis to hear and address any concerns from the student body. As a result of this partnership, the Counseling and Advising unit has increased participation in Student Government initiatives such as the Student Involvement Fair and has worked in partnership with Student Government in order to increase continuing student awareness of the registration period and counseling services (IIC-108). Future plans include working with the Student Government to conduct student focus groups on counseling and advising services.

**Evaluation and Improvement of Counseling and Advisement**

As noted in Standard IIC.1, the Counseling unit evaluates its services annually in the ARPD. The unit regularly assesses its services to determine what is working well and what needs further improvement. An area of emphasis is ensuring accurate information about academic requirements. The College has structures in place to verify that all pertinent information on academic requirements is accurate and disseminated in a timely manner. Each year, STAR, an advising and academic planning software, is updated to reflect the approved curricular changes prior to fall registration. In addition, the College updates its Catalog each academic year with new curricular changes. The Catalog is available through the College website. Counselors receive a print copy and can also access the latest course and program updates on the Counseling Handbook website (IIC-109).

The Counseling and Advising unit assigned one of the general counselors to serve part time as an academic advising coordinator. This counselor is responsible for summarizing and communicating program and course modifications to the entire unit and maintaining documentation of approvals for curricular changes. The unit provides trainings for counselors during weekly counselor meetings or in one-on-one sessions. Program counselors and those who service special student populations provide updates at the general counseling meetings on an as-needed basis, but at least once per semester.

Prior to fall 2017, counselors requested student evaluations after the completion of an appointment. Every six months, counselors received their individual evaluation results and the counseling unit received an aggregate review; each determined if the results of the evaluations necessitated any changes. In fall 2017, the Counseling and Advising unit began using the MySuccess software to email counselor evaluations to students following their appointments. This new practice increased the number of completed evaluations on each counselor, providing better feedback on counseling services (IIC-110).

The Counseling and Advising unit provides professional development to prepare counselors and academic advisors for their advising roles. Every year, the unit has a professional development retreat to review goals and counseling standards and to reflect on strengths and areas of improvement. In addition, counselors/academic advisors attend an annual UH System conference for regular training and updates, and they pursue various professional development opportunities throughout the year. Senior counselors are paired with junior counselors to allow for further training of newer counselors.
In fall 2017, the Counseling and Advising unit received funding support from the system Co- requisite Initiative Project Allocation. The funding included $4,000 to support the professional membership of all 22 counselors in the national organization of their choice in order to promote networking and keeping abreast of national trends in counseling and advising. The funding also included $36,000 towards professional development related specifically to the support of developmental education, co-requisite initiatives, and career counseling of developmental and general student populations. This funding support has allowed counselors to attend regional and national conferences of professional student support organizations such as the American Counseling Association, the National Academic Advising Association, and the Student Affairs Administrators in Higher Education. Counselors who attend these conferences share what they have learned to either improve their own practice or recommend initiatives for the larger unit.

**Analysis and Evaluation**

The College offers counseling and advising services in a variety of modalities at both campus sites and online to make sure Leeward’s diverse student population receives timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies. Designated program and discipline counselors ensure that students understand the requirements related to their programs of study. The College’s counseling and academic advising staff receive quality ongoing training, updates and mentoring, and engage in program assessment to continuously improve program services.

II.C.6.

*The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER 16)*

**Evidence of Meeting the Standard**

**Policies and Procedures for Admissions**

The College adheres to Regents Policy (RP) 5.211, Admissions, which is consistent with the College mission (IIC-111). The policy specifies the qualifications of students appropriate for the College’s programs. The Catalog publishes information on admissions for U.S. citizens and international students (IIC-112). The College website provides prospective students with additional information including qualifications for admission and online forms for admissions and enrollment (IIC-43, IIC-113).

The College uses the MySuccess software to streamline the NSO program, which includes NSO Live, NSO Online, and NSO exemptions. NSO Live is an in-person session that includes a campus tour, training on the UH System course management system Laulima, a review of the MySuccess software and instructions on how to select courses for timely degree completion, opportunities to learn about campus resources, and opportunities to meet current students and faculty (IIC-114, IIC-115).
If a student obtained a certificate or degree within the UH System, attended a UH System campus in the past three years with good academic standing, or attended an NSO Live session the previous semester, MySuccess filters that student as exempt from attending an NSO session and possibly an initial advising appointment (IIC-116, IIC-117). MySuccess filters a student who attended a UH System campus in the past three years with a GPA under 2.0 as exempt from attending an NSO session but must attend an initial advising appointment. MySuccess filters a student who has a zip code off island as a DE student, and that student is automatically sent the NSO Online session. A student who will attend the Waiʻanae Moku Education Center may attend NSO Live, NSO Online, or NSO Welcome to Waiʻanae session. Students who obtained a degree from a non-UH System campus may submit their transcript or diploma for an NSO exemption.

The College has a clear admissions process for international students, who are assisted by the OIP staff (IIC-118). The applicant must be 18 years or older or have graduated from a high school. The applicant needs to complete an international student application form (IIC-119). The applicant must also provide an original bank statement to verify that the applicant has access to sufficient funds to cover educational and living expenses for one academic year (a minimum of $18,796 is required), a copy of a current passport, and the appropriate application fee. The College does not require applicants to have a test score to apply to the English Language Institute, but the College does require an applicant to have an official and minimum TOEFL, IELTS, STEP Eiken, or GTEC score to apply directly to a credit degree program (IIC-118). Upon receiving the necessary documents, the OIP processes the application and generates necessary documents for the student’s visa application (IIC-120).

Pathways to Degree Completion and Transfer Goals
The College fully implemented the UHCC Student Success Pathway framework, which is designed as a clear and structured pathway from point of interest through graduation to transfer or career completion (IIC-121). Figure 8 illustrates how this model provides “just-in-time” support for students.

The Pathway model helps us design “just-in-time” support for students throughout their academic journey.

![Pathway Model](image)

*Figure 8. Student success pathway framework.*

The UH System’s STAR software program includes STAR GPS, a registration system within STAR that maps an academic pathway for students based on their identified major (IIC-122).
Counselor/academic advisors and students regularly use this program to ensure students understand all requirements for their degree. The graduation pathway in STAR GPS lists all the requirements for students’ majors and notifies them when they are selecting a class that will not count toward their degree. Therefore, in addition to counselors working with students on degree completion and career counseling, STAR GPS is an important tool to ensure a timely graduation and accurate information.

As of spring 2017, all students within the UH System registered for their courses through the STAR GPS. Because STAR GPS must access the requirements of an identified major, its ability to suggest course offerings is based on the student declaring a major. When students do not see suggestions for course offerings in STAR GPS or they do not have their desired course of study displayed in the program, students need to declare a major or correct the one they declared when first applying to the College. This is another feature to help students create a clear path to graduation.

The “What If Journey” tab in STAR allows students to look at the requirements for any degree or certificate across all ten UH System campuses. By utilizing this feature, students have the tools to map out an academic pathway that leads to a bachelor’s degree from their first day at a community college. This feature is vital to ensuring students take courses that will not only allow them to complete their immediate degree, but also ensures the students take the prerequisites needed for higher degrees. Students take the correct classes to acquire the knowledge needed for their field, and they spend less time in school by creating a streamlined academic plan.

The College’s cohort learning groups provide students with clear academic pathways and extensive support. The College currently offers two cohort programs for students, the Lanakila First-Year Cohort program and the Going to Finish On-Time program at the Wai‘anae Moku Education Center (IIC-123, IIC-65). A Title III grant supports both of these programs with the goal of increasing Native Hawaiian student completion.

Analysis and Evaluation

The College’s open access philosophy extends to its admissions policies, which clearly outline program requirements, and its advising practices in order to effectively guide students toward achieving educational and career goals. STAR and STAR GPS ensure students have a defined pathway to completion so they can attain their educational goals.

II.C.7. The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

Evidence of Meeting the Standard

The College admits any applicant who is a high school graduate, received a high school equivalency credential, or is at least 18 years old. Once a student is admitted, the College uses multiple measures for placement of all students regardless of intended course enrollment, including those in DE courses.
The College regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases. The College has made two important student-centered changes to its admissions and placement practices since 2016. First, students can defer their enrollment if they are unable to attend the original semester that they applied for. Second, the College replaced its placement measures with those recommended by the UHCC Student Success Council.

As of November 2016, the American College Testing (ACT) no longer offered the Compass placement test, which is how the College placed students into math and English courses. The UHCC System chose to replace Compass with Accuplacer as a placement test tool. However, research has shown that a single high-stakes exam is not an accurate predictor for college readiness, so the UHCC System is moving away from Accuplacer to a system of multiple measures. The Cognitive Assessment Committee, along with system wide math and English committees, explored available placement options and developed recommendations for the UHCC Student Success Council, which the College implemented in fall 2016. Students can use any of the following multiple placement measures: cumulative high school grade point average; 12th grade English grade; 12th grade Intro to College Math grade; 12th grade Algebra 3, Trigonometry, or Precalculus grade; Algebra I grade; Algebra II grade; ACT Writing/Math score; Scholastic Aptitude Test Writing/Math score; High School Equivalency Test Language Arts/Math score; or General Equivalency Diploma Language Arts/Math score (IIC-124).

Analysis and Evaluation

To maintain the consistency and validity of admissions and placement processes, the College regularly assesses its tools and procedures. In order to meet the College mission, every effort is made to minimize any admissions or placement biases.

II.C.8.
The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

Evidence of Meeting the Standard

Process to Maintain Student Records
The College has an established process to maintain student records permanently, securely, and confidentially, with a provision for secure backup of all files. The Admissions and Records office maintains student records that are permanent, accurate, and complete. All academic records are confidential and are carefully secured against theft. The Admissions and Records office retains the records according to the guidelines of the American Association of Collegiate Registrars and Admissions Officers, and the registrar and the dean of student services are responsible for compliance. Current guidelines call for the preservation of student records for a minimum of three years; however, the Admissions and Records office currently keeps physical copies of student records for five years once a student is no longer enrolled at the College. The Admissions and Records office limits access to authorized personnel only and maintains files in locked cabinets when the files are not in
use by office staff. The Admissions and Records office removes older records from the active files and secures them in a separate area.

The Admissions and Records office backs up all physical copies of records contained in student files in the student information system called Banner. In some cases, the Admissions and Records office maintains the records electronically in their separate secure campus server. Banner maintains students’ academic history, including application history, registration history, course grades, and transfer course information, which the College can use in the event that the physical student record is lost or destroyed prior to the end of the record-retention period as set forth in the guidelines.

**Policies and Procedures for Release of Student Records**
The College publishes and follows its established policies for release of student records. The Catalog clearly states the policies and procedures regarding the release of student information (IIC-125). In all activities that involve private information, the College makes every effort to comply with the Family Educational Rights and Privacy Act of 1974 (IIC-126). The Catalog informs students what information the College considers directory information, information that may be disclosed without a student’s consent. The College gives students a two-week period at the beginning of each academic term to notify the College of their intent to keep all of their student record information confidential, including their directory information. The procedures relating to the protection of the educational rights and privacy of students is set forth in Administrative Procedure (AP) 7.022 (IIC-127). The College complies with Executive Policy (EP) 2.214, EP 2.215, EP 2.216, and EP 2.217 that govern how the College handles student data (IIC-128, IIC-129, IIC-130, IIC-131). For further discussion on data governance and information security, see Standard III.A.15.

Forms to request transcripts are available at the Admissions and Records office and online. The Admissions and Records office does not release official information without a written signature from the student authorizing release. The Admissions and Records office considers requests received from a student’s official UH email account valid since the student’s identification is verified by the act of signing into the account. A student may access an unofficial transcript online using his or her UH username and password. An unofficial transcript may be used for advising purposes and for transfers within the UH System.

The College has further increased personal security for students by training faculty and staff on the issue of personally identifiable information. The College no longer considers it appropriate to use a student’s social security number as the student’s identification number on student forms. Instead, the College issues each student a computer-generated Banner (UH ID) identification number when the student is admitted into the College.

The Admissions and Records office has created an application input manual for all of its employees to codify routines and procedures related to the creation of admission and student records in Banner (IIC-132). While this document is intended primarily as an instrument for ensuring consistency and quality in actions related to the application processing and residency determination, the standardization also enhances the objectivity of all decision-making related to the acceptance process. These processes and procedures are uniform regardless of the ultimate location of courses registered for by an admitted student, whether in traditional classrooms or through DE.
**Analysis and Evaluation**

In compliance with state and federal laws and professional guidelines, the College has an established process that ensures the security and confidentiality of student records in all forms, including procedures related to their release. The College publishes and disseminates its policies regarding the release of student records through the Catalog.

STANDARD III: RESOURCES

Student Spotlight
Kristina Nip

The new facilities at Waiʻanae Moku have opened up the campus in a way that allows for better collaboration and studying areas. The layout of the campus is structured well in the sense that the "Common Area" is in the middle of the area where students have easy access to it. There are also always tutors available in the Common Area so that students can access them easily as well. The inside of the campus is always kept clean, including the bathrooms. The testing center is now larger and more secluded so that students using the center can do so without interference or noise. Seeing Waiʻanae Moku through its transition, the new facilities have only heightened the campus' ability to function this way with better amenities and facilities. I always feel welcomed and know that the people who work here truly care about me and my educational journey.
STANDARD III: RESOURCES

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

III.A. Human Resources

III.A.1. The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

Evidence of Meeting the Standard

Leeward Community College ensures that all personnel are qualified by their appropriate education, training, and experience to provide and support the College’s programs and services. The College recognizes a variety of personnel positions. The University of Hawai‘i (UH) Board of Regents (BOR) appointees who are subject to classification and qualification rules include executive and managerial personnel; faculty; and administrative, professional, and technical (APT) (III-A-1, III-A-2, III-A-3, III-A-4). Support staff including grounds and maintenance and clerical staff are state of Hawai‘i civil service employees subject to civil service classification and qualification rules (III-A-5). All personnel except executive and managerial are subject to collective bargaining agreements.

Appropriate Hiring Criteria for All Personnel

The College has developed appropriate hiring criteria for administrators, faculty, and staff. The UH System’s Executive Policy (EP) 9.212, Executive and Managerial Classification and Compensation, provides for the establishment of executive and managerial classes (III-A-2). The class specifications broadly describe the functionality, responsibility, and authority of positions in the class (III-A-6). The policy outlines the process for creating a specific position description that can involve creating a new description or amending an existing one. The policy also includes a sample executive and managerial position description (III-A-7). Position descriptions include a list of the position’s duties and responsibilities as well as the qualifications necessary to perform the duties at a high level. The supervisor is responsible for creating a position description that accurately describes the needs of the College, which the human resources manager then reviews.
For faculty positions, the BOR defines personnel criteria, and the University of Hawai‘i Community Colleges (UHCC) system provides a faculty classification plan in consultation with the collective bargaining unit, the University of Hawai‘i Professional Assembly (UHPA) (IIIA-1, IIIA-8). The plan defines primary and other responsibilities as well as classification ranks.

For APT positions, the BOR defines the personnel criteria, and the UH System Office of Human Resources provides a classification and compensation plan based on four bands or levels of work complexity (IIIA-9). Within each band, the system office establishes career group designations, position classifications within each group, and possible duties and responsibilities for each group. Supervisors of APT positions supplement the minimum qualifications as needed.

For civil service positions, the UH System provides a classification and compensation plan (IIIA-10). The plan provides a systematic means to describe civil service positions. The state of Hawai‘i Department of Human Resources Development sets the minimum qualifications for these positions.

**Consistent Hiring Procedures for All Personnel**

The College employs safeguards to ensure that it consistently follows hiring procedures. The hiring process begins with the formation of a hiring committee, which serves as the prime recommending group throughout the hiring process. This committee consists of at least one subject matter expert. The division chair or unit head chooses a chair for the committee, and the Equal Employment Opportunity and Affirmative Action (EEO/AA) coordinator in the College’s Human Resources office (HRO) determines whether the committee meets diversity requirements. The College requires employees who serve on a hiring committee to attend mandatory training to learn about the hiring process and the responsibilities of screening committee members (IIIA-11).

The UH System and the UHCC System policies set minimum qualifications for each position, but the supervisor writes the job description to include duties, responsibilities, and appropriate desirable qualifications, which ensures that a person familiar with the position and the College mission writes the description. The UH System administrative procedures for the recruitment and selection of faculty and APT include a suggested checklist for the recruiting and hiring process, instructions for internal posting of job opening announcements, APT selection procedures, a sample APT screening evaluation sheet, and/or faculty selection procedures (IIIA-12, IIIA-13, IIIA-14, IIIA-15, IIIA-16).

All job descriptions are directly related to the College mission and core values. For example, the Automotive Technology Instructor job description listed as a desirable qualification the “understanding of and experience working with a diverse student population, including students with disabilities and students from a variety of economic backgrounds,” which aligns with the College mission to deliver high-quality career and technical education and the College’s core values of open access and diversity and respect (IIIA-17, IIIA-18, IIIA-19).

The job description for the College’s Native Hawaiian Career and Technical Education Academic Advisor provides an example of how the duties and responsibilities of the position are directly related to the College’s “special commitment to Native Hawaiians” (IIIA-18,
This job description states that the academic advisor provides "outreach [in order to] recruit, retain, and facilitate the success of Native Hawaiian students engaged in the Science-Technology-Engineering-Math (STEM) fields and career preparation" and "assists in the provision of holistic counseling to students, addressing both academic and other concerns related to Native Hawaiian students" (IIIA-20).

The College advertises open positions using appropriate venues to attract quality candidates. Once the HRO approves the job description, the College posts executive and managerial, faculty, and APT positions on the Work at UH website (IIIA-21). The College also posts designated executive and managerial positions in The Chronicle of Higher Education. The College initially posts civil service positions internally on the Work at UH website and then posts them on the State of Hawai‘i’s Civil Service Government Jobs Listing website if there are no qualified internal applicants (IIIA-22).

The College uses methods to ensure that it closely matches qualifications for each position to specific programmatic needs and that it clearly defines the duties, responsibilities, and authority for each position. The hiring committee drafts interview questions and a scoring rubric. The EEO/AA coordinator for EEO compliance reviews both to help determine the best possible candidate for the position with a goal of obtaining information about the candidate’s experience level, competency in the field, and ability to perform the job duties as described. During an interview, the hiring committee may ask applicants to perform job-related skills such as providing a teaching demonstration or solving a job-related problem. The hiring committee scores each applicant on a numeric scale and recommends the top scoring applicants to an administrator, usually the appropriate dean or vice chancellor. The College designed the process to enable a group of people who are familiar with the job position to choose the most qualified candidate from the pool of applicants.

The College has a process to verify the qualifications of applicants and newly hired personnel. The HRO collects documentation to ensure that applicants provide official documentation supporting their educational experience level and that the hiring committee has correctly and uniformly followed the hiring process. The College checks the equivalency of degrees from non-U.S. institutions by referring to the National Association of Credential Evaluation Services website (IIIA-23).

In fall 2017, the College piloted a new online applicant tracking software called NEOGOV that will replace the Work at UH website. Applicants for all executive and managerial, faculty, APT, and lecturer positions will use this system. The entire recruitment process from application to hiring of the selectee will eventually be completely online (IIIA-24).

The College does not include in job announcements specific criteria and qualifications for hiring faculty and staff involved in offering distance education (DE). Current faculty who teach through DE must satisfy the same qualifications that exist for their traditional classroom counterparts. During the recruitment process, instructional divisions may but are not required to identify qualifications for teaching DE courses. When instructional divisions identify DE qualifications, the job advertisement lists them as desirable qualifications. For example, a job advertisement may include the following statement: “May include instructional assignments involving DE.” In addition, the College does not require specific personnel with DE experience to be involved in the recruitment of new personnel.
During 2017-2018, the Faculty Senate DE Committee worked on recommended interview questions that screening committees may use during the recruitment process for instructional faculty (IIIA-25). The committee drafted the questions based on the DE Guidelines and sent a preliminary set of questions to the HRO for feedback (IIIA-26). The committee revised the questions based on the feedback, and the HRO approved a final version in February 2018 (IIIA-27, IIIA-28, IIIA-29).

**Analysis and Evaluation**

In order to maintain the quality of its programs and services, the College hires qualified personnel (administrators, faculty, and staff) by clearly and publicly posting the criteria required for each position; furthermore, the criteria address the College’s needs and are tied to the institutional mission and goals.

III.A.2.

*Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning.* (ER 14)

**Evidence of Meeting the Standard**

The UHCC System ensures consistency in generic job descriptions and criteria for tenure and promotion. Academic qualifications for lecturers (adjunct) are identical to those for regular faculty. The College uses system policies in hiring, retention, and promotion decisions (IIIA-3, IIIA-8).

The College has a consistent process to verify that faculty selected for hire have adequate and appropriate knowledge of their subject matter. The UHCC System sets the minimum qualifications for each faculty position (IIIA-30). Minimum qualifications include the appropriate degree or comparable work experience, if applicable, that the applicant must have in order to qualify for the position and contribute to the mission of the College. Applicants submit transcripts or copies of transcripts with their applications to allow the HRO to verify that the applicant meets the minimum faculty qualifications. If an applicant submits a copy of an official transcript, that person must submit an official original transcript upon hire.

Faculty job descriptions include the responsibility for curriculum oversight and outcomes assessment. The supervisor is responsible for writing the desirable qualifications for a job description. These qualifications include a desirable level of teaching and/or professional experience and a knowledge of the subject matter specific to the position. Faculty positions that involve teaching also include desirable qualifications that address subject-matter knowledge, experience with a diverse set of teaching methodologies, especially online teaching, experience with curriculum oversight, and assessment of learning outcomes. For
example, the job description for the English as a Second Language and the English Language Institute Instructor includes 12 desirable qualifications (III.A.31).

The College has a formal process for vetting credentials to ensure that hiring committees hire qualified faculty. The College conducts checks with current and former employers to confirm periods of employment, official titles, duties and responsibilities, work habits and attitudes, and/or reasons for termination.

**Analysis and Evaluation**

The College has a well-established process to ensure that faculty are highly qualified for their respective positions. Faculty job descriptions include curriculum development, review, and assessment. These job descriptions ensure that people hired have the required knowledge and skills to perform the job.

III.A.3. *Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.*

**Evidence of Meeting the Standard**

The College has a consistent process to determine if administrators and other employees responsible for educational programs and services possess the qualifications necessary to perform duties required to sustain academic quality and institutional effectiveness. When the College hires administrators and other employees, a hiring committee is responsible for screening and vetting applicants to determine which candidate will best fit the needs of the College. The hiring committee is a diverse group that includes representation from all campus personnel (faculty, APT, and civil service) and may include a community member with a vested interest in the position.

EP 9.212 provides for the establishment of these classes. The class specifications broadly describe the functionality, responsibility, and authority of positions in the class (III.A.2). The policy also outlines the process for creating a specific position description that can involve creating a new description or amending an existing one. Within the UHCC System, executive and managerial classification includes positions such as vice president, associate vice president, chancellor, vice chancellor, dean, assistant dean, director, academic affairs program officer, institutional research and analysis program officer, and assistant to senior executive. Position descriptions include a list of the position’s duties and responsibilities as well as the academic qualifications necessary to perform the duties at a high level (III.A.7). The supervisor is responsible for creating a position description that accurately describes the needs of the College.

As with the hiring of faculty, the hiring committee conducts the initial interview of selected candidates. However, applicants for executive and managerial positions can often undergo multiple interviews by specific groups such as faculty, administrators, students, and specialty groups from other campuses.
Analysis and Evaluation

In order to maintain the effectiveness and quality of its academic programs, the College vets administrators and employees responsible for academic programs and services to ensure they have the necessary qualifications to perform their tasks.

III.A.4.  
*Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.*

Evidence of Meeting the Standard

The College verifies the qualifications of applicants and newly hired personnel. The College complies with UH System policies and practices that are consistent with this standard and verifies qualifications of applicants through official transcripts and employment verification checks. In compliance with the “Minimum Qualifications for Faculty Positions,” a transcript must come from a regionally accredited postsecondary institution (IIIA-30). The HRO screens each transcript to determine whether it comes from an accredited institution. If a transcript comes from a non-accredited institution, the HRO rejects the application. The College checks the equivalency of degrees from non-U.S. institutions by referring to the National Association of Credential Evaluation Services website (IIIA-23).

Analysis and Evaluation

All degrees held by employees at the College are from U.S.-accredited institutions or from a non-U.S. institution that has been established as being equivalent to a U.S.-accredited institution.

III.A.5.  
*The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.*

Evidence of Meeting the Standard

The College has a process in place to evaluate all personnel on a regular basis. The UH System and/or UHCC System established evaluation policies and processes for each classification of employee at the College: executive and managerial, faculty, lecturer (adjunct), APT (professional staff), and civil service. State of Hawai‘i civil service policies are on the Department of Human Resources Development Performance Management webpage (IIIA-32). The process and frequency of an evaluation vary for each classification. These policies are available to all personnel for viewing and include the evaluation criteria for each personnel group (IIIA-33).
Evaluation criteria accurately measure the effectiveness of personnel in performing their duties. The UHCC Faculty Classification Plan provides the criteria to evaluate faculty members (IIIA-8). The UHPA collective bargaining agreement requires an evaluation every two years of tenure-track faculty who are serving probation (IIIA-34). A different set of criteria guides the evaluation of faculty applying for tenure and/or promotion (IIIA-35). Regardless of the application, the College evaluates applicants based on the following criteria: a self-assessment of their ability to perform primary duties, their effectiveness in teaching or their support of student learning, and their contributions to the College and the community. The applicant prepares a dossier application that is based on evidence and includes supporting documentation. A process is in place to evaluate each submitted dossier, which includes evaluation by a division personnel committee; the division chair; a tenure and promotion review committee, if applicable; and an administrator. Each review level documents feedback and comments, which are returned to the applicant in a timely manner (IIIA-36, IIIA-37). The primary objective of the process is to serve as a measure of effectiveness and to provide recommendations for improvement. If the process determines that the faculty member is not showing professional growth, the applicant is either terminated in the case of a contract renewal or a tenure application, or in the case of promotion, the applicant is denied promotion.

At the start of each fall semester, the College provides workshops for faculty about the contract renewal and tenure and/or promotion processes. Presenters include the chancellor, the vice chancellor for academic affairs, the UHCC human resources director, and an UHPA representative. The College encourages newly hired faculty and those applying for tenure and/or promotion to attend these workshops (IIIA-38).

Tenured faculty members must be evaluated every five years. Evaluation is done either through promotion, or for those who do not submit an application for promotion, through the Faculty Five-Year Review. The criteria for this review are similar to that of the tenure and promotion process and are outlined in UHCC Policy (UHCCP) 9.203, Faculty Five-Year Review (IIIA-39). One difference from the tenure and promotion process is that in the Faculty Five-Year Review process, only the division chair reviews the application. In the event that the division chair is of a lower rank than the applicant or the division chair is also submitting a dossier for review, the division personnel committee performs the evaluation. As a part of the review, the division chair (or equivalent) shares any recommendations to be made with the faculty member. If the division chair (or equivalent) decides that there is need for significant improvement, the division chair (or equivalent) and the faculty member develop a professional improvement plan together.

UHCCP 9.104, Lecturer Evaluation, outlines the lecturer evaluation process, which requires that a lecturer must submit an evaluation document in order to be eligible to continue as part of the lecturer pool (IIIA-40). The criteria for evaluation are focused primarily on teaching effectiveness with the primary goal of continued improvement. The rank of the lecturer determines the frequency of evaluation: Step A lecturers are evaluated annually, Step B lecturers are evaluated every two years, and Step C lecturers are evaluated every four years. Depending on the division, the division chair works with either the discipline coordinator or the division personnel committee to evaluate the applications and provide feedback on the applicant’s strengths and weaknesses as well as any potential recommendations.
Employees who teach DE courses include a discussion on issues related to online teaching and the educational needs of DE students in their contract renewal, tenure and/or promotion application, five-year review, or lecturer review.

The College annually evaluates executive and managerial positions using criteria set by Regents Policy (RP) 9.212 and UHCCP 9.202 (IIIA-2, IIIA-41). These include the evaluation of a number of performance categories as well as a review of the position description. As a part of the evaluation, the UH System distributes a 360-degree assessment survey to personnel who support or work with the executive or managerial employee (IIIA-42, IIIA-43). The employee’s supervisor discusses the anonymous results with the employee for his or her review and evaluation. The employee also prepares a discussion of specific goals to achieve for the upcoming year. For further discussion of the 360-degree assessment survey, see Standard IV.C.3.

Administrative Procedure (AP) 9.170 outlines the annual performance evaluation of APT personnel (IIIA-44). The immediate supervisor performs a review of the employee’s performance and documents the results electronically (IIIA-45). The supervisor and employee discuss the review and any improvements and goals for the employee for the upcoming year. For APT employees who are not performing up to standard, the College offers retraining and professional development opportunities.

The State of Hawai‘i’s Performance Appraisal System outlines the civil service employee evaluation (IIIA-46, IIIA-47). Supervisors meet with the employees annually to discuss goals and evaluate them on their ability to perform assigned duties. For civil service employees who are not performing up to standard, the College offers retraining and professional development opportunities.

**Analysis and Evaluation**

Regular and systematic evaluations that have clearly established guidelines allow the College to evaluate the effectiveness of all personnel. Actions taken as a result of the evaluations are formal, timely, and documented.

III.A.6. *The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.*

**Evidence of Meeting the Standard**

The College’s evaluation process leads faculty to improve teaching methods and plans to improve learning. The College recognizes the importance of the assessment of learning outcomes and the use of the assessments as driving forces to improve teaching and learning. As such, the College adheres to L5.210, Policy on Assessment, to promote an environment that is dedicated to the practice of assessment and to ensure that the assessments performed are used in decision-making and resource allocation processes. The policy also stresses that
assessment is a continual process and delineates responsibilities for those involved in assessment (IIIA-48).

Evaluation instruments, where appropriate, include evidence of engagement with learning outcomes. UHCC faculty classification plans and evaluation processes for contract renewal, tenure and/or promotion, and post-tenure review include the use of outcomes assessment results as a job responsibility and evaluation criteria (IIIA-34, IIIA-35, IIIA-39, IIIA-40). A lecturer evaluation also includes this criteria. As an example, the criteria for tenure include a self-analysis of the degree of attainment of learning outcomes in the classes taught and the possible impact and contributions that the faculty member has made toward achieving his or her professional objectives and meeting students’ needs (IIIA-35). The criteria indicate that the faculty member is not solely responsible for the attainment of learning outcomes by all students.

The role for administrators, specifically vice chancellors and deans, is to ensure that the assessment process is ongoing for all courses and programs. In addition, the executive and managerial evaluation criteria state that as part of the evaluation, administrators are to discuss the specific metrics outlined by the strategic goals of the College (IIIA-49).

L5.210 also states that staff members are required to participate in the support of outcomes assessment if it is in the scope of their job responsibilities (IIIA-48). The College encourages participation from those who do not have assessment as an explicit part of their job description.

**Analysis and Evaluation**

With the goal of improving teaching and learning, the evaluation of all personnel that are directly responsible for student learning includes the consideration of how they use the results of outcomes assessment.

III.A.7. *The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)*

**Evidence of Meeting the Standard**

The College has the appropriate staffing levels for each program and service. While no formal policy governs the ratio of full-time to part-time/adjunct faculty, the UHCC System and the College monitor the ratio to ensure compliance with the Accreditation Standard. In fall 2017, the full-time to part-time/adjunct faculty headcount ratio was 63 percent, or 215 full-time faculty to 126 part-time/adjunct faculty.

At the College, each instructional division, instructional program, and support unit completes an Annual Review of Program Data (ARPD) each year. As part of the report, there is an assessment of the “health” of the program, division, or unit using quantitative indicators, which include a measure of the efficiency of the number of faculty in that area. In the event
that the ARPD determines that a program, division, or unit is in need of a faculty position, the College can reallocate a vacant position from another area (IIIA-50, p. 8).

Administration discusses staffing sufficiency with the deans and division chairs and reviews ARPD personnel requests to determine if divisions, programs, or units require permanent and/or temporary positions to fulfill the College mission. The campus continually recruits lecturers to teach in disciplines that are deficient in staffing due to a temporary increase in course offerings when demand arises. The campus keeps a list of qualified lecturers to hire on short notice to fill this need.

Each academic year, the College publishes a roster of faculty, including their degrees, in the Catalog (IIIA-51, IIIA-52). Each semester, the College publishes a current schedule of classes that identifies faculty responsible for each class on the College website for both the Pearl City campus and the Waiʻanae Moku Education Center (IIIA-53).

**Analysis and Evaluation**

In order to maintain the quality of educational programs and services, the College maintains a sufficient number of qualified faculty, both full and part time, such that the programs and services meet the goals of the College mission. The ARPD process ensures the number of faculty and staff is sufficient in size to support all of the College’s educational programs.

III.A.8.

*An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.*

**Evidence of Meeting the Standard**

The College has policies and practices demonstrating that lecturers (adjunct faculty) have opportunities for professional development, are appropriately oriented to the College and its student populations, and are engaged in key academic processes. Lecturers teaching half time or more are members of the faculty collective bargaining unit UHPA and are covered by the collective bargaining agreement (IIIA-54). UHCC policies govern the step advancement and evaluation of lecturers (IIIA-40).

The College is responsible for the orientation, oversight, evaluation, and professional development of lecturers and integrates the lecturers into the campus culture. They can attend faculty events including most of the professional development programs coordinated by the Innovation Center for Teaching and Learning (ICTL) (IIIA-55). Lecturers may serve on committees and participate in campus events. They can also apply for a professional development award (IIIA-56). Additionally, each year the College recognizes one lecturer through the Outstanding Lecturer Award, which is presented at a campus ceremony in the spring semester (IIIA-57, IIIA-58).

The College has a Lecturers’ Group, a committee that meets to discuss matters that are important to lecturers (IIIA-59, IIIA-60). Through these meetings, this group has helped
develop lecturer-specific programs such as the New Lecturer Workshop and the Lecturer Mentoring program (IIIA-61, IIIA-62, IIIA-63). The Lecturer Mentoring program provides lecturers with short-term, one-on-one assistance from selected Power Mentors to improve student learning and/or effectiveness on the job. Both of these programs are similar to programs that exist on campus but contain subject matter that pertains specifically to lecturers and are lecturer driven. This group was also the driving force to ensure that lecturers receive service awards. In addition, the Lecturers' Group may recommend one representative to the Faculty Senate and one representative to Campus Council (IIIA-64).

**Analysis and Evaluation**

The College integrates part-time and adjunct faculty into institutional life through the implementation of policies and practices that provide orientations and evaluation of these faculty, as well as through opportunities for mentoring, serving on governance boards, and participating in professional development.

**III.A.9.**

The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)

**Evidence of Meeting the Standard**

The College has a sufficient number of staff with appropriate qualifications to support the effective educational, administrative, physical, and technological operations of the College. All UHCC positions are controlled through legislative appropriation. By policy, the UHCC System reallocates positions that have gone unfilled by the College. While the UHCC System has not established formal staffing ratios, UHCC System administrators review and compare staffing levels for various classifications of employees across campuses.

As of July 1, 2017, the organization charts for the College had 351 positions (IIIA-65). Table 55 shows the distribution of those positions.

**Table 55.**

Each division and academic support unit performs an ARPD in which there is a discussion about staffing levels. If an ARPD demonstrates that a division or academic support unit needs more staff, the state legislature may award a new position, but this is determined by the state’s ability to fund these positions. The College may also reallocate positions within its authorized number of position counts.

A more common practice to achieve appropriate staffing levels is the temporary hiring of staff during a time of need. The ARPD process determines if a division or unit requires a new position to support its proper operation, and the College determines if funding is available for a specified period. Prior to the end of the temporary hire’s employment period, the College reviews both the need for the position and the budget to decide if the position should be terminated or extended.

By hiring staff that meets the UH System, the UHCC System, or State of Hawai‘i Department of Human Resources Development minimum qualifications, the College ensures that the new hires are capable of performing the duties of the position. Official College organization charts and functional statements determine the organizational structure of the College (IIIA-65). AP 3.101 governs any amendments to these charts and statements (IIIA-66). Additionally, a vacant position can be reallocated from another area to meet staffing needs.

Analysis and Evaluation

In order to effectively support the educational, technological, physical, and administrative operations, the College maintains a sufficient number of qualified staff. The College uses the ARPD to evaluate program staffing levels.

III.A.10. The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes. (ER 8)

Evidence of Meeting the Standard

The College has policies and practices to determine the appropriate number, qualifications, and organization of administrators. All UHCC positions are controlled through legislative appropriation. By policy, the UHCC System reallocates positions that have gone unfilled by the College (IIIA-67). The College may also reallocate positions within its authorized number of position counts. While the UHCC System has not established formal administrative staffing ratios, UHCC System administrators review and compare staffing levels of executive and managerial employees across the campuses.

The College’s Organization Charts are the UHCC-approved organization of all administrative and faculty positions (IIIA-65). As stated in AP 3.101, the chancellor annually reviews the organization charts (IIIA-66). In the event that changes are necessary, the
College can propose a reorganization of existing positions in accordance with the administrative procedures to meet the changing needs of the campus.

Administrators at the College include the chancellor, two vice chancellors, four deans, and one director (IIIA-68, IIIA-52). The rigorous hiring process helps ensure that administrators are well qualified to perform their duties; the hiring process is further discussed in Standard III.A.1. Additionally, the College annually evaluates executive and managerial positions to ensure that administrators are performing their duties at a sufficient level. For further discussion, see Standard III.A.5.

**Analysis and Evaluation**

The College hires and maintains a sufficient number of qualified administrators to sustain continuity and provide effective administrative leadership in support of its mission and goals.

III.A.11. *The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.*

**Evidence of Meeting the Standard**

The College establishes, publishes, and adheres to multiple levels of personnel policies, including UH board policies, UH executive policies, UHCC policies, and College policies. All policies are available for all personnel to view at any time on the UH System wide Policies and Procedures Information System (PPIS) website, the UHCC System Policies webpage, and the College’s Policies webpage (IIIA-69, IIIA-70, IIIA-71). Additionally, collective bargaining agreements govern personnel actions for the covered employees. The system reviews all its policies every three years in order to maintain currency and relevancy (IIIA-72, IIIA-73).

The College’s human resources manager serves as the EEO/AA coordinator to ensure that the College consistently administers personnel policies. The EEO/AA position is responsible for equitable and consistent compliance with existing personnel policies and procedures. In addition, the HRO maintains records and makes decisions based on historical practices, and if necessary, from consultations with the UHCC office and the UH Legal Affairs and University General Counsel Office. All new hires receive a briefing of the major personnel policies on campus through the New Hire Orientation (IIIA-74). Since 2016, the UH System requires all employees to complete training on Title IX policies and practices. The state of Hawai‘i designated all faculty as “responsible employees” with a duty to report sexual harassment and other sexual misconduct to the proper authorities (IIIA-75). Campus-wide workshops, seminars, and email announcements communicate any major changes to personnel policies.
Analysis and Evaluation

The College follows an established set of published personnel policies and procedures including UH board policies, UH executive policies, UHCC policies, and College policies that are fair, equitable, and consistently administered.

III.A.12.
Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.

Evidence of Meeting the Standard

Policies and Practices That Promote Equity and Diversity
The College’s policies and practices promote an understanding of equity and diversity. The College is an institution of equal employment opportunity and affirmative action and is committed to an environment of nondiscrimination for all employees and students. The UH System establishes, publishes, and adheres to nondiscrimination and affirmative action policies and practices that support its diverse personnel (IIIA-76, IIIA-77, IIIA-78, IIIA-79). In accordance with RP 1.205, Section III, the UH System is committed to a “policy of nondiscrimination on the basis of race, sex, gender identity and expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, national guard absence, or status as a covered veteran” (IIIA-77). The College’s L1.202, Policy on Nondiscrimination and Affirmative Action, reaffirms this commitment (IIIA-80). The UH System adheres to procedures for the recruitment and selection of all personnel, which ensures compliance with system hiring policies, affirmative action and equal employment opportunity guidelines, and respective collective bargaining agreements (IIIA-81). The UH System regularly evaluates all policies and procedures to ensure they are effective.

The College has methods to determine the kinds of support its personnel need and regularly evaluates the effectiveness of these programs and services. The UHCC System office conducts formal EEO/AA action analysis on a regular basis and incorporates it into the recruitment/hiring processes. Each UHCC campus has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measurement of affirmative action efforts, and remedial action when necessary.

As part of the affirmative action program, the director of EEO/AA at the Office of the Vice President for Community Colleges develops affirmative action plans for minorities and women on an annual basis for the seven community college campuses in accordance with federal contractor requirements. In addition, the director of EEO/AA develops affirmative action plans for protected veterans and individuals with disabilities that are prepared in accordance with federal contractor requirements.

The director of EEO/AA works closely with assigned EEO/AA coordinators at each UHCC campus to monitor and oversee the employment practice including recruiting and hiring.
decisions; to ensure compliance with the laws and policies and with the affirmative action plans including reviewing job announcements, reviewing for underrepresentation, and monitoring recruitment; to ensure equitable treatment of applicants and diverse screening committees; to brief search committee members on recruiting practices including nondiscrimination, equal opportunity, implicit bias awareness, and accessible interviews; and to receive, investigate, and resolve complaints.

The College holds regular training sessions to educate employees on current and new practices concerning equity and diversity. Training starts with the New Hire Orientation (online and in-person options are available), which includes information for new employees about nondiscrimination policies and practices (IIIA-74). New employees receive the Faculty and Staff For Your Information (FYI) Guidebook (IIIA-82). Additionally, the UH System holds workshops and training seminars throughout the year for employees on sexual harassment, hostile environment, disabilities, EEO/AA and diversity, and recruitment, selection, and hiring (IIIA-83).

The College ensures that its personnel and students are treated fairly. The College complies with Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973 (IIIA-84). In 2016, the state of Hawai‘i mandated that all UH faculty are designated as “responsible employees” with a duty to report sexual harassment and other misconduct to the proper authorities and that all UH employees are required to complete an online training program on Title IX, the Violence Against Women Act, and relevant UH System policies (IIIA-85). As of fall 2016, the College had 80 percent faculty participation in this mandatory training, the highest rate of the ten campuses in the UH System (IIIA-86). Additionally, the UH Office of Institutional Equity conducted a Title IX campus training in February 2016, and the College’s compliance and training officer held sessions during the fall 2016 and spring 2017 convocations (IIIA-87, p. 2; IIIA-88, p. 5). In fall 2017, the UH System launched CampusClarity, an online student training program regarding sex- and gender-based violence. The goal of this program is to educate the UH System community on students’ rights and available resources (IIIA-89, IIIA-90). Additionally, the College’s vice chancellor of administrative services provides faculty with a suggested course syllabus statement regarding Title IX (IIIA-91).

The College has three designated Title IX coordinators: a Title IX coordinator for the overall campus, a deputy Title IX coordinator assigned to employees, and a deputy Title IX coordinator assigned for students. The College publishes the names of all coordinators on the College website along with Title IX resources for UH System employees and students (IIIA-84). In fall 2017, the College’s Teaching Guidelines and Issues for Faculty Committee invited the deputy Title IX coordinator assigned for students to facilitate a discussion on how the campus community can continue to support the College’s commitment to protecting students and employees from sex-based discrimination and encroachment (IIIA-92).

The College is committed to building an inclusive community that supports and advocates for all employees and students. In 2016, the College created two all-gender restrooms for employees and students on the Pearl City campus and one all-gender restroom at the Wai‘anae Moku Education Center. The College has two representatives who participate on the system wide advisory commission that raises awareness about issues relating to the status of Lesbian, Gay, Bisexual, Transgender, Queer, + (LGBTQ+) equality and who regularly
conduct Safe Zone workshops (IIIA-93, IIIA-94, IIIA-95). In compliance with EP 7.302, Preferred Name, students may change their student identification card to reflect a first name that is concurrent with their gender identity (IIIA-96, IIIA-97).

The College provides resources designed to assist women, minorities, veterans, and disabled groups including Bridge to Hope, the Children’s Center, a Mother’s Room for nursing mothers, the Veterans Resource Center, the Military and Veterans Coordination Program, and the Kākoʻo ʻIke program (IIIA-98, IIIA-99, IIIA-100, IIIA-101, IIIA-102). The College has a representative who participates on the system wide advisory commission on the status of women (IIIA-103).

**Evaluation of Employment Equity and Diversity Record**

The College tracks and analyzes its employment equity and diversity record consistent with its mission. In order to maintain an equitable and diverse employee group, the College asks new hires to fill out a confidential survey that collects data based on a number of categories. Annual review of the data helps the College to ensure that there is an appropriate distribution of diversity. In the event that there is a shortage in the field (females in administration, for example), the HRO keeps a hiring period open long enough to draw a sufficient number of applicants and/or posts job advertisements in specific publications to solicit a diverse applicant pool. Proper hiring practices, however, determine that the College chooses the best candidate.

**Analysis and Evaluation**

Through established policies and procedures, the College creates and maintains programs and services that support its diverse personnel and regularly assesses its employment record with respect to equity and diversity.

III.A.13.

*The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.*

**Evidence of Meeting the Standard**

The College has approved ethics policies for all of its personnel that delineate consequences for violation. The UH System established formal ethics policies and procedures for various employee classifications (IIIA-104, IIIA-105, IIIA-106, IIIA-107, IIIA-108, IIIA-109). The UHCC System has a published policy statement of professional ethics for faculty (IIIA-110). The policy establishes that faculty must maintain academic integrity given their role as educators and scholars. The College references the Hawai‘i State Ethics Commission website on the new hire checklist, which contains an ethics guide for state employees (IIIA-111, IIIA-112).

Employees are subject to state of Hawai‘i ethics rules and regulations. The College adheres to Hawai‘i Revised Statutes, Section 84, Standards of Conduct (IIIA-113). This document is a code of ethics that covers the expected conduct of all employees of the state of Hawai‘i as well as possible outcomes of the violation of this code.
Every year, employees at the College read and sign a required disclosure form from the State of Hawai‘i Ethics Commission (IIIA-111). Every election year, the UH System and the State of Hawai‘i Ethics Commission distribute reminders regarding political campaigns and guidelines that govern employees seeking political office. In the event of a violation, the appropriate bargaining units determine punitive actions. Records of punitive actions are kept in personnel files, but confidential information is kept in a separate file.

**Analysis and Evaluation**

The College follows a written code of UH System professional ethics for all personnel that includes consequences for violation.

III.A.14.  
*The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.*

**Evidence of Meeting the Standard**

**Robust Professional Development Programs**  
The College is committed to offering robust professional development programs that are consistent with the College mission for all personnel.

Much of the ongoing professional development offerings on campus come from two units, the ICTL and the Educational Media Center (EMC). Both of these units have full-time, tenure-track faculty coordinating efforts to provide a diversified offering of workshops and programs, and both units receive resources from the College to fund these efforts.

The ICTL’s mission is to facilitate professional development to improve teaching and learning by encouraging collaboration, inspiring innovation, and recognizing excellence at the College. The EMC’s mission is to inspire, facilitate, and support teaching and learning using technology.

The ICTL has a full-time faculty coordinator, a half-time staff member, and selected faculty coordinators on reassigned time to plan, organize, implement, support, and evaluate professional development for faculty, lecturers, and staff. The ICTL coordinator also recruits and trains faculty and staff to voluntarily coordinate or conduct professional development programs. The ICTL Advisory Committee, consisting of 14 faculty and staff members from across the campus, oversees the programs and operations of the center. ICTL offers general programs for faculty, lecturers, and staff; teaching and learning programs for faculty and lecturers; group programs for staff; and funding programs for faculty, lecturers, and staff. The ICTL staff also works with staff groups to plan, organize, and request professional development programs and activities for their constituencies (IIIA-55). Table 56 provides a comprehensive list of the ICTL’s professional development programs.

● Professional Development Award  
● Staff Development Fund |

The ICTL also conducts an annual fundraising drive to raise funds to provide food and lei in support of professional development programs at the College. Headed by members of the ICTL Advisory Committee, the fundraising drive has exceeded its annual goal of $3,000 for the past few years with donations from current and retired faculty and staff ([IIA-114](#)). This fundraising effort has also resulted in larger gifts for professional development, leading to the creation of awards for innovation and sustained excellence.

Professional development funding awards by the ICTL support faculty and staff in maintaining their expertise, certification, and relevance to their industry. Travel grant awards assist automotive and culinary staff in fulfilling program accreditation annual training requirements and in learning new program technologies and trends. These awards also help send teams of faculty and staff to conferences. Innovative initiatives on campus also receive professional development funds to develop new programs or support faculty and staff development. For example, the Student Success Committee Mini-Grant Awards and Innovation Fund Awards provided funds to develop the Teaching Excellence Program, New Lecturer Training, and Lecturer Mentor Programs.
The EMC offers a wide variety of professional development opportunities and online learning resources for faculty, lecturers, staff, and administrators related to using technology in the classroom and online ([III-115](#III-115)). The faculty and staff within the unit work together in partnership with the College’s administration and instructional faculty to provide meaningful professional development opportunities, which will inspire students to learn. Four full-time educational technologists develop and facilitate all of the EMC’s professional development programs. Table 57 provides a comprehensive list of the EMC’s professional development programs.

For further discussion of the support and training provided by the EMC for information technology, see Standard III.C.4.

Faculty and staff at the Waiʻanae Moku Education Center participate in the College’s professional development activities. They have also held professional development activities at the Waiʻanae Moku facility to meet their specific needs. Activities have included a review and revision of the mission and two retreats to support faculty concerns with classroom management issues.

The UH System supports faculty and staff professional development by offering tuition waivers for up to 6 credits each semester (IIIA-116). The UHCC System offers sabbatical opportunities each year for qualified faculty with appropriate sabbatical proposals (IIIA-117, IIIA-118).

The College supports professional development for all employees, including training required to maintain certification to meet the minimum qualifications for the job. The College also supports additional training for employees to keep current in specialized areas such as automotive technology, culinary arts, information and computer science, and digital media.

**Assessment of Professional Development Needs**

Every three years, the ICTL uses a variety of methods to assess professional development needs including online surveys for faculty, lecturers, clerical, and APT staff; interviews with follow-up surveys for administrators; and focus groups for the Operations and Maintenance staff. In addition, specific individuals or groups can approach the ICTL to help identify professional development needs. For example, the Lecturers’ Group was interested in having a mentoring program tailored for lecturers, so the ICTL helped launch the Lecturer Mentoring program in February 2017 (IIIA-63).

The ICTL bases its professional development funding decisions on the proposal’s relationship to the College mission. For example, the ICTL judges applications for professional development awards “on the benefits to be gained by the applicant and relevancy to the UH system and/or college goals/mission.” Also, one of the guidelines on the travel grant award rubric is that the application “clearly shows direct relationship to college mission, goals, and strategic plans” (IIIA-119). Faculty and staff may apply for funds from three sources. The Travel Grant program with an annual budget of $36,000 funds travel for employees for College initiatives. Professional Development Awards help fund on-island...
conference and workshop registration fees up to $500 per faculty and staff ($4,000 annual budget). The Staff Development Fund provides small grants of up to $200 to support professional development programs and activities.

The ICTL Advisory Committee provides regular guidance and oversight of the professional development program and activities. This committee approves funding requests throughout the year and selects winners for professional development awards. They assist in the development or provide recommendations or approval of new professional development programs. They revise program policies and bring concerns or recommendations for professional development.

The EMC has methods to identify professional development needs of its faculty and other personnel. To determine specific needs, the EMC regularly surveys faculty and staff. For example, the EMC provides faculty and lecturers with an online self-assessment for teaching online (IIIA-120). Additionally, in order to maintain currency with changing technologies, the EMC staff looks at trends in higher education and tailors the new technologies to the needs of the College. The educational technologists at the College have an annual $5,000 budget to experiment with emerging technologies, which provides the means for the technologists to be informed of emerging technologies and their application in the classroom.

**Evaluation of Professional Development Programs**

The ICTL engages in meaningful evaluation of its professional development activities and uses results for improvement. As an Academic Services Support unit, the ICTL completes an ARPD as part of the College’s program review process (IIIA-119). The ICTL evaluates its programs through a standardized survey, which uses a standard Likert scale to determine the effectiveness of the program. Additionally, surveys for selected professional development programs collect ideas or insights from participants that can be used to improve student learning and assess the effectiveness of new ideas. The surveys also provide opportunities for qualitative feedback. Taken together, the ICTL uses these surveys to improve the programs offered (IIIA-121). For example, in response to comments that some new personnel had difficulty attending the new hire orientation, which is typically held the week before the semester begins, the ICTL created an online orientation for new hires in September 2015 (IIIA-74).

The ICTL coordinator is also responsive to requests. For example, in response to division chairs’ concerns that new lecturers are not aware of College policies, in 2017 the ICTL coordinator developed a one-day orientation designed for new lecturers. This program received positive evaluations from its participants. Follow-up surveys on the Teaching Excellence Program showed that participants found the program beneficial as they developed partnerships with other participants and program presenters. This information led to an application and award for the Wo Learning Champions Community Building Award in 2017, validating the program’s effectiveness (IIIA-122).

The ICTL conducts a professional development needs assessment every three years for each staff/faculty group. In 2017, the ICTL sent out an online survey and the results (n=97) indicated that faculty and lecturers approved of the professional development programs and funding. Approximately 90 percent of the respondents said that the ICTL programs have had a positive impact on their job effectiveness (IIIA-123, IIIA-124).
The EMC engages in meaningful evaluation of its professional development activities and uses results for improvement. As an Academic Services Support unit, the EMC completes an ARPD as part of the College’s program review process (IIA-125). The EMC primarily uses surveys to measure the effectiveness of programs and workshops. A number of surveys exist to measure both short-term and long-term effectiveness. For example, standardized exit surveys conclude each workshop, determining its effectiveness. The EMC uses the final program surveys to measure the overall effectiveness of workshop series. The EMC also uses longitudinal surveys to measure the outcomes of the programs and workshops on teaching and learning and how participants applied their learning to their teaching (IIA-125).

The EMC uses a formative evaluation process in order to maintain continued improvement of their workshops and programs. They use the results to adapt and modify offerings based on their effectiveness. For example, the EMC first offered the Teaching Online Challenge in person and focused the content on pedagogical theory. Participant feedback made it clear that many participants had never taught online before and were not aware of the challenges involved in teaching online. As a result, the program is now completely online and focuses more on application and implementation.

**Analysis and Evaluation**

The College has a robust professional development program that meets the needs of continually evolving pedagogy and technology. The College regularly evaluates these programs to maintain or increase their quality and effectiveness.

According to the 2016 Employee Satisfaction Survey, 83 percent of the faculty and staff who responded agreed with the statement that the College provides professional development activities that help them do their work efficiently and effectively (IIA-126, Item 9, p. 5).

III.A.15.
*The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.*

**Evidence of Meeting the Standard**

The College has provisions for keeping personnel records secure and confidential. The UH System establishes personnel records policies, including security and confidentiality, in accord with the law and collective bargaining agreements (IIA-127, IIA-128). In spring 2018, the UH Institutional Data Governance Program held an information briefing at the College on data governance and information security (IIA-129, IIA-130). The College maintains records under its control in accord with these policies. The HRO stores and maintains personnel records in the HRO, a secure environment (IIA-131, IIA-132, IIA-133). The HRO doors require a special key that tracks usage including the date and time of entry. The HRO securely locks all computers with cables, and the rooms have around-the-clock video surveillance. The UH System Office of Human Resources stores official personnel files for executive and managerial and Civil Service employees; however, the HRO keeps a shadow file in the HRO during the employee’s tenure at the College. In
compliance with the Hawaiʻi Revised Statutes, Section 92F, Uniform Information Practices Act, all employees are able to see their own personal files upon request (IIIA-134).

**Analysis and Evaluation**

The UH System establishes records retention policies, including security and confidentiality, in accordance with the law and collective bargaining agreements. While the records are kept secure and confidential at the College, each employee has access to view that employee’s records.

III.B. Physical Resources

III.B.1. The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.

Evidence of Meeting the Standard

Leeward Community College (Leeward CC) has a main campus and an education center. The Pearl City campus is comprised of 18 primary buildings and several clusters of portables located on 49 acres of land. The education center, originally referred to as the Wai‘anae-Nānākuli Education Center, has been located in various leased locations in Wai‘anae. In fall 2017, it moved 1.7 miles to a permanent location in Mā‘ili and was renamed the Leeward CC-Wai‘anae Moku Education Center to reflect the geographic area the site serves.

The College constructs and maintains the physical resources at both the Pearl City campus and the Wai‘anae Moku Education Center to ensure access, safety, security, and a healthful learning and working environment. The vice chancellor of administrative services (VCAS) and the auxiliary and facilities service manager oversee campus compliance of all federal and state laws, statutes, and regulations.

The College ensures that its physical facilities at both the Pearl City campus and the Wai‘anae Moku Education Center are accessible to students, faculty, staff, and the general public. The State of Hawai‘i’s Disability and Communication Access Board reviews all plans and designs for construction and renovation-related projects that occur at either location. One of the board’s primary roles is to “review and provide recommendations on all State and County plans and specifications for buildings, facilities, and sites, as required under Hawai‘i Revised Statutes, Section 103-50, in order to ensure that they are designed and constructed to be accessible to persons with disabilities” (IIB-1). The board must approve all construction and renovation plans for any campus facility improvement prior to the finalization of the project’s design plans.

Periodically, the College in conjunction and coordination with the University of Hawai‘i Community Colleges (UHCC) System office, undergoes an assessment and evaluation of facility accessibility. In 2018, the College and all UHCC campuses are undergoing an Americans with Disabilities Act assessment and evaluation through the use of external consultants. The consultants are scheduled to complete the assessment of the facilities in 2018 and provide a review with specific project recommendations in 2019. The College, through the UHCC System office, will then seek legislative funding of these projects shortly thereafter.

The College’s Emergency Operations Plan and Emergency Guides highlight accessible evacuation points and routes (IIB-2). The College updates these plans periodically and distributes them electronically and in hard-copy form to the campus community.
Two separate support offices provide access- and accommodation-related services for students and employees on a case-by-case basis. For students, the Kākoʻo ʻIke (KI) Program provides disability and accommodation services while employees work with the Affirmative Action/Equal Employment Opportunity unit within the HRO. (IIIB-3, IIIB-4).

Finally, the College’s updated Long Range Development Plan (LRDP) addresses the access, circulation, and parking improvements for both campuses (IIIB-5, IIIB-6). The UH Board of Regents (BOR) reviewed the LRDP in spring 2018. The LRDP provides an updated blueprint for future facility improvements for the College (IIIB-7, IIIB-8).

The College implements a three-pronged approach to ensure that physical facilities provide a safe learning and working environment. This approach provides the College with a structured process to regularly evaluate whether it has sufficient physical resources at all locations.

The first prong is the Operations and Maintenance unit, which is divided into three sub-units: maintenance, grounds, and janitorial. The maintenance staff maintains the physical facilities, air conditioning, electrical, and plumbing systems. The grounds staff maintains assigned landscaped areas, removes trash and materials from designated outdoor areas, assists with planting needs, and assists with event preparation, setup, and takedown. The janitorial staff is responsible for indoor and outdoor general cleaning, removal of trash and materials, support of campus recycling efforts, changing lights, coordinating movement requests, and assisting with event preparation, setup, and takedown. A computerized maintenance system, eFacilities AiM, tracks all submitted service requests (IIIB-9).

The second prong is ongoing monitoring and assessment of daily operations. The auxiliary and facilities services officer conducts a personal check of campus buildings and grounds. The manager sends prompt email notifications to all campus employees of construction, repair, and safety concerns.

The third prong consists of reports from specific units at the College. This third prong ensures that the College has a process by which all personnel and students can report maintenance and safety concerns. An important source is the campus security officers who are continuously on duty at both the Pearl City campus and Waiʻanae Moku Education Center. Security officers monitor and report physical resource safety concerns and maintenance issues. They regularly contact the Operations and Maintenance unit regarding safety concerns and necessary repairs. Another campus group that provides reports on campus facilities is the Academic and Institutional Support Committee, a standing committee of the Faculty Senate, which seeks to improve the academic and institutional support services for faculty, staff, and students (IIIB-10). During 2016-2017, this committee brought forth concerns that included sidewalk safety, parking safety, and designated smoking areas (IIIB-11).

A centralized Environmental Health and Safety unit supports all community colleges in the UH System. It works collaboratively with the College to develop and administer a variety of health and safety training and awareness programs, many of which are directly related to the College’s physical resources. These programs include training and guidance on hazardous materials and waste management, asbestos and lead abatement, indoor air quality, fire safety,
storm water discharge, and others. The College provides these training programs on a continuous basis to ensure that faculty and staff are familiar with the best practices in the field and to make certain that the College maintains a safe learning and working environment.

The College has recently implemented several initiatives as part of its continued emphasis on providing a healthy learning and working environment. These initiatives include designated smoking areas, the Wai‘awa Mile Fitness Trail, a Mothers Room, and the College’s Wellness Committee.

The current campus smoking policy went into effect in 2013, and the College created designated smoking areas at both locations (IIIB-12). These measures support and are consistent with the UH Tobacco Products Policy whereby enforcement is not through disciplinary measures but through the “thoughtfulness, consideration and cooperation of smokers and nonsmokers” (IIIB-13).

The campus and community members worked together to complete the Wai‘awa Mile Fitness Trail and the installation of several outdoor pieces of fitness equipment in 2015 (IIIB-14). Participants who contributed to this project include the College’s Sustainability Committee, Student Life office, Student Government, Creative Services office, the Shade House, and a local Boy Scout troop.

To support parents who are either students, faculty, or staff and assist in their transition back to school or the workplace following the birth of a child, the College implemented Lactation Support Guidelines in August of 2013 by creating a Mother’s Room for nursing mothers at the Pearl City campus (IIIB-15, IIIB-16). In January 2018, the UH System provided further support by the release of Executive Policy (EP) 1.205 on Inclusive Facilities. This policy sets forth standards and expectations for safe and accessible facilities that support a “campus community of diverse students, faculty, staff, and visitors inclusive of their gender identity and/or gender expression” (IIIB-17).

The College’s Health and Wellness Committee supports a healthful learning and working environment. This grassroots committee had its modest start in 2012 within the Student Services area and has quickly grown into a robust campus constituency. The committee’s mission is “to create a work/life balance by improving positive well-being through educational activities and information for individuals and groups” (IIIB-18). The many activities and programs sponsored by this committee include the Annual Health and Wellness Fair, participation in the Great Aloha Run, Instagram challenges, and regular speakers and presenters all geared toward health, fitness, and individual well-being (IIIB-19, IIIB-20, IIIB-21).

The College ensures that all facilities are secure. The main campus at Pearl City offers around-the-clock, comprehensive security services. The Campus Security office is located in the center of campus in the Language Arts Building, Room 238. On duty Campus Security personnel are available at (808) 455-0611 or by campus telephone extension 611 or through any of the emergency call boxes. The Security Services webpage includes a link to a map with the emergency call box locations and other safety and security information (IIIB-22). At the Wai‘anae Moku Education Center, security services are on duty during the facility’s
operational hours. In addition, during business hours, Wai‘anae Moku Education Center members can report emergencies to designated on-site officials and Campus Security Authorities. The Pearl City campus would also provide assistance with a coordinated emergency response should a need arise.

In addition to the College’s security officer workforce, a contracted security firm, U.S. Security Associates, provides additional safety and security. These security guards provide supplemental resources and support at both locations on an as-needed basis. The College has an annual contract for this supplemental service which expired in May 2018 and was recently renewed. In order to renew a contract, the College must follow strict personnel and procurement guidelines for this outsourced service.

In recognition of the critically important role of safety and security on both campuses, the College in coordination with the UHCC System office has requested additional security officer staffing from the state legislature. The College’s request is for the addition of four additional security officer positions and nearly $140,000 in salaries. In fall 2017, the BOR approved this request, which is being considered during the 2018 state legislative session (III.B.23).

Analysis and Evaluation

The College provides safe and sufficient physical resources at both the Pearl City campus and the Wai‘anae Moku Education Center while providing an accessible, secure, and healthy learning and working environment.

III.B.2. The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.

Evidence of Meeting the Standard

Integrated Planning and Budgeting Process
The College uses several mechanisms to ensure objectivity and transparency in decisions regarding the planning, budgeting, and requests for campus facilities and space needs. The Annual Report of Program Data (ARPD) process, initiated at the individual unit or division level, captures relevant repair and maintenance data. Administrative Services uses this data to prioritize the repair and maintenance requests. The College uses its strategic plan and LRDP as guides when making decisions about physical resources (III.B-6). Each UHCC campus has an LRDP that serves as a blueprint for future development and drives all future projects. The College completed its most recent LRDP in December 2016. Refer to Standard III.B.4 for a detailed discussion of the LRDP.

Similar planning processes are in place for capital improvement program (CIP) projects, minor CIP projects, and capital renewal and deferred maintenance projects. The College is in adherence with Regents Policy (RP) 10.201 and RP 10.202 on interests in and planning and management of real property (III.B-24, III.B-25). To ensure safe and sufficient physical
resources, the different levels of the UH System share facilities planning and management. The UHCC System Office of Facilities and Environmental Health manages projects that are larger and typically require professional design consultants. This office, when appropriate, assigns its environmental safety specialist to investigate and recommend remediation of code and safety needs. This office prioritizes projects based on the needs of the UH System and UHCC System.

**Physical Resources Support Programs and Services**
The VCAS oversees physical resources at both the Pearl City campus and the Wai‘anae Moku Education Center. The VCAS reports to the campus on approved and funded facility projects through the Auxiliary Services unit’s current project listing, updates to the Campus Council, convocation presentations, and construction advisory notices (IIIB-26, IIIB-27).

The College considers program and service needs when planning and maintaining its physical resources. This is accomplished through the College’s ARPD and Integrated Planning and Budgeting Process where units and departments initiate requests for facility improvements. Once the College undertakes a facility improvement project, unit or department personnel are involved throughout the various phases of planning, design, and construction, and these representatives meet frequently with the College’s facility staff, consultants, contractors, and project managers during the course of the project. Between 2012 and 2017, the College undertook over 50 active renovation, modernization, deferred maintenance, and major construction projects through this process. Active involvement by unit/department representatives ensures that the College incorporates their programmatic and service-related requirements into the project.

An example of this type of project is the recently completed office and classroom building complex for the Office of Continuing Education and Workforce Development (OCEWD). The College constructed four new buildings, two new parking lots, two new motorcycle range lots, and a forklift training lot at no cost to the College due to the City and County of Honolulu’s rail project and the site of the College’s new rail station. Throughout the 18-month design and build process, OCEWD program coordinators worked with campus officials, consultants, and contractors on a weekly basis to properly design, configure, and construct facilities that would meet their specific programmatic requirements. The new OCEWD facilities opened in May 2016 (IIIB-28).

**Equipment Requests in Support of Programs and Services**
The College is actively engaged in ensuring that its faculty, staff, programs, and services have adequate equipment resources to fulfill their teaching and support roles. Campus members request new equipment through the College’s ARPD process, which requires a direct tie to specific College or unit goals. Requests that the College prioritizes are subject to College funding availability.

In fiscal year 2016-2017, the College, in conjunction and coordination with the UHCC System office, implemented an equipment replacement process. In the two years of its existence, the UHCC System provided the College with nearly $1.5 million in equipment replacement funds for high priority needs. The College’s operational expenditure plan allocates nearly $1.2 million annually to units and departments in support of modernization of its equipment, technology, smart classrooms, classroom furnishings, and library
These funds help the College support its programs and services that are working to achieve the mission.

**Effective and Efficient Resource Utilization**

The Wai‘anae Moku Education Center project demonstrates effective and efficient resource utilization. Operating budget cost savings as a result of the College acquiring and renovating the Wai‘anae Moku facility is more than $278,000 per year due to the expiration of lease payments at its previous facility. While some of these funds have been redirected to provide services and support to the new campus, the majority of these funds have been reallocated to meet the budget priorities identified through the College’s annual Integrated Planning and Budgeting Process. For further information, see Exhibit 8 in the College’s Operational Expenditure Plan for fiscal year 2017-2018 (IIIB-29, p. 9).

Taking a balanced approach to facility-related improvements ensures that the College reduces operating costs wherever possible and supports the sustainability initiatives of the UH System and the state of Hawai‘i. This approach incorporates the College’s energy goals and *Strategic Plan 2015-2021* to “continue to execute energy reduction strategies and sustainability programs” (IIIB-30). Among the most visible and significant of these projects is the Energy Conservation Measures and Alternative Energy projects that the College implemented (Phase I) and is currently constructing (Phase II). Phase I, which was completed in 2015-2016, resulted in the College reducing its electrical power consumption by 29 percent and having solar production generate 14 percent of its power needs. Upgrades to campus lighting, chiller plant, and power production through solar energy led to more than $830,000 in verifiable cost savings (IIIB-31). Upon completion of Phase II, the College will reach 97 percent of its net zero energy goal to produce as much renewable energy as it consumes. The College achieved this through a robust expansion of solar power generated and stored at the campus in addition to upgrading indoor and outdoor lighting and replacing electrical transformers (IIIB-26). The College is close to meeting its net zero energy goal well in advance of the state of Hawai‘i’s goal for the state and the UH System to be net zero by the year 2035.

**Physical Resources Support the Mission**

A key element of facilities planning is connecting each new physical resource to the College mission. The College integrates the LRDP into the campus planning process to ensure effective use of campus physical resources. Using the ARPD, the Integrated Planning and Budgeting Process includes assessment, planning, and budgeting, while aligning to the strategic plan and LRDP. In the ARPD, division and support areas identify and justify equipment and facility needs, supporting them with evidence and alignment to campus goals and the strategic plan. Each division and support area ranks its needs based on agreed upon priorities. The Campus Council votes on proposed institutional priorities. These procedures ensure effective utilization of resources to support programs and services while achieving the College mission.

The Hālau ‘Ike O Pu‘uloa (Hālau) renovation is a clear example of a successful facility plan aligning to the College mission, particularly its special commitment to Native Hawaiians (IIIB-32). In spring 2015, the faculty and staff of the Hālau moved into the newly renovated first floor space of the DA building (IIIB-33). The design includes improved student engagement spaces including a “Welina Mai” lounge and a separate room for “Quiet Study.”
The College’s Integrated Planning and Budgeting Process directs the planning and development of physical resources, including facilities, equipment, land, and other assets. This process helps to ensure the effectiveness and quality of the College’s physical resources in supporting its mission.

According to the 2016 Employee Satisfaction Survey, 87 percent of the faculty and staff who responded agreed that they have the materials and equipment needed to do their work. In the same survey, almost 75 percent of the faculty and staff who responded agreed that the resources provided for their division, department, or unit are adequate (III-B-26, Items 10-11, pp. 5-6).

III.B.3.
To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

Evidence of Meeting the Standard

The College regularly assesses the use of its facilities and equipment and utilizes those assessment results to make improvements. Building tenants and custodial staff routinely assess the condition of facilities and report any needed repair or modification to the campus administration. The campus has a facilities manager in the Operations and Maintenance unit, who is the primary point of contact for campus facility needs. The College uses the
computerized maintenance management system, Sightlines, to identify problem subsystems and their rate of recurrence. Additionally, the Operations and Maintenance unit uses eFacilities AiM, an online maintenance request and management system, for campus departments, units, and programs to submit a work request.

For ongoing facilities planning, the College uses the Facilities Renewal Resource Model, eFacilities AiM, the Event Management System, room utilization reports, and ARPDs (IIIB-9). In addition, the College uses the annual facilities renewal reinvestment model called Sightlines to record maintenance backlog and estimated annual funding required for ongoing capital reinvestment. The College monitors all facilities on a regular maintenance schedule, including planning for deferred maintenance, and establishes priorities for addressing both regular and deferred maintenance.

The VCAS tracks classroom usage, vacancy and fill rates, classroom equipment inventory, and campus facilities use. To identify trends, needs, and efficiency, the College compares its data to the data at the other UH System campuses. The VCAS uses current space utilization to identify current and projected needs by departments, units, and programs. This data, along with feedback from campus groups, impacts future decisions.

Planned science labs at the Waiʻanae Moku Education Center provide an example of using data to plan for future needs. The Waiʻanae Moku Education Center’s previous facility did not have science labs. A combination of the ARPD, alignment with campus mission, and a Title III grant will enable the new facility to include a science lab on-site (IIIB-37). This modernization will allow for multiple science courses at the Waiʻanae Moku Education Center. Students will be able to fulfill science requirements for multiple certificate and degree programs such as the Associate in Arts (AA) in Liberal Arts and the AA in Teaching. The chemistry lab is part of Phase II renovations (IIIB-6).

Using systematic and regular inspection, assessment reports from programs, areas, and units, and Administrative Services data gathering, the College is able to accommodate the changing needs of the campus and plan for the future. Administration is active in providing information and updates to the College regarding construction projects and other works that impact physical resources.

**Analysis and Evaluation**

The College uses a variety of planning and assessment tools on a regular basis to ensure that it effectively uses the institution’s physical resources in support of its academic programs and support services. The ARPD process is the primary mechanism for evaluating facilities and identifying needed improvements.

According to the 2016 Employee Satisfaction Survey, the majority of faculty and staff who responded indicated that the cleanliness and maintenance of the buildings and grounds were adequate (IIIB-36, Item 12, pp. 6-7). The overall satisfaction rate for the cleanliness of campus facilities has consistently improved since 2011 (IIIB-38). The Administrative Services unit conducted a more detailed survey in fall 2017 to gather more data on areas to improve and evaluated the results in spring 2018.
III.B.4.

Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

Evidence of Meeting the Standard

The College has three mechanisms in place to address long-range capital plans: the LRDP, EP 4.201, and the Strategic Plan 2015-2021 (IIIB-6, IIIB-39, IIIB-30). Together they drive all long-range capital plans.

The LRDP is a comprehensive capital improvement and land use plan for the main campus in Pearl City and its Waiʻanae Moku Education Center. The LRDP identifies the physical development needed to support the College mission and strategic goals, and it guides the future expansion and growth of the College. The LRDP includes a Phase I plan addressing facility needs and campus improvement plans to be implemented within the near-term (within five to seven years) and an Ultimate Plan to guide campus development over the long term (20+ years). The College updates its LRDP every five to ten years, and the chancellor recommends it for approval by the UH System administration and the BOR.

The BOR reviewed the College’s current LRDP in spring 2018. The LRDP not only establishes space requirements and allocations as shaped by the long-term goals, but also provides the framework by which the College can request additional funding for capital improvement projects.

As a central component of the LRDP, Phase I acknowledges capital improvement funding realities and also responds to guiding principles, accomplishes design goals, and prepares the campus for the opening of the Leeward Transit Station, part of a new state mass transit rail system. With a five- to seven-year planning horizon, Phase I reflects near-term, foreseeable improvements such as streetscape, main entry, courtyard improvements, revitalized pedestrian mall linking the rail station with campus, and interior and exterior improvements to existing facilities. The LRDP also includes site, utility, landscape, and electrical improvements as well as replacing the roof overhang (IIIB-6).

A fundamental element in the cost estimation of any major CIP construction- or renovation-related project is the completion and submission of the Capital Project Information and Justification Sheet. This document includes the project’s scope of work and its direct planning, design, and construction cost projections. It also requires information on the need and assessment of existing conditions, alternatives that the College would undertake if the project is deferred, benefits associated with completion of the project, and future operating cost impacts of the project. By requesting this level of detail, the College, the UH System, and the state of Hawai‘i ensure that all facility construction projects factor in the total cost of ownership prior to the project receiving funding approval by the state legislature and the governor. The College is requesting a major CIP project for 2019 related to fascia and sidewalk improvements. This project received UH Board of Regent approval and is before the state legislature for funding consideration (IIIB-40).

The UHCC Strategic Directions 2015-2021 is committed to developing a system of planned equipment replacement that accounts for the expected life of equipment, the cost of
replacement, and a systemwide budget for capital equipment replacement (IIIB-41). This systematic approach regulates the influence of equipment replacement on campus budgets so that large items do not impact the budget in unexpected ways. The replacement schedule will also provide a clearer picture of the amount of deferred equipment within the system.

Using a portion of a recent tuition and fee increase and funds garnered from legislative appropriations, the UHCC System centralizes funds from the seven campuses in an equipment replacement pool that is then distributed to each campus on an annual basis. The College has received nearly $1.5 million in equipment replacement funds using this process during the first two years of the program’s inception (IIIB-42).

**Analysis and Evaluation**

The College has established long-range capital plans that support its mission and institutional goals. Intentionally aligning long-range plans and institutional goals benefit both the campus and students. Long-range planning supports goals and prepares for the future. The College conducts long-range planning for capital improvement of new facilities and equipment that take into account the total cost of ownership.

III.C. Technology Resources

III.C.1.
Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution’s management and operational functions, academic programs, teaching and learning, and support services.

Evidence of Meeting the Standard

Appropriate and Adequate Technology Resources
The College ensures that it identifies its various types of technology needs and makes decisions about the use and distribution of technology services, facilities, hardware, and software based on these needs. These decisions include input from faculty, staff, and students.

The Information and Technology Group (ITG) maintains and manages all Apple and PC computers, nine computer classroom labs, institutional servers, the Voice Over Internet Protocol telephone systems, web servers, networking services, networked printers, information technology security, the Student Test Center, and Help Desk operations (IIIC-1).

The Educational Media Center (EMC) maintains 74 smart classrooms at the Pearl City campus and five smart classrooms at the Wai‘anae Moku Education Center. These classrooms are learning spaces with instructional technology that can be used to aid and enhance course instruction. The College developed smart classrooms over a period of time, which resulted in incremental equipment differences. At a minimum, each smart classroom has a lectern, dual-boot iMac (Mac and Windows OS), DVD, mixer/amplifier, speakers, projector, and screen or flat-screen monitor. In addition to the minimum equipment, many of the newest smart classrooms have a touch panel control, SMART Board, HDMI connector for laptops and other devices, Airplay, room microphone, and moveable tables and chairs. In addition to maintaining the smart classrooms, the EMC also operates technology equipment loans, professional development for learning with technology for teaching in the classroom and online, video production, and the Copy Center (IIIC-2, IIIC-3, IIIC-4, IIIC-5, IIIC-6, IIIC-7). The EMC also has a portable cart with a set of 20 Chromebooks that are available for instructors to use in the classroom.

As part of a University of Hawai‘i Community Colleges (UHCC) System initiative, the College offers online tutoring services through Brainfuse, an online tutoring service that provides students with tutoring in math, writing, reading, anatomy and physiology, nursing, biology, chemistry, physics, organic chemistry, accounting, economics, finance, statistics, and Spanish (IIIC-8).

The Kākoʻo ‘Ike (KI) Program provides support and services to students with documented disabilities. The KI Program provides qualified students assistive technology, access to Kurzweil 3000 (audible scanned text), Dragon Speak (voice to text), and JAWS for visually impaired students (IIIC-9).

The Library’s technology resources support instructional programs and teaching and learning. The Library provides over 65 desktop computers for students on the second and
third floors of the library facility. These computers include both PC and Mac as well as designated computers with specialty software needed by digital media students. In addition to the desktop computers, the Library has 30 laptops and 30 iPads that students can borrow for a four-hour interval and use anywhere on campus. Instructors can also borrow iPads to use in their classes. The Library provides two study rooms for students for collaboration and meetings. Each of these rooms is equipped with an Apple TV and Polycom/video conference equipment (IIIC-10).

The Library provides printer and scanning services for all students, staff, and faculty. Equipment includes two black-and-white printers, one color printer, one black-and-white printer/photocopier/scanner, and one black-and-white photocopier. Students can print from the Library’s computers/laptops or from their own devices. Any computer in the library facility can print on any of the networked printers. The Library has one high-speed scanning station and two other scanners on the second floor and one printer/photocopier/scanner on the third floor for students to use (IIIC-10). At the Wai‘anae Moku Education Center, there is one black and white printer, one color printer, a scanner, and one photocopy machine. Students can print from the Wai‘anae Moku Education Center’s desktop computers, laptops, or their own devices.

The Library provides access to 140 online databases for all faculty, staff, and students (IIIC-11). Faculty, staff, and students can access the resources from anywhere with an internet connection. The Library regularly works with instructional programs to supply access to databases that support their content.

The Library administers an information literacy exam that is required for English 100 students and optional for English 24/English as a Second Language 22 students. Through the Information Literacy program, students learn about how to access the many resources the Library offers such as the Hawai‘i Voyager catalog and online databases (IIIC-12, IIIC-13).

To ensure that current technology is adequately supporting operations, programs, and services at the College, the campus uses the Technology Support account and Smart Classroom account. In 2016-2017, the College allocated $327,000 to the Technology Support account, $20,000 to the Smart Classroom account, and an additional $200,000 to the Academic Services units for technology requests. From the additional $200,000 budgeted for Academic Services, $130,000 goes to the Technology Support account, $50,000 to smart classroom upgrades, and $20,000 to the Library for electronic resources for students and faculty (IIIC-14, p. 10). Overseen by ITG, the Technology Support account covers the maintenance, repairs, and upgrades for all computer classrooms, smart classrooms, faculty and staff computers, student computers, academic services, and technology infrastructure.

The Information and Computer Science (ICS) program coordinates the College’s grant-funded The Hub, Leeward Student Help Desk, which is staffed by ICS student interns. The Hub provides student customers with technical assistance for their personal electronic devices. ICS faculty identify and make decisions about the technology services, facilities, hardware, and software at The Hub. Student interns and The Hub customers make additional recommendations for technology resources. The Hub adheres to clear policies to protect the privacy and security of students and the College (IIIC-15). Because The Hub is a troubleshooting environment, it is isolated in its own network to prevent an infected device.
from infecting the campus network. Student interns do not back up a customer’s information onto any of The Hub devices to prevent the storage of illegal materials.

**Evaluation of Technology Resources**

The College regularly evaluates the effectiveness of its technology in meeting its range of needs. In accordance with the approved Integrated Planning and Budgeting Process, every division and unit completes an Annual Report of Program Data (ARPD) and generates resource request lists, which detail requested items. These items include technology resources needed by the division or unit. The Academic Services area has primary responsibility for evaluating technology resources for the campus. The Academic Services units review the instructional area resource request priorities and use this information to inform its Academic Services Area Prioritized Resource Request List. See Standard LB.9 for a detailed discussion of the Integrated Planning and Budgeting Process.

Until 2016, the Information Technology Standing Committee provided an additional review and recommendations on future technology needs to meet the current and future needs of the campus, instructional programs, support services, and students. The standing committee was comprised of the ITG coordinator, the dean of academic services, digital media and information and computer science faculty, the Help Desk coordinator, and the EMC coordinator (IIIC-16).

The Information Technology (IT) Standing Committee reviewed all of the resource request lists that College units and divisions develop through the ARPD. During the review process, the committee identified needs and examined future directions for IT. They presented a memo to the chancellor with recommendations for IT needs and resource implications. The administrative team and the Campus Council used these recommendations as part of the institutional prioritization of resource requests process (IIIC-17).

In fall 2016, the College disbanded the IT Standing Committee since it was the last standing committee that remained from the 2007 Planning Process. The current Ad Hoc Planning Process Review Committee is reviewing the need for an IT advisory committee and will make a recommendation in the 2018-2019 academic year.

In order to evaluate the effectiveness of its technology and identify needs of faculty, staff, and students, the College implements a variety of surveys on an annual basis. Faculty who teach in a smart classroom take the Smart Classroom survey to evaluate their satisfaction with the technology and the degree to which the technology supports their teaching. Faculty and students who have class in a computer classroom lab take the Computer Classroom Lab survey, which evaluates faculty and student satisfaction with the technology components of the Computer Classroom Lab and how they help or hinder their teaching or learning. The College uses the results of the Smart Classroom and Computer Classroom Lab surveys to identify technology needs of faculty and students and to gauge the effectiveness of the technology in improving student learning (IIIC-18).

To help identify technology needs in smart classrooms, computer classrooms, and with faculty computers, the Help Desk keeps a log of all trouble calls received and sends out a post-trouble call survey (IIIC-19). This log and survey help the EMC and ITG identify
technology need areas, which the units discuss in unit meetings in order to make recommendations and requests to the ITG for funding from the Technology Support account.

The College uses multiple methods for collecting data to assess and evaluate the technology needs for distance education (DE). Every semester the EMC sends a DE student survey to all DE students to assess their DE learning experience, which includes an evaluation of the technology, and posts survey results on the iTeach website (IIIC-5). The EMC collects evaluation data from each technology training session. The DE coordinator analyzes the results and feedback from the surveys and evaluations and includes any technology recommendations in the EMC ARPD in accordance with the approved Integrated Planning and Budgeting Process (IIIC-20).

**Provisions for Reliability, Disaster Recovery, Privacy, and Security**

For privacy and security, the College uses network security appliances and its security bundle subscriptions to protect devices that are connected to the College’s network. The Fortinet Fortiguard Security Bundle includes IPS and application control, antivirus, web filtering, endpoint-control, data leak prevention, DNS filter, and VPN. In addition to network security appliances and security bundle subscription, the College also provides McAfee Virus Scan Enterprise 8.8 at no charge to all faculty, staff, and students.

As part of the UH System, UH Information and Technology Services implements single sign-on, multi-factor authentication via the UH System’s identity management system. This is an option available to all faculty, staff, and students at the College. Multi-factor authentication is implemented using Duo Security, a trusted third-party cloud-based authentication system, integrated with the UH System’s web login system (IIIC-21). Widely adopted by higher education institutions, Duo Security is an excellent way to strengthen security by reducing the risks associated with standard password-based systems.

**Analysis and Evaluation**

The College’s numerous designated technology resources demonstrate its commitment to supporting technology infrastructure and services. The ITG, EMC, Library, and KI Program work together to ensure that technology services, facilities, and equipment adequately support all functions of the College.

III.C.2. *The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.*

**Evidence of Meeting the Standard**

The College has provisions to ensure that its technical infrastructure is robust, current, sustainable, secure, and reliable. As detailed in Standard III.C.1, the ITG maintains a cluster of server equipment with uninterrupted power supply units to provide maximum reliability of the College’s network. In order to maintain a reliable network, the ITG replaces network switches every five to eight years, battery backups every four or five years, and servers as needed (IIIC-22).
Wireless networking is available in 95 percent of all indoor areas including the Student Lounge, the Uluwehi Café, and the Learning Commons. All instructional spaces have wireless networking available. Outdoor coverage includes the courtyards, main concourse, and main parking lots. Wireless connectivity is available for students, faculty, and staff for campus and personal laptops and mobile devices.

The College has nine computer classroom labs. All hardware in the computer classrooms is on a four-year replacement plan. Additionally, the College upgrades software when necessary, through tuition and fee funds set aside for the Technology Support account, to meet the needs of technology-intensive programs (see Standard III.C.1). The upgrade schedules vary according to specific needs of individual divisions and units (IIIC-23). The Wai‘anae Moku Education Center has a new computer classroom lab that is on a four-year replacement plan.

The College has 79 smart classrooms with instructional technology that can be used to aid or enhance course instruction (IIIC-24). See Standard III.C.1 for details on smart classrooms. The EMC manages the smart classrooms using $20,000 annually from the Technology Support account to maintain them. In 2016-2017, the College allocated an additional $50,000 to upgrade the technology in smart classrooms and to renovate and upgrade five rooms.

The College bases its technology decisions on the results of evaluation of program and service needs in accordance with the College’s Integrated Planning and Budgeting Process. Every division and unit at the College completes an ARPD and generates resource request lists, which detail requested items. These items include technology resources needed by the division or unit, an explanation of why they are needed, and the evidence to support those needs. Requests for technology items on a division or unit’s resource request lists follow the procedure in the approved planning and budgeting process. See Standard LB.9 for a discussion on the Integrated Planning and Budgeting Process.

The College has structured processes to prioritize needs when making decisions about technology purchases. Technology prioritization takes place in three different areas. First, for items over $5,000, an instructional division or unit will include technology on its resource request list as part of its ARPD and the approved planning and budgeting process. Each division chair or unit head prioritizes purchases under $5,000 and pays for them with an annual budget allocation. Secondly, the ITG prioritizes campus wide technology needs, such as servers, routers, WiFi access points, and cabling. The Technology Support account is used to pay for campus wide technology priorities, upgrades, and maintenance. Lastly, the Academic Services area evaluates all technology items on the ARPD’s resource request lists submitted by each division and unit and prioritizes the items as part of the Academic Services Area Prioritized Resource Request List (IIIC-25).

**Analysis and Evaluation**

The ITG and EMC analyze the College’s technology infrastructure annually through the ARPD to ensure it is adequate to support its mission, operations, programs, and services.
III.C.3. 
*The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.*

**Evidence of Meeting the Standard**

The College ensures that technology resources at both the Pearl City campus and the Waiʻanae Moku Education Center are reliable, safe, and secure. The UH System Technology Infrastructure Office provides additional support for state wide connectivity among and between all UH System locations (III.C-26). ITG and the EMC manage and maintain the same services at both locations. The process in which technology is prioritized and allocated, as detailed in Standards III.C.1 and III.C.2, applies to both the Pearl City and Waiʻanae Moku locations.

The College provides an appropriate system for reliability and emergency backup. The ITG performs a daily disc-to-disc backup of critical servers that are located in the server room and stores the discs in a secured facility. The server administrator conducts annual recovery drills. To ensure the reliability of the College’s network, the ITG maintains a cluster of servers housed in a secured room equipped with environmental controls and protected by rack-mounted uninterrupted power supply units installed in a separate secured room. As of spring 2017, the College has service contracts for 30 percent of servers for same-day replacement of server components in the event of hardware failure. Older servers do not have same-day replacement contracts, but as the College replaces them, it will do so with servers that have same-day replacement contracts.

The ITG has developed a disaster recovery plan in the event damage occurs to the campus server room or if there is a major campus wide power outage. The College has rack-mounted uninterrupted power supply units and a gas-powered generator. During a power outage, the units can power essential critical servers for three to four hours. For longer power outages, the generator will be able to provide continuous power to the server room.

**Analysis and Evaluation**

The ITG ensures reliable access, safety, and security to technological resources at the Pearl City campus and Waiʻanae Moku Education Center.

III.C.4. 
*The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.*

**Evidence of Meeting the Standard**

The College allocates resources and provides appropriate instruction and support in the effective use of technology and technology systems related to the College’s programs, services, and operations. The EMC is the primary unit that provides those types of training. The mission of the EMC unit is to inspire, facilitate, and support teaching and learning using
technology (IIIC-27). The EMC has four full-time tenured educational technologist faculty members with one serving as the EMC coordinator and another serving as the DE coordinator. Having four full-time faculty dedicated to educational technology professional development and support for faculty, staff, students, and administrators demonstrates the importance of technology in teaching and learning at the College.

The educational technologists closely follow national trends in technology and teaching and create workshops to enrich the professional development of the faculty, staff, students, and administrators. The educational technologists at the College have an annual $5,000 budget to experiment with emerging technologies, which provides the means for the technologists to be informed of emerging technologies and their application in the classroom.

The EMC offers professional development opportunities and online learning resources for faculty, staff, and administrators using technology in the classroom (collectively referred to as Learning with Technology for Teaching) and online (collectively referred to as iTeach). Some of these opportunities include a set of regular workshops each semester to help faculty use UH System-supported technologies to enhance productivity and professional practice such as smart classrooms, Laulima (the UH System collaborative learning environment based on the Sakai platform), a visual syllabus, Gmail, and Google Docs. The EMC also offers other workshops and workshop series every year that focus on enhancing teaching and learning with technology in the classroom such as flipped classroom and course design. Particularly for DE faculty, the EMC offers an online workshop series each semester on how to teach online, the art of teaching online, and how to create an online course as well as a week-long professional development opportunity in the summer (IIIC-4, IIIC-20, IIIC-28). For further discussion of the professional development programs offered by the EMC, see Standard III.A.14.

To support students with the effective use of technology, the EMC provides a collection of resources and tutorials known as iLearn. This website provides students with tools to evaluate their technology skills, an introduction to online learning, strategies for online success, tools for “getting tech ready,” a Laulima orientation, and other technology and DE resources (IIIC-29).

In addition to professional development workshops, Intec (part of the EMC) supports the effective use of technology through the Technology Equipment Loan program (IIIC-3). This program provides faculty and staff with technological equipment and instructions on how to properly use it in the classroom.

The Video Production unit offers faculty and staff production support with filming and creating videos for the classroom and the filming of cable courses (course instruction offered through cable television). All faculty and staff at the College may make use of these video production services (IIIC-6).

Although the primary role of the ITG is not related to professional development, the ITG has been hosting professional development workshops open to faculty, staff, and students such as “Protecting Your Identity Online” and “Tips to Maintain Your Computer and Mobile Devices” (IIIC-30, IIIC-31). The ITG conducts these workshops as part of the Success Connection workshops offered by the Writing Center. Student feedback has been consistently
positive. For example, in spring 2017 and fall 2017, student feedback averaged 4.75 on a five-point scale that the workshops benefitted them academically or personally (IIIC-32).

The College regularly evaluates the training and technical support it provides for faculty and staff to ensure these programs are appropriate and effective. After completing a professional development workshop or series of workshops, each participant completes a survey to evaluate the effectiveness of the workshop. For workshops such as teaching online, which have multiple meetings over the course of a year, participants complete a formal evaluation and presentation of artifacts. Furthermore, the EMC has developed a badging system as a method to recognize professional development efforts and completion. These evaluations help the EMC ensure that the programs and workshops offered are appropriate and effective. For further discussion of how the College evaluates professional development programs that focus on information technology, see Standard III.A.14.

Analysis and Evaluation

Through the EMC and ITG, the College provides quality instruction and support for faculty, staff, students, and administrators in the effective use of relevant technology and technology systems.

III.C.5. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

Evidence of Meeting the Standard

The College has established policies and processes to make decisions about the appropriate use and distribution of its technology resources. As part of the UH System, the College is governed by the UH Systemwide Policies and Procedures Information System (PPIS) (IIIC-33). The purpose of this system is to establish system wide policies and practices for the acceptable use and management of all UH information technology resources. The PPIS defines and provides effective protection, equitable access, and administrative guidelines for the use of those resources. The PPIS also supplements existing laws, regulations, codes of conduct, agreements, and contracts that are currently in place. For a detailed discussion of the PPIS, see Standard IV.C.7.

The PPIS covers responsible use, confidentiality and security of electronic information, ownership and disclosure information, privacy of student information, commitment to access, special responsibilities of system and network administrators, and due process.

In addition to the PPIS, the UH System has established policies on UH username practices, security and protection of sensitive information, and system and campus wide electronic channels of communicating with students. The ITG website posts publicly-accessible links to these policies (IIIC-34).

The College has a Personal Equipment Use on Campus Network policy governing the use of personal technology on the College’s network (IIIC-35). The policy is applicable to all...
faculty, staff, and students and sets forth policies for connecting personal equipment to the College network in order to protect technological resources.

The UH website publishes the PPIS and all UH System policies, and they are accessible to the public. The ITG website posts links to the PPIS, other UH System policies, and the Personal Equipment Use on Campus Network policy, and they are publicly available.

**Analysis and Evaluation**

The College has well defined policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

</table>
III.D. Financial Resources

III.D.1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)

Evidence of Meeting the Standard

Leeward Community College (Leeward CC) and the University of Hawai‘i Community Colleges (UHCC) System are committed to supporting and sustaining student learning programs and services and improving institutional effectiveness. For further discussion of the UHCC System’s allocation of resources, see Standard IV.D.3. The College maintains sufficient revenue streams to cover base operations as well as to support initiatives that innovate and enhance programs and services. The College’s Integrated Planning and Budgeting Process identifies institutional priorities that align with strategic goals and objectives and determines sources of revenue to fund, to the extent possible, some of these institutional priorities. The College manages this inclusive process with integrity to ensure that it maintains financial stability.

The campus administration approved the College’s operating budget for fiscal year 2017-2018 with a projected $41,603,055 in unrestricted revenue to fund an unrestricted expenditure budget of $39,733,896 (III.D-1, p. 8). Projected revenues exceed expenditures by $1,869,159. Excess funds will be combined with internal budget reallocations to fund high priority resource needs that the College identified through the Integrated Planning and Budgeting Process. These funds will also be used to cover unanticipated or contingency-related expenditures. Reserve requirements exceed both the minimum five percent and targeted ten percent thresholds (III.D-2).

All of the UHCC campuses rely on state-appropriated revenues (general funds) to subsidize a significant portion of their operations in order to keep the cost of post-secondary education within reach of target student populations. The UH vice president for community colleges and the UHCC chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding. Current service funding is equal to the prior year general fund appropriation, plus any previously agreed upon collective bargaining augmentations, minus base budget reductions, plus funds for new initiatives (program change requests). Downturns in the state economy normally drive reductions in the general fund base budget; however, there have been no significant budget reductions since fiscal year 2010-2011.

The general funds received by the campuses combined with tuition generated from credit instruction comprise the general operating budget of the campuses. In 1995, the state legislature authorized the establishment of the Tuition and Fees Special Fund and permitted the UH System to retain and expend revenues from tuition in order to “maintain and improve the university’s programs and operations” (III.D-3). Prior to this action, the state retained tuition revenues and the UH System received general fund appropriations for all of its
general operating expenses. This change allowed the community college campuses to implement planned tuition increases designed to cover base operations as well as fund initiatives supporting educational improvement and innovation. In spite of consecutive tuition increases over the past 12 years, the community college campuses remain affordable. The 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education identified the UHCC campuses as the most affordable two-year public higher education institutions in the nation (IIID-4).

The funding of the operating budget through a combination of general funds and Tuition and Fees Special Fund has a significant stabilizing effect on campus operations. General fund allocations remain relatively stable even when enrollments go down, mitigating the impact of the loss of Tuition and Fees Special Fund revenue. Conversely, when enrollments grow, campuses generate additional revenue to meet increased costs. As mentioned previously, reductions to the general fund base itself usually coincide with downturns in the state economy; however, these periods often have increases in enrollment as students leave the workforce to further their education.

Other special and revolving funds finance certain aspects of campus operations. Unlike general funds and Tuition and Fees Special Fund that support general operations, these funding sources support specific program activities, including noncredit instruction, summer session instruction, conferences, and student activities. The individual funds, after being established by statute, operate on a self-sustaining basis. The programs must cover direct costs and generate an administrative cost fee to cover their equitable share of general campus operating expenses.

Extramural funds are project-based funds from federal, state, and private sources, which relate to research and training grants or contracts. The College obtains these funds through competitive grants or contracts and focuses the funds on specific improvements or on services provided to the contracting agency. The University Office of Research Services administers all extramural funds.

The UHCC System requires that each campus maintains adequate financial resources to ensure financial stability (IIID-5). All community college campuses maintain sufficient cash reserves to address emergencies (five percent minimum reserve) and other operating contingencies such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (ten percent targeted reserves) (IIID-1).

The UHCC System supports all campuses by securing and allocating capital improvement program (CIP) funding to fund major construction and renovation projects. The primary revenue source for UH System CIP projects comes from state-issued general obligation bonds where the state funds debt service payments to retire the bonds. Individual campuses do not pay for these long-term obligations.

The framework of financial planning begins with a comprehensive operating financial plan submitted to the UH Board of Regents (BOR) for its approval prior to the start of each fiscal year. The financial plan provides the BOR with oversight to ensure that the UH System is managing its resources in a fiscally responsible manner.
The financial plan includes all appropriated funds including the operating budget and other special and revolving funds. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures. The College analyzes the budgets on a quarterly basis and must explain to the BOR at the close of each quarter variances exceeding established thresholds at the UHCC System level (IIID-1). As the third largest institution in the UH System, Leeward CC is able to effectively and efficiently deliver a quality educational experience for students while receiving the least amount of funding on a per student basis in the UH System (IIID-6).

The College’s annual Integrated Planning and Budgeting Process, which is discussed in detail in Standard LB.9, culminates with an Operational Expenditure Plan for the College’s annual operating budget. The College incorporates into the plan the institutional priorities that it develops through the completed Annual Report of Program Data (ARPD) templates. The plan is a more detailed and focused budget planning document than the operating budget that the BOR approves. The Operational Expenditure Plan articulates specific objectives that directly support student learning and improvements to institutional effectiveness using line item budget allocations, strategic reallocations, and incremental budget adjustments (IIID-1).

The UHCC System office provides additional funding allocations to the College for priority initiatives that support institutional improvements and strategic plan goals. The Hawai‘i Graduation Initiative is an example of a high-priority strategic plan initiative. This initiative aims to increase the number of college graduates within the state. Its strategies reflect the UHCC System’s commitment to expand workforce development opportunities across the state and to support increased student participation and completion, particularly for students from underserved populations and regions.

Performance-based funding is a strategy to generate greater institutional productivity, accountability, and educational attainment. Through funding incentives, performance-based funding encourages efficient resource allocation, greater awareness and attention to strategic priorities, and a results-oriented campus culture. The UHCC System and the seven community college campuses currently earmark approximately $6.5 million of its base budget for performance-funding purposes. Starting in fiscal year 2015-2016, the UH System began providing performance-funding allocations that contributed an additional $2.0 million to the performance-funding pool of resources. Combined, performance funding represents over four percent of the total operating budget. The College has historically performed well in achieving its performance-funding goals and has received nearly all of the possible performance-funding allocations over the last several years (IIID-7).

Performance-funding allocations support the Hawai‘i Graduation Initiative by linking funding to the successful attainment of goals that promote the initiative. Performance measures related to increasing student participation and completion, particularly for students from underserved populations and regions, and expanding workforce development opportunities, are closely tied to the initiative’s strategies.

The College uses innovation and strategic initiative funding allocations to address critical needs identified through the strategic planning process and support the goals of the Hawai‘i Graduation Initiative. Some of the recent initiatives include subsidizing the cost of new
classes associated with enrollment growth, reforming developmental education, improving retention and persistence through guided pathway and early intervention systems, expanding financial aid support, supporting Native Hawaiian student achievement, and replacing aging equipment. The UHCC System office holds the funds used to support these initiatives and distributes them on an annual basis to the community college campuses.

The campus fiscal officer enters all operating budgets and other special and revolving fund budgets into the financial management system at the individual account level and by major category of expenditure (regular payroll, lecturer payroll, casual hire payroll, student help payroll, other current expenses, and equipment). The College monitors the budgets in several ways: with monthly budget to actual financial reports that are available on the UHCC Budget website, through the UH System’s online Kuali Financial System, and through various hardcopy financial reports that the College’s Business Office distributes on a monthly basis (IIID-8).

Each account manager, such as division chairs and unit heads, monitors and adjusts the operating budgets (general funds and tuition and fees special fund) throughout the year as needed. For other special and revolving funds, the College monitors business and financial plans to track revenue and expenditure projections. Finally, the College follows best practices regarding budget and cash management to ensure that it can cover cash flow requirements, long-term obligations, and other unanticipated costs as they arise.

**Analysis and Evaluation**

The College maintains positive cash flows and cash reserves to develop, support, and sustain student learning programs and services and improve institutional effectiveness. The budget and budgeting process is well documented. General funds, special and revolving funds, and tuition and fee funds provide adequate resources for programs and services. The College manages its funds efficiently and with integrity to ensure it provides a quality education to students at the lowest per student cost in the UHCC System.

**III.D.2.**

*The institution’s mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.*

**Evidence of Meeting the Standard**

The UHCC’s mission and strategic goals are the foundation for all planning, including financial planning. Strategic goals drive budget priorities in an effort to achieve the outcomes directed by the BOR. The College aligns its mission and goals to the UHCC System mission and goals.

The UH System identified guiding principles in the document *UH Strategic Directions, 2015-2021*. This document, approved by the BOR in January 2015, provides the framework, objectives, and priority targets that the system campuses use to develop their own strategic
plans (IIID-9, IIID-10, IIID-11). For further discussion of the UH Strategic Directions 2015-2021, see Standard IV.C.8.

The timing of the financial planning process at the College is tied to the state and UH System budget processes. The UH System president prepares a budget for submission to the BOR.

Upon approval by the BOR, the UH System submits its budget to the governor for review and incorporation into the executive budget request. The state legislature considers the executive budget during its regular session in January. The legislature usually passes appropriations in May and transmits them to the governor for approval. After the governor approves them in June, the state sends allocation notices to the UH System, including any restrictions imposed on legislative appropriations. The president determines distributions of general funds including a UHCC-level distribution. The vice president for community colleges and the UHCC chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding.

The College’s Integrated Planning and Budgeting Process begins with its mission and Strategic Plan 2015-2021. All programs and services complete a program review using the mission and strategic plan goals as a guide. The campus leadership meets in late summer to prepare and plan for the upcoming academic year. For a more detailed description of the planning process, see Standard LB.9.

The BOR conducts budget and financial reviews. Regents Policy (RP) 8.204 sets the UH System’s fiscal management, budget process, legislative budget proposal, and preparation processes (IIID-12). The BOR follows best practices to establish policies that ensure that resources are strategically invested in the UH System’s mission, vision, and plans.

The College disseminates information about the annual budget and operational expenditure plan via email upon final approval by the chancellor, usually at the beginning of each academic year, and the vice chancellor of administrative services (VCAS) provides budget updates to the campus community at convocation each semester. The VCAS posts these budget-related documents and convocation presentations on the College intranet (IIID-13, IIID-1).

In addition, the College shares its budget and financial information on a quarterly basis with the College’s Financial Management Group, which was created in fall of 2016. The role and purpose of the group is to “share, discuss, and review information, processes, and procedures related to matters involving the budget, financial management, and business-related functions of the College.” The group, comprised of faculty, staff, and administrators who have budget, fiscal, and/or business-related responsibilities, is a continuous improvement initiative that the College’s fiscal administrator and VCAS facilitate (IIID-14).

Analysis and Evaluation

The College has a well-established Integrated Planning and Budgeting Process that begins with the mission and goals. The College aligns its mission and goals with the UH Strategic Directions 2015-2021 and the UHCC Strategic Directions 2015-2021. Policies and
procedures related to this process ensure sound financial practices and financial stability. The VCAS distributes budget and financial information to the campus community on a regular basis at the fall and spring convocations and upon final approval of the Operational Expenditure Plan. Additionally, the College shares quarterly updates related to the budget, fiscal, and business operations of the College with the Financial Management Group. All budget and financial information is available online on the College intranet.

III.D.3. 
The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

Evidence of Meeting the Standard

The UH System has clearly defined guidelines and processes for financial planning and budget development. The Budget Policy Paper and budget instructions outline the budget development process. The Budget Policy Paper provides the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The budget instructions establish the budget philosophy, major budget assumptions, expectations, and timeline. The budget instructions also explain the operating budget revenue and expenditure assumptions including enrollment and tuition revenue projections, payroll cost assumptions, and utility cost projections. Finally, the budget instructions provide assumptions for developing CIP revenue and expenditure projections and outlines expectations for increased efficiencies and productivity.

Budget development documents are available on the UH website (IID-15). These documents include the Budget Policy Paper and budget instructions, a proposed budget request to the BOR, and the status of both operating and CIP budgets through the various stages of the budget development cycle (IID-16, IID-17, IID-18).

The Budget, Planning and Finance office distributes UHCC System budget execution documents at monthly VCAS meetings and/or posted on the UHCC Budget and Planning and Finance website (IID-19). These documents include general operating budget allocations, CIP projects, and consolidated financial statements (IID-20, IID-21, IID-22).

The College uses the Integrated Planning and Budgeting Process described in Standard LB.9 to gather input from all campus constituencies before finalizing the budget for the following fiscal year. This process culminates with a list of Institutional Priorities that have been vetted through the primary campus governance groups, the Faculty Senate and the Campus Council, and then voted on by the Campus Council. The VCAS and the fiscal administrator refer to the Institutional Priorities list after completing an initial draft budget. The draft budget uses information from UH System and UHCC System allocations, internal campus reallocations, tuition and fee projections, and performance funding results offset by projected operational expenditures for the upcoming fiscal year. Once the VCAS and fiscal administrator draft the budget, the College allocates any remaining available funds based on the Institutional Priorities list. An example is the Operational Expenditure Plan for fiscal year 2017-2018.
Analysis and Evaluation

The UH System and UHCC System offices have clear processes, policies, and procedures for budget development and financial planning, which the College follows. The College uses its Integrated Planning and Budgeting Process to ensure all campus constituencies have an opportunity to submit plans for future program growth development and request resources. This is a broad-based process that is driven by the mission and strategic plan.

III.D.4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Evidence of Meeting the Standard

Institutional planning at the College reflects a realistic assessment of resource availability and works towards the further development of resources to meet expenditure requirements and strategic goals. Tuition increase proposals balance the competing needs of keeping college affordable, meeting immediate campus needs, and achieving the goals in the College’s Strategic Plan 2015-2021 (IIID-11). The UHCC System has successfully maintained this balance by establishing a tuition rate schedule that ensures adequate resources for ongoing needs and new funding to meet strategic objectives while remaining affordable when compared to other two-year institutions.

The College has a proven track record of using its resources wisely and efficiently. In periods of declining enrollment, the College has made selective and strategic decisions and investments to ensure programs and services can continue to operate to meet the needs of its students such as re-allocating support positions to those areas that have the greatest need. Additionally, the College has been successful in diversifying its resource base by receiving UHCC System funding for various student success initiatives and federal grant funds that provide support for programs and services that align with the College mission and strategic plan. An example is the Title III grant, Part A and Part F, from which the College received a $13.6 million award from the federal government (October 1, 2014, through September 30, 2019) to enhance services to Native Hawaiian students by renovating the Hālau ‘Ike O Pu‘u‘ula, several science labs, expanding space and services to the Wai‘anae Moku Education Center, and modernizing and renovating the Shade House (IIID-25, IIID-26, IIID-27).

The UH System and UHCC System offices provide the College with access to several financial forecasting models, which are an integral component of assessing realistic financial resource availability for institutional operations and facility planning. The College makes use of multi-year financial models for tuition and fee revenue projections and financial projections related to campus operations across all fund types (IIID-28). To assist with facility planning, the College has access to a six-year CIP plan, annually updated by the UH System, which provides construction-related project and funding details for all institutions (IIID-29). Additionally, the College’s revenue-generating accounts annually complete business plans that document and forecast all sources of revenue and anticipated expenditure
levels. These planning and financial models present data that the College uses to forecast revenue and expenditure requirements.

**Analysis and Evaluation**

The College completes its financial planning using realistic projections of expected resources and anticipated expenditures by using several forecasting and planning models. As potential partnerships and grant opportunities become available, the College assesses each proposal’s appropriateness and resource requirements as well as how the proposal aligns with the College mission and strategic plan.

**III.D.5.**

*To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.*

**Evidence of Meeting the Standard**

The College uses several UH System administrative software systems to conduct the business affairs of the College. These systems provide the framework and structures for the College to manage financial resources and business processes. Systems include Banner for students, PeopleSoft for human resources and payroll, and Kuali for financial management. The UH System manages these administrative systems, which are designed to segregate duties and responsibilities among end-users, financial managers, and approval authorities for all financial-related transaction revenue and expenditure processing.

The various administrative software systems provide scheduled, timely, and detailed data and reports. The College incorporates this information into the financial planning models and systems for budget and resource allocation as well as uses it for management purposes. The College uses the data to develop a formal budget, which it analyzes and reviews throughout the fiscal year ([III.D.8]).

UH, UHCC, and institutional-level policies and procedures provide the basis for sound financial management and business practices that include internal control mechanisms. A recent example of continuous improvements made in this area is the implementation of UHCC Policy (UHCPCP) 8.200, Financial and Operational Oversight of Revenue Generating and Financially Self-Sustaining Programs. UHCC developed this policy following recommendations made by, and in concert with, the UH Office of Internal Audit and the community college campuses. Following an evaluation process, UHCC developed this policy to improve internal control systems and subsystems related to accounting, cash handling, reconciliation, billing, and inventory management practices for revenue-generating activities of the colleges ([III.D.30]). When the College implemented the policy requirements, it received a favorable opinion from the UH Office of Internal Audit in February 2017 following an audit of selective revenue-generating programs ([III.D.31]).
The College incorporates revenue and expenditure budgets for all funds and programs into the annual Integrated Planning and Budgeting Process. This process includes incremental budget adjustments to existing allocations, requests for new funding, and business plans for all revenue-generating activities. The College ties all financial decisions regarding existing allocations, reallocations, or requests for new funding to the strategic plans of the College, the UH System, and the UHCC System. Various supporting data, including outcomes assessment data or service-related outcome measures, help justify these financial decisions. See Standard LB.9 for more detailed information on the planning process.

External audits of the entire UH System financial statements further support the College’s integrity and internal controls. On December 15, 2016, Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016 (IIID-32). The opinion read, “In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai‘i, as of June 30, 2016 and 2015, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.” Additionally, the audit’s management letter noted no material deficiencies following completion of the A-133 audit (IIID-33).

In the event of an audit exception or management advice item, the College would provide a prompt and timely response to ensure that corrective action is taken to prevent any future occurrence.

**Analysis and Evaluation**

The College has appropriate internal control structure and mechanisms in place and disseminates financial information in a timely manner to support decision making. The College regularly reviews and updates financial management practices to improve internal control systems.

III.D.6. *Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.*

**Evidence of Meeting the Standard**

As stated in Standard III.D.5, an external validation of the financial statements at the macro level ensures financial stability and cash flow position (IIID-32). To ensure accuracy and credibility of financial and budget related documents at the institutional level, the College, in consultation and coordination with the UHCC System office, utilizes various multi-year financial projection models, historical revenue and expenditure patterns, business plans, and enrollment forecasts to determine anticipated cash and fund balances, revenues, and expenditures. Additionally, the fiscal administrator and the VCAS perform internal and independent reconciliation procedures to ensure accuracy and to maintain integrity in financial and budgeting planning (IIID-34).
The College provides direct support to student learning programs and services through the Integrated Planning and Budgeting Process as detailed in Standard I.B.9. This program review process ensures that resource requests and subsequent investment of resources are aligned with program needs and activities and with the College’s strategic plan goals and objectives.

**Analysis and Evaluation**

The College has internal and external control and procedures in place to ensure accuracy and credibility in financial planning and budgeting documents. The College makes allocations based on the Integrated Planning and Budgeting Process to align financial resources with student learning programs and services and to ensure consistency with the goals and objectives of the strategic plan.

III.D.7.  
*Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.*

**Evidence of Meeting the Standard**

The College has not received any external audit findings or management letters of any material weaknesses or deficiencies during the last six years. Previous external audits are available on the College intranet (IIID-35).

Should the College receive an audit finding or management letter, the College would make timely and thorough corrective action to address the issue(s) (IIID-33). The College would discuss audit findings with affected departments to ensure clear communication of the reason for the finding and the regulations or requirements upon which the audit based the finding (IIID-32). Campus administrative officials and campus or system support departments would also receive the audit findings if they impact the officials or departments or if the officials or departments would be involved with corrective action.

Affected departments and administrative or support staff would discuss and develop corrective action plans which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, or implementation of new administrative software systems. The Destiny administrative software system is an example of a new administrative software system implemented at the UHCC System and campus level. This system, designed specifically for continuing education and noncredit programs, improves regulatory compliance, increases and enhances financial and programmatic data available for monitoring and decision-making, and improves internal controls.

The College would then communicate corrective action plans to the auditor in accordance with deadlines set by the auditor or coordinating office such as the Office of Research Services (A-133 audit corrective action plans). Corrective action plans would identify the program, the individuals responsible for implementing the corrective action to address the audit finding, the actions taken to prevent reoccurrence, and the date corrective actions were taken.
Analysis and Evaluation

External financial audits take place on a regular basis and procedures are in place to ensure that the College addresses and communicates its responses to audit findings or management letters in a timely and thorough manner. The College has not received any audit finding or management letter over the past six years. The College shares information regarding past external audits, institutional responses to external audits, and financial and resource planning with the campus community and posts the information on the College intranet.

III.D.8.
_The institution’s financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement._

Evidence of Meeting the Standard

Several external and internal agencies or departments evaluate and assess the UH, UHCC, and College’s financial and internal control systems for validity and effectiveness on a regular basis.

External financial audits take place on an annual basis and include a report on internal control over financial reporting and compliance with respect to provisions of laws, regulations, contracts, and award agreements. This report describes the scope of testing of internal control and compliance. Noncompliance could have a material effect on the consolidated financial statements. The 2016 external audit reported on the internal control over financial reporting: “[W]e did not identify any deficiencies in internal control that we consider to be material weaknesses”.

The audit also provides a report on compliance for each major federal program and a report on internal control over compliance. The 2016 external audit reported on compliance for each major federal program: “In our opinion, the University complied, in all material respects, with the types of compliance requirements…that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2016.” Finally, the same external audit reported on internal control over compliance: “We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses.”

The State of Hawai‘i’s Office of the Auditor conducts additional reviews and audits of the UH, UHCC, and the College’s funds and financial reports per the Hawai‘i Revised Statutes. Section 23-12 of the Statutes requires that independent auditors review the UH special, revolving, and trust funds and accounts once every five years and that this review includes an evaluation of the original intent and purpose of the fund, the degree to which each fund achieves its purpose, and an evaluation of the fund’s performance standards. Independent auditors completed the last report in December 2014 and stated that the UHCC Special Fund “continues to serve the purpose for which it was created…” (IIID-36).

The UH Office of Internal Audit performs audits and reviews of select programs and may identify internal control deficiencies and recommendations for improvements. The office reports findings and recommendations from internal audit reviews to the BOR Committee on
Independent Audit to ensure appropriate oversight, management, and operating responsibilities. An example of action taken due to an audit comes from the internal audit review of the UHCC’s revenue generating programs, which is highlighted in Standard III.D.5. Through this audit review and a follow-up consultation process between the Office of Internal Audit, the UHCC System office, and the College, the UHCC System office developed UHCCP 8.200. The College took measured steps to improve and strengthen its internal control processes, implemented a formalized annual business plan process for revenue-generating programs, and established the Financial Management Group (IIIID-30, IIIID-14).

The creation of the College’s Financial Management Group in fall 2016 provides an additional level of accountability in support of this standard. The purpose of the group is to “share, discuss, and review information, processes, and procedures related to matters involving the budget, financial management, and business-related functions of the College,” resulting in “more informed financial and business-related management practices, stronger internal controls, and increased access and reliability of financial information to assist in decision-making and the protection of financial assets.” The group meets on a quarterly basis and is comprised of all faculty, staff, and administrators who have budget, fiscal, and/or business-related duties and responsibilities. A specific improvement area that came as a result of collaborative efforts between the group and the administration is an annual business plan that the College requires from all of its revenue-generating activities and programs. Each business plan provides revenue, expenditure, and cash flow estimates, and the College incorporates the plans into its overall financial planning forecasts and projections.

The College regularly undertakes an evaluation and assessment of its financial management and internal control procedures through the Integrated Planning and Budgeting Process as described in Standard LB.9. The College and the UHCC System campuses use various comparable measures to capture financial and internal control metrics. The College reviews and assesses these measures and ultimately includes them in the Administrative Services ARPD (IIIID-37). This process helps administrative services develop strategies and action plans to improve efficiencies and performance.

**Analysis and Evaluation**

The College has demonstrated through various external and internal audits and reviews, coupled with the College’s own self-assessment and evaluation processes contained within the Integrated Planning and Budgeting Process and the Financial Management Group, that it regularly evaluates and assesses financial and internal control systems and uses the results to support continuous improvement efforts.

III.D.9.

*The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.*
Evidence of Meeting the Standard

Consistent with the UHCCP 8.201 on Unrestricted Fund Reserve, the College maintains sufficient cash reserves in order to provide for financial stability ([IID-5]). All community college campuses, including Leeward CC, meet both the five percent minimum reserve and the ten percent target reserve requirements of the policy. Meeting these cash balance reserve thresholds ensures that sufficient resources are available to meet unplanned contingencies, emergency response, and repair request needs ([IID-38]).

The College has two primary sources of revenue to support its operating budget: state general fund appropriations and tuition revenue. The state legislature appropriates general funds to the community college campuses. The state provides approximately one quarter of the funding prior to the beginning of the fiscal year with the remaining full-year allocation made prior to the end of the first quarter. The College uses state general fund revenues almost exclusively to pay employee salaries. The College collects tuition prior to the beginning of fall and spring terms and expends these funds over the course of each term. Tuition revenue projections can be adjusted according to actual enrollments, and the College modifies the budget to reflect the adjustment. The College uses revenue from tuition to support salaries and other operational expenses. Unexpended tuition revenue is the primary source of the College’s cash reserves.

Revenue-generating programs and activities maintain sufficient cash balances to accommodate working capital requirements. These programs provide annual business plans that project revenues, expenditures, and cash balances. Financial reports and the Kuali Financial System regularly compare the budget to actual performance of these programs to prevent cash flow issues.

The state of Hawai‘i, which includes the UH and its ten campuses, is self-insured and provides comprehensive oversight of insurance policies and coverages for all state agencies. The College has a delegated responsibility to review potentially high-risk programs and activities and to ensure that they properly assess these programs and activities to minimize or prevent liability concerns. The UH Office of Risk Management provides the College with oversight for all insurance-related requirements and issues. This office assists the College in identifying and managing risks in order to reduce losses, maintain financial stability, and protect resources ([IID-39], [IID-40]).

The projected unrestricted Tuition and Fees Special Fund cash balance of the College is $2,418,871 for fiscal year 2017-2018 ([IID-1]). In addition, campus reserves are 20.05 percent of the combined prior year expenditures of the General Fund and Tuition and Fees Special Fund. The College has direct access to these resources should a financial emergency occur or extraordinary financial obligations exist ([IID-41]).

Analysis and Evaluation

The College has sufficient cash flow and reserves to meet the needs of its programs and services. Appropriate strategies and realistic plans are in place to meet financial emergencies and unforeseen occurrences and to provide for appropriate risk management oversight.
III.D.10.
*The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.*

**Evidence of Meeting the Standard**

The College uses a variety of financial management tools, reports, and models to plan, project, monitor, and assess its financial condition. The reports help to monitor extramural funds, loan funds, and non-extramural funds. These include quarterly expenditure reports, monthly budget status reports, monthly cash management reports, and the Kuali Financial System.

Policies and procedures are in place to ensure financial management integrity at the College, regardless of the source of funds. These policies and procedures ensure that sufficient resources and fund availability (allocations, appropriations) exist, that the College reviews proper expenditure authorizations, and that the College is in compliance with all applicable statutes, rules, and regulations.

The College demonstrates compliance with Federal Title IV regulations and requirements in the following ways:

- Documentation to demonstrate compliance with regulations and requirements such as student eligibility based on need, financial aid awards that do not exceed unmet need, or maximum award limits
- Adjustment of awards when unmet need changes or student withdraws
- Repayment of federal program for over award/adjustments
- Reporting of awards, adjustments, and withdraws to federal agency
- Exit interviews for students with loans

As stated in Standard III.D.5, Accuity LLP concluded its financial and compliance audit on the UH System that covered the period from July 1, 2014, to June 30, 2016, and found the financial statements fairly presented the financial position and cash flows of the UH System (IIIID-32). Over the past six years, the College has not been cited for any material weaknesses or deficiencies in compliance or internal controls from external audit findings.

The College has special fund accounts for campus units and activities that generate revenue, including student activities, noncredit programs, vending services, food services, and other programs that support the College. The external UH System annual financial and compliance audit and the legislative audit of special funds includes an audit and review of the College’s special funds.

The UH Foundation manages monies from scholarships, fundraisers, and donations and has an internal control system to monitor the accounts. The UH Foundation has a responsibility to ensure that they properly process authorized transactions in a timely manner and that they make disbursements that are in compliance with account restrictions.
The UH Central Accounting Office and the Office of Research Services provide oversight, policies, and procedures for all grants to ensure that they are managed in compliance with all regulations, internal restriction, and laws governing the agreements. The College has a Grants Coordinator position that assists faculty, program directors/coordinators, principal investigators, and administration in the efficient use of grant funds, timely delivery of reports, and other post-award activities. Additionally, the grants coordinator assists in pre-award submissions for new proposals. The Business Office staff includes several professional positions that provide post-award grant accounting support to ensure proper recordation of revenues and expenditures and to coordinate and facilitate financial report preparation and distribution.

**Analysis and Evaluation**

The College demonstrates through a variety of methods that it practices effective oversight of finances for all its programs including financial aid, grants, externally funded programs, and other organizations or foundations.

III.D.11. 
*The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.*

**Evidence of Meeting the Standard**

The College participates in short-term and long-term planning as noted in Standard I.B.9 and III.B.2. All financial planning and resource allocation decisions incorporate payments of long-term liabilities and future obligations, including debt service, system wide assessments, and any compensation-related adjustments (IIID-34, IIID-42). The College uses the same type of financial planning and information in developing an annual budget, short-term planning, and other fiscal-related planning efforts.

The community college campuses do not issue debt for Other Post-Employment Benefits (OPEB), insurance costs or repairs, and maintenance projects, which the state funds. The items currently financed with long-term debt are projects that directly create revenue streams that offset debt service costs. Refer to Standard III.D.14 for further discussion.

**Analysis and Evaluation**

The College plans for the payment of liabilities and future obligations to ensure its short-term and long-term financial solvency.
III.D.12.

*The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.*

**Evidence of Meeting the Standard**

The state general fund pays the employer’s share of OPEB obligations for general funded positions for all state agencies. Therefore, employer OPEB obligations for general funded positions are not part of the College’s operating budget.

The College is obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the College. The College’s contributions are calculated as part of the state’s total contribution requirements and are reimbursed to the state’s general fund as part of the fringe benefit rate on employees’ actual salaries. The UH System’s annual OPEB cost for non-general funded employees is calculated based on the annual required contribution of the employer, an amount actuarially determined in accordance with the Governmental Accounting Standards Board Statement No. 45. The annual required contribution represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The business and financial plans of the College’s revenue-generating accounts and funds recognize and account for the employers’ OPEB obligations for non-general funded positions (IIID-43).

As part of the annual audit of the UH System consolidated financial statements, the report of independent auditors conducts a review of the OPEB obligations at the UH System level. Financial statements reflect the UH System’s liability for OPEB, but campuses do not budget for OPEB obligations since the state allocates and pays OPEB for general fund positions (IIID-22).

**Analysis and Evaluation**

The College is responsible for the OPEB for only a small number of non-general-funded positions. The College includes the OPEB costs associated with these positions in the fringe benefit rate on employees’ salaries and factors them into the annual and long-term business and financial plans of the revenue-generating accounts and funds that are responsible for paying these costs.

III.D.13.

*On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.*
Evidence of Meeting the Standard

The UHCC System, in coordination and consultation with the College, calculates the amount of the financial obligation associated with locally incurred debt instruments. The College transfers funds to the UHCC System on an annual basis for repayment of these debt instruments. The College used locally incurred debt instruments to fund energy conservation measure projects that have been implemented campus wide and to fund alternative energy (photovoltaic) projects. It used additional debt instruments to purchase the building and site for the College’s Waiʻanae Moku Education Center. The College includes these debt obligation payments in all budget and planning documents and, in fiscal year 2017-2018, used an estimated 1.7 percent of the College’s operating budget to repay all locally incurred debt service (III.D.34, III.D.42).

Analysis and Evaluation

The College plans and budgets adequate resources to repay all locally incurred debt. The College’s and UHCC System’s planning and budget documents separately identify and account for each debt instrument.

III.D.14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

Evidence of Meeting the Standard

As noted in Standards III.D.5 and III.D.10, the College manages its financial resources efficiently and with integrity including the management of funds associated with debt instruments, all revenue-generating activities, fund-raising, and extramural grants and contracts.

The College has long-term debt instruments (UH-issued revenue bonds) and used bond funds to purchase an existing building and site for the Waiʻanae Moku Education Center. The College allocates and transfers funds for debt service to the UH System on an annual basis as part of the budget planning and execution process. The percentage of the College’s operating budget used for this debt service is 0.5 percent.

The College and the UHCC System also have long-term debt instruments (UH-issued revenue bonds) for various energy conservation and alternative energy projects. They use bond funds to purchase and install new or replacement fixtures and equipment that consume less energy or generate electricity resulting in lower utility cost for the College. The UHCC pays the debt service and receives annual reimbursement from the College based on energy savings. The College’s Integrated Planning and Budgeting Process annually allocates the funds for this debt service reimbursement. The percentage of the College’s operating budget used for this debt service reimbursement is 1.4 percent.
UH System policies and procedures require that the funds be used in accordance with state and federal requirements, the mission and goals of the UH System, and the purpose of the funding source (IIID-30, IIID-44, IIID-45).

Auxiliary activities are revenue-generating programs and activities that provide non-instructional goods or services funded by a user charge or fee. Auxiliary activities, conducted for the benefit of students, faculty, and staff, include activities such as the bookstore, food service, and the copy center. The University of Hawai‘i at Mānoa (UH Mānoa) Bookstore unit administers the bookstore. The College annually reviews the other auxiliary activities as part of the College’s revenue-generating program planning and budget process. This process ensures that these activities actively engage in the financial management responsibilities of the enterprise and ensures the activities are financially solvent.

UH System policies and procedures require that the funds be used in accordance with state and federal requirements and the purpose of the funding source (IIID-46). UH System policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure that the College properly expends the funds in compliance with donor restrictions and the usual and common business and regulatory practices (IIID-47, IIID-48, IIID-49, IIID-50).

**Analysis and Evaluation**

The College uses all financial resources effectively and with integrity in a manner consistent with the intended purpose of the funding source in accordance with various federal, state, UH, UHCC, and College policies, procedures, and guidelines.

**III.D.15.**

*The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.*

**Evidence of Meeting the Standard**

The College has a current student loan default rate of 16.5 percent (IIID-51). The student loan default rate has remained fairly consistent over the past four years hovering between 14.4 percent and 17.7 percent, which is well below the 30 percent federal guideline threshold that would require the creation of a student loan default prevention task force and the subsequent development and implementation of default prevention action plans (IIID-52, IIID-53, IIID-54).

The College’s financial aid manager is responsible for the management, oversight, and compliance with Title IV financial aid programs. The College does not award student loans during the initial packaging of financial aid. Upon financial aid award notifications, the College informs students that loans are available, and this process includes counseling students about their obligations to the grantor of the loan and responsibilities associated with being a responsible borrower. In addition, starting in 2018-2019, all financial aid staff will be trained to review and manage the cohort default rate data, so they can submit a challenge,
adjustment, or appeal to the U.S. Department of Education as needed to determine whether the College’s cohort default rate is inaccurate. If these challenges, adjustments, or appeals are successful, the cohort default rate may be lowered, raised, or not impacted. If the U.S. Department of Education lowers the College’s cohort rate, the College may avoid sanctions or become eligible for a benefit.

Alternative revenues for student financial aid conform with Executive Policy (EP) 6.204, Student Financial Assistance Program, whereby the College dedicates a minimum of 8.8 percent of its tuition revenues to need-based financial aid (IIID-55). In addition, the College’s annual budget dedicates additional tuition revenues to other financial aid programs that serve need- and non-need based students (IIID-1, IIID-56). In total, the College will dedicate more than 16 percent of its fiscal year 2017-2018 tuition revenue to student financial assistance programs.

**Analysis and Evaluation**

The College monitors and manages its student loan default rates to ensure compliance with federal requirements. Programs are in place to counsel students on student loan responsibilities. The College’s budget process identifies alternative revenue streams to maximize student financial assistance and minimize student dependence on loans.

III.D.16. *Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.*

**Evidence of Meeting the Standard**

The College’s Administrative Services staff provides oversight of contractual agreements with external entities and follows several BOR, UH, and UHCC policies, procedures, and guidelines to review and approve all contracts prior to implementation. Some of the contractual agreements fulfill basic service-related functions of a campus, such as the beverage and snack vending contracts, food service concessions, facility use contracts, and facility service and maintenance contracts. Other contractual agreements meet an institution-related need identified through the planning process, student surveys, or other means. The integration of the contractual agreements with the Integrated Planning and Budgeting Process demonstrates the alignment of these agreements with the College mission and goals.

The College has a variety of contractual agreements, including purchase orders, service contracts, memoranda of agreements, concession contracts, affiliation agreements, sponsored class or sheltered class agreements with external agencies, consultant contracts, construction contracts, internships and externships, maintenance contracts, and lease agreements. Noting the need to standardize contractual provisions, establish clarity for approvals, and implement risk-reduction strategies, the BOR, in consultation with the UH System’s colleges and universities through the UH Office of General Counsel, adopted 8.200 on Contracts and Signing Authority, which is applicable to all contractual agreements between the UH System and non-university entities. This policy went into effect November 1, 2017 (IIID-57).
Several other UH and/or UHCC policies and procedures address various types of contractual agreements for the College. For instance, Administrative Procedure (AP) 8.200 through AP 8.299 provide procurement guidelines for contracts and purchasing; UHCCP 8.102A covers memoranda of agreements for sponsored or sheltered class; Regents Policy (RP) 8.201 through RP 8.212 cover internships and externships; and AP 8.270 covers lease agreements (IIID-46, IIID-58, IIID-59, IIID-60).

Examples of the contractual agreements include contracting for Student Health Center services with the UH Mānoa Student Health Center, the Xerox lease agreement for copy/duplicating services, and the memorandum of agreement with the Kapiʻolani Community College’s Nursing program. The VCAS and support staff review all contractual agreements with external entities for compliance with established codes, regulations, policies, and procedures. The College uses SuperQuote to request bids on purchase orders for any service or items costing more than $2,500. For amounts under $2,500, the unit or division head must approve the purchase order, submit it to the Business Office, and get approval from the fiscal officer prior to any commitment of funds.

To limit liability, the College utilizes the UH service contract that the UH General Counsel office approved (IIID-61). The appropriate dean or director must complete and approve UH service contracts prior to their review by the vice chancellor for academic affairs. The total amount of the contract determines final signing authority. For contracts up to $25,000, the College’s fiscal administrator reviews and approves. For contracts over $25,000, final approval is the responsibility of the UH System Office of Procurement and Real Property Management.

The UH service contract provides a termination clause which states, “UNIVERSITY shall have the right to terminate this contract upon TEN (10) days’ written notice at any time and for any reason.” AP 8.275 on Contract Formation and Administration provides provisions “to assure that the Contractor’s total performance is in accordance with its contractual commitments and that the obligations of the University are fulfilled” (IIID-62). It includes the monitoring and supervision of the contract actions from award of the contract to completion of the work required. This administrative procedure also provides guidelines for contract modification and termination.

**Analysis and Evaluation**

Contractual agreements are subject to various BOR, UH, and UHCC System policies and procedures. UH and UHCC System staff provide oversight, ensuring that the College maintains its integrity in contractual agreements. The College monitors contracts to ensure consistency with the College’s mission statement and strategic goals. Efforts to improve institutional integrity in contractual agreements and to reduce risk to the UH System resulted in EP 8.200 on Contracts and Signing Authority that is applicable to all contractual agreements between the UH System and non-university entities. This policy went into effect November 1, 2017.

STANDARD IV: LEADERSHIP AND GOVERNANCE

Student Spotlight
Keokolo Akina

I was inspired to take the plunge and be a part of Student Government. I think one of the most rewarding experiences was being a student representative at the many campus committees. It was such a wonderful feeling to know that the campus department heads, staff, and educators were so receptive and encouraging and took time to listen to what we had to say. I truly believe that student government played a big part in who I am today; I finally felt like I could face insecurities, challenge myself, and be open to learn from failure. Not only do I have a college education but through all those leadership skills gained, I have been able to secure a job that isn’t a job at all; it’s a hobby that I get paid to do.
STANDARD IV: LEADERSHIP AND GOVERNANCE

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

IV.A. Decision-Making Roles and Processes

IV.A.1. Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.

Evidence of Meeting the Standard

Innovation Initiatives
Leeward Community College (Leeward CC) has formal and informal practices and procedures that encourage all campus constituents to bring forward ideas for institutional improvement.

The College’s Office of the Vice Chancellor for Academic Affairs has set up Innovation Funds that provide small grants to fund innovative activities and professional development for faculty and staff (IVA-1, IVA-2, IVA-3). As stated in an email from the vice chancellor for academic affairs (VCAA), “Leeward Community College is committed to fostering innovation and supporting instructional improvement in the classroom to support student success. The College has set aside $60,000 to provide support to faculty and staff members to try new strategies, implement new tools, and learn new methodologies in support of the success of our students” (IVA-1). As an example, in 2017 the Faculty Senate applied for and received funding for the $20,328 annual campus site license to Turnitin, an online originality checking service (IVA-4).

Administrative leaders look for opportunities to encourage faculty and staff to innovate in the classroom. A recent example is the Acceleration Initiative, a system initiative that supports faculty leaders in their efforts to try innovative teaching strategies to either move students through the developmental education sequence faster or to develop a co-requisite
course to support identified students in college-level math and English courses. For a

The Carl D. Perkins Vocational and Technical Education Act grants give career and
technical faculty and staff opportunities to experiment with new teaching strategies and
student support delivery services. These grant awards are specific to career and technical
programs and encourage innovative pilot programs and strategies with initial grant
funding (IVA-5). For example, the Job Prep Services received a Carl D. Perkins grant of
$51,000 to promote the use of the Job Center Online system that enables students to
search and apply for job opportunities, manage multiple resumes and cover letters, and
learn about career and recruiting events on campus (IVA-6, IVA-7).

The College also supported a small team of faculty and staff to attend the 2014 Leading
from the Middle professional development program. This team created the On Track
cohort model for recent high school graduates (IVA-8). Now in its third year, the team
continues to evaluate and improve the program in an effort to improve retention and
completion rates.

The College rewards innovation and excellence through diverse campus and system awards.
The College sponsors the Outstanding Service Award for civil service and administrative,
professional, and technical (APT) employees; the Outstanding Lecturer Award for lecturers
(adjunct); and the Innovative Online Teaching Award for distance education (DE) faculty.
The College recognizes award recipients at the annual spring awards reception held on
campus (IVA-9). The Open Educational Resources (OER) Campus Committee created an
Open Educator Award to recognize faculty who promote or contribute to a culture of
utilizing OER to reduce the financial burden on students and overall cost of a college
education (IVA-10). The College gave this award for the first time at the spring 2018 awards
reception.

The University of Hawai‘i (UH) System sponsors the Regents’ Medal for Excellence in
Teaching for faculty, the Frances Davis Award for Excellence in Undergraduate Teaching for
faculty, the Masaki and Momoe Kunimoto Memorial Award for Outstanding Contributions
to Vocational Education for career and technical education faculty, the Willard Wilson
Award for Distinguished Service to the University for UH System employees, and the
President’s Award for Excellence in Building and Grounds Maintenance for UH System
employees (IVA-11).

The Wo Learning Champions, a University of Hawai‘i Community Colleges (UHCC) system
initiative, presents the Change Agent Award and the Community Building Award annually to
recognize innovative programs at the community college campuses (IVA-12, IVA-13).

The UH System’s President’s Emerging Leaders Program provides UH System employees
with the opportunity to develop as future campus and system leaders (IVA-14). Each
academic year, two Leeward faculty are nominated to participate in the program (IVA-15).

In spring 2016, Sharon Narimatsu, former Leeward CC provost, created the Sharon S.
Narimatsu Faculty and Staff Development Award for faculty and staff to have access to the
latest developments in their fields and incorporate new ideas and practices in their positions
to maintain excellence across the campus. The award provides for professional development
funding to support one faculty or staff member each year. The first awardee was able to
participate in a fellowship by the CubaOne Foundation, which was founded to host
“birthright” trips to Cuba for young, Cuban-American professionals. The Anthropology
faculty member traveled with nine other young Cuban-Americans to collaborate with Cubans
in related fields and connect with the local culture.

In fall 2017, the College’s Innovation Center for Teaching and Learning Advisory
Committee inaugurated the Kosasa Innovation in Teaching and Learning Award to support a
project, event, or class activity that improves teaching, learning, or the operations of the
College. A current Leeward faculty member created and funded this program. This award
encourages faculty, lecturers, and staff to find creative solutions that can make a positive
difference at the College, new ways to improve the quality of services or instruction, novel
approaches for completing work more effectively or efficiently, and workplace
improvements that support the College’s commitment to diversity, equity, and inclusion. The
first recipient of this award will use the funds to redesign the Organic Chemistry laboratory
sequence in order to innovate the curriculum in the field of Green Chemistry and create a
safer laboratory environment at the College (IVA-16).

Systematic Participative Processes
The College has established systems and participative processes for effective planning
and implementation for program and campus improvement. The College builds
collegiality by encouraging participation at every level from students, through faculty and
staff, and up to administrative leaders. Established governance groups that contribute to
participative processes include the Campus Council, the Faculty Senate, the Pūkoʻa no na
ʻEwa Council (Nā ʻEwa Council), and the Student Government.

The Campus Council serves as a recommending body to the chancellor on planning and
budgeting issues. The council reviews and recommends the annual institutional budget
priorities for the next academic year. The Revised Constitution and By-laws begin with a
preface that states that the “Campus Council will serve as a recommending body to the
chancellor for finalizing planning and budgetary matters particularly including but not
limited to program reviews, area plans, budget structuring and prioritization of the College’s
operational plan” (IVA-17).

The Campus Council includes 18 voting members representing all the campus constituencies.
These members include division chairs and coordinators of the credit and noncredit
instructional divisions and units as well as representatives of student services, academic
services, auxiliary services, the Native Hawaiian Student Support Program, the Office of
Continuing Education and Workforce Development, the Administrative Support (Clerical)
Group, the APT Group, the Lecturers’ Group, the Nā ʻEwa Council, and the Student
Government. The Faculty Senate has two representatives on the council, typically the senate
chair and vice chair. Administrators are also members in a nonvoting capacity.

The Faculty Senate is chartered by the UH Board of Regents (BOR) as the primary voice
of faculty in the academic governance of the College. The Charter and Bylaws begin with
a preamble stating that the “Faculty Senate provides through its Charter and Bylaws both
an organizational structure and formal procedures by which the faculty of the University
of Hawai‘i - Leeward Community College can carry out its collective responsibilities with administrative colleagues in reviewing, recommending, and advising on matters of academic policy that affect the College” (IVA-18).

The Faculty Senate is comprised of 22 senators elected at-large from instructional and non-instructional faculty with approximately half elected each year for a two-year term. Upon recommendation by the lecturers and approval by senate members, one lecturer may serve on the senate. One Student Government representative serves as a nonvoting member. To ensure that the senate represents all constituencies, the faculty senate chair will solicit a recommendation for a senator to represent a constituency not represented by an elected senator (IVA-18).

The Faculty Senate has 11 standing committees (IVA-19). Membership on senate committees is open to faculty who are not senate members. Some of these committees regularly work with administration, Student Services units, and/or the Student Government to improve student learning programs and support services. The various committees present the senate with recommendations and relay resolutions to the relevant administrators through the senate chair.

The UH System is committed to serving the Native Hawaiian community. The Pūko‘a Council is the UH president’s advisory group “dedicated to increase the number of Native Hawaiian students, faculty, staff, and administrators in the university system to 23%, which mirrors the percentage of Hawaiians in Hawai‘i’s general population” (IVA-20). In order to represent the College’s Native Hawaiian interests and needs at the Pūko‘a Council, in 2002 the College established the Nā ‘Ewa Council, whose charter states it will “provide advocacy, leadership, and support for Native Hawaiians through higher education” (IVA-21).

The Nā ‘Ewa Council welcomes all faculty, staff, and students who are interested in Native Hawaiian issues and advocacy. Members and consultants draft position statements and program designs by consensus, which are taken to campus governance groups and administration as well as to the Pūko‘a Council.

The Student Government is the governing body of the Associated Students of the University of Hawai‘i- Leeward CC (ASUH-Leeward CC). The ASUH-Leeward CC Constitution begins with a preamble stating that the Student Government exists to “serve the needs, promote the welfare, encourage the active participation, and democratically represent a body of students within a curricular atmosphere” (IVA-22). The Student Government works to fulfill its mission, which is to “advocate and strive to represent the student body with leadership, honesty, and integrity while providing a positive learning experience and promoting active participation from students and the community” (IVA-23). For a more detailed discussion of ASUH-Leeward CC, see Standard IV.A.2.

According to the 2016 Employee Satisfaction Survey, 61.5 percent of the faculty and staff who responded (n=200) agreed that the administrative team encourages an open exchange of ideas that foster institutional improvement. Of those surveyed, 23 percent were unsure and 14 percent disagreed or strongly disagreed (IVA-24, Item 18, p. 8).
To continually encourage an open exchange of ideas, the VCAA implemented Talk Story sessions (informal campus conversations) in 2016-2017 to encourage dialogue on system initiatives and critical issues for faculty and staff. These sessions will continue in 2017-2018. In addition, the College developed a format of breakout sessions at recent convocations. These breakout sessions include sessions facilitated by members of the administrative team and other campus leaders, and the sessions have been used to solicit feedback from faculty and staff as well as an opportunity for sharing ideas for improvement. For more discussion of these practices, see Standard I.B.1.

When ideas for improvement have policy or significant institution wide implications, the College’s Integrated Planning and Budgeting Process provides a systematic participative process. For further discussion of this planning and budgeting process, see Standard I.B.9.

**Analysis and Evaluation**

Campus leaders encourage and support innovation and institutional excellence through Innovation Funding, Perkins grants, professional development programs, and awards in excellence. The College builds collegiality by encouraging participation at every level through governance groups such as the Campus Council, the Faculty Senate, the Nā ‘Ewa Council, and the Student Government, as well as the Integrated Planning and Budgeting Process.

IV.A.2.

*The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.*

**Evidence of Meeting the Standard**

**Policies and Procedures for College Decision Making**

College policies and procedures describe the roles for each group in decision-making processes. These policies and procedures describe the official responsibilities and authority of the faculty and academic administrators in curricular and other educational matters.

The College’s L1.201, Policy on Shared Governance, allows individuals and groups to provide views on issues important to them and ensures that administrative leaders demonstrate a willingness to incorporate faculty, staff, and student input into collegial decision-making especially as it relates to academic policies, procedures, and budgetary matters (IV.A-25). Under shared governance, individuals and groups may voice opinions, vote, make recommendations, investigate, write reports, evaluate leaders, serve as consultants, lead forums, and attend forums. Shared governance empowers campus committees, governance groups, divisions, and units to make formal recommendations on College issues.
The College’s L1.101, Policy on the Policy Development Process, requires organized involvement of all appropriate governing bodies (IVA-26). An objective of the policy is to promote shared governance by allowing administration, the Campus Council, and the Faculty Senate to review and approve all academic and non-academic policies and procedures at the College. The VCAA and the Faculty Senate review and approve all academic policies, and if an academic policy involves significant planning or budget allocations, the Campus Council also reviews and approves that policy. The vice chancellor of administrative services (VCAS) and the Campus Council review and approve non-academic policies. The chancellor provides final approval of all College policies.

The College’s L4.100, Policy on Institutional Mission, specifies that the chancellor initiates the periodic review of the College’s mission statement in consultation with campus governance groups. During the review, campus and community constituents can provide input. The policy states that the Campus Council, the Faculty Senate, the Student Government, and the chancellor approve the mission statement at the campus level before it is submitted to the BOR (IVA-27).

**Evaluation of Decision-Making Policies and Procedures**
The College regularly evaluates whether policies and procedures are functioning appropriately. The Campus Council established the Shared Governance Policy Revision Ad Hoc Committee in fall 2017, which assessed L1.201. The College also established the Planning Process Review Ad Hoc Committee, a joint committee between the Campus Council and the Faculty Senate, to review and update the College’s L5.202, Policy on Annual Program Review. For further discussion of this ad hoc committee, see Standard IV.A.3.

**Role of Students in College Decision-Making**
The College encourages student participation in matters that directly concern them and considers their views during decision-making. The College empowers the student voice through the Student Government, which the College’s student body elects every spring semester. The Student Government Executive Board is comprised of a president, vice president, secretary, and treasurer. The Student Government also has five elected senators and one designated Wai‘anae Moku Education Center senator. The Student Government represents the ASUH-Leeward CC to the campus administration and the UH System. It advocates for students’ concerns and needs, and student representatives serve on a range of campus committees to ensure student input on institutional policies and plans. Its major responsibilities include the budgeting and management of the student activities fees, advocating student needs at the campus and system level, and the establishment of policies and programs for students. Student Government senators train over the summer to understand their roles as student leaders, to prepare themselves to be the voice for the students once the academic year is underway, and to learn about the campus organizational structure and the role of each campus committee. A key committee of the Student Government is the Budget and Finance Committee. This committee allocates funding for student organizations and campus divisions. Members of this committee train over the summer and review the guidelines for requesting and granting funds. During the academic year, this committee meets weekly to review funding requests.
To ensure that the student perspective is heard, student government representatives serve as members on 16 campus or system committees or groups and have voting rights in all except for the Faculty Senate (IVA-28). As voting members of various committees, student government representatives attend monthly or biannual meetings, engage in discussions, and vote on topics discussed. As a nonvoting member on the Faculty Senate and the Faculty Senate’s Student Affairs Committee, the student representative attends scheduled meetings, participates in discussions, and provides feedback from a student perspective. The Wai‘anae Moku Education Center’s representative attends weekly student support and retention team meetings to ensure that the students’ voices are heard. Student government committee representatives provide updates every week at student government senate meetings, and the secretary records the updates in the weekly minutes that are posted on the Student Life website, the student government board outside of the office, and the Wai‘anae Moku Education Center’s bulletin board (IVA-29). Additionally, campus administrators regularly attend student government meetings and the student government president meets monthly with the chancellor to continue open dialogue and discussion.

Analysis and Evaluation

The College’s policies on Shared Governance, Policy Development Process, and Institutional Mission authorize and specify procedures for administrator, faculty, and staff participation in decision-making processes. The College establishes ad hoc committees as needed to assess and update policies and procedures with respect to shared governance. The College empowers the student voice through Student Government where representatives serve on 16 campus or system committees or groups and have voting rights in all except Faculty Senate.

IV.A.3.
Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

Evidence of Meeting the Standard

College policies and procedures describe the roles for each group in governance, including planning and budget development. The College’s Integrated Planning and Budgeting Process, which includes program review and resource requests, is the primary method for recommending and implementing new innovations and improvements within divisions and units. As part of the process, the Campus Council serves as a recommending body to the chancellor on planning and budgeting issues. The council reviews and recommends the annual institutional budget priorities for the next academic year. For further discussion of the Integrated Planning and Budgeting Process, see Standard IB.9.

In spring 2017, the Campus Council sent out a survey to gather feedback about members’ experience in program review and the planning cycle. Eighty percent of those surveyed said that they understood how to use the data provided by the UH System. Almost 88 percent of the respondents reported that they knew how to make prioritization requests for their program or unit improvements (IVA-30).
To continually improve the College’s program review and planning processes, the Campus Council and the Faculty Senate executive members met with the College’s two vice chancellors in May 2017 to discuss the formation of the Ad Hoc Planning Process Review Committee, which is a joint committee between these two governance groups facilitated by the VCAA (IVA-31). The membership of the committee reflects individuals who are directly responsible and/or experienced in producing the Annual Report of Program Data (ARPD) and the Comprehensive Review and Evaluation (CRE). Nine of 16 members of the ad hoc committee are faculty. The committee will make recommendations for improvements on the Integrated Planning and Budgeting Process and review and update L5.202. The group will report on its progress to the Campus Council and the Faculty Senate at the end of 2017-2018.

Administrators have both formal and informal roles in governance at the College. Administrators have a decision-making role as part of their position descriptions. In terms of policy, administrators often have specific roles in the development and implementation of policy. An example is the College’s L1.101, Policy on the Policy Development Process (IVA-26). This policy specifically provides approval authority to the VCAA or the VCAS, depending on the type of policy being approved. As an administrator, the VCAA has responsibility for coordinating the Integrated Planning and Budgeting Process, and the VCAS has responsibility for developing and implementing the annual budget, the Operational Expenditure Plan. Administrators also have an informal role in governance through their participation on Campus Council as nonvoting members and as conveners for committees that make recommendations on a range of topics. The VCAA is the convener and facilitator for the Ad Hoc Planning Process Review Committee outlined above. The VCAS convened the Sustainability Committee and continues to serve as a member in support of this cross-disciplinary group.

**Analysis and Evaluation**

Through the policies and procedures of the integrated planning and budgeting process and governance committees, administrators and faculty have a substantive and clearly defined role in institutional governance. Administrators and faculty exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.

According to the 2016 Employee Satisfaction Survey, 68 percent of the faculty and staff who responded (n=200) agreed that they participate in the planning processes of their division, department, or unit. Of those surveyed, ten percent were unsure and 17 percent disagreed. In the same survey, 57 percent of the faculty and staff who responded agreed that the planning effectively incorporates input from appropriate people or groups in the College, such as their division, department, or unit. Of those surveyed, 29 percent were unsure (IVA-24, Items 6 and 7, pp. 3-4).

**IV.A.4.**

*Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.*
Evidence of Meeting the Standard

UH System and College policies and procedures describe the official responsibilities and authority of the faculty and academic administrators in curricular and other educational matters.

Regents Policy (RP) 1.210, Faculty Involvement in Academic Decision-Making and Academic Policy Development, recognizes the critical role that faculty play in the academic governance of the UH System (IVA-32). A memorandum of agreement between the BOR and the bargaining agent for faculty, the University of Hawai‘i Professional Assembly (UHPA), designates topics that the UH System will refer to faculty senates. This memorandum authorizes senates to advise campus administration on “matters impacting and/or relating to the development and maintenance of academic policy and standards to the end that quality education is provided, preserved, and improved” (IVA-33).

The Curriculum Committee, a standing committee of the Faculty Senate, is responsible for the development, review, recommendation, and approval of new, modified, and deleted academic courses and programs. This committee suggests ways to strengthen curriculum and supports faculty in the review of new approaches to instruction. The committee’s website contains information including the formal procedures by which administration receives program, course, and other curricular matters through the Curriculum Committee and the full senate (IVA-34, IVA-35). During 2017-2018, this committee reviewed 234 courses and programs. To put this in perspective, the committee reviewed 106 courses and programs in 2016-2017. Due to the enormous volume of courses and programs submitted for review, the Curriculum Committee met weekly to fulfill its obligations and ensure the Faculty Senate’s vital role in matters of curricula (IVA-36). For further discussion of the Curriculum Committee, see Standard II.A.2.

The Assessment Committee, a standing committee of the Faculty Senate, reviews and makes recommendations to the Faculty Senate on policies and procedures relating to assessment. The committee also works with the administration and the Office of Planning, Policy and Assessment to facilitate the assessment process and establish a culture of assessment (IVA-37).

The DE Committee, a standing committee of the Faculty Senate, helps promote the development of DE courses to ensure that content and design are appropriate to DE delivery. This committee develops and recommends policies and procedures that provide technical and academic support to ensure success for DE students and faculty who teach DE courses. Membership consists of faculty from every instructional division who have experience teaching DE courses and at least one non-faculty member (IVA-38).

The DE Committee hosted a breakout session at the campus convocation in spring 2017 to inform faculty and staff of federal and Commission requirements regarding the definitions of DE and correspondence education and provided examples of instructor-initiated substantive interaction (IVA-39). At the convocation in fall 2017, the committee held a mandatory training session on federal and Commission requirements for faculty teaching a DE course (IVA-40). Participants at this training completed a self-evaluation survey on instructor-initiated interaction in their DE course (IVA-41). The DE Committee held additional training
sessions during the fall 2017 semester at various dates and times (IVA-42, Item III.D.5, p. 4). To ensure quality online courses, division chairs will refer those needing further assistance or training to their division’s DE liaison (IVA-43). In spring 2018, the DE Committee distributed a survey to faculty teaching DE courses to identify their needs. The committee will compile the results from both surveys and make general recommendations to the Faculty Senate (IVA-44, IVA-45, IVA-46).

Faculty Senate can have several ad hoc committees that focus on specific academic issues of short duration. Some of these committees work with administration, Student Services, and/or the Student Government to improve student learning programs and services. During 2016-2017 and 2017-2018, ad hoc committees focused on the revision of the College’s L5.201, Policy on Curriculum Review and Revision, a new course evaluation system, and an alternative class schedule (IVA-47). The various committees presented recommendations to the senate and resolutions to the relevant administrators through the senate chair.

For example, the Faculty Senate Course Evaluation System Ad Hoc Committee has been working to ensure the College’s compliance with the UH System’s plans to implement the new course evaluation system for every student enrolled in a credit-based course in fall 2018. This ad hoc committee surveyed faculty and lecturers using an online ballot and shared the survey results with division chairs. To ensure full faculty input, the ad hoc committee administered a second survey through academic divisions. In spring 2018, the ad hoc committee worked with a designated campus administrator to create a central repository for existing survey questions and to arrange that these questions be accessible to faculty. The College is planning workshops for fall 2018 to train faculty on the new course evaluation system (IVA-48).

The VCAA, the dean of arts and sciences, the dean of career and technical education, and the academic coordinator of the Waiʻanae Moku Education Center meet with the division chairs on a regular basis to discuss issues and concerns from their respective units at division chair meetings. Together, this group is able to serve as the liaison between their units and administration and make recommendations that directly affect student learning programs and initiatives (IVA-49).

The VCAA also meets with Student Services unit heads and Academic Services unit heads as needed to respond to curriculum-related recommendations. In 2017-2018, the implementation of the Online Five-Week Course Development Program resulted in ongoing meetings between the VCAA, division chairs, student services faculty, and academic services faculty (IVA-50).

**Analysis and Evaluation**

Faculty Senate is authorized through UH Regent and UHPA policy to advise campus administration on matters impacting curriculum and student learning programs and services. The senate has a well-defined structure with ten standing committees responsible for recommendations about curriculum and student learning programs. Administrators, division chairs, and academic coordinators meet regularly to discuss instructional matters and work regularly with Academic Services and Student Services faculty and staff to make recommendations that directly affect student learning.
IV.A.5.
Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

Evidence of Meeting the Standard

The College’s L1.201, Policy on Shared Governance, provides an overview of constituency roles in participatory governance processes (IVA-25). The policy guarantees that any individual or group of individuals has the right to provide their views on any issue of importance. The policy specifies the decision-making role of faculty in areas of academic decision-making and policy development. For additional discussion of this policy, see Standard IV.A.2.

Administrators are responsible for educating faculty and staff of their right to share diverse perspectives and for providing opportunities for faculty and staff to do so. L1.201 specifies that ample campus input should be incorporated into decision-making especially relating to academic policies, academic procedures, and financial and budgetary matters.

Data from the 2016 Employee Satisfaction Survey prompted the Executive Committee of the Campus Council to propose a review of L1.201 to determine if it reflects current needs, best practices, policy alignment, and Accreditation Standards. In 2017-2018, an ad hoc committee reviewed the policy and proposed amendments (IVA-25, IVA-51, IVA-52, IVA-53, IVA-54). The Campus Council and Faculty Senate provided additional revisions to the policy, and both groups will finalize the policy in fall 2018.

The College values diverse perspectives and considers those perspectives when setting institutional priorities. When decisions are contrary to the wishes of constituency groups and other recommending bodies, administrators and other decision-makers provide reasons for their decisions.

Various groups collaborate on campus improvements and document those efforts. Campus governance groups provide input based on their respective expertise and responsibilities. The Campus Council reviews non-academic policies and practices that pertain to the entire campus and then advises administration on decision-making. Examples of the Campus Council’s contributions to campus improvements include discussions about revision to the College Integrated Planning and Budgeting Process, campus technology and duplicating contracts, the College’s mission statement, and reviews of College policies on facilities access control and animals on campus (IVA-55, IVA-56, IVA-57, IVA-27, IVA-58, IVA-59). Faculty Senate reviews academic policies and practices and then advises administration on decision-making. For example, the Faculty Senate Course Evaluation System Ad Hoc Committee has been working with administration to ensure the College’s compliance with the UH System’s plans to implement the new course evaluation system for every student enrolled in a credit-based course in fall 2018 (IVA-48, p. 6). The Student Government reviews policies and practices that pertain to students and advises administration as needed. An example of this is their collaboration with administration to implement designated
smoking areas and recycling bins. Finally, the Nā ‘Ewa Council reviews policies and practices regarding Native Hawaiian issues and advises administration as needed. For example, the Nā ‘Ewa Council’s Ad Hoc Committee on Indigenizing Leeward is developing a biennium budget request for Hawaiian signage for division and unit offices (IVA-60).

**Analysis and Evaluation**

The College’s shared governance system ensures that the College appropriately considers the relevant perspectives of faculty, staff, and students on issues related to planning, decision-making, and curricular changes.

According to the 2016 Employee Satisfaction Survey, 59 percent of the faculty and staff who responded (n=200) agreed that their unit is adequately represented at the Campus Council while 32 percent were unsure. When asked about participation in governance, 80 percent of the faculty and staff who responded (n=182) agreed that they participate in College committees (IVA-24). As campus leaders, the Campus Council members have the responsibility of including input and feedback from members of their constituencies.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about shared governance at the College. Participants discussed how the College meets Standard IV.A.5 and how the College can improve in this area. They noted that the shared governance process is more transparent and that the VCAA shares budget priority lists. Some participants expressed interest in learning more about shared governance, perhaps with a blog or Frequently Asked Questions site (IVA-61, p. 16).

**IV.A.6.**

*The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.*

**Evidence of Meeting the Standard**

**Communication with the Campus Community about College Decision-Making**

The College has processes to document and communicate decisions throughout the institution. The College’s campus communication system includes resources that are always available as well as periodic communication distributed at multiple levels. This system provides a process to document and administer communication on all decisions across the campus. It allows users to input news, events, activities, and announcements in one online form for distribution on one or more campus communication media, which includes the College website, UH News and the UHCC System website, on-campus digital signage system, campus bulletin, official College social media sites (Twitter and Facebook, for example), and media distribution through news releases. The College also emails the bulletin to everyone on the faculty and staff listserv and posts the bulletin on the College website.

Campus administrators present reports on new initiatives, policy changes, and issues of interest to the campus at convocation, which takes place before the start of each semester (IVA-62, IVA-63). The College posts all documents shared at each convocation on the intranet for all faculty and staff to access. The VCAA holds regular Talk Story sessions on current topics that need campus discussion and input; Talk Story sessions are discussed in
more detail in Standard I.B.1. Additionally, the VCAA provides updates to the planning process throughout the academic year and sends email distributions of division or unit priorities (IVA-64, IVA-65).

The Campus Council, the Faculty Senate, and Nā ʻEwa Council send out monthly meeting notices with an agenda (IVA-66, IVA-67, IVA-68, IVA-69). The Campus Council webpage on the College intranet hosts agendas, minutes, and pertinent documents (IVA-70). The Faculty Senate website hosts agendas, minutes, and supporting documents in order to keep the campus community current on the business being considered (IVA-71). The Nā ʻEwa Council posts agendas and meeting minutes on the campus intranet, and the Student Government posts agendas and meeting minutes on its website (IVA-72, IVA-29). Minutes from all governance meetings include records of discussions, votes, and other relevant information.

At the start of each semester, the College holds convocation at which time administrators distribute a detailed handout with updates and announcements about institutional efforts to achieve goals and improve learning (IVA-73). During convocation week, divisions and/or disciplines have meetings to discuss issues specific to them. Each semester, the UH vice president for community colleges gives a presentation to the campus on the status of system and college goals and achievements, which is also posted to the College intranet. For further discussion of the vice president’s presentations, see Standards I.B.3, I.B.6, and IV.D.6.

Communication with Students about College Decision-Making

The College uses three digital messaging methods to communicate with students: an email messaging system called UH Announce, an emergency email and short message service system called UH Alert, and an early-alert retention system called MySuccess to distribute various messaging to students (IVA-74, IVA-75, IVA-76, IVA-77).

The College has used the UH Announce and UH Alert systems for several years. As part of UHCC System’s Integrated Communications for Recruitment and Retention, the College launched the MySuccess campaign in June 2016, which provides customized email messages to assist students from application through completion (IVA-78).

The College uses social media as an additional method to communicate with students. The College’s Facebook page, Twitter account, and Instagram account are the primary digital channels used to share news, announcements, event information, and emergency messaging (IVA-79, IVA-80, IVA-81). The College uses the social media sites as a means for digital engagement, providing a forum for students to ask questions, connect to each other, and share concerns and comments.

The College communicates with students through weekly emails sent by the Student Life office and through updates on the Student Life website (IVA-82, IVA-23). Digital signage provides reminders of Student Life activities and campus news at the Pearl City campus and the Waianae Moku Education Center.

The chancellor has regular meetings with executive members of Student Government. To further ensure that the student perspective is heard, student government representatives serve as members on 16 campus or system committees or groups and have voting rights in all
except for the Faculty Senate. For further discussion of the role of Student Government in college decision-making, see Standard IV.A.2.

The College uses UH Announce, which can be sent to all Leeward students, to disseminate the results of decisions that affect students. At the beginning of each semester, the VCAS uses UH Announce to send a recap of policies and campus announcements (IVA-83). The College sent an email message using UH Announce to inform the campus of Chancellor Cabral’s impending retirement and the appointment of an interim chancellor (IVA-84).

**Communication with the Public about College Decision-Making**

The College performs annual program reviews and publishes results of most ARPDs on the UHCC ARPD website (IVA-85). ARPDs for all of the College’s programs are available to the public on the College’s website. The College also requires each academic program, educational unit, and support area to complete a CRE every four years, which is available to the campus community on the College’s website. For discussion of how the College communicates the program reviews to the public, see Standard I.B.8.

The marketing staff uses social media, UH News, and the Leeward Communication’s blog to share news and announcements with the public. The marketing staff sends news releases to the UH News distribution system, which posts articles on UH News (online webpages and emailed messages). News media, bloggers, and influencers also disseminate information. (IVA-86).

The homepage of the College website features Leeward Communication’s blog entries (IVA-87). The posts share information, announcements, news, and feature articles. The College’s social media accounts provide additional avenues to communicate with the public. Its Facebook page, Twitter account, and Instagram account are the most active of the social media accounts (IVA-79, IVA-80, IVA-81).

Many items shared on social media have a high engagement rate. The Facebook event post on February 21, 2018, had 2,200 views (IVA-88). The Facebook news post on December 18, 2017, had 26,000 views (IVA-89). The Facebook news post on November 27, 2017, had 1,700 views (IVA-90). The Facebook event post on November 2, 2017, reached 12,000 people with 4,600 views (IVA-91).

**Analysis and Evaluation**

The College has an extensive communication system that ensures that the College effectively documents and communicates decision-making processes and resulting decisions. This system includes convocation, division and discipline meetings, campus intranet, emails from governance groups, the College and UHCC System websites, on-campus digital signage system, and the campus bulletin.

During the roundtable discussions at the convocation in spring 2018, faculty and staff expressed their opinions about campus communication and decision making at the College. Participants discussed how the College meets Standard IV.A.6 and how the College can improve in these areas. The faculty and staff recognize that the College has a decision-
making process and many expressed interest in learning more about the process and possibly increasing their involvement in the process (IVA-61, pp. 16-17).

IV.A.7.

Leadership roles and the institution’s governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

Evaluation of Institutional Governance and Decision-Making

The College regularly evaluates its governance and decision-making policies and uses the results of those evaluations to make improvements, which it communicates to the campus community. For detailed discussion of how the College regularly evaluates its policies to ensure their effectiveness, see Standard IV.A.2. For further discussion of how the College communicates the results of evaluations, see Standard IV.A.6.

Continuous Improvement of Institutional Governance and Decision-Making

The College uses an employee satisfaction survey, which is discussed in detail in Standard LB.7, as a broad-based mechanism to evaluate its governance and decision-making procedures and processes. The College also uses this survey to evaluate its leadership roles.

According to the 2016 Employee Satisfaction Survey, 36 percent of the faculty and staff who responded (n=200) agreed that the Campus Council effectively carries out its role in governance. Of those surveyed, 55.5 percent were unsure. The survey indicated that 55.5 percent of the faculty and staff who responded agreed that the Faculty Senate effectively carries out its role in governance. Of those surveyed, 38 percent were unsure (IVA-24, Items 14-15, pp. 7-8).

Given that 38 to 56 percent of respondents were unsure about the effectiveness of these governing group, the chairs of the Campus Council and the Faculty Senate led a breakout session at convocation in January 2017 to solicit feedback on how to better improve the two organizations and improve communication about these governance groups (IVA-62, IVA-92).

Administrative leaders discussed the results of the campus survey and determined that the Campus Council and Faculty Senate would create and administer additional surveys to gather more information from campus constituents about the integrity and effectiveness of these governance groups.

The Campus Council discussed the results of the campus survey at its meeting in February 2017 (IVA-93). During spring 2017, the council conducted its own member survey (IVA-94). According to the results, two-thirds of its membership responded that their knowledge of the council’s role and function had increased during the academic year. The most common suggestions for improvement to the College’s governance and planning processes included increased constituent engagement and more effective, timely communication to the campus community of the council’s role and accomplishments. As a result, the council sends emails
to announce their upcoming meetings, includes the agenda, and invites campus constituents to attend or contact current council members (IVA-68). Council members suggested starting in-person conversations with their constituents to solicit specific feedback (IVA-95). Additionally, because the College had not reviewed L1.201, Policy on Shared Governance, since its adoption in 2003, the council created an ad hoc committee in spring 2017 to review the policy and to propose best practices with current participatory governance practices (IVA-25).

The Faculty Senate discussed the results of the 2016 campus satisfaction survey at its August 2017 meeting and appointed the Elections Committee to design and administer its own satisfaction survey, which it distributed to the campus community (IVA-96, IVA-97). In fall 2017, the committee evaluated the results (n=71) and suggested improvements (IVA-98). Results indicated that 77 percent of faculty agree that the Faculty Senate works on relevant issues and concerns. To improve faculty satisfaction, the Faculty Senate held a breakout session at convocation in fall 2017 to educate the campus community about the functions of the senate and the issues that the senate faced the previous academic year. New and returning senators attended and were available to answer questions (IVA-99).

Survey results also indicated that 71 percent of faculty believe that the monthly blog, News from Faculty Senate, is an effective way to communicate with the campus. The Faculty Senate Executive Committee created the blog to increase communication about the senate and its role. According to its first posting, “Blog posts will share important news from the Faculty Senate to our core constituencies and the campus at large. This blog is not intended to replace the Faculty Senate website which is the official source for Senate meeting agendas, minutes, motions, and committee reports. Instead, this blog will serve as an up-to-date supplement sharing commentary, activities, and other news of importance to you” (IVA-100).

The Student Government consistently seeks feedback from students using a suggestion box outside of its office at the Pearl City campus and at the Wai‘anae Moku Education Center and through weekly Student Life emails indicating office hours, social media sites, and an email address for making suggestions (IVA-101). The Student Life office communicates the results of these suggestions to the campus community through email and on its website. In fall 2017, the Student Government conducted an effectiveness survey that will gain student, faculty, and staff perspectives (IVA-102). The office shared the results on the Student Life website.

**Analysis and Evaluation**

Surveys are the primary tool used to evaluate the integrity and effectiveness of the College’s governance and decision-making procedures and processes. The College shares findings from the surveys with the entire campus community at convocation, and campus governance groups further discuss findings relevant to them. Administrative leaders and governance groups use these findings as the basis for improvement by collecting more data as needed, determining ways to increase constituent engagement, and diversifying communication methods.
The College demonstrates regular and thoughtful review of feedback within each of the governance bodies. The governance bodies share results of campus surveys with the campus community at large and provide constituents an opportunity to offer suggestions for improvement. The governance bodies are currently reviewing L1.201, Policy on Shared Governance, and are encouraging all constituents to participate in the process of reviewing decision-making within a shared governance model.

</table>
IV.B. Chief Executive Officer

IV.B.1. The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

Evidence of Meeting the Standard

At Leeward Community College (Leeward CC), the current chancellor (college CEO) first assumed the position of interim chancellor in March 2007. In May 2008, the UH Board of Regents appointed the interim chancellor to the position of chancellor (IV-B-1, p. 15). He is the first faculty member of a University of Hawai‘i Community Colleges (UHCC) campus to assume the position of chancellor at his home campus and the first Native Hawaiian chancellor of the College (IV-B-2). On March 29, 2017, the Native Hawaiian Education Association honored him as Native Hawaiian Educator of the Year 2017 (IV-B-3). After more than 11 years, the chancellor will retire on July 1, 2018, and Suzette Robinson will assume the position of interim chancellor.

The chancellor’s duties as noted in the job listing for his position are as follows:

Under supervision of the vice president for community colleges and university president, provides leadership as the chief executive officer for the College and is responsible for the overall administration and management of the College’s instructional, student services, institutional support, academic support, continuing education and training programs and workforce development.

- Represents the University of Hawai‘i and acts on behalf of the College within the community.
- Serves as the College liaison officer to the president of the university and the president’s staff, the governing board, the vice president of community colleges, and the state legislature.
- Responsible for setting the institutional goals and mission, planning and forecasting courses of action, determining performance objectives and desirable results, developing strategies to achieve goals, allocating resources, developing policies, setting procedures, developing the budget, and so forth.
- Works with the campus program managers and various recommending and advisory groups in matters relating to the priorities for the direction of the College, especially with regard to staffing and budget planning and resource allocation.
- Responsible for the financial soundness of the College’s operations.
- Works with administrative staff members to direct, manage and supervise personnel responsible for academic and non-academic programs.
- Renders decisions on renewals, evaluations, disciplinary actions, appointments, and tenure and promotion applications.
- Establishes internal and external communication processes to handle transmittal of information.
Articulates mission of the College to serve the campus and community at large.

Responsible for institutional fundraising, marketing and public relations. (IVB-4)

For further discussion of the selection of the chancellor and the newly drafted UHCC Policy (UHCCP) 9.210, Recruitment, Selection, and Appointment of Community College Chancellors, see Standard IV.C.3.

The chancellor and his executive team regularly communicate institutional values, goals, and institution-set standards to faculty and staff at each convocation, which is held before the start of each semester. Faculty and staff receive detailed handouts of the information covered at convocation; the College also posts the handouts on the College intranet (IVB-5). In addition to the convocation presentation, the chancellor regularly communicates updates, goals, and accomplishments to all faculty and staff through the campus electronic mailing list (IVB-6).

Through the approved Integrated Planning and Budgeting Process, the chancellor ensures that institutional research is linked to institutional planning and resource allocation. See Standard LB.4 for details.

**Analysis and Evaluation**

The chancellor is responsible for the overall quality of every aspect of the College. The chancellor provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

According to the 2016 Employee Satisfaction Survey, 78 percent of the faculty and staff who responded (n=200) agreed that the chancellor provides effective leadership to the campus. Of those surveyed, 15.5 percent were unsure and 5.5 percent disagreed (IVB-7, Item 16, p. 8).

IV.B.2.

*The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution’s purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.*

**Evidence of Meeting the Standard**

The chancellor manages a team of seven executive and managerial positions and the Creative Services (Marketing and Public Relations) office (IVB-8). The College has two vice chancellors – one for Academic Affairs and one for Administrative Services. The Academic Affairs area includes a dean of arts and sciences, a dean of career and technical education, a dean of student services, and an interim dean of academic services. The vice chancellor for academic affairs (VCAA) also supervises the director of the Office of Planning, Policy, and Assessment (OPPA), a position that is currently vacant.

The chancellor maintains an open-door policy to his office and is often in communication, either in person, via phone, or via email on issues of importance with all of his administrative
team. The chancellor has weekly scheduled meetings with the vice chancellor of administrative services (VCAS) and the VCAA and meets informally to discuss pressing issues with them on a daily basis. The chancellor has regularly scheduled monthly meetings with his entire administrative team. The chancellor delegates authority for academic initiatives to the VCAA and the administrative resources to the VCAS (IVB-9, IVB-10, IVB-11). The chancellor believes in delegation of authority to the administrative team but intercedes when circumstances warrant a higher-level decision.

The chancellor makes the final decisions in the College’s Integrated Planning and Budgeting Process. This process, described in Standard LB.9, incorporates assessment results into the Annual Report of Program Data (ARPD) template from all units, programs, and divisions to evaluate its programs and activities. The end result of this process is the generation of an institutional priorities list, which the College uses to guide the development of the Operational Expenditure Plan. The Campus Council makes the final recommendation about the institutional priorities list to the chancellor, who has final decision-making authority on campus resource allocations.

**Analysis and Evaluation**

The chancellor plans, oversees, and evaluates a team of seven executive and managerial positions that suit the institution’s purpose and needs. The chancellor holds monthly meetings with the entire team and delegates authority for academic initiatives to the VCAA and authority for administrative resources to the VCAS.

IV.B.3.

*Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by: establishing a collegial process that sets values, goals, and priorities; ensuring the college sets institutional performance standards for student achievement; ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions; ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning; ensuring that the allocation of resources supports and improves learning and achievement; and establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.*

**Evidence of Meeting the Standard**

In line with the *UHCC Strategic Directions 2015-2021* and goals, the chancellor guides the College in the annual Integrated Planning and Budgeting Process. This process is described in detail in Standard LB.9 and begins with a review of the mission statement and *Strategic Plan 2015-2021*. At an annual summer leadership retreat, the chancellor sets the focus for the coming year and initiates the annual planning process. Thereafter, campus constituents provide input into the Integrated Planning and Budgeting Process, which is driven by the College’s common values, goals, priorities, and institution-set standards.

The OPPA provides the College with accurate data reports and facilitates program review, evaluation, and the planning process. The College integrates the data provided by the OPPA into the planning process and connects the resource request lists from the ARPD process to
resource allocations. Resource requests are based primarily on program assessment and review data, such as factors indicating demand, efficiency, effectiveness, and degree completion.

The College’s institution-set standards mirror the UHCC System’s standards (IVB-12). See Standard L.B.3 for further discussion.

The chancellor is responsible for institutional planning and supports the continual improvement of the planning process. The OPPA provides an Institutional Effectiveness Report to track progress toward campus goals and summarize the results of campus planning efforts as part of the Integrated Planning and Budgeting Process. The OPPA will also provide data and analysis to the chancellor, vice chancellors, and other campus leaders upon request.

Analysis and Evaluation

The chancellor ensures the College achieves its mission through well-established policies and procedures that are collegial and evidence based. In line with the UHCC Strategic Directions 2015-2021 and goals, the chancellor guides the College in the annual Integrated Planning and Budgeting Process. This process incorporates data driven input from all constituencies at multiple levels and is driven by the College’s common values, goals, priorities, institution-set standards, and mission.

IV.B.4.
The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

Evidence of Meeting the Standard

The chancellor has responsibility to select the accreditation liaison officer (ALO). The ALO collaborates with the chancellor and facilitates the self-evaluation process. The ALO is primarily responsible for preparing the Institutional Self-Evaluation Report and guides all other accreditation efforts.

Every year, the chancellor oversees the annual reporting requirement to the Accrediting Commission for Community and Junior Colleges (ACCJC). The chancellor delegates responsibility for the Annual Report to the ALO and the Annual Fiscal Report to the VCAS (IVB-13, IVB-14). The chancellor encourages administration and faculty participation on evaluation teams.

The chancellor has delegated authority for overseeing accreditation efforts to the VCAA who is also the ALO. Administrative leaders ensure compliance with accreditation requirements in their respective areas and share updates with faculty and staff at convocation each semester. Through the Faculty Senate Curriculum and Assessment Committees, the faculty and staff ensure compliance with accreditation requirements regarding curriculum and student learning.
Analysis and Evaluation

The chancellor has the primary responsibility to ensure that the College meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies, and oversees the annual reporting requirement to ACCJC. The chancellor selects the ALO who is also the VCAA. Faculty, staff, and administrative leaders, including governance groups and program and division chairs, also have responsibility for assuring compliance with accreditation requirements within their respective areas.

IV.B.5. The CEO ensures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

Evidence of Meeting the Standard

The chancellor ensures the College is complying with governing board policies by maintaining current knowledge of federal and state regulations, union policies and contracts, and UH System policies. Federal and state emails update the chancellor on new or revised regulations or laws as well as provide reminders on meeting compliance. The Council of Community College Chancellors meets with the UH vice president for community colleges to review compliance and state and federal laws that affect education as well as the College mission (IVB-15).

The VCAS receives updates at monthly system meetings on fiscal and Title IX regulations. The VCAS conveys this information to the campus during convocation and at various workshops and trainings throughout the year. The UH System Office of Institutional Equity created a mandatory online Title IX training that faculty and staff need to complete every two years.

The financial aid officer receives updates on financial aid regulations and ensures that all counselors are aware of new regulations.

In decision-making processes, the chancellor and the administrative team refer to UH System policies when making decisions or developing campus policies. Proposed policies must be in accordance with the institutional mission and meet applicable governing policies. They are vetted through the College’s L1.101, Policy on the Policy Development Process (IVB-16).

The chancellor has various ways to ensure the College maintains effective control of the budget and expenditures. The College has employed a VCAS for over a decade who provides transparent fiscal information to the campus at every convocation and collaborates with the Campus Council and the Faculty Senate on budgetary matters. Once a year the VCAS shares the Operational Expenditure Plan with the campus in an email (IVB-17). The VCAS regularly discusses the budget with the chancellor, VCAA, deans, and the Business Office; the VCAS also discusses the budget in quarterly meetings with the Financial Management Group. The chancellor actively participates in the Campus Council, which reviews budget planning and recommends resource allocations.
Analysis and Evaluation

The chancellor ensures College compliance with relevant statutes, regulations, and policies by maintaining current knowledge of federal and state regulations, union policies and contracts, and UH System policies. The chancellor maintains effective control of the budget and expenditures primarily through the VCAS and the Integrated Budgeting and Planning Process. The chancellor and the College’s administrative team ensure practices are consistent with the College’s policies and mission through clearly defined processes.

IV.B.6.  
_The CEO works and communicates effectively with the communities served by the institution._

Evidence of Meeting the Standard

The chancellor communicates with the communities served by the College in a number of ways. He represents the College and acts on its behalf within the community. The chancellor sends frequent emails through the facstaff email listserv sharing new partnerships and programs and utilizes social media to raise awareness across campus ([IVB-18]).

The chancellor connects with the community through various events like the Discovery Fair, L’ulu (Culinary Arts fundraiser), Geek Day, the Volunteer Income Tax Assistance Program, the Theatre, the annual luncheon for local high school principals, the Department of Education’s Robotics Competition, and the Wai’anae Moku Education Center Graduate Recognition Ceremony ([IVB-19, IVB-20, IVB-21, IVB-22, IVB-23]). In 2013, Chancellor Cabral received the first Hawai‘i State Science Olympiad Science, Technology, Engineering, and Math (STEM) Appreciation Award for “having the foresight to recognize the potential of the Science Olympiad program [and] how it could positively impact K–12 students and teachers throughout the State of Hawai‘i” ([IVB-24, IVB-25]). The chancellor is visible in the community and posts pictures of events on the College website and social media.

The chancellor understands his role as the spokesperson for the College and prioritizes building relationships with partners and community groups to showcase the College and educate the community about the College’s goals and accomplishments. The chancellor is involved with the following partnerships and community groups:

- National Association for Community College Entrepreneurs
- Ka Lama Education Academy Advisory Board and Kululā’au (initiatives to provide teachers for the Leeward coast of O‘ahu)
- Kamehameha Schools Education Council
- Lions Club, Rotary Club, and Business Clubs
- Kaua’i Filipino Chamber of Commerce
- American Association of Community College Conferences
- Hawai‘i State Legislature
- Leeward CC Employers’ Appreciation Dinner
- Aloha United Way
- Kauhale Youth Leadership Training
- Wai’anae Coast Comprehensive Health Center
● State of Hawai‘i Department of Education partnerships
● James and Abigail Campbell Family Foundations
● Asian Pacific Islander Council
● InPEACE
● Hakuoh University
● Asian American and Native American Pacific Islander-Serving Institutions
● Military activities
● Community marches
● Neighborhood board meetings

In 2017, Kala‘ealoa Partners, a community-focused electrical energy provider, gifted the College $100,000 in scholarships (IVB-26). The chancellor partners with community organizations by attending meetings and community events. The chancellor actively seeks to create new relationships and cultivate existing relationships with businesses, institutions, and members of the community.

**Analysis and Evaluation**

As the College’s head representative, the chancellor works and communicates effectively with the communities served by the College. The chancellor sends frequent campus emails and connects with the broader community through numerous annual events. Understanding his role as the spokesperson for the College, the chancellor is involved in over 20 partnerships and community groups and actively seeks to create new relationships with businesses, institutions, and community members.

IV.C. Governing Board

IV.C.1. The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution. (ER 7)

Evidence of Meeting the Standard

The University of Hawai‘i (UH) Board of Regents (BOR) is established under Hawai‘i Revised Statutes, Section 304A-104. The fifteen-member board is responsible for the general management and control of the UH System that incorporates all of public higher education, including the University of Hawai‘i Community College (UHCC) System. The regents (board members) are appointed to five-year terms (with one exception noted below) and represent either one of the four counties in the state or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the UH System. The student regent is appointed for a two-year term and may be reappointed (IVC-1, IVC-2).

The governor appoints members of the BOR, who are drawn from a slate of nominees submitted by the Regents Candidate Advisory Council, and the state senate confirms them. The council consists of seven members, with four members appointed by the governor and one member each appointed by the president of the state senate, the speaker of the house, and the association of emeritus regents. The council solicits nominations for the regents, qualifies and screens the applicants, and presents to the governor a slate of nominees for each vacant regent position (IVC-3, IVC-4).

The BOR bylaws include the specific organization and responsibility of the BOR and its committees for academic matters, financial oversight, and general control of the UH System. This authority is further delineated through board policies (IVC-5, IVC-6). Several policies, including Regents Policy (RP) 4.201, Mission and Purpose of the University, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements (IVC-7). The BOR executes these responsibilities through regular reporting and deliberation at board and committee meetings. The BOR also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan (IVC-8).

Analysis and Evaluation

State statute establishes the governing board, which is appointed through a process of open recruitment for board member candidates followed by gubernatorial appointment and senate confirmation.

State constitution and statute establishes the authority of the BOR for the governance of the UH System, and the BOR has organized its bylaws, policies, and processes to carry out the full measure of board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.
The authority of the BOR encompasses all components of the UH System, including the UHCC System and the individual community colleges.

IV.C.2.
*The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.*

**Evidence of Meeting the Standard**

The primary policy governing BOR interaction among board members and with the broader UH System community is RP 1.202, Relationship of the Board to Administration and University. Specifically, Section III.A.2.B of the policy states:

> Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized. ([IVC-9](#))

The policy also delineates and structures the communication between the BOR and the UH System administration, including the requesting and providing of information to and from the BOR and the administration.

The BOR handbook that is made available to all incoming regents and published on the BOR website further emphasizes this policy. The handbook is based on best practices drawn from the Association of Governing Boards and includes expectations of regents, including the responsibility of individual regents to “serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree” ([IVC-10](#)).

The 2017 Board Self-Assessment includes several items focused on “acting as a unit.” Responses to the self-assessment questionnaire indicate that regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together” ([IVC-11, IVC-12, IVC-13](#)).

**Analysis and Evaluation**

RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of board minutes did not disclose any instances of board members acting outside the policy guidelines.
IV.C.3. 
The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.

Evidence of Meeting the Standard

As the governing body of the UH System, the BOR selects and evaluates the university president. RP 2.203, Evaluation of the President, establishes the evaluation protocols for the university president, including an annual self-assessment by the president, additional data collection by the BOR, a preliminary meeting between the BOR and the president, and a final evaluation after the president responds to the preliminary assessment (IVC-14).

There has not been a search for the UH vice president for community colleges (VPCC) since the position was re-established in 2005 and the current VPCC was appointed to oversee the reorganization of the community college system. Should the position of VPCC become vacant, the president would follow the recruitment and other procedures outlined in RP 9.212, Executive and Managerial Personnel Policies. In a two-step process that differentiates the functions of appointment and approval, the president would make a recommendation for VPCC to the BOR, which has the final approving authority for that position (IVC-15).

The VPCC manages the process for selecting the chancellor (CEO) of a college. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee, composed of representatives from various college constituencies and the community that the college serves. The VPCC solicits nominations for members of the screening committee from governance groups and determines the final composition of the committee based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of chancellors, UHCC Policy (UHCCP) 9.210, Recruitment, Selection, and Appointment of Community College Chancellors, was drafted in spring 2018, and vetted and approved by the chancellors and campus governance bodies (IVC-16). A detailed set of procedures, which has been used consistently for several years, has also been codified.

The VPCC has the authority for the appointment of the college chancellor with final approval of the appointment by the president of the university. A public announcement is made, and the selected candidate’s appointment is also placed on the board’s agenda to ensure that the regents are fully informed of the selection process and the selected candidate.

Regents conduct evaluations in executive session at a public board meeting with the summary results of the evaluation made public and included in board minutes. The posted agenda items and subsequent minutes for the past three presidential evaluations are provided as evidence (IVC-17, IVC-18, IVC-19).

The BOR delegates the evaluation of the VPCC to the university president and the evaluation of the individual college chancellors to the VPCC. Executive Policy (EP) 9.203, Evaluation of Board of Regents Appointees, and EP 9.212, Executive/Managerial Classification and
Compensation, govern the annual evaluation of both the VPCC and the chancellors (IVC-20, IVC-21).

Executive policies establish an annual review of an executive’s performance that includes a 360-degree assessment by the individual as well as peers, subordinates, and constituents. The individual’s self-assessment also includes a review of accomplishments and goals set for the review year and the establishment of goals for the upcoming year. The supervisor and the executive being evaluated discuss the results of the evaluation, which impact both continued employment and compensation increases.

The UHCC System further refines the annual evaluation of executive personnel, including chancellors, through UHCCP 9.202, Executive Employees Performance Evaluation. This policy delineates the requirements for the respondents in the 360-degree assessment and also adds the college’s attainment of its strategic goals as a component of the chancellor’s evaluation (IVC-22).

The UH System office reviews the evaluation system on a periodic basis. In the 2016-2017 review, the office adopted two changes. First, the office added an additional item to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda (IVC-23). Second, the office changed the categories of performance rating to better reflect the gradations in overall performance. Each executive and managerial employee is now rated as exceptional, exceeds expectations, meets expectations, or does not meet expectations (IVC-24).

Analysis and Evaluation

The procedures used to recruit and select the VPCC and the college chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The president of the university makes the final selection of the vice president, subject to approval by the BOR. The VPCC makes the final determination of the chancellor, subject to approval by the president.

The vice president and all college chancellors participate in annual evaluations involving 360-degree evaluations, assessment of goal attainment, and progress toward strategic goals. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and determine merit-based salary increases when available.

IV.C.4. **The governing board is an independent, policy-making body that reflects the public interest in the institution’s educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure. (ER 7)**

Evidence of Meeting the Standard

The autonomy of the UH System and related independent authority of the BOR is embodied in Article X of the state constitution. Section 6 of Article X specifically states:
There shall be a board of regents of the University of Hawai‘i, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawai‘i, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern. (IVC-25)

In carrying out its responsibilities, the board leadership often testifies at legislative hearings on matters relating to the UH System and meets with key state legislators on various bills and budget matters. The BOR and the UH System’s administrative legislative coordinator manages these legislative communications.

**Analysis and Evaluation**

The state constitution establishes the autonomy of the UH System. Given the authority of the legislature to enact laws of state wide concern, the BOR remains attentive to whether such laws might impede the UH System and the BOR from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for UH athletics led to extensive legislative hearings and bills introduced relating to management and control within the UH System. The BOR responded by creating an Advisory Task Group on Operational and Financial Controls Improvement to conduct its own audit of UH System operations. The task group, comprised of both regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in several areas for improvement. The BOR considered the reports and made governance and policy changes in accordance with some of those recommendations (IVC-26, IVC-27, IVC-28, IVC-29, IVC-30).

By taking the initiative to address the issues raised by the state legislature in a comprehensive and very public manner, the BOR exercised not only its responsibility for oversight and management of the UH System, but also its authority to act on matters relating to the UH System and protect the institution from undue influence and political pressure.

**IV.C.5.**

*The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.*
Evidence of Meeting the Standard

Both by the structure of and responsibilities established for its standing committees, and by its board policies, the BOR acts to fulfill its responsibilities as the single provider of public higher education in the state. Board policies are aligned with strategic plans and both guide the UH System in fulfilling its overall mission. The role of community colleges within the UH System is further defined in RP 4.207, Community College System (IVC-31).

The BOR has modified the UH System mission statement twice in the past several years. In 2009 the regents adopted a change in the mission that made explicit the UH System’s responsibility and commitment to the success of Native Hawaiian students and the desire for the UH System to be a model indigenous serving institution (IVC-7). In 2014, the regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the UH System. This subsequently led to the creation of a new policy, RP 4.208, Sustainability, illustrating the alignment of mission and policy (IVC-32). Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in RP 4.201, Section C.b, “The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality.” RP 4.201, Section C.a also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements.

Analysis and Evaluation

The BOR bylaws and policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system and reflect the broad compliance with the overall expectations of board management, quality control, and fiscal oversight.

IV.C.6.

*The institution or the governing board publishes the board bylaws and policies specifying the board’s size, duties, responsibilities, structure, and operating procedures.*

Evidence of Meeting the Standard

The BOR website includes links to the BOR bylaws and policies (IVC-2). The bylaws include sections defining the board membership and organization, the officers and duties of each officer, the standing committee structure of the BOR and the scope of each committee, the meeting requirements for both committees and the BOR, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the BOR. The bylaws also include the conflict of interest requirements for board members (IVC-5).
**Analysis and Evaluation**

The bylaws are published and made available to the public and include all required elements of the standard.

IV.C.7.  
*The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.*

**Evidence of Meeting the Standard**

The BOR reviews board policies on a staggered three-year cycle with current iterations posted at the BOR website. As a result of a recommendation from the previous institutional self-evaluation, the UH System and BOR developed and implemented the UH System wide Policies and Procedures Information System (PPIS). The PPIS documents all of the board policies and the related UH System executive policies and administrative procedures (IVC-33).

The features of the PPIS include the following:

- Description of the PPIS with frequently asked questions on the PPIS website
- Easy public access to all policies, including from the BOR website
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While board policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related board policy
- Automatic notification to interested parties of any change in policy (IVC-34).

When the UH System and the BOR implemented the PPIS in 2014, they re-codified all policies to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1 through 4, August 2018 for Chapters 5 through 9, and August 2019 for Chapters 10 through 13 (IVC-35).

The BOR began reviewing the 28 policies in Chapters 1 through 4 in summer 2017. They reviewed the policies for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. The committee made recommendations as to whether a policy would remain unchanged, be subject to editing for clarity or alignment with current practice, undergo substantive review and modification, or be repealed. Based on this assessment, the committee determined that one policy will be repealed and six will undergo substantive review. One new policy may be created. The BOR will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on November 1, 2017, and subsequently provided to the BOR at its meeting on November 16, 2017 (IVC-36, IVC-13). The committee provided a further update on April 5, 2018 (IVC-37).
The review cycle for Chapters 1 through 4 began as scheduled in summer 2017 and resulted in the review of 28 policies. Six policies were substantially updated through the review process. All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of board minutes confirmed that board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawai‘i Revised Statutes, the public employee collective bargaining law.

Analysis and Evaluation

The board policies are publicly available through the BOR website and are managed through the comprehensive PPIS system. This system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

IV.C.8.
To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.

Evidence of Meeting the Standard

The BOR has established strategic goals for the UH System and its component colleges in four key areas.

- Hawai‘i Graduation Initiative focusing on student success
- Hawai‘i Innovation Initiative focusing on research and innovation and commercialization of UH System research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the UH System’s role as the single system of public higher education in the state.

These key goals, endorsed by the BOR in 2015 in the UH Strategic Directions 2015-2021, are further articulated in and aligned with the strategic goals of the UHCC System and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures (IVC-38, IVC-39, IVC-40, IVC-41, IVC-42).

The BOR regularly receives updates on the UH System’s progress in meeting these strategic goals through data on established metrics and trends and presentations at either board meetings or meetings of the academic and student affairs committee. The BOR has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the BOR has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways.
The BOR meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda. Leeward Community College hosted the board meeting on September 21, 2017 (IVC-43).

**Analysis and Evaluation**

The BOR has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

IV.C.9.  
*The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.*

**Evidence of Meeting the Standard**

All new BOR members receive a full-day orientation that consists of two major components. The first is an introduction to UH System functions, governance, and strategic directions. The second component deals with board governance, processes, ethics, and conduct. All new board members receive a copy of the BOR General Overview as a part of the orientation as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, the BOR pairs new board members with a more experienced board member, who serves as a mentor to the incoming member (IVC-5, IVC-44, IVC-10).

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees (IVC-45).

The BOR also organizes training for its members as a part of regular board retreats or board committee meetings. For example, during 2016-2017, the UH external auditor conducted a four-part training session for the BOR independent audit committee, drawn from the American Institute of Certified Public Accountants handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management (IVC-46). The vice president for budget and finance also provides an overview of the state budget as it pertains to the UH System (IVC-47).

**Analysis and Evaluation**

New board members receive a comprehensive orientation and related materials and are paired with a mentor from among the experienced board members. Attendance at national board professional association conferences and training at board meetings provides board members with professional development.
In 2017, the BOR updated its committee structure to modify the personnel committee to also include board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to board service is provided for board members.

IV.C.10. **Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board’s effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.**

**Evidence of Meeting the Standard**

RP 2.204 establishes the process for board self-evaluation. In 2017, the BOR amended its bylaws to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance with explicit responsibility for managing the board evaluation process (IVC-48, IVC-49).

Pertinent to the current institutional self-evaluation cycle, the BOR conducted annual evaluations since 2014 (IVC-50, IVC-51, IVC-11). Additionally, in 2012-2013, the BOR undertook a comprehensive audit of the UH System operations, including board functions and structure, and implemented significant changes in response to the audit recommendations (IVC-26, IVC-27, IVC-28, IVC-29, IVC-30). The BOR has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations (IVC-52).

**Analysis and Evaluation**

The BOR uses the results of its evaluation to improve its operations. For example, in 2015 the board evaluation included an assessment of whether the board committee structure adequately aligned with the strategic directions of the UH System. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in uncoordinated conversations about student success. After debate and consultation, the BOR consolidated the three committees and focused the committee responsibilities on the student success agenda. At the same time, the BOR created a committee on research and innovation in alignment with the UH System’s strategic directions (IVC-5).

While the BOR has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the BOR acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

IV.C.11. **The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for**
dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution. (ER 7)

**Evidence of Meeting the Standard**

Article X of the BOR bylaws establishes the conflict of interest policies and procedures for regents. Regents are informed of the ethics requirements during their initial orientation (IVC-5).

RP 2.206, Regents as Employees, also describes the conflicts of interest that may arise when regents are also active employees of the UH System and the conditions under which such regents need to recuse themselves from actions impacted by their employment status (IVC-53).

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai‘i State Ethics Commission. These disclosures are open to the public. The BOR has included an educational presentation by the State Ethics Commission executive director as an agenda item at its regular meetings (IVC-54).

**Analysis and Evaluation**

The BOR is subject to both state ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. The BOR informs its members of the ethics requirements through their initial orientation and through regular professional development.

The BOR routinely identifies potential ethics concerns during board meetings and the regent in question is either recused from action and deliberation on the agenda item or the potential conflict is determined not to preclude participation. The UH System general counsel is available at board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for board members having acted in a manner inconsistent with the established ethics bylaws and policies.

IV.C.12. *The governing board delegates full responsibility and authority to the CEO to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.*

**Evidence of Meeting the Standard**

RP 2.202, Duties of the President, clearly documents the relationship between the BOR and the UH System president and establishes the authority of the president to implement and administer board policies (IVC-55).
The general policy on duties of the president is further refined in specific actions. For example, RP 9.218, Delegation of Personnel Actions, describes those hiring actions reserved by the BOR, those delegated to the president, and those that may be further delegated by the president (IVC-56).

The structure of the UH System establishes this line of authority with the UH System president and through the president to the VPCC and the individual college chancellors.

When the BOR does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. The chairperson may establish task groups upon authorization by the BOR and with such powers and duties as determined by the BOR. The tenure of a specific task group shall expire at the completion of its assigned task.

For example, the BOR formed a task group to create an Integrated Academic and Facilities Plan for the UH System (IVC-57, IVC-58). The task group included both board members and UH System administrative officials. The task group held several meetings that led to the final recommendation to adopt a plan governing academic program planning and related facilities construction across the ten-campus UH System (IVC-59, IVC-8, IVC-11).

**Analysis and Evaluation**

While the BOR maintains its responsibility for establishing overall strategic direction, UH System policies, and fiduciary management of the UH System, the BOR does not actively engage in direct or detailed management of the community colleges or individual campuses.

IV.C.13. The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college’s accredited status, and supports through policy the college’s efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.

**Evidence of Meeting the Standard**

The community colleges routinely inform the BOR about the status of their accreditation.

In preparation for the 2018 institutional self-evaluation report (ISER), the VPCC presented the BOR Committee on Academic and Student Affairs with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the BOR acted to create a permitted interaction group to assist in the evaluation of board-related standards (IVC-60). A permitted interaction group is comprised of a subset of the board members and is allowed to engage in conversation and dialogue about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger board or one of its committees. The permitted interaction group included board leadership, the chair and vice chair of the academic and student affairs committee, and board members representing all the islands with community colleges. The VPCC provided the BOR with a further briefing on preparing for accreditation at its meeting on March 8, 2017 (IVC-61).
Members of the permitted action group were provided an early draft of Standard IV.C in August 2017 and met with representatives from the community colleges (accreditation liaison officers and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the governing board, before the six campuses presented their completed ISERs for review by the Committee on Academic and Student Affairs, the BOR, and the UH president in early summer 2018.

**Analysis and Evaluation**

The BOR was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

IV.D. Multi-College District or Systems

IV.D.1. In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

Evidence of Meeting the Standard

The University of Hawai‘i (UH) System is the sole provider of public higher education in the state of Hawai‘i. Regents Policy (RP) 3.201, Major Organizational Units of the University of Hawai‘i, establishes the overall structure of the UH System. The ten-campus UH System as a whole includes the University of Hawai‘i Community College System (UHCC) System, which is comprised of seven community colleges (see Figure 9). RP 4.207, Community College System, further establishes the UHCC System. The University of Hawai‘i Maui College is accredited by the Western Association of Schools and Colleges, Senior Division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges and function as the multi-campus system now being evaluated (IVD-1, IVD-2).

![Figure 9. The University of Hawai‘i System.](image_url)

The vice president for community colleges (VPCC), the chief executive officer (CEO) of the system, now provides the overall leadership of the UHCC System, an outcome of a reorganization in 2005. The VPCC is a member of the senior administration of the UH System, reporting directly to the UH System president (IVD-3). The UHCC System office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O‘ahu at a central site near the flagship campus in Mānoa. The VPCC works with an associate vice president for academic affairs and an associate vice president for administrative affairs to ensure support for the effective operation of the colleges at the system level (IVD-4, IVD-5).
The VPCC further works with the chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership (IVD-6). For more detailed discussion, see Standard IV.D.4. The chancellors may report through the VPCC to the president of the UH System for system wide policy-making and decisions affecting all campuses and to the VPCC for leadership and coordination of community college matters. This flow of communication preserves the actions of the UH Board of Regents (BOR) in supporting both individual campus autonomy and system wide coordinated operations (IVD-7).

The UHCC System’s functional map summarizes the delineation of functions and the differentiation of responsibilities between system and campus level. The community colleges most recently reviewed and updated the map in fall 2017. The functional map shows alignment with both the major accreditation topics as well as the detailed parts of the Accreditation Standards (IVD-8).

**Analysis and Evaluation**

Established policies and procedures clearly identify the positions of CEO for both the UHCC System (the VPCC) and individual campuses (chancellors) and identify their authorized roles in providing leadership at multiple levels.

IV.D.2.

*The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.*

**Evidence of Meeting the Standard**

The VPCC provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office and through several bodies comprised of campus representatives.

Two associate vice presidents who coordinate centralized support services in the areas of academic affairs and administrative affairs oversee the operations of the Office of the Vice President for Community Colleges (OVPCC). The associate vice president for academic affairs provides leadership in operational policy-making pertinent to the development and implementation of UHCC System wide academic plans, goals, and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment, and policy analysis; career and technical education; and student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives (IVD-9).
The associate vice president for administrative affairs provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications (JVD-10). Facilities management is one area that requires an additional level of coordination and prioritization. The UH Office of Capital Improvements (now designated as the Office of Project Delivery), established by the BOR, manages capital improvement program (CIP) projects for all campuses. The associate vice president for administrative affairs manages general UHCC repair and maintenance and minor CIP projects, and individual colleges have responsibility for routine maintenance and health and safety issues. Individual colleges have Long Range Development Plans, which the UHCC and UH Systems use to develop and justify minor and major CIP (IVD-11, IVD-12).

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: the Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs (IVD-13, IVD-14, IVD-15, IVD-16).

Each campus also mirrors the system-level structure in having executive leadership for academic affairs and administrative affairs. Where the associate vice president for academic affairs coordinates student services functions at the system level, the colleges maintain separate executive management for student services with either vice chancellors or deans. Vice chancellors for academic affairs, vice chancellors for administrative affairs, and vice chancellors for student affairs or deans for student services also meet with their counterparts from other campuses on a regular basis, extending the network of collaborative planning and decision-making and mutual support (IVD-17). For further discussion of the College’s executive team, see Standard IV.B.2.

In addition to these councils based on administrative positions, the UHCC System has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC System having joined the Achieving the Dream Initiative in 2006 (IVD-18). The system-level council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission. For a discussion of these campus-based activities, see Standards I.B.6 and II.C.5.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are sustainability and distance education. Executive Policy (EP) 4.202, Sustainability, and new RP 4.208, Sustainability Policy, signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time,
recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the UHCC System level, which will require renewed and proactive commitment from the UHCC System office and the individual campuses (IVD-19, IVD-20, IVD-21).

**Analysis and Evaluation**

The UHCC System is well structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC, while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the councils that meet with the VPCC, the committees of vice chancellors, and the system-level initiatives such as the Student Success Council.

IV.D.3.
*The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditures.*

**Evidence of Meeting the Standard**

State law, primarily Chapter 37 of the Hawai‘i Revised Statutes, governs the UH System’s budget preparation and receipt of and further distribution of resources (IVD-22). The UH System provides biennial budget requests, financial plans, and program performance reports to the governor and the state legislature in odd-numbered years; the UH System may also submit supplemental budget requests to amend any appropriation for the current fiscal biennium in even-numbered years. Major organizational units, including the UHCC System, appropriate operating and CIP funds for the UH System.

The UHCC System office, under the guidance of the associate vice president for administrative affairs, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH System, the UHCC System, and the individual college strategic plan (IVD-23). The UHCC Strategic Planning Council is the primary body for ensuring system wide participation in the UHCC strategic planning process. The membership of the council includes the chancellor, faculty senate chair, and student government chair from each college and the vice president and the associate vice presidents for the community colleges (IVD-24). The council provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC strategic plan goals and objectives. UHCC Policy (UHCCP) 4.101, Strategic Academic Planning, codifies the guiding principles of the community college Strategic Academic Planning Process, which defines the role of the council. The VPCC has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges (IVD-25).
Each college develops its own budget request (as described in more detail in Standard III.D). At the UHCC System level, the seven UHCC chancellors, with support from the associate vice presidents and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level but are consolidated at the UHCC System level for purposes of further integration in the overall UH System budget, which is ultimately submitted to the state legislature.

While state general funds, allocated by the legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Each college may also generate and retain other sources of internal and extramural funds. UHCCP 8.000, General Fund and Tuition and Fees Special Fund Allocation, and UHCCP 8.201, Unrestricted Fund Reserve—General, Special, Revolving Funds guide the management of sources of funding other than general funds. Each college’s budget reflects a different combination of revenue sources and expenditures; all campuses maintain the reserve required by accreditors (IVD-26, IVD-27, IVD-28).

Campuses have also had access to additional funds from the OVPCC and more recently from the office of the UH president, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives (IVD-29). Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. The OVPCC redistributes unallocated funds for other campus or system initiatives, such as those associated with student success.

In addition to fiscal resources, the UHCC System has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy, UHCCP 9.495, Long-Term Vacancy, created a system pool of those positions from which campuses may request reallocation based on documented need (IVD-30).

With reference to effective control of expenditures, recent actions taken between 2013 and 2016 provide an example of the controls in place to ensure accountability and sound fiscal management as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit conducted operational reviews of the Culinary Arts programs at Leeward Community College and Kapi‘olani Community College. The reports identified operational and financial risks and presented recommendations relating to the inventory management, financial analysis and reporting, and other aspects of these programs. In spring 2014, the Office of Internal Audit conducted follow-up reviews to ensure implementation of recommendations (IVD-31). The Internal Audit report was on the agenda of the May 12, 2015, meeting of the BOR Committee on Independent Audit. Subsequent to
the December 15, 2016, meeting of that same committee, findings from the internal audit report were included in the UH System’s Annual Report on Material Weaknesses and Fraud, presented to the 2017 state legislature (IVD-32, IVD-33, IVD-34). As one outcome of this case, the OVPC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs (IVD-35).

**Analysis and Evaluation**

Clearly established policies guide allocation of key resources particularly funding and personnel. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that the colleges use resources most effectively to support their missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

IV.D.4. 
*The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.*

**Evidence of Meeting the Standard**

The UH System has a president, a VPCC (among several vice presidents responsible for differentiated areas of UH System functions), and chancellors for each of the ten universities or colleges in the system. The VPCC is the CEO of the system of the seven UHCC campuses. Each college has a chancellor, the CEO of the institution. RP 4.207 established the community college system in 2002, although the colleges have been functioning since 1965 as part of the UH System (IVD-2). In 2005, the BOR approved the reorganization of the community college system and created the new executive position of VPCC (IVD-36). A subsequent memo to the college chancellors provided detailed organizational charts as well as a functional statement for the OVPC (IVD-37). Key among the major functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of community college chancellors for the overall management and governance of their campuses is further affirmed in EP 1.102, Authority to Manage and Control the Operations of the Campus, which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads” (IVD-38). UHCCP 8.000 also specifies the chancellor’s responsibility “to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission” (IVD-26). EP 9.112 Attachment B delegates responsibility for a broad range of personnel actions to the chancellors (IVD-39).
In line with the need for accountability in the fulfillment of their duties, chancellors and other executive-managerial personnel are subject to annual performance evaluation with final assessment by the VPCC. UHCCP 9.202, Executive Employees Performance Evaluation, thoroughly codifies this process (IVD-40, IVD-41).

**Analysis and Evaluation**

Several policy and procedural documents clearly document that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC System. The trend of delineation and delegation has generally given more autonomy to the chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

IV.D.5.

*District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.*

**Evidence of Meeting the Standard**

The community colleges in the Hawai‘i state wide system of public higher education operate within a three-tiered system: the UH System as a whole; the UHCC System; and the individual community college campuses located on the four major islands in the state. The community colleges and the University of Hawai‘i Maui College manage satellite learning centers, providing additional outreach across the state (see Figure 9 in Standard IV.D.1). A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

There are multiple structures in place at the UH- and the UHCC-system level that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive strategic plan that provides the conceptual guidance for mid-range planning. These currently include the *UH Strategic Directions 2015-2021*, the *UHCC Strategic Directions 2015-2021* that was developed to be aligned with the overall UH plan, and the individual campus strategic plans, developed in alignment with the UHCC plan (IVD-42, IVD-43, IVD-44). For further discussion of the College’s strategic plan and its alignment with the UHCC strategic plan, see Standard LA.2.

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration (IVD-23). In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the UHCC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in Standard IV.D.3 (IVD-29).

Most recently, on April 20, 2017, the BOR approved the Integrated Academic and Facilities Plan for the UH System. Recognizing the critical interdependence between the academic
missions of the ten campuses and the physical and other resources required to support those missions, the plan states that it is “intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH System is addressed without undue duplication or inter-campus competition” (IVD-45). The plan provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three UH universities and the seven UHCC campuses, which function as a single major unit) and affirms the further integration of planning in noting that “the principles of this plan will be incorporated into biennium budget planning, annual operating budgets, six-year CIP plans and academic program approvals and reviews” (IVD-45).

**Analysis and Evaluation**

The UH System, the UHCC System, and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that the UH System, the UHCC System, and the individual community colleges use as the basis of evaluating institutional and system effectiveness.

**IV.D.6. Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.**

**Evidence of Meeting the Standard**

Multiple modes and avenues of communication exist in the UH System to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the VPCC and the administrative staff in the OVPCC are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH president’s senior leadership team as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the administrative representative to the BOR Committee on Academic and Student Affairs. When the colleges forward items to the BOR for approval such as strategic plans and institutional self-evaluation reports, they do so under the signature of the VPCC. In addition to publicly posted minutes of board committee and board meetings, the VPCC receives memos summarizing board-approved actions (IVD-46). The Policies and Procedures Information System notifies campuses of updates to the policies and procedures that constitute the institutional infrastructure (IVD-47).

The VPCC meets regularly with three councils representing different aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Each council documents its meetings and completes an annual self-assessment (IVD-13, IVD-14, IVD-15).
The VPCC makes semi-annual visits to each UHCC campus with information pertinent to both UHCC System and individual campus performance. Typically, fall semester visits focus on major initiatives and budget for the current academic year as well as campus scorecards in the context of performance-based funding based on data from the prior academic year (IVD-48). Spring semester visits generally provide a summary of current initiatives as well as a prospective view of upcoming work (IVD-49).

The community colleges function within a three-tiered system: The UH System, the UHCC System, and the individual community colleges. Communication between the top two tiers, the UH System and UHCC System, is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. The UHCC System is taking specific steps to improve timely access to information that documents discussion and decision-making at the system level such as agendas and minutes of councils and other deliberative bodies. The UHCC System committees will provide orientations as needed to those serving as campus representatives to system committees so they are more fully aware of their reporting duties. Additionally, the OVPCC will update its website to enhance the accessibility and currency of the information posted there.

Analysis and Evaluation

Just as the VPCC serves as an important point of connection between the UH System and the UHCC System, and between the OVPCC and the individual colleges, the chancellors of the individual colleges are responsible for coordinating with the OVPCC and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC recognizes the need to maintain access to up-to-date documentation of system-level meetings and is updating its own website to ensure better access to that information.

IV.D.7.
The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.

Evidence of Meeting the Standard

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to set standards of best practices and minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly
reviewed, new policies are created when needed, roles and responsibilities are delineated in
the functional map, and personnel are regularly evaluated on their performance in supporting
and achieving educational goals (IVD-50, IVD-51).

Of specific importance in this last context is the role of the UHCC System’s Strategic
Planning Council, the primary body for assuring system wide participation in the UHCC
strategic planning process, as codified in UHCCP 4.101. The policy identifies roles and
responsibilities in the process of campus academic planning, which provides much of the
critical infrastructure for the effective functioning of the colleges (IVD-25).

Analysis and Evaluation

Established policies and procedures as well as documentation of governance and decision-
making that operationalize those policies and procedures are subject to ongoing review.
Where appropriate, colleges are evaluated on the basis of performance-based measures that
support their efforts to meet goals linked to student achievement and learning.

QUALITY FOCUS ESSAY

Introduction

As part of Leeward Community College (Leeward CC)’s continuing efforts to improve student learning and achievement as well as demonstrate a commitment to excellence, the Self-Evaluation Core Team used the self-evaluation process to reflect on the College’s successes as well as areas that need improvement. Over the course of two years, the team remained open regarding what the Quality Focus Essay (QFE) topics would be. In fact, particular effort was made to not select topic areas too early in order to allow the self-reflective nature of the institutional self-evaluation report (ISER) to uncover those larger areas of focus for the College.

In fall 2017, the first topic became clear as the campus embraced a single goal to drive campus initiatives. This goal is known as the Wildly Important Goal (WIG) and provides a unifying vision for the many campus initiatives currently underway to increase student retention and persistence.

The second topic developed out of a breakout session at the convocation in spring 2018. These breakout sessions were focused on the areas of improvement that had been identified during the writing of the ISER. One area attracted much attention, and this led to the second QFE topic that focuses on improving student learning by making outcomes assessment more meaningful for faculty and staff.

The WIG and the efforts surrounding assessment will help “provide the institution with multi-year, long-term directions for improvement of student learning and student achievement and demonstrate the institution’s commitment to excellence.”

Action Projects

1. Increase student retention and persistence by keeping the students the College already has.
2. Improve student learning by making outcomes assessment more meaningful for faculty and staff.

Action Project 1: Increase student retention and persistence by keeping the students the College already has. (Standard I.B.3)

Background

The College operates as part of a community college network in the state of Hawai‘i. As one of seven community colleges, and one of ten colleges in the University of Hawai‘i (UH) System, Leeward CC plays a critical role in preparing students for the workforce and for transfer to a four-year college. The University of Hawai‘i Community Colleges (UHCC) System coordinates the efforts of the community colleges, ensuring alignment and focused movement on key initiatives. The UHCC System has initiated several system wide projects in the past five years including a coordinated effort to accelerate students’ progress through
developmental education courses, the implementation of a pathway-driven registration system, and the creation of common exploratory majors to guide students’ selection of coursework. The College goals and plans are guided by these system efforts.

The core team’s review of student achievement data indicated that retention and persistence are areas that have shown little movement despite the implementation of these system initiatives (See Student Achievement Data chapter for further discussion.). Additionally, faculty and staff had begun to experience “initiative fatigue” with so many initiatives needing attention. In spring 2017, the UHCC System hosted a biannual Community College Survey of Student Engagement (CCSSE) workshop. At this workshop, the College’s vice chancellor for academic affairs (VCAA) met Dr. Tonjua Williams from St. Petersburg College in Florida who discussed St. Petersburg’s implementation of The Four Disciplines of Execution: Achieving Your Wildly Important Goals by Chris McChesney, Sean Covey, and Jim Huling.5 The VCAA was intrigued with the idea of focusing on one goal – one WIG. After distributing the book to administrators and campus leaders, the College selected its WIG of “Keeping the Students We Have.” Specifically, the goal is to increase retention and persistence by ten percent in 2017-2018. As one faculty member commented, “It was like a breath of fresh air.” The College would have one goal that drives everything it does.

The VCAA introduced the WIG to campus leaders at a leadership retreat in August 2017. A presentation on retention by Pam Cox Otto enhanced the discussion of the WIG, and the retreat concluded with an introduction of the theme for the year, “The Student Experience.” The VCAA communicated the WIG to the campus community at the convocation in fall 2017.

The Counseling and Advising unit created additional goals that aligned with the WIG and created four subcommittees to develop specific strategies to pursue. One of the unit’s strategies was to encourage continuing students to register for the spring 2018 semester early. The Counseling and Advising unit recruited faculty and staff to assist with this effort by creating the #IGotClass campaign. Faculty and staff wore stickers with the #IGotClass hashtag and asked their students if they had registered for upcoming classes before winter break. By registering early, students can also get their preferred courses, class times, and instructors. In one month, the campus community encouraged and assisted more than 3,100 students to register for spring 2018 (Q1, Q2).

In addition, the College’s campus co-leads for the UHCC Student Success Committee convened the WIG Design Team. The WIG Design Team is similar to a strategic planning group; it will lead and guide the College’s efforts to implement the WIG and the UHCC System initiatives. The WIG Design Team is comprised of representatives from all areas of the campus. The team first convened in December 2017. By May 2018, the team completed an initial review of institutional data, identified the areas to focus on in the coming year, and created three “keys” or values that the College will use to guide future work on implementing the WIG. The team will work with existing committees and/or convene work teams as this initiative is further deployed.

Goals and Outcomes

- Increase student retention and persistence by ten percent in 2018-2019.
- Increase the sense of belonging at the College through activities that connect and support students.
- Increase the three-year graduation rate from 16 percent to 22 percent by 2020-2021.

**Action Project 2: Improve student learning by making assessment more meaningful for faculty. (Standard II.A.3)**

**Background**

A second area in need of improvement is learning outcomes assessment. Since 2010, the College has made use of Tk20, which is a comprehensive online assessment planning, data management, and reporting system. In 2013, the Office of Policy, Planning, and Assessment (OPPA) created the handbook Sustaining Assessment: Three-Year Plan to Maintain and Enhance Assessment of Learning Outcomes at Leeward Community College to provide the campus with assessment terminology and processes and to set forth future plans for assessment at Leeward (Q-3). The College made good progress with implementing Tk20 as the repository for learning outcomes assessment. However, faculty and staff did not find Tk20 intuitive or easy to use. Tk20 has become a deterrent to meaningful dialogue about assessment instead of a supportive tool.

At Leeward CC’s convocation in spring 2018, faculty and staff gathered at moderated roundtable discussions to participate in conversations about the College and how it meets and can improve in various Accreditation Standards. An area that generated much discussion is assessment and Tk20. The roundtable facilitator for discussions about Standard II.A.3 noted, “A lot of the discussion centered around how TK20 wasn’t very intuitive and how there should be more tutorials or training. Another area of discussion focused on mentoring or specifically, the lack of mentoring that we have at the College. We had several lecturers and tenured faculty in both sessions that mentioned the need for mentoring.” Other roundtable attendees echoed the facilitator’s comments in written feedback. Based on this feedback, the Self-Evaluation Core Team is setting a goal to further train faculty in assessment and Tk20 to make outcomes assessment more meaningful while at the same time have the College determine the best assessment tool to suit its needs.

To help with Tk20 training and support, the College has the Faculty Senate’s Assessment Committee, which is made up of representatives from the five main organizational areas and one nonvoting representative from the administration or OPPA (Q-4). The committee’s mission is as follows: “COMMUNICATE - Review and make recommendations to the Faculty Senate on policies and procedures relating to assessment. FACILITATE - Work with
the Administration and Office of Planning, Policy and Assessment to facilitate the assessment process and establish a culture of assessment” (Q-5).

The committee gives between four and seven Tk20/assessment training sessions per semester to provide faculty and staff with assistance in these areas. Additionally, the committee encourages the campus constituents to contact their assessment representative for any assistance.

In November 2017, the assessment specialist and the Faculty Senate Assessment Committee chair began a new Assessment Think Tank for the campus. This group is charged with the task of developing, recommending, and implementing concepts and strategies that will help to establish a culture of assessment that carries the College beyond the fall 2018 accreditation visit. The Assessment Think Tank works in conjunction with the Assessment Committee and serves as a voice for a much broader pool of communal stakeholders. The participants are enthusiastic about fostering wider acceptance of and engagement in the assessment process.

In March 2018, the VCAA hosted a Talk Story on assessment. At this session, participants gave feedback on how to further engage the campus in reflection and dialogue on assessment. Discussion centered on clarifying assessment terminology and having a user-friendly tool to report assessment. The assessment specialist demonstrated a prototype reporting tool he designed to collect assessment results. Participants provided additional feedback on the tool, and these suggestions will be incorporated before the tool is implemented in the fall 2018 semester as a pilot.

**Goals and Outcomes**

- Provide faculty and staff with training assessment practices by way of learning and collaborative engagement opportunities with colleagues.
- Improve quality of outcomes assessment evidence in the College’s database of assessment results.
- Increase faculty and staff satisfaction with the process for reporting assessment results.

Summary of Evaluation Report

INSTITUTION: Leeward Community College

DATES OF VISIT: October 15 – 18, 2018

TEAM CHAIR: Patrick U. Tellei, Ed.D

A 10-member Evaluation Peer Review Team visited Leeward Community College on October 15 – October 18, 2018, for the purpose of determining whether the College continues to meet Accreditation Standards, Eligibility Requirements, Commission Policies and USDE regulations. The team evaluated how well the College is achieving its stated mission, providing recommendations for quality assurance and institutional improvement, and submitting recommendations to the Accrediting Commission for the Community and Junior Colleges (ACCJC) regarding the accredited status of the College.

In preparation for the campus visit, the team chair attended a team chair training on August 2, 2018 in Los Angeles, California. The evaluation team attended team training on September 5, 2018 in Los Angeles, California. The team chair and team chair assistant pre-visited Leeward Community College on September 7, 2018 where tours of the main campus in Pearl City and the Waianea Moku Center were made available by the College.

The evaluation team received the College’s Institutional Self Evaluation Report (ISER) and related evidence in August 2018, well in advance of the team training and campus visit. The team found the ISER to be well-written and comprehensive with related supporting evidence. The ISER appropriately addressed the Accreditation Standards, Eligibility Requirements, Commission Policies, as well as USDE regulations. The team confirmed that the ISER was created through a broad process of College participation and was well examined prior to submission to Accrediting Commission for Community and Junior Colleges (ACCJC). The team found the ISER to be a thoughtful and largely accurate reflection of the current status of the College with the inclusion of an Institutional Quality Focus Essay outlining two overarching action projects to support the College Institution Set Standards for Student Achievement.

Prior to the campus visit, team members completed their team assignments from the team chair. The team assignment identified areas for further investigation and provided a list of interview requests, as well as additional evidence to review. On October 15 – 18, 2018, the team first visited the Waianea Moku Center that has more than 500 students. The team visited the Waianea Moku Center on the first day of the visit where the Center welcomed the team with a Hawaiian chant and provided a tour of the center. Two forums with students and with faculty and staff were also scheduled that day. Both forums were well attended by students, faculty and staff. The main campus hosted a welcoming reception on October 16th followed by a campus tour.

During the visit, team members held more than 35 individual/group meetings and interviews with approximately 100 students, faculty, classified staff, and administrators. The team also
reviewed comments provided by internal and external community members. The team visited classrooms, labs, tutoring center, student support center, library, bookstore, cafeteria, Culinary Arts restaurant, and different programs and service areas of the College. The team members were also invited to sit-in scheduled Campus Council Meeting, Curriculum Committee Meeting, Financial Management Group Meeting, and Faculty Senate Meeting. Three team members visited the campus during one evening to re-affirm the services provided to students attending evening classes, and to confirm the safety and security of students who are in the campus at night.

The team found the College was well prepared for the team visit and the team felt the warm “Ohana” welcome by the entire College. The outstanding support provided to the team during the College visit was acknowledged by the entire team.

The team found that the College satisfies all Accreditation Standards, Eligibility Requirements, Commission Policies and USDE regulations, but provided one recommendation to meet standards, two recommendations to improve institutional quality and effectiveness, and seven commendations.
Major Findings and Recommendations of the
2018 External Evaluation Team

Team Commendations

Commendation

1. The team commends the college for its mission, which emphasizes student support, quality learning opportunities and open access and includes a special commitment to Native Hawaiian students. The college embraces its mission, in planning and action, as evidenced by a consistent integration of the mission’s core values throughout the curriculum, services and culture of the college. (I.A)

2. The team commends the College for developing programs and curricula that accelerate student progress toward college-level courses, particularly in English and mathematics. (II.A.4)

3. The team commends the College for the development of the innovative learning support program “The Hub”, which facilitates student success by using Computer Science students to provide technology assistance to students in a Help Desk setting. (II.B.1)

4. The team commends the Student Government for their organization and engagement of students in a wide range of creative, informative and meaningful activities and for actively encouraging student participation in college committees. (II.C.4, IV.A.2)

5. The team commends the College for its leadership in the development and implementation of guided pathways. (II.C.5)

6. The team commends the College for its dedicated and collaborative support of professional development, with an emphasis on supporting faculty in instructional pedagogy, teaching with technology and encouraging effective practices by modeling such practices during training sessions. (III.A.14, III.C.4)

7. The University of Hawaii Community College System is commended for its island-centered mission in identifying new programs and for its successful system-wide implementation of technology across the system to support program planning and tracking in clarification of students’ academic pathways. (IV.D.5)
Team Recommendations

Recommendations to Meet Standards:

Recommendation

1. In order to meet the standard, the College should establish a clear cycle to regularly evaluate and update its policies and practices. (I.B.7)

Recommendations to Improve Quality:

Recommendation

2. To ensure academic quality and improve institutional effectiveness, the College should improve efforts to analyze, disseminate and discuss assessment results of all outcomes across the campus to improve student learning. (I.B.1, I.B.8)

3. In order to improve effectiveness, the team recommends that the College develop a mechanism to inform the College community about the college governance structure, membership and responsibilities of committees, pertinent policies and the college decision-making process. (IV.A.6)

4. In order to improve institutional effectiveness, the team recommends that the system develop and implement an assessment process to measure the effectiveness of role delineations, governance and decision-making processes to ensure their integrity. (IV.D.7)
Introduction

Leeward Community College was established in 1968 as the first community college in the state of Hawai‘i without a connection to a pre-existing technical school, nine years after statehood was granted. In the first year, there were 1,640 students who were ready to explore the community college experience, more than twice the anticipated number of students. Shortly thereafter, in 1971, the College was accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC), Western Association of Schools and Colleges (WASC). The College’s original guiding principles emphasized innovation and accessibility to higher education. Since those beginnings, enrollment has grown to place Leeward Community College among the largest of the seven public two-year community colleges in the UHCC System with approximately 7,000 students enrolled each fall semester in liberal arts, career and technical education, and noncredit programs.

In 1972, Leeward Community College took over the Wai‘anae-Nānākuli Education Center as the operating agency. In 1977, this center was fully integrated into Leeward’s operations and organization. The Wai‘anae-Nānākuli Education Center was renamed the Leeward Community College - Wai‘anae Moku Education Center in fall 2017 in conjunction with its recent move to a permanent facility. The Wai‘anae Moku Education Center offers credit and noncredit courses and a full range of learning and student support services. During the visit in October 2018, the center had a headcount enrollment of 548 students.

While the College primarily serves students in the Leeward coast and Central O‘ahu, a geographical region containing approximately a third of the state’s population, students from all parts of the island attend Leeward Community College. One constant over the past 50 years has been Leeward’s focus on student learning as its motto makes clear: “To help people learn.”

Leeward Community College continues to look for new programs that will meet the workforce needs of the community. Since its institutional self-evaluation in 2012, the College has developed four new career and technical education degrees including the following: Associate in Science (AS) in Plant Biology and Tropical Agriculture, AS in Integrated Industrial Technology, Advanced Professional Certificate in Special/Inclusive Education, and a certificate program in Alternative Certification for teachers in career and technical education secondary programs. The College has also successfully moved two programs to established status. These programs are the AS in Natural Science and the Associate in Arts in Hawaiian Studies. Finally, the College received program accreditation for the AS in Health Information Technology. The Board of Regents approved this program for established status in June 2018.

Leeward Community College has received a number of grants and system funding to complete, renovate, and refurbish facilities at the Pearl City campus. Shortly after the last self-evaluation visit in 2012, the College completed the Ka ‘Imi ‘Ike Education Building, a facility on the Pearl City campus that is the home of Leeward Community College’s Teacher Education program. Designed and built to meet the Leadership in Energy and Environmental Design’s silver certification, Ka ‘Imi ‘Ike has features such as photovoltaic panels, rainwater collection for irrigation, water bottle refilling stations, natural lighting, and a hybrid air conditioning system that incorporates natural ventilation. Additionally, the College completed the planned renovation
of the Learning Commons, which involved re-envisioning the Library building as a one-stop shop for academic support services for students. The College also finished a renovation project of the Hālau ‘Ike O Pu'uloa that provides a larger collaboration space for students, additional offices, and renovated classroom spaces. Finally, the College relocated its Office of Workforce Development and Continuing Education due to the new public rail station being built in the campus parking lot. The new portable buildings form a small campus environment on the Diamond Head (east) side of the Pearl City campus.

In addition, the College finalized the move of its education center from Wai‘anae town to a neighboring community. The previous Wai‘anae site leased 9,680 gross square feet on the first and second floors of a two-story commercial building. The new location, located 1.7 miles from the previous site, is a building of 38,600 gross square feet that is being renovated in multiple phases, dependent upon funding availability. The main building is named Hale Kaiāulu. The word kaiāulu has a dual meaning: kaiāulu means “community” and is also the name of celebrated gentle trade winds unique to the area. Currently, the Wai‘anae Moku Education Center operates in the Phase I space of 11,000 gross square feet. Students are able to utilize three general classrooms, a math lab/classroom, a computer lab/English classroom, a testing center, a student lounge, and a conference room. The Wai‘anae Moku Education Center also includes program support spaces such as offices and meeting rooms for administrators, faculty, counselors, lecturers, and security personnel. This new location is expected to provide the College an opportunity to expand the population served in this historically underserved area.
Eligibility Requirements

1. Authority
The Team confirmed that Leeward Community College is a comprehensive two-year institution authorized to operate under the authority of the state of Hawaii and the UH Board of Regents to award academic degrees and certificates. This is also confirmed based on continuous accreditation by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges (WASC).

The College meets Eligibility Requirement.

2. Operational Status
The Team confirmed that Leeward Community College is operational and provides educational services to approximately 6,800 students each year who are enrolled in degree applicable credit courses. The College awarded 1,019 degrees and certificates in 2017.

The College meets Eligibility Requirement.

3. Degrees
The Team confirmed that majority of courses offered by the College lead to a degree and/or transfer. The majority of the College’s students are enrolled in one of 15 associate degree programs. All of the degree programs are two years in length where significant proportion of the students at Leeward CC are enrolled in them.

The College meets Eligibility Requirement.

4. Chief Executive Officer
The Team confirmed that Leeward Community College has an institutional CEO (interim chancellor) who was appointed by the Board of Regents in July, 2018 who has the authority to administer Board policies, and whose full-time responsibility is to the institution. This CEO does not serve as the chair of the Governing Board.

The College meets Eligibility Requirement.

5. Financial Accountability
The UH system outlines policies and procedures for internal controls; an independent accounting firm audits the UH systems; and major campus audits are annually taken place to ensure financial accountability. Results of audit reports are made available to college constituents and communities it serves.

The College meets Eligibility Requirement.
Checklist for Evaluating Compliance with
Federal Regulations and Related Commission Policies

The evaluation items detailed in this Checklist are those which fall specifically under federal regulations and related Commission policies, beyond what is articulated in the Accreditation Standards; there may be other evaluation items under ACCJC standards address the same or similar subject matter. Evaluation teams will evaluate the institution’s compliance with standards as well as the specific Checklist elements from federal regulations and related Commission policies noted here.

This Checklist will become part of the evaluation team report. Institutions may also use this form as a guide for preparing documentation for team review. It is found as an appendix in the team and institutional self-evaluation manuals.

Narrative:

The College informed its constituents by posting a link to the ACCJC third-party comments on its college website prior to the accreditation site visit. The College informed its students, faculty, staff and the communities it served through students meetings, faculty and staff meetings, as well as information to the community and leadership constituents. As a result, all open forums were
well attended by students, faculty, classified staff, management, and community officials and leaders.

**Standards and Performance with Respect to Student Achievement**

**Evaluation Items:**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>X</td>
<td>The institution has defined elements of student achievement performance across the institution, and has identified the expected measure of performance within each defined element. Course completion is included as one of these elements of student achievement. Other elements of student achievement performance for measurement have been determined as appropriate to the institution’s mission.</td>
</tr>
<tr>
<td>X</td>
<td>The institution has defined elements of student achievement performance within each instructional program, and has identified the expected measure of performance within each defined element. The defined elements include, but are not limited to, job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers.</td>
</tr>

**Narrative:**

The UHCC System has set institutional-set standards for student achievement where it is implemented at the College campus level. The College uses data to determine how well it is accomplishing its mission through the UHCC System’s institutional-set standards for student achievement. The set standards are reviewed regularly where administrators use the results to
identify institutional priorities for the coming year. Each institutional-set standard has a minimum level of achievement and an aspirational target for improvement. The College has not set its own specific institutional-set standards; however, the College has set College goals under the umbrella of the UHCC System’s institutional-set standards for student achievement.

Credits, Program Length, and Tuition

Narrative:

The College adheres to Executive Policy (EP) 5.209 – Student Transfer and Inter-Campus Articulation. The policy states that student who has earned an articulated associate degree from a UHCC campus shall be accepted as having filled the general education core requirements at all other UH System campuses. The College is a liberal arts institution with strong transfer programs that are aligned with the four-year degree programs at the University of Hawaii four-year institutions. The 15 associate degree programs offered by the College are transferable degree programs to the University of Hawaii four-year institutions or other colleges and universities in the United States.

**Narrative:**

Although Distance Education (DE) is not specifically named in Leeward’s Mission Statement, DE courses and programs offered through the college are consistent with the educational objectives expressed in the Mission Statement. DE courses and programs provided through the college are subject to the same control, development, implementation and evaluation as all other courses and programs offered under the name of the college. DE courses and programs are required, like all other courses offered through the college, to have clearly defined and appropriate student learning outcomes. DE courses and programs, including outcomes, are evaluated in ARPDs and other assessments.
## Student Complaints

### Evaluation Items:

<table>
<thead>
<tr>
<th></th>
<th>The institution has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the College catalog and online.</th>

</table>

**Narrative:**

The College is in compliance with the Federal Title IV regulations and USDE requirements.
Standard I

Mission, Academic Quality and Institutional Effectiveness

IA. Mission

General Observations:

As part of the University of Hawaii system, the Leeward Community College mission aligns with the university mission’s commitment to open, accessible, quality learning, and includes language affirming active support for the participation of Native Hawaiians. The college mission plays an integral role in institutional planning, prioritization and resource allocation. The college follows a regular mission review process that culminates in approval by the Board of Regents.

Findings and Evidence:

Leeward Community College (LCC) directs its mission of providing high-quality liberal arts and CTE (career and technical education) to all students. In alignment with the University of Hawaii, the college also makes a special commitment to Native Hawaiians. To emphasize this point, the mission and values statements appear side-by-side in English and Hawaiian. The mission emphasizes a student-focused, collaborative and supportive approach to learning and student success. (I.A.1)

The college uses a strategic planning process to determine its effectiveness in meeting its mission and the educational needs of students. The LCC Strategic Plan 2015-2021 aligns five goals with the college mission and the UHCC Strategic Directions 2015-2021. As part of the process, the college reviews data targeted at these goals including data to determine if it is accomplishing its mission to Native Hawaiian students. Departments also review program-level data annually as part of the program review cycle. Additionally, the college analyzes data connected to the UHCC institution-set standards, which also serve as the college’s institution-set standards, to identify institutional priorities. (I.A.2)

The institution engages in an Integrated Planning and Budgeting Process that uses the college mission as a central component of the Comprehensive Review and Evaluation (CRE) program review template. Each program and student service aligns its program mission with that of the college. The CRE and Annual Report of Program Data (ARPD) identify resource requests, which the divisions and Campus Council prioritize. In turn, the college develops a budget based on these priorities. (I.A.3)

The college mission appears in key college publications, including the catalog, the website, the strategic plan and employee handbooks. It is also posted throughout classrooms, labs and other campus spaces. The college adopted a Policy on Institutional Mission in January 2010. The policy calls for review of the mission at least every six years. The Board of Regents (BOR) approved the current mission statement in May 2012, following a two-year process. The campus conducted an abbreviated review of the mission in 2017 and made no changes. (I.A.4.)
Conclusions:

The College meets Standard 1A.

Commendation 1: The team commends the college for its mission, which emphasizes student support, quality learning opportunities and open access and includes a special commitment to Native Hawaiian students. The college embraces its mission, in planning and action, as evidenced by a consistent integration of the mission’s core values throughout the curriculum, services and culture of the college. (I.A)

IB. Assuring Academic Quality and Institutional Effectiveness

General Observations:

The College’s response to standard IB in the Institutional Self Evaluation Report (ISER) demonstrates dialogue on student learning, equity, and academic quality throughout college program and services. The college provides sufficient evidence that it meets the standard. Site team interviews with campus personnel confirm the College engages in an annual program review process which includes Annual Report of Program Data (ARPD) and comprehensive / long-range planning (Comprehensive Review and Evaluation or CRE) occurring every four years, led by the Office of Planning, Policy and Assessment (OPPA). Additionally, the integrated planning process could be clearer and the college indicated that it is working to improve the planning process. Another area that needs to be addressed is the cycle of when policies are reviewed and evaluated. The college acknowledges that while the college evaluates its policies and procedures every five years, there are certain policies that have not been touched since 2012. The policy on course and program perquisites had an effective date of February 1992. In conversation with the Vice Chancellor of Academic Affairs, the College indicated that it is working to fully staff the Office of Planning, Policy, and Assessment which would provide OPPA with the capacity to complete the review/evaluation of policies and developing an evaluation calendar of when policies are reviewed and revised.

Findings and Evidence:

Dialogue concerning outcomes, equity, and institutional effectiveness and efforts to address continuous improvement of learning and achievement occur in multiple groups across the College. The Assessment Committee facilitates dialogue regarding learning outcomes and coordinates efforts to institutionalize assessment policies and practices and train faculty and College personnel to use the homegrown assessment database (“KNACK”). The institution supports an assessment technician who works with all constituencies to develop, implement, and improve the functionality of the new assessment database. While assessment results from Service Area Outcomes (SAOs) are available in Tk20, most are more than 10 years old. SAOs are not accessible by the site team in KNACK and appear to be submitted to division, program, and support area representatives. However, assessment data and dialogue is captured in the ARPD.
Dialogue on student equity takes place in informal administrator-led Talk Story sessions and at specific locations like the Wai‘anae Moku Education Center. According to the ISER, dialogue on academic quality and institutional effectiveness takes place at vice president for community colleges (VPCC) campus forums, in governance groups, and at bi-annual convocations. However, with the exception of the convocation and its use of table top discussions, little evidence is provided to demonstrate sustained, substantive and collegial dialogue is taking place around outcomes assessment at the course, program, GE or Institution-level. Team interviews confirmed the institution can improve dialogue on outcomes assessment and implications for assuring academic quality. (1.B.1)

The College defines and assesses student learning outcomes within instructional and learning support service. The College has developed instructional course learning outcomes (CLOs), program learning outcomes (PLOs), general education learning outcomes (GELOs), institutional learning outcomes (ILOs) and support service area outcomes for all programs and services (SAOs). CLOs are identified in the Curriculum Management Database and assessed directly by the instructor. CLOs are linked to PLOs through the assessment database Tk20. Currently, the College assesses PLOs through the mapping process in Tk20 and personnel reflect on results within the ARPD; however, the institution presented minimal evidence of meaningful assessment at the program level. As confirmed through interviews, the new outcomes assessment database (KNACK) does not yet have mapping capabilities. GELOs are assessed on a rotating cycle led by a faculty task force that developed and normed rubrics for its GELOs. They are finalizing a rubric for “ethical reasoning” and working with Writing Intensive course instructors to begin the next round of GE assessment. ISLOs are assessed through attitudinal student surveys, not direct measures of assessment. GELO assessment is reported in the ARPD and discussed at Faculty Senate.

The College provided data that shows 71% of courses in Catalog have been assessed. While the College is discussing assessment results in individual programs and areas, it can better engage in College-wide dialogue about academic quality and institutional effectiveness, particularly related to student learning. With the exception of an example of PLO assessment informing changes to instruction in the AA in Teaching Program and the aforementioned GELO assessment, dialogue is not college-wide. The same could be said for SAOs with an example of assessment training provided as evidence of assessing the learning outcomes using qualitative and quantitative data and only one example provided of an ARPD using data to request additional personnel. (I.B.2; ER11)

The College uses the UHCC System established institution-set standards based on the UHCC Strategic Directions 2015-2021 and regularly assesses performance against these standards. These standards are aligned with the College’s Strategic Plan 2015-2021, mission, and College goals including its goal of increasing retention and persistence by ten percent within a year. In pursuit of continuous improvement, each standard has baseline and target values, which the College annually assesses, shares with the campus community through VPCC presentations and its intranet, and publishes on the college and system websites (I.B.3).

The College has established a clear culture of assessment in which faculty and others identify, enter and reflect upon data entered into the assessment database (Tk20) and now KNACK. The
ARPD requires data, analysis, and reflection. OPPA staff, program coordinators, and unit heads utilize assessment data via ARPD and the four-year Comprehensive Review and Evaluation (CRE) to support student learning and achievement. The Institutional Effectiveness Report (IER), published every four years, incorporates data on student achievement and institution-set standards and disseminates this report widely across the campus. (I.B.4)

Through its use of the ARPD and CRE, the College effectively analyzes and assesses its ability to accomplish its mission using student achievement and student outcomes data. Data on key performance indicators regarding student achievement is disaggregated at the program level. Budget requests are integrated into the CRE and all planning and budget requests move through a cycle referred to as the College’s Integrated Planning and Budgeting Process. Planning and budgeting documents include the ARPD, a Resource Implications Template, the CRE, and the IER. All of these documents require an identification and analysis of data. (I.B.5)

Currently, the College is only disaggregating and analyzing student achievement data, not learning outcomes data. The College is using the UHCC identified performance gaps for Federal Pell Grant recipients and three underrepresented student populations: Native Hawaiian, Filipino, and Pacific Islander and disaggregating the achievement data to evaluate the impact on these populations. The IER identifies and communicates the equity gaps to the campus community. One effort to address the equity gaps is the UH system-wide Acceleration Initiative. Through collegial consultation, the College has shortened and accelerated developmental course sequences and adopted a co-requisite model and funded requests for equipment, support and professional development. The College engages in various efforts to monitor and address performance gaps for its Native Hawaiian students. Team’s visit to the Wai’anae Moku Education Center validates the efforts that the College has made to allocate resources to support Native Hawaiian students. Additionally, the College continues to monitor DE student success noting continued success rates similar to those taking face-to-face courses. (I.B.6)

The Office of Planning, Policy, and Assessment (OPPA) is charged with reviewing institutional policies and practices. But according to the ISER, OPPA has been understaffed leading to a delay in reviewing some policies. For example, L5.200, the Policy on Course and Program Prerequisites, has not been reviewed since 1992. L1.201, Policy on Shared Governance, had not been reviewed since 2003, but is under review. Interview with OPPA staff indicated that the College recognizes that it needs to establish a calendar to regularly evaluate its policies and will work to review and update policies once it has filled vacancies in OPPA. In spring 2017, the College reviewed the program review process noting strengths and areas for improvement which will be presented by an ad hoc committee. The College regularly administers employee satisfaction surveys to determine effectiveness of policies and practices across all areas of the institution. However, it is unclear if this invitation is extended to students. (I.B.7)

The primary methods for communicating assessment and evaluation results are the ARPD, the CRE, and the IER, which the college makes available on its website. The team learned from interviews that limited functionality of TK-20 has been a significant barrier to effective dissemination and discussion of assessment results. The college is transitioning to KNACK which should allow for easier reporting, dissemination and discussion of results. (I.B.8)
The College demonstrates a commitment to and an engagement in a well-established, institution-wide, systematic and integrated process of evaluation and planning. In 2012, the College determined that the planning and budgeting process needed revision and engaged in comprehensive analysis and inquiry to develop, approve, revise and institute the existing process. Throughout this process, the College engaged all those involved in the planning process through surveys and discussions at the Campus Council to ensure broad-based involvement in the new planning and budgeting process. The current process involves an annual leadership retreat, dissemination of an overview and timeline for the Integrated Planning and Budgeting Process, resource requests and prioritization of those requests, and resource allocation. In 2017, the College updated, published and disseminated its Integrated Academic, Facilities, and Enrollment Plan 2015 – 2021 to communicate updates to the planning process. Additionally, in an interview with site team members, College Council representatives cited the Integrated Planning Handbook as an effective means of communicating to campus personnel the planning and budget allocation process. Internal planning documents (ARPD, CRE) are used to determine needed resources and to recommend resource prioritization.

Through the annual program review (ARPD) process and the larger four-year CRE, all institutional programs engage in planning that informs resource requests and allocations addressing both short-term and long-term needs necessary to accomplishing the mission of the College. However, as acknowledged in the ISER and supported by findings from the team’s interviews, the College can more effectively communicate the improvements in programs and services to its stakeholders as a result of the integrated planning process. The College recognizes this need and is working to address it through an ad hoc committee. (I.B.9)

Conclusions:

The College meets Standard IB, with the exception of I.B.7.

Recommendation 1:
In order to meet the standard, the College should establish a clear cycle to regularly evaluate and update its policies and practices. (I.B.7)

Recommendation 2:
To ensure academic quality and improve institutional effectiveness, the College should improve efforts to analyze, disseminate and discuss assessment results of all outcomes across the campus to improve student learning. (I.B.1, I.B.8)

IC. Institutional Integrity

General Observations:

The college provides a significant amount of information to all its constituents (students, prospective students, faculty, staff, administrators, board of regents, and the community) regarding the college, courses, programs, degrees and certificates, and policies and procedures pertinent to the stakeholders in print and electronic means. Through its programs and services and underlying philosophy, the college demonstrates that students and their education are at the forefront of all that it does. Regular self-examination and reflection provides the college will the
mechanism to continue on a cycle of self-improvement. As part of this cycle, the college has moved to a culture of assessment as it guides institutional policy, teaching and learning, and resource allocation.

Findings and Evidence:

The college catalog, provided in print and electronic forms, is examined annually and revisions are made should they needed. The Office of Planning, Policy, and Assessment (OPPA), the entity which takes on role of updating the catalog, readily seeks input from faculty, staff, administrators, and students about the necessary revisions that need to be made. Careful attention is paid to ensure that all information published in the catalog is accurate and current. (I.C.1; I.C.2)

College wide communication is also the responsibility of Creative Services. As part of its work, it ensures that the communication to all constituents – students, faculty/staff, administrators, and the community is accurate and informative. It maintains the college website, social media sites, and other communication means so that information offered both internally at the institution and externally to the UH system and community accurately reflects the college’s mission and its work to best serve its students. (I.C.1)

The collection and analysis of assessment data and the thoughtful reflection of its implications is an integral part of the college’s work to ensure the academic quality of its educational programs and services. All courses have learning outcomes (CLOs), all programs have learning outcomes (PLOs), and the general education program has learning outcomes (GELOs) and they are vetted and approved by the college curriculum committee and housed the Kauli Student Curriculum Management System. Data from learning outcomes and other pertinent information is collected, analyzed, and reported in the Annual Report of Program Data (ARPD) and the six-year cycle of Program Review. (I.C.3)

The college catalog provides accurate information to students and prospective students about the institution, programs, courses, degrees and certificates, costs and fees, the code of conduct (published in the catalog and Student Handbook), the policies pertaining to academic honesty, responsibility, and academic integrity, and the consequences of dishonesty. (I.C.1; I.C.6; I.C.8; I.C.10) Students and prospective students are well-informed about the college’s degree programs, certificates of achievement, and certificates of competency with regard to the purpose, content, course requirements, and learning outcomes. (I.C.4) The College continues to examine ways in which it can make the cost of education more affordable. The use of the Open Educational Resources (OER) when available continues to be an effective way for students to minimize the cost of textbooks. (I.C.6)

The college catalog provides accurate information to faculty, staff, and administrators regarding Board of Regents policies and procedures pertaining to academic freedom and responsibility and professional accepted views to ensure that all constituents are treated fairly and equitably. (I.C.7; I.C.9; I.C.10)
The college respectfully complies with external entities which govern the accreditation of the college and its programs. Specifically, the college adheres to the Eligibility Requirements (Department of Education) and Accreditation Standards (ACCJC) as well as the agencies which accredit the Automotive Technology Program (National Automotive Technician Education Foundation), Culinary Arts Program (American Culinary Federation Foundation Accrediting Commission), Health Information Technology Program (Commission on Accreditation for Health Informatics and Information Management Education), and the Teacher Education Program (State Approved Teacher Education Program). The college website has a link which offers information about the accreditation process, the timeline for completion, and the Institution Self Study Report. The college website provides accurate information about the institution’s status of accreditation by ACCJC. The status of accreditation for the Automotive Technology Program, Culinary Arts Program, Health Information Technology Program, and the Teacher Education Program are provided on the respective webpages for each of these programs. The college continues to work with external agencies respectfully and adheres to their requirements and deadlines in a professional manner. (I.C.12; I.C.13)

The Strategic Plan 2015-2021 is the guiding document used by the college to ensure that its programs and services align with the institution’s mission and goals. This collaborative effort reflects the varied viewpoints of its constituents and clearly demonstrates that students and their education receive the highest priority. (I.C.14)

The college utilizes the L1.101 Policy on Policy Development Process as its mechanism to determine how policies are made. The college’s governance groups and appropriate administrators are responsible for determining if policies and procedures continue to reflect the college’s mission. Creative Services is responsible for examining and updating the college wide publications. (I.C.5)

The college has no foreign locations. (I.C.11)

Conclusion:

The College meets the Standard IC.
Standard II

Student Learning Programs and Support Services

IIA. Instructional Programs

General Observations:

Leeward Community College provides consistent, high quality liberal arts and CTE education through a variety of modalities. Faculty ensure quality course content and instructional methods through a rigorous curriculum approval process. All courses have student learning outcomes which faculty assess regularly. The College has taken significant steps to meet the changing needs of students, including aligning pre-collegiate level curriculum with college-level curriculum through an accelerated learning program and developing strong support for distance education. The institution follows standard practices with regard to awarding credit and degree requirements. The College Catalog provides guidance on program completion and transfer requirements. Program learning outcomes align with General Education Learning Outcomes. CTE degrees and certificates lead to appropriate technical and professional competencies. The College regularly evaluates instructional programs. If the College eliminates a program, students are allowed up to two years to complete the program. If the College identifies a need for additional program resources, the program review process provides a means of allocating resources for this purpose.

Findings and Evidence:

The college’s programs of study are consistent with its mission in terms of content, targeted student population and delivery modes. Leeward offers 15 associate degrees and 12 certificates of achievement in the liberal arts and career and technical education (CTE), enabling students to transfer and pursue careers. The college offers programs through the main campus, at the Wai‘anae Moku Education Center and at several high school locations. It also provides special academic programs for native Hawaiians. Students can take courses in face-to-face, hybrid and distance education modalities. The college evaluates its programs annually through the Annual Report of Program Data (ARPD). DE courses and programs are required, like all other courses offered through the college, to have clearly defined and appropriate student learning outcomes. DE courses and programs, including outcomes, are evaluated in ARPDs and other assessments. (IIA.1)

The curriculum development and review process is systematic, with extensive involvement of faculty to ensure courses meet acceptable professional standards. Courses and programs are evaluated in the Annual Report of Program Data (ARPD) and in Comprehensive Review Evaluation (CRE) reports. In its review of a sampling of ARPD and CRE reports, the team found that the reports adhere to the required templates, and that the reports establish goals for improvement. The team was not able to follow up on the eventual results of stated goals in the ARPD and CRE reports reviewed. (IIA.2)

The College discussed the assessment of SLOs, summarized in the document, during spring 2018 Convocation Roundtable Discussions. In that report, faculty expressed the need for better
faculty training in Tk20, the database program that stores and reports SLO data. The subject also emerged as one of the two key activities recommended in the Quality Focus Essay. In interviews with college personnel, the team learned the college has recently transitioned to a home-grown assessment database called KNACK; however, because the program is so new, there has not been enough time to evaluate its effectiveness. The team’s examination of a sampling of face-to-face and DE course syllabi indicated that essential elements, including course SLOs, are included in syllabi. (II.A.3)

The college has taken an early lead in thoughtfully developing its accelerated programs in mathematics and English. Their work began in 2012 in English for classes that were one and two levels below transfer level and have expanded this effort so that students can complete a transfer level course along with a class that precedes it, as evidenced by the 2016 ARPD in Remedial/Developmental Writing. The mathematics department began its work in accelerated courses shortly thereafter by addressing courses that were one to three levels below transfer. A collaborative climate among faculty occurs regularly along with ongoing professional development. Both departments regularly examine the work on the accelerated courses, student retention and success rates, and make adjustments when needed. Consistent with this standard, the college distinguishes clearly between pre-college and college levels in its course numbering system. The College develops and assesses pre-college curricula in the same manner that college-level courses and programs are developed and assessed. (II.A.4)

The college’s policies and practices ensure “appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning” in its courses. Moreover, the college requires that distance education course proposals demonstrate “timely and effective interaction” between instructor and student, and identify technological skills required to complete the course, as defined in the Leeward CC DE Guidelines. DE courses and programs provided through the college are subject to the same control, development, implementation and evaluation as all other courses and programs offered under the name of the college. The team examined a sampling of twenty-six DE courses through Laulima and found all to be compliant with each of the policy elements stated in the ACCJC Policy on Distance Education and Correspondence Education, July 2011. (II.A.5)

The college uses the STAR system, enabling students to track their progress toward a degree or certificate. The system also enables faculty and administrators to evaluate space utilization, fill rates and other course characteristics to improve effectiveness in scheduling and to facilitate student progress. (II.A.6)

The college is effective in evaluating and meeting the changing needs of a diverse population of students. It does so through various means: accelerated learning programs in math and English, a variety of DE courses (including an AA in Teaching that can be earned primarily via DE), professional development workshops for faculty to enhance teaching skills including the use of technology, five-week long DE courses designed for working adults, and the use of open educational resource materials. The College’s DE courses and programs are consistent with the core values of open access and meeting the needs of students, as expressed in the College mission. (II.A.7)
Since the college does not use department-wide course or program examinations, this standard does not apply. However, in a related activity, the college has started pilot programs to award academic credit for incoming students’ life experience through portfolio-based assessment and other efforts. (II.A.8)

The two system-wide policies relevant to this standard are UHCCP 5.203 (Program Credentials: Degrees and Certificates) which sets graduation requirements and UHCCP 5.228 (Credit Hour) which defines credit hours. The college faculty conduct learning assessments of all course and program outcomes. (II.A.9)

The College publishes transfer-of-credit policies via the college Catalog and website. Equivalency information within the UH system is searchable by students through the UH System Course Transfer Database. The College certifies the comparability of learning outcomes of courses from outside institutions with its own courses through syllabus review by academic advisors and, when needed, transcript review by faculty. There are numerous course and program articulation agreements between the College and the UH system. (II.A.10)

Program learning outcomes, PLOs, have been established for each of the College’s programs, and they are published in the College Catalog. Based on the team’s review of a sampling of instructional and learning support ARPDs and CREs produced over multiple years, it is evident the College performs assessments of PLOs in those reports. Furthermore, the College has established seven specific learning outcomes in all its instructional programs in addition to program-specific outcomes; the seven learning outcomes align with the outcomes delineated in Standard II.A.11, thereby ensuring that GELOs meet that accreditation standard. The College has named these outcomes General Education Learning Outcomes, or GELOs; each GELO provides for specific skill standards, which are listed in the College Catalog. The College requires that each course in the general education program be mapped to PLOs, and to at least one GELO specific skill standard. The team examined the SLOs listed in the course outlines of record for six courses in the general education program, namely, ANTH 151, GEOG 101, PSY 260, ENG 100, HIST 152, and ENG 272, and found that each course has at least one SLO that addresses at least one GELO skill standard. This analysis demonstrates that general education course outcomes are mapped to general education outcomes, which, in turn, are consistent with the skills delineated in Standard II.A.11. (II.A.11)

The College publishes a carefully considered general education philosophy in the college catalog. All associate degrees require core courses categorized as “foundations” or “diversification.” Additionally, associate degrees require “focus” courses identified as writing intensive; Hawaiian, Asian and Pacific issues; contemporary ethical issues; and oral communication. Faculty-led boards review and approve courses proposed as foundation, diversification or focus. Degree program outcomes align with the learning outcomes identified in Standard II.A.12. (II.A.12)

College degree programs require focused study in at least one area of inquiry or an established interdisciplinary core. Faculty identify the specialized courses that make up the focused study based on appropriate learning outcomes and competencies. (II.A.13)
All CTE programs, both credit and noncredit, require learning outcomes and are subject to the same assessment process as other courses offered by the college. Every CTE program has an advisory board made up of industry representatives to provide guidance on professional competencies and emerging industry needs. Additionally, many of the college’s CTE programs are accredited by external agencies that require their own competencies. (II.A.14)

UH policy RP 5.201 (Instructional Programs) includes a section on handling program termination. The policy stipulates that the College will meet commitments for up to two years for students enrolled in programs designated for termination and will not admit new students. (II.A.15)

The Annual Report of Program Data (ARPD) and the Comprehensive Review and Evaluation (CRE) (completed every four years) are the principal means by which the college evaluates its programs. The ARPD requires an analysis of the previous year’s performance and current data that informs an action plan for program improvement. The College prioritizes resource requests for program improvements based on this evaluation. (II.A.16)

Conclusions:

The College meets Standard IIA.

Commendation 2:
The team commends the College for developing programs and curricula that accelerate student progress toward college-level courses, particularly in English and mathematics. (II.A.4)

IIB. Library and Learning Support Services

General Observations:

The College supports student learning and achievement by providing a comprehensive set of library and instructional support services to students, regardless of location. The college relies on the expertise of librarians and other learning support professionals in developing its resource collections and implementing programs and services. The College continuously assesses its library and learning support services, including analysis of program effectiveness and student satisfaction. In addition, the college demonstrates that it is open to making changes as necessary to support students and the communities served by the college system.

Findings and Evidence:

Centrally located on the main campus, the three-story Learning Commons houses the library and an assortment of academic support services, including tutoring, a writing center, the Kākoʻo ʻIke Program (support for students with disabilities), an IT help center and a test center. Staffed by six librarians and five support staff, the library is open Monday-Friday for 60.5 hours per week. The library offers a wide assortment of print, media and electronic resources. The online library system (Hawaii Voyager) allows students to request items from anywhere in the University of Hawaii system for delivery at Leeward or the Waiʻanae Moku Education Center. Librarians teach several-hundred library orientations every year focusing on a range of information literacy
The Learning Commons offers students access to computers and a variety of study spaces. Students may also borrow iPads. Tutoring is available in a variety of formats (appointment, drop-in, group, workshops, in-class) and for a range of content areas. Outside of the Learning Commons, Computer Science students provide individual technology assistance to students at the Hub, an innovative grant-funded help desk. The Math Lab provides additional tutoring options in the Math and Science Building. Tutoring options are also available at the Wai‘anae Moku Education Center, and online through Brainfuse. (II.B.1)

The library maintains a collection of print, electronic and audiovisual materials. Librarians follow a collection development policy that includes both selection and deselection criteria. Recently, the library adopted a zero-growth policy for its book collection. Each of the librarians serves as a liaison to a different instructional division in order to solicit suggestions and engage faculty in the development of the collection. The library also offers students the use of computers, laptops, iPads, study rooms, scanning, printing and device charging. Other instructional support areas also provide a wide array of equipment (computers, laptops, calculators), adaptive software and textbooks based on the recommendations of the learning support professionals in the respective areas. (II.B.2)

The Library conducts an annual evaluation through the ARPD, which includes assessment of learning outcomes. Other library assessment activities include an annual survey of students and analysis of a wide range of usage and inventory statistics. Librarians use the Information Literacy Exam to assess students enrolled in English 100 and English 24. The LRC, Test Center and KI Program all conducts ARPDs. The LRC’s Content Tutoring Center and Writing Center both assess learning outcomes by comparing pass rates and persistence rates for student who have used their services versus those who have not. The College also uses the CCSSE survey of students to assess learning support services. (II.B.3)

As a member of the Hawaii Library Consortium, the College provides system-wide electronic resources and lending services for students. The Library is also part of the UH Library Council which shares an integrated library system Hawaii Voyager, as well as support tools such as Primo and the SFX link resolver. The Library also maintains contracts for its printing services and security gates. The KI Program contracts with several services to meet interpreting and alternative text needs. The College is able to leverage collaborative discussions with professional organizations such as the UH Library Council and the Association of Higher Education and Disability to inform its evaluation of supplementary learning support services. The college has a two-tiered system of network security support. The UH system provides security for the main network while the college has an additional system to protect the local network. (II.B.4)

Conclusions:

The College meets Standard IIB.
Commendation 3:
The team commends the College for the development of the innovative learning support program “The Hub”, which facilitates student success by using Computer Science students to provide technology assistance to students in a Help Desk setting. (II.B.1)

IIC. Student Support Services

General Observations:

Leeward Community College provides comprehensive student support services that are aligned with the college’s mission and core values to meet the ever changing needs of its student population and to ensure that students meet their educational, transfer and career goals. Each of the Student Services units use student satisfaction surveys, program review and the Annual Report of Program Data to evaluate demand, effectiveness and efficiency of support services to make continuous quality improvements.

Findings and Evidence:

Leeward Community College has well-established processes for the annual and periodic assessment and evaluation of the adequacy and effectiveness of student support services. As part of the college integrated planning and budgeting process, each student support services unit evaluates its services annually and reports the results through the Annual Review of Program Data (ARPD), and the Comprehensive Review & Evaluation (CRE) at least once every four years. The College also administers the Community College Survey of Student Engagement (CCSSE) and integrates data from the survey into the ARPD and CRE. (II.C.1)

Student services units assess learning and Support Area Outcomes (SAOs) and report the results in the ARPD or CRE. Students complete surveys to provide feedback regarding services received, which the units use to improve student support services. (II.C.2)

Student Support units provide online, phone and in-person services at both the main campus and the Wai’anae Moku Education Center. The Counseling and Advising unit offers a range of options for academic advising during the day and evening, including a new Express Counseling service available in the Learning Commons. In addition to general and program counseling, counselors work with specific populations such as dual enrollment students, Native Hawaiian students and veteran students. Some services, particularly back office support services (A&R File Drop and Financial Aid), are centralized to provide more consistent and efficient service to students. Where appropriate, system-wide support services are provided to ensure consistency of services to both on-campus and off-campus students. (II.C.3)

Leeward Community College co-curricular programs advance the college’s mission and core values of diversity and respect. The College supports a variety of co-curricular programs through the Student Life office, including Student Government, the Student Activities Board, campus clubs, the Budget and Finance Committee, Ka Mana‘o (the student magazine), New Student Orientation (NSO) and intramural sports. Policies and procedures are in place to oversee the effective operation of Student Life co-curricular programs and to ensure the College conducts these programs with sound educational policy and standards of integrity, including fiscal
accountability. The Student Government organizes and engages students in a wide range of creative, informative and meaningful activities allowing the students opportunities to participate in the college communities. (II.C.4)

The college has twenty-two counselors assigned to general or specific programs and special student populations. The Counseling and Advising unit conducts an annual professional development retreat. The UH System also provides regular training and updates for counselors and academic advisors. The College follows a Counseling Process model that guides every incoming student from recruitment to commencement, including mandatory New Student Orientation and mandatory New Student Advising, with counselor responsibilities identified for each stage of the student’s college experience. The College uses technology tools such as Maka’ala (the campus wide early alert system) and MySuccess (student retention software) to facilitate communication between students and faculty/counselors and to ensure that students stay on track. (II.C.5)

The UHCC System implemented exploratory majors in Fall 2016 and tasked all UHCC System campuses to create an exploratory model and major selection system for their students declaring a Liberal Arts major. By spring 2018, Leeward students had four exploratory Liberal Arts major options, with guidance from Liberal Arts Counselors who now operate with specific major groups in mind. In summer 2017, the UHCC System also implemented the Integrated Student Support (ISS) initiative whereby Student Services units collaborated to invite students who were close to graduating to return to complete their degree. As a financial incentive, students could take one class at no cost upon their return. The College guided pathways provides support to its students from students first semester at the College to completion of their degree program. This support had increased degree completion rate. (II.C.5)

Regents Policy 5.211 specifies the qualifications of students appropriate for the College’s programs and publishes admissions information in the Catalog and College website. The College fully implemented the UHCC Student Success Pathway framework, designed as a clear and structured pathway from point of interest through graduation to transfer or career completion. As part of the New Student Orientation, students learn how to use Laulima (course management system) and STAR GPS (academic pathway guidance). (II.C.6)

The College uses multiple measures for placement of all students regardless of intended course enrollment. The College regularly evaluates admissions and placement instruments and practices to ensure consistency and to validate their effectiveness while minimizing biases. (II.C.7)

The College follows an established process to maintain student records permanently, securely and confidentially. The College keeps physical copies of student records in locked cabinets for five years post-enrollment. Admissions and Records backs up records in Banner. The College Catalog states policies and procedures regarding the release of student information. (II.C.8)

Conclusions:

The College meets Standard IIC.
Commendation 4:
The team commends the Student Government for their organization and engagement of students in a wide range of creative, informative and meaningful activities and for actively encouraging student participation in college committees. (II.C.4, IV.A.2)

Commendation 5:
The team commends the College for its leadership in the development and implementation of guided pathways. (II.C.5)
Standard III

Resources

III.A. Human Resources

General Observations:

The College is keenly aware that the employees at the institution are essential to support the academic and career pursuits of the student population. The College has well-developed and well-implemented protocol and policies to request new positions, develop job descriptions, post job opening, and hire highly qualified employees. As part of the UH system, the College integrates the UH board policies, UH executive policies, and UHCC policies with regard to all aspects of the human resources endeavors. The College ensures that all personnel are highly qualified for the positions they seek, a sufficient number of employees are secured, and a systematic evaluation process is in place. A variety of professional development activities are an integral part of the continual cycle of professional growth and improvement.

Findings and Evidence:

The College ensures that all personnel are qualified by their appropriate education, training, and experience to provide and support the College’s programs and services. The University of Hawai‘i (UH) Board of Regents (BOR) appointees who are subject to classification and qualification rules include executive and managerial personnel; faculty; and administrative, professional, and technical. Support staff including grounds and maintenance and clerical staff are state of Hawai‘i civil service employees subject to civil service classification and qualification rules. The College accurately details the job qualifications and specifies how each position aligns with the institution’s mission and core values. Job announcements are widely distributed through postings and other venues. The protocol indicating which entity (LCC, UHCC, UH, BOR) makes the final decision on hiring employees (faculty, APT, administrators, civil service employees) is in place. (III.A.1)

The UH system provides the College with a comprehensive set of requirements and criteria used for faculty hiring and rank and tenure. The College has a mechanism to ensure that faculty are qualified and vetted through formal means. (III.A.2)

The College has a consistent process to determine if administrators and other employees responsible for educational programs and services possess the qualifications necessary to perform duties required to sustain academic quality and institutional effectiveness. The College vets administrators and employees responsible for academic programs and services to ensure they have the necessary qualifications to perform their professional duties. (III.A.3)

The College ensures that all degrees held by employees at the College are from U.S.-accredited institutions or from a non-U.S. institution that has been established as being equivalent to a U.S.-accredited institution. (III.A.4)
All personnel at the College are evaluated on a regular basis and the process and frequency varies for each classification. The guidelines and processes for the evaluation are well-documented, include evaluation criteria, and are made available to personnel for review. The process for evaluation is collegial and feedback is provided to ensure that individuals are effective as employees. The continual improvement and growth for employees is encouraged. The processes for employee evaluation are formal, timely, well-documented. (III.A.5)

The College is mindful that student learning is of the utmost importance as evidenced in the formal evaluation process for those individuals who work directly with students. Assessment data, analysis, and findings focusing on student learning and success are observed and reported which also provides personnel with the opportunity for a continual cycle of examination and improvement. (III.A.6)

The College maintains an adequate number of qualified faculty, full- and part-time, to ensure that all educational programs and services are meeting the needs of students. The ARPD is the vehicle used to request full- and part-time faculty should they be needed. (III.A.7)

Adjunct faculty are welcomed into the college community through the orientation process, a variety of professional development activities, and mentoring services. Adjunct faculty are readily sought after to become active members on department and college committees. (III.A.8)

The College continues to have sufficient staff who are well-qualified as viable members of the academic programs and services. These individuals play a salient role in the educational, administrative, physical, and technological operations at the College to ensure student learning and success remains a high priority. (III.A.9)

The College recognizes that a sufficient number of qualified administrators is important to ensure that educational programs and services remain in alignment with the institution’s core values and mission and are effective, efficient, and ultimately meeting the needs for the student population. (III.A.10)

As part of a larger educational body, the College systematically implements UH board policies, UH executive policies and UHCC policies and develops and implements other policies when appropriate. These policies are vetted to ensure that each are fair and administrated consistently and readily available to all interested parties. (III.A.11)

The College continues to be keenly aware of the importance of a diverse employees many of whom are a reflection of the communities they serve. Special attention is given to ensure that these individuals have the essential qualifications, experience, education, and mentoring to be a successful part of the college community. The Director of the EOO/AA at the Office of the Vice President for Community College plays a key role in this effort. (III.A.12)

The College adheres to the policies for the code of conduct regarding professional ethics provided by the UH system. Consequences for infractions to this policy are clearly stated. (III.A.13)
The College provides its employees with a robust professional development program. The Innovation Center for Teaching and Learning (ICTL) and the Educational Media Center (EMC) play key roles in the professional development efforts. The ICTL takes on the role of an advisory entity to guide and oversee the work and the EMC determines the needs and interests of the employees so that the professional development activities are meeting the needs its employees. A campus survey indicates a high level of satisfaction (83%) by employees indicating that the professional development activities are meaningful, efficiently implemented, and helpful to improve teaching and learning. (III.A.14)

The College has a mechanism in place to ensure that the confidentiality and privacy of personnel documents are secure and available to employees for their review. (III.A.15)

Conclusions:

The College meets Standard IIIA.

Commendation 6:
The team commends the College for its dedicated and collaborative support of professional development, with an emphasis on supporting faculty in instructional pedagogy, teaching with technology and encouraging effective practices by modeling such practices during training sessions. (III.A.14, III.C.4)

IIIB. Physical Resources

General Observations:

The College provided a comprehensive explanation of the responsibilities that the UH System, the UHCC System and Leeward Community College have with regards to immediate, near and long-term planning for the physical facilities to ensure that the College has adequate facilities that are safe, reliable and efficient to meet the needs of all students, faculty, staff and the general public. The institution has policies, processes and procedures for the development of the Long Range Development Plan at the college and its submission to the Board of Regents.

Facilities planning & management is shared with the UH System managing major capital projects and the UHCC managing minor projects, including repairs & maintenance. The institution is very cognizant and responsive to meeting the needs of its students, particularly Native Hawaiians, in accordance with the institutional mission, vision and core values. The College uses primarily its Annual Report of Program Data (ARPD) to identify facilities and space needs. The College Strategic Plan and Long Range Development Plan guide facilities expansion and renovation decisions in the immediate, near and long term. The College is committed to sustainability and minimizing adverse impact on the environment by implementing methods to increase energy efficiency.
Findings and Evidence:

The College meets the standard and its subsections. The institution is committed to promoting sustainable practices in constructing/renovating its physical resources resulting in significant savings both in terms of dollars and energy consumption.

Leeward Community College primarily serves students in the Leeward coast and Central O‘ahu, a geographical region where approximately a third of the state’s population reside, in addition to students from all parts of the island. The College supports learning programs and services and provides safe, accessible, and secure learning environment to achieve its mission. The campus infrastructure includes 18 primary buildings and several clusters of portables located on 49 acres of land as well as an education center located in Ma‘ili. The institution provides sufficient physical facilities at the Pearl City campus and the Wai‘anae Moku Center to meet the needs of one of the largest service areas of the UHCC campuses. (III.B.1)

The College provides security and maintenance and operations services at Pearl City and Wai‘anae Moku to ensure that campus facilities are clean and safe for students, faculty and staff. In coordination with the UHCC System, the College undergoes periodic assessment and evaluation of facility accessibility. The College has sufficient staffing for their Campus Security Office to meet the current needs of students, faculty and staff at the Pearl City campus and Wai‘anae.

The College develops and administers a variety of health and safety training and awareness programs to familiarize students, faculty and staff and maintain a safe learning and working environment. The College regularly updates and distributes its Emergency Operations Plan and Emergency Guides to ensure that the campus community is informed of accessible evacuation points and emergency response procedures and protocols should the need arise.

Facilities planning is aligned with the institutional mission. The UH System and the UHCC System are responsible for the development of long-range physical plans and the implementation of capital improvement program projects. The Strategic Plan and Long Range Development Plan guide decision-making about the college’s physical resources, including capital improvement projects, in adherence with Regents Policies. The UHCC System Office of Facilities & Environmental Health prioritizes projects based on the needs of the UH System & UHCC System. Through the Annual Report of Program Data and the planning and budgeting process, the College evaluates program and services needs when planning for and maintaining physical resources. Stakeholders in new construction or facility improvement projects actively participate in the development of Leeward’s Long Term Development Plan that links the physical planning process with the college’s programmatic and institutional goals.

The College utilizes equipment replacement funds from the UHCC System to support equipment upgrades, technology, smart classrooms and library acquisitions to bolster its programs and services and achieve the college mission. The College is strategic in its effective and efficient use of physical and financial resources, exemplified firstly by the acquisition and renovation of a facility to house the Wai‘anae Moku Education Center, resulting in lease cost savings that were reallocated to meet other college budget priorities, and by leveraging Title III grant dollars to
fund Phase II renovation costs; secondly, for allowing the expansion of the City & County of Honolulu’s rail project resulting in the construction of the College’s new rail station and the construction of the Office of Continuing Education & Workforce Development (OCEWD) complex at no cost to the college; and lastly for the UH System and Leeward’s commitment to sustainable practices demonstrated through the establishment of a net zero energy goal. The UH system (including the UHCCs) is expected to be net zero by the year 2035. Leeward has already generated significant verifiable energy cost savings from the implementation of its Energy Conservation Measures and Alternative Energy projects, and is close to meeting its net zero goal well in advance of the UH System goal. (III.B.2)

The institution regularly assesses the use of its facilities to identify current and projected needs by programs and departments, and uses the results of the evaluation to improve facilities and equipment to meet the changing needs of the campus. The College monitors all campus facilities on a regular maintenance schedule, including planning for deferred maintenance, utilizing computerized facilities management tools provided by the UHCC System and UH System. The College uses planning and assessment tools to ensure the efficient and effective use of clean and well-maintained facilities that support academic programs and services. (III.B.3)

The UHCC and UH System are responsible for planning for major new projects, including total cost of ownership. Long-range capital projects are linked to institutional planning: the Long Range Development Plan (LRDP), the UH System Integrated Long-Range Planning Framework (EP 4.201), and the Strategic Plan. The Leeward Community College Long Range Development Plan identifies the physical development needed to support the College mission and strategic goals within the near term and over the long term. The UH Board of Regents requires a Capital Project Information and Justification, which includes a needs assessment, scope of work and total cost projections to support any major CIP construction or renovation related project requests prior to approval and submission to the State of Hawai‘i for funding consideration. The UHCC System created a system wide equipment replacement fund that is allocated to the colleges to meet equipment replacement needs on campus. (III.B.4)

Conclusions:

The College meets Standard IIIB.

IIIC. Technology Resources

General Observations:

With 79 smart classrooms and an assortment of computer labs, Leeward Community College integrates a wide range of current technology resources into its educational programs and support services at both the Pearl City campus and Wai‘anae Moku Education Center. The college offers a range of technology services for students, staff and faculty, with a strong emphasis on distance education support. Using its program review process for prioritization, the college maintains and updates technology resources on a regular basis. The college follows recommended protocols to ensure reliable and secure networks. University of Hawaii policies provide primary guidance on the use of technology.
Findings and Evidence:

The college provides an extensive array of technology support services. The Information and Technology Group (ITG) maintains computers across the Pearl City campus and Waiʻanae Moku Education Center, including nine computer classroom labs. ITG also manages servers, the VOIP telephone system, printers, networking services and security. ITG staffs a Help Desk that provides online and phone support for students and employees, and a Student Test Center. The Educational Media Center (EMC) focuses its support on instructional technology, including the college’s 79 smart classrooms. The EMC also loans equipment, produces instructional videos, manages the Copy Center and provides extensive professional development opportunities in instructional technology. Assistive technology support for students with documented disabilities is available through the Kākoʻo ʻIke (KI) Program. The Information and Computer Science (ICS) program coordinates The Hub, an additional help desk, on its own network, that uses interns to provide technical assistance to students who need help with personal devices. (III.C.1)

The college uses the program review process to review, prioritize and update its technology infrastructure. ITG replaces network switches, battery backups and servers on a regular basis. A wireless network is available for 95% of indoor campus areas and many outdoor spaces as well. The college has a regular 4-year replacement cycle for most campus computers. The college has an annual Technology Support fund that is distributed based on prioritization by Academic Services and, for network-related needs, ITG. (III.C.2)

The ITG and EMC handle technology support at both the Pearl City campus and the Waiʻanae Moku Education Center. The University of Hawaii Office of Technology Infrastructure provides additional support for state connectivity between UH sites. The ITG houses servers in a secured room with uninterrupted power supply units and conducts daily backups of critical servers. Thirty percent of the servers have same-day replacement contracts and the college plans similar contracts for all new servers. ITG has a disaster-recovery plan that includes a gas-powered generator for extended power outages. (III.C.3)

With a dedicated staff of four full-time faculty, the EMC provides extensive support for faculty in instructional technology. It developed iTeach, a vibrant website designed for DE faculty. The website includes a variety of DE-themed online workshops and other useful resources. To support distance students, the EMC created iLearn, a website with online learning tools and resources. The ITG conducts some in-person workshops on technology topics for staff and students. (III.C.4)

As part of the University of Hawaii, the college adheres to all of the technology-related policies and procedures covered by the system’s Policies and Procedures Information System. In addition, the college follows a local Personal Equipment Use on Campus Network policy. The policies appear on the ITG website. (III.C.5)

Conclusion:

The College meets Standard IIIC.
Commendation 6:  
The team commends the College for its dedicated and collaborative support of professional development, with an emphasis on supporting faculty in instructional pedagogy, teaching with technology and encouraging effective practices by modeling such practices during training sessions. (III.A.14, III.C.4)

IIID. Financial Resources

General Observations:

The college provided a comprehensive response to Standard III.D.1-III.D.16. A general observation is the college has implemented protocols and practices of checks and balances for ensuring their fiscal planning, responsibility and stability. In addition, to the required 5% reserves of cash balances, the system maintains a balance of 16% cash reserves as outlined in the system’s Board of Regents requirements. In addition, the college provided access to a broad range of internal college and public planning documents, which substantiated the response to the standard.

The college has systems and processes in place to ensure accuracy and credibility of financial and budget related documents at the institutional level. In addition, the College, in consultation and coordination with the University of Hawaii Community College System office, utilizes various multi-year financial projection tools (software), historical revenue and expenditure patterns, business plans, and enrollment forecasts to determine anticipated cash and fund balances, revenues, and expenditures. Additionally, the fiscal administrator and the Vice-Chancellor of Administrative Services perform internal and independent reconciliation procedures to ensure accuracy and to maintain integrity in financial and budgeting planning. Internal and external audits of the college is fiscal planning and expenditures have resulted in modifications and final reports verifying the college is using generally accepted practices for accounting practices.

Finally, the college has an integrated budget and planning process, which supports the adequate allocation of resources to student support, and learning programs.

The college has protocols for ensuring there are adequate resources and internal controls for how funds and expenditures are utilized to accomplish the mission of the college.

The college appears to have financial practices that encourage stability in resources in order for them to meet their institutional mission and goals. The college will need to enhance their process of gaining input from all constituent groups in the development of the annual budget.

Findings and Evidence:

The team's overall analysis of this standard and its subsections is that the college has processes and procedures in place to ensure they have adequate fiscal resources to meet the student support and learning needs of the college. These processes and procedures are aligned with an integrated
planning and budget structure, which allocates resources that supports the college’s mission and institutional effectiveness.

The college maintains sufficient financial resources to support and sustain student learning programs and services, thereby, improving institutional effectiveness. Financial planning at the college begins with a comprehensive operating financial plan submitted to the University of Hawai‘i, Board of Regents (BOR) for its approval prior to the start of each fiscal year. The financial plan provides the Board of Regents with oversight to ensure that the University of Hawai‘i System is managing its resources in a fiscally responsible manner. The college plans and manages its financial resources effectively, in a manner that ensures financial stability. (III.D.1)

The college demonstrates through strategic planning, the institution’s mission and goals drive financial planning. The college has policies and procedures for ensuring sound financial practices and resources. Financial updates are provided to the campus community at convocation, quarterly updates and posted on the college’s intranet site. (III.D.2)

The college provided documentation for this standard, which outlines the University of Hawai‘i and University of Hawai‘i Community College systems budget development process. The college provided evidence on the processes it utilizes to ensure college constituents develop institutional plans with requests for resources and how the allocation of these resources is decided. (III.D.3)

The college engages in institutional planning which takes into account available fund resources compared to college expenditure requirements. The University of Hawaii System and University of Hawai‘i Community College System offices provide the College with access to several financial forecasting models, which are an integral component of assessing realistic financial resource availability for institutional operations and facility planning. The College makes use of multi-year financial models for tuition and fee revenue projections and financial projections related to campus operations across all fund types. (III.D.4)

The college has an internal control structure, which ensures financial integrity and the appropriate use of fiscal resources. The college provides fiscal reports hosted on the college’s website. The college has a system of evaluating its fiscal process through internal and external audits. (III.D.5)

The college has internal and external audit procedures in place to ensure accuracy and credibility in financial planning and budgeting documents. The college makes allocations based on their Integrated Planning and Budgeting Process to align financial resources with student learning programs and services and to ensure consistency with the goals and objectives of the strategic plan. An area for further review in this standard is how involved different college constituent groups are in this process. (III.D.6)

The college has not received any external audit findings or management letters of any material weaknesses or deficiencies during the last six years. (III.D.7)
The college’s financial and internal review systems are evaluated to determine effectiveness and area for improvement. The college appears to use this information to make improvements in their financial control systems. (III.D.8)

The college maintains sufficient cash flow and reserves to ensure operations. The college demonstrates they have appropriate procedures in place to account for unexpected financial occurrences. (III.D.9)

The college maintains effective practices in place ensuring appropriate oversight of finances. These processes including compliance with Federal Title IV requirements and regulations. The college has not been cited for material weaknesses or deficiencies in their internal processes for fiscal controls. (III.D.10)

The college provided evidence they participate in short-term and long-term fiscal planning. The college’s financial planning and resource allocation decisions take into account payments of long-term liabilities and future obligations, including debt service, system wide assessments, and any compensation-related adjustments. (III.D.11)

The state general fund pays the employer’s share of Other Post-Employment Benefits (OPEB) obligations for general funded positions for all state agencies. Therefore, employer OPEB obligations for general funded positions are not part of the College’s operating budget. The college covers the OPEB requirements for the relatively small number of non-general-funded positions employed by the college. The college’s contributions are calculated as part of the state’s total contribution requirements and are reimbursed to the state’s general fund as part of the fringe benefit rate on employees’ actual salaries. (III.D.12)

The college plans and budgets resources to repay locally incurred debt. The college funded several projects then repaid the incurred debt using the projections from their operating budget. (III.D.13)

The college has policies and procedures in place for ensuring financial resources are used according to their intended use. In addition, the college maintains a process of review for the use of these funds. (III.D.14)

The college projects financial resources for student assistance. The college monitors and manages their student loan default rates, and makes loans options available to students only when it is determined they do not qualify for other sources of financial support. The college has processes in place to ensure they are compliant with Federal Title IV requirements. The college’s loan default rate is below the thirty percent federal threshold. (III.D.15)

The college has policies and procedures in place to ensure contracts with external entities are appropriately reviewed, and there is a signatory process to ensure the contracts are aligned with the business of the college focused on the delivery of programs, services and operations. (III.D.16)
Conclusion:

The College meets Standard IIID.
Standard IV  

Leadership and Governance

IVA. Decision-Making Roles & Processes

General Observations:

The college supports an engaged community of faculty, staff, administrators and students by providing both formal and informal opportunities for individuals and groups to participate and share new ideas and unique perspectives. Policies and procedures ensure that administrators, faculty, staff and students are able to participate in governance, including a substantive role for administrators and faculty in areas relating to their responsibility and expertise. The governance structure reflects the primary role of faculty, with key support from academic administrators, in curriculum and student learning. College governance leaders meet regularly with system leaders to ensure alignment of planning and curriculum. Governance bodies share updates, agendas and minutes through the campus communication network. In evaluating the effectiveness of its governance practices, the college discovered that despite the widespread availability of these informational resources, there remains significant uncertainty as to the effectiveness of the campus governance structure.

Findings and Evidence:

The college encourages innovation through a variety of special funding opportunities and award recognitions. The Vice Chancellor of Academic Affairs (VCAA) established a $60,000 innovation fund and solicited applications. The UHCC system provided funding through the Acceleration Initiative that led to innovations in the English and math curriculum. The institution recognizes individuals in all staff categories with a variety of awards for new ideas and contributions toward institutional excellence. The college governance structure provides formal opportunities for students and employees to bring forward ideas. For less formal conversational input, the VCAA conducts periodic Talk Story discussion sessions with faculty and staff. (IVA.1)

The Policy on Shared Governance (L1.201) explicitly states that any individual or group on campus has a right to participate in decision-making. The Student Government body is one of four established governance groups and is actively engaged on campus. The other governance groups - Faculty Senate, Pūko’a no na ʻEwa Council (Nā ʻEwa Council) and Campus Council all include student representation. In addition, the college committee structure includes ample representation by students. The Policy on the Policy Development Process (L1.101) documents procedures and responsibilities for developing policy. It illustrates the process from initiation to approval with a flow-chart and includes a template of elements to be included in new policy. (IVA.2)

Both the Policy on Shared Governance Policy and the Policy on the Policy Development Process address the distinct and significant roles of faculty and administrators in the governance process. The Integrated Planning and Budgeting Process also describes the responsibilities of faculty and administrators through the entire cycle. In terms of planning and prioritization, faculty and
administrators have particularly prominent roles, whether at the program, area or governance body level. (IV.A.3)

University of Hawaii Regents Policy (RP) 1.210 Faculty Involvement in Academic Decision-Making and Academic Policy Development affirms that faculty have primary responsibility in “such fundamental academic areas as curriculum content, subject matter, and methods of instruction and research.” A memorandum of agreement between the Board of Regents and the University of Hawaii Professional Assembly further clarifies the academic governance areas assigned to the Faculty Senate. Committees with an academic focus (such as curriculum, assessment and distance education) fall under the purview of the Faculty Senate. (IV.A.4)

The college operates within the University of Hawaii Community College system which in turn is part of the University of Hawaii, with a UH President and Board of Regents. The Vice President of Community Colleges meets with three governance councils: Chancellors, Faculty Senate Chairs and Native Hawaiian Chairs. Curriculum approval follows an established process that centers on faculty with final approval by the college. Faculty develop programs with administrative support at the colleges and receive final approval by the Board of Regents. (IV.A.5)

The college communicates decisions throughout the year via electronic communications and special reports at college-wide activities. The Campus Council, Faculty Senate, and Student Government all maintain websites with agendas, minutes and other relevant information. The college also provides via its website a committee information list that includes committee name, contact person, description/mission, and membership requirements and whether or not the committee is seeking members. The College does not have a central consolidated resource that documents the governance process, structure and decisions. Most committees do not have websites. At roundtable discussions during the spring 2018 convocation, faculty and staff expressed interest in learning more about the decision-making process. The Fall 2016 Employee Satisfaction Survey shows that 73% of respondents participate in college committees. However, the same survey indicates that more than 60% of respondents are unsure of or disagree with the notion that the Campus Council carries out its role effectively. (IV.A.6)

The college primarily relies on surveys for evaluation of its governance and decision-making process. The college conducted a survey of employees in fall 2016 that ultimately led Campus Council to conduct a self-evaluation and increase its college-wide communications about meetings. In response to survey results, the Campus Council also created an ad-hoc committee to review the Policy on Shared Governance (L1.201). A review of the results also led the institution to launch a college-wide discussion at its January 2017 convocation to solicit feedback on how to improve the effectiveness and communication methods of the Campus Council and Faculty Senate. In response to the discussion, the Campus Council conducted a self-evaluation by surveying its members in spring 2017. The Faculty Senate and Student Government also conduct surveys of their respective constituencies. (IV.A.7)

Conclusion:
The college has policies and structures in place to support vibrant, engaged involvement in decision-making. However, information about decision-making policy, governance bodies and
committees is not centralized. There are few committee websites. Although governance bodies post a wealth of documentation, the college lacks a single site or source that ties together the disparate components of the college governance process and structure.

The College meets Standard IVA.

Commendation 4:
The team commends the Student Government for their organization and engagement of students in a wide range of creative, informative and meaningful activities and for actively encouraging student participation in college committees. (II.C.4, IV.A.2)

IVB. Chief Executive Officer

General Observations:

As part of the UH and UHCC systems, the roles and responsibilities of the CEO and the management structure of the college are clearly articulated and in place. Overseeing the process for institutional planning and resource allocation falls within the purview of the CEO and the process and responsibilities are clearly delineated.

Findings and Evidence:
The role of the CEO (chancellor) is clearly articulated in the job description and dictates that this individual will be the educational leader at the institution and responsible for the quality and the educational programs provided to students, the planning and resource allocation, selecting and developing personnel, and the overall effectiveness of the institution. The role of the CEO aligns with the accreditation standards and the process to select the CEO is described in UH Policy 9.210 (Recruitment, Selection, and Appointment of the Community College Chancellors). (IV.B.1)

The CEO manages seven executives including the VCAA and VCAS, and the Creative Services Office. The Vice Chancellor of Academic Affairs (VCAA) oversees the academic departments and supervises the college deans and the Office of Planning, Policy, and Assessment (OPPA). The Vice Chancellor of Administrative Services (VCAS) is responsible for all fiscal matters pertaining to the institution. The CEO meets weekly with the VCAA and VCAS and monthly with the entire administrative team. (IV.B.2)

The CEO is in charge of the institutional planning process. The annual Integrated and Planning Process utilizes the college’s Strategic Plan 2015-2021 and work begins with the summer leadership retreat. College constituents have the opportunity to provide their input which reflects the institutional mission, goals, and values. Information provided in the ARPD and the Institutional Effectiveness Report furnished by the OPPA play an important role in the decisions about resource allocation and the final decisions are made by the CEO. (IV.B.3)

The CEO is responsible for the overall accreditation process and delegates tasks to appropriate individuals and committees. The VCAA serves as the Accreditation Liaison Officer (ALO) whose major responsibility is the development of the Institutional Self-Evaluation Report.
(ISER). The VCAS addresses all fiscal matters including information presented in the ISER as well as the preparation of the Annual Fiscal Report sent to ACCJC. The Faculty Senate subcommittees on curriculum and assessment are responsible for compliance with the ACCJC standards that pertain to curriculum and student learning. (IV.B.4)

The CEO is responsible for making institutional decisions that comply with statutes, policies, and regulations set forth by the UH system and reflect the mission and goals of the college. The Policy on Policy Development Process (College L1.101) is used to make Institutional decisions. During the decision-making process, the Campus Council prioritizes potential expenditures reported in the ARPD and CRE and the CEO makes the final decision regarding resource allocation. The CEO participates in the Council of Community College Chancellors which serves as the entity to ensure compliance with state and federal laws. The VCAS, who bears the responsibility for all budget matters, works collaboratively with the Campus Council and Faculty Senate to ensure that monetary decisions reflect the mission and goals of the institution. (IV.B.5)

The former CEO has established a strong presence in the community by participating in a variety of partnerships and community groups and educational professional organizations and attending educational and community events. The institution expects that this will be an ongoing effort and expects that new partnerships should emerge. In July 2018, a change in leadership occurred as the chancellor retired and interim chancellor took the leadership role at the institution. The interim chancellor brings to the college her passion for education, her vast experience at the community college level and UH system, and a keen understanding that the institution plays in cultivating a climate which promotes student success. In the short time in this position, she has reached out to the high school principals to strengthen the pathway from secondary to post-secondary education for prospective students. She also works closely with UH Foundation to showcase the college’s endeavors and assist with fund raising. The CEO communicates regularly to faculty and staff during the convocation prior to each semester and through the faculty list serves. (IV.B.6)

Conclusion:

The College meets Standard IV.B.

IVC. Governing Board

General Observations

The College is part of the University of Hawaii system that is overseen by the Board of Regents (BOR), whose fifteen members are appointed to five-year terms by the governor of the state and confirmed by the state senate. Regents are expected to act as a whole and maintain appropriate communication between the BOR and the institution. The BOR has established and adheres to clear policies related to the selection, evaluation and authority of the CEO of the institution. They also have policies and procedures in place related to the Board's operation, professional development, self-evaluation and ethical requirements. Finally, the BOR has established clear delineation between the general oversight responsibilities of the board and the operational responsibilities of the CEO.
The governing board for the college is established in Hawaii State statute and is appointed by the governor and confirmed by the Senate. The Board’s authority is also established in statute and the State constitution. Its policies assure its responsibility for academic quality, integrity, and effectiveness of the student learning programs and services.

Findings and Evidence

The Board policy manual is organized under the UH System-Wide Policies and Procedures Information System (PPIS) using a standardized policy format. This format includes the designated policy number, the title, and a header including the chapter, Regents Policy number, effective date, prior dates amended, and a review date. Regents Policy RP 5.201 delineates the Board’s accountability for academic quality, integrity, and the effectiveness of learning programs. Financial stability is addressed through RP 8.203 among others. The BOR executes those responsibilities through board and committee meetings, and at times, through the creation of special tasks groups to address specific issues. (IV.C.1)

RP 1.202 outlines the expected relationship of Regents with the administration and the university, and delineates the communication structure related to the flow of information to and from the BOR. In addition, the BOR handbook also details the expectation that Regents will serve the system as a whole and individuals have a responsibility to support the majority action. These responsibilities and adherence to them are reviewed via a board self-assessment instrument. (IV.C.2)

Policies state that “the authority of the board reposes in the board as a whole.” The Board’s minutes and self-evaluation show that they are working collectively. Board of Regents meeting minutes of October 31, 2017, indicate that “acting as a unit” was included on the Board Self Evaluation Survey. The summary of results reflects three survey items related to this criterion supports the assertion that the board acts as a unit. One Regent commented, “Regents have been very good at representing as an individual and not speaking on behalf of the full board.” Regent Policy RP 1.202 states that “no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson.” (IV.C.2)

Selection of a CEO is governed by specific policies depending on the position. Recruitment and selection of the system CEO (Vice President for Community Colleges [VPCC]) is outlined in RP 9.212 and the selection of the College's chancellor is conducted in accordance with policy UHCCP 9.210. The BOR delegates the authority to evaluate the VPCC to the University of Hawaii president and the evaluation of the college chancellors is further delegated to the VPCC. Evaluations of the VPCC and the chancellors are governed by Executive Policies 9.203 and 9.212. The process primarily consists of a 360-degree assessment by those who work closely with the executive, a review of accomplishments and goals for the review year, and the setting of goals for the upcoming year. The evaluation system itself is also periodically reviewed and updated as necessary. (IV.C.3)
The UHCC office has a newly approved (spring 2018) policy UHCCP 9.210 for the recruitment, selection, and appointment of Community College Chancellors which is aligned with Regent Policy RP 9.212. Executive Policy EP 9.212 (in support of Regent Policy RP 9.212) which establishes an annual review that includes a 360-degree assessment by the HCC Chancellor, as well as his or her peers, subordinates, and constituents of the Chancellors’ performance. This assessment also includes a review of accomplishments and goals for the review year and for the coming year. (IV.C.3)

Article X of the State Constitution outlines the independent authority of the BOR and the autonomy of the University of Hawaii. The Article establishes the power of the BOR to formulate policy and exercise control over the university through an executive officer appointed by the BOR. In exercising its responsibilities, the BOR leadership may communicate and/or meet with state legislators on matters relating to the university. (IV.C.4)

The autonomy of the University and related independent authority of the Board of Regents is embodied in Article X of the State Constitution, specifically Section 6 and RP 1.202: Relationship of the Board to Administration and University. (IV.C.4)

The BOR has established a number of policies to ensure the quality, integrity, and improvement of student learning programs and services, as well as provide for resources to support them. Board policies governing the system and college work are arranged into several tiers. The uppermost tier are the Board of Regents Policies (RP) and the UH Executive Policies (EP) that implement the RPs. Other policy tiers must exist in compliance with and/or not contradict policies at higher levels. Below the RPs and EPs are the UHCC policies and then those established by the individual colleges. The BOR has established a number of policies to ensure the quality, integrity, and improvement of student learning programs and services, as well as provide for resources to support them. These include RP 5.201, which states that instructional programs must be consistent with the institution’s mission and undergo regular review and RP 4.205, which outlines the need for regular and systematic assessment and accountability of all programs, campuses, and the university as a whole with an eye toward effectiveness in meeting the mission and goals of the institution. (IV.C.5)

A review of the Board of Regents policy manual shows that the Board has established policies consistent with the system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. (IV.C.5)

BOR policies related to the board size, responsibilities, structure and operating procedures are found on the Board of Regents’ home webpage. In addition, the bylaws of the BOR includes sections defining the board and its organization, the duties of the BOR officers, committee structure, meeting requirements, general operating procedures, and conflict of interest requirements. (IV.C.6)

The board publishes its policies establishing its size, duties, responsibilities, structures, and operating procedures. Board Bylaws and the Board Policy Manual, under the UH System Policies and Procedures Information System, are readily available on the UH website. (IV.C.6)
The BOR reviews its policies on a staggered three-year cycle for 12 chapters of policy. The policies and related administrative procedures are all documented on a system-wide Policies and Procedures Information System (PPIS) that provides easy public access to all policies, information related to the effective date of each policy as well as prior amendment dates and automatic notifications to interested parties of any change to policy. Regular reports on policy review and revisions are made first to the Committee on Personnel Affairs and Board Governance and then to the BOR. (IV.C.7)

A review of samples of Board minutes shows that the actions of the Board are consistent with its policies and bylaws. There is a regular three-year cycle for policy review, and Chapters 9-12 will be reviewed in 2019-2020, after which the cycle begins again. Any policy may be reviewed at any time, as needed. The community colleges are not involved per se, but the VPCC provided leadership for the review of Chapters 1-4 at the request of the Board, and as a regular attendee at Board meetings, is fully informed of the process. The community colleges can provide input to the VPCC. For example, the Community College Council of Faculty Senate Chairs might provide input on matters pertaining to shared governance and decision-making. (IV.C.7)

The BOR has established strategic goals for the University of Hawaii in four key areas, the first of which is a graduation initiative focused on student success. The BOR strategic goals are also aligned with the strategic goals of the UHCC system and the individual colleges. Where possible, targeted incremental growth or improvement measures are associated with the goals and regular updates are provided to the BOR during board meetings or relevant committee meetings. (IV.C.8)

The board has established goals related to student success. It is kept informed of issues impacting student success through reports. The UH System, in keeping with its commitment to be an indigenous-service institution, tracks data on the various demographic constituents it seeks to serve. The UH and UHCC systems track the incremental changes in several factors. Data related to meeting campus-specific targets are also used in the allocation of performance-based supplemental funding, beyond base-budgeting. (IV.C.8)

The BOR has an ongoing training program that includes a number of professional development opportunities. New board members receive a full-day orientation that introduces them to University functions, governance and strategic directions, as well as to BOR governance, processes, ethics, and conduct. New members are also paired with an experienced board member who serves as a mentor to the incoming member. Members also attend relevant conferences such as the Association of Governing Boards and the Association of Community College Trustees. In addition, the BOR conducts retreats and specialized training sessions such as a recent session on financial audits. (IV.C.9)

Through a review of HRD394A – 104 (enabling legislation), it appears the Board has staggered terms. The Board Bylaws provide for a written method of providing for leadership continuity and orientation of new members. Article II, Section E, of the Bylaws (as of July 19, 2018), provides for an orientation for new members within one month of the beginning of their term. The orientation shall include, among other things, an overview of the University system, BOR responsibilities, accreditation standards for Board governance, and BOR policies and practices.
New members also are to be provided with a Reference Guide covering these and other topics. (IV.C.9)

RP 2.204 provides a process for BOR self-evaluation and in 2017, the BOR committee structure was revised to provide oversight to the self-evaluation process. The BOR has conducted the self-evaluations annually since 2014 and uses the results for continuous improvement of board performance and institutional effectiveness. (IV.C.10)

The Board has been conducting annual self-evaluations. The commitment to this process is codified in RP 2.204: Policy on Board Self-Evaluation. While there is not a formal schedule per se, recent practice has been consistent in conducting the self-evaluation just prior to or at the beginning of the new academic year. (IV.C.10)

BOR bylaws and RP 2.206 contain conflict of interest policies and procedures and members are informed of the ethics requirements during their initial orientation. Regents who are also active employees of the University of Hawaii are also aware of the conditions under which they must recuse themselves from actions impacted by their employment status. All regents are required to file annual financial disclosure forms with the state ethics commission and those disclosures are made available to the public. (IV.C.11)

A review of Board minutes provided evidence that the Board upholds its code of conflict of interest policy as expressed in Article X of the bylaws. The Board is required to comply with Chapter 84 Part II Code of Ethics of the Hawaii Revised Statutes. The Board’s Code of Ethics is combined with its (State) Conflict of Interest policy. (IV.C.11)

Through RP 2.202, the BOR clearly distinguishes between its responsibility for establishing overall strategic direction, university policy and fiduciary management and that of the UH System President. The President’s authority is then delegated where appropriate to the VPCC and the individual college chancellor. Where specific situations may indicate board oversight, a task force is established to explore and address the particular issue, but the BOR does not engage in direct management of the community colleges. (IV.C.12)

Board Policy RP 2.202, Duties of the President, delegates responsibility and authority to the President to implement and administer Board policies and delineates the President’s authority to delegate to VPs and Chancellors. (IV.C.12)

The BOR is informed on a regular basis about the accreditation status of the College. A sub-set of Regents were actively engaged in dialog about board-related standards and participated in refinements of Standard IV.C. All actions of the smaller group were reported back to the entire BOR. (IV.C.13)

The February 23, 2017, Board meeting minutes show an item related to the Permitted Action Group’s participation in the self-study process for the community colleges. The BOR, primarily through its Committee on Academic and Student Affairs, monitors the accredited status of all ten campuses in the UH system. For the six community colleges accredited by ACCJC, as they prepared for the current cycle, the Board authorized the formation of a permitted interaction
group, as described in IV.C.13. This group provided input to the VPCC, who provided periodic reports to the BOR. All six campuses provided summaries of their ISERs and QFEs to the Committee on Academic and Student Affairs via the VPCC on May 18, 2018, which accepted them on behalf of the BOR. The Committee subsequently reported that to the full Board, which formally accepted the community college ISERs at its June 7, 2018 meeting. The permitted interaction group was formally dissolved at the July 19, 2018 BOR meeting. (IV.C.13)

Conclusion:

The College meets Standard IV.C.

IVD. Multi-College Districts or Systems

General Observations

The University of Hawaii System is the sole provider of public higher education in the state of Hawaii. The overall structure of the University of Hawaii System is established in the Board of Regents Policy 3.201: Major Organizational Units of the University of Hawaii. The ten-campus system as a whole includes the University of Hawaii Community Colleges (UHCC), which is comprised of seven community colleges. The UHCC is further established in the Board of Regents Policy 4.207: Community College System. University of Hawaii Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior Division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as a multi-campus system.

The UH system is governed by a 15-member Board of Regents (BOR) and overseen by the UH system President. Overall leadership of the community colleges is provided by the Vice President of Community Colleges (VPCC) who reports directly to the UH system President. The VPCC delegates authority for each college to a community college chancellor. The VPCC ensures that system level leadership and support for the system and college missions are provided and coordinated through his office. The VPCC delegates the operations of each college to the chancellor. The operational structures at the system level are mirrored at each college and functions are delineated. The system has clearly articulated methods for budget preparation in a responsible manner, and adequate allocation and re-allocation of resources to support operations in a sustainable manner.

Findings and Evidence

The VPCC delegates full authority and responsibility to administer policies to each chancellor without interference and holds the chancellor accountable for the operations of the college. System planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness. Communication between colleges and the system is timely and accurate and ensures effective operations of the colleges. The process for evaluating system and college role delineation, governance and decision-making is described as “ongoing and organic.” (IV.D.1)
The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC Functional Map, most recently reviewed by the community colleges, and updated in fall 2017. The Functional Maps shows alignment with both the major accreditation topics as well as the detailed parts of Standards IV.D.1-9.

The system re-organization in 2005 created a new organizational chart that established the VPCC as a member of the senior administration of the UH System, reporting directly to the UH system president. The UHCC office then oversees the management of and provides support in areas such as academic support, planning, personnel, facilities, and fiscal resources. (IV.D.1)

The vice president for community colleges (VPCC, the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfilling their respective missions, and in supporting educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office and through several bodies comprised of campus representatives. (IV.D.2)

The operations of the Office of the Vice President for Community Colleges (OVPCC) are overseen by two associate vice presidents who coordinate centralized support services in the areas of Academic Affairs and Administrative Affairs. The associate vice president for academic affairs provides leadership in operational policy-making pertinent to the development and implementation of community college system-wide academic plans, goals and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment and policy analysis; career and technical education; student affairs; and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to a more refined assessment of the success of various programs and initiatives. (IV.D.2)

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: Council of Community College Chancellors; Community College Council of Faculty Senate Chairs; and Community Council of Native Hawaiian Chairs. (IV.D.2)

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) Sustainability, and b) Distance Education. With reference to Sustainability, an Executive Policy 4.202 and a new Board of Regents Policy 4.208 signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the community college system level, which will require renewed and proactive commitment from the community college system office and the individual campuses. (IV.D.2)

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC-System Functional Map, most recently reviewed by the community colleges, and updated in fall 2017. The functional map shows alignment with
accreditation standards. The VPCC provides system-level support for campus operations through both a centralized system office and through several bodies comprised of campus representatives. System-wide councils exist to facilitate planning and also allocation of resources among the campuses to ensure that the colleges have the flexibility and support to fulfill their mission. Two associate VPs coordinate efforts across the system in academic affairs and administrative services, respectively. Several councils operate at the system level and the campus level organizational structure mirrors the system level support. The Strategic Planning Council (SPC) ensures that CC system planning is aligned with UH system planning. (IV.D.2)

The UH System has Hawaii state law and board policies that provide the authority and the processes for allocating and reallocating resources in support of college/system operational effectiveness and sustainability. Board policy delegates responsibility for financial management and campus operations to the UH System President and College Chancellors. (IV.D.3)

Campuses have also had access to additional funds from the Office of the Vice President for Community Colleges, and more recently from the Office of the University of Hawaii President, providing additional incentive for meeting certain goals linked to performance measures focuses on student achievement. These are in turn associated with system and campus strategic objectives. Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the Office of the Vice President for Community Colleges for other campus or system initiatives, such as those associated with student success. (IV.D.3)

The district/system has established methods for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures. The biennial mechanism for budget preparation is codified in law, policy, and procedure. System-wide the process is coordinated by the AVPAS for community colleges. Colleges have access to state authorized budget, tuition dollars, revenue funds and also other funds through the VPCC. Reallocation of resources is most clearly demonstrated through the pool of vacant positions system-wide that can be used to support emerging needs among the colleges based upon documented need. (IV.D.3)

Board policies (UHCCP 8.201, 8.000, 8.200) have been established for developing budgets, managing funds, and controlling expenditures (general, grants, special, revolving, tuition and fees, revenue generating, self-sustaining programs, cash reserves). Additional funds have been made available to colleges through the OVPCC for those that meet or exceed specific student achievement performance measures identified in the UH System and college strategic objectives. A UHCC policy was established for the colleges to more effectively manage vacant positions throughout the UHCC unit. Vacant positions are placed into a system pool from which colleges can request reallocation of a position based on documented need. (IV.D.3)

The University of Hawaii System has a president, a vice president for community colleges (among several vice presidents responsible for differentiated areas of UH System functions), and chancellors for each of the ten universities or colleges in the system. As noted, the VPCC is the CEO of the system of the seven UHCCs. Each college has a chancellor, the CEO of the
institution. Board of Regents Policy 4.207 established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System. In 2005, the Board of Regents approved the reorganization of the Community Colleges System and created the new executive position of Vice President for Community Colleges. (IV.D.4)

The authority and responsibility of UHCC chancellors for the overall management and governance of their campuses is further affirmed in UH Executive Policy 1.102, Authority to Manage and Control the Operations of the Campus, which states, “Primary authority for financial management has been delegated by the president to the chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads.” University of Hawaii Community Colleges Policy UHCCP 8.000: General Fund and Tuition and Fees Special Fund Allocation, also specifies the chancellor’s responsibility “…to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission.” Responsibility for a broad range of personnel actions has also been delegated to the chancellors in UH Executive Policy 9.112. In line with the need for accountability in the fulfillment of their duties, chancellors (and other executive managerial personnel) are subject to annual performance evaluation, with final assessment by the VPCC. This process is thoroughly codified in UHCCP 9.202: Executive Employees Performance Evaluation. (IV.D.4)

The community colleges in the Hawaii statewide system of public higher education operate within a three-tiered system: the University of Hawaii (UH) System as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community Colleges; and the individual community college campuses located on the four major islands in the state. Satellite Learning Centers, providing additional outreach across the state, are managed by the community colleges and UH-Maui College. A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require the effective planning of operations that are coordinated and integrated across the system. (IV.D.5)

As noted, there are multiple structures in place at the UH- and the CC-system level (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialogue and decision making essential to planning and implementation. In addition, each tier of the system is grounded in a comprehensive strategic plan that provides the conceptual guidance for mid-range planning. These currently include the UH Strategic Directions 2015-2021, the UHCC Strategic Directions 2015-2021 (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan. (IV.D.5)

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration. In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the Crosswalk of UH System and UHCC Performance Funding cited in IV.D.3.
Most recently, on April 20, 2017, the Board of Regents approved the Integrated Academic and Facilities Plan (IAFP) for the University of Hawaii System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is “...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH System is addressed without undue duplication or inter-campus competition.” The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the CC system) and affirms the further integration of planning in noting that “The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews (p. 18).” (IV.D.5)

System planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness. This is documented in the UH Strategic Directions 2015-2021, the UHCC Strategic Directions 2015-2021 (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan. There is a high degree of congruity and integration between the three tiers of the public education system in Hawaii (UH, CC system and individual CC). In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are also linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding. CC system-wide and individual colleges utilize council structures to align college goals with system goals and performance indicators. (IV.D.5)

Conclusion:

The College meets Standard IV.D.

Commendation 7:
The University of Hawaii Community College System is commended for its island-centered mission in identifying new programs, and for its successful system-wide implementation of technology across the system to support program planning and tracking in clarification of students’ academic pathways. (IV.D.5)

The VPCC is a member of the UH president’s senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the board of Regents Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for Board of Regent approval (e.g. strategic plans, Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of Board of Regents committee and board meetings, the VPCC is provided with memos summarizing Board of Regents approved actions. Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through notification from the Policies and Procedures Information System (PPIS). The VPCC also meets regularly with three Councils representing different
aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Meetings of these Councils are documented, and each Council completes an annual self-assessment. (IV.D.6)

Established mechanisms for communication exist between the three tiered system of public higher education in Hawaii. This occurs in a timely and accurate manner to ensure effective operations of the colleges. The VPCC is primarily responsible for advocating CC issues to the BOR and is notified of BOR decisions in a timely manner through direct communications from the UH president. The VPCC uses a system of councils and also semi-annual visits to each community college campus to ensure effective communication. Finally, at the campus level, policies, practices, and structures exist whereby stakeholders and those with particular expertise are able to contribute to governance.

While assessment of system-wide role delineation, governance and decision-making is “organic and ongoing”, a formalized structure for assessment does not exist. Recent improvements have been made to communication across the CC system through orientation provided to campus representatives that serve on system committees and also a comprehensive update of the system website. (IV.D.7)

Recommendation 4:
In order to improve institutional effectiveness, the team recommends that the system develop and implement an assessment process to measure the effectiveness of role delineations, governance and decision-making processes to ensure their integrity. (IV.D.7)
Quality Focus Essay

As part of the College continuing efforts to improve student learning and achievement as well as demonstrate a commitment to excellence, the Self-Evaluation Core Team used the Self-evaluation process to reflect on the College’s successes as well as areas that need improvement. Over the course of two years, the Self-Evaluation Core Team remained open regarding what the Quality Focus Essay topics would be. The College allowed the self-reflective nature of the Institutional-Self Evaluation Report to uncover those larger areas of focus for the College. Through this process, the College identified two action projects.

**Action Project 1:**

Increase student retention and persistence by keeping the students the College already has. (Standard I.B.3)

- In fall 2017, the first topic became clear as the campus embraced a single goal to drive campus initiatives. This goal is known as the Wildly Important Goal (WIG) and provides a unifying vision for the many campus initiatives currently underway to increase student retention and persistence.

**Goals and Outcomes:**

- Increase student retention and persistence by ten percent in 2018-2019.
- Increase the sense of belonging at the College through activities that connect and support students.
- Increase the three-year graduation rate from 16 percent to 22 percent by 2020-2021.

**Action Project 2:**

Improve student learning by making assessment more meaningful for faculty. (Standard II.A.3)

- The second topic developed out of a breakout session at the convocation in spring 2018. These breakout sessions were focused on the areas of improvement that had been identified during the writing of the ISER. One area attracted much attention, and this led to the second QFE topic that focuses on improving student learning by making outcomes assessment more meaningful for faculty and staff.

**Goals and Outcomes:**

- Provide faculty and staff with training assessment practices by way of learning and collaborative engagement opportunities with colleagues.
- Improve quality of outcomes assessment evidence in the College’s database of assessment results.
- Increase faculty and staff satisfaction with the process for reporting assessment results.
Timelines, responsible parties and resources are identified for each action project and goals. Outcomes are extensive, detailed and clear. The team recognizes the time and effort that has gone into systematically identifying areas of needed improvement. The two action projects were supported by a rationale for why they were selected. Following the timelines and monitoring progress toward their measurable outcomes should show improvement in each of the action projects.
Leeward Community College
Policy on Institutional Mission

Policy Number: L4.201
Effective Date: March 27, 2019
Review Date: March 27, 2024

Introduction

The broad educational purposes of Leeward Community College are expressed in the institutional mission statement. The mission statement communicates to students and the general public the commitment of the College to achieving student learning.

The mission statement for Leeward Community College is consistent with the broader mission statements established for the University of Hawaiʻi system and the community colleges as an integral component of the University system.

Specifically, the Board of Regents has established that:

*The primary mission of the University of Hawaiʻi system is to provide environments in which faculty and students can discover, examine critically, preserve and transmit the knowledge, wisdom, and values that will help ensure the survival of the present and future generations with improvement in the quality of life.* (RP 4.201, III.C.1)

*As the only provider of public higher education in Hawaiʻi, the University embraces its unique responsibilities to the indigenous people of Hawaiʻi and to Hawaiʻi's indigenous language and culture. To fulfill this responsibility, the University ensures active support for the participation of Native Hawaiians at the University and supports vigorous programs of study and support for the Hawaiian language, history, and culture.* (RP 4.201, III.C.3)

*The University of Hawaiʻi Community Colleges are open-door, low-tuition institutions. Community colleges offer two-year college transfer and general education programs, two and four-year career and technical education programs; semiprofessional, career and technical, and continuing education programs, and such other educational programs and services appropriate to community colleges.* (RP 4.201, III.C.4.a.4)

Related University Policies

*Board of Regents Policy 4.201 Mission and Purpose of the University*

*University of Hawaiʻi Systemwide Executive Policy E4.201 Integrated Long-Range Planning Framework*

Policy
1. **Components of the Mission Statement**
   The Leeward Community College mission statement shall define the College's mission and incorporate the vision, purposes, and common values of the University system, emphasizing a fundamental commitment to access and quality. The mission statement shall also highlight the University and the College's special advantage and distinction in Hawaiian, Asian and Pacific affairs. In addition, the mission statement shall clearly differentiate Leeward Community College's “mission in terms of instruction, research and service roles, campus type, degree levels, populations served, student selectivity, and special campus distinctions.” *(RP 4.201, III.C.4.a.4.f)*

2. **Periodic Review of the Mission Statement**
   By Board of Regents policy, the mission statement must be reviewed at least every fifteen years. Leeward Community College policy is to review and revise, as needed, the mission statement each six years in conjunction with the creation of the new strategic plan.

   Under unusual circumstances, the mission statement may be reviewed more frequently in response to proposals for significant new programs or activities that are not included within the currently approved mission statement.

3. **Mission Statement Revision Process**
   The periodic review of the mission statement shall include a process that solicits broad input and consideration from among the faculty, staff, students, and community members. The review will be based on inclusive dialogue among all constituencies.

   The Chancellor will initiate the review in consultation with campus governance groups. A representative committee from these groups will be charged with conducting the review.

4. **Mission Statement Approval**
   The University Board of Regents must approve the mission statement. Prior to submittal to the Board of Regents, the following entities must approve the College mission statement:
   - Faculty Senate
   - Campus Council
   - Student Government
   - Na ‘Ewa Council
   - Chancellor

5. **Mission Statement Dissemination**
   The Leeward Community College mission statement shall be widely distributed, including, but not limited to, publication in the:
   - College catalog
• College website
• College strategic plan

Campus Approvals

Faculty Senate approval date: November 14, 2018
Campus Council approval date: May 7, 2018
Chancellor approval date: March 27, 2019

                 Student Showcase: Leeward Students' Oceanography and Kilo ‘Āina Research
                 Got Funding?
| Session #1 | Hoʻoia ʻĀina: Leeward’s Land Acknowledgment Statement  
Presented by Piʻikea Hardy-Kahaleoumi (Council Chair), and NaʻEwa council members Kuʻuipo Losch, Kaleʻa Silva and Erin Thompson  
Land acknowledgments have been common practice among indigenous people for centuries. They pay homage to the relationship between the land upon which the college sits and its people. Join Leeward’s Pūko’a no nā ‘Ewa Council members as they share Leeward’s Hoʻoia ʻĀina, its purpose, and protocol in this interactive session. |

Position Changes

Lynn Fujikawa moved from Compliance and Training Officer to Interim HR Manager.
Tina Lee will serve as the Division Chair for the Business Division effective Fall 2021.
Nicole Ogawa moved from Interim HR Manager to UH System Interim Associate Human Resources Director.

Welcome to Our New Hires

Keala Chock, Vice Chancellor for Academic Affairs, Administration, earned a bachelor’s degree in Hawaiian Studies and a master’s degree in Public Administration from the University of Hawai‘i at Mānoa. In June 2005, he began his 16-year career as a faculty member at Honolulu Community College (Hon CC), where he developed and managed the Music and Entertainment Learning (MELE) program. He served as the Interim Dean of Communication and Services (2012-2013) and the Dean of Transportation and Trades (2013 - 2017). In his most recent position as Hon CC’s Dean for Career and Technical Education, Keala oversaw academic programs and workforce development training initiatives. These areas included the Skilled Trades, Information Technology, Apprenticeship Training, Early Childhood Education, and various community engagement projects.

Lorraine Gershun, Counselor for G2FO and ATE programs, Student Services/Leeward Wai‘anae Moku Education Center, earned a Bachelor of Science in English Literature and a teaching degree at the University of California, Los Angeles (UCLA) and also holds a Master of Science in Curriculum and Instruction. Lorraine has lived and worked in the Wai‘anae community for the past 30 years. She is passionate about access to education and student success.

Tom Hirsbrunner, Title IX Coordinator, Chancellor’s Office, is also serving as the Chair of Leeward’s Behavioral Intervention Team (BIT). He has previously worked in higher education compliance at UH West O‘ahu (Disability Services) and Lansing Community College in Michigan (Title IX Investigations). Tom is also an attorney, licensed in Michigan, and lecturer in Constitutional Law.

Toshiro Luab, UH Security Officer I, Administrative Services, has an Associate in Arts in Liberal Arts from Leeward Community College (Yay, Leeward alumus!). He has been with the state of Hawaii for five years, originally serving at the University of Hawai‘i at Mānoa’s Department of Public Safety.

Danielle Kauwila Tai, Recruitment and Retainment Specialist, PEEC II Grant, graduated with an AA in Liberal Arts from Leeward Community College (Yay, Leeward alumna!) and a BA in Public Administration from the University of Hawaii at West O‘ahu. She also has two subject certificates in Management and Disaster Preparedness Emergency Management. Danielle believes that academics is the key to success. As a Native Hawaiian, she would like to contribute her experience and enthusiasm to support other Native Hawaiians to invest into academics and become contributing leaders and mentors of their communities.
New Lecturers

Lucy Masa  
Social Sciences, HDFS

Colleen Rost-Banik  
Social Sciences, Sociology

Monica Vidal  
Language Arts, English

NOTE: The new hire lecturer list might not be comprehensive as lecturers may still be in the hiring process.

Updates from Leadership

Keala Chock, Vice Chancellor for Academic Affairs

Aloha kākou,

As we look ahead to the school year, I would first like to thank the entire Leeward Community College ‘ohana for welcoming me to the Pu’u‘aloa and Wai’anae Moku campuses. During the past month, I have spent time meeting and listening to Leeward faculty and staff share the unique attributes that make our college a high-quality educational institution. I am inspired by the dedicated, hard-working individuals from our instructional programs, Wai’anae Moku Education Center, Division Chair leadership, OCEWD, Student Services, Academic Support, and Kīpuka Native Hawaiian Center at Pu’u‘aloa, who are committed to the success of our students. As I continue to make my way around campus, I am looking forward to meeting you and learning more about your area.

Over the past 16 years, I have spent my career advocating for equitable student success as a faculty member and Dean at Honolulu Community College. My vision was simple and focused on ensuring that every student enrolled at the College would earn some type of college credential in a timely fashion. This proved to be a little more challenging than I had anticipated and ultimately motivated me to explore questions, which has led me to serve in various administrative capacities. As a first-generation Native Hawaiian college student, I know all too well the uphill battle many of our students face as they make the big decision to enroll in college. I have seen firsthand the significant role the community college plays in positively impacting students. Our open-door educational system, dedicated faculty, and guided pathways have provided unprecedented access, which has resulted in college graduates earning more than individuals who do not go to community college. I have also seen the same system, with the best of intentions, design practices that have negatively impacted students. As
your new Vice Chancellor for Academic Affairs, I would like to encourage you to remain vigilant and to reaffirm our collective commitment to supporting student learning and achievement. I would also like to challenge all of us to re-examine our approach through the careful use of student data, identifying opportunities that will remove barriers to student success, and investing in opportunities that will benefit our community.

In closing, I am excited to begin my journey at Leeward Community College and I look forward to working with you as we continue to build a brighter future for our students to thrive here in Hawai‘i.

Aloha,

Keala Chock

Lori Lei Hayashi, Interim Vice Chancellor of Administrative Services

Welcome to a new academic year. Administrative Services (Auxiliary Services, Business Office, Human Resources, Operations & Maintenance, and Security) has continued to operate throughout these challenging times with uninterrupted mail service, processing purchases, payments and payroll, procuring and distributing PPE, and maintaining and securing our facilities and property. Here are some events that have occurred earlier this year and a few of what’s planned in the near future…

● Our campus partnered with the City & County of Honolulu’s Department of Emergency Management and the Department of Health from December 2020 to May 2021 to administer over 50,000 doses of the COVID-19 vaccines to first responders, federal, state, and county employees, those providing critical services to our island’s infrastructure, UH employees and students, and the public.

● Three hundred twenty-nine (329) work orders were completed by our Operations & Maintenance team from January 1 to July 30, 2021. Requests included disposals of bulky items, minor electrical/plumbing work, floor maintenance, and minor maintenance (removing graffiti, installing interior furnishings, painting, and assisting employees with relocation of their offices). Twenty-five (25) work orders are outstanding due to delays of materials and labor shortages.

● The campus Facilities Use process has been upgraded, and you may now access a “view-only” feature to assist you in selecting rooms/spaces for events. Please contact your Division/Unit Secretary for assistance in requesting a room or space. Browse For Space

● Projects commencing this year are the AM Model Classroom/Art Gallery, the Wahiawa Product Development Center, and the Learning Commons Spall Repair.

● The PS/BS Model Classrooms are scheduled to be completed this year.

● Campus-funded projects in FY 2021 include the installation/relocation of eyewash stations and installation of emergency electrical shut-off switches at the Automotive complex, and the repair of five (5) fume hoods in PS-213 (chemistry lab).
• Projects scheduled to commence in 2022 are the re-roofing of the Learning Commons and the re-roofing and landscaping at Waiʻanae Moku.

• Please be attentive to our “Construction Advisory” messages you receive via email. Please respect the construction barricades and boundaries for your own safety and that of our construction company partners. We appreciate your patience and understanding.

• Health and safety of the campus community is always our highest priority and is a responsibility that falls on each and every one of us. No one person or unit can ensure your personal safety. In case of an active threat or emergency, the UH ALERT system is the primary means of communication by which notices will be sent to faculty, staff, and students. You MUST sign up to receive emergency messages through the UH ALERT system. PLEASE sign up for UH ALERT at: https://www.hawaii.edu/alert/

COVID-19 Resources and Information:

  Campus Guidelines
  UH Guidelines
  UH LumiSight - upload your vaccination information; self-attestation of your health
  Employee On-line Training - mandatory for all UH employees and UH student employees
  CARES Act Higher Education Emergency Relief Fund (HEERF) Reporting - expenditure reports

James Goodman, Dean of Arts and Sciences

Welcome back to the Fall 2021 semester! Here are a few highlights from Arts & Humanities, Language Arts, Math & Sciences, Social Sciences, the Kīpuka, Native Hawaiian Center at Puʻuloa, and the Office of International Programs.

Despite the challenges of having to put so much of our instruction and services online, there have been some notable successes, particularly in terms of degree awards compared to last year. For example, this past spring there was a 29% increase in the AA in Liberal Arts degrees, a 29% increase in the AA in Hawaiian Studies, a 9% increase in the AS in Natural Sciences, and a 49% increase in the AS in Teaching (AST).

In the Teacher Education Program (TEP) Jeffrey Judd, Christina Keaulana, and Brian Ichida led Leeward to be the first community college in the nation to receive a full seven-year accreditation from AAQEP (Association for Advancing Quality in Educator Preparation) for the Alternative Certification for Career and Technical Education (CTE) and the Advanced Professional Certificate in Special Education (SPED). In other TEP news:

• The 3+1 Leeward CC-Chaminade BS in SPED was approved by the HSTB to license teachers in Pre-K-3 Special Education – which currently has 90 students in the program.
• Leeward CC’s SPED programs were approved for a renewed UH-HIDOE Special Education Stipend that provides full tuition for any candidate who commits to teach special in a HIDOE school - awards of $389,307 have so far supported 64 licensed HIDOE SPED teachers.
• With 6 CTE Licensure grads this past spring and 11 more ready for the fall, 12 new candidates are entering the program from Hawai‘i Island, Kaua‘i, Maui, Moloka‘i, and O‘ahu.
In addition to coordinating the AST program, with almost 400 majors, Kaleʻa Silva has enrolled over 60 students in the Culturally Responsive Teaching Certificate (CRT) program. Last spring 20 students completed that certificate, supported by over $50,000 in scholarships.

Christina Keaulana secured a $50,000 grant, "Closing the Student Achievement Gap in Hawai'i: Designing Place-Based Professional Development to Support Culturally Responsive Teaching," to support Christina and Kale'a's development and delivery of six professional development CRT courses. In partnership with the Hawaii State Teachers Association those courses focused on culturally responsive teaching practices for Hawai'i public school teachers--reaching over 200 teachers state-wide and strengthening community partnerships with various DOE complex areas throughout the islands.

As the incoming TEP Coordinator, Michael Cawdery brought in $210,000 from the Governor's Emergency Education Relief (GEER) fund to conduct a workforce needs assessment leading to an innovative design for "teacher-in-training" pathways to reduce turnover and attrition in the HIDOE schools. Intended project partners include Waipahu High School, Kūlia and Ka Lama Education Academy, UH Maui College, and Hawai'i CC.

From Math & Sciences, 7 students participated in this summer’s INBRE and B2B undergraduate research programs under the supervision of Kabi Neupane and Helmut Kae. This year was the first for a cross-campus partnership with UH-West Oahu, which provided students the opportunity to visit both campuses, and present their work to a group of peers and faculty from both campuses. The work culminated with the Leeward CC Undergraduate Research Symposium, where student researchers from both campuses shared the efforts of their summer’s work. For the Pre-Engineering Education Collaborative (PEEC II), 9 students participated this summer, where they completed calculus online and engineering research in person. Bryson Padasdao and Jennifer McFatridge advised students with the research projects, which included developing a digital hand dynamometer as well as a motion capture suit. A poster and video of their research will be presented at a system-wide online symposium in mid-August.

From Arts & Humanities, the Theater program led by Loretta Chen hosted Leeward CC’s Virtual Pau Hana featuring students from both the Pearl City and Early College at James Campbell High School. Students commemorated the end of their semester by musing on the theme, “Let’s Get Real” based off an engaging bystander training provided by Lexer Chou. Students also got to showcase their talents and digital theater creations to St. Andrew’s Priory and to the Department of Public Safety. Through a partnership with Kaiser Permanente’s West O’ahu Medical Office at Kapolei, Leeward CC students and faculty will be able to display their artwork at Kaiser Permanente’s newest state-of-the-art facility. Mike Harada was the first to exhibit his prints when the clinic opened in April 2021. Articles on that can be found at UH News and Pacific Business News.

The Kūpuka, Native Hawaiian Center at Pu‘u‘ola, which supports all of our Leeward CC students, is the recipient of a grant from Kamehameha Schools to support our Kahua Ho’omau Ola (13th Year) Initiative. In addition, Aulii Silva secured a 5-year $1.3 million US DOE Native Hawaiian Career and Technical Education Program grant which will support Native Hawaiian students in pathways to in-demand and living-wage careers such as Cybersecurity, Digital Media, Information & Computer Sciences, Natural Sciences, Sustainable Agriculture, Pre-Engineering, and Transfer Business. As part of June’s Hawai‘i Papa O Ke Ao Cultural Webinar series He Ukana Aloha Kā Kīlauea, which features music, dance, storytelling and a cooking demonstration
through the Office of the President of the University of Hawai‘i, Leeward CC’s current and alumni faculty, staff, and students were showcased in Awawaleiākea (Pū‘uloa).

The Office of International Programs resumed its short-term program in June 2021 by hosting a group of 9 students and 2 chaperones from Wabash High School in Wabash, Indiana. This group of Japanese language students had planned on visiting their partner school in Yokohama, Japan in 2020 but the trip was suspended due to the pandemic, so the group decided to visit Hawaii because of its strong connection to Japan. These students participated in several educational activities such as visiting Hawaii's Plantation Village, the Byodo-in Temple, and volunteering with a local non-profit organization.

Thank you to all of the Arts & Sciences division chairs Jim West, Kathryn Fujioka-Imai, William Albritton, Eiko Kosasa and program coordinators Eric Matsuoka, Jenny Watada, Brandi Reyes, Ann Inoshita, I-Chia Shih, Mike Bauer, Jeff Judd, Lu‘ukia Archer, Momi Kamahele, Jeremiah Boydstun, and all the faculty and staff for their great work and commitment to student success!

Ron Umehira, Dean of Career, Technical, and Education (CTE)

The following are highlights from the Business Division, Professional Arts and Technology Division, the Office of Continuing Education and Workforce Development (OCEWD), Wai‘anae Moku, and the Wahiawa Value-Added Product Development Center.

Business Division

Congratulations to Associate Professor in Accounting - Tina Lee in her new position as Business Division Chair effective fall 2021. Also, congratulations to former Business Division Chair – Warren Kawano who started a new position on August 2 as the Career Pathways Strategy Director at Hawai‘i P-20.

The Business Division and OCEWD created a Memorandum of Agreement where students that successfully complete a 90 hours non-credit Office Administration & Technology course can apply for transfer credits for two Business Technology courses.

Professional Arts and Technology Division

The faculty (Don Maruyama, Matt Egami, Chris Garnier, Abigail Langlas, Lee Alan Dung, Jaylene Duarte), staff (Fabi Castellano, Jason Fernandez), and students of the Culinary Arts program successfully executed a “May Day Lu‘au To Go” event where over 1,600 plates of delicious Hawaiian foods were purchased by the many supporters of the program. This event was in lieu of the program’s annual fundraising event - L‘ulu Culinary Arts Gala.

Television Production (TVPR) program coordinator, Bob Hochstein’s dream finally came true as the TVPR program has a Mobile Video Training Lab which will be used by the students to shoot, edit, and produce events and activities at off-campus locations. The mobile van was purchased through the generous donation from Eye Productions (Hawai‘i Five-O) and the equipment was purchased through Perkins funds.

Office of Continuing Education and Workforce Development (OCEWD)

OCEWD has been the college’s rapid response unit for over 25 years serving unemployed, underemployed, and dislocated workers in our community. In fall 2020, the O‘ahu Back to Work (OBTW1) Initiative was launched to
provide job training for eligible residents whose employment was disrupted by COVID-19 economic impacts. OCEWD led the way among all other community colleges in the number of referrals and the number of residents (450) participating in training opportunities such as Pharmacy Technician, Medical Receptionist, Forklift Certification, Office Administration & Technology, MS Excel and Word 2019, Certified Nurse Aide, and Commercial Driver’s License program.

This fall 2021, another round of OBTW2 will be launched on August 16 and will run through the end of December. Congratulations to the OCEWD coordinators and staff (Patrick Leddy, Will Castillo, Bill Labby, Michael Scullly, Grace Yoshimura, Elyse Matsumoto, Lisa Daelson, Dayna Lapina, Jarissa Lum, Amy Amper, and all of the instructors) that provided these valuable and essential training opportunities.

Waiʻanae Moku Campus in Māʻili
Welcome back to Jennifer Wharton, Assistant Professor in English who was on personal leave as she was greatly missed by the students, faculty, and staff. Welcome also to new counselor Lorraine Gershun as she provides support to the students in the “Going to Finish On-Time” (G2FO) and “Access to Education” (ATE) programs.

Wahiawa Product Development Center (WPDC) Update
A lease agreement was approved in May 2021 between the Agribusiness Development Corporation and the University of Hawai‘i for the long-term use of the 69,000 square-foot parcel of land located in Wahiawa. Renovations of the WPDC began on July 1 with completion anticipated by Spring 2023. The WPDC will provide research, testing, production, packaging, and educational services in the development of value-added products for the local, national, and international markets.

A Value-Added Product Development Workshop Series will be offered in fall 2021 to summer 2022 to the community on various topics such as Introduction to Entrepreneurship, Starting a Business, Creating a Business Plan, Orientation to Hawai‘i Agriculture Industry, Sanitation & Safety, Food Safety & Post-Harvest Handling, Turning Off-Grade Products into Value-Added Products, How to Launch and Market Value-Added Products, and “Getting Your Value-Added Product to Market”.

Leanne Riseley, Interim Dean of Academic Services

Welcome back to a new academic year! I’m excited to see you in-person! We are still wearing masks, but it is really good to see and talk to some of you, live, not through a computer screen. Academic Services, made up of the following units: Disability Services, Educational Media Center, Information Technology Group, Innovation Center for Teaching and Learning, Learning Resource Center, Library, Theatre, Tutoring and Writing Center has and will continue to provide services through the pandemic.

The biggest news and cause for celebration is our campus has hired the Osaki Creative Group to work with us to redesign our campus website and Intranet! A huge thank you to all involved in making this possible! A special shout out to Tad Saiki, Kay Ono, Lori Lei Hayashi, Carlos Peñaloza, Cori Wakamura, and Stella Yamamoto who worked diligently to make this happen. The work is just starting and is projected to continue through next year. This is a big project and individual areas will be contacted throughout the process for interviews and input.
Throughout the last year, Academic Services has strategically planned and is using CARES/CRRSAA funding to purchase about $2M worth of technology. While much of the technology is unseen, this investment will help us to future-proof our campus in the years ahead. The purchases include upgraded classroom technology allowing for hybrid teaching, improving the network (including wireless), and providing virtual desktop infrastructure (more info on VDI will be shared later).

Disability Services
Our Disability Services (formally KI) office continues to provide services to students with documented disabilities at both Pu’uloa and Wai’anae locations. We are continuing to use Clockwork to securely provide student accommodations. If you receive an email from Clockwork, please be sure to acknowledge it. Disability Services information may be found at http://www.leeward.hawaii.edu/ki

Educational Media Center
The EMC is in the process of purchasing and installing equipment for newly upgraded, modular-designed classrooms called Technology Enhanced Classrooms (TECs). TECs will have additional equipment such as a video recorder on a tripod, document camera, and graphics tablet to support socially-distanced in-person and hybrid teaching. View the technology classrooms list. EMC information may be found at http://www2.leeward.hawaii.edu/emc/. Be on the lookout for emails on professional development events being offered to support teaching and learning using technology.

Information Technology Group
ITG will be implementing a new Technology Replacement Plan. Please contact your Division Chair/Unit Head or Secretary for details. The goal of the plan is to provide technology to meet employee and student needs with planned replacement cycles. Information will be widely communicated throughout the year.

ITG is asking for your cooperation. If you took computers from your office home during telework, it is critical to bring it back to the Help Desk before returning the computer to campus. DO NOT PLUG IT BACK INTO THE NETWORK. We need to keep the campus’ network safe from viruses and other nasty stuff. Remember these three numbers X271 (Help Desk) for any IT issues. ITG information may be found at http://www2.leeward.hawaii.edu/itg/

LC-102 was taken off-line as a classroom lab this summer. It will remain that way for the foreseeable future so that the Help Desk staff will have the workspace needed to address the increased computer support demand. BE-227 will replace LC-102 as a Campus Computer Lab (CCL). It was previously used by Language Arts. It may be scheduled through the CCL.

Innovation Center for Teaching and Learning
ICTL has coordinated over 50 professional development workshops during the pandemic. A link to the flyer has sessions by topic if you would like to view them on your own.

ICTL has coordinated CARES/CRRSAA professional development awards totaling nearly $15,000 so far. For more information on the ICTL offerings, please visit http://www.leeward.hawaii.edu/innovation
Learning Commons (Library, Learning Resource Center and Writing Center)
The Learning Commons is open M - F from 8 am - 4 pm. Computer and study table reservations can be made online or in-person. Laptops, iPads, WiFi hotspots, and accessories are available for loan to students. Loan periods vary from 4-hours to a full semester.

The Library website, a portal to online book, journal, and video collections, is available 24x7. Our new Overdrive Magazine collection includes over 3,000 titles. Call x210 or live chat with librarians and circulation staff during hours of operation. Schedule a consultation with a librarian to discuss library support and resources for your classes. View a short orientation video of our services.

We are happy to announce that Tasha Williams will serve as our Interim Tutoring Services Coordinator for the Fall semester. Tasha will oversee both the Learning Resource Center and Writing Center tutoring services. This summer, Tasha implemented Penji, an app-based scheduler for online and in-person writing and subject tutoring support. Go to the LRC and Writing Center websites, or call x409, for more information about tutoring services.

Theatre
Our Theatre remains closed for events and productions. However, classrooms in the Theatre are being used for instruction. Theatre information may be found at http://lcctheatre.hawaii.edu/

Kami Kato, Interim Dean of Student Services

Welcome to Fall 2021! Here are some updates from your Student Services colleagues—Admissions & Records, Counseling, Early College, Financial Aid, Health Center, HINET, Job Prep Services, Recruitment, Student Life, Veterans Resource Center…

CHECK OUT OUR NEW WEBPAGES!
We have rolled out/are working to roll out several new webpages. Check them out!

- Our Enroll (www.leeward.hawaii.edu/enroll) webpage helps to guide students through their enrollment process and informs them of their next steps.
- Our Costs (www.leeward.hawaii.edu/costs) webpage helps students understand the resources we have available at the College to help defray their educational costs. In addition to financial aid and scholarships, the page mentions resources like Hānai iā Leeward, OER, HINET, free Microsoft Software, Discounted Bus Passes, etc.
- Our Financial Aid pages (www.leeward.hawaii.edu/finaid) have been refreshed and revised so that they are more navigable by students.
- Our Welcome Center page (www.leeward.hawaii.edu/welcomecenter) outlines the personalized services that can be received by phone or in-person.

Soon to come: our Explore webpage, introducing prospective students to Leeward CC as an excellent educational choice. Stay tuned!
THE WELCOME CENTER
The Welcome Center opened on January 4, 2021 and is now the main hub for students seeking assistance from Student Services. Student Associates have received 121 visitors and countless phone calls even during the COVID-19 shutdown. Our Student Associates are also the primary engine behind our new live chat service, available during business hours.

OUR CHATBOT, ‘ULU, HAS CHATTED WITH LOTS OF VISITORS! 🎉
In February 2021, Student Services launched a new ChatBot service. It is available as a pop up on Leeward CC’s Student Service’s pages 'Ulu is available 24/7, and links folks to offices if it can’t answer the question posed. In June, the live chat mentioned above was added for anyone who wants to speak with a “live” person. Since February, 'Ulu has logged 7,400 visitors and, since June, our Associates have fielded 34 live chat sessions.

OUR RECRUITMENT OFFICE NEEDS YOUR HELP
Our Outreach and Recruitment Office needs your help! Here are some ways you can assist us:

- Participate in filming a 360 Virtual Tour! O and R is joining forces with the EMC to showcase our most requested programs.
- Participate in an informational session hosted by the Outreach and Recruitment Office. Talk with prospective students about your program, job prospects, and alumni experiences.
- Help us connect with community partners Help us to market and showcase our special programs

HĀNAI IĀ LEEWARD
Leeward CC’s Food Pantry has continued to be an important source of student support during the pandemic. We hold bimonthly food distributions at the Pu‘uloa campus and weekly distributions at the Wai‘anae Moku campus. We have served over 135 students. One student said, "As a mother of three young children, the lockdowns of 2020 meant that there was no school or daycare for my children…. With my children out of school I could no longer work and this stressor put a great strain on my family financially. I am humbled and grateful for Leeward Community College and the Hanai ia Leeward for providing for my family when I wasn’t able to." Students interested in this service can visit https://hanaiia.wixsite.com/leewardcc.

LOVE PONO
Love Pono students created an educational series, "Talk Tuesdays," focused on a monthly theme including Harmful messages from Disney, How to End Relationships in a Healthy Way, and Love is Learned. Follow their IG for future posts: https://www.instagram.com/lovepono/.

STUDENT LIFE’S STOP THE HATE CAMPAIGN
Student Lifers from various programs shared a powerful message on active bystanding. Their video was highlighted on https://www.weareoceania.org/ and Act to Change social media outlets. View their video, “Don’t Wait, Stop the Hate” here: http://go.hawaii.edu/8PP.

COUNSELING…ROCKING AND ROLLING ONLINE
Even though our Counseling services have gone mostly remote, our Counselors are still actively supporting students’ entry, continuation and completion. They have supported the entry and registration of 793 new Fall 2021 students, held individual appointments with 5,755 continuing students in Spring 2021 alone, and reviewed and audited 1,478 graduation records. Over the next year, Counseling will be looking to help increase student retention by intentionally intervening with students placed on Academic Warning.
PARTICIPATION VERIFICATION (PV)
In Spring 2021, Leeward CC rolled out its Participation Verification process. Via PV, instructors were asked to identify students who were not attending/not participating in their classes. “No Shows” were then administratively disenrolled from their classes and received a 100% tuition refund. PV is part of a system-wide initiative that:

- Helps to release students who registered but did not intend to come from a financial obligation and failing grade.
- Improves our course success rates by eliminating F grades assigned to students who never came.
- Puts us in compliance with federal financial aid guidelines.

In Summer 2021, all of Leeward CC’s classes were subject to PV. This will continue in Fall 2021. For more information, please feel free to visit the Participation Verification website (www.leeward.hawaii.edu/participation), or ask your Division Chair. The dates and deadlines for reporting and student disenrollment can be found at http://go.hawaii.edu/P4K.

Finally...

A special mahalo needs to be said to a group of Leeward volunteers who helped our Marketing and Communications Office yesterday. To prepare for some new directory signs, this group cleaned the walls where the old signs were and mounted new backing boards and temporary directories in almost 20 locations around campus. It was a very hot day, but they worked hard and efficiently and completed their tasks by lunchtime! Also, a special shout out to Tad Saiki who organized the event and Joy Soma and the Operations and Maintenance staff who provided cleaning supplies, protective gear, and ice cold water for our volunteers.

Leeward’s Super Volunteer Heroes are Annemarie Paikai ~ Audrey Villanueva ~ Bill (Boleslaw) Wright ~ Bruce Lindquist ~ Camden Barruga ~ Cameron Rivera ~ Cisley Ancheta ~ Darci Francis ~ Eileen Sakamoto ~ Feebe Cabulera ~ Heather McCafferty ~ I-Chia Shih ~ Igor Nikitin ~ Jennifer Sunada ~ Joy Soma ~ Jue Wang ~ Junie Hayashi ~ Karla Noa ~ Paras "Tami" Williams ~ Tasha Williams ~ Wayde Oshiro ~ and William Albritton! Mahalo!

Have a great semester!
Meet the Team

Three working groups of diverse faculty and staff selected for their skill sets, expertise, and interest in the project are organized in the following to help develop the strategic plan.

Mission & Vision Review Committee

- Review Leeward’s existing Mission and Vision and that of other institutions.
- Provide prompts for College input.
- Draft revisions, allow for feedback.

MORE

Strategic Planning Design Team

- Review plans from various other institutions.
- Analyze information collected from the campus and research.
- Draft the Strategic Plan and incorporate feedback.

MORE

Facilitating Team

Gather broad campus input for the Mission & Vision Review Committee and Strategic Planning Design Team via focus group sessions, campus events, and asynchronous platform.

MORE
Project Coordinator

Summer Barrett has served as the Community Outreach & Transition Specialist for the Wai‘anae Moku Education Center for the past 13 years. Born and raised on the Wai‘anae Coast, her passions include working with Native Hawaiian communities, empowering student leaders, and helping first-generation students transition to college. Always wanting to grow professionally and work collaboratively with diverse colleagues, Summer has participated in the Wo Learning Champions program, Leadership in Excellence program, and Faculty Senate. Since 2019, she began to write Title III grants for the College to support cohort retention programs, capital improvement projects, and the expansion of our mental health services. The year 2022 brings an exciting new endeavor for her in the form of learning about Strategic Planning. In her spare time, Summer loves to spend time with her three children, husband, rabbit, and four chickens at their home in Wahiawa.

Mission & Vision review committee
Meet the Team

- **Jayne Bopp**, Office of Planning, Policy & Assessment, Interim Coordinator
- **Michelle Igarashi**, Student Services, Program Officer
- **Momi Kamahaele**, Kīpuka, Native Hawaiian Center at Pu’uloa Coordinator
- **Edward Meyer**, ICS, Instructor
- **Wayde Oshiro**, Learning Commons and Library, Interim Coordinator
- **Leilani Puchalski**, Student Services, Native Hawaiian Success Counselor
- **Erika Marie Ramirez**, Student Government, Vice President
- **Erin Thompson**, Innovation Center for Teaching & Learning, Coordinator

strategic planning design team

- **Kepa Badis**, Hawaiian Language, Assistant Professor
- **Jessica Choi**, Music, Assistant Professor
- **Adam Halemano Jr.**, Office of Planning, Policy, & Assessment, Institutional Assessment Specialist
- **Lori Lei Hayashi**, Human Resources Office, Human Resources Manager
Facilitators

Cara Chang

Facilitator

Cara was born in Honolulu and raised in ‘Aiea, O‘ahu. She holds a Bachelor of Arts degree in English and Sociology from the University of San Diego, a Master of Arts degree in English with an emphasis in Cultural Studies in Asia and the Pacific from the University of Hawai‘i at Mānoa. She is currently working on her Doctorate of Philosophy in Education at the University of Hawai‘i at Mānoa. After lecturing at multiple campuses on the island, she is proud to finally call Leeward Community College her home and has been teaching English courses (ENG 24, ENG 22, ENG 100, ENG 200, ENG 209) at Leeward Community College since 2013. In her spare time, Cara loves traveling (she’s been to 37 countries!), running (she’s run 4 marathons!), swimming, gardening, reading, trying new recipes, and playing with her two children. She is excited to be working on this campus-wide project with the team!
Loretta Chen, PhD

Facilitator

Hailed as “a force of nature”, “Asia’s Anna Wintour” and “100 Most Inspiring Women”, Loretta is an award-winning creative director, The Straits Times bestselling author, Nominated Member of Parliament, and educator. She is also co-founder of Smobler Studios, a leading metaverse builder. Loretta is known for her innovative theatrical productions and even hosted the World Cities Summit. Her film, Secrets to Happiness won numerous awards in the international film circuit. Before exiting to pursue her dream in Hawaii, her media agency, The Activation Group counts Samsung, Louis Vuitton, Nike, etc as key clients. She chose to return to her first love, higher education, and teaches leadership, theater & correctional education at Leeward Community College. She sits on the board of the Hawaii Technology Academy and was inducted into Patsy Mink Center for Business Leadership. Loretta’s personal tagline is People, Purpose, Possibilities. She is on a mission to use her 24 years of hard-won, diverse experience to educate and accelerate the next generation of leaders and changemakers. She is a doting mom to fifteen fur babies.

Kelly Kennedy

Facilitator

Kelly McClanahan Kennedy signed up for this project to give back to Leeward CC, where she has loved teaching, learning, and supporting students for fifteen years. Kelly was born in Chapel Hill, North Carolina. She comes from a family of educators who raised her with a passion for reading, writing, language learning, and community service. In 2003, Kelly moved to Honolulu to pursue a degree in Second Language Studies at the University of Hawai‘i at Mānoa. After graduating in 2005, she taught at the University of Hawai‘i English Language Program and McKinley Community School. Since 2007, Kelly has been teaching English as a Second Language at Leeward Community College, where she has had the privilege of working with diverse students from Hawai‘i and around the world.
Tracie Kuʻuipo Losch

Facilitator

Tracie Kuʻuipo Losch is a professor of Hawaiian Studies in the Arts & Humanities Division. As an educator, Kuʻuipo is focused on finding practical, place-based solutions paying particular attention to the well-being of the Native Hawaiian people through education. She is a firm proponent of servant-leadership and works well with others. She thrives in collaborative environments, enjoys a sense of community, and seeks to empower her team members to support collective goals.

I am grateful to Leeward for having nurtured me professionally for the last 16 years. I have had the privilege of working with fabulous students and being mentored by talented educators. I want to give back to the college beyond the classroom, and see this strategic planning project as an opportunity to serve our college in a new capacity.
Welcome and Introductions

Attending: Tommylynn Benavente, James Fujita, Adam Halemano, Jeff Judd, Evelyn Kamai, Cecilia Lucas, Stanley May, Kristina Nip, Guy Nishimoto, Grant Okamura, Della Teraoka, Donna Matsumoto (guest)

Understand the charge and timeline

Della reviewed the charge, timeline, and provided a brief history of the planning process at Leeward.

Background

Charge: The work of the committee will be to 1) make recommendations for improvements on the College’s integrated planning and budgeting process, and 2) review and update the Leeward Policy on Annual Program Review (L5.202).

Timeline: Committee formed by September 1. Work will commence shortly thereafter and have recommendation to Campus Council by April 2018 meeting.

History

Discussion of the ARPD process which has been around more than 15 years. The ARPD was created as a separate system process that has been incorporated into the Leeward planning and budgeting process since 2013. A short review of how the process changed from 2006 with the comprehensive Annual Program Review (APR) to the current process which uses the ARPD as the core planning document with a less frequent Comprehensive Review and Evaluation (CRE) every 3-4 years.

Process starts with Mission, Strategic Plan, and College Goals. Ongoing assessment at the course, program, and unit levels is conducted and recorded in Tk20. Annual Report of Program Data (ARPD) is completed each year and the same template is used for those programs and units not required by the UHCC system. The CRE is completed at least every 4 years. The Resource Request template is completed annually and follows the prioritization process. Decisions are made at the beginning of the next academic year, after campus funding is finalized at the system level.

The committee came up with the following goals:

Goals

- Clarify role of Faculty Senate in the budgeting process
- Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
● Clarifying Program Review process and what is included, and how to complete it
● Institutionalizing communication protocol
● Training and support for completion of ARPD
● Engaging faculty and staff in the process
● Increasing transparency about who reads it and what happens

We will prioritize the goals at the next meeting as we may need more than one year to complete all of the goals.

There was discussion about including student voices in the planning process. We do not currently have a place for students to provide input. What about whether the schedule is meeting the “demands” of the students? Can we keep a record of how many students were not able to get a course at the time they wanted? Some of this information will be available with the new STAR GPS system.

We also discussed having programs include more surveys and data points beyond the system required data measures.

There was some discussion about the ARPD process and whether it is “misunderstood”. Some training may be required. We will also find out if we can change the benchmark language, such as “Unhealthy”.

We will get more input from the campus on their participation in the process.

Possible survey question:
Have you been allowed input into the process?
Describe your participation in the planning process in the past.
   1. I was asked for input.
   2. I participated in writing the report.
   3. I have no idea how the planning process works.

We will ask the deans to read reports and give feedback to programs/units. It was also noted that funding information in an email from Mark is good, but it needs to be placed on the Budget website.

Other comments:
● Program outcomes should drive the process – not the data from the system. PLOs are at the end – can we move this section to the beginning so it is referenced throughout the report.
● Issue of relationship between ARPD and resource requests template.

Next meeting: Monday, November 6 from 1:00-2:30 pm in BE 229A.

Ad Hoc Planning Process Review Committee
Meeting Notes
November 6, 2017
12 – 1:30 pm in BE 229A

Attending: Tommylynn Benavente, James Fujita, Adam Halemano, Jeff Judd, Evelyn Kamai, Mark Lane, Cecilia Lucas, Cindy Martin, Don Maruyama, Stanley May, Kristina Nip, Guy Nishimoto, Grant Okamura, Aulii Silva, Della Teraoka, Gregg Yoshimura

Review of Previous Meeting Minutes
Review Goals - Placed in priority order

- Clarify roles of stakeholders
  - Clarify role of Faculty Senate in the budgeting process
  - Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
  - Providing a voice for students in the planning process
  - Clarify role of all groups on campus
- Develop a planning and budgeting website
- Clarifying the process, improving efficiency, and making improvements
  - Clarifying Program Review process and what is included, and how to complete it
  - Increasing transparency about who reads it and what happens
  - Enhancing the ARPD format and data to better support the process
  - Closing the loop - improving programs and reporting on that
- Review of policy
- Communication of process
  - Institutionalizing communication protocol
  - Engaging faculty and staff in the process
  - Increasing transparency in budget and planning documents (trend analysis)
- Professional development and training
  - Training and support for completion of ARPD

Discussion:

Need to develop a more robust website with information on program reviews, previous budgets, and other reports. What is the best way to keep the site up to date?

Opportunity to create stronger communication with use of website and online tools so stakeholders can access information and training tools when they want.

Group agreed to wait on a survey until some changes have been implemented.

Issue of role of Faculty Senate as per BOR policy.

Aulii and James spoke with John Morton on this issue.

The Chancellor has delegated authority over non-academic policies and college budgeting. He has created the Campus Council as a recommending authority to him.

Executive boards of Campus Council and Faculty Senate have worked collaboratively to consider the issue of roles in the budgeting process.

There was some discussion of asking the BOR to provide interpretation for its policy, however the BOR is currently reviewing the policy. Some also suggested it would not be within the appropriate lines of authority to directly ask them for an interpretation.

General issue to be resolved is to clarify and document the roles of governance groups in the planning and budgeting process. The issue of the Faculty Senate role in the process has been of particular concern to the Budget and Planning Standing Committee of the Faculty Senate.

Next Steps
Each of the members of the committee are asked to bring forth their questions and concerns regarding clarification of roles to the next committee meeting. We will tackle these issues at that meeting. Della will upload appropriate policies regarding budgeting and planning.

**Next meeting:**

Monday, November 27, 2017 at 1:00 pm in BE 229A

**Ad Hoc Planning Process Review Committee**

**Meeting Notes**

**November 27, 2017**

**1 – 2:30 pm in BE 229A**

**Attending:**

Tommylynn Benavente, James Fujita, Adam Halemano, Jeff Judd, Evelyn Kamai, Mark Lane, Cecilia Lucas, Cindy Martin, Don Maruyama, Stanley May, Kristina Nip, Guy Nishimoto, Grant Okamura, Aulii Silva, Della Teraoka, Gregg Yoshimura

**Review of roles in current process**

Discussion of current process and roles. Della presented a visual of the planning process and explained how the current process works.

- Campus Council is the one group that includes every group as a voting member as it was created out of the concept of shared governance. Campus Council formed after the 1994 accreditation visit with recommendation to create a representative body that reviews the budget. It was formed from the Provost Advisory Council.

- Question about administrative presence at Campus Council meetings. Response is that Campus Council is a representative body that reviews budget and requires administration presence. Council membership is evaluated periodically. Administration has no vote. Campus Council has improved over time and is a good system for shared governance. Charge of this committee is not to reorganize Campus council but focus on what role people/groups have in the planning process.
● Question about what happens if when reviewing someone wants to make a change to the priorities; has this happened before? Response is timeline for process is that the ARPD’s completed during the fall and reviewed by OPPA to ensure completeness. Resource lists prioritized by different areas and submitted to Administration for review and prioritization. Governance groups review priorities in April and make final recommendations to Chancellor in May. Chancellor can adjust list and has funded items out of the prioritization. This may be due to numerous factors including the amount of money available.

● The Student Government would like to be involved in the process if possible. Student Government will be included when the shared priorities are sent to the campus; student feedback will be solicited at this point. Student Government may also be included during the program review process. Students would voice their opinions through this committee and through Campus Council.

● Discussion about improvement to streamline the process and remove Division from the Resource Requests process. Question as to how the Liberal Arts AA folds into a Division under the Resource Requests. Problem is the system and accreditation want “program” review and we want “instructional” review. Trying to serve two masters through this process.

● Suggestion to divorce the budget from the program review process. Possible to run two parallel systems and somehow find a way to link the review process to the budget. Treat both systems in a more real world way.

● Discussion on the role of Faculty Senate in power sharing with Campus Council. Clarification of role of the Faculty Senate is “for academic affairs.” Request of “accountability” from administration.

● Discussed creating “Campus Request” level during the Resource Requests process. This request used to meet institutional goals with specific priorities and would need to include approval(s) for resources/management of request. Vote for “Campus Request” form to be inserted into process: Yes: 6

Next meeting: tba

What about removing the Division level? How to prioritize?

Can we divorce the program review from the budgeting process? But still show the connection?

Ad Hoc Planning Process Review Committee
Notes
February 7, 2018
1 – 2:00 pm in BE 229A

Attendees: Guy Nishimoto, Adam Halemano, Jeff Judd, Terry Richter, Gregg Yoshimura, Don Maruyama, Della Teraoka, James Fujita

Review of Previous Meeting Minutes

Review of Institutional Resource Request Form

Group reviewed the form and made edits for final distribution.

Review Goals - Placed in priority order
- Clarify roles of stakeholders - Adam will create a visual document based on previous meetings' discussion of planning process and roles.
  - Clarify role of Faculty Senate in the budgeting process
  - Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
  - Providing a voice for students in the planning process
  - Clarify role of all groups on campus
- Develop a planning and budgeting website
  - Let's work on this at the next meeting.

**Set regular meeting day/time**

Doodle for Mondays or Wednesday at 1 pm or 2 pm

How often? Monthly

**Next Steps**
- Adam will create a visual document based on previous meetings' discussion of planning process and roles.
- Della to talk to Kathleen about how to proceed on creating a website.
- Della to send out Doodles for upcoming meetings.

**Next meeting:** tba

---

**Ad Hoc Planning Process Review Committee**

**Meeting Notes**

**March 19, 2018**

12:00 pm – 1:00 pm in BE 229A

Attendees: Della Teraoka, Mark Lane, Cecilia Lucas, Grant Okamura, Stanley May, Don Maruyama, Jeff Judd, Aulii Silva, James Fujita

**Set regular meeting day/time** - Mondays at 1:00 pm

**Institutional Resource Requests - Received 2018**

Review of 2 requests received
Need to include sending this form to Student Government next year

**Visual of Prioritization Process**

Delete Governing Groups
Consider how visual represents meetings
Add box for decision at Chancellor level
Add ARPD at beginning
Change “Resource Requests” to “Prioritization Meeting”
Change middle box to Resource Request List
Can we create people of the same color?

**Annual Program Review Policy**

Feedback by April 10 on this policy

**Discuss System plans**
- New: [https://uhcc.hawaii.edu/varpd/](https://uhcc.hawaii.edu/varpd/)
Develop a planning and budgeting website
- Discussion of what information is needed
- Need to have a site that provides an overview of the process, visual, tutorials, resources, and previous reports.
- Place most information in a public location with as much information as possible.
- Place to store resources that were funded.
- Include “models” for what the ARPD should look like.
- Research sites that we like.
- Can we create a way to update more easily? Possibly 2 - 3 people.

Next Steps
Review the APR policy draft
Bring a sample website for program review and planning.
Next meeting: tba

Ad Hoc Planning Process Review Committee
Agenda/Notes
April 16, 2018
12 – 1:00 pm in BE 229A

Attendees: Don Maruyama, Cecilia Lucas, Stanley May, Adam Halemano, Guy Nishimoto, James Fujita, Tommylynn Benavente, Della Teraoka, Grant Okamura, Mark Lane

Review of work so far
- Review and clarification of roles in planning process
- New visual document of prioritization process
- Added institutional level resource request step and form
- Enhanced communication of planning process to the campus
- Review of Annual Program Review Policy completed and forwarded to Faculty Senate and Campus Council

Visual of Prioritization Process

Develop a planning and budgeting website
- Discussion of what information is needed
  - Functional classification of expenses for the budget (program expenses)
  - Comparison of functional classification of expenses between campuses over time
  - System dashboard - Not in place yet. Working on it, but issues with eThority extraction tools. May need to hire a consulting group on how to do this.
  - Add links to the reports that exists on UHCC system site, UH system site, or IR site.
  - Present the information with graphics and in easy to read format.
  - Add trend reports to show data over time.
- Review of other college’s websites
- Review of main categories
Next Steps

- Need to further institutionalize student voice in planning process
- Develop a planning and budgeting website
- Review and revise the ARPD template
- Review and revise the process including closing the loop
- Enhance engagement of faculty and staff in the planning process
- Training and support for faculty and staff with completion of ARPD
- Institutionalize communication protocol
- Continue to develop planning and budget website
- Follow up on UH financial dashboard project
- Create visual personnel analysis of faculty/staff categories and trend over time
- Clarify Faculty Senate role in academic planning and budgeting issues

Set regular meeting day/time - Mondays at 1:00 pm

Proposed meeting dates: September 10, October 8, November 19, December 10

Ad Hoc Planning Process Review Committee
Agenda/Notes
September 10, 2018
1 – 2:00 pm in BE 229A

Attendees: Cecilia Lucas, Jeff Judd, Kristina Nip, Adam Halemano, Guy Nishimoto, Michael Cawdery, Della Teraoka

The committee reviewed the meeting notes from the April 2018 meeting. Della brought forward the items from the April notes that still need to be worked on.

Visual of Prioritization Process

Adam revised the visualization based on feedback from the April meeting. Della will put the revised visual in the team drive.

Develop a planning and budgeting website

- OPPA is working on the website.
  - The committee reviewed the proposed OPPA website and made some suggestions including having everything come from a central point.
  - It was recommended that some of the specific links on the Faculty/Staff page (footer of Leeward site) be removed. Jeff will communicate to faculty and staff that all assessment resources can be found from the OPPA/Assessment webpage.
  - Need to add links to Faculty Senate assessment site and training tutorials.
  - Della will share the slideshow so the committee can provide additional feedback.

This list is from the April meeting notes. We discussed what information is still needed.

- Functional classification of expenses for the budget (program expenses)
- Comparison of functional classification of expenses between campuses over time
- System dashboard - Mark or Della will need to follow up on this item.
- Leeward dashboard - OPPA is working on some basic data points on their website. See the OPPA website slides for sample.
• Add links to the reports that exists on UHCC system site, UH system site, or IR site. Done! A new Planning Reports webpage has been added that includes links for all APRDs and CREs (system and campus). [http://www.leeward.hawaii.edu/planning-reports](http://www.leeward.hawaii.edu/planning-reports)

• Present the information with graphics and in easy to read format. Some suggestions are in the OPPA website slides.

• Add trend reports to show data over time. Some of this information is in the Visual ARPD. [https://uhcc.hawaii.edu/varpd/visual_arpd.php](https://uhcc.hawaii.edu/varpd/visual_arpd.php) This should be discussed at a future meeting.

The committee discussed what could be accomplished in the next year. Next steps are below. Some items will need to be worked on in the following year.

**Next Steps**

• Need to further institutionalize student voice in planning process
  o Della to add Kristina to her emails to campus. Should students have a separate form? Can they use the Institutional Resource Request form?
  o Kristina will follow up on the program level input issue as well.

• Develop a planning and budgeting website - Some of this information is available. This is something we can finish up this year.

• Review and revise the ARPD template - The UHCC system will not be updating the template this year, but Leeward will work on making revisions for 2018-2019.

• Review and revise the process including closing the loop - This item should be worked on this year as part of ARPD template revision.

• Enhance engagement of faculty and staff in the planning process - This action item should be further discussed so some enhancements can be made this year.

• Training and support for faculty and staff with completion of ARPD - Guy provides training, but a survey of needs might be helpful.

• Follow up on UH financial dashboard project - Mark or Della will find out if this is happening.

• Create visual personnel analysis of faculty/staff categories and trend over time - This will likely fall in 2019-2020.

• Clarify Faculty Senate role in academic planning and budgeting issues - Additional work is needed.

Della also mentioned to Cecilia that Administrative Services needs to complete the template this year.

**Set regular meeting day/time** - Mondays at 1:00 pm in BE 229A

Meeting dates: September 10, October 15, November 19, December 10, February 4, March 4, April 1, April 29

**Ad Hoc Planning Process Review Committee**

**Agenda/Notes**

**October 15, 2018**

1:00 – 2:00 pm in BE 229A

Attendees: Della Teraoka, Don Maruyama, Cecilia Lucas, Stan May, Mark Lane, Grant Okamura, Adam Halemano, Aulii Silva, Guy Nishimoto, Jeff Judd, Michael Cawdery

Visualization of Prioritization Process - Discuss date; Adam will add “approved” or “effective date”.  

9
Develop a planning and budgeting website - Plan to work on this after accreditation visit.

Review and revise the ARPD template - Have Guy share his thoughts on this.

- Idea was to flip the PLOs to the top, but it might be confusing since the system ARPD template is not changing.
- Guy went through the ARPDs for last year, and he was pleasantly surprised with the improvements in the reports.
- Guy will ask them to start by focusing on the program learning outcomes first. Data from UHCC system is about program outcomes, and it will come later.
- Guy will send out the reports this week.

Training and support for faculty and staff with completion of ARPD - Guy will provide training and met with the program coordinators to discuss the change in thinking for APRD completion.

Jeff talked about providing training to program coordinators on program assessment. Discussion was around having the training in the spring semester. Maybe we intentionally focus on program learning outcomes and their assessment in March/April every year.

Enhance engagement of faculty and staff in the planning process - Let’s generate ideas on this topic.

- Review survey results
  - Last employee satisfaction survey for awareness of planning process.
  - System survey results also.
  - Campus Council survey
- Send out short survey on planning process to get a temperature check now.
  - Perceptions of the process
  - How the process works for resource allocations
  - What do you know about the planning process?
  - Do you have any concerns about the planning process?

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm

Meeting dates: September 10, October 15, November 19, December 10, February 4, March 4, April 1, April 29

Ad Hoc Planning Process
Review Committee
Update October 2018

2017-2018 Accomplishments

- Review and clarification of roles in planning process
- New visual document of prioritization process
- Added institutional level resource request step and form
- Enhanced communication of planning process to the campus
- Review of Annual Program Review Policy completed and forwarded to Faculty
- Senate and Campus Council

Next Steps

- Need to further institutionalize student voice in planning process
- Develop a planning and budgeting website
- Review and revise the ARPD template
- Review and revise the process including closing the loop
- Enhance engagement of faculty and staff in the planning process
- Training and support for faculty and staff with completion of ARPD
- Follow up on UH financial dashboard project
- Create visual personnel analysis of faculty/staff categories and trend over time
- Clarify Faculty Senate role in academic planning and budgeting issues

**Ad Hoc Planning Process Review Committee**  
**Agenda/Notes**  
**December 10, 2018**  
**1:00 – 2:00 pm in BE 229A**

Attendees: Della Teraoka, Don Maruyama, Cecilia Lucas, Stan May, Adam Halemano, Guy Nishimoto, Shuqi Wu, Jeff Judd, Michael Cawdery, Tiffany Kasoga, Kathryn Fujioka-Imai, Tommylynn Benavente, Grant Okamura

Outcome: Enhance engagement of faculty and staff in the planning process

- Sent out short survey on planning process to get a temperature check now.
  - Perceptions of the process

This meeting was largely focused on reviewing the survey data and generating ideas to improve faculty and staff engagement in the planning process.

Those responsible for the process probably understand it, but those not involved in the process may not have a good understanding.

Budget end - Need the financial statements to include graphics and charts to help people interpret the financials. Administrative positions have increased - more information about APT positions, non-instructional positions. Mark is working on a website.

Faculty Senate is working on getting financial reports into the minutes and include some interpretation.

We are currently earning around a C as some understand the process, but still improvement to be made.

- What do you know about the planning process? - range of responses on this question
- How the process works for resource allocations - pretty well.
- What suggestions do you have for the planning process?

Seeing a simple visual diagram - This has been done and need to get that out so people see it.

Feedback on ARPD - Could give feedback from ARPD writer and faculty, process for review by peers, OPPA feedback, leadership review, relationship of ARPD and future allocations. Recommendation that Dean give feedback to each ARPD. Recommendation that faculty committee can get a third party to provide feedback on whether the health call is accurate.

Concern that data is driving the program instead of informing how well the program is meeting PLOs. System metrics are looking at the economic side. Also need to focus ARPD on analyzing the program and not just driving resource requests.
Issue of unexpected expenses and how to get that funded - what is the process?

Representative groups or unit head should communicate better with their unit about the process.

Create a short handbook with information on planning process and ask divisions/units to discuss with their groups.

Send announcements and actively solicit feedback from faculty/staff at large. Consider monthly updates with info on where we are in the process (what step).

Consolidate information on one website.

Share information about what is funded, what isn’t, and rationale through email and website.

Strengthen communication with website, handbook, timeline, steps, etc.

Host a convocation workshop on this topic and/or during the semester.

More communication about how items are prioritized.

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm

Meeting dates: February 4, March 4, April 1, April 29

Ad Hoc Planning Process Review Committee
Agenda/Notes
March 4, 2019
1:00 – 2:00 pm in BE 229A

Attendees: Michael Cawdery, Kathryn Fujioka-Imai, Adam Halemano, Jeff Judd, Tiffany Kasoga, Don Maruyama, Stan May, Della Teraoka, Shuqi Wu

Review what needs to be done.

Spring 2019

- Need to further institutionalize student voice in planning process - Institutional Resource Request form sent to SG
- Institutionalize communication protocol - In process
  - Send out visual for prioritization process - Della Teraoka
- Enhance engagement of faculty and staff in the planning process - Part of communication protocol - Della Teraoka and Shuqi Wu
- Clarify Faculty Senate role in academic planning and budgeting issues - This is part of the review process of the Shared Governance Policy.
- Have Campus Council reps communicate with their constituent groups about the process - Kathryn Fujioka-Imai
- Develop a planning and budgeting website - Della Teraoka
  - Review proposed content
  - Identify missing content
  - Update website by May 2019

Summer 2019

- Review and revise the ARPD template - OPPA
- Review and revise the process including closing the loop including providing feedback to program review participants. Who should give feedback, when and how. - OPPA
- Create a handbook on the process and distribute widely and on website in fall 2019 - OPPA

Fall 2019

- Share information about what is funded, what isn’t, and rationale through email, website, and convocation - Mark Lane
- Training and support for faculty and staff with completion of ARPD - OPPA/Shuqi Wu
- Follow up on UH financial dashboard project - Mark Lane
- Create visual personnel analysis of faculty/staff categories and trend over time - Mark Lane

Get feedback on the planning website

- Use landing page as jumping off point with links to other pages.
- Add a menu item for Resources and Templates (or Handbook and Templates).
- Are there other resources? Consider adding exemplars.
- Add Timeline.
- Mention that additional data can be requested from IR.
- Add Mission to the Strategic Plan page.
- Add link to old reports
- Add link to the system org chart site and update what is on Leeward’s site

Adam is also working on the Assessment website. He will also work on a handbook for assessment.

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm

Meeting dates: April 1, April 29

Ad Hoc Planning Process Review Committee
Agenda/Notes
April 29, 2019
1:00 – 2:00 pm in BE 229A

Attendees: Michael Cawdery, Kathryn Fujioka-Imai, Jeff Judd, Stan May, Della Teraoka, Cecilia Lucas

Review updated website. Feedback included:

- Adam will have responsibility for updated the Assessment website.
- Shuqi will take responsibility for Program Review website.
- Mark will be adding more information on the Operational Expenditure Plan website.

Recent updates:

- Share information about what is funded, what isn’t, and rationale through email, website, and convocation - Mark Lane
- Create visual personnel analysis of faculty/staff categories and trend over time - Mark Lane

Summer 2019
- Review and revise the ARPD template - OPPA
- Review and revise the process including closing the loop including providing feedback to program review participants. Who should give feedback, when and how. - OPPA
- Create a handbook on the process and distribute widely and on website in fall 2019 - OPPA

Fall 2019

- Training and support for faculty and staff with completion of ARPD - OPPA/Shuqi Wu
- Follow up on UH financial dashboard project - Mark Lane
- Develop and post an institutional level dashboard that can be filtered easily - Shuqi Wu

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm
Employee Satisfaction Survey

Results from Fall 2019 and Fall 2016

Summary Report

OVERVIEW & PURPOSE
The college strives to provide valued employees with the facilities, tools, and support needed to excel in their positions. We conducted this survey to acquire a better understanding of employee morale, satisfaction, and engagement at Leeward Community College.

This survey was created by the 2nd Cohort of the Leadership Excellence Program (William Albritton, Kathryn Fujioka-Imai, Lori Lei Hayashi, Tracie Losch, and Grant Okamura) in collaboration with the Leeward Community College Office of Planning, Policy and Assessment.

DATA SUMMARY
Overall
The survey had 176 respondents in 2019 and 200 respondents in 2016. There are approximately 500 recipients that were emailed the survey. (Note that this list included active employees and retirees.)
Results

1. Which of the categories below best describes your work status and location at Leeward CC?

<table>
<thead>
<tr>
<th></th>
<th>2019 #</th>

Hi Leeward Faculty and Staff,

The Campus Council invites all members of the Leeward CC community to attend its monthly meetings and welcomes suggestions for agenda items. Below is the agenda (with the zoom link and sign-in sheet). Please see the Campus Council website for meeting dates, membership, and other information about Campus Council.

Mahalo,
William Albritton, chair
Genai U’ilani Kelii’ikuli and Warren Kawano, vice chairs

Campus Council Agenda

May 7, 2021
1pm - 2pm
Online via Video Conference

Zoom Meeting: https://us02web.zoom.us/j/85787382115
Meeting ID: 857 8738 2115
Passcode: campus

See the Campus Council website for meeting dates and membership information

I. Call to Order
II. Roll Call - Please sign-in on the Sign-in Sheet Google Doc
III. Approval of Minutes (April 9, 2021) by unanimous consent
IV. Unfinished Business
   A. Voting item: Institutional Priorities Draft (not approved) for AY 2021-2022 (Kay Ono)
      This year’s list was handled differently due to CARES funding. Kay shared a copy at the April meeting and distributed it to the entire campus. According to our current Planning Process, the Faculty Senate can present a campus-wide item to be added onto the Institutional Priorities List; if they do, it should be discussed prior to the CC vote in May. The Campus Council units should
discuss the Institutional Priorities with their units; then be prepared to vote on it at the May meeting.

**B. Voting item: Annual Planning Process_Suggested edits for AY 2021-2022 (Kay Ono and Jayne Bopp)**

Jayne and Kay proposed some changes for next year's process. We presented the information in April, had Campus Council discuss it with their units in April; then we are voting on the changes at the May meeting. OPPA webpage should be reviewed: [http://www.leeward.hawaii.edu/institutional-priorities](http://www.leeward.hawaii.edu/institutional-priorities). See the proposed motion below.

---

**Motion**
Modify the Leeward CC Integrated Planning and Budgeting Process to allow the Pūko’a no nâ ‘Ewa Council, Student Government (Associated Students of University of Hawai‘i - Leeward Community College), and Campus Council to submit one resource request each to the Integrated Planning and Budgeting Process. This request process will be similar to the one that is currently extended to the Faculty Senate. All organizations allowed to make requests through this process will abide by the same deadline.

**Rationale**
This change will make the campus Planning Process more inclusive. This will also help with including resource requests that are campus wide. Also, Campus Council should also be included, as there really isn't any other mechanism for APT, ASG, and janitorial staff to share their mana'o. Working out the details of the dates is a separate process that we will leave up to Jayne Bopp.

---

**V. New Business**

A. Chancellor’s Report
B. Faculty Senate Report
C. Pūko’a no Nā ‘Ewa Council Report
D. Student Government Report
E. Campus Announcements

1. Leeward’s Land Acknowledgment Statement. (Nā ‘Ewa member U‘i Keli‘ikuli will be presenting.)

**VI. Notice of Next Meeting – Friday, September, 17th, 2021 (1 pm - 2pm) on zoom**

**VII. Adjournment**

William McDaniel Albritton, M.S.
Professor, Information and Computer Science
Math and Sciences Division Chair

INTEGRATED PLANNING & BUDGETING PROCESS
The College's integrated planning and budgeting process is designed to collect input from all levels of the College. It starts at the program, unit, or area level when faculty and staff are encouraged to review and evaluate data metrics and other assessment information for their respective areas. Faculty and staff are encouraged to collaborate on an analysis and evaluation of the data in order to make recommendations for improvements including the need for any additional resources. Resource Request Lists are reviewed and prioritized at varying levels until a final institutional resource priority list is developed and recommended to the Chancellor who approves and then shares the resource priority list at convocation.

The driver of the planning and budgeting process is the College mission (https://www.leeward.hawaii.edu/mission) and strategic plan (https://www.leeward.hawaii.edu/strategic-plan). The University of Hawai‘i Community College (UHCC) system developed the Annual Report of Program Data (ARPD), a requirement for programs and support areas, to meet University of Hawaii (UH) Board of Regent (BOR) and UH system policies on program review (https://uhcc.hawaii.edu/ovpcc/policies/UHCCP_5.202). Since this process is mandatory, Leeward’s planning process utilizes the ARPD as the central planning document for the campus.

In addition to the ARPD, a Comprehensive Review and Evaluation (CRE) document is required every five years, per UH BOR and UH system policies on program review. The CRE template incorporates information from the ARPDs, to provide a big picture analysis for programs and units.

INSTITUTIONAL PRIORITIES

As part of the planning process, all programs, divisions, units, and areas developed Resource Requests based on the results of their assessments and program reviews. These resource requests are prioritized within the four main areas of the college: Instruction, Student Services, Academic Services, and Administrative Services. Each area prioritizes the resource requests that were submitted from their respective units and departments. During this part of the planning process, governance groups may submit an Institutional Resource Request form to include a request for resources that benefit the entire campus or multiple units.

The Administrative Team (i.e., Vice Chancellor of Academic Affairs, Vice Chancellor of Administrative Services, Dean of Arts and Sciences, Dean of Career and Technical Education, Dean of Student Services, and Dean of Academic Service) combines all of the resource requests and creates draft Institutional Priorities for the campus. These priorities are shared with the College's governance groups: Student Government, Pūko'a no Nā ‘Ewa Council, Campus Council and Faculty Senate. These bodies are responsible for sharing the Institutional Priorities with their constituents and gathering feedback on the recommended priorities. Campus Council provides a final recommendation on the Institutional Priorities to the Chancellor. A comprehensive Operational Expenditure Plan is developed for the following academic year using the Institutional Priorities as a guide for allocating available funds (for more information see the Administrative Services Budget Information website.) (https://www.leeward.hawaii.edu/adminservices-budget).

</table>
### January
**Instructional Areas Prioritize Resource Request Lists**

- Each of the Instructional Areas prioritize their own resource requests.
- Instructional areas include six instructional divisions, Wai‘anae Moku, Office of Continuing Education & Workforce Development, and Native Hawaiian Student Support Program.
- Instructional Resource Request Lists are submitted to OPPA.
- Instructional Resource Request Lists are shared with support areas and campus governance groups.

---

### February
**Prioritization of Resource Request Lists by Area and Governance Groups**

- Each support area creates an overall prioritized resource request list: Academic Services, Student Services, and Administrative Services.
- Governance groups: Faculty Senate, Student Government, Pūko’a no Nā ‘Ewa Council, and Campus Council each finalize their single, top priority.
- Support area and governance group Resource Request Lists are submitted to OPPA.

---

### March
**CREs Reviewed**

- Appropriate Dean and/or Vice Chancellors review and provide feedback to the submitted CREs.
- OPPA posts ARPDs and CREs on the campus website to share with the campus community.

---

### March
**Create Draft Institutional Priorities List**

- Administration reviews and prioritizes all of the resource requests, including institutional requests, into a draft Institutional Priorities List.
- VCAA shares the four area prioritized Resource Request Lists and the draft Institutional Priorities List with the campus community.

---

### April
**Governance Groups Review Draft Institutional Priorities List**

- Governance Groups distribute the draft Institutional Priorities List to their members for review and dissemination to their constituencies. If a recommendation will be added to the priorities by a governance group, it must be submitted to Campus Council.
April

Campus Council Reviews Institutional Priorities List

- VCAA adds governance groups' requests to the existing draft Institutional Priorities List and resends the revised list to Campus Council.

April 30

May

Campus Council approves Institutional Priorities List

- Campus Council reviews governance groups’ recommendations.
- Campus Council votes on the recommended Institutional Priorities List at the last meeting of the academic year.
- Campus Council makes final recommendation for Institutional Priorities List to Chancellor.

May Meeting

May

Review and Approval of Institutional Priorities List

- Chancellor reviews recommendations and approves final Institutional Priorities List.

May 15

August

Budget Decisions and Details Communicated

- Chancellor or VCAS provide campus updates at convocation and distribute the annual budget through email.

Fall

Convocation

Continuing Education (https://ocewd.org/)
Provided required training on faculty-initiated interaction in DE courses.

Fall 2017 - Present

- 2017-2018
  - The DE Committee created the “DE Federal Requirements Training,” which was mandatory for all instructors teaching online. The majority of instructors completed the required training during the Fall 2018 Convocation. The DE Committee facilitated five additional training sessions throughout the Fall semester. In Spring 2018, the DE Committee developed an online version of this training for instructors who were identified by their division chairs as unable to complete an in-person training session. A total of 138 instructors completed this training in the 2017-2018 academic year.
  - EMC Workshops
    - Fall 2017: The Art of Teaching Online
    - Fall 2017: The Teaching Online Challenge
    - Spring 2018: Infusing Critical Thinking in Online Discussions
    - Summer 2018: Create Your Online Course w/ Critical Thinking

- 2018-2019
  - DE Committee
    - Created new DE Guidelines, DE Guidelines Self-Assessment, and DE Peer Evaluation created.
Hosted two DE Guidelines info sessions for the campus.

- **2019-2020**
  - DE Committee
    - Hosted several DE Guidelines and Self-Assessment info sessions.
  - EMC & DE Committee
    - Summer 2020: Classroom and Distance Online (CanDO) Professional Development workshop series. (Refer to the announcement flyer.) Five, two-week long workshops. Aligned to DE Guidelines.

- **2020-2021**
  - DE Committee
    - Several members participated on campus working groups in response to COVID-19. See DE Committee Report to Faculty Senate 2020-2021.
    - A few members helped to create the Leeward CC Baseline Recommended Actions as guidelines for “Distance-Delivered” (not Distance Education) courses.
  - EMC
    - Fall 2020 - In response to COVID-19, the EMC developed several workshop series and sessions to assist instructors in moving their courses online (distance-delivered). *(I didn’t list all the workshops, just the ones for moving online and that were related to interaction. Lemme know if you want me to include all the workshops.)*
      - Classroom and Distance Online (CanDO) Professional Development workshop series. Five, two-week long workshops. Aligned to Leeward CC Baseline Recommended Actions and DE Guidelines. - Repeated workshop series
      - Class-Zoom Essentials workshop
      - From Zoom to Breakout Room workshop
      - Zoom Beyond Basics workshop
      - Screen Recording with Loom workshop
  - Fall 2020 - Equipment for the new Technology Enhanced Classrooms (TECs) were purchased.
  - Spring 2021 - In response to COVID-19 and the shift back to some in-person, the EMC supported technologies for hybrid modality. Laulima had a few new updates as well.
    - TECs installation started.
    - Hybrid Classroom Orientation and workshops featuring new technologies in classrooms for hybrid modality.
    - Laulima Rubrics workshop
    - Laulima Gradebook workshop
- Summer 2021 - Encouraged instructors to enhance their distance-delivered (remote) classes, hybrid classes, and DE classes. Move off of Baseline Recommended Actions and onto DE Guidelines.
- DE Guidelines Professional Development Workshop Series (Announcement Flyer). Five, one-week long workshops to train instructors on applying the DE Guidelines to their online courses.

- Workshop Survey Results *(for workshops mentioned above)*

Revise and implement the DE Peer Evaluation form to provide feedback on regular and substantive interaction.

*Note: We went beyond just updating the DE Peer Evaluation form to address RSI. We created the DE Guidelines, Self-Assessment form and review process, and Peer Evaluation form aligned to the DE Guidelines.*

Fall 2018 - Spring 2019
In the 2018-2019 academic year, the DE Committee has created new DE Guidelines, DE Guidelines Self-Assessment, and DE Peer Evaluation to reflect best practices and provide instructors with a framework for creating a quality DE course. The "Leeward CC Distance Education (DE) Guidelines" provide standards for designing a DE course. In particular, DE Guideline 5 addresses interaction.

Included with the new DE Guidelines is a new DE Self-Assessment and revised DE Peer Evaluation. The Self-Assessment will be completed by DE instructors every 3 years and serve as a tool for ensuring quality DE courses at Leeward CC. The revised DE Peer Evaluation replaces the previous version (from 2012) and is aligned directly to the new DE Guidelines but focuses on course delivery components. Sub-guidelines of DE Guideline 5 are included in the peer evaluation. The previous DE Federal Regulations Self-Evaluation (from 2017-2018) has been included in the new DE Peer Evaluation and Self-Assessment.

The development of the new DE Guidelines, DE Peer Evaluation, and DE Guidelines Self-Assessment went through many revisions throughout the academic year, obtained the support of the Division Chairs, and was presented for Faculty input at two breakout sessions during the Spring 2019 convocation. The Faculty Senate unanimously approved the new DE Guidelines and Evaluations for adoption at its March 13, 2019 meeting.

DE Self-Assessment process will be rolled out over three years (three groups) as a pilot.

DE Committee Annual Report AY 2018-2019

Fall 2019 - Spring 2020
- First group for the DE Guidelines Self-Assessment
- DE Committee Annual Report AY 2019-2020

Fall 2020 - Spring 2021
- Second group for DE Guidelines Self-Assessment
- DE Committee Annual Report AY 2020-2021
- Most current DE Guidelines Self-Assessment results (as of November 10, 2021): 68 instructors cycled into the DE Guidelines Self-Assessment process over the course of AY 199-20 and AY 2020-21. 64 instructors have completed a Self-Assessment, giving the process a current 94% completion rate.

Fall 2021 - Spring 2022
- Third (and final) group for DE Guidelines Self-Assessment pilot (for the first round of DE instructors)
The “Leeward CC Distance Education (DE) Guidelines” provide standards for designing a DE course. Refer to the annotations under each guideline for further information and examples. (Related: DE Guidelines Self-Assessment and DE Peer Evaluation.)

### COURSE DESIGN

#### 1 COURSE OVERVIEW AND INFORMATION

**1.1 Provide welcome, getting started.**
- Welcome students and provide context for what they will be learning, setting a tone for success from the start of the course.
  - Establish instructor presence and model voice and tone of interaction.
  - Provide guidance to ensure students will get off to a good start in the online space.
- Explain how students are to proceed when they first access the course.
- Guide students through course learning materials and activities through visual clues and simple notations, like “start here”, and “before you move on” help.

**1.2 Provide course orientation, module orientations.**
- Clarify content rationale as well as the scope of work and expected time commitment.
- Provide an overview of the online course including what, when, where and why they will be learning, and an overview of each course module that provides information on what content, interaction, and assessment will take place within a specific period of time.
- Include a module orientation with at least a short introduction to the module topic and indicate what materials need to be reviewed, and what activities and assignments need to be completed.
- Include due dates for every assignment and activity in the module.

**1.3 Provide an online/printable version of syllabus.**
- Keep students on track with information provided, in advance, alleviating the possibility for problems and obstacles.
- Syllabus is in an accessible format available for online download and printing. ([Syllabus template](#))

**1.4 Include mandatory Leeward CC syllabi information and campus policies.**

Policies need to be communicated to online students, with course links to associated student services offices at the institution. Links should bring the student to:
- The policy, in clear language.
- Guidelines on the policy, including how the policy is enforced.
- Contact information for policy related offices and personnel.
- Where to go for additional resources.
- Campus policies should address [student conduct and academic integrity](#).

**1.5 Explain course policies.**
- A clear explanation of course policies is provided and easy to understand.
- Course policies may include:
  - Grading policy
  - Late work submission
  - Student conduct
  - Communication

**1.6 Provide access to campus resources (technical help, orientation, tutoring).**

Link to [campus resources for Distance Education students](#).

**1.7 State whether the course is fully online or blended.**

Provide students with information about online readiness; for example:
1.8 Explain communication methods.
Instructor communication policy is clearly stated.
- How will your students communicate with you?
- What is your response time?
- How will students communicate with each other?
- What is your preferred way for students to contact you?

1.9 Ensure objectives/outcomes are easily located, clearly stated, measurable, and written from a student's perspective.
- Objectives should be measurable and express some level of mastery that students will need to demonstrate as a result of participating fully in the course.
- All course content, learning activities, interactions and assessments should be in alignment with these objectives/outcomes.
- Objectives should address what students need to know when they complete the module, course, or program, and aligned activities and assessments should showcase how students will achieve those objectives.
- Objectives are written from a student’s perspective to make it easy for students to understand.
- Objectives for the course or module are easy for students to locate in the course.

1.10 Provide instructor, department, and program contact info.
Instructor, department, and program (if applicable) contact information is easy to find.

1.11 Explain distinction between required and optional materials.
The course contains an explanation of required and optional resources and materials. It is clear to students which resources are required to complete course activities and assignments. Optional resources are clearly indicated.

1.12 Provide instructor self-introduction.
Examples include: a self-introduction video, forum post, email, infographic

1.13 Ask students to do self-introductions.
Examples include: a self-introduction video, forum post, email, infographic

2 COURSE TECHNOLOGY AND TOOLS

2.1 State technology skills and minimum technology requirements.
Any hardware, software, or technology applications that are required for successful participation in the course need to be introduced along with resources that support a full range of learner mastery. This information needs to be communicated to students early on, and reinforced throughout the term.

2.2 Include orientation/tutorials for technology skills required for learning activities.
Instructor may create a personalized tutorial or provide links to existing tutorials.

2.3 Link to tools' privacy and accessibility policies.
- Students entrust the university with their personal information and expect that information to be protected. Web-based applications and other technology tools may be collecting data in the background, and students need to be advised and know that their data is safeguarded.
- Links to privacy policies are provided for all external websites and services that require students to create a username and password.
- Link to the privacy policy of the Learning Management System (LMS) is provided. (e.g. Laulima use is subject to the University of Hawai'i Executive Policy E2.210.)
- Links to accessibility policies are provided for all tools used in the course. (Note: If a tool isn’t accessible, provide an equivalent alternative tool or activity if you move forward with using it.)
- Tools used are approved by UH ITS. Check the UH ITS' third-party tools or microservices commonly used by instructors. If a tool you use is not listed, submit the form for review and approval.
2.4 Ensure course tools promote student engagement and active learning.
Tools available within the LMS are used to facilitate learning by engaging students with course content, each other, and the instructor.

2.5 Ensure course technologies are current.
- Course technologies are up-to-date
- Examples include:
  - Synchronous web conference tools
  - Mobile application that supports learning and/or interaction
  - Web-based collaborative platform (i.e. Google Docs, wiki)
  - Blogs
  - Online simulation software
- The course utilizes tools in the LMS that supports learning objectives

2.6 The technology and tools used in the course support the course learning objectives/outcomes.
The technology tools utilized in the course actively engage students in the course material, facilitate interaction, and help students achieve the course learning objectives and outcomes.

3 DESIGN AND LAYOUT

3.1 Ensure course layout and navigation is logical, consistent, and uncluttered.
- The online course should be designed so that students can easily navigate and progress through a logical sequence and pace. This is achieved through consistency in layout and delivery of information types in regular order within learning modules.
- Organization is one of the most important parts of an online course. The key factor in the organization of an online course is consistency — from the overall color scheme and page design to the layout and structure of learning modules, assignments, and rubrics.
- Redundancy (the same documents appearing in several locations) is recommended because repetition helps students navigate easily to relevant information without having to search extensively.

3.2 Ensure information is divided into manageable sections.
- Reduce content to smaller “chunks”
- Organize course content into sections
- Utilize white space

3.3 Write clear, unambiguous instructions.
- Clear instructions help students to function in the online environment without having to repeatedly ask for clarification.
- Instructions can be communicated in many different forms in an online course, including orientations, introductions, announcements, guidelines, rubrics, etc.

3.4 Text is easily readable.
- Recommended: sans-serif, 12 pt or larger font used
- Ensure text can be zoomed
- Ensure enough contrast between text and background

3.5 Where applicable, use simple tables to display information.
- Ensure all tables have a title and description
- Ensure table header rows and columns are assigned
- Avoid using merge-cells or complex tables

3.6 Course materials are accessible to meet the needs of diverse learners.
- Videos are captioned or text transcripts are available
- All text (page, PDF, images) is readable by a screen reader
- Alt tags, captions, and transcripts are provided for all non-text content
- All text, graphics, and images do not use color as the only means of conveying meaning
3.7 Ensure tools meet accessibility standards.
- Link to Laulima Accessibility
- Link to third party tools’ accessibility statements
- If no accessibility statement exists, it is stated as such

4 CONTENT AND ACTIVITIES

4.1 Provide a variety of activities and resources that facilitate communication, collaboration, learning, and engagement.
- Students benefit more from activities than from simple presentation of content. External readings, assignments, discussions, interactive web sites, online assessments (formative and summative) should all be connected clearly to mastering course concepts, and aligned with module, course, and program objectives.
- Relevancy to the course content is clear to students.
- Students need to know why they are required to read, review, discuss or create materials in the course. When they know the reasoning behind what they need to complete, they will be more engaged.

4.2 Ensure course content and resources use proper citations, copyright, permissions, and licensing info (including Creative Commons).
Ask a librarian for guidance on how to properly cite and use fair use materials.

4.3 Course content and activities are aligned with course objectives.
All course content, learning activities, and interactions should align with course objectives/outcomes.

5 INTERACTION

5.1 Explain all instructor interaction and feedback.
The course provides students with information on instructor response times, which include, but are not limited to: discussion postings, feedback on assignments, and grades. This information is easily accessible for students.

5.2 Explain all student interaction expectations.
A clear explanation of the instructor’s expectations and requirements of student interaction is provided to the students (frequency, length, response time, content, etc.). This includes, but are not limited to: discussion postings, assignments, peer evaluations, self-assessments, group projects, etc.)

5.3 Provide activities and/or opportunities that build community.
- Activities and/or opportunities which foster social presence (a sense of belonging and feeling comfortable to participate/interact and respect opposing views), promote student engagement, and open up avenues for communication.
- Examples may include: icebreaker/self-introduction discussion forum where instructor and students participate and engage with each other, students share their insights and opinions about an article or course topic, study groups, team/group projects, “cyber cafe”/“hallway” discussion forum or virtual meeting/chat space where students and the instructor can meet informally to chat about course-related (or other) topics.

5.4 Provide opportunities for student-to-student interaction.
- Instructor as facilitator, moderating and evaluating the quality and quantity of interaction between students.
- Group and peer-review assignments support social, teaching, and cognitive presence in the online space.
- Collaborative exercises enabling more advanced students to help other students to maximize their abilities, and help construct new knowledge together.

5.5 Provide opportunities for regular and substantive interaction between instructor and student.
- ACCJC Policy on Distance Education and Correspondence Education
- Examples of instructor-student interaction:
5.6 Learning activities provide interaction that support active learning.
Active learning involves students engaging by "doing" something, such as discovering, processing, or applying concepts and information. Active learning entails guiding students to increasing levels of responsibility for their own learning.

6 ASSESSMENT AND FEEDBACK

6.1 Assessments measure course and/or module objectives.
Assessments are linked to course activities and measure learner mastery of course and/or module objectives.

6.2 Provide regular and appropriate assessments.
- Assessments are included at regular intervals
- Formative assessments that lead to summative assessments
- Assessments used are appropriate for the course content

6.3 Provide clear assessment criteria for assignments.
Rubrics are recommended as a best practice for communicating criteria and achievement levels for assignments in online courses. They:
- Make learning targets clearer;
- Guide the design and delivery of instruction;
- Normalize the assessment process; and
- Give students self- and peer-assessment guidelines.

6.4 Provide opportunities for self-assessment.
- Students have opportunities to assess their own learning throughout the course determining what they’ve mastered, and detailing what needs improvement. It is a multi-faceted method of determining learner mastery, by asking students to explore their own work, and determine a level of performance or mastery.
- Self-assessment plays a role in learner self-efficacy, fosters learners’ abilities to construct meaning, and promotes metacognition. By asking students to check their skill mastery levels, or reflect on their own work, they learn to examine their own reasoning and decision making process (Cukusic et al, 2014).

6.5 Setup online gradebook for students.
By providing easy access to an up-to-date gradebook, the instructor gives students the ability to check in on their progress continuously throughout the term. The added functionality and reporting features enable the instructor to review and analyze the gradebook, as well as create reports on student progress and course completion.

6.6 Provide at least one opportunity for descriptive feedback on all aspects of course.
This may include, but is not limited to the course evaluation via Course Evaluation System (CES).

The "Leeward CC Distance Education (DE) Guidelines" were based on recognized best practices from:
- Quality Matters
- SUNY Center for Online Teaching Excellence
- UHM College of Education, Department of Learning Design and Technology
Leeward CC Distance Education (DE) Guidelines Self-Assessment

INSTRUCTIONS: The "Leeward CC Distance Education (DE) Guidelines" provide standards for designing a DE course. This is intended to help you self-reflect and improve your course design, and must be submitted once every three years for each DE course you teach (except for 5-week courses that have gone through a UH System review process) for the current academic year. Refer to the annotations under each guideline for further information and examples.

STEP 1: Use this Google Doc http://go.hawaii.edu/wIG to compose your answers since you won't be able to save your answers mid-way through. For each guideline, indicate if you've MET it and how you've met it, or if you've NOT MET it and how you plan to meet it.

STEP 2: Copy/Paste your responses from your Google Doc into this form. Click Submit.

Once completed, the DE Committee Chair will forward your submitted DE Self-Assessment to your Division Chair. For details see http://go.hawaii.edu/GIE.

Note: The "Leeward CC Distance Education (DE) Guidelines" were based on recognized best practices from: Quality Matters, SUNY Center for Online Teaching Excellence, and the UHM College of Education, Department of Learning Design and Technology.

e.g. ENG 100

Your answer
Would you be willing to share your Self-Assessment with the DE Committee who may use select responses as examples for the DE Guidelines that will help other DE instructors? *

- Yes, sharing is caring.
- No, thank you.

**COURSE DESIGN**

**1: COURSE OVERVIEW AND INFORMATION**

1.1 Provide welcome, getting started. *

Welcome students and provide context for what they will be learning, setting a tone for success from the start of the course. Establish instructor presence and model voice and tone of interaction. Provide guidance to ensure students will get off to a good start in the online space. Explain how students are to proceed when they first access the course. Guide students through course learning materials and activities through visual clues and simple notations, like "start here" and "before you move on."

Your answer
1.2 Provide course orientation, module orientations. *
Clarify content rationale as well as the scope of work and expected time commitment. Provide an overview of the online course including what, when, where and why they will be learning, and an overview of each course module that provides information on what content, interaction, and assessment will take place within a specific period of time. Include a module orientation with at least a short introduction to the module topic and indicate what materials need to be reviewed, and what activities and assignments need to be completed. Include due dates for every assignment and activity in the module.

Your answer

1.3 Provide an online/printable version of syllabus. *
Keep students on track with information provided, in advance, alleviating the possibility for problems and obstacles. Syllabus is in an accessible format available for online download and printing.* (Syllabus template: https://docs.google.com/document/d/1MpuFK1JTvk5Xt3sz5asekoBG4kP_kLejFDUGZ3tSg/edit?usp=sharing)

Your answer

1.4 Include mandatory Leeward CC syllabi information and campus policies. *
Leeward CC mandatory syllabi info: http://go.hawaii.edu/Gjk. Policies need to be communicated to online students, with course links to associated students services offices at the institution. Links should bring the student to: the policy, in clear language; guidelines on the policy, including how the policy is enforced; contact information for policy related offices and personnel; where to go for additional resources; and campus policies should address student conduct and academic integrity - http://www.leeward.hawaii.edu/files/StuPol_StConductCode_May2010.pdf

Your answer
1.5 Explain course policies. *
A clear explanation of course policies is provided and easy to understand. Course policies may include: grading policy, late work submission, student conduct, and communication.

Your answer

1.6 Provide access to campus resources (technical help, orientation, tutoring). *
Link to campus resources for Distance Education students: http://blogs.leeward.hawaii.edu/ilearn/.

Your answer

1.7 State whether the course is fully online or blended. *
Provide students with information about online readiness; for example, "Are You Ready to Learn Online?" (self-assessment): http://go.hawaii.edu/XjG. The Online Learning Orientation @ Leeward CC: http://blogs.leeward.hawaii.edu/ilearn/olo/.

Your answer
1.8 Explain communication methods. *

Instructor communication policy is clearly stated. How will your students communicate with you? What is your response time? How will students communicate with each other? What is your preferred way for students to contact you?

Your answer

1.9 Ensure objectives/outcomes are easily located, clearly stated, measurable, and written from a student's perspective. *

Objectives should be measurable and express some level of mastery that students will need to demonstrate as a result of participating fully in the course. All course content, learning activities, interactions and assessments should be in alignment with these objectives/outcomes. Objectives should address what students need to know when they complete the module, course, or program, and aligned activities and assessments should showcase how students will achieve those objectives. Objectives are written from a student's perspective to make it easy for students to understand. Objectives for the course or module are easy for students to locate in the course.

Your answer

1.10 Provide instructor, department, and program contact info. *

Instructor, department, and program (if applicable) contact information is easy to find.

Your answer
1.11 Explain distinction between required and optional materials. *

The course contains an explanation of required and optional resources and materials. It is clear to students which resources are required to complete course activities and assignments. Optional resources are clearly indicated.

Your answer

1.12 Provide instructor self-introduction. *

Examples include: a self-introduction video, forum post, email, and infographic.

Your answer

1.13 Ask students to do self-introductions. *

Examples include: a self-introduction video, forum post, email, and infographic.

Your answer

2: COURSE TECHNOLOGY AND TOOLS
2.1 State technology skills and minimum technology requirements. *

Any hardware, software, or technology applications that are required for successful participation in the course need to be introduced along with resources that support a full range of learner mastery. This information needs to be communicated to students early on, and reinforced throughout the term.

Your answer

2.2 Include orientation/tutorials for technology skills required for learning activities. *

Instructor may create a personalized tutorial or provide links to existing tutorials.

Your answer
2.3 Link to tools' privacy and accessibility policies. *

Students entrust the university with their personal information and expect that information to be protected. Web-based applications and other technology tools may be collecting data in the background, and students need to be advised and know that their data is safeguarded. Links to privacy policies are provided for all external website and services that require students to create a username and password. Link to privacy policy of the Learning Management System (LMS) is provided. (e.g. Laulima use is subject to the University of Hawai'i Executive Policy E2.210 [https://www.hawaii.edu/policy/archives/ep/e2/e2210.pdf](https://www.hawaii.edu/policy/archives/ep/e2/e2210.pdf).) Links to accessibility policies are provided for all tools used in the course. (Note: If a tool isn't accessible, provide an equivalent alternative tool or activity if you move forward with using it.) Tools used are approved by UH ITS. Check the UH ITS' third-party tools or microservices commonly used by instructors. If a tool you use is not listed, submit the form for review and approval ([https://docs.google.com/forms/d/e/1FAIpQLSfHCQMZoq3d3MCl0oHChQhxICY3wCwg8HKa67w0PmAsuf4XVg/viewform](https://docs.google.com/forms/d/e/1FAIpQLSfHCQMZoq3d3MCl0oHChQhxICY3wCwg8HKa67w0PmAsuf4XVg/viewform)).

Your answer

2.4 Ensure course tools promote student engagement and active learning. *

Tools available within the LMS are used to facilitate learning by engaging students with course content, each other, and the instructor.

Your answer
2.5 Ensure course technologies are current.*
Course technologies are up-to-date. Examples include: synchronous web conference tools, mobile application that supports learning and/or interaction, web-based collaborative platform (i.e. Google Docs, wiki), blogs, and online simulation software. The course utilizes tools in the LMS that supports learning objectives.

Your answer

2.6 The technology and tools used in the course support the course learning objectives/outcomes.*
The technology tools utilized in the course actively engage students in the course material, facilitate interaction, and help students achieve the course learning objectives and outcomes.

Your answer

3: DESIGN AND LAYOUT
3.1 Ensure course layout and navigation is logical, consistent, and uncluttered. *

The online course should be designed so that students can easily navigate and progress through a logical sequence and pace. This is achieved through consistency in layout and delivery of information types in regular order within learning modules. Organization is one of the most important parts of an online course. The key factor in organization of an online course is consistency — from the overall color scheme and page design to the layout and structure of learning modules, assignments, and rubrics. Redundancy (the same documents appearing in several locations) is recommended because repetition helps students navigate easily to relevant information without having to search extensively.

Your answer

3.2 Ensure information is divided into manageable sections. *

Reduce content to smaller "chunks." Organize course content into sections. Utilize white space.

Your answer

3.3 Write clear, unambiguous instructions. *

Clear instructions help students to function in the online environment without having to repeatedly ask for clarification. Instructions can be communicated in many different forms in an online course, including orientations, introductions, announcements, guidelines, rubrics, etc.

Your answer
3.4 Text is easily readable. *
Recommended: sans-serif, 12 pt or larger font used. Ensure text can be zoomed. Ensure enough contrast between text and background.

Your answer

3.5 Where applicable, use simple tables to display information. *
Ensure all tables have a title and description. Ensure table header rows and columns are assigned. Avoid using merge-cells or complex tables.

Your answer

3.6 Course materials are accessible to meet the needs of diverse learners. *
Videos are captioned or text transcripts are available. All text (page, PDF, images) is readable by a screen reader. Alt tags, captions, and transcripts are provided for all non-text content. All text, graphics, and images do not use color as the only means of conveying meaning. Format all text with titles, headings, and styles for accessible reading. Avoid flashing or blinking text. Use descriptive hyperlinks - Avoid "Click here." Instead, identify the destination in the text. (e.g., Leeward Community College is a great school. (The words, "Leeward Community College" would be hyperlinked.))

Your answer
3.7 Ensure tools meet accessibility standards. *
Link to Laulima Accessibility: [https://confluence.sakaiproject.org/display/2ACC/Sakai+CLE+Current+Accessibility](https://confluence.sakaiproject.org/display/2ACC/Sakai+CLE+Current+Accessibility). Link to third party tools' accessibility statements. If no accessibility statement exists, it is stated as such.

Your answer

4. CONTENT AND ACTIVITIES

4.1 Provide a variety of activities and resources that facilitate communication, collaboration, learning, and engagement. *

Students benefit more from activities than from simple presentation of content. External readings, assignments, discussions, interactive web sites, online assessments (formative and summative) should all be connected clearly to mastering course concepts, and aligned with module, course, and program objectives. Relevancy to the course content is clear to students. Students need to know why they are required to read, review, discuss or create materials in the course. When they know reasoning behind what they need to complete, they will be more engaged.

Your answer
4.2 Ensure course content and resources use proper citations, copyright, permissions, and licensing info (including Creative Commons). *
Ask a librarian for guidance on how to properly cite and use fair use materials.

Your answer

4.3 Course content and activities are aligned with course objectives. *
All course content, learning activities, and interactions should align with course objectives/outcomes.

Your answer

5: INTERACTION

5.1 Explain all instructor interaction and feedback. *
The course provides students with information on instructor response times, which include, but are not limited to: discussion postings, feedback on assignments, and grades. This information is easily accessible for students.

Your answer
5.2 Explain all student interaction expectations.*
A clear explanation of the instructor's expectations and requirements of student interaction is provided to the students (frequency, length, response time, content, etc.). This includes, but are not limited to: discussion postings, assignments, peer evaluations, self-assessments, group projects, etc.

Your answer

5.3 Provide resources and activities that build community.*
Activities and/or opportunities which foster social presence (a sense of belonging and feeling comfortable to participate/interact and respect opposing views), promote student engagement, and open up avenues for communication. Examples may include: icebreaker/self-introduction discussion forum where instructor and students participate and engage with each other, students share their insights and opinions about an article or course topic, study groups, team/group projects, "cyber cafe"/"hallway" discussion forum or virtual meeting/chat space where students and the instructor can meet informally to chat about course-related (or other) topics.

Your answer

5.4 Provide opportunities for student-to-student interaction.*
Instructor as facilitator, moderating and evaluating the quality and quantity of interaction between students. Group and peer-review assignments support social, teaching, and cognitive presence in the online space. Collaborative exercises enabling more advanced students to help other students to maximize their abilities, and help construct new knowledge together.

Your answer
5.5 Provide opportunities for regular and substantive interaction between instructor and student. *

ACCJC Policy on Distance Education and Correspondence Education: [http://accjc.org/wp-content/uploads/Policy-on-Distance-Education-and-on-Correspondence-Education.pdf](http://accjc.org/wp-content/uploads/Policy-on-Distance-Education-and-on-Correspondence-Education.pdf). Examples of instructor-student interaction: follow-up questions on assignments, forum discussion posts that include instructor participation, instructor provides a summary post for forum discussions, instructor feedback on assignments, course announcements that provide general feedback to students, synchronous chat, and one-on-one synchronous meetings.

Your answer

5.6 Learning activities provide interaction that support active learning. *

Active learning involves students engaging by "doing" something, such as discovering, processing, or applying concepts and information. Active learning entails guiding students to increasing levels of responsibility for their own learning.

Your answer

6: ASSESSMENT AND FEEDBACK
6.1 Assessments measure course and/or module objectives. *
Assessments are linked to course activities and measure learner mastery of course and/or module objectives.

Your answer

6.2 Provide regular and appropriate assessments. *
Assessments are included at regular intervals. Formative assessments that lead to summative assessments. Assessments used are appropriate for the course content.

Your answer

6.3 Provide clear assessment criteria for assignments. *
Rubrics are recommended as a best practice for communicating criteria and achievement levels for assignments in online courses. They: make learning targets clearer, guide the design and delivery of instruction, normalize the assessment process, and give students self- and peer-assessment guidelines.

Your answer
6.4 Provide opportunities for self-assessment.

Students have opportunities to assess their own learning throughout the course determining what they've mastered, and detailing what needs improvement. It is a multi-faceted method of determining learner mastery, by asking students to explore their own work, and determine a level of performance or mastery. Self-assessment plays a role in learner self-efficacy, fosters learners' abilities to construct meaning, and promotes metacognition. By asking students to check their skill mastery levels, or reflect on their own work, they learn to examine their own reasoning and decision making process (Cukusic et al, 2014).

Your answer

6.5 Setup online gradebook for students.

By providing easy access to an up-to-date gradebook, the instructor gives students the ability to check in on their progress continuously throughout the course term. The added functionality and reporting features enable the instructor to review and analyze the gradebook, as well as create reports on student progress and course completion.

Your answer

6.6 Provide at least one opportunity for descriptive feedback on all aspects of course.

This may include, but is not limited to the course evaluation via Course Evaluation System (CES): https://www.hawaii.edu/ces/.

Your answer

A copy of your responses will be emailed to the address you provided.
Leeward CC Distance Education (DE) Peer Evaluation

Please use this form to evaluate an instructor’s course delivery. Note that evidence can be gathered via multiple methods (see suggested methods at the end of this form).

Semester:  
Peer Evaluator:  

## COURSE DELIVERY

### COURSE TECHNOLOGY AND TOOLS

Evidence that course tools are used to promote student engagement and active learning. (Guideline 2.4)

Tools available within the LMS are used to facilitate learning by engaging students with course content, each other, and the instructor.

Evidence & Comments:

### INTERACTION

Evidence of information explaining instructor interaction and feedback. (Guideline 5.1)

The course provides students with information on instructor response times, which include, but are not limited to: discussion postings, feedback on assignments, and grades. This information is easily accessible for students.

Evidence & Comments:

Evidence of activities and/or opportunities that build community. (Guideline 5.3)

- Activities and/or opportunities which foster social presence (a sense of belonging and feeling comfortable to participate/interact and respect opposing views), promote student engagement, and open up avenues for communication.
- Examples may include: icebreaker/self-introduction discussion forum where instructor and students participate and engage with each other, students share their insights and opinions about an article or course topic, study groups, team/group projects, “cyber cafe”/“hallway” discussion forum or virtual meeting/chat space where students and the instructor can meet informally to chat about course-related (or other) topics.

Evidence & Comments:

Evidence of student-to-student interaction. (Guideline 5.4)

- Instructor as facilitator, moderating and evaluating the quality and quantity of interaction
between students.
- Group and peer-review assignments support social, teaching, and cognitive presence in the online space.
- Collaborative exercises enabling more advanced students to help other students to maximize their abilities, and help construct new knowledge together.

Evidence & Comments:

Evidence of regular and substantive interaction between instructor and student. (Guideline 5.6)
- **ACCJC Policy on Distance Education and Correspondence Education**
- Examples of instructor-student interaction:
  - Follow-up questions on assignments
  - Forum discussion posts that include instructor participation
  - Instructor provides a summary post for forum discussions
  - Instructor feedback on assignments
  - Course announcements that provide general feedback to students
  - Synchronous chat
  - One-on-one synchronous meetings

Evidence & Comments:

Learning activities provide interaction that support active learning. (Guideline 5.6)
Active learning involves students engaging by "doing" something, such as discovering, processing, or applying concepts and information. Active learning entails guiding students to increasing levels of responsibility for their own learning.

Evidence & Comments:

ASSESSMENT AND FEEDBACK

The online gradebook is current. (Guideline 6.5)
By providing easy access to an up-to-date gradebook, the instructor gives students the ability to check in on their progress continuously throughout the course term. The added functionality and reporting features enable the instructor to review and analyze the gradebook, as well as create reports on student progress and course completion.

Evidence & Comments:

Methods of Evaluation | Checkmark
--- | ---

http://go.hawaii.edu/GrB | Last updated on 9/30/20
Viewed course syllabus.

Visited online course site (UH Learning Management System or other website).

Viewed streaming video or media content.

Observed asynchronous discussions, groups, blogs, etc.

Observed synchronous sessions, communications, etc.

Observed on-site laboratory instruction.

Observed instructors’ communication and interactions with students.

Conferenced with the instructor.

Additional comments:

______________________________  __________________________
Signature of Peer                Date

This evaluation has been discussed with me:

______________________________  __________________________
Signature of Instructor          Date

_It is recommended that each instructor and lecturer have two (2) peer evaluations each semester._

Related: [DE Guidelines](http://go.hawaii.edu/GrB) and [DE Guidelines Self-Assessment](http://go.hawaii.edu/GrB).

The "Leeward CC Distance Education (DE) Guidelines" were based on recognized best practices from:

- [Quality Matters](http://go.hawaii.edu/GrB)
- [SUNY Center for Online Teaching Excellence](http://go.hawaii.edu/GrB)
- [UHM College of Education, Department of Learning Design and Technology](http://go.hawaii.edu/GrB)
Report to Faculty Senate
For Faculty Senate Meeting April 13, 2022
Distance Education Committee

Submitted by Co-Chairs Kelsie Aguilera and Evelyn Wong

- The three-year Self-Assessment process pilot is ending
  - The past two years have had a 94% completion rate. This academic year, we are currently at a 80% completion rate and are working on improving it.
  - The committee along with the EMC, VCAA Chock, and Interim Dean for Academic Services Riesley, are considering how to move our campus forward with DE. New professional development programs and peer coaching models for online course support are being considered, especially since C19 designations have sunsetted. C19 was a temporary designation for courses that transitioned from F2F to online due to the pandemic.
    - Courses previously designated as C19 will now be considered fully DE by the ACCJC and Department of Education. Therefore, we need to reevaluate our current processes and practices, including the Self-Assessment process.
    - The EMC will be working closely with Danny Wyatt and Wai’anae Moku hybrid instructors this summer on a pilot professional development program and possibly peer coaching model to help support online/hybrid course design.

- DE Guidelines Updates
  - This academic year, the DE Committee has been working hard to update and revise the DE Guidelines. We hope to have an updated version for your review next week. We hope to vote on the revised guidelines at our last Faculty Senate meeting in May. The DE Guidelines outline best practices in online course design at Leeward Community College.
    - Thus far, no substantive changes have been made to the guidelines. In general, we updated and cleaned-up some language as well as removed redundancies (making it shorter).

- ACCJC Session - Changes in Distance Education Regulations (recording)
- WCET Quality Basics Workshop
The last Comprehensive Review and Evaluation (CRE) for this program was completed in 2016 and can be viewed here. The next CRE will be completed in 2021.

1. Program or Unit Description

The Associate in Arts (AA) degree program consists of at least 60 semester credits, entirely at the baccalaureate level (100 level and above), which provides students with skills and competencies essential for successful completion of a baccalaureate degree. The AA degree program provides students with a solid liberal arts and sciences foundation in preparation for transfer to four-year colleges and universities. The AA degree program also develops critical thinking, information literacy, communication and problem-solving skills needed for a successful career.

The general education received in the program:

- Encompasses the common knowledge, skills, and attitudes needed by individuals to be effective as persons, family members, workers, and citizens.
- Provides opportunities to develop understanding, abilities, values, and personal attributes which should help students apply their knowledge, skills, and talents to make sound decisions and to analyze and solve problems in a multi-cultural community.
- Helps the students gain a more integrated view of knowledge, a more realistic view of life and a more defined sense of community and social responsibility.

The program learning outcomes are:

1. Develop, support, and communicate ideas to a particular audience through writing [written communication].
2. Develop, support, and communicate ideas to a particular audience through speech and writing [oral communication].
3. Apply quantitative reasoning to solve problems, interpret answers, and communicate results [quantitative reasoning].
4. Use critical thinking to address issues and solve problems [critical thinking].
5. Find, evaluate, and use information [information literacy].
6. Use the concepts, theories, and methodologies in arts, humanities, natural and social sciences to examine natural phenomena or to evaluate human experiences [arts, humanities, and sciences].
7. Describe and analyze the nature of culture and its variations, past and present [cultural diversity].

What is the target student or service population?

As stated in the 2019 – 2020 Course Catalogue, “While the Leeward coast and Central O‘ahu are the primary areas served by the College, students attend Leeward Community College from all parts of the island. We believe in the dignity and potential of each individual and the power of that belief to help people learn and grow. We are committed to providing an educational environment that accepts people as they are and fosters the development of each student's unique talents.”
2. Analysis of the Program/Unit

Overall program health is rated at a “cautionary” level, where it has remained for the past three academic years.

</tbody>
</table>

Although Demand was rated at an unhealthy level for the past two academic years, Demand is currently rated as cautionary. This can be attributed to the number of majors increasing by 1.55% from 2198 during the 2018 – 2019 AY to 2232 in the 2019 – 2020 AY as well as the increase in Percent Change Majors, which saw a 2% increase.

The number of classes taught over the past three academic years has steadily decreased for a net loss of 177 classes offered, a 16.7% difference. This can primarily be attributed to decreased enrollment over the past three academic years, as well as increased efforts within the system to streamline the path toward graduation, which dissuades students from taking classes that are not required for graduation. While this is a trend being seen on other UHCC Oahu campuses, with Kapiolani, Windward and Honolulu recording 13.6%, 7.7%, and 15.9% decreases, respectively, Leeward’s decrease is the highest in the UHCC system.

</table>
The health call for Efficiency continues to rate as *healthy*. Class fill rates have remained steady over the past three academic years, seeing a 0.7% increase during the 2019 – 2020 AY.

The ratio of majors to FTE faculty has increased by one over the past two academic years and is currently measured at 27.

</tbody>
</table>

The number of students who were actively enrolled in program classes at the end of the semester and who earned a grade of ‘C’ or better has increased by 1% over the past two academic years and currently stands at 75%.

Overall Persistence from Fall to Spring has remained steady from the previous academic year, while Persistence from Fall to Fall has seen a 2% increase from the previous academic year. This is comparable to Kapiolani CC and Windward CC, with the former averaging 69% Fall to Spring Persistence and 45% Fall to Fall Persistence, and the latter averaging 71% and 46%, respectively.
According to the “Hawai’i Graduation Initiative” of the Strategic Directions 2015 -2021, “The goal is to increase the number of associate degrees by 5% per year in order to maintain progress toward the P-20 goal of having 55% of working age adults with a college degree by 2025.” During the previous academic year, the college saw an 14.3% decrease in the number of students earning degrees, dropping from 621 in 2017 – 2018 AY to 532 in the 2018 – 2019 AY, where it remained during the 2019 – 2020 AY. This follows the trend being experienced by other UHCC campuses on Oahu, with Kapiolani, Windward and Honolulu seeing decreases of 19.2%, 11.8%, and 8.7%, respectively, over the last three academic years.

3. Program Student Learning Outcomes or Unit/Service Outcomes

List of the Program Student Learning Outcomes or Unit/Service Outcomes

- Develop, support, and communicate ideas to a particular audience through writing.
- Develop, support, and communicate ideas to a particular audience through speech and writing.
- Apply quantitative reasoning to solve problems, interpret answers, and communicate results.
- Use critical thinking to address issues and solve problems.
- Find, evaluate, and use information.
- Use the concepts, theories, and methodologies in arts, humanities, natural and social sciences to examine natural phenomena or to evaluate human experiences.
- Describe and analyze the nature of culture and its variations, past and present.

Program or Unit/Service Outcomes that have been assessed in the year of this Annual Review.

The third PLO---Apply quantitative reasoning to solve problems, interpret answers, and communicate results---was assessed during the 2019 – 2020 AY.

Assessment Results.

Using student work from Fall 2019, several Math faculty members assessed MATH 100 (with developmental course as co-requisite) and MATH 103. Separate assessment tools were used to assess each of the Quantitative Reasoning (QR) criteria as stated in the QR General Learning Outcome:

1. Choose and apply appropriate models to solve quantitative problems.
2. Solve computational problems.
3. Select and/or use appropriate numeric, symbolic, graphical, and/or statistical reasoning to interpret, analyze, or critique information and draws a conclusion.
4. Express quantitative information symbolically and/or graphically, in written or oral language.

<table>

</tr>
<tr>
<td>Criteria 4</td>
<td>Parabola Quiz</td>
</tr>
</tbody>
</table>

For Math 103, 20 artefacts were scored on a scale of 4 – 1 (4 being the highest score). The results are as follows:
For the MATH 100 assessment, two sections were assessed, one of which is a face-to-face emporium-style course with a co-requisite and the other an online five-week course without a co-requisite. Based on the assignments in the emporium-style course, only criteria 2 - 4 were assessed. All four criteria were assessed for the five-week course. For each section, 10 artefacts were assessed and scored on a scale of 4 – 1 (4 being the highest score). The results are as follows:

### Emporium-style course (face-to-face)

Math faculty determined that, overall, the assessment results for QR were satisfactory.

For the next round assessment, Math faculty will work together to determine an appropriate assessment problem(s) for assessing criterion 1 for the MATH 100 emporium course.

In both of the sections of MATH 100 that were assessed only 60% of the students met criterion 4. Currently, only MATH 111 (Math for Elem Teachers I) has ENG 100 as a prerequisite. Because many MATH 100 and 103 students have not yet taken an English course, it can be challenging for them to express their solutions clearly in written format. Therefore, Math faculty are considering creating an ENG prerequisite for these courses.

### Division Assessment Analysis
Assessment has been ongoing within the four Arts and Sciences (A&S) divisions and results generally indicate that students are meeting or exceeding the proficiencies within the Student Learning Outcomes (SLOs) that are assessed. The tables below present aggregate assessment data for the ten highest enrolled courses in each of the four A&S. The far right column indicates which PLO correlates to the SLO that was assessed. Each PLO has been abbreviated according to its primary learning proficiency (see below). All of the assessment done across the four divisions was summative.

- Assignment: 100% of students received a grade of C or better;
Assignment: 90% of students demonstrated full or partial mastery of SLO.

- Assignment: 100% of students received a grade of C or better;
Assignment: 86% of students demonstrated full or partial mastery of SLO.

The aggregated and averaged results from the assessment that was done during the previous academic year is promising. These results provide a snapshot of how proficient students are in meeting PLOs vis-à-vis course SLOs. For courses that used multiple measures to assess, PLOs were mapped to correlating SLOs and the scores that pertained to those specific SLOs were included in the overall average for each PLO. Average Scores have been rounded up.

<table>
<thead>
<tr>
<th>PLO</th>
<th>Courses Assessed</th>
<th>Number of SLOs Assessed</th>
<th>Average Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>WC</td>
<td>ENG 100, ENG 209</td>
<td>5</td>
<td>92%</td>
</tr>
<tr>

<td>ENG 22, ENG 209</td>
<td>3</td>
<td>97%</td>
</tr>
<tr>
<td>OC</td>
<td>JPN 101</td>
<td>1</td>
<td>100%</td>
</tr>
</tbody>
</table>
This represents a significant difference in the PLO assessment data for WC, OC, IL, CT, and AHS that was presented in the ARPD for the previous academic year (see below). CD has not been assessed, and QR was assessed this academic year.

<table>
<thead>
<tr>
<th>Program Learning Outcomes Assessed in AY 2018 - 2019</th>
<th>Percentage Meeting or Exceeding Proficiency</th>
<th>Difference from SLO Assessment for AY 2019 – 2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>Written Communication</td>
<td>62</td>
<td>92% = +30%</td>
</tr>
<tr>
<td>Oral Communication</td>
<td>81</td>
<td>97% = +16%</td>
</tr>
<tr>
<td>Critical Thinking</td>
<td>60</td>
<td>83% = +23%</td>
</tr>
<tr>
<td>Information Literacy</td>
<td>61</td>
<td>97% = +36%</td>
</tr>
<tr>
<td>Arts, Humanities and Sciences</td>
<td>58</td>
<td>82% = +24%</td>
</tr>
</tbody>
</table>

Although there are many factors that can account for this significant difference in assessment scores, the difference underscores the need for regular division-level assessment, discussion regarding assessment practices, and the comparison of assessment results with pass rates. Regular, on-going course SLO assessment will allow for closer monitoring of PLO attainment.

4. Action Plan

The college is pursuing initiatives aimed at student retention and degree completion. College pathways have been introduced and counseling teams are focusing on how to better meet the needs of our students, many who are part-time students. In addition to traditional face to face classes, options such as hybrid and online courses are being offered. Leeward Community College is also offering five-week online courses in the Liberal Arts.

Below are objectives organized by the Leeward CC Strategic Plan, 2015-2021. The tables below present the five major goals of the Strategic Plan, which are each divided into specific objectives. The steps that each of the four academic divisions that offer classes for the Liberal Arts Program---Language Arts, Arts and Humanities, Social Sciences, and Math and Sciences---have taken for each objective and their proposed action plans for each objective have been provided. The same information for the Waianae Moku campus has been included within the table as well.

Note: “n/a” indicates that no data or response was reported for a particular objective.
**Goal 1: Hawai‘i Graduation Initiative: Increasing enrollment and completion rates while reducing time to completion**

**Objective:** Accelerate time to “college-ready” status for students at one or two levels below the college ready standard

<table>
<thead>
<tr>
<th>Division</th>
<th>Steps Taken (AY 2019 – 2020)</th>
<th>Action Plan for upcoming AY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Language Arts</td>
<td>• Offered the Accelerated Learning Program (ALP ENG 100/ENG 22) for students at one level below college ready&lt;br&gt;• Offered ENG 24 for students at two levels below college ready&lt;br&gt;• Offered ENG 98B and Transitional English Pathway (TEP ENG 22/ENG 100) for students at two levels below college ready&lt;br&gt;• Offered an accelerated course sequence for English language learners: ESL 18, 19, 21, and 22&lt;br&gt;• Provided embedded peer support for ENG 24, ENG 98B, and TEP ENG 22/ENG 100 students via the division’s Peer Mentor Program</td>
<td>• Continue offering the Accelerated Learning Program (ALP ENG 100/22) for students at one level below college ready&lt;br&gt;• Continue offering ENG 24 for students at two levels below college ready&lt;br&gt;• Continue offering ENG 98B and Transitional English Pathway (TEP ENG 22/100) for students at two levels below college ready&lt;br&gt;• Continue offering accelerated course sequence: ESL 18, 19, 21, and 22&lt;br&gt;• Continue providing support for Peer Mentor Program</td>
</tr>
<tr>
<td>Arts and Humanities</td>
<td>Arts &amp; Humanities instructors teach many courses in the Early College Program.</td>
<td>Continue to offer Early College courses based on requests.</td>
</tr>
<tr>
<td>Social Sciences</td>
<td>Division offered courses in Early College Program at high schools in the college’s service area, plus any high school that Early College has agreements with such with Sacred Hearts Academy in Kaimuki. For AY, 10 courses were offered.</td>
<td>Increase participation in Early College offerings from 10 courses/sections in 2019-2020 to 15 courses/sections in 2020-2021.</td>
</tr>
<tr>
<td>Math and Sciences</td>
<td>Creation of a 3-credit MATH 78B (two levels below college-level) co-requisite companion course for designated college-level non-STEM courses starting in Fall 2019. Students who would have ordinarily enrolled in MATH 75 now enroll in MATH 78B</td>
<td>The Mathematics program will continue to offer content courses covering developmental algebra, quantitative methods, introductory college-level mathematics, and co-requisite companion courses that provide just-in-time support for</td>
</tr>
</tbody>
</table>
concurrently with a college-level math course in the same semester so that they can complete their college-level math course in one semester rather than two.

**Objective:** Establish clear structured pathways for each degree for both full-time and part-time students

<table>

| Language Arts   | • Offered Early College courses, including ENG 100, ENG 200 (WI), ENG 204 (WI), SP 151, and SP 251 (WI) at Aiea HS, Campbell HS, Hawai‘i Technology Academy, Kapolei HS, Mililani HS, Pearl City HS, Sacred Hearts Academy, Wai‘anae HS, and Waipahu HS  

• Supported Running Start students enrolled in division courses                                                                                       | • Continue to offer Early College courses based on requests                                                                                     |
|                  |                                                                                                                                                                                                                                 | • Continue to support Running Start students enrolled in division courses                                                                  |
## Arts and Humanities

- **Courses offered:** Dual credit courses offered in Art, Asian Studies, History, Hawaiian Studies, Music, Philosophy, Religion and Theatre courses at various high schools, which include Aiea, Campbell, Leilehua, Waianae, and Pearl City.
- **Objective:** Continue to support dual credit programs in the early college program.

## Social Sciences

- **Courses offered:** Social Sciences courses participate in enrollment programs of Early College and On Track.
- **Objective:** Continue to offer classes for Early College and On Track students.

## Math and Sciences

- **Courses offered:** In fall 2020, M&S Division is offering 18 Early College classes. In spring 2021, M&S Division is offering 23 Early College classes.
- **Objective:** Continue to offer classes for Early College students.

## Waianae Moku

- **Courses offered:** Working with the Pu’uloa campus, the Early College Head Counselor based at the Waianae Moku campus organized and held information sessions at Waianae Coast high schools for students and parents. He also assisted in providing counseling services in conjunction with participating high schools.
- **Objective:** The head Counselor, Christopher Pokipala, will continue organizing informational sessions and work with the high schools in offering the appropriate courses.

### Objective: Coordinate programs with the DOE Adult Schools to align education and GED preparation courses with community college curricula.

- **Objective:** Identify new programs and opportunities that align with the community needs and workforce demands.
The Teacher Education Program (TEP) addresses the state’s need for teachers in the DOE. Its Associate in Science in Teaching (AST) degree prepares paraeducators to be in the classroom. TEP also has two licensure programs for CTE and SPED teachers as well as two CTE and SPED transfer (3+1) programs where student take 3 years at Leeward and the final year at Chaminade University.

SPED’s transfer program (3+1) waiting for approval from UHM and UHWO.

IIT is newest program in division.

The ICS program is adding a Cloud Support Specialty consisting of ICS 131 Introduction to Virtualization, ICS 215 Introduction to Scripting and ICS 284 Cloud Security to the AS ICS degree.

A Business Advisory Council is being organized to identify employment trends in the Waianae Coast for the next 10 years. Campus expansion is being planned based on the EMSI employment report funded by the CTE Dean.

The Business Advisory Council will meet during the upcoming year to start long-range planning utilizing the current facilities and identifying best use of the remaining unrenovated portion of the campus.

Goal 4: Modern Teaching and Learning Environments: Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments

Objective: Continue to execute energy reduction strategies and sustainability programs.

| Social Sciences | The Teacher Education Program (TEP) addresses the state’s need for teachers in the DOE. Its Associate in Science in Teaching (AST) degree prepares paraeducators to be in the classroom. TEP also has two licensure programs for CTE and SPED teachers as well as two CTE and SPED transfer (3+1) programs where student take 3 years at Leeward and the final year at Chaminade University. | SPED's transfer program (3+1) waiting for approval from UHM and UHWO. |
| Math and Science | IIT is newest program in division. | The ICS program is adding a Cloud Support Specialty consisting of ICS 131 Introduction to Virtualization, ICS 215 Introduction to Scripting and ICS 284 Cloud Security to the AS ICS degree. |
| Waianae Moku | A Business Advisory Council is being organized to identify employment trends in the Waianae Coast for the next 10 years. Campus expansion is being planned based on the EMSI employment report funded by the CTE Dean. | The Business Advisory Council will meet during the upcoming year to start long-range planning utilizing the current facilities and identifying best use of the remaining unrenovated portion of the campus. |

Goal 4: Modern Teaching and Learning Environments: Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments

Objective: Continue to execute energy reduction strategies and sustainability programs.

| **Math and Science** | Construction has been ongoing on the renovation of four (4) lecture-style classrooms located in our Physical Science (PS) and Biological Science (BS) buildings. Scope of Project: Complete demolition and renovation of classrooms PS 201A, PS 201B, BS 208A, and BS 208B. In addition, the project includes the renovation and construction of a covered lanai area that will span the existing walkway between the PS and BS buildings. Duration of Project: Onsite work will began June 1, 2020. Work is expected to take between 9- and 12-months to complete. Use of the new classrooms and lanai area scheduled for the Fall 2021 Semester. | The college has chosen three main projects for the Title III renovation project:  
1. New Shadehouse  
2. Accessibility on lower campus  
3. MS 102 lab space  
This will hopefully start in spring 2021. |
| **Waianae Moku** | 8 84” touch screens were purchased allowing for placement in each classroom. Training was provided to faculty in order to utilize the touch screens. | Faculty participate in EMC sponsored training during Summer breaks and when possible via online platforms. |

**Objective:** Develop a professional development and certification program for online instructors to master online teaching techniques and share best practices.

The Dean of CTE funded an analysis and review of employment trends in the upcoming 20 years and is sharing that with appropriate academic programs.

The Business Advisory Council will meet during the upcoming year to start long-range planning utilizing the current facilities and identifying best use of the remaining unrenovated portion of the campus.

AA Program Review Committee

The previous assessment cycle, which concluded in 2018, focused on four General Learning Outcomes (GELOs): Written Communication, Critical Thinking, Information Literacy, and Arts, Humanities and Sciences. Since there were no areas of concern for the latter two outcomes, no action plan was formed.

AA Program Review Committee co-chairs Eunice Brekke and Jeremiah Boydstun and Accreditation Liaison Officer Jayne Bopp hosted a Fall 2019 Convocation break-out session “Assessing GELOs: What Did We Learn about Students and Their Learning?” in order to present assessment data to faculty and solicit ideas on how to make the data actionable. While a number of ideas and questions were shared, many of the faculty who attended the break-out session were more interested in learning about the assessment methodology that the AA Task Force used to assess GELOs. Ultimately the break-out session was effective in making the work of the AA Task Force transparent, but not very effective in garnering the type of feedback that could have led to useful, practical action plans for assessment data.

During the Spring 2020 semester, AA Program Coordinator co-chairs Eunice Brekke and Jeremiah Boydstun, in collaboration with Jayne Bopp, the Accreditation Liaison Officer, devised the Critical Thinking Cohort Initiative in order to address the relatively low aggregate score of the Critical Thinking GELO. Working with each of the Arts and Sciences division chairs, Jeremiah coordinated the formation of two-person, faculty-led cohorts for each of these divisions. The mission of these cohorts was to engage in inter- and cross-disciplinary discussion of and professional development on issues pertaining to critical thinking pedagogy ultimately as a means of improving our students’ abilities to practice critical thinking.

Jeremiah met with each of the cohorts during the Fall 2020 semester and is currently working with the Innovation Center for Teaching and Learning (ICTL) to plan professional development activities that put some of the ideas shared by the cohorts into action. Jeremiah will also be working with the ICTL to help plan professional development activities in order to address the lowest scoring measure of the Written Communication GELO (Develop appropriate content to support position, thesis or central idea).

During the Fall 2020 semester Jeremiah and Jayne, who had now taken over as the Interim Coordinator for the Office of Planning, Policy, and Assessment, met and devised an action plan for the AA Liberal Arts Program that will take future assessment activities in a new, much more efficient, direction. We will move away from assessing GELOs and instead focus assessment efforts on Program Learning Outcomes (PLOs),

\[1\] 57% of students were able to “Develop a position, thesis, or central idea on the issue or problem”; 55% were able to “Analyze the problem”; and only 49% were able to “Evaluate stated position, thesis or central idea on the issue or problem.”
which are more or less identical to the college’s GELOs. Jayne will work with administration to have the GELOs removed altogether since they are essentially redundant. The college’s PLOs already tie directly into the Institutional Learning Outcomes (ILOs), so having an extra layer of outcomes simply does not make sense.

The new method of assessment, which will take place during the 2021 AY, will rely on mapping, which will connect certain groups of courses to specific PLOs. Specifically, the mapping will focus courses that hold a Focus, Foundation, or Diversification designation, since these designations correlated directly with the PLOs. The rationale for this is simple: these courses are required to graduate with an AA Degree. To receive a designation, courses must go through an application process and regular review to ensure the meet designation hallmarks. Since designation hallmarks can be easily mapped to our PLOs, the assessment itself will use student pass rates for courses bearing these designations to assess the Liberal Arts AA degree.

As Jayne pointed out, this strategy will be more effective because it is so efficient; our current method of assessment on a five-year cycle is simply not efficient, requiring as it does the collection of artefacts, the creation and use of rubrics, the norming to those rubrics, and the assessment, etc. is, at least for program-level assessment, simply too much work. We can easily assess each PLO more often with this new method. Course mapping is also how most of the other UHCC campuses assess their Liberal Arts degree.

5. Resource Implications

The needs of the program are filtered through the Divisions and are articulated in the Planning Lists developed through the Annual Program Reviews.
Date: May 5, 2021

To: Michael Oishi, Leeward CC Faculty Senate Chair

From: Michele Mahi, Leeward CC Faculty Senate Assessment Committee Chair

Subject: Faculty Senate Assessment Committee 2020-2021 Academic Year Report

Assessment Committee Mission:

1. Communicate: Review and make recommendations to the Faculty Senate on policies and procedures relating to assessment.
2. Facilitate: Work with the Administration and the Office of Planning, Policy, and Assessment to facilitate the assessment process and establish a culture of assessment.

Assessment Committee Membership:

1. Jayne Bopp, Interim Coordinator for the Office of Planning, Policy, and Assessment
2. Petersen Gross, Assistant Professor of ICS and Curriculum Committee Chair
3. Adam Helemano, Institutional Assessment Specialist
4. Michele Mahi, Assistant Professor of Speech and Assessment Committee Chair

Assessment Committee Meeting Dates:

1. Wednesday, September 23, 2020
2. Monday, January 4, 2021
3. Wednesday, January 6, 2021
4. Thursday, January 14, 2021
5. Tuesday, January 19, 2021
6. Monday, February 8, 2021
7. Wednesday, February 24, 2021
8. Thursday, March 4, 2021
9. Monday, March 8, 2021
10. Thursday, March 11, 2021
11. Thursday, March 18, 2021
12. Thursday, March 25, 2021
13. Thursday, April 1, 2021
14. Thursday, April 8, 2021

Motions Proposed to Faculty Senate:

During the March 10, 2021, regular meeting of the Faculty Senate, Michele Mahi, Chair of the Faculty Senate Assessment Committee, submitted the following Motion:

On behalf of the Assessment Committee, Senator Mahi moves to accept the proposed amendments to Policy L5.210.
Policy L5.210 (with strikeouts) and Policy L5.210 (amended clean copy).

The amended Policy L5.210 removed references to the General Education Learning Outcomes (GELOs). The Assessment Committee deleted GELOs references because the GELOs repeat the Program Learning Outcomes (PLOs) for the AA in Liberal Arts Degree. This duplication in Policy L5.210 created confusion and problems with assessment and accreditation.

The Faculty Senate approved the motion and accepted the amended policy on April 14, 2021.

Assessment Committee Accomplishments:

1. The Assessment Committee presented a workshop at the Spring 2021 Convocation: Teaching and Learning: Using Signature Assignments to Assess Student Learning. The workshop covered aligning learning activities to course and module learning outcomes and using signature assignments to assess student learning. Twenty-five faculty and staff members participated in the workshop.

2. The Assessment Committee revised the 2020-2021 Assessment Report. To better reflect Policy L5.210, courses were only marked as up to date on assessment reporting if a course had all student learning outcomes (SLOs) assessed in the past five years. Previously, if a course had one SLO assessed, the Assessment Committee marked the course as assessed. The change resulted in a decrease in the number of courses assessed; however, the report is now more accurate. Additionally, the Assessment Committee added the following information to the report:
   a. The number of SLOs listed on KSCM for each course
   b. The number of sections taught in the past five years for each course
   c. The instructors who taught the class in the past five years for each course
   d. The last semester the college offered each course
   e. Additional notes such as course missing from KSCM, no SLOs listed on KSCM, courses not taught in the past five years, and other pertinent information.

3. The Assessment Committee continued to use the Course Assessment Google Form to collect assessment data while waiting for Anthology. On the Google Form, instructors reported the following information: Name, division, course, academic term, delivery method, assessment measurement tools, number of students assessed, number of students meeting outcomes, and an analysis of the assessment process. From Fall 2020 to the date of this report, May 5, 2021, instructors submitted assessment data for 276 SLOs.

4. The Assessment Committee also created Discipline Assessment Google Docs for each discipline and emailed those documents to the discipline coordinators and their respective division chairs. The Google Docs included the following information:
   a. List of all courses in the discipline
   b. SLOs for each course as found on KSCM
   c. Number of sections offered for each course in the past five years
   d. List of instructors who taught each course in the past five years
   e. Last semester the college offered the course
   f. Notation whether the discipline assessed the course in the past five years.
For each course missing SLO assessment data, the Assessment Committee invited the discipline coordinator to work with course instructors to complete a table that includes the required SLO assessment information. Once Anthology, Leeward’s new assessment management software, runs, the Assessment Committee will hold training sessions and show instructors how to input the data from the Assessment Google Doc into Anthology. From the launch of these files in Spring 2021 to the date of this report, May 5, 2021, instructors submitted assessment data for 184 SLOs using these Google Docs. Using a combination of the Course Assessment Google Form and the Discipline Assessment Google Docs, the Assessment Committee collected assessment data for 460 SLOs. Last academic year, the Assessment Committee only collected data for 208 SLOs.

5. The Assessment Committee worked with Janel Oshiro, Leeward CC Banner Specialist, Tao Feng, Leeward CC Institutional Analyst, and members of Anthology Support to set up Anthology, the new assessment management software our campus will be using. The Assessment Committee expects Anthology to start operating in the Fall 2021 semester.

Assessment Committee Goals/Priorities for the 2021-2022 Academic Year:

1. Launch Anthology, our new assessment management software.
2. Create training sessions for the campus on how to use Anthology.
3. Develop workshops on assessment to further encourage a campus culture of assessment.
4. Increase the percent of courses with all SLOs assessed in the past five years.
UH System-wide General Education Redesign

The University of Hawai‘i at Mānoa last revised its general education curriculum in 1999 and after more than 15 years, that curriculum has now been adopted system-wide. With one exception (the transition to quantitative reasoning), little has changed in either the structure or content of the curriculum. Meanwhile, the state of the world as well as higher education has substantially transformed. It is now time to envision a new general education curriculum for the entire University of Hawai‘i (UH) system to prepare our graduates for the world in which they will live.

UH Mānoa commissioned an external review of general education, which provides valuable insights and recommendations. And all ten UH campuses have agreed to participation in the (WICHE) Interstate Passport program, a multi-state faculty-developed approach to base general education transfer on learning outcomes and proficiencies rather than specific courses and credits. These both provide valuable background, and the Mānoa General Education Committee has begun work on recommendations for reform. It is clear to all today that this work has implications across the UH system. With the support of faculty governance groups, I am therefore charging a system-wide working group to develop a plan for reform of general education at UH both substantively, what skills and competencies comprise general education, as well as structurally, how general education is organized and the
Project Parameters

The starting assumption for a new general education curriculum must be how best to prepare our students for the uncertain future facing them. We must identify and articulate what our students need to know, be able to do, and value so they can be knowledgeable and contributing citizens in the complex, diverse, information-driven and interconnected world within which they will live and work. UH needs a general education curriculum that will prepare them for this world's challenges, and the many careers, not just jobs, and life experiences they are likely to face. From issues of civic engagement, sustainability, resilience, data analytics, critical thinking, effective communication, teamwork and much more, we need to ensure that we have created a general education curriculum that prepares our students to flourish and lead in the wide range of possible worlds before them.

The key guidelines that will structure the work of the UH General Education Curriculum Design Team, and shape our future General Education curriculum, are:

- To make the general education curriculum more understandable and efficient for students (fewer credits required) without diminishing its effectiveness.
- To make administration of the curriculum less bureaucratic, reducing the work required by faculty to manage general education coherently across the UH System.
- To design a curriculum that scaffolds learning throughout matriculation.
- To design a curriculum that ensures the key 21st-century competencies and knowledge necessary for all UH graduates to succeed in the workplace and society.
- To emphasize an interdisciplinary and integrated approach to learning, with consideration of project- and problem-based learning.

General Education Guiding Principles
(Guardrails)

The task of redesigning UH's General Education Curriculum will occur within a network of already existing guidelines, including the ILOs for each institution, and accreditation standards. When charging a faculty group to the redesign principle, the President established some guiding principles to help focus the work:

1. To make the general education curriculum more efficient without diminishing its effectiveness.

2. To make the curriculum less bureaucratic and more easily administered.

3. To design a curriculum that is intuitive for students.

4. To design a curriculum that scaffolds learning.

5. To focus on what the UH System believes are the key competencies necessary for all UH graduates.

6. To emphasize an interdisciplinary and integrated approach to learning.

7. To design a curriculum that is oriented towards 21st century knowledge and skills.
For more information about how participants for the Summer 2021 General Education Summer Institute were recruited and selected, see the UH General Education Curriculum Design Team: Recruitment and Selection Process page.

For more information about the Summer 2021 General Education Institute and general timeline and process for this Systemwide General Education Redesign initiative, please see the Summer Institute page.

Gen Ed redesign presentation

Contact

✉️ gedesign@hawaii.edu

Last modified: January 27, 2022
In its *Strategic Directions: 2015-2021*, the University of Hawaii Community College System (UHCC) has outlined the way it intends to continue “creating higher education opportunities for Hawai`i’s citizens.” Five goals are identified on page 3:

- **Hawai`i Graduation Initiative** - increasing the number of graduates and transfers and on the momentum to get students through to graduation and transfer more quickly.
- **Hawai`i Innovation Initiative** - workforce development linked to developing emerging sectors in Hawai`i’s economy while simultaneously providing a stable workforce for the traditional employment sectors.
- **Modern Teaching and Learning Environments** - ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments.
- **High Performance Mission-Driven System** - practices and policies that capitalize on the University of Hawai`i being a single system of higher education in the state that can provide students with smooth transitions from K-12 through the community colleges to the baccalaureate institutions in the most productive, cost-effective, and results-oriented manner possible.
- **Enrollment** - the identification and goals for targeted currently underserved populations.

In Fall 2015, the Strategic Plan Update Committee of Leeward Community College held “focused conversations” to start the process of updating our strategic plan. The conversations enabled the campus to align our planning with the system’s Strategic Directions and to generate broad campus input from a diverse group of Leeward faculty and staff on key topics that currently affect Leeward’s students and their ability to complete courses, programs and/or transfer successfully. ([Strategic Plan](#))

In Spring 2016, faculty, staff, and administrators were invited to “suggest strategies” for implementing the directions. And as a results of those discussions, in Fall 2016, the system directions were adopted, adapted and recast in Leeward’s *Strategic Plan 2015-2021*, and more specific goals integrated into the planning process.

Because the college’s strategies and goals are aligned with the system’s directions and performance requirements, data provided by the UHCC system indicate the progress of the college.

**Mission and Goals**

Leeward has aligned its mission and goals with the UHCC’s Hawai`i Graduation Initiative, and so continues to implement policies and practices that will increase enrollment and graduation rates while reducing time to completion.
One factor has dominated the prospect of the system: the enrollment decline. UHCC enrollment peaked in 2010 and has been slipping for seven years.

Although UHCC enrollment in Fall 2017 was still about 6% higher than the enrollment in Fall 2007, the net decrease since 2010 was about 20%.

Leeward’s enrollment leveled off between Fall 2010 and Fall 2013. But thereafter, its drop paralleled the system’s. The headcount in Fall 2017 was about 16% higher than in Fall 2007, but the net decrease since 2010 was about 14%.

To fulfill its mission and respond to the enrollment decline, the UHCC system has focused on five target groups:

- Recent high school graduates (those enrolling in the first fall after high school graduation)
- Working age adults (25-44)
- GED recipients
- Pacific islanders
- International students

University of Hawaii Community Colleges Strategic Directions 2015-2021
PowerPoint Presentation, Fall 2017, http://www.uhcc.hawaii.edu/ovpcc/vp-corner
Leeward has also focused on
- Dual enrolled students (students enrolled in college courses while still in high school)
- Distance education students (first-time, freshman)

Enrollment in the three largest groups has continued to fall.

However, enrollment seems to have increased where people have assigned responsibility for clearly defined populations and efforts are directed toward building enrollment.
There has been a 7% net increase in Pacific Islanders since 2014. They are recruited locally. But currently only one faculty member is responsible, part-time, for recruiting.

![Enrollment: Small Target Groups](image)

The number of international students has increased 45% since 2014. The director of Leeward’s Office of International Programs noted that “a big part of the increase” comes from the efforts of agencies that represent Leeward in foreign countries and connect with students there. But she and her staff visit such agencies when they travel abroad. They also go to recruitment fairs, conferences and seminars, high schools, and talk directly to students, parents, and counselors.

While the Educational Media Center (EMC), which has responsibility for Distance Education (DE) classes, has not made any extraordinary efforts to market DE classes, it monitors and evaluates the performance of DE classes and trains DE instructors. This past year, its Annual Report of Program Data (ARPD) shows that the number of instructors EMC has trained has risen from 95 in 2014 to 131 in 2017, an increase of 38%. Increasing the number of trained instructors means that more DE classes will be available and that leads to growth in the number of DE students—a net increase of 29% over the last three years.
The Early College (EC), or dual-credit, program has had the largest growth: 72% in the last three years.

That growth has resulted partly from what is sometimes seen as “natural” demand arising in the high schools. But the college has invested personnel, time, and much energy in establishing memos of agreement with high schools on Oahu, arranging classes for the dual-enrolled high school students, maintaining course quality, expanding offerings, and providing support for the EC students (see the 2016 Comprehensive Review and Evaluation (CRE) for Student Services, pages 4, 7-8).

However, it has not produced two of the benefits hoped for:

- Influencing high school students who were “on the fence” about enrolling in college or university. Of interest were students who might be hesitating to enroll in post-secondary institutions, especially for economic reasons. We had hoped the early exposure to community college classes and the kinds of support—economic and academic—that high schools and colleges can provide would increase the going rate to post-secondary education.

- High school students enrolling in a UH community college—like Leeward—that had been offering dual-enrollment classes at the high schools or through reserved sections at the college.

Hundreds of high school students enrolled in Leeward classes. However, initial data (for the first fall enrollment of the Class of 2016) also show us that, compared to students who did NOT take dual-credit classes, EC students are

- 32% LESS likely to enroll in a UHCC as regular students,
- 30% MORE likely to enroll in a 4-year institution in Hawaii, and
- 19% MORE likely to enroll in a Mainland 4-year institution.
Many of the students who took dual-credit courses while still in high school intended to go to college anyway. They were using the program to accelerate their progress.

Leeward’s EC coordinator points out that EC has clearly benefited high school students, preparing them “so well that, upon matriculation, they feel more ready to go straight to a 4-year institution,” either in the UH system or on the Mainland. Accelerating progress of college-bound high school students is still a desirable outcome.

Some data indicate that a large proportion of dual-credit students were not economically disadvantaged. They may have come from families that could bring ample resources to bear on their children’s education.

An analysis based on information from the Department of Education (Hawaii DXP, LEE Tables 20170717-325 from Hawaii DXP.xlsx) shows that, the percentage of EC students not economically disadvantaged ranged from 52% (EC participants in the graduating class of 2013) to 61% (graduating class of 2015). But those numbers also mean anywhere from 39% to 48% of the participants were classified as economically disadvantaged. An average of 43%--not a small part of the population.

In other words, the Early College Dual-Credit program is not producing all the results which it was intended to produce. Nevertheless, the unintended results are still desirable and significant.
**Put a WIG on It**

The UHCC system also recognizes the importance of providing students with a “coherent and structured” educational experience, which greatly improves their chances of success. To that end, it has launched its Student Success Pathway model: “[It] is not the next step in a long line of reforms, but rather a framework that helps unify a variety of reforms” (from the home page of the [Student Success Council](https://studentsuccess.uhcc.edu) website).

In the past, large-scale reforms have generated a cloud of various goals, objectives, experiments, and innovations, in which effective reform gets lost. To prevent that from happening, Leeward has established a focus—a Wildly Important Goal. The current WIG is a much more intentional and focused resurrection of Leeward’s five-year Student Success Initiative, initially launched in 2010 and evaluated in 2014.

Complementing the effort to increase enrollment, WIG zeroes in on one thing: retention—keeping students who are already enrolled and steering them to completion and transfer.

Initially, retention may be seen as driven by economics, but as one researcher points out (Neal Raisman, “The Power of Retention” in *University Business*, 2008), retention is integral to accomplishing an institution’s mission:

> Retention is where the real revenue is created. Admissions costs money - significant amounts of money. Retaining students/clients costs from nothing to very little. Retaining students through graduation is also how colleges, universities and career schools meet their higher calling, their missions, their purpose and reason to exist and be supported. Students and learning are still the key publicly conceived rationale for higher education. Granted the old saying “this would be a great place to work if it weren't for the students” is still out there. But without the students, undergraduates primarily, there would be no place to work. Society supports higher education because it believes college prepares students for the economy, for society and for life.

To figure out how this goal will be implemented, a sixteen-member WIG Design Team has been formed, consisting of counselors, administrators, faculty, and staff. It began monthly meetings this semester. Its first task will be to gain a better understanding of how and where we lose students, then develop an integrated network of people, policies, processes, and practices that will increase retention and persistence by 10% in the coming year.
Strategic Directions, Performance

The UHCC System has identified various measures of outcome on which our funding is based. Comparing our actual outcomes with the “targets” set and the ultimately the fund awarded is one way to evaluate Leeward’s performance.

[NOTE: Unless otherwise indicated, the data come from University of Hawaii Community Colleges Strategic Directions 2015-2021, PowerPoint Presentation, Fall 2017, http://www.uhcc.hawaii.edu/ovpcc/vp-corner]

1. Graduation Outcomes: Numbers of Degrees and Certificates of Achievement Awarded in a Fiscal Year (targets based on an average of FYs 2013-2015, then a 5% increase every year)

<table>
<thead>
<tr>
<th></th>
<th>FY 2014</th>
<th>FY 2015</th>
<th>FY 2016</th>
<th>FY 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>LEE (Target)</td>
<td>661 *</td>
<td>953 **</td>

</tr>
<tr>
<td>LEE (Actual)</td>
<td>1,090</td>
<td>1,000</td>
<td>1,057</td>
<td>1,019</td>
</tr>
</tbody>
</table>

* Old Target ** Revised Baseline

Overall, the performance appears weak. However, note the 44% jump in the Target number in 2015. The baseline was revised in 2015 because the policy of automatically awarding associate in arts degrees when students completed requirements after leaving the college—so-called Reverse Transfer—was implemented in 2014. Hundreds of AA degrees were awarded that year, many to students who had not been enrolled at the college for years. An unintended effect of the revised baseline will be discussed later in the section on Performance Funding.

When we disaggregate the various target groups, the results are, for the most part, encouraging:

<table>

<td>502</td>
</tr>
<tr>
<td>LEE (Actual)</td>
<td>542</td>
<td>480</td>
<td>518</td>
<td>527</td>
</tr>
</tbody>
</table>
In three of the four groups—Native Hawaiians, Filipinos, and PELL Recipients—actual degree and certificate counts exceed the targets for the past four fiscal years.

The number of degrees and certificates falls below the target only in FY 2015 for Pacific Islanders, and they are a very small group.

2. **STEM Degrees and Certificates.** Completion is not an end in itself. Completion in STEM-related fields holds out the promise of better employment opportunities and higher wages, as well contributing to growing the economy of the state. The number of STEM-related degrees and certificates of achievement awarded has increased over 340% since 2014. Actual numbers have exceeded targets every year. The number of degrees and certificates awarded last year exceeded the target by 205%.

<table>
<thead>
<tr>
<th>STEM Degrees &amp; CAs</th>

<td>42</td>
</tr>
<tr>
<td>LEE (Actual)</td>
<td>29</td>
<td>66</td>
<td>133</td>
<td>128</td>
</tr>
</tbody>
</table>

And, of course, those percentages indicate that the target numbers should be recalibrated.

3. **IPEDS Success Rate for First-Time, Full-Time Students.** Since 2008, time to completion has also become a major concern. The longer students delay completion, the less likely they are to complete. So the rate of completion or transfer is a key measure of effectiveness. The percentage of students completing or transferring to a four-year institution within three years (150% of time) should be 50% by 2021. Presently Leeward’s rates are falling behind the targets set by the system:
In FY 2014 and 2015, Leeward’s IPEDS Success Rate (percentage completing or transferring to a four-year institution within three years) almost met the targets. Then over the next two years, the gap increased to three or four percentage points.

Since this measure is based on a cohort of first-time, full-time students, it is not affected by the Reverse Transfer numbers. It is perhaps a more accurate reflection of what is happening institutionally in “real” time. The current numbers show us that student completion and transfer rates might be moving upward, but slowly and unsteadily.

4. Transfers to ALL Baccalaureate Institutions

Leeward’s transfers have been decelerating in terms of numbers of transfers and rates of increase.
Strategic Direction, Performance and Performance Funding 2017 - 2018

The following tables summarize how Performance Funding was allocated in fiscal years 2017 and 2018. The allocations are based on six measures, which are tied to the Strategic Directions of the UHCC System.

Two factors adjust how much of the total funds are actually allocated to the college:

1. The weight put on the category of performance. The number of degrees and certificates, for example, has more weight (35 out of 100 points) than the number of Pell Grant Recipients (10 out of 100 points). The weighting controls what percentage of the total funds can possibly be allocated for the category of performance. A total $1,000,000 might be allotted to the college, but 35/100 of that amount—$350,000—could possibly be allocated for number of degrees and certificates awarded.

2. The difference between the actual and baseline and the difference between the target and baseline, expressed as a percentage, then determines the amount of funds actually allocated to the college.

The formula is

\[
\frac{(\text{Actual} - \text{Baseline})}{(\text{Target} - \text{Baseline})} \times 100
\]

The Target will always be larger than the Baseline.

The upper limit is usually restricted to 100%. If the Actual is larger than the Target, the % defaults to 100%. All the funds allotted to the category would be allocated to the college.

If the Actual is equal to the Target, the percentage will be 100%, and all the funds allotted to a category of performance would be allocated.

If the Actual is less than the Target, the result will be a percentage less than 100%.

If the Actual should fall below the Baseline, the % will be 0%. In other words, negative percentages are not allowed.

In our hypothetical example, $1,000,000 is allotted to the college, 35/100 of that amount could possibly be allocated for number of degrees and certificates awarded. Then let’s say the baseline number is 900; the Target, 1,000; the Actual number of degrees and certificates, 975.

The amount actually allocated would be calculated in this way:

**Weighting:** $1,000,000 x (35/100) = $350,000

**%:** \((975 - 900) / (1000 - 900) = 75/100 = 75% \)

350,000 x 75% = 262,500

In this hypothetical example, the college will actually be allocated $262,500 for the performance category “Degrees and Certificates” awarded.
It will NOT receive $87,500. That is, $350,000 - $262,500 will be left behind. The UHCC system office labels that amount “unearned.”

[NOTE: There are two sources of funds each fiscal year—one from the UHCC system and one from the University of Hawaii (UH). Why?

The UHCC system started down the performance funding path in FY 2011, several years in advance of the UH system (FY 2016). With funds appropriated by the state legislature to fill the funding gap from the American Recovery and Reinvestment Act of 2009 (ARRA), the UHCC Vice-President set aside about $3.5 million of the appropriated funds from all community college campuses to create the performance funding pool. The colleges were then asked to meet performance funding targets to replenish the funding that had originally been part of their campus’ budget prior to the recession. The UH system didn’t begin implementing its model until the legislature appropriated funds specifically for that purpose. The UH system also examined what the UHCCs had done, but didn’t replicate the model 100%. The UH model is still evolving.

--Vice Chancellor of Administrative Services, Leeward Community College]

In FY 2017, Leeward was awarded nearly all of the money allotted by the UHCC and the UH systems, falling short in only one area: the IPEDS Success Rate.

</tr>
</tbody>
</table>
The shortfall was especially significant since the category of performance affected was time to completion and/or transfer. Leeward’s IPEDS Success Rate was indeed faltering, a little over 4 percentage points under the Targeted 37.0%.

For FY 2018, however, the college stands to lose not 3% of the total possible funds as it had in FY 2017, but 20% of the total possible funds. About 58% of the “Unearned” funding—$265,625—is being withheld because the college has fallen short of the targeted number of degrees and certificates awarded.

But perhaps the system needs to reconsider the way the Reverse Transfer (RT) program has affected funding.

The RT program was implemented in 2014. It automatically awards an AA degree to students who have not completed course requirements for a degree while they were enrolled at the college but who subsequently completed those requirements. The degrees are counted in the year they are awarded.

As a result, there was a surge in the number of degrees awarded in FY 2014. Leeward was credited with 224 additional RT degrees. But then that number was used to reset the baseline: the number with which future performance targets are computed. 953 was the target for FY 2015 and 1,001 the target for 2016, then 1,051 for 2017, etc. Each target 5% higher than the previous year’s.
The baseline is also used to compute the percentage of available funds the college will actually receive in performance funding. The percentage is the difference between the target and the baseline and the target and the actual number of credentials awarded.

The baseline went from 661 in FY 2013 to 953 (the average of the actual number of degrees and certificates awarded in FYs 2013-2015).

However, that average included the first two years of RT degrees, and those who set the targets seem to have assumed that the number of RT degrees awarded would remain fairly constant.

Actually, the number of RT degrees was bound to decrease. The first year RT was implemented would have swelled the number of degrees awarded because the system was awarding AAs to a decade or more of students who had not applied for AAs when they were enrolled at the college.

So Leeward got 224 additional degrees in 2014. And in 2015, 135 more RT AAs.

But after the initial swell, the number of RT degrees was bound to decline: in two years, we had caught up with 60% of a ten year backlog. The rest would be taken care of in 2016 and 2017.

And the number of RT degrees awarded shrank to 84 in FY 2017.

If the system had continued to use the AA degrees actually awarded during the Fiscal Years, even with an adjusted baseline in 2015 (the average of FY 2013-2015), the average annual gains over five years for Leeward would have been a little more than 5%, and the actual numbers would have exceeded the targets.

*Target adjusted: average of actual awarded in FYs 2013, 2014, 2015
But Still . . .

Even if the numbers of degrees and certificates might indicate satisfactory performance . . . Even if the disaggregated data show targeted sub-populations are being served . . . Even if STEM completions have exceeded expectations . . .

The performance funding outcomes clearly indicate that Leeward should be greatly concerned about two issues:

1. Transfers to four-year institutions
2. Time to completion and transfer.

What the Strategic Directions data—especially on enrollment—seem to indicate is that (unsurprisingly) we can make progress in areas that need improvement if we have

1. Clearly defined target populations,
2. People assigned responsibility for those populations, and
3. Efforts intentionally focused on producing specific results.

In other words, things don’t get better by themselves.
Goal & Objectives

The goal of the strategic planning team and affiliated committees is to guide the college in the revision of its vision, mission, and strategic plan.

1. Foster **renewed commitment** to the vision, mission, and each other.
2. Cultivate **collective direction** for successful implementation of the plan.
3. **Strengthen the capacity** of the campus community to implement the plan.

READY TO APPLY? CLICK HERE TO CHOOSE LEEWARD CC. (HTTPS://UHCC2022.LIAISONCAS.COM/APPLICANT-UX/#/LOGIN)

Be sure to submit your application by the Application Deadline (/app-deadlines)
**Purpose:** To prepare current faculty/staff for leadership positions at Leeward Community College.

**When:** Fall 2017 to Fall 2018 (18 month program)
Recruit participants in April.

**Format/Components**

1. Use a 360-evaluation tool for pre- and post-program assessment. Participants also complete a self-evaluation.
   Participants will:
   - Reflect on the results and identify leadership skills they want to improve.
   - Plan professional development sessions based on identified areas common to the group.
   - Complete Individual Development Plan template with plans for the participant’s future leadership development.

2. Plan, organize, and evaluate a leadership project.
   - Group will select a campus project from a list.
   - Conduct needs assessment by interviewing appropriate campus leaders.
   - Propose leadership project with plans and budget to administrators.
   - Plan, organize, and implement project.
   - Evaluate the project.

3. Participate in one-on-one mentoring sessions with University of Hawaii leader(s) of participant’s choice.

4. Program coordinators: Kay Ono, Business Division Chair and Cindy Martin, Professional Development Coordinator

**Selection Process:**

- Self-Nominate – application and approval of supervisor required.
- A committee selects four to six participants using a rubric.

**Cohort 2**
William Albritton, Assoc. Professor in ICS
Kathryn Fujioka-Imai, Assoc. Professor in English/Division Chair, Language Arts
Lori Lei Hayashi, Human Resources Manager, EEO/AA Coordinator and Deputy Title IX Coordinator for Employees
Tracie Losch, Associate Professor in Hawaiian Studies
Grant Okamura, Auxiliary Services Officer

**Project - Employee Satisfaction Survey**
Review, revise, administer, and report the results of an Employee Satisfaction Survey (similar to that conducted in 2011 and 2014). This project could also include open forums or other avenues for gathering employee feedback.

**Cohort 1**
Corey Adler, Asst. Professor in Sociology
Alicia Brown, Grants Coordinator
Lexer Chou, Student Life Coordinator
Michelle Igarashi, Instructor in English
Warren Kawano, Asst. Professor in Business
Christy Takamure, Assoc. Professor in Speech
Natalie Wahl, Librarian
Project - Leadership Retreat
Plan, organize, and evaluate a leadership retreat for campus leaders based on campus needs. Propose leadership workshop topics, venues, and budget to administrators. Develop and lead leadership retreat.

Employee Satisfaction Survey

Results from Fall 2019 and Fall 2016

Summary Report

OVERVIEW & PURPOSE
The college strives to provide valued employees with the facilities, tools, and support needed to excel in their positions. We conducted this survey to acquire a better understanding of employee morale, satisfaction, and engagement at Leeward Community College.

This survey was created by the 2nd Cohort of the Leadership Excellence Program (William Albritton, Kathryn Fujioka-Imai, Lori Lei Hayashi, Tracie Losch, and Grant Okamura) in collaboration with the Leeward Community College Office of Planning, Policy and Assessment.

DATA SUMMARY

Overall
The survey had 176 respondents in 2019 and 200 respondents in 2016. There are approximately 500 recipients that were emailed the survey. (Note that this list included active employees and retirees.)
Results

1. Which of the categories below best describes your work status and location at Leeward CC?

<table>
<thead>
<tr>
<th>Location</th>
<th>2019 #</th>
<th>2019 %</th>
<th>2016 #</th>
<th>2016 %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Faculty Leeward CC - Pearl City</td>

Program/Area/Unit Name: Administrative Services

Program/Area/Unit Description:
- This section should include a short paragraph that describes your program, area, or unit.
- Goals for your program, area, or unit should be listed in this section. A statement of purpose would also be appropriate.

The core purpose of Administrative Services is to provide quality services in support and advancement of the academic mission of Leeward Community College. Administrative Services primary responsibility is in providing stewardship over the human, financial, and physical resources of the College while maintaining a safe and healthy learning and working environment. As a comprehensive unit and at each departmental level, we continually strive to enhance the delivery of these services in a more efficient and effective manner.

Business Office: The mission of the Business Office is to maintain the College’s fiscal integrity through accurate record keeping and adherence to UH and State policies and procedures; to provide procurement, cashiering, fiscal, and payroll services to the campus; serve as campus liaison with the System Financial Management Office (FMO), Office of Procurement and Real Property Management (OPRPM), UH Foundation Office, and the Research Corporation of the University of Hawaii (RCUH); provide financial reports and analysis as required; and to safeguard the assets of the college.

Human Resources: The Human Resources Office is responsible for all aspects of personnel management and administration. The areas of responsibility are, but not limited to the following: recruitment and appointments; employee benefits; labor and employee relations; classification; position management, organizational charts and functional statements; worker’s compensation and temporary disability insurance; student employment; labor relations and collective bargaining contracts; EEO/AA and adverse actions.

Goals: provide excellent customer service; provide additional EEO trainings and workshops to the campus community; and encourage HR employees to attend EEO-related training and workshops off campus as allowable.

Enterprise Operations: The Enterprise Operations unit is responsible for a wide range of services that directly support the College and the public, to include; the management of all functions related to facility scheduling and usage, parking services, emergency operations and planning, lead liaison with state civil defense and FEMA-related matters, and campus security and safety.

Operations and Maintenance: The Operations and Maintenance unit is responsible for the day-to-day operations of the physical plant, parking lots, service roads, and grounds. The areas of responsibility include electrical, plumbing, carpentry, janitorial, grounds, mail service, and transportation services. The goal of the Operations and Maintenance unit is to provide a clean, safe, and welcoming environment for all students, faculty, staff, and visitors.
Part I. Quantitative Indicators:

- Identify 3-5 indicators for each of the following areas. These indicators should be measurable, useful data measures that will indicate how well your program, area, or unit is performing. Consult the IR staff if you need assistance identifying indicators.
- Each indicator should list three years worth of data, if available.
- Note: Administrative Services uses a variety of comparable measures and support area outcomes to manage and monitor the efficiencies and effectiveness of all areas and units. These measures and outcomes are highlighted below by area/unit.

UHCC Comparable Measures – Business Office

For FY 2013 A/R count and dollar amount does not include A/R outstanding more than 2 years as of 09/30/12 (only data for A/R less than 2 years was input into KFS).

*Note: RCUH Direct payments include, AFP, mileage reimbursements, petty cash replenishments and other direct payment transactions.

RCUH Payroll and other JV entries are processed by RCUH accounting staff, therefore, this is not a workload issue for CC staff.

** FY09 Non-payroll JV entries include manual JV transactions which include general, payroll, and 12th month accrual JVs.

Departmental checking system discontinued during FY 2012

Effective FY 2013 PO amendment, close, reopen, and void counts are included.
Effective FY 2013 AFP count does include disbursement voucher for check payment (DV/INV), wire transfer (DIV/FW), and non-check disbursements (ND)
Effective FY 2013 AFP payment request counts are included (PREQ auth for payment from RO).
Effective FY 2013 Non-Payroll JV - Internal Billing/Rev Billing counts are included.
Effective FY 2013 Non-Payroll JV - Internal Billing/Service Billing counts are included.
Effective FY 2013 Out-of-State Travel counts include origin 01 edocs from KFS and origin TV edocs from eTravel, exclude travel transactions
Effective FY 2013 Out-of-State Travel counts include origin 01 edocs from KFS and origin TV edocs from eTravel, exclude travel transactions

UHCC Comparable Measures – Enterprise Operations

There are no specific UHCC Comparable Measures that have been developed for the types of services that fall under the purview of Enterprise Operations. However, other sources of data provide a variety of measures that point to unit effectiveness and efficiencies. Examples include:

1. Annual Security Report for Clery Act crime data
2. Campus Security Incident Statistics
3. Facility Use requests for room and facility scheduling
4. Facility Use rental agreements

These measures, and others, will be reviewed for possible incorporation into future ARPD reviews.

Definitions:
2. Janitor FTE includes permanent and temporary positions, all funding sources, filed at fiscal year end (6/30/XX) - Campus records
4. Groundskeeper/Laborer FTE includes permanent and temporary positions, all funding sources, filed at fiscal year end (6/30/XX). Laborer FTE determined by campus based on percentage FTE assigned groundskeeping duties - Campus records
6. Building Maintenance FTE includes permanent and temporary positions, all funding sources, filed at fiscal year end (6/30/XX) - Campus records
8. Includes Head Maintenance Supervisor and clerical staff
Support Area Outcomes (SAO) and Assessment

- If assessment results have been entered in Tk20, please attach a copy of the report.
- If assessment results have not been entered in Tk20, please provide a summary of assessment activity and results for the past year.

### Business Office:

1. Training workshops for campus users on Travel, p-Card procedures, Requisitions and Purchase Orders, and Budget Reports.
2. Business Office provides quality service to both, Leeward campus and the campus community.
3. Consistent compliance with the UHCC Policy 8.200, Financial and Operational Oversight of Revenue Generating Programs.

### Enterprise Operations:

To be determined

### Human Resources:

1. EEO training and workshops presented on campus: 2016: 24; 2017: 49
2. EEO training and workshops HR employees attended: 2016: 12; 2017: 9

### Operations and Maintenance:

1. Random areas were assessed for cleanliness on a daily basis with the use of a janitorial cleanliness checklist. Monthly calculations were completed to compute the cleanliness percentage for FY 2017. The result was a 86% cleanliness average.
Other Measures or Indicators

**All Units:**
Business Office: survey of payments under $2,500.00 made by check versus p-Card.
Business Office: internal audit of campus revenue generating programs.

2016 Leeward CC Satisfaction Survey

2017 Administrative Services Satisfaction Survey
Part II. Analysis of Area(s) and Unit(s):

- Review each of the indicator categories above, and provide an explanation and analysis of the indicators. Review the trend in the data, unusual outlier data points, and compare results to other similar programs, areas, and units, if possible.
- This section should be a summary and should be no more than 3 pages of analysis. Reference other documents as needed to remain within the page limit.

All Units:

1. Past employee satisfaction surveys have noted comments related to improving relationships between specific administrative support units and the broader campus community. As a result of these survey results and to engage in continuous improvement efforts, the Administrative Services leadership team strategized on possible solutions in the area of customer service.

Business Office:

1. Processing time for UH Purchase Orders has improved compared to last year (FY 2016). Filling our vacant Account Clerk position was instrumental in achieving this. Our purchase order processing time was reduced by almost 1 day in FY 2017 compared to FY 2016.
2. A recent survey indicates that customers are satisfied with the current level of customer service. There is room for improvement in the area of user training workshops and plans are on the way to deliver this in 2018.
3. An audit conducted in December 2016, shows that the campus is in compliance with the requirements of the Revenue Generating Program policies.

Enterprise Operations:

1. Key staffing issue is the adequate number of security officer positions that have been authorized for the Pearl City and Waianae Moku campuses. A total of eight (8) security officers are authorized for LCC to provide 24/7 coverage at Pearl City and all operational hours at Waianae Moku. Strategies need to be developed to address the staffing shortage.

Human Resources:

1. Staffing Sufficiency decreased from 95.27% to 94.72%. Within an increase in the number of retirements of instructional faculty and the decrease in the number of students attending college, the filling of permanent instructional faculty was not warranted.
2. Training and workshops offered related to EEO and Title IX doubled (24 to 49) which may have led to an increase in awareness of the subject and an increase in reporting of complaints and investigations (4 to 16).
3. 2016 Leeward CC Satisfaction Survey had the following comment: “The Human Resources and Business Offices are excellent”

Operations and Maintenance:

1. Assess janitorial cleaning services to measure if we are at Ordinary Tidiness, 85% cleanliness, as established by APPA standards.
Part III. Action Plan:

- Using the analysis in the section above, identify the action plans to be pursued in the next year. Action plans should be specific and indicate implementation deadlines when appropriate.
- This section should be no more than 1 page in length.

All Units:

1. As a result of past employee satisfaction surveys and the goal of improving service levels and efficiencies, Administrative Services held a mandatory Customer Service or “People Service” training workshop with an external consultant for all Administrative Services personnel on March 30, 2017. The “Aloha Touch” training is the first in a series of continuous efforts to focus on “people service” skills.

Business Office:

1. Reduce the number of days required to submit PO payments to UH Disbursing Office from 4.95 to 3 days. Maximizing the use of pCcards for purchases under $2500 will help achieve this goal; there will be less PO payments to process, hence a reduction in the processing time.
2. Consistent compliance with the UHCC Policy 8.200, Financial and Operational Oversight of Revenue Generating Programs.
3. Improve the monitoring of Grants and Contracts to insure compliance with performance requirements, timely submission of travel documents and Purchase Orders; insure grant closeout procedures are followed and monitored.
4. Improve customer service experience in the Cashier’s Office by doing minor renovations to comply with ADA requirements. The renovations will also address fire code issues with the current layout.

Enterprise Operations:

1. A request to the UHCC system office for an additional security officer position for the Waianae Moku campus has been made via the vacant position reallocation pool. This position will also be included in the Resource Implications request. Other security officer vacancies are being processed in most expeditious manner to mitigate staffing shortages.

Human Resources:

1. Staffing Sufficiency – continue to fill vacant positions as allowable by budget and staffing requirements.
2. EEO Training – continue to provide training and workshops as required and needed; encourage HR employees to attend training and workshops.
3. Satisfaction Survey – continue to provide excellent customer service.

Operations and Maintenance:

1. Auxiliary & Facilities Services Officer will use a checklist to inspect random areas on a daily basis. This data will be calculated on a monthly basis to determine the cleanliness percentage. Auxiliary & Facilities Services Officer will review inspection outcomes with the janitorial supervisor on areas for improvement and what is being done well.
Part IV. Resource Implications:

- Provide a short summary of resources needed to implement the action plans identified above.
- Specific resource requests will be reported on the Request for Resource Allocations template.

All Units:

Business Office:
1. APT Band B, Bursar Position, 1.0 FTE. This position is currently temporary; the position is currently funded, hence, no funding is requested; the request is to convert this temporary position to permanent status.
2. APT Band A, Fiscal Specialist, 1.0 FTE. This position supports all campus Revenue Generating Programs which includes: cafeteria, culinary, Office of Continuing Education and Workforce Development, Summer Session, and Theatre.
3. APT Band A, .35 FTE. This is a fulltime position and currently funded 100% with Indirect Cost Recovery funds (RTRF). However, RTRF monies are declining and will only be able to fund 0.65 FTE of this position. The request is to fund 0.35 FTE of this position.
4. Renovation of the Cashier’s Office to meet students’ needs and comply with ADA and fire code requirements.

Enterprise Operations:
1. Security officer position for Waianae Moku campus is number one priority. Other security officer positions are requested for Pearl City campus.

Human Resources:
1. Staffing Sufficiency – N/A
2. EEO Training – N/A
3. Satisfaction Survey – N/A

Operations and Maintenance:
1. No additional funding is requested as the Auxiliary and Facilities Services Officer position is currently filled.
Leeward Community College
Annual Report of Program Data

Program Name: Administrative Services - Human Resources Office (Including EEO/AA)

Assessment Period: July 2018 - June 2019

College Mission:
At Leeward Community College, we work together to nurture and inspire all students. We help them attain their goals through high-quality liberal arts and career and technical education. We foster students to become responsible global citizens locally, nationally, and internationally. We advance the educational goals of all students with a special commitment to Native Hawaiians.

Part I. Brief Description
The Human Resources Office is responsible for all aspects of personnel management and administration. The areas of responsibilities are, but not limited to the following: recruitment and appointments; employee benefits; employee relations; classification; position management, organizational charts and functional statements; worker’s compensation and temporary disability insurance; student employment; labor relations and collective bargaining contracts; and equal employment opportunity/affirmative action.

The goal of the Human Resources Office is to recruit, renew, and retain qualified, effective, and a diverse faculty, staff and leadership.

Part II. Analysis of Program/Unit Data
Overall reviews and evaluation for the Human Resources Office are taken from the Administrative Services Survey administered in Spring 2017. Data used in the analysis of the Human Resources Office is from the Community Colleges Administrative Services Accreditation Comparable Measures for Human Resources and the Administrative Services Program Review for Equal Employment Opportunity/Affirmative Action.

Part III. Analysis of Major Functions/Services

The Administrative Services Survey administered in Spring 2017 received 128 responses from the college’s employees. One-hundred eighteen (65 strongly agree, 53 agree) employees are satisfied with the service they received from the Human Resources Office. One-hundred fifteen (66 strongly agree, 49 agree) employees feel that Equal Employment Opportunity practices are promoted by the Human Resources Office. One-hundred nineteen (77 strongly agree, 43 agree) employees feel comfortable contacting the Human Resources Office in order to get assistance, answer questions or address concerns. One-hundred twenty-four (63 strongly agree, 61 agree) feel that they received accurate information from the Human Resources Office.

The following are data from the Community Colleges Comparable Measures and Accreditation Program Review:

A. During the 2018-2019 assessment period, the college’s staffing sufficiency (percentage of filled, authorized positions [G-funded, permanent, and temporary]) was at a 93% fill rate as compared to the previous period of 95%.

B. The number of BOR ads posted for recruitment during this period was 63, compared to 116 in ‘17-‘18. In ‘17-‘18 the UH system “parallel tested” the NEOGOV on-line recruitment system, therefore requiring ads to posted in two different on-line recruitment systems simultaneously.

C. All college recruitments were in EEO/AA compliance to ensure diversified but best qualified faculty and staff were employed. There were no complaints pertaining to the employment process in the current assessment period.

D. BOR employees required to be evaluated annually were done so at 100% for the past four periods. Civil Service employees were at 100% this period, compared to 77% in the previous period.

E. There were no EEO complaints formally filed and no EEO campus investigations in this period.

F. The number of new grievances/investigations (including EEO) filed during this period was 10, compared to seven in the last period.

G. Forty-one EEO related workshops and training was provided to the campus this period as compared to seventy-four in the last period.

H. HR staff attended seven EEO related workshops and training during this period as compared to 10 in the last period.

I. The number of workers’ compensation claims have increased from 15 last period to 26 this period.

J. Unduplicated student employee headcount has decreased from 344 to 308 this period.
Part IV. Overview Analysis of Program/Unit

Overall, employees of Leeward Community College are satisfied that the Human Resources Office provides assistance and accurate information in addition to promoting Equal Employment Opportunity practices.

The following is an analysis of the data from the Community College Comparable Measures and Accreditation Program Review:

A. The decrease in staffing sufficiency could be attributed to the decline in enrollment, which led to a decline in hiring of permanent replacements.

B. Although our staffing sufficiency was lower than previous years, this percentage accounted for only general-funded positions. The number of ads posted included grant-funded positions, which has increased over the years.

C. The number of EEO/AA complaints related to employment decreased from one in 2016-2017 and one in 2017-2018 to zero in the current period.

D. All employees requiring an evaluation were evaluated.

E. The number of EEO complaints formally filed or investigated declined from the past four years (7, 6, 2, 0).

F. The number of new grievances increased from seven to 10 and may have been due to an awareness of Title IX and workplace non-violence policies as the UH system has been aggressively encouraging training for all employees and students.

G. The number of EEO related workshops and training provided to the campus decreased in part because employees are trained for interview committees every other year.

H. Training for EEO related workshops decreased due to either the timing of the workshop or staff attending to more pressing issues.

I. The number of workers’ compensation claims have increased possibly due to an increase in awareness to report accidents to supervisors in a timely manner.

J. Student employment numbers have been slowly decreasing over the past four years, which may be attributed to the decline in student enrollment.

Part V. Action Plan

The Human Resources Office will continue to hire the best qualified applicants through consistent equal employment opportunity practices so that students may receive high-quality education. Verification of employees’ qualifications must also be current to meet ACCJC requirements for Standard III.A.
Retain employees by continuing to provide accurate information, addressing concerns and questions, and provide training opportunities.

**Part VI. Resource and Budget Implications**

The addition of one employee (Human Resources Assistant IV; SR 11 - $52,000) would allow the current five Human Resources Office staff members time to focus on providing timely assistance to the campus regarding recruitment, onboarding, labor relations, benefits, training, etc.

With the introduction of the NeoGov online recruitment system for the UH system, our campus is receiving over 2,000 applications each year. Additional time is spent reviewing the applications for completeness, screening for required licenses, confirming accreditation of schools, preparing the applications for the interview committees, and closing out recruitments upon selection or non-selection.

Additionally, the new online employee forms component of NeoGov was released for the Spring 2019 semester. This component of NeoGov required more time spent reviewing forms for completeness and accuracy as each form must be accessed individually. Moreover, forms containing personally identifiable information (PII) must be manually deleted for each individual. In a one-year period, approximately 250 employees (regular, lecturers, casual) utilized this component and a number of those are temporary employees which are required to complete forms for each appointment (potentially four times a year).

The Human Resources Office is responsible for employment transactions for over 850 employees (including 300+ student employees). Recently, responsibilities of Deputy Title IX Coordinator for Employees and Behavioral Intervention Team (BIT) Co-Chair were added to Human Resources and EEO/AA management, leading to employees reallocating time spent on daily assignments.

Having a Human Resources Assistant would alleviate the current staff’s time being used toward the NeoGov recruitment system and will enable the Human Resources Office to provide better assistance to the campus in a timely manner.
Leeward Community College
Comprehensive Review and Evaluation

Program Name: Operations & Maintenance

Assessment Period: August 2015 to July 2019

College Mission:
At Leeward Community College, we work together to nurture and inspire all students. We help them attain their goals through high-quality liberal arts and career and technical education. We foster students to become responsible global citizens locally, nationally, and internationally. We advance the educational goals of all students with a special commitment to Native Hawaiians.

Part I. Brief Description
The Operations & Maintenance unit is responsible for the day to day operations of the physical plant, parking lots, service roads, and grounds. The areas of responsibility include electrical, plumbing, carpentry, janitorial, grounds, mail service, transportation services, and project design and management for construction projects on the Pearl City and off site campuses.

The goal of the Operations & Maintenance unit is to provide a clean, safe, and welcoming environment for all students, faculty, staff, and visitors.

Part II. Analysis of Program/Unit Data
Assess janitorial cleaning services to measure if we are at Ordinary Tidiness, 85% cleanliness, as established by APPA standards. Random areas were assessed for cleanliness on a daily basis with the use of a checklist. Monthly calculations were completed to compute the cleanliness percentage for each fiscal year. These are the cleanliness percentage results for the review period: FY 2016 – 89%, FY 2017 – 86%, FY 2018 – 85%, FY 2019 – 86%. These results show that we are cleaning at a satisfactory level.

Comparable Measures are submitted per request by the System Office each year. The measures tracked for Operations & Maintenance are total FTE for each position classification and total number of work orders completed. This is our position FTE for the review period:

FY 2016  Janitor – 18.00, General Laborer – 6.00, Building Maintenance Worker – 5.00
FY 2017  Janitor – 18.00, General Laborer – 6.00, Building Maintenance Worker – 5.00
FY 2018  Janitor – 18.00, Genral Laborer – 6.00, Building Maintenance Worker – 5.00
FY 2019  Janitor – 18.50, General Laborer – 6.00, Building Maintenance Worker – 5.00

The total number of work orders completed during the review period:
FY 2016 – 1,054    FY 2017 – 1,293    FY 2018 – 1,098    FY 2019 – 1,077
The consistent number of work orders we have completed yearly shows that we have a high demand for services and that this unit is critical in supporting the campus operations.

Part III. Analysis of Major Functions/Services
The Operations & Maintenance unit provides support services to the entire campus community to ensure the buildings are clean and well maintained, building systems are operational, the grounds are well kept, and provide daily mail service.

The Janitorial staff is responsible for cleaning the building interiors, lanais, disposal of trash; and providing services for moving and delivering furniture, and setting up for events. They respond to calls from the campus when urgent cleaning services are required.

The General Laborers main duties are to upkeep the campus grounds. This includes cutting of grass, trimming of trees and shrubs, cleaning the exterior walkways and parking lots. They also install and repair irrigation systems and assist the Building Maintenance Workers as needed.

The Building Maintenance Workers are responsible for repair and maintenance of the building interiors and exteriors, electrical, plumbing, and carpentry work. They respond to calls from the campus when urgent repairs are required.

The Mailroom provides in-coming and out-going mail service for the entire campus. This service consists of mail pick-up and delivery at each division/unit on campus, mail delivery to off campus sites (e.g. UH-Manoa, U.S. Post Office). Accepting mail and deliveries from USPS and other delivery companies.

In year 2017, Administrative Services conducted a Satisfaction Survey sent out to all faculty and staff. This is the results of the survey.

Janitorial Services
- Cleanliness of the walkways/lanais, covered areas, concourse – 88% satisfied
- Cleanliness of interior spaces (offices, classrooms, public spaces) – 75% satisfied
- Cleanliness of the restrooms – 79% satisfied

Grounds
- Upkeep of the exterior walkways – 91% satisfied
- Upkeep of the parking lots – 87% satisfied
- Upkeep of the campus grounds and courtyards – 92% satisfied

Building Maintenance
- Work orders are completed as requested – 85% satisfied
- Work orders completed in a timely manner – 86% satisfied

Operations & Maintenance Unit
- Overall satisfied with the service received – 94% satisfied

Part IV. Overview Analysis of Program/Unit
The Operations & Maintenance unit has been sufficiently staffed these past years. The janitorial unit has had to do building assignment changes as a few buildings that have been, and still are,
being renovated during this review period. With buildings being off-line, we have had enough staffing to cover all areas of the campus. When all buildings come back on line, and the recent addition of two buildings (ED building in 2014 and Diamond Head portables in 2017), we will have a staffing shortage to sufficiently provide cleaning services to the campus. A request for one full FTE Janitor position has been submitted through the ARPD each year. In February 2019, we hired a 0.50 FTE Janitor to work in the afternoon, to provide services after the full time janitorial staff ends their work shift.

Waianae Moku opened in Fall 2017, without any FTE to provide janitorial and grounds services. Since its opening, we have had to contract these services. These services are put out to bid, which resulted in changes in vendors providing the services. This has been problematic in the past, as each different vendor needs to trained on operating procedures of the campus, and upon transition between vendors supplies and equipment needs to be switched out from the storage room. A request for one full FTE Custodian position has been submitted through the ARPD each year.

The renovation of a building in Wahiawa is currently in the design stage. Leeward CC will be operating this building upon completion, which is expected to be in year 2021. This will require janitorial and grounds services also.

Part V. Action Plan
For janitorial assessment, the Auxiliary and Facilities Services Officer will continue to use the checklist to inspect random areas on a daily basis to ensure we are cleaning at acceptable standards. The results of these inspections will be reviewed with the Janitorial Supervisor on areas for improvement and what is being done well.

In the future, looking at sending out a Satisfaction Survey to the campus to see how we are doing in servicing the campus with our individual units (Janitorial, Grounds, Building Maintenance), and as Operations and Maintenance as a whole.

This unit will continue to request positions to provide satisfactory services at all Leeward CC campuses.

- The Pearl City - requesting one FTE janitor position, with square footage added with the opening of the Education building(24,253sf) and the Diamond Head portables(24,527sf).
- Waianae Moku – requesting one FTE Custodian position to provide janitorial and grounds services.
- Wahiawa – Planning on how to provide janitorial and grounds services for this building. May need to contract out services if an FTE is not provided with the completion of the building renovation.
Part VI. Resource and Budget Implications

The Operations and Maintenance unit procures service contracts for A/C, elevator, and trash disposal services. There are escalation clauses for the vendor in the Maintenance contracts, when renewing each year.

Program/Area/Unit Name: Enterprise Operations

Program/Area/Unit Description:

- This section should include a short paragraph that describes your program, area, or unit.
- Goals for your program, area, or unit should be listed in this section. A statement of purpose would also be appropriate.

The Enterprise Operations unit is responsible for a wide range of services that directly support the College and the public, to include; the management of all functions related to access control, emergency management, facilities use and scheduling, parking services and campus security and safety.

**Access Control:** The purpose of this unit is to minimize the risk of unauthorized access to physical systems. The campus employs two types of access for its facilities. The primary is through the use of Medeco’s X4 mechanical key patented system specifically for Leeward. The second means of access to campus facilities employs the use of access cards on doors most frequently used or requiring an additional layer of secured access. All mechanical keys and access cards are distributed through this office. In addition, this office provides first line service, maintenance and/or repairs to campus locks. The goal of this unit is to fulfill the appropriate access needs of Leeward personnel while maintaining proper physical security measures for all campus assets.

**Emergency Management:** The Enterprise Operations Officer serves as Emergency Management coordinator for Leeward Community College. This position helps to develop procedures and plans to respond to natural disasters or other emergencies to minimize the risk to the campus community. Additionally, the emergency management coordinator will assist senior campus administrators during an emergency to conform with the mandated National Incident Management System (NIMS) and Incident Command System (ICS). The goal of this unit is to ensure that all required Leeward personnel receives the proper training in the National Incident Management System as mandated by Homeland Security Presidential Directive 5 and Hawaii State Civil Defense memo to comply to UH President David McClain (April 24, 2009).

**Facilities Use:** This unit coordinates the use and scheduling of all campus facilities with exception of the theatre and of credit courses. Revenue generation is achieved through the rental of campus facilities to non-affiliated college and/or university organizations. Use by non-affiliated organizations is permissible at the convenience of the college and will be prioritized after all needs of the campus have been met. The goal of Facilities Use is to provide the campus community with the needed space in a timely manner to facilitate student learning and to generate revenue when appropriate taking into consideration all needs and wants of the campus have been fulfilled.

**Parking:** This unit is still in its infancy for the college. With the anticipation and start up of Honolulu’s rail system, Leeward Community College is expected to be significantly impacted due to the location of
an on-campus station. Impacts to Leeward’s free parking designated for students, faculty, staff, administration, and authorized visitors will be diminished by the general public utilizing the rail. A parking program for Leeward is to be developed in the very near future.

**Campus Security:** The Campus Security unit is responsible for providing security services. Security officers are on duty 24-hours a day, 7 days a week, 365 days a year. The unit is staffed by a Security Chief, two Security Supervisors and six officers. Campus security officers conduct vehicle and foot patrols on campus. They are charged with the enforcement of federal, state, and local laws and regulations of the University of Hawaii and Leeward Community College. Officers conduct a full range of services dealing with incident reports, campus investigations, medical and fire emergencies, traffic accidents, enforcement of laws regulating the use of alcohol, drugs, and weapons, inspection of lighting and shrubbery, and all other situations requiring campus security assistance. The goal of campus security is to ensure the security and safety of the campus community by reporting all potential safety and security hazards observed for corrective action.

**Part I. Quantitative Indicators:**

- Identify 3-5 indicators for each of the following areas. These indicators should be measurable, useful data measures that will indicate how well your program, area, or unit is performing. Consult the IR staff if you need assistance identifying indicators.
- Each indicator should list three years worth of data, if available.
- Note: Administrative Services uses a variety of comparable measures and support area outcomes to manage and monitor the efficiencies and effectiveness of all areas and units. These measures and outcomes are highlighted below by area/unit.

---

**UHCC Comparable Measures – Enterprise Operations**

There are no specific UHCC Comparable Measures that have been developed for the types of services that fall under the purview of Enterprise Operations. However, other sources of data provide a variety of measures that point to unit effectiveness and efficiencies. Examples include:

- Annual Security Report for Clery Act crime data
- Campus Security Incident Statistics
- Facility Use requests for room and facility scheduling
- Facility Use rental agreements
- Department of Homeland Security National Incident Management System training, personnel tracking for Leeward CC.

These measures, and others, will be reviewed for possible incorporation into future ARPD reviews.

**Other Measures or Indicators:**

- 2016 Leeward CC Satisfaction Survey
- 2017 Administrative Services Satisfaction Survey
Part II. Analysis of Area(s) and Unit(s):

- Review each of the indicator categories above, and provide an explanation and analysis of the indicators. Review the trend in the data, unusual outlier data points, and compare results to other similar programs, areas, and units, if possible.
- This section should be a summary and should be no more than 3 pages of analysis. Reference other documents as needed to remain within the page limit.

1. Past employee satisfaction surveys have noted comments related to improving relationships between specific administrative support units and the broader campus community. As a result of these survey results and to engage in continuous improvement efforts, the Administrative Services leadership team strategized on possible solutions in the area of customer service.

2. Key staffing issue is the adequate number of security officer positions that have been authorized for the Pearl City and Waianae Moku campuses. A total of eight (8) security officers are authorized for LCC to provide 24/7 coverage at Pearl City and all operational hours at Waianae Moku. Strategies need to be developed to address the staffing shortage.

Part III. Action Plan:

- Using the analysis in the section above, identify the action plans to be pursued in the next year. Action plans should be specific and indicate implementation deadlines when appropriate.
- This section should be no more than 1 page in length.

1. As a result of past employee satisfaction surveys and the goal of improving service levels and efficiencies, Administrative Services held a mandatory Customer Service or “People Service” training workshop with an external consultant for all Administrative Services personnel on March 30, 2017. The “Aloha Touch” training is the first in a series of continuous efforts to focus on “people service” skills.

2. A request to the UHCC system office for an additional security officer position for the Waianae Moku campus has been made via the vacant position reallocation pool. This position will also be included in the Resource Implications request. Other security officer vacancies are being processed in most expeditious manner to mitigate staffing shortages.

Part IV. Resource Implications:

- Provide a short summary of resources needed to implement the action plans identified above.
- Specific resource requests will be reported on the Request for Resource Allocations template.

Security officer position for Waianae Moku campus is number one priority. Other security officer positions are requested for Pearl City campus.
Welcome and Introductions

Attending: Tommylynn Benavente, James Fujita, Adam Halemano, Jeff Judd, Evelyn Kamai, Cecilia Lucas, Stanley May, Kristina Nip, Guy Nishimoto, Grant Okamura, Della Teraoka, Donna Matsumoto (guest)

Understand the charge and timeline

Della reviewed the charge, timeline, and provided a brief history of the planning process at Leeward.

Background

Charge: The work of the committee will be to 1) make recommendations for improvements on the College’s integrated planning and budgeting process, and 2) review and update the Leeward Policy on Annual Program Review (L5.202).

Timeline: Committee formed by September 1. Work will commence shortly thereafter and have recommendation to Campus Council by April 2018 meeting.

History

Discussion of the ARPD process which has been around more than 15 years. The ARPD was created as a separate system process that has been incorporated into the Leeward planning and budgeting process since 2013. A short review of how the process changed from 2006 with the comprehensive Annual Program Review (APR) to the current process which uses the ARPD as the core planning document with a less frequent Comprehensive Review and Evaluation (CRE) every 3-4 years.

Process starts with Mission, Strategic Plan, and College Goals. Ongoing assessment at the course, program, and unit levels is conducted and recorded in Tk20. Annual Report of Program Data (ARPD) is completed each year and the same template is used for those programs and units not required by the UHCC system. The CRE is completed at least every 4 years. The Resource Request template is completed annually and follows the prioritization process. Decisions are made at the beginning of the next academic year, after campus funding is finalized at the system level.

The committee came up with the following goals:

Goals
- Clarify role of Faculty Senate in the budgeting process
- Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
- Clarifying Program Review process and what is included, and how to complete it
- Institutionalizing communication protocol
- Training and support for completion of ARPD
- Engaging faculty and staff in the process
- Increasing transparency about who reads it and what happens

We will prioritize the goals at the next meeting as we may need more than one year to complete all of the goals.

There was discussion about including student voices in the planning process. We do not currently have a place for students to provide input. What about whether the schedule is meeting the “demands” of the students? Can we keep a record of how many students were not able to get a course at the time they wanted? Some of this information will be available with the new STAR GPS system.

We also discussed having programs include more surveys and data points beyond the system required data measures.

There was some discussion about the ARPD process and whether it is “misunderstood”. Some training may be required. We will also find out if we can change the benchmark language, such as “Unhealthy”.

We will get more input from the campus on their participation in the process.

Possible survey question:
Have you been allowed input into the process?
Describe your participation in the planning process in the past.
1. I was asked for input.
2. I participated in writing the report.
3. I have no idea how the planning process works.

We will ask the deans to read reports and give feedback to programs/units. It was also noted that funding information in an email from Mark is good, but it needs to be placed on the Budget website.

Other comments:
- Program outcomes should drive the process – not the data from the system. PLOs are at the end – can we move this section to the beginning so it is referenced throughout the report.
- Issue of relationship between ARPD and resource requests template.

Next meeting: Monday, November 6 from 1:00-2:30 pm in BE 229A.
Review Goals - Placed in priority order

- Clarify roles of stakeholders
  - Clarify role of Faculty Senate in the budgeting process
  - Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
  - Providing a voice for students in the planning process
  - Clarify role of all groups on campus
- Develop a planning and budgeting website
- Clarifying the process, improving efficiency, and making improvements
  - Clarifying Program Review process and what is included, and how to complete it
  - Increasing transparency about who reads it and what happens
  - Enhancing the ARPD format and data to better support the process
  - Closing the loop - improving programs and reporting on that
- Review of policy
- Communication of process
  - Institutionalizing communication protocol
  - Engaging faculty and staff in the process
  - Increasing transparency in budget and planning documents (trend analysis)
- Professional development and training
  - Training and support for completion of ARPD

Discussion:

Need to develop a more robust website with information on program reviews, previous budgets, and other reports. What is the best way to keep the site up to date?

Opportunity to create stronger communication with use of website and online tools so stakeholders can access information and training tools when they want.

Group agreed to wait on a survey until some changes have been implemented.

Issue of role of Faculty Senate as per BOR policy.

Aulii and James spoke with John Morton on this issue.

The Chancellor has delegated authority over non-academic policies and college budgeting. He has created the Campus Council as a recommending authority to him.

Executive boards of Campus Council and Faculty Senate have worked collaboratively to consider the issue of roles in the budgeting process.

There was some discussion of asking the BOR to provide interpretation for its policy, however the BOR is currently reviewing the policy. Some also suggested it would not be within the appropriate lines of authority to directly ask them for an interpretation.

General issue to be resolved is to clarify and document the roles of governance groups in the planning and budgeting process. The issue of the Faculty Senate role in the process has been of particular concern to the Budget and Planning Standing Committee of the Faculty Senate.

Next Steps
Each of the members of the committee are asked to bring forth their questions and concerns regarding clarification of roles to the next committee meeting. We will tackle these issues at that meeting. Della will upload appropriate policies regarding budgeting and planning.

Next meeting:

Monday, November 27, 2017 at 1:00 pm in BE 229A

**Ad Hoc Planning Process Review Committee**  
**Meeting Notes**  
**November 27, 2017**  
**1 – 2:30 pm in BE 229A**

Attending:

Tommylynn Benavente, James Fujita, Adam Halemano, Jeff Judd, Evelyn Kamai, Mark Lane, Cecilia Lucas, Cindy Martin, Don Maruyama, Stanley May, Kristina Nip, Guy Nishimoto, Grant Okamura, Aulii Silva, Della Teraoka, Gregg Yoshimura

**Review of roles in current process**

Discussion of current process and roles. Della presented a visual of the planning process and explained how the current process works.

- Campus Council is the one group that includes every group as a voting member as it was created out of the concept of shared governance. Campus Council formed after the 1994 accreditation visit with recommendation to create a representative body that reviews the budget. It was formed from the Provost Advisory Council.
- Question about administrative presence at Campus Council meetings. Response is that Campus Council is a representative body that reviews budget and requires administration presence. Council membership is evaluated periodically. Administration has no vote. Campus Council has improved over time and is a good system for shared governance. Charge of this committee is not to reorganize Campus council but focus on what role people/groups have in the planning process.
• Question about what happens if when reviewing someone wants to make a change to the priorities; has this happened before? Response is timeline for process is that the ARPD’s completed during the fall and reviewed by OPPA to ensure completeness. Resource lists prioritized by different areas and submitted to Administration for review and prioritization. Governance groups review priorities in April and make final recommendations to Chancellor in May. Chancellor can adjust list and has funded items out of the prioritization. This may be due to numerous factors including the amount of money available.

• The Student Government would like to be involved in the process if possible. Student Government will be included when the shared priorities are sent to the campus; student feedback will be solicited at this point. Student Government may also be included during the program review process. Students would voice their opinions through this committee and through Campus Council.

• Discussion about improvement to streamline the process and remove Division from the Resource Requests process. Question as to how the Liberal Arts AA folds into a Division under the Resource Requests. Problem is the system and accreditation want “program” review and we want “instructional” review. Trying to serve two masters through this process.

• Suggestion to divorce the budget from the program review process. Possible to run two parallel systems and somehow find a way to link the review process to the budget. Treat both systems in a more real world way.

• Discussion on the role of Faculty Senate in power sharing with Campus Council. Clarification of role of the Faculty Senate is “for academic affairs.” Request of “accountability” from administration.

• Discussed creating “Campus Request” level during the Resource Requests process. This request used to meet institutional goals with specific priorities and would need to include approval(s) for resources/management of request. Vote for “Campus Request” form to be inserted into process: Yes: 6

Next meeting: tba

What about removing the Division level? How to prioritize?

Can we divorce the program review from the budgeting process? But still show the connection?

Ad Hoc Planning Process Review Committee
Notes
February 7, 2018
1 – 2:00 pm in BE 229A

Attendees: Guy Nishimoto, Adam Halemano, Jeff Judd, Terry Richter, Gregg Yoshimura, Don Maruyama, Della Teraoka, James Fujita

Review of Previous Meeting Minutes

Review of Institutional Resource Request Form

Group reviewed the form and made edits for final distribution.

Review Goals - Placed in priority order
Clarify roles of stakeholders - Adam will create a visual document based on previous meetings’ discussion of planning process and roles.
  ○ Clarify role of Faculty Senate in the budgeting process
  ○ Clarifying the Planning Process: Accountability issue – If FS budget issues, need a response from Administration and not Campus Council
  ○ Providing a voice for students in the planning process
  ○ Clarify role of all groups on campus

Develop a planning and budgeting website
  ○ Let’s work on this at the next meeting.

Set regular meeting day/time

Doodle for Mondays or Wednesday at 1 pm or 2 pm

How often? Monthly

Next Steps
  ● Adam will create a visual document based on previous meetings’ discussion of planning process and roles.
  ● Della to talk to Kathleen about how to proceed on creating a website.
  ● Della to send out Doodles for upcoming meetings.

Next meeting: tba

Ad Hoc Planning Process Review Committee
Meeting Notes
March 19, 2018
12:00 pm – 1:00 pm in BE 229A

Attendees: Della Teraoka, Mark Lane, Cecilia Lucas, Grant Okamura, Stanley May, Don Maruyama, Jeff Judd, Aulii Silva, James Fujita

Set regular meeting day/time - Mondays at 1:00 pm

Institutional Resource Requests - Received 2018
Review of 2 requests received
Need to include sending this form to Student Government next year

Visual of Prioritization Process
Delete Governing Groups
Consider how visual represents meetings
Add box for decision at Chancellor level
Add ARPD at beginning
Change “Resource Requests” to “Prioritization Meeting”
Change middle box to Resource Request List
Can we create people of the same color?

Annual Program Review Policy

Feedback by April 10 on this policy

Discuss System plans
  ● New: https://uhcc.hawaii.edu/varpd/
Current: https://www.hawaii.edu/offices/cc/arpd/index.php
UHCCP 5.202 - Needs revision

Develop a planning and budgeting website
- Discussion of what information is needed
- Need to have a site that provides an overview of the process, visual, tutorials, resources, and previous reports.
- Place most information in a public location with as much information as possible.
- Place to store resources that were funded.
- Include “models” for what the ARPD should look like.
- Research sites that we like.
- Can we create a way to update more easily? Possibly 2 - 3 people.

Next Steps
Review the APR policy draft
Bring a sample website for program review and planning.
Next meeting: tba

Ad Hoc Planning Process Review Committee
Agenda/Notes
April 16, 2018
12 – 1:00 pm in BE 229A

Attendees: Don Maruyama, Cecilia Lucas, Stanley May, Adam Halemano, Guy Nishimoto, James Fujita, Tommylynn Benavente, Della Teraoka, Grant Okamura, Mark Lane

Review of work so far
- Review and clarification of roles in planning process
- New visual document of prioritization process
- Added institutional level resource request step and form
- Enhanced communication of planning process to the campus
- Review of Annual Program Review Policy completed and forwarded to Faculty Senate and Campus Council

Visual of Prioritization Process

Develop a planning and budgeting website
- Discussion of what information is needed
  - Functional classification of expenses for the budget (program expenses)
  - Comparison of functional classification of expenses between campuses over time
  - System dashboard - Not in place yet. Working on it, but issues with eThority extraction tools. May need to hire a consulting group on how to do this.
  - Add links to the reports that exists on UHCC system site, UH system site, or IR site.
  - Present the information with graphics and in easy to read format.
  - Add trend reports to show data over time.
- Review of other college’s websites
- Review of main categories
Next Steps

- Need to further institutionalize student voice in planning process
- Develop a planning and budgeting website
- Review and revise the ARPD template
- Review and revise the process including closing the loop
- Enhance engagement of faculty and staff in the planning process
- Training and support for faculty and staff with completion of ARPD
- Institutionalize communication protocol
- Continue to develop planning and budget website
- Follow up on UH financial dashboard project
- Create visual personnel analysis of faculty/staff categories and trend over time
- Clarify Faculty Senate role in academic planning and budgeting issues

Set regular meeting day/time - Mondays at 1:00 pm

Proposed meeting dates: September 10, October 8, November 19, December 10

Ad Hoc Planning Process Review Committee
Agenda/Notes
September 10, 2018
1 – 2:00 pm in BE 229A

Attendees: Cecilia Lucas, Jeff Judd, Kristina Nip, Adam Halemano, Guy Nishimoto, Michael Cawdery, Della Teraoka

The committee reviewed the meeting notes from the April 2018 meeting. Della brought forward the items from the April notes that still need to be worked on.

Visual of Prioritization Process

Adam revised the visualization based on feedback from the April meeting. Della will put the revised visual in the team drive.

Develop a planning and budgeting website

- OPPA is working on the website.
  - The committee reviewed the proposed OPPA website and made some suggestions including having everything come from a central point.
  - It was recommended that some of the specific links on the Faculty/Staff page (footer of Leeward site) be removed. Jeff will communicate to faculty and staff that all assessment resources can be found from the OPPA/Assessment webpage.
  - Need to add links to Faculty Senate assessment site and training tutorials.
  - Della will share the slideshow so the committee can provide additional feedback.

This list is from the April meeting notes. We discussed what information is still needed.

- Functional classification of expenses for the budget (program expenses)
- Comparison of functional classification of expenses between campuses over time
- System dashboard - Mark or Della will need to follow up on this item.
- Leeward dashboard - OPPA is working on some basic data points on their website. See the OPPA website slides for sample.
● Add links to the reports that exists on UHCC system site, UH system site, or IR site. **Done!** A new Planning Reports webpage has been added that includes links for all APRDs and CREs (system and campus). [http://www.leeward.hawaii.edu/planning-reports](http://www.leeward.hawaii.edu/planning-reports)

● Present the information with graphics and in easy to read format. Some suggestions are in the OPPA website slides.

● Add trend reports to show data over time. Some of this information is in the Visual ARPD. [https://uhcc.hawaii.edu/varpd/visual_arpd.php](https://uhcc.hawaii.edu/varpd/visual_arpd.php) This should be discussed at a future meeting.

The committee discussed what could be accomplished in the next year. Next steps are below. Some items will need to be worked on in the following year.

**Next Steps**

- Need to further institutionalize student voice in planning process
  - Della to add Kristina to her emails to campus. Should students have a separate form? Can they use the Institutional Resource Request form?
  - Kristina will follow up on the program level input issue as well.

- Develop a planning and budgeting website - Some of this information is available. This is something we can finish up this year.

- Review and revise the ARPD template - The UHCC system will not be updating the template this year, but Leeward will work on making revisions for 2018-2019.

- Review and revise the process including closing the loop - This item should be worked on this year as part of ARPD template revision.

- Enhance engagement of faculty and staff in the planning process - This action item should be further discussed so some enhancements can be made this year.

- Training and support for faculty and staff with completion of ARPD - Guy provides training, but a survey of needs might be helpful.

- Follow up on UH financial dashboard project - Mark or Della will find out if this is happening.

- Create visual personnel analysis of faculty/staff categories and trend over time - This will likely fall in 2019-2020.

- Clarify Faculty Senate role in academic planning and budgeting issues - Additional work is needed.

Della also mentioned to Cecilia that Administrative Services needs to complete the template this year.

**Set regular meeting day/time** - Mondays at 1:00 pm in BE 229A

Meeting dates: September 10, October 15, November 19, December 10, February 4, March 4, April 1, April 29

---

**Ad Hoc Planning Process Review Committee**

**Agenda/Notes**

**October 15, 2018**

1:00 – 2:00 pm in BE 229A

Attendees: Della Teraoka, Don Maruyama, Cecilia Lucas, Stan May, Mark Lane, Grant Okamura, Adam Halemano, Aulii Silva, Guy Nishimoto, Jeff Judd, Michael Cawdery

Visualization of Prioritization Process - Discuss date; Adam will add “approved” or “effective date”.
Develop a planning and budgeting website - Plan to work on this after accreditation visit.

Review and revise the ARPD template - Have Guy share his thoughts on this.

- Idea was to flip the PLOs to the top, but it might be confusing since the system ARPD template is not changing.
- Guy went through the ARPDs for last year, and he was pleasantly surprised with the improvements in the reports.
- Guy will ask them to start by focusing on the program learning outcomes first. Data from UHCC system is about program outcomes, and it will come later.
- Guy will send out the reports this week.

Training and support for faculty and staff with completion of ARPD - Guy will provide training and met with the program coordinators to discuss the change in thinking for APRD completion.

Jeff talked about providing training to program coordinators on program assessment. Discussion was around having the training in the spring semester. Maybe we intentionally focus on program learning outcomes and their assessment in March/April every year.

Enhance engagement of faculty and staff in the planning process - Let’s generate ideas on this topic.

- Review survey results
  - Last employee satisfaction survey for awareness of planning process.
  - System survey results also.
  - Campus Council survey
- Send out short survey on planning process to get a temperature check now.
  - Perceptions of the process
  - How the process works for resource allocations
  - What do you know about the planning process?
  - Do you have any concerns about the planning process?

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm

Meeting dates: September 10, October 15, November 19, December 10, February 4, March 4, April 1, April 29

**Ad Hoc Planning Process**

**Review Committee**

**Update October 2018**

2017-2018 Accomplishments

- Review and clarification of roles in planning process
- New visual document of prioritization process
- Added institutional level resource request step and form
- Enhanced communication of planning process to the campus
- Review of Annual Program Review Policy completed and forwarded to Faculty
- Senate and Campus Council

Next Steps

- Need to further institutionalize student voice in planning process
- Develop a planning and budgeting website
• Review and revise the ARPD template
• Review and revise the process including closing the loop
• Enhance engagement of faculty and staff in the planning process
• Training and support for faculty and staff with completion of ARPD
• Follow up on UH financial dashboard project
• Create visual personnel analysis of faculty/staff categories and trend over time
• Clarify Faculty Senate role in academic planning and budgeting issues

**Ad Hoc Planning Process Review Committee**  
**Agenda/Notes**  
**December 10, 2018**  
**1:00 – 2:00 pm in BE 229A**

Attendees: Della Teraoka, Don Maruyama, Cecilia Lucas, Stan May, Adam Halemano, Guy Nishimoto, Shuqi Wu, Jeff Judd, Michael Cawdery, Tiffany Kasoga, Kathryn Fujioka-Imai, Tommylynn Benavente, Grant Okamura

Outcome: Enhance engagement of faculty and staff in the planning process

- Sent out short survey on planning process to get a temperature check now.
  - Perceptions of the process

This meeting was largely focused on reviewing the survey data and generating ideas to improve faculty and staff engagement in the planning process.

Those responsible for the process probably understand it, but those not involved in the process may not have a good understanding.

Budget end - Need the financial statements to include graphics and charts to help people interpret the financials. Administrative positions have increased - more information about APT positions, non-instructional positions. Mark is working on a website.

Faculty Senate is working on getting financial reports into the minutes and include some interpretation.

We are currently earning around a C as some understand the process, but still improvement to be made.

- What do you know about the planning process? - range of responses on this question
- How the process works for resource allocations - pretty well.
- What suggestions do you have for the planning process?

Seeing a simple visual diagram - This has been done and need to get that out so people see it.

Feedback on ARPD - Could give feedback from ARPD writer and faculty, process for review by peers, OPPA feedback, leadership review, relationship of ARPD and future allocations. Recommendation that Dean give feedback to each ARPD. Recommendation that faculty committee can get a third party to provide feedback on whether the health call is accurate.

Concern that data is driving the program instead of informing how well the program is meeting PLOs. System metrics are looking at the economic side. Also need to focus ARPD on analyzing the program and not just driving resource requests.
Issue of unexpected expenses and how to get that funded - what is the process?

Representative groups or unit head should communicate better with their unit about the process.

Create a short handbook with information on planning process and ask divisions/units to discuss with their groups.

Send announcements and actively solicit feedback from faculty/staff at large. Consider monthly updates with info on where we are in the process (what step).

Consolidate information on one website.

Share information about what is funded, what isn’t, and rationale through email and website.

Strengthen communication with website, handbook, timeline, steps, etc.

Host a convocation workshop on this topic and/or during the semester.

More communication about how items are prioritized.

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm

Meeting dates: February 4, March 4, April 1, April 29

Ad Hoc Planning Process Review Committee
Agenda/Notes
March 4, 2019
1:00 – 2:00 pm in BE 229A

Attendees: Michael Cawdery, Kathryn Fujioka-Imai, Adam Halemano, Jeff Judd, Tiffany Kasoga, Don Maruyama, Stan May, Della Teraoka, Shuqi Wu

Review what needs to be done.

Spring 2019

● Need to further institutionalize student voice in planning process - Institutional Resource Request form sent to SG
● Institutionalize communication protocol - In process
  ○ Send out visual for prioritization process - Della Teraoka
● Enhance engagement of faculty and staff in the planning process - Part of communication protocol - Della Teraoka and Shuqi Wu
● Clarify Faculty Senate role in academic planning and budgeting issues - This is part of the review process of the Shared Governance Policy.
● Have Campus Council reps communicate with their constituent groups about the process - Kathryn Fujioka-Imai
● Develop a planning and budgeting website - Della Teraoka
  ○ Review proposed content
  ○ Identify missing content
  ○ Update website by May 2019

Summer 2019

● Review and revise the ARPD template - OPPA
Review and revise the process including closing the loop including providing feedback to program review participants. Who should give feedback, when and how. - OPPA
Create a handbook on the process and distribute widely and on website in fall 2019 - OPPA

Fall 2019

Share information about what is funded, what isn’t, and rationale through email, website, and convocation - Mark Lane
Training and support for faculty and staff with completion of ARPD - OPPA/Shuqi Wu
Follow up on UH financial dashboard project - Mark Lane
Create visual personnel analysis of faculty/staff categories and trend over time - Mark Lane

Get feedback on the planning website

- Use landing page as jumping off point with links to other pages.
- Add a menu item for Resources and Templates (or Handbook and Templates).
- Are there other resources? Consider adding exemplars.
- Add Timeline.
- Mention that additional data can be requested from IR.
- Add Mission to the Strategic Plan page.
- Add link to old reports
- Add link to the system org chart site and update what is on Leeward’s site

Adam is also working on the Assessment website. He will also work on a handbook for assessment.

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm
Meeting dates: April 1, April 29

Ad Hoc Planning Process Review Committee
Agenda/Notes
April 29, 2019
1:00 – 2:00 pm in BE 229A

Attendees: Michael Cawdery, Kathryn Fujioka-Imai, Jeff Judd, Stan May, Della Teraoka, Cecilia Lucas

Review updated website. Feedback included:

- Adam will have responsibility for updated the Assessment website.
- Shuqi will take responsibility for Program Review website.
- Mark will be adding more information on the Operational Expenditure Plan website.

Recent updates:

- Share information about what is funded, what isn’t, and rationale through email, website, and convocation - Mark Lane
- Create visual personnel analysis of faculty/staff categories and trend over time - Mark Lane

Summer 2019
- Review and revise the ARPD template - OPPA
- Review and revise the process including closing the loop including providing feedback to program review participants. Who should give feedback, when and how. - OPPA
- Create a handbook on the process and distribute widely and on website in fall 2019 - OPPA

Fall 2019

- Training and support for faculty and staff with completion of ARPD - OPPA/Shuqi Wu
- Follow up on UH financial dashboard project - Mark Lane
- Develop and post an institutional level dashboard that can be filtered easily - Shuqi Wu

Meeting location: BE 229A, Mondays at 1:00 pm - 2:00 pm
Employee Satisfaction Survey

Results from Fall 2019 and Fall 2016

Summary Report

OVERVIEW & PURPOSE
The college strives to provide valued employees with the facilities, tools, and support needed to excel in their positions. We conducted this survey to acquire a better understanding of employee morale, satisfaction, and engagement at Leeward Community College.

This survey was created by the 2nd Cohort of the Leadership Excellence Program (William Albritton, Kathryn Fujioka-Imai, Lori Lei Hayashi, Tracie Losch, and Grant Okamura) in collaboration with the Leeward Community College Office of Planning, Policy and Assessment.

DATA SUMMARY
Overall
The survey had 176 respondents in 2019 and 200 respondents in 2016. There are approximately 500 recipients that were emailed the survey. (Note that this list included active employees and retirees.)
## Results

1. Which of the categories below best describes your work status and location at Leeward CC?

The last Comprehensive Review and Evaluation (CRE) for this program was completed in 2016 and can be viewed [here](#). The next CRE will be completed in 2021.

## 1. Program or Unit Description

The Associate in Arts (AA) degree program consists of at least 60 semester credits, entirely at the baccalaureate level (100 level and above), which provides students with skills and competencies essential for successful completion of a baccalaureate degree. The AA degree program provides students with a solid liberal arts and sciences foundation in preparation for transfer to four-year colleges and universities. The AA degree program also develops critical thinking, information literacy, communication and problem-solving skills needed for a successful career.

The general education received in the program:

- Encompasses the common knowledge, skills, and attitudes needed by individuals to be effective as persons, family members, workers, and citizens.
- Provides opportunities to develop understanding, abilities, values, and personal attributes which should help students apply their knowledge, skills, and talents to make sound decisions and to analyze and solve problems in a multi-cultural community.
- Helps the students gain a more integrated view of knowledge, a more realistic view of life and a more defined sense of community and social responsibility.

The program learning outcomes are:

1. Develop, support, and communicate ideas to a particular audience through writing [written communication].
2. Develop, support, and communicate ideas to a particular audience through speech and writing [oral communication].
3. Apply quantitative reasoning to solve problems, interpret answers, and communicate results [quantitative reasoning].
4. Use critical thinking to address issues and solve problems [critical thinking].
5. Find, evaluate, and use information [information literacy].
6. Use the concepts, theories, and methodologies in arts, humanities, natural and social sciences to examine natural phenomena or to evaluate human experiences [arts, humanities, and sciences].
7. Describe and analyze the nature of culture and its variations, past and present [cultural diversity].

### What is the target student or service population?

As stated in the 2019 – 2020 Course Catalogue, “While the Leeward coast and Central O‘ahu are the primary areas served by the College, students attend Leeward Community College from all parts of the island. We believe in the dignity and potential of each individual and the power of that belief to help people learn and grow. We are committed to providing an educational environment that accepts people as they are and fosters the development of each student's unique talents.”
2. Analysis of the Program/Unit

Overall program health is rated at a “cautionary” level, where it has remained for the past three academic years.

</table>

Although Demand was rated at an unhealthy level for the past two academic years, Demand is currently rated as cautionary. This can be attributed to the number of majors increasing by 1.55% from 2198 during the 2018 – 2019 AY to 2232 in the 2019 – 2020 AY as well as the increase in Percent Change Majors, which saw a 2% increase.

The number of classes taught over the past three academic years has steadily decreased for a net loss of 177 classes offered, a 16.7% difference. This can primarily be attributed to decreased enrollment over the past three academic years, as well as increased efforts within the system to streamline the path toward graduation, which dissuades students from taking classes that are not required for graduation. While this is a trend being seen on other UHCC Oahu campuses, with Kapiolani, Windward and Honolulu recording 13.6%, 7.7%, and 15.9% decreases, respectively, Leeward’s decrease is the highest in the UHCC system.

13. Overall Program Expenditures $13,444,348 $12,307,216 $12,205,418
13a. General Funded Budget Allocation $10,121,662 $10,642,674 $10,632,266
13b. Special/Federal Budget Allocation $3,007,733 $1,372,087 $1,258,302
13c. Tuition and Fees $314,953 $292,455 $314,850

14. Cost per SSH
15. Number of Low-Enrolled (<10) Classes 94 125 76

The health call for Efficiency continues to rate as healthy. Class fill rates have remained steady over the past three academic years, seeing a 0.7% increase during the 2019 – 2020 AY.

The ratio of majors to FTE faculty has increased by one over the past two academic years and is currently measured at 27.

</table>

The number of students who were actively enrolled in program classes at the end of the semester and who earned a grade of ‘C’ or better has increased by 1% over the past two academic years and currently stands at 75%.

Overall Persistence from Fall to Spring has remained steady from the previous academic year, while Persistence from Fall to Fall has seen a 2% increase from the previous academic year. This is comparable to Kapiolani CC and Windward CC, with the former averaging 69% Fall to Spring Persistence and 45% Fall to Fall Persistence, and the latter averaging 71% and 46%, respectively.
According to the “Hawai‘i Graduation Initiative” of the Strategic Directions 2015 -2021, “The goal is to increase the number of associate degrees by 5% per year in order to maintain progress toward the P-20 goal of having 55% of working age adults with a college degree by 2025.” During the previous academic year, the college saw an 14.3% decrease in the number of students earning degrees, dropping from 621 in 2017 – 2018 AY to 532 in the 2018 – 2019 AY, where it remained during the 2019 – 2020 AY. This follows the trend being experienced by other UHCC campuses on Oahu, with Kapiolani, Windward and Honolulu seeing decreases of 19.2%, 11.8%, and 8.7%, respectively, over the last three academic years.

3. Program Student Learning Outcomes or Unit/Service Outcomes

List of the Program Student Learning Outcomes or Unit/Service Outcomes

- Develop, support, and communicate ideas to a particular audience through writing.
- Develop, support, and communicate ideas to a particular audience through speech and writing.
- Apply quantitative reasoning to solve problems, interpret answers, and communicate results.
- Use critical thinking to address issues and solve problems.
- Find, evaluate, and use information.
- Use the concepts, theories, and methodologies in arts, humanities, natural and social sciences to examine natural phenomena or to evaluate human experiences.
- Describe and analyze the nature of culture and its variations, past and present.

Program or Unit/Service Outcomes that have been assessed in the year of this Annual Review.

The third PLO---Apply quantitative reasoning to solve problems, interpret answers, and communicate results---was assessed during the 2019 – 2020 AY.

Assessment Results.

Using student work from Fall 2019, several Math faculty members assessed MATH 100 (with developmental course as co-requisite) and MATH 103. Separate assessment tools were used to assess each of the Quantitative Reasoning (QR) criteria as stated in the QR General Learning Outcome:

1. Choose and apply appropriate models to solve quantitative problems.
2. Solve computational problems.
3. Select and/or use appropriate numeric, symbolic, graphical, and/or statistical reasoning to interpret, analyze, or critique information and draws a conclusion.
4. Express quantitative information symbolically and/or graphically, in written or oral language.

</tr>
</tbody>
</table>

For Math 103, 20 artefacts were scored on a scale of 4 – 1 (4 being the highest score). The results are as follows:
For the MATH 100 assessment, two sections were assessed, one of which is a face-to-face emporium-style course with a co-requisite and the other an online five-week course without a co-requisite. Based on the assignments in the emporium-style course, only criteria 2 - 4 were assessed. All four criteria were assessed for the five-week course. For each section, 10 artefacts were assessed and scored on a scale of 4 – 1 (4 being the highest score). The results are as follows:

Math faculty determined that, overall, the assessment results for QR were satisfactory.

For the next round assessment, Math faculty will work together to determine an appropriate assessment problem(s) for assessing criterion 1 for the MATH 100 emporium course.

In both of the sections of MATH 100 that were assessed only 60% of the students met criterion 4. Currently, only MATH 111 (Math for Elem Teachers I) has ENG 100 as a prerequisite. Because many MATH 100 and 103 students have not yet taken an English course, it can be challenging for them to express their solutions clearly in written format. Therefore, Math faculty are considering creating an ENG prerequisite for these courses.

Division Assessment Analysis
Assessment has been ongoing within the four Arts and Sciences (A&S) divisions and results generally indicate that students are meeting or exceeding the proficiencies within the Student Learning Outcomes (SLOs) that are assessed. The tables below present aggregate assessment data for the ten highest enrolled courses in each of the four A&S. The far right column indicates which PLO correlates to the SLO that was assessed. Each PLO has been abbreviated according to its primary learning proficiency (see below). All of the assessment done across the four divisions was summative.

- Assignment: 100% of students received a grade of C or better; Assignment: 83% of students demonstrated full or partial mastery of SLO.

- Assignment: 100% of students received a grade of C or better.

| Assignment: 100% of students received a grade of C or better; Assignment: 90% of students demonstrated full or partial mastery of SLO. |
| Assignment: 100% of students received a grade of C or better; Assignment: 86% of students demonstrated full or partial mastery of SLO. |

The aggregated and averaged results from the assessment that was done during the previous academic year is promising. These results provide a snapshot of how proficient students are in meeting PLOs vis-à-vis course SLOs. For courses that used multiple measures to assess, PLOs were mapped to correlating SLOs and the scores that pertained to those specific SLOs were included in the overall average for each PLO. Average Scores have been rounded up.

<table>

<td>82% = +24%</td>
</tr>
</tbody>
</table>

Although there are many factors that can account for this significant difference in assessment scores, the difference underscores the need for regular division-level assessment, discussion regarding assessment practices, and the comparison of assessment results with pass rates. Regular, on-going course SLO assessment will allow for closer monitoring of PLO attainment.

4. Action Plan

The college is pursuing initiatives aimed at student retention and degree completion. College pathways have been introduced and counseling teams are focusing on how to better meet the needs of our students, many who are part-time students. In addition to traditional face to face classes, options such as hybrid and online courses are being offered. Leeward Community College is also offering five-week online courses in the Liberal Arts.

Below are objectives organized by the Leeward CC Strategic Plan, 2015-2021. The tables below present the five major goals of the Strategic Plan, which are each divided into specific objectives. The steps that each of the four academic divisions that offer classes for the Liberal Arts Program---Language Arts, Arts and Humanities, Social Sciences, and Math and Sciences---have taken for each objective and their proposed action plans for each objective have been provided. The same information for the Waianae Moku campus has been included within the table as well.

Note: “n/a” indicates that no data or response was reported for a particular objective.
### Goal 1: Hawai‘i Graduation Initiative: Increasing enrollment and completion rates while reducing time to completion

**Objective:** Accelerate time to “college-ready” status for students at one or two levels below the college ready standard

<table>
<thead>

The Teacher Education Program (TEP) addresses the state’s need for teachers in the DOE. Its Associate in Science in Teaching (AST) degree prepares paraeducators to be in the classroom. TEP also has two licensure programs for CTE and SPED teachers as well as two CTE and SPED transfer (3+1) programs where students take 3 years at Leeward and the final year at Chaminade University.

SPED’s transfer program (3+1) waiting for approval from UHM and UHWO.

IIT is newest program in division.

The ICS program is adding a Cloud Support Specialty consisting of ICS 131 Introduction to Virtualization, ICS 215 Introduction to Scripting and ICS 284 Cloud Security to the AS ICS degree.

A Business Advisory Council is being organized to identify employment trends in the Waianae Coast for the next 10 years. Campus expansion is being planned based on the EMSI employment report funded by the CTE Dean.

The Business Advisory Council will meet during the upcoming year to start long-range planning utilizing the current facilities and identifying best use of the remaining unrenovated portion of the campus.

**Goal 4: Modern Teaching and Learning Environments: Ensuring that students and faculty have the learning and teaching environments appropriate for the 21st century and the sustainability practices to maintain those environments**

**Objective:** Continue to execute energy reduction strategies and sustainability programs.

AA Program Review Committee

The previous assessment cycle, which concluded in 2018, focused on four General Learning Outcomes (GELOs): Written Communication, Critical Thinking, Information Literacy, and Arts, Humanities and Sciences. Since there were no areas of concern for the latter two outcomes, no action plan was formed.

AA Program Review Committee co-chairs Eunice Brekke and Jeremiah Boydstun and Accreditation Liaison Officer Jayne Bopp hosted a Fall 2019 Convocation break-out session “Assessing GELOs: What Did We Learn about Students and Their Learning?” in order to present assessment data to faculty and solicit ideas on how to make the data actionable. While a number of ideas and questions were shared, many of the faculty who attended the break-out session were more interested in learning about the assessment methodology that the AA Task Force used to assess GELOs. Ultimately the break-out session was effective in making the work of the AA Task Force transparent, but not very effective in garnering the type of feedback that could have led to useful, practical action plans for assessment data.

During the Spring 2020 semester, AA Program Coordinator co-chairs Eunice Brekke and Jeremiah Boydstun, in collaboration with Jayne Bopp, the Accreditation Liaison Officer, devised the Critical Thinking Cohort Initiative in order to address the relatively low aggregate score of the Critical Thinking GELO. Working with each of the Arts and Sciences division chairs, Jeremiah coordinated the formation of two-person, faculty-led cohorts for each of these divisions. The mission of these cohorts was to engage in inter- and cross-disciplinary discussion of and professional development on issues pertaining to critical thinking pedagogy ultimately as a means of improving our students’ abilities to practice critical thinking.

Jeremiah met with each of the cohorts during the Fall 2020 semester and is currently working with the Innovation Center for Teaching and Learning (ICTL) to plan professional development activities that put some of the ideas shared by the cohorts into action. Jeremiah will also be working with the ICTL to help plan professional development activities in order to address the lowest scoring measure of the Written Communication GELO (Develop appropriate content to support position, thesis or central idea).

During the Fall 2020 semester Jeremiah and Jayne, who had now taken over as the Interim Coordinator for the Office of Planning, Policy, and Assessment, met and devised an action plan for the AA Liberal Arts Program that will take future assessment activities in a new, much more efficient, direction. We will move away from assessing GELOs and instead focus assessment efforts on Program Learning Outcomes (PLOs),

1 57% of students were able to “Develop a position, thesis, or central idea on the issue or problem”; 55% were able to “Analyze the problem”; and only 49% were able to “Evaluate stated position, thesis or central idea on the issue or problem.”
which are more or less identical to the college’s GELOs. Jayne will work with administration to have the GELOs removed altogether since they are essentially redundant. The college’s PLOs already tie directly into the Institutional Learning Outcomes (ILOs), so having an extra layer of outcomes simply does not make sense.

The new method of assessment, which will take place during the 2021 AY, will rely on mapping, which will connect certain groups of courses to specific PLOs. Specifically, the mapping will focus courses that hold a Focus, Foundation, or Diversification designation, since these designations correlated directly with the PLOs. The rationale for this is simple: these courses are required to graduate with an AA Degree. To receive a designation, courses must go through an application process and regular review to ensure the meet designation hallmarks. Since designation hallmarks can be easily mapped to our PLOs, the assessment itself will use student pass rates for courses bearing these designations to assess the Liberal Arts AA degree.

As Jayne pointed out, this strategy will be more effective because it is so efficient; our current method of assessment on a five-year cycle is simply not efficient, requiring as it does the collection of artefacts, the creation and use of rubrics, the norming to those rubrics, and the assessment, etc. is, at least for program-level assessment, simply too much work. We can easily assess each PLO more often with this new method. Course mapping is also how most of the other UHCC campuses assess their Liberal Arts degree.

5. Resource Implications

The needs of the program are filtered through the Divisions and are articulated in the Planning Lists developed through the Annual Program Reviews.
1. Program or Unit Description

The Associate in Arts (AA) degree program consists of at least 60 semester credits, entirely at the baccalaureate level (100 level and above), which provides students with skills and competencies essential for successful completion of a baccalaureate degree. The AA degree program provides students with a solid liberal arts and sciences foundation in preparation for transfer to four-year colleges and universities. The AA degree program also develops critical thinking, information literacy, communication and problem-solving skills needed for a successful career.

The general education received in the program:

- Encompasses the common knowledge, skills, and attitudes needed by individuals to be effective as persons, family members, workers, and citizens.
- Provides opportunities to develop understanding, abilities, values, and personal attributes which should help students apply their knowledge, skills, and talents to make sound decisions and to analyze and solve problems in a multi-cultural community.
- Helps the students gain a more integrated view of knowledge, a more realistic view of life and a more defined sense of community and social responsibility.

What is the target student or service population?

As stated in the 2020 – 2021 Course Catalogue, “As part of the University of Hawai‘i system, we are dedicated and responsive to our community, providing an open door to the world of educational opportunities. We offer a variety of educational programs and services on our main Pu‘uloa (Pearl City) and Wai‘anae Moku campuses. [. . .] While the Leeward coast and Central O‘ahu are the
primary areas served by the College, students attend Leeward Community College from all parts of the island.”

2. Analysis of the Program/Unit

Overall program health is rated at a “cautionary” level, where it has remained for the past three academic years.

</table>

Demand is currently rated as *Needs Attention*. The rating is based on the percent change in majors from the previous year, which saw a decrease of 131, or 5.87% for the 2020 – 2021 AY. Correspondingly, the total decrease in Student Semester Hours (SSH) over the last three academic years has seen a total decrease of 3522 SSH, or 5.91%.

The number of classes taught over the past three academic years has steadily decreased for a net loss of 121 classes offered. This can primarily be attributed to a decrease in full-time enrollment over the past three academic years, a 9.75% decrease in FTE BOR appointed faculty (see Efficiency Indicators below), and increased efforts within the system to streamline the path toward graduation, which dissuades students from taking classes that are not required for graduation.

</tbody>
</table>
The health call for Efficiency continues to rate as Healthy. Class fill rates have remained steady over the past three academic years, seeing a 0.7% increase during the 2019 – 2020 AY and increasing again in the 2020 – 2021 AY by 2.2%.

The ratio of majors to FTE faculty has increased by one over the past three academic years and is currently measured at 28, though the number of FTE BOR Appointed Faculty has decreased by 12 since the 2018 – 2019 AY.
the P-20 goal of having 55% of working age adults with a college degree by 2025.” For the previous two academic years, the number of students who were awarded an Associate Degree remained steady at 532, but saw a significant increase of 686 degrees awarded during the 2020 – 2021 AY, which represents a 29% increase.

3. Program Student Learning Outcomes or Unit/Service Outcomes

The program learning outcomes are:

- Use the concepts, theories, and methodologies in arts, humanities, natural and social sciences to examine natural phenomena or to evaluate human experiences.

- Develop, support, and communicate ideas to a particular audience through writing.

- Develop, support, and communicate ideas to a particular audience through speech and writing.

- Find, evaluate, and use information.

- Apply quantitative reasoning to solve problems, interpret answers, and communicate results.

- Use critical thinking to address issues and solve problems.

- Describe and analyze the nature of culture and its variations, past and present.

Program or Unit/Service Outcomes that have been assessed in the year of this Annual Review.

In the past, assessment for the AA Liberal Arts Program was conducted via the traditional method of collecting artefacts and scoring those artefacts against rubrics designed specifically for the assessment. Prior to scoring, the artefacts were normed. Following assessment, results were aggregated and presented as data sets. Requiring the work on a committee (the AA Task Force) composed of nearly a dozen faculty from various disciplines and support areas, this assessment method proved to be time-consuming, inefficient and, due to the nature of the artefacts collected, limited in scope.

At the end of the 2019 – 2020 AY, the AA Task Force was dissolved and an alternative assessment method of course mapping was devised that would not require the collection and assessment of artefacts and would not require the work of a committee. Course mapping would instead collect data on the success rates of students enrolled in designation courses, specifically Foundations, Diversification and Focus courses, in order to capture a broad view of how well students were meeting Program Learning Outcomes (PLOs). Additionally, course mapping would provide an overview of student success for the various designation areas and within specific courses. It would, in short, be more efficient and comprehensive.
Working collaboratively with the Office of Planning, Policy and Assessment (OPPA), the AA Liberal Arts Program Coordinator collected and aggregated data on student success rates for designation courses for the Spring 2021 semester. The tables below show the five highest and five lowest scoring courses for each of the designation areas. The data only includes those students who received a letter grade, an “I” grade, or a C/NC grade at the end of the semester and does not include students who received a “W” grade.

Courses in which 70% or more of enrolled students met PLOs are highlighted in green, while courses in which less than 70% of enrolled students met PLOs are highlighted in red.

Note:

- Some Diversification areas, such as Written Communication (FW) and Oral Communication contain less than five courses.
- All percentages have also been rounded to the nearest tenth.

</table>
Of the 10,141 grades that were earned during the Spring 2021 semester, 8301 of those grades, or 81.9%, met or exceeded the minimum requirement to meet PLOs, while 1840 of those grades, or 18.1%, did not meet the minimum requirement. Specifically, 5147 (50.8%) “A” grades were earned, 1985 (19.6%) “B” grades were earned, and 1156 (11.4%) “C” grades were earned. There were also 13 “CR” grades awarded.

While there does not appear to be a clear-cut pattern or trend regarding underachieving courses, it would be advisable to examine division-level assessment results for the lowest scoring Foundations Quantitative Reasoning courses and Diversification Physical Science Courses to see if students are struggling with specific proficiencies (SLOs) that could be correlated with PLOs.
4. Action Plan

The college is pursuing initiatives aimed at student retention and degree completion. College pathways have been introduced and counseling teams are focusing on how to better meet the needs of our students, many who are part-time students. In addition to traditional face to face classes, options such as hybrid and online courses are being offered. Leeward Community College is also offering five-week online courses in the Liberal Arts.

The table below presents the four major goals of the Leeward CC Strategic Plan, 2015 – 2021, which are each divided into specific objectives. Notable steps that each of the four academic divisions that offer classes for the Liberal Arts Program---Language Arts, Arts and Humanities, Social Sciences, and Math and Sciences---have taken for each objective and their proposed action plans for each objective have been provided. The same information has also been provided for the Wai’anae Moku campus. Objectives for which none of the four divisions or Wai’anae Moku provided information have been omitted.

<p>| Goal 1: Hawai‘i Graduation Initiative: Increasing enrollment and completion rates while reducing time to completion |</p>

As a means of coordinating with the DOE Adult Schools to align education and GED preparation courses with community college curricula, the Wai’anae Moku campus is currently examining the possibility of offering GED courses.

In order to stay connected to students and inform them in an efficient manner, The Waianae Moku campus consistently communicates via social media in addition to college email. The Moku campus also utilizes the Westside Stories local newspaper and attends neighborhood board meetings for the Waianae and Nanakuli/Maile Boards.
To increase access to STEM programs and provide distance and hybrid education opportunities in STEM education, the Wai’anae Moku campus has expanded offerings for BIOL 130, BIOC 141, and MATH 135.

The Wai’anae Moku campus also purchased subscription to Penji online student support services to assist students with tutoring needs.

5. Resource Implications

The needs of the program are filtered through the Divisions and are articulated in the Planning Lists developed through the Annual Program Reviews.
On August 20, 2019 and January 7, 2020, the Disability Services Office (DSO) presented information about ADA accommodations at the New Hire Orientation. There were a total of 20 participants at the August 20 orientation and 30 participants at the January 7 orientation. The New Hire Orientation took place in our Learning Commons and information was presented through slide decks. According to an email we received, the following comments were made about the information that was presented.

1. “Without a doubt this was the BEST “new hire” day I have ever attended.
2. “I was planning on leaving at lunch time, but stayed because it was such a high-quality program.”

As a result of the Covid19 Pandemic, a sudden shift in the delivery of courses occurred. Instructors pivoted to online learning in order to deliver course content. In response to the sudden shift in learning modalities the DSO held workshops and training for staff and faculty. The presentations included information about ADA laws, the Disability Services Office accommodations process, and how to create accessible documents. These workshops and training took place on the following dates, May 27, 2020, May 28, 2020, May 29, 2020, June 8, 2020, June 12, 2020, July 1, 2020, July 6, 2020, July 8, 2020, and July 10, 2020. Sessions were held virtually using remote meeting environments. While 100% of respondents reported that overall the workshops were “Very Good” or “Excellent, only four out of the 11 workshops offered were evaluated. Since the collection of feedback for these events was not as consistent as we would like them to be, moving forward the DSO will further formalize workshop curricula and be more intentional about soliciting feedback and assessing the effectiveness of trainings.

1. **Program or Unit Description**

Counseling Unit’s Mission:

*With integrity and purpose, Leeward CC counselors promote student success and the college mission by valuing individual worth, recognizing and respecting the diverse needs of students, and encouraging and supporting academic, career and personal growth.*

This mission guides our unit goals and activities, and are in alignment with the larger Student Services mission.

The Counseling Unit is the one constant support in a student’s academic journey, helping them persevere through every step, from start to finish.

We serve as the translators of college jargon, processes, and procedures. We are conduits to helping students advocate for themselves and direct their actions. We are the teachers, the guides, the cheerleaders, the compassionate ear, the encouragers, sometimes even the givers of hope. We guide growth and self understanding which promotes healthy choice making toward the accomplishment of a student’s goals and dreams.

Counseling is also the unifying point of various campus entities such as admissions and records, financial aid, veterans administration, academic divisions, job prep services, and academic supports, providing a “boutique-style” counseling with the different divisions.

We are the heart, the center that weaves together the different parts of campus creating a larger web of support for each student’s individual needs. We assist with the building and support of the student’s vision and dreams, career and life aspirations, educational path, and personal growth.

We serve all potential, new, continuing, “at risk” / struggling, and transfer students so that they are able to complete their academic goals toward their careers. We have counselors in our unit designated to serve special populations of students such as Native Hawaiian, Veteran, Early College, Career and Technical Education Programs, those going through Developmental Education Courses, and those students at our Wai’anae Moku campus. This specific program support has enabled a closer working relationship between the counseling unit and the different instructional divisions which has resulted in better communication regarding program and curriculum changes and increased consultation regarding student issues in the classroom. These closer interactions all have an impact on the success of a student’s journey.

All that the counseling unit does supports the college and system’s goals to increase enrollment, retention, and completion.
2. Analysis of the Program/Unit

The counseling unit serves a large number of students (Fall 20: 5,032, Spring 21: 4,733, Summer 21: 1,521) with a wide variety of needs. In total, we have supported our students through 16,831 individual appointments during the 2020 to 2021 academic year (Please note that this number does not include all student phone or email inquiries that are addressed). As part of our unit’s evaluative process, after each counseling appointment, students are asked to complete an online evaluation. These evaluations were carefully crafted to measure activities that align with our unit’s support area outcomes (SAO’s).

We collected a total of 978 counselor evaluations during this reporting period. Although this was only a 6% response rate, the results illustrated in the graph below speak volumes on the effectiveness of our counselors. Students are asked to rate their experience in the following areas: being able to identify a degree/career, being able to outline an academic/career plan, being able to identify obstacles that affect their academic success, being able to identify their next steps toward college success, building their awareness of resources, how satisfied they were that their needs were met, and whether they would feel comfortable returning to the same counselor in the future. The results showed that 94%-97% of students agreed or strongly agreed that these areas were achieved in their appointment.

![Counselor Evaluation Results 2020-2021 AY](image)

In terms of the student response rate to our evaluation, there was an 8% reduction from last year. This may be due to a shift in the unit’s scheduling system. On Oct 5, 2020, the counseling unit moved from the Starfish scheduling system to STAR Balance. This caused a significant change in the way that the student surveys were sent. The Starfish system required that the counseling office manually send the student surveys while in the STAR Balance system, student surveys are...
automated. Although the STAR Balance method is more time efficient, in review of the data, our unit will need to evaluate how we can increase the response rate of students.

Our Unit not only evaluates our services overall as mentioned above in the student appointment numbers and student evaluations of these appointments, but we also evaluate our services in terms of the student journey. We will be discussing each stage in a student’s journey as it applies to counseling services in more detail with data points and our assessment/analysis.

**Enrollment**

Counselors are often the first connection for a new student. This connection is vital as they begin their educational journey because then, they are more likely to return with questions when they are uncertain and for advice when they face challenges. Our first meeting with a student is for their Incoming Student Advising (ISA). This individual or group meeting is mandatory for all first time college students.

During this appointment, the counselor helps the student to discover a sense of purpose for attending college, decipher the language and process required for registration, resolve barriers to registration (holds, placement testing, finances, etc.), register for their first semester courses, determine their next steps (payment deadlines, books, how to navigate Laulima, etc), identify potential risk factors, and develop preliminary strategies for success including connections to resources.

Below is a table illustrating the number of students who attended an ISA appointment and the number of those students who successfully enrolled in courses for that term.

<table>

</tr>
<tr>
<td></td>
<td>Total Registered for Sp21</td>
</tr>
</tbody>
</table>

According to the data, it is clear that the counseling unit assists a large percentage of new students to register for their classes. It seems however, that the number of students seen for ISA that
registered for their initial term has decreased from 85% in fall 2019 to 78% in fall 2020; though the number of students who actually attended ISA actually increased by a small margin. There are a number of factors that may have attributed to this decrease such as the class delivery mode changing mid-semester to primarily online due to COVID-19, students deciding to wait to attend classes due to the uncertainty of the current times, the addition of two more health clearance requirements, and the possibility of withdrawal due to financial reasons.

The pandemic continuing on and no vaccination being available at that time could have attributed to fewer new students attending school in spring 2021 than spring 2020. The yield rate between those two terms, on the other hand, shows a significant increase from 79% to 84%. Though inconclusive, some reasons could be the certainty of how classes were being offered at the time of registration and people who continued to be out of work may have decided to attend school.

Since our last evaluation period, in an effort to increase enrollment, the counseling unit focused its efforts on establishing and implementing a process to follow up with students who attended their ISA appointment but did not register. We established a measurable outcome of increasing the new student registration rate by 3% after implementation of the process. The process was established in spring 2021 with implementation to begin with the incoming fall 2021 students. In addition to this effort, the unit decided that further outreach via email would be sent to those who attend an ISA, but did not enroll in classes at two points prior to the start of the term. This would encourage registration and/or reaching out for assistance from their counselor.

To assist the unit in further understanding the needs of the students who attended an ISA, but chose not enroll, a survey was created to send to these students at the beginning of the term when registration was no longer possible. Gathering data on the reasons students chose not to register for classes would provide another possible way to assess and improve our processes.

Another area that was identified as being crucial in a student’s initial interaction with a counselor was to receive a uniform experience. The unit established a standardized process and aligned it with our SAOs.

In addition to the standardized ISA process, another student touch point was initiated. Each student who attended an ISA and registered for the semester was contacted by the counseling unit’s student employees to see how they were doing and if necessary, were scheduled for a follow up appointment with their counselor. In the inaugural spring 2021 term, 205 new students were contacted via phone or email.

**Retention**

Once a counselor makes an initial connection with a student, the relationship building begins through numerous touch points to support retention efforts. Counselors ask the important questions, drawing information from students that can be used to determine if a student is uncertain about what they are doing in school, or if there is a particular area of struggle they are dealing with in their life.
Counselors guide students through career counseling, intervene with struggling students, assist continuing students toward completion of their goals, help students overcome barriers to facilitate their movement forward in their educational journey, and teach and work with students in IS and SSCI classes.

**Career Counseling**
Career counseling is a series of appointments that guide students to ascertain their purpose and direction in their college journey. The objectives of these meetings are to help students explore the abundant possibilities for their future through engaging conversations and the use of assessment tools that address their interests, values, personality, skills/strengths, passions, and lifestyle. The subsequent conversation and research then covers information from different career/occupational resources and job shadowing experiences so the student is eventually able to decide on a career choice. This then allows for the co-creation of their educational and experiential path to reach their goal. This particular appointment type has been a focus for the counseling unit because it goes to reason that a student with a clear purpose for attending school will be more likely to persevere to their goal and therefore assist in the student retention efforts.

The counseling unit felt that career was such a crucial part of a student’s journey, that we began work on establishing a standardized way of incorporating career into each phase of a student’s growth with us. We determined in our assessment of this area that we would incorporate career into our counseling process instead of establishing a specific measurable outcome. Therefore, the need to establish a specific reason code for career counseling in our scheduling system was no longer called for as previously thought in our last evaluation period.

We divided our unit’s discussion into three phases: the career exploration process, counselor training, and career resources. Thus far, we have established a draft of the career exploration process. In this upcoming year, we will be finalizing this process as well as establishing what is needed in terms of training for counselors in this area and career resources.

**“At-Risk” and Struggling Students**
Another touch point in a student’s academic journey is when they are experiencing difficulties. Students normally reach out to a counselor due to a hold on their registration or the possible suspension of their financial aid. Counselors assist students to better understand and navigate through the college's "rules" in terms of academic expectations and financial aid when applicable. Students are guided through the identification of their challenges and addressing these challenges through skill building and strategies to change behavior toward a more successful outcome in the future. A number of the counselors also build Academic Improvement Plans, which is a step-by-step “contract” for students to follow based on what was discussed and agreed upon in the appointment. At the conclusion of the meeting together, students will have the Unsatisfactory Academic Progress (UAP) hold removed to allow the student to register and/or leave with a Satisfactory Academic Progress (SAP) Appeal done for financial aid compliance.
There are several levels to UAP:

- **Warning** - 1st term cum GPA is below a 2.0
- **Probation** - 2nd term cum GPA is below a 2.0
- **Suspension** - 3rd term cum GPA is below a 2.0-take one term off
- **Probation after Suspension** - returning after taking one term off due to suspension
- **Dismissal 1** - 4th term cum GPA is below a 2.0-take a year off
- **Probation after Dismissal** - returning after taking one year off due to Dismissal 1
- **Dismissal 2** - dismissed for a second time-permanently dismissed

As the table (Students on UAP per Academic Standing) below suggests, there are a large number of warning students and less than half of these students persist to the following term. Currently, a student who is on academic warning does not have an academic hold on their account, while the students in other standings do. Admissions and Records sends out notification emails to students if they are on one of the UAP standings. The notification email for students on warning, however, only highly suggests that the student see their counselor for further assistance. It is not required. The UAP Warning Advising table shows only 22-28% of those on warning see a counselor for assistance, but of these, about 82% end up registering for the next semester.

It goes to reason that if more students on warning consulted with their counselor, there may be an increase in the number of warning students persisting to their next semester. Currently, the majority of the counselors do not necessarily initiate contact to follow up with those on UAP. Based on our assessment, we determined the need to develop a consistent manner of meeting the needs of these students to support the retention and enrollment efforts of the college and system. In fall 2020, the counseling unit committed to making this group of students a priority by establishing supports to increase their persistence rate. In order to achieve this, counseling developed a process on how to best support warning students consistently. This also included a standardized **Academic Improvement Plan** to use when meeting with any student on UAP. This plan is designed to guide conversation, reflection, and co-creation of goals that are intended to move students beyond their challenges through the assessment and use of their strengths and supports that are needed. There is a follow up appointment scheduled at the end of the plan as well. In addition, the unit agreed upon a two-fold outreach effort that would be implemented with the warning students: 1. Communication via text or email would be sent targeting students placed on warning from the most recent term who did not register for classes. This communication would be sent prior to the start of the upcoming term urging students to register and meet with their counselor. 2. Communication via text or email would be sent targeting warning students who registered for classes to check on their progress in the beginning of the term (approximately week 5-6). The counseling unit is also working collaboratively with the Registrar to update the verbiage in the initial warning letter to remind students that counselors are available to support them and that they are still able to register for classes despite their recent setback. The counseling unit plans to implement these changes with fall 2021 warning students, and has determined the measurable outcome to be to increase the persistence rate of this group by 3%.

If a student on UAP is receiving financial aid, they are generally also on an SAP appeal. Financial aid rules require that a student maintain a 2.0 cumulative GPA and a successful completion rate of at least 67% of all courses they have attempted. If a student is not within compliance of either of these rules, their financial aid gets suspended. They may however be eligible to appeal. If a student chooses to complete an SAP appeal, they must meet with a counselor to complete the necessary process. Counselors conduct a similar type of appointment for SAP as they do for UAP. Similar points of discussion are covered with the student as mentioned above in the description of the UAP appointment. One difference however, is that two worksheets need to be completed with the student which guides the conversation a little differently. The first worksheet consists of three parts: an evaluation of what occurred that led a student to be out of compliance, what changes the student is planning to implement, and what resources are available for the student to access should they need. The second worksheet requires the counselor to work with the student to plot out the projected grades based on the load they intend to take in future semesters. This allows the student to see how long it will take for them to get back to good academic standing and what grades are needed to make this happen. Both sheets require the student to sign that they agree and commit to the plan.

As the tables below indicate, in the 2020 to 2021 academic year 370 students were able to appeal and of that 222 of the students or 60% actually completed and submitted an SAP appeal. The Satisfactory Academic Progress Student Retention Rate table illustrates that more than 92% of the students who were either cleared from SAP or met the terms of the SAP were retained to the next term.

*Includes enrollment in either Su21 or F21 courses
Effective fall 2021, Financial Aid will modify the SAP process from requiring the student to meet with both a financial aid officer and a counselor for their first appeal to requiring just a meeting with a financial aid officer. Students will have an option to meet with their counselor to do an SAP plan on their first appeal, but it will not be mandatory. Only students who are appealing for a second time or more will be required to meet with both the financial aid officer and to create an SAP plan with a counselor. Although this shift in process will reduce the number of first time SAP students that are seen by our unit, these students will likely be captured by the overall UAP initiative our unit will be implementing thus providing them the additional guidance and support that they need. Since this is the case and this population of students make up a small fraction of all students on UAP (16% FA20, 4% SP21), it goes to reason that the unit will shift its focus to the larger UAP group to have a wider reaching impact on retention.

*Continuing Students*

The continuing student encompasses a large range, from the second semester student to those who are close to graduation. Counselors often work with these students to facilitate registration for the next semester, review their academic plan to ensure they are on track, discuss and address any academic/personal challenges they may be facing, and assist to develop success strategies when needed. Currently, it is not mandatory for students to meet with their counselor after their initial ISA session. Our unit has found that oftentimes students get caught up in the busyness of their lives and may need prompting to visit their counselor during timely points along their academic journey, such as registration, transfer, or graduation. In an effort to address this, in fall 2020, the counseling unit examined a student’s overall journey and identified possible impact points in the semester where we could deliberately insert communication to inform, support and encourage students. This in hopes of increasing student enrollment, retention, and completion.

Since this increased communication effort was such a large undertaking, we established a Communications Committee (Comm Comm) in spring 2021 to develop a comprehensive communication plan so that all messaging was consistent (fresh, relatable, relevant) and sent out during targeted times based upon the impact points and where the student was on their student journey. This plan was developed and implemented and will continue to be revised as we evaluate the outcomes/effectiveness. The modes of communication included traditional mass emails, but during the summer 2021, our unit was excited to also begin utilizing the System’s new Signal Vine texting tool to engage with students. Although Leeward CC was utilizing Signal Vine for our on-boarding process for new, transfer and returning students, counseling led the charge with the engagement piece with students. Our first campaign targeted continuing students who had not yet registered for fall 2021 classes. The analytics below illustrates that the response rate to the text messages were between 11% and nearly 20%, usually within the first 30 to 60 minutes after a text message was deployed. This piece also requires counselors to be available to monitor and respond to students texting back. During this reporting period, the demands to communicate different types of messages from Student Services via Signal Vine grew. The unit heads assessed the situation and determined that perhaps there should be a larger Student Services Communication Committee for messaging that was not counseling specific so that the workload was more manageable. The Student Services Communications Committee was established. The Counseling Comm Comm will work with the larger Student Services Communications Committee to coordinate messaging so
students are not inundated with messaging. The unit has continued to send mass emails for certain communications to students; however, we have not collected any data on whether the emails have led to any action. To evaluate and improve on our strategies, we will work on tracking the effect of our email messaging in the coming year.

Students Overcoming Barriers
Each of our students are unique in their life experiences and where they are in their student development, therefore face a variety of challenges such as difficulty making good/healthy choices, learning how to manage their time, domestic violence, adjustment issues, motivation issues, financial strain, health and mental health issues, etc.

Counselors assist students in identifying challenges, co-create strategies to overcome these challenges, make appropriate referrals to campus or community resources, and support the student so that they are able to persevere. Multiple issues may need to be addressed at once as many things are interrelated. Counselors also guide students on how to comply with federal regulations (VA, Financial Aid, etc.) so they are able to secure and maintain their benefits to pay for their education, discuss success strategies for students needing to repeat a course more than two times and do the 3-peat override, discuss appropriate credit load for a student’s particular situation, provide overrides for courses based upon transcripts and other information, complete concurrent enrollment forms for financial aid, and assist students with navigating through the appeal process (other than UAP and SAP) in order for their special circumstance to be considered so they are able to continue their academic journey.

Counselors play an important role in assisting students to overcome a variety of barriers and facilitate progression in their educational journey. This role is important in the support of student
retention and although the counseling unit will continue with these efforts, it will be a naturally occurring part of our overall service to our students and therefore will not become one of our unit’s measurable outcomes for the year.

Participation Verification
Participation Verification is a System wide initiative that started in spring 2021. It is similar to Leeward CC’s “No Show” policy in which students who did not participate in their classes during the first week of the term, would be flagged by their instructors and notified that they were identified as a “no show” and if they no longer wanted to participate in the class, they could drop the course. Participation Verification takes this policy one step further and administratively drops those marked as non-participatory, with a full refund. The reasons the System instituted this initiative was to be compliant with the Federal Student Aid regulation requiring verification of student attendance in courses and to encourage student participation from the beginning of the term.

Since this initiative was new and the ramifications of students getting administratively dropped from their classes was potentially severe, communication to the affected students was crucial. The students needed to clearly understand what the initiative was and what the ramifications were of non-participation on their part. They also needed to understand the process and short deadline for appeal in situations where they did not agree with the instructor’s determination. The counseling unit decided to supplement the email communication already being sent by the UH System by calling the affected students who were either receiving financial aid and/or veteran’s benefits to inform, clarify, and answer any questions about the Participation Verification process. It was also to stress the deadline to appeal since it was such a short time frame from the time they are notified to the deadline to appeal. This group of students were prioritized because being dropped from their classes could result in a reduction in their funding and in turn could create financial hardship. The counseling unit will continue this practice for the upcoming academic year and will continue to monitor the data.

IS and SSCI Classes
Each semester, the unit offers classes which promote student growth in the area of non-cognitive skill development (goal setting, problem solving, college success, time management, etc.) and self and career development (sense of purpose) through self-assessment and self-evaluation.

During the fall and spring semesters between one and four classes are normally offered, while in the summer there is a high demand for IS 103 (Introduction to College Success) in particular to acquaint Early College, Next Steps, and distance education students with higher education.

The counseling unit determined a need to establish a protocol for addressing the increasing demand for IS courses during the summer. In the past, the unit was able to address the demand for the IS courses, but as the number of counselors decreased due to retirements and the demand for classes increased, it was necessary to formalize a process for increasing our capacity. A sub-committee was formed and a formalized process for recruitment and training was established. In addition, an SSCI course was converted to an IS 115 course which would provide another option for courses being offered in the summer to address the demand. This course would offer more flexibility in terms of
who could be recruited and trained to teach it. The sub-group also agreed on training and mentorship that would be provided for new instructors by senior instructors of each IS course. Due to this new process, we were able to offer three more IS courses for Early College in summer 2021 as compared to summer 2020 as well as offering three more IS courses for the Next Steps program in summer 2021 as compared to summer 2020.

This year was also fruitful for the IS courses as the instructors worked very hard on aligning SLOs for each IS course for assessment purposes and a common assignment was agreed upon for the IS 103 course to make assessment more streamlined.

We collected data for the Fall 2020- Summer 2021 terms. Please refer to the chart below:

*Early College students have an option to take additional courses in subsequent terms; some may graduate and not continue at Leeward
The IS/SSCI course data above illustrates that overall in comparison to the total number of students entering in each term, there is a relatively low number of students that enroll in these courses, however, more students who take the IS/SSCI courses (both Early College and non-Early College students) earn a 2.0 or higher GPA as compared to the total entering student cohort. In addition, for the fall and spring term, more students who have taken an IS/SSCI course appear to persist to the next term. The data in this area proves to be complex as it involves Early College students whose situations vary from the standard college student.

It is difficult to illustrate the true value that these courses offer students through just the statistics. We have included a few statements that students shared on their evaluations about what they found valuable about their IS course:

IS 103 Sp 21:

1. “I really found the academic plan or the exploring leeward and doing the different things on there along with the scholarships. These were the most useful because I learned about FAFSA and how to apply for it. I also liked the academic plan on STAR because it helped me a lot with mapping out what I have to do in order to achieve my goals academically. Learning about the different scholarships and actually foundations of different scholarships was really awesome. I realized that there is a scholarship for everything and just by doing the research or getting the right resources from a professional can help you succeed 100% more than without it.”

2. “During this course, I found that was the most valuable and helpful was most of the assignments that allowed me to help me open up more and use my voice to speak. I was never really outgoing throughout my elementary and middle school years, but as I attended IS 103 I was able to open up, cooperate with others in my class, and discuss and talk with my Kumu/Teacher. My teacher was able to get me through the course without any struggling or problems which allowed me to be more out there rather than staying hidden and being shy.”

3. “I really loved the stories, the stories helped a lot. Not just her Hawaiian stories but all her stories. I liked hearing about her actual life experiences, it helped me take a step back and realize what I should and shouldn't do in the real world. I also liked her stories because it made you think. Not no math problem think but personal think, to me those are the hardest, but it helped a lot. The stories also always taught us a lesson whether it be what not to do in an interview or about self love, her stories always had meaning and a significance.”

4. “What I found most helpful about the course was the information I was able to obtain. Before taking this class I really did not feel that I was a strong independent person. But with each lesson we took in this class I was able to really open up about myself and push myself past my limits. I am able to see that I good enough and that I am a strong person who is ready for whatever comes my way.”
There is no doubt these courses make an impact on student’s persistence and GPA, but the statements above show just how much impact these courses and instructors can have on the student’s personal growth. We remain committed to continuing to offer this valuable option for students, but for reporting purposes and measurable outcomes, we will choose to focus our unit’s efforts on areas that have a high impact on a larger number of students.

**Completion**
The final and most rewarding touch point with a student is completion. The counseling unit not only ensures that students are on track to completion of their degree, but also plays the role of coordinator and facilitator with the various parties involved in the student’s transfer including transfer workshops. Counselors also ensure the timely conferral of certificates and degrees through degree audits and obtaining exceptions to the standard journey for graduation.

**Transfer Advising**
As a student approaches 30 to 45 credits, they may elect to meet with their counselor for a transfer advising appointment to ensure their smooth transition to the workforce or to the next level of their education. Counselors help students navigate through the graduation and transfer process by identifying and guiding them through the graduation application process and the "rules" of their receiving institution such as, transfer credits, the credit transfer process, and the enrollment process. Furthermore, students are provided transfer options available to them such as Auto Admit, memorandums of agreement, and programs like Ka‘ie‘ie. In the past, the unit pulled student data of students that were 75% to 90% complete with their degree path. The student lists were provided to the respective counselor to reach out to those students to congratulate them for being so close to completion and encourage them to meet for a transfer appointment. Our evaluation from our last ARPD determined that there was no consistent practice throughout the unit. We stated that our unit would agree upon measurable outcomes and consistent activities for this year; however, our unit determined that our priorities this year would be focused on three areas: ISA, Career, and UAP Warning Students. After the completion of these priorities, we will be able to focus our efforts on this population of students and hope to develop messaging, standardize practices, as well as determine measurable outcomes.

**Degree Audits**
The counseling unit works in tandem with Admissions and Records to verify that students are eligible for graduation. There are three processes that occur to award the maximum number of degrees and certificates a student qualifies for.

The first process is Auto Conferral (AC), which is done in the fall and spring terms. In this process, the UH System STAR team will generate a list of students who have completed or are in progress to complete a degree or certificate in that semester. Counselors will then review all entries on the list to verify if the student is eligible to earn the certificate/degree or not. In a review of this process, it was identified that there were some students who were missed and were actually in progress to graduate. As a result, the 100% completion list, which notes if a student will be completely done with their declared degree/certificate, is pulled from STAR Academic Logic and is added to the Auto Conferral list for review.
The second process is Reverse Transfer (RT), which is also done in the fall and spring semesters. The UH System STAR team again creates a list of students who have completed their Associate in Art (AA) in Liberal Arts degree or Associate of Science (AS) in Natural Science from Leeward, but have already transferred to an in-System four-year school prior to completing their credentials. One counselor reviews the Reverse Transfer candidates and will oftentimes transfer many completed classes back to Leeward in order for the student to meet the requirements for their AA degree.

The third degree audit process is when the student submits a graduation application on their own. Duplicate student certificates/degrees previously reviewed as an Auto Conferral or a Reverse Transfer are removed from this list. Once again, counselors will review each submission to determine if the student qualifies for the degree/certificate they applied for.

For each of these processes, if it is discovered that a student may not graduate, the reviewing counselor will intervene and attempt to facilitate completion. Depending upon the situation, this may be through the coordination of transferring credits from another institution, requesting an exception or a substitution to use a different course in lieu of a requirement, or to waive a requirement entirely.

Per the Graduation Application/Reverse Transfer/Auto Conferrals table, counselors have reviewed a total of 2,481 graduation applications/RT/AC to help students graduate in the 2020-2021 AY. Moreover, the unit facilitated 84 transcript evaluation requests to transfer in course work and 103 substitutions/waivers during the same time period. This extensive and detailed work that the counseling unit does in reviewing applications makes conferring degrees and certificates of this magnitude possible.

Students Overcoming Barriers to Graduate
Counselors not only assist students to overcome barriers for retention, we facilitate processes and exceptions for barriers to graduation. We act as a guide for students through the prior learning assessment (PLA) process, in which a student has work experience that can be used as course credit to fulfill degree requirements. PLA has various options and can be time intensive so it is important that the counselor explain the details of the student’s steps in the process as well as coordinate with all the parties involved. In addition, we conduct unofficial transcript evaluations for students transferring in from outside of the UH System so students are able to get a general idea of what courses will transfer in toward the requirements of their intended degree. This helps them to better plan their semesters avoiding duplicate courses until a formal evaluation is completed. Another way we promote graduation is through the submission of substitutions and waivers as noted above in the Degree Audit section. It may be difficult for a student to figure out and understand what acceptable exceptions are, therefore, counselors are the liaisons and interpreters for each student’s unique situation.

At this time, we are not collecting any data on how often we assist students with overcoming barriers to graduate as this usually occurs as a part of the Incoming Student Advising or continuing student appointment. The extent of the unit quantifying our work with these students is the number of substitutions and waivers that have been completed which is located in the table above.

Summary
Although each student that enters our doors is unique with their own set of needs, they all share one common thread, a counselor. The counseling unit plays a vital role as the consistent connection with the students as they travel through each point in their journey. This connection allows us to build a path with a student toward their life desires, to guide and teach through challenges, uncertainty and doubt, to celebrate the victories with them and to help them persevere to the completion of their goals with us. Our unit undoubtedly impacts student enrollment as demonstrated through our ISA and registration appointments. We also impact retention as demonstrated through our work with UAP and facilitating the removal of barriers for students. Finally, we impact completion as demonstrated through our work with continuing students and students close to completion of their degree as well as our work with confirming graduation applications.

3. Program Student Learning Outcomes or Unit/Service Outcomes

Based on the analysis of the counseling unit outlined in the previous section, it is clear that counseling is a consistent resource, support, and guide for the student throughout their academic journey. The unit contributes in many ways to Leeward CC in terms of enrollment, retention, and completion of students. During the 2020-2021 ARPD reporting period, we strived to improve on quantifying our work with students and being more consistent and intentional in our outreach to them. Below are the Action Plan points from last year’s ARPD and how the counseling unit addressed each goal.
### Action Points from 2020-2021 ARPD

<table>
<thead>
<tr>
<th>How Counseling Addressed Each Point</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Agree upon impact points along the student’s journey</strong> (2nd semester, 75% complete, etc.)</td>
</tr>
</tbody>
</table>
| In fall 2020, the unit decided upon specific points on a student’s journey, in which a message or action could help impact enrollment, retention, or completion. These impact points include:  
  - the second or third week of school (prior to the end of the erase period)  
  - the fifth or sixth week of school  
  - the 11th week of school (before the start of continuing student registration)  |
| Certain populations of students that were identified to message include:  
  - students on UAP  
  - those at least 75% complete with their degree  
  - students who do not register before the start of the next semester |

| **Set measurable outcomes for specific appointment types such as UAP/SAP, and Incoming Student Advising, and Career Counseling** |
| In fall 2020 and spring 2021, counseling established the following measurable outcomes:  
  - Improve retention of warning students by 3% from the previous year  
  - Improve enrollment of students who attend an ISA by 3% from the previous year  |
| The unit determined that since career is such an integral part of what we do, instead of creating a specific measurable outcome, we would include career conversations within all our counseling appointments.  

Since we set our measurable outcomes, we were able to start collecting baseline data to compare with our data once we begin implementing our efforts in each area. |

| **Establish measurable outcomes for each impact point along the academic journey; this includes intentional outreach to students** |
| The Communication Committee (Comm Comm) was created in spring 2021, to produce a targeted messaging plan to students at the impact points mentioned above. In addition, the Comm Comm determined what means of communication would be most appropriate whether it be via text, email, or phone. The group will track student engagement directly after a message is deployed starting in fall 2021. |

<p>| <strong>Add more specific appointment reason codes in the scheduling system to keep better track of what</strong> |
| The unit decided it would be difficult to implement this idea because it would rely on students and counselors to correctly select appointment reason codes. Furthermore, there may have been multiple reason codes that were touched upon during an appointment |</p>
<table>
<thead>
<tr>
<th>type of appointments students come in for</th>
<th>yet only a single code could be selected. As a result, instead of using more specific reason codes, we will instead utilize STAR Academic Logic and STAR Balance reports to pull specific data sets necessary to see the outcome of our efforts on enrollment, retention, and completion.</th>
</tr>
</thead>
</table>
| Determine how we will address the staffing shortfall and manage the student loads | Counseling has made the following adjustments to manage student loads over the past year:  
  - Several counselors have volunteered to temporarily take on additional student populations in Early College to assist in that high growth area  
  - All counselors were trained on time-consuming military student plans like Tuition Assistance and MyCAA, to help alleviate the workload of our veteran’s counselor  
  - Temporary personnel changes occurred to address staffing shortages:  
    - two grant funded positions have been filled to assist with groups with high numbers such as Native Hawaiian liberal arts students and with areas of high need like the Wai‘anae Moku Campus  
    - a Disabilities Services’ counselor was temporarily assigned to fill an Early College position half time for one year  
    - an Early College Counselor was hired as a backfill for a counselor on loan to the System for two years |

In addition to our Action Plan points from last year, we also worked on determining standardized processes for specific appointment types, such as ISA and UAP. This was to ensure that students have a consistent experience no matter which counselor they meet with. We have also started standardizing a process for career counseling/conversations with students and will finalize this process by the next reporting period.

Over the past year, our unit established our counseling ‘ulu tree foundation which was important for us to move forward cohesively in the examination and assessment of the entirety of the work of our unit. Please see the images below explaining our parts, how we are all connected and interdependent, and how each of us plays a part in the ripening of the fruit which are our students.
Our Root System

Root, the definition according to Merriam-Webster and Dictionary.com:

1. "the part of a plant which attaches it to the ground or to a support, typically underground, conveying water and nourishment to the rest of the plant via numerous branches and fibers."
2. "the basic cause, source, or origin of something."
3. "establish deeply and firmly."
4. "the essential core: HEART—often used in the phrase at root”

We want to be deeply rooted in what our heart and truth is and therefore what we choose to do.

We want to be deeply rooted so that we are able to withstand hurricanes, drought, and flooding.

Our Trunk

Trunk, the definition according to Merriam-Webster and Dictionary.com:

1. "the main stem of a tree apart from limbs and roots"
2. "the central part of anything"

The purpose of the trunk is transport the water and nutrients throughout the tree and to support the crown of the tree.

We want our trunk to be strong and open to receiving and giving life….

If we operate from our heart and truth individually and as a whole, we will be “life giving” in what we do.

Our Branches and Leaves

Branch, the definition according to Merriam-Webster and Dictionary.com:

1. "a secondary shoot or stem (such as a bough) arising from a main axis (as of a tree)"
2. "to extend in different directions from a main part or point"
3. "extend or expand one's activities or interests in a new direction"

Leaf, the definition according to Merriam-Webster and Dictionary.com:

"a flattened structure of a higher plant, typically green and blade-like, that is attached to a stem directly or via a stalk. Leaves are the main organs of photosynthesis"

We each are a branch on our tree. Together the branches make up the crown. Each branch bears its own leaves, flowers, fruits and seeds contributing to the health of the entire tree, but we also need the team trunk and roots to be healthy.

We often are so busy with our branch of the tree that we don’t realize what the entire tree looks like or how healthy it is, what other branches need….so let’s be curious about that.
With strength from this foundation, as a unit we were able to examine the entire journey of a student, the impact points and the priorities as it related to the student’s journey. Please see the image below of the ‘ulu fruit student journey.

We were then able to evaluate our processes within these priorities. We set our measurable outcomes so we are able to determine our effectiveness and efficiency. We will continue to examine all parts of what we do as a unit and the impact this has on enrollment, retention and completion so that we are able to focus our efforts in those areas of highest impact.
4. Action Plan

In 2020 to 2021, the counseling unit concentrated our efforts on developing intentional supports to help students during certain impact points along their journey, creating a more consistent student experience, and determining measurable outcomes for our priorities. For this upcoming year, we plan to begin implementing what we have created. We will continue to take a look at our outcomes and data to assess the efficiency and effectiveness of these strategies and whether modifications are needed.

The following are the specific action points the counseling unit plans to accomplish in the next review period:

- In fall 2021, start using a predetermined process agreed upon by all counselors, to follow up with students who attend an ISA but do not register for classes.
- Begin using the standardized ISA process in spring 2022, so all new first time college students entering Leeward will have a consistent experience independent of which counselor they meet with.
- In spring 2022, implement the Academic Improvement Plan with warning students, who meet with a counselor.
- Continue to establish a consistent Career Counseling model for all counselors to follow.

5. Resource Implications

One of the main goals for the next academic year is to continue to increase outreach and communication with our students throughout their academic journey at Leeward CC. This will align with the institution’s Wildly Important Goal of “keeping the students we have”. Considering that our goals will require more targeted outreach, it is more important than ever to be fully staffed. The counseling unit continues to face difficult personnel challenges in the upcoming years. We have already experienced the loss of three counselor positions (Wai’anae, Teaching, and Native Hawaiian) and one clerk position due to them being eliminated by the legislature in 2020. To fill the vacancies, we currently have two temporary hires and have shifted a counselor from one area to fill another. This is a short-term fix for the next year. There are four counselors and our only remaining clerk, who are eligible to retire within the next few years. When these retirements occur and the temporary appointments end, these losses will leave unprecedented personnel shortages in the unit making the increase in the number of quality touches with students near impossible. As a result, we request that these positions be reinstated to ensure that there is a manageable counselor to student ratio to continue to provide a high level of support to all students throughout their academic journey. This level of service can in turn lead to increased enrollment, retention, and completion rates.
Goal & Objectives

The goal of the strategic planning team and affiliated committees is to guide the college in the revision of its vision, mission, and strategic plan.

1. Foster **renewed commitment** to the vision, mission, and each other.
2. Cultivate **collective direction** for successful implementation of the plan.
3. **Strengthen the capacity** of the campus community to implement the plan.

**SG meeting minutes**
Student Services
Executive Summary

ANNUAL
REPORT OF PROGRAM DATA
2021
1. Executive Summary

Leeward CC’s Student Services Area is comprised of 10 different units and programs that work in concert to support students’ entry, progression and completion of their academic journeys. They are responsible for supporting and assisting with students’ co-curricular needs—needs that are non-academic in nature, but that directly impact students’ ability to be successful in their classes and in earning their credentials.

Leeward CC’s Student Services Division embodies the following Units and Programs. Each play a unique role in students’ academic life; but all are focused on 1) helping students start, continue and complete their education; 2) providing support and resources to address challenges that jeopardize students’ progress; and 3) alleviating institutional, administrative and/or other barriers that prevent students’ forward movement.

Admissions and Records (A&R)
The Admissions & Records Office is often the first point of contact people have with the College. It oversees students’ admission; maintains their academic records as they progress through their academic programs (i.e., their grades and transcripts); and helps to confer all of their degrees and certificates once earned. It also serves as both an access and acceleration point for transfer students who wish to utilize previously earned credits to earn a degree; to students utilizing their veterans benefits to support their education; and any other student who needs their enrollment and/or course-taking verified in order to secure employment, scholarship funding, admission to the next level of education, etc. The Admissions & Records Office plays an important role in students’ entry into the College, their progression through their coursework, and their completion of this leg of their academic journey.

Counseling
Once a student’s journey begins, the Counseling Unit is the main provider of academic guidance and non-academic support. Counselors start students on the right path by providing initial advising for all first-year students. They then help to keep students on that path by providing continued academic advising (including transfer advising) and by intervening when students perform poorly. Counselors help students traverse the many facets of a student’s educational journey. This includes navigating the College’s processes and procedures; establishing educational and/or career goals; managing their financial supports; successfully negotiating work-school-life balance; practicing self-advocacy; and overcoming academic and personal challenges, to name a few. Counselors also are the arbiters of graduation, performing all degree audits to confirm eligibility for credential conferral. Each of the Unit’s 20 Counselors are asked to monitor and steward the educational journeys of a specific caseload of students—so every student has a counselor.

Early College
In order to increase the State’s college-going and college success rates, Leeward CC’s Early College Program provides high school students with the opportunity to take college courses while still in high school. The program targets those who do not traditionally aspire to college (e.g., low-income and first-generation students), and the credits students earn can be applied to both high school graduation and college degree requirements. The program strives to prepare students for
college success on all levels, and to meet the College’s student success goals. Leeward CC’s Early College Program depends heavily upon its partnerships with students’ high schools.

**Financial Aid**
The Financial Aid Office serves as the arbiter for federal, UH system and institutional aid that is given to students in support of their education. Although this office awards some merit-based funding, the majority of their resources support those who are both underrepresented in higher education and who stand to benefit most from it—i.e., low-income students. Because much of the funding given out by this office allows for continued financial support, the Financial Aid Office is key in helping students start, continue and then complete their education. The Financial Aid Office also plays an essential role in helping to provide equitable access to education for those who are underrepresented.

**Hawaii Nutrition Employment & Training (HINET) Program**
Through a partnership with the Department of Human Services (DHS), the HINET Program helps eligible students receive food stamps and other supports for their basic needs so that they can successfully engage in their education. Participating students must meet the DHS income standards and must be pursuing a short-term, workforce credential. The HINET Program is extremely important as it helps to fill the gaps for students who are ineligible for federal aid, who qualify for insufficient levels of aid, and/or who are pursuing non-credit credentials. The HINET Program also serves as a conduit that connects qualifying students to other State resources (e.g., childcare, TANF, housing, emergency assistance, etc.).

**Job Prep Services**
The Job Prep Services Office helps students prepare for employment. It provides them with career assessment and exploration tools; it helps them develop the skills to actually apply for jobs (e.g., resume building, interviewing, effective job searching, effective application submission); it helps to expose students to different job opportunities within intended fields; and it connects students with potential employers.

**Recruitment**
The Recruitment Office focuses on increasing Leeward CC’s enrollment. It helps to raise public awareness about the College, and it supports and promotes the (re)enrollment of a wide variety of constituents. The Recruitment Office coordinates and runs all campus tours; provides representation at Career & College Fairs and other events; performs various college-going workshops at the high schools; and provides application assistance to people who are interested in attending the College. The Recruitment Office also serves as the College’s primary liaison with its service area high schools, adult community schools, military educational centers and alternative educational sites.

**Student Health Center (SHC)**
The Student Health Center is an extension of University Health Services at Manoa. It provides health care services that include but are not limited to health education, disease prevention, and treatment for acute episodic illness and family planning services to Leeward CC students, faculty, and staff. The SHC also works with Admissions & Records to ensure that the State of Hawaii
mandated health requirements for entrance to post-secondary school are met. The mission of the SHC is to achieve and maintain a healthy student body and college community.

**Student Life**
The Student Life Office helps to keep students engaged in their education by 1) offering them a conduit through which they can build connections; 2) offering them an opportunity to develop leadership skills; and 3) fostering a sense of community within the student body. Student Life does this through organizing and executing campus-wide events; facilitating the establishment and continuation of student organizations; overseeing the campus’s Student Government programs; and by coordinating and running its multi-campus intramural sports program. Nurturing involvement is important to students’ retention. Not only do students want to remain a part of our community because of these activities, but those involved in these Student Life programs must 1) perform at a certain level academically; and 2) stay enrolled at the campus in order to participate.

**Veterans Resource Center (VRC)**
The Veterans Resource Center (VRC) provides specialized services for military veterans, active duty servicemembers, reservists, guardsmen, and their dependents. It supports these students through all phases of their educational journey—particularly in their entry to the College and in their continuation from semester to semester. The VRC is key in helping students understand how to access and retain the military benefits that finance their education. It is also poised to support and provide resources to students who experience difficulty. The VRC houses a Leeward CC Counselor as well as a partnership with the Department of Veterans Affairs (VA), who provides both an onsite Psychologist and a Vocational Rehabilitation Counselor.

**Dean of Student Services Office**
The Dean of Student Services Office coordinates and oversees the efforts of all of the units within Student Services. It provides leadership and guidance; provides advocacy and resource development; oversees and manages various student success initiatives; acts as an ombudsman for students when they encounter difficulty with the College’s processes; and ensures the health and safety of the campus by administering and enforcing the Student Conduct Code as well as the University’s Title IX policy.

Collectively, the offices mentioned above contribute to the College’s efforts to enroll, retain and then transfer and/or graduate (i.e., completion) students—a process otherwise known as the Student Success continuum.

**EVALUATION SUMMARY**
Over the last year, many things changed. The COVID-19 pandemic completely shut the community down, and the University spent the entire academic year online. Our students experienced many repercussions from this in both their academic and their non-academic spheres. Many found their lives disrupted, their responsibilities expanded and their focus shifted to securing basic needs. Community-wide health and safety measures such as telework, social distancing and online/remote services made it difficult for the College and for Student Services to connect with students.
Therefore, in this last year, we saw a notable decline in student engagement, participation and service usage in almost every way.

There were a few exceptions where service utilization remained the same or increased. In general, areas that helped with students’ immediate needs continued to be tapped by students at either the same or increased levels as previous years (e.g., Counseling, Food Pantry, Urgent Student Relief Funding). Conversely, services that provided support and guidance for longer-term concerns (e.g., Job Prep Services, Early College, new admission) saw a considerable decline in usage. This shift in student patronage directly reflected the changes in their needs. Where they once focused on longer-term endeavors, their more basic and urgent needs now took centerstage.

Because the impacts of the COVID-19 pandemic heavily influenced how Student Services was utilized this year, our annual review must keep this context in mind. In many ways, this year is an outlier for Student Services; it does not accurately represent the typical demand, effectiveness or efficiency of the area or its units. So, although we can reflect on what occurred, we cannot compare it to what may have been happening pre-pandemic.

When we do reflect on what occurred in AY 2020-2021, we can see the impacts of the pandemic:

**Program Demand**

In general, there was a smaller, but still significant demand for the services provided by Student Services. Our areas were successful in meeting these demands, even though it was more difficult given the fact that a University-wide hiring freeze created personnel shortages; that a University-wide spending freeze created resource shortages; and that we needed to transact most if not all of our business remotely (online, via phone, etc.).

**Enrollment**

- The College received 9,652 applications for admission, which represented a 12.5% decrease from the previous year.
- Of these, 2,109 were from Early College students, which represented an 18.8% shortfall from the previous year.
- 1,936 applications were from transfer students. These students have college credits and are likely in need of transcript evaluation services. Approximately 24.9% of our 2020-21 applicants fell into this category. Although this number remains high, it again represents about a 16.4% drop in applications from the previous year, even though the proportion of transfer applicants in the overall applicant pool remained pretty steady.
- Of the students who did enter and register in Fall, over 40% (40.5%) were supported by federal financial aid. In the Spring, financial aid supported over a third (33.7%). This represented approximately a 4.1% decline from the previous Fall term, but held steady from the previous Spring.

**Retention and Persistence**

- 4,078 students who had applied to our campus during the evaluation period enrolled in classes. This represents a decrease of about 8.2% and is probably related to the lower application rates seen over the academic year. It also puts us on par with the 2018-19
academic year as well as those which preceded it; the application to enrollment rates in 2019-20 were exceptionally high and seem to represent an anomaly. The 8.2% loss in enrollment almost completely reverses the 8.5% gain seen in that one year.

- 1,368 of the 4,078, or 33.5%, of the applicants who subsequently enrolled were Early College students. This is 12.9% fewer students than in the last evaluation period, and a complete reversal of the upward trend that we had witnessed in the years prior to the pandemic.

- Student Services continued to support a student body of over 8,700 throughout the academic year, which translated into roughly 6,300 students a semester (Fall and Spring). This was consistent with the previous year and reversed the downward trend in overall enrollment that the College has experienced over the previous 4 years.

- Less than half (approximately 43%) of the continuing students at Leeward CC financed their education with federal student aid each semester. About 10.5% of Leeward CC’s students financed their education using VA benefits, and 80 students were supported by HINET.

- An average of 16.4% of enrolled students and an average of 23.2% of newly enrolled students were transfer students who have college credits that needed to be officially applied to our degree requirements.

- About 11% of our student body were veterans or military-connected, representing no change from the previous year.

- Between 9%-10% of our student body were Early College students who were dually enrolled in both high school and college.

- Hānai iā Leeward, the College’s Food Pantry, saw an 52.3% increase in student participants last year.

- The College continued to lose enrolled students over the course of time. The College’s Fall to Spring persistence rate continued its plateau of 68%, and its Fall to Fall rate remained steady at about 61%.

**Completion**

- During the review period, 2,114 credentials were awarded, which is 14.7% more than in the previous year.

- 717 Leeward CC students transferred to a UH 4-year institution, which represented a 6.1% increase over the previous year.

**Program Effectiveness**

Overall, the enrollment, persistence/retention and completion support provided by Student Services was effective in meeting students’ needs. Collectively, our units informed the public about Leeward CC; processed all application materials received; offered the requisite number of orientations and advising appointments; certified students for VA benefits and HINET and awarded financial aid; supported Early College students and provided resources, information and assistance to continuing students. Even though COVID-19 presented unique barriers and challenges to the way we normally do business, we:

- Admitted and supported the entry of 9,652 students.

- Awarded financial aid to 3,253 students, and supported 80 students through HINET.
● Handled 3,121 health requirements and helped 1,434 students overcome deficiencies in their health requirements so they could enroll. Although this represents a 9% reduction in health clearances management, we also saw a 12% increase in helping students overcome health clearance barriers.
● Took over 1,500 new, first-time students through an online new student orientation.
● Held new student advising sessions with 1,992 students.
● Supported the enrollment and continued needs of 8,700 students in AY 2020-21, which translated into approximately 6,300 students a semester.
● Facilitated greater success of the 471 Early College students in Fall 2020, 695 in Spring 2021 and 355 in Summer 2021 who were enrolled in our Early College courses at the high schools. They achieved about an 87% success rate (i.e., were awarded grades of “C” or higher).
● Supported individual students’ and their needs via 16,831 counseling appointments.
● Provided opportunities for students to engage and build their relationship with the college community via student-generated videos, virtual gaming, virtual student activities, podcasts, etc. via various Student Life programs.
● Conferred 2,114 degrees and certificates.

Over the past year, we made significant strides in a couple of specific areas:

**Yield Rate.** Even though the College received less applications, the number of students who were admitted and then subsequently enrolled (i.e., the yield rate) steadily improved. During this review period, 45.5% of those who were admitted for the Fall and 59.7% of those admitted for Spring registered for classes. This is a 3.5% and 7.6% improvement respectively from the previous Fall and Spring. This outcome is significant; the College’s yield rate has remained steady and/or has been declining over the past 5 years—despite efforts to improve it. So, even though we received less applications overall, more of the students we admitted registered for classes.

We saw a similar improvement in the yield rate of Early College students. In academic year 2020-21, nearly 79.9% of Early College students who applied went on to register. This is a 5.5% improvement over the previous year.

Perhaps most significant, however, was the improvement in the yield rate among our direct from high school population. The yield rate among this population has always been troubling. The lowest of all applicant populations, its Fall yield rate has been dwindling by an average of 3% a year since 2016. In Fall 2019, it stood at 37.5%, which was 4.5% below the overall yield rate that year. However, it improved over the last year. Although the Fall 2020 yield rate still fell by 2%, the Spring 2021 yield rate jumped by 10%. Even though Spring yield rates traditionally trend upwards by 3% a year, the impact of the changes made in our Recruitment Office, which was fully implemented for the first time in Spring 2021, resulted in larger gains. We are expecting to see a similar impact in Fall 2021. This, again, is significant as we have been unsuccessful thus far to improve this outcome.
Counseling Access. Despite the fact that counseling services were offered completely online in AY 2020-21, students continued to access counselors and did so at a higher rate. Where other campuses saw a decline in counseling appointments, our Counseling Unit held steady and actually saw a 1% increase in student appointments.

Engagement with HINET. In the last year, HINET’s reach exponentially increased. Traditionally, this program received around 100-120 inquiries from students. This year, the number of inquiries received quadrupled. As HINET is an essential resource that can help students stay enrolled in and focused on their studies, it is important that students are aware of and are actively trying to connect with it.

Food Distributions. The community-wide shutdown caused by the COVID-19 pandemic left many of our students newly unemployed. The number of students on our campuses who now faced food insecurity issues therefore increased. Consequently, our Food Pantry saw a 52.3% increase in student usage over the last year. In order to meet the demands of our students, Hānai iā Leeward increased their food distributions on both the Pearl City and Waianae campuses from once every other month to twice a month; partnered with the College’s agriculture program to add fresh produce to its distribution; and partnered with the College’s Culinary Arts Program to add hot, prepared food to the items distributed. Hānai iā Leeward also added baby items, such as diapers, wipes, etc. to their inventory to support student parents.

Course Success of Early College Students. Although the participation of Early College students was slightly lower than in previous years, those who did participate succeeded at higher rates. Early College students achieved an overall success rate that was nearly 9% higher than in the previous evaluation year.

Although we made some gains in AY 2020-21, there is still work to do.

Enrollment

- For the first time in nearly a decade, we have improved our yield rates. Due to the changes made in our Recruitment and Counseling Offices last year, we have successfully reversed the historic downward trend and are converting more admitted students into enrolled ones. This, however, has been at the expense of the top of the enrollment funnel. In order to effectively shepherd students through our on-boarding process, we have had to redirect our resources from outreach (i.e., raising awareness of the College and soliciting applications) to recruitment (i.e., case managing accepted students through the on-boarding process). This has resulted in lower application submission rates, which, in turn, ultimately result in less enrollments even if we are converting more of the applied into enrolled.

- Despite our best efforts, we can still see that there are “leaks” at every step of our entry pipeline. This ultimately results in the loss of students. In Fall 2020, for example, we received 5,119 applications. Of those, we admitted 4,730 students—2,373 of which were new to college and needed to go through new student orientation (NSO). However, only 1,467 (61.8%) completed NSO and met with a counselor for new student advising. Of the students who completed their advising, only 1,142 (77.7%) actually registered. So, at each step, we continued to lose students; and this pattern of loss has held true over-time.
● Most of the students in 2020-2021 who were awarded Financial Aid ultimately enrolled at the College (86.1%). This is an improvement of almost 5% over the last year, and reflects the intentional efforts our Recruitment Office made to follow up with awarded but unenrolled students. Even with this improvement, however, nearly 14% of those who have the financial means to enroll did not. Additionally, less than half of those who complete a FAFSA with us go on to enroll at the College. This pattern has been constant over the last 3 years, and is another “leak” in the pipeline.

● Our Early College students fare better. During this evaluation period, we experienced an average 79.9% yield rate from Early College applicants—despite the challenges presented by the COVID-19 pandemic.

Retention and Persistence

● We have not made any significant gains in our semester-to-semester persistence rates. They have stagnated—remaining at the exact same levels for the last 5 years. We continue to lose a little less than a third of our students from Fall to Spring, and then about 40% from Fall to Fall. A deeper dive into the data, however, shows that there may be some specific opportunities to help impact the loss:
  o Our full-time students, across all student types, tend to fare the best. We have, and have held steady, high Fall to Spring retention rates of full-time students.
  o HINET Program participants also seem to persist at higher levels. 75% of all HINET participants persisted from Fall to Spring. Financial Aid recipients also seem to persist at higher levels.
  o We seem to lose part-time students the most. Across all student types (e.g., transfer students, returning students, continuing students, etc.), our part-time students are retained at rates about 10-20 percentage points below their full-time counterparts.
  o We are most challenged with retaining our returning students. Among both part-time and full-time students, we only retain about half of those who start with us in the Fall semester into the following Spring.

● Underperforming (UAP) students contribute to our attrition rates.
  o On average, we lose about half of the students placed on UAP each semester; many do not or cannot re-enroll after receiving an academic sanction. Students placed on academic warning, which is the first academic sanction, represents the largest group of students lost. About 60% of all underperforming students were at the academic warning level last year; and 52% of these students did not persist into the next semester. The rate of loss for this student group remained consistent compared to the last evaluation period.
  o The persistence rate of underperforming financial aid recipients stands to be even bleaker. Federal regulations tie academic performance with financial aid eligibility. Because of this, students who underperform often lose their funding, which hampers their ability to continue.
  o Preliminary data suggests, however, that UAP students who 1) receive a counselor intervention; and 2) have registering for the next semester as part of that intervention, are much more likely to persist.

● Although we continue to see unprecedented growth in Early College participation and typically maintain high student success rates, we are still challenged in delivering advising services to
them. Although more Early College students met with their Leeward CC Counselor last year than in the previous year, we still are only successful in connecting with 24% of the Early College population. As Early College classes have a unique impact on students’ academic record and future college journey, it is imperative that they are advised well and understand the implications of their Early College participation.

Additionally, the College’s overall enrollment rate continues to decline. Although our enrollment stabilized in this last evaluation cycle for the first time in the last 5 years, the gains that we make in enrollment are among Early College students—they are the ones who fill in our enrollment gaps. This is a concerning trend as Early College students 1) require more support and resources; 2) by-in-large will not continue from semester to semester and/or complete degrees with us; and 3) only enroll in 1-2 classes a semester. It is imperative that our campus continues to build our regular student enrollment.

Although Student Services is not solely responsible for these institutional outcomes, we do track and monitor them, as they are the ones that we try to help impact.

Student Services has already begun to position ourselves to improve our outcomes. We have:

- Initiated and contributed to campus-wide conversations focused on improving enrollment. We have partnered with other entities of the College (e.g., instruction, retention specialists, communications and marketing, etc.) to help reach out to various student groups and encourage them to enroll/re-enroll. We plan to expand our efforts by convening a division-wide Strategic Enrollment Management (SEM) taskforce that will formulate a comprehensive enrollment strategy.
- Deployed Signal Vine 2-way text messaging to encourage students to continue through the on-boarding process (new students) and to re-register each semester (continuing students).
- Convened a Student Services taskforce to develop and implement a Student Services-wide communication strategy and infrastructure. This strategy, once completed, will identify the critical messaging that should be deployed to students throughout their educational journey. It will also identify the best and most appropriate communication vehicle for the various types of messaging.
- Begun to develop a cohesive strategy to 1) ensure new student enrollment; and 2) intervene with more UAP students so that more can be retained.
- Continue the process of repositioning all offices so that they are best able to contribute to the College’s goals of improving enrollment, retention and completion. In this past evaluation cycle, the leaders of all Student Services units arrived at shared goals and target outcomes for the different phases of a student’s journey, and they identified the offices that should be involved in delivering each.

**Program Efficiency**

Although Student Services has been largely successful at meeting the needs presented, all struggle with achieving the efficiencies that could allow them to be more effective and impactful. A common theme throughout all of the Student Services offices—especially those who are highly regulated by compliance demands—continues to be an extremely high workload burden created by
the need to simultaneously execute and manage a multitude of processes that are 1) highly diverse in both their goals and in what is required; 2) highly complex; 3) constantly expanding and changing; and 4) lack the resources and tools, including technology and easy and timely access to data, that would make the work efficient. Much of the work executed by the offices within Student Services are highly manual in nature. As a result, their ability to be “efficient” as well as adaptive to new requests and situations rests entirely on the capacities (both in numbers and in abilities) of their human resources.

We have seen significant improvement over the last year in a few areas. However, until we are able to secure more tools, achieving efficiency will remain difficult and will continue to compromise the effectiveness of Student Services as a whole.

Here are a few highlights from the Area’s program data that reflects this.

Admissions
One of the ways in which we determine efficiency in enrollment is by looking at application processing times. Admissions and Record’s goal is to process regular applications within an average of 14 days upon receipt. The ability to admit a student quickly has a direct impact on students’ subsequent decision to enroll with us.

As a College, we have historically struggled to meet our application processing goal. In past years, factors, such as unanticipated staff shortages, heavily impacted our ability to process applications on-time. However, in this past evaluation cycle, significant strides were made in this area. Starting in Spring 2021, the UHCC system adopted a new online application and admissions portal. These tools introduced a great deal of automation and allowed our Admissions Office to review and handle applications in-bulk, which was a huge improvement over the one-by-one processing that had to occur previously. Our campus’s effort to adopt this new system quickly showed in processing times for Spring 2021 (which was the inaugural semester). An even larger impact was seen in the subsequent Summer term.

Average Application Processing Times

The new application has made a huge impact in an area where we traditionally struggled to improve. Now that the process is more efficient and less labor-intensive for staff, our campus has the capacity to entertain different admissions strategies and practices that previously could not be considered due to workload implications.
This is a prime example of how tools, such as automation and technology, 1) help us make significant strides towards achieving our desired outcomes; and 2) introduce a greater ability for offices to be flexible, nimble and responsive.

**Recruitment and Outreach**
Over the past year, our Recruitment and Outreach office has been highly successful in transitioning from an outreach to a case management focused entity. However, they struggle under the weight of their activities as they are highly manual and inefficient. This office’s ability to identify where students are, in-process, at any given time so that they can intervene rests completely on their ability to obtain timely and accurate data on large groups of students. Having access to real-time data is ideal as students are constantly taking steps forward, so their place in the process is always changing. Static data becomes irrelevant quickly.

Our Recruitment and Outreach office, however, does not have ready access to the type of information they need. Instead, they are relegated to manually pulling, sorting through and matching raw data using existing (and not customized) reports in order to carry out their work. This is a time consuming and inaccurate process that requires a high level of training to execute, and results in a finished product that is already obsolete. This is a highly inefficient process that translates into wasted time and effort as phone calls and outreach activities inevitably include those who no longer need it.

Having a technological tool that is conducive to tracking and monitoring students and that is automatically fed by regular data loads, such as a CRM, would be game changing for this office and their outcomes.

**Transcript Evaluations**
Evaluating transcripts in an efficient and timely way is critical for students who enter our campus with some higher education experience. It is not only important for enrollment; it is also important for continuation and timely completion of a student’s degree. Students need to know, both at the juncture of deciding where to enroll and at the juncture of making registration decisions, if and how their previous credits apply. This, oftentimes, is a deciding factor in which college a student decides to attend.

However, we continue to fall short in our ability to evaluate transcripts in a timely way.

The College is inefficient at evaluating transcripts. Because we have minimal resources committed to this area, our processing times lag by about 12-14 weeks. This means that, on average, it takes almost an entire semester to finish evaluating a student’s transcript once it is requested. Our processing times have held steady at this rate over the past 3 years—ever since our transcript evaluation resources were reduced in 2016. This is problematic and can affect our enrollment.

Additionally, because of our resource limitations, we won’t evaluate a student’s transcript unless they are already enrolled with us. Although helpful from a workload management perspective, this practice is problematic for enrollment. Many students who have already accumulated credits are looking for an institution that will allow them to leverage their credits so they can attain their
credential efficiently. They do not want to enroll in an institution where their past credits can’t be utilized. So, the fact that we expect students to commit to our institution before we will tell them where they stand in terms of credit attainment can deter them from enrolling with us—especially if other institutions are able to provide them with the information they seek. Our College receives approximately 2,000 applications from transfer students each year. However, less than half of them actually enroll with us.

Students with past college credits who are financing their education with some kind of benefit (e.g., financial aid, veterans/military benefits) maybe particularly impacted by our inefficiencies in this area. Some of these programs require/will require students to have their transcripts officially evaluated before they register for classes; if they do not, they are ineligible for their benefits. If we continue to be unable to evaluate a student’s transcript prior to their enrollment, we risk losing and/or seeing a significant reduction in the enrollment of these student populations as well.

As was the case in Admissions, the transcript evaluation process is highly manual; therefore, it is arduous and heavily dependent on human resources. If we are to affect any kind of change in this area, we will need to invest either in additional technologies that will improve efficiency, or we need to invest more heavily in human resources.

**Veterans Benefits**
The time it takes us to complete the processes that allow students to access their funding also affects enrollment. Therefore, we need to look at our efficiency in programs such as Veterans’ (VA) Benefits.

In 2020-21, the amount of time it took for the College to complete students’ VA certifications increased; so, it appears as though our efficiency in this area decreased. This is problematic as the 2019-20 data had already represented a decreased efficiency from the previous evaluation year. So, this means our efficiency in this area is on a steady decline.

However, the data can be deceiving. Many times, longer processing times can be attributed to student delays in providing the required documentation. The mandate to move to telework and remote communication and service beginning in Spring 2020 could’ve also exacerbated this. In general, VA benefits certifications are completed within 1-2 weeks of receiving the required documentation.

The increased inefficiency in 2020-21 does, in part, reflect a change in staffing and decreased resources in this area. In Fall 2020, the College lost its VA Certifying Official to retirement as well as its part-time VA clerk. Because the University’s hiring freeze prevented us from filling these
vacated positions, the work of these individuals had to be absorbed by staff members who 1) did not usually perform these duties; and 2) who had to shoulder them on top of their regular assignments. The transition to less experienced staff and the loss of focused and dedicated VA resources compromised our College’s overall efficiency.

**Needed Resources**

Overall, there are many areas of inefficiencies within the different Student Services Offices that prevent us from being able to make bigger impacts on intended outcomes.

It is our intention, over the next year, to 1) continue to evaluate, pinpoint and address areas where we can improve our efficiencies in order to have a greater impact on student enrollment, persistence/retention and completion; and 2) acquire the tools and resources to do it, including access to meaningful and timely data.

We do know that, at a minimum, all of our offices will highly benefit from the following tools in order to increase efficiency, and have a bigger impact on student success:

- A communication relationship management (CRM) software that will allow for the identification, tracking, monitoring, intervention and automated communication with various student subgroups. This type of tool is not only needed to facilitate the entry of students; it is also needed to help the College stay in compliance with various federal and state regulations (e.g., financial aid, NC-SARA) as it implements new initiatives (e.g., Online AA degree program, Course Program of Study, accelerated classes/programs, fully online programs, Early College, etc.).
- Effective, user-friendly, regularly updated and available data dashboards that will allow us to track and monitor our efforts, inform strategy design and inform resource allocation.
- A technological tool that will increase efficiency in our transcript evaluation process as well as additional staffing in this area.
- A Welcome Center Coordinator who can focus on managing the Welcome Center and its staff and who can lend additional support to Student Services-wide initiatives (e.g., Student Services communication initiative, maintaining the Ocelot Chatbot, maintaining Signal Vine, etc.).
- A centralized, IT staff person who can, at minimum:
  - Set up, configure and maintain the various software systems being or will be used by Student Services in support of multiple work functions (e.g., STAR, MySuccess, NSO Online, SECE, the Liaison application, the Ocelot ChatBot, SignalVine, any communication-relations management software adopted by the College, etc.).
  - Design, configure and maintain online systems that will allow for secure online submission of forms as well as the routing of those forms through various workflows.
  - Design and maintain the digital signage that will be present in the Welcome Center.
  - Create and design efficient and secure database systems that work with and between systems already being used by the campus.
- Alterations to BANNER pages that would allow for increased automation of our processes.
- Continued funding for the electronic platforms acquired during the COVID-19 pandemic (i.e., NSO Online platform, Ocelot ChatBot, Signalvine).
Voting Members Attending: Cheryl Bell (for Patrick Leddy), Tommylynn Benavente, Kathryn Fujioka-Imai, Eiko Kosasa, Serina Makaiwa, Grant Okamura, Kay Ono, Wayde Oshiro, Aulii Silva, Wesley Teraoka, Jennie Thompson, Christine Walters, Jue Wang (for Laurie Kuribayashi), Darren Wastell, James West, Eric Wong (for Raezheen Pascua), Danny Wyatt

Non-Voting Members Attending: Manuel Cabral, James Goodman, Paul Kuehn, Della Teraoka, Curtis Washburn.

Absent Voting Members: Jean StavRue-Pe‘ahi
Absent Non-Voting Members: Mark Lane, Ron Umehira
2017-2018 In-coming Members: James Fujita, Shelley Ota

1. Call to Order

   The meeting called to order at 2:06 pm with quorum of 14 voting members.

2. Roll Call

3. Approval of the Minutes

   With no corrections noted, a motion was made to approve the minutes.

   Motion by Danny Wyatt, Second by Jennie Thompson.
   Vote: Yes 14 No 0

   After the Minutes were approved, three voting members arrived bringing the total voting members present to 17.

4. Unfinished Business

   a. Campus Council Member and Planning Process Surveys

   Chair Silva led a discussion about the results of two recent surveys administered by the Campus Council to gather feedback about 1) CC members’ participation in 2016 - 2017 and 2) ARPD/CRE authors’ experience in this last planning cycle. Members who would represent campus stakeholders on two ad-hoc committees were recruited to work with the survey data.
and to look for “best practices” with a goal of presenting their proposed recommendations for improvement in Fall 2017. Chair Silva thanked Bob Pacheco for summarizing our survey data and mentioned that any new responses will be included in the ad hoc committees’ review.

1. Summarized feedback from each survey

   - **Campus Council Membership Survey**: 2/3 of the membership responded that their knowledge of the Council’s role and function had increased during the academic year. The members stated that having discussions during the meetings helped clarify issues.

   - **Program Review & Planning Process Survey**: 80% of those surveyed said they understood how to use the data provided from the UH System. To improve the program review and prioritization process, most members said they would appreciate 1) increased data use and 2) greater access to analytical support. Less than half of the respondents said the program review process motivates them to make programmatic improvements and half said the ARPD templates were ease to use.

   - Council members raised discussion and questions about communicating with the wider campus; particularly with their stakeholders. Explicitly discussed was how to make people interested in the issues related to Leeward’s planning process and governance. When emails are used, people often delete or do not read them. Someone remarked that most people on the campus are not educated in the planning process or shared governance so are less likely to read the emails. Vice Chair Benavente suggested doing a blog like the Faculty Senate because its format is appealing and easy to read. The student representative Eric Wong shared that students who want to raise issues use the suggestion box or visit the Student Government office.

2. Discussion about survey data

   Chair Silva asked the Council members who are familiar with the planning process to pass on comments or suggestions to improve the process to the summer ad hoc committee. She reiterated that resource requests should be based on strategic goal data. She also added that ACCJC expects colleges to not just measure their outcomes, but to also make improvements based on what the data show.

   **Discussion:**

   - The process is fine, but respondents are not always confident that the data are accurate.
   - The proposers are assuming many things when they do their ARPDs. The data need to be correct and current.
   - The ARPD template was not designed for the support areas. There have been improvements to the template over the years but it is still driven by instructional needs.
   - Chair Silva asked what purpose does the UHCC System’s ARPD data and website serve. Vice Chancellor for Academic Affairs Teraoka stated it was
primarily designed to provide a means to communicate our program outcomes to the public; we could create our own template that better serves our planning needs.

1. VCAA Della Teraoka gave a quick overview of the Institutional Planning List and asked Campus Council members if they received any feedback from their constituents.

2. Discussion of Faculty Senate Motion [17:49]
   Faculty Senate sent a memo to insert an item (Turnitin.com) into the Institutional Planning List. A discussion followed the motion memo because it was the second year that Faculty Senate was attempting to include Turnitin.com into the planning process at the final stage of the process.

CC members suggested that it may be helpful to share the Planning Process with Faculty Senate because their memo presents a variety of issues:

1) All faculty members could make requests via the planning process which begins with instructional divisions.
2) A request to change the planning process should be made based on actual deficiencies in the process, not just because some “don’t like the process.”
3) Would any governance group have the right to add items to the Institutional Planning list at the final stage of the process? If pre-final amendments were made available to Faculty Senate, Student Government and other governing entities would need to have the same opportunity to do so.

As a former FS and FSVC, Chair Silva spoke that each body has a particular area of responsibility to fulfill for the College. The Chancellor has designated CC as a recommending body for budget and planning while the BOR recognizes the FS to carry out academic policy and planning. Both are representative which requires us to trust our colleagues to represent larger stakeholder groups. She then asked the CC members for feedback about how Campus Council should respond to the Faculty Senate motion.

Incoming FS Chair James Fujita shared that FS is considering electronic voting so that junior senators can vote without personal pressures from senior faculty.

Some of the comments:
- All Program Review proposals require data. The Faculty Senate motion for Turnitin.com lacked any accompanying supporting data.
- Did senators research which anti-plagiarism programs were most effective?
- A member stated that perhaps there is no data for plagiarism as there is no process to report it.
- Who would manage Turnitin.com’s implementation and effect for FS because it is not coming out of a Division?
- The College purchased Turnitin in 2006 but discontinued because of lack of use by
faculty.

• Innovation funds to purchase Turnitin were offered twice but no one has applied for it.

FS Secretary Wayde Oshiro said that Faculty Senate will invite VCAA Teraoka to a meeting during the next academic year to explain the planning process. Another member recalled that FS was a governance body that approved the current planning process.

No suggestions to re-prioritize the Prioritization List were made. A motion was made to accept the list as presented.
Motion by Jennie Thompson, Second by Christine Walters.
Vote: 15 yes, 2 no

5. **New Business**

a. Representation on Campus Council……………………………….Della Teraoka

VCAA Della Teraoka asked the Council to consider adding a member of the Native Hawaiian Student Support Program to the Campus Council. The Native Hawaiian Student Support Program reports directly to Dean James Goodman who is a non-voting member of Campus Council so that program has no representation on the Council. Another member pointed out that Native Hawaiian Student Support Programs participates in the planning process as an academic unit like Leeward Waiʻanae and Office of Continuing Education and Workforce Development.

A motion to support adding a member of the Native Hawaiian Student Support Program as a voting member to Campus Council.

Motion: Christine Walters, Second by Wes Teraoka.
Vote: 17 yes; 0 no

b. **Campus Council Membership for AY 17 - 18**………………………………All voting members

Chair Silva solicited membership for the following academic year.

**New members:**
Business Division Chair: Shelley Ota
Faculty Senate Chair: James Fujita
Faculty Senate Vice-Chair: Wayde Oshiro
Native Hawaiian Student Support Program: Aulii Silva

**Returning members:**
Administrative Support Group: Serina Makalwa
Arts & Humanities Division Chair: James West
Language Arts Division Chair: Kathryn Fujioaka-Imai
Leeward Waiʻanae: Danny Wyatt
Math & Sciences Division Chair: Jennie Thompson
Operations and Maintenance Group: Grant Okamura
Professional Arts & Technology Division Chair: Tommylynn Benavente
Social Science Division Chair: Wesley Teraoka
Units that have not made decisions:
Academic Support
Lecturer Group
OCEWD
Student Government
Student Services Coordinator
Administrative, Professional, Technical Group
Nā ‘Ewa Council

c. Nomination and Election of 2017 - 2018 Executive Committee

Through verbal nominations and secret ballot, an election of new Executive Committee members was conducted.

Chair: Aulii Silva (Motion by Kay Ono, Second by Jennie Thompson)
Vice-Chair: Tommylynn Benavente (Motion by Jim West, Second by Kay Ono)
Vice-Chair: Grant Okamura (Motion by James West, Second by Kay Ono)

Vote: 17 yes; 0 no

d. Campus Reports

1. Chancellor’s Report
   ● Naomi Losch, former Leeward instructor honored with an O‘o Award by the Native Hawaiian Chamber of Commerce.
   ● May 12 Graduation Commencement: Chancellor Cabral will be out of town so Vice Chancellors Teraoka and Lane will host the graduation with Vice President Morton.
   ● Dean Paul Keuhn leaving Leeward after five years of service; Paul was acknowledged for his work.
   ● Interim VCAA Della Teraoka selected for the permanent position of VCAA. Her name is submitted in June to the Board of Regents for confirmation.

2. Student Government Report
   Eric Wong reported that the student government did a survey on student communication and bus fare.

3. Announcements
   Danny Wyatt announced that Leeward Wai‘anae will close in mid-June and move to its new campus in July. The current lease expires on June 30.

6. Adjournment & Mahalo Reception

Next meetings: TBD
Employee Satisfaction Survey

Results from Fall 2019 and Fall 2016

Summary Report

OVERVIEW & PURPOSE
The college strives to provide valued employees with the facilities, tools, and support needed to excel in their positions. We conducted this survey to acquire a better understanding of employee morale, satisfaction, and engagement at Leeward Community College.

This survey was created by the 2nd Cohort of the Leadership Excellence Program (William Albritton, Kathryn Fujioka-Imai, Lori Lei Hayashi, Tracie Losch, and Grant Okamura) in collaboration with the Leeward Community College Office of Planning, Policy and Assessment.

DATA SUMMARY
Overall
The survey had 176 respondents in 2019 and 200 respondents in 2016. There are approximately 500 recipients that were emailed the survey. (Note that this list included active employees and retirees.)
## Results

1. Which of the categories below best describes your work status and location at Leeward CC?

ARPD Websites

1. uhcc.hawaii.edu/varpd - this is the public ARPD site which includes:
   - Quantitative Indicators data for Instructional Programs
   - Visual tools such as GPA and Skills
   - Quantitative Indicators data for Student Services

2. uhcc.hawaii.edu/varpd/submission - this is the web submission site for UHCC staff to download program analyses templates (MS Word templates) and to upload completed program analyses (ADA-compliant PDFs). Access to upload PDFs are restricted by UH login and permission must be granted by a VCAA or VCSA.

Overview of Campus Process

- **DATA**
  - Review Quantitative Indicators data and visual tools on the public ARPD site

- **TEMPLATES**
  - Download Microsoft Word templates from the Web Submission site

- **ANALYSES**
  - Write up program analyses in MS Word templates

- **ADA COMPLIANCE**
  - Ensure MS Word document has ADA compliant tags then convert to PDF

- **PDF**
  - Upload PDF to the Web Submission site
## ARPD Timeline (last updated 10/25/2021)

<table>
<thead>
<tr>
<th>Date</th>
<th>System Office Responsibility</th>
<th>Campus Responsibility</th>
</tr>
</thead>
</table>
| Sep 7, 2021| • Provide preliminary Quantitative Indicators (QI) data for Instructional Programs and Student Affairs  
• Provide updated/generic Microsoft Word templates for all programs (Instructional, Student Affairs, Academic Services) and for the Executive Summaries | • Review preliminary QI data for Instructional Programs at [uhcc.hawaii.edu/varpd](https://uhcc.hawaii.edu/varpd) and inform system office of any required edits  
• May review generic Microsoft Word template for all programs (click "MS Templates" tab above) |
| Oct 15, 2021| • Provide finalized QI data for Instructional Programs and Student Affairs  
• Provide Budget Allocation data  
• Provide finalized Co-Req data for Math and English  
• Provide mechanism to collect "External Licensing Exams Passed" data in order to include it in the QI table | • May download generic Microsoft Word template and begin writing program analyses  
• Ensure the MS Word document contains all ADA-compliant tags, convert to PDF, and upload (click the "Upload PDFs" tab above) |
| Oct 25, 2021| • Updated Co-Req data, specifically the "Efficiency By Placement Goals" table for English and Math for all campuses based on feedback from Maui that the numbers were incorrect | |
| Dec 15, 2021|                                                                                              | • Deadline for campuses to upload their PDF documents                                  |
| Dec 16, 2021| • All PDFs that have been uploaded are made available online for public viewing at [uhcc.hawaii.edu/varpd](https://uhcc.hawaii.edu/varpd) | • All PDFs uploaded from this date forward will automatically be posted for public viewing |

### Additional Information

Send any questions, comments and/or suggestions for improvement to Academic Planning, Assessment and Policy Analysis at the following email address: [uhccdata@hawaii.edu](mailto:uhccdata@hawaii.edu)

For more information on ARPD, see the following policy documents:

- [UHCC policy 5.202 Review of Established Programs](https://uhcc.hawaii.edu/varpd/policy/5.202)
- [UHCC policy 5.202 Attachment 1-A on Instructional Programs](https://uhcc.hawaii.edu/varpd/policy/5.202)
- [UHCC policy 5.202 Attachment 2 on Academic Support Services](https://uhcc.hawaii.edu/varpd/policy/5.202)
- [UHCC policy 5.202 Attachment 3 on Student Support Services](https://uhcc.hawaii.edu/varpd/policy/5.202)

The previous ARPD website will remain available at this link: [Prior UHCC ARPD site](https://uhcc.hawaii.edu/varpd)

The previous web submission site will remain available at this link: [Prior UHCC Web Submission site](https://uhcc.hawaii.edu/varpd/submission)

The system office intends to archive content on these websites over the next year and subsequently take these sites offline.
## ARPD Information Sessions

OVPCC will be conducting APRD information sessions at the following dates and times.

The Leeward Faculty Senate is chartered by the Board of Regents as the primary voice of faculty in the academic governance of the College. Through the Curriculum Committee, the faculty has a powerful role in shaping the programs and courses offered at the College. The Budget, Student, and Faculty Committees of the Faculty Senate provide faculty input and recommendations to the administration.

- The Senate Chair and Vice Chair sit on the Campus Council.
- The Senate is comprised of at least 22 senators elected at-large from among the full-time faculty, with approximately half elected each year for two-year terms, as well as one representative for the lecturers.
- The Senate elects its Executive Committee that consists of the Chair, Vice chair, and Secretary.
- Membership on Senate committees is open to all Leeward faculty, administration, and staff members.

Faculty Senate Executive Committee members for the 2021-2022 academic year:

- Michael Oishi - Chair
- Junie Hayashi - Vice Chair
- Kelsie Aguilera - Secretary

Issues before the Senate for Fall 2021 - Spring 2022

- Advocate for participation in the evaluation of academic executive leadership at the campus and system level, as protected by Part I, Section 8 of UHPA's Reference Section 20 (R-20).
- Monitor and advise on the college and UH System's resource and budget planning.
- Communicate progress on UH General Education curriculum revisions.
- Resolve facilities problems identified in our Faculty Senate memo of 30 April 2020.
- Continue to ensure that all divisions and academic units are represented on Faculty Senate committees.

Issues before the Senate for Fall 2020 - Spring 2021

- Resolve facilities problems identified in our Faculty Senate memo of 30 April 2020.
- Advise in the search for an interim Vice Chancellor for Academic Affairs.
- Revise the Leeward CC Faculty Senate's Bylaws.
- Ensure that all divisions and academic units are represented on Faculty Senate committees.
- Advise on the college's operating budget.

Issues before the Senate for Fall 2017 - Spring 2018

- Providing input into the system-wide transition, by Fall 2018, to the new CES (Course Evaluation System).
- Participating in the review of the Budget and Planning Process at Leeward Community College.
- Provide input into the Revised Shared Governance Policy at Leeward Community College.

Issues before the Senate for Fall 2016 - Spring 2017

- Input collection to investigate the benefits of a transition from current teaching schedule to a two-day a week teaching schedule.
- The formation of an Oral Communication Focus Board and the Oral Communication Hallmarks.
• Revise the Leeward Faculty Senate's Charter and Bylaws.
• Please acknowledge the MOA between UH Administration, UHPA, and UH Faculty Senates: https://goo.gl/OyILSe

Issues before the Senate for Fall 2015

• Input collection to investigate the benefits of a transition from current teaching schedule to a two-day a week teaching schedule.
• Consider the formation of an Oral Communication Focus Board and the Oral Communication Hallmarks.
• Revise the Leeward Faculty Senate's Charter and Bylaws.

News

• Faculty Senate Highlights, Academic Year 2020-2021
Aloha Leeward,

We hope this message finds you well and you are enjoying the summer.

The Faculty Senate Executive Committee would like to take this opportunity to share some of the work and accomplishments of your faculty senators for the 2020-2021 academic year, particularly as we look forward to academic year 2021-2022. We are particularly invested in this effort at outreach given the unique number and degree of changes and challenges we have all had to navigate over the last year. Below are some of Faculty Senate’s endeavors.

Shared Governance and Protection of Faculty and Faculty Rights

The work of Leeward CC’s Faculty Senate began abruptly, and before the official start of the 2020-2021 academic year. Owing to concerns over the state’s projected reduction in revenue due to the COVID-19 pandemic, the UH System and Leeward CC administration instituted policies and practices to streamline and economize operations, one of which was an unprecedented and early deadline for cancellation of low-enrolled classes, particularly those taught by the most vulnerable among us: lecturers. In response, and in an effort to protect both students and faculty from unilateral, hasty, and possibly pernicious and unnecessary course cancellations (considering how so many students register late), Faculty Senate approved Resolution 20.1. As noted in University of Hawai‘i Board of Regents Agreement, R-20, Faculty Senates have the negotiated right and responsibility to participate in “strategic planning directions, goals . . . and related budget priorities,” of which early course cancellations are a part. While Faculty Senate understands the need for economic efficiency in these fiscally challenging times, it also believes and expects that such efforts will be conducted transparently and collaboratively with Faculty Senate, especially when different metrics for minimum fill rates and deadlines for course cancellations are employed. Going forward, recently revived Small Undergraduate and Graduate Course Sections (EP 5.230), signed by UH President David Lassner, will provide more transparent and consistent guidance across the UH System.
regarding enrollment thresholds and deadlines for course cancellations.

Likewise, and in an effort to ensure a transparent and meaningful process of consultation, Faculty Senate approved Resolution 20.2, advocating for Faculty Senate’s participation in executive leadership appointments. To date, Leeward CC’s administration has filled several interim executive positions without the consultation of Faculty Senate—practices that both faculty senators and the University of Hawai‘i Professional Assembly (UHPA) deem a violation of Faculty Senate’s right to participate in the selection of executive leadership, also protected by University of Hawai‘i Board of Regents Agreement, R-20. Senate’s advocacy on this issue has resulted in a Framework for Faculty Senate Consultation on Interim Appointments on Executive Managerial Positions—a document that will help to ensure Senate’s input in future interim appointments and for which Chancellor Peñaloza has communicated support in his memo of June 16, 2021. On behalf of the Faculty Senate, the Executive Committee thanks Chancellor Peñaloza for his feedback on this document and his commitment to meaningful collaboration to ensure transparency, fairness, and diversity in the selection of Leeward CC’s future administrators—safeguards already in place for the hiring of other UH faculty and staff.

Concern over faculty rights also included an intensive discussion of faculty workloads on Tenure and Promotion Review Committees (TPRCs) as some faculty are called upon more frequently than others to serve on multiple TPRCs per year (sometimes as many as three), often for several years in a row. Following Faculty Senate’s requests for data on TPRC assignments, former Leeward CC Vice Chancellor for Academic Affairs (VCAA), Della Teraoka, provided the following results for all the UH Community Colleges (UHCCs). Owing to UHCC Human Resources guidelines to ensure fairness and diversity in the composition of TPRCs, faculty assignments to TPRCs are complex and sometimes uneven. As UHCC Vice President Erika Lacro has noted, TPRC assignments have multiple criteria such as rank, campus (three from the same campus as the candidate, though not from the same discipline or division), discipline (two from the same discipline as the candidate, but from different campuses), gender, race, ethnicity, exclusion lists, and other exemptions that prevent faculty from serving (e.g., illness, conflicts of interest, etc.). While there are always efforts to avoid assigning faculty to multiple TPRCs, this is not always possible given the above restrictions. A consequence of Faculty Senate’s inquiries into this matter is Vice President Lacro’s “Guidance for Chancellor’s in the Formation of Tenure and Promotion Review Committees (TPRCs).” While not resolving the complicated issue of multiple and frequent TPRC assignments, the memo attempts to ensure that chancellors are fully aware of the guidelines informing TPRC assignments in an effort to create diverse and informed TPRCs while also balancing concerns over faculty workloads. That said, it is important to note that any faculty member who feels unable or too overburdened to discharge her/his/their responsibilities on a given TPRC may request the Chancellor to be removed. The Chancellor must then assess the reason for the request and inform the affected faculty member of his/her/their decision.

Standing Committee Work
Much of the important, detailed, and time-consuming work of Faculty Senate is conducted by its committees, which work to identify and resolve problems across multiple areas of Faculty Senate’s responsibility. The following is a brief synopsis of our Faculty Senate standing committees’ efforts last year.

Academic and Institutional Support (AIS)
The AIS Committee, chaired by Fa’amaile (Betty) Ickes, last year focused on resolving several lingering issues related to facilities use and maintenance—issues acknowledged by previous Vice Chancellor of Administrative Services, Mark Lane, in his memo of November 20, 2020, and in response to Faculty Senate Resolution 19.1. Detailed in Senator Ickes’ annual report are updates over the creation of an online Facilities Use application, the creation of response times to acknowledge receipt of Facilities Use applications, and the ability for secretarial staff to view and book room reservations on behalf of faculty applicants, among other concerns. Resolutions to some of these issues are expected with this summer’s implementation of a new facilities booking software. We look forward to more updates on and resolutions to these concerns by Senator Ickes in Fall 2021.

Assessment Committee
The Assessment Committee, chaired by Michele Mahi, busied itself with several initiatives last year, among them being amendments to Leeward CC Policy L5.210, a Spring 2021 Convocation workshop on assessment strategies and methods, the selection of a new Assessment Management System (Anthology),
and a concerted drive to encourage faculty to assess their Course Learning Outcomes as required by the Accrediting Commission for Community and Junior Colleges (ACCJC), and UHCC Policy 5.202, Executive Policy 5.202 and Regents Policy 5.201. Of particular note, the Assessment Committee’s efforts have resulted in a tremendous assessment progress rate of 95.6% of courses assessed through June 2021! Mahalo to all who assessed their learning outcomes to reach this remarkable benchmark. A full accounting of the Assessment Committee’s work can be found in Senator Mahi’s annual report.

Budget and Planning Committee

The Budget and Planning Committee, chaired by Gholam Khaleghi, had its hands full as it monitored the welter of changes associated with the UH System’s and college’s operating budgets. A trained economist, Senator Khaleghi was particularly adept at explaining the college’s and the UH System’s budget forecasts in relation to the larger trends of the state, nation, and global economies. Additionally, Senator Khaleghi kept Senate abreast of important federal Coronavirus Aid, Relief, and Economic Security (CARES) and CARES Higher Education Emergency Relief Funds (HEERF) monies for the college and UH System and helped develop ideas for revenue generation (rather than painful budget reductions) to keep the campus financially solvent. Please find a comprehensive discussion of the Budget and Planning Committee’s efforts in Senator Khaleghi’s annual report.

Curriculum Committee

The Curriculum Committee, led by Pete Gross, was busy as usual. As Senator Gross notes in his annual report, the Curriculum Committee reviewed, recommended, and presented to Faculty Senate proposals for 11 new courses, 133 course modifications, 10 course deletions, 1 new program, and 16 program modifications. Additionally, the Curriculum Committee updated in the Kuali Student Curriculum Management (KSCM) system the Career and Technical Education (CTE) General Education requirements while also fixing several bugs and interface issues to make KSCM more stable and user friendly. The Faculty Senate bids a fond aloha to Senator Gross as he rolls off of the Curriculum Committee and Faculty Senate after six dedicated and excellent years of service and extends a warm welcome to incoming Curriculum Committee Chair, Jiajia Garcia.

Distance Education Committee

The Distance Education (DE) Committee, co-chaired by Kelsie Aguilera and Evelyn Wong, has proven instrumental in providing important technical and pedagogical support for Leeward’s faculty as we navigate the many challenges of distance education in this time of COVID-19. Among the many accomplishments of the Distance Education Committee are the creation of an Online Learning Orientation Subcommittee, chaired by Jordan Lewton; revisions to and information sessions on the Leeward CC DE Guidelines Self-Assessment process; and recommendations for technological solutions to support faculty and staff in the implementation of distance learning and campus services, among other work. Please peruse Senators Aguilera and Wong’s annual report for a complete list of DE Committee endeavors.

Elections Committee

The Elections Committee, co-chaired by Senators Matt Egami and Alyssa MacDonald, and joined by Igor Niktin, facilitated both our annual at-large election of senators as well as the election of members of the Faculty Senate Executive Committee. In addition to these accomplishments, the Elections Committee also recommended a mechanism for resolving tie-breaks in at-large elections— a long overdue protocol missing from but now incorporated into the revised Faculty Senate Elections Procedures. For more details on the Elections Committee’s endeavors, please refer to Senators Egami and MacDonald’s annual report.

Faculty Committee

Co-chaired by U'ilani Keli'ikuli and Danny Wyatt, the Faculty Committee investigated several issues of concern to faculty and students. Among the Faculty Committee’s notable accomplishments are the creation of an optional syllabus notification listing withdrawal deadlines for 16-week and part-of-term courses. This committee also worked closely with members of the Faculty Senate Student Affairs Committee, Student Services, and Student Government to create a Student Complaint Process document. Reviewed and approved by UHPA, this document seeks to make transparent to students the established protocol for the expression of their grievances, particularly by ensuring that proper conversations occur between students and faculty before involving campus administrators. Finally, and considering the difficult time our students are experiencing learning and living in relative isolation, the Faculty Committee recommended for approval an optional syllabus notification informing students of the campus’s mental
General Education Committee

The General Education Committee, chaired by Michelle Igarashi, juggled multiple and important concerns last year. Among Senator Igarashi’s personal accomplishments are the creation of a new Foundations Board website to facilitate the updating of information and the clarification of hallmarks and application process. Collectively the General Education Committee is monitoring the progress and recommendations of the UH General Education Curriculum Design Team, which is currently at work on the reconceptualization of our UH General Education curriculum during its Summer Institute. The recommendations of this Summer Institute, projected to be implemented in Fall 2025 (best case scenario) after multiple rounds of consultation, will prove impactful to the design and delivery of our current courses and programs. Those interested in following the developments and discussion of the General Education Summer Institute should consult the Schedule and List of Topics listed on the UH General Education Curriculum Design Team’s website. For a complete account of the General Education Committee’s endeavors, please see Senator Igarashi’s annual report.

Lecturer Mentor Group

Led by Christine Walters in Fall 2020 and Wayland Quintero in Spring 2021, the Lecturer Mentor Group kept Faculty Senate abreast of the concerns and challenges of our lecturer colleagues—concerns and challenges that have multiplied and deepened in these fiscally challenging times. Among the concerns raised by Senator Quintero in his May 5 report are course assignment prioritization according to lecturer rank and a lack of clarity regarding whether lecturers are employed by a particular UH campus or by the UH System (important for the calculation of teaching equivalencies and attendant employee health benefits). Overshadowing and informing these concerns is the more general distress emanating from a severe reduction of lecturer course loads as a result of increased course cancellations. Particularly important are the results of a survey of lecturers throughout the UH System and which Senator Walters captures in her report of October 2020. As the survey notes, the mass cancellation of lecturer sections also greatly impacts students considering that many lecturers (46.9%) report that they teach two or more courses in their discipline not taught by tenured faculty members.

Legislative Relations Committee

Our Legislative Relations Committee, chaired by Erika Molyneux, was extremely active this academic year monitoring the welter of important initiatives impacting the UH System. Among this committee’s many accomplishments are its Legislative Relations Priorities Letter, which communicates to legislators, particularly those on the House and Senate Higher Education Committees, many of the concerns of Leeward CC and UH System faculty, such as the protection of tenure, clear guidelines for a safe return to face-to-face interactions, support for more campus mental health services, and the recognition and protection of our lecturers who are vital to our ability to deliver quality education to students. Additionally, the Legislative Relations Committee diligently monitored several bills impacting our campus and UH community, particularly HB1105 HD1 which sought to provide greater faculty and student input in the selection of candidates for the UH Board of Regents, and SCR201 SD1 HD1, which urges the creation of a “task force to examine and assess the UHM tenure structure of researchers and non-instructional faculty compared to peer institutions of higher education across the USA.” As the issues the Legislative Relations Committee engaged are many and complex, please see Senator Molyneux’s annual report for more details.

Student Affairs Committee

Our Student Affairs Committee, co-chaired by Summer Barrett and John Signor, was extremely busy this year as they worked to resolve a range of thorny issues related to students, faculty, and student services. Notable among these efforts were a thorough review of student-related procedures and policies to ensure both are accurate and reflect current system and college practices; amendments to the Student Affairs description in Faculty Senate’s Bylaws (approved by Faculty Senate on April 14 and approved by Chancellor Peñaloza on April 26); exploration of the creation of a senior audit policy due to the lack of clarity regarding seniors’ statuses as students and their lack of access to important services such UH Alert, LUMISIGHT UH, etc.; and reviews of our policies on Course Repeat, Course Substitution, Grading, Student Academic Grievance, and Graduation, to name only a few. Additionally, the Student Affairs Committee had vital roles in developing the above mentioned Student Complaint Process document and optional syllabus
notifications for academic withdrawal deadlines (16-week and part-of-term) and campus mental health services. For full details of this committee's many activities, please see Senators Barrett and Signor's annual report.

While long, this annual review provides a window into the work of your senators in discharging their commitments to students and faculty at Leeward Community College. For a repository of all Faculty Senate committee reports, please consult the Fall 2020-Spring 2021 Supporting Documents folder of our Faculty Senate website.

Acknowledgments

The Faculty Senate Executive Committee wishes to recognize the contributions of all our faculty senators whose work has been instrumental in promoting the interests of the college. In particular, we would like to thank Summer Barrett (Student Affairs Committee Co-Chair), Weirong Cai (Legislative Relations Committee), William Castililo (Budget and Planning Committee), Matthew Egami (Elections Committee Co-Chair), Jiajia Garcia (Curriculum Committee), Petersen Gross (Curriculum Committee Chair), Fa'amaile (Betty) Ickes (Academic and Institutional Support Committee Chair), Michelle Igarashi (General Education Committee Chair), Warren Kawano (Distance Education Committee), Ulani Kel'i'ikuli (Faculty Committee Co-Chair), Gholam Khaleghi (Budget and Planning Committee Chair), Kealohilani Leleo (Student Government President and Faculty Senate representative), Alyssa MacDonald (Elections Committee Co-Chair), Michele Mahi (Assessment Committee Chair), Erika Molyneux (Legislative Relations Committee Chair), Michael Moser (Budget and Planning Committee), Wayland Quintero (Lecturer Mentor Group Representative), Suzette Scotti (Faculty Committee), John Signor (Student Affairs Committee Co-Chair), Kale'a Silva (Student Affairs Committee), Joseph Wargo (Student Government Vice President and Faculty Senate representative), Christine Walters (Lecturer Mentor Group Representative), James West (Budget and Planning Committee and Faculty Committee), Evelyn Wong (Distance Education Committee Co-Chair), and Danny Wyatt (Faculty Committee Co-Chair).

In closing, we wish to thank everyone for their dedication, hard work, and support during this turbulent time, and particularly for giving us the opportunity to help make Leeward CC a better place for students, faculty, and staff. We look forward to hearing from and working with you in the near future as we embark on a new academic year.

Sincerely,

The Faculty Senate Executive Committee

Michael Oishi
Chair, Leeward CC Faculty Senate, 2020-2022

Junie Hayashi
Vice Chair, Leeward CC Faculty Senate, 2020-2022

Kelsie Aguilera
Secretary, Leeward CC Faculty Senate, 2020-2022

Co-Chair, Distance Education Committee, 2020-2022

News:

Current
Chair’s Priorities:

- We are striving to ensure the development of systems and processes to keep our Senate organized. This is an effort toward a demonstrated record of meeting the campus expectations and accomplishing our responsibilities.
- We have reviewed, approved, or commented on a number of important campus and system policies. This is an effort to ensure that we honor the needs of our campus and students, as well as make efforts to create consistency across the system as a whole, as well as pushing transparency and shared governance (and responsibility) in the planning and policy development process.
- We are leading a collegial process to develop the Shared Governance Policy in collaboration with all representative campus bodies. These efforts are essential to creating a positive and effective campus climate that is of our own making and working to ensure we have spirited and meaningful conversations that drive opportunities to engage in respectful dialogue.
- Acknowledge and credit the work done by those who have chosen to serve, and done so admirably, including administration.

Executive Committee’s Priorities:

- Our Vice-Chair, Wayde Oshiro, organized the campus approval of separation of the Senate’s charter and bylaws to make our organization more representative and responsive to the needs of the campus and system.
- Our Secretary, Junie Hayashi, has led us through efforts to manage our decision-making capital appropriately by maintaining the clear and consistent reporting of reviews, decisions, recommendations, and grievances, and continually opening new lines of transparent communication.

Faculty Senate Standing Committee Record and Accomplishments:

- **Academic and Institutional Support** - This engaged committee, chaired by Gholam Khaleghi, works directly with the administration to keep an “open door” about faculty concerns on campus operations. This committee was instrumental in developing a mechanism of rapport, feedback, communication, and demonstrated outcomes between the Vice-Chancellor of Administrative Services and the faculty. Overall, this committee is a driver of a positive campus climate.

- **Assessment** - After years of heavy lifting, the AA task force, and Chair, Jeff Judd, have developed a more manageable, meaningful, and user-friendly student learning assessment database. We continue to grow a culture of assessment based on objectives, instruction, outcomes, and adjustment. We have reviewed the General Learner Outcomes of our AA degree so that we can confidently say, our graduates have demonstrated competencies in these areas. Overall, the focus on assessment for quality instruction is essential for us to reach our strategic student completion goals.
- **Budget** - Chair, Stanley May, has supported faculty-driven efforts to communicate with administration auditing of the campus planning processes and institutional priorities for budgeting. The committee continues to support our overall Leeward CC trend towards more inclusivity, transparency, and accountability in the campus planning and budgeting processes, as is afforded by the BOR policies. Overall, these efforts are essential in ensuring our resources are equitably distributed across campus, including faculty priorities.

- **Curriculum Committee** - Chair, Pete Gross has stewarded faculty to review a near-record number of courses and programs creation, modification, and deletion. Over the course of the year, they have taken the lead in securing faculty input to make the large lift of the Curriculum Committee more efficient and effective. An effective Curriculum Committee is essential to our instructional quality, system alignment, as well as positioning our faculty and campus to achieve accreditation.

- **Distance Education** - Chair, Warren Kawano, has led efforts to establish Distance Education course guidelines to be supported by a faculty-driven evaluation system. These guidelines have been derived from a long examination of industry standards and position Leeward to continue to deliver quality and accountable online delivery, thereby ensuring student completion.

- **Faculty Committee** - Chair, Danny Wyatt, has been making efforts to address faculty concerns about issues surrounding late-registration. We have requested data from our planning office that can help faculty mediate assumptions about student success as we move forward to ensure that our all of our enrolled students are prepared for course success, retention, and completion.

- **General Education** - Led by co-Chairs Weirong Cai and Suzette Scotti, the committee has ensured the quality of curricular offerings that focus on Writing Intensive, Hawaii and the Pacific, Oral Communication, and Ethics. They have shepherded a process to ensure that Leeward is in a position to seamlessly accept transfer credits from students who participated in the WICHE passport. Additionally, they have led efforts to ensure that we find an appropriate place to house the development of a system driven (S) sustainability designation. Overall, their efforts have been to increase access, ensure quality, and encourage completion.

- **Legislative Relations** - Co-Chairs, Betty Ickes & Raymond Liongson, have worked to ensure that the Leeward Faculty senate is informed with the most up to date information from the legislature.

- **Student Committee** - Our co-Chairs Summer Barrett and Kale‘a Silva are committed to student success. They are currently in the process of working with our Student Services group to ensure that our student-focused policies either appropriately reflect policies found to be effective at other system campuses or reflect the need of our students as a unique population. For example, course renewal and academic forgiveness. Overall, Student committee initiatives are foundational to student retention and completion.
Senators: Aguilera, Kelsie; Barrett, Summer; Boydstun, Jeremiah; Cai, Weirong; Cawdery, Michael (Chair); Gross, Petersen; Hayashi, Junie (Secretary), Ickes, Betty; Kawano, Warren; Keliʻikuli, Genai; Khaleghi, Gholam; Liongson, Raymond; Mahi, Michele; May, Stanley; Molyneux, Erika; Oishi, Michael (Vice-Chair); Scotti, Suzette; Scully, Michael; Signor, John; Silva, Kaleʻa; StavRue-Peʻahi, Jean; Walters, Christine; West, James; Wyatt, Danny

Meetings Schedule AY 2019-2020

Meeting 1 - Friday, September 13, 2019 - Agenda - Minutes
Meeting 2 - Friday, October 11, 2019 - Agenda - Minutes
Meeting 3 - Friday, November 8, 2019 - Agenda - Minutes
Meeting 4 - Friday, December 6, 2019 - Agenda - Minutes
Meeting 5 - Friday, January 10, 2020 - Agenda - Minutes
Meeting 6 - Friday, February 14, 2020 - Agenda - Minutes
Meeting 7 - Friday, March 13, 2020 - Agenda - Minutes
Meeting S - Thursday, April 2, 2020 - Agenda - Special Meeting Outcome
Meeting 8 - Wednesday, April 8, 2020 - Agenda - Minutes
Meeting 9 - Thursday, May 7, 2020 - Agenda - Minutes

Chair’s Priorities AY 2019-2020:

- We worked to ensure the development of systems and processes to keep our Senate organized. This includes:
  - Prior to the beginning of the AY, the chair invited all Standing committee Chairs, past and present, to lunch in discussing their priorities.
  - We worked to create a Google Shared Drive where all Senators can have access to the materials and working documents of the Senate.
  - Provision of an opening report to make roles and responsibilities clear.
The Chair also provided an update of Mid-year Report to the Campus and at Convocation as well as division meetings.

The formal separation of Charter and Bylaws, approved by the Chancellor, so that we can update Bylaws to conform with the needs of the Senate.

The Senate adopted the special rules of order that keep most of our work and deliberation in committee. This allows the Senate to speak directly to the Standing Committees and support their efforts.

We have requested that standing committees inform the Chair, Executive Committee, Faculty Senate, and Faculty at large about their meetings, members, minutes, and actions. We attempted to maintain a Master Schedule in an effort to support the college as a whole.

Additionally, we have solidified the place of Shared Governance Meetings with the administration. These are currently conducted on a monthly basis. We have honored our monthly participation in ACCFSC, CCCFSC, Campus Council, and UHCC Strategic Planning Council.

Finally, we are working to ensure that our communications are effective and timely.

Leeward is a leader in Faculty Leadership at the System level. For example, The Leeward CC Faculty Senate Chair was also Chair of the CCCFSC and ACCFSC. This work including priorities as laid out in the body’s AY 2019-2020 Opening Letter.

We have worked to enhance the quality of our relationships with other Authorized Governance Bodies (AGBs) and the general atmosphere of Shared Governance on the Campus. We were able to pass a new, more comprehensive, more inclusive Shared Governance Policy. This effort was spearheaded by the Faculty Senate Executive Committee. This includes recommendations to Campus Council that Faculty Senate and all bodies be given standing reports. We also sought the inclusion of Pūkoʻa no Nā ʻEwa Council in the Shared Governance Executive Committee meetings.

We have reviewed, approved, or commented on a number of important campus and system policies. This is an effort to ensure that we honor the needs of our campus and students, as well as make efforts to create consistency across the system as a whole, as well as pushing transparency and shared governance (and responsibility) in the planning and policy development process. The policies that we worked on, reviewed, and in some cases approved, include:

- UH System - Policy Request Memo
- UH System - Participant Verification Policy (Consulted on)
• We led a collegial process to develop the Shared Governance Policy in collaboration with all representative campus bodies. These efforts are essential to creating a positive and effective campus climate that is of our own making
and working to ensure we have spirited and meaningful conversations that drive opportunities to engage in respectful dialogue. We shared a presentation with the Chancellor of Leeward CC to the BOR.

- **Acknowledge and credit the work done** by those who have chosen to serve, and done so admirably, including administration.

**Executive Committee’s Priorities:**

- Our Vice-Chair, Michael Oishi, organized the campus approval of separation of the Senate’s charter and bylaws to make our organization more representative and responsive to the needs of the campus and system. Michael has been instrumental in defining and executing the role of Vice Chair. This re-defined role ensures the Vice Chair has the responsibility to maintain procedures, and to the best of the ability or as is reasonably needed for the operation of the Senate, according to Robert’s Rules of Order. It is essential that the Vice-Chair keep the position of Chair in order and in check.

- Our Secretary, Junie Hayashi, has led us through efforts to manage our decision-making capital appropriately by maintaining the clear and consistent reporting of minutes, reviews, decisions, recommendations, meetings, Standing Committee reports, and resolutions, and continually opening new lines of transparent communication. We have strived to get a timely submission and communications of information from committees to faculty and administration. We have also maintained the Faculty Senate website and resurrected the Faculty Senate Blog.

**Faculty Senate Standing Committee Record and Accomplishments:**

- **Academic and Institutional Support** - This engaged committee, chaired by Gholam Khaleghi, works directly with the administration to keep an “open door” about faculty concerns on campus operations. This committee was instrumental in developing a mechanism of rapport, feedback, communication, and demonstrated outcomes between the Vice-Chancellor of Administrative Services and the faculty. Overall, this committee is perceived as the faculty mechanism responsible for driving a positive campus climate.

- **Assessment** - Michelle Mahi has boldly supported the college as we work toward a more manageable, meaningful, and user-friendly student learning assessment database. We continue to grow a culture of assessment based on objectives, instruction, outcomes, and adjustment. We have reviewed the General Learner
Outcomes of our AA degree so that we can confidently say, our graduates have demonstrated competencies in these areas. Overall, the focus on assessment for quality instruction is essential for us to reach our strategic student completion goals.

- **Budget** - Chair, Stanley May, has supported faculty-driven efforts to communicate with the administration to an end of ensuring that Faculty are more meaningfully included in the campus budget and planning processes, including institutional priorities for budgeting. The committee continues to support our overall Leeward CC trend towards more inclusivity, transparency, and accountability in the campus planning and budgeting processes, as is afforded by the BOR policies R-20. Overall, these efforts are essential in ensuring our resources are equitably distributed across campus, including faculty priorities. The Faculty Senate executive committee has contributed a statement in that it is hopeful that faculty find meaningful participation in the budgeting processes of the college.

- **Curriculum Committee** - Chair, Pete Gross has stewarded faculty to review a near-record number of courses and programs creation, modification, and deletion. Over the course of the year, they have taken the lead in securing faculty input to make the large lift of the Curriculum Committee more efficient and effective. An effective Curriculum Committee is essential to our instructional quality, system alignment, as well as positioning our faculty and campus to achieve accreditation. He was instrumental in ensuring that we have a Committee on the Sustainability Designation or S-Designation, AA Program Chair as well as additional policies for Curriculum and Program Review.

- **Distance Education** - Chair, Warren Kawano & Kelsie Aguilera, has led efforts to establish Leeward’s DE Guidelines to be supported by a faculty-driven evaluation system, including DE Guidelines Self-Assessment and DE Peer Evaluation. These guidelines have been derived from a long examination of industry standards and position Leeward to continue to deliver quality and accountable online delivery, thereby ensuring student completion. They include a process for Self Evaluation and Peer Evaluation of DE courses. In addition, the DE committee was foundational in our transition to DE and online course delivery due to the COVID-19 pandemic, including the development of "Baseline Recommended Actions for Distance-Delivered Instruction”

- **Elections Committee** - Thank you to Michael Scully for successfully soliciting candidates, holding elections, and communicating the results of the New Senators elect for 2020-2021. The Elections Committee also supported the
January elections of the New Executive Committee for AY 2020-2021.

- **Faculty Committee** - Chair, *Danny Wyatt and Genai Keliʻikuli*, has been making efforts to address faculty concerns Tenure, Promotion, and Contract Renewal, including DPC procedures, electronic submission of dossiers, and lecturer protections. The committee has been requesting information from UHPA and Leeward CC and UHCC administration. The committee has contributed greatly to clear processes and procedures for faculty to follow resulting in increased faculty morale.

- **General Education** - Led by co-Chairs *Weirong Cai and Suzette Scotti*, The committee ensured the quality of curricular opportunities and offerings that focus on Foundations, Writing Intensive, Hawaiʻi, Asia and the Pacific, Diversifications, Oral Communication, and Ethics. They have shepherded a process that positions Leeward to seamlessly accept transfer credits from students who participated in the WICHE passport. Additionally, they have led efforts to ensure that the committees under General Education are completing their work and supporting student success. That is a number of sub-committees with lots of members. Overall, their efforts have been to increase access for students, ensure quality, and encourage completion & transfer.

- **Legislative Relations** - Co-Chairs, *Betty Ickes & Raymond Liongson*, began the AY and started with efforts to expand the work of the committee. Fortunately, Raymond Liongson had the opportunity to retire. Since Betty has worked tirelessly to ensure that the Leeward Faculty senate is informed with the most up to date information from the legislature regarding budgets, allocations, and political operations.

- **Student Affairs Committee** - Our co-Chairs *Summer Barrett and John Signor* are committed to student success. They are currently in the process of working with our Student Services group to ensure that our student-focused policies either appropriately reflect policies found to be effective at other system campuses or reflect the need of our students as a unique population. For example, course renewal and academic forgiveness. Overall, Student committee initiatives are foundational to student retention and completion.
Welcome Back Leeward ‘Ohana!

*Sessions will be recorded and shared approximately a week after Convocation.
| Session #1 | Faculty Senate Talk Story Session  
*Presented by Michael Oishi, Faculty Senate Chair; Junie Hayashi, Faculty Senate Vice Chair; Kelsie Aguilera, Faculty Senate Secretary*  
Join us for a talk story session to learn more about Leeward CC’s Faculty Senate: who we are, and what we have been and are doing to serve the faculty and the college. We would particularly like to hear the concerns and problems faculty have and discuss how and whether the Faculty Senate can help to resolve them.  
Zoom Host: Junie Hayashi |
|---|---|
| Session #2 | Building Community & Empathy in an Online Environment  
*Presented by Anika Gearhart, Social Sciences and Susan Wood, Language Arts*  
Join two faculty members as they share tips for building empathy and strengthening online community with students. Bring your own ideas to share in small group breakout sessions and help compile a comprehensive list of tips.  
Zoom Host: Kelly Kennedy |
| Session #3 | Turn Your Webcam Into a TV Studio  
*Presented by Chris Gilbert, Language Arts*  
Impress your audiences with studio quality effects on Zoom, Google Meet, Loom, Jitsi, Microsoft Teams, pre-recorded videos--or ANY service with a webcam! If you're ready to up your camera game, get ready for a deep-dive and one-time setup that will pay off for a lifetime! Supercharge the easy-to-use Google Slides you already know with OBS Studio: the FREE secret weapon of professional streamers, YouTubers, and content creators around the world. [Basic knowledge of Zoom or Google Meet is preferred.]  
Zoom Host: Brent Hirata |
| Session #4 | Using “Pu‘uloa: A Sense of Place” to Implement Mo‘olelo ‘Āina Across Disciplines  
*Presented by Camden Barruga, EMC; Anuschka Faucci, Math & Sciences; Annemarie Paikai, Library; Erin Thompson, Innovation Center*  
An interdisciplinary team will debut their short video highlighting the rich natural and cultural history of Pu‘uloa/Pearl Harbor to help our campus community connect to this place. The video includes an overview of the area surrounding Leeward, resources, and community and student involvement towards a more sustainable and hopeful future. Additionally, a curated LibGuide and a Story Map with resources will be presented and shared to encourage instructors across disciplines to connect with and incorporate this special place into their curriculum.  
Zoom Host: Camden Barruga |
| Session #5 | Let’s Go There: Maintaining Relationships through Controversial Discussions  
*Presented by Lucille Gilbert, Language Arts*  
"Unfriend me if you don't agree with me" has become a common reaction when facing family or friends with opposing views. We live in challenging times where polarizing views on politics, prejudices, and a pandemic can result in divisive and sometimes explosive discourse. In this workshop, you will learn how to effectively manage relationships and conversations on controversial topics in order to minimize conflict. You will also learn about language and group communication techniques that you can immediately apply in your classrooms or with those you care about in order to improve communication and strengthen relationships.  
Zoom Host: Cameron Rivera |

| **Session #1**  
[Join Session Here]  
Zoom Host: Cara Chang | **Hoʻoia ʻĀina: Leeward’s Land Acknowledgment Statement**  
*Presented by Piʻikea Hardy-Kahaleoumi (Council Chair), and NaʻEwa council members Kuʻuipo Losch, Kaleʻa Silva and Erin Thompson*  
Land acknowledgments have been common practice among indigenous people for centuries. They pay homage to the relationship between the land upon which the college sits and its people. Join Leeward’s Pūkoʻa no nā ‘Ewa Council members as they share Leeward’s Hoʻoia ʻĀina, its purpose, and protocol in this interactive session. |
| **Session #2**  
[Join Session Here]  
Zoom Host: Don Oberheu | **What has Covid-19 Taught Us? How Can We Do Our Part? (Student Presentation)**  
*Presented by Kaian Torres (Student Government President), Alex Williamson (Secretary), and Kealohi Leleo (Senator)*  
Join members of Leeward CC’s Student Government as they share and discuss students’ perspectives on their COVID-19 learning experiences. An open-forum Q&A session will follow the presentation. |
| **Session #3**  
[Join Session Here]  
Zoom Host: Junie Hayashi | **Faculty Senate Talk Story Session**  
*Presented by Michael Oishi (Senate Chair), Junie Hayashi (Vice Chair), and Kelsie Aguilera (Secretary)*  
Join us for a talk story session to learn more about Leeward CC’s Faculty Senate: Who we are and what we have been and are doing to serve the faculty and the college. We would particularly like to hear the concerns and problems faculty have and discuss how and whether the Faculty Senate can help to resolve them. |
| **Session #4**  
[Join Session Here]  
Zoom Host: Kelly Kennedy | **How to Spot Fake, Biased, and Misleading News and Misinformation**  
*Presented by Natalie Wahl (Instructional Librarian)*  
This is an active session that will define fake, biased, or misleading news and information, why it is created, how to spot it, how to stop it, and explore the future of junk info! |
| **Session #5**  
[Join Session Here]  
Zoom Host: Donald Carreira Ching | **A Brief Introduction to Tableau and Data Visualization**  
*Presented by Tao Feng (OPPA) and Peterson Gross (ICS)*  
This session will cover the basics of Tableau, a program that allows you to connect to databases and Excel spreadsheets, drag and drop items to create visualizations, and share results with a click. Learn how to gain access to Tableau and the different access levels as well as its reporting capabilities. An overview of how to request a report that takes advantage of Tableau for any of your data needs will also be provided. If you work with data, grants, ARPDs, or reports, join us! |
| **Session #6**  
[Join Session Here]  
Zoom Host: Meredith Lee | **Creating Accessible Documents**  
*Presented by Allan Nebrija (Disabilities Specialist)*  
Learn to create accessible text and images for your course. Apply what you learn immediately to your course syllabus, and learn about free accessibility tools to help you create accessible documents. |
### Convocation Online Breakout Sessions (Round 2): 11:10am - 12:00pm

<table>

| **Session #1**  
[Join Session Here]  
Zoom Host: Puaonaona Stibbard | “What's Going On?” (Talking Story with Leeward’s Social Justice League)
*Presented by Pi’ikea Hardy-Kahaleoumi (Co-Chair), Erin Thompson (Committee Advisor), Syreeta Washington (Co-Chair), and Jonathan Wong (Member)*
Join Leeward’s Social Justice League members to learn about the origins and functions of this DEISJ (Diversity, Equity, Inclusion, and Social Justice) campus committee. In this engaging and supportive space, attendees will also explore their own definitions of social justice and implications of how we can best serve our campus community. |
| **Session #2**  
[Join Session Here]  
Zoom Host: Robert Oshita | Anthology: A Path to Meaningful Assessments  
*Presented by Adam Halemano (OPPA)*
Join our Institutional Assessment Specialist, Adam Halemano, as he provides an overview and demonstration of the new Anthology assessment software. The Anthology program is replacing previous assessment software solutions (e.g., TK20, Knack, Google forms) and will be used to track course and support area outcomes. This program will be launched in Spring 2022 so get your sneek peek today! |
| **Session #3**  
[Join Session Here]  
Zoom Host: Anika Gearhart | Introducing the LCC Behavioral Intervention Team (BIT)  
*Presented by Tom Hirsbrunner (Title IX Coordinator and BIT Chair)*
The Leeward CC BIT is a multi-disciplinary team that includes representatives from Student Services, Mental Health Services, Human Resources, Wai’anae Moku Administration, Campus Security, Title IX, and Academic Counseling. Our mission is to promote a safe and effective learning and working environment by implementing best practice behavioral management and threat assessment techniques. Come and meet the team and learn more about how we can support you and your students. |
| **Session #4**  
[Join Session Here]  
Zoom Host: Daniela Elliott | Student Showcase: Leeward Students' Oceanography and Kilo ‘Āina Research  
*Presented by Anuschka Faucci (Biology) and Donn Viviani (Oceanography)*
What do "place-based" and "curiosity-driven" research look like? Over the past several years, Leeward students have been investigating the hidden life of Pu’uloa. Building on that base, students have then worked on research projects in collaboration with nonprofit organizations, National Oceanic and Atmospheric Administration (NOAA), and University of Hawai‘i scientists. See some of the cool work Leeward students have been doing and stick around for discussions about place-based student research. |
| **Session #5**  
[Join Session Here]  
Zoom Host: Naiad Wong | Got Funding?  
*Presented by P. Jayne Bopp (Interim OPPA Coordinator) and Erin Matsuda (Grants Manager)*
Do you have an idea for a program or initiative that could make a difference in the lives of our students? Extramural grants are viable funding sources that can support our ideas by providing personnel, equipment, supplies, renovations, and professional development opportunities. Join our OPPA staff as they cover grant basics and present an overview of the grant development process at Leeward CC. |

Position Changes

Lynn Fujikawa moved from Compliance and Training Officer to Interim HR Manager. 
Tina Lee will serve as the Division Chair for the Business Division effective Fall 2021. 
Nicole Ogawa moved from Interim HR Manager to UH System Interim Associate Human Resources Director.

Welcome to Our New Hires

Keala Chock, Vice Chancellor for Academic Affairs, Administration, earned a bachelor’s degree in Hawaiian Studies and a master’s degree in Public Administration from the University of Hawai‘i at Mānoa. In June 2005, he began his 16-year career as a faculty member at Honolulu Community College (Hon CC), where he developed and managed the Music and Entertainment Learning (MELE) program. He served as the Interim Dean of Communication and Services (2012-2013) and the Dean of Transportation and Trades (2013 - 2017). In his most recent position as Hon CC’s Dean for Career and Technical Education, Keala oversaw academic programs and workforce development training initiatives. These areas included the Skilled Trades, Information Technology, Apprenticeship Training, Early Childhood Education, and various community engagement projects.

Lorraine Gershun, Counselor for G2FO and ATE programs, Student Services/Leeward Waiʻanae Moku Education Center, earned a Bachelor of Science in English Literature and a teaching degree at the University of California, Los Angeles (UCLA) and also holds a Master of Science in Curriculum and Instruction. Lorraine has lived and worked in the Waiʻanae community for the past 30 years. She is passionate about access to education and student success.

Tom Hirsbrunner, Title IX Coordinator, Chancellor’s Office, is also serving as the Chair of Leeward’s Behavioral Intervention Team (BIT). He has previously worked in higher education compliance at UH West O‘ahu (Disability Services) and Lansing Community College in Michigan (Title IX Investigations). Tom is also an attorney, licensed in Michigan, and lecturer in Constitutional Law.

Toshiro Luab, UH Security Officer I, Administrative Services, has an Associate in Arts in Liberal Arts from Leeward Community College (Yay, Leeward alums!). He has been with the state of Hawaii for five years, originally serving at the University of Hawai‘i at Mānoa’s Department of Public Safety.

Danielle Kauwila Tai, Recruitment and Retainment Specialist, PEEC II Grant, graduated with an AA in Liberal Arts from Leeward Community College (Yay, Leeward alumna!) and a BA in Public Administration from the University of Hawaii at West O‘ahu. She also has two subject certificates in Management and Disaster Preparedness Emergency Management. Danielle believes that academics is the key to success. As a Native Hawaiian, she would like to contribute her experience and enthusiasm to support other Native Hawaiians to invest into academics and become contributing leaders and mentors of their communities.
New Lecturers

Alyssa Alcos  
Business, MGT

Geuseppe Ayala  
Math & Science, MATH

Shanda Freitas  
Social Sciences, HDFS

Katherine Hardine  
Math & Science, ICS

Kelly Higa  
Social Sciences, HDFS

Patrice Jackson  
Business, HIT

Diana Kim  
Social Sciences, HDFS

Lucy Masa  
Social Sciences, HDFS

Colleen Rost-Banik  
Social Sciences, Sociology

Monica Vidal  
Language Arts, English

NOTE: The new hire lecturer list might not be comprehensive as lecturers may still be in the hiring process.

Updates from Leadership

Keala Chock, Vice Chancellor for Academic Affairs

Aloha kākou,

As we look ahead to the school year, I would first like to thank the entire Leeward Community College ‘ohana for welcoming me to the Pu‘u‘ula and Wai‘anae Moku campuses. During the past month, I have spent time meeting and listening to Leeward faculty and staff share the unique attributes that make our college a high-quality educational institution. I am inspired by the dedicated, hard-working individuals from our instructional programs, Wai‘anae Moku Education Center, Division Chair leadership, OCEWD, Student Services, Academic Support, and Kīpuka Native Hawaiian Center at Pu‘u‘ula, who are committed to the success of our students. As I continue to make my way around campus, I am looking forward to meeting you and learning more about your area.

Over the past 16 years, I have spent my career advocating for equitable student success as a faculty member and Dean at Honolulu Community College. My vision was simple and focused on ensuring that every student enrolled at the College would earn some type of college credential in a timely fashion. This proved to be a little more challenging than I had anticipated and ultimately motivated me to explore questions, which has led me to serve in various administrative capacities. As a first-generation Native Hawaiian college student, I know all too well the uphill battle many of our students face as they make the big decision to enroll in college. I have seen firsthand the significant role the community college plays in positively impacting students. Our open-door educational system, dedicated faculty, and guided pathways have provided unprecedented access, which has resulted in college graduates earning more than individuals who do not go to community college. I have also seen the same system, with the best of intentions, design practices that have negatively impacted students. As
your new Vice Chancellor for Academic Affairs, I would like to encourage you to remain vigilant and to reaffirm our collective commitment to supporting student learning and achievement. I would also like to challenge all of us to re-examine our approach through the careful use of student data, identifying opportunities that will remove barriers to student success, and investing in opportunities that will benefit our community.

In closing, I am excited to begin my journey at Leeward Community College and I look forward to working with you as we continue to build a brighter future for our students to thrive here in Hawai‘i.

Aloha,

Keala Chock

Lori Lei Hayashi, Interim Vice Chancellor of Administrative Services

Welcome to a new academic year. Administrative Services (Auxiliary Services, Business Office, Human Resources, Operations & Maintenance, and Security) has continued to operate throughout these challenging times with uninterrupted mail service, processing purchases, payments and payroll, procuring and distributing PPE, and maintaining and securing our facilities and property. Here are some events that have occurred earlier this year and a few of what’s planned in the near future…

- Our campus partnered with the City & County of Honolulu’s Department of Emergency Management and the Department of Health from December 2020 to May 2021 to administer over 50,000 doses of the COVID-19 vaccines to first responders, federal, state, and county employees, those providing critical services to our island’s infrastructure, UH employees and students, and the public.

- Three hundred twenty-nine (329) work orders were completed by our Operations & Maintenance team from January 1 to July 30, 2021. Requests included disposals of bulky items, minor electrical/plumbing work, floor maintenance, and minor maintenance (removing graffiti, installing interior furnishings, painting, and assisting employees with relocation of their offices). Twenty-five (25) work orders are outstanding due to delays of materials and labor shortages.

- The campus Facilities Use process has been upgraded, and you may now access a “view-only” feature to assist you in selecting rooms/spaces for events. Please contact your Division/Unit Secretary for assistance in requesting a room or space. Browse For Space

- Projects commencing this year are the AM Model Classroom/Art Gallery, the Wahiawa Product Development Center, and the Learning Commons Spall Repair.

- The PS/BS Model Classrooms are scheduled to be completed this year.

- Campus-funded projects in FY 2021 include the installation/relocation of eyewash stations and installation of emergency electrical shut-off switches at the Automotive complex, and the repair of five (5) fume hoods in PS-213 (chemistry lab).
Projects scheduled to commence in 2022 are the re-roofing of the Learning Commons and the re-roofing and landscaping at Waiʻanae Moku.

Please be attentive to our “Construction Advisory” messages you receive via email. Please respect the construction barricades and boundaries for your own safety and that of our construction company partners. We appreciate your patience and understanding.

Health and safety of the campus community is always our highest priority and is a responsibility that falls on each and every one of us. No one person or unit can ensure your personal safety. In case of an active threat or emergency, the UH ALERT system is the primary means of communication by which notices will be sent to faculty, staff, and students. You MUST sign up to receive emergency messages through the UH ALERT system. PLEASE sign up for UH ALERT at: https://www.hawaii.edu/alert/

COVID-19 Resources and Information:
  - Campus Guidelines
  - UH Guidelines
  - UH LumiSight - upload your vaccination information; self-attestation of your health
  - Employee On-line Training - mandatory for all UH employees and UH student employees
  - CARES Act Higher Education Emergency Relief Fund (HEERF) Reporting - expenditure reports

James Goodman, Dean of Arts and Sciences

Welcome back to the Fall 2021 semester! Here are a few highlights from Arts & Humanities, Language Arts, Math & Sciences, Social Sciences, the Kīpuka, Native Hawaiian Center at Puʻuloa, and the Office of International Programs.

Despite the challenges of having to put so much of our instruction and services online, there have been some notable successes, particularly in terms of degree awards compared to last year. For example, this past spring there was a 29% increase in the AA in Liberal Arts degrees, a 29% increase in the AA in Hawaiian Studies, a 9% increase in the AS in Natural Sciences, and a 49% increase in the AS in Teaching (AST).

In the Teacher Education Program (TEP) Jeffrey Judd, Christina Keaulana, and Brian Ichida led Leeward to be the first community college in the nation to receive a full seven-year accreditation from AAQEP (Association for Advancing Quality in Educator Preparation) for the Alternative Certification for Career and Technical Education (CTE) and the Advanced Professional Certificate in Special Education (SPED). In other TEP news:

- The 3+1 Leeward CC-Chaminade BS in SPED was approved by the HSTB to license teachers in Pre-K-3 Special Education – which currently has 90 students in the program.
- Leeward CC’s SPED programs were approved for a renewed UH-HIDOE Special Education Stipend that provides full tuition for any candidate who commits to teach special in a HIDOE school - awards of $389,307 have so far supported 64 licensed HIDOE SPED teachers.
- With 6 CTE Licensure grads this past spring and 11 more ready for the fall, 12 new candidates are entering the program from Hawai‘i Island, Kaua‘i, Maui, Moloka‘i, and O‘ahu.
In addition to coordinating the AST program, with almost 400 majors, Kale‘a Silva has enrolled over 60 students in the Culturally Responsive Teaching Certificate (CRT) program. Last spring 20 students completed that certificate, supported by over $50,000 in scholarships.

Christina Keaulana secured a $50,000 grant, "Closing the Student Achievement Gap in Hawai‘i: Designing Place-Based Professional Development to Support Culturally Responsive Teaching," to support Christina and Kale‘a’s development and delivery of six professional development CRT courses. In partnership with the Hawai‘i State Teachers Association those courses focused on culturally responsive teaching practices for Hawai‘i public school teachers--reaching over 200 teachers state-wide and strengthening community partnerships with various DOE complex areas throughout the islands.

As the incoming TEP Coordinator, Michael Cawdery brought in $210,000 from the Governor’s Emergency Education Relief (GEER) fund to conduct a workforce needs assessment leading to an innovative design for "teacher-in-training" pathways to reduce turnover and attrition in the HIDOE schools. Intended project partners include Waipahu High School, Kūlia and Ka Lama Education Academy, UH Maui College, and Hawai‘i CC.

From Math & Sciences, 7 students participated in this summer’s INBRE and B2B undergraduate research programs under the supervision of Kabi Neupane and Helmut Kae. This year was the first for a cross-campus partnership with UH-West Oahu, which provided students the opportunity to visit both campuses, and present their work to a group of peers and faculty from both campuses. The work culminated with the Leeward CC Undergraduate Research Symposium, where student researchers from both campuses shared the efforts of their summer’s work. For the Pre-Engineering Education Collaborative (PEEC II), 9 students participated this summer, where they completed calculus online and engineering research in person. Bryson Padasdao and Jennifer McFatridge advised students with the research projects, which included developing a digital hand dynamometer as well as a motion capture suit. A poster and video of their research will be presented at a system-wide online symposium in mid-August.

From Arts & Humanities, the Theater program led by Loretta Chen hosted Leeward CC’s Virtual Pau Hana featuring students from both the Pearl City and Early College at James Campbell High School. Students commemorated the end of their semester by musing on the theme, “Let’s Get Real” based off an engaging bystander training provided by Lexer Chou. Students also got to showcase their talents and digital theater creations to St. Andrew’s Priory and to the Department of Public Safety. Through a partnership with Kaiser Permanente’s West O‘ahu Medical Office at Kapolei, Leeward CC students and faculty will be able to display their artwork at Kaiser Permanente’s newest state-of-the-art facility. Mike Harada was the first to exhibit his prints when the clinic opened in April 2021. Articles on that can be found at UH News and Pacific Business News.

The Kīpuka, Native Hawaiian Center at Pu‘u’ola, which supports all of our Leeward CC students, is the recipient of a grant from Kamehameha Schools to support our Kahua Ho‘omau Ola (13th Year) Initiative. In addition, Aulii Silva secured a 5-year $1.3 million US DOE Native Hawaiian Career and Technical Education Program grant which will support Native Hawaiian students in pathways to in-demand and living-wage careers such as Cybersecurity, Digital Media, Information & Computer Sciences, Natural Sciences, Sustainable Agriculture, Pre-Engineering, and Transfer Business. As part of June’s Hawai‘i Papa O Ke Ao Cultural Webinar series He Ukana Aloha Kā Kīlauea, which features music, dance, storytelling and a cooking demonstration.
The Office of International Programs resumed its short-term program in June 2021 by hosting a group of 9 students and 2 chaperones from Wabash High School in Wabash, Indiana. This group of Japanese language students had planned on visiting their partner school in Yokohama, Japan in 2020 but the trip was suspended due to the pandemic, so the group decided to visit Hawaii because of its strong connection to Japan. These students participated in several educational activities such as visiting Hawaii’s Plantation Village, the Byodo-in Temple, and volunteering with a local non-profit organization.

Thank you to all of the Arts & Sciences division chairs Jim West, Kathryn Fujioka-Imai, William Albritton, Eiko Kosasa and program coordinators Eric Matsuoka, Jenny Watada, Brandi Reyes, Ann Inoshita, I-Chia Shih, Mike Bauer, Jeff Judd, Lu’ukia Archer, Momi Kamahele, Jeremiah Boydstun, and all the faculty and staff for their great work and commitment to student success!

Ron Umehira, Dean of Career, Technical, and Education (CTE)

The following are highlights from the Business Division, Professional Arts and Technology Division, the Office of Continuing Education and Workforce Development (OCEWD), Wai‘anae Moku, and the Wahiawa Value-Added Product Development Center.

Business Division
Congratulations to Associate Professor in Accounting - Tina Lee in her new position as Business Division Chair effective fall 2021. Also, congratulations to former Business Division Chair – Warren Kawano who started a new position on August 2 as the Career Pathways Strategy Director at Hawai‘i P-20.

The Business Division and OCEWD created a Memorandum of Agreement where students that successfully complete a 90 hours non-credit Office Administration & Technology course can apply for transfer credits for two Business Technology courses.

Professional Arts and Technology Division
The faculty (Don Maruyama, Matt Egami, Chris Garnier, Abigail Langlas, Lee Alan Dung, Jaylene Duarte), staff (Fabi Castellano, Jason Fernandez), and students of the Culinary Arts program successfully executed a “May Day Lu’au To Go” event where over 1,600 plates of delicious Hawaiian foods were purchased by the many supporters of the program. This event was in lieu of the program’s annual fundraising event - L’ulu Culinary Arts Gala.

Television Production (TVPR) program coordinator, Bob Hochstein’s dream finally came true as the TVPR program has a Mobile Video Training Lab which will be used by the students to shoot, edit, and produce events and activities at off-campus locations. The mobile van was purchased through the generous donation from Eye Productions (Hawai‘i Five-O) and the equipment was purchased through Perkins funds.

Office of Continuing Education and Workforce Development (OCEWD)
OCEWD has been the college’s rapid response unit for over 25 years serving unemployed, underemployed, and dislocated workers in our community. In fall 2020, the O‘ahu Back to Work (OBTW1) Initiative was launched to
provide job training for eligible residents whose employment was disrupted by COVID-19 economic impacts. OCEWD led the way among all other community colleges in the number of referrals and the number of residents (450) participating in training opportunities such as Pharmacy Technician, Medical Receptionist, Forklift Certification, Office Administration & Technology, MS Excel and Word 2019, Certified Nurse Aide, and Commercial Driver’s License program.

This fall 2021, another round of OBTW2 will be launched on August 16 and will run through the end of December. Congratulations to the OCEWD coordinators and staff (Patrick Leddy, Will Castillo, Bill Labby, Michael Scullly, Grace Yoshimura, Elyse Matsumoto, Lisa Daclison, Dayna Lapina, Jarissa Lum, Amy Amper, and all of the instructors) that provided these valuable and essential training opportunities.

Waiʻanae Moku Campus in Māʻili
Welcome back to Jennifer Wharton, Assistant Professor in English who was on personal leave as she was greatly missed by the students, faculty, and staff. Welcome also to new counselor Lorraine Gershun as she provides support to the students in the “Going to Finish On-Time” (G2FO) and “Access to Education” (ATE) programs.

Wahiawa Product Development Center (WPDC) Update
A lease agreement was approved in May 2021 between the Agribusiness Development Corporation and the University of Hawaiʻi for the long-term use of the 69,000 square-foot parcel of land located in Wahiawa. Renovations of the WPDC began on July 1 with completion anticipated by Spring 2023. The WPDC will provide research, testing, production, packaging, and educational services in the development of value-added products for the local, national, and international markets.

A Value-Added Product Development Workshop Series will be offered in fall 2021 to summer 2022 to the community on various topics such as Introduction to Entrepreneurship, Starting a Business, Creating a Business Plan, Orientation to Hawaiʻi Agriculture Industry, Sanitation & Safety, Food Safety & Post-Harvest Handling, Turning Off-Grade Products into Value-Added Products, How to Launch and Market Value-Added Products, and “Getting Your Value-Added Product to Market”.

Leanne Riseley, Interim Dean of Academic Services

Welcome back to a new academic year! I’m excited to see you in-person! We are still wearing masks, but it is really good to see and talk to some of you, live, not through a computer screen. Academic Services, made up of the following units: Disability Services, Educational Media Center, Information Technology Group, Innovation Center for Teaching and Learning, Learning Resource Center, Library, Theatre, Tutoring and Writing Center has and will continue to provide services through the pandemic.

The biggest news and cause for celebration is our campus has hired the Osaki Creative Group to work with us to redesign our campus website and Intranet! A huge thank you to all involved in making this possible! A special shout out to Tad Saiki, Kay Ono, Lori Lei Hayashi, Carlos Peñaloza, Cori Wakamura, and Stella Yamamoto who worked diligently to make this happen. The work is just starting and is projected to continue through next year. This is a big project and individual areas will be contacted throughout the process for interviews and input.
Throughout the last year, Academic Services has strategically planned and is using CARES/CRRSAA funding to purchase about $2M worth of technology. While much of the technology is unseen, this investment will help us to future-proof our campus in the years ahead. The purchases include upgraded classroom technology allowing for hybrid teaching, improving the network (including wireless), and providing virtual desktop infrastructure (more info on VDI will be shared later).

**Disability Services**
Our Disability Services (formally KI) office continues to provide services to students with documented disabilities at both Pu‘u‘loa and Wai‘anae locations. We are continuing to use Clockwork to securely provide student accommodations. If you receive an email from Clockwork, please be sure to acknowledge it. Disability Services information may be found at [http://www.leeward.hawaii.edu/ki](http://www.leeward.hawaii.edu/ki)

**Educational Media Center**
The EMC is in the process of purchasing and installing equipment for newly upgraded, modular-designed classrooms called **Technology Enhanced Classrooms (TECs)**. TECs will have additional equipment such as a video recorder on a tripod, document camera, and graphics tablet to support socially-distanced in-person and hybrid teaching. View the [technology classrooms list](http://www2.leeward.hawaii.edu/emc/). EMC information may be found at [http://www2.leeward.hawaii.edu/emc/](http://www2.leeward.hawaii.edu/emc/). Be on the lookout for emails on professional development events being offered to support teaching and learning using technology.

**Information Technology Group**
ITG will be implementing a new **Technology Replacement Plan**. Please contact your Division Chair/Unit Head or Secretary for details. The goal of the plan is to provide technology to meet employee and student needs with planned replacement cycles. Information will be widely communicated throughout the year.

ITG is asking for your cooperation. If you took computers from your office home during telework, it is critical to bring it back to the Help Desk before returning the computer to campus. **DO NOT PLUG IT BACK INTO THE NETWORK.** We need to keep the campus’ network safe from viruses and other nasty stuff. Remember these three numbers X271 (Help Desk) for any IT issues. ITG information may be found at [http://www2.leeward.hawaii.edu/itg/](http://www2.leeward.hawaii.edu/itg/)

LC-102 was taken off-line as a classroom lab this summer. It will remain that way for the foreseeable future so that the Help Desk staff will have the workspace needed to address the increased computer support demand. BE-227 will replace LC-102 as a Campus Computer Lab (CCL). It was previously used by Language Arts. It may be scheduled through the CCL.

**Innovation Center for Teaching and Learning**
ICTL has coordinated over 50 professional development workshops during the pandemic. A link to the [flyer](#) has sessions by topic if you would like to view them on your own.

ICTL has coordinated CARES/CRRSAA professional development awards totaling nearly $15,000 so far. For more information on the ICTL offerings, please visit [http://www.leeward.hawaii.edu/innovation](http://www.leeward.hawaii.edu/innovation)
**Learning Commons (Library, Learning Resource Center and Writing Center)**

The Learning Commons is open M - F from 8 am - 4 pm. Computer and study table reservations can be made online or in-person. Laptops, iPads, WiFi hotspots, and accessories are available for loan to students. Loan periods vary from 4-hours to a full semester.

The Library website, a portal to online book, journal, and video collections, is available 24x7. Our new Overdrive Magazine collection includes over 3,000 titles. Call x210 or live chat with librarians and circulation staff during hours of operation. Schedule a consultation with a librarian to discuss library support and resources for your classes. View a short orientation video of our services.

We are happy to announce that Tasha Williams will serve as our **Interim Tutoring Services Coordinator** for the Fall semester. Tasha will oversee both the Learning Resource Center and Writing Center tutoring services. This summer, Tasha implemented Penji, an app-based scheduler for online and in-person writing and subject tutoring support. Go to the LRC and Writing Center websites, or call x409, for more information about tutoring services.

**Theatre**

Our Theatre remains closed for events and productions. However, classrooms in the Theatre are being used for instruction. Theatre information may be found at [http://lcctheatre.hawaii.edu/](http://lcctheatre.hawaii.edu/)

---

**Kami Kato, Interim Dean of Student Services**

**Welcome to Fall 2021!** Here are some updates from your Student Services colleagues—Admissions & Records, Counseling, Early College, Financial Aid, Health Center, HINET, Job Prep Services, Recruitment, Student Life, Veterans Resource Center…

**CHECK OUT OUR NEW WEBPAGES!**

We have rolled out/are working to roll out several new webpages. Check them out!

- Our **Enroll** ([www.leeward.hawaii.edu/enroll](http://www.leeward.hawaii.edu/enroll)) webpage helps to guide students through their enrollment process and informs them of their next steps.
- Our **Costs** ([www.leeward.hawaii.edu/costs](http://www.leeward.hawaii.edu/costs)) webpage helps students understand the resources we have available at the College to help defray their educational costs. In addition to financial aid and scholarships, the page mentions resources like Hānai iā Leeward, OER, HINET, free Microsoft Software, Discounted Bus Passes, etc.
- Our **Financial Aid** pages ([www.leeward.hawaii.edu/finaid](http://www.leeward.hawaii.edu/finaid)) have been refreshed and revised so that they are more navigable by students.
- Our **Welcome Center** page ([www.leeward.hawaii.edu/welcomecenter](http://www.leeward.hawaii.edu/welcomecenter)) outlines the personalized services that can be received by phone or in-person.

Soon to come: our **Explore** webpage, introducing prospective students to Leeward CC as an excellent educational choice. Stay tuned!
THE WELCOME CENTER
The Welcome Center opened on January 4, 2021 and is now the main hub for students seeking assistance from Student Services. Student Associates have received 121 visitors and countless phone calls even during the COVID-19 shutdown. Our Student Associates are also the primary engine behind our new live chat service, available during business hours.

OUR CHATBOT, ‘ULU, HAS CHATTED WITH LOTS OF VISITORS! 🌺
In February 2021, Student Services launched a new ChatBot service. It is available as a pop up on Leeward CC’s Student Service's pages 'Ulu is available 24/7, and links folks to offices if it can’t answer the question posed. In June, the live chat mentioned above was added for anyone who wants to speak with a “live” person. Since February, 'Ulu has logged 7,400 visitors and, since June, our Associates have fielded 34 live chat sessions.

OUR RECRUITMENT OFFICE NEEDS YOUR HELP
Our Outreach and Recruitment Office needs your help! Here are some ways you can assist us:

- Participate in filming a 360 Virtual Tour! O and R is joining forces with the EMC to showcase our most requested programs.
- Participate in an informational session hosted by the Outreach and Recruitment Office. Talk with prospective students about your program, job prospects, and alumni experiences.
- Help us connect with community partners Help us to market and showcase our special programs

HĀNAI IĀ LEEWARD
Leeward CC’s Food Pantry has continued to be an important source of student support during the pandemic. We hold bimonthly food distributions at the Pu'uloa campus and weekly distributions at the Wai'anae Moku campus. We have served over 135 students. One student said, "As a mother of three young children, the lockdowns of 2020 meant that there was no school or daycare for my children…. With my children out of school I could no longer work and this stressor put a great strain on my family financially. I am humbled and grateful for Leeward Community College and the Hanai ia Leeward for providing for my family when I wasn’t able to." Students interested in this service can visit https://hanaiia.wixsite.com/leewardcc.

LOVE PONO
Love Pono students created an educational series, "Talk Tuesdays," focused on a monthly theme including Harmful messages from Disney, How to End Relationships in a Healthy Way, and Love is Learned. Follow their IG for future posts: https://www.instagram.com/lovepono/.

STUDENT LIFE’S STOP THE HATE CAMPAIGN
Student Lifers from various programs shared a powerful message on active bystanding. Their video was highlighted on https://www.weareoceania.org/ and Act to Change social media outlets. View their video, “Don’t Wait, Stop the Hate” here: http://go.hawaii.edu/8PP.

COUNSELING…ROCKING AND ROLLING ONLINE
Even though our Counseling services have gone mostly remote, our Counselors are still actively supporting students’ entry, continuation and completion. They have supported the entry and registration of 793 new Fall 2021 students, held individual appointments with 5,755 continuing students in Spring 2021 alone, and reviewed and audited 1,478 graduation records. Over the next year, Counseling will be looking to help increase student retention by intentionally intervening with students placed on Academic Warning.
PARTICIPATION VERIFICATION (PV)

In Spring 2021, Leeward CC rolled out its Participation Verification process. Via PV, instructors were asked to identify students who were not attending/not participating in their classes. “No Shows” were then administratively disenrolled from their classes and received a 100% tuition refund. PV is part of a system-wide initiative that:

- Helps to release students who registered but did not intend to come from a financial obligation and failing grade.
- Improves our course success rates by eliminating F grades assigned to students who never came.
- Puts us in compliance with federal financial aid guidelines.

In Summer 2021, all of Leeward CC’s classes were subject to PV. This will continue in Fall 2021. For more information, please feel free to visit the Participation Verification website (www.leeward.hawaii.edu/participation), or ask your Division Chair. The dates and deadlines for reporting and student disenrollment can be found at http://go.hawaii.edu/P4K.

Finally...

A special mahalo needs to be said to a group of Leeward volunteers who helped our Marketing and Communications Office yesterday. To prepare for some new directory signs, this group cleaned the walls where the old signs were and mounted new backing boards and temporary directories in almost 20 locations around campus. It was a very hot day, but they worked hard and efficiently and completed their tasks by lunchtime! Also, a special shout out to Tad Saiki who organized the event and Joy Soma and the Operations and Maintenance staff who provided cleaning supplies, protective gear, and ice cold water for our volunteers.

Leeward’s Super Volunteer Heroes are Annemarie Paikai ~ Audrey Villanueva ~ Bill (Boleslaw) Wright ~ Bruce Lindquist ~ Camden Barruga ~ Cameron Rivera ~ Cisley Ancheta ~ Darci Francis ~ Eileen Sakamoto ~ Feebe Cabulera ~ Heather McCafferty ~ I-Chia Shih ~ Igor Nikitin ~ Jennifer Sunada ~ Joy Soma ~ Jue Wang ~ Junie Hayashi ~ Karla Noa ~ Paras "Tami" Williams ~ Tasha Williams ~ Wayde Oshiro ~ and William Albritton! Mahalo!

Have a great semester!
Faculty Senate Minutes

Wednesday, April 14 2021
3:00-5:00 p.m.
Online via Video Conference

Senators: Kelsie Aguilera (Secretary), Summer Barrett, Weirong Cai, Matthew Egami, Jiajia Garcia, Petersen Gross, Junie Hayashi (Vice Chair), Betty Ickes, Michelle Igarashi, Warren Kawano, Genai Keli‘ikuli, Gholam Khaleghi, Alyssa MacDonald, Michele Mahi, Erika Molyneux, Michael Oishi (Chair), Wayland Quintero, Suzette Scotti, John Signor, kale’a Silva, James West, Evelyn Wong, Naiad Wong, Danny Wyatt

Student Government Representatives: Kealohilani Leleo, Student Government President

Student Government Representatives Absent: Joseph Wargo, Student Government Vice President

Invited Guests: Will Castillo, OCEWD; Carlos Peñaloza, Chancellor; Kalei Ruiz, Academic Counselor

Guests: Jayne Bopp, Sam Hume, Kami Kato, Susan Lum, and Janel Oshiro

Join Zoom Meeting: https://hawaii.zoom.us/j/97321693563

Meeting ID: 973 2169 3563
Passcode: 012458

Agenda

I. A quorum being present, Chair Oishi called the meeting to order at 3:01 p.m.

II. Chancellor’s updates

A. While we still do not have a state budget yet, the Chancellor is personally optimistic about the University of Hawai‘i (UH) budget. It may be better than anticipated.
B. Our strategic planning process is underway.

C. We have to build up to the next 2022 Accrediting Commission for Community and Junior Colleges (ACCJC) report.

D. Leeward is waiting on receiving more Coronavirus Aid, Relief, and Economic Security Act (CARES) funding and we are working through the submitted CARES proposals.

E. Enrollment for upcoming semesters is “weird” right now. Registrations are good while new applications are low.

F. At tomorrow’s Board of Regents (BOR) meeting, a resolution will be presented which details a new “reimagined” university.

G. Framework for Interim Executive Management Appointments
   1. The Chancellor hopes to not have to do interim appointments in the future, but we now have a mechanism to avoid the mishaps from the past.

H. Question: Are we thinking about making it mandatory for people to be vaccinated before they come on to campus?
   1. As of now, the Chancellor does not think that will be mandated. He has not heard that directive, but conversations are happening. We are a state agency and such a requirement might have to be legislated.

III. Kalei Ruiz on financial aid initiatives.

A. Course Program of Study (CPoS) refers to rules governing Federal financial aid which require colleges and universities to consider for eligibility only those courses which apply to a student's officially declared, eligible program. These rules have been in place for some time, but the UH System has only recently been able to build the technological capability to track courses and implement these rules. As our campus pursues compliance, students who take courses that do not apply to their declared, eligible program will be notified if doing so impacts their financial aid award package. These rules line up with system and campus initiatives to reduce costs and time to degree for our students by ensuring students take only applicable courses.
   1. Course Program of Study (CPoS): UH System Compliance with Federal Aid Regulations

B. The Curriculum Committee has been working on removing hidden prerequisites to avoid financial aid implications for students

C. Counselors recommend and advise, while students make the decisions in terms of their schedules. There is a cap of 18 credits per semester and
students need special permission to take over that.

D. Certificates? All academic subject certificates are not eligible for financial aid because they are built into a larger program or degree.

E. Electives? Students can take any electives and have them qualified for financial aid as long as the courses stay within degree requirements.

IV. Senate confirmation of William Castillo as Faculty Senate representative from OCEWD.

A. **Motion 21.07:** On behalf of the Faculty Senate Executive Committee, Vice Chair Hayashi moved to approve the appointment of William Castillo as Faculty Senate representative from OCEWD.

B. **The Senate approved the motion.**

V. Review of meeting minutes from March 10, 2021

A. The minutes from March 10, 2021 were accepted to the record without amendment.

VI. Standing Committee Reports

A. Academic and Institutional Support (AIS) Committee

1. **Report**

B. Assessment Committee

1. **Motion 21.08:** On behalf of the Assessment Committee, Senator Mahi moves to accept the proposed amendments to Policy L5.210.

   a) Senator Gross seconded the motion.

   b) **The Senate approved the motion.**

   c) **Policy L5.210 (with strikeouts)**

   d) **Policy L5.210 (amended clean copy)**

C. Budget and Planning Committee

1. **Notes from meeting of 04-12-2021**

2. The economic outlook for the state may be more balanced by the Fall than anticipated.

D. Curriculum Committee
1. **Report**

2. Report approved by unanimous consent.

E. Distance Education (DE) Committee

F. Elections Committee

1. **Motion 21.09:** On behalf of the Election Committee, Senators Egami and MacDonald move to accept the edited Elections Committee Procedures.

2. Senator Igarashi seconded the motion.

3. The Senate approved the motion.

G. Faculty Committee

1. Optional syllabus notification:

   a) **Student Access to Mental Health Services:** Leeward Community College understands that the attainment of educational and professional goals depends vitally on students’ health, safety, and wellbeing. This also includes students’ mental health. If any currently enrolled Leeward CC student feels they would benefit from the support of mental health services, please contact our mental health professionals. More information about Leeward CC’s mental health services, including how to connect with them, can be found on our Counseling webpage: https://www.leeward.hawaii.edu/counseling.

2. **Motion Introduced:** On behalf of the Faculty Committee, Senators Keli‘ikuli and Wyatt move to approve an optional syllabus notification promoting Leeward CC’s mental health services. (To be voted on at our Faculty Senate meeting on May 5, 2021).

3. Concerns about syllabus notifications:

   a) Having all of the notifications (both mandatory and optional) on a college page that can be updated by the VCAA or whomever would take care of these notifications so that instructors don’t need to update the notifications when updates (new counselors, Title IX coordinators, etc.) occur.

   b) Having the VCAA (or the person who handles the notifications) send a reminder/updates—3 weeks before the beginning of each semester as instructors prepare their syllabi.
c) Needing to figure out how to communicate with lecturers effectively to ensure they have the necessary information, notifications, updates (including participation verification), etc. especially when lecturers aren’t part of the listserv, some don’t have hawaii.edu email addresses until very near the beginning of the semester, and some don’t know if they’re teaching any sections until almost the Friday before the semester begins.

H. General Education Committee

1. Report

2. Motion: On behalf of the General Education Committee, Senator Igarashi moves to forward four candidates for participation in the Summer 2021 General Education Institute (vote conducted online to make the deadline of 13 April 2021). Vote conducted April 6-9. Motion passed unanimously.

   a) Candidates:

      (1) Cawdery, Michael

      (2) Gross, Petersen

      (3) Lewis, Andrea

      (4) Lindquist, Bruce

   b) Michael Oishi forwarded the names of the above candidates to members of the UH GE Design Team following the conclusion of the vote.

I. Lecturer Group

J. Legislative Relations Committee

1. Report

K. Student Affairs Committee

1. Amendments to Student Affairs Committee description in the Faculty Senate bylaws.

   a) FS Bylaws table of Amendments (2020-2021 AY)

   b) Copy of FS Bylaws (w/ deletions and additions)

   c) Proposed Clean Copy of FS Bylaws
d) **Motion 21.10:** On behalf of the Student Affairs Committee, Senators Barrett and Signor move to accept the proposed amendments to the Student Affairs Committee description in the Faculty Senate bylaws.

(1) Senator Ickes seconded the motion.

(2) **The Senate approved the motion.**

2. **March 19, 2021 Meeting Summary**

L. **Student Government**

1. Student Government is working on its new leadership team.

2. Topics of concern: sex assault awareness, Asian-American and Pacific Islander month, and Earth month.

3. Our AIS committee will work with the Student Government on the issue of their carpet.

4. Student Government members’ names were submitted for the Summer 2021 GE Institute.

VII. **Chair’s Report**

A. Congratulations to Betty Ickes and Evelyn Wong on being awarded sabbaticals during the 2021-2022 academic year.

B. Standing committee chair annual reports due at next Faculty Senate meeting on May 5. Please submit them as PDFs to Michael, Junie, and/or Kelsie.

1. Please consider including the following in your reports:

   a) Purpose of the Committee

   b) Committee membership (including leadership)

   c) Committee meeting dates for the academic year

   d) Motions proposed by your committee to the Faculty Senate

   e) Narrative or detailed bullets of accomplishments, goals/priorities, and potential future endeavors.

   f) Any requests to change your committee's description in Article V of the Faculty Senate Bylaws.

   g) Changes to operating procedures and/or leadership transition
2. Updates on mental health counseling.

   a) The search for another mental health counselor is underway.

      (1) We came close to hiring a counselor, though we lost the two candidates due to the hiring freeze (they found jobs before the college could get approval to go to ad again).

      (2) Minimum qualifications (MQs) for mental health counselors cannot be changed. However, there may be opportunities to identify alternative licensures that may still satisfy the MQs to provide the college more flexibility to make a hire.

   b) Dr. Steven Taketa is currently training and supervising graduate students in mental health counseling. These students will be able to counsel some of the less urgent and acute cases, though the most urgent and acute cases will still be referred to certified mental health counselors.

   c) Kū Makani: The Hawai‘i Resiliency Project (slideshow by Michelle Igarashi)

   d) The Behavior Intervention Team (BIT), headed by Tom Hirsbrunner and Kami Kato, is ready to roll. The BIT is version 2.0 of Team Care, which will serve as a frontline resource to triage cases to help ensure that students get the help that they need—especially the urgent and acute cases.

       (1) BIT has just developed a handbook to help identify student behavior in need of intervention and to connect faculty and staff to trained professionals.

       (2) The BIT is working on an online application form where students can self-identify and seek help from one of the professionals listed in the handbook.

C. Seventh draft of framework for Faculty Senate consultation on interim Executive Managerial appointments

   1. **Motion Introduced**: On behalf of the Faculty Senate Executive
Committee, Vice Chair Hayashi moves to accept the framework for Faculty Senate consultation on interim Executive Managerial appointments. (To be voted on at our Faculty Senate meeting on May 5, 2021).

D. **2021-2024 Academic Calendar**

E. UH Board of Regents proposed resolution to reimagine the university (see p. 82 and in UH News). **UH BOR meeting** on Thursday, April 15, at 8:30 a.m.

F. In February, the UHM Faculty Senate passed a resolution calling for all EM positions to be subject to an open search, recruitment, and hiring process, citing UHM faculty’s understanding of shared governance (see p. 7, paragraph four, under UHM Faculty Senate Chair Paul Mckimmy’s report to the BOR).

G. All Campus Council of Faculty Senate Chairs (ACCFSC) (from meeting of February 19, 2021)
   1. No March meeting due to Spring break.

C. Community College Council of Faculty Senate Chairs (CCCFSC)
   1. No March meeting due to Spring break.
   2. **Guidance for Chancellors in Formation of TPRC Assignments**

D. Campus Council (from meeting of April 9, 2021)
   1. **Institutional Priorities Draft (unapproved and revised)** for AY 2021-2022 (Kay Ono)
      a. This year’s list was handled differently due to CARES funding. According to our current Planning Process, the Faculty Senate can present a campus-wide item to be added onto the Institutional Priorities List; if they do, it should be discussed prior to the CC vote in May. The Campus Council units should discuss the Institutional Priorities with their units; then be prepared to vote on it at the May meeting.
      b. Four groups (instructional, student services, academic services, administrative services)
         i. Each group meets to prioritize their lists
      c. Identified items that could qualify for CARES funding
i. Separated CARES qualified requests from other requests.

ii. Further identified items that can be partially funded by CARES.

d. Personnel

i. Separated instructional and non-instructional priorities.

ii. Separated “New Position Requests” and “Frozen Position Requests.”

1. Listed non-instructional position that can be funded (fully or partially) by CARES

2. Retention initiatives can be funded by CARES, but not enrollment

e. Repair and Maintenance

i. Health and safety items marked in red (needs to be addressed in a timely manner) - suggested change for next year: Add “health and safety compliance” category.

ii. Requests that can be funded by CARES identified

f. Recommendations and suggestions for next year

i. Include one item on one line (i.e. each position listed should be on individual lines instead of being grouped together)

ii. Round dollar amounts to nearest $100

2. Jayne Bopp and Kay Ono proposed changes for next year’s annual planning process. The OPPA webpage should be reviewed: http://www.leeward.hawaii.edu/institutional-priorities. Proposed changes include:

a. Expand the ability of other governance groups to add items to the institutional priorities (currently only Faculty Senate can do this)

i. Discussion on pros and cons of this new addition to the process.
1. Pros: Giving other Authorized Governance Bodies (AGBs) (i.e., Pūkoʻa no nā ʻEwa Council and Student Government).

2. Cons: Could replicate votes from divisions, Faculty Senate, and/or Campus Council (where faculty might be members of all three organizations). All AGBs are already represented on Campus Council. Also, unfair to add items to the Institutional Priorities after divisions and academic units have already submitted their requests.

ii. Motion to vote on change has been tabled to May meeting

VIII. Vice Chair’s Report

IX. Secretary’s Report

X. Old Business

XI. New Business

XII. General Announcements

XIII. Notice of next meeting: 3:00-5:00 p.m., Wednesday, May 5, 2021, via video conference

XIV. Adjournment at 5:10 pm

Respectfully submitted by Kelsie Aguilera, Faculty Senate Secretary
The Leeward Faculty Senate is chartered by the Board of Regents as the primary voice of faculty in the academic governance of the College. Through the Curriculum Committee, the faculty has a powerful role in shaping the programs and courses offered at the College. The Budget, Student, and Faculty Committees of the Faculty Senate provide faculty input and recommendations to the administration.

- The Senate Chair and Vice Chair sit on the Campus Council.
- The Senate is comprised of at least 22 senators elected at-large from among the full-time faculty, with approximately half elected each year for two-year terms, as well as one representative for the lecturers.
- The Senate elects its Executive Committee that consists of the Chair, Vice chair, and Secretary.
- Membership on Senate committees is open to all Leeward faculty, administration, and staff members.

Faculty Senate Executive Committee members for the 2021-2022 academic year:

- Michael Oishi - Chair
- Junie Hayashi - Vice Chair
- Kelsie Aguilera - Secretary

Issues before the Senate for Fall 2021 - Spring 2022

- Advocate for participation in the evaluation of academic executive leadership at the campus and system level, as protected by Part I, Section 8 of UHPA's Reference Section 20 (R-20).
- Monitor and advise on the college and UH System's resource and budget planning.
- Communicate progress on UH General Education curriculum revisions.
- Resolve facilities problems identified in our Faculty Senate memo of 30 April 2020.
- Continue to ensure that all divisions and academic units are represented on Faculty Senate committees.

Issues before the Senate for Fall 2020 - Spring 2021

- Resolve facilities problems identified in our Faculty Senate memo of 30 April 2020.
- Advise in the search for an interim Vice Chancellor for Academic Affairs.
- Revise the Leeward CC Faculty Senate's Bylaws.
- Ensure that all divisions and academic units are represented on Faculty Senate committees.
- Advise on the college's operating budget.

Issues before the Senate for Fall 2017 - Spring 2018

- Providing input into the system-wide transition, by Fall 2018, to the new CES (Course Evaluation System).
- Participating in the review of the Budget and Planning Process at Leeward Community College.
- Provide input into the Revised Shared Governance Policy at Leeward Community College.

Issues before the Senate for Fall 2016 - Spring 2017
