Notice of Meeting UNIVERSITY OF HAWAI'I BOARD OF REGENTS COMMITTEE ON BUDGET AND FINANCE

Members: Regents Moore (Chair), Higaki (Vice-Chair), Acoba, McEnerney, and Tagorda

Date: Thursday, September 6, 2018

Time: 12:15 p.m.

Place: University of Hawai'i at Mānoa

Information Technology Building 1st Floor Conference Room 105A/B

2520 Correa Road Honolulu, Hawai'i 96822

AGENDA

- I. Call Meeting to Order
- II. Approval of Minutes of the August 2, 2018 Meeting
- III. Public Comment Period for Agenda Items: All written testimony on agenda items received after posting of this agenda and up to 24 hours in advance of the meeting will be distributed to the board. Late testimony on agenda items will be distributed to the board within 24 hours of receipt. Written testimony may be submitted via US mail, email at bor@hawaii.edu, or facsimile at 956-5156. Individuals submitting written testimony are not automatically signed up for oral testimony. Registration for oral testimony on agenda items will be provided at the meeting location 15 minutes prior to the meeting and closed once the meeting begins. Oral testimony is limited to three (3) minutes. All written testimony submitted are public documents. Therefore, any testimony that is submitted verbally or in writing, electronically or in person, for use in the public meeting process is public information and will be posted on the board's website.

IV. Agenda Items

- A. FY18 Fourth Quarter UBS Legacy Endowment Fund Investment Performance Report
- B. Discussion on UBS Investment Strategy
- C. Recommend Board Approval of Fiscal Biennium 2019-2021 Budget Policy Paper
- D. FY18 Fourth Quarter Financial Report
- E. FY17 Bond Post-Issuance Compliance Update
- F. Review and Approval of Committee Work Plan

V. Adjournment

UNIVERSITY OF HARAN BOARD OF REGENTS Kalbert K. Young Vice President for Budget and Finance Chief Financial Officer

18 AUG 30 P5:01

RECEIVED

August 29, 2018

18 AUG 30 P2:14

UNIVERSITY OF HAWAII PRESIDENT'S OFFICE

TO:

Lee Putnam

Chair, Board of Regents

Randy Moore

Chair, Committee on Budget and Finance, Board of Regents

VIA:

David Lassner

President

FROM:

Kalbert K. Young

Vice President for B&F/CFC

SUBJECT:

FY18 Q4 UBS Investment Performance Report

Attached is a report on investment performance of the Legacy Endowment Fund provided by UBS for the fourth quarter of the fiscal year ending on June 30, 2018. The report highlights performance of the overall portfolio and the specific funds or investment products that comprise the Legacy Endowment Fund portfolio. This report is an information item for discussion at the Committee on Budget and Finance (B&F Committee) meeting on September 6, 2018.

Ms. Lori Hamano and Mr. Kyle Yoneshige from UBS will be present to discuss this before the B&F Committee and will be available to answer any questions the Regents may have on the report or on the portfolio in general.

Disclosures applicable to accounts at UBS Financial Services Inc.

This section contains important disclosures regarding the information and valuations presented here. All information presented is subject to change at any time and is provided only as of the date indicated. The information in this report is for informational purposes only and should not be relied upon as the basis of an investment or liquidation decision. UBS FS accounts statements and official tax documents are the only official record of your accounts and are not replaced, amended or superseded by any of the information presented in these reports. You should not rely on this information in making purchase or sell decisions, for tax purposes or otherwise.

UBS FS offers a number of investment advisory programs to clients, acting in our capacity as an investment adviser, including fee-based financial planning, discretionary account management, non-discretionary investment advisory programs, and advice on the selection of investment managers and mutual funds offered through our investment advisory programs. When we act as your investment adviser, we will have a written agreement with you expressly acknowledging our investment advisory relationship with you and describing our obligations to you. At the beginning of our advisory relationship, we will give you our Form ADV brochure(s) for the program(s) you selected that provides detailed information about, among other things, the advisory services we provide, our fees, our personnel, our other business activities and financial industry affiliations and conflicts between our interests and your

In our attempt to provide you with the highest quality information available, we have compiled this report using data obtained from recognized statistical sources and authorities in the financial industry. While we believe this information to be reliable, we cannot make any representations regarding its accuracy or completeness. Please keep this guide as your Wealth Review

Please keep in mind that most investment objectives are long term. Although it is important to evaluate your portfolio's performance over multiple time periods, we believe the greatest emphasis should be placed on the longer period returns.

Please review the report content carefully and contact your Financial Advisor with any questions.

Client Accounts: This report may include all assets in the accounts listed and may include eligible and ineligible assets in a fee-based program. Since ineligible assets are not considered fee-based program assets, the inclusion of such securities will distort the actual performance of your accounts and does not reflect the performance of your accounts in the fee-based program. As a result, the performance reflected in this report can vary substantially from the individual account

performance reflected in the performance reports provided to you as part of those programs. For feebased programs, fees are charged on the market value of eligible assets in the accounts and assessed quarterly in advance, prorated according to the number of calendar days in the billing period. When shown on a report, the risk profile and return objectives describe your overall goals for these accounts. For each account you maintain, you choose one return objective and a primary risk profile. If you have questions regarding these objectives or wish to change them, please contact your Financial Advisor to update your accounts records.

Performance: This report presents accounts activity and performance starting 12/31/02. For accounts opened prior to 12/31/02, this report does not include the complete account activity or performance of your accounts prior to that date. For consolidated reports, the Performance Start Date will be the earliest performance start date of any of the individual accounts selected for the consolidation time period. If an individual account's performance information is not available for a full reporting time period (month to date, quarter to date, year to date or performance to date), the individual's net of fee time weighted return will not be displayed. For consolidated accounts that include different account Performance Start Dates, the consolidated Additions/Withdrawals, Income Earned and Investment Appreciation/ Depreciation will include all activity that occurred during the consolidated reporting time period. Accounts that hold or held insurance products will be reported on from the month end date of when insurance and annuity activity could be obtained from the carrier. Past performance does not guarantee future results and current performance may be lower/higher than past data presented.

Time-weighted Returns (prior to 10/31/2010): The report displays a time weighted rate of return (TVR) that is calculated using the Modified Dietz Method. This calculation uses the beginning and ending portfolio values for the month and weighs each contribution/withdrawal based upon the day the cashflow occurred. Periods greater than one month are calculated by linking the monthly returns. The TWR gives equal weighting to every return regardless of amount of money invested, so it is an effective measure for returns on a fee based account. All periods shown which are greater than 12 months are annualized.

Time-weighted Returns (after 10/31/2010): For reports generated on or after 1/26/2018, the report displays a time weighted rate of return (TWR) that is calculated by dividing the portfolio's daily gain/loss by the previous day's closing market value plus the net value of cash flows that occurred during the day, if it was positive. The TWR gives equal weighting to every return regardless of amount of money invested, so it is an effective measure for returns on a fee based account Periods greater than one day are calculated by linking

the daily returns. All periods shown which are greater than 12 months are annualized. For reports generated prior to 01/26/2018, the performance calculations used the account's end of day value on the performance inception (listed in the report under the column "ITD") and all cash flows were posted at end of day. As a result of the change, the overall rate of return (TWR) and beginning market value displayed can vary from prior generated reports.

Money-weighted returns: Money-weighted return (MWR) is a measure of the rate of return for an asset or portfolio of assets. It is calculated by finding the daily Internal Rate of Return (IRR) for the period and then compounding this return by the number of days in the period being measured. The MWR incorporates the size and timing of cash flows, so it is an effective measure returns on a portfolio.

Annualized Performance: All performance periods greater than one year are calculated (unless otherwise stated) on an annualized basis, which represents the return on an investment multiplied or divided to give a comparable one year return.

Cumulative Performance: A cumulative return is the aggregate amount that an investment has gained or lost over time, independent of the period of time involved.

Net of Fees and Gross of Fees Performance: Performance is presented on a "net of fees" and "gross of fees" basis, where indicated. Net returns do not reflect Program and wrap fees prior to 10/31/10 for accounts that are billed separately via invoice through a separate account billing arrangement. Gross returns do not reflect the deduction of fees, commissions or other charges. The payment of actual fees and expenses will reduce a client's return. The compound effect of such fees and expenses should be considered when reviewing returns. For example, the net effect of the deduction of fees on annualized performance, including the compounded effect over time, is determined by the relative size of the fee and the account's investment performance. It should also be noted that where gross returns are compared to an index, the index performance also does not reflect any transaction costs,

Asset Class Performance: If you selected the Manager Roll-up option, even though the asset manager may invest in more than one asset class, the asset manager will be included in an asset class based upon the asset manager's investment style/category. Therefore, the values/percentages of asset classes presented within this report may not match if you selected the Manager Roll-up option.

which would lower the performance results. Market

index data maybe subject to review and revision.

Benchmark/Major Indices: The past performance of an index is not a guarantee of future results. Any

benchmark is shown for informational purposes only and relates to historical performance of market indices and not the performance of actual investments. Although most portfolios use indices as benchmarks. portfolios are actively managed and generally are not restricted to investing only in securities in the index. As a result, your portfolio holdings and performance may vary substantially from the index. Each index reflects an unmanaged universe of securities without any deduction for advisory fees or other expenses that would reduce actual returns, as well as the reinvestment of all income and dividends. An actual investment in the securities included in the index would require an investor to incur transaction costs, which would lower the performance results. Indices are not actively managed and investors cannot invest directly in the indices. Market index data maybe subject to review and revision. Further, there is no guarantee that an investor's account will meet or exceed the stated benchmark, Index performance information has been obtained from third parties deemed to be reliable. We have not independently verified this information, nor do we make any representations or warranties to the accuracy or completeness of this information.

Benchmark 1 for Advisory accounts- The Benchmark 1 for your account is designed to reflect the asset categories in which your account is invested.

Benchmark 2 - 8 for Advisory accounts - are optional indices selected by you which may consist of a blend of indexes.

Consumer Price Index - The Consumer Price Index for Urban Wage Earners and Clerical Workers-U.S. City Average, All Items. Based on monthly data published by the U.S. Department of Labor. The CPI for the most recent month is estimated due to the delayed release of CPI data by the U.S. government. Therefore, CPI for the most recent month is assumed to be equal to the CPI for the previous month.

CPI + % - is an optional index that, if selected, will replace the standard CPI measure on your Review. This index consists of the CPI return plus an absolute annualized return selected by you.

Client Return Objective - is an optional annualized return objective selected by you. In establishing this objective, you should make sure that it is consistent with your tolerance for risk.

Custom Time Periods: If represented on this report, the performance start date and the performance end date have been selected by your Financial Advisor in order to provide performance and account activity information for your account for the specified period of time only. As a result only a portion of your account's activity and performance information is presented in the performance report, and, therefore, presents a distorted

Disclosures applicable to accounts at UBS Financial Services Inc. (continued)

representation of your account's activity and performance.

Net Deposits/Withdrawals: When shown on a report. this information represents the net value of all cash and securities contributions and withdrawals, program fees (including wrap fees) and other fees added to or subtracted from your accounts from the first day to the last day of the period. When fees are shown separately, net deposits / withdrawals does not include program fees (including wrap fees). When investment return is displayed net deposits / withdrawals does not include program fees (including wrap fees). For security contributions and withdrawals, securities are calculated using the end of day UBS FS price on the day securities are delivered in or out of the accounts. Wrap fees will be included in this calculation except when paid via an invoice or through a separate accounts billing arrangement. When shown on Client summary and/or Portfolio review report, program fees (including wrap fees) may not be included in net deposits/withdrawals.

Dividends/Interest: Dividend and interest earned, when shown on a report, does not reflect your account's tax status or reporting requirements. Use only official tax reporting documents (i.e. 1099) for tax reporting purposes. The classification of private investment distributions can only be determined by referring to the official year-end tax-reporting document provided by the issuer.

Change in Accrued Interest: When shown on a report, this information represents the difference between the accrued interest at the beginning of the period from the accrued interest at the end of the period.

Change in Value: Represents the change in value of the portfolio during the reporting period, excluding additions/withdrawals, dividend and interest income earned and accrued interest. Change in Value may include programs fees (including wrap fees) and other fees.

Fees: Fees represented in this report include program and wrap fees. Program and wrap fees prior to October 1, 2010 for accounts that are billed separately via invoice through a separate account billing arrangement are not included in this report.

Performance Start Date Changes: The Performance Start Date for accounts marked with a 'A' have changed. Performance figures of an account with a changed Performance Start Date may not include the entire history of the account. The new Performance Start Date will generate performance returns and activity information for a shorter period than is available at UBS FS. As a result, the overall performance of these accounts may generate better performance than the period of time that would be included if the report used the inception date of the account. UBS FS recommends

reviewing performance reports that use the inception date of the account because reports with longer time frames are usually more helpful when evaluating investment programs and strategies. Performance reports may include accounts with inception dates that precede the new Performance Start Date and will show performance and activity information from the earliest available inception date.

The change in Performance Start Date may be the result of a performance gap due to a zero-balance that prevents the calculation of continuous returns from the inception of the account. The Performance Start Date may also change if an account has failed one of our performance data integrity tests. In such instances, the account will be labeled as 'Review Required' and performance prior to that failure will be restricted. Finally, the Performance Start Date will change if you have explicitly requested a performance restart. Please contact your Financial Advisor for additional details regarding your new Performance Start Date.

Closed Account Performance: Accounts that have been closed may be included in the consolidated performance report. When closed accounts are included in the consolidated report, the performance report will only include information for the time period the account was active during the consolidated performance reporting time period.

Portfolio: For purposes of this report "portfolio" is defined as all of the accounts presented on the cover page or the header of this report and does not necessarily include all of the client's accounts held at UBS FS or elsewhere.

Pricing: All securities are priced using the closing price reported on the last business day preceding the date of this report. Every reasonable attempt has been made to accurately price securities; however, we make no warranty with respect to any security's price. Please refer to the back of the first page of your UBS FS. accounts statement for important information regarding the pricing used for certain types of securities, the sources of pricing data and other qualifications concerning the pricing of securities. To determine the value of securities in your account, we generally rely on third party quotation services. If a price is unavailable or believed to be unreliable, we may determine the price in good faith and may use other sources such as the last recorded transaction. When securities are held at another custodian or if you hold illiquid or restricted securities for which there is no published price, we will generally rely on the value provided by the custodian or issuer of that security.

Cash: Cash on deposit at UBS Bank USA is protected by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000 in principal and accrued interest per depositor for each ownership type. Deposits made in an individual's own name, joint name, or individual retirement account are each held in a separate type of ownership. Such deposits are not guaranteed by UBS FS. More information is available upon request.

Ineligible Assets: We require that you hold and purchase only eligible managed assets in your advisory accounts. Please contact your Financial Advisor for a list of the eligible assets in your program. These reports may provide performance information for eligible and ineligible assets in a fee-based program. Since ineligible assets are not considered fee-based program assets, the inclusion of such securities will distort the actual performance of your advisory assets. As a result, the performance reflected in this report can vary substantially from the individual account performance reflected in the performance reports provided to you as part of those programs. For fee-based programs, fees are charged on the market value of eligible assets in the accounts and assessed quarterly in advance, prorated according to the number of calendar days in the billing period. Neither UBS not your Financial Advisor will act as you investment adviser with respect to Ineligible Assets.

Variable Annuity Asset Allocation: If the option to unbundle a variable annuity is selected and if a variable annuity's holdings data is available, variable annuities will be classified by the asset class, subclass, and style breakdown for their underlying holdings. Where a variable annuity contains equity holdings from multiple equity sectors, this report will proportionately allocate the underlying holdings of the variable annuity to those sectors measured as a percentage of the total variable annuity's asset value as of the date shown.

This information is supplied by Morningstar, Inc. on a weekly basis to UBS FS based on data supplied by the variable annuity which may not be current. Portfolio holdings of variable annuities change on a regular (often daily) basis. Accordingly, any analysis that includes variable annuities may not accurately reflect the current composition of these variable annuities. If a variable annuity's underlying holding data is not available, it will remain classified as an annuity. All data is as of the date indicated in the report.

Equity Style: The Growth, Value and Core labels are determined by Morningstar. If an Equity Style is unclassified, it is due to non-availability of data required by Morningstar to assign it a particular style.

Equity Capitalization: Market Capitalization is determined by Morningstar. Equity securities are classified as Large Cap, Mid Cap or Small Cap by Morningstar. Unclassified securities are those for which no capitalization is available on Morningstar.

The account listing may or may not include all of your accounts with UBS FS. The accounts included in this report are listed under the "Accounts included in this

review" shown on the first page or listed at the top of each page. If an account number begins with "@" this denotes assets or liabilities held at other financial institutions. Information about these assets, including valuation, account type and cost basis, is based on the information you provided to us, or provided to us by third party data aggregators or custodians at your direction. We have not verified, and are not responsible for, the accuracy or completeness of this information.

Account changes: At UBS, we are committed to helping you work toward your financial goals. So that we may continue providing you with financial advice that is consistent with your investment objectives, please consider the following two questions:

1) Have there been any changes to your financial situation or investment objectives?

2) Would you like to implement or modify any restrictions regarding the management of your account? If the answer to either question is "yes," it is important that you contact your Financial Advisor as soon as possible to discuss these changes. For MAC advisory accounts, please contact your investment manager directly if you would like to impose or change any investment restrictions on your account.

ADV disclosure: A complimentary copy of our current Form ADV Disclosure Brochure that describes the advisory program and related fees is available through your Financial Advisor. Please contact your Financial Advisor if you have any questions.

Important information for former Piper Jaffray and McDonald Investments clients: As an accommodation to former Piper Jaffray and McDonald Investments clients, these reports include performance history for their Piper Jaffray accounts prior to August 12, 2006 and McDonald Investments accounts prior to February 9, 2007, the date the respective accounts were converted to UBS FS. UBS FS has not independently verified this information nor do we make any representations or warranties as to the accuracy or completeness of that information and will not be liable to you if any such information is unavailable, delayed or inaccurate.

For insurance, annuities, and 529 Plans, UBS FS relies on information obtained from third party services it believes to be reliable. UBS FS does not independently verify or guarantee the accuracy or validity of any information provided by third parties. Information for insurance, annuities, and 529 Plans that has been provided by a third party service may not reflect the quantity and market value as of the previous business day. When available, an "as of" date is included in the description.

Investors outside the U.S. are subject to securities and tax regulations within their applicable jurisdiction that are not addressed in this report. Nothing in this report shall be construed to be a solicitation to buy or offer to sell any security, product or service to any non-U.S.

Disclosures

This information is being provided as a service by your Financial Adviser, not UBS Financial Services Inc. ("UBSFS"). This report is provided for informational purposes only at your request. This report does not constitute an offer to sell or a solicitation or an offer to buy any securities. Any reference to a specific security included in this report does not constitute a recommendation to buy, sell or hold that security.

As a firm providing wealth management services to clients, UBS Financial Services Inc. offers both investment advisory services and brokerage services. Investment advisory services and brokerage services are separate and distinct, differ in material ways and are governed by different laws and separate arrangements. It is important that clients understand the ways in which we conduct business and that they carefully read the agreements and disclosures that we provide to them about the products or services we offer. For more information visit our website at ubs.com/workingwithus

The information is based upon the market value of your account(s) as of the close of business on **06/30/2018**, is subject to daily market fluctuation and in some cases may be rounded for convenience.

Your UBS account statements and trade confirmations are the official records of your accounts at UBS. We assign index benchmarks to our asset allocations, strategies in our separately managed accounts and discretionary programs based on our understanding of the allocation, strategy, the investment style and our research. The benchmarks included in this report can differ from those assigned through our research process. As a result, you may find that the performance comparisons may differ, sometimes significantly, from that presented in performance reports and other materials that are prepared and delivered centrally by the Firm. Depending upon the composition of your portfolio and your investment objectives, the indexes used in this report may not be an appropriate measure for comparison purposes, and as such, are represented for illustration only. Your portfolio holdings and performance may vary significantly from the index. Your financial advisor can provide additional information about how benchmarks within this report were selected.

Past performance does not guarantee future results and current performance may be lower or higher than past performance data presented. The investment return and principal value of an investment will fluctuate so that your investment, when redeemed, may be worth more or less than your original cost of investing.

No part of this material should be duplicated or used in any way other than for the recipient's personal use.

If you provided information regarding assets that you hold at other financial institutions, we have included those assets in this report. We have not verified, and are not responsible for, the accuracy or completeness of this information. UBS does not provide advice with respect to your assets at other firms and specifically disclaims any liability for any activity conducted by you in accounts at other firms. Therefore, any evaluation or analysis provided in this report, which includes assets not held at UBS FS, should be considered an estimate only.

Customers should review and maintain the original source documents that are integrated into this report, such as the statements for individual accounts held away from UBS FS. Source documents may contain notices, disclosures and other information important to you, and may also serve as a reference should questions arise regarding the accuracy of the information in this report. UBSFS SIPC coverage would only apply to those assets held at UBS FS, and to the extent some of the other reported entities may be SIPC members, customers should contact their financial representative or the other entity or refer to the other entity's statement regarding SIPC membership.

You have discussed the receipt of this individually customized report with your Financial Advisor and understand that it is being provided for information purposes only. If you would like to revoke such consent, and no longer receive this report, please notify your Financial Advisor and/or Branch Manager.

Standardized and Tax Adjusted Returns Disclosure Statement

The performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate; thus an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than return data quoted herein. For performance data current to the most recent month-end please visit http://advisor.morningstar.com/familyinfo.asp

Standardized Returns assume reinvestment of dividends and capital gains. They depict performance without adjusting for the effects of taxation, but are adjusted to reflect sales charges and ongoing fund expenses.

If adjusted for taxation, the performance quoted would be significantly reduced. For variable annuities, additional expenses will be taken into account, including M&E risk charges, fund-level expenses such as management fees and operating fees, contract-level administration fees, and charges such as surrender, contract, and sales charges.

After-tax returns are calculated using the highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or an IRA. After-tax returns exclude the effects of either the alternative minimum tax or phase-out of certain tax credits. Any taxes due are as of the time the distributions are made, and the taxable amount and tax character of each distribution are as specified by the fund on the dividend declaration date. Due to foreign tax credits or realized capital losses, after-tax returns may be greater than before-tax returns. After-tax returns for exchange-traded funds are based on net asset value.

Money Market Fund Disclosures

If money market fund(s) are included in the Standardized Returns table below, each money market fund's name will be followed by a superscripted letter that links it to the applicable disclosure below:

Institutional Money Market Funds (designated by an "S"):

You could lose money by investing in the fund. Because the share price of the fund will fluctuate, when you sell your shares they may be worth more or less than what you originally paid for them. The fund may impose a fee upon sale of your shares or may temporarily suspend your ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Government Money Market Funds that have chosen to rely on the ability to impose liquidity fees and suspend redemptions (designated by an "L") and

Retail Money Market Funds (designated by an "L"):

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The fund may impose a fee upon sale of your shares or may temporarily suspend your ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Government Money Market Funds that have chosen not to rely on the ability to impose liquidity fees and suspend redemptions (designated by an "N").

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Mutual Fund Detail Report Disclosure Statement

The Mutual Fund Detail Report is supplemental sales literature, and therefore must be preceded or accompanied by the mutual fund's current prospectus or an equivalent statement. Please read this information carefully. In all cases, this disclosure statement should accompany the Mutual Fund Detail Report. Morningstar is not itself a FINRA-member firm.

All data presented is based on the most recent information available to Morningstar as of the release date and may or may not be an accurate reflection of current data for securities included in the fund's portfolio. There is no assurance that the data will remain the same.

Unless otherwise specified, the definition of "funds" used throughout this Disclosure Statement includes closed-end funds, exchange-traded funds, grantor trusts, index mutual funds, open-ended mutual funds, and unit investment trusts. It does not include exchange-traded notes or exchange-traded commodities.

Prior to 2016, Morningstar's methodology evaluated open-end mutual funds and exchange-traded funds as separate groups. Each group contained a subset of the current investments included in our current comparative analysis. In this report, historical data presented on a calendar-year basis and trailing periods ending at the most-recent month-end reflect the updated methodology.

Risk measures (such as alpha, beta, r-squared, standard deviation, mean, or Sharpe ratio) are calculated for securities or portfolios that have at least a three-year history.

Most Morningstar rankings do not include any adjustment for one-time sales charges, or loads. Morningstar does publish load-adjusted returns, and ranks such returns within a Morningstar Category in certain reports. The total returns for ETFs and fund share classes without one-time loads are equal to Morningstar's calculation of load-adjusted returns. Share classes that are subject to one-time loads relating to advice or sales commissions have their returns adjusted as part of the load-adjusted return calculation to reflect those loads

Comparison of Fund Types

Funds, including closed-end funds, exchange-traded funds (ETFs), money market funds, open-end funds, and unit investment trusts (UITs), have many similarities, but also many important differences. In general, publically-offered funds are investment companies registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended. Funds pool money from their investors and manage it according to an investment strategy or objective, which can vary greatly from fund to fund. Funds have the ability to offer diversification and professional management, but also involve risk, including the loss of principal.

A closed-end fund is an investment company, which typically makes one public offering of a fixed number of shares. Thereafter, shares are traded on a secondary market. As a result, the secondary market price may be higher or lower than the closed-end fund's net asset value (NAV). If these shares trade at a price above their NAV, they are said to be trading at a premium. Conversely, if they are trading at a price below their NAV, they are said to be trading at a discount. A closed-end mutual fund's expense ratio is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. Closed-end funds may also have 12b-1 fees. Income distributions and capital gains of the closed-end fund are

subject to income tax, if held in a taxable account.

An ETF is an investment company that typically has an investment objective of striving to achieve a similar return as a particular market index. The ETF will invest in either all or a representative sample of the securities included in the index it is seeking to imitate. Like closed-end funds, an ETF can be traded on a secondary market and thus have a market price that may be higher or lower than its net asset value. If these shares trade at a price above their NAV, they are said to be trading at a premium. Conversely, if they are trading at a price below their NAV, they are said to be trading at a discount. ETFs are not actively managed, so their value may be affected by a general decline in the U.S. market segments relating to their underlying indexes. Similarly, an imperfect match between an ETF's holdings and those of its underlying index may cause its performance to vary from that of its underlying index. The expense ratio of an ETF is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. ETFs do not have 12b-1 fees or sales loads. Capital gains from funds held in a taxable account are subject to income tax. In many, but not all cases, ETFs are generally considered to be more tax-efficient when compared to similarly invested mutual funds.

Holding company depository receipts (HOLDRs) are similar to ETFs, but they focus on narrow industry groups. HOLDRs initially own 20 stocks, which are unmanaged, and can become more concentrated due to mergers, or the disparate performance of their holdings. HOLDRs can only be bought in 100-share increments. Investors may exchange shares of a HOLDR for its underlying stocks at any time.

A money-market fund is an investment company that invests in commercial paper, banker's acceptances, repurchase agreements, government securities, certificates of deposit and other highly liquid securities, and pays money market rates of interest. Money markets are not FDIC-insured, may lose money, and are not guaranteed by a bank or other financial institution.

An open-end fund is an investment company that issues shares on a continuous basis. Shares can be purchased from the open-end mutual fund itself, or through an intermediary, but cannot be traded on a secondary market, such as the New York Stock Exchange. Investors pay the open-end mutual fund's current net asset value plus any initial sales loads. Net asset value is calculated daily, at the close of business. Open-end mutual fund shares can be redeemed, or sold back to the fund or intermediary, at their current net asset value minus any deferred sales loads or redeemtion fees. The expense ratio for an open-end mutual fund is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. Open-end funds may also have 12b-1 fees. Income distributions and capital gains of the open-end fund are subject to income tax, if held in a taxable account.

A unit investment trust (UIT) is an investment company organized under a trust agreement between a sponsor and trustee. UITs typically purchase a fixed portfolio of securities and then sell units in the trust to investors. The major difference between a UIT and a mutual fund is that a mutual fund is actively managed, while a UIT is not. On a periodic basis, UITs usually distribute to the unit holder their pro rata share of the trust's net investment income and net realized capital gains, if any. If the trust is one that invests only in tax-free securities, then the income from the trust is also tax-free. UITs generally make one public offering of a fixed number of units. However, in some cases, the sponsor will maintain a secondary market that allows existing unit holders to sell their units and for new investors to buy units. A one-time initial sales charge is deducted from an investment made into the trust. UIT investors may also pay creation and development fees, organization costs, and/or trustee and operation expenses. UIT units may be redeemed by the sponsor at their net

Investment research is produced and issued by subsidiaries of Morningstar, Incincting, but not limited to, Morningstar Research Services LLC, registered with and opened by the U.S. Securities and Arange Commission. This report is supplemental sales literature. If applicable it must be preceded or accompanied by a prospectus, or equivalent, and disclosure statement. Please see important disclosures at the end of this report.

asset value minus a deferred sales charge, and sold to other investors. UITs have set termination dates, at which point the underlying securities are sold and the sales proceeds are paid to the investor. Typically, a UIT investment is rolled over into successive trusts as part of a long-term strategy. A rollover fee may be charged for the exercise of rollover purchases. There are tax consequences associated with rolling over an investment from one trust to the next.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares, when sold, may be worth more or less than the original investment. Fund portfolio statistics change over time. Funds are not FDIC-insured, may lose value, and are not guaranteed by a bank or other financial institution.

Morningstar calculates after-tax returns using the highest applicable federal marginal income tax rate plus the investment income tax and Medicare surcharge. As of 2018, this rate is 37% plus 3.8% investment income plus 0.9% Medicare surcharge, or 41.7%. This rate changes periodically in accordance with changes in federal law.

Pre-Inception Returns

The analysis in this report may be based, in part, on adjusted historical returns for periods prior to the inception of the share class of the fund shown in this report ("Report Share Class"). If pre-inception returns are shown, a performance stream consisting of the Report Share Class and older share class(es) is created. Morningstar adjusts pre-inception returns downward to reflect higher expenses in the Report Share Class, we do not hypothetically adjust returns upwards for lower expenses. For more information regarding calculation of pre-inception returns please see the Morningstar Extended Performance Methodology.

When pre-inception data is presented in the report, the header at the top of the report will indicate this. In addition, the pre-inception data included in the report will appear in italics.

While the inclusion of pre-inception data provides valuable insight into the probable long-term behavior of newer share classes of a fund, investors should be aware that an adjusted historical return can only provide an approximation of that behavior. For example, the fee structures of a retail share class will vary from that of an institutional share class, as retail shares tend to have higher operating expenses and sales charges. These adjusted historical returns are not actual returns. The underlying investments in the share classes used to calculate the pre-performance string will likely vary from the underlying investments held in the fund after inception. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

12b1 Expense %

A 12b-1 fee is a fee used to pay for a mutual fund's distribution costs. It is often used as a commission to brokers for selling the fund. The amount of the fee is taken from a fund's returns.

Alpha

Alpha is a measure of the difference between a security or portfolio's actual returns and its expected performance, given its level of risk (as measured by beta.) Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.

Asset Allocation

Asset Allocation reflects asset class weightings of the portfolio. The "Other" category includes security types that are not neatly classified in the other asset classes, such as convertible bonds and preferred stocks, or cannot be classified by Morningstar as a result of missing data. Morningstar may display asset allocation data in several ways, including tables or pie charts. In addition, Morningstar may compare the asset class breakdown of the fund against its three-year average, category average, and/or index proxy.

Asset allocations shown in tables may include a breakdown among the long, short, and net (long positions net of short) positions. These statistics summarize what the fund's managers are buying and how they are positioning the fund's portfolio. When short positions are captured in these portfolio statistics, investors get a more robust description of the fund's exposure and risk. Long positions involve buying the security outright and selling it later, with the hope the security's price rises over time. Short positions are taken with the hope of benefitting from anticipated price declines. The investor borrows the security from another investor, sells it and receives cash, and then is obligated to buy it back at some point in the future. If the price falls after the short sale, the investor will have sold high and can buy low to close the short position and lock in a profit. However, if the price of the security increases after the short sale, the investor will experience a loss buying it at a higher price than the sale price.

Most fund portfolios hold fairly conventional securities, such as long positions in equities and bonds. Morningstar may generate a colored pie chart for these portfolios. Other portfolios use other investment strategies or securities, such as short positions or derivatives, in an attempt to reduce transaction costs, enhance returns, or reduce risk. Some of these securities and strategies behave like conventional securities, while other have unique return and risk characteristics. Portfolios that incorporate investment strategies resulting in short positions or portfolio with relatively exotic derivative positions often report data to Morningstar that does not meet the parameters of the calculation underlying a pie chart's generation. Because of the nature of how these securities are reported to Morningstar, we may not always get complete portfolio information to report asset allocation. Morningstar, at its discretion, may determine if unidentified characteristics of fund holdings are material. Asset allocation and other breakdowns may be rescaled accordingly so that percentages total to 100 percent. (Morningstar used discretion to determine if unidentified characteristics of fund holdings are material, pie charts and other breakdowns may rescale identified characteristics to 100% for more intuitive presentation.)

Note that all other portfolio statistics presented in this report are based on the long (or long rescaled) holdings of the fund only.

Average Effective Duration

Duration is a time measure of a bond's interest-rate sensitivity. Average effective duration is a weighted average of the duration of the fixed-income securities within a portfolio.

Average Effective Maturity

Average Effective Maturity is a weighted average of the maturities of all bonds in a portfolio.

Average Weighted Coupon

A coupon is the fixed annual percentage paid out on a bond. The average weighted coupon is the asset-weighted coupon of each bond in the portfolio.

Average Weighted Price

Average Weighted Price is the asset-weighted price of bonds held in a portfolio, expressed as a percentage of par (face) value. This number reveals if

If applicable it must be preceded or accompanied by a prospecture, or equivalent, and disclosures at the end of this report.

the portfolio favors bonds selling at prices above or below par value (premium or discount securities respectively.)

Best Fit Index

Alpha, beta, and R-squared statistics are presented for a broad market index and a "best fit" index. The Best Fit Index identified in this report was determined by Morningstar by calculating R-squared for the fund against approximately 100 indexes tracked by Morningstar. The index representing the highest R-squared is identified as the best fit index. The best fit index may not be the fund's benchmark, nor does it necessarily contain the types of securities that may be held by the fund or portfolio.

Beta

Beta is a measure of a security or portfolio's sensitivity to market movements (proxied using an index.) A beta of greater than 1 indicates more volatility than the market, and a beta of less than 1 indicates less volatility than the market.

Credit Quality Breakdown

Credit Quality breakdowns are shown for corporate-bond holdings in the fund's portfolio and depict the quality of bonds in the underlying portfolio. It shows the percentage of fixed-income securities that fall within each credit-quality rating as assigned by a Nationally Recognized Statistical Rating Organization (NRSRO). Bonds not rated by an NRSRO are included in the Other/Not-Classified category.

Deferred Load %

The back-end sales charge or deferred load is imposed when an investor redeems shares of a fund. The percentage of the load charged generally declines the longer the fund's shares are held by the investor. This charge, coupled with 12b-1 fees, commonly serves as an alternative to a traditional front-end load.

Expense Ratio %

The expense ratio is the annual fee that all funds charge their shareholders. It expresses the percentage of assets deducted each fiscal year for fund expenses, including 12b-1 fees, management fees, administrative fees, operating costs, and all other asset-based costs incurred by the fund. Portfolio transaction fees, or brokerage costs, as well as front-end or deferred sales charges are not included in the expense ratio. The expense ratio, which is deducted from the fund's average net assets, is accrued on a daily basis. The gross expense ratio, in contrast to the net expense ratio, includes interest and dividends on borrowed securities but does not reflect any fee waivers in effect during the time period.

Front-end Load %

The initial sales charge or front-end load is a deduction made from each investment in the fund and is generally based on the amount of the investment.

Geometric Average Market Capitalization

Geometric Average Market Capitalization is a measure of the size of the companies in which a portfolio invests.

Growth of 10,000

For funds, this graph compares the growth of an investment of 10,000 (in the base currency of the fund) with that of an index and/or with that of the average for all funds in its Morningstar Category. The total returns are not adjusted to reflect sales charges or the effects of taxation but are adjusted to reflect actual ongoing fund expenses, and they assume reinvestment of dividends and capital gains. If adjusted, effects of sales charges and taxation would reduce the performance quoted. If pre-inception data is included in the analysis, it will be graphed.

The index in the Growth of 10,000 graph is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by Morningstar.

Management Fees %

The management fee includes the management and administrative fees listed in the Management Fees section of a fund's prospectus. Typically, these fees represent the costs shareholders paid for management and administrative services over the fund's prior fiscal year.

Maximum Redemption Fee %

The Maximum Redemption Fee is the maximum amount a fund may charge if redeemed in a specific time period after the fund's purchase (for example, 30, 180, or 365 days).

Mean

Mean is the annualized geometric return for the period shown.

Morningstar Analyst Rating™

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause the Manager Research Group's expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.

Morningstar Quantitative Rating™

Morningstar's quantitative fund ratings consist of: (i) Morningstar Quantitative Rating (overall score), (ii) Quantitative Parent pillar, (iii) Quantitative People pillar, (iv) Quantitative Performance pillar, (v) Quantitative Price pillar, and (v) Quantitative Process pillar (collectively the "Quantitative Fund Ratings").

The Quantitative Fund Ratings are calculated monthly and derived from the analyst-driven ratings of a fund's peers as determined by statistical algorithms. Morningstar, Inc. calculates Quantitative Fund Ratings for funds when an analyst rating does not exist as part of its qualitative coverage.

 Morningstar Quantitative Rating: Intended to be comparable to Morningstar's Analyst Ratings for open-end funds and ETFs, which is the summary expression of Morningstar's forward-looking analysis of a fund. The Morningstar Analyst Rating is based on the analyst's conviction in the fund's

ability to outperform its peer group and/or relevant benchmark on a riskadjusted basis over a full market cycle of at least 5 years. Ratings are assigned
on a five-tier scale with three positive ratings of Gold, Silver, and Bronze, a
Neutral rating, and a Negative rating. Morningstar calculates the Morningstar
Quantitative Rating using a statistical model derived from the Morningstar
Analyst Rating our fund analysts assign to open-end funds. Please go to
[https://corporate.morningstar.com/us/documents/MethodologyDocuments/An
alystRatingforFundsMethodology.pdf] for information about Morningstar
Analyst Rating Morningstar's fund analysts assign to funds.

- Quantitative Parent pillar: Intended to be comparable to
 Morningstar's Parent pillar scores, which provides Morningstar's analyst
 opinion on the stewardship quality of a firm. Morningstar calculates the
 Quantitative Parent pillar using an algorithm designed to predict the Parent
 Pillar score our fund analysts would assign to the fund. The quantitative rating
 is expressed as Positive, Neutral, or Negative.
- Quantitative People pillar: Intended to be comparable to Morningstar's People pillar scores, which provides Morningstar's analyst opinion on the fund manager's talent, tenure, and resources. Morningstar calculates the Quantitative People pillar using an algorithm designed to predict the People pillar score our fund analysts would assign to the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.
- Quantitative Performance pillar: Intended to be comparable to Morningstar's Performance pillar scores, which provides Morningstar's analyst opinion on the fund's performance pattern of risk-adjusted returns. Morningstar calculates the Quantitative Performance pillar using an algorithm designed to predict the Performance pillar score our fund analysts would assign to the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.
- Quantitative Price Pillar: Intended to be comparable to
 Morningstar's Price pillar scores, which provides Morningstar's analyst opinion
 on the fund's value proposition compared to similar funds sold through similar
 channels. Morningstar calculates the Quantitative Price pillar using an
 algorithm designed to predict the Price Pillar score our fund analysts would
 assign to the fund. The quantitative rating is expressed as Positive, Neutral, or
 Neoative.
- Quantitative Process Pillar: Intended to be comparable to
 Morningstar's Process pillar scores, which provides Morningstar's analyst
 opinion on the fund's strategy and whether the management has a competitive
 advantage enabling it to execute the process and consistently over time.
 Morningstar calculates the Quantitative Process pillar using an algorithm
 designed to predict the Process pillar score our fund analysts would assign to
 the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.

Morningstar Quantitative Ratings <u>have not been made available</u> to the issuer of the security prior to publication.

Risk Warning

The quantitative fund ratings are not statements of fact. Morningstar does not guarantee the completeness or accuracy of the assumptions or models used in determining the quantitative fund ratings. In addition, there is the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, and tax rate. For investments in foreign markets there are further risks, generally based on exchange rate changes or changes in political and social conditions. A change in the fundamental factors underlying the quantitative fund ratings can mean that the recommendation is subsequently no longer accurate.

For more information about Morningstar's quantitative methodology, please visit com/Research Library.

Morningstar Category

Morningstar Category is assigned by placing funds into peer groups based on their underlying holdings. The underlying securities in each portfolio are the primary factor in our analysis as the investment objective and investment strategy stated in a fund's prospectus may not be sufficiently detailed for our proprietary classification methodology. Funds are placed in a category based on their portfolio statistics and compositions over the past three years. Analysis of performance and other indicative facts are also considered. If the fund is new and has no portfolio history, Morningstar estimates where it will fall before giving it a permanent category assignment. Categories may be changed based on recent changes to the portfolio.

Morningstar Rank

Morningstar Rank is the total return percentile rank within each Morningstar Category. The highest (or most favorable) percentile rank is zero and the lowest (or least favorable) percentile rank is 100. Historical percentile ranks are based on a snapshot of a fund at the time of calculation.

Morningstar Rating™

The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. For more information about the Morningstar Rating for funds, including its methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Return rates a fund's performance relative to other managed products in its Morningstar Category. It is an assessment of a product's excess return over a risk-free rate (the return of the 90-day Treasury Bill) in comparison with the products in its Morningstar category. In each Morningstar category, the top 10% of products earn a High Morningstar Return (High), the next 22.5% Above Average (+Avg), the middle 35% Average (Avg), the next 22.5% Below Average (-Ave), and the bottom 10% Low (Low). Morningstar Return is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

Morningstar Risk

Morningstar Risk evaluates a fund's downside volatility relative to that of other products in its Morningstar Category. It is an assessment of the variations in monthly returns, with an emphasis on downside variations, in comparison with the products in its Morningstar category. In each Morningstar category, the 10% of products with the lowest measured risk are described as Low Risk (Low), the next 22.5% Below Average (-Avg), the middle 35% Average (Avg), the next 22.5% Above Average (+Avg), and the top 10% High (High). Morningstar Risk is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

Morningstar Style Box™

The Morningstar Style Box $^{\rm IM}$ reveals a fund's investment strategy as of the date noted on this report.

For equity funds, the vertical axis shows the market capitalization of the long stocks owned, and the horizontal axis shows the investment style (value, blend, or growth.) A darkened square in the style box indicates the weighted average style of the portfolio.

For fixed-income funds, the vertical axis shows the credit quality of the long bonds owned and the horizontal axis shows interest-rate sensitivity as measured by a bond's effective duration. Morningstar seeks credit rating information from fund companies on a periodic basis (for example, quarterly). In compiling credit rating information, Morningstar accepts credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations. For a list of all NRSROs, please visit http://www.sec.gov/divisions/marketreg/ ratingagency.htm. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/ agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating; and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings.

Please Note: Morningstar, Inc. is not an NRSRO nor does it issue a credit rating on the fund. NRSRO or rating agency ratings can change from time to time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of "low," "medium," or "high" based on their average credit quality. Funds with a "low" credit quality are those whose weighted-average credit quality is determined to be less than "BBB-"; "medium" are those less than "AA-", but greater or equal to "BBB-"; and "high" are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration. Generally, Morningstar classifies a fixed-income fund's interest-rate sensitivity based on the effective duration of the Morningstar Core Bond Index, which is currently three years. The classification of Limited will be assigned to those funds whose average effective duration is between 25% to 75% of MCBI's average effective duration; funds whose average effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive.

For municipal-bond funds, Morningstar also obtains from fund companies the average effective duration. In these cases, static breakpoints are used. These breakpoints are as follows: (i) Limited: 4.5 years or less; (ii) Moderate: more than 4.5 years but less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-U.S. taxable and non-U.S. domiciled fixed-income funds, static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: more than 3.5 years but less than or equal to 6 years; (iii) Extensive: more than 6 years.

Interest-rate sensitivity for non-U.S. domiciled funds (excluding funds in convertible categories) may be measured with modified duration when effective duration is not available.

P/B Ratio TTM

The Price/Book Ratio (or P/B Ratio) for a fund is the weighted average of the P/B Ratio of the stocks in its portfolio. Book value is the total assets of a company, less total liabilities. The P/B ratio of a company is calculated by dividing the market price of its outstanding stock by the company's book value, and then adjusting for the number of shares outstanding. Stocks with negative book values are excluded from this calculation. It shows approximately how much an investor is paying for a company's assets based on historical valuations.

P/C Ratio TTM

The Price/Cash Flow Ratio (or P/C Ratio) for a fund is the weighted average of the P/C Ratio of the stocks in its portfolio. The P/C Ratio of a stock represents the amount an investor is willing to pay for a dollar generated from a company's operations. It shows the ability of a company to generate cash and acts as a gauge of liquidity and solvency.

P/E Ratio TTM

The Price/Earnings Ratio (or P/E Ratio) for a fund is the weighted average of the P/E Ratios of the stocks in its portfolio. The P/E Ratio of a stock is the stock's current price divided by the company's trailing 12-month earnings per share. A high P/E Ratio usually indicates the market will pay more to obtain the company's earnings because it believes in the company's abilities to increase their earnings. A low P/E Ratio indicates the market has less confidence that the company's earnings will increase, however value investors may believe such stocks have an overlooked or undervalued potential for appreciation.

Percentile Rank in Category

Percentile Rank is a standardized way of ranking items within a peer group, in this case, funds within the same Morningstar Category. The observation with the largest numerical value is ranked zero the observation with the smallest numerical value is ranked 100. The remaining observations are placed equal distance from one another on the rating scale. Note that lower percentile ranks are generally more favorable for returns (high returns), while higher percentile ranks are generally more favorable for risk measures (low risk).

Performance Quartile

Performance Quartile reflects a fund's Morningstar Rank.

Potential Capital Gains Exposure

Potential Capital Gains Exposure is an estimate of the percent of a fund's assets that represent gains. It measures how much the fund's assets have appreciated, and it can be an indicator of possible future capital gains distributions. A positive potential capital gains exposure value means that the fund's holdings have generally increased in value while a negative value means that the fund has reported losses on its book.

Quarterly Returns

Quarterly Return is calculated applying the same methodology as Total Return except it represents return through each quarter-end.

R-Squared

R-squared is the percentage of a security or portfolio's return movements that are explained by movements in its benchmark index, showing the degree of correlation between the security or portfolio and the benchmark. This figure is helpful in assessing how likely it is that beta and alpha are statistically significant. A value of 1 indicates perfect correlation between the security or portfolio and its benchmark. The lower the R-squared value, the lower the

©2018 Morningstar: All Rights Reserved. Unless otherwise provided in a separate agreement, you may use this report only in the country in which its original distributor is based. The information, data, analyses and opinions contained herein [1] include the confidential and proprietary information of Morningstar, [2] may include, or be derived from, account information provided by you or infancial advisor which cannot be verified by Morningstar. [3] may not be cooperad or redistributed, [4] do not constitute investment advisor offered by Morningstar. [3] may not be consisted as one of the original distributor is based. The informational purposes and therefore are not an offer to bey or sell a security, and [6] are not warranted to be correct, complete or accurate Except as otherwise required by law. Morningstar shall have been been supposed to a complete or accurate Except as otherwise required by law. Morningstar shall not be responsible for any trading decisions, damaged existent suspenses or other losses resulting from, or related to, this information, data, analyses or opinions uppressed are as if the date written and are subject to change without notice. Investment research is produced and is sused by substitutions of Morningstar, incircular, but not limited to. Morningstar Research Services LLC, registered with and governed by the U.S. Security and Except and Except the properties of the original states and Exchange Commission. This report is supplemental sales literature. If applicable it must be preceded or Security and the suppose of the research security and the supplemental sales literature.

correlation.

Regional Exposure

The regional exposure is a display of the portfolio's assets invested in the regions shown on the report.

Sector Weightings

Super Sectors represent Morningstar's broadest classification of equity sectors by assigning the 11 equity sectors into three classifications. The Cyclical Super Sector includes industries significantly impacted by economic shifts, and the stocks included in these sectors generally have betas greater than 1. The Defensive Super Sector generally includes industries that are relatively immune to economic cycles, and the stocks in these industries generally have betas less than 1. The Sensitive Super Sector includes industries that ebb and flow with the overall economy, but not severely so. Stocks in the Sensitive Super Sector generally have betas that are close to 1.

Share Change

Shares Change represents the number of shares of a stock bought or sold by a fund since the previously reported portfolio of the fund.

Sharpe Ratio

Sharpe Ratio uses standard deviation and excess return (a measure of a security or portfolio's return in excess of the U.S. Treasury three-month Treasury Bill) to determine the reward per unit of risk.

Standard Deviation

Standard deviation is a statistical measure of the volatility of the security or portfolio's returns. The larger the standard deviation, the greater the volatility of return.

Standardized Returns

Standardized Return applies the methodology described in the Standardized Returns page of this report. Standardized Return is calculated through the most recent calendar-quarter end for one-year, five-year, 10-year, and/or since-inception periods, and it demonstrates the impact of sales charges (if applicable) and ongoing fund expenses. Standardized Return reflects the return an investor may have experience if the security was purchased at the beginning of the period and sold at the end, incurring transaction charges.

Total Return

Total Return, or "Non Load-Adjusted Return", reflects performance without adjusting for sales charges (if applicable) or the effects of taxation, but it is adjusted to reflect all actual ongoing security expenses and assumes reinvestment of dividends and capital gains. It is the return an investor would have experienced if the fund was held throughout the period. If adjusted for sales charges and the effects of taxation, the performance quoted would be significantly reduced.

Total Return +/- indicates how a fund has performed relative to its peers (as measure by its Standard Index and/or Morningstar Category Index) over the time periods shown.

Trailing Returns

Standardized Return applies the methodology described in the Standardized Returns page of this report. Standardized Return is calculated through the most recent calendar-quarter end for one-year, five-year, 10-year, and/or since-inception periods, and it demonstrates the impact of sales charges (if applicable) and ongoing fund expenses. Standardized Return reflects the return an investor may have experienced if the fund was purchased at the beginning of the period and sold at the end, incurring transaction charges.

Load-Adjusted Monthly Return is calculated applying the same methodology as Standardized Return, except that it represents return through month-end. As with Standardized Return, it reflects the impact of sales charges and ongoing fund expenses, but not taxation. If adjusted for the effects of taxation, the performance quoted would be significantly different.

Trailing Return +/- indicates how a fund has performed relative to its peers (as measure by its Standard Index and/or Morningstar Category Index) over the time periods shown.

ETF Detail Report Disclosure Statement

The Exchange-Traded Fund (ETF) Detail Report is supplemental sales literature, and therefore must be preceded or accompanied by the mutual fund's current prospectus or an equivalent statement. Please read this information carefully. In all cases, this disclosure statement should accompany the ETF Detail Report. Morningstar is not itself a FINRA-member firm. All data presented is based on the most recent information available to Morningstar as of the release date and may or may not be an accurate reflection of current data for securities included in the fund's portfolio. There is no assurance that the data will remain the same.

Unless otherwise specified, the definition of "funds" used throughout this Disclosure Statement includes closed-end funds, exchange-traded funds, grantor trusts, index mutual funds, open-ended mutual funds, and unit investment trusts. It does not include exchange-traded notes or exchange-traded commodities.

Prior to 2016, Morningstar's methodology evaluated open-end mutual funds and exchange-traded funds as separate groups. Each group contained a subset of the current investments included in our current comparative analysis. In this report, historical data presented on a calendar-year basis and trailing periods ending at the most-recent month-end reflect the updated methodology.

Risk measures (such as alpha, beta, r-squared, standard deviation, mean, or Sharpe ratio) are calculated for securities or portfolios that have at least a three-year history.

Most Morningstar rankings do not include any adjustment for one-time sales charges, or loads. Morningstar does publish load-adjusted returns, and ranks such returns within a Morningstar Category in certain reports. The total returns for ETFs and fund share classes without one-time loads are equal to Morningstar's calculation of load-adjusted returns. Share classes that are subject to one-time loads relating to advice or sales commissions have their returns adjusted as part of the load-adjusted return calculation to reflect those loads.

Comparison of Fund Types

Funds, including closed-end funds, exchange-traded funds (ETFs), money market funds, open-end funds, and unit investment trusts (UITs), have many similarities, but also many important differences. In general, publically-offered funds are investment companies registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended. Funds pool money from their investors and manage it according to an investment strategy or objective, which can vary greatly from fund to fund. Funds have the ability to offer diversification and professional management, but also involve risk, including the loss of principal.

A closed-end fund is an investment company, which typically makes one public

offering of a fixed number of shares. Thereafter, shares are traded on a secondary market. As a result, the secondary market price may be higher or lower than the closed-end fund's net asset value (NAV). If these shares trade at a price above their NAV, they are said to be trading at a premium. Conversely, if they are trading at a price below their NAV, they are said to be trading at a discount. A closed-end mutual fund's expense ratio is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. Closed-end funds may also have 12b-1 fees. Income distributions and capital gains of the closed-end fund are subject to income tax, if held in a taxable account.

An ETF is an investment company that typically has an investment objective of striving to achieve a similar return as a particular market index. The ETF will invest in either all or a representative sample of the securities included in the index it is seeking to imitate. Like closed-end funds, an ETF can be traded on a secondary market and thus have a market price that may be higher or lower than its net asset value. If these shares trade at a price above their NAV, they are said to be trading at a premium. Conversely, if they are trading at a price below their NAV, they are said to be trading at a discount. ETFs are not actively managed, so their value may be affected by a general decline in the U.S. market segments relating to their underlying indexes. Similarly, an imperfect match between an ETF's holdings and those of its underlying index may cause its performance to vary from that of its underlying index. The expense ratio of an ETF is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. ETFs do not have 12b-1 fees or sales loads. Capital gains from funds held in a taxable account are subject to income tax. In many, but not all cases, ETFs are generally considered to be more tax-efficient when compared to similarly invested mutual funds.

Holding company depository receipts (HOLDRs) are similar to ETFs, but they focus on narrow industry groups. HOLDRs initially own 20 stocks, which are unmanaged, and can become more concentrated due to mergers, or the disparate performance of their holdings. HOLDRs can only be bought in 100-share increments. Investors may exchange shares of a HOLDR for its underlying stocks at any time.

A money-market fund is an investment company that invests in commercial paper, banker's acceptances, repurchase agreements, government securities, certificates of deposit and other highly liquid securities, and pays money market rates of interest. Money markets are not FDIC-insured, may lose money, and are not guaranteed by a bank or other financial institution.

An open-end fund is an investment company that issues shares on a continuous basis. Shares can be purchased from the open-end mutual fund itself, or through an intermediary, but cannot be traded on a secondary market, such as the New York Stock Exchange. Investors pay the open-end mutual fund's current net asset value plus any initial sales loads. Net asset value is calculated daily, at the close of business. Open-end mutual fund shares can be redeemed, or sold back to the fund or intermediary, at their current net asset value minus any deferred sales loads or redemption fees. The expense ratio for an open-end mutual fund is an annual fee charged to a shareholder. It includes operating expenses and management fees, but does not take into account any brokerage costs. Open-end funds may also have 12b-1 fees. Income distributions and capital gains of the open-end fund are subject to income tax, if held in a taxable account.

A unit investment trust (UIT) is an investment company organized under a trust agreement between a sponsor and trustee. UITs typically purchase a fixed portfolio of securities and then sell units in the trust to investors. The major difference between a UIT and a mutual fund is that a mutual fund is actively managed, while a UIT is not. On a periodic basis, UITs usually distribute to the

unit holder their pro rata share of the trust's net investment income and net realized capital gains, if any. If the trust is one that invests only in tax-free securities, then the income from the trust is also tax-free. UITs generally make one public offering of a fixed number of units. However, in some cases, the sponsor will maintain a secondary market that allows existing unit holders to sell their units and for new investors to buy units. A one-time initial sales charge is deducted from an investment made into the trust. UIT investors may also pay creation and development fees, organization costs, and/or trustee and operation expenses. UIT units may be redeemed by the sponsor at their net asset value minus a deferred sales charge, and sold to other investors. UITs have set termination dates, at which point the underlying securities are sold and the sales proceeds are paid to the investor. Typically, a UIT investment is rolled over into successive trusts as part of a long-term strategy. A rollover fee may be charged for the exercise of rollover purchases. There are tax consequences associated with rolling over an investment from one trust to the next.

Performance

The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares, when sold, may be worth more or less than the original investment. Fund portfolio statistics change over time. Funds are not FDIC-insured, may lose value, and are not guaranteed by a bank or other financial institution.

The market price noted on the ETF Detail Report is the price of the fund as of the close of trading on the last business day at month-end. This date is listed at the top of the ETF Detail Report.

Morningstar calculates after-tax returns using the highest applicable federal marginal income tax rate plus the investment income tax and Medicare surcharge. As of 2018, this rate is 37% plus 3.8% investment income plus 0.9% Medicare surcharge, or 41.7%. This rate changes periodically in accordance with changes in federal law.

12 Month Yield

12 Month Yield is derived by summing the trailing 12-months' income distributions and dividing the sum by the last month's ending NAV, plus any capital gains distributed over the same period. Income refers only to interest payments from fixed-income securities and dividend payoffs from common stocks.

12b1 Expense %

A 12b-1 fee is a fee used to pay for a mutual fund's distribution costs. It is often used as a commission to brokers for selling the fund. The amount of the fee is taken from a fund's returns.

30-Day SEC Yield

The 30-day SEC Yield is a calculation based on a 30-day period ending on the last day of the previous month. It is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The figure listed lags by one month. When a dash appears, the yield available is more than 30 days old. This information is taken from fund surveys.

Alpha

Alpha is a measure of the difference between a security or portfolio's actual returns and its expected performance, given its level of risk (as measured by beta.) Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.

Asset Allocation

©2018 Momingstar. All Rights Reserved. Unless otherwise provided in a separate agreement, you may use this report only in the country in which its original distributor is based. The information, data, analyses and opinions contained herein [1] include the confidential and proprietary information of Momingstar, (2) may include, or be derived from, account information provided by your financial advisors which cannot be verified by Momingstar, (3) are provided solely for informational purposes and therefore are not an offer to by by or sell as security, and (6) are not warranted to be correct, complete or accurate. Momingstar inspection, or equinalent, and disclosures at the disclosures at the order of this report is supplemental sales literature. If applicable it must be preceded or accompanied by a prospectual, or equinalent, and disclosure attended indictiouses at the off this report.

Asset Allocation reflects asset class weightings of the portfolio. The "Other" category includes security types that are not neatly classified in the other asset classes, such as convertible bonds and preferred stocks, or cannot be classified by Morningstar as a result of missing data. Morningstar may display asset allocation data in several ways, including tables or pie charts. In addition, Morningstar may compare the asset class breakdown of the fund against its three-year average, category average, and/or index proxy.

Asset allocations shown in tables may include a breakdown among the long, short, and net (long positions net of short) positions. These statistics summarize what the fund's managers are buying and how they are positioning the fund's portfolio. When short positions are captured in these portfolio statistics, investors get a more robust description of the fund's exposure and risk. Long positions involve buying the security outright and selling it later, with the hope the security's price rises over time. Short positions are taken with the hope of benefitting from anticipated price declines. The investor borrows the security from another investor, sells it and receives cash, and then is obligated to buy it back at some point in the future. If the price falls after the short sale, the investor will have sold high and can buy low to close the short position and lock in a profit. However, if the price of the security increases after the short sale, the investor will experience a loss buying it at a higher price than the sale price.

Most fund portfolios hold fairly conventional securities, such as long positions in equities and bonds. Morningstar may generate a colored pie chart for these portfolios. Other portfolios use other investment strategies or securities, such as short positions or derivatives, in an attempt to reduce transaction costs, enhance returns, or reduce risk. Some of these securities and strategies behave like conventional securities, while other have unique return and risk characteristics. Portfolios that incorporate investment strategies resulting in short positions or portfolio with relatively exotic derivative positions often report data to Morningstar that does not meet the parameters of the calculation underlying a pie chart's generation. Because of the nature of how these securities are reported to Morningstar, we may not always get complete portfolio information to report asset allocation. Morningstar, at its discretion, may determine if unidentified characteristics of fund holdings are material. Asset allocation and other breakdowns may be rescaled accordingly so that percentages total to 100 percent. (Morningstar used discretion to determine if unidentified characteristics of fund holdings are material, pie charts and other breakdowns may rescale identified characteristics to 100% for more intuitive presentation.)

Note that all other portfolio statistics presented in this report are based on the long (or long rescaled) holdings of the fund only.

Average Effective Duration

Duration is a time measure of a bond's interest-rate sensitivity. Average effective duration is a weighted average of the duration of the fixed-income securities within a portfolio.

Average Effective Maturity

Average Effective Maturity is a weighted average of the maturities of all bonds in a portfolio.

Average Weighted Coupon

A coupon is the fixed annual percentage paid out on a bond. The average weighted coupon is the asset-weighted coupon of each bond in the portfolio.

Average Weighted Price

Average Weighted Price is the asset-weighted price of bonds held in a portfolio, expressed as a percentage of par (face) value. This number reveals if the portfolio favors bonds selling at prices above or below par value (premium

or discount securities respectively.)

Best Fit Index

Alpha, beta, and R-squared statistics are presented for a broad market index and a "best fit" index. The Best Fit Index identified in this report was determined by Morningstar by calculating R-squared for the fund against approximately 100 indexes tracked by Morningstar. The index representing the highest R-squared is identified as the best fit index. The best fit index may not be the fund's benchmark, nor does it necessarily contain the types of securities that may be held by the fund or portfolio.

Beta

Beta is a measure of a security or portfolio's sensitivity to market movements (proxied using an index.) A beta of greater than 1 indicates more volatility than the market, and a beta of less than 1 indicates less volatility than the market.

Credit Quality Breakdown

Credit Quality breakdowns are shown for corporate-bond holdings in the fund's portfolio and depict the quality of bonds in the underlying portfolio. It shows the percentage of fixed-income securities that fall within each credit-quality rating as assigned by a Nationally Recognized Statistical Rating Organization (NRSRO). Bonds not rated by an NRSRO are included in the Other/Not-Classified category.

Expense Ratio %

The expense ratio is the annual fee that all funds charge their shareholders. It expresses the percentage of assets deducted each fiscal year for fund expenses, including 12b-1 fees, management fees, administrative fees, operating costs, and all other asset-based costs incurred by the fund. Portfolio transaction fees, or brokerage costs, as well as front-end or deferred sales charges are not included in the expense ratio. The expense ratio, which is deducted from the fund's average net assets, is accrued on a daily basis. The gross expense ratio, in contrast to the net expense ratio, includes interest and dividends on borrowed securities but does not reflect any fee waivers in effect during the time period.

Geometric Average Market Capitalization

Geometric Average Market Capitalization is a measure of the size of the companies in which a portfolio invests.

Growth of 10,000

For funds, this graph compares the growth of an investment of 10,000 (in the base currency of the fund) with that of an index and/or with that of the average for all funds in its Morningstar Category. The total returns are not adjusted to reflect sales charges or the effects of taxation but are adjusted to reflect actual ongoing fund expenses, and they assume reinvestment of dividends and capital gains. If adjusted, effects of sales charges and taxation would reduce the performance quoted. If pre-inception data is included in the analysis, it will be graphed.

The index in the Growth of 10,000 graph is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by Morningstar.

Management Fees %

The management fee includes the management and administrative fees listed in the Management Fees section of a fund's prospectus. Typically, these fees represent the costs shareholders paid for management and administrative services over the fund's prior fiscal year.

Maximum Redemption Fee %

The Maximum Redemption Fee is the maximum amount a fund may charge if redeemed in a specific time period after the fund's purchase (for example, 30, 180, or 365 days).

Mean

Mean is the annualized geometric return for the period shown.

Morningstar Analyst Rating™

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause the Manager Research Group's expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.

Morningstar Quantitative Rating™

Morningstar's quantitative fund ratings consist of: (i) Morningstar Quantitative Rating (overall score), (ii) Quantitative Parent pillar, (iii) Quantitative People pillar, (iv) Quantitative Performance pillar, (v) Quantitative Price pillar, and (v) Quantitative Process pillar (collectively the "Quantitative Fund Ratings").

The Quantitative Fund Ratings are calculated monthly and derived from the analyst-driven ratings of a fund's peers as determined by statistical algorithms. Morningstar, Inc. calculates Quantitative Fund Ratings for funds when an analyst rating does not exist as part of its qualitative coverage.

- Morningstar Quantitative Rating: Intended to be comparable to Morningstar's Analyst Ratings for open-end funds and ETFs, which is the summary expression of Morningstar's forward-looking analysis of a fund. The Morningstar Analyst Rating is based on the analyst's conviction in the fund's ability to outperform its peer group and/or relevant benchmark on a risk-adjusted basis over a full market cycle of at least 5 years. Ratings are assigned on a five-tier scale with three positive ratings of Gold, Silver, and Bronze, a Neutral rating, and a Negative rating. Morningstar calculates the Morningstar Quantitative Rating using a statistical model derived from the Morningstar Analyst Rating our fund analysts assign to open-end funds. Please go to https://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf for information about Morningstar Analyst Rating Morningstar's fund analysts assign to funds.
- Quantitative Parent pillar: Intended to be comparable to Morningstar's Parent pillar scores, which provides Morningstar's analyst

opinion on the stewardship quality of a firm. Morningstar calculates the Quantitative Parent pillar using an algorithm designed to predict the Parent Pillar score our fund analysts would assign to the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.

- Quantitative People pillar: Intended to be comparable to Morningstar's People pillar scores, which provides Morningstar's analyst opinion on the fund manager's talent, tenure, and resources. Morningstar calculates the Quantitative People pillar using an algorithm designed to predict the People pillar score our fund analysts would assign to the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.
- Quantitative Performance pillar: Intended to be comparable to
 Morningstar's Performance pillar scores, which provides Morningstar's analyst
 opinion on the fund's performance pattern of risk-adjusted returns. Morningstar
 calculates the Quantitative Performance pillar using an algorithm designed to
 predict the Performance pillar score our fund analysts would assign to the fund.
 The quantitative rating is expressed as Positive, Neutral, or Negative.
- Quantitative Price Pillar: Intended to be comparable to
 Morningstar's Price pillar scores, which provides Morningstar's analyst opinion
 on the fund's value proposition compared to similar funds sold through similar
 channels. Morningstar calculates the Quantitative Price pillar using an
 algorithm designed to predict the Price Pillar score our fund analysts would
 assign to the fund. The quantitative rating is expressed as Positive, Neutral, or
 Negative.
- Quantitative Process Pillar: Intended to be comparable to Morningstar's Process pillar scores, which provides Morningstar's analyst opinion on the fund's strategy and whether the management has a competitive advantage enabling it to execute the process and consistently over time. Morningstar calculates the Quantitative Process pillar using an algorithm designed to predict the Process pillar score our fund analysts would assign to the fund. The quantitative rating is expressed as Positive, Neutral, or Negative.

Morningstar Quantitative Ratings have not been made available to the issuer of the security prior to publication.

Risk Warning

The quantitative fund ratings are not statements of fact. Morningstar does not guarantee the completeness or accuracy of the assumptions or models used in determining the quantitative fund ratings. In addition, there is the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, and tax rate. For investments in foreign markets there are further risks, generally based on exchange rate changes or changes in political and social conditions. A change in the fundamental factors underlying the quantitative fund ratings can mean that the recommendation is subsequently no longer accurate.

For more information about Morningstar's quantitative methodology, please visit corporate1.morningstar.com/Research Library.

Morningstar Category

Morningstar Category is assigned by placing funds into peer groups based on their underlying holdings. The underlying securities in each portfolio are the primary factor in our analysis as the investment objective and investment strategy stated in a fund's prospectus may not be sufficiently detailed for our proprietary classification methodology. Funds are placed in a category based on their portfolio statistics and compositions over the past three years. Analysis of performance and other indicative facts are also considered. If the fund is new

Opinions expressed are as of the date written and are subject to change without notice. Investment research is produced and issued by subsidiaries of Morningstar, Inc including, but not limited to, Morningstar Research Services LLC, registered with and governed by the U.S. Securities and then-page Commission. This report is supplemental sales literature. If applicable it must be preceded or accompanied by a prospectus, or equivalent, and disclosure statement. Please see important disclosures at the end of this report.

WUBS

and has no portfolio history, Morningstar estimates where it will fall before giving it a permanent category assignment. Categories may be changed based on recent changes to the portfolio.

Morningstar Rank

Morningstar Rank is the total return percentile rank within each Morningstar Category. The highest (or most favorable) percentile rank is zero and the lowest (or least favorable) percentile rank is 100. Historical percentile ranks are based on a snapshot of a fund at the time of calculation.

Morningstar Rating™

The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. For more information about the Morningstar Rating for funds, including its methodology, please go to global.morningstar.com/managerdisclosures/.

Morningstar Return

The Morningstar Return rates a fund's performance relative to other managed products in its Morningstar Category. It is an assessment of a product's excess return over a risk-free rate (the return of the 90-day Treasury Bill) in comparison with the products in its Morningstar category. In each Morningstar category, the top 10% of products earn a High Morningstar Return (High), the next 22.5% Above Average (+Avg), the middle 35% Average (Avg), the next 22.5% Below Average (-Ave), and the bottom 10% Low (Low). Morningstar Return is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

Morningstar Risk

Morningstar Risk evaluates a fund's downside volatility relative to that of other products in its Morningstar Category. It is an assessment of the variations in monthly returns, with an emphasis on downside variations, in comparison with the products in its Morningstar category. In each Morningstar category, the 10% of products with the lowest measured risk are described as Low Risk (Low), the next 22.5% Below Average (-Avg), the middle 35% Average (Avg), the next 22.5% Above Average (+Avg), and the top 10% High (High). Morningstar Risk is measured for up to three time periods (three, five, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the product. Products with less than three years of performance history are not rated.

Morningstar Style Box™

The Morningstar Style Box™ reveals a fund's investment strategy as of the date noted on this report.

For equity funds, the vertical axis shows the market capitalization of the long stocks owned, and the horizontal axis shows the investment style (value, blend, or growth.) A darkened square in the style box indicates the weighted average style of the portfolio.

For fixed-income funds, the vertical axis shows the credit quality of the long bonds owned and the horizontal axis shows interest-rate sensitivity as measured by a bond's effective duration. Morningstar seeks credit rating information from fund companies on a periodic basis (for example, quarterly). In compiling credit rating information, Morningstar accepts credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations. For a list of all NRSROs, please visit http://www.sec.gov/divisions/marketreg/ ratingagency.htm. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/ agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating; and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings.

Please Note: Morningstar, Inc. is not an NRSRO nor does it issue a credit rating on the fund. NRSRO or rating agency ratings can change from time to time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of "low," "medium," or "high" based on their average credit quality. Funds with a "low" credit quality are those whose weighted-average credit quality is determined to be less than "BBB-"; "medium" are those less than "AA-", but greater or equal to "BBB-"; and "high" are those with a weighted-average credit quality of "AA-" or higher. When classifying a bond portfolio, Morningstar first maps the NRSRO credit ratings of the underlying holdings to their respective default rates (as determined by Morningstar's analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration. Generally, Morningstar classifies a fixed-income fund's interest-rate sensitivity based on the effective duration of the Morningstar Core Bond Index, which is currently three years. The classification of Limited will be assigned to those funds whose average effective duration is between 25% to 75% of MCBI's average effective duration; funds whose average effective duration is between 75% to 125% of the MCBI will be classified as Moderate; and those that are at 125% or greater of the average effective duration of the MCBI will be classified as Extensive.

For municipal-bond funds, Morningstar also obtains from fund companies the average effective duration. In these cases, static breakpoints are used. These breakpoints are as follows: (i) Limited: 4.5 years or less; (ii) Moderate: more than 4.5 years but less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-U.S. taxable and non-U.S. domiciled fixed-income funds, static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: more than 3.5 years but less than or equal to 6 years; (iii) Extensive: more than 6 years.

Interest-rate sensitivity for non-U.S. domiciled funds (excluding funds in convertible categories) may be measured with modified duration when effective duration is not available.

P/B Ratio TTM

The Price/Book Ratio (or P/B Ratio) for a fund is the weighted average of the P/B Ratio of the stocks in its portfolio. Book value is the total assets of a company, less total liabilities. The P/B ratio of a company is calculated by

©2018 Morningstar. All Rights Reserved. Unless otherwise provided in a separate agreement, you may use this report only in the country in which its original distributor is based. The information, data, analyses and opinions contained herein [1] include the confidential and proprietary information of Morningstar, [2] may include, or be derived from, account information provided by your financial advisor which cannot be verified by Morningstar, [3] may not be copied or redistributed, [4] do not constitute investment advice offered by Morningstar, [5] are provided solely for informational purposes and therefore are not an offer to buy or self a security, and [6] are not warranted to be correct, complete or accurate. Except as otherwise required by law, Morningstar shall not be responsible for any trading decisions, damages or other losses resulting from, or related to, this information, data, analyses or opinions or their use. Opinions expressed are as of the date written and are subject to change without notice. Investment research is produced and issued by subsidiaries of Morningstar, Inc including, but not limited to, Morningstar Research Services LIC, registered with and governed by the U.S. Securities and repairing Commission. This report is supplemental sales literature. If applicable it must be preceded or accompanied by a prospectus, or equivalent, and disclosure statement. Please see important disclosures at the end of this report.

dividing the market price of its outstanding stock by the company's book value, and then adjusting for the number of shares outstanding. Stocks with negative book values are excluded from this calculation. It shows approximately how much an investor is paying for a company's assets based on historical valuations.

P/C Ratio TTM

The Price/Cash Flow Ratio (or P/C Ratio) for a fund is the weighted average of the P/C Ratio of the stocks in its portfolio. The P/C Ratio of a stock represents the amount an investor is willing to pay for a dollar generated from a company's operations. It shows the ability of a company to generate cash and acts as a gauge of liquidity and solvency.

P/E Ratio TTM

The Price/Earnings Ratio (or P/E Ratio) for a fund is the weighted average of the P/E Ratios of the stocks in its portfolio. The P/E Ratio of a stock is the stock's current price divided by the company's trailing 12-month earnings per share. A high P/E Ratio usually indicates the market will pay more to obtain the company's earnings because it believes in the company's abilities to increase their earnings. A low P/E Ratio indicates the market has less confidence that the company's earnings will increase, however value investors may believe such stocks have an overlooked or undervalued potential for appreciation.

Percentile Rank in Category

Percentile Rank is a standardized way of ranking items within a peer group, in this case, funds within the same Morningstar Category. The observation with the largest numerical value is ranked zero the observation with the smallest numerical value is ranked 100. The remaining observations are placed equal distance from one another on the rating scale. Note that lower percentile ranks are generally more favorable for returns (high returns), while higher percentile ranks are generally more favorable for risk measures (low risk).

Performance Quartile

Performance Quartile reflects a fund's Morningstar Rank.

Potential Capital Gains Exposure

Potential Capital Gains Exposure is an estimate of the percent of a fund's assets that represent gains. It measures how much the fund's assets have appreciated, and it can be an indicator of possible future capital gains distributions. A positive potential capital gains exposure value means that the fund's holdings have generally increased in value while a negative value means that the fund has reported losses on its book.

Quarterly Returns

Quarterly Return is calculated applying the same methodology as Total Return except it represents return through each quarter-end.

R-Squared

R-squared is the percentage of a security or portfolio's return movements that are explained by movements in its benchmark index, showing the degree of correlation between the security or portfolio and the benchmark. This figure is helpful in assessing how likely it is that beta and alpha are statistically significant. A value of 1 indicates perfect correlation between the security or portfolio and its benchmark. The lower the R-squared value, the lower the correlation.

Regional Exposure

The regional exposure is a display of the portfolio's assets invested in the regions shown on the report.

Sector Weightings

Super Sectors represent Morningstar's broadest classification of equity sectors

by assigning the 11 equity sectors into three classifications. The Cyclical Super Sector includes industries significantly impacted by economic shifts, and the stocks included in these sectors generally have betas greater than 1. The Defensive Super Sector generally includes industries that are relatively immune to economic cycles, and the stocks in these industries generally have betas less than 1. The Sensitive Super Sector includes industries that ebb and flow with the overall economy, but not severely so. Stocks in the Sensitive Super Sector generally have betas that are close to 1.

Page 31 of 34

Share Change

Shares Change represents the number of shares of a stock bought or sold by a fund since the previously reported portfolio of the fund.

Sharpe Ratio

Sharpe Ratio uses standard deviation and excess return (a measure of a security or portfolio's return in excess of the U.S. Treasury three-month Treasury Bill) to determine the reward per unit of risk.

Standard Deviation

Standard deviation is a statistical measure of the volatility of the security or portfolio's returns. The larger the standard deviation, the greater the volatility of return.

Standardized Returns

Standardized Return applies the methodology described in the Standardized Returns page of this report. Standardized Return is calculated through the most recent calendar-quarter end for one-year, five-year, 10-year, and/or since-inception periods, and it demonstrates the impact of sales charges (if applicable) and ongoing fund expenses. Standardized Return reflects the return an investor may have experience if the security was purchased at the beginning of the period and sold at the end, incurring transaction charges.

Total Return

Total Return, or "Non Load-Adjusted Return", reflects performance without adjusting for sales charges (if applicable) or the effects of taxation, but it is adjusted to reflect all actual ongoing security expenses and assumes reinvestment of dividends and capital gains. It is the return an investor would have experienced if the fund was held throughout the period. If adjusted for sales charges and the effects of taxation, the performance quoted would be significantly reduced.

Total Return +/- indicates how a fund has performed relative to its peers (as measure by its Standard Index and/or Morningstar Category Index) over the time periods shown.

Trailing Returns

Standardized Return applies the methodology described in the Standardized Returns page of this report. Standardized Return is calculated through the most recent calendar-quarter end for one-year, five-year, 10-year, and/or since-inception periods, and it demonstrates the impact of sales charges (if applicable) and ongoing fund expenses. Standardized Return reflects the return an investor may have experienced if the fund was purchased at the beginning of the period and sold at the end, incurring transaction charges.

Load-Adjusted Monthly Return is calculated applying the same methodology as Standardized Return, except that it represents return through month-end. As with Standardized Return, it reflects the impact of sales charges and ongoing fund expenses, but not taxation. If adjusted for the effects of taxation, the performance quoted would be significantly different.

Trailing Return +/- indicates how a fund has performed relative to its peers (as measure by its Standard Index and/or Morningstar Category Index) over the

If applicable it must be preceded or accommanded of this report.

time periods shown.

Investment Risks

International/Emerging Market Equities: Investing in international securities involves special additional risks. These risks include, but are not limited to, currency risk, political risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks.

Sector Strategies: Portfolios that invest exclusively in one sector or industry involve additional risks. The lack of industry diversification subjects the investor to increased industry-specific risks.

Non-Diversified Strategies: Portfolios that invest a significant percentage of assets in a single issuer involve additional risks, including share price fluctuations, because of the increased concentration of investments.

Small Cap Equities: Portfolios that invest in stocks of small companies involve additional risks. Smaller companies typically have a higher risk of failure, and are not as well established as larger blue-chip companies. Historically, smaller-company stocks have experienced a greater degree of market volatility than the overall market average.

Mid Cap Equities: Portfolios that invest in companies with market capitalization below \$10 billion involve additional risks. The securities of these companies may be more volatile and less liquid than the securities of larger companies.

High-Yield Bonds: Portfolios that invest in lower-rated debt securities (commonly referred to as junk bonds) involve additional risks because of the lower credit quality of the securities in the portfolio. The investor should be aware of the possible higher level of volatility, and increased risk of default.

Tax-Free Municipal Bonds: The investor should note that the income from taxfree municipal bond funds may be subject to state and local taxation and the Alternative Minimum Tax.

Bonds: Bonds are subject to interest rate risk. As the prevailing level of bond interest rates rise, the value of bonds already held in a portfolio declines. Portfolios that hold bonds are subject to declines and increases in value due to general changes in interest rates.

HOLDRs: The investor should note that these are narrow industry-focused products that, if the industry is hit by hard times, will lack diversification and possible loss of investment would be likely. These securities can trade at a discount to market price, ownership is of a fractional share interest, the underlying investments may not be representative of the particular industry, the HOLDR might be delisted from the AMEX if the number of underlying companies drops below nine, and the investor may experience trading halts.

Hedge Funds: The investor should note that hedge fund investing involves specialized risks that are dependent upon the type of strategies undertaken by the manager. This can include distressed or event-driven strategies, long/short strategies, using arbitrage (exploiting price inefficiencies), international investing, and use of leverage, options and/or derivatives. Although the goal of hedge fund managers may be to reduce volatility and produce positive absolute return under a variety of market conditions, hedge funds may involve a high degree of risk and are suitable only for investors of substantial financial means who could bear the entire loss of their investment.

Bank Loan/Senior Debt: Bank loans and senior loans are impacted by the risks

associated with fixed income in general, including interest rate risk and default risk. They are often non-investment grade; therefore, the risk of default is high. These securities are also relatively illiquid. Managed products that invest in bank loans/senior debt are often highly leveraged, producing a high risk of return volatility.

Exchange Traded Notes (ETNs): ETNs are unsecured debt obligations. Any repayment of notes is subject to the issuer's ability to repay its obligations. ETNs do not typically pay interest.

Leveraged ETFs: Leveraged investments are designed to meet multiples of the return performance of the index they track and seek to meet their fund objectives on a daily basis (or other time period stated within the prospectus objective). The leverage/gearing ratio is the amount of excess return that a leveraged investment is designed to achieve in comparison to its index performance (i.e. 200%, 300%, -200%, or -300% or 2X, 3X, -2X, -3X). Compounding has the ability to affect the performance of the fund to be either greater or less than the index performance multiplied by the multiple stated within the funds objective over a stated time period.

Short Positions: When a short position moves in an unfavorable way, the losses are theoretically unlimited. The broker may demand more collateral and a manager might have to close out a short position at an inopportune time to limit further losses.

Long-Short: Due to the strategies used by long-short funds, which may include but are not limited to leverage, short selling, short-term trading, and investing in derivatives, these funds may have greater risk, volatility, and expenses than those focusing on traditional investment strategies.

Liquidity Risk: Closed-end fund, ETF, and HOLDR trading may be halted due to market conditions, impacting an investor's ability to sell a fund.

Market Price Risk: The market price of ETFs, HOLDRs, and closed-end funds traded on the secondary market is subject to the forces of supply and demand and thus independent of the NAV. This can result in the market price trading at a premium or discount to the NAV, which will affect an investor's value.

Market Risk: The market prices of ETFs and HOLDRs can fluctuate as a result of several factors, such as security-specific factors or general investor sentiment. Therefore, investors should be aware of the prospect of market fluctuations and the impact it may have on the market price.

Target-Date Funds: Target-date funds typically invest in other mutual funds and are designed for investors who are planning to retire during the target date year. The fund's target date is the approximate date when investors expect to begin withdrawing their money. A target-date fund's investment objective/strategy typically becomes more conservative over time, primarily by reducing its allocation to equity mutual funds and increasing its allocations in fixed-income mutual funds. An investor's principal value in a target-date fund is not guaranteed at any time, including at the fund's target date.

High double- and triple-digit returns: High double- and triple-digit returns were the result of extremely favorable market conditions, which may not continue to be the case. High returns for short time periods must not be a major factor when making investment decisions.

BBgBarc Govt/Corp 1 Yr Duration TR USD

Description unavailable

BBgBarc Intermediate Treasury TR USD

This index includes treasury bonds with maturates of at least one year and up to 10 years with an outstanding par value of at least 100 million. They include fixed-rate debt issues, rated investment grade or higher by Moody's Investor Services, Standard & Poor's Corporation, or Fitch Investor's Service (in that order). Treasuries include all public obligations of the U.S. Treasury, excluding flower bonds and foreign-targeted issues. The returns we publish for the index are total returns, which include reinvestment of dividends. For more information, visit the BarCap indexes web site. The constituents displayed for this index are from the following proxy: SPDR® BImbg Barclays Interm Term Trs ETF.

BBgBarc US Agg Bond TR USD

This index is composed of the BarCap Government/Credit Index, the Mortgage-Backed Securities Index, and the Asset-Backed Securities Index. The returns we publish for the index are total returns, which includes the daily reinvestment of dividends. The constituents displayed for this index are from the following proxy: iShares Core US Aggregate Bond ETF.

BBgBarc US Government Long TR USD

Includes those indexes found in the BarCap Government index which have a maturity of 10 years or more. The constituents displayed for this index are from the following proxy: iShares 20+ Year Treasury Bond ETF.

BBgBarc US Government TR USD

Tracks the returns of U.S. Treasuries, agency bonds, and one- to three-year U.S. government obligations.

BBgBarc US Govt/Credit Long TR USD

Includes the BarCap Government and BarCap Corporate Bond indices that have maturities of 10 years or longer. The returns we publish for the index are total returns, which include reinvestment of dividends. The constituents displayed for this index are from the following proxy: Vanguard Long-Term Bond Index Fund.

BBgBarc US MBS TR USD

Includes 15- and 30-year fixed-rate securities backed by mortgage pools of the Government National Mortgage Association (GNMA). The constituents displayed for this index are from the following proxy: iShares MBS ETF.

BBgBarc US Universal TR USD

BarCap U.S. Universal Bond Index: The U.S. Universal Index mirrors the increasingly popular "Core Plus" choice set used by many U.S.-dollar investors. It is the union of the U.S. Aggregate Index, the U.S. High Yield Corporate Index, the 144A Index, the Eurodollar Index, the Emerging Markets Index, the non-ERISA portion of the CMBS Index, and the CMBS High Yield Index. Municipal debt, private placements, and non-dollar- denominated issues are excluded from the Universal Index. The constituents displayed for this index are from the following proxy: iShares Core Total USD Bond Market ETF.

FTSE WGB! NonUSD USD

A market-capitalization weighted index consisting of the government bond markets of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Italy, Japan, Netherlands, Spain, Sweden, Switzerland, and United Kingdom. Country eligibility is determined based upon market capitalization and investability criteria. The index includes all fixed-rate bonds with a remaining maturity of one year or longer and with amounts outstanding of at least the equivalent of US\$25 million. Government securities typically exclude floating or variable rate bonds.

ICE BofAML US High Yield TR USD

The US High Yield Master II Index tracks the performance of below investment grade US dollar-denominated corporate bonds publicly issued in the US domestic market. "Yankee" bonds are included in the Index provided the issuer is domiciled in a country having an investment grade foreign currency long-term debt rating. 144a issues are not included in the index until they are exchanged for registered securities. Qualifying bonds must have at least one year remaining term to maturity, a fixed coupon schedule and a minimum amount outstanding of USD 100 million.

ICE BofAML USD 3M Dep OR CM TR USD

The BofA Merrill Lynch USD LIBOR 3 Month Constant Maturity Index represents the London intrabank offered rate (LIBOR) with a constant 3-month average maturity. LIBOR is a composite of the rates of interest at which banks borrow from one another in the London market.

Morningstar US Mid Cap TR USD

The Morningstar Mid Cap Index tracks the performance of U.S. mid-cap stocks. These stocks fall between the 70th and 90th percentile in market capitalization of the investable universe. In aggregate, the Mid-Cap Index represents 20 percent of the investable universe.

Morningstar US Small Cap TR USD

The Morningstar Small Cap Index tracks the performance of U.S. small-cap stocks. These stocks fall between the 90th and 97th percentile in market capitalization of the investable universe. In aggregate, the Small Cap Index represents 7 percent of the investable universe.

MSCI ACWI Ex USA NR USD

The MSCI AC World ex USA is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The index consists of 48 developed and emerging market country indices. The returns we publish for the index are total returns, which include reinvestment of dividends. The constituents displayed for this index are from the following proxy: iShares MSCI ACWI ETF.

MSCI ACWI Ex USA Value NR USD

Description unavailable.

MSCI EAFE NR USD

This Europe, Australasia, and Far East index is a market-capitalization-weighted index of 21 non-U.S., industrialized country indexes.

This disclosure applies to all MSCI indices: Certain information included herein is derived by Morningstar in part from MSCI's Index Constituents (the "Index Data"). However, MSCI has not reviewed any information contained herein and does not endorse or express any opinion such information or analysis. Vice President for Budget and Finance Chief Financial Officer

SUBJECT:

LEGACY ENDOWMENT PORTFOLIO STRATEGY, UBS

UBS has provided the attached presentation for discussion at the next upcoming Committee on Budget and Finance scheduled for September 6, 2018. The material is provided to forward an informational discussion on the agenda item related to the portfolio strategy that UBS will employ for investments in the Legacy Endowment.

The Administration has been working with UBS to restructure the investment platform and the portfolio strategy to improve return performance and to better comply with requirements in the Regents Policy on investments. Ms. Lori Hamano and Mr. Kyle Yoneshige from UBS will deliver the presentation and lead the discussion at the committee meeting. They will also handle any questions members may have regarding the portfolio.

MARKET INSIGHTS

Guide to the Markets®

U.S. 3Q 2018 | As of July 31, 2018

Cash accounts GTM – U.S.

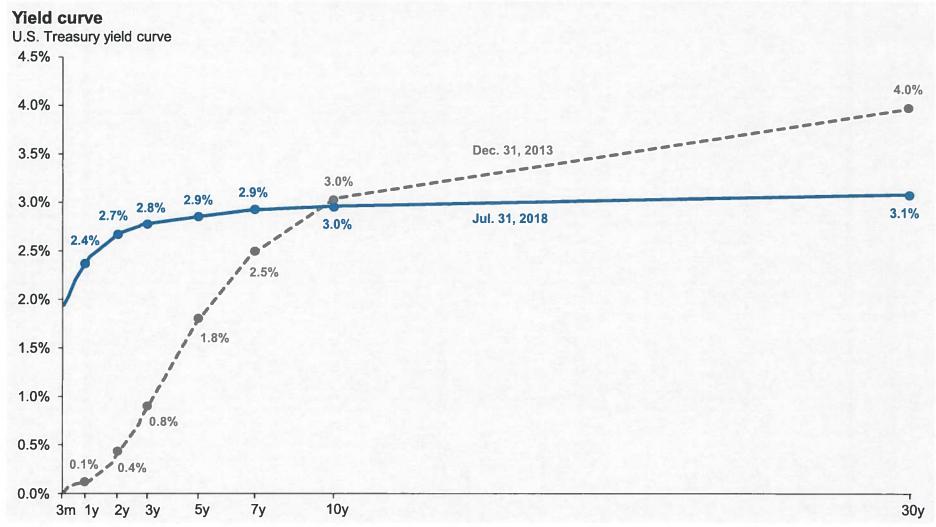

Source: FactSet, J.P. Morgan Asset Management; (Left) Bankrate.com; (Right) BEA, Federal Reserve System. Cash accounts and consumer spending are as of 6/30/18 and mortgage debt is as of 3/31/18. M2 includes M1 (currency in circulation and checking accounts) plus savings deposits, small-denomination time deposits and retail money market mutual funds. Institutional money market funds are considered a memorandum item, not included in M2. Annual income is for illustrative purposes and is calculated based on the 6-month CD yield on average during each year and \$100,000 invested. Past performance is not indicative of comparable future results.

Guide to the Markets – U.S. Data are as of July 31, 2018.

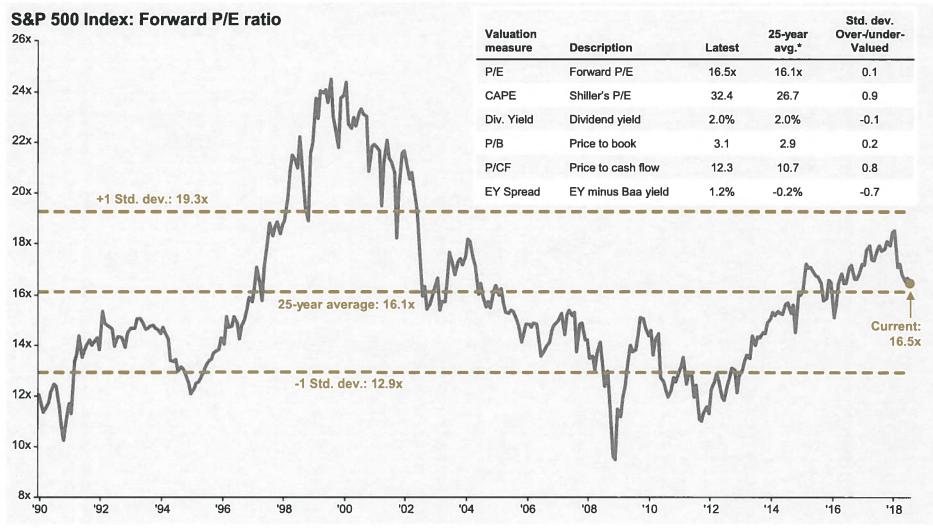

Yield curve GTM – U.S.

Source: FactSet, Federal Reserve, J.P. Morgan Asset Management. Guide to the Markets – U.S. Data are as of July 31, 2018.

Source: FactSet, FRB, Robert Shiller, Standard & Poor's, Thomson Reuters, J.P. Morgan Asset Management.

Price to earnings is price divided by consensus analyst estimates of earnings per share for the next 12 months as provided by IBES since December 1989, and FactSet for July 31, 2018. Average P/E and standard deviations are calculated using 25 years of FactSet history. Shiller's P/E uses trailing 10-years of inflation-adjusted earnings as reported by companies. Dividend yield is calculated as the next 12-month consensus dividend divided by most recent price. Price to book ratio is the price divided by book value per share. Price to cash flow is price divided by NTM cash flow. EY minus Baa yield is the forward earnings yield (consensus analyst estimates of EPS over the next 12 months divided by price) minus the Moody's Baa seasoned corporate bond yield. Std. dev. over-/under-valued is calculated using the average and standard deviation over 25 years for each measure.

*P/CF is a 20-year average due to cash flow data availability.

Guide to the Markets – U.S. Data are as of July 31, 2018.

J.P.Morgan Asset Management

MSCI All Country World ex-U.S. and S&P 500 Indices Dec. 1996 = 100, U.S. dollar, price return 400 -Jul. 31, 2018 P/E (fwd.) = 16.5xP/E 20-yr. avg. Div. Forward price to earnings ratio is a bottom-up calculation based on the most recent index price, divided by consensus estimates for earnings in the next 12 months (NTM), and is provided by FactSet Market Aggregates. Returns are cumulative and based on price movement only, and do not include the reinvestment of dividends. Dividend yield is calculated as consensus estimates of dividends for the next 12 months, divided by most recent price, as provided by FactSet Market Aggregates. Past performance is not a reliable indicator of current and future results.

Guide to the Markets- U.S. Data are as of July 31, 2018.

Annual returns and intra-year declines

S&P 500 intra-year declines vs. calendar year returns

Despite average intra-year drops of 13.8%, annual returns positive in 29 of 38 years

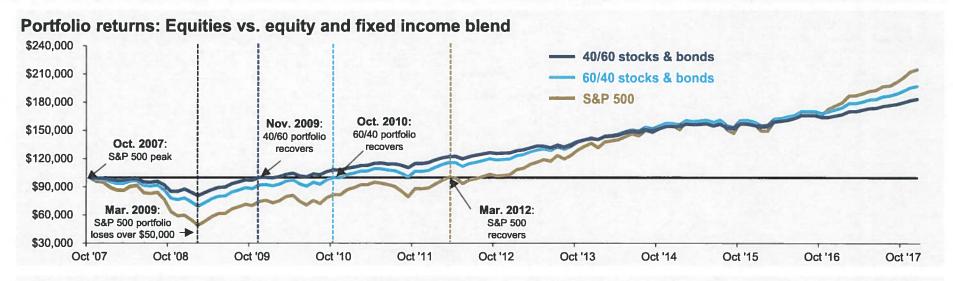

Source: FactSet, Standard & Poor's, J.P. Morgan Asset Management.

Returns are based on price index only and do not include dividends. Intra-year drops refers to the largest market drops from a peak to a trough during the year. For illustrative purposes only. Returns shown are calendar year returns from 1980 to 2017, over which time period the average annual return was 8.8%.

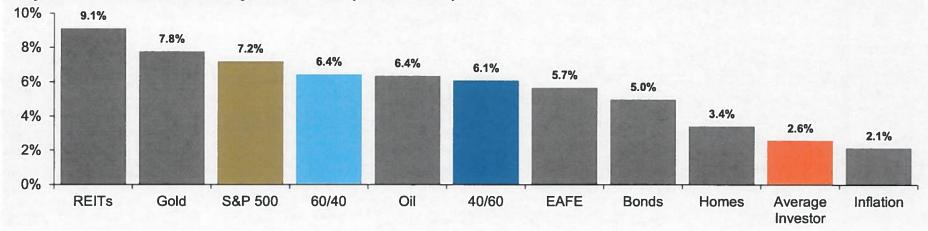

Guide to the Markets - U.S. Data are as of July 31, 2018.

Diversification and the average investor

20-year annualized returns by asset class (1998 - 2017)

Source: J.P. Morgan Asset Management; (Top) Barclays, Bloomberg, FactSet, Standard & Poor's; (Bottom) Dalbar Inc. Indices used are as follows: REITS: NAREIT Equity REIT Index, EAFE: MSCI EAFE, Oil: WTI Index, Bonds: Bloomberg Barclays U.S. Aggregate Index, Homes: median sale price of existing single-family homes, Gold: USD/troy oz., Inflation: CPI. 60/40: A balanced portfolio with 60% invested in S&P 500 Index and 40% invested in high-quality U.S. fixed income, represented by the Bloomberg Barclays U.S. Aggregate Index. The portfolio is rebalanced annually. Average asset allocation investor return is based on an analysis by Dalbar Inc., which utilizes the net of aggregate mutual fund sales, redemptions and exchanges each month as a measure of investor behavior. Returns are annualized (and total return where applicable) and represent the 20-year period ending 12/31/17 to match Dalbar's most recent analysis.

J.P. Morgan Asset Management – Index definitions

GTM - U.S.

All indexes are unmanaged and an individual cannot invest directly in an index. Index returns do not include fees or expenses.

Equities:

The **Dow Jones Industrial Average** is a price-weighted average of 30 actively traded blue-chip U.S. stocks.

The MSCI ACWI (All Country World Index) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US & Canada.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

The MSCI Europe Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe.

The MSCI Pacific Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the Pacific region.

The Russell 1000 Index® measures the performance of the 1,000 largest companies in the Russell 3000.

The Russell 1000 Growth Index® measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values.

The Russell 1000 Value Index® measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values.

The Russell 2000 Index® measures the performance of the 2,000 smallest companies in the Russell 3000 Index.

The Russell 2000 Growth Index® measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values.

The Russell 2000 Value Index® measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values.

The Russell 3000 Index® measures the performance of the 3,000 largest U.S. companies based on total market capitalization.

The Russell Midcap Index® measures the performance of the 800 smallest companies in the Russell 1000 Index.

The Russell Midcap Growth Index ® measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000 Growth index.

The Russell Midcap Value Index ® measures the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. The stocks are also members of the Russell 1000 Value index.

The **S&P 500 Index** is widely regarded as the best single gauge of the U.S. equities market. The index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The **S&P 500 Index** focuses on the large-cap segment of the market; however, since it includes a significant portion of the total value of the market, it also represents the market.

Fixed income:

The **Bloomberg Barclays 1-3 Month U.S. Treasury Bill Index** includes all publicly issued zero-coupon US Treasury Bills that have a remaining maturity of less than 3 months and more than 1 month, are rated investment grade, and have \$250 million or more of outstanding face value. In addition, the securities must be denominated in U.S. dollars and must be fixed rate and non convertible.

The **Bloomberg Barclays Global High Yield Index** is a multi-currency flagship measure of the global high yield debt market. The index represents the union of the US High Yield, the Pan-European High Yield, and Emerging Markets (EM) Hard Currency High Yield Indices. The high yield and emerging markets subcomponents are mutually exclusive. Until January 1, 2011, the index also included CMBS high yield securities.

The **Bloomberg Barclays Municipal Index**: consists of a broad selection of investment- grade general obligation and revenue bonds of maturities ranging from one year to 30 years. It is an unmanaged index representative of the tax-exempt bond market.

The Bloomberg Barclays US Dollar Floating Rate Note (FRN) Index provides a measure of the U.S. dollar denominated floating rate note market.

The **Bloomberg Barclays US Corporate Investment Grade Index** is an unmanaged index consisting of publicly issued US Corporate and specified foreign debentures and secured notes that are rated investment grade (Baa3/BBB or higher) by at least two ratings agencies, have at least one year to final maturity and have at least \$250 million par amount outstanding. To qualify, bonds must be SEC-registered.

The **Bloomberg Barclays US High Yield Index** covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets (sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included.

The Bloomberg Barclays US Mortgage Backed Securities Index is an unmanaged index that measures the performance of investment grade fixed-rate mortgage backed pass-through securities of GNMA, FNMA and FHLMC.

The **Bloomberg Barclays US TIPS Index** consists of Inflation-Protection securities issued by the U.S. Treasury.

The J.P. Morgan Emerging Market Bond Global Index (EMBI) includes U.S. dollar denominated Brady bonds, Eurobonds, traded loans and local market debt instruments issued by sovereign and quasi-sovereign antities.

The J.P. Morgan Domestic High Yield Index is designed to mirror the investable universe of the U.S. dollar domestic high yield corporate debt market.

The J.P. Morgan Corporate Emerging Markets Bond Index Broad Diversified (CEMBI Broad Diversified) is an expansion of the J.P. Morgan Corporate Emerging Markets Bond Index (CEMBI). The CEMBI is a market capitalization weighted index consisting of U.S. dollar denominated emerging market corporate bonds.

The J.P. Morgan Emerging Markets Bond Index Global Diversified (EMBI Global Diversified) tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds. The index limits the exposure of some of the larger countries.

The **J.P. Morgan GBI EM Global Diversified** tracks the performance of local currency debt issued by emerging market governments, whose debt is accessible by most of the international investor base.

The U.S. Treasury Index is a component of the U.S. Government index.

J.P. Morgan Asset Management – Index definitions & disclosures

GTM - U.S.

Other asset classes:

The Alerian MLP Index is a composite of the 50 most prominent energy Master Limited Partnerships (MLPs) that provides investors with an unbiased, comprehensive benchmark for the asset class.

The **Bloomberg Commodity Index** and related sub-indices are composed of futures contracts on physical commodities and represents twenty two separate commodities traded on U.S. exchanges, with the exception of aluminum, nickel, and zinc

The Cambridge Associates U.S. Global Buyout and Growth Index® is based on data compiled from 1,768 global (U.S. & ex – U.S.) buyout and growth equity funds, including fully liquidated partnerships, formed between 1986 and 2013.

The CS/Tremont Hedge Fund Index is compiled by Credit Suisse Tremont Index, LLC. It is an asset-weighted hedge fund index and includes only funds, as opposed to separate accounts. The Index uses the Credit Suisse/Tremont database, which tracks over 4500 funds, and consists only of funds with a minimum of US\$50 million under management, a 12-month track record, and audited financial statements. It is calculated and rebalanced on a monthly basis, and shown net of all performance fees and expenses. It is the exclusive property of Credit Suisse Tremont Index, LLC.

The HFRI Monthly Indices (HFRI) are equally weighted performance indexes, utilized by numerous hedge fund managers as a benchmark for their own hedge funds. The HFRI are broken down into 4 main strategies, each with multiple sub strategies. All single-manager HFRI Index constituents are included in the HFRI Fund Weighted Composite, which accounts for over 2200 funds listed on the internal HFR Database.

The NAREIT EQUITY REIT Index is designed to provide the most comprehensive assessment of overall industry performance, and includes all tax-qualified real estate investment trusts (REITs) that are listed on the NYSE, the American Stock Exchange or the NASDAQ National Market List.

The NFI-ODCE, short for NCREIF Fund Index - Open End Diversified Core Equity, is an index of investment returns reporting on both a historical and current basis the results of 33 open-end commingled funds pursuing a core investment strategy, some of which have performance histories dating back to the 1970s. The NFI-ODCE Index is capitalization-weighted and is reported gross of fees. Measurement is time-weighted.

Definitions:

Investing in alternative assets involves higher risks than traditional investments and is suitable only for sophisticated investors. Alternative investments involve greater risks than traditional investments and should not be deemed a complete investment program. They are not tax efficient and an investor should consult with his/her tax advisor prior to investing. Alternative investments have higher fees than traditional investments and they may also be highly leveraged and engage in speculative investment techniques, which can magnify the potential for investment loss or gain. The value of the investment may fall as well as rise and investors may get back less than they invested.

Bonds are subject to interest rate risks. Bond prices generally fall when interest rates rise.

Investments in commodities may have greater volatility than investments in traditional securities, particularly if the instruments involve leverage. The value of commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Use of leveraged commodity-linked derivatives creates an opportunity for increased return but, at the same time, creates the possibility for greater loss.

Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed the original investment. The use of derivatives may not be successful, resulting in investment losses, and the cost of such strategies may reduce investment returns.

Distressed Restructuring Strategies employ an investment process focused on corporate fixed income instruments, primarily on corporate credit instruments of companies trading at significant discounts to their value at issuance or obliged (par value) at maturity as a result of either formal bankruptcy proceeding or financial market perception of near term proceedings.

Investments in **emerging markets** can be more volatile. The normal risks of investing in foreign countries are heightened when investing in emerging markets. In addition, the small size of securities markets and the low trading volume may lead to a lack of liquidity, which leads to increased volatility. Also, emerging markets may not provide adequate legal protection for private or foreign investment or private property.

The price of equity securities may rise, or fall because of changes in the broad market or changes in a company's financial condition, sometimes rapidly or unpredictably. These price movements may result from factors affecting individual companies, sectors or industries, or the securities market as a whole, such as changes in economic or political conditions. Equity securities are subject to "stock market risk" meaning that stock prices in general may decline over short or extended periods of time.

Equity market neutral strategies employ sophisticated quantitative techniques of analyzing price data to ascertain information about future price movement and relationships between securities, select securities for purchase and sale. Equity Market Neutral Strategies typically maintain characteristic net equity market exposure no greater than 10% long or short.

Global macro strategies trade a broad range of strategies in which the investment process is predicated on movements in underlying economic variables and the impact these have on equity, fixed income, hard currency and commodity markets.

International investing involves a greater degree of risk and increased volatility. Changes in currency exchange rates and differences in accounting and taxation policies outside the U.S. can raise or lower returns. Some overseas markets may not be as politically and economically stable as the United States and other nations.

There is no guarantee that the use of **long and short positions** will succeed in limiting an investor's exposure to domestic stock market movements, capitalization, sector swings or other risk factors. Using long and short selling strategies may have higher portfolio turnover rates. Short selling involves certain risks, including additional costs associated with covering short positions and a possibility of unlimited loss on certain short sale positions.

Merger arbitrage strategies which employ an investment process primarily focused on opportunities in equity and equity related instruments of companies which are currently engaged in a corporate transaction.

Mid-capitalization investing typically carries more risk than investing in well-established "blue-chip" companies. Historically, mid-cap companies' stock has experienced a greater degree of market volatility than the average stock.

Price to forward earnings is a measure of the price-to-earnings ratio (P/E) using forecasted earnings. Price to book value compares a stock's market value to its book value. Price to cash flow is a measure of the market's expectations of a firm's future financial health. Price to dividends is the ratio of the price of a share on a stock exchange to the dividends per share paid in the previous year, used as a measure of a company's potential as an investment.

Real estate investments may be subject to a higher degree of market risk because of concentration in a specific industry, sector or geographical sector. Real estate investments may be subject to risks including, but not limited to, declines in the value of real estate, risks related to general and economic conditions, changes in the value of the underlying property owned by the trust and defaults by borrower.

Relative Value Strategies maintain positions in which the investment thesis is predicated on realization of a valuation discrepancy in the relationship between multiple securities.

Small-capitalization investing typically carries more risk than investing in well-established "blue-chip" companies since smaller companies generally have a higher risk of failure. Historically, smaller companies' stock has experienced a greater degree of market volatility than the average stock.

Disclaimer

UBS does not provide legal, tax or actuarial advice. You will be responsible for ensuring that your investment policy statement and other plan documents comply with ERISA, state or local laws, or other regulations or other requirements that apply to you. You should consult with your legal and tax advisors regarding those matters. Our services do not include a review of the performance or recommendations regarding whether a retirement plan should offer or continue to offer employer securities as an investment option under the plan. If our fees are based on the value of the assets in your plan, we will not include the value of the employer securities when we calculate our fees. Our investment searches will not include UBS affiliated/proprietary mutual or sub advised funds, unless requested by a non-retirement plan client. Inclusion of affiliated or proprietary mutual or sub advised funds in our investment searches raises a conflict of interest as purchasing those funds will result in increased compensation to UBS and/or a member of the UBS organization. While we can identify investment funds from an extensive list of options, our investment searches are limited to those which are offered by the Firm or for which the Firm has conducted a review. With regard to SMA Managers you select in the IC Program, we are not responsible for your choice of SMA Manager (in the non-discretionary IC Program), their day-to-day investment decisions, their performance, their compliance with applicable laws, rules or regulations and best execution obligations, their receipt of or compliance with your IPS, or any other matters within the SMA Manager's control.

Important Considerations of an Asset-Based Fee Option. You may pay more or less in a UBS Financial Services Inc. wrap-fee program than you might otherwise pay if you purchased the services separately. For example, depending on your asset allocation or strategy selection, you may find that the individual components of your strategy or allocation are available to you outside of the IC Program for more or less than you would pay in the IC Program.

For important additional information, please see the UBS Financial Services' Disclosure Wrap Fee Brochure Form ADV for UBS-IC. Investment advisory services (including consulting and investment management) and brokerage/custody services are separate and distinct, differ in material ways and are governed by different laws and separate contracts. It is important that you carefully read the agreements and disclosures UBS provides to you about the products or services offered, including the Program.

Products and services (including the Program) may not be available for residents in certain jurisdictions. This document does not constitute an offer to sell or a solicitation to offer to buy any security or product, and nothing in this document shall limit or restrict the particular terms of any specific offering or product. Offers will be made only to qualified investors by means of prospectus, offering memorandum or other document providing information as to the specifics of the offering or product. No offer of any security or product will be made in any jurisdiction in which the offer, solicitation or sale is not permitted or to any person to whom it is unlawful to make such offer, solicitation or sale.

* An investment adviser does not have to demonstrate or meet any minimum level of skill or training to register with the SEC.

WERSHIY OF HARKILL

KALBERT K. YOUNG
VICE PRESIDENT FOR BUDGET & FINANCE
CHIEF FINANCIAL OFFICER

18 AUG 30 P5:02 August 28, 2018

RECEIVED

'18 AUG 30 P2:15

UNIVERSITY OF HAWAIL PRESIDENT'S OFFICE

TO:

Lee Putnam

Chair, Board of Regents

Randy Moore

Chair, Committee on Budget and Finance, Board of Regents

VIA:

David Lassner

President

FROM:

Kalbert K. Young

Vice President for B&F/CFO

SUBJECT:

FISCAL BIENNIUM 2019-2021 BUDGET POLICY PAPER

SPECIFIC ACTION REQUESTED:

The Administration hereby submits to the Board of Regents and its Committee on Budget and Finance the attached document entitled "Fiscal Year Biennium 2019-2021 Budget Policy Paper" (hence forth referred to as "Budget Policy Paper" or "Paper"). In conformance with Regent Policy (RP) 8.204, this Budget Policy Paper is submitted for the review and approval of the Board of Regents. Administration requests the Committee on Budget and Finance recommend the Board of Regents approve the Budget Policy Paper and that the Board of Regents to subsequently approval the Paper.

RECOMMENDED EFFECTIVE DATE:

Upon approval of the Board of Regents.

BACKGROUND:

RP 8.204 directs that the Administration draft an annual budget policy paper for the review and approval by the Board of Regents. The purpose of the Paper is to outline the University's policy and governing principles that will be incorporated into the process to gather budget requests from University campuses and units. The Budget Policy Paper provides the environmental context for building budget proposals and articulates the University's general program, policy, and management objectives and institutional priorities that campuses and the Administration will use in the course of preparing budget requests.

Board Chair Putnam Committee Chair Moore August 28, 2018 Page 2 of 3

The Paper is to be approved by the Regents ahead of the issuance of budget instructions and directions to campuses. Budget instructions are given to outline the format and parameters for campuses to construct budget requests for funding that would ultimately be proposed to the Legislature. Budget instructions will also typically mirror instructions provided by the State Department of Budget and Finance to conform to the requirements of the Executive Branch's budget proposal.

APPLICABLE REGENTS POLICY:

RP 8.204, outlines the "Policy and Governing Principles for the Biennial and Supplemental Budget Proposals to the Legislature." In particular, the policy directs the preparation of a budget policy paper as part of the major activities that the University should do as part of the budget preparation process. As identified in RP 8.204, the budget construction process of the University will include the development of:

- a. Budget Policy Paper
- b. Budget Instructions
- c. Administration's proposal of operational and capital improvement budget requests

This For-Action item is submitted to the Board of Regents in conformance with RP 8.204 for approval of the Administration's proposed Budget Policy Paper.

DISCUSSION:

This Budget Policy Paper is intended to be used by the Administration of the University of Hawai'i (UH) in the construction of its fiscal biennium (FB) 2019-2021 budget request. The budget request will eventually be submitted to the Governor for consideration to be included in the Executive branch's proposed budget to the Legislature. The budget request is also simultaneously submitted to the Legislature, pursuant to statute. In crafting this Budget Policy Paper, the UH Chief Financial Officer gathered input from key stakeholders at the State and from stakeholders in the area of financial management within the University.

The Paper describes the environmental context from which the budget requests are expected to be constructed. The emphasis will be on budget proposals that can be framed to support the four strategic directions of the University of Hawai'i.

- Hawai'i Graduation Initiative (HGI)
- 21st Century Facilities (21CF)
- Hawai'i Innovation Initiative (HI2)
- High Performance Mission-Driven System (HPMS)

Board Chair Putnam Committee Chair Moore August 28, 2018 Page 3 of 3

The Administration has also identified issues that should be considered in the context of budget requests. Considering the University's major revenue sources and the forecasted trajectory for these various revenue components, the University needs to be mindful of balancing its revenues and expenditures with an eye on sustainability of programs. The two major revenue sources for the University are general fund appropriations via the annual legislative-appropriated budget and University-generated revenues via tuition and fees. Each of those sources have their own constraints – general fund appropriations have increased primarily for collective bargaining agreements and any new revenue generated from tuition rate increases are to be used for deferred maintenance and not general operations.

The goal of the Budget Policy Paper is to establish a collective vision from which budget proposals can develop. The Administration has identified two key areas that are fundamental to nearly all of the strategic directions: enrollment management and capital renewal.

This Budget Policy Paper will be used to guide the process and evaluation of budget proposals for operating requests. The Board of Regents has already approved the biennium capital improvement budget request at its August meeting which follows the principles outlined in this Budget Policy Paper, the University's Strategic Directions, and the Integrated Academic and Facilities Plan.

Upon approval of this Budget Policy Paper by the UH Board of Regents, and in accordance with RP 8.204, the Administration will be issuing budget preparation instructions to all campuses in the UH system to guide their development of budget requests that will be used to construct the University's FB2019-2021 biennium budget requests.

ACTION RECOMMENDED:

The Administration recommends that the Committee on Budget and Finance review and recommend to the full Board of Regents approval of the attached Budget Policy Paper in accordance with RP 8.204.

The Administration further recommends that upon the recommendation of the Committee on Budget and Finance, the Board of Regents then approve the Budget Policy Paper as soon as procedurally possible so as to not delay the issuance of budget instructions.

Attachment (Fiscal Year Biennium 2019 -2021 Budget Policy Paper)

c: University Budget Office (w/o Attachments)

Budget Policy Paper Fiscal Biennium 2019-2021

September 2018

SECTION 1: BACKGROUND

Regent Policy (RP) 8.204¹ directs that an annual Budget Policy Paper outline the University of Hawai'i's policy and governing principles for its (biennium or supplemental) budget proposals to the Legislature. This document hereby provides the environmental context for building budget proposals and articulates the University of Hawai'i's general program, policy, and management objectives and institutional priorities that guide the preparation of the upcoming biennium budget request.

This Budget Policy Paper (Paper) is intended to be used by the Administration of the University of Hawai'i (UH) in the construction of its fiscal biennium (FB) 2019-2021 budget request that, upon approval by the Board of Regents (Board), will be submitted to the Governor for construction of the Executive branch's proposed budget to the Legislature. In accord with Chapter 37-68, Hawai'i Revised Statutes, the Board's biennium budget request is also provided directly to the Legislature.

In crafting this Paper, the UH Chief Financial Officer considered general input from UH Officers, including those representing major UH units (Mānoa, Hilo, West Oʻahu, Community Colleges, Systemwide Administration), and key stakeholders at the State. This input in conjunction with the direction of this Paper is expected to lay the foundation for System instructions for budget construction and requests when formulating the UH budget proposal considered by the Boards' Regents, the Governor, and the Legislature. Upon approval of this Paper by the Board, and in accordance with RP 8.204, the Administration will be issuing budget preparation instructions to all units to guide development of budget requests used to construct UH's FB2019-2021 biennium budget request.

SECTION II: ENVIRONMENTAL CONTEXT

General Fund Revenues

At its meeting on May 24, 2018, the Council on Revenues (Council) raised its forecast for State General Fund revenue growth from 5.3% to 7.3% for fiscal year (FY) 2018, and from 4.5% to 5.0% for FY 2019. This revision followed the Council's previous meeting of March 15, 2018, where the Council also raised the FY18 forecast from 4.5% to 5.3% and the FY19 forecast was elevated from 4.3% to 4.5%. In both instances, the Council left its FY 2020 to FY 2024 forecasts unchanged at 4.0% annual growth. The department of taxation preliminary report of general fund tax revenues through

¹ UH Regents Policy 8.204 at RP8.204, III.D.3.A.1.a(1)

[&]quot;a. Preparation of budget policy paper.

⁽¹⁾ Using input from key stakeholders at the state and the university, as well as a review of university and campus planning goals and plans, the president shall direct the preparation of a budget policy paper and approve its submittal for review and approval by the board. The paper shall set forth the environmental context for budget building, as well as general program, policy and management objectives, and institutional priorities to guide the preparation of the budget request."

June 2018, reports that general fund tax revenues from all sources was approximately 7.6% greater than the previous fiscal year. These performance numbers would suggest that State tax revenue has been strong and that strength should (hopefully) continue into the next fiscal year with continued year-over-year growth.

Approval of New Tuition Schedule

In July 2016, the Board approved a tuition schedule for three years (Academic Year 2017-2018 through 2019-2020). Anticipated tuition rate increases in the second year of the tuition schedule (Academic Year 2018-2019 /FY19) will be 1% or 2%, depending upon the campus. The sole purpose of the tuition rate adjustment is to provide dedicated revenues to address facilities conditions including deferred maintenance and modernization needs at each campus. Any new revenue resulting from tuition rate increases associated with this schedule may not fund general operational activities. The level of tuition revenues are anticipated to be challenging even in light of rate increases due to headwinds in enrollment levels across the system.

A recent major challenge to UH has been the explosive increase in fringe benefit costs. While the State covers fringe benefit costs for permanent appropriated positions supported by general funds or tuition, the rapid increase in rates from 42.49% to 60.08% over the past four years² has had a devastating impact on fully or partially self-funded programs such as campus auxiliaries and athletics.

Strategic Directions and Integrated Academic and Facilities Plan

UH has identified its guiding principles in establishing formal Strategic Directions for 2015-2021. The Strategic Directions, which were approved by the Board in January 2015, has since provided the framework, objectives, and priority targets for UH in the biennium budget request of the Board. The strategic directions are currently being updated for relevance and targets, but the objectives themselves continue unchanged.

STRATEGIC DIRECTIONS 2015 - 2021

1. Hawai'i Graduation Initiative (HGI)

Goal: Increase the educational capital of the State by increasing the participation and completion of students, particularly Native Hawaiians, low-income students, and those from underserved regions and populations and preparing them for success in the workforce and their communities.

2. 21st Century Facilities (21CF)
Goal: Eliminate UH's deferred
maintenance backlog and modernize
facilities and campus environments to
be safe, sustainable, and supportive of
modern practices in teaching, learning,
and research.

² Executive Memorandum Nos. 14-13 and 18-12 from State of Hawai'i Department of Budget and Finance

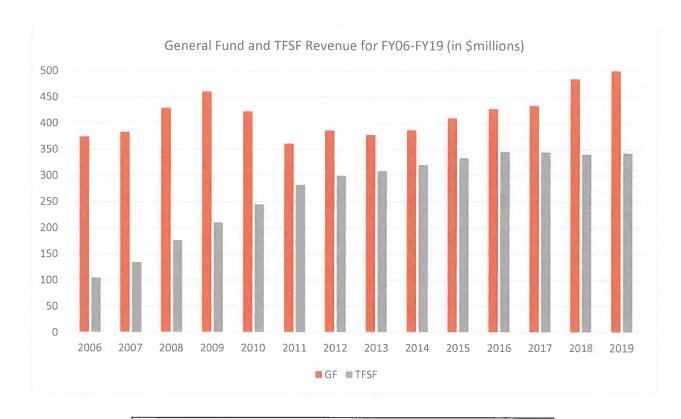

- 3. Hawai'i Innovation Initiative (HI2) Goal: Create more high-quality jobs and diversify Hawai'i's economy by leading the development of a \$1 billion innovation, research, education, and training enterprise that addresses the challenges and opportunities faced by Hawai'i and the world.
- 4. High Performance MissionDriven System (HPMS)

 Goal: Through cost-effective,
 transparent, and accountable practices,
 ensure financial viability and
 sustainability to ensure UH's ability to
 provide a diverse student body
 throughout Hawai'i with affordable
 access to a superb higher education
 experience in support of the institutional
 mission of UH, which includes
 commitments to being a foremost
 indigenous-serving university and
 advancing sustainability.

In addition, the Board approved an Integrated Academic and Facilities Plan (IAFP) in April 2017. The comprehensive plan provides direction for campuses to develop a more coordinated approach towards how individual campuses and programs work together (and fit together) within UH System to ensure that the entire mission of UH System is addressed without undue duplication or inter-campus competition. While the plan is not intended to be prescriptive as to specific programming on every campus, the IAFP does provide the framework for UH decision-making in regard to placing programs and prioritization of (new) facilities within UH System.

Balancing UH Revenues

General operating revenues of UH are largely derived from two primary sources: Legislative appropriations of general funds and tuition and fees revenue from UH activity. After their rapid decline in the Great Recession, State support in the form of general fund appropriations to UH has been trending upward. The amount budgeted for FY19 is \$501.9 million. However, most of the new appropriations have been to fund negotiated statewide collective bargaining increases. The growth in operating funds has only modestly supported (new) program initiatives or department (Board and/or Governor) requests.

Source: Presentation, Board of Regents. <u>University of Hawai'i Operating Budget for Fiscal Year 2018–2019</u>, August 16, 2017.

During the years following the recession (FY11-16), UH-generated revenues via tuition and fees had seen slight increases as the result of the previous five-year tuition rate schedule, which had annual tuition rate increases ranging between 2% to 5% per year depending on individual campuses. These rate increases partially obscured the financial impact of declining enrollment during the same period. Moving forward, small increases in tuition rates will not make up for declines in enrollment, as any additional revenue generated from increased rates for FY19 and FY20 may only be used to address campus maintenance and modernization. While general fund appropriations have recently exceeded pre-recession levels, as previously noted, a majority of that increase has gone to support negotiated collective bargaining increases.

SECTION III: LEGISLATIVE STRATEGY AND PRIORITIES FOR THE BIENNIUM REQUEST

The FY2018-2019 Supplemental Budget bill passed by the 2018 Legislature, with some exceptions, did not include funding for most of the items or initiatives submitted as UH's expressed operating budget priorities.

As UH evaluates and refines its four Strategic Directions, the FB2019-2021 biennium request should focus on emphasizing those initiatives that are most critical and signature to advancing strategic priorities. There are two areas that are fundamental to nearly all of the strategic directions: building enrollment and capital renewal. In addition, the State continues to look to UH, its sole public university, to strengthen and diversify the economy with a focus on creating more high-value jobs.

Administration has initiated a proactive and enhanced enrollment management initiative that sets aggressive forward targets and multiple areas of emphasis for campuses to focus on to drive total enrollment. All aspects of enrollment, such as recruitment, retention, securing new audiences and financial aid strategies are being considered.

Major units may suggest other items from the biennium budget request consistent with the approach provided in this Paper and the Strategic Directions and the Integrated Academic and Facilities Plan. These will be reviewed by the Administration for consideration of inclusion in UH's budget request.

Legislative Strategy for Operating Budget

The recommendation for the FB2019-2021 biennium budget request is to emphasize operational funding that will support initiative(s) that are intended to directly drive enrollment management and growth. To this end, budget requests will be focused around improving student services to include assistance and accessibility. Areas of emphasis should include:

Hawai'i Promise

Expansion of current program to four-year programs and campuses. By providing the "last dollar" for students' educational costs, the Hawai'i Promise Program has benefited over 1,000 students since it began this past year. Beyond the direct benefit to the student, the program also enhances enrollment at the Community Colleges. To further develop the Hawai'i Promise Program, Administration will seek funding that will expand the program to all four-year students who attend any UH campus at a preliminary estimate of approximately \$17 million. While this is a large amount, the program has received positive feedback from students, their families, and the Legislature.

Enrollment Management

UH remains focused on graduating students that are educated and prepared for our State's workforce needs. This objective requires achievement in a number of areas to attain student success, to include: graduation in a timely manner, providing modern and contemporary learning opportunities, and providing services that assist students to be better prepared to succeed in college and in the workforce. As one of the main drivers of the local economy, it is imperative for UH to drive economic development and diversification. In addition, partnering with local industries to recognize their needs will

assist with workforce development for the State and provide jobs for our graduates. The Administration seeks to enroll more students, improve their experience while attending, and provide opportunities upon graduation.

Nonetheless, enrollment has declined at nearly every campus in the UH System. Although reasons may vary, decline in enrollment rates are a combination of factors to include: Hawai'i's economic climate and low unemployment rate, lack of growth in high school graduation classes, and an increase in on-time graduation rates from UH. Despite these factors, it is imperative that UH strive to increase enrollment. To this end, the Administration will deploy the following enrollment management strategies at all UH campuses:

- Initiatives and approaches to bolster transfer rates;
- Support for efforts to attract more students throughout the UH System;
- o Improvements to services that assist Returning Adults within UH; and
- o Retention of students through to completion.

Initiatives for both Graduate and Undergraduate students can bolster opportunities and compensation for on-campus employment. This assists both the students currently employed (employment on campus increases student success) and also those who are positively impacted by Teaching and Learning Assistants on campuses.

- Funding support for graduate assistants (salary increase)
- Undergraduate Learning Assistants for students (new employment opportunities)

• Additional adjustments of continuing appropriations

During the 2018 Legislative Session, while the Legislature did provide \$700,000 in additional funds toward the Hawai'i Promise program, that appropriation was not recurring and is therefore not part of UH's continuing base budget. Providing a single appropriation in the base budget that includes both years' appropriations (\$1,800,000 plus the new \$700,000) will ensure stability of the program and improve efficiency.

In addition, the 2019 Legislature eliminated funding that was previously included as recurring funding in UH's base budget for Athletics programs at Mānoa and Hilo. Administration will include restoration of funding on a recurring basis for these items as part of its request.

- Hawai'i Promise (\$700,000) Incorporating FY19 appropriations into the base budget.
- Athletics (\$3,000,000) Reinstatement of base budget appropriations for athletics funding systemwide.

Maintaining and modernizing facilities; Addressing increasing fringe benefit costs

While UH has stepped up to address the challenges of its aging facilities with funding from the current tuition schedule, this work will also require additional personnel. Accordingly, UH will request additional positions (without dollars) to dedicate to improving the quality of our campus facilities.

In addition, in programs most impacted by the increase in fringe benefit costs, which are not under the control of UH, we will be requesting position counts (without dollars) to maximize the impact of our scarce general funds and tuition dollars.

As UH is one of the main drivers of the local economy, it is imperative for us to continue to drive economic development and diversification. Critical areas of high-tech employment, such as astronomy, may be the focus of UH's legislative agenda.

Legislative Strategy for CIP Budget

The Board has approved the UH biennium budget capital request for FB2019-2021 at its August full Board meeting. Our request for CIP funding for FY 2019-2020 is \$295 million and for FY2020-21 it is \$319.5 million. This budget anticipates to address a total of \$217 million in capital renewal and deferred maintenance projects. The following is a breakout by campus:

| Campus | A RIP | FY20 | FY21 |
|------------|-------|---------|---------------|
| Mānoa | \$ | 181.5 M | \$ 200.5 M |
| Hilo | \$ | 24.0 M | \$ 20.5 M |
| West O'ahu | \$ | 9.0 M | \$ 10.5 M |
| CCs | \$ | 80.5 M | \$ 88.0 M |
| Total | \$ | 295.0 M | \$ 319.5 M |

Below is the full list of specific projects provided in the budget and approved at the August 2018 full Board meeting.

| Campus | Project Description | MOF | 20 Budget Request | | 21 Budget Request |
|------------|--------------------------------|-----|----------------------|------|----------------------|
| Mānoa | RIM Projects | С | \$ 135.5 M | \$ - | 110.5 M |

| Comm. Colleges | TOTAL | | \$: | 295.0 M | \$ 3 | 319.5 M |

SECTION IV. NEXT STEPS

In accordance with Board policy, upon approval of this Paper, the President shall issue formal instructions to major units on preparation of the biennium budget. These instructions will be based on priorities, assumptions, and guidelines contained in this Paper.

Submittals from the major units will then be used to prepare an integrated biennium budget proposal for UH, which will be reviewed and approved by the Board and then utilized for the preparation of formal documents to be submitted to the Governor and the Legislature in accordance with applicable statutes and instructions.

Budget Policy Paper Fiscal Biennium 2019-2021

September 6, 2018

Committee on Budget and Finance

- 1. Regent Policy (RP) 8.204 directs that an annual budget policy paper outline the University's policy and governing principles for its budget proposals to the Legislature.
- 2. This paper provides environmental context for building budget proposals and articulates UH's objectives and priorities that will guide the upcoming biennium budget request that will be submitted to the Governor and Legislature upon Board approval.

- 1. State General Fund collections for FY18 grew 7.6% from FY17
 - Council on Revenues had predicted 7.3% growth for FY18
 - Council is forecasting 4.5% growth for FY19 and 4.0% annual growth beyond
- 2. Tuition Rate increase of 1% or 2% for Academic Year 2018-2019
 - New revenue from rate increases is to be used to address deferred maintenance and may not be used to fund general operations
- 3. Fringe benefit rates for non-general funded positions has increased from 42% to 60% over the past four years. This creates pressure on self-funded programs such as auxiliaries and athletics.

Legislative Strategy and Priorities

1. Enrollment Management

• Recruitment, retention, transfer rates, financial aid, employment, etc.

2. Capital Renewal

- Improving learning and research environment
- Target highest utility and poorest conditions
- 3. Major units may request items that are consistent with this approach and the University's Strategic Directions and the Integrated Academic and Facilities Plan (IAFP).

- 1. Expansion of Hawai'i's Promise Program to all four-year students
 - Estimated \$17,000,000
- 2. Enrollment Management
 - Transfers, student support, student services, returning adults
 - Employment opportunities for Graduate and Undergraduate students
- 3. Continuing Appropriations
 - Hawai'i's Promise \$700,000 in Act 14/2018 is non-recurring
 - Athletics \$3,000,000 was made non-recurring by Legislature
- 4. Modernizing Facilities; Addressing Fringe Benefit Costs
 - Additional FTEs (without dollars) for facilities and athletics

- 1. Board approved capital budget at August meeting
 - FY2019-20: \$295 million
 - FY2020-21: \$319.5 million
- 2. Follows principles and priorities set forth in IAFP and seeks to transform the learning and research landscape
- 3. Additional details in materials approved at August 2018 Board meeting

- 1. Upon approval, the President shall issue formal instructions to major units in preparation of the supplemental budget, following these priorities, assumptions, and guidelines.
- 2. In November, an operating budget proposal will be presented to the Board of Regents for approval and subsequent submission to Governor and Legislature.

Vice President for Budget and Finance Chief Financial Officer

SUBJECT:

FY18 FOURTH QUARTER FINANCIAL REPORT AS OF JUNE 30, 2018

Attached is the Quarterly Financial Report as of June 30, 2018 for the University of Hawai'i System. Since this reporting period encompasses the fourth quarter, the fiscal performance will also highlight the fiscal year results (FY18). This report is an information item for discussion at the Budget and Finance Committee meeting on September 6, 2018.

A Quarterly Financial Report presentation is included to summarize a high-level analysis of the report.

FY18 Q4 Financial Report

September 6, 2018 Committee on Budget and Finance

- 1. At the end of FY18, revenues for all funds are slightly (0.8%) higher than projections and expenditures are 3.2% lower than projections.
- 2. Although the total is higher than projections, revenues for individual fund categories are mixed relative to projections:
 - General Fund \$15.9 million (3.4%) higher
 - TFSF \$5.9 million (1.7%) lower
 - Other Revolving Funds \$2.9 million (7.8%) lower
- 3. Expenditures for all funds are \$33.3 million (3.2%) lower than projections. General Fund Expenditures were up \$15.9 million but all other fund categories showed a decrease in expenditures.

FY18 Budget vs. Actual Comparison

| | Revenues* | | | | |
|---------------|-----------|---------|-------|--|--|
| | Budget | Actual | Diff | | |
| General Funds | 469.2 | 485.2 | 16.0 | | |
| TFSF | 342.4 | 336.5 | (5.9) | | |
| RTRF | 49.9 | 50.2 | 0.3 | | |
| Other SF | 131.0 | 131.9 | 0.9 | | |
| Other RF | 37.8 | 34.8 | (2.9) | | |
| Total | 1,030.3 | 1,038.6 | 8.3 | | |

|----------|---|
| Actual | Diff |
| 485.2 | 16.0 |
| 320.9 | (24.7) |
| 50.4 | (6.6) |
| 122.3 | (17.5) |
| 33.9 | (0.5) |
| ,012.7 | (33.3) |
| | Actual 485.2 320.9 50.4 122.3 33.9 |

| Rev - Ex | p/Trf* |
|----------|--------|
| Budget | Actual |
| 0.0 | 0.0 |
| (3.2) | 15.6 |
| (7.1) | (0.2) |
| (8.8) | 9.6 |
| 3.3 | 0.9 |
| (15.8) | 25.9 |
| | |

- 1. Revenues were higher in aggregate, driven by General Fund increase (release of restrictions, UHPA CB)
- 2. Expenditures for all funds, except General Fund were lower than projections
- 3. Net result: Initially projected \$15.8 million loss became \$25.9 million gain

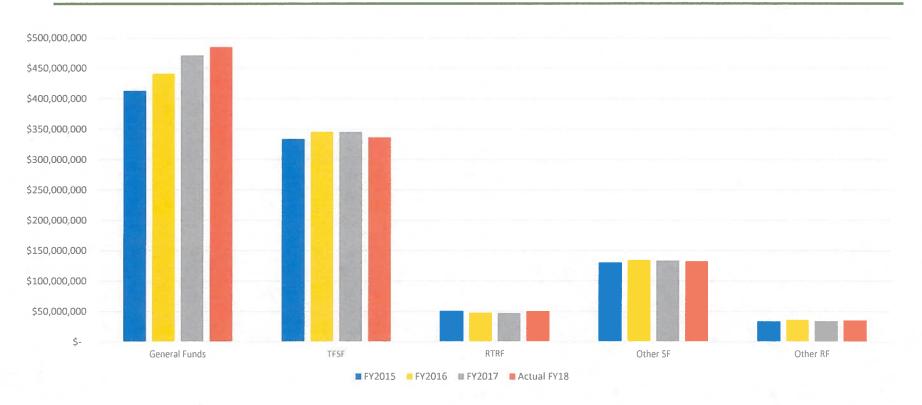

Revenues (Budget vs. Actual)

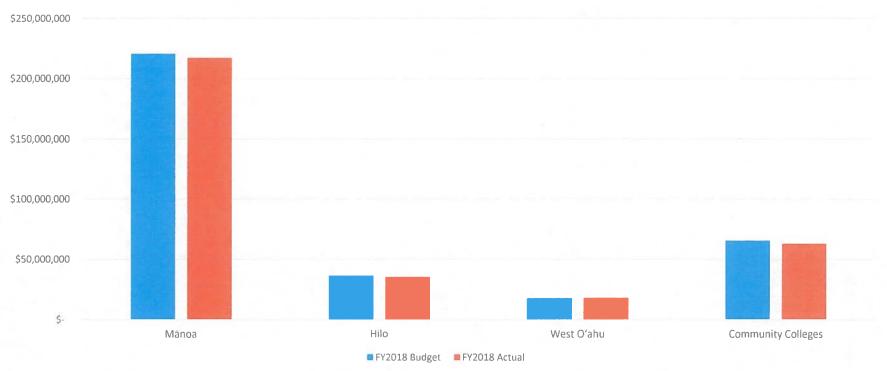

Revenues Comparison (FY15-18)

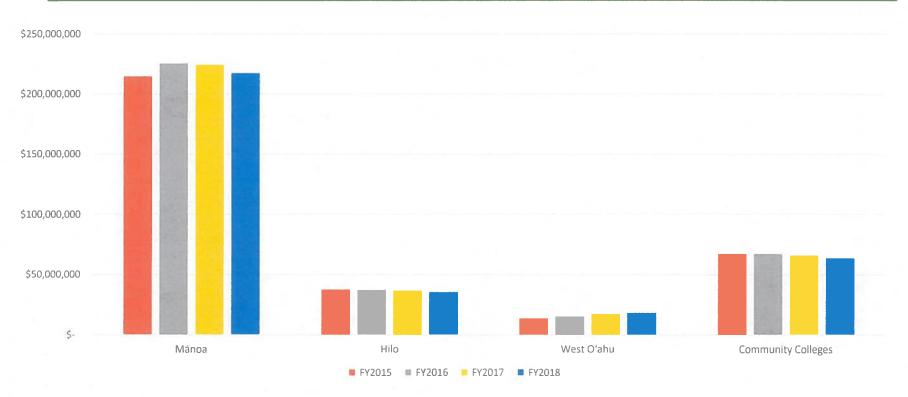

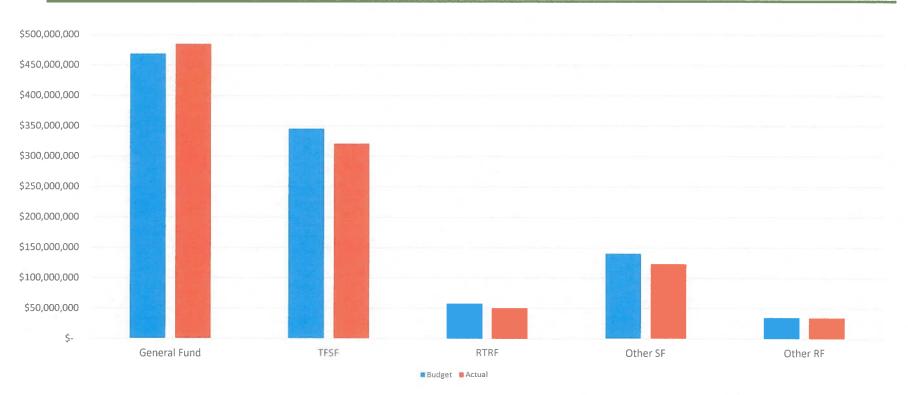

TFSF Revenue by Campus (FY15-18)

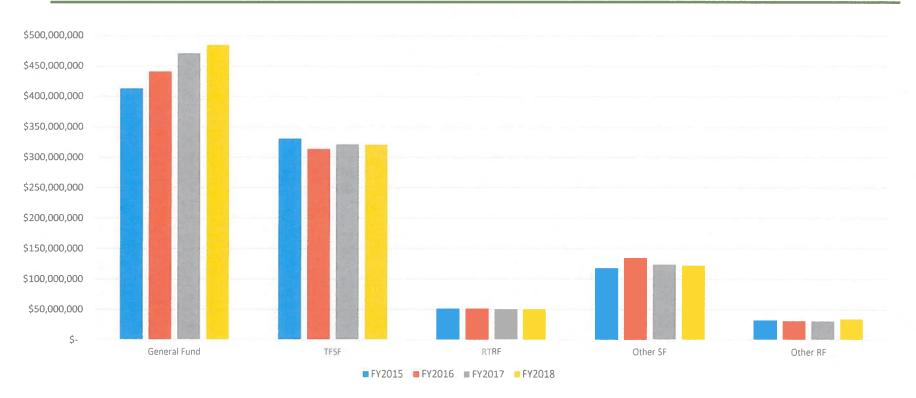

Expenditures (Budget vs. Actual)

Mānoa — General Fund and TFSF

- 1. General Fund Utilities expenditures were projected to be \$0. The variance (\$3 million) resulted from Cancer Center incurring Utilities expenses to maximize the use of General Funds after the release of restriction by Governor.
- 2. TFSF Personnel Expenditures are \$10.4 million (11%) lower than projected due to conservative projections in anticipation of decreased revenues. These lower expenditures allowed for the increase in Non-Personnel Expenditures. In aggregate, TFSF Expenditures were \$8.9 million (4%) lower than projections.

- 1. Non-personnel expenditures are lower than projections due to conservative budgeting as units typically budget the entire multi-year allocation for a single year to track progress over time.
- 2. Transfers variance is a result of a cleanup effort done by Office of Vice Chancellor of Research to correct prior year cash transfers that were delayed.
- 3. Overall expenditures were \$6.6 million (19%) lower than projections.

Mānoa – Other Special Funds and Other Revolving Funds

- 1. Due to the release of the General Fund restriction, Cancer Center was able to use less of their Special Fund monies and used General Funds instead, creating the Non-Personnel variance.
- 2. Additionally, some projects originally planned for FY18 were delayed and will be expended in FY19.
- 3. Personnel expenditures for Other Revolving Funds were \$1.2 million (12%) lower than projections as a result of conservative projections and delays in execution.

- 1. TFSF Personnel Expenditures were \$2.4 million (18%) lower from a combination of delays in filling vacant positions, reduction in lecturer costs, and increased availability of general funds.
- 2. TFSF Non-Personnel Expenditures were \$1.9 million (16%) lower than projections as a result of cautious spending as enrollment continued to decline. Utilities were \$1.7 million (34%) lower due to rates increasing at a slower than projected rate.
- 3. RTRF variance is a result of recording some planned revenue as a transfer rather than income.

- 1. TFSF Non-Personnel Expenditures were \$613,648 (21%) lower than projected as a result of conservative budgeting and general efficiencies. There are still \$383,552 in encumbrances that will be carried over to FY19.
- 2. Non-Personnel Expenditure from Other Special Funds were \$546,182 (22%) lower than projected as a result of not all scholarship funding being expended as well as certain programs changing their operational expenditures.

Community Colleges

- 1. As General Funds became available throughout the year, Personnel and Utilities expenditures were shifted there from TFSF, creating those variances.
- 2. Non-Personnel Expenditures were lower as some costs were shifted from General Fund to TFSF or delayed into FY19.
- 3. Closure of a Commercial Enterprise culinary venture has resulted in Other RF Revenues and Expenditures being lower than projections.

Systemwide Administration

- 1. General Fund Personnel variance due to timing issue with retirements, unanticipated resignations, and vacant positions. Non-personnel costs were also shifted from TFSF to General Fund when those resources were made available.
- 2. TFSF Transfer variance due to timing issue with document imaging assessment which will occur in FY19.
- 3. RTRF Non-personnel expenditures are \$1.1 million (10%) lower than projected due to increased fiscal prudence. The transfer variance is a result of a new allocation methodology applied this year after projections were initially made.
- 4. Other SF Non-personnel expenditure variance due to reimbursement of legal expenses and unrealized expenses for POST building recovery.

- 1. Governor had initially imposed a 10% General Fund restriction. Throughout the Fiscal Year, 7.5% of that 10% was released, resulting in an additional \$6.5 million that campuses used to offset TFSF expenditures.
- 2. Across all funds, Net Operating Income showed a \$25.9 million gain compared to a projected \$15.8 million loss.

FY18 Fourth Quarter Financial Report

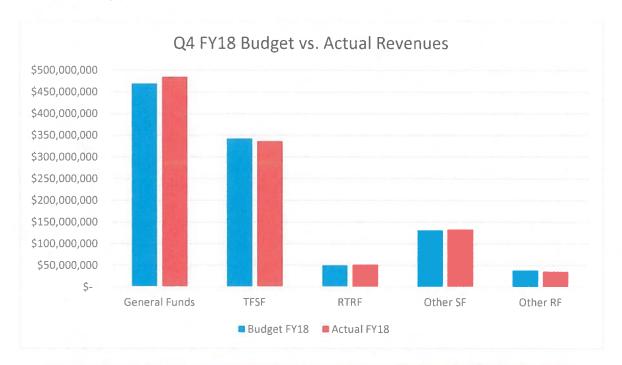

UNIVERSITY SYSTEM SUMMARY

Introduction

Through the fourth quarter (Q4) of Fiscal Year 2017-2018 (FY18), revenues were \$8.3 million (0.8%) higher than projections. General Fund revenues were \$15.9 million (3.4%) higher than projections. All expenditures are \$33.3 million (3.2%) lower than projections, resulting from a combination of conservative budgeting, responding to declining revenues in non-general funds, and some costs delayed into FY19.

Revenues

The revenue picture through FY18 is mixed, with some fund categories outperforming projections and others not:

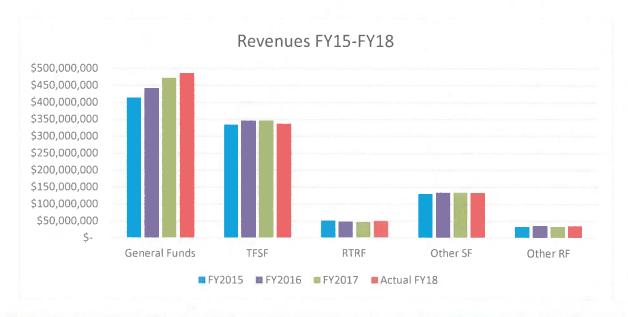

| | | FY18 Budget | FY18 Actual | Difference | % |
|--------------|------|---------------|---------------------|-------------------|-------|
| General Fund | \$ | 469,213,125 | \$ 485,167,253 | \$ 15,954,128 | 3.4% |
| TFSF | \$ | 342,399,419 | \$ 336,541,364 | \$ (5,858,055) | -1.7% |
| RTRF | \$ | 49,924,845 | \$ 50,182,349 | \$ 257,504 | 0.5% |
| Other SF | \$ | 131,025,681 | \$ 131,940,283 | \$ 914,602 | 0.7% |
| Other RF | \$ | 37,750,462 | \$ 34,808,891 | \$ (2,941,571) | -7.8% |
| All Funds | \$: | 1,030,313,532 | \$ 1,038,640,140 | \$ 8,326,608 | 0.8% |

Across all funds, revenues exceed projections by \$8.3 million (0.8%). However, while General Funds, RTRF, and Other Special Funds are above projections, Tuition and Fees Special Fund (TFSF) and Other Revolving Funds are lower.

General Fund revenues are higher than anticipated due to the lifting of restrictions. The FY18 budget was created under the expectation of a 10% restriction on general funded discretionary costs, pursuant to Executive Memorandum No. 17-04, dated August 29, 2017. However, on January 22, 2018, the Governor issued Executive Memorandum No. 18-01, which released half of the 10% restriction. Additionally, on March 28, 2018, the Governor issued Executive Memorandum No. 18-02, which released half of the remaining 5% restriction.

Other Revolving Funds are lower than projected due to variances in two units at Mānoa and a Commercial Enterprise Revolving Fund culinary venture for the Community Colleges that was closed down ahead of schedule.

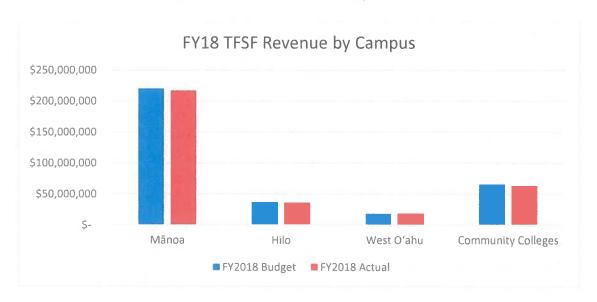

A comparison of revenues for the current and three prior fiscal years shows the increase in general fund revenues and the recent declines in both the TFSF and Other Special Fund categories.

| All Funds | \$ | 960,693,802 | \$ | 1,005,160,470 | \$ | 1,032,001,023 | \$ | 1,038,640,140 |
|--------------|----|-------------|----|---------------|----|---------------|----|---------------|
| Other RF | ¢ | 33,421,812 | Ġ | 35,895,773 | ¢ | 33,825,203 | ¢ | 34,808,891 |
| Other SF | \$ | 129,805,067 | \$ | 134,041,591 | \$ | 133,790,916 | \$ | 131,940,283 |
| RTRF | \$ | 50,823,462 | \$ | 47,935,027 | \$ | 47,283,464 | \$ | 50,182,349 |
| TFSF | \$ | 333,480,917 | \$ | 345,912,680 | \$ | 345,645,620 | \$ | 336,541,364 |
| General Fund | \$ | 413,162,544 | \$ | 441,375,399 | \$ | 471,455,820 | \$ | 485,167,253 |
| | | FY2015 | | FY2016 | | FY2017 | | FY2018 |

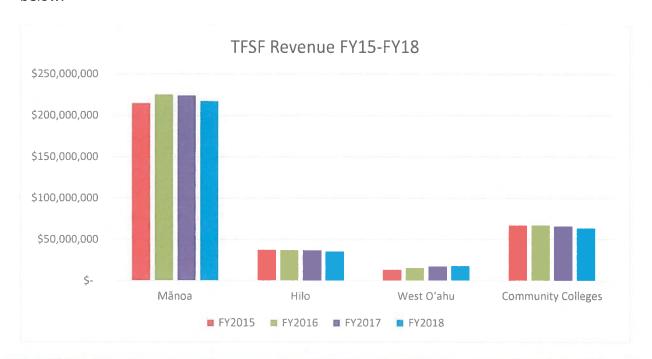

Tuition and Fees Revenue

Across all campuses, TFSF revenue is \$5.9 million, or 1.7%, below projections. Revenues are lower across all campuses with the exception of West O'ahu.

| Campus | F | Y2018 Budget | F | Y2018 Actual | D | ifference | %age |
|--------------------|----|--------------|----|--------------|-------|------------|-------|
| Mānoa | \$ | 220,800,567 | \$ | 217,507,413 | \$ (: | 3,293,154) | -1.5% |
| Hilo | \$ | 36,632,748 | \$ | 35,354,887 | \$ (: | 1,277,861) | -3.5% |
| West Oʻahu | \$ | 17,835,564 | \$ | 18,049,034 | \$ | 213,470 | 1.2% |
| Community Colleges | \$ | 65,612,600 | \$ | 63,220,408 | \$ (: | 2,392,192) | -3.6% |
| Systemwide Support | \$ | 1,517,940 | \$ | 2,409,622 | \$ | 891,682 | 58.7% |
| Total | \$ | 342,399,419 | \$ | 336,541,364 | \$ (| 5,858,055) | -1.7% |

The trend for TFSF revenue by campus for the past four fiscal years is presented below:

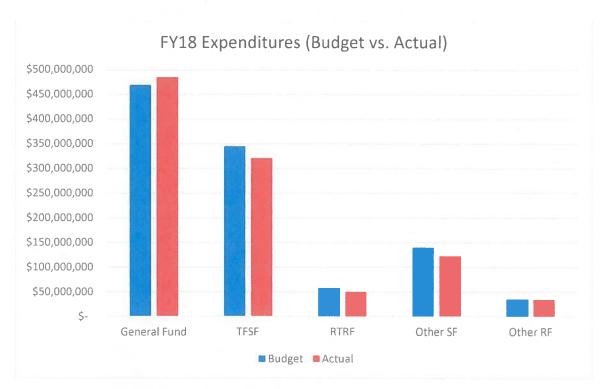

| Campus | FY2015 | FY2016 | FY2017 | FY2018 |
|--------------------|-------------------|-------------------|-------------------|-------------------|
| Mānoa | \$ 214,837,431 | \$ 225,456,509 | \$ 224,323,882 | \$ 217,507,413 |
| Hilo | \$ 37,443,534 | \$ 37,224,613 | \$ 36,887,139 | \$ 35,354,887 |
| West O'ahu | \$ 13,576,921 | \$ 15,238,449 | \$ 17,330,885 | \$ 18,049,034 |
| Community Colleges | \$ 66,798,904 | \$ 67,033,462 | \$ 65,520,953 | \$ 63,220,408 |
| Systemwide Support | \$ 824,127 | \$ 959,647 | \$ 1,582,761 | \$ 2,409,622 |
| Total | \$ 333,480,917 | \$ 345,912,680 | \$ 345,645,620 | \$ 336,541,364 |

The decline in TFSF revenue is to be expected given declining enrollment at every campus except West O'ahu. Campuses are looking to address this decline through managing expenditures as well as enrollment management initiatives.

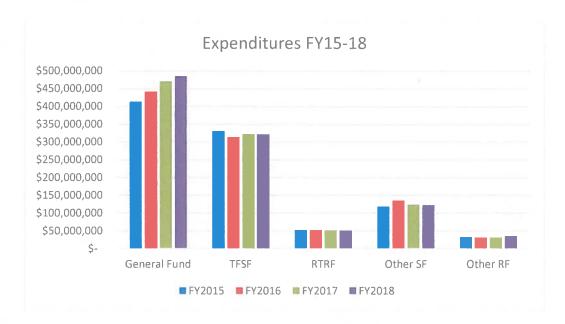

Expenditures

With the exception of the State General Fund, actual expenditures for all fund categories are lower than projected expenditures for FY18. This can be attributable to generally conservative budgeting during construction of the FY18 spending plan as well as responding to the revenue situation during budget execution.

| Fund | Budget | Actual | Difference | %age |
|--------------|---------------------|---------------------|--------------------|--------|
| General Fund | \$ 469,213,125 | \$ 485,167,248 | \$ 15,954,123 | 3.4% |
| TFSF | \$ 345,598,683 | \$ 320,938,699 | \$ (24,659,984) | -7.1% |
| RTRF | \$ 57,032,660 | \$ 50,408,475 | \$ (6,624,185) | -11.6% |
| Other SF | \$ 139,808,943 | \$ 122,291,739 | \$ (17,517,204) | -12.5% |
| Other RF | \$ 34,437,081 | \$ 33,935,974 | \$ (501,107) | -1.5% |
| Total | \$ 1,046,090,492 | \$ 1,012,742,135 | \$ (33,348,357) | -3.2% |

When comparing actual expenditures to prior years' experience, expenditures for FY18 are higher than FY17 in aggregate. However, this is largely due to the increase in General Fund expenditures. TFSF, RTRF, and other Special Funds expenditures are all lower in FY18 than FY17.

| Fund | FY2015 | FY2016 | FY2017 | FY2018 |
|--------------|-------------------|-------------------|-------------------|---------------------|
| General Fund | \$ 413,148,657 | \$ 441,372,790 | \$ 471,452,761 | \$ 485,167,248 |
| TFSF | \$ 330,565,196 | \$ 313,648,021 | \$ 321,311,342 | \$ 320,938,699 |
| RTRF | \$ 51,236,101 | \$ 51,505,159 | \$ 50,423,511 | \$ 50,408,475 |
| Other SF | \$ 117,984,235 | \$ 134,246,598 | \$ 124,000,114 | \$ 122,291,739 |
| Other RF | \$ 31,979,260 | \$ 30,694,116 | \$ 30,774,004 | \$ 33,935,974 |
| Total | \$ 944,913,449 | \$ 971,466,684 | \$ 997,961,732 | \$ 1,012,742,135 |

Net Operating Income

Across all Means of Financing, revenues outpaced expenditures by \$25.9 million. This was \$41.7 million more than the projected loss of \$15.8 million.

| | Budget | Actual | Difference |
|--------------|-----------------|---------------|----------------|
| General Fund | \$ - | \$ 5 | \$ 5 |
| TFSF | \$ (3,199,264) | \$ 15,602,665 | \$ 18,801,929 |
| RTRF | \$ (7,107,815) | \$ (226,126) | \$ 6,881,689 |
| Other SF | \$ (8,783,262) | \$ 9,648,544 | \$ 18,431,806 |
| Other RF | \$ 3,313,381 | \$ 872,917 | \$ (2,440,464) |
| All Funds | \$ (15,776,960) | \$ 25,898,005 | \$ 41,674,965 |

MĀNOA

General Fund

Utility expenditures were not projected to occur on General Funds; however, Cancer Center incurred expenditures for utilities due to release of the Governor's restriction. Campus utilities were also charged in Q4 to maximize the use of general funds. Non-personnel expenditures were primarily due to equipment purchase for Facilities for energy data systems collection and for performance funding expenditures related to student success and student recruitment.

Tuition and Fees Special Fund

Personnel expenditures were lower due to units' conservative projections. Due to personnel expenditures being lower, several units including CTAHR, JABSOM and Facilities expended funds on non-personnel expenditures resulting in a variance in that category. This allowed these units to make one time investments to further their mission.

Research & Training Revolving Fund

RTRF expenditures are budgeted based on the total amount of allocation given to the units for their facilitating money. Since this money is used to support start up packages and longer term projects, units typically budget the entire amount of allocation even though it might not be spent in the current year. This is a means to track the progress of the project over a period of time and to be able to calculate a balance for the Principal Investigators.

Transfers were higher than budgeted because of a cleanup effort done by the Office of the Vice Chancellor of Research (OVCR) to correct prior year cash transfers that were delayed. Since these transfers included adjustments from prior years, this would cause the actual transfers to be higher than what was budgeted.

Other Special Funds

Non-personnel expenditures on other special funds were lower due to several reasons. Cancer Center expenditures were lower than projected due to receiving funds tied to the release of the Governor's restriction of general funds. This allowed Cancer Center to utilize less of their Cancer Center special fund monies. Cancer Center also did not transfer funds for repair and replacement reserve in FY18 and delayed a projected expenditure due to that non-transfer. Student Housing had estimated to complete several repair and maintenance expenditures in FY18, but the projects were delayed and are now budgeted to happen in FY19 totaling about \$6.7 million. Commuter Services also had lower than projected expenditures due to operational cost savings and

not replacing as many Pay-To-Park machines as anticipated. Telecomm had projects that were budgeted to occur in FY18 that were delayed until FY19.

Transfers for other special funds had a variance mostly due to over-estimating the amount of transfers from the state for the Tobacco Settlement money. Original estimate based on the prior fiscal year was about \$11.8 million, the actual transfer came in closer to \$9.4 million.

Other Revolving Funds

Personnel expenditures were lower than expected due to conservative projections of the units and due to delays in execution of some of the HI-DESIGN projects. University Health Services also had lower personnel expenditures due to changes in funding for their permanent personnel.

Non-personnel expenditures were higher than expected for some units and lower for others. Division Food Services under Student Affairs had prior year payments for invoices and replacement of a boiler in Hale Aloha Cafeteria, resulting in higher than projected expenditures. This was in part offset by lower than expected expenditures primarily in three units: University Health Services had projected to incur renovation costs that did not occur; Facilities had budgeted for replacement of equipment which did not occur; and Campus Services had lower non-personnel expenditures due to using fewer contracted services and hiring more student employees.

Transfers were higher than expected due to Facilities transferring funds from their Facilities Use fund to cover AIM costs which was not included on their BOR budget. Student Life had an unbudgeted one time transfer to correctly record One Card transactions as part of Campus Center instead of part of Co-Curricular Activities.

HILO

Tuition and Fees Special Fund

Personnel expenditures are about \$2.4 million, or 18% lower than planned due to delays in filling vacant positions, reduction in lecturer costs and more than planned general funds available for personnel costs. The delay in filling vacant positions and reduction in lecturer cost is in response to a decline in enrollment.

Non-personnel expenditures are \$1.9 million, or 16% lower than planned due to cautious spending as enrollment continued to decline. Also contributing to the lower expenditure is the timing of when encumbrances are liquidated and recorded as expenditures, as it is difficult to accurately project when payments are made for construction and CRDM related projects.

Utilities are about \$1.7 million, or 34%, lower than planned due to rates increasing at a slower pace than projected. Also, the budgeted amount is gross of any energy savings realized during the fiscal year.

Research and Training Revolving Fund

Revenue is \$555,000, or 16% lower than planned due to the recording of planned revenue as a transfer-in rather than income.

Net Transfer is \$985,000 less than planned due to the receipt of funds being recorded as a transfer-in rather than revenue and also transfers-out were lower than anticipated.

WEST O'AHU

Tuition and Fees Special Fund

Although the campus is \$613,648 below the projected "Non-Personnel" expenses, there was \$383,552 in encumbrances and pre-encumbrances not yet paid by the end of the fiscal year. TFSF savings resulted from lower than projected expenses for recruitment, relocation, travel, technology, and equipment. Other cost savings incurred as efficiencies in general campus services are being utilized over contracting for services.

Other Special Funds

Non-personnel expenditures were lower than projected because of a variance in scholarship awards and from certain other programs. \$2,320,000 was awarded for scholarships for the 2017-2018 academic year. However, some students were deemed ineligible based on the fund criteria (GPA, decrease in credits, FAFSA requirements, etc.) and not all funds were expended. Additionally, several programs such as Ulu Ulu, Project Lead the Way and International Programs did not meet its projected expenditure plan due to changes in operational expenditures such as digitization services and a decrease in program offerings.

COMMUNITY COLLEGES

General Fund

Non-personnel expenditures were lower than projected because replacement equipment originally budgeted in General Funds were spent in Tuition and Fees Special Funds (TFSF). Utilities expenditures were higher than planned because electricity costs budgeted in TFSF were charged to the General Fund. Total utilities expenses for all means of financing was up 7% due to increases in kilowatt hour costs for electricity.

Tuition and Fees Special Fund

The personnel expenditure variance was also the product of efforts to balance GF and TFSF revenues and expenditures. The total variance for the GF and TFSF personnel expenditures combined was only 1%. Non-personnel costs were lower than projected because funds set aside for R&M were not expended by the end of the year. These expenditures are anticipated to occur in FY19 instead and have been included in the approved BOR budget for FY19. Utilities expenditures were lower than planned because electricity costs budgeted in TFSF were charged to the General Fund (see above).

Other Special Funds

The Other SF revenue projection was overly conservative reflecting an anticipated reduction in summer session and non-credit revenue over the preceding year. The actual revenue, however, turned out to be virtually flat when compared to the previous year.

Other Revolving Funds

Revenue and non-personnel expenditure variances are primarily due to a Commercial Enterprise Revolving Fund culinary venture that was closed down ahead of schedule.

SYSTEMWIDE ADMINISTRATION

General Funds

The variance in Personnel expenditures was largely the result of retirements, unanticipated resignations, and slow-to-fill vacant positions. Non-Personnel expenditures originally budgeted in TFSF were charged to General Funds due to salary savings.

Tuition and Fees Special Funds (TFSF)

Actual Revenue surpassed its projection due to interest income growth from higher interest rates, notably on new CD investments, and investments in government obligations that yield higher interest rates.

Non-Personnel expenditures were lower than anticipated, as expenditures originally budgeted in TFSF were charged to General Funds. The Transfer variance was primarily the result of a timing issue with the document imaging assessment to the campuses. The assessment did not occur in FY18 as budgeted, but is projected to take place in FY19.

Research and Training Revolving Fund (RTRF)

The variance in Non-Personnel expenditures was largely the result of increased fiscal prudence and a concerted effort to reduce expenditures in areas such as travel, supplies, and membership dues.

Campus RTRF allocations were determined late in Quarter 1 and a new allocation methodology was applied this fiscal year. As a result, variances exist between actual versus budgeted allocation transfers.

Other Special Funds

The variance in Non-personnel expenditures was mainly due to a reimbursement of legal expenses advanced on the Risk Management Special Fund and unrealized expenses for the POST Building recovery. Additionally, patent expenditures originally budgeted in special fund accounts are instead being recorded in revolving fund accounts.

The Transfer variance was largely due to a transfer from the System debt service reserve account to cover operating expense deficits for the UH Revenue Undertakings program.

Kalbert K. Young Vice President for Budget and Finance Chief Financial Officer

AUG 30 P5:03

RECEIVED

August 29, 2018

18 AUG 30 P2:15

UNIVERSITY OF HAWAII PRESIDENT'S OFFICE

TO:

Lee Putnam

Chair, Board of Regents

Randy Moore

Chair, Committee on Budget and Finance, Board of Regents

VIA:

David Lassner

President

FROM:

Kalbert K. Young

Vice President for Budget and Finance/Chief Financial Officer

SUBJECT: FY17 Bond Post-Issuance Compliance Update

The Administration hereby submits for the information of the Board of Regents and its Committee on Budget and Finance a report and presentation entitled "University of Hawai'i Post-Issuance Compliance Update." Since FY2013, a review has been undertaken annually to monitor a number of post-issuance compliance issues related to outstanding University of Hawai'i revenue bonds including, the amount of private activity occurring on or within facilities financed with UH revenue bonds. The attached report covers compliance review through FY17.

This report is to be discussed as an information item at the Committee on Budget and Finance meeting on September 6, 2018.

POST-ISSUANCE COMPLIANCE UPDATE

- I. Compliance Requirements
- II. Private Use Analysis Results

COMPLIANCE REQUIREMENTS

Governmental Bond Requirements

- At least 90% of the proceeds of the bond issue must be used for governmental purposes
- No more than 10% of the proceeds of the bond issue can be used for a "private business use"
- Private business use is determined over the life of the bond issue

Series 2006A Refunding (compliant)

- Financed Biomedical Sciences Building Renovations 1 and 2, Cancer Center design and planning, and various JABSOM buildings including a central plant, cooling system, and emergency generators
 - ✓ 2013 Fiscal Year private use percentage: 2.24%
 - ✓ 2014 Fiscal Year private use percentage: 3.46%
 - ✓ 2015 Fiscal Year private use percentage: 2.89%
 - ✓ 2016 Fiscal Year private use percentage: 2.39%
 - ✓ 2017 Fiscal Year private use percentage: 2.48%

Series 2006A (compliant)

- Financed student housing (Frear Hall and Hilo and Mānoa R&R) and the Gateway Cafeteria
 - ✓ 2013 Fiscal Year private use percentage: 0.00%
 - ✓ 2014 Fiscal Year private use percentage: 0.18%
 - ✓ 2015 Fiscal Year private use percentage: 2.02%
 - ✓ 2016 Fiscal Year private use percentage: 2.11%
 - ✓ 2017 Fiscal Year private use percentage: 0.60%

Series 2009A (compliant)

- Financed the following projects: Ching Field, Hawai'i CC Palamanui Campus,
 Hilo Bookstore Campus Center addition, UH Hilo College of Pharmacy, UH Hilo
 Student Housing, UH Mānoa Student Housing, UHM Biomedical Sciences Building
 addition (C-MORE), Waianae Education Center, and UH West O'ahu campus
 development
 - ✓ 2013 Fiscal Year private use percentage: 0.45%
 - ✓ 2014 Fiscal Year private use percentage: 6.09%
 - ✓ 2015 Fiscal Year private use percentage: 11.44%
 - ✓ 2016 Fiscal Year private use percentage: 2.60%
 - ✓ 2017 Fiscal Year private use percentage: 3.02%

(Private use compliance is determined over the life of the bond issue. Exceeding the allowable percentage in one year does not put us out of compliance.)

Series 2010A-1 and 2010A-2 (compliant)

- Financed construction of Cancer Center
 - ✓ Series 2010A-1 & 2010A-2 2013 Fiscal Year private use percentage: 7.89%
 - ✓ Series 2010A-1 & 2010A-2 2014 Fiscal Year private use percentage: 9.73%
 - ✓ Series 2010A-1 & 2010A-2 2015 Fiscal Year private use percentage: 5.04%
 - ✓ Series 2010 A-1 & 2010 A-2 2016 Fiscal Year private use percentage: 3.80%
 - ✓ Series 2010 A-1 & 2010 A-2 2016 Fiscal Year private use percentage: 5.89%

Series 2010 B-1 and 2010 B-2 (compliant)

- Financed UH Mānoa Campus Center Warrior Recreation Center, CC Energy Conservation Project, Culinary Institute of the Pacific, ITC building, Pan-STARRS facility, Sinclair Library Basement Renovation, Waianae Education Center, and UH West O'ahu campus development
 - ✓ Series 2010B-1 & 2010B-2 2013 private use percentage: 0.66%
 - ✓ Series 2010B-1 & 2010B-2 2014 private use percentage: 0.17% and .13%, respectively
 - ✓ Series 2010B-1 & 2010B-2 2015 private use percentage: 2.62% and 1.95%, respectively
 - ✓ Series 2010 B-1 & 2010 B-2 2016 Fiscal Year private use percentage: 2.83% and 2.10%, respectively
 - ✓ Series 2010 B-1 & 2010 B-2 2017 Fiscal Year private use percentage: 2.74% and 2.00%, respectively

Series 2012A (compliant)

- Financed the UH Mānoa telecommunications system, elevator upgrades (Gateway, Hale Aloha Towers, Hale Wainani, and Hale Noleani), bathroom renovations (Laulima, Kahawai, Hale Aloha Ilima, and Mokihana Towers), and lounge conversions (Gateway, Laulima, and Kahawai)
 - ✓ 2013 Fiscal Year private use percentage: 2.19%
 - ✓ 2014 Fiscal Year private use percentage: 2.05%
 - ✓ 2015 Fiscal Year private use percentage: 2.01%
 - ✓ 2016 Fiscal Year private use percentage: 2.09%
 - ✓ 2017 Fiscal Year private use percentage: 2.14%

Series 2015B (R) (compliant)

- Partial refund Series 2006 A (no new money)
- Series 2006 A financed student housing (Frear Hall, Hilo and Mānoa R&R) and the Gateway Cafeteria
 - ✓ 2016 Fiscal Year private use percentage: 0.48%
 - ✓ 2017 Fiscal Year private use percentage: 0.00%

(The private use percentage would be 2.48% if the refunding didn't include 25% of taxable bonds. In other words, the refunding with taxable bonds allow us to generate up to 25% of private use for this series)

Series 2015E(R) (compliant)

- Partial refund of Series 2006A Refunding Bonds (no new money)
- Series 2006A Refunding Bonds refunded Series 2002A (no new money)
- Series 2002A financed Biomedical Sciences Building Renovations 1 and 2, Cancer Center design and planning, and various JABSOM buildings including a central plant, cooling system, and emergency generators
 - ✓ 2016 Fiscal Year private use percentage: 1.92%
 - ✓ 2017 Fiscal Year private use percentage: 0.00%

(The private use percentage would be 0.60% if the refunding didn't include 25% of taxable bonds. In other words, the refunding with taxable bonds allow us to generate up to 25% of private use for this series)

Thank You

Committee on Budget & Finance August 2, 2018

Review & approval of committee goals & objectives.

The committee's functions per BOR bylaws are:

- (1) Work in concert with the University administration relating to operating and capital improvement budgets. [Note: CIP has historically been reviewed by the P&F committee before being included in the budget reviewed by the B&F committee.]
- (2) Examine the budgetary process, budget proposals, expenditure plans, and development plans. [Note: development plans have historically been the purview of the P&F committee.]
- (3) Discuss the implementation of the budgetary decisions with the University administration, especially amendments thereto or when circumstances require deviations from expenditure plans.
- (4) Review matters related to business affairs, endowment funds, and other financial assets of the University.
- (5) Exercise general oversight and policy direction over the University's financial systems and programs.

Proposed goals and workplan for FY 19:

- (1) Exercise general oversight and policy direction over the University's budget (revenues and expenditures)
 - Review the administration's operating budgets, with emphasis on budget alignment with university priorities.
 - o Review and recommend approval of the FY 19 budget projections (August)
 - o Review and recommend approval of the BY 20-22 policy paper (Sept)
 - o Review and recommend approval of the BY 20-22 budget submission to the governor and legislature (Nov)
 - o Review and recommend approval of the rolling 6-year operating budget
 - o Review any FY 19 supplemental budget request (as needed)
 - Review quarterly budget-to-actual operating reports
 - o 4th quarter FY 18 (Sept)
 - o 1st quarter FY 19 (Nov)
 - o 2nd quarter FY 19 (Feb)
 - o 3rd quarter FY 19 (May)
- (2) Exercise general oversight and policy direction over the investment and spending policies of the University's "legacy" endowment.
 - Review a revised contract with UBS for management of the endowment (Nov)
 - Review the fiduciary responsibilities of the board for the investment of the legacy endowment and the ASUH-Manoa endowment created by the sale of Honolulu Stadium stock and change practices if appropriate (Nov)
 - Study and determine whether it would be possible, feasible and beneficial to UH to transfer responsibility for the investment of its legacy endowment to UHF (Nov)
 - Review quarterly reports of the legacy endowment's performance
 - o 4th quarter FY 18 (Sept)
 - o 1st quarter FY 19 (Nov)
 - o 2nd quarter FY 19 (Feb)
 - o 3rd quarter FY 19 (May)
 - Review and recommend revisions, if appropriate, to the regents policy on investments (Nov)

- (3) Exercise general oversight and policy direction over other matters related to business affairs and financial assets of the University.
 - Review and accept bond compliance reports for FY 17 (Feb Sept)
 - Review impacts of tax law changes on UH and UHF (Feb)
 - Review and recommend revisions, if appropriate, to the reporting relationships of the office of internal audit
