Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

City, State: Hawaiian Kingdom,

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. Additional comments: Kanaka Maoli and people around the world have shown a large opposition to the construction of the TMT and to ignore that is wrong. You all know it is wrong and immoral so why do you continue to ignore us? We will never stop fighting for our land or our rights as the indigenous people of Hawai‘i.

**Additional comments:** Recent decades have shown that UH has not been a good steward of Mauna Kea's natural and cultural resources. Its mismanagement includes not obtaining anything resembling fair market value from its business partners to operate at the summit. It has also ignored federal environmental reviews finding a deleterious impact of more projects. The management of Mauna Kea is better suited to a government or nonprofit agency that can better center the express needs of Hawaiian's indigenous population.

Shame on the UH!

Additional comments: The UH also claims to support indigenous Hawaiian knowledge and claims to be a center for learning and collaborating with Hawaiian people. Actions by the university must reflect that. It cannot be self-serving lip service to make the UH seem special, tolerant of the people are whose dispossession enables its existence. Science is not a part from culture. Science can and has been a tool of great violence, do not forget that. Do not further perpetuate that.

Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: UH has grossly mismanaged Mauna Kea all these years and it’s time a commission for the protection and preservation of our highest altar be run by those who led the massive protests of 2019.

Additional comments: It’s unconscionable that UH has maintained their stance on desecrating a sacred place that’s central to native Hawaiian culture and identity given that Mauna Kea is a part of Hawaiian cosmology. This is shameful and as a Hawai'i resident who was born and raised in the islands, I view the building of TMT as an inadvertent (or explicit) neocolonial tactic to cultural erasure much in the same way that State tried to when the government outlawed ʻōlelo Hawai‘i in 1896. The State has since made great progress on that front with the immersion of Hawaiian charter schools and for UH to continue this assault on Mauna Kea is a major step backwards from fortifying Hawaiian culture and is also contributing to the already existent polarization between settlers and kānaka ʻōiwi as well as racism against Hawaiians.

**Additional comments:** We will stand in solidarity for Mauna Kea forever. It is a shame that the management of Mauna Kea continues to be led by corrupted, blood sucking, and destructive entities. The majority of "Public" lands are "Ceded Lands" Hawaiian Kingdom Crown Lands that are meant to be designated for the good of the public, including the benefits of Kanaka Maoli (Native Hawaiians) and their descendants. The Office of Maunakea Management, University of Hawai‘i at Hilo, Board of Land and Natural Resources, continue to fail to protect our "natural resources" that sustains life by allowing "Public" lands to be used for commercial, mixed, industrial, government use, etc. without communicating with the people of this land concerns for over 65 years. This needs to end. We the kanaka (people) of this land refuse to continue to allow this desecration to Papa (our earth mother). Do what is right for the land, once the damage is done, it is never the same AGAIN. STOP THE DESECRATION BEFORE IT IS TOO LATE. Kūpa‘a ma hope o ka `āina (ever loyal to the land)!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

**Additional comments:** I oppose to the new UH proposed plans 2021 on Mauna a wakea, Mauna a wakea is our Piko, it is our life source that was written in our (Kanaka 'oiwi) creation story the Kumulipo which predates Darwin theory of creation by 2000 yrs. I am contesting to the brutal, consistent, unauthorized, illegal occupation of UH and all US military on all our sacred places such as Maunakea. That'n's DHHL land for the Hawaiian families left by Kamehameha so that all Hawaiians would have land to sustain themselves. Enough is enough with all this desiccation to our lands by the US and it's forces. Hewa, you are not allowed to continue to steal, kill, and destroy our people and continue the illegal land grab by the fake state allowing entities like OHA, DHHL, DOT, etc to continue to misrepresent the people of Hawaii, we would greatly appreciate if our concerns and our voices be heard to the injustice that continued plaqueour beautiful'ain!, these entities under the rule of the US continue to rape our future generations of their /our birthright as the original people of this land. All of this is unethical and if we are going to need to protect our sacred places like so many other issues we will fight. Why, do we only have these types of issues here in Hawaii and no where else in the world. Stop the injustice amongst a peace people. We are Hawaii and Hawaiian is in us, we are one. Malama Aloha 'aina was the concept ad until today is still our concept for demonstrating love and peace through Kapu Aloha. IDK how long that's going to last if push goes to shove, we will defend what is ours till the end. Do you really want all hewa on yourself when the day is done a d you go home from your job. Enough is enough so that we would have land to sustain ourselves, not for desecration an giving authority to those entities that don't respect the people (communities) and push their power on us as if we were nothing, I take this seriously as all this

stress is causing harm to my well being, how much longer do I, my kupuna and our future generations have to go through all this corruption and demise? I hold each and everyone of you here today responsible for the generational trauma caused by the United States, your constituents, all parties responsible for this continued war crimes amongst a always peaceful people. Go find another Country to abuse, we are done with all you attempt to keep your control and leave our home... NOW

</table>

**Additional comments:** The duty of the University and the State should be to preserve this wahipana for all future generations to come. Allowing foreign and non-native influences to determine the future of Mauna Kea is unacceptable.
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: I oppose to the new UH proposed plans 2021 on Mauna a wakea, Mauna a wakea is our Piko, it is our life source that was written in our (Kanaka \'oiwi) creation story the Kumulipo which predate Darwin theory of creation by 2000 yrs. I am contesting to the brutal, consistent, unauthorized, illegal occupation of UH and all US military on all our sacred places such as Maunakea. That\'s DHHL land for the Hawaiian families left by Kamehameha so that all Hawaiians would have land to sustain themselves. Enough is enough with all this desicration to our lands by the US and it\'s forces. Hewa, you are not allowed to continue to steal, kill, and destroy our people and continue the illegal land grab by the fake state allowing entities like OHA, DHHL, DOT, etc to continue to misrepresent the people of Hawaii, we would greatly appreciate if our concerns and our voices be heard to the injustice that continue plaguing our beautiful\'ain... these entities under the rule of the US continue to rape our future generations of their /our birthright as the original people of this land. All of this is unethical and if we are going to need to protect our sacred places like so many other issues we will fight. Why, do we only have these types of issues here in Hawaii and no where else in the world. Stop the injustice amongst a peace people. We are Hawaii and Hawaii is in us, we are one. Malama Aloha 'aina was the concept ad until today is still our concept for demonstrating love and peace through Kapu Aloha. IDK how long that\'s going to last if push goes to shove, we will defend what is ours till the end. Do you really want all hewa on yourself when the day is done and you go home from your job. Enough is enough so that we would have land to sustain ourselves, not for desecration an giving authority to those entities that don't respect the people (communities) and push their power on us as if we were nothing, I take this seriously as all this
stress is causing harm to my well being, how much longer do I, my kupuna and our future generations have to go through all this corruption and demise? I hold each and everyone of you here today responsible for the generational trauma caused by the United States, your constituents, all parties responsible for this continued war crimes amongst a always peaceful people. Go find another Country to abuse, we are done with all you attempt to keep your control and leave our home... NOW

Additional comments: The trauma this is causing Native Hawaiians is unacceptable and directly impacts their health and well-being, which impacts us all. Non-Hawaiians should have no plans for spaces that are sacred to Native Hawaiians, that is their birthright to protect. The only role for non-Hawaiians is to support Native Hawaiians in those efforts to protect and preserve the ecosystem for future generations, efforts that benefit us all.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** When I have to submit my proposal for my senior thesis for just interviews alone, I need to submit for IRB approval. Without consent from interviewees, I would never receive approval to move forward with my research. Yet, none of the telescopes on the Mauna today have the consent of Kānaka Maoli. Why are the standards for gigantic telescopes with millions and billions of dollars in resources and boards of educators and “scholars” so low? It’s time for TMT and all other telescopes to understand that their research has ZERO legitimacy without the consent of the Native people and the Native land they desecrate. The inter generational trauma that this “research” and the strain on the Kanaka Maoli community is irreversible. Do not further harm what you know cannot be fixed.

Additional comments: I don’t think anyone should be able to lease the top of the mountain and it should be left to the gods. If Hawaii doesn’t want anything on MAUNA Kea then nothing should be on the top of Mauna Kea. Okay there are the 5-10 Hawaiian scientists that support this project but what about the 1,000s of Hawaiians who don’t.

**Additional comments:** In conclusion, the Mauna Kea summit has been mismanaged for decades. This proposal for the TMT is another example of missing the mark of what the people of Hawaii want. I am vehemently opposed to including the TMT in the master plan for this mountain. Please come to the table with a plan to support the people of Hawaii, it should include ecological restoration at the forefront of the design and allow a voice to native peoples.

**Additional comments:** Hello. I’m writing as a friend of the Kanaka Maoli, and a former resident of Lahaina. I urge you to consider the voices of the people of Hawaii and what they have said for many years now regarding the building of the 30 meter telescope on Mauna Kea. To continue with this development despite an enormous and global show of opposition by native and non-native peoples is just a modern interpretation of the many violations of indigenous values and sanctity. Putting the interests of science, whether it be one university or of space-curious people everywhere, over the urgent and human rights of a group is not just. Please listen to the people of Hawaii and do not build telescopes on their most sacred landscape.

YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

X

**Additional comments:** Listen to the people and stewards of this land! If this institution claims to empower Native Hawaiians through education, yet cut their legs from underneath them by supporting the desecration of a sacred site while placing local families and Hawai’i island at financial and ecologic harm—YOU ARE PART OF THE PROBLEM NOT THE SOLUTION! Stop now and shame on University of Hawai’i!

Additional comments: ALOHA, I AM OPPOSED TO YOUR SO CALLED MASTER PLAN OF FRAUD DESECRATION COLONIALISM OPPRESSION UNLAWFUL MANAGERIAL INCOMPETENCY ON OUR MAUNA. IT IS TIME TO LET GO OFF THIS PROJECT AND GIVE BACK ALL MONIES (KICKBACKS) TO GET TMT BUILT. GO BUILD YOUR WEAPON OF MASS DESTRUCTION ON TOP MOUNT FUJI OR SOMEWHERE ELSE. ITS ENOUGH THAT THE LANDS THE US AND STATE OF HAWAII (PROVISIONAL GOVERNMENT ) ARE IN GREAT BREACH OF TRUST ACCORDING TO LATEST AUDIT. WAR CRIMES ARE DOCUMENTED AND WE WILL NEVER LET SETTLER COLONIZERS WITH NO ALOHA FOR HAWAII OR ITS ABORIGINAL PEOPLE ANYMORE. SHUT THIS HEWA ACTION DOWN!! JUST BECAUSE STEALING LAND BY THE US , SOH, AND MILITARY DOESNT MAKE IT RIGHT FOR OTHE CORPORATE AGENCIES TO DO THE SAME CORRUPT ACTS. GET THE HELL OFF OUR MAUNA!! A’OLE PONO HAOLES GO BACK TO YOUR OWN COUNTRY AMELIKA USA!!! SEE YOU ON THE MAUNA!!

Additional comments: Dear UH Executive Leadership, It is your obligation to listen and heed the requests of native Hawaiians who want to keep their land free. After the US stole the indigenous Hawaiian islands from its rightful owners, it is our obligation to halt construction of TMT on Mauna Kea. Respect that it is a sacred site and that people who worship it and who are connected to its history should not have to fight for their basic rights to their own land. I am in opposition of TMT construction project.

They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!  

---

**Additional comments:** We must protect this land for generations to come. Sacred places are sacred for a reason. It is way past time to listen to the Kanaka Maoli and environmentalists, and people like me who know we need to protect our watershed.

**Additional comments:** As an additional comment, I will add that I hold an undergraduate and Master’s Degree from UH Mānoa as well as a Master’s in Law and Policy from Vermont Law School. The manner in which the proponents of this project are going about this process is: 1. In violation of the Scientific Precautionary Principle (2) A continued legacy of leveraging Supremacist State Power in order to further desecrate and colonize. The time for bulldozing over the voices of the land, in the name of western science is over. History has taught us that the hubris of institution is something to be wary of. Mahalo for doing the right thing.

**Additional comments:** Protect the Mauna for the sake of its sacredness and for the sake of future generations. The mauna is a relative, and should be treated with the utmost respect. Let's focus the TMT efforts and budget on clearing away pollution and climate change instead; then everyone can see stars more clearly and sacred mountains can stay in peace.

**Additional comments:** The halt of this project clearly means a lot to the indigenous people of Hawai‘i. As someone who is still fascinated by astronomy and supports its research, this is so much bigger than that. The land has already been damaged enough, and will only suffer more with the follow through of a plan like this. There are so many other places where a telescope like this would succeed, and not have to desecrate the sanctity of the land or destroy the ecosystem of it. Please permanently stop the construction of TMT on the Mauna.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.  
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: Please take into consideration the real and last effects building this unnecessary telescope will have on the people who’s ancestors have called this land home for thousands of years. You cannot be so heartless as to disregard that and allow that to go through. The world is watching and ultimately if this went through, you would go down in history as the villains you are. I don’t think it’s far fetched to call you villains when you are colonizing and stealing sacred land just the same as Christopher Columbus. Please respect the natives who’s land it is. Thanks you.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawaiʻi and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawaiʻi residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. Shame on the UH!

Additional comments: The indigenous people of this land have told you no, this is sacred to them. Be respectful of that no and stop. The fact that you are on stolen land, trying to take up more space on SACRED LAND is so disrespectful and violent. You should all feel ashamed of yourselves for ignoring the words and actions of the kanaka.

Additional comments: The power of love It is all about power and it seems that the power of domination and money faces the power of love and can only lead to one solution: the experience shows that one side wins and thus the other loses. Here is the conflict on both sides. But when you feel connected to all people, you are not on one side and realize that the power of love is rooted in each one of us. And if you give it the priority then this means to make sure that everyone is comfortable, happy and satisfied and nobody comes to harm. Then it happens that someone changes the perspective because something does not feel right anymore and develops compassion for others. So much that contrary to his previous convictions he takes his influence in order to bring about social changes that create more peace in the minds & hearts of many. A victory for everyone.

**Additional comments:**  Everyone knows all the good pictures come from probes!! There's NO SENSE in risking the top of the watershed in the middle of the Pacific Ocean for ANY telescope and all the rest shld get cleaned up rm! No was emphatically the answer by kanaka maoli on THEIR LAND! No means NO!!

Additional comments: Mauna Kea belongs to the indigenous people of Hawaii. They have the legal, historical and inherited right to protect their land. The Kanaka Maoli people and their protection of the sacred mountain of Mauna Kea must be respected. We demand any construction to cease. I do not consent to the building of the thirty meter telescope on Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: For many years Native Hawaiians have rejected this plan for many reasons including its effect on the watershed. Water is our most important resource. It’s crucial we listen.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

X

Additional comments: You’ve repeatedly stated that you want to hear from the native Hawaiian community, yet, when a majority of us voice oppositions to ANY and ALL CONSTRUCTION on the Mauna, you ignore us. You look the other way. Native Hawaiians and local people oppose the building of TMT or any other works on the Mauna because the Mauna holds religious value to the very people whose land you live on. This is a form of colonization and disrespect as you desecrate and show clear ignorance towards native beliefs. The very people who are far to often left behind by the government. DO NOT do any more construction on the Mauna because it is the just and respectful thing to do. Prove that you are listening.

**Additional comments:** I am here making use of a form circulated by ethnic Hawaiian opponents to TMT, through which they hope many people will submit the points stated above even without understanding them. Most of those points are false or misleading. Here are my own comments. I want to encourage you advisors and decision-makers to reject the racial divisiveness of the protestors, and to support the construction of TMT with appropriate safeguards for environmental protection and standards for employment and visitation that will not mandate promulgation of or propagandizing for any ethnocentric cultural or religious views. The Hilo/Kona newspapers quote the Ka Lahui spokesperson speaking at a recent hearing, who concluded: "Any plan for the future of the mauna has to come from Kanaka Maoli." Of course that is false as a matter of fact, and wrong as a matter of morality. It displays the racism and routine arrogance of the ethnic Hawaiian race-nationalists, whose creation legend is part of their religious fascism in which they think every parcel of land is sacred to their gods and their ethnicity. Of course they have a right to whatever religion they choose to believe in -- but the rest of us have no obligation to knuckle under to them. In our society with many races, cultures and religions, we all must fight to protect full equality for everyone. We are all equal in the eyes of God(s) and we should all be treated equally under the law by our government. Hawaiian race-nationalists think people with a drop of the magic blood have a right to set land-use policy and govern Hawaii because their creation legend says they are genetically children of the gods and brothers/sisters to the land in a way nobody else can ever be who lacks a drop of that blood. The Hawaiian version of critical race theory says Whites are inherently racist colonialist oppressors and ethnic Hawaiians are their main victims with a right to take control by any means.
necessary. People in Hawaii are horrified at White-nationalism on the mainland, but strangely silent about Hawaiian race-nationalism here. The fascists say "Any plan for the future of the mauna [or any other part of Hawaii] has to come from Kanaka Maoli." These zealots will never abide by decisions made by multiracial legislatures or government hearings. What they say should be treated as logically irrelevant to decision-making. They have freedom to say it, but the rest of us have the right to reject it.

Shame on the UH!

Additional comments: As someone who is a scientist and at the same time a student of Hawaiian culture, I am appalled at how UH is managing this. The expected benefits from the TMT or the investment it brings would never be enough to make it worth erasing and further damaging such a sacred place. Furthermore, the world has its eyes on UH and Mauna Kea. Not listening to kanaka maoli and disrespecting the wishes of the native people of Hawai‘i is sending a message that they are not important, and eventually other sites and other natives are not important as well, when set against money. Please revise the plan, and do not allow the TMT to be built on the Mauna.

Additional comments:
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. **Additional comments:** The TMT is one of the greatest projects to ever come to Hawaii. It will diversify our economy and bring jobs and scholarships for our keiki. It will set up Hawaii as the premier astronomy location for decades to come. Please push forward with the project. The protesters have made clear that they are not interested in talking. Please do what is best for the people of Hawaii and build TMT.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawaiʻi residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawaiʻi’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawaiʻi have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakula Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: Shame on you for thinking that you know what should be done for us! We speak for ourselves. I am Hawaiian and I say NO to TMT!

**Additional comments:** The people have spoken but our voices have fallen upon deaf ears. Enough is enough. UH has mismanaged our mauna from the 60s. NOW that we are more aware, we can oppose such a monstrosity such as TMT. Sometimes it's not about $$. It's about doing the right thing. It's time to mālama our mauna.

Additional comments: This should have be in the planning...... HRS §711-1107 Desecration. (1) A person commits the offense of desecration if the person intentionally desecrates: (a) Any public monument or structure; (b) A place of worship or burial; or (c) In a public place the national flag or any other object of veneration by a substantial segment of the public. (2) "Desecrate" means defacing, damaging, polluting, or otherwise physically mistreating in a way that the defendant knows will outrage the sensibilities of persons likely to observe or discover the defendant's action. (3) Any person convicted of committing the offense of desecration shall be sentenced to a term of imprisonment of not more than one year, a fine of not more than $10,000, or both. [L 1972, c 9, pt of §1; gen ch 1993; am L 2002, c 198, §1]n

Shame on the UH!

Additional comments: The University of Hawaii has seriously mismanaged Mauna Kea for decades. The University has an inherent conflict of interest and has violated the conservation district by developing an industrial zone of telescopes at the summit. The University of Hawaii has no business managing the delicate ecosystem at the summit of Mauna Kea.

**Additional comments:** Aloha, I am an attorney and 4th generation resident in Hawai‘i, with my family immigrating from Okinawa, Madeira and the Azores. I am concerned about the current process limiting discourse and community engagement relating lease extensions on Mauna Kea amidst the COVID-19 pandemic. This contravenes acting in good faith, and casts suspicion over the entire process. Beyond process, there is absolute disregard of the rights of Kanaka Maoli under state, federal and international law. Would you build the TMT on top of the Sistine Chapel, the Punchbowl Or Arlington Cemetry, a temple, mosque or synagogue? We are simply asking for equality and equity, an respecting that Mauna Kea is a sacred place. As the adage goes, “actions speaks louder than words. If you want to be regarded as an Indigenous place of learning, then start by respecting this sacred site, and stop all plans for the TMT. Anything less is not conciliation, but an act of War against Kanaka Maoli.

**Additional comments:** Why is there continual misrepresentation of local support for the building of the TMT? There is not much support and our local community continue to be vocal because we have seen how this mauna and area around Mauna Kea is mismanaged. UH system does not appear to service our community but rather to have its own agenda of profiting foreign entities over the decades of mismanagement many local groups have pointed out!

Shame on the UH!

Additional comments: Eventually there will be no sacred land left. Time to stop this desecration. Time to save the little that is left. For science there are good alternatives else where. Few or no extra jobs will be created for locals and Hawaiians.

Some of these suits and cases are still pending.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: All foreign entities Who have been ileagally occupying MaunaKea have no intention to conserve Maunakea as respectable stewards of the Ahupuaa. As my Aunt Hannah Kane would always say In years past, the Land is the Kanaka Peoples from the Mountain top all the way down to the Sea. No Consent, and No TMT On Maunakea!!!

Shame on the UH!

Additional comments: As a student at UH @ Mānoa, I’m appalled that funds are being funneled into this project. UH claims to be a Hawaiian place of learning but is silencing the voices of the people they claim to represent. The obvious discontent of natives and others from around the world show that the institution does not support kanaka maoli. I strongly believe that the removal of TMT is directly tied to the survival of Hawai‘i in the wake of climate change. Although the construction of the telescopes are said to be helping science and technology, it’s not what we need today. We need the money and resources being funneled into this project to go towards revitalizing the a‘āina. The answers to our current climate crisis won’t be in space. For decades kanaka maoli have been making their voices heard in opposition, it’s time that you all listen. The proven ecological damage that comes from construction is not worth whatever it is we are looking for in the sky. The funds need to be invested in our environment, the ocean and the ‘āina. Protect the pu‘uhulhulu, the ‘ōhia trees, the coral, the fish, the streams, and all other aspects of our earth that we stand to lose in coming years. This is not how we diversify the economy. That can only be done when capitalism is no longer serving the white supremacist agenda, and this project perpetuates the values of that agenda. If UH really wants to diversify the economy, they’d find alternatives opportunities for environmental remediation guided by kanaka maoli knowledge. We know this land and what’s needed for it to thrive, and to ensure our survival you need to listen to us. This project needs to be stopped and funding discontinued immediately.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

City, State: Honolulu, HI

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** After residing on Maui for eight years and being lucky enough to behold the beauty that is the Hawaiian Islands, I have come to understand that the care of the land and waters are best decided by Native Hawaiians and Hawaiian Nationals, not U.S. settlers who have consistently exploited finite resources for profit to the detriment of community wellness. Decades of mismanagement of Mauna Kea must be addressed before more construction is even considered. It makes no sense to me to build more without the consent of the Kingdom without at least carrying down the decommissioned telescopes. Even the Canary Islands are finding TMT to be a bad deal for their community. I also recognize that TMT and UH are not above racist nor genocidal narratives to further their means in their public relations. TMT and UH must be held accountable for purporting that this is a matter of science and technology versus "superstition" or "religion." This reduction is used to depict Natives as barbarians rather than countrymen who achieved a literacy rate in the 90 percentile in the latter half of the 1800s. This part of history is being made more and more visible these days. Beware to all who dehumanize for their means..

| Opposition to the University of Hawai’i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai’i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. | X  
| Opposition to the University of Hawai’i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
The indigenous people of Hawai’i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. | X  
| Opposition to the University of Hawai’i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! | X  
| Opposition to the University of Hawai’i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! | X  

**Additional comments:** No to tmt.

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. | X |
| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. | X |
| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. | X |
| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. | X |

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

X

Shame on the UH!

Additional comments:  You know all the reasons to reject this master plan and discontinue UH’s leasing and management of this sacred place. Mine won’t be new to you. The onus is yours to justify how UH has earned a renewed lease. It is a privilege to manage this mauna. Prove to us why UH should continue to hold it.

**Additional comments:** My aunty told me that when she was in college they were fighting the construction of a different telescope at the time. Does it seem right that 20 something years later to have to fight against the construction of yet another telescope?? When will it stop? Have you not taken enough land and resources already?? PLEASE PLEASE DO NOT DO THIS. A’OLE!!!!!!

Additional comments: As an institute that claims to be a “Native Hawaiian Place of Learning”, I urge UH to hold true to that promise by listening to Native Hawaiians. This Hawaiian joins with the countless others who say aʻole! We do not consent to the construction of the Thirty Meter Telescope upon Mauna a Wākea. Mahalo.

Additional comments: Naive Hawaiians all say no. What part of no don’t you understand? You guys just found a planet in a galaxy far away, so what now? This discovery, and any other future celestial discoveries, does nothing for the current problems on this planet like the pandemic, world wide shortages, Kanaka Maoli suffering from drug and alcohol abuse and Kanaka who cannot even afford to live in their own homeland because their land keeps being turned over to the highest bidder. So, A‘OLE TMT and UH, A‘OLE!

---|---  
There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public, YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! |

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | ✗  
---|---  
Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! |

**Additional comments:** Naive Hawaiians al say no. What part don‘t you understand. You guys just found a planet in a galaxy far away, so what now? This discovery does nothing for the current problems on this planet like the pandemic, world wide shortages, Kanaka Maoli suffering from drug and alcohol abuse and Kanaka who cannot even afford to live in their own homeland because their land keeps being turned over to the highest bidder. So, A‘OLE TMT and UH, A‘OLE!

**Additional comments:** No more desecration on God’s Mauna, is this word “No” hard to understand or hard to swallow in your na’au. Enough is enough of all your lies, your greed and to think all of you are up to challenge the rightful owner of the Mauna and who is the rightful Owner? My God and yours, did you think that all of you people are above our Creator? All of you who think ‘money’ can buy His Creations, do what is right and Pono, Mr. your time is almost up, need to give this World back to God, the rightful owner of the Universe.

**Additional comments:** More should also be done to lessen the visual footprint of the telescopes on the mountain even if it means using a paint or covering on the existing observatories that match the color of the mountain. They look very ugly and negatively impact the natural beauty of the mauna.

**Additional comments:** The CMP should address the remaining 12 years on the existing lease. It should address the conditions required by the existing lease. You need to clean up and restore the mountain. The lease is over, it will not be renewed. The TMT will not be built on Mauna Kea ever. No title, no treaty, no consent. It is the right of the right holders, not the stakeholders, to decide. The right holders are the descendants of the original inhabitants of these stolen & prostituted lands. Be satisfied with the 65 years at $1/year. It is pau.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: - Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. **Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.
- Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.
- The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** While I believe that astronomy is an important part of scientific development, I do not believe that the further desecration of the culturally and genealogically significant sites on Mauna Kea recognizes a mutual respect for both cultural and environmental significant sites. Making the Draft Master Plan statement by the University of Hawai‘i respects the capacity both the cultural and environmental significance of Mauna Kea a fallacy. Using ‘Ōlelo Hawai‘i in this Master Plan seemed like a tactic of mockery and was in fact used in opposition to what Kanaka Maoli continually fight and protect for. To name the document “E Ō I Ka Leo” seems very ironic as it translates to “listen to the voice”. This is very much inconsiderate to Kanaka Maoli as our voices are not being heard, in fact they rewrite history and weaponize our mother tongue against us. Despite the worldwide disapproval of TMT, there are still plans to further develop this plan. Kanaka Maoli do not consent to further desecration on Mauna Kea. As a displaced kanaka of O‘ahu, I defer to the leaders of Kānaka Maoli who have vehemently opposed TMT. Mauna a Wākea is a progenitor ancestor of Kānaka Maoli and therefore I believe that Kānaka Maoli should hold the most sway in decision-making. I strongly urge the University of Hawai‘i to take a similar approach that is rooted in transparency with the community. I am greatly appreciative of the opportunity to have input on this master plan and hope that the University of Hawai‘i will proactively seek to engage and empower Kānaka Maoli on local developments beyond the thirty meter telescope.

<tbody>
<tr>
<td>For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.</td>
<td>X</td>
</tr>
<tr>
<td>There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.</td>
<td>X</td>
</tr>
<tr>
<td>Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.</td>
<td>X</td>
</tr>
<tr>
<td>There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.</td>
<td>X</td>
</tr>
<tr>
<td>On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.</td>
<td>X</td>
</tr>
<tr>
<td>The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.</td>
<td>X</td>
</tr>
<tr>
<td>Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!</td>
<td>X</td>
</tr>
<tr>
<td>Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!</td>
<td>X</td>
</tr>
</tbody>
</table>

Additional comments: The University would not feel safe to me if they allowed the further desecration of my kupuna. I oppose the construction of the TMT, and UH should not call themselves a Native Hawaiian Place of Learning if they contribute to the assault of ʻāina, and Native Hawaiian ancestors.

**Additional comments:** By continuing with this project, you cement your position as one who does not care for the kānaka and locals who have generational connection to the ʻāina. Disrespecting the ʻāina means disrespecting the people. Shame on UH for saying they are for the people when their actions say just the opposite. It is disappoenting to see one of the biggest Universities in Hawai'i support constructions so obviously destructive and disrespectful of the history and culture here.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in n the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!!

Additional comments: I am a white citizen of Hawai'i. I have been an attorney for over 30 yrs. Mauna Kea is not sacred to me. I am opposed to the UH Master Plan and any further construction on the mauna as a matter of justice. If Hawai'i's native people consider the mauna sacred, the piko of their universe, who are you to tell them different and desecrate their holy place with an 18-story monstrosity? Have you followed all the astronomical discoveries made in the last three yrs from the telescopes already up there? Any discoveries a larger telescope MIGHT find is not worth demeaning our desecrating our native people's sacred place.

Additional comments: The Hawaiian Kingdom Nation NEVER RELINQUISHED OUR RIGHTS TO THESE LANDS, OUR NATURAL RESOURCES, OR GIVEN CONSENT TO DO SO. Show me your TREATY OF ANNEXATION FROM OUR QUEEN TO YOUR REPUBLIC OF HAWAI'I OVERTHROWERS. It is written in the Organic Act and All Acts that the State of Hawaii is Perpetuating is the description of lands received and Ceded to the Federal United States is called "WHATSOEVERKIND!" There is NO Treaty describing this but only the NON CONSENTUAL MASSIVE KU'Ε PETITION PRESENTED TO THE US CONGRESS. ANY AND ALL Derivative Titles after 1893, 1900, 1920, 1933, 1959, 1978 til present day is NULL AND VOID! Your inherited Military Occupation of 1893 until today has continued the violation of GENOCIDE. MY RESPONSE TO THIS AGENDA OF CONTINUALLY DESECRATING OUR MAUNA IS A\OLE. CONSTRUCTIVE NOTICE IS HEREBY GIVEN TO THE UNIVERSITY OF HAWAI'I, state of Hawaii, Individual Board Members and ALL CONCERNED TO CEASE ACTING LIKE YOU ARE ALL THE MASTERS IN CONTROL OF WE THE KANAKA AND OUR AINA THAT IS IN A "TRUST" AND NOT IN THE STATE OF HAWAI'I AS OWNERS! CONTINUE TO ACT AS OWNERS? SHOW ME YOUR CONVEYANCE FROM OUR KINGDOM NATION TO YOU!

<th>Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:</th>
<th>X</th>
</tr>
</thead>
<tbody>
<tr>
<td>- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.</td>
<td></td>
</tr>
<tr>
<td>- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.</td>
<td></td>
</tr>
<tr>
<td>- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.</td>
<td></td>
</tr>
<tr>
<td>- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.</td>
<td></td>
</tr>
<tr>
<td>- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.</td>
<td></td>
</tr>
<tr>
<td>- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.</td>
<td></td>
</tr>
<tr>
<td>- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!</td>
<td></td>
</tr>
<tr>
<td>- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!</td>
<td></td>
</tr>
</tbody>
</table>

**Additional comments:** Why did the UH Regents only preserve the adze quarry under the preservation act of 106 and not Mauna Kea? You guys have been neglecting yor obligations to protect the mauna for too long. Do what’s right for the Hawaiian people. Mahalo

Additional comments: The State and its agents, departments, and divisions such as the University of Hawai‘i system have for years exploited Ceded Lands and DHHL lands for economic benefit with no regard to the moral and fiduciary responsibility to the original indigenous inhabitants of the islands. The kanaka maoli have been decimated by disease, oppressed, subjugated, and marginalized over the past 200 years. No one can undo past wrongs, but when government power continues to be abused at the expense of the kanaka maoli, then there is a point when people need to say Lawa / Enough. The UH master plan for Mauna Kea ignores the unique historical and cultural place that Mauna Kea holds to its people. Based on previous actions of fiduciary indifference to those who deserve to benefit from this land, ie the kanaka maoli, there is no reasonable expectation to be had that any positive gain will ever come of this so-called master plan - either culturally or financially. Too many times the government has made its promises and the reneged on those same promises. It is too late - Fool us once, shame on you. Fool us a thousand times, well then you are just corrupt and cannot be trusted AT ALL. That land is conservation land and needs to remain as such. As Kahookahi Kanuha said, the kanaka maoli should not have to prove every inch has value and the culture of the kanaka maoli should not be dismissed because it is contemporary and not more than 200 years old. Hawaiian culture still exists whether you want to acknowledge that or not. Being dismissive of another's culture is absolutely *disgusting* coming from an institution of higher learning sitting on the very same islands.

Additional comments: Eight Criteria to build the Telescope. All Must Be Met for the permit to be approved for construction... Among other issues, such as spirituality and sacredness of the mountain, petitioners have been stressing through their witnesses that the project does not meet Hawai‘i Administrative Rules section 13-5. In it, there are eight criteria the Department of Land and Natural Resources must evaluate before allowing construction on a conservation district, such as Mauna Kea. Those eight criteria include: The proposed land use is consistent with the purpose of land conservation district; The proposed land use is consistent with the objectives of the subzone of the land on which the use will occur; The proposed land use complies with provisions and guidelines contained in Chapter 205A, HRS, entitled “Coastal Zone Management,” where applicable; The proposed land use will not cause substantial adverse impact to existing natural resources within the surrounding area, community or region; The proposed land use, including buildings, structures and facilities, shall be compatible with the locality and surrounding areas, appropriate to the physical conditions and capabilities of the specific parcel or parcels; The existing physical and environmental aspects of the land, such as natural beauty and open space characteristics, will be preserved or improved upon, whichever is applicable; Subdivision of land will not be utilized to increase the intensity of land uses in the conservation district; and The proposed land use will not be materially detrimental to the public health, safety and welfare. Because land has been desecrated before does not mean you can continue to do so. We continue to say no to this project. We continue to expect that our concerns and objections are heard and respected by terminating this project.

### Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:

- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** As I see it, this pandemic has shed light on how Hawai'i needs to be self-sustaining. There has been a push for local farmers to provide our produce, doesn't it make more sense to protect our resources rather than destroy what has been given freely from our Aina? I oppose TMT being built on Mauna Kea and another thing: this land belongs to Native Hawaiians... remember where your roots are planted and stop chasing the money.

**Additional comments:** Lassner, Chun, Hayes, Young: YOU, lessees, do NOT OWN Mauna Kea. The physical numbers are right in front of you = online 500,000 signatures IN OPPOSITION and 30,000+ statewide marching IN OPPOSITION and thousands at the base of Mauna Kea protecting her IN OPPOSITION and 38 respected Kūpuna literally with their bodies, minds, hEArts, and spirits SAYING NO!!! STOP!!! ENOUGH!!! Avoid saying or explaining one more word. out loud or on paper = NO RENEWAL OF UH LEASE ON MAUNA KEA! NO APPROVAL OF UH MASTER PLAN! NO TMT ON MAUNA KEA! NO TELESCOPES PERIOD ON MAUNA KEA! PLEASE CLEAN UP AND LEAVE. NO = NO!

**Additional comments:** Kānaka Maoli do not consent to the building of TMT. Tens of thousands of Kānaka and non-Kānaka has risen up in opposition. Being a “Hawaiian place of learning” should begin with consensual collaboration with the Hawaiian people. There is no consent. TMT should never be built.

Additional comments: Technology is surpassing itself in realtime. Alignment with the Spaceforce is imperative. Collaborating to build an orbiting space station is the future. Allocating funds on outdated technology is a waste. We need our students on space missions. Astronaut Astronomers.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakulao Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: We will fight until the last vestiges of colonization are eradicated.

Additional comments: I agree with all of the important and relevant points made here. Good stewards cannot ignore the voices of its people so why should you be stewards at all if you lack integrity to uphold and protect our cultural values!? It’s a shame that politics along with self-interest/greed supersedes doing what’s pono. It’s time the people let you know they are paying attention.

**Additional comments:** Our natural resources were never endangered until our government began to attack its every aspect of natural existence. Once destroyed, we will never be able to restore it to its natural capacity. Our government is gambling with our very existence and that is a chance we will not take. There is too much at stake.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Shame on the UH! X

Additional comments: I do NOT consent. TMT does NOT have consent. Stop wasting taxpayers money to pursue this futile act of oppression against native culture and values. The University of Hawai'i’s sense of entitlement with regard to making big plans that clearly exceed the 2033 lease, and that includes further rape of Hawaii’s majestic lands is appalling and proves just how importance it is for the 2033 lease to be the final expiration date of it’s tenure.

Additional comments: The University of Hawai'i has proven their ineptitude in managing the mauna in manner that supports the protection of the land and Kanaka Maoli self determination. This is evident in the 1998 audit, in the decades of pollution and accumulation of trash that proceeded it, in the unheeded opposition to telescope expansion since the first, and in the fact that UH has not listened observatories went up, and in the fact that UH has not listened to the thousands of Kanaka Maoli and allies opposing the TMT. Why is the TMT still an option in this plan? Why has stewardship of the mauna not been returned to Kanaka Maoli as it is crown lands? Why does this plan call for expansion of facilities on the mauna when the public has made clear they want no construction? Why have public conversations on this plan been heavily regulated? I oppose this plan because it does not address the main issues at stake with the management of Maunakea and public review has been conducted ineffectively.

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawaiʻi and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

X

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

X

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawaiʻi residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

X

Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public, YET despite decades of Hawai'i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!
X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!
X

Additional comments: It cannot be understated that the greater community at large opposes the current version of the Mauna Kea Master Plan proposed by UH. It remains unacceptable to the majority of the Kānaka Oiwi population as well as the majority of the non-native Lāhui. I strongly criticize this plan and will stand in opposition to the implementation of the plan.

**Additional comments:** You should have taken the defeat at the hands of our Lahui. Now you probably think with all these distractions and the pandemic is gonna keep us busy and not protect Mauna Kea. Think again! If you thought 2019 was bad for you..wait til come 2022. We will unite again and rise!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Additional comments: The corporation of the United States and the state of Hawaii have are illegally occupying the Kingdom of Hawaii. The state of Hawaii along with all the counties have been oppressing Kanaka Maoli, desecrating our lands, ancestral burials, and diverting and polluting our waters. It’s time to restore pono (righteous) to our lands. I oppose any and all activities from the state of Hawaii and United States on Mauna Kea and Pohaku Loa.

**Additional comments:** It is time you listen to the vast majority, and especially Kanaka Maoli, most of who oppose the construction of the Thirty Meter Telescope on Mauna Kea. Instead of continuing to pursure a project that obvious opposition from the local community, projects that will directly benefit and therefore support the larger community should be pursued instead.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Shame on the UH!

Additional comments: Please stop. Take Mauna Kea off of the potential site list for this project. UH should've held exclusive rights with their 1 telescope instead of selling out for more money and desecrating a sacred water source. Your staff has disagreed with this idea, your students have protested (the majority), men, women, children, kupuna from around the planet has voiced their rejection of this project. The majority has spoken, its time for you to listen. I ask that you scrap any and all development for TMT and future telescopes. Remove, clean, restore, preserve Mauna Kea. Mahalo.

**Additional comments:** I do not consent to the building of any telescopes on Mauna Kea or any other natural spaces in Hawai'i.
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** As many have noted, the issue of the TMT is multi-layered, multi-faceted and extremely complicated at best. Although this is true, it is also true that the solution to this conflict is elegantly simple. Aloha aina. Imagine the love that you have for your family, for your mother, your brother, your son. Hold on to the deep emotion within and imagine feeling that same love when you look at a field of kalo, a school of fish swimming near the reef, or a majestic mountain standing tall above the clouds. It’s not the appreciation of beauty or the objectification of nature, it’s a deep, visceral connection. Aloha aina is a call to strive to live in harmony and balance with everyone and everything around you. Those in support of the would-be telescope claim economic benefits, advancement of scientific knowledge and community pride. I state that we can reach those same goals through aloha aina and do so without increasing the already significantly adverse environmental impact. We can encourage our community members to become more aware of the issues that affect them and get more involved with finding and creating solutions. We can fund education, not by taking from others and corporations, but by using the resources we have in our own communities. In my opinion, no amount of money will ever be worth jeopardizing the future of this place, of our island home. And to me, the construction of the TMT will do just that. Those who criticize the protectors of Mauna a Wakea have stated that we are not willing to compromise. To them I say, the familial relationship between humans and the environment requires that we care for that which cares for us and protect that which protects us. There is no compromise in aloha aina, there is only action.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: Education in Hawaii has had a history of degrading and disregarding Kanaka Maoli in favor of colonizer control and "enlightenment". In light of this history of wrongdoings, UH is still choosing to disregard the voices of Hawaiians and continue this settler methodology and mindset of "we know what's best and you are wrong/denying progress if you disagree". Science should not happen at the expense of a people and yet here we are. Where are the ethics in this pursuit of knowledge? Nowhere.

Additional comments: Let us also remember that we are still under an illegal occupation by the USA. Anyone claiming to have jurisdiction over Mauna Kea that is not Kanaka Maoli is in direct opposition to the Kingdom of Hawai‘i. It is unlawful for anyone either than Kanākā Maoli to be making decisions on behalf of Mauna Kea, and all lands of the Hawaiian Kingdom.

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in n the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! | X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! | X |

Additional comments: Times have changed. It shold no longer be the colonialist's right to desecrate sacred land that has been protected by indigenous for thousands of years. WE/Colonialists do NOT know best. To think we can do better than the keepers of this sacred land is pompous and egotistical. Let the protectors of our life blood protect it. Leave Mauna Kea be, it is fine a is.

Additional comments: Why do you need to build an observatory?? Why not focus on the issues that are happening on Earth before you go looking for another planet? Why not use that money to save our planet from climate change by endorsing and enforcing The Plant Basrd Treaty? It is better for the animals, humans, and the environment.
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: I am Hawaiian. I am a student at UHM. I was not consulted or informed. I disagree with this Master Plan.

### Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:

- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.  
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.  
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.  
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.  
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.  
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.  
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!  
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

### Additional comments:

Pretty sure the people's decision was final. This is a pseudo democracy after all, at least pretend that the populous have an intrinsic right to self-governing based upon the wants and wishes of the majority. Furthermore, the supposedly elected, fiscally elite in control of the governing bodies could not be farther from understanding the cultural and environmental needs of the people and planet they so eloquently fail to support in any resolve ever. This particular issue has been determined through the actions and perseverance of the Kingdom Hawaii and its lawful and sovereign People. This particular issue of #TMT has divided the inhabitants of this land and made it particularly difficult for people without Hawaiian Koko to simply exist. The torment of the many for the greed of a few. It's time to lay this issue to rest. Otherwise more wasted community dollars and an uprising of the people, such as this government has never seen and a course of action that contains the repercussions of their actions. The absolute tyranny of the Hawaiian People since 1823. The reparations are long over due. In simple, to the people responsible for the financial component of tmt: please abandon your resolve. You are tearing our community apart. We are guests in a sovereign land. By any means necessary, respect and honor the culture of our hosts as they have respected (under threat of imprisonment and death) our commercial extortion and exploitation of their most fertile and beautiful lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: You should be ashamed

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Additional comments: No, to building anymore telescopes on Mauna Kea. It is a cultural and sacred area. From childhood, my parents spoke of the Sacred Hawaiian Land. Over a million people internationally agree there should be no more telescopes. They have mis-managed and polluted the site. No to anymore of this. I know the Palm Springs Indians hold their lands sacred and malama and cherish every square foot. We will do the same. Stop, with the money pitches, the indigenous people and all are against it. This is recorded in history. Our eco and infrastructure are worth more than money. Sincerely, Sadie Eckart.

**Additional comments:** Jesus Christ, stop messing with what makes Hawaii, Hawaii and what we’ve all come to love about it. This is NOT your land as much as you think it is… you are on the wrong side of history here, friends. Do the right thing. If the kanaka says they don’t want it, you shouldn’t force it down their throats. I will remind you, this is not your land.

**Additional comments:** What ever is considered sacred by any indigenous people should be always be sacred. We kanaka Maoli are thought from babies to respect our Kupuna, we are ready to take on any foreign people to save what is our legacy! To even attempt to desecrate the sacred is not Pomo. The countries That are sponsoring the TMT project are the very countries who pollute the earth the most. India’s water ways are filthy with human remains and excretments’ Japan is leeching radioactive wastes into our pertinent Pacific Ocean, they are depleting our sea animals and killing our Mano! America is even worst with their contamination of the soil, waterways and air. They pollute the rivers with spilt oil, coal mine and factory wastes,

**Additional comments:** As a Kanaka Maoli pursuing my Bachelors degree in Social Work at UH, I feel it is my kuleana to show my support in A'ole TMT. My question to you: How can you push a plan to desecrate and build on our land time and time again and teach about the history, our culture, and language and not feel guilty about doing what you are trying to do? It seems so hypocritical that you do the exact thing that oppressed our people, taking our aina for gain of another … Where is the justice for our people? When will the oppression stop? Why???? How does this benefit my people? Always taking what is not your, acting just like the Westerners that stole our identity, our land, our culture. How do you sleep at night knowing that you are stealing from my people again??? Hewa!!!

<td>Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!</td>

**Your Testimony/Comments**

The Center for Mauna Kea Stewardship has taken a long, hard and inclusive look at the future of Maunakea. Its efforts have been collaborative and responsive to the concerns voiced by many in the community and the path it lays out for future stewardship is thoughtful, respectful and creative. Hawaii needs astronomy; Hawaii needs the mountain on which the most fruitful astronomy in the world occurs managed appropriately and efficiently; Hawaii needs to look to the future and honor its past. The plan proposed by the Center for Mauna Kea Stewardship furthers all of these aspirations. I strongly support it.
I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

I’m all for it. Despite the din from the myopic naysayers, UH has done a great job managing astronomy on the mountain, and the struggles of the recent past will help guide UH to do an even better job in the future. Astronomy is one the best things we have going on this island, and TMT will be one of the best things ever to happen to this island. Just build it! My brother-in-law William Southwell did the groundbreaking math that made Laser Guidestar possible, and he taught me to look skyward when I was 5 years old. Let’s keep the good science going stronger and stronger so our children and the world can continue to learn about the real universe.

Sincerely,
Walter Greenwood
UH Hilo Performing Arts Department

I support the UH Master Plan and TMT.

Astronomy and the Polynesians go back to when people first populated the islands.

They got here by following the stars and their urge to learn and explore.

That is what TMT is about, learning and exploring the heavens.

Mahalo

Aloha,
George

I support the building of the 30M telescope on Mauna Kea. Admittedly I am not of Hawaiian descent, but I think their ancestors would approve of this distinct project. They were brave explorers and an adventurous society. The telescope is something to be proud given the proximity of the Hawaiian Islands, and will provide a unique opportunity to young Hawaiians. I do not believe it diminishes the sacredness of the mountain.

Bette Belanger
Kihei, HI
Aloha

I am in full support of the Master Plan and the Thirty Meter Telescope. Science and knowledge of the cosmos are important to humankind and a building block for future inspiration. Building the TMT will provide ever increasing discovery, will also provide an increase in pride for our state, and further the education of all.

Mahalo to UH for their achievement in astronomy so far, with more to come.

Valerie Weiss
Grandmother of 2 UH graduates and one current senior.

Name is Edward Rambo Odquina Kū.

....Our ancestors have always been the greatest of astronomers and our King Kamehameha would have had all those so-called "Protectors" heads cut off for interfering with the study of the stars.

... THIS TELESCOPE IS NOT JUST ABOUT MAKING HAWAII AND AMERICA THE UNDISPUTED LEADER IN THE STUDY OF THE STARS, IT CAN SAVE HUMANITY.

IF THERE IS ONE THING YOU MUST DO IN YOUR LIFETIME, IT'S TO LEAVE OUR WORLD A BETTER PLACE.

BUILD THE TMT.....

THIS TIME, I SUGGEST BUILDING A BIG JAIL AT THE BASE SO THAT ANYONE WHO UNLAWFULLY IMPEDES PERMITTED TRAFFIC CAN GET THROWN IN...BOOKED.....AND BAILED. EACH TIME THEY ARE FINED....MONEY ALLOCATED TO THE CITY AND COUNTY AND TO THE TMT.

......GET PERMITS FOR A JAIL OR PRISON FIRST.

......We can't be bullied or extorted by these FAKE NEWS HAWAIIANS anymore.

NO MORE PLAYING NICE AND DIPLOMATIC.

ENFORCE THE LAW.

......Or, simply HIRE ME, and I'll make sure these annoying "Protectors" stay away.

Edward Rambo Odquina Kū

808-233-8654
The University should support the Thirty Meter Telescope, as it is a noble project not only using talent from the state and the nation, it also brings together nations toward a common goal, nations like China and India whose relations are at times uneven. There are projects that bring the best of us together and that deserve to happen. This is one. TMT will be a great asset to the State, the Nation and the world. And make no mistake about it, if the Obstructionists succeed in driving away TMT it will be a tragedy, they will then go after the rest of the telescopes. Between that the the fall of Arecibo America will then be wavering if not in decline in relation to the rest of the world in ground based Astronomy.

Sincerely,

Don Davis
Hi,
I am pro education and exploration,

BUT
Those other telescopes (5 of them) need to be taken away and recycled or responsibly disposed of or sold to another country or state—before TMT is allowed to be built!

We cannot continue to pollute the land and the earth! We cannot leave our ‘opalns for the future generations!

If they can spend billions on a new telescope, I’m sure “they” can get rid of the old ones first!!! Or get the countries who built them to help pay to dispose of them properly!!!

Thank you,
Stacie Friel

Please keep it up. I mua Kilo Hōkū and i mua TMT!

Paul Hirst  
Hilo
Aloha, If not for exploration on the world will die. We need to support knowledge of the Universe. The TMT will bring us information that we will not be able to find without the telescope. If protesters run the show, nothing will ever progress. Please do not allow a few out of work, welfare recipients to control our future.

Maybe the Governor did not have enough intestinal fortitude to do the right thing and remove the protesters, but you have a chance to make things right, by supporting the TMT project and building a scientific future for the Hawaiian Islands.

Mahalo,

Harold Spindel

I support TMT!

alexnick@hawaiiantel.net <alexnick@hawaiiantel.net>  
To: bor.testimony@hawaii.edu, "Matthew D.Murphy Murphy" <alexnick@hawaiiantel.net>  

To whom it may concern:

As a long term resident of Hawaii and a proponent of science I truly believe that "TMT" moving forward is in the best interest of the State of Hawaii and of our country. Mauna Kea is sacred and I would never go against the beliefs of our Kupuna and the rest of the indigenous people of the State of Hawaii but I do believe that a balance can be and should be reached between science and our local population. The marvels of the Universe have been discovered and who knows what else is waiting for "TMT" to discover. It would be a shame to loose this opportunity of a life time. Please lets move forward with "TMT" to allow for discoveries to be made now and for generations to come.

Respectfully,
Matthew D. Murphy
testimony

Peter Ehrhorn <ehrhornp1@gmail.com>  
To: bor.testimony@hawaii.edu  

I am in support of the Thirty Meter Telescope but the Hawaiian protestors have to be dealt with. I thought you did well when you offered education and money but that seems to have been rejected. Perhaps offer to figure out how to repair the crack in Kahoolawe would be something that might get their approval. Point is you have to get their approval. You may have to hire more Hawaiian astronomers before they approve. I remember an Hawaiian astronomer who talked to my Rotary club but sadly he died. He was very good in his amazement of the universe was contagious
Parallel Paths and the TMT Telescope
Graham DeVey, Kihei August 9, 2019

I’m hopeful we can find parallel paths to success in supporting Hawaiian culture and operating the Thirty Meter Telescope in Hawaii.

My wife and I have lived on Maui 24 years. What keeps us here is the lasting and positive influence of the Hawaiian people on us and the community. We’ve traveled widely, and there are few places in the world where an endemic culture has been so welcoming, so pertinent and important to daily life for all. It’s an ongoing blessing for all of us to learn from Hawaiians.

I was a science teacher at Baldwin High School on Maui for 17 years and taught 3000 or more students—Hawaiian, Haole, Filipino, Japanese, Portuguese, and many mixes of these. In my classroom lessons, I was very careful to share lessons in ways that were parallel to Hawaiian teachings, both in content and method. A native of Chicago, I was unqualified to teach Hawaiian culture and felt that the Hawaiian kupuna were much better for that responsibility, through their knowledge, passion, patience, mana, and ability to nurture the next generations. But I took pride in finding ways to parallel Hawaiian teaching and culture with my own science lessons. Many, many students and families have thanked me for my approach.

Before teaching, I had been a corporate engineer for 19 years, with 200 scientists and engineers reporting to me. Developing the next generations of young technical people became a calling for me and brought me to Maui. While on Maui, I’ve helped lots of youngsters gravitate toward the sciences.

Losing our local talent to the Mainland is a huge drain on our resources and a personal tragedy for me. I work with local tech businesses to help hire and train Hawaii-born workers, who know how to live and thrive here. Years ago, I attended a community hearing regarding a telescope for Haleakala on Maui. A well-meaning, silver-haired Haole woman stood and said, “Jobs jobs jobs! They are lying to us. These telescope people will bring in their own people from the Mainland and overseas, and our kids won’t get the jobs! Our Hawaii kids don’t know how to do this difficult work!” She was actually weeping. I wanted to climb over the table and smack her, wake her up. Yes, our local kids can and will do the work, and our tech companies would prefer to hire them, rather than train outsiders to work in Hawaii for 2-3 years before returning to their own homelands. We can, we will train brilliant students of Hawaii to work here, and technical people of all levels to work alongside them. This is what I devoted 17 years of my own life to support, and I am absolutely not alone.

At this point, many Hawaiians are gathered to oppose building TMT on Mauna Kea. I see many loving faces, people I know well, among the participants. Part of me rejoices to see native Hawaiians coming together, sharing their spirit, uniting as one. It is difficult to apply the Hawaiian teachings of antiquity to a confused new world. But I feel their pride, their joy, their mana in uniting behind a cause.

For me, though, this is a bitter, bitter development and my heart is bruised by the irony that a telescope is the focus of so much cultural upheaval. Perhaps University of Hawaii could have been a better steward of the mountain environment, I truly do not know. What promises were made in the past, and kept or broken, can surely be researched and discussed. From what I know, though, the TMT project has attempted to treat its mountain site with respect, and has tried to be open in negotiating, in good faith, to do what is pono.
I have taken native Hawaiian students to the top of Haleakala to use its telescopes, and these students enhanced the experience of our entire group. One Hawaiian boy, late in the evening, took off his shirt and lay on his back, surrounded by telescopes, feeling the earth beneath him through his skin and absorbing the stars above. He was connecting with many generations, and I was honored to help him find his way there.

So, here we are. We are at an absolutely unique time in terms of opportunity, to find parallel paths to help Hawaiians connect to their culture and to attract locally-grown talent towards astronomy careers in their own homeland. We must stop accepting the norm of losing our bright youngsters to Seattle, to Silicon Valley, to Wall Street, when we could be helping them use the marvelous TMT telescope to explore, and perhaps challenge or even replace our deepest and most fundamental knowledge of the cosmos, right from Hawaii. I cannot imagine a more rewarding time to work together, honoring and rescuing the past, and preparing the way for educational prosperity for generations to come.

Updated Dec 14, 2021. Graham DeVey
I support the UH draft master plan to keep astronomy alive, especially the Thirty Meter Telescope. Enough said, just do it!
Suzanne Anderson/Petersen

Sent from my iPhone
To whom it may concern,
I fully support UH's draft Master Plan to keep astronomy on Mauna Kea alive, including the construction of the Thirty Meter Telescope (TMT). I understand UH has managed astronomy on Mauna Kea for many years, and has sought a permit for the construction of TMT. TMT could be a huge asset for Hawaii, the United States and the world. I hope TMT is built sooner rather than later.
I have been advised that the Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world. Astronomy on Mauna Kea is good for Hawaii and is part of our culture. Astronomy on Mauna Kea provides opportunities for all Hawaii residents, including our keiki, to benefit in terms of scientific education, training, inspiration and pride in the many discoveries that occur there. The presence of astronomy on Mauna Kea is important for the Big Island community and our state as a whole for many reasons, including our economic diversification and the discoveries from the world-class research conducted there. Thank you for all of your efforts.
Aloha,
James C. McWhinnie
1206 Lunaai Street
Kailua, HI 96734-4545
Aloha,

I'm just an ordinary citizen, born and raised here, my wife's family are from the Big Island and lots and lots of blood Hawaiian relatives.
I am in total support of the UH TMT program and what it means to the university, our community, and the future of space science.

I recognize the respect Native Hawaiians have and desire to declare an area sacred. My question is, How far does the area extend? They claim, The whole mountain.
Is that feasible? Is that respectful of those Hawaiians and citizens of Hawaii who also respect the sacred aina but want to be able to utilize this magnificent location as one of the best and most optimal locations in the world for this type of hope? The hope that this may bring to future citizens the wonder and discovery of that great unknown, space?

It's time we move on to enhance our future with the TMT.

Thank you for your kind consideration.

Mahalo,
Paul
Aina Haina

| Your Testimony/Comments | As an olapa hula practitioner who has lived in Hawaii for more than half my life, I support the draft UH Maunakea management plan and construction of the TMT. I believe this is consistent with the ancestors, whose very history is one of discovery and exploration and whose reverence for Maunakea did not preclude use of the mountain’s resources (as evidenced by the adze quarry there).

I remember the days before UH management, and it angers me that opponents cite problems from that era, since corrected, along with misinformation in an attempt to sway public opinion against astronomical research. I have watched with sadness attacks on Native Hawaiians who thoughtfully express support for the project, creating an atmosphere of intimidation that prevents many who are not opposed from speaking out. |
Please imua - move forward with the management plan and astronomical research on Maunakea.

I STRONGLY SUPPORT TMT for our State, for scientists worldwide but mostly for the people of Hawaii and the amazing opportunities that this project can offer. The possibilities that might unfold from this project are limitless. The prestige it will bring is massive and the highly skilled jobs, though limited in number, will be important in maintaining a level of excellence at UH. This, I am VERY hopeful that, at last, this incredible project can begin and that it will bring a greater spotlight on the excellence at UH and offer the opportunity for extensive exploration and discovery in the decades ahead.

Thank you for consideration of my strong support for this amazing project. What a dream!! Please enable that dream to become a reality!!!!!

Nancy Taylor
Support of UH's Master Plan for TMT & Mauna Kea

Lucia Kaplan <luciakaplan@me.com>  
To: bor.testimony@hawaii.edu  

I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). We are so fortunate that the Island of Hawaii is the best place in the world to observe & study our Universe. I am in awe of the great scientists to study our cosmos & make important discoveries of our small planet fits into the larger expanse of outer space. I believe there is more than enough room for all to utilize the gifts of Mauna Kea. We must continue to move forward with plans to build TMT. It is time to build TMT now!

Mahalo,

Lucia Kaplan
luciakaplan@me.com
please do not let this project sink as the superferry did!!!!!!!!!!!!

As the Polynesians of old observed, studied, studied, and understood the movement of the stars in time, to explore, navigate, discover, inhabit and populate remote islands throughout the vast Pacific, the planning, investment, and development of astronomy, astrophysics, astro-mathematics, astro-technology on Mauna Kea under the management and guidance of the UH Mauna Kea Master Plan, will advance and expand in humanity's knowledge and understanding of the principles and forces that operate in the infinite cosmos, allowing humanity to navigate, discover, explore the Universe in Time and Space.

Your Testimony/Comments
I fully support the UH Draft Master Plan because it keeps astronomy on Maunakea and TMT. UH has done an excellent job managing the Maunakea Science Reserve and surrounding areas. From managing the road, to getting rid of invasive species, care for the Wolf Spider and the Weiku Bug, the historic properties, the Nene Goose and all the flora such as the Aweoveo, the area continues to flourish. They did a through job with obtaining the construction permit for the Thirty Meter Telescope, meeting each requirement that seeks to protect the environment. I support the UH’s endeavor to renew Master Lease for the astronomy precinct so that Hawaii can continue to lead in this field of science. I hope my alma mater does everything possible to see that TMT is built on Maunakea and astronomy continues in Hawaii.
I know the anti TMT people would like to see an end to astronomy in Hawaii, but every institution of higher learning has an astronomy and physics department. For the last 50 years the observatories in Hawaii have contributed to knowledge for all humanity, from the Cosmic Microwave Background, to mapping out our galaxy Laniakea, to discovering Powehi. We cannot step backwards, we must move forward as our ancestors did on those long oceanic voyages. It is because we are Hawaiian, descended from master naked eye astronomers that we must continue to study the heavens and understand our place in the universe.

UH Hilo Center for Maunakea Stewardship’s Proposed Maunakea Master Plan – Support for UH Board of Regents Approval

UH Board of Regents Special Board Meeting
Thursday, December 16
via virtual meeting

Aloha University of Hawaii Regents,

I am Nancy Sakamoto, submitting supportive testimony for the approval of the Proposed Maunakea Master Plan in my capacity as an active community member, and as a tutu for my grandchildren who offer much promise as the next generation of Native Hawaiian leaders.

I have been actively involved in the Kona Kohala Chamber of Commerce, the Kailua Village Business Improvement District as an advocate for stewardship of our valuable resources here on Hawaii Island.

I’ve kept up to date on the stewardship of Maunakea, through presentations and engagement. The Center for Maunakea Stewardship, formally known as Office of Maunakea Management, has been successfully managing its lands on the mountain, implementing state policy on astronomy since 2000. Let’s remember that nearly sixty years ago, it was the State of Hawaii who wanted to develop astronomy in Hawaii. Looking towards the future, I would ask all of us to take pride in this accomplishment.

This new draft management plan takes us forward into the next few decades, ensuring good, sound management of the unique resources found on Maunakea. The balance struck in the master plan limits development that protects the resources while ensuring world class astronomy continues in Hawaii, providing inspiration for our island students. How fortunate we really are.

I support the draft and I ask you to as well.

Mahalo for allowing this opportunity to share my comments.

I support Astronomy on Mauna Kea

Ken D <kenya1953@hotmail.com>  
To: "bor.testimony@hawaii.edu" <bor.testimony@hawaii.edu>

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

RE: UH’s Master Plan

I am writing in full support of UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

The way to the future is guided by roads from the past: knowledge of the stars - astronomy - is what brought our forebears to these islands.

We honor the accomplishments of those who came before by continuing to advance the study of the stars for all the world’s peoples. And at the same time enhancing our local and state economy and providing opportunities for our keiki.

Keep up the good work - I mua TMT!

Mahalo and aloha,

Ali Bairos
Aloha:

I am a resident of Kailua-Kona and would like my voice to be heard. Mauna Kea is a resource for ALL of the Big Island residents and scientists visiting the telescopes. Mauna Kea is one of the best locations for stellar and interstellar research to be done. The benefit of the TMT to the entire island is something all people on the island should approve.

Hawaiians, when the took off from their island in the South Pacific, were navigators, able to cross unfathomable ocean to “find” our beautiful islands. They were star navigators of the highest rank and should be applauded by all astronomers and navigators even today. The TMT consortium was willing to provide money to the island schools for STEM subjects which as we know, can lead to highly paid positions after college. But if we wish to keep our people on the island, they NEED jobs hiring in those fields. I want our gifted children and young adults to see what can happen by seeing highly successful people living among them, hearing their stories, and believing that they, too, can succeed. That can only happen if the money is pumped into our schools, and TMT is a willing partner in this endeavor.

UH has mismanaged the mountain for a long time but it can and must involve more than a few people. Please plan on doing what's right for the mountain and for the Big Island. Hold meetings here on our island, not on Oahu. Come here to our island and hold meetings around the island so regular people have a say. Regular people have good ideas and you must hear them personally.

Mahalo for your time,

Greg Olsen

I have reviewed the Maunakea UH Master Plan – E O I Na Leo. This is a thoughtful document, and I strongly believe that the Boards should approve the Master Plan, pending modifications/clarifications.

I also agree with the Task Force’s other conclusions, including that it should engage in sustained outreach efforts and that it should continue to manage the MKSR – either solely or as a major partner in a reorganized management structure -- and support world-class astronomy.

I have the following additional comments on UH’s past management and on the Master Plan itself, requesting some minor modifications.

**Master Plan comments:**

- In agreement with the National Science Foundation’s comments, my main criticism is that the Native Hawaiian community needs to have a clear voice in the management of Maunakea if for no other reason than UH’s management area includes at least some land – Lake Waiau, Pu’u Poliahu, etc. – upon which Hawaiian traditional and customary practices unquestionably occur. The existence of Kahu Ku Mauna, cultural training, and a promise of deeper engagement is most welcome. But I believe the Master Plan would be substantially improved with a discussion of how to not just consult the Hawaiian community but involve said community in the governance of Maunakea itself.

- Likewise, I agree with NSF that describing how new guidelines on observatories lessen environmental or cultural resource impacts.

As one specific example, in multiple places the document describes how facilities must convert to a zero-discharge waste system by 2033. A reader is not given the motivation for this rule. One could infer that UH is somehow conceding that the current waste disposal systems pose a threat to the island’s water, an often-repeated bit of pseudoscience from the TMT contested case hearing. Instead, moving to a zero-discharge system is an action that lessens cultural impacts as many practitioners believe that the deposit of waste into summit grounds is culturally inappropriate.

- Re: the UH commitments on decommissioning (Sect 4.1.2). First, it should be clearly acknowledged that the multi-observatory decommissioning steps are spurred by TMT’s CDUP. I.e. TMT in exchange for multiple older telescopes. This is alluded to in Sect 4.3.2.1 but should be clearly spelled out. Furthermore, Appendix E describes that UH will receive input from other organizations – including Hawaiian organizations – on which additional telescopes would be decommissioned by 2033. I think it would be more appropriate for Hawaiian organizations to have a vote in this process, not merely be consulted. This suggestion goes back to the first comment: that the Native Hawaiian community should have a clear voice in the management of Maunakea.
UH’s past management:

- I very strongly believe that the University of Hawai‘i has done an exceptional job managing and protecting resources on Maunakea for at least the past decade. As the Independent Auditor’s Report acknowledges, “the cultural and natural resources on the state conservation lands on Mauna Kea are some of the best managed and protected lands in the entire State. The area is clear of trash, the invasive species are being removed not only by OMKM but volunteer groups, and the OMKM Rangers to ensure public safety on Mauna Kea.”

- The inventory of cultural/historical sites is exhaustive and well documented. In my years on Mauna Kea, I have seen cultural practitioners free to engage in their activities without harassment but with respect from UH. The cultural orientation program required for all Mauna Kea astronomy personnel is well presented.

- As evidenced during TMT’s most recent Contested Case Hearing, UH has done an exceptionally thorough job in documenting and protecting Mauna Kea’s natural resources. Arthropod surveys are well thought out and detailed. The weiku bug population has recovered. Documentation and surveys of plant species is also well thought out.

As I said in the auditor’s report, UH’s stewardship of the land is a stark contrast to the poor stewardship that some TMT protesters have on the Pu‘u Huluhulu encampment. UH’s commitment to laws and regulations is a stark contrast to lackadaisical attitude from state and county law enforcement. Furthermore, mistakes that are often attributed to UH instead lie at the feet of the state itself. For example, it was the state that has allowed protesters to damage planets and scatter plants at the MK Access Road. It was the state that refused to prosecute Palikapu Dedman’s disinterment of remains and placement of bones on the TMT site in an act of protest and against state law.

My Background:

- I have gone to Mauna Kea for the past 14 years for astronomical observations and thus have seen the state of the mountain prior to the completion of the CMP, during the early years of its implementation, and up to recent times.

- I have not shied away from pointed and public criticism of UH or the Institute for Astronomy in other contexts. For example, as an interviewee for EnVision Mauna Kea I expressed extreme frustration and anger at IfA for "a lack of courage" in direct and frank discussions with some TMT opposition leaders in order to have a future where the telescope is built on Mauna Kea in the most peaceful way possible. While I am strongly encouraged by the new leadership at IfA, I remain extremely concerned about the lack of engagement by IfA faculty in general.

Please support the TMT; we need to continue looking outward.

mahalo,
glee stormont
Time to continue the voyage into the unknown the Hawaiians began centuries ago. Ancestors sailing across and unknown, open ocean in search of knowledge were the true pioneers of life. Instead of hiding behind imaginary fears, these brave warriors faced uncertainty and the unknown to seek knowledge, happiness and new adventure. Open your minds and hearts to the unknown as the ancestors did when they began to travel to unknown worlds.

I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a much better job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. It was the stars that led the ancestors to these beautiful shores full of opportunity. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Mauna Kea Plan

Marilyn Seely <marseel@aol.com>  
To: bor.testimony@hawaii.edu

Dear Regents,

I write to you to express my support for the Plan. I have followed the process for the several years you have published information on your plans and the pros and cons expressed by the community.

I confess that I am not as familiar with the objections to the project from the Hawaiian community or the proposals UH has made to rectify their concerns regarding stewardship. My concern stems from the potential of further developing a viable world class astronomy program directly beneficial to the University and the state with major world wide implications for other countries who participate in this type of research and development.

I find it difficult to imagine sacrificing such an opportunity for the near and far future. It is heartbreaking to give up this dream. Surely a compromise can be reached with those who object so we can assure our children and grandchildren a chance to be part of this monumental endeavor.

It is part of the spirituality my family feels for the precious mountain and the many questions we hope it will answer about our universe. Are we alone? What wonders are yet to be discovered about our home planet, solar system and galaxy. Can we protect ourselves from an interstellar collision? And many others.

I get chicken skin when I think of the wonders of such a program and what it could offer.

I trust you will find the path through the star lit skies just as the sailors across the Pacific did in their voyages of discovery. There is so much at stake in this treasure hunt for us all.

Thank you for your consideration of my testimony.

I have lived in Hawaii for over 26 years. I have worked as a lawyer in Hawaii for the entire time and have a small law firm in Kona. I have one daughter who was born and raised on the Big Island and is now on the mainland and applying for graduate school in the medical field. I strongly support astronomy and been fascinated with the study since childhood.

I STRONGLY SUPPORT THE UH MASTER PLAN REGARDING MAUNA KEA AND CONTINUING WITH THE TMT. I personally think that the objectors have latched onto what they see as an anti-ha’ole cause and haven’t considered the real essence of what they are protesting. Ancient Hawaiians were fascinated by the stars and even found their way from Tahiti to Hawaii through astronomy. I am humbled to live on the Big Island with a mountain so able to launch exploration and assist with research into life itself. I am also very much in support of education and exploring areas of wonder. The protestors’ children will also greatly benefit from having a resource of this caliber right here at home. I believe the mountain is proud to be contributing to such lofty efforts.

I don’t have time to camp out Mauna Kea for months as a sign of opposition, as I’m very busy helping many people with very difficult legal problems. I question if the protestors have done much to help others on this island as they have a lot of free time to spend complaining and away from any home or work life.

Respectfully submitted, Kimberly A. Jackson, Esq.

Hawaii Island Chamber_BOR testimony 12142021.pdf
134K
December 14, 2021

TO: University of Hawai‘i Board of Regents

FROM: Miles Yoshioka, Executive Officer
Hawai‘i Island Chamber of Commerce

SUBJECT: Support for Proposed Master Plan for the UH Maunakea Lands

Aloha Chair Moore and all distinguished Regents,

The Hawai‘i Island Chamber of Commerce, formed in 1898 by the business community of the Island of Hawaii, has continued to be a dedicated supporter of scientific and, in particular, the astronomical enterprises on Maunakea.

In 1963, the Executive Secretary of this Chamber, Mr. Mitsuo “Mits” Akiyama began his quest to rebuild the economy of Hawaii Island, then devastated by the 1960 tsunami that hit Hilo Bay, much as how the COVID-19 pandemic is affecting Hawai‘i Island’s economy today. Through the efforts of Mr. Akiyama, Mauna Loa astrophysicist Howard Ellis and astronomer Dr. Gerard Kuiper, the first telescope was placed on the mountain a few years later for site testing, a precursor to the world-class astronomical center it is today.

Our chamber continues to stand with Hawaii’s business community in support of astronomy, science, culture and environmental stewardship. The economic benefits of this industry are significant. There are hundreds of local residents currently working in the industry earning good wages and supporting their families and community.

Initially through the Office of Maunakea Management and now, through the Center for Maunakea Stewardship, UH has dedicated its management efforts to the protection of the natural and cultural resources while ensuring the UH managed lands on the mountain allow for world-class astronomy. A point we should all be proud of.

HICC members have actively participated in every management plan process, invasive weed pulls and one of our members was awarded for her efforts in partnering with CMS for environmental stewardship. We are working together in our community to ensure best management practices continue for Maunakea.

The University of Hawaii has sought to balance multiple community interests when it comes to Maunakea. The balance struck in the Master Plan limits
telescope development and protects natural and cultural resources, all while ensuring a world class astronomy program for Hawaii continues.

We stand in support of the Master Plan. We call on you to support the Master Plan as well and continue stewardship efforts to malama Maunakea.

Thank you for your time.
To whom it may concern,

I support the University of Hawaii (UH) draft Master Plan because it encompasses astronomy on Mauna Kea including the Thirty Meter Telescope (TMT). I also have confidence in UH continuing to manage Mauna Kea after over 20 years of active involvement. UH has received a legal permit for the construction of TMT, a major Multi National Collaboration that will produce significant data and knowledge on our understanding of the Universe and science. Our existing telescopes have been a major attraction for visitors around the world and TMT will further serve to establish Mauna Kea and Hawaii as a world class location for astronomy in one of the best locations in the world to explore the night sky. TMT will also attract scientists and technicians creating more jobs in Hawaii not only for TMT but also the support companies needed for this major undertaking.

Thirty years ago Hawaii was concerned that its main industry was tourism and the construction of telescopes was a way to attract higher technology positions to the islands, TMT can serve the same purpose and attract firms to establish design, R&D, software and robotics centers and diversify the employment base within Hawaii.

The Hawaiian ancestors arrived here after traveling vast distances in voyaging canoes and navigating at night using only the stars to guide them. An amazing act of skill and seamanship and I think that they would be extremely proud to know that Mauna Kea is now the premiere site for astronomy and expanding knowledge that dates back some 1500 years.

With respect

Clive B Davies PhD

Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, providing research and employment opportunities to residents of Hawaii. The summits were never “sacred land” and access for any religious purposes would not be restricted by the telescope project.

Please do everything in your power to complete the TMT as soon as possible.

Thank you,

Gail Wong
Hawaii Resident

Sent from my iPhone
Our family fully supports the University of Hawai‘i continuing their oversight and management of Mauna Kea, and support their draft Master Plan towards renewal of their Master Lease. Divisive as this issue has become there is no denying the historic, indigenous importance of continually seeking enrichment through the study and knowledge of our night skies. The informed curiosity which led the ancestors to the islands of Hawai‘i is the gift and endowed responsibility for us now: to seek, learn, caretake and share.

There have been assertions that past management of Mauna Kea was less than it should have been, and that any past shortcomings should deny UH continued stewardship, and furthermore deny all astronomical studies at the summit. Whether this accusation is fair or strategic, humanity can and does learn from experience, including gained knowledge of better practices. It would be a sad disservice to determine there is no place for scientific study on Mauna Kea, and that it be strictly a spiritual temple. Mauna Kea has been, can, and should be both, and so much more. The potential to collaborate on a richly rewarding future for education, enrichment, honoring traditions, inspiring our keiki, and yes increased economic diversity is there. It is all possible.

Civility, respect, patience, listening, compromise, and inclusion is needed from all. Imua the responsible collaboration for astronomy on Mauna Kea; imua TMT.
Support for UH TMT Astronomy

Gene <groundsg001@hawaii.rr.com>
To: bor.testimony@hawaii.edu

Aloha

Support the UH TMT activities on Mauna Kea. I believe it is a tribute to our Hawaiian culture as well as furthering our knowledge and understanding of the universe.

Mahalo I am practically a life-long resident of Hawaii, a pioneer of solar energy usage and a long time farmer and rancher. I love the aina.

Gene Grounds
To whom it may concern,

My name is Eric Takasugi, a resident of the Big Island and I strongly support the Thirty Meter Telescope (TMT).

I also support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including TMT. I believe that UH has done a great job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. TMT has also shown their commitment not only to science and astronomy, but also to the community through their numerous contributions to education and job opportunities for people on the island.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. Imua Kilohana and imua TMT!

Thank you for your time.

Sincerely,
Eric Takasugi

December 16, 2021 BOR meeting - Testimony from the Kona-Kohala Chamber of Commerce

Wendy Laros <wendy@kona-kohala.com> 
To: bor.testimony@hawaii.edu 

December 14, 2021

RE: December 10, 2021 Proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo.

To the University of Hawai‘i Board of Regents,

The Kona-Kohala Chamber of Commerce brings together the business community as a strong, united voice to address key issues in our community, on our island and in our state. Founded in 1968, our 430 member businesses and organizations represent a wide range of industries such as agriculture, aquaculture, astronomy, banking, construction, education, finance, food service, healthcare, media, non-profits, retail, real estate, tourism, technology, transportation and more. We exist to provide leadership and advocacy for a successful business environment in West Hawai‘i. Our goal is to enhance the quality of life for our community through a strong, sustainable economy on Hawai‘i Island.

We support the proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo. We believe in the UH’s mission and purpose to “Sustainably steward Maunakea for the benefit of our communities, Hawai‘i, and the world, as a publicly-accessible learning landscape where all who visit learn, and those who seek something more discover through rich multi-cultural experiences and multi-disciplinary discourse. Provide equal opportunities across the schools of the UH system and community partners to engage with the mauna in ways that perpetuate and advance knowledge, wisdom and values while fostering mutual understanding and respect.”

UH acknowledges this special place is a destination for residents and visitors seeking cultural, educational, recreational, and exploration experiences. With entities in place such as the Center for Maunakea Stewardship, ‘Imiloa Astronomy Center and the Institute for Astronomy, the University of Hawai‘i has broad resources, vast knowledge and a steadfast commitment to provide the best possible stewardship under very complex circumstances.

We strongly support UH management and state lease renewal on Maunakea. The University of Hawai‘i is by far the best option for a management structure on Maunakea and the lease renewal of 2033 is an urgent matter. The University has taken significant steps to address issues and improve management. We applaud the depth, scope and considerations embedded in the Master Plan pertaining to land use and facilities along with the Comprehensive Management Plan that fully outlines related activities and resources.

The Kona-Kohala Chamber of Commerce strongly supports the astronomy industry on Maunakea noting significant scientific discovery, global leadership, educational outreach, workforce pipelines, jobs and economic impact. Hawai‘i has worked diligently to diversify its economic sectors and attract high tech industry to create more opportunities. Hawai‘i’s astronomy sector provides needed economic diversity with a statewide impact of $167 million. Astronomy activities generate over $52 million in earnings, over $8 million in state taxes and 1,400 jobs statewide. We are very grateful to the UH Institute for Astronomy and Maunakea’s astronomy industry for well-developed, impactful programs that better prepare Hawai‘i students to become the workforce for higher paying science and technology jobs in Hawai‘i’s 21st century economy.
We support culture, science and environmental stewardship on Maunakea. We understand and respect the cultural values associated with Maunakea and believe science and culture can and will harmoniously exist in this special place. In 2017, we recognized the University’s commitment to culture on Maunakea when the Office of Mauna Kea Management, now Center for Maunakea Stewardship, was the recipient of the Kona-Kohala Chamber of Commerce Pualu Award for Culture and Heritage. The Chamber’s Pualu Awards recognize businesses, organizations or individuals that work together for the betterment of Hawai’i Island. The meaning of pualu translates to “all together, in unison, and cooperative.” (Pukui & Elbert, 1986).

We support expanded educational activity and construction of a new UH observatory at the Halepōhaku Mid-Level Facility to continue the important work of teaching, training and conducting research. As mentioned in the plan’s opening message, “Efforts already underway to elevate culture and education as key priorities alongside astronomy and land stewardship have begun with the assignment of responsibility to the ‘Imiloa Astronomy Center of Hawai’i. ‘Imiloa is developing additional necessary and appropriate educational programming for those who work on and visit Maunakea and improving the interpretive experience at the Maunakea Visitor Information Station at Halepōhaku.” In Part 2, Section 3 of the Master Plan, it states, “The facilities at Halepōhaku are essential to UH’s ongoing astronomy program and management.” In the UH Commitment Regarding Use of Halepōhaku, it states, “The only astronomy facility that will be proposed at Halepōhaku is the UH Hilo educational telescope.”

Lastly, the Kona-Kohala Chamber of Commerce strongly supports the development and future operations of the Thirty Meter Telescope (TMT). Although this Master Plan does not specifically address TMT, we must voice our support for this permitted project. Since 2009, TMT has contributed millions of dollars to educational initiatives for Hawai’i Island students that include The Hawai’i Island New Knowledge (THINK) Fund, Workforce Pipeline and Akamai Internship Program. Additionally, TMT will provide 300 local and specialized construction jobs during the construction phase, and once the telescope is complete, employ 140 staff. TMT’s commitment is to fill these positions with as many Hawai’i residents as possible and use local businesses for support services. We must acknowledge the positive contributions of TMT for our island community.

We appreciate the opportunity to voice our support for the UH Master Plan for the Maunakea Lands, E Ō I Nā Leo.

Sincerely,

Wendy J. Laros, President & CEO

RE: December 10, 2021 Proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo.

To the University of Hawai‘i Board of Regents,

The Kona-Kohala Chamber of Commerce brings together the business community as a strong, united voice to address key issues in our community, on our island and in our state. Founded in 1968, our 430 member businesses and organizations represent a wide range of industries such as agriculture, aquaculture, astronomy, banking, construction, education, finance, food service, healthcare, media, non-profits, retail, real estate, tourism, technology, transportation and more. We exist to provide leadership and advocacy for a successful business environment in West Hawai‘i. Our goal is to enhance the quality of life for our community through a strong, sustainable economy on Hawai‘i Island.

We support the proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo. We believe in the UH’s mission and purpose to “Sustainably steward Maunakea for the benefit of our communities, Hawai‘i, and the world, as a publicly-accessible learning landscape where all who visit learn, and those who seek something more discover through rich multi-cultural experiences and multi-disciplinary discourse. Provide equal opportunities across the schools of the UH system and community partners to engage with the mauna in ways that perpetuate and advance knowledge, wisdom and values while fostering mutual understanding and respect.”

UH acknowledges this special place is a destination for residents and visitors seeking cultural, educational, recreational, and exploration experiences. With entities in place such as the Center for Maunakea Stewardship, ‘Imiloa Astronomy Center and the Institute for Astronomy, the University of Hawai‘i has broad resources, vast knowledge and a steadfast commitment to provide the best possible stewardship under very complex circumstances.

We strongly support UH management and state lease renewal on Maunakea. The University of Hawai‘i is by far the best option for a management structure on Maunakea and the lease renewal of 2033 is an urgent matter. The University has taken significant steps to address issues and improve management. We applaud the depth, scope and considerations embedded in the Master Plan pertaining to land use and facilities along with the Comprehensive Management Plan that fully outlines related activities and resources.

The Kona-Kohala Chamber of Commerce strongly supports the astronomy industry on Maunakea noting significant scientific discovery, global leadership, educational outreach, workforce pipelines, jobs and economic impact. Hawai‘i has worked diligently to diversify its economic sectors and attract high tech industry to create more opportunities. Hawai‘i’s astronomy sector provides needed economic diversity with a statewide impact of $167 million. Astronomy activities generate over $52 million in earnings, over $8 million in state taxes and 1,400 jobs statewide. We are very grateful to the UH Institute for Astronomy and Maunakea’s astronomy industry for well-developed, impactful programs that better prepare Hawai‘i students.
to become the workforce for higher paying science and technology jobs in Hawai’i’s 21st century economy.

We support culture, science and environmental stewardship on Maunakea. We understand and respect the cultural values associated with Maunakea and believe science and culture can and will harmoniously exist in this special place. In 2017, we recognized the University’s commitment to culture on Maunakea when the Office of Mauna Kea Management, now Center for Maunakea Stewardship, was the recipient of the Kona-Kohala Chamber of Commerce Pualu Award for Culture and Heritage. I support UH master plan on Maunakea and TMT.

Sent from my iPhone
I spent twenty seven years as a Professor of Animal Science in the College of Tropical Agriculture and a joint Faculty in the Dept of Physiology in the John Burns Medical School. I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

TMT is true science. Watching Hawaii’s economy tank over the past year and a half, we definitely need to get a positive contribution not only to our economy but to our environment, to our children’s education and to our culture. TMT provides all of this and more.
Keep TMT!
Meryl Abrams
Aloha,

I wanted to share with you my support for the TMT project. I feel TMT would benefit the state of Hawaii for the following reasons:

1. Research for the benefit of many – not just the scientific community at large, but also for aspiring scientists here in Hawaii. I envision high school and college students serving in some sort of internship program that would benefit their learning.

2. Aspiring our youth – we already see a “brain drain” of our youth to the mainland due to a lack of technology jobs. Why not give them an opportunity to stay in Hawaii?

3. Providing much needed jobs – as a former resident of Hilo, I understand jobs that pay well are hard to come by. The TMT would provide construction jobs, support staff and secondary jobs once the TMT is complete.

4. Funding for the UH – I’m not a finance person, but I’m sure the TMT would be able to generate funding for the UH through various grants.

Mahalo for listening to my thoughts,

Kevin Ancog

To BOR:

We need UH's new Master Plan in place in order to renew UH's Master Lease for Mauna Kea and keep the astronomy industry, including TMT, in Hawaii! This is an important, clean industry for Hawaii. This will advance knowledge for all people of the world. The master plan is well thought out and shows a sense of honor and responsibility.

Aloha, Ruth Robison

To: bor.testimony@hawaii.edu

As a resident of Hawaii for the last 40 years I have been pleased with the UH master plan and the emergence of Mauna Kea as the premier site for astronomy in the world. I would like to see UH maintain this position and not be bullied by an extremely small but loud minority determined to remove UH and astronomy from Mauna Kea under the guise of "religion", which was not practiced until a road to the summit was built for observatories. Hawaii can lead the world in precious little, but I would much rather it lead the world in astronomy than homelessness.

Gregory B. Wilson, M.D.

Sent from my iPhone
Aloha to all,

As a French astronomer who lived with all his family for several years in Waima (Big Island), who made the main part of his scientific career on the top of Mauna Kea, thanks to the Canada-France-Telescope and also from many collaborations with UKIRT, Keck telescopes, JCMT, Gemini North, I fully support the completion of the UH Master plan. It will continue what was just at the beginning in 1980, the year I arrived in Hawaii which has since given so many results. And TMT is just in the line of the developments of this exceptional site, with first the generation of the 3 - 4 meters telescopes, then the 8 to 10 meters and now a 30 meters.

For sure, the presence of astronomy on Mauna Kea is vital for the Hawaiian people but also for the worldwide scientific community. So, please don't let a stupid nationalism and a poor populism take the lead. I want to trust your understanding of your true interest, your open mind for a bright future of the science from Mauna Kea.

Mele kalikimaka

Testimony in favor of approving Mauna Kea Master Plan

Dear Regents:

This communication is to express my support for your approval of the revised Mauna Kea Master Plan. I was a member of the Mauna Kea Management Board from 2004 to 2012, when the original Master Plan was developed and approved. My paramount concern has always been the well-being of the natural resources on Maunakea. On the MKMB, we organized a team of people – observatory supporters, objectors, and agnostics alike – to prepare the Natural Resource Management Plan (NRMP) component. My comments concentrate on that aspect of the Plan, as there are many others who are more qualified to discuss other aspects such as the interface with Native Hawaiian cultural practitioners, tourism, etc.

The NRMP was recognized as one of the best plans for management of State lands and has served as model for other areas. Our component plan called first for the protection of rare species and habitats, second for dealing with invasive species, and third with research on the biology of the mauna, which was still not fully documented. A series of goals and objectives and actions were developed to get to work on this. Not only was the plan visionary, it was effective. Under the guidance of the Master Plan and OMKM, all these objectives were pursued with a remarkable degree of success, considering we are talking about the government after all! We now have a much greater understanding of the ecology of the wekiu bug, we have a full flora of the summit area, and we know much more about the permafrost and subsurface hydrology.

I think natural resource management of Maunakea has gotten an unfairly bad rap. There was bad management at one time – I was a protestor myself in the 1990s after construction of one of the observatories left a giant trash pile that blew in the wild summit winds halfway to Hilo. We came up in a pickup truck and retrieved what we could, cursing the University of Hawaii for their malfeasance. But in 2000, when a new management structure emerged, and Barry Taniguchi helped provide the community leadership the mauna really needed, things turned around dramatically for the better. Development of the Master Plan – as contentious as that was – helped solidify that. It is a challenge to manage the multiple permitted uses on the mountain – but we should not just tear down the observatories and kick out the curious tourists and local snowplayers in their lifted trucks. We need some balance. Despite a plethora of fake news, the mauna can be managed with current uses and minimal impacts. Astronomy has been and can be even a greater source of funding for critical management. The new Master Plan redoubles the focuses on working with the Native Hawaiian community to celebrate the mauna and reduce adverse effects. The Center for Maunakea Stewardship has been a very positive addition and has helped outreach into the community in a deeper way than ever before. I urge you to take steps to approve the pre-final Master Plan so that we can continue to take care of the natural and cultural resources and truly malama Maunakea for the greater good of our citizens.

Ron Terry
We support TMT

Island community and our state as a whole, for the economic diversification and world-class nature of the
work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

The future of high tech in our state is linked to the success of astronomy on our mountains, especially
telescopes on Maunakea. High Tech is our state's hope for future diversification. We don't have much else -
do we really want more tourism? Maunakea is unique on this earth, and the excellent conditions for
astronomical research are also unique to Maunakea. We must maintain this opening to the universe.
Polynesians in the distant past used the science of astronomy to navigate the whole Pacific; we can continue
to use this scientific gift to navigate our world now and for future generations.
Mahalo,
Ann Lum

## Your Testimony/Comments

I am an Astronomer Emeritus at the UH Manoa Campus. I worked at the UH from 1980 to 2016 and have therefore seen and participated in the growth of astronomy on Maunakea from the early days. I am a former director of the NASA Infrared Telescope Facility. I was born and raised on Maui, and like many people in the islands I am saddened by the controversy of astronomy development on Maunakea. Stopping the TMT and even stopping all of astronomy in Hawaii will not resolve the issues raised by the Kia‘i movement and it will not yield a better future for the next generation. I believe the proposed Master Plan is a good step toward addressing the many issues that face the University and the community. It will take generations to realize the objectives of the
plan and to address the concerns of the Kia'i movement. No plan will please everyone, but we must move forward and I urge to BOR to adopt this plan.

[Laychak_BoRtestimony_support.pdf](Laychak_BoRtestimony_support.pdf) (33.6 kB)
To: University of Hawai‘i Board of Regents  
From: Mary Beth Laychak  
Subject: Testimony on Proposed Master Plan for the University of Hawai‘i Maunakea Lands  
Date: December 15, 2021

As a staff member of one of the Maunakea Observatories, I am reassured to see a long range commitment to astronomy in the draft Master Plan; E Ō I Nā Leo. The Maunakea Observatories are the scientifically most productive collection of telescopes in the world and I am proud of the work that we do.

I have the privilege to represent my facility and the Maunakea Observatories (MKOs) in the community. The core values described in the Master Plan resonate with me and reflect the work that myself and others strive to do in the community. It is my opinion that the MKOs have a kuleana to the mauna and the community to respect the wahi pana that is Maunakea and share understanding of the universe gained by the telescopes with the broader community. We also have the obligation to be good neighbors, and contribute to the community we call home. Over the past 50 years, the MKOs have not always done as much as we can or should have, but we strive to do better moving forward.

Over the past decade, I have been a part of the MKOs efforts to do better, both within and outside of our traditional STEM outreach. From the start of COVID, the MKOs saw the need in our community and asked the community “how can we help?” When our community answered that critical needs were food insecurity and our keiki, we started to do the work to help. The W.M. Keck Observatory created a program called Farm to Families where they bought produce from local farmers then donated the food to local organizations in need. MKOs staff volunteer at the Hawai‘i Island Food Basket, packing and helping to distribute food across the island. I am one of the founders of Keiki Heroes, a community based program to educate and empower keiki to feel in control of their own health during COVID. Keiki Heroes is now a statewide program with materials distributed through all the major health organizations in the state. The MKOs are a critical sponsor of Keiki Heroes, supporting the program since day one.

Community engagement is a cornerstone of my work. In my experience, engagement works best when it is a two-way street: asking the community what they want and then listening to the answer. I encourage the Board of Regents and the University of Hawai‘i to truly live up to the values outlined in E Ō I Nā Leo by involving community voices— specifically Hawaiian voices. I believe the Maunakea Observatories are eager to support and willing to lead these efforts, working collaboratively with the University and our community to achieve these goals.

Thank you for the opportunity to provide testimony,  
Mary Beth Laychak
Aloha Chair Moore and members of the University of Hawai‘i Board of Regents,

Mahalo for the opportunity to submit testimony in support of a long-term future for astronomy on Maunakea. It is my personal belief that there is much good to come from the continuation of Hawai‘i astronomy, so long as we are able to come together as a community to advance a new model of collaboration, reciprocity and trust.
I was born and raised in the islands, and have the privilege of working with the Maunakea Observatories (MKO). I have been a part of the telescopes’ good-faith efforts to reset relationships with members of the Hawai’i Island and statewide community. It is clear that, over the past five decades of astronomy on Maunakea, the experience our community members have had with representatives of the astronomy field has been uneven and inconsistent. For some, the observatories are valuable resources, close collaborators, celebrated partners. For others, the observatories are mysterious ivory towers, perceived as inaccessible and unwelcome in our home. The fix for this unhealthy dynamic didn’t start today, nor will it be complete tomorrow; it will take a while, and only happen through genuine effort sustained over time, directed in the shared best interest of our community.

The past several years have been a sharp wake-up call. These events have underscored the need to put much more focus toward caring for the relationships that make healing, collaboration, and new beginnings possible.

As others will likely point out, the draft Master Plan, E Ō I Nā Leo, lacks specificity in describing how community voices - specifically Hawaiian community voices - will inform Maunakea management decisions in the future. This reset of relationships and power dynamics is essential to the success of any future management plan. Ensuring that the community derives meaningful benefit from the presence of astronomy on Hawai’i Island is critically important as well, and I encourage the Regents to probe further into the University’s position on how that benefit can be shaped in collaboration with our community, and delivered in a meaningful way. The MKOs are eager to support and willing to lead in that effort, and will work collaboratively with the University to advance these goals.

Mahalo for your consideration of my testimony, and for your attention on this important set of issues.

With aloha,
Christine Matsuda

Dear Board Members,

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work.

Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

I was a friend of Paul Coleman and I know he supported everything that you are doing for Hawaii.

Stay strong for Paul.

Thank You

Carl King

Dear Board of Regents,

On behalf of the Directors of the Maunakea Observatories (MKO), I am respectfully submitting testimony on Agenda Item IV. B. Partial Report of the Maunakea Plan Review Permitted Interaction Group Recommending Consideration of Approval of the Proposed Master Plan for the University of Hawai'i Maunakea Lands -- E O I NĀ Leo (Listen to the Voices) that will be discussed at the Special Board of Regents Meeting on December 16, 2021.

The testimony is attached to this email as a PDF file.

Mahalo,

Rich Matsuda

W. M. Keck Observatory

MKO Testimony_UH Master Plan.pdf
119K
To: University of Hawaiʻi Board of Regents  
From: Maunakea Observatories  
Subject: Proposed Master Plan for the University of Hawaiʻi Maunakea Lands, E Ō I Nā Leo  
Date: 15 December 2021

The Maunakea Observatories (MKO) appreciate the University’s efforts to guide land use decisions for the next two decades through the proposed Master Plan, E Ō I Nā Leo. MKO extends our support and desire to collaborate with all stakeholders on Maunakea as the important and weighty future responsibility of governing the Maunakea Science Reserve lands is determined.

The MKOs agree with a long range commitment to astronomy in the draft Master Plan. We believe science is important, and astronomy is beneficial to our local community, the state of Hawaiʻi, and the world.

For the past five decades, telescopes on Maunakea have provided important new knowledge about the universe, including two Nobel Prizes in Physics, the very first image of a black hole - Pōwehi, detection of ʻOumuamua - the first known interstellar object passing through our solar system, the first image of a solar system beyond our own - HR8799, and much more. The publicly shared scientific knowledge produced on Maunakea deepens our understanding of the laws of nature and even addresses fundamental questions about human existence.

There are many positive benefits that result from our scientific endeavors. We share astronomy with students through our many STEM outreach activities, such as the Maunakea Scholars Program that provides opportunities for Hawaiʻi public high school students to engage in research using highly-coveted time on Maunakea telescopes. We provide high-quality internships to college and community college students from Hawaiʻi through programs like the Akamai Workforce Initiative. And, we offer a wide range of engineering, technical, scientific and administrative employment opportunities for Hawaiʻi residents in our workforce of approximately 500 jobs at the MKOs. In addition, the MKOs rely on scores of local businesses to conduct our operations. The total economic impact is significant, contributing approximately $200M per year to Hawaiʻi’s economy.

While we believe in the benefits of astronomy, we acknowledge that for many in the Native Hawaiian and local community Maunakea is a wahi pana of immense environmental and
cultural significance that takes priority over other activities. Knowing this, we strive to conduct astronomy in a balanced and respectful way with care for the environment and respect and support for Native Hawaiian cultural practices. Our thoughts are in alignment with the recently released Decadal Survey on Astronomy and Astrophysics 2020 (Astro2020) from the National Academies of Sciences, Engineering, and Medicine, which includes a major recommendation for “the development of a new model for respectful, collaborative decision-making in partnership with Indigenous and other local communities.” As such, the MKOs recommend the plan be more specific about its impacts on the indigenous Native Hawaiian and local communities, and that the plan outline processes for meaningful partnership and collaborative decision-making with these communities, which we look forward to participating in.

Thank you for the opportunity to provide testimony.

Aloha,

Director Hilton Lewis, W. M. Keck Observatory (Keck I and Keck II)

Interim Director Andy Sheinis, Canada-France-Hawaii Telescope

Director Paul Ho, James Clerk Maxwell Telescope (East Asian Observatory)

Director John Rayner, NASA Infared Telescope Facility

Director Michitoshi Yoshida, Subaru Telescope

Your Testimony/Comments

The TMT is part of the grand vision of our beloved Governor of Hawaii, John Burns. Mauna Kea's potential was part of how he saw Hawaii and its role in the future. According to grandson Brendan, Governor John Burns, "dreamed of the creation of world class telescopes". Because of his efforts to make this happen, the road leading up to the telescopes on Mauna Kea is called "John A. Burns Way." This was in 1970.

Experts will extoll the location, the pristine conditions, I point out the continuity of history. The building of the TMT will be the pinnacle of the vision he had for our state and the continuation of Queen Lili‘uokalani’s passion for science. She said, "The ancient Hawaiians were astronomers."
Whatever valid issues exist between the supporters and protesters of the TMT, I hope that they can be worked out in a fair and honest way, perhaps in the Hawaiian *Ho`oponopono* way.

I think about the ancient ones— *na po`e kahiko*—robust, curious, hungry to find. How they would have relished exploring nōho`i— *the Milky Way*—to watch creation unfold by slicing through time diving into the waves of the Big Bang.

Jean Toyama

Page 1527
TMT is arguably the greatest project to ever be developed in Hawaii. I am confident UH will continue to do an incredible job of managing Mauna Kea, noting that Mauna Kea is actually among the few best managed state-owned parcels of land in Hawaii. The University has been especially sensitive with respect to obtaining a permit for the construction of TMT, which would join all the observatories administered by UH as the most scientifically-productive collection of telescopes in the world. Surely UH regents must be aware that US intelligence agencies have been directed to give unclassified reports about Unidentified Aerial Phenomenon (UAP), reported by US Navy pilots and others, to Congress in June 2022. The government's publicly admitted interest in these phenomenon presents an unbelievable opportunity for this University to assume a prime position in efforts to learn if we are the only planet with life in this universe. The kids know about these sightings. They are engrossed in Star Wars and enthralled with anything to do with outer space. Why deny that hunger to learn to our keiki right here in our own state?

Too few science educational and enrichment opportunities are available to marginalized populations in Hawaii. The United States government aims to address this problem. STEM education in Hawaii would be significantly enhanced by recognizing the unique opportunity Mauna Kea presents. The building of TMT will tell all our children that they can learn about the stars and the planets right here in Hawaii— they need not leave home. TMT will reinforce the historical fact that their ancestors traveled all over the Pacific and Indian Oceans before the Europeans even knew Hawaii or the Pacific Ocean existed! Supporters of TMT, and that is actually the majority of the population in Hawaii, know their children want to be able to proudly proclaim: "I am of _____ ancestry and I discovered this, I invented that, I identified!!! an "aerial phenomenon", I made a difference—not just for my people, my culture, my family, my country, but for the whole world—the universe! Yes, me! I did it and you can too!"

Approve the Master Plan and ensure renewal of the Master Lease with the University of Hawaii. IMUA!

Adrienne King

1 Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) Design and Development Launch Pilots

Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) is a comprehensive national initiative designed to enhance U.S. leadership in science, technology, engineering and mathematics (STEM) discoveries and innovations focused on NSF’s commitment to diversity, inclusion, and broadening participation in these fields. NSF INCLUDES supports efforts to create networked relationships among organizations whose goals include developing talent from all sectors of society to build the STEM workforce. This initiative seeks to improve collaborative efforts aimed at enhancing the preparation, increasing the participation, and ensuring the contributions of individuals from groups that have traditionally been underrepresented and underserved in the STEM enterprise: women, persons with disabilities, African Americans/Blacks, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, Native Pacific Islanders, and persons from economically disadvantaged backgrounds. Significant advancement in the inclusion of these groups will result in a new generation of STEM talent and leadership to secure our nation's future and long-term economic competitiveness. https://www.nsf.gov/pubs/2017/nsf17522/nsf17522.htm

| I urge the BoR to approve the new Master Plan for Maunakea. One of the ways in which Hawaii is known around the world is through its astronomical discoveries, many of which are given Hawaiian names. The University is improving its outreach and education to the broader community and astronomy is a great way for us to grow and diversify the Big Island economy with minimal environmental impact. Maintain strong oversight but allow astronomy to continue on Maunakea! |

**Your Testimony/Comments**

There needs to be continuity in management concerning Maunakea and UH has a balanced vision to remain its keeper. One of important issues for me about this TMT build is based on our economy and what this project will contribute to that.

**Your Testimony (pdf or word)**

No file attached
Building TMT is a matter of time. The protesters' game is to delay as long as possible in the hope that we give up. Part of this strategy involves changing the management system of Mauna Kea, especially removing the University of Hawaii as the manager of Mauna Kea because that would create chaos for the astronomy community. The reason for this is that UH holds a Master Lease from the Department of Land and Natural Resources to manage Mauna Kea and all the telescopes have sub-Leases with UH based on that Master Lease. If UH's Master Lease is not renewed, it will create legal ambiguity as to whether the subleases are still good and possibly push the telescopes off Mauna Kea. Therefore, the protesters believe that stopping UH's Master Lease stops TMT. That is not strictly true, but it will create enough risk that we encourage TMT supporters to support renewal of UH's Master Lease.

UH is currently applying for that lease renewal. Part of that process is the creation of a number of plans, including a Master Plan. The UH Board of Regents is holding a hearing to discuss the Master Plan. The protesters are using this opportunity to attack the plan as a way of attacking TMT and destroying the astronomy industry.

The reality is that UH actually does a really good job managing Mauna Kea. Mauna Kea is some of the best managed land in the state.

I OPPOSE TMT ! this email I received asking to support is malicious and disgusting.

Go build a telescope on YOUR HOUSE then

Shanna
Aloha Regents,

I’m an active member of our Kona community and have served as Association of Hawaiian Civic Clubs Hawaii Council President. I have also served on the Hawaii Island Burial Council.

I support the University’s management on Maunakea.

The mauna holds very special meaning to all of us of Hawaiian ancestry. It’s where we can all look forward as a people knowing our ancestors traveled the vast oceans using the very sky we see from its summit today. It’s the best place in the world to study the universe. The mountain is a portal to the universe – a place to study the stars that lead our ancestors to these islands.

What an honor for future generations of native Hawaiian people to know that their mountain stands in the world’s light. Maunakea represents our future, we respect the value and significance and cultural values keep us moving forward and progressing. Our culture is living and vibrant.

I believe the University of Hawaii is successfully managing the mountain, they are successfully implementing the Comprehensive Management Plan, which we all as a community supported, and they are protecting the cultural, scientific, educational and natural resources within their kuleana of land. The draft Master Plan before you continues the stewardship efforts to malama Maunakea.

When an agency of any kind has to manage public lands, finding a balance to multiple public interests is necessary. That challenge and responsibility is not unique to UH or to Maunakea. The draft Master Plan before you strikes that balance.

This is good stewardship. Please approve the Proposed Master Plan for the UH Lands on Maunakea.

Mahalo for your time,

Gene ‘Bucky” Leslie

Sent from my iPhone
Even though I live in Michigan and have never been to Hawaii, I have friends who live there and several relatives and friends who have travelled there! The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and your state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up! The tourism industry in Hawaii has suffered greatly because of the pandemic, so please be good to the astronomy folks! We all need the science of astronomy, so this is good for ALL of the USA!

The international community has weathered the years-long legal storm and protests, and continues to support the TMT in spirit and in substance. The majority of people in Hawaii support the TMT and associated Mauna Kea area management. Even the majority of people with Native Hawaiian ancestry support the TMT. The UH has addressed the issues well, and should remain the master lease holder for telescope management. It is time we move ahead instead of taking a step into stagnation.

Daniel Smith <smithdan@hawaii.edu>  To: bor.testimony@hawaii.edu  Wed, Dec 15, 2021 at 10:12 AM

I write in my individual capacity to support UH's dra. Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). From what I have heard, UH has done a good job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT.

TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. In my observations, the science community is very respectful and treats the land well. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work.

Astronomy on Mauna Kea is properly viewed as an extension of the Pacific Islands cultures that brought people to these islands. Astronomy has earned high respect. I believe Papa Mau would have supported continued astronomy on Mauna Kea.

Astronomy on Mauna Kea provides opportunities for our youth to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. As an educator, I hope my students will have opportunities associated with astronomy and the TMT.

On a personal note, as an undergraduate I, among others, had the opportunity to work for “big science” in a physics lab exploring the nature of fundamental particles. It greatly improved my academic experience and lead to my life-long involvement in computer science-related work. TMT will make possible many such opportunities of for the younger generations in Hawaii.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please extend the Master Plan and keep astronomy on Mauna Kea.

Respectfully, E Malama Pono,
Daniel C. (Dan) Smith, PhD
1-808-462-6346, Mobile
I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I urge UH to do everything in its power to ensure TMT is built.

If the TMT is not built on Maunakea, the long term future of astronomy in Hawaii is bleak, as no project involving the construction of a major observatory on Maunakea (the best site in the world for ground-based astronomy) will want to go through the struggle, with likely a negative result, that the TMT project has been going through for so long. Maunakea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Maunakea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. It brings a valuable dimension to our lives and culture that few communities have. The presence of astronomy on Maunakea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and recognition of the world-class nature of the work it brings to our state. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Sincerely,

Tom Geballe
Hilo
I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Please, don't let the protesters convince you otherwise. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!
Aloha

I would like to express support for the Maunakea Master Plan as well as the entire Astronomy community as we work through this difficult stage of our transformation. Although Maunakea has been mismanaged in the past, it has worked hard to improve on all fronts including cultural, environmental and scientific. I grew up with telescopes on Maunakea and I see them as a valuable part of our future. Thank you for hard work and perseverance.

Mahalo
Katherine Roseguo

Please - remember, reduce, reuse, recycle, renew, refresh, recover, restore, respect, refuse, reintegrate, rethink, revitalize, replant, replanet, regreen, refurbish, regrow, rot.
I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT.

TMT is one of the greatest scientific projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture.

Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

Please keep it up. I mua Kilo Hōkū and i mua TMT!

Your Testimony/Comments
I whole-heartedly support the UH draft Master Plan because it keeps astronomy on Maunakea alive (including the Thirty Meter Telescope). UH has done a very good job of managing the mauna over the past 20 years, as someone who has worked there I know this isn't always an easy undertaking. It's easy to criticize when things do go wrong, but overall I am very confident in UH's ability to manage Maunakea - it is now some of the best managed state-owned land in Hawaii! Astronomy on Maunakea provides a huge amount of scientific knowledge to all of humanity. I am happy the observatories exist and proud of the work they do. Astronomy provides clean, skilled jobs for our residents. It also provides opportunities for our keiki to in terms of education and training. The presence of astronomy
on Maunakea is vital for the Big Island community and our state as a whole, for the economic diversification and the world-class nature of the work that goes on there. Please keep it up, and please do everything within your power to ensure TMT gets built here.

Mahalo for your time,

Michael

I support the UH Master Plan

Michelle Sandell <mysandell@gmail.com>
To: bor.testimony@hawaii.edu

I support the UH Master Plan because I support astronomy in Hawaii, astronomy supports Hawaii, and I believe the University of Hawaii has stepped up well to handle the major responsibility of managing Mauna Kea in the past. I am confident they will continue to do so in the future. The Master Plan’s expanded efforts to incorporate other disciplines for field studies at Halepōhaku, to be committed to the teaching telescope there, and to increase the ways the larger community can connect with the decision-making process are all exciting things to look forward to.

I am proud of what Mauna Kea stands for, and I am proud that this evidence of care for the land and for each other, and the pursuit of knowledge on Mauna Kea is a manifestation of important virtues that humans prioritize. Let’s keep up the good work and move forward with UH’s draft of the Master Plan.

Sincerely,
Michelle Sandell

<td>Many wrongs to Native Hawaiians grievously need attention. There is vehement disagreement whether this can be done in concert with or in exclusion to Astronomy. Yet, driving away Astronomy (TMT, current telescopes) denies educational and life opportunities for Hawaii’s future generations— including for Native Hawaiians who bring valuable perspectives to advancing scientific excellence. If Hawaii becomes known for an anti-science attitude the negative impacts will extend beyond Astronomy to all scientific disciplines, hindering the ability of Hawaii’s children to thrive in the current century and diminishing our ability to solve critical problems. UH can and should lead the way.</td>

Support for UH’s Master Plan for Maunakea

Georjean Adams <georjean@gmail.com>
To: bor.testimony@hawaii.edu

I support the draft Master Plan for the University of Hawaii Maunakea Lands dated December 10, 2021.

Maunakea is a special place for its beauty, cultural significance and uniqueness in the world. We share kuleana to keep it that way. The Plan shows careful consideration and balancing of both the cultural and scientific importance of Maunakea.

- Maunakea is the best location in the world for astronomical observation. UH should do everything it can to maintain that status. I support the cutting edge observatories on Maunakea, the decommissioning of observatories that are past their prime, and the building of new observatories as they meet standards in the Master Plan. Yes, I support building the TMT. I believe that the people employed by these observatories will continue to treat the mauna with the utmost respect. The world benefits from the discoveries made on our mauna. Our kama’aina benefit from the inspiration (and jobs) our observatories provide.

- Expanding educational opportunities is a great goal, as long as you are careful not to overwhelm facilities.

- Allowing cultural practitioners access to the summit is a given. But they, too, need to malama ka ‘aina. I’m disgusted at the continued ugliness of the protestors’ camp leavings and hope we never see such a mess up at the summit.

- Tourism (off-islanders and kama’aina) has to be managed and limited to prevent damage to the mauna and to facilities. I think the Plan outlines a decent approach, but I expect it will require adjustments as you learn what works best.

The University of Hawaii has learned a lot (and will keep learning) and has shown that it should continue managing the Maunakea Lands for the benefit of all.

Georjean Adams

I Support TMT

Terryl Leong <terrylberryl@gmail.com>  
To: bor.testimony@hawaii.edu  

Because Ancient Hawaiians developed healing methods like massage and plant-based medicines, I really feel they would have supported the education that the TMT project will give the world!

As long as all precious living things that the building of TMT structures would destroy are protected and found homes for, I support this project. All other space exploration structures not being used should be removed with the same consideration.

To the University of Hawai’i Board of Regents:

I strongly support UH’s draft Master Plan. It keeps the vital work in the field of astronomy alive on Mauna Kea, including the Thirty Meter Telescope (TMT). In my opinion, the TMT is the most significant, leading-edge project to ever be developed in Hawaii, and UH should be doing everything in its power to ensure the TMT is built. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and some of the most important discoveries in astrophysics, like “dark energy” and locating a “black hole”, have been made at the Keck. Astronomy, using the stars to navigate, is central to the Hawaiian culture, and how anyone, especially any dedicated educator could be against building the world’s greatest telescope here, in reality, runs counter to the Hawaiian culture. Astronomy on Mauna Kea also provides opportunities for our students on all grade levels to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

Please make sure it is supported!
Mahalo and I mua TMT!
Elizabeth Miller
Volcano, HI 96785
Aloha e Regents,

I am writing in favor of the UH Mauna Kea Master Plan up for discussion at your upcoming Board of Regents meeting on December 16, 2021.

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

I do have a couple of suggestions for how to improve the master plan.

1. After the decommissioning of the 5 telescopes promised with TMT, there should be no future restrictions on the development of Mauna Kea for astronomy purposes imposed by UH on future generations. The individual permitting process for each telescope can decide that. UH should not feel pressured by protesters to place artificial caps on the number of telescopes to be built on Mauna Kea.

2. UH should strive to explain that "culture" is a concept that embraces both scientific endeavor and religious experiences. Unfortunately, much of the discussion of Native Hawaiian issues in the plan provided an overemphasis on Kapuist religious beliefs and creation chants. The reality is more complicated. For starters, the kapu religion imposed on the islands by Kamehameha I was abolished by our ali`i 200 years ago. Continuing to invoke its beliefs, such as the kumolipo, or Native Hawaiians being descended from Papa and Wakea, in the name of the Hawaiian people is odd. Second, there were atheists in Hawaii even prior to the arrival of Captain Cook, so it was never true that Native Hawaiians uniformly believed in any particular religion. The belief that Mauna Kea is sacred, or mention of "Hawaiian worldviews" are unjust impositions on the freedom of thought for Native Hawaiians. Native Hawaiians are free to believe as we choose, both religiously and politically. UH should point out that claims of Mauna Kea's sacredness are ultimately "religious" beliefs. They are, at best, equivalent to scientific beliefs. Thus, both science and religion have a right to share the mountain with each other. And the sharing of the mountain by science and religion is the culture of Hawaii.

Mahalo,

Samuel Wilder King II

To: bor.testimony@hawaii.edu  
Thu, Dec 16, 2021 at 6:40 AM

I am writing this in support of the Thirty Meter Telescope. Here is an opportunity to respectfully connect Hawaii's past to its future. This has many layers of positive things that can benefit our community as well as students in every level of education. Jobs being one of the driving factors and astronomy the other. I hope this short letter helps to make this telescope a reality.

Sincerely,

Ian Jenss

Your Testimony (pdf or word)

I‘mua TMT.docx (89.7 kB)
I'mua re TMT

I support University of Hawaii's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). I have lived in Kamuela for 60 years and the UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture.

It is common knowledge among all of us who live in Hawaii that King Kalakaua showed immense interest in astronomy and stated in a letter to Captain R. S Floyd that he had a desire to see an observatory established in Hawaii. And Queen Liliuokalani oft noted that “The ancient Hawaiians were astronomers”. So it is fitting that the use of Mauna Kea as the world’s premier astronomical observing platform is a testament to the vision of our Hawaiian heritage.

Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our state. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up.  I mua Kilo Hōkū and i mua TMT!

I am a retired kupuna and support the TMT. The mountain is the best seeing in this hemisphere. I think that great knowledge can be learn from heavenly observations at that site.

I see no reason why the mountain can not be used in many different ways as long as the beauty of the place is respected and preserved. The people of Hawaii should be able to visit and learn from the area.

Wed, Dec 15, 2021 at 10:18 AM

I support the UH Master Plan for Astronomy and the placement of the TMT on Mauna Kea, not only for the numerous opportunities and benefits they would provide Hawaii and its people but for the resultant worldwide recognition and honor of our original Hawaiian navigators and our beloved mauna!

Theone Vredenburg  
(Born and raised on its slope.)
15 UH RESPONSE TO MAUNA KEA WORKING GROUP’S HE LĀ HOU KĒAI MA MAUNA A WĒKEA: A NEW DAY ON MAUNA A WĀKEA
Mahalo for the opportunity to provide comments on the Mauna Kea Working Group’s ("MKWG") Draft Report to the Hawai‘i State Legislature entitled, He Lā Hou Kēia Ma Mauna A Wākea: A New Day On Mauna A Wākea (“Report”). It is clear from the Report that the MKWG worked diligently in fulfilling their charge.

We have organized our response around five themes that arise from the content of the Report: 1) The University of Hawai‘i (UH) embraces the value of the Kānāwai principles; 2) The MKWG’s recommendations risk the future of astronomy in Hawai‘i and beyond; 3) The complexities and costs of managing access to public lands have been underestimated; 4) Legal and administrative concerns; and 5) UH’s responsible stewardship of Maunakea.

Our cover letter summarizes our views on these themes with further elaboration provided in the Attachment. Our intent is to provide an overview of the real challenges and implications of the Report and provide background that should be considered prior to contemplating and drafting legislation seeking to build upon the recommendations in the Report. Further discussion is welcomed.

1. The Kānāwai principles are consistent with UH plans for Maunakea

We acknowledge and appreciate the holistic and integrated approach of the Kānāwai principles described in the Report. The symbiotic connections between the elements of nature, and of nature with humans, emphasizes the importance of sustaining balance between these forms. These principles are valuable guidelines for land use planning and decision making. We understand that stewardship of Maunakea is a privilege that requires a comprehensive and cohesive management program. The University embraces these perspectives, which are reflected in the integrated and balanced nature of our own Master Plan including our proposed update, our Comprehensive Management Plans, and our Administrative Rules that collectively and specifically outline our commitments and responsibilities to Maunakea, the state, and the communities we serve.

As you know, managing public lands, especially ʻāina with as many complexities and conflicting expectations is extraordinarily complex. We are committed to continuous improvement and look forward to improving the application and integration of these principles into the University’s existing and next plans within the context of governing laws and regulations.

2. The MKWG Report places the future of astronomy at risk

Foundational to the Report’s recommendations is the position of the MKWG that astronomy on Maunakea above the 9,200 foot elevation should be phased out as an allowed land use (Page 25).

Support for astronomy on Maunakea is a longstanding State policy going back more than fifty years. At that time, the State decided that it did not want to just be a passive landlord for the best observatories in the world but that Hawai‘i should be the home of a world-class program of astronomy research and education. This has enabled Hawai‘i to participate in and lead the discoveries that underlie human understanding of the origins of the universe and the celestial bodies around us. It is not an overstatement to say that what is at risk here is the future of
astronomy as a field of human inquiry, as a source of economic activity on Hawai‘i Island, as an inspiration for Hawai‘i’s youth, as a source of pride for the people of Hawai‘i, and as an area of international excellence for UH and our students. Consistent with its place in Hawaiian cultural tradition and cosmology, Maunakea stands as a uniquely treasured scientific and community resource.

Maunakea is truly deserving of the highest levels of stewardship. Decisions on access to Maunakea for culture, science, education, recreation, and commercial activities require broader policy discussions involving stakeholders across multiple communities and policy-makers on Hawai‘i Island and the State. The recommendation to eliminate astronomy is not substantiated by wider stakeholder input in the Report.

The risk to astronomy’s future is further amplified by the lack of specifics in the implementation plan for establishing the new Governing Entity proposed by the MKWG. Numerous steps would need to be achieved to establish the new Governing Entity including, but not limited to, enabling legislation, land transfers, development of land use and management plans, permitting requirements, development and coordination of administrative rules across jurisdictions, standard operations start-up, and the potential for appeals at multiple steps along the way. At the Board of Regents direction, the UH administration conducted its own analysis of alternate governance models for Maunakea in 2020. The MKWG’s projected timeline of three years to establish the new Governing Entity is unrealistic and exacerbates the risk to the future of astronomy due to the impending termination of the current general lease in 2033. These are no small steps and the lack of a viable business plan on top of these challenges makes success highly speculative, especially with the Report’s reliance on general fund appropriation.

3. The complexities and costs of managing access to public lands have been underestimated

Under the proposed powers and duties in the Report, public access appears to be more restrictive and does not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and economic (including commercial tour operator) uses. Does the MKWG propose to prohibit snow play? Hunting? Hiking? Who would determine the legitimacy of claims made by individual native Hawaiian cultural practitioners?

Access to Maunakea by Hawai‘i Island residents, including native Hawaiian practitioners, is one of the most contentious and consistently raised concerns in matters related to Maunakea. The Report underestimates the complexity of addressing public interests and coordinating across the various jurisdictions on Maunakea. The proposal to include adjacent State and private lands into the jurisdiction of the new Governing Entity exacerbates the operational complexities of the enterprise and significantly increases its resource requirements. It is also unclear on how new rules and procedures the new Governing Entity adopts would integrate with existing rules governing activities on DLNR, DHHL, County, and private landowner property that is included in the new land area defined in the Report. Importantly, who does the MKWG propose to allow to have access, who will it prohibit, and who will make decisions about how individuals are placed into categories that are allowed or disallowed access?

Finally, the Report does not meaningfully address the resource requirements of the new Governing Entity. Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so
that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

4. **Legal, administrative, and funding issues present risks for implementation of the MKWG’s proposal**

There are a number of legal, administrative, and funding concerns raised by the MKWG’s proposal that will require further analysis and discussion. These include but are not limited to:

   A. The potential constitutional concerns related to race-based membership of a government entity with control over state lands and resources.

   B. The Report does not account for the complexity of the various jurisdictions on Maunakea, and the variety of funding sources that will need to be shored up, or replaced with general funds.

   C. As discussed before, stakeholder representation on the board of the new Governing Entity will in and of itself create governance and funding problems.

   D. The complexities and risks of successfully working through the aforementioned tasks of realigning, much less simply coordinating, management of public lands that are currently under leases and/or the jurisdiction of different agencies with different administrative rules.

All of these are complex issues and any one of these is a potential show stopper given the contentious nature and resources required of them. Attaching the success of a newly established entity to highly speculative outcomes requires considerably more cost-benefit analyses than is provided in the Report.

5. **The University’s commitment and ability to successfully steward Maunakea has been demonstrated**

The University has acknowledged and apologized for its stewardship of Maunakea in the last century. Subsequent state audits of the University’s management of Maunakea have documented our commitment and improvement over time. In its *Report on the Implementation of State Auditor’s Recommendations 2014 – 2017*, the State Auditor noted that of the several audit recommendations from 1998, only four (4) were outstanding as of its November 2019 report. One item, directly under the control of the University, was completed with the University Board of Regents’ (“BOR”) adoption of Hawai‘i Administrative Rules (“HAR”) chapter 20-26 on November 6, 2019 (approved by the governor on January 13, 2020). The University is actively working on the remaining three (3) items in coordination with DLNR, which has final approval on these particular tasks. These remaining items are dependent on whether a new general lease is to be granted to UH and, more significantly, whether there is a future for astronomy on Maunakea, both of which are decisions outside UH’s sole authority.

The University is charged with implementing 103 management actions in the *Mauna Kea Comprehensive Management Plan*, adopted by BLNR in 2009 (“CMP”). The University’s implementation of the CMP was the subject of an independent review conducted by Kuiwalu in December 2020 at the direction of DLNR (“Independent Evaluation”). DLNR’s Independent Evaluation of the University’s implementation of the comprehensive management plan showed that UH had achieved good or some progress on 8 of the 10 desired outcomes identified in the
The two outcomes where we received a minimal progress rating are actively being worked on. This evaluation also found that people’s perceptions of UH’s effectiveness as manager were associated to whether people supported telescope development on Maunakea, i.e., no change in management practice will satisfy many of those who oppose TMT or even astronomy on Maunakea. This is not a management issue; this is a challenging and contentious statewide policy issue that is, again, not a decision that UH alone makes.

Our efforts to improve stewardship have been recognized by the community. In 2017 UH received the Pualu Award from the Kona-Kohala Chamber of Commerce for our education and outreach. In 2017 UH received a Preservation Commendation Award from the Historic Hawai‘i Foundation for our interpretative efforts. And in 2016 we received the Pualu Award for Environmental Awareness from the Kona-Kohala Chamber of Commerce. Finally, and perhaps most notable, in 2011 the Wekiu Bug was removed from endangered species candidate list because of our ecosystem restoration efforts.

The University should be judged by our complete record which shows substantial improvement over time across multiple dimensions. Our commitment has been reliably demonstrated in time, effort, and resources committed by us over the years in the exercise of our stewardship responsibilities for the privilege of access we have. The University believes that the criticism of “mismanagement” often levied against UH, and seemingly the basis for the Report, is now inaccurate and derives from the accusations of those who oppose the state policies in support of astronomy on Maunakea rather than the actual practices of the University.

For these, and the reasons further detailed in the Attachment, we humbly suggest that instead of creating a new entity, the focus turns to what the Hawai‘i Island community, native Hawaiian practitioners, Maunakea observatories, and DLNR have learned over time to continuously improve the University’s stewardship of what has become one of the most, if not the most complex land management challenge in Hawai‘i.

We are available for any questions you or others may have regarding our comments and our stewardship program.

Na māua iho nō me ka ‘oia‘i‘o,

David Lassner  Gregory Chun
President, UH System  Executive Director, Center for Maunakea Stewardship

University of Hawai‘i (UH) Response to the Maunakea Working Group’s Draft Report: He Lā Hou Kēia Ma Mauna A Wākea: A New Day On Mauna A Wākea

1. The Kānāwai Principles are Consistent with UH Plans for Maunakea

UH acknowledges and appreciates the holistic and integrated approach of the Kānāwai principles described in detail in the Foreword, Introduction, and Chapters 2 and 3 of the Report. The symbiotic connections between the elements of nature, and of nature with humans, emphasizes the importance of sustaining balance between these forms. As stated in the report:

“Normalizing the use of these traditional kānāwai in our modern society protects the life of kanaka, flora and fauna, as well as the health of the environment and the balance of its natural cycles. Developing this worldview can start with an inquiry into native ecology, observing nature, developing a relationship and appreciation of natural phenomena, and exhibiting a sense of responsibility in protecting that which nurtures and feeds us, the ‘āina.” (Page 5).

The connected nature of our surroundings and, therefore, the importance of sustaining balance between the various branches of the natural world are well established in many indigenous cultures. It is a lesson lost upon a large fraction of the world’s population and as an institution grounded in science, UH finds the concepts laid out in the four kānāwai to be sound and relatable. They are the product of centuries of observation and learning in an island setting, developing practices that fundamentally sustain populations of living organisms, including humans, over long periods of time. Embracing them in the future makes sense, given the demonstrated success of their application in the past.

Chapter 3 of the Report is an attempt to bridge the elegant concepts laid out in the previous chapters into a management structure predicated on the kānāwai. Guiding principles are articulated, including:

“We are driven by creativity and innovation, constantly challenging the status quo. Our stewardship of Maunakea is informed based on existing knowledge and traditions (kānāwai) as well as on new and expanding knowledge. We are mindful and observant of needs, trends, and opportunities and seek new knowledge and opportunities in ways that enhance our ability to serve as stewards without jeopardizing our foundation of ‘āina aloha.” (Page 20).

This is an important statement because it explicitly acknowledges the importance of continuity in knowledge systems to support ‘āina aloha, past, present, and future through “...new knowledge and opportunities...”. It is a hopeful and upbeat statement, but the report fails to identify how the approach proposed would actually lead to “new knowledge and opportunities” for our community. It sets up a dichotomy of interests and begs the question, what is the ultimate goal of the proposed management model?

The management of public lands is complicated, as you know, and as any agency will tell you. But, unlike any other land management framework in the state, the University has several layers built into its management framework that includes the Hawai‘i Island community, academics, observatory operators, and the native Hawaiian community who are represented at various levels of decision making. This framework for managing lands on Maunakea was developed
over decades. The University has built constituencies, infrastructure, and funding to support its efforts. The University’s new draft Master Plan and our updates to the Comprehensive Management Plan consider and incorporate what has been learned. Through its experience, the University has successfully moved toward a more balanced goal of astronomy, stewardship, and respect for Maunakea.

The University understands that stewardship of Maunakea is a privilege that requires a comprehensive and cohesive management program. The University embraces the intent of the kānāwai, which is reflected in the integrated and balanced nature of our master plan and our proposed update, management plans, and administrative rules that collectively outline our commitments and responsibilities to Maunakea, the state, and the community in specific terms. These principles are valuable guidelines for land use planning and decision making and we are committed to continuous improvement and look forward to learning how to improve the application and integration of these principles into the University’s existing plans and policies and within the context of governing law and regulation. Maunakea lands currently managed by the University are ceded lands with great cultural significance to native Hawaiians. Ceded lands are held in trust for the five (5) purposes enumerated under section 5(f) of the Admission Act of 1959 and the kānāwai principles can help further balance those objectives.

2. The MKWG Report places the future of astronomy at risk

Foundational to the Report’s recommendations is the position of the MKWG that astronomy on Maunakea above the 9,200 foot elevation will no longer be an allowed land use:

“The Governing Entity shall develop a framework to limit astronomy development on the mauna, through development limitations that may include limitations on the number of astronomy facilities or an astronomy facility footprint limitation; provided that in establishing a framework to control astronomy development on the mauna, the Governing Entity shall establish a plan to return the mauna above 9,200 feet elevation to its natural state” (Page 25).

The Report also states that the MKWG had robust discussions over whether future legislation should limit the current astronomy footprint:

“The full Working Group had a robust conversation as to whether the Governing Entity should be prohibited from allowing either an increase to the current number of astronomy facilities or an increase to the current astronomy development footprint. Ultimately, the Working Group was not able to reach an agreement, with some members preferring not to set a specific astronomy footprint or astronomy facility number limit in legislation and others wanting a smaller footprint or less telescopes than what currently exists. Some members wanted a lower number of telescopes, such as the Governor's and the University of Hawaii's proposed nine telescopes. Nine telescopes, while a lower number than the thirteen telescopes that currently exist on the mauna, still represents an increase in the current astronomy footprint, which was unacceptable to some members” (Page 25 Footnote 5).

Section 5(f) of the Admission Act, provides that ceded lands trust purposes are “[1] the support of the public schools and [2] other public educational institutions, [3] the betterment of the conditions of native Hawaiians, as defined in the Hawaiian Homes Commission Act, 1920, as amended, [4] the development of farm and home ownership on as widespread a basis as possible for the making of public improvements, and [5] the provision of lands for public use.”
The Report is also not clear on the question of funding and the details of implementation are lacking:

“To support the Governing Entity, a special fund shall be created as an on-going revenue base of funding. The Governing Entity shall consider various supplemental revenue sources to be deposited into the special fund, including but not limited to renegotiated lease terms and fees; observatory use fees; common area maintenance; toll fees; general funds; ecosystem service fees; user fees; other surcharges or fee structures; and state, county and federal funding” (Page 27).

“To assure that the Governing Entity has adequate time to establish itself, the Governing Entity shall have a transition period of three years to assume management of Mauna a Wākea lands”; and,

“To help establish the Governing Entity, general funds should be allocated by the Legislature for at least the first five years. Special funds shall also be used to provide financial support for the Governing Entity.” (Pages 24 and 27)

Further, the Report states decision making regarding the new managed lands will be under the “sole authority” of the proposed new Governing Entity:

“The Governing Entity shall be the sole authority for the management of designated state-owned lands on Mauna a Wākea (See JURISDICTION)” (Page 24).

Collectively, the result of these proposed changes, i.e., uncertainty regarding: the future for astronomy, implementation requirements, and decision-making authority, is to increase substantially the risk to the ongoing viability of astronomy. Importantly, the process for implementing the recommendations must occur at an unprecedented pace to enable a future for Maunakea (Hawai‘i) astronomy. Numerous steps would need to be achieved including but not limited to enabling legislation, land transfers, development of land use and management plans, development and coordination of administrative rules across jurisdictions, and operations start-up. The projected timeline of three years to establish the new entity is unrealistic and exacerbates the risk to the future of astronomy due to the impending termination of the current general lease in 2033 (see section 5 herein for UH’s governance analysis). The lack of a viable business plan on top of these make success highly speculative, especially with the Report’s reliance on general fund appropriation.

It must also be noted that these changes require not just State of Hawai‘i approval but they must be embraced by US and international federal funding agencies that are wary of large-scale change without assurances of long-term stability. The prospect of protracted litigation, on top of all the other challenges to forging, funding, and implementing a new Governing Entity in the three years prescribed, will surely push the timescale for this proposal well beyond the horizon of viability for the existing Maunakea Observatories.

Support for astronomy on Maunakea is a longstanding State policy going back more than fifty years. At that time, the State decided that it did not want to just be a passive landlord for the best observatories in the world but that Hawai‘i should be the home of a world-class program of astronomy research and education. This has enabled Hawai‘i to participate in and lead the discoveries that underlie human understanding of the origins of the universe and the celestial
bodies around us. It is not an overstatement to say that what is at risk here is the future of astronomy as a field of human inquiry, as a source of economic activity on Hawai‘i Island, as an inspiration for Hawai‘i’s youth, as a source of pride for the people of Hawai‘i, and as an area of international excellence for UH and our students. Consistent with its place in Hawaiian cultural tradition and cosmology, Maunakea stands as a uniquely treasured scientific and community resource.

3. The complexities and costs of managing access to public lands have been underestimated

Under the proposed powers and duties in the Report, public access appears to be more restrictive and does not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and economic (including commercial tour operator) uses. Does the MKWG propose to prohibit snow play? Hunting? Hiking? Who would determine the legitimacy of claims made by individual native Hawaiian cultural practitioners?

Access to Maunakea by Hawai‘i Island residents, including native Hawaiian practitioners, is one of the most consistently raised concerns in matters related to Maunakea. The Report’s proposal appears to be more restrictive and may not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and commercial uses. For example, the Report states on pages 24 and 26:

“\[The Working Group recognized that the scope of managing an area of such important cultural significance and geographic size presents many challenges. Additionally, because Mauna a Wākea is the kuahiwi, or backbone, of Hawai‘i Island in a structural, physical, and spiritual sense, the Governing Entity should work toward decreasing the human footprint of all users and visitors of Mauna a Wākea.\]” (Emphasis added); and,

“The Governing Entity shall establish a management framework guided by the Kumu Kānāwai to manage access, stewardship, education, research, permitted uses for frequent and seasonal users, and overall operations. The Governing Entity shall also prohibit commercial use and activities (not including astronomy) above Hale Pohaku and develop rules to designate areas for permissible use, including defining "commercial use."; and,

“The Governing Entity shall consider restrictions via applications and registration processes to ensure user compliance. Additionally, the Governing Entity shall require an application for all recreational uses, including fees, and create guidelines on limits by monitoring the impacts of recreational use over time.”

In 2020 Governor Ige approved Hawai‘i Administrative Rules ("HAR") Chapter 20-26 which was developed by the University with significant public input received over multiple years, to be able to enforce our stewardship responsibilities. HAR Chapter 20-26 regulates commercial and public activities on Maunakea lands managed by UH. The rules allow activities subject to the impacts of those activities being addressed. Commercial activities, such as commercial tours, are regulated by permit and operators are required to pay for the impact they have on the resources and for use of public facilities. Commercial tour operators provide a needed service by reducing independent vehicles driving up Maunakea, and this activity provides economic opportunities for the local community. Under HAR 20-26 the University is authorized to levy fees and fines with the opportunity for appeal. The University regulates impacts to resources
caused by public and commercial activities, not native Hawaiian cultural practices. And despite vague criticisms to the contrary, the University has never denied access to native Hawaiian cultural practitioners.

Finally, the Report does not meaningfully address the resource requirements of the new Governing Entity. Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

4. Legal, administrative, and funding issues present risks for implementation of the MKWG’s proposal

There are a number of legal, administrative, and funding concerns raised by the MKWG’s proposal that will require further analysis and debate. These include but are not limited to:

A. The potential constitutional concerns related to race-based membership of a government entity with control over state lands and resources.

While we understand the intent, the designation of members of a state entity by race raises state and federal constitutional questions. Note that the Kaho'olawe Island Reserve Commission (HRS § 6K-5) and the burial council (HRS § 6E-43.5), both referenced in the Report, do not limit seats on its boards to “native Hawaiians.” Instead, for example, burial councils are comprised as follows:

“Regional representatives shall be selected from the Hawaiian community on the basis of the representatives’ understanding of the culture, history, burial beliefs, customs, and practices of native Hawaiians in the region they each represent.”

We acknowledge that other agencies have board compositions where seats are explicitly designated for native Hawaiians. For example, the Hawaiian Homes Commission Act § 202(a) provides that “at least four of the members shall be descendants of not less than one-fourth part of the blood of the races inhabiting the Hawaiian Islands previous to 1778.” And, the Papahānaumokuākea Council Charter provides that members shall include “three Native Hawaiian representatives.” However, the purposes of those bodies are distinctly different from the new Governing Entity. DHHL was established specifically for the benefit of native Hawaiians and Papahānaumokuākea is an interagency management collaborative where individual partners do not cede their jurisdiction to the collaborative. Board composition tied to race should be further evaluated, particularly when the authority of the new Governing Entity is to manage public lands and state resources.

B. The Report does not account for the complexity of the various jurisdictions on Maunakea, and the variety of funding sources that will need to be shored up, or replaced with general funds.
i. Public lands should remain with the State for the benefit of the public.

On page 24 of the Report, the MKWG states:

“The public land trust lands held by the Governing Entity shall be held in trust as part of the public land trust; provided that the State shall transfer management and control of the lands to a sovereign Native Hawaiian entity upon its recognition by the United States and the State of Hawaii”

This language mirrors Hawai‘i Revised Statutes § 6K-9, related to the Kahoʻolawe Island Reserve Commission. However, Maunakea is not Kahoʻolawe. While both are culturally significant, unlike Kahoʻolawe, Maunakea is actively used by the Hawai‘i Island community, including native Hawaiians, researchers, and others from across the state. These are ceded government lands that should remain with the State of Hawai‘i for the five (5) stated purposes under section 5(f) of the Admission Act.

ii. The Report’s proposal to expand the land area under a new Governing Entity adds uncertainty and complexity to an already complex management issue.

The Report recommends a significant expansion of currently managed lands, pulling in private lands and other state lands managed under different laws as follows:

“the jurisdiction area for the Governing Entity shall be state-owned lands above the 6,500 foot elevation line, inclusive of Pu‘u Huluhulu to the summit of Mauna a Wākea, in order to care for Mauna a Wākea through an integrated, whole systems approach. Additionally, for lands outside of its jurisdiction, the Governing Entity shall enter into cooperative management agreements with the Department of Hawaiian Home Lands, County of Hawai‘i, and private landowners whose lands are within the jurisdiction area.”

Conservative estimates of this expansion could include approximately 56,000 acres of DHHL property, and more than 50,000 acres and 3,800 acres designated as DLNR Forest Reserve (“FR”) and Natural Area Reserve (“NAR”) land, respectively, in addition to other unidentified state, county, and privately owned lands that are referenced. The Report does not provide any details on how the new entity will manage state and private lands, and it is unclear what is meant by the new Governing Entity having jurisdiction over adjacent private lands as proposed in the Report. The Report discusses the idea of cooperative agreements but there could be significant property right issues raised through this expansion.

iii. Powers and duties of the new Governing Entity are unclear and already exist.

Existing plans and rules developed and implemented by the University and DLNR over decades of learned and practiced management provide the integrated planning and decision-making framework suggested in the Report.
Chapter 3 of the Report details the powers and duties of the new governing entity on pages 24-25. Among other matters, it states that:

“...the Governing Entity shall develop a single plan that dictates the management of land uses; human activities, uses, and access; stewardship; and disposition. The plan shall be developed during the transition period; finalized and approved, and operational by the end of the transition period; and updated every ten years with a focus on long-term, comprehensive, coordinated planning for all of the managed lands. Additionally, the plan shall consider the state’s energy and sustainability goals, as well as impacts to climate change, including adapting to climate change and developing mitigation measures to climate change, and shall incorporate indigenous management and cultural processes and values.”

Before updating of the master plan for lands managed by the University on Maunakea, the University explored the idea of combining its two governing documents: the master plan adopted by BOR and the CMP adopted by BLNR. Based on the University’s assessment, in consultation with DLNR, we determined that combining them may not be practicable.

Both plans are implemented together and are consistent; however, each serves a different purpose. The CMP is a plan required when applying for a conservation district use permit. It addresses ongoing resource management practices to avoid, mitigate, or minimize impacts caused by proposed uses and activities. The master plan is the University’s vision for the lands it manages on Maunakea for a period of years, and it provides a framework for proposed land uses and decision making early in the planning process before a proposal is advanced to permitting, environmental review, and funding consideration. The University’s master plan and CMP, along with the administrative rules, collectively are required to achieve the state’s long-term goals of stewardship and sustainability.

Chapter 3 of the Report also provides that the new governing entity must comply with various statutes applicable to state agencies, but suggests that Maunakea lands be placed in the FR. On page 25 of the Report, it states:

“To maximize transparency, the Governing Entity shall be subject to administrative procedure pursuant to chapter 91, Hawaii Revised Statutes; Sunshine Law, pursuant to chapter 92, Hawaii Revised Statutes; the State Procurement Code, pursuant to chapter 103D, Hawaii Revised Statutes; and chapters 183, 205, 205A, and 343, Hawaii Revised Statutes.”

The Report suggests that these lands should be subject to HRS chapter 183, Forest Reserves, Water Development, Zoning. Lands designated FR will be subject to the rules and program under DLNR’s Division of Forestry and Wildlife (“DOFAW”). FR rules are far more restrictive generally than conservation district rules (e.g., it is unlikely that astronomy facilities would be allowed in the FR).

Building capacity to operate under HRS chapter 91, the Hawai‘i Administrative Procedures Act (“HAPA”), takes time, staff, and resources. HAPA covers rule making, contested cases, and declaratory orders. The Report does not provide
detail on these resource-intensive requirements. These regulatory frameworks are needed, if as the Report suggests, the new entity will have more enforcement authority than the University currently has. The Report states on pages 26-27:

“[T]he Governing Entity shall work with the Department of Land and Natural Resources’ Division of Conservation and Resources Enforcement and Hawai’i County Police enforcement structure to enforce rules and monitor public safety through cooperative agreement. Additionally, the Governing Entity shall create operational procedures that are guided by the Kumu Kānāwai and implemented by enforcement partners.”

The Report is unclear on how new rules and procedures it adopts would integrate with existing rules governing activities on DLNR, DHHL, private, and other government lands included in the new land area defined in the Report. It is also unclear what the statement “...guided by the Kumu Kānāwai and implemented by enforcement partners” means to people who would visit Maunakea, such as Hawai‘i Island residents, including native Hawaiians.

The University already has administrative processes and procedures in place. It already works under the sunshine law, procurement, HRS chapter 343, and other agency regulations related to land use. These processes have been scrutinized and tested by internal audits, state audits, DLNR oversight, and Hawai‘i courts. How these matters are proposed to be handled directly impacts the viability and resource needs of the new entity.

C. The adequacy of stakeholder representation on the board of the new Governing Entity.

The Report recommends the establishment of a new attached state agency governed by a board of directors: On page 22, the Report states:

“The Governing Entity shall be attached to the Office of the Chairperson of the Board of Land and Natural Resources for administrative purposes. Decision-making for the Governing Entity shall be made by a nine-member board, of which seven seats shall be appointed and two seats shall be held by ex-officio members, with the board selecting a Chair from among its non-ex-officio members; provided that the Chair shall not be the Executive Director of the Governing Entity. Additionally, of the nine members, four of the seven non-ex-officio board members shall be Native Hawaiian Hawaii Island residents, with a preference for Native Hawaiian Hawaii Island residents for all seven non-ex-officio board seats.”

While the University agrees that broad representation on the governing board of a state land management entity is needed to ensure the range of perspectives Maunakea deserves, key expertise is lacking from the proposed structure, including seats for observatory and University representatives.

The MKWG’s lack of consensus for having astronomy representation and for eliminating University representation on the governing entity board is problematic. The Report argues that this would create a potential conflict of interest. First, it is not uncommon to have tenant and stakeholder representation on governing boards of attached state agencies. For example, the Natural Energy Laboratory of Hawai‘i (“NELHA”) maintains
two seats on its board of directors for tenants who hold direct leases from the agency. Second, every board, public and private, deals with conflicts of interest through reporting and recusal procedures, so this alone is not sufficient reason to omit these important perspectives especially if they are a primary source of funding stewardship activities.

By contrast, the University’s management framework includes community advisory groups, such as Mauna Kea Management Board ("MKMB") and Kahu Kū Mauna ("KKM") who have early and direct input into the decision-making process. Additional committees that advise the MKMB, like the Environment Committee ("EC"), provide additional, specific expertise. All of these advisory groups include Hawai’i Island members who are directly impacted by decisions on Maunakea.

D. Working through the aforementioned complexities of realigning, much less simply coordinating, management of public lands that are currently under the jurisdiction of different agencies, subject to different administrative rules, appear to have been underestimated, like the time for of start-up and amounts of funding.

The details of the University’s concerns here were outlined in section B(iii) above. The processes for working through the challenges of multiple jurisdictions are already in place so further analysis should be performed to discern the cost of duplication or replication of these processes, as compared with any purported benefit.

Each of these issues is itself complex, and any one of them is a potential show stopper given the contentious nature and resources required of them. Attaching the success of a newly established entity to highly speculative outcomes requires considerable more analysis before even attempting to draft legislation.

5. The University’s commitment and ability to successfully to steward Maunakea has been demonstrated

While not explicitly stated in the Report, the rationale for the formation of the MKWG, and the need to establish a new governing entity, appears to be based on the assumption that a new entity could manage Maunakea better than the University. This assumption seems to be based on a snapshot of reports that evaluated the University’s management over the years as well a lack of recognition of the University’s own efforts and response to the University’s critics.

A. State audits of the University’s management of Maunakea show improvement over time

The Report on page 3 cites a series of State Audits that began in 1998 and concludes with the statement that “Subsequent reports, which still identified shortcomings, were filed by the State Legislative Auditor’s office in 2005, 2014, 2017, and 2019.” The University has acknowledged and apologized for its stewardship of Maunakea in the last century, but subsequent state audits of the University’s management of Maunakea have documented our commitment and improvement over time.

In its Report on the Implementation of State Auditor’s Recommendations 2014 – 2017, the State Auditor noted that of the several audit recommendations from 1998, only four (4) were outstanding as of its November 2019 report. One item, directly under the control of the University, was completed with the University Board of Regents’ ("BOR") adoption of Hawai’i Administrative Rules ("HAR") chapter 20-26 on November 6, 2019 (approved by the governor on January 13, 2020).
The University is actively working on the remaining three (3) items in coordination with DLNR, which has final approval on these particular tasks. These three (3) items are:

i. “The University of Hawai‘i should renegotiate with existing sublessees to amend subleases to include provisions that address stewardship issues, as modeled by the provisions in the 2014 TMT sublease, following execution of the new general leases for UH-managed lands on Mauna Kea”;

ii. “The Department of Land and Natural Resources should continue working with UH to renew the general leases for the UH-managed lands on Mauna Kea and ensure the leases are substantially in the form DLNR’s Land Division recommended for approval by the land board”;

iii. “The Department of Land and Natural Resources should use additional stewardship-related conditions contained within the TMT observatory permit as a template in all new observatory permits issued for the summit of Mauna Kea.”

The timeline on the first two of these audit items is affected by challenges brought by the Office of Hawaiian Affairs (“OHA”) and other groups who oppose TMT in several ongoing administrative and judicial appeals. If the Board of Land and Natural Resources (“BLNR”) grants the University another general lease, then BLNR must approve the first two items, which the University intends to comply with. The third audit item regarding whether BLNR grants a new astronomy facility conditional use permits is not within the University’s control.

These audit findings show the significant progress the University has made over time in fulfilling its management responsibilities. Reliance on those past audits as a measure of the University’s recent or current performance is no longer valid, and the past audits do not support taking the management away from the University. Instead, those audit reports confirm that the University has learned from its decades-long management and improved based on that experience.

B. The Independent Evaluation of University’s implementation of the CMP was positive in most all areas, and the University has made changes to improve the few areas marked for improvement

The University is charged with implementing 103 management actions in the Mauna Kea Comprehensive Management Plan, adopted by BLNR in 2009 (“CMP”). The University’s implementation of the CMP was the subject of an independent review conducted by Kuiwalu in December 2020 at the direction of DLNR (“Independent Evaluation”).

The Report picked up on some aspects of the Independent Evaluation; however, it is important to consider the actual text of the Independent Evaluation. As stated in the Independent Evaluation:

“The purpose of this Independent Evaluation Report (Report) is to (1) evaluate the effectiveness of UH, specifically OMKM’s, implementation of the specific Management Component Plans (MCP) found in Section 7 of the CMP, and (2) to evaluate the efficiency of the governance structure in managing the cultural and natural resources within state conservation lands under lease to UH.”
The Independent Evaluation offers the following conclusions:

i. “UH’s self-assessment and many of the public comments which included members of the Native Hawaiian community and government agencies, have acknowledged that OMKM has implemented most of the 103 MAs within the MCPs. Many have commented that OMKM has effectively implemented many of the MAs that have resulted in protecting and preserving the cultural and natural resources within the state conservation lands.”

ii. “[I]n the areas of untimely adoption of the administrative rules, cultural resources, and education and community outreach, especially with the Native Hawaiian stakeholders, the efforts by OMKM have been ineffective to achieve the desired outcome.”

It is important to note regarding the above conclusions that:

i. At the time of the Independent Evaluation, HAR chapter 20-26 was adopted by BOR and approved by the governor. The University is currently implementing the rules. Before BOR adopted the rules (which it was granted authority to adopt in 2009 under Act 132), the University was continuously implementing the 103 CMP management actions, administering commercial tour operator permits, and coordinating on enforcement related to resources and public health and safety with entities like DLNR and its various programs and county first responders.

ii. Outreach to the Hawai‘i Island community, including native Hawaiians, has been a mainstay of University management on Maunakea, and it is built into its management framework. This includes outreach through advisory groups like KKM and the MKMB as well as local schools, community groups, businesses, native Hawaiian faculty, lineal descendants, and those who identify as kia‘i. The recent adoption of HAR chapter 20-26 and the on-going work finalizing the new master plan include significant efforts by the University to capture community input, resulting in thousands of comments and dozens of meetings with interested groups. All substantive comments were considered, which the University has documented in its rulemaking process and the new master plan Volume II.

iii. There has always been an education component for the public and community outreach conducted by the University and directly by the Maunakea observatories. The University’s recent reorganization furthers this work by designating the ‘Imiloa Astronomy Center for orientation programs and educational partnerships by BOR resolution and executive policy.

The Independent Evaluation did not conclude that UH has “mismanaged” Maunakea, a term often used against the University. Here is how the Independent Evaluation discusses “mismanagement”, only once and quoted in full:

“The public’s assessment of how effectively UH has implemented the CMP has primarily varied depending on whether they are in favor or opposition of

---

2 For example the State Historic Preservation Division, Division of Conservation and Resources Enforcement, Division of Forestry and Wildlife, Office of Conservation and Coastal Lands, etc.

3 Comprised of individuals knowledgeable about native Hawaiian cultural practices who advise the MKMB.

4 Composed of members representing the major stakeholders of Maunakea; primary role is to advise the Office of the Chancellor at the University of Hawai‘i at Hilo on management of the Mauna Kea Science Reserve.
telescope development on Mauna Kea. Those who support existing and future telescope development on Mauna Kea believe that OMKM has adequately implemented the CMP MAs to preserve and protect the cultural and natural resources on Mauna Kea. **For those who do not support continued telescope development on Mauna Kea beyond 2033, the expiration of the existing state lease, they believe that UH continues to mismanage Mauna Kea as concluded in the 1998 State Auditor’s Report. In particular, those in opposition believe that UH continues to advocate telescope development over the protection and preservation of the resources.**

With respect to the broader public comments on the effectiveness of the UH governance structure, most see UH as one entity. They either believe that the UH existing structure is doing a good job, or they believe that UH is mismanaging Mauna Kea and there is very little in between.”

(Emphasis added.)

It should be noted that the University’s newly issued draft Master Plan establishes a limit of nine telescopes post 2033. It also restricts future development to existing observatory sites. The University committed to these limits despite considerable differences with astronomy advocates.

C. The University and its advisory groups take constructive criticism seriously.

At the direction of the BOR, in April 2020, the University completed an analysis of alternative governance models that included models in which the University did not serve as primary manager. The analysis evaluated the benefits and challenges of establishing the various forms of new entities identified (see BOR Presentation [4.16.20]). In the University’s analysis of governance models, the University concluded that three (3) years is not sufficient time to transfer legal rights under existing agreements, staff, resources, programs, plans, policies, and other elements of the University management program and apparatus to a new, yet-to-be-formed entity. Given the need for bicameral legislative support and based on past legislative efforts, the University determined it would take several years for the enabling legislation to be passed to form the new entity. This short timeline also does not account for the approvals required for a new master plan, management plan, permits, administrative rules, general lease, and observatory subleases, and for developing a viable business plan that ensures the new entity’s sustainability.

As a result, the University has focused its attention on the governance alternative within its control and broadened community representation within its existing advisory groups. In 2021, the EC increased its membership, bringing different expertise and perspectives to its committee. KKM updated its purpose statement and is actively recruiting new members to reflect their renewed vision. The voices on the EC and KKM are diverse and include members who share some of the views of Hawai‘i Island kia‘i.

At their December 7, 2021 public meeting, the MKMB passed a motion recommending that the University administration restructure MKMB along the lines of what was identified as Model 4A, Collaborative Management with UH, in the University’s analysis of governance models. Model 4A expands the current MKMB from seven to nine members; designates ex-officio seats on the MKMB for DLNR, DHHL, OHA, and the
County of Hawai‘i; and redistributes representation of the remaining seats to include various stakeholder interests.

In many ways, the MKWG’s recommended structure parallels what the University is in the process of implementing except that the University and astronomy are represented.

D. Tangible demonstration of the University’s commitment to stewardship

Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

The fruits of the University’s efforts to improve its stewardship have been recognized by the community. In 2017 UH received the Pualu Award from the Kona-Kohala Chamber of Commerce for its education and outreach. In 2017 UH received a Preservation Commendation Award from the Historic Hawai‘i Foundation for its interpretative efforts. And in 2016 UH received the Pualu Award for Environmental Awareness from the Kona-Kohala Chamber of Commerce. Finally, and perhaps most notably, in 2011 the Wekiu Bug was removed from endangered species candidate list because of the University’s ecosystem restoration efforts.

In closing, the University should be judged by our complete record which shows substantial improvement over time across multiple dimensions. Our commitment has been reliably demonstrated in time, effort, and resources committed by us over the years in the exercise of our stewardship responsibilities for the privilege of access we have. And as a result, as reported by many in the Independent Evaluation “…the cultural and natural resources on the state conservation lands on Mauna Kea are some of the best managed and protected lands in the entire State” and we have a world class research enterprise Hawai‘i can be proud of.

obligation to: (i) protect and conserve their natural, cultural, and scientific resources; (ii) responsibly manage actions and activities; and (iii) protect public health and safety.

- **Kuleana** (responsibility or privilege). The UH Maunakea Lands are held in trust by the State for the benefit of Hawai‘i’s people. The summit region is wahi pana and, to many, wao akua where traditional Native Hawaiian cultural practices are exercised. It is where species have evolved to adapt to the unusual conditions existent on the mauna and where geography and climate come together to create unmatched astronomical viewing conditions. It is also where residents and visitors come to recreate. UH respects cultural practice and honors its privilege, commitment, and responsibility to support access to and use of resources that is balanced across the many values ascribed to Maunakea.

- **‘Ike Hawai‘i; Nohona Hawai‘i** (traditional knowledge; traditional practices). Our stewardship and educational programming will integrate traditional knowledge and practice to strengthen our care for Maunakea’s resources and people’s understanding and connection to place.

- **Mau loa** (a long view). UH will responsibly steward the physical, scientific, and biological resources present on Maunakea so that their vital ecosystem functions continue for future generations.

- **Laulima** (cooperation). As a public institution, UH is committed to broadening participation of Native Hawaiians and the larger community in its planning and programs for Maunakea. We encourage all people to come together in shared responsibility to collaboratively protect and learn from this special place.

- **Kūpono** (trustworthiness). Stewardship of the mauna and ensuring that Maunakea’s unique resources remain available for the continued advancement of science, education, and astronomy requires organizational and economic stability. UH will seek to maintain a level of trust and decision-making certainty that allows the continuation of responsible stewardship in partnership with the community.

These core values were developed with consideration for the values of other UH programs and units that either oversee actions on Maunakea, conduct actions on Maunakea, or are otherwise tied to UH activities on Maunakea. These include the values expressed in various UH System, UH Hilo, and ‘Imiloa plan documents (Appendix C).

### 1.4 GOALS AND OBJECTIVES

The goals and objectives described below are concise statements of what needs to be achieved to fulfill the vision expressed in Section 1.2, accomplish the mission and purpose expressed in Section 1.1, and promote the core values in Section 1.3. Importantly, no goal has precedence over the others; they are equally important. Nor should they be thought as being exclusive of each other; in fact, UH views each as a strand that needs to be woven together to fulfill our vision.

#### 1.4.1 RESPONSIBLY STEWARD MAUNAKEA FOR PRESENT AND FUTURE GENERATIONS

Referred to as the “Stewardship Goal,” it commits UH to stewarding Maunakea by implementing the CMP in coordination with the community to further a collective understanding of, respect for,
elected leaders of the State and County for more than 50 years, and that continues to be a part of Hawai‘i’s economic future.9

1.4.3 DIVERSIFY EDUCATIONAL PURSUITS AND EXPAND RESEARCH OPPORTUNITIES

Referred to as the “Education Goal,” it entails UH working to diversify its educational pursuits and to expand research opportunities on Maunakea beyond astronomy for UH, for partner institutions and groups, and for the broader community. In addition to being an exceptional site for astronomy, Maunakea’s landscape, resources, and infrastructure provide opportunities for researchers in a myriad of physical and social sciences, including indigenous knowledge. UH will actively encourage and invite researchers and students to use its facilities at Halepōhaku in support of their research and teaching so that they may learn from the natural, cultural, and social environment within and surrounding the UH Maunakea Lands.

Specific objectives under the Education Goal are to:

- Maintain the physical and administrative environment necessary to grow research and learning in diverse fields on Maunakea.
- Foster collaborations between leaders and researchers from diverse fields, cultures, institutions, and the community to enrich and extend the knowledge gained from work on Maunakea though multidisciplinary research and cross-cultural discourse.
- Facilitate the foregoing by repurposing the Halepōhaku facilities as a Multidisciplinary Field Station to support a broader range of education and research.
- Impart an understanding of Maunakea to all who work and visit there of the historical, cultural, and environmental context of the mauna, so that they may see the mauna as a teacher and understand their role in contributing to the stewardship of this special place.

The Education Goal and associated objectives recognize that the UH System is the state’s primary higher education provider and that creating greater opportunities for educational and research programs on Maunakea can benefit and unite the System’s three universities, seven community colleges, and community-based learning centers across the state. Further, these Maunakea-specific objectives support UH’s overall efforts to expand its support of the science- and knowledge-based economy that is sought by Hawai‘i’s elected leaders.9

While UH will continue its strong support for and involvement in astronomy on Maunakea, it will simultaneously strengthen its support of research and educational programs in indigenous, natural, and social sciences. UH also recognizes that kanaka maoli’s (Native Hawaiian) timeless knowledge regarding Maunakea, reflected in their observations shared in mo‘olelo (narrative story) and mele (song or chant), are no less significant than other knowledge, and these will be

---

9 In 1964 the Hawai‘i State Legislature passed Senate Concurrent Resolution 16 (SCR 16) stating that the “State of Hawai‘i and its citizenry are most desirous and willing to co-operate and aid in the promotion of our nation’s space program and research to the benefit of the County of Hawai‘i, the state and the nation.”

The Hawai‘i 2050 Sustainability Plan (2021) and Hawai‘i Statewide Comprehensive Economic Development Strategy (2016), which draw on HRS § 226-10, 226-103, and 226-108, emphasize that it is the State’s policy to promote economic diversification and innovation to retain a workforce educated in science, technology, engineering, and mathematics (STEM).
3. Strive to build community confidence and trust so that UH may be provided the opportunity to continue and improve its management, stewardship, and research beyond 2033.

4. Allow the establishment of only those new facilities that address the Phase 1 screening and assessment criteria (Section 6.2), including (i) support consistency with the mission, vision, goals, and objectives of this Master Plan; (ii) are consistent consistency with the CMP; (iii) would adequately benefit from and/or increase our understanding of Maunakea’s unique cultural conditions, landscape—or—unique natural and resources; (iv) are consistent consistency with applicable rules regulations, and permits; and (v) avoid, minimize, or mitigate adverse effects on existing facilities and practices to Maunakea’s resources.

5. Continue to sustainably steward Maunakea through the implementation of the CMP and this Master Plan, including ecosystem and habitat restoration efforts.

6. Manage access to the UH Maunakea Lands in a phased and adaptive manner that (i) protects and conserves the cultural landscape, natural resources, and astronomical viewing conditions; (ii) responsibly manages activities to minimize potential adverse effects on the landscape and resources; (iii) protects public health and safety; and (iv) preserves the feeling of wilderness and sanctity in the summit region.

7. Work with the Native Hawaiian community to identify measures, policies, and facilities that will further reduce adverse effects to the cultural landscape and cultural practices and perpetuate 'ike Hawai‘i (traditional knowledge) and nohona Hawai‘i (traditional practices).

8. Decommission a sufficient number of existing astronomy facilities to ensure that the number of operating astronomy facilities in the MKSR is no more than nine (9) by December 31, 2033, and does not exceed that number throughout the remainder of the time covered by this Master Plan.

9. Execute agreements between UH and the entities that operate Maunakea astronomy facilities so that the parties to those agreements collectively provide their fair share of financial support and other resources needed to (i) provide public benefits for the community and state, with a focus on the Native Hawaiian community; (ii) implement the CMP and this Master Plan; (iii) provide education regarding Maunakea’s cultural landscape and natural resources; (iv) support the UH astronomy programs; and (v) maintain necessary infrastructure.

10. Facilitate over the 20-year period of this Master Plan: (i) the development of an astronomical facility on Astronomy Site 13, and (ii) the modification or recycling of up to three (3) existing astronomy facilities in the MKSR.

Strategy 10 recognizes that there is some uncertainty regarding the Thirty Meter Telescope (TMT) project, which is permitted for Astronomy Site 13. Mauna Kea Access Road was blocked from July 16 through December 26, 2019, and construction of the TMT project was paused indefinitely. The U.S. National Science Foundation (NSF) is now considering funding that project; their funding would trigger federal review of the project prior to construction restarting. Should the TMT project not proceed on Maunakea, this Master Plan will continue to guide UH decisions on Maunakea including the future of Astronomy Site 13.
Reserve, and any other lands on Mauna Kea that the University of Hawaii leases or over which the University of Hawaii acquires control or jurisdiction.

The UH Maunakea Lands presently consist of two parcels that UH leases and the portion of a third parcel over which UH holds an easement (Figure 2-1):

- Parcel TMK 4-4-015:009 via General Lease S-4191, which expires December 31, 2033. This parcel is 11,287.854-acre and is called the Mauna Kea Science Reserve (MKSR).
- Parcel TMK 4-4-015:012 via General Lease S-5529, which expires in 2041. This 19.261-acre parcel is known as Halepōhaku.
- Portion of parcel TMK 4-4-015:012, which is part of the Mauna Kea Forest Reserve, under a non-exclusive roadway easement. This easement, which encompasses 70.798 acres, contains the roadway between the two leased parcels listed above.

Over the life of this Master Plan the specific area that falls within UH Maunakea Lands may change. This Master Plan is only binding on those UH Maunakea Lands that remain under the authority of UH. For example, if UH Maunakea Lands were reduced, this Master Plan would govern only those lands still authorized for use by UH, without the need to amend this Master Plan.

The UH Maunakea Lands are all considered “ceded” lands. Ceded lands are those crown, public, and government lands that were once held by the Kingdom of Hawai‘i. The Republic of Hawai‘i took control of these lands after the overthrow of the Hawaiian monarchy. The United States annexed Hawai‘i in 1898 and the Republic of Hawai‘i ceded 1.8 million acres of public lands to the Federal government. In March 2009, the United States Supreme Court noted that when Hawai‘i joined the Union in 1959 as the 50th state, the Federal government granted title to the ceded lands to the State.

These lands, together with the proceeds from the sale or other disposition and income there from, are held by the State as a public trust.

The State holds the ceded lands in a public trust for (i) the support of the public schools and other public educational institutions, (ii) the betterment of the conditions of Native Hawaiians, as defined in the Hawaiian Homes Commission Act, (iii) the development of farm and home ownership on as widespread a basis as possible, (iv) for the making of public improvements, and (v) the provision of lands for public use (The Admission Act Section 5(f)).
2.3 MASTER PLAN IMPLEMENTATION

This Master Plan will be implemented through the governance structure approved via a motion by the BOR. The BOR delegated responsibility for the governance and management of UH Maunakea Lands to UH Hilo, which is advised by the Mauna Kea Management Board (MKMB) and Kahu Kū Mauna Council (KKM),¹² UH Hilo has, in turn, created the Center for Maunakea Stewardship (CMS) to administer the lands. This governance structure is established through policies adopted by the BOR and is outside the scope of this Master Plan. The governance structure at the time this plan was adopted is illustrated in Figure 2-2. The structure may be modified from time to time over the life of this Master Plan without requiring this plan to be amended.

Figure 2-2: CMS Governance Structure, Established in 2020

Notes: * Shown here for descriptive purposes. Organization of these functions to be finalized by Director of Stewardship Programs.

The structure may be modified from time to time over the life of this Master Plan without triggering a need to amend this plan.

Source: CMS

¹² Under the 2000 Master Plan, MKMB was "encouraged to establish special committees on culture, environment and education, as needed, to assist it in its functioning." A long active, and currently active, special committee is the Environment Committee, which provides expertise to MKMB on environmental issues.
UH’s General Lease No. S-4191 for the Mauna Kea Science Reserve expires on December 31, 2033; UH is seeking a new land authorization, but there is no guarantee that it will be renewed prior to the expiration of the General Lease. If UH does not obtain a land authorization that allows for its continued management and use of the UH Maunakea Lands, whatever beyond 2033, then under the General Lease UH must surrender and deliver possession of the land to BLNR and any improvements on the lands must be removed or disposed of by UH or, with the approval of the BLNR chair, improvements may be abandoned in place. Once the lands under the General Lease are surrendered, among other possibilities, BLNR and the Governor may consider issuance of a new entitlement (whether by lease, executive order, or other authorization) to UH or another entity assumes control may adopt a different plan with different priorities and goals. The Mauna Kea Working Group, created by House Resolution No. 33, H.D. 1 in 2021, issued a report during the development of this Master Plan entitled, He Lā Hou Kēai Ma Mauna a Wēkea: A New Day on Mauna a Wākea. The report discusses the creation of a new entity. UH’s response to the Working Group’s report is included in Volume 2. However, unless and until such a change occurs, the provisions of this Master Plan will guide land use decisions on Maunakea.

2.4 RELATIONSHIP BETWEEN THIS PLAN AND OTHER PLANS

The only active plans relevant to UH decision-making regarding its Maunakea Lands are: (i) this Master Plan, which is approved and adopted by the BOR; and (ii) the CMP, which is approved and adopted by the BOR and the BLNR. This Master Plan supersedes all previous Master Plans.

This Master Plan does not replace the CMP, which may be amended from time to time. On the contrary, it and the CMP are consistent with and complement one another and are intended to be implemented together. All the uses and facilities that are envisioned in this Master Plan can be designed and implemented so that they are fully consistent with the management actions described in the CMP.

This Master Plan addresses the planning, siting, and design of new facilities and significant material changes to existing facilities. The CMP addresses management of activities and resources. Examples of the differences between the elements addressed in the two plans are shown in Table 2-1. Specific information concerning recreational, commercial, and astronomy activities are presented in subsections 2.4.1 through 2.4.3.

2.4.1 RECREATIONAL ACTIVITIES IN THE PLANS

Management of recreational activities is addressed in the CMP and in Hawai‘i Administrative Rules (HAR) Chapter 20-26, Public and Commercial Activities on Mauna Kea Lands (the UH
Any development at Halepōhaku on previously undisturbed land that results in the removal of māmane trees could cause an adverse impact to the Palila’s designated critical habitat and thus would be minimized and mitigated. CMS has an ongoing program to propagate and outplant māmane trees within Halepōhaku and takes additional actions to improve the habitat for Palila and other native species, but it is too early to evaluate how successful that program will be. DLNR, which is leading Palila recovery efforts, has asked that new disturbances and developments at Halepōhaku be avoided.

3.1.2.2 Cost Considerations

Because of its elevation and isolation, it is costly to build and operate facilities at Halepōhaku. Factors that contribute to high costs include: (i) all water and other supplies must be trucked up the mountain; (ii) there is no central wastewater treatment system; and (iii) all maintenance and food service must be accommodated by UH-provided facilities and personnel. The high construction and operational costs make the development of non-mission critical facilities at Halepōhaku unattractive.

3.1.3 UH Commitments Regarding Use of Halepōhaku

In view of the limitations outlined above, UH will adhere to the following precepts in making decisions related to facilities, developments, and disturbances at Halepōhaku:

- Existing structures will be repurposed and utilization of existing space maximized before new facilities are proposed.
- If additional facilities are proposed, they will be sited in previously disturbed areas devoid of native vegetation to the maximum extent practicable.
- The only astronomy facility that will be proposed at Halepōhaku is the UH Hilo educational telescope New Educational Telescope (NET) (Section 3.3). The only other telescopes that will regularly be present at Halepōhaku will be small portable stargazing telescopes that are set up and then removed and stored after use.
- UH will manage vehicular access in a way that forestalls the need to expand parking within Halepōhaku beyond the locations where it presently exists.
- UH will continue its habitat restoration efforts within Halepōhaku and utilize Halepōhaku to assist and/or support conservation efforts by others on the upper slopes of Maunakea to contribute to the State’s pledge to conserve, restore, or grow 100 million trees (DLNR, September 25, 2021).

3.2 MKSS Baseyard

As illustrated in Figure 3-1, the uppermost part of Halepōhaku contains the MKSS baseyard, which contains structures, equipment, and storage areas utilized for logistical services and support. These are used to maintain the Mauna Kea Access Road above Halepōhaku and in support of operations of other Halepōhaku facilities. The MKSS baseyard provides sufficient space to accommodate MKSS’ current and forecast needs.
Because the size and location of the existing baseyard facilities are deemed by MKSS to be adequate for the foreseeable future, no fundamental changes to it are likely to be proposed during the life of this Master Plan. However, refurbishment, updating, and modest enhancements that would improve the function and/or extend the operating life of some of the existing facilities were identified during the master planning process and may be undertaken over the term of this Master Plan. Examples include:

- Upgrading fuel storage by July 15, 2028, to comply with new regulations requiring double-walled tanks.
- Paving portions of the baseyard that now have only a gravel base-course cover to improve efficiency and safety while also reducing the potential for the establishment of invasive species.
- Improving portions of the baseyard area, currently in limited use, for the storage of material and equipment associated with resource maintenance and management on Maunakea and making minor improvements (e.g., vegetation clearance or rough grading) needed to allow that.

### 3.3 UH HILO NEW EDUCATIONAL TELESCOPE

#### 3.3.1 BACKGROUND

The Department of Physics and Astronomy at UH Hilo offers two programs, the Bachelor of Science degree in Astronomy and Bachelor of Arts degree in Physics. Both degrees have their own mission statements, which are closely aligned with the mission of UH Hilo at large. The UH Hilo astronomy program aims to: (i) develop the science knowledge and analytic skills of students, whether they be majors or not, through a focus on the field of astronomy and (ii) instill an appreciation of science, particularly astronomy, in students. The programs provide students with transferable skills so they can excel in a wide range of STEM-related fields. UH Hilo presently offers astronomy courses every semester that are designed to build expertise in data acquisition and analysis and to provide hands-on experience handling the necessary hardware and software. Skills acquired through both programs position graduates for operations-related employment at the Maunakea Observatories (MKOs), employment in other STEM-related fields, or, for those who are committed to making a career of advanced research in the field of astronomy, graduate-level education in astronomy. Five of the courses have laboratory components that would use a telescope if it were available, and even more might be initiated if the telescope is available at Halepōhaku; educational material (e.g. celestial object pictures or spectra) produced during these laboratories could also be used during lecture-based courses. At one time, facilities at Astronomy Site 9 (Hōkū Kea) were used for this purpose, but those became unusable in 2006. UH Hilo has since acquired a state-of-the-art PlaneWave Instruments CDK700 (PIC700) telescope system, a suite of instruments, and an AstroHaven “clamshell” 18-foot dome for the laboratories. With an aperture of 0.7 meter (28 inches) and a focal ratio of F/6.5 (Figure 3-3), the PIC700 is currently stored in a room on the UH Hilo campus. While it can be/is being used to train students on the purely mechanical aspects of telescope operations, at its current location it cannot be used to train students in real observing sessions.
3.3.2 **NEW EDUCATIONAL TELESCOPE AT HALEPŌHAKU**

Both programs described above have identified a need for access to a working modern, small-aperture telescope on Maunakea as an important component of their desired educational programs. After an extensive search for a suitable site for the educational telescope (NET) (about 16 different locations were considered), UH Hilo identified an area at Halepōhaku as an excellent location for such an instrument. Skills acquired through the operation of such an educational telescope, along with visits to astronomy facilities in the MKSR, would better position the students for employment at the MKOs and elsewhere in the world astronomical research community. In addition, faculty and students at both UH Hilo and UH Mānoa would use it for laboratory courses and research projects. An educational telescope at Halepōhaku could also be employed for outreach events and for programs involving the Big Island community that would help UH build a stronger bond between astronomy on Maunakea and the community. It is expected that telescope time will be made available to students and the community interested in astronomy or for educational purposes.

The UH BOR Resolution 19-03 dated November 6, 2019 (Appendix D), directed that Astronomy Site 9 (Hōkū Kea Kea) be decommissioned and that “…a new educational telescope facility for the University of Hawai‘i at Hilo shall be established at Halepōhaku or elsewhere.” UH’s present intent is to site the educational telescope within Halepōhaku, and it has commissioned a planning and design team for the proposed educational telescopeNET project that will lead the project.
review process, prepare an HRS Chapter 343 environmental document, and prepare a Conservation District Use Application (CDUA) for the facility that UH will submit to DLNR.

More specifically, UH Hilo has identified one primary and one backup location at Halepōhaku to date. The primary location is adjacent to the smallest of the four dormitories (Dormitory A) in the upper portion of Halepōhaku (Figure 3-4). This site offers limited light pollution, good sky visibility, and is near power and communication infrastructure. The site has been tested using a smaller, portable telescope and was found to be suitable. An already identified backup location is land adjacent to one of the four Subaru-built construction cabins in the lower portion of Halepōhaku. This site is also believed to be suitable, but less so due to light pollution from passing vehicles on the main road. The proposed structure is comparatively much smaller than the astronomy facilities on the MKSR, with a profile that is no taller than existing Halepōhaku structures and taking up a small portion of a previously disturbed area. Additional and more refined alternatives may be identified as UH coordinates with the community as part of the planning and design team’s work.

**Figure 3-4: Conceptual Illustration of Educational TelescopeNET by Dormitory A**

UH Hilo has passed the following educational telescopeNET milestones:

- In February, 2020, it displayed the PlaneWave 0.7-meter telescope at the ʻImiloa Center. This was the first time that it was displayed to the public, and hundreds of persons stopped by, including many young people who experienced moving the telescope using the control interface.

- In mid-2020, a project was formally initiated by UH Hilo for the educational telescopeNET.

- In September, 2020, UH Hilo initiated a community outreach campaign regarding the possible installation of the new educational telescopeNET. The effort included a virtual
The extent and specifics of the diversified educational programs are yet to be fully defined, but to achieve its goals and optimize the usage of facilities that it continues to operate and maintain, UH anticipates the need to reconfigure, modify, repurpose, and/or remove certain facilities at Halepōhaku. If the field station concept does not require all the underutilized existing facilities, UH would prefer that the unused facilities be removed and the environment restored rather than transfer them to the VIS to expand its offerings in a manner that would generate a greater number of visitors. Limited new facilities, such as the UH Hilo educational telescope NET, may also be developed. CMS and UH Hilo will continue to seek input from the community and consider alternatives for the Multidisciplinary Field Station. Examples of possible repurposing concepts include:

- Expanding access to the “common building” and dorms (Figure 3-1) to non-astronomy faculty, researchers, students, and other UH-affiliated or -sponsored programs for food service, meetings, and overnight stays. It is envisioned that students from high schools age and older could utilize the lodging facilities while participating in resource-based educational programs.
- Repurposing existing facilities to accommodate classrooms, offices, laboratory facilities, and other Multidisciplinary Field Station needs.
- Repurposing the stone cabins (Figure 3-1) and associated water tanks to create additional space for visitor information and education and Ranger functions as well as water sources for conservation projects.
- Repurposing the construction cabins (Figure 3-1) to create additional space for visitor information and education and Ranger functions.

To the extent that re-purposing proves impractical, removal of some of the buildings may be appropriate.

3.4.2 Specific Projects

In addition to the general repurposing concepts discussed above, several specific proposals for projects at Halepōhaku have already been identified. They include, but are not limited to, the following:

- Grading and paving the currently unpaved parking area immediately to the west of the Halepōhaku “common building.” This may involve structural components and drainage components that incorporate lessons learned from similar infrastructure improvements at the VIS that were completed in 2019.
- Conducting habitat rehabilitation or restoration projects as called for in the CMP.
- Producing and outplanting native species as called for in the CMP.
- Erecting educational, safety, and interpretive signs as called for in the CMP.
- Improving pedestrian connectivity between existing and future trails in the neighboring Forest Reserve that are sanctioned by DLNR, the “common building,” stone cabins, VIS, and/or construction cabins.
and natural resources. Stewardship, conservation, and non-astronomy education goals have not required the establishment of new facilities or developments to date; therefore, nearly all the vertical facilities\(^{21}\) in the MKSR in 2021 are related to astronomy. Table 4-1 and Figure 4-1 summarize the existing astronomy sites and facilities within the MKSR. Additional detail for selected sites is provided on a larger drawing provided in Appendix F.

“Astronomy Sites” are the specific locations, typically defined by sublease areas, where astronomy facilities have been or may be developed. The astronomy sites are numbered generally clockwise from Astronomy Site 1 (Subaru) to Astronomy Site 13 (TMT); Astronomy Site 14 (VLBA) is removed from the others on the southern slope of Maunakea (Figure 4-1). The astronomy site boundaries are based on the following:

- For astronomy sites that have, or had, subleases, the boundary is based on descriptions and depictions in the sublease and the CDUP for each astronomy facility.\(^{22}\)
- For astronomy sites that never had a sublease (the two astronomy facilities, Site 7 (UH 2.2m) and Site 9 (Hōkū Kea Kea), always owned by UH), the boundary was drawn based on the extent of the existing facilities, disturbed areas, their relationship/proximity to adjacent uses, and topography.

Source: UH and DLNR

---

\(^{21}\) Vertical facilities are those that rise substantially higher than the natural ground surface and include all buildings, but do not include roads and utilities.

\(^{22}\) The extents of Astronomy Sites 2 and 3 (Keck I and Keck II) are based on dividing the single Keck sublease area into two sites based on drawings included in CDUP applications for the two facilities (HA-1646 and HA-2509).

\(^{23}\) Astronomy facilities developed prior to 1971 were permitted post facto by CDUP HA-954. As outlined in DLNR’s staff report for that CDUP (DLNR, 1977), participants in the MKSR master lease (e.g., UH) likely did not seek additional approvals when the pre-1971 facilities were built because they assumed that the lease and purposes of the MKSR permitted the construction of observatories. The report states, “It is felt that the failure to obtain the approval of the Board for the use of State-owned conservation lands may well be based on assumption rather than outright omission.”
4.1.2 UH COMMITMENTS

UH’s vision and goals recognize that astronomy on Maunakea can only continue to the extent that (i) it is sensitive to and respectful of Maunakea’s cultural landscape and natural resources, and (ii) it contributes to the area’s stewardship, preservation, and utilization by others. Accordingly, UH has committed to reducing the number of operating astronomy facilities. Although a reduction in the number of astronomy facilities may adversely affect UH’s astronomy program and the MKOs in the short-term, UH believes it is likely to contribute substantially to the achievement of non-astronomy goals and objectives while also allowing the State and its residents to continue to reap the substantial scientific, cultural, and economic benefits that astronomy facilities in the MKSR provide.

This Master Plan reflects UH’s specific commitments, which include:

- By December 31, 2033, and throughout the remainder of the time covered by this plan, there will be not more than nine (9) operating astronomy facilities in the MKSR.24
- Five of the 14 astronomy sites that existed in 2020 will be ineligible for future astronomy facility use once the existing astronomy facilities on them have been decommissioned.25 They may be considered for non-astronomy uses consistent with this Master Plan’s framework.
- Astronomy Site 13 will be the last new site developed for an astronomy use in the MKSR. All future astronomy facilities will remain within the astronomy sites (Appendix F) that remain eligible for future astronomy facility use.
- No land uses will be considered on major undeveloped cinder cones (pu‘u) in the MKSR; this includes Pu‘uala, Pu‘uhoaka, Pu‘ulilīnoe, Pu‘umāhoe, Pu‘umākanaka, Pu‘upoepoe, and Pu‘uula.26

These commitments will support UH’s compliance with existing permits and governmental approvals. Which nine facilities continue to operate beyond 2033 in compliance with the first commitment will be established via the process outlined in Appendix E. Those not selected to continue will be decommissioned prior to the end of 2033.

Two astronomy facilities, Hōkū Kea Kea (Astronomy Site 9) and Caltech Submillimeter Observatory (Astronomy Site 10), have already self-selected cessation of operations and have made substantial progress toward decommissioning. In addition, the Very Long Baseline Array...

24 UH presently holds a General Lease from BLNR under which it grants rights to non-profit entities to construct, operate, and maintain astronomy facilities within the MKSR, in exchange for, among other things, access to world class facilities and research coordination. The General Lease expires at the end of 2033, before this Master Plan’s 20-year planning horizon. This Master Plan is essential to UH’s management efforts at least until 2033. After 2033, if UH is not granted a land authorization that includes the MKSR, whatever entity takes UH’s place might adopt some, all, or none of this Master Plan in its planning efforts. It is possible that, per the General Lease and subleases, that all the existing astronomy facilities will need to be decommissioned by the end of 2033 if UH or another entity is not granted a land authorization for all or portions of the MKSR.

25 As described in Section 4.3.4.3, a portion of Astronomy Sites 7 and/or 8 may continue to be utilized for astronomy if one of those sites is decommissioned and the other is selected for recycling.

26 Pu‘upoli‘ahu and Pu‘ukūkahau‘ula are not included in this list, although they were mentioned in CMP management action FLU-2, because they are not undeveloped and land uses, including habitat restoration, may be proposed on those pu‘u.
these portable toilets, rangers and/or astronomy facility personnel are still regularly called upon to clean up human waste. This continuing burden is due to: (i) parking in undesignated parking areas within the MKSR, (ii) the type and limited number of toilets provided, (iii) the fact that visitors are not always aware the facilities exist, and (iv) the facilities’ excessive distance from some locations where visitors congregate.

To mitigate this issue, UH will designate public parking areas as provided for in the UH Maunakea Rules (HAR Chapter 20-26) and maintain, reposition, and increase the number of portable toilets in the MKSR until improved permanent facilities can be developed. The repositioning of existing and future portable toilets may be necessary during construction and decommissioning projects as well. UH will investigate the extent to which it may be able to provide permanent public restrooms and shelters that can serve the MKSR. Once improved permanent restrooms are available, nearby portable toilets will be removed.

Those who come to the mountain, including BLNR, have also identified the need for shelter, particularly shelter that would be helpful to cultural practitioners, the public, and the Rangers. Shelters to provide a place where cultural practitioners and others could assemble and Rangers could store safety equipment and have office space will be considered.

Siting considerations for these facilities include:

- Proximity to where people, including the public and cultural practitioners, presently or are likely in the future to congregate, such as near designated public parking areas, shuttle stops, popular sunset viewing areas, and trailheads.
- Preference for areas that:
  - Have been previously disturbed, including the adaptive reuse of decommissioned or recycled astronomy sites and facilities. Astronomy sites where it may be more likely to consider this include Astronomy Sites 9 (Hōkū Ke'aKea) and 14 (VLBA), plus Astronomy Sites 7 (UH 2.2) and 8 (UKIRT), should they be decommissioned.
  - Are next to or near existing improvements, including astronomy facilities. 29
  - Minimize visual impacts.
  - Provide a buffer from areas with high native species diversity, unique biological communities, unique geological features, or sensitive cultural sites.
  - Provide a buffer, established in consultation with SHPD, from archaeology sites (Figure 4-2).
- Ease of access by maintenance vehicles and personnel.
- Proximity to existing utility lines if utility connections are required.

29 Facilities could be attached to existing UH-owned astronomy facilities, but placement of public facilities on astronomy sites subleased to other entities would require modification of agreements. Public facilities would need to avoid or minimize impacts to astronomy facility operations and safety hazards related to falling ice and other hazards.
impacts, including impacts to the cultural landscape and natural resources. The proximity of utilities will also be considered in the unlikely event signs require utility connections. Signs will preferentially be sited in locations that have been previously disturbed and collocated with restrooms, shelters, public parking, and trailheads. Where appropriate for safety or other considerations, these minor facilities can be sited in undisturbed areas.\textsuperscript{30}

4.2.2.4 Trails

The great majority of the trails on Maunakea are outside the MKSR on land that is either within the neighboring Mauna Kea Ice Age NAR or within the Mauna Kea Forest Reserve. These areas are managed by and under the jurisdiction of DLNR. Nevertheless, hiking is a relatively common recreational activity in the MKSR; it is concentrated on the few better-known trails in the MKSR (e.g., summit trail and Lake Wai‘au trailheads). Hiking near the summit of Maunakea is challenging and potentially hazardous for two main reasons.

- First, because the amount of oxygen in the air is only about 65 percent of what it is at sea level, individuals must breathe faster to compensate for the oxygen shortfall, and the heart must beat faster too.
- Second, the temperature, wind, snowfall, and ice in the summit region can be dangerous for those who are caught outside without the proper clothing because it leads to hypothermia, which can be life-threatening.

For health and safety reasons, hiking in areas that are not visible to Rangers and first responders is not advisable. For this reason, UH does not advocate the establishment of any new public trails within the MKSR. Instead, UH will continue to coordinate with DLNR regarding the establishment of trails at lower elevations on NAR or Forest Reserve land and will make areas under UH jurisdiction needed to support or complement such trails available for trail purposes as requested.

Notwithstanding its desire to minimize the amount of hiking across the high-elevation lands within the MKSR, UH recognizes that hiking on some routes is so well established that it will continue and be made consistent with HAR Chapter 20-26. The trail to the summit of Maunakea from Astronomy Site 9 (Hōkū KeaKea) will be considered for improvement. Accessing the highest point in the Pacific will continue to lure visitors, and some cultural practitioners also access the summit. It is a short trail, and people are always visible to the Rangers and other first responders on the road, provided they remain on the trail. Adverse impacts observed associated with use of this trail include erosion, trail widening, trail realignment, and wandering off the trail. To reduce erosion and more clearly delineate the trail, UH may consider hardening the trail while respecting the design guidelines in Chapter 7. The most appropriate techniques and materials to carry out this concept would be informed by working with Native Hawaiians that have ties to the Kaʻohe Ahupuaʻa.

\textsuperscript{30} Undisturbed areas are those areas outside of the astronomy sites that have not been visually affected by human activity. All areas within the astronomy sites, including decommissioned and restored astronomy sites, are considered disturbed.
Data gathering land uses would be sited as necessary to support the research goals of individual programs. Achieving those goals may require measurements at different elevations, data from various sides of Maunakea, or the collection of information from locations similar to other locations around the world where the same sorts of data are being gathered. UH will evaluate siting alternatives to ensure that data gathering activities, facilities, and equipment avoid and/or minimize potential impacts by, for example:

- Considering previously disturbed areas, including active and decommissioned astronomy sites, when program research goals do not require undisturbed areas.
- Siting equipment outside of buffers established in consultation with SHPD around archaeology sites (Figure 4-2).
- Considering visual impacts.

Actual site selection criteria will be proposal specific, based on type and longevity of use, and other factors. They will be established via the appropriate proposal review process (see Part 3). A proposed data gathering use will not be approved if it cannot avoid and/or minimize impacts to the extent deemed appropriate by UH and DLNR.

4.3.2 ASTRONOMY DECOMMISSIONINGS

This Master Plan calls for there to be no more than nine (9) astronomy sites with operational astronomy facilities in the MKSR by the end of 2033 (Section 4.1.2). This section outlines the process by which UH will accomplish this commitment.

4.3.2.1 Ongoing Decommissioning of Two Astronomy Sites

As summarized below, the sponsors of the CSO (Astronomy Site 10) and Hōkū 庞 Kan (Astronomy Site 9) have each already submitted a decommissioning Notice of Intent (NOI), MKMB and DLNR have approved their NOIs, and they are fully engaged in the decommissioning process laid out in the CMP. They have also both issued Draft Environmental Assessments detailing their proposed decommissioning efforts and associated impacts (Caltech 2021, UH Hilo 2021). The decommissioning of these two facilities partially fulfills CDUP HA-3568 Special Condition #10, which states “The University will decommission three telescopes permanently, as soon as reasonably possible.”

UH has decided that these two sites will not be available for future astronomy use, including recycling. As discussed in Section 4.2 of this Master Plan, some non-astronomical use of portions of Astronomy Site 9 may be considered during or after the decommissioning process.

4.3.2.2 Upcoming Decommissioning of Additional Astronomy Sites

Which astronomy facilities and sites will continue beyond 2033 and which shall be decommissioned will be established via the process outlined in Appendix E. It is known that VLBA, on Astronomy Site 14, will be decommissioned prior to the end of 2033. One or two additional facilities, depending on if an astronomy facility is developed on Astronomy Site 13, will not be selected for continued operation via the process outlined in Appendix E. Selections are expected by the end of 2025, allowing seven years for the owners/operators of any not selected to completely decommission prior to the end of 2033.
### Astronomy Site Modification and Recycling Probability

<table>
<thead>
<tr>
<th>Astronomy Site</th>
<th>Modification and Recycling Probability</th>
<th>Discussion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Site 8: UKIRT</td>
<td>Slight to moderate</td>
<td>UKIRT has been one of the most impactful facilities in recent years due to its wide-field camera and ability to engage in time-domain astronomy. As its efforts with the wide-field camera wind down over the next decade, the likelihood of modification or recycling may increase. The size of the site and proximity to other resources suggest that its recycling would not yield a facility substantially larger than the existing one. See Section 4.3.4.3 regarding possible recycling once the site boundary is altered.</td>
</tr>
<tr>
<td>Site 9: Hōkū Kea</td>
<td>None</td>
<td>This facility will be decommissioned, and the site will not be available for future astronomy use.</td>
</tr>
<tr>
<td>Site 10: CSO</td>
<td>None</td>
<td>This facility will be decommissioned, and the site will not be available for future astronomy use.</td>
</tr>
<tr>
<td>Site 11 – JCMT</td>
<td>Highly unlikely</td>
<td>JCMT continues to be very impactful and is part of the Event Horizon Telescope, which is a long-baseline submillimeter interferometer. Maunakea will continue to play an important role in such efforts due to its latitude. However, it is unlikely that modification or recycling will occur due to the large and ongoing investment in submillimeter facilities in the southern hemisphere. Located in “submillimeter valley,” this site is not attractive for recycling to an optical or infrared facility.</td>
</tr>
<tr>
<td>Site 12 – SMA</td>
<td>Highly unlikely</td>
<td>Factors discussed above related to JCMT apply to the SMA as well, and the Smithsonian has not indicated any change in priorities or funding.</td>
</tr>
<tr>
<td>Site 13 – TMT</td>
<td>Extremely unlikely</td>
<td>The TMT has a CDUP to build on this site during the term of this Master Plan. If constructed, it will have an operating life of at least 50 years.</td>
</tr>
<tr>
<td>Site 14 – VLBA</td>
<td>None</td>
<td>This facility will be decommissioned, and the site will not be available for future astronomy use.</td>
</tr>
</tbody>
</table>

Source: UH and the MKOs

Although the current MSE project concept involves the facility at Astronomy Site 5 (CFHT) becoming slightly taller (no change to building footprint at ground level), it is not a foregone conclusion that all modification or recycling projects will result in larger facilities. Instead, technological advances could result in larger aperture telescopes being developed on astronomy sites in ways that require minimal disturbance and result in minimal height and size increases, or even allow existing facilities to be replaced with smaller ones. Moreover, not all astronomical research requires large-aperture telescopes. There will always be demand for 2- and 4-meter class telescopes, and it is possible that an astronomy site that presently has a 2- or 4-meter class telescope could be modified or recycled with a similar size facility that takes advantage of the many technical advances that have occurred since the mid-1980s when telescopes of this size were last installed in the MKSR. Such recycling could substantially increase the scientific power of a site without increasing (and potentially decreasing) the footprint, bulk, and impacts of the facilities that are present.

### 4.3.4 Other Potential Astronomy-Related Projects

#### 4.3.4.1 Optical Hawaiian Array for Nanoradian Astronomy Project

The astronomy facilities on Maunakea are experimenting with the use of fiber optics for two different purposes.
CMS newsletters and/or other means, including measures to inform and involve the Native Hawaiian community.

**Figure 6-2: Phase 2 Review Process Flowchart**

**Step 1.** CMS staff prepares report that proposes Type (A, B, or C; which is informed by discussions with DLNR; see Figure 6-3), provides comments, and lists draft conditions.

**Step 2.** CMS ED reviews and approves staff report and authorizes proceeding to Step 3.

**Step 3.** Kahu Kū Mauna (KKM) and Environment Committee (EC) review and comment on proposal and associated CMS report.

**Step 4.** Maunakea Management Board (MKMB) reviews proposal, associated CMS report, plus KKM and EC input, gather public input, and provides a recommendation.

**Step 5.** CMS ED (or UH Hilo Chancellor designee) reviews all available information and advice, then decides which type each proposal is and what conditions should be imposed, if any, or rejects the proposal; the determination is documented in a letter to Proponent.

- **6.a** If Type A, this determination shall serve as UH’s approval. Proponent can proceed (as applicant) with downstream disclosures, approvals, and/or permits, if any (see Section 6.6.1 and Figure 6-6)

- **6.b** If Type B, proceed to Phase 3 review described in Section 6.4 and Figure 6-4; also see Figure 6-7 for Type B process overview.

- **6.c** If Type C, proceed with Phase 4 agreement and review described in Section 6.5 and Figure 6-5; also see Figure 6-8 for Type C process overview.

- **6.d** Proposal rejected as submitted; Proponent may revise and resubmit.

Source: UH
2 review process. If the resulting Implementation Plan is acceptable\textsuperscript{45} to UH and the proposal proponent, the proponent will lead the implementation of that plan. If the proposal proponent or UH find the Implementation Plan unacceptable, the proposal proponent may modify their proposal and return to Step 1 of the Phase 4, Type C proposal review process.

The Implementation Plan should include a proposal-specific Phase 4 review committee that consists of members of the CMS advisory bodies and community members that are knowledgeable in various aspects of the proposal and its potential impacts, including potential impacts to the Native Hawaiian cultural practices. It is further anticipated that this committee will review proposal materials, such as design drawings, environmental disclosure documents, and permit applications as the planning and review process progresses.

### 6.6 OVERVIEW OF REVIEW PROCESS BY PROPOSAL TYPE

The following subsections provide an overview of the review process for each proposal type.

#### 6.6.1 TYPE A

Type A proposals are those expected to have negligible adverse impacts and are anticipated not to require a Site Plan Approval or CDUP. Between 2000 and 2020, most proposals at existing facilities on UH Maunakea Lands were classified as similar to Type A projects because they tended to consist of efforts to keep existing facilities operating efficiently and safely and did not entail structural modifications or ground disturbance.\textsuperscript{46} This trend is expected to continue in the coming years. Proposals involving the following may be considered Type A proposals:

- Repairs to existing equipment and structures.
- Like-to-like replacement of component external parts.
- Painting and resurfacing.
- Small new external equipment additions (e.g., cameras and weather sensors mounted on existing facilities, roof-mounted solar panels, and signs).
- The installation and operation of small data gathering instruments for periods of time measured in months.

As with all proposals, these Type A proposals would need to complete Phase 1 and Phase 2 reviews (Sections 6.2 and 6.3). Given the small scale of these proposals and their negligible potential for adverse impact, the review process would be relatively short, on the order of 2 to 4 months. Figure 6-6 provides an overview of the process and timeline for Type A proposals.

\textsuperscript{45} The only proposal items being found acceptable at this step are those in the bullet list above related to process. Although the draft Implementation Plan shall include proposal scope, schedule, budget, and other conceptual materials, those items are only included for context and shall not be considered approved or accepted by any actions at Step 6 of the Phase 4 review.

\textsuperscript{46} The terms Type A, Type B, and Type C were not used prior to this Master Plan. The vast majority of projects at existing facilities were characterized as a “minimal” project over the last 20 years.

7 DESIGN GUIDELINES

This chapter provides guidelines for astronomy facilities in the MKSR, certain other facilities in the upper slopes of Maunakea, and structures in Halepōhaku. The purpose of these guidelines, combined with the proposal review process in Chapter 6, is meant to provide early guidance and community input in a manner that prepares proposals for future permits and approvals by minimizing potential adverse effects, applying lessons learned to date, and encouraging consistency among current and future land uses. All proposals should also consider the Future Land Use (FLU) management actions in the CMP. UH will be actively evaluating project designs and specifications from initial concept through final design. This will be true whether a project originates within UH or is proposed by a sub-lessee or other 3rd party.

These design guidelines apply to all structures that will remain on the site once construction activities are complete; they do not apply to temporary items that are only present at the site during construction. For example, while the guidelines discourage the use of fences, during the construction phase, temporary chain-link fencing may be used to delineate and secure the construction site.

7.1 GUIDELINES APPLICABLE TO ALL PROPOSED PROJECTS

The following specific guidance regarding the management of native excavated material and imported construction material should be followed by all proposed projects within the UH Maunakea Lands unless a proponent demonstrates a compelling reason for an exception and incorporates community input via the CMS advisory groups regarding the exception.

7.1.1 MANAGEMENT OF NATIVE MATERIALS

Excavated native rock and soil material should be managed (i.e., removed and stockpiled) in a way that allows the site to be restored as nearly as possible to its original condition when the facility is decommissioned. Accordingly:

- The amount of native rock material disturbed by a project should be kept to a minimum consistent with the design requirements of the facility.
- Native material should not be crushed, or otherwise altered, more than necessary to move it to a stockpile or amended to the point where it cannot readily be used during the site restoration process unless it consists of massive lava flows and will be used as on-site fill material after it is crushed.
- All native material that is removed during the course of construction should either be used in an aesthetically acceptable way on-site, used for restoration projects elsewhere in the UH Maunakea Lands, or stored at the Batch Plant Staging Area or other location identified during the project review and approval process, if applicable. If it is stored off-site, provisions should be made for returning it to the site when the facility is decommissioned.
Modified and new facilities will be designed to minimize the use of hazardous materials to the maximum extent feasible.

7.2.11 WASTEWATER SYSTEM

New facilities in the MKSR (i.e., astronomy facilities constructed on recycled sites) will be required to have zero-discharge wastewater systems. Facilities that continue operating beyond 2033 will also be converted to zero-discharge wastewater systems. The basis of this requirement is unrelated to water quality concerns, it is a requirement to avoid impacts to the cultural landscape.

7.2.12 SOUND GENERATION

Heating, ventilation, and air conditioning (HVAC) and other non-mobile equipment with the potential to generate objectionable noise shall be designed and operated in a manner that limits the amount of sound that emanates from it. This means that, at a minimum, it should comply with the provisions of HAR Chapter 11-46, as applicable.

7.2.13 MAXIMIZE EXTENT OF REMOTE OPERATION

To the extent that it is technically, operationally, and economically feasible, any modified or new facilities should be designed to be operated remotely and/or robotically, and operators should make as full use of these features as is practicable.

7.2.14 EXCEPTIONS TO THE GUIDELINES FOR ASTRONOMICAL FACILITIES

UH may allow exceptions to any of the design guidelines in Chapter 7, except those related to the number of astronomy sites and the height and bulk of facilities on them. For this to occur, the facility designer/operator must demonstrate, to UH’s satisfaction, that strict adherence to the guidelines is likely to prevent the satisfactory performance of the facility or prevent the project from achieving its purpose and need. The facility operator will also need to demonstrate that the proposed exceptions will not result in significant adverse effects.

Requests for exceptions may be approved if they are minor in nature and if the proposed project is otherwise consistent with the overall goals and objectives of this Master Plan. UH will make decisions regarding requested exceptions only after it receives and evaluates input from the Phase 4 proposal review committee, MKMB, the Environment Committee, and Kahu Kū Mauna.

7.3 GUIDELINES APPLICABLE TO OTHER FACILITIES AND USES IN THE MKSR

Other facilities and uses the UH foresees potentially being developed in the MKSR are limited in scope. Examples of other potential facilities and land uses over the life of this Master Plan include:

54 The operation of individual wastewater systems within the UH Maunakea Lands has been permitted by the State of Hawai‘i Department of Health and several experts have concluded that operation of such systems do not pose a risk to surface water quality, groundwater quality, or drinking water quality.
Reimagining and Repositioning the University of Hawaiʻi: Navigating together to a Sustainable Future for UH and Hawaiʻi
As discussed in November:

- This “Reimagining and repositioning” initiative is a direct response to the pandemic crisis, which focused us more strongly on resource challenges and mission imperatives associated with the impacts and lessons of COVID-19 including their short- and long-term implications.

- Strategic Planning is the UH practice of systematically developing strategic directions, typically for a 6 year period.

- This presentation focuses on ”Reimagining and repositioning,” relevant work done and underway, and how the pandemic will influence the new Strategic Planning process now being initiated.
Lessons of the Pandemic for Hawai‘i and UH

• Hawai‘i needs a stronger and more diversified economy with less reliance on conventional tourism
• Hawai‘i needs more high-quality jobs that our residents can fill
• UH needs more diversified revenue streams than General Funds and conventional tuition
• Everyone has now seen that online learning, working and services can be effective, which improves our flexibility and responsiveness moving forward
• UH is quite agile and we can do even more with investment in our people to advance Hawai‘i priorities
• UH can do even better to utilize data to inform decision-making across the institution and the state
WHAT Hawaiʻi Needs Most from UH, Now More than Ever

• UH must engage more Hawaiʻi residents in post-secondary education and training
• UH must prepare more Hawaiʻi residents to fill the jobs Hawaiʻi needs
• UH must seed new economic sectors and develop new approaches to old ones
• UH must strengthen the research enterprise as a major economic and intellectual for the state
HOW UH Must Change the Way We Work

• UH must streamline administration, including academic administration, where possible
• UH must prioritize academic programming that advances the most pressing needs of our students and the State
• UH must diversify operating revenue sources and rely proportionately less on State General Funds
• UH must operate within the most modest physical plant feasible
• UH must work together as a more tightly knit system: UHunited
The University of Hawai‘i system is the single most important contributor to the future of Hawai‘i. The people of Hawai‘i appreciate the excellence throughout UH, understand its value to the state and show their pride in their university system. UH campuses are recognized for their quality and value and are destinations of choice within Hawai‘i and beyond. The UH System is the premier integrated higher education system in the country.

UH Board of Regents
April, 2017
Vision for Post-Pandemic
“Reimagining and Repositioning”

• **Prioritize Academic Offerings:** UH works together to offer a robust portfolio of student-responsive academic programs that meet the highest priority needs of the state and strengthen UH areas of excellence

• **Expand Online Programming:** UH collectively offers more market-responsive online programs across our islands and beyond

• **Pursue Strategic Research Initiatives:** The UH research and innovation enterprise advances opportunities for economic development and job creation while addressing the challenges facing Hawaiʻi

• **Improve Relations:** UH initiatives help improve Hawaiʻi’s relationship with the Native Hawaiian community

• **Enhance Efficiencies:** From reorganizations and online transactions to faculty workload templates and small program/course review, UH is committed to action

• **Reduce Footprint:** UH functions within an efficiently used and operated physical plant

• **Achieve Financial Sustainability:** UH operating revenues and expenditures are in full balance by FY25 (per 6-year Financial Plan)
Responding to State Needs: Academic Programming Imperatives

- Pandemic learning loss in our K12 student is one of the greatest challenges we face. UH must leave no one behind as we commit to educate more of our citizenry
  - Hawaii needs UH to bring more public high school graduates into post-secondary education and training
  - Pathways beginning with early college and CTE are powerful tools
  - Emphasis is required on equity for underrepresented populations
- UH must prepare more of our residents, from throughout our islands, to fill Hawaiʻi jobs
  - Institutionalize increased systemwide collaboration with employers through the proven sector convening strategy
  - More training, retraining and upskilling adults the way they need it: online, non-credit, industry-recognized certifications, stackable micro-credentials

These initiatives also represent opportunities for philanthropic and extramural funding
Responding to State Needs: Research, Innovation & Economic Development Imperatives

- Hawaiʻi needs UH to help grow healthy new economic sectors and develop new approaches to existing sectors
  - Stronger UH-wide educational emphasis on innovation and entrepreneurship
  - Recognize faculty excellence and achievement through T&P process
- Hawaiʻi needs the UH research and innovation enterprise to be an even more substantial economic and intellectual driver across the islands
  - Address Hawaiʻi challenges and opportunities,
  - Strengthen programs that support creation of new companies and jobs
  - Prioritize strategic and opportunistic faculty hires in areas of current and needed strengths

Excellent opportunities for extramural and philanthropic funding
Areas of Hawai‘i Need, Research Excellence and Economic Opportunity Overlap Significantly

- Education – Teacher shortage areas, Education leaders for Hawai‘i
- Health Sciences - Doctors, nurses, allied health, social workers, public health, psychologists, counselors, physical therapists...
  - Understand and address Hawai‘i health disparities
- Built Environment - Skilled labor, architects & engineers focused on sustainable and resilient structures for Hawai‘i
- IT & Computer Science – Technicians, Cybersecurity, Data Science, Machine Learning, Software Engineering
  - Hawai‘i residents with these skills can telework for employers anywhere
- Creative Media - Film / Music / Video / Arts, Production, Animation, Gaming, Esports
- Ocean, earth & atmospheric sciences; Environmental microbiology
- Climate Change, Energy, & Conservation
  - Sea level rise, coral reef health, renewable energy generation & microgrids, disaster management, ecosystem protection
  - RESILIENCE
- Food, Agriculture, Aquaculture
- Sustainable Tourism
- Astronomy & space sciences
- Civic engagement / Civil Society
- Study of Asia and the Pacific, Hawai‘i and our peoples
Post-Pandemic Online Learning Strategy

• While online learning will not replace in-person education in the next decade...
  • Data is clear that many traditional 18-year old learners do not thrive when too much of their learning is online
  • There are competencies and content best provided through in-person instruction

• Online learning will **substantially** increase in importance
  • Asynchronous online learning frees working adults and others from barriers of time and place
  • Online learning can be individualized, self-paced, competency based and scalable
  • Even “traditional” campus-based students want choice and benefit from online learning opportunities

1) Address statewide needs for education & training across our islands
  • Online Associate degrees with prior learning assessment, Baccalaureate completions, Professional post-grad certificates and degrees
  • Hybrid programs, e.g., weekends or summers in person, interactive video
  • UHunited – Create opportunities throughout the state including through University Centers

2) Identify opportunities for entrepreneurial signature online programs for global audiences in areas of UH expertise and excellence: Hawaiian language/studies, Asia-Pacific studies, Environment, Climate and resilience...

3) Continue to support individual online courses as part of traditional curricula
### Research Hubs

</table>
Initial Ideas for UH Role in Improving Hawai‘i’s Relationship with the Native Hawaiian Community: Journey to Become a Model Indigenous-Serving Institution

- Embrace Aloha – For ourselves, each other, and the environment
- Educational Disparities – Continue to reduce and eliminate equity gaps between Native Hawaiians and the general population in higher education access and attainment
- ‘Ōlelo Hawai‘i – Educate more teachers for immersion schools, Train translators for public boards, commissions and the Judiciary; Model bi-lingual signage and behaviors
- Health Disparities – Continue research with and in communities to understand health disparities including their causes and remedies
- Explore opportunities to collaborate with DHHL to create greater economic opportunity for homesteaders
- Maunakea – Continue to improve stewardship of Maunakea with stronger focus on culture and education, and ensure decommissioning of existing telescopes to honor commitments
- Identify and utilize measures and metrics of success
Current UH Financial Realities

• Operating Revenue – UH currently relies on General Funds and traditional student tuition
  • While State tax revenues are unexpectedly strong, there are many calls on them in addition to public higher education
  • Tuition rates cannot be increased substantially (beyond inflation) without harming access and competitiveness
• Operating Expenses – Reductions are possible but mostly not immediate
  • Relative to peers, UH has robust faculty/student ratios and weak staff/student ratios
  • Administrative consolidations are helpful although challenging to units’ and stakeholders’ sense of importance and authority; Savings not immediate
  • UH has not tightly managed our statewide academic program portfolio; Financial impacts of most academic decisions are not immediate
  • Some UH facilities are in desperate need of renewal, improvement and modernization; Some are under-utilized
• Timing - We are in neither a sprint nor a marathon
  • Prudent management and federal relief funds have enabled adequate reserves
  • We must achieve balanced operational finances with operating revenues covering operating expenses by FY24-25
Prioritize areas of state need
  • Workforce
  • Economy
  • Student demand / sustainability

Address small programs and low-enrollment courses
  • Stop-Out, Termination, Merger
  • UHunited: Opportunities to share across system
Review Opportunities for Savings Around Organization and Personnel Practices

• Reorganizations and consolidations on and among campuses to provide effective and efficient shared support services for students and faculty
• Leverage and accelerate the current work on:
  • Faculty Workload Assignment Template
  • Faculty Classification initiative to engage more qualified faculty in direct instruction
• Faculty buyout policies can increase percentage funding of faculty salaries from extramural funds in some units
• Charge tuition for extramurally funded GAs to grants
• Create flexible spaces that meet current and future needs, e.g.
  • Modern appropriately-sized classrooms
  • Shared space for teleworkers when on campus (frees up offices)
  • Better supported shared core research facilities and equipment
• Create and apply standard usage metrics
  • Office space standards
  • Classroom scheduling and utilization standards – Evening/weekend classes may attract more non-traditional students
• Review and divest from external leases where possible
• Identify, repurpose and/or decommission under/unutilized campus spaces
• Actively manage research space for Indirect Cost Recovery (IDC)
• Monetize or divest UH real estate with high costs and/or low academic value
• Downsize physical plants to match current and anticipated future needs
Revenue Measures Can Also Enhance Achievement of Mission

• Increased Campus Enrollment Generates More Tuition
  • More opportunity in public high school going rates, private school recruitment, internal transfers, retention, non-resident domestic and international recruiting
  Serving more students; leaving fewer behind

• New Programs Can Attract New Students and Revenue
  • Build and market unique programs of excellence
  • More online and adult-learner focused programs
  • More non-credit workforce training: micro-credentials and industry certifications
  Preparing more Hawai‘i residents for Hawai‘i jobs

• Strategic Research Initiatives Support Continued Growth in Extramural Funding
  Research can address Hawai‘i challenges and opportunities, enhances job creation

• Philanthropic funding on multi-year upswing
  Donors primarily support scholarships and research; strengthens town—gown relations

• Multiple real estate projects nearing fruition
  • Some opportunities complement our missions, some purely financial
  • Where possible, increase community use of UH facilities and resources
  Revenue beyond costs CAN support operations; Community engagement helps UH
• A seamless web of educational opportunity must ensure
  • Closing of equity gaps with entry points for everyone
  • Diverse curricular pathways from K12 and early college into and through the UH system
  • Seamless curricular pathways from UH CCs into UH universities
  • Sharing and collaborating on courses and programs to maximize opportunity across the islands
    • Maximize access, Leverage capacity and expertise, Extend Hub & Spoke approach across units
  • Common modernized general education
• Operating Efficiencies; Shared centralized high-quality services
• Shared physical facilities where possible
• Continue to engage in and monitor opportunities and ideas from “The Power of Systems”
High-Level Summary of Work Underway

• Intense and inclusive post-pandemic planning in every academic unit
  • Public web pages document processes and work products
• Program review underway throughout UH
• New lens on organizational structures
  • Much has been done; More proposals being designed and changes underway
• Development of approaches to shared services
  • Community Colleges leading the way
• Human resource practices in transition
  • Faculty Workload Assignment Template & Classification Review
• Campus space utilization studies complete or underway;
  Will provide basis for planning

REORGANIZATIONS AND PROGRAM MERGERS UNDERWAY
(Proposals Developed & Under Review)

- School of Communications and Matsunaga Institute for Peace (Social Sciences), Department of Communicology (Arts, Languages & Letters), Library & Information Science Program (Natural Sciences) to form the School of Communication & Information (Social Sciences).

- Classics Program (Department of LLEA) with the Department of Religion to form the Department of Religions & Ancient Civilizations (undergraduate degree mergers underway).

- Consolidation of bachelor’s degrees in French, German and Spanish into one BA (with concentrations) to realize administrative efficiencies and to make the new BA more robust with interdisciplinary and cross-cultural connections for a more flexible curriculum.

- Center on the Family (CTAHR) to the Social Science Research Institute (Social Sciences) to strengthen capacity and effectiveness. Both organizations work at the intersection of research and outreach to address emerging issues and offer evidence-based solutions for policy and practice.
REORGANIZATIONS COMPLETED

- **Phase II Reorganization** (effective July 1, 2021): Reduced siloes to foster collaborative initiatives and work, ensured financial savings, and reduced executive/managerial and support positions.

- **College of Arts, Languages and Letters** (effective July 1, 2020): Merged three stand-alone schools/colleges (College of Arts & Humanities, College of Languages, Linguistics & Literature, and the School of Pacific & Asian Studies) into one college to address declining enrollments, to reduce the number of executive/managerial positions, to facilitate stronger interdisciplinary collaboration, and to reinvigorate the liberal arts with our unique Asia-Pacific strength and focus at the core.

- **Library Services** (effective December 3, 2020): Designed to achieve greater operational effectiveness and efficiency with current staffing levels through the consolidation of Sinclair Library functions, strategic dissemination of select collection responsibilities, and reconfiguration of the Access Services Department.
ALIGNING RESOURCES TO POST-PANDEMIC PRIORITIES

• **Performance Indicators for Prioritization developed** as a tool to support the ongoing identification of, and investment in our priorities. Collaborative working group of faculty, students, staff and administrators developed the indicators and metrics to guide resource allocations.

• **Indicators aligned with the UH Mānoa strategic plan goals and Post-Pandemic Hawai‘i priority areas**, including Native Hawaiian Place of Learning; Student Success; Research & Creative Work; Responsiveness to the Needs of Hawai‘i; and Outreach/Engagement with the Community.

• **FY 2022 Hiring Decisions Utilized Performance Indicators.** Academic units and the Mānoa Budget Team utilized the indicators to prioritize faculty hiring requests for the first time.

• **The Indicators will facilitate a regular assessment** of our performance in living our values and achieving our goals. It is expected that the campus will revisit our priorities, indicators, and metrics regularly to ensure that we are agile, innovative, and responsive to the needs of Hawai‘i.
Post-Pandemic Work Underway at UH Hilo
• Shore up transfer services and create more transfer pathways from UHCCs that prepare students for careers that allow them to stay in state.

• Create an intentional online portfolio to better serve our island and state.

• Create summer academies and low-residency degree programs to attract more students from off-island.

• Maintain focus on equity and student success.
Update curriculum and develop new programs to better align with employer needs and student demand

- Pharm D curricular transformation project
- Drone technology embedded in STEM programs
- Data science and data visualization
- Fisheries and Wildlife
- Bachelor’s level education programs and STEM Ed.
• Agencies on campus
  • USGS
  • SHPD

• Nascent partnership projects
  • BBB grant for food and ag
  • NELHA and ‘Iole
UH Hilo - Preparing students for careers in Hawai‘i: Experiences

- Shore up support and expand opportunities for internships
  - Akamai internships
  - PIPES internships
  - Legislative internships
  - COBE internships
- Bonner Leadership Program
- Kuleana and Community course
- Kawili Kine Cultures
- Peer mentoring
• Data-informed decision-making.
  • AASCU Transformation Accelerator Project.
  • CSU Student Success Analytics Certificate Program.

• Beyond diversity: Focus on equity.
  • AAC&U Truth Racial Healing and Transformation Center.

• Organizational investments on priority needs.
  • Student Mental Health
  • Employee resource groups
  • Professional development
  • Research support
Post-Pandemic Work Underway at UH West O‘ahu
UH West O‘ahu: Engage more students in post-secondary education

- Early College pathways with our regional high schools academies
- Strong 2+2 articulation agreements with community colleges
- Expanded online degree and certificate programs
- Dedicated space for VA & active duty military students and family members
- Strengthened student support in behavioral health and counseling, tutoring, financial literacy, academic advising and life coaching
- Emphasize grants, contracts, philanthropic opportunities to support student scholarships, student internships/mentoring, student transfer, student on-campus and on-line support, faculty scholarship and teaching, and academic programs
- Growth-oriented action goals across signature programs
• Placement of students in capstone practica with area businesses and industries
• Partnership with Kapolei Chamber of Commerce and Complex Area schools to prepare students for careers in our region
• Joint efforts with DOE and KS to prepare teachers. 228 alumni of BEd program teaching in the Hawai‘i DOE; 88% of alumni teaching at schools in Leeward or Central O‘ahu
• Expanded Allied Health professions with 7 new concentrations
• Career pathways merging ‘ike and ‘ōlelo Hawai‘i with science, applied mathematics, business, hospitality, and creative media
UH West O‘ahu: Innovating to grow new and existing economic sectors

• New degrees and certificates targeting needs of an increasingly digital economy

• Hybrid, blended learning opportunities that leverage our use of developing technology for jobs in a future-oriented economy

• Extramural funding endeavors to grow innovative technologies by bringing faculty, students, and external partners together to address future challenges

• Leveraging academic programs across UH System, talent of faculty, students, and graduates, and the new ACM building to advance innovative technologies
Post-Pandemic Work Underway Across Our Seven UH Community Colleges
Repositioning and Reimagining the UHCCs

• UHCC will:
  • Better shared resources to serve our students and local communities.
  • Greater collaboration will leverage strengths of different campuses.
  • Allow UHCC to take advantage of distance learning to extend new opportunities statewide.
Objectives and Priorities:

- Provide statewide access for quality education and training to meet the state's workforce needs and to serve community needs and provide employment opportunities for all residents (CC’s open door legacy). Hawaii’s residents should have access to a diversity of programs through the UHCC as a group; each campus will have areas of emphasis and contribute to the range of options provided statewide.
- Focus on workforce needs and transfer opportunities that lead to living-wage jobs.
- Identify campus strengths and reduce duplication of programs and services.
- Maintain a focus on student success and equitable outcomes.
UHCC Operational Units

• Centralizing operations for better consistency and service to students
  • Now in pilot – 3 campuses taking part in centralized financial aid awarding
  • Moving toward beginning centralized approaches to Admissions

• Right-sizing for consistent levels of staffing
  • Human Resources
  • Institutional Research
  • Financial Management
• Administration of non-credit programs will be centralized for consistent and aligned approach to:
  • Responding to workforce development needs
  • Consistent quality of course offerings
  • Consistent pricing and financial management for course offerings
  • Leverage campus level academic programs to deliver meaningful training
  • Centralized approach to building non-credit credential programs

• Short term non-credit programs will be aligned so that workforce training will be “stacked” to allow for advancement in a career pathway.
UHCC Academic Programs

• Academic programs are being evaluated for:
  • Continuous improvement and alignment with current or future workforce needs
  • Opportunities to collaborate among campuses to increase students’ access and provide opportunities for efficiency
  • Program health and efficiency
• Since 2020, 55 community college credentials have been stopped out or terminated based on evaluation: 1 Bachelor of Applied Science, 11 Associates degrees, and 43 other credentials (i.e., certificates, concentrations).
• Among other options, faculty and administrators are considering:
  • “Hub and spoke” models:
    • Work with academic programs still underway
    • Assessments ongoing of courses to be shared to avoid multiple sections of small class sizes
    • Evaluation of needed new programs to respond to workforce development to be shared cross-campuses
  • Program investments
  • Program consolidations
  • Program stop outs for curriculum redesign
  • Program terminations

• Work with academic programs still underway
• Assessments ongoing of courses to be shared to avoid multiple sections of small class sizes
• Evaluation of needed new programs to respond to workforce development to be shared cross-campuses
• Create opportunities at University Centers
Looking Forward
Examples of What Success Looks Like

• Increasing number of online programs underway
• Portfolio of academic programs across the UH system meet the highest priorities of the state
  • Reduce number of out-of-state teachers / Eliminate shortage
  • Reduce Healthcare worker shortage
  • Increased numbers of enrollments in IT/CS/Cyber/Engineering
  • Plan for early childhood ed workforce
  • Institutionalized engagement with employers to meet needs
• UH driving job creation across the islands in multiple sectors
  • Research enterprise growing and hiring
  • UH initiatives leading to new companies with new jobs
• Efficiently used physical plant – lower operating costs
• Revenues and expenditures in full balance by FY25
UH Strategic Directions 2022 - 2028

Timeline: Implementation in 2022

Establish steering committee

**Phase I outreach:**
- set up website
- send information and survey to faculty and staff

**Phase II outreach**
- to internal and external discussions/workgroups

**Phase III outreach**
- with draft plan and measures

2022

- JAN
- FEB
- MAR
- APR
- MAY
- JUN
- JUL
- AUG
- SEP
- OCT
- NOV

- Publish results of survey and review of campus strategic plans
- Develop draft plan and possible measures with officers and BOR
- Finalize report and present to BOR
Post-Pandemic Response Continues Actively
Work on Next Strategic Plan Begins

Athletics Department Update

January 20, 2022
• Athletics Department Vision
• Issues Recently Highlighted
• NCAA Transfer Portal
• Financial Considerations
Vision:
To bring pride to Hawai‘i through championship-caliber competition

Mission:
To prepare our student-athletes to become successful in life

Core Values:
Integrity, commitment, respect, ‘ohana, and passion

Role of Athletics Department:
To serve the student-athlete through an academic degree program and through intercollegiate sports to develop their capabilities to the fullest. Furthermore, our role is to promote sportsmanship, equal opportunity, and diversity among participants in our athletics programs. In addition, the Department strives to contribute toward the economic development of Hawai‘i through our intercollegiate sports programs that bring excitement to our fans as well as competitors’ fans, and to the supporters and stakeholder of the State of Hawai‘i…
Issues Recently Highlighted

• Mental Health
• Student-Athlete Nutrition
• Communication Channels for Student-Athletes
• Facilities
• Responsiveness of Athletics Department Administration

January 20, 2022
Mental Health

Jonathan Sladky, M.D. and Lyn Nakagawa, ATC
The current Athletics’ administration has made mental health care for athletes the top medical priority over the past 3 years. The well-being and mental health of student-athletes remains our highest priority.

**UH Athletics’ “firsts”**

- Since Fall semester of 2019, the Athletics Department has (for the first time) had a half-time mental health specialist (psychologist/LCSW) dedicated to the mental healthcare of student-athletes
- Beginning Spring semester of 2021, Kelly Hee brought on officially as a half-time hire to broaden availability to athletes and increase proactive mental health care
- During the worst of the COVID-19 pandemic, the Athletics Department partnered with TalkSpace to make the TalkSpace app available to all student-athletes; this app allows connection at any time to licensed psychologists through the app
- The Counseling and Student Development Center (CSDC) partnered with Athletics Department to offer group therapy sessions for student-athletes to proactively address mental health issues and concerns
Mental Health Care Resources

- **Proactive / Preventative Efforts:**
  - Newsletters and information (TalkSpace, Cindy Rote, CSDC)
  - Large-scale presentations (Kelly Hee, Eating Disorder summit, Dr. Sladky)
  - CSDC / UH Athletics staff, coaches, counselors, academic advisors, and learning specialists

- **Counselors in Residence (CIR)** – CSDC therapists who live in the residence halls to support on campus residents after hours and on weekends.
  - TalkSpace: available to all athletes during the 2020-2021 academic year
  - Individualized / team-based preventative presentations: through Kelly Hee during the 2021-22 academic year
  - Plans are in place to implement standardized mental health screening for all athletes (in conjunction with pre-participation clearance) beginning in the 2022-23 academic year
Mental Health Care Resources

- **Reactive / Treatment:** Students may contact CSDC or local mental health hotlines directly, or may be triaged through our medical staff.

- UH Athletics Department has implemented mental health referral protocols, and has an Emergency Action Plan.
  
  - **Acute, Emergent:** CSDC Blue Line, Queen's Psych ER, Castle Psych ER
  
  - **Acute, Non-emergent:** *UH Athletics counselor*, CSDC counseling, Queen's Counseling Services
  
  - **Chronic:** *UH athletics counselor*, CSDC counseling, Queen's Counseling Services
  
  - **Preventative / Proactive Resources:** *UH Athletics counselor*, meditation apps, Cindy Rote
Student-Athlete Nutrition

- Always want to do “more” for student-athletes, balanced against budget constraints and equity among all sports
- Hawai‘i spending on student-athlete nutrition compares favorably to peers and benchmarks
- Difficulties of COVID impact on budget and nutrition programs; compounded by legislature not renewing $900,000 of support for student-athlete nutrition

Source: NCAA Institutional Performance Program data base. Student-athlete meals includes supplemental meals, pre- and post- game meals, occasional meals paid through UH Foundation, and food/drinks provided through “trade” (e.g., Muscle Milk) via the weight room.
Communication Channels for Student-Athletes

Lois Manin, Associate Athletics Director, Student Services/SWA
Communication Channels for Student-Athletes

Bringing Concerns as Student and/or as Athlete

• Various channels established to allow student-athletes to bring concerns forward as individuals or as group, for example:
  - End of season program evaluation
  - Exit evaluation/interview
  - Student-Athlete Advisory Committee
    o Each team represented
    o Promote increased communication between student-athletes, coaches and administration
    o Promote communication, interaction, and support between teams in an effort to cultivate a sense of community pride among UHM SA
    o To provide an opportunity for SA to develop leadership skills.
    o To promote SA welfare by offering suggestions for and feedback on SA Development programming and on other programs and policies affecting SA
Communication Channels for Student-Athletes

Bringing Concerns as Student and/or as Athlete

Jan 20, 2022

• Student-Athlete Handbook contains information in various areas where concerns may be raised, including complaints as a student and/or as an athlete

• There are several channels available to student-athletes
  
  - Time doesn’t allow for going over all of them during this meeting, but Athletics can go over in more detail before ICA

SECTION 2: RIGHTS OF A STUDENT-ATHLETE

UHM POLICY ON EQUAL OPPORTUNITY AND NON-DISCRIMINATION

Student-Athlete Handbook contains information in various areas where concerns may be raised, including complaints as a student and/or as an athlete.

• There are several channels available to student-athletes

  - Time doesn’t allow for going over all of them during this meeting, but Athletics can go over in more detail before ICA

COMPLAINTS AND GRIEVANCES

If you feel that you have been treated unfairly by anyone in the university system, the university provides a number of different ways for you to appeal for relief. You should choose the proper venue based on the nature of your complaint, and whenever possible, you should make use of the procedures that are available to all students before you turn to those that are specific to SA. If you need some advice on how to proceed, you can consult an academic advisor, the EAB (Dr. David Erickson, 956-4243), or the office of the Dean of Students (Queen Lilipalalani Center for Student Services, room 409, 956-3298).
• For team-related concerns, student-athletes are generally encouraged to communicate and work with their coaches, sport administrators, and if warranted, the Athletics Department leadership

• In those instances where it may be difficult for the student-athletes to work with their coaches, the sport administrators or the Athletic Director may establish other methods to communicate and move forward
  – UH Football is a recent example, where meetings were held directly between the Athletics Director and players and an “action plan” was developed based on the feedback received
    o Athletics will be prepared to share more details of the action plan with the ICA
Facilities

David Matlin, Athletics Director
Athletics Facilities
Overview

- Athletics facilities serve multiple users
  - UHM Athletics
  - UH classes (e.g., kinesiology)
  - Intramurals
  - Community (e.g., state championships, graduations, robotics, charitable events such as Relay For Life)
- Improvements provide multiple benefits
  - Health, safety & wellness of users
  - Fan experience
  - Recruiting
  - Competitiveness
  - Revenue opportunities

- Roughly $40+M has been invested in improvements to athletics facilities over the past several years
- Department strives to be mindful of all sports as well as Title IX equity requirements
Recent testimony mentioned “better” locker room and weight room among concerns

**Alexander C. Waterhouse Training Facility**
- Constructed in 1994
- ~$2.2M in improvements currently in design stage
- Nutrition center targeted as part of improvements

**Rainbow Warrior Football Locker Room**
- Last remodeled 6-7 years ago
- Another remodel will be subject to funds becoming available and in consideration of other facilities needs, including Title IX considerations
Athletics Facilities
High Performance Center Opportunity

- Multi-purpose facility (e.g., academics, health & wellness, offices/meeting rooms, equipment, locker rooms)
- Allow consolidation of football into facility to free up space that can be reallocated to other sports in support of Title IX efforts
- Allow UH to be comparable to rest of Mountain West programs
- School of Architecture (Summer 2019)
  - Led by Professor Hyoung-June Park
  - Student teams developed three conceptual designs that can meet athletics’ needs and encourage integration of student population with athletics
Responsiveness of Athletics Department Administration

David Matlin, Athletics Director
• Recent public testimony raised that there were instances where concerns were raised by no action was ever taken by the Athletics Department administration

• In general, the Athletics administration does take every complaint seriously and takes action, where warranted.

• Athletics is reviewing all the testimony provided and all instances where a lack of action was raised to determine whether the department responded appropriately
  
  – Review is ongoing. At this time, we believe that many of the stated instances were responded to and documented appropriately

  – However, we enter the review with an open mind and no preset position on any of the instances brought up

  – Athletics will be prepared to provide a more detailed assessment before the ICA once the review is completed and with appropriate safeguards to protect student-athlete confidentiality
NCAA Transfer Portal

David Matlin, Athletics Director

**NCAA Transfer Portal**

<tr>
<td>One-time transfer</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

“Transfer portal” allows student-athletes from all three NCAA divisions to post notices of their intent to transfer and allows coaches to search for players to recruit.

April 28, 2021 - NCAA enacted the “one-time transfer rule” that allows athletes to transfer to a different school one time during their career and play immediately without getting permission from their coach or school.

July 1, 2021 - NCAA made it possible for athletes to profit off their “name, image and likeness” (NIL).

Athletes may seek transfers for a multitude of reasons such as: playing time, coaching conflicts, hopes of playing professionally, opportunity to profit from NIL, personal and family reasons, etc.
Impact from NCAA transfer portal rule change has been significant and felt by all levels of programs

"It's crazy. It's really sad, to be honest with you," Clemson University head football coach Dabo Swinney said, according to The Clemson Insider. “It's total chaos right now,” he added. "There's so much tampering going on and so many adults manipulating young people, and it's sad.”

"I don't think people really say it this way, but let's not make a mistake: We have free agency in college football," agreed University of Mississippi head football coach Lane Kiffin, reported in the Clarion Ledger.

Change has empowered athletes with flexibility to choose to transfer, but can carry risks

"We have to support an environment that provides more flexibility, permits legitimate transfer while holding to account those who tamper and want to turn college rosters into their personal recruiting grounds," Southeastern Conference Commissioner, Greg Stankey said.

Stankey noted in July 2021 that roughly 13,000 Division I student-athletes had entered the portal and that 11,000 remained without a new team

1 Data as of January 19, 2022

December 24, 2021 - First time online ad used by an athletic program to attract transfer portal athletes
UH Football Transfer Portal Drivers

• Rule changes in 2021 to Transfer Portal and Name Image Likeness
  o Ability to transfer without “sitting out” a year and new financial opportunities with NIL
• For some, opportunity to play at Power-5 schools to try to increase likelihood of NFL careers
• Increase in possible “tampering” with student-athletes in Hawai‘i and nationwide
• Hawai‘i had some of the longest and most stringent COVID requirements in the nation. Playing in front of no fans was unique to Hawai‘i as were COVID travel requirements, which significantly impacted UH Football’s efforts in:
  o Recruiting, coaching, performance training, team building
• Surprise closing of Aloha Stadium, the venue where players expected to compete before fans
  o “Emergency improvements” to Clarence TC Ching Athletics Complex are amazing but facility lacks the size and amenities of a real stadium that student-athletes expect
  o Continuing uncertainty around future and timeline for new stadium not under UH control
• Inability to play in expected Division I setting
  o Only FBS program that had zero fans for most of season and 1,000 only at Game 4
  o No concessions or other amenities all season
  o Parents and families not allowed to attend
• Transition to new head coach and staff under COVID conditions including limited in-person socialization

Nonetheless, goal moving forward is to eliminate transfers driven by the kinds of feelings expressed in the public hearing

Meet with each departing athlete to understand reasons for leaving
Also identify opportunities that could improve program and athlete experience at Hawaii
Financial Considerations

David Matlin, Athletics Director
Financial Context of UHM Athletics

- UH Mānoa athletics are primarily supported by revenue generated but also rely heavily on campus services and internal allocations.

- The annual deficit is a mismatch between revenues/allocations and expenditures for athletics, including internal expenses.
  - All financial obligations are paid.
  - The deficit and accumulated debt show up as internal to UH Mānoa, which now has healthy balances overall.

- The UHMAD has taken many steps to contain expense and generate revenue.

- At the same time, many costs have increased due to changes out of our control.
  - NCAA changes around COA.
  - Escalation of spending driven by Power-5 schools.

- The legislative appropriation of $3.6M, including $900K for student meals was deeply appreciated, but has been inconsistently available. We are hopeful the $3.6M will be restored this year.

- The UHM campus has committed to support additional scholarship costs.

- We would appreciate the opportunity for a deeper dive with numbers at a forthcoming meeting of the Intercollegiate Athletics Committee.

Our goal is to work with the UH Mānoa administration to eliminate the paper deficit and debt as part of the overall campus financial plan and to arrive at an internal allocation under which we can consistently balance revenue and expenses.
Portion of revenues that UH Athletics generates itself, compares very favorably to its peers and benchmarks:

<table>
<thead>
<tr>
<th>Athletics Generated Revenue as % of Total Revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td>Hawai‘i</td>
</tr>
<tr>
<td>Big West</td>
</tr>
<tr>
<td>Mountain West</td>
</tr>
<tr>
<td>Group of 5</td>
</tr>
</tbody>
</table>

UH Athletics has increased fundraising. As reported by UH Foundation as funds received for UH Athletics:

<table>
<thead>
<tr>
<th>Funds Raised</th>
<th>2019</th>
<th>2020</th>
<th>2021</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$3,084,177</td>
<td>$4,311,431</td>
<td>$7,713,525</td>
</tr>
</tbody>
</table>

UH Athletics has, for the first time, engaged partners for significant long term commitments for naming rights of facilities:

- **Boyd Gaming** - $450,000
- **Mike Kawazoe** $1,000,000
- **Bank of Hawai‘i** - $5,000,000
- **Waterhouse Foundation** $1,000,000+

Since football “seat premiums” are a significant source of contributions for all schools, UH Athletics’ future fundraising will be particularly challenged by the lack of a full-sized stadium with “stadium” level capacity and amenities.
MEMORANDUM

TO: Randy Moore  
   Chair, University of Hawai‘i Board of Regents  

FROM: Kendra T. Oishi  
       Executive Administrator and Secretary of the Board of Regents  

SUBJECT: Regent Survey of Possible Retreat and Board Education and Development Topics  

BACKGROUND  

During the December 2, 2021, meeting of the Committee on Personnel Affairs and Board Governance, a list of possible topics for a board retreat and for board education and development was circulated and discussed. There was general agreement among committee members that a retreat should take place as soon as practical. 

Pursuant to the committee discussion, the Office of the Board of Regents subsequently circulated the list of topics to all regents to rate each topic on the list as high, medium, or low priority. The results of the survey are included in the attachment, and a few highlights are noted below.  

SURVEY RESULTS  

The top "high" items receiving 6 or more votes, roughly in order of priority are:  

- Leadership succession planning and process, both administrative and board (committee topic)  
- UH mission and vision (retreat topic)  
- Budget primer (committee topic)  
- National “reimagining” trends; emerging from pandemic (retreat topic)  

The top “medium” items receiving 6 or more votes, roughly in order of priority are:  

- Demographic trends nationally and locally for students (retreat topic)  
- Hawaiian place of learning (retreat topic)  
- Monetizing real estate (committee topic)  
- UH comparison to peers in degree/certificate perseverance (committee topic)  
- State support for higher education: how does Hawai‘i stack up? (retreat topic)
• UH Foundation: how is its work coordinated with UH needs and how should UHF be funded? (*board education and development topic*)

Other notable ratings:

• 10 Regents rated the following either high or medium:
  o What does an indigenous-serving university look like? How does UH measure up? (*retreat topic*)
  o What is the board's role in assuring the quality of teaching and learning? (*committee topic*)

• 9 Regents rated the following either high or medium:
  o Tuition and affordability primer (*board education and development topic*)
  o What are equity gaps and how do we close them? (*committee topic*)

• 8 Regents rated the following either high or medium:
  o Online education within UH and by competitors (*retreat topic*)
  o What does student success look like? How do we know it is happening? (*retreat topic*)
  o Autonomy for UH – what does it mean? (*retreat topic*)
  o What does it mean for the regents to have fiduciary responsibility? (*board education and development topic*)
  o Overall structure of UH and the scope of the major areas. One unified system. How can the structure be streamlined? (*board education and development topic*)
  o Review of shared governance (*board education and development topic*)
  o Board self-evaluation, including the use of permitted interaction groups and the development of board agendas (*board education and development topic*)
  o What kind of professional development is provided to leadership/management/supervisors? (*committee topic*)
