Requiring all On Campus students to have been vaccinated

Your Position (required) *

Oppose

Your Testimony/Comments

Aloha,

I strongly oppose the idea of enabling a persona right to education in America by thier medical status. This creates an unfair cast system. It is not fair to say that it is still offered (virtually) as we all know the quality of education is simply not the same. Why does one's individual choice for thier body affect them being in school. The vaccinated should feel protected by thier choice and so someone not vaccinated is simply not an issue,

harm or of anyone else business as stated under HIPAA laws. Please consider this and what discrimination you will be apart of if this is carried out.

Sincerely,

Jacqueline

Strong opposition to mandating vaccines for attending classes at UH.

Your Position (required) *

Oppose

Your Testimony/Comments

I oppose mandated Covid jab for students attending in person learning at UH. It is not a vaccine and it is against the Nuremberg Code to force experimental therapies on people who are uninformed, seeking education, and are not at risk of dying from Covid-19. Stop the false narrative and start educating and protecting this generation. The children of Hawaii deserve better.

COVID VACCINE REQUIREMENT

Your Position (required) *

Oppose

Your Testimony/Comments

My son is supposed to be going back for his third year of college at KCC (A UH CAMPUS) this fall after a horrible year of sub-par virtual "learning". If you require him to be vaccinated for covid to return to campus - you will not be seeing him again. College age students have an almost ZERO risk of developing severe symptoms related to Covid. This vaccine is all risk and no reward for them. If your faculty and staff feel that these vaccines are protective, great! They can be vaccinated and take advantage of the benefits they feel the vaccine gives. If they simply will not teach or facilitate students who refuse to be vaccinated of covid, only one of two scenarios is taking place:

1. The faculty does not actually feel the vaccines are protective. Their unwillingness to be around unvaccinated individuals (who pose a "threat") clearly demonstrates this.
2. The push to mandate this vaccine is not about science or health and safety, but instead is about punishing individuals who refuse to align with your ideology.

Either scenario is unacceptable.

Thank you,
Jessica Penner
Kaua'i resident

Board of Regents: To whom it may concern

Covid-19 vaccine mandate to return to in-person learning.

Any compulsory Covid-19 vaccination requirement is a violation of federal law. I urge you to advise all your students that they have a right to refuse or take any Covid-19 vaccine. Any other action is a contradiction of a federal law. One's CHOICE should not affect their opportunity to learn on or off campus.

Covid-19 vaccines are still considered experimental, Covid-19 vaccines are not approved by the FDA. The Covid-19 vaccines are only approved under an Emergency Use Authorization (EUA), for investigational use only. They lack the requisite studies and have yet to be approved for medical treatment. The FDA's guidance on emergency use authorization of medical products requires the FDA to "ensure that recipients are informed to the extent of practical given the applicable circumstances... They have the option to accept or refuse EUA products..."

Title 21, Section 360bbb-3 of the Federal Food, Drug and Cosmetic Act (The FD&C Act) vests the Secretary of Health and Human Services with the permissive authority to grant Emergency Use Authorizations (EUA) providing that appropriate conditions designed to ensure that individuals whom the product is administered are informed:

- That the Secretary has authorized emergency use of the product
 - Of the significant known and potential benefits and risks of such use and of the extent to which such benefits and risks are unknown; and
 - Of the option to accept or refuse administration of the product, and
 - Of the consequences if any of refusing administration of the product and
 - Of the alternatives to the product that are available and their benefits and risks
1. The right to avoid the imposition of human experimentation is fundamental, rooted in the Nuremberg Code of 1974, has been ratified by the 1964 Declaration of Helsinki and further codified in the United States Code of Federal Regulations. In addition to the United States regarding itself as bound by these provisions, these principles were adopted by the FDA in its regulations requiring informed consent of human subjects for medical research. It is unlawful to conduct medical research even in the case of an emergency unless steps are taken to secure informed consent of all participants.
University of Hawaii Manoa is manipulating their students into informed consent by putting their availability to learn on the line.

The following EUA's have been issued for Covid-19 vaccinations:

12/18/20 Moderna-FDA issued EUA for emergency use of Moderna mRNA Covid-19 vaccine for recipients 16 years of age and older

12/18/20 Pfizer/BioNtech- FDA issued EUA for emergency use of Pfizer/BioNtech mRNA Covid-19 vaccine for recipients 18 years of age and older

2/27/20 Johnson & Johnson- FDA issued EUA for emergency use of Johnson & Johnson mRNA Covid-19 vaccine for recipients 18 years of age and older

Each of the EUAs were issued in conjunction with similar fact Sheet from the FDA. For example, the Johnson & Johnson fact contains the following notice:

“INFORMATION TO PROVIDE TO VACCINE RECIPIENTS/CARE GIVERS”

Clearly, any attempt to force anyone to take a Covid-19 vaccine is a violation of federal law and the conditions under which the covid-19 vaccine has been authorized for use. The law is clear, experimental medical treatment cannot be mandated.

I urge UH Manoa and all UH campuses to comply with FD&C Act and the terms of the EUA and its accompanying Fact Sheet and to advise all employees of their right to accept or refuse any Covid-19 vaccine. Any other course of action is contradicting to federal law.

Thank you for your time and for protecting the best interest of your students

Sincerely

Lori Patrick

Thank you for your time and for protecting the best interest of your students

I would also like to add that bodies are NOT homogeneous. I personally have a lot of allergies. I have multiple hormone disorders and autoimmune disorders. Every vaccine I have received has made me sick for months. My doctors have recommended me not to get the flu shot since I experienced such horrible side effects. I am really getting cheated out of my education if I cannot get the vaccine. It does not have enough research on how it effects bodies like mine let alone enough research at all to be mandatory. You're putting students like me at risk by implementing these mandates.

Sincerely

Erika Patrick

Opposition Testimony To Require Vaccines For UH Physical Classes

Enokashayne@protonmail.com <Enokashayne@protonmail.com>

Wed, May 19, 2021 at 12:54 PM

Reply-To: Enokashayne@protonmail.com

To: "bor.testimony" <bor.testimony@hawaii.edu>

University of Hawaii Board Of Regents:

Aloha BOR Members,

My name is Enoka and I am writing to you all, with heavy opposition of your proposal to require vaccines for physical learning at any UH campus. My ohana are registered to attend and some to board with UH Manoa campus. They are scared to take the shot, because of the side effects people are having, which include seizures, magnetized shot site, "Covid Arm" side effects, procreation complications, menstrual cycle irregularities, which is causing heavy anxiety of public humiliation in my niece, symptoms worse than Covid-19 (which they had tested positive for last year and felt nothing more than mild cold or flu symptoms) the risk of death in otherwise healthy young adults (CDC's VAERS portal reports multiple young, healthy people dying of blood clots, strokes or heart attacks), certain hazardous ingredients, such as SM-102 amino acid being highly carcinogenic, they have also seen the CDC charts, reporting Hawaii's 2017 flu deaths totaled 637, whereas 15-19 months of Covid-19 panic resulted in 491 deaths, as well as the the blatant coercion and incentivising within society, pressuring and coercing them to get this experimental, unapproved form of treatment.

We understand this was a real variant to previous coronavirus outbreaks, like SARS-COV1, but we, as a nation, have NEVER required such irresponsible measures, to be allowed back into society. We have never disallowed people from living freely and these coercive tactics are illegal. This type of so-called "vaccine " has never been done before and our family are not required to be experimental subjects, without FDA approval. My nieces and nephews are scared and their reaching out for help. Board members, this effects their mental health. They have anxiety attacks about following the rules of this proposed requirement. That is not responsible, by the standards of any of your kuleana to protect them from harm and keep our students safe!

If this email is just opinions to you so far, I will remind you of the Code of Federal Regulation; Title 21: section 50: Protection of Human Subjects; and, §50.20, and, §56.111, as well as, the Nuernberg (Nuremburg) Code of Ethics, which the second trials have already commenced for the gross medical negligence of this outbreak/pandemic; and, ZERO FDA Approval. You, Board Of Regents, are not allowed to require anyone to receive an experimental product.

In conclusion, I respectfully demand, that you arrest and halt all proposals of any requirements to impede, infringe or neglect the right to choose for any students of our University of Hawaii'i campuses. I have also attached an important Cease and Desist Letter, which also serves as a Notice of Liability. I would like to remind you, that I am not the only one who will hold you accountable, if these students display reactions, whether adverse, severely adverse, or the unspeakable. Please absorb the contents of this email and the attached notice and govern yourselves accordingly.

Mahalo nui,
Enoka-Shayne Bingo

Covid-19 Mobile Vaccination Clinic

Hawai'i Public/Private School Campuses

Subject: Cease and Desist Order and Notice of Liability for Misconduct & Negligence Regarding the So-Called COVID-19 Vaccination Program

Dear Health and Education Administrators:

On May 5, 2021 the public announcement news article of the Covid-19 "Vax Squad Bus" was announced, with the first school campus stop the very next day on May 6, 2021 and talk of approving the effort to so-called "vaccinate" ages 12-15 with this mobile clinic within the same article. On May 10, 2021, the Federal Drug Administration (FDA) formally announced and lowered the authorization use of the COVID Pfizer so-called "vaccine" to a new age group, adolescents between the ages 12-15. The pertinent advertisements are stated below:

Coronavirus vaccine soon available for those under 16 as Hawaii DOE offers shots at schools

by: [Jenn Boneza](#)

Posted: May 5, 2021 / 05:58 PM HST / **Updated:** May 5, 2021 / 05:58 PM HST HONOLULU (KHON2)

-The Food and Drug Administration (FDA) is expected to green-light the COVID-19 vaccine for kids 12 to 15 years old as early as the week of Monday, May 10. That as Hawaii Department of Education (DOE) kicks off efforts to vaccinate more students on school campuses on Thursday, May 6.

And the following excerpt:

- DOE spokesperson says they are discussing ways to include those 12 to 15 in their school vaccination efforts once it is approved. They are partnering with Hawaii Pacific Health to vaccinate students 16 and older, along with their families, starting Thursday at Waipahu High School.

The public was given only one day notice of this up and coming so-called "vaccination" initial effort. As a result, the public was given no time to respond with any rebuttal against this decision in bringing this so-called "vaccination" efforts onto public school properties as well as the intention to inoculate thousands of students, adolescents, children, minors, youths, juveniles, under aged, sons and daughters and any adult, man or woman who wish to receive the so-called Pfizer COVID-19 "vaccine"; and,

This is an immediate Cease and Desist Order & Notice of Liability to stop the facilitating of medical treatments and devices on any man, woman, son or daughter who enter the mobile clinic bus on school campus, in particular Oahu High School campuses, as part of the Hawaii Department of Health and Department of Educations effort to inoculate the public with the so-called Pfizer COVID-19 “vaccine”; and,

Please note, all terms in articles, publications, fact sheets, describing sons and daughters as minors, juvenile, adolescents, under aged, students, children, youth, ages 17 and under, shall henceforth be referred to as “sons and daughters” or “recipients”. And “recipients” will also incorporate the meaning of adult men and women; and,

Breaches in violation of policy, oaths, laws, ethics, the US Constitution, and legality of these unlawful and illegal issues are serious and warrants immediate rectification to the matters stated herein:

1. Whereas converting a public school into a medical facility to administer medical treatments;
 - a. You did not engage the public about the decision to turn a school campus into a medical treatment facility. The public was not informed of this decision in a timely manner; and,
 - b. You have failed to follow due process as it is your legal obligation to engage the public in their input regarding any decision to convert a public-school tax paying property for the usage other than educational purposes, especially when it involves risky business such as administering medicine without a license; and,
 - c. Your actions put the taxpayers and the school districts at jeopardy for legal actions taken against it for failure to disclose all information and associated risks relating to the so-called COVID-19 “vaccines” if there are any resultant bodily injury from administering these medical treatments on the Hawaii State school campuses; and,

2. Whereas the men and women allowing and abetting this process of converting the schools and allowing the administering of the medical treatments on a school campus;
 - a. Are in breach of your oaths of office to education, not medication; and,
 - b. Is in violation and breach of your oath of office to uphold the U.S. Constitution; and,
 - c. Are in breach of several codes of conduct; and,
 - d. Have dishonored your oaths of office; and,
 - e. Are misusing and abusing the privileges and purposes of the school grounds; and,
 - f. Are abusing your position to propagandize the so-called COVID-19 “vaccine” treatment; and,
 - g. Are presenting false and incomplete information not allowing full informed consent and medical decision to be made by the recipients of these so-called “vaccines”; and,

- h. Are creating and campaigning a biased form of medical coercion through creating vaccine incentive programs that gives an imbalanced and incomplete information regarding inherent risks associated with these so-called COVID-19 “vaccines”; and,
 - i. Offer fully informed and voluntary choice without any biased and coercive tactics, efforts, rewards, peer pressure, pressure, propaganda advertisements, without limits; and,
 - j. Campaigning even though you have administrators participating with no medical license or have any experience in treating patients with vaccines, or inoculations of any kind, is acting outside your professional capacity and oaths of office; and,
 - k. Are not recognized to be in service to the school as a medically trained and licensed professional and therefore are abusing your powers and committing crimes of misconduct in your complicit acts regarding the so-called COVID-19 “vaccine” programs on a school campus; and,
 - i. Trespassing the recipient’s patient physician relationship; and,
 - ii. Interfering the recipient’s patient physician relationship; and,
 - iii. Modifying the recipient’s health care without physician involvement; and,
 - iv. Committing negligence and liability without assurance of insurance from either parties, both the recipients of the so-called COVID-19 “vaccines”, as well as the insurance of the recipients’ medical provider and attending physician without their knowledge and agreement to cover and attend to any illness, injury and death as a result of any damage sustained from these so-called COVID-19 “vaccines”; and,
 - v. Based on the lack of assurance in insurance coverage and by stepping outside the realm of the oaths of office, made to the school district, or sworn to, as the healthcare professionals, you will within your personal capacity, be made fully and completely responsible and liable for any and all damages, bodily injury, and deaths of any son or daughter that receives the medical treatment and product the so-called COVID-19 “vaccine” conducted on any Hawaii School campus; and,
3. Whereas the problems in the policies, regulations, bonds, insurance, and liability exemption behind the development and deployment of the so-called COVID-19 “vaccine” itself;
- a. The Pfizer COVID-19 “vaccine” is not an approved drug but only a temporarily authorized for use up to a year under the “Emergency Use Authorization” (EUA) policy; and,
 - b. The so-called COVID-19 “vaccine” is not approved because it is still undergoing clinical trials. These trials do not consist of any successful animal studies. The only studies performed to date have been on human subjects as experimental subjects; and,
 - c. The human trials have also begun studies on children as young as a few months of age, to toddler, and pre-adolescent age groups, and yet, despite the adverse, severe adverse, or yet unknown risk factors involving children, under-aged minors, the sons and daughters between the ages 0-17 are being coerced and encouraged to get their so-called COVID-19 “vaccine”. This action is clearly a crime against humanity as the

most vulnerable of the population is being targeted with an unknown risk factor drug, where the current death rate since its introduction four months ago has already reached the highest known death counts in total of all the vaccines deaths combined since 1997; and,

- d. Other facts that need to be disclosed to the recipients, the sons and daughters receiving the so-called COVID-19 “vaccine” is the condition that they have no insurance coverage as the government issuing these so-called “vaccines” are exempt and immune from lawsuits and hold no liability to any injury, bodily damage, and death as a result of exposures to these so-called “vaccines”; and,
 - e. Any decision to administer medical treatments on school grounds demand proof of coverage by insurance for both the school as well as the administration, and the recipient of the so-called COVID-19 “vaccines”; and,
4. Whereas violating the codes of ethics regarding medical treatments and human experimentation due to the lack of ethical procedures surrounding the development and trial testing of the so-called COVID “vaccine”;
- a. The seriousness of medically treating the sons and daughters under the age of consent must follow strict guidelines and protocols for administering any new medicines, devices, products, procedures, programs and protocols, without limits; and,
 - b. Show proof of application for submitting the so-called COVID-19 “vaccine” program for review and approval as part of the human experimentation requirement for underaged minors ages 17 and under, as required by Federal laws such as the Institutional Review Board (IRB), and,
 - c. Show proof of a third party that will oversee the protocol in the administration of these experimental drugs performed on underaged minors the sons and daughters with the novel so-called COVID-19 “vaccine” especially since this novel new drug has never been tested on animals, nor gone through a complete trial on underaged minors; and,
 - d. Because the seriousness of treating the sons and daughters with an experimental drug the so-called COVID-19 “vaccine” requires even stricter guidelines as they are underaged minors, show proof of how they as living subjects to the experiment will be fully informed to the protocols to all the inherent risks, limitations, information that are involved in participating in this so-called “vaccination” program; and,
 - e. Show proof on how the parents of these sons and daughters receiving the novel drug treatment the so-called COVID 19 “vaccines” will also be fully informed of all the inherent risks, including SAE, AE, allergic reactions and death reports, limitations, allergy and pregnancy exclusions, information that are involved in participating in this so-called “vaccination” program; and,
5. Whereas the targeted recipients of the so called COVID-19 “vaccine”, the sons and daughters and their lack of vulnerability to the so-called COVID-19 virus;

- a. Figure 1, in the chart below, shows statistically that the death percentages related to COVID-19 against the general total deaths for the sons and daughters within the “0-17 years” is less than 1% of all deaths in that age category; and,
- b. Figure 2, in the chart below, shows statistically that the death percentages related to COVID-19 against the total population of the living within the “0-17 years” is 0.0001%.
- c. Furthermore, when Figure 2 shows the comparison of total deaths related to general causes as 0.013% within the total population, the COVID related deaths at 0.0001% is still significantly less when compared to the total general causes of death in that age category; and,
- d. It is clear from the Center for Disease Control and Prevention’s (CDC) own reporting found on its official website that the age groups targeted for this experimental and novel so-called COVID-19 “vaccination” program is not at risk for death from COVID-19; and,
- e. There is no one size fits all regarding medical care, including administering any vaccines and so-called “vaccines”. Allergic reactions are only a small minute issue amongst a long list of potential problems of unforeseen complications that lead to damage, injury, chronic illnesses, and death; and,
- f. It is scientific proof understanding that all vaccines harm; and,
- g. It is also proof that the sons and daughters within the group 0-17 years of age act as an immune buffer for the rest of the community of age groups, the adult men and women; and,
- h. Asymptomatic men, women, sons and daughters do not spread illness, only the ill who exhibit symptoms spread disease, and this pertains to all age groups, including the 0-17 age category; and,
- i. It is imperative the 0-17 age category son’s and daughter’s immune systems are not to be tampered with by drugs and so-called “vaccines” that they do not need, and especially by drugs that have not been approved, but only authorized under Emergency Use Authorization (EUA) only by the U.S. Food and Drug Administration (FDA); and,
- j. It is also scientifically proven that exposures to the COVID-19 virus solicits long term immunity that remains robust. The scientific research study published by the U.S. National Institutes of Health (NIH) entitled “**Lasting Immunity Found After Recovery from COVID-19**” dated January 26, 2021, states that “*After people recover from infection from a virus, the immune system retains memory of it.....this long term immune protection involves several components.....Several months ago, our studies showed that natural infection induced a strong response, and this study now shows that the responses last*”; and,
- k. Fast-tracking the deployment of the so-called COVID-19 “vaccines” upon the age group between 0-17 is unnecessary, wasteful, negligent, dangerous, and outright reckless, because of the low risk of the sons and daughters to dying from COVID-19; and,
- l. There have been no animal studies performed with the so-called COVID-19 “vaccine”, and any past studies performed on animals have shown that any COVID vaccine has proven unsuccessful as all the animals have died once they were exposed to the live virus in the wild. Exposing minors who have .0001% risk to dying from COVID-19, and

yet, have robust immune systems, exposing them to the so-called COVID-19 “vaccine” is complete medical malpractice, negligence, endangerment of the most vulnerable of our population and is considered the greatest crime against humanity for cruelty, assault, unnecessary medical treatment, as well as underaged minors for human experimental medical treatment without license, oversight, approval and authorization, without limits; and,

- m. Fast-tracking before all human trial studies have been complete, including the trial studies on underaged minors, is with full knowledge gross medical negligence, and a crime against humanity for creating unnecessary risks that could have been easily mitigated and avoided; and,
- n. Enabling risky behavior and conducting medical treatments that are not grounded on known facts is accruing liability to the life and longevity of all the sons and daughters and recipients who receive the so-called COVID-19 “vaccine” under your care; and,

Figure 1:

<p align="center">CDC Data on COVID Deaths in the US*</p> <p align="center">Data last updated on May 12, 2021</p> <p align="center">Data created on May 1, 2020</p>

**Population data taken from the website: <https://www.worldometers.info/world-population/us-population/>

6. Whereas there are problems with the trial studies and the side effects, injury and harm both acute and latent from exposures to the inoculated by the so-called COVID-19 “vaccine” and to those exposed to the inoculated; and,
 - a. There is no clinical rationale for vaccinating any man, woman, son or daughter who have recovered from exposures to the COVID-19 virus; and,
 - b. There is danger to exposing those who have already developed natural immunity against the COVID-19 virus, as it can cause side effects by creating an enhanced immune response resulting as one of the side effects of cytokine storm events, blood clots, arterial and venous thrombosis, endothelial damage, damage to multiple organs, cause systemic-wide organ failure, without limits; and,
 - c. Those who have been so-called “vaccinated” have shown to develop dangerous systemic wide blood clotting, thrombosis, multiple organ failure, cytokine storm event, which can and has led to a high number of deaths, including infants and adolescents; and,
 - d. The numbers of deaths as a result of the so-called COVID-19 “vaccines” have outperformed the entire numbers of deaths due to vaccines in total since 1997 as found on the “Vaccine Adverse Event Reporting System” (VAERS); and,
 - e. Those unvaccinated who are exposed to the inoculated can receive transmissions of the so-called COVID-19 “vaccine” through skin contact and inhalation as stated on page 59 in the trial report of the Pfizer early phase study; and,

- f. The transmissions to the unvaccinated can cause unknown and unexpected side effects ranging from miscarriages, blood clots, endothelial damage, damage of organs, migraines, headaches, bruising, without limits, as more data is currently collected since these are all still going through the trial phases, and will not be completed until another year or more for most of the novel so-called COVID-19 “vaccines” and drugs; and,
7. Whereas there are real solutions that do not require vaccines, or so-called “vaccines” but medicines that encourage your own immune system to develop natural resistance to viral and microbial activities built through developing true and natural immunity and better health; and,
 - a. There are clear alternate drugs and medicines that do not require vaccination; and,
 - b. Medicine is about choice. Every man, woman, son and daughter are different, there is no one size fits all program. There has to be offered alternative options that offer not only healing but opportunities that allow overall improvement of health and strengthening of the immune system; and,
 - c. Outside of vaccines, there are proven drugs and therapies that work to fight against COVID and in particular the COVID-19 virus; and,
 - d. Many physicians have come forth to share their treatment methods from all over the world that reveal proof of clinical experience and studies that other pathways to eliminating and healing from the COVID-19 virus can be successfully treated without the use of vaccines; and,
 - e. Texas has announced their Covid-19 mortality numbers have dramatically declined since they have opened their state two months ago and on Sunday, May 16, 2021, Governor Gregory Abbott announced zero reports of deaths caused by Covid-19.

It is always healthier for children to fight something real and natural that their bodies battle against with an almost guaranteed win practically 100% of the time. Battling against real viruses develop long-term immunity and is always better than it is for them to fight something man-created called “fear” and “control”. The latter is the most damaging to their entire being beyond anything a virus can ever be done to their physical body, especially considering that the statistics show they are virtually at no risk from dying from the COVID-19 virus; and,

Why is this statistic not being told to the youth? Because the tactic is to drive fear into them and coerce them to take something that they do not need. One of the side effects of fear is suicide. There have been alarming increases in suicides amongst the youth as a result of the propagandized fear, more than any deaths from their exposures to the COVID-19 virus, while the death count for previous coronaviruses, such the seasonal flu in Hawaii, has decreased from previous years, resulting in 637 flu deaths in 2017, while there are approximately 491 deaths total in Hawaii, throughout the entire lockdown period; and

The advertised solution as the only solution is also not the answer as this tactic to “vaccinate” and override their immune response, with an untested novel experimental process, can and will irreversibly

destroy and damage a child's natural immunity for life, by exposing them to experimental drugs that have 1.) received no animal studies, and 2.) no completed trial studies for children under 18 years of age, and 3.) contain several ingredients that have never been used on humans before; and,

In summation for the school campus staff along with "Vax Squad Bus" administrators, you are in breach of unlawful conversion of a tax-paying public-school facility licensed for the administering of education, not medication, and turning public school grounds into a medical treatment facility where drugs are being disseminated and inoculations performed. School board trustee limits your contract with the public to education services only. Your involvement in campaign advertisements and encouragement for medical treatment, allowance for any medical treatments to be held on any school grounds is legal grounds for gross medical negligence, without limits; and,

You are in breach of not only turning public school grounds into medical treatment centers, but in breach of campaigning to adolescents, minors, youth, underaged children, sons and daughters, ages 17 and under, to receiving medical treatments. You are manipulating the medical decision of a minor, an underaged son or daughter. In addition to presenting false and misleading information about medical treatments, you are providing incentives and rewards, and coercive tactics to manipulate the minds of the minor to receiving these so-called "vaccines" without giving full disclosure of all the potential risks of harm including death; and,

Your actions in this campaign to vaccinate, hosting the medical treatment on a publicly funded school campus, do not meet the standard of care required for the sons and daughters whom the public have entrusted in your care to educate, not medicate. Your trespass into the realm of medicine, medical treatment, medical device administration, faculties, and facility is unlawful, illegal and downright dangerous. You will be liable for negligence for all these accounts; and,

You are unlawfully and illegally playing "doctor" by allowing students and participants, without any license to medically treat students, not to mention that the products and device itself are wrought with numerous liabilities that the receiver of the so-called vaccine will be held responsible for, in addition to bringing great harm to the schools if it is sued, due to the lack of full informed transparency and destroying the quality of life to anyone who develop injuries, damages, and death as a result of the so-called "vaccines"; and,

Vaccinating someone is a serious offense and a crime as you are not vetting nor aware of the entire medical history of the man, woman, son or daughter as you are piercing and penetrating the flesh with an instrument and administering poisonous materials; and,

You will be held personally accountable, responsible, liable for negligence, trespass, falsehood, complicit in coercive and propaganda tactics, treason against the statehood of this country’s Constitutional protection to defend the people of the United States against enemies both foreign and domestic, breach and violation of your oaths of office, oaths to uphold the Constitution, no insurance coverage for any damages that can and do occur, zero information available and explained to the recipients and breaching student physician care to “do no harm”, illegally and unlawfully interceding in the medical care of the student on behalf of their insured medical care, exposing a tax funded public school campus to legal liability for conversion into a medical treatment facility making it vulnerable to plausible lawsuits filed by any damaged and injured recipients of the COVID-19 inoculations; and,

It is imperative this program to facilitate the inoculations of the so-called COVID-19 “vaccine” be halted immediately and all decisions to expose any adolescents 17 and under, be arrested immediately.

In Truth and Honor,

No Covid vaccine requirement

May 19, 2021

My name is Leslie Gerhardt. I am writing to oppose your requirement of this so-called "vaccine" you are proposing to mandate on the students of University of Hawaii campuses, in order to return to physical learning. Side effects, such as seizures, magnetic reactions on shot sites, "Covid Arm" phenomenon, pregnancy complications, menstrual cycle severity and irregularities, symptoms worse than Covid-19 contraction, DCD's VAERS portal showing multiple young, healthy people dying of blood clots, strokes or heart attacks, certain hazardous ingredients, such as, but not limited to SM-102 amino acid being highly carcinogenic to humans, CDC chargs for Hawaii's flu deaths reporting 637 deaths in 2017, but death count of the entire Covid-19 pandemic, resulted in 491 deaths, yet non of the official news, or Hawaii health officials are shedding light on the full spectrum of this available data. There is blatant coercion and incentivizing with society, pressuring and coercing, to get this experimental, unapproved treatment into every arm.

We understand this was a real variant to previous coronavirus outbreaks, like SARS-COV1, but we as a nation have NEVER required such irresponsible measures to be allowed back into society. In fact, we have never disallowed people from living freely and inhibited their education, to require experimental medical procedures and these uninformed, coercive tactics are illegal. This type of so-called "vaccine" has never been done before and our family and friends are not required to be experimental subjects, without an FDA approval. Emergency Use Authorization does not override that law. This effects the student's mental health. Required participation, is highly irresponsible and may result in anxiety and heightened unnecessary stress in students and staff.

I respectfully demand, that all of you reject any proposals of any requirements to impede, infringe, or neglect the right to choose, for students of our University of Hawaii campuses. If these students display reactions, whether adverse, severely adverse, or worse, UH Board of Regents will be held liable, for their gross negligence and failure to fully inform all recipients of all the risks associated, as well as not allowing them the freedom to choose.

Best Regards.

Aloha,

I am writing as a concerned citizen for our young adults. It is absolutely horrendous that your establishment would mandate vaccines for young people with their extremely high survival rate to covid19. I oppose the vaccine being mandated for students!

Your Testimony/Comments

Aloha,

As a parent of a former UH student and two current UH students (WCC and Shidler school of business) I strongly oppose the Covid 19 vaccine being mandated as a condition for in person attendance. while our daughters are ecstatic about a return to in person instruction, they do not want to take an experimental treatment as a condition to do so.

covid 19 has a similar survival rate to the flu (99.85 vs. 99.9 according to CDC statistics) and moreover does not affect the young. Young people have a 99.997 survival rate. Those who are older and have returned to

further their studies and those who are faculty and/or staff at any of the UH system schools already have the option to take care of their own health by eating healthy and exercising, or other measures they choose such as making use of free vaccines options and/or wearing masks when they feel it is necessary. Furthermore, the COVID-19 vaccine does not protect against catching or transmitting the virus which would negate the supposed reasons for mandating it.

Please do not burden the young with a new, experimental treatment we have no long term research for when other, less burdensome measures can be taken by those who choose to do so to protect their own health. Let's keep health our own kuleana—taking responsibility for and cherishing that which is given to us.

Please KEEP the University of Hawai'i an equal opportunity school by not forcing students to take a new medical measure or go through cumbersome, laborious procedures to obtain exemptions for in-person instruction.

Mahalo,
Keren Stonebraker, Waimanalo

Mandates - testimony

Halina Ngo <polishgirl_hawaii@icloud.com>
To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 4:28 PM

Dear Board of Regents,

Right upfront, thank you for hearing my heart! Please see the truth of it all.

There are 19 States that have lifted their Covid Restrictions. Hawaii should be among, having mortality rate similar previous years' annual flu! And these Covid mRNA injections are issued under Emergency Use Authorization- not FDA approved at least till 2023. Fact-checked. They are still in experimental stage on mass scale.

Mandating covid "vaccines" for students for in class attendance is illegal; discriminatory/ unconstitutional, a call for lawsuits.

Also, should the students be injured by these experimental injections for the sake of attending in class, you will certainly face a huge class lawsuit.

You may have been offered \$ promises for pushing this agenda like many private businesses do now, but this will not end well for anyone, before man and God. You will be held accountable for every injury.

Our Ohana understands this BigPharma - a medical apartheid power grab over us and our children.

You are given a high position of authority to protect our individual freedoms, civil liberties and privacy, and to prohibit discrimination based on health status. No health emergency in the past much more severe than Covid with 99.99-99.95% survival rate was ever an excuse for locking us up, invasive tests via nostril like cattle, and now mandating form of coercion to take Covid gene therapy in order to be in class in person. It seems like a nightmare dream, where people lost common sense and sleepwalking into abyss.

Please, vote not against reason and conscience.

Covid Vaccine is an Experimental Vaccine. The U.S. Centers for Disease Control and Prevention (CDC) in August, stated that "COVID-19 vaccines are NOT allowed to be mandated."

UH choosing to mandate these for in class attendance would engage in DISCRIMINATION against those who already had Covid, or have allergies, or simply decline to be injected with experimental treatment, deceitfully marketed as Covid "vaccines."

Hawaii county pilot program for preferential treatment for transpacific travelers fits the same category of coercion/ discrimination as Lt Governor Green's Vaccine Passport. This is absolutely shredding of our Constitution and freedom as we know it.

I am not against vaccines if they work but these do not stop transmission from vaccinated individuals, in fact well renowned medical authorities warn that individuals with Covid mRNA vaccines generate these new variants. Only 1% of death is reported to VAERS and nearly 4,000 died. What would be the figure if 100% be reported? Reported injuries are in the hundreds of thousands and this only in few months of mass injections. What will it do in the long term to us all / see top scientist warning and letters to CDC & WHO (Dr. Yeadon, Dr. G. V. Bossche, or Great Barrington Declaration).

Please, research and do what's legal and right for the students of Hawaii. Don't listen to the fear mongering media, puppets of the Oligarchs.

Can't simply fool any longer any rational being - it's fully visible how this "emergency" is being stretched, dangling the carrot of freedom from restriction if one takes experimental Covid jab, as even year supply of donuts is offered for it. It's clear it has nothing to do with our health or safety but control to alter, DEPOPULATE and the rest of humanity that survives be pushed into digital slavery, cashless central control system, and down the line no private property- SEE WORLD ECONOMIC FORUM- it's all in the UN agenda, too, for 2020-2030, including much worse pandemic in 2025-28 already announced by John Hopkins University (Bill Gates \$) called SPARS. Surprisingly, it's even in the google search, as it was the "prediction" for this current SARS Covid 19.

In closing, will you participate in actions that are crimes against humanity? According to the Nuremberg Code of 1947, it is ILLEGAL to coerce or mandate ANY experimental drug! Creating classes of people based on their health status is an attack on our Equal Rights 14th Amendment!

And here is my personal advice for your personal use. And let UH become a leader among other universities by winning example of standing for righteousness and not for wicked Agenda against humanity. Let UH shine the path to protect our God given bodily integrity and civil liberties:

Have your students be familiar with health protocols to treat people while recovering with well known therapeutic such as Vit D3, C, Zink and as IVERMECTIN (true cure used by thousands of doctors for a recovery within 24 -48 hours) / no one has to be dominated by fear of this covid flu and let media be informed to say so. I speak from experience being elderly and having no problem recovering following this protocol.

Why this had not been given at CDC level? Countless lives would have been spared and this epidemic be long over! So many good doctors use this protocol and didn't lose one life to this Covid flu! Will you choose to help Big Pharma/ BIG tech censoring our free speech in holding us hostage? They were prolonging this grip on us until rolling out their harmful product to the whole world is completed and all who survive enter into neo-feudalism shackles, called Great Reset. Please, research and how all is fitting this wicked agenda, and you were not exempt from it no matter the position.

Perhaps, you are for such a time as this highly responsible position to do the right thing. I pray God's delayed judgement but if not, His purpose will be done even through wicked actions, in no way holding the guilty excused. We all have conscience, as the witness.

Mahalo for hearing me out!

The life of the land perpetuates in righteousness!

Hopeful

Vaccine Requirement for On-Campus Students

Larni Atkins <larni.atkins@gmail.com>
To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 9:28 PM

Attn: UH Board of Regents

As an alumna of the University of Hawai'i and parent of a child currently attending online classes at the University of Hawai'i, I strongly oppose the vaccine requirement that seems to be forthcoming in order for students to return to campus and attend classes face-to-face for Fall 2021. This is discrimination against those students who choose not to be vaccinated with these experimental drugs from Moderna, Pfizer, and Johnson & Johnson.

According to the fact sheet "FDA Sheet for Recipients and Caregivers" (<https://www.modernatx.com/covid19vaccine-eua/eua-fact-sheet-recipients.pdf>), it says, "WHAT IS THE MODERNA COVID-19 VACCINE? The Moderna COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19. The FDA has authorized the emergency use of the Moderna COVID-19 Vaccine to prevent COVID-19 in individuals 18 years of age and older under an Emergency Use Authorization (EUA)." The website <https://www.modernatx.com/covid19vaccine-eua/> says, "The Moderna COVID-19 Vaccine has not been approved or licensed by the US Food and Drug Administration (FDA), but has been authorized for emergency use by FDA, under an Emergency Use Authorization (EUA), to prevent Coronavirus Disease 2019 (COVID-19) for use in individuals 18 years of age and older. There is no FDA-approved vaccine to prevent COVID-19."

According to the website <https://www.cvdvaccine.com/> it says, "Global Information About Pfizer-BioNTech COVID-19 Vaccine (also known as BNT162b2) The approval status of the Pfizer-BioNTech COVID-19 Vaccine varies worldwide. In countries where the vaccine has not been approved by the relevant regulatory authority, it is an investigational drug, and its safety and efficacy have not been established." The "Fact Sheet for Recipients and Caregivers" (<https://www.fda.gov/media/144414/download>) says, "WHAT IS THE PFIZER-BIONTECH COVID-19 VACCINE? The Pfizer-BioNTech COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19. 2 Revised: 10 May 2021 The FDA has authorized the emergency use of the Pfizer-BioNTech COVID-19 Vaccine to prevent COVID-19 in individuals 12 years of age and older under an Emergency Use Authorization (EUA)."

According to the fact sheet for Johnson & Johnson (<https://www.janssenlabels.com/emergency-use-authorization/Janssen+COVID-19+Vaccine-HCP-fact-sheet.pdf>) it

says, "The U.S. Food and Drug Administration (FDA) has issued an Emergency Use Authorization (EUA) to permit the emergency use of the unapproved product, Janssen COVID-19 Vaccine, for active immunization to prevent COVID-19 in individuals 18 years of age and older." "For information on clinical trials that are testing the use of the Janssen COVID-19 Vaccine for active immunization against COVID-19, please see www.clinicaltrials.gov." Why is this drug being disguised as a "vaccine" when they are still undergoing "clinical trials?" The fact sheet also states, "The Janssen COVID-19 Vaccine may not protect all vaccinated individuals." Why is this drug considered a "vaccine" when there's no guarantee of IMMUNITY which is what a true vaccine is supposed to provide.

The FDA regulates vaccines as "drugs" under the Federal Food, Drug and Cosmetics Act ("FDCA") - as stated in an article from Harvard titled "Vaccines and The National Vaccine Injury Compensation Program" which can be accessed here https://dash.harvard.edu/bitstream/handle/1/9453695/Davenport%2C_Katherine_NVICP.pdf?sequence=2&isAllowed=y.

To require these drugs, which seem to have no guarantee of immunization against covid-19, as a prerequisite for students to return to campus from these pharmaceutical companies when they are clearly still in experimental and clinical stages, is irresponsible and reckless. Without the long term study of possible long term risks as a result from these drugs, students are being coerced and maybe even bribed into getting these so-called vaccinations so that they are allowed to receive face-to-face education. It seems this unprecedented push for covid-19 vaccinations is so strong that public schools and state owned locations have become vaccination sites. Shouldn't vaccinations be between the doctor and patient? There have already been many documentation of vaccine injuries in VAERS as a result of being given these shots of drugs from the pharmaceutical companies: Moderna, Pfizer, Johnson & Johnson.

I strongly oppose this requirement for students who will attend any University of Hawai'i campus. I respectfully request that this board reject the vaccine requirement and err on the side of choice and offer ALL students full access to ALL UH campuses. I fully understand there are "Health Clearance Requirements," but I am also aware that students can claim religious and medical exemptions. If that's the case, then why will there be explicit discrimination against unvaccinated students who will only be able to access classes online? University of Hawai'i has an anti-discrimination policy according to the Board of Regents Policy RP 1.205 "It is the policy of the university to provide equity of opportunity in higher education, both in the educational mission and as an employer. The university is committed to comply with all State and Federal statutes, rules, and regulations which prohibit discrimination. The university is committed to a policy of nondiscrimination on the basis of race, sex, gender identity and expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, national guard absence, or status as a covered veteran. This policy covers admission and access to and participation, treatment, and employment in the university's programs and activities.

Discriminatory harassment, including sexual harassment, is prohibited under this policy. The university shall promote a full realization of equal opportunity through a positive, continuing program of nondiscrimination and affirmative action (41 CFR Chapter 60) on each campus.”

There should never be discrimination at any level.

Sincerely,

Larni Atkins

To: "bor.testimony@hawaii.edu" <bor.testimony@hawaii.edu>

Aloha! My name is Kristen and I am a resident of Kailua. I am writing to express my sincere outrage in your decision to mandate experimental Covid "vaccines" for students. As you probably know the Covid "vaccine" has already in a few short months caused more adverse side effects than any other vaccine in 20 years! 20!! (As reported to VAERS which is approximately only 1% reported.)

Your absolute negligence in this matter is absolutely disgraceful. I would never think to send my children to a school that can't balance risk over reward properly.

I strongly suggest that you reverse this decision to MANDATE this experimental vaccine with no long term studies. It is disgraceful. If not, I hope you will be held liable in a court of law.

Concerned citizen

Covid Vaccination

Geneve <gemp2122@gmail.com>

Wed, May 19, 2021 at 10:30 PM

To: bor.testimony@hawaii.edu, david@hawaii.edu

Aloha,

Please do not make the vaccine mandatory for in-person classes. Taking the vaccine is a personal choice — everything we do with our bodies is a personal choice! The shot is still in its experimental phase and clinical trials end in 2023. Do not make our children guinea pigs for the pharmaceutical companies who have zero liability! If you look it up, it's not even a true vaccine but is gene therapy. If you mandate the vaccine, and if pharmaceutical companies can't be held liable, then the University should be held liable for any injuries or death associated with the 'vaccine'. Are you ready to take on that liability?

Thank you!
Geneve Chong

OPPOSE MANDATORY VACCINES

Lei Kamahele <lkamahele@gmail.com>
To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 5:23 PM

Our family stands in opposition of Covid-19 vaccine requirements for students even after FDA approval. It is medical discrimination and the statistics of people affected from Covid alone (with no other underlying health issues) is minuscule and should not require forced vaccination status to attend schools.

Kamahele Dias 'Ohana

No Mandatory Medical Treatments for on campus students!

Dina Kaniho <dkaniho73@gmail.com>
To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 5:07 PM

University of Hawaii Board of Regents:

Aloha Board of Regent Members,

My name is Dina Kaniho and I am writing to you in opposition of your proposal to require "vaccines" for physical learning at any UH campus. I am Alumnae of The School of Nursing and have been practicing for 28 years. My child is currently enrolled in the UH System.

I would like to point out that all "vaccines" which are currently being distributed are all experimental therapies, which do not have long term studies, nor do they have FDA approval. The documented side effects, deaths, and the unknown long term effects of these experimental therapies far outweigh the unproven benefits for the demographic of young adults that make up the majority of enrollment in the UH system. Furthermore, emergency protocols cannot be deemed mandatory nor should a medical treatment be mandatory for any human. Every person has the right to choose the medical treatments which they feel are right for them.

We do not agree with the coercive tactic to get students to take this experimental drug, when it has been reported that employees of UH are not being required to take it to keep employment. Board members, I implore you to think long and hard about whether it makes sense to you, to require all on campus students to get "vaccinated" while your employees are not (nor should they be).

Do you truly feel that it is your right to make this therapy a requirement for on campus enrollment and thereby deny those who choose to honor their healthy bodies, a right to higher education? Please allow our college students the respect to make the decision that is right for them.

Mahalo,

Dina Kaniho

To: Bor.testimony@hawaii.edu

Wed, May 19, 2021 at 9:49 PM

My name is Kristina and I am writing to oppose your requirement of this so-called "vaccine" you are proposing to mandate on the students of University of Hawai'i campuses, in order to return to physical learning. Side effects, such as seizures, magnetic reactions on shot sites, "Covid Arm" phenomenon, pregnancy complications, menstrual cycle severity and irregularities, symptoms worse than Covid-19 contraction, CDC's VAERS portal showing multiple young, healthy people dying of blood clots, strokes or heart attacks, certain hazardous ingredients, such as, but not limited to SM-102 amino acid being highly carcinogenic to humans, CDC charts for Hawaii's flu deaths reporting 637 deaths in 2017, but death the count of the entire Covid-19 pandemic, resulted in 491 deaths, yet none of the official news, or Hawai'i health officials are shedding light on the full spectrum of this available data. There is blatant coercion and incentivizing within society, pressuring and coercing, to get this experimental negligence and failure to fully inform all recipients of all the risks associated, as well as not allowing them the freedom to choose.

Best Regards,
Kristina M.

New Requirements

Korina Leong <kkleong@hawaii.edu>

Wed, May 19, 2021 at 4:47 PM

To: bor.testimony@hawaii.edu, bitter@hawaii.edu, rsolems@hawaii.edu, mayudan@hawaii.edu, dorinna@hawaii.edu

Aloha,

I am writing to oppose your requirement of this new "vaccine" you are mandating for students to come back to campus. Side effects such as seizure, magnetic reactions, menstrual cycle severity and irregularities, COVID symptoms and death are just some of the known factors. How dare the university pressure and coerce this experimental vaccine not even approved by the FDA on every student. In fact, we have never disallowed people from living freely and inhibited their education to require experimental medical procedures and these uniformed, coercive tactics are illegal and hewa. Required participation is highly irresponsible.

I respectfully demand that you reject proposals of any requirements to impede, infringe or neglect the right to choose for students of Hawai'i campuses. If required and students display reactions, you all are held accountable, especially Board of Regents for gross negligence.

Mahalo,
Korina Makaokalani

To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 8:41 PM

My name is Jasmine Mano'i and I am writing to oppose your requirement of the experimental non FDA approved "vaccine" that you are proposing to mandate on the students of University of Hawai'i campuses, in order to return to physical learning. Side effects, such as: seizures, magnetic reactions on shot sites, "Covid Arm" phenomenon, pregnancy complications, menstrual cycle severity and irregularities, symptoms worse than Covid-19 contraction, CDC's VAERS portal showing multiple young, healthy people dying of blood clots, strokes or heart attacks, certain hazardous ingredients, such as, but not limited to SM-102 amino acid being highly carcinogenic to humans, CDC charts for Hawaii's flu deaths reporting 637 deaths in 2017, but the count of the entire Covid-19 pandemic resulted in 491 deaths...yet none of the official news or Hawai'i health officials are shedding light on the full spectrum of this available data.

There is blatant coercion and incentivizing within society, pressuring and coercing, to get this experimental, unapproved treatment into every arm.

We understand this was a real variant to previous coronavirus outbreaks, like SARS-COV1, but we, as a nation, have NEVER required such irresponsible measures to be allowed back into society. In fact, we have never prohibited people from living freely and inhibited their education, to require experimental medical procedures and these uninformed coercive tactics.

This type of so-called "vaccine " has never been done before and our family and friends should not be required to be experimental subjects, without an FDA approval nor true informed consent. This affects the student's mental health which in turn affects the student's physical health and overall well-being. Required participation is highly irresponsible and may result in anxiety and heightened unnecessary stress in students and staff.

I respectfully demand, that all of you reject any proposals of any requirements to impede, infringe or neglect the right to choose for students of our University of Hawai'i campuses. If these students display reactions, whether adverse, severely adverse, or worse, UH Board of Regents will be

held liable, for their gross negligence and failure to fully inform all recipients of all the risks associated, as well as not allowing them the freedom to choose. I have family members that are scared to speak out against this, but please know that if anything happens to them I'll hold you all accountable!

Best Regards,
Jasmine Mano'i

STRONGLY OPPOSE MANDATING COVID VACCINE FOR IN-PERSON CLASSES

amatsubara@hawaiiantel.net <amatsubara@hawaiiantel.net>
To: BOR.TESTIMONY@hawaii.edu

Thu, May 20, 2021 at 12:19 AM

To Whom It May Concern:

I wanted to send in my concern over the idea of mandating UH students to receive the covid shot in order to attend in person classes. I **STRONGLY OPPOSE** this idea, as it infringes on our rights to the health of our own bodies. It is not right and sounds very controlling. We live in the United States of America, where we should be free to make a choice whether or not to take the vaccine and not be forced to. We should also not be looked down upon or punished for choosing not to. Our body, our choice. No student, no employee, no individual should be forced to take the covid shot against their will.

Thank you,

Alyson Matsubara

Public Testimony for COVID-19 requirement to enter any UH campuses 5/20/21

Glen Miguel-Matsumoto, Jr <glenmm@hawaii.edu>
To: bor.testimony@hawaii.edu

Thu, May 20, 2021 at 12:07 AM

Dear UH Board of Regents,

My name is Glen Miguel-Matsumoto, a student from the University of Hawai'i at Manoa. I am writing to oppose your proposed requirement of the COVID-19 vaccine for all students of any University of Hawai'i campuses, in order to return to physical learning starting this coming fall semester. Many individuals, while hopeful of the status of the near future, are extremely concerned in regards to the COVID-19 vaccines that are available for dosage.

The CDC's VAERS, fully known as the Vaccine Adverse Event Reporting System database, has reported numerous side effects from the emergency authorized vaccines that are currently in use. Taking the age demographic of UH students into account, side-effects that were reported from the ages 18-29 are not limited to; respiratory issues, blood clots, severe dizziness, strokes, heart attacks, sudden diabetic symptoms and other serious infections -- many of which are life-threatening symptoms. While a portion of the patients have underlying health conditions, the fact that these adverse events are reported shortly after receiving the vaccine(s) is very worrisome. Even those who are completely healthy prior to the dosage(s) are encountering these effects. There is very little transparency in regards to the risks of getting injected by these vaccinations. Furthermore, these vaccines are only approved under Emergency Use Authorization, not under the approval of the Federal Drug Administration.

The concerns in regards to the safety in the UH campuses is completely understanding with the new COVID variants roaming around. However, the required vaccination metric to be allowed back on campus is way too extreme for students and faculty members. It is simply unrealistic to think that everyone is confident and will adhere with the vaccinations. Yes, there are other alternative options such as taking online courses full-time yet, there are courses -- especially the engineering courses, that are meant for in-person learning. One essential skill that is needed for students to succeed in their respective career pathway is socialization and communication. Speaking as an undergraduate of the College of Engineering at Manoa, group work is required for engineering courses. This is where the issue of mental health rises. Communicating and learning virtually may put a heavy burden of stress and anxiety on students and faculty because the resources for assistance are excruciatingly limited. As a result, a decrease in academic performance may occur as time persists.

I respectfully demand that everyone in the board to reject all proposals of mandatory COVID-19 vaccinations that neglect the students' and staff's right to choose in any University of Hawai'i campuses. Since the university itself is a COVID-19 research facility, the UH Board of Regents will be legally held liable for failure to inform any individual in the UH system about the associated risks of the vaccines as well as not allowing them the freedom to choose to reject if students display any adverse effects. Severe or not.

All the best,

Glen Miguel-Matsumoto
Undergraduate at the University of Hawai'i at Manoa

Opposition of the “Vaccine” Requirement

Cheryl Nakashima <chercn@aol.com>
To: bor.testimony@hawaii.edu

Wed, May 19, 2021 at 8:44 PM

Aloha.

My name is Cheryl Nakashima and I am writing to oppose your requirement of this so-called “vaccine” you are proposing to mandate on the students of University of Hawai’i campuses, in order to return to physical learning. Side effects, such as seizures, magnetic reactions on shot sites, “Covid Arm” phenomenon, pregnancy complications, menstrual cycle severity and irregularities, symptoms worse than Covid-19 contraction, CDC’s VAERS portal showing multiple young, healthy people dying of blood clots, strokes or heart attacks, certain hazardous ingredients, such as, but not limited to SM-102 amino acid being highly carcinogenic to humans, CDC charts for Hawai’i flu deaths reporting 637 deaths in 2017, but the death count of the entire Covid-19 pandemic, resulted in 491 deaths, yet none of the official news, or Hawai’i health officials are shedding light on the full spectrum of this available data. There is blatant coercion and incentivizing within society, pressuring and coercing, to get this experimental, unapproved treatment into every arm.

We understand this was a real variant to previous coronavirus outbreaks, like SARS-COV1, but we, as a nation, have never required such irresponsible measures, to be allowed back into society. In fact, we have never disallowed people from living freely and inhibited their education, to require experimental medical procedures and these uninformed, coercive tactics are illegal. This type of so-called “vaccine” has never been done before and our family and friends are not required to be experimental subjects, without an FDA approval. Emergency Use Authorization does not override that law. This effects the student’s mental health. Required participation, is highly irresponsible and may result on anxiety and heightened unnecessary stress in students and staff.

I respectfully demand, that all of you reject any proposals of any requirements to impede, infringe or neglect the right to choose, for students and our University of Hawai’i campuses. If these students display reactions, whether adverse, severely adverse, or worse, UH Board of Regents will be held liable, for their gross negligence and failure to fully inform all recipients of all the risks associated, as well as not allowing them to the freedom to choose.

Best Regards.

No mandatory vaccinations for in person learning

Yan Scherman -LJA <soccermom808@hotmail.com>
To: "bor.testimony@hawaii.edu" <bor.testimony@hawaii.edu>

Wed, May 19, 2021 at 10:29 PM

Aloha Board of Regents

I'm an alumni of UH Moana and grew up in Hawaii. I'm married with children and both my husband and I have parents who still live here on the island.

I understand the nature of wanting to protect the community and the welfare of the population, as we all have felt the effects of Covid 19 this past year. Through it all, we as islanders stood strong and together. That's how it's always been growing up here. When it got tough, is when we were the strongest. Imua!

Although I am not a medical physician or a scientist, I am an American Citizen and know that we have always had the right to choose what's right for our bodies and for our kids.

I respectfully ask that you do not mandate this Covid shot for those who wish to attend in person learning. This vaccination is still under emergency use authorization. There have been substantial evidence that this shot would only make sense and worth the risk to a certain population - certain older age group, for those immune compromised or for those with co-morbidities. Typically college age young adults do not suffer the same effects as those mentioned earlier.

In addition to this decision for your University System, I should also mention that your decisions have direct impact on our local College Prep schools. Typically many larger schools as well as the DOE follow similar guidelines that the university puts out.

All that I am asking is that this Vaccine not be made a mandatory requirement for in person learning. The right to these decisions should be born on individuals independently. Coercion and forced vaccination is unconstitutional and could put the university in potential litigation should persons be injured, die or suffer long or short term health consequences due to these vaccines.

I love UH, I love my State, and do not want to see it divided over this issue.

Sincerely, Yan Scherman '95

Covid-19 Vaccine Mandate

Your Position (required) *

Oppose

Your Testimony/Comments

If you keep your Covid-19 vaccine mandate, my daughter will consider a gap year, or move to the mainland and switch schools. She's currently in her second year. Children and young adults are at a very very low risk of Covid, and at much greater risk of catching and dying of the flu. You don't have a mandate for that, so STOP it already! In any given year we have more people die from flu in Hawaii than from and WITH Covid. You are taking the minute risk way out of proportion!

Those who get vaccinated should be protected, and feel safe. Those who are not vaccinated should be allowed access to campus and in-person classes. Why are you treating unvaccinated people as a vector of disease? Fauci himself has stated that the "asymptomatic" carriers do not drive outbreaks. The unvaccinated are not (yet) willing to take an UNKNOWN risk of a completely new technology, gene therapy injections.

Here are some things to consider before you fully implement this WRONG idea of mandating Covid shots:

- 1) Will UH bar the unvaxxed from campus forever if Covid stays around and doesn't go away?
- 2) What is the metric at which you would allow unvaccinated students and staff on campus again?
- 3) Will UH agree to be liable and provide medical and financial compensation for any injuries or (heaven forbid) deaths, resulting from mandating this EXPERIMENTAL gene therapy or which we do not know the long-term safety profile?
- 4) How will UH protect HIPAA laws regarding the privacy of medical information of its students and faculty?
- 5) Why are you still afraid of unvaccinated people? Doesn't your vaccine work? (If it works, don't be afraid. If it doesn't work, why mandate it?)
- 6) These mRNA vaccines do NOT stop infection or transmission, so mandating them doesn't even make sense. The benefit is for the recipient in that it will lessen the symptoms.

Please, come to your senses and drop the mandate.

Covid Vaccine Requirement for Students

Your Position (required) *

Oppose

Your Testimony/Comments

Aloha,

I ask that you re-think the university's decision to require the covid vaccine for students to return to in-person classes.

- The vaccine is still in the trial phase--red flag

- The vaccine manufacturers have zero liability (in the trial phase and beyond)
- There is no "one size fits all" answer for anything ever (especially not medical intervention like vaccines)
- There is no proof that the covid vaccine is safe or effective (it's still in the trial phase and is a new technology not used on humans before. Conclusions about safety and efficacy cannot be determined before the trial is complete)
- Plus this policy is blatant discrimination

There are so many obvious reasons that are being ignored by school officials with this decision to require the vaccine for in-person classes that many in the community are SHOCKED at the lack of logic, lack of community and student input, and obvious discrimination.

There is also concern that university officials are not considering the opinions of students and the community accurately. Please share with everyone how/when you are collecting and considering feedback regarding the vaccine requirement decision. Thank you.

Covid vaccine requirement for students

Your Position (required) *

Oppose

Your Testimony/Comments

I just wrote a check for UH tuition for my son and appalled to hear you are planning on not allowing him to attend classes due to his choice to not take an experimental "vaccine" which has so far killed people and cause countless health problems for many more. According to CDC data a/o 5/19/21, more 18-29 year olds have died from pneumonia than from covid. They have a 99.8% survival rate IF they get a covid infection. This is not a reason to be a guinea pig. Experimental vaccines can not be mandated. You are turning this into something ridiculous and unscientific. It is evil for you to require students to subject themselves to this experiment. My son is a local boy and wants to live and work in Hawaii as an engineer. This might force him

to move to the mainland. Is that fair? All because he is healthy and chooses to not risk his health on a vaccine he doesn't need...On what basis does this make sense? Shame on you. If teachers are concerned they can choose to get vaccinated. Are you going to give us a discount if he's not permitted to attend class in person? Please fill out this form and send back to me with your answers. I look forward to hearing what you say.

NOTE TO COLLEGE OR UNIVERSITY: As a student at your institution, I am requesting that you review this document, provide the requisite information, and sign the form, in regards to your requirement that students get a Covid-19 emergency use authorization (EUA) experimental vaccine.

1) If I agree to receive an EUA Covid-19 injection, does my **student health insurance plan [if applicable] provide complete coverage should I experience an adverse event, or even death?**

2) As a student at your institution, will you provide **any other medical or financial support to me or my family if I have an adverse event to an EUA Covid-19 injection and am unable to attend school for days, weeks, or months, or if I am disabled for life?**

3) The Food and Drug Administration (FDA) requires that EUA vaccine recipients be provided with certain vaccine-specific information to help them make an informed decision about vaccination.⁹

The EUA fact sheets that must be provided are specific to each authorized Covid-19 injection and are developed by the manufacturers of the injections (Pfizer/BioNTech, Moderna, Oxford/AstraZeneca, and the Johnson & Johnson subsidiary Janssen). The fact sheets must provide the most current and up-to-date information on the injections, and vaccine recipients must also receive information about adverse events. Have you read, understood, and provided me (and all other students) with these fact sheets and with current information on adverse events so that I/we can make an educated decision?

4) Have you reviewed the available databases of material adverse events reported to date for people who have received experimental Covid-19 injections?^{10,11,12,13} Potential and reported adverse events include death, anaphylaxis, neurological disorders, autoimmune disorders, other long-term chronic diseases, blindness and deafness, infertility, fetal damage, miscarriage, and stillbirth.

5) The FDA’s guidance¹⁴ on emergency use authorization of medical products requires the FDA to “ensure that recipients are informed to the extent practicable given the applicable circumstances... **[t]hat they have the option to accept or refuse the EUA product....**” Are you aware of this statement? Have you informed all students that they have the option to refuse?

6) With respect to the emergency use of an unapproved product, the Federal Food, Drug and Cosmetic Act, Title 21 U.S.C. 360bbb-3(e)(1)(A)(ii)(I-III)¹⁵ reiterates that individuals be informed of “**the option to accept or refuse administration of the product**, [and] of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.” If experimental EUA Covid-19 vaccines are ever approved by the FDA, state legislation would be required to allow companies to mandate the Covid-19 injections. Are you aware of these facts?

7) EUA products are unapproved, unlicensed, and experimental. Under the Nuremberg Code—the foundation of ethical medicine—no one may be coerced to participate in a medical experiment. The individual’s consent is absolutely essential. No court has ever upheld a mandate for an EUA vaccine. In *Doe #1 v. Rumsfeld*, 297 F. Supp. 2d 119 (2003),¹⁶ a federal court held that the U.S. military could not mandate EUA vaccines for soldiers: “...[T]he United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs” (*Id.* at 135). Are you aware of this?

8) The United States Code of Federal Regulations¹⁷ and the FDA require the informed consent of human subjects for medical research. The EUA Covid-19 injections are unapproved, unlicensed, investigational vaccines that are still in their experimental stage. It is unlawful to conduct medical research on a human being, even in the event of an emergency, unless steps are taken to secure the **informed consent** of all participants. Are you aware of this?

9) According to Federal Trade Commission (FTC) Guidelines¹⁸ and the FTC’s “Truth In Advertising,”¹⁹ promotional material—and especially material involving health-related products—cannot mislead consumers, omit important information, or express claims. All of this falls under the rubric of “deceptive advertising” (whereby a company is providing or **endorsing a product**), whether presented in the form of an ad, on a website, through email, on a poster, or in the mail. For example, statements such as “all students are required to get the Covid-19 vaccine to make the campus safe” or “it’s safe and effective” leave out critical information. Critical information includes the facts that Covid-19 injections are unapproved EUA vaccines that “may” or “may not” prevent Covid, won’t necessarily make campuses safer, and could in fact cause harm. Not providing links or attachments of the manufacturers’ fact sheets and current information on adverse events is omitting safety information. Are you aware of this?

10) Since the Covid lockdowns began over one year ago, there have been over 178 reported breaches of unsecured protected health information (PHI), incidents investigated by the Office for Civil Rights (OCR). These breaches exposed millions of people’s personal health information. Although many of these incidents were attributed to hacking, some of the breaches to PHI fell directly under the 1996 Health Insurance Portability and Accountability Act (HIPAA), such as sharing a patient’s or person’s information with an unauthorized individual or incorrectly handling PHI.²⁰ **Can you please explain your obligations to me, under HIPAA law, and how you are going to protect my personal information - both with respect to your requirement that I receive this injection?**

11) Whereas pharmaceutical companies that manufacture EUA vaccines have been protected from liability related to injuries or deaths caused by experimental agents since the PREP Act² was enacted in 2005, **companies, schools, and all other institutions or individuals who mandate experimental vaccines on any human being are not protected from liability**. Are you aware that you do not enjoy such liability protection?

12) Are you aware that students or families could file a **civil suit** against you should the student suffer an adverse event, death, or expulsion from school for refusing an EUA Covid-19 injection?

As the legally authorized officer of the college or university, I have read all of the above information, have provided my students with all of the information that the FDA requires be provided to recipients of the Covid-19 injections, and do hereby agree to assume 100% financial responsibility for covering any and all expenses from adverse events, including death, through insurance coverage or directly. In addition, I affirm that the student shall not be denied access to school should they decline to receive a Covid-19 injection.

Opposed to mandatory experimental Cov2 vaccine there is not enough evidence that it is safe

Your Position (required) *

Oppose

Your Testimony/Comments

There is not not enough scientific evidence to support the safety of a mandatory vaccine for a flu like illness that has a 99% survival rate. A vaccine should never be made mandatory if someone would like to consent to being a part of the experiment that is there right but to mandate it without proof it is safe is a violation of human rights and the University could be held liable.

Mandatory inoculations / "vaccines" for UH students

Your Position (required) *

Oppose

Your Testimony/Comments

Allow each individual their own freedom of choice for their health.

There is no need to mandate a medical procedure in a free society. The risk posed by the virus, particularly for people under 65 yrs of age, is minimal.

As an alternative, UH should suggest that students take measures to keep their immune systems healthy. In a free society, such measures are voluntary, never mandatory.

Freedom should be a core value.

COVID Vaccine Mandate for all students who will be on campus this Fall

Your Position (required) *

Oppose

Your Testimony/Comments

Please don't make it mandatory for all students (and faculty too, eventually) to be vaccinated in order to attend in-person schooling at UH .

Do not deny students' right to choose and their right to bodily integrity.

In the United States and other jurisdictions, such a mandate is a violation of the law. It is also a violation of fundamental human and religious rights. As the Association of American Physicians and Surgeons recently wrote, "Students and their families may justifiably believe these policies discriminate against individuals who aren't candidates for this vaccine, have pre-existing conditions, previous COVID-19 disease, cite religious

objections, or are otherwise exercising their freewill choosing not to participate in this optional vaccine experiment.”

Handwritten signature of Thanh Truc Nguyen.

Thanh Truc Nguyen, Ed.D.
Mānoa Faculty Senate Secretary

Presented to the Mānoa Faculty Senate by the Committee on Professional Matters for a vote of the full senate on April 21, 2021, a resolution in recognition of Alice Augusta Ball to establish an annual day and award in her honor. Approved unanimously through acclamation by the Mānoa Faculty Senate on April 21, 2021.

**RESOLUTION CREATING ALICE BALL DAY AND AN ANNUAL AWARD IN HER NAME
RECOGNIZING EXCELLENCE IN RESEARCH BY A GRADUATE STUDENT**

WHEREAS, the University of Hawai'i at Mānoa seeks to refine its recognition of Alice Ball and her accomplishments, including the following:

1. Fundamental scientific contribution to the treatment of Hansen's Disease (leprosy) through the application of a new method of ethyl esterification (developed by a German chemist) to chaulmoogra oil, more effectively administered to patients with leprosy; and
2. First Black woman published twice in the *Journal of the American Chemical Society*, one before she had a master's degree; and
3. First Black woman to receive a master's degree in chemistry (probably first in the US); and
4. First Black woman to become head of the College of Hawai'i's Chemistry Department (very likely the first in the US); and
5. First Black woman to develop an early treatment for Hansen's Disease (leprosy) that was used for two decades; and
6. Commitment to teaching compositional English to young women at the Hawai'i YWCA in the fall of 1914 and spring of 1915 when she was working on her thesis, teaching chemistry classes, and managing the Chemistry Department;

WHEREAS, the London School of Hygiene and Tropical Medicine has recently honored Alice August Ball as a woman health pioneer, recognizing her and placing her in the same category as Marie Curie and Florence Nightingale; and

WHEREAS, Alice Ball Day was proclaimed by Lieutenant Governor Mazie Hirono to take place on February 29, 2000; and University of Hawai'i at Mānoa recognized her the same day with a bronze plaque at the base of the lone Chaulmoogra tree on campus; and

WHEREAS, retired UH Science and Technology Librarian Paul Wermager has already established the Alice Ball Scholarship with the UH Foundation, and in 2006, the University of Hawai'i Board of Regents awarded Alice Ball their Medal of Distinction, posthumously,

BE IT RESOLVED, that the Mānoa Faculty Senate request that Governor Ige or Lieutenant Governor Josh Green issue a proclamation designating a day in February (besides February 29) as a Alice Ball Day henceforth to; and, that the University of Hawai'i at Mānoa recognize and memorialize the contributions of Alice Ball by commissioning the design and sculpting of a bust of Alice Ball (or other such memorial), which may also serve as an incentive and inducement to young scholars aspiring to contribute to the public health and welfare; and

BE IT FURTHER AND FINALLY RESOLVED, that the Mānoa Faculty Senate facilitate the establishment of an annual Alice Ball Award to honor a graduate student for outstanding research that contributes to the well-being of the people of Hawai'i.

[Mānoa Faculty Senate] Resolution to Increase Student Mental Health and Well-Being Support at UHM

UHM Faculty Senate <uhmfs@hawaii.edu>

Handwritten signature of Thanh Truc Nguyen.

Thanh Truc Nguyen, Ed.D.
Mānoa Faculty Senate Secretary

Presented to the Mānoa Faculty Senate by the Committee on Student Affairs for a vote of the full senate on April 21, 2021, a resolution to increase student mental health and well-being support at University of Hawai'i at Mānoa. Approved unanimously through acclamation by the Mānoa Faculty Senate on April 21, 2021.

**RESOLUTION TO INCREASE STUDENT MENTAL HEALTH
AND WELL-BEING SUPPORT AT UNIVERSITY OF HAWAII' I AT MĀNOA**

WHEREAS, one of the missions of the University of Hawai'i at Mānoa, is to achieve and maintain a healthy student body and University community; and

WHEREAS, as a steward of Native Hawaiian values, culture, and traditions, an important value of the University of Hawai'i at Mānoa is the concept of Lōkahi - that total health is the balance and harmony of the physical, emotional, family, environmental, and spiritual; and

WHEREAS, there has been an on-going shortage of mental health specialists at the University of Hawai'i at Mānoa prior to the COVID-19 pandemic, as was identified and addressed by the Mānoa Faculty Senate in 2015; and

WHEREAS, in 2021, students are facing increasingly difficult medical, emotional, financial, and academic challenges as a result of the ongoing COVID-19 pandemic; and

WHEREAS, of the University of Hawai'i at Mānoa students who participated in an intake assessment appointment at the Counseling and Student Development Center in the fall 2020 semester, 43 percent considered suicide in the past, with 6.8 percent of students reporting they considered suicide in the past month; and

WHEREAS, John A. Burns School of Medicine Department of Psychiatry is willing to participate in a hui, including, but not limited to, the Counseling and Student Development Center, Department of Psychology, and the Department of Social Work, with other key University of Hawai'i at Mānoa departments and services to increase programs and resources to benefit students' mental health and well-being; and

WHEREAS, the hui is willing to create an action plan that meets students' mental health needs, and is in collaboration with other allied health professionals on campus, including but not limited to, the University of Hawai'i at Mānoa Counseling and Student Development Center, Thompson School of Social Work and Public Health, and Department of Psychology; therefore,

BE IT RESOLVED, that the Mānoa Faculty Senate requests the University of Hawai'i at Mānoa administrative leadership prioritize mental and behavioral health for the University of Hawai'i at Mānoa student body and support the establishment of the mental health and well-being hui under the leadership of the University of Hawai'i at Mānoa Counseling and Student Development Center, supported by the Department of Psychiatry; and

BE IT FURTHER RESOLVED, that the Mānoa Faculty Senate recommends that University of Hawai'i at Mānoa administrative leadership establish G-funded positions at the University of Hawai'i at Mānoa Counseling and Student Development Center, to help the institution attain the recommended national standard of one mental health professional per 1000-1500 students; and

BE IT FURTHER RESOLVED, that the Mānoa Faculty Senate recommends that University of Hawai'i at Mānoa administrative leadership provide funding to support Department of Psychiatry trainee physicians who can provide services at the University of Hawai'i at Mānoa Counseling and Student Development Center; and

BE IT FINALLY RESOLVED, that the Mānoa Faculty Senate requests the hui be provided funding through the CARES Act and/or any other available COVID-19 pandemic funding.

Adding COVID 19- Vaccination to a student"s health clearance

Your Position (required) *

Oppose

Your Testimony/Comments

I strongly oppose the measure that would require students to be vaccinated against the Covid 19 virus in order to attend in person classes in the University of Hawaii and any of its Oahu Campuses. As of today, this vaccine has not been approved by the FDA and its in its early testing stages. The health of our students and faculty will be at stake if such a requirement is made as it is too early in the documentation of secondary effects and health issues arising from attaining this vaccination. The average age of a student is 19 yrs old,

and most young adults have a capable and strong immune system that can survive on its own a virus that has a high survival rate.

The Department of Education, any governmental officials of the State of Hawaii and the CDC do not have the right to discriminate against a student or faculty member that decides to not be vaccinated. Vaccination against Covid 19 are optional and voluntary. If medical treatment cannot be denied to someone that does not get vaccinated, neither should be the right to obtain an education or earn a wage in a Public Institution. As the mother and primary care taker of a student in the UH system, I refuse to allow my son's health to be in the hands of strangers. My son is responsible for his health decisions, not an institution. An institution cannot play advocate to convert their students into test subjects and be human experiments without consent. This measure is unconstitutional and all people should retain the right to choose life, their life over living in fear or attaining the consequences of being vaccinated with a vaccine that still lacks years of testing and reviews.

Your Testimony/Comments

As an alumnae of the University of Hawaii at Manoa, I oppose the proposed requirement of mandatory vaccination to allow in person attendance. I am not an "antivaxxer", but I am hesitant about the push for the mandatory requirement for this unapproved shot. Vaccines go through years of clinical trials before it is approved, and it is too soon for you to require the students and/or faculty to take it as a coercive measure to allow in person classes. My niece is a present UH student who has not been able to attend a single class on campus. My 8th grade daughter (who may be a future UH student) has doing in person classes all year long with

no issues. Please do not cause a case for discrimination against those who cannot or will not take the shot. I am also asking you to make a widespread public announcement that UH will NOT be requiring these shots in order to return to physical learning on campus. Mahalo for your time and consideration.

Your Testimony/Comments

My daughter is a bright and happy 16-year old sophomore attending Kaiser High School. She has begun the Running Start program and attends classes via KCC on line. She is determined to continue doing this through graduation so she can exit high school with 15-18 college credits. I will not be vaccinating her as the covid vaccine has not been tested in children. We do not know short-term or long-term safety at this time. I am firmly opposed to the vaccine mandate to be on campus. Thank you.

Mandatory Covid vaccine

Your Position (required) *

Oppose

Your Testimony/Comments

How dare UH try and force students to take a highly controversial, experimental vaccine, that has deadly side effects! This is Unconstitutional, and appalling on so many levels. Shame on you! I'm not sending my son back to school this fall. We will be transferring his credits elsewhere.

mandatory COVID vaccination requirements for students

Your Position (required) *

Oppose

Your Testimony/Comments

An experimental vaccination that is not a vaccination, for disease with a 99.9+% recovery rate that can now be cured in most cases, that, in the past 5 months, has a higher death rate than the total of all vaccine reactions for all diseases over the last 20yrs, should not be forced on a population that is not at risk. This is so blatantly wrong, one can only wonder about your motive for such action. Clearly, this is NOT about health or safety.

Vaccine Mandate

Your Position (required) *

Oppose

Your Testimony/Comments

Aloha,

I am greatly concerned for the health and well-being of our state's students. Mandating any vaccine that is still in its trial period is irresponsible and unsafe. Please do not force medical practices upon students who do not need nor want them. Let them choose. Don't take their medical freedoms away.

Sincerely,

Melissa

Board of Directors meeting for CoVID vaccine mandate

Your Position (required) *

Oppose

Your Testimony/Comments

I find it incredible that we need to submit testimony on this issue. You are mandating a medical treatment (this is NOT a vaccine according to the medical definition of vaccines) for all students in the U of H system for a disease that has a 99.998% chance of survival for the student age group. This treatment has not even been proven to prevent transmission of the virus, it merely reduces symptoms if you do contact the virus. Everyone screams "Follow the Science", but obviously you have not actually read the science on this vaccine. We currently have safe and effective treatments for SARS COV2 - Ivermectin and Hydroxychloroquine so a

"vaccine" is completely unnecessary, much less forcing students who have basically zero risk of death which is really what we all should be focusing on.

Do the right thing and remove any mandates for experimental or even FDA approved medical treatments.

Please review attached document to understand the University of Hawaii's liability risk if you do decide to mandate these treatments.

Sincerely,

Dr. Robert Abell, N.D.

Form for Students Attending Colleges or Universities Requiring Covid-19 Injections

NOTE TO COLLEGE OR UNIVERSITY: As a student at your institution, I am requesting that you review this document, provide the requisite information, and sign the form, in regards to your requirement that students get a Covid-19 emergency use authorization (EUA) experimental vaccine.

1) If I agree to receive an EUA Covid-19 injection, does my student health insurance plan [if applicable] provide complete coverage should I experience an adverse event, or even death?

2) As a student at your institution, will you provide any other medical or financial support to me or my family if I have an adverse event to an EUA Covid-19 injection and am unable to attend school for days, weeks, or months, or if I am disabled for life?

3) The Food and Drug Administration (FDA) requires that EUA vaccine recipients be provided with certain vaccine-specific information to help them make an informed decision about vaccination.⁹

The EUA fact sheets that must be provided are specific to each authorized Covid-19 injection and are developed by the manufacturers of the injections (Pfizer/BioNTech, Moderna, Oxford/AstraZeneca, and the Johnson & Johnson subsidiary Janssen). The fact sheets must provide the most current and up-to-date information on the injections, and vaccine recipients must also receive information about adverse events. Have you read, understood, and provided me (and all other students) with these fact sheets and with current information on adverse events so that I/we can make an educated decision?

4) Have you reviewed the available databases of material adverse events reported to date for people who have received experimental Covid-19 injections?^{10,11,12,13} Potential and reported adverse

events include death, anaphylaxis, neurological disorders, autoimmune disorders, other long-term chronic diseases, blindness and deafness, infertility, fetal damage, miscarriage, and stillbirth.

5) The FDA’s guidance¹⁴ on emergency use authorization of medical products requires the FDA to “ensure that recipients are informed to the extent practicable given the applicable circumstances... **[t]hat they have the option to accept or refuse the EUA product....**” Are you aware of this statement? Have you informed all students that they have the option to refuse?

6) With respect to the emergency use of an unapproved product, the Federal Food, Drug and Cosmetic Act, Title 21 U.S.C. 360bbb-3(e)(1)(A)(ii)(I-III)¹⁵ reiterates that individuals be informed of “**the option to accept or refuse administration of the product**, [and] of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.” If experimental EUA Covid-19 vaccines are ever approved by the FDA, state legislation would be required to allow companies to mandate the Covid-19 injections. Are you aware of these facts?

7) EUA products are unapproved, unlicensed, and experimental. Under the Nuremberg Code—the foundation of ethical medicine—no one may be coerced to participate in a medical experiment. The individual’s consent is absolutely essential. No court has ever upheld a mandate for an EUA vaccine. In *Doe #1 v. Rumsfeld, 297 F. Supp. 2d 119 (2003)*,¹⁶ a federal court held that the U.S. military could not mandate EUA vaccines for soldiers: “...[T]he United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs” (*Id.* at 135). Are you aware of this?

8) The United States Code of Federal Regulations¹⁷ and the FDA require the informed consent of human subjects for medical research. The EUA Covid-19 injections are unapproved, unlicensed, investigational vaccines that are still in their experimental stage. It is unlawful to conduct medical research on a human being, even in the event of an emergency, unless steps are taken to secure the **informed consent** of all participants. Are you aware of this?

9) According to Federal Trade Commission (FTC) Guidelines¹⁸ and the FTC’s “Truth In Advertising,”¹⁹ promotional material—and especially material involving health-related products—cannot mislead consumers, omit important information, or express claims. All of this falls under the rubric of “deceptive advertising” (whereby a company is providing or **endorsing a product**), whether presented in the form of an ad, on a website, through email, on a poster, or in the mail. For example, statements such as “all students are required to get the Covid-19 vaccine to make the campus safe” or “it’s safe and effective” leave out critical information. Critical information includes the facts that Covid-19 injections are unapproved EUA vaccines that “may” or “may not” prevent Covid, won’t necessarily make campuses safer, and could in fact cause harm. Not providing links or attachments of the manufacturers’ fact sheets and current information on adverse events is omitting safety information. Are you aware of this?

10) Since the Covid lockdowns began over one year ago, there have been over 178 reported breaches of unsecured protected health information (PHI), incidents investigated by the Office for Civil Rights (OCR). These breaches exposed millions of people’s personal health information. Although many of these incidents were attributed to hacking, some of the breaches to PHI fell directly under the 1996 Health Insurance Portability and Accountability Act (HIPAA), such as sharing a patient’s or person’s information with an unauthorized individual or incorrectly handling PHI.²⁰ **Can you please explain your obligations to me, under HIPAA law, and how you are going to protect my personal information - both with respect to your requirement that I receive this injection?**

11) Whereas pharmaceutical companies that manufacture EUA vaccines have been protected from liability related to injuries or deaths caused by experimental agents since the PREP Act² was enacted in 2005, **companies, schools, and all other institutions or individuals who mandate experimental vaccines on any human being are not protected from liability.** Are you aware that you do not enjoy such liability protection?

12) Are you aware that students or families could file a **civil suit** against you should the student suffer an adverse event, death, or expulsion from school for refusing an EUA Covid-19 injection?

As the legally authorized officer of the college or university, I have read all of the above information, have provided my students with all of the information that the FDA requires be provided to recipients of the Covid-19 injections, and do hereby agree to assume 100% financial responsibility for covering any and all expenses from adverse events, including death, through insurance coverage or directly. In addition, I affirm that the student shall not be denied access to school should they decline to receive a Covid-19 injection.

Covid vaccine mandate

Your Position (required) *

Oppose

Your Testimony/Comments

University of Hawaii Board of Regents,

I strongly oppose this mandate requiring UH employees to be Covid vaccinated. These teachers instruct a population that is extremely low-risk. In 2020, the biggest concern was Hawaii hospital ICUs becoming overwhelmed and running out of ventilators/supplies. This never happened here in Hawaii. I am a RN and continued working around patients (of all ages) and hospital staff throughout the lockdown. My employer does NOT require it's employees to be Covid-19 vaccinated. UH staff is at lower risk than the frontline healthcare

workers of a major healthcare facility. This should be optional for your employees and your students. Again,

Your Testimony/Comments

Aloha,

I strongly oppose the requirement to make UH students get a covid shot to attend school on campus in person. There is absolutely no need with a 99.8 % recovery rate if you were to get it. Hundreds of thousands of people are injured and dying from taking the shots (<https://healthimpactnews.com/2021/10570-dead-405259-injuries-european-database-of-adverse-drug-reactions-for-covid-19-vaccines>). Plus, there are over 100 cures for covid, see attachment. We do not know the long-term affects of taking the jab, many of which are beginning to surface now such a brain fog, perpetual tiredness, irregular periods for women, migraine headaches, and not being able to carry a baby to full term, that are just a few of the results of taking any of the three most popular shots. Learn more in this presentation by Dr. Ben Edwards. <https://youtu.be/GSssnEOZYDg>

Do not subject our future leaders and generation to the life threatening covid shot, not a vaccine, for the greed of the certain representatives in the Hawaii government and the cabal/deepstate.

Sincerely,
Heidi Hirsh,
3721 Kanaina Ave,
Honolulu, HI 96815

FOR IMMEDIATE RELEASE

Orthomolecular Medicine News Service, July 18, 2020

COVID-19

How can I cure thee? Let me count the ways.

Commentary by Thomas E. Levy, MD, JD

(OMNS July 18, 2020) Probably never before in history has anything or any event mixed fact, fiction, fear, and confusion like the COVID-19 pandemic of 2019-2020. Political and medical "experts" have been in abundance, primarily regurgitating the same message as though it was something new every time they get interviewed: wash your hands, maintain social distancing, and wear a mask as much as possible. And the public and the news media always take great comfort that an "expert" told them the truth. Trouble is, you can always find another "expert" of equal credentials who will offer a completely contradictory perspective. Understandably, this generates much of the fear and confusion noted above. The good hygiene and virus avoidance advice noted above is helpful, although it is probably a bit overblown when discussing how important a mask is in preventing virus transmission, especially outdoors. It seems ludicrous to mandate mask wearing at all times, indoors and outdoors, although this is being given consideration by some governmental (and medical) authorities at the time of this writing. However, this advice only scratches the surface with regard to the numerous options available to avoid contracting this infection, or to even cure it. There is no point in suffering from

misguided advice when COVID-19 can be prevented or reliably cured in short order. As will be clearly explained in this article, nobody needs to die from COVID-19, or even to suffer needlessly (as many virus victims have remained quite ill for months before finally recovering).

While still unknown to most practitioners of traditional, or "modern" medicine, acute viral syndromes, COVID-19 included, can all be easily prevented most of the time. And when such viruses do get a foothold in the body, they are still easily eradicated if the patient is not too close to death before receiving any of a large number of treatments established to be effective. Many doctors get attacked for promoting treatments as cures for afflictions that are traditionally considered to be incurable. Certainly, it is true that some treatments promoted as being reliable cures are either fraudulent or of only nominal benefit. However, failing to assert the validity of a true cure for a medical condition is just as detrimental to the health of an ailing patient as it is promoting a false cure. Many doctors know of highly beneficial treatments that cure or vastly improve medical conditions that are little affected by traditional therapies. Yet, fear of license revocation for telling the truth about inexpensive and natural therapies that cannot be protected by patents keeps most health care practitioners from promoting those beneficial therapies. Nothing is ever embraced, and seemingly not even **permitted**, that would take away large profits from pharmaceutical companies, hospitals, and even many of the doctors themselves. Whenever you are absolutely stupefied and cannot figure out why a valuable treatment is not being used, just take the time to identify, expose, and analyze the money trail that is involved with the prescription drugs and/or overall treatment protocol that would be displaced. [1] The reason for the avoidance or suppression of that therapy will then become apparent.

To be perfectly clear: The health of the patient must always be the primary concern whenever rendering medical care.

There exists a first amendment right in the United States that permits free speech, including the writing of books and articles. This right has even protected authors that openly provide information on how to make bombs and promote terrorism. One can only hope that discussing inexpensive and effective medical treatments will continue to receive the same protection. However, it is very clear that this right is rapidly disappearing, in light of the open suppression of free speech that has been occurring for some time, but especially in the last few months. In light of this, then, the information in this article is being presented.

There already exist numerous ways to reliably prevent, mitigate, and even cure COVID-19, including in late-stage patients who are already ventilator-dependent. Some of the modalities have already been proven to work, although not in the classic "prospective double-blind, placebo-controlled trials" conducted on hundreds to thousands of patients. A perceptive clinician realizes that one overwhelmingly impressive case report where an agent or intervention promptly and unequivocally reverses the condition of a rapidly declining patient back to good health simply cannot be dismissed and disparaged as anecdotal and irrelevant. Furthermore, it is the existence of such cases and unequivocally positive responses that makes it completely **unethical** to put other patients into placebo-controlled trials when the treatment is dramatically beneficial to most patients and harmless to all. Allowing patients in the placebo group to suffer greatly and even die under such circumstances can never be justified.

Unfortunately, even when multiple scientifically-sound clinical studies actually do get conducted and reported on inexpensive, nontoxic, and highly effective therapies, those therapies rarely get utilized clinically. Although there are many examples of such therapies, an especially noteworthy example of the suppression of good medicine is seen with vitamin C. The continued avoidance of the use of intravenous vitamin C, especially in septic patients in the intensive unit, [2] stands out as a clear example of flagrant malpractice. Conservatively, thousands of ICU patients around the world, on a **daily** basis, would be saved or at least spared substantial suffering with a simple protocol utilizing intravenous vitamin C. And the morbidity and mortality of many different infections and toxin exposures outside of the ICU setting would

also be readily mitigated and even resolved with vitamin C-based protocols. But this is not happening, even though the literature has unequivocally indicated the clinical importance (and safety) of vitamin C for over 80 years. [3]

The following therapies can be used, and many have been used, to prevent and treat COVID-19 (and many other infections, viral or otherwise). Not all of them have been equally well-documented or proven as being effective. Some have strong literature, research study, and clinical support. Others represent simply logical applications of treatment protocols that have already been proven to be highly effective in eradicating other viral infections and should be expected to have comparable effects on the COVID-19 virus. The treatments described below are categorized as having the ability to **prevent**, to **improve** and to **cure** COVID-19 and other viral syndromes.

Vitamin C (prevents, improves, cures)

Vitamin C has been documented to readily cure all acute viral syndromes in which it has been adequately dosed. As the ultimate virucide, vitamin C has been documented to inactivate/destroy every virus against which it was tested *in vitro* (in the test tube). Similarly, vitamin C has consistently resolved nearly all acute viral infections in patients treated with sufficient doses. [1,3] Vitamin C has cured Zika fever, another epidemic virus that struck in 2016. [4] Along with hydrogen peroxide, intravenous vitamin C has also been documented to be highly effective against the debilitating pain of Chikungunya virus. [5] Intravenous vitamin C has also resolved influenza. [6] A high degree of protection against infection by many other pathogens is also achievable with a variety of treatments featuring oral forms of vitamin C.

In an ongoing clinical study on hospitalized COVID-19 patients, a combination of vitamin C, methylprednisolone, heparin, and thiamine has already resulted in a dramatic decrease in hospital mortality rate. [7]

Vitamin D (prevents, improves)

Vitamin D has been clearly documented to strengthen immune function and decrease the risk of infection from any pathogen, including the COVID-19 virus. Patients with the highest vitamin D levels have shorter and less symptomatic courses of infection. While vitamin D has not been demonstrated to cure viruses as a monotherapy, maintaining an adequate level of vitamin D is vital for both preventing the contraction of infectious diseases as well as for recovering more rapidly from such infections, with a clear decrease in mortality rate. [8] In a recent study not yet published, Indonesian researchers studied the effects of vitamin D on mortality in 780 patients hospitalized with COVID-19. They found that nearly all (98.9%) of COVID-19 patients with vitamin D levels below 20 ng/ml died. Yet, less than 5% with substantially higher levels of vitamin D died. Consistent with these findings, it has been shown that the most life-threatening complication of COVID-19 infection, acute respiratory distress syndrome, occurs much more readily in the presence of a vitamin D deficiency. [9] Clearly, vitamin D supplementation should be part of any treatment protocol for COVID-19 or any other infectious disease.

Zinc (prevents, improves)

Zinc is needed inside the virus-infected cells to stop virus replication by inhibiting viral RNA polymerase. It is a possibility that many of the younger individuals that are either killed or made severely ill by COVID-19 are chronically zinc-depleted due to inadvertently zinc-deficient diets. Since supplemental zinc has only a limited ability to reach the cytoplasm of cells due to its ionic nature, zinc ionophores (agents that complex with zinc and transport it into the cell) are known to be good general antiviral agents. Quercetin is one such supplement, and it can serve as a good adjunctive agent to any COVID-19 treatment protocol. [10] Chloroquine, discussed

below, is also a zinc ionophore, perhaps explaining its potent anti-COVID-19 effects.

Magnesium Chloride (prevents, improves, may cure)

Magnesium, especially as magnesium chloride, has been documented to have substantial antipathogen properties, and it has been reported to cure poliovirus infections as a monotherapy when ingested orally. [11] While it remains unclear what an aggressive regimen of this agent would do as a monotherapy for COVID-19, it can be expected to be a positive adjunctive agent in any COVID-19 prevention or treatment protocol.

Ozone (improves, cures)

Ozone is probably the single most potent antipathogen agent available today. It readily eradicates all pathogenic bacteria, fungi, viruses, and protozoa. It has many routes of administration and can be utilized as an effective monotherapy, although it positively supports all treatment protocols in an adjunctive and usually synergistic fashion as well. [12] Ozone has been documented to cure advanced cases of Ebola virus, for which there are still no known effective mainstream medical therapies. [13] For someone with ready access to ozone, different applications of ozone could certainly be used to prevent COVID-19 and other respiratory viruses as well. However, with the other simple and effective antiviral measures listed in this article, using ozone for prevention is not really needed.

Hydrogen Peroxide (prevents, improves, cures)

Hydrogen peroxide has been used for many years as a monotherapy as well as part of many different treatment protocols for a wide variety of infections. A clinically effective dose will typically cost less than a dime. During a severe epidemic of influenza in 1919 a protocol of intravenous hydrogen peroxide given only to the most severely ill patients dramatically decreased the death rate. [14]

Due to its well-documented and potent antipathogen properties, along with producing no toxic byproducts upon killing pathogens, hydrogen peroxide is now being proposed in the literature for an off-label use via oral and nasal washing, a regimen of gargling, and administration via nebulization immediately upon symptom appearance with the presumptive diagnosis of COVID-19. [15,16] Impressive anecdotal evidence already indicates that this application, especially via nebulization, appears to be a powerful preventive and even curative therapy against all respiratory-acquired infections, viral or otherwise.

In addition to nebulization with hydrogen peroxide, a large number of other agents can also be nebulized that have pathogen-killing and mucosal cell-healing properties, including, but not limited to: DMSO, magnesium chloride, sodium ascorbate [vitamin C], nascent iodine, sodium chloride, sodium bicarbonate, zinc chloride, glutathione, and N-acetyl cysteine.

Hyperbaric Oxygen (may improve, may cure)

Hyperbaric oxygen therapy is the breathing of pure oxygen inside a chamber that is pressurized between 1.5 to 3 times normal atmospheric pressure. It has been documented to consistently help eradicate deep-seated and otherwise non-healing wounds and infections. [17] Ozone therapy, which has destroyed all viruses and pathogens against which it has been tested, has been shown to share some mechanisms of action with hyperbaric oxygen therapy. This certainly raises the reasonable possibility that hyperbaric oxygen might also be a very effective antiviral therapy in addition to its established antibacterial effects. [18]

Ultraviolet Blood Irradiation (improves, may cure)

Also known as photo-oxidation therapy, ultraviolet blood irradiation therapy has been effectively treating infections for many decades now. In a series of 36 cases of acute polio (spinal type), the blood irradiation treatment was successful in curing 100% of these patients. Viral hepatitis and bacterial sepsis were also found to be very effectively treated with ultraviolet blood irradiation. [19] This irradiation therapy would likely be equally effective against any other pathogens, especially viruses.

Chlorine Dioxide (improves, cures)

Chlorine dioxide has long been recognized as a powerful antimicrobial agent. It has been around for over 100 years, and it is used both to purify water and to purify blood to be used for transfusion. As a therapeutic agent for infectious diseases, it has been given both orally and intravenously with great effect, and it has been shown to be very effective against COVID-19 as well. [20,21] Dr. Andreas Kalcker directed a clinical study with doctors in Ecuador on COVID-19 patients using oral and intravenous chlorine dioxide. 97% of over 100 COVID-19 patients were vastly improved with clear remission of the severest symptoms after a four-day treatment regimen with chlorine dioxide. No deaths were reported. Oftentimes a dramatic clinical response was seen after only 24 hours. [22] A clinical study on the effects of oral chlorine dioxide on COVID-19 patients in Colombia was initiated in April of this year. [23]

Dexamethasone (improves)

Early findings in the Randomized Evaluation of COVid-19 thERapY (RECOVERY) Trial in the United Kingdom indicate that the addition of dexamethasone significantly improved clinical outcome in COVID-19 patients. A 35% reduction in death was seen in treated patients already dependent on mechanical ventilation, and a 20% reduction in death was seen in the treated patient group just receiving supplemental oxygen therapy. [24] This response of COVID-19 patients on ventilators is very consistent with the benefits of dexamethasone seen with acute respiratory distress syndrome unrelated to COVID-19. [25]

Budesonide (may prevent, improves, may cure)

Budesonide is a corticosteroid approved for inhalation via a nebulizer (Pulmicort Respules), and it is primarily used for persistent asthma and asthma exacerbations in children and infants as young as 12 months. [26,27] Dr. Richard Bartlett, a West Texas physician, has treated several dozen COVID-19 patients as of mid-June with nebulized budesonide, and he has asserted that all have promptly and dramatically responded positively and none have died. Sequential, or even combined, nebulizations of budesonide and hydrogen peroxide would appear to have great potential for a safe and rapidly effective treatment for any respiratory virus, including COVID-19. The hydrogen peroxide would serve to promptly kill the virus in the airways, and the corticosteroid would relieve the COVID-19 inflammation ("cytokine storm") and the associated shortness of breath. Nebulized budesonide has also been shown to be an effective treatment for preventing fungal infections of the nose and sinuses. [28]

Patients already on mechanical ventilation can also benefit greatly from the direct nebulization of therapeutic agents through the endotracheal tube. [29,30] This can certainly be done with budesonide [31] and hydrogen peroxide as well. Too many ventilator-dependent patients are left to eventually overcome the virus with whatever remaining immune capacity they have. Having a treatment that can directly attack the virus present in the lungs while relieving the inflammation with a resultant improvement in oxygenation should result in many of these patients getting weaned off the ventilators and eventually recovering completely. To date, being hospitalized with COVID-19 and eventually ending up on a ventilator still appears to be a death sentence for the vast majority of such patients.

Convalescent Plasma (improves, may cure)

Convalescent plasma is plasma collected from individuals who have recovered from an infectious disease resulting in the formation of antibodies. Depending on the severity of COVID-19 infection and the inherent immune capacity in a given patient, the transfusion of convalescent plasma from recovered COVID-19 patients has nearly always significantly reduced the viral load and clinically improved the patient. When the viral load is lowered dramatically, a clinical cure can be expected. A significantly improved survival rate has been seen in COVID-19 patients who have received convalescent plasma therapy. [\[32,33\]](#)

Chloroquine and Hydroxychloroquine (prevents, improves, cures)

I have had the opportunity to see clear-cut and dramatically positive clinical responses in six individuals with rapidly evolving symptoms consistent with fulminant COVID-19 infection treated with oral chloroquine phosphate. In these individuals (ranging from 35 to 65 years of age), therapy was initiated when breathing was very already very difficult and continuing to worsen. In all six, significant improvement in breathing was seen within about four hours after the first dose, with a complete clinical recovery seen after about an average of three days. The oldest individual had a pulse oximeter reading of 80 before the first dose of chloroquine, and the reading improved to 94 after about four hours as the labored breathing eased. The rapidity with which the shortness of breath evolved in all these individuals strongly suggested that respiratory failure secondary to COVID-19-induced acute respiratory distress syndrome was imminent. The chloroquine dosing was continued for several days after complete clinical resolution to prevent any possible clinical relapse. While a large, definitive study on chloroquine and COVID-19 remains to be completed, there is already a great deal of published evidence supporting its effectiveness and overall safety. [\[34,35\]](#) Also, a recent clinical trial demonstrated that hydroxychloroquine given with azithromycin eradicated or significantly decreased measured viral load in respiratory swabs. [\[36\]](#)

Both chloroquine and hydroxychloroquine are old drugs that are very safe at the doses shown to be effective in treating COVID-19, and they are both recognized as having significant nonspecific antiviral properties. Also, chloroquine, and probably hydroxychloroquine as well, are zinc ionophores, [\[37,38\]](#) which is likely the reason why they have such significant antiviral properties. As noted above in the discussion on zinc, agents that greatly facilitate zinc transport inside virus-infected cells rapidly accelerate virus destruction and clinical resolution of the viral infection. Many clinicians now feel that chloroquine and hydroxychloroquine therapy for COVID-19 and other viruses is optimized by concomitant zinc administration. [\[39,40\]](#) Certainly, there is no good reason to avoid taking zinc with these agents.

As might be expected, drugs as potently antiviral to COVID-19 as chloroquine and hydroxychloroquine would be expected to be effective preventive agents as well, particularly in the setting where exposure is known or strongly suspected to have taken place, or in a setting where repeated and substantial exposure will reliably occur, as in COVID-19-treating hospitals. [\[41,42\]](#) Many front-line health care workers are on such preventive protocols. But many of the physicians who are taking one of these agents to prevent COVID-19 infection are still resistant to giving it to infected patients. This is difficult to logically reconcile if patient welfare is of the uppermost concern.

Radiotherapy (improves, cures)

In a recent pilot trial at Emory University, five nursing home patients hospitalized with COVID-19 were given a single treatment of low-dose radiotherapy over the lungs. All five patients had radiographic evidence of pneumonia and required supplemental oxygen. All five were felt to be

deteriorating from a clinical perspective. The radiotherapy consisted of a 10- to 15-minute application of 1.5 Gy (150 rads). Four of the five patients were noted to have a rapid improvement in their breathing, and clinical recovery was seen to occur between 3 and 96 hours post-irradiation.

General Recommendations

While many supplement regimens can be used for COVID-19 prevention, such regimens should include at a minimum vitamin C, vitamin D, magnesium chloride, and zinc. Any of many additional quality nutrient and antioxidant supplements can be added as desired, largely dependent on expense and personal preference.

Nebulizations of powerful antipathogen agents, especially hydrogen peroxide, can readily prevent respiratory viral infections like COVID-19 from taking hold, and initiating such nebulizations even after an infection has been contracted will still make a substantial contribution to a more rapid and complete recovery.

As noted earlier, interventions such as ozone and ultraviolet blood treatments have the potential to be effective monotherapies, although it is always a good idea to accompany such treatments with the baseline supplementation regimen and nebulizations as mentioned above.

In the hospitalized setting, intravenous vitamin C and dexamethasone should always be part of the treatment regimen. Nebulizations with hydrogen peroxide and budesonide can accelerate recovery substantially. Also, patients already on ventilator support should always be given vitamin C and dexamethasone along with these nebulizations in addition to anything else felt to be indicated by the attending physician.

Low doses of hydroxychloroquine or chloroquine along with zinc should always be given in the setting of high-risk exposure. Azithromycin can be taken with these agents as well. Higher doses of these agents should always be part of any regimen in the treatment of a suspected or diagnosed COVID-19 patient, whether asymptomatic or already in the hospital.

Recap

While the politics of the COVID-19 pandemic are beyond the scope and aim of this article, there remain **no** valid medical reasons for not using any of the agents or interventions itemized above for either preventing or treating COVID-19 patients. Furthermore, many combinations of these treatments can be applied, depending on their availability and the clinical status of a given patient. Traditional medicine insists on "proof" of any therapy before it is used routinely, even though this standard of proof is never actually obtained for many of the usual prescription drug approaches to infections and other diseases. When an agent is inexpensive, virtually harmless, and with substantial evidence of providing benefit, there is no justification for a physician to refuse or even actively block its administration to a patient otherwise assured of prolonged suffering and likely death (as with hospitalized COVID-19 patients on ventilation support).

With the treatment options available, there is no good reason for most people to even contract COVID-19, and there is certainly no good reason for anyone to die from this virus, much less have a prolonged clinical course of infection with a great deal of needless suffering.

Please note: **None of the information in this article is intended to be utilized by anyone as direct medical advice. Rather, the article is intended only to make the reader aware of other treatment possibilities and documented scientific information that can be further discussed with a chosen health care professional.**

Requiring Covid vaccine to attend school on campus

Your Position (required) *

Oppose

Your Testimony/Comments

I oppose Covid vaccine required for in campus learning

This is insane! The Covid vaccines are a new vaccine technology that has never been used in mass vaccination. Long term studies are not complete and therefore the safety profile is incomplete. Medical treatments are supposed to be without coercion and with informed consent. UH is setting themselves up for liability and lawsuits. If a student becomes injured by the vaccine they the have grounds to sue UH for medical coercion and harm. Online learning is not an opt out option as online learning is not equitable

learning to in person learning. Additionally, there is no guarantee that having students vaccinated will prevent transmission. There is no guarantee that each students health will not be compromised if they get the vaccine.

thank you,
Dawn Poiani

Vaccine Mandate

Your Position (required) *

Oppose

Your Testimony/Comments

The Vaccine for Covid-19 has proven itself unreliable and faulty causing side affects in numerous recipients across our country. I oppose the Vaccine mandate due to the fact that Vaccine does not meet the standard of reliability or safety set by medical professionals. The Vaccine alone has killed over 50 times the amount of people over the limit for certification set by the CDC. I believe every individual should have the right to control what substances are injected into them and the freedom to exercise their rights as American citizens.

Mandatory Covid vaccine for students

Your Position (required) *

Oppose

Your Testimony/Comments

The Covid vaccine is not safe for human use via the FDA until it is fully tested. This will not happen until 2022 or 2023. These young people are the future of this nation and are not guinea pigs for an experimental pharmaceutical injection. This so called vaccine is not a vaccine as it does not contain attenuated virus. The Covid virus has never been isolated having been a disease vector for over 15 years. This jab is a biotech injection of which the contents have not been shared with us. It is unsafe to assume long term efficacy and a disease free future for it's recipients.

I strongly oppose this injection on our students!

Your Testimony/Comments

The policy being adopted "The University of Hawai'i System is adding the COVID-19 vaccination to its student health clearance requirements beginning in the fall 2021 semester." Is violation of the rights of the individual. Forcing your prospective students to take an untested experimental vaccine with no liability on the part of the creators is a travesty and abuse of power in the part of the school system. if we have learned anything in the past 14months it's that the Wuhan Coronavirus isn't what it's has seemed.

Your Testimony/Comments

Aloha, My name is Bud Stonebraker and I am a keiki o ka aina born and raised on the north shore of Oahu. I have 2 daughters attending UH Manoa. I want to say thank you for all you do for our community as regents. I am a Pastor and Kalo Farmer in Waimanalo.

Please, show leadership and courage in our islands and say "NO" to a vaccine mandate on the students. The danger of covid19 on this age group is effectively the same to that of the flu. This is incontrovertible. It is short sighted to require an experimental treatment upon a younger population which is largely unaffected.

According to the Vaccine Adverse Event Reaction System this vaccine has caused well over 4000 deaths. This is in just four months. The CDC recently reported that it has caused more deaths than all other vaccines combined over the last 20 years. In 1976 an experimental swine flu vaccine was pulled from the shelves because of around 100 deaths. Why should we be pushing this vaccine until it proves safe, especially for a virus that has a 99.9% survival rate among those college aged? In reality the virus is effectively as deadly as common influenza. And yet thousands of adverse reactions are being reported from these essentially unnecessary vaccines.

I had Covid earlier this year. Dozens of people I knew got it too. I was fine and they were too. One came close but, nobody I knew died of Covid. Strangely, I do know 4 people who have died as a result of the vaccine. I am a Pastor, I did their funeral.

I also know that many others have died with Covid. Reports from the CDC say that they had, on average, 2.5 comorbidities. That means they were already sick with almost three other things like obesity, diabetes, heart disease or hypertension. And they were, on average, over 80. That means that most people who died of Covid were older than 80 with two and a half comorbidities!! Why should we treat 20 year olds like they were frail.

The truth is that Covid is not to be feared and responded to in irrational ways. Mass vaccinations with untested biotechnology might make for a great beginning of a zombie movie but should not be foisted upon unsuspecting college students at the beginning of their lives.

Who knows what mRNA vaccines or their delivery mechanisms could do to fertility or brain function in years to come? Many doctors and scientists are sounding the alarm now on the effects of the spike protein on the brains of laboratory animals. Reports of blood clots are flooding our hospitals. Other scientists are greatly concerned that the virus has all the fingerprints of being built in a lab, the spike protein (sort of the crown in the corona) in particular. Incredibly, Doctor Michael Yeadon the former Vice President (and Chief Science Officer) of Pfizer (he was also their chief scientist) said this in a recent interview: "It is my considered view that it is entirely possible that this [vaccine] will be used for massive scale depopulation." Now, I understand that this is an outlandish claim but it is at least worthy of pause and reflection.

It shouldn't be beyond the limits of our understanding though. After all, history is replete with stories of cruelty and massacre. There is a saying about failing to learn from history. I think we all probably learned that in college. If we had good leaders.

What a burden you must bear as you decide the potential fate of thousands of young men and women. I am sincerely praying great wisdom for you.

Recently OSHA reported that employers who coerce employees into vaccination can be held liable for unforeseen negative side effects. This could potentially expose the University to great liability, something the board would surely rather avoid.

I also fear a negative shadow could fall upon the school. It could be argued that the faculty is at a greater risk from Covid than the student body. It seems strange that students, at less risk from this virus, should be forced to undergo an experimental medical device ("vaccine" is a misnomer), while the faculty, technically at greater risk should be exempted. People could say, "Oh, the height of hypocrisy!"

The truth is that Covid will not do any damage to the school. There are numerous proven therapeutics with near 100% efficacy. Truly, the danger lies in our potential over reaction to this. A vaccine mandate is so bad

for our keiki. Do not inject them with pseudo savior in a syringe. It is not pono. Thank you for your time. Much Aloha, Bud

Your Testimony/Comments

I oppose any mandatory vaccinations under the premise that there have been ZERO studies proving both the safety and efficacy of the experimental Covid vaccines. None of the Covid vaccines approved under emergency order by the FDA have not undergone normal rigorous testing and peer review and there is no guarantee that getting the vaccinations will either provide you with immunity or protect others around you from transmission. If the University of Hawaii decides to overreach it's authority in an issue involving each person's personal health decisions while also violating numerous Constitutional rights by creating a second class of citizens in those who choose NOT to get vaccinated, I hope the board of regents is prepared to also take on the fiscal and legal responsibility for any UH student who gets vaccinated and suffers any serious physical and/or emotional hard or trauma from having to adhere to any mandate.

Aloha,

My name is Rebecca McGuire and I am writing to oppose the requirement of this so-called "vaccine" It is dangerous and to force people to take it you are endangering the health of your students. People need the freedom to choose their own health.

Sincerely,
Rebecca McGuire

STOP VAX MANDATE

Trish Chock <trriish@yahoo.com>

Thu, May 20, 2021 at 4:22 AM

To: "david@hawaii.edu" <david@hawaii.edu>, "bor.testimony@hawaii.edu" <bor.testimony@hawaii.edu>

Please do not require students to take a vaccination for Covid 19. None of them are FDA approved and you would be coercing them to be human test subjects. You would be exposing them to potential injury or even death for a flu condition that is over 98% survivable. I have scrolled through the Vaers tab of the CDC website where thousands of adverse reactions and deaths have been logged. While no manufacturer can be held liable for the injuries or death, will the school be held responsible?

Thank you for your consideration.

Mahalo,

Pat Chock

Attn: UH Board of Regents

My name is meghan leialoha au and I am writing to oppose your requirement of this so-called "vaccine" you are proposing to mandate on the students of University of Hawai'i campuses, in order to return to physical learning. Side effects, such as seizures, magnetic reactions on shot sites, "Covid Arm" phenomenon, pregnancy complications, menstrual cycle severity and irregularities, symptoms worse than Covid-19 contraction, CDC's VAERS portal showing multiple young, healthy people dying of blood clots, strokes or heart attacks, certain hazardous ingredients, such as, but not limited to SM-102 amino acid being highly carcinogenic to humans, CDC charts for Hawaii's flu deaths reporting 637 deaths in 2017, but death the count of the entire Covid-19 pandemic, resulted in 491 deaths, yet none of the official news, or Hawai'i health officials are shedding light on the full spectrum of this available data. There is blatant coercion and incentivizing within society, pressuring and coercing, to get this experimental, unapproved treatment into every arm.

We understand this was a real variant to previous coronavirus outbreaks, like SARS-COV1, but we, as a nation, have NEVER required such irresponsible measures, to be allowed back into society. In fact, we have never disallowed people from living freely and inhibited their education, to require experimental medical procedures and these uninformed, coercive tactics are illegal. This type of so-called "vaccine " has never been done before and our family and friends are not required to be experimental subjects, without an FDA approval. Emergency Use Authorization does not override that law. This effects the student's mental health. Required participation, is highly irresponsible and may result in anxiety and heightened unnecessary stress in students and staff.

I respectfully demand, that all of you reject any proposals of any requirements to impede, infringe or neglect the right to choose, for students of our University of Hawai'i campuses. If these students display reactions, whether adverse, severely adverse, or worse, UH Board of Regents will be held liable, for their gross negligence and failure to fully inform all recipients of all the risks associated, as well as not allowing them the freedom to choose.

Best Regards,

meghan leialoha au

Zachary Wadas <zakwadas@gmail.com>
To: bor.testimony@hawaii.edu

Thu, May 20, 2021 at 8:44 AM

Good Morning University of Hawaii Board of Regents,

Im writing you this morning in OPPOSITION to the mandatory vaccine requirements for Fall of 2021. To start off, an annual flu season in Hawaii has a death toll of 637 people in 2017 according to the CDC. That's just in the flu season. Currently with covid over the past year 489 people have lost their lives. To this, has the UH system ever required a flu shot to attend school? The answer is a big No as I have never have had to get one, since starting to attend the UH CC system in 2014.

If students do not want to take an experimental MRNA vaccine issued under "Operation Warp Speed", that can only be done under a pandemic order. Then allow them to go to school and be educated upon their choice. We need to keep options open and not force students towards a certain ideology as that's what I believe higher education is about and creating free-thinkers. I do not feel safe taking this so called "vaccine" that doesn't help stop me from getting covid, but only makes my immune system supposedly better. However this would only help my immune system to only fight off a certain strain and would dedicate those white blood cells to fight that off and would weaken the rest of my body. Including adverses effects immediately after receiving the vaccine.

As the vaccine companies are not held liable for bodily harm. I would directly hold the University of Hawaii system directly accountable for any bodily harm caused by this vaccine be it long term or short term. With all of the adverse problems faced with this vaccine, such as my friends dad dying two days after getting the vaccine (lungs filled with water). I am highly opposed to this vaccine at my young age of 25 with a great immune system. I have never gotten covid and have been exposed to it with close family of my mom and brother. As for them, I took car of them and they never had to be hospitalized.

By stating that this vaccine needs to be taken or you cannot return to school is the same tactics used in Nazi Germany by Hitler. You are telling people that there is this "covid vaccine train" to which whoever gets on will be safe from covid. This is highly improbable as people who's get vaccinated still are not safe from getting covid.

This needs to be an option of the people in this free country. If the vaccine works so great for those who got it, then allow the people who are skeptical live their lives how they do and feel without hindering their ability to be educated toward the future.

Thanks for you time in reading this,
Zachary Wadas

Testimony on BOR VII.A.2. for 5.20.2021 on behalf of Academic Labor United

Alex Miller <alexjm@hawaii.edu>

Thu, May 20, 2021 at 8:56 AM

To: BOR Testimony <bor.testimony@hawaii.edu>

Aloha,

Below is my written testimony. I intended to give oral testimony today but was never sent the zoom link. I tuned into the live stream and it seems that the other person signed up did not either. I'm disappointed I was not able to give oral comments. Please make sure our written testimony is included in public record and distributed to the Regents.

Mahalo,
Alex Miller

Testimony:

Aloha Regents. My name is Alex Miller and I am the Chair of Academic Labor United, the thus far unrecognized labor union for Graduate Assistants at UH. Mahalo for the opportunity to speak today. I am writing about Agenda Item VII.A.2. regarding Academic Labor United's filing of complaint against the UH Board of Regents, the Hawai'i Labor Relations Board, and State of Hawai'i because for nearly 50 years graduate assistants have been actively excluded from the right to collective bargaining. We seek to challenge this decision in court. I am writing today to give you some context for why we have filed suit.

The Hawaii State Constitution Article XIII, Section 2 states that "Persons in public employment shall have the right to organize for the purpose of collective bargaining as provided by law." However, in 1972, during the formation of the private sector unions in Hawai'i, the Public Employee Relations Board, the predecessor to the HLRB, ruled that graduate assistants would be excluded from Collective Bargaining Units 7 or 8, the units which include faculty and staff at UH to this day. The decision was based on the nature of GA work, maintaining that we were actually more similar to private secretaries for faculty, and on precedence set by decisions in Michigan and at the federal level.

I am not sure what graduate student labor looked like in 1972, however, I know that today, graduate assistants provide essential labor to the University that is comparable to the work provided by both faculty and staff. Graduate assistants do not only assist faculty, but many teach their own sections or even classes entirely and are responsible for providing quality education to our undergraduates. Many conduct research in partnership with faculty. My own position as a GA is at the Center on Disability, where I have worked one-on-one with undergraduate students with disabilities not just at Mānoa but at KCC, Hawaii CC and UH Hilo to help them access and navigate higher education. As a GA, I actually took on some of the responsibilities of one of my supervisors when he moved to a new job in 2018. Previously, he was afforded the right to union representation for doing the same work. As a worker, I deserve that right as well.

The Michigan decision cited in the 1972 PERB decision has since been nullified, and University of Michigan Graduate assistants now have a thriving local union which bargains with UM for better working conditions and wages for their members. At the federal level, the NLRB has recognized graduate assistants as employees who deserve a union as well. In fact, graduate student workers at 6 of UH Mānoa's 9 benchmark institutions are represented by recognized unions, and graduate student workers at public universities in 17 other states have unions as well. If UH wants to keep up with these other universities and attract high quality graduate students, we need to make it an attractive place to live, work, and study. Recognizing our rights as workers is necessary and massive step in that direction.

Academic Labor United formed in 2017 after 2 decades of attempts by graduate assistants to work with state legislators to pass legislation forming a collective bargaining unit for GAs. We again put forth a similar bill in 2018, 2019, and 2020. Despite this, legislators and the governor have STILL never passed it into law. In the deciding opinion of 2002 Hawaii State Supreme Court Case AFSCME vs. Yogi, in which Justice Ramil was joined by our regent, Justice Acoba, the two justices wrote that "we reject Defendants' contention that the phrase "as provided by law" gave the legislature complete discretion to take away public employees' right to organize for the purpose of collective bargaining."

We maintain that the 1972 PERB decisions together with the many years of decisive inaction by state politicians have effectively taken away our constitutional right to organize for the purpose of collective bargaining. Partly to blame for politicians' inaction is the UH administration's continual lobbying against graduate assistants' rights and interests at the state legislature.

These union busting tactics by our bosses are extremely disappointing, but unfortunately unsurprising. An example of the kinds of things they been saying for years can be found In Star Advertiser's recent news article announcing the filing our lawsuit. In it, UH spokesman Dan Meisenzahl claimed "The university considers GAs to be students first and employees second..."

We receive paychecks from the state, just like every other public employee. The fact that we are students is irrelevant. The state constitution does not say "except for people who are students."

Meisenzahl also stated "GA positions are a component of graduate education and include training that is designed to help students prepare for their future careers or to advance in current careers."

If it was a necessary component of graduate education, why do not all graduate students have GA positions? UH Mānoa has 4,859 graduate students, yet only roughly 1/4 have GA positions. We also have no standardized performance reviews or mentoring. Many departments offer little to no training, or no performance reviews. This is something a union could bargain to standardize in a contract.

It is misleading to call the experience of a GA position "training." This is how careers work. You occupy one position, gain experience, then are promoted or apply for a position that requires more experience. It has NOTHING to do with whether or not those workers have a right to collective bargaining.

Another quote: "The university considers a graduate assistantship a form of financial assistance for graduate students through part-time work."

Our wages are not charity. They are not a grant. They are not free. GAs exchange our labor hours for a paycheck, the same as every worker.

Regents, this is not a complicated issue. GAs are workers. We have a human and constitutional right to unionize. Our bosses, state politicians, and state agencies have denied us this right for half a century. That's why we have filed this lawsuit. Mahalo.

Vaccine requirements at UH

Your Position (required) *

Oppose

Your Testimony/Comments

I oppose the experimental COVID shots as a requirement to attend classes at UH. Since COVID vaccines are not FDA approved (only approved for emergency use), will the University of Hawaii be held liable for any adverse reactions to UH staff and students? VAERS data shows 192,954 reports of adverse reactions after taking the jab, including 4,057 deaths and 17,190 serious injuries from Dec 14, 2020 to May 7, 2021. It is also discriminatory to not allow the unvaccinated access to UH classrooms as well as a violation of human and religious rights.

Your Testimony/Comments

Dear Board of Regents,

Right upfront, thank you for hearing my heart! Please see the truth of it all.

There are 19 States that have lifted their Covid Restrictions. Hawaii should be among, having mortality rate similar previous years' annual flu! And these Covid mRNA injections are issued under Emergency Use Authorization- not FDA approved at least till 2023. Fact-checked. They are still in experimental stage on mass scale.

Mandating covid "vaccines" for students for in class attendance is illegal; discriminatory/ unconstitutional, a call for lawsuits.

Also, should the students be injured by these experimental injections for the sake of attending in class, you will certainly face a huge class lawsuit.

You may have been offered \$ promises for pushing this agenda like many private businesses do now, but this will not end well for anyone, before man and God. You will be held accountable for every injury.

Our Ohana understands this BigPharma - a medical apartheid power grab over us and our children.

You are given a high position of authority to protect our individual freedoms, civil liberties and privacy, and to prohibit discrimination based on health status. No health emergency in the past much more severe than Covid with 99.99- 99.95% survival rate was ever an excuse for locking us up, invasive tests via nostril like cattle, and now mandating form of coercion to take Covid gene therapy in order to be in class in person. It seems like a nightmare dream, where people lost common sense and sleepwalking into abyss.

Please, vote not against reason and conscience.

Covid Vaccine is an Experimental Vaccine. The U.S. Centers for Disease Control and Prevention (CDC) in August, stated that "COVID-19 vaccines are NOT allowed to be mandated."

UH choosing to mandate these for in class attendance would engage in DISCRIMINATION against those who already had Covid, or have allergies, or simply decline to be injected with experimental treatment, deceitfully marketed as Covid "vaccines."

Hawaii county pilot program for preferential treatment for transpacific travelers fits the same category of coercion/ discrimination as Lt Governor Green's Vaccine Passport. This is absolutely shredding of our Constitution and freedom as we know it.

I am not against vaccines if they work but these do not stop transmission from vaccinated individuals, in fact well renowned medical authorities warn that individuals with Covid mRNA vaccines generate these new variants. Only 1% of death is reported to VAERS and nearly 4,000 died. What would be the figure if 100% be reported? Reported injuries are in the hundreds of thousands and this only in few months of mass injections. What will it do in the long term to us all / see top scientist warning and letters to CDC & WHO (Dr. Yeadon, Dr. G. V. Bossche, or Great Barrington Declaration).

Please, research and do what's legal and right for the students of Hawaii. Don't listen to the fear mongering media, puppets of the Oligarchs.

Can't simply fool any longer any rational being - it's fully visible how this "emergency" is being stretched, dangling the carrot of freedom from restriction if one takes experimental Covid jab, as even year supply of donuts is offered for it. It's clear it has nothing to do with our health or safety but control to alter, DEPOPULATE and the rest of humanity that survives be pushed into digital slavery, cashless central control system, and down the line no private property- SEE WORLD ECONOMIC FORUM- it's all in the UN agenda, too, for 2020-2030, including much worse pandemic in 2025-28 already announced by John Hapkins University (Bill Gates \$) called SPARS. Surprisingly, it's even in the google search, as it was the "prediction" for this current SARS Covid 19.

In closing, will you participate in actions that are crimes against humanity? According to the Nuremberg Code of 1947, it is ILLEGAL to coerce or mandate ANY experimental drug! Creating classes of people based on their health status is an attack on our Equal Rights 14th Amendment!

And here is my personal advice for your personal use. And let UH become a leader among other universities by winning example of standing for righteousness and not for wicked Agenda against humanity. Let UH shine the path to protect our God given bodily integrity and civil liberties:

Have your students be familiar with health protocols to treat people while recovering with well known therapeutic such as Vit D3, C, Zink and IVERMECTIN, as true cure used by thousands of doctors for a recovery within 24 -48 hours) / no one has to be dominated by fear of this covid flu and let media be informed to say so. Unfortunately, our medical system only advice is to isolate and go to hospital if you suffer shortness of breath! I know this from personal experience being an elderly and having no problem recovering from Covid, following this protocol, as there was no help from medical cartel.

Why this had not been given at CDC level? Countless lives would have been spared and this epidemic be long over! So many good doctors use this protocol and didn't lose one life to this Covid flu! Will you choose to help Big Pharma/ BIG tech censoring our free speech in holding us hostage? They were prolonging this grip on us until rolling out their harmful product to the whole world is completed and all who survive enter into neo-

feudalism shackles, called Great Reset. Please, research and how all is fitting this wicked agenda, and you are not exempt from it, no matter the position.

Perhaps, you are for such a time as this highly responsible position to do the right thing. I pray God's delayed judgement but if not, His purpose will be done even through wicked actions, in no way holding the guilty excused. We all have conscience, as the witness.

Mahalo for hearing me out!

The life of the land perpetuates in righteousness!

Hopeful,
Elizabeth Diamond

Reported injuries are in the hundreds of thousands and this only in few months of mass injections. What will it do in the long term to us all / see top scientist warning and letters to CDC & WHO (Dr. Yeadon, Dr. G. V. Bossche, or Great Barrington Declaration).

Please, research and do what's legal and right for the students of Hawaii. Don't listen to the fear mongering media, puppets of the Oligarchs.

Can't simply fool any longer any rational being - it's fully visible how this "emergency" is being stretched, dangling the carrot of freedom from restriction if one takes experimental Covid jab, as even year supply of donuts is offered for it. It's clear it has nothing to do with our health or safety but control to alter, DEPOPULATE and the rest of humanity that survives be pushed into digital slavery, cashless central control system, and down the line no private property- SEE WORLD ECONOMIC FORUM- it's all in the UN agenda, too, for 2020-2030, including much worse pandemic in 2025-28 already announced by John Hapkins University (Bill Gates \$) called SPARS. Surprisingly, it's even in the google search, as it was the "prediction" for this current SARS Covid 19.

In closing, will you participate in actions that are crimes against humanity? According to the Nuremberg Code of 1947, it is ILLEGAL to coerce or mandate ANY experimental drug! Creating classes of people based on their health status is an attack on our Equal Rights 14th Amendment!

And here is my personal advice for your personal use. And let UH become a leader among other universities by winning example of standing for righteousness and not for wicked Agenda against humanity. Let UH shine the path to protect our God given bodily integrity and civil liberties:

Have your students be familiar with health protocols to treat people while recovering with well known therapeutic such as Vit D3, C, Zink and IVERMECTIN, as true cure used by thousands of doctors for a recovery within 24 -48 hours) / no one has to be dominated by fear of this covid flu and let media be informed to say so. Unfortunately, our medical system only advice is to isolate and go to hospital if you suffer shortness of breath! I know this from personal experience being an elderly and having no problem recovering from Covid, following this protocol, as there was no help from medical cartel.

Why this had not been given at CDC level? Countless lives would have been spared and this epidemic be long over! So many good doctors use this protocol and didn't lose one life to this Covid flu! Will you choose to help Big Pharma/ BIG tech censoring our free speech in holding us hostage? They were prolonging this grip on us until rolling out their harmful product to the whole world is completed and all who survive enter into neo-feudalism shackles, called Great Reset. Please, research and how all is fitting this wicked agenda, and you are not exempt from it, no matter the position.

Perhaps, you are for such a time as this highly responsible position to do the right thing. I pray God's delayed judgement but if not, His purpose will be done even through wicked actions, in no way holding the guilty excused. We all have conscience, as the witness.

Mahalo for hearing me out!

The life of the land perpetuates in righteousness!

Hopeful,
Elizabeth Diamond

Requiring COVID shots to attend in the fall

Your Position (required) *

Oppose

Your Testimony/Comments

Emergency Use Authorization because it's only experimental, what you want to do is illegal and will open up the school to a high risk of liability from injury. The age group of the students is one of the least at risk of dying from infection by sarscov2 so what you want to do is unnecessary. I will advise every student I know to DEFER their attendance until you drop this harmful policy. My body my choice.

Your Testimony/Comments

I'm opposing that no student take a emergency use vaccine that is not have a federal license. It's against the law to make any individual take something for emergency use. Numberg code states that no business, school or entity force anyone to take such a thing. Until it's it's fda approved... which won't be until 2024...

Mandatory shots for SARS2-covid

Your Position (required) *

Oppose

Your Testimony/Comments

I am submitting testimony against the mandatory Emergency Use Authorization shot requirement.

Requiring the Emergency Use Authorized shot is not providing immunity according to the CDC website page on Immunity Basics. To require such is a violation of health privacy. People would be required to explain why they are not able to take the shot. By asking people to disclose that they have a medical condition is a violation of their right to privacy. Also, the shot is being used under emergency authorization. It has not been properly tested and approved by the FDA. To be so irresponsible and jeopardize the lives of those who may

have allergies or contradictions with medications are unknown. This could put people's lives at risk for an unapproved shot which doesn't provide immunity. You need to have someone read the manufacturer's websites in detail. Their information states their shots do not provide immunity. It is not possible for them to say it does because that would be illegal and unethical. Requiring this will only open the system to law suits in the future when it comes out that the shot is not a vaccine.

The Salk Institute has released a study stating that it is a vascular disease, not a respiratory disease. Has anyone on the Board looked into that? Do you want people to be required to take a shot for a disease then be told that they didn't know what kind of disease it is so the shot doesn't work? Who did the studies that the news reports use for their statistics on the effectiveness? There's too many unanswered questions to be requiring an Emergency Use Authorization shot which doesn't provide immunity to require it be mandatory.

Mandating of covid vaccine upon UH students and faculty

Your Position (required) *

Oppose

Your Testimony/Comments

I oppose the mandating of covid 19 vaccine upon students and faculty of the university of Hawaii.

It should remain a free and personal choice of every individual. As a parent with 3 children in the UH system, I am not comfortable with a vaccine that has not undergone long term trials. We personally know individuals who have had adverse effects after the shot and I do not want to risk subjecting my children to any possible negative side effects.

Let's not give our youth an excuse to not pursue college.

Thank you

University of Hawaii to require students to get COVID-19 vaccine

Your Position (required) *

Oppose

Your Testimony/Comments

The Pfizer & Moderna mRNA vaccines are based on an entirely new technology that are more analogous to genetic manipulation than traditional vaccination. They are designed to induce an immune response against a protein that the body has been prompted to produce, by incorporating a synthetic viral gene (in the form of mRNA) into the cell genome. It is hypothesized that this immune response will be limited to the target protein & not be directed to any human proteins, but there is no current data that can rule out the possibility that this technology may trigger autoimmune diseases, which could take years to manifest.

Few people seem to realize that attempts to develop a vaccine against coronavirus have been taking place for almost 2 decades—at least since the SARS-CoV-2 in 2002. These have all been unsuccessful, due to serious safety concerns in the animal trials where immune enhancement or antibody-dependent enhancement (ADE) was observed, which caused animals to develop more severe disease when exposed to the virus after immunization. It is unknown at this stage, whether the currently administered vaccines will trigger this devastating effect, as animal trials during Trump's Operation Warp Speed were limited or skipped and the reaction to subsequent exposure to SARS-CoV-2 virus in humans has not been specifically tested. The possibility of triggering ADE remains a significant concern.

The Pfizer and Moderna vaccines contain polyethylene glycol (PEG). PEG is a known allergen which carries a risk of serious, potentially fatal allergic reactions. Even within the short amount of time of the vaccine being used, there have been many reports of serious allergic reactions and anaphylaxis, which are occurring at a higher rate than normally expected for vaccines. In response to these reports, the CDC issued advice that anyone allergic to PEG or its close relative, Polysorbate, should not receive either mRNA vaccine. Neurological damage and complications have previously been reported following vaccinations. In the Covid-19 vaccine trials, cases of transverse myelitis, which affects the spinal cord, have been reported as well as other neurological adverse events, such as Bell's palsy (paralysis of the facial nerve) reported in the trial data. There have also been reports of encephalomyelitis following Covid-19 vaccination.

It is understandable that the University of Hawaii wants to protect their faculty and students. However, with respect to Covid-19 vaccines, this desire should be weighed against the state of the existing evidence regarding possible medium and long-term effects of this new mRNA vaccination technology. Many concerns have been raised by scientists regarding possible adverse effects, which at this stage remain unrefuted due to lack of data.

Covid-19 vaccine manufacturers demanded and have been granted exemption from any liability for adverse effects caused by their products as they could not take the financial risk of liability. If UH mandates Covid-19 vaccines then it will surely give rise to claims against UH from both students & employees when they suffer adverse reactions to the vaccine.

If UH makes covid-19 vaccines mandatory then they need to give students & faculty the assurance that if they do have an adverse reaction, they'll be taken care of by the University. (Whether it is time off needed to recover from the more common mild side effects—such as fever, shivering, body pains, joint pain, and fatigue which normally dissipate in a matter of days—and health care for those who suffer a medical complication; and monetary compensation in case of any moderate to severe vaccine side effects or injuries, to cover for any loss of work and out-of-pocket expenses; as well as damages for pain and suffering, to include the cost of any future medical costs and death benefits in case someone dies from a vaccine-induced complication).

This is submitted in opposition to mandated COVID vaccinations for students, staff, and faculty.

Your Position (required) *

Oppose

Your Testimony/Comments

Under no circumstance should any faculty or student be forced to take an experimental vaccine that is authorized for emergency use only. Not one experimental vaccine is approved based on long-term human studies. There are other low-cost, proven medications that have been on the market for decades with high success treating COVID with minimal side effects. Even if a COVID vaccine is FDA approved in the future, a vaccine was never necessary. The Vaccine Adverse Event Reporting System (VAERS) has thousands of reports of injury/ damaging side effects from the COVID experimental vaccines including death in some

instances. There have been no long term human studies. There must be informed consent. Most people are unaware of the materials contained in the vaccine when they agree to take it and since it is experimental they give up their right for compensation in the event of injury. Our medical records are private and protected under law. Schools should not have access to one's vaccination status.

Testimony for UH Board of Regents Meeting 5/20/2021

Re: **Strong opposition** to COVID shot requirement for students and online-only learning available to those who seek exemption

Aloha UH Board of Regents,

UH **must not coerce** the taking of COVID **shots** [they're not really vaccines, but rather **experimental gene therapies** which are not yet fully FDA-approved for lack of adequate long-term safety and efficacy testing ([video clip of Dr. Larry Palevsky](#))]; the shots do not even prevent transmission of the SARS -CoV2 virus, according to Dr. Anthony Fauci himself. This virus has a 99+% recovery rate in youth.

The public has been beholden to liberty-crushing Emergency Proclamation policies based upon PCR tested “cases” of unreported cycle thresholds with test results, after the inventor of PCR Kary Mullis stated that these tests ought never be used to diagnose infectious diseases—which alarmingly is how they’ve been used in Hawai`i and elsewhere. Higher cycle thresholds increase the chance of positive tests being false positives. We need a full audit of all “cases” and COVID-attributed deaths, as well as better understood definitions of “cases” and “COVID deaths” among the public.

The government lockdowns (without there being any actual, current emergency of hospital over-utilization to justify the ongoing Emergency Proclamation status) and perpetual fear-mongering campaigns in news and other media have put the entire public under duress and rendered individuals highly susceptible to undue coercion, incentivization of and promotion of volunteering themselves and their minor children to take these experimental gene therapies as society’s collective key to “getting back to normal.”

Meanwhile, those who suffer adverse events after taking these **liability-free** shots are on their own to deal with any debilitating sequelae.

The shots are liability-free for manufacturers and medical providers. It is dubious that universities and employers will share similar liability protection for requiring these shots under these circumstances of duress, incentivization, promotion and lack of adequately informed consent.

Over four thousand reports of death post COVID shots and nearly two hundred thousand adverse reaction reports as of May 7, 2021 have been logged into the Vaccine Adverse Events Reporting System (VAERS) database.

*VAERS HHS releases COVID Data weekly, but they release LAST WEEK'S data. So an update will always lag a week behind. When launched, OpenVAERS used the Download date. We have switched to the "data through" data provided by VAERS.

Miscarriages and stillbirths reportedly are increasing among vaccinated women (see VAERS). What will be the long-term effects on fertility? We don't yet have data. How can an institution of higher learning coerce these potentially harmful products without such data and still retain its credibility and good reputation while injuries and deaths pile up?

Even if FDA were to rubber stamp the shot(s) in upcoming months, sensible young people familiar with the growing body of VAERS data would be wise to hesitate taking these shots based on personal cost vs benefit analysis. Do the risks outweigh the rewards in non-elderly people? People are not being adequately apprised of up-to-date known risks by their medical providers offering these shots—regardless of EUA guidelines.

Yale epidemiology professor Harvey Risch stated on camera that clinicians are telling him that approximately 60% of recent hospitalized COVID cases are among COVID-vaccinated individuals. Also, people taking the shots reportedly are testing positive for COVID. What does that mean for the utility of campus testing programs?

People taking COVID shots **are** the clinical trials' test subjects—mostly unwitting—a flagrant breach of the Nuremberg Code.

It is in fact illegal to require an Emergency Use-authorized product without a choice for individuals to decline. Those who decline should not be penalized for doing so. Offering only online learning instead of the full campus experience to students who invoke exemptions is, at best, unethical and unwise, given the fact that the shots do not even prevent transmission, and taint the tests. The rationale offered for the requirement therefore makes no sense, and is polarizing to society.

If the shots work, then those who choose them need not worry about others' decisions to take them or not. If the shots don't work well, then **why** require them?

I urge you strongly to revoke this oppressive, ill-conceived “vaccine” requirement with numerous adverse consequences to our society and without scientifically proven benefit.

See below the following letters of notice for colleges, universities and employers mandating COVID vaccines, tests and masks.

Sincerely,

Laurie West
Hawai'i resident and parent of college-bound high schoolers

**NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS
MANDATING COVID-19 VACCINES**

April 26, 2021

This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely “may be effective.” Federal law states:

Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:

individuals to whom the product is administered are informed—

- (I)** that the Secretary has authorized the emergency use of the product;
- (II)** of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). The court held: “...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs.” *Id.* at 135. No court has ever upheld a mandate for an EUA vaccine.

The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.

**NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS
MANDATING COVID-19 TESTS**

April 26, 2021

This serves as notice that the mandate for any individual to be tested against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 tests, whether polymerase chain reaction (PCR), antigen tests or others, are authorized, not approved or licensed, by the federal government; they are [Emergency Use Authorization](#) (EUA) only. They merely “may be effective.” Federal law states:

Title [21 U.S.C. § 360bbb-3\(e\)\(1\)\(A\)\(ii\)\(I-III\)](#) of the Federal Food, Drug, and Cosmetic Act states:

individuals to whom the product is administered are informed—

- (I)** that the Secretary has authorized the emergency use of the product;
- (II)** of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that even the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003).

The Food and Drug Administration (FDA) has issued Emergency Use Authorizations for [over 200 different test kits](#) manufactured by various organizations. Each of FDA’s EUA letters relies on 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I- III), stating: “This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of SARS-CoV-2....”

Liability for coercing participation in a medical experiment, and any injury from it, may be incalculable. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA tests.

NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS MANDATING COVID-19 MASKS

April 26, 2021

This serves as notice that the mandate for any individual to wear a mask against COVID-19 for employment or attendance at a university or other institution violates federal law. All [COVID-19 masks](#), whether surgical, N95 or other respirators, are authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely “may be effective.” Federal law states:

Title [21 U.S.C. § 360bbb-3\(e\)\(1\)\(A\)\(ii\)\(I-III\)](#) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) states:

individuals to whom the product is administered are informed—

- (I) that the Secretary has authorized the emergency use of the product;
- (II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) **of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that even the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003).

In a [letter](#) dated April 24, 2020, the Food and Drug Administration stated that authorized face masks must be labelled accurately and may not be labeled in a way that misrepresents the product’s intended use as “source control to help prevent the spread of SARS-CoV-2.” The letter specifies that the labeling “may not state or imply that the product is intended for antimicrobial or antiviral protection or related uses or is for use such as infection prevention or reduction.” Any EUA mandate requiring individuals to wear face masks conflicts with Section 360bbb-3(e)(1)(A)(ii)(I-III), which provides that the person must be informed of the option to refuse to wear the device.

Liability for forced participation in a medical experiment, including possible injury, may be incalculable. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse to wear EUA masks.
