UNIVERSITY OF HAWAI'I SYSTEM LEGISLATIVE TESTIMONY

UNIVERSITY OF HAWAI'I SYSTEM BUDGET BRIEFING

Testimony Presented Before the Senate Committee on Ways and Means

January 15, 2009

by

David McClain President University of Hawai'i System

Testimony of David McClain President, University of Hawai'i System Presented to the Senate Ways and Means Committee January 15, 2009

Chair Kim and members of the Senate Ways and Means Committee: Mahalo for your ongoing support of the University of Hawai'i, and for this opportunity to present to you the Biennium Budget request approved last fall by our Board of Regents. I will also be providing testimony on the Executive Budget. Joining me today are the chancellors from each of our 10 campuses, along with several other members of my leadership team, as well as the directors of the Aquarium and the Small Business Development Center.

Per the 2009 Budget Briefing Instructions issued jointly by you and House Finance Committee Chair Oshiro, I will focus my remarks on how the current economic and fiscal conditions are affecting UH's operations. In part in response to the downturn, enrollment at our 10 campuses increased by nearly 3,000 students in fall 2008 from fall 2007 levels, to over 53,500 students, the highest enrollment of degree-seeking students the University has ever served in its 101-year history. Since fall 2000 enrollment is up by some 9,000 students. At the same time, we've absorbed a \$3.9 million restriction (about 0.5%) in general funds available for our fiscal 2009 operating budget, and we're coping with higher energy costs.

Serving more students with fewer general funds available for operations means that our campuses have adapted in some cases by increasing section sizes, and in others by taking a closer look at whether to hold classes with small enrollments. We have looked to save funds via energy conservation measures, by not filling vacant positions, by deferring some discretionary spending such as equipment replacement, and of course we have employed tuition, research overhead, and other special & revolving funds to take up some of the fiscal slack.

In our centennial academic year of 2007-2008, the University reviewed the UH mission and strategic plan, and the Board of Regents approved the adoption of a small number of related strategic outcomes and performance goals. Some of these goals are: producing more graduates (from just under 8,000 currently to over 10,500 in 2015); growing our production of graduates in key workforce occupations such as teaching and nursing by 40% by 2015; increasing educational attainment in underserved regions (e.g. West O'ahu and West Hawai'i) and populations (e.g. Native Hawaiians); diversifying the economy by growing our \$400-million research and scientific enterprise; and decreasing our deferred maintenance backlog by 2/3 by 2015.

These outcomes have driven our biennium budget preparation process, from stocktaking to review by the biennium budget advisory committee to review by the council of chancellors and then the Board of Regents. Similarly, as we adjust to a diminished flow of general funds revenue, these outcomes and goals connected with them will guide us in where to downsize.

Our operating budget request for FY 2010 and FY 2011 mirrors the Governor's request that we prepare budgets with three scenarios: a \$13.5 million reduction in general funds; a \$22.0 million reduction, and a \$30.6 million reduction. Because of the rising demand for our services, we've proposed to offset these reductions partially by drawing on our tuition, research overhead, and other special and revolving funds. The offsets range from 1/3 of the smallest reduction scenario to slightly more than 2/3 of the largest reduction requested.

The Executive Budget includes a \$13.5 million reduction in general funds for the University. Also included in the Executive Budget are \$5.5 million in additional funding for a number of programs in science education.

The University's capital improvements budget as approved by the Board of Regents emphasizes in its first three priorities some \$350 million in health and safety, capital renewal and deferred maintenance, and equipment for new buildings coming on stream. The budget includes planning and design funds for a number of new buildings (priority #4), a UH System information technology building to be co-funded by UH and the State (priority #5), and four new buildings (priority #6 -- one each at UH Mānoa (a new classroom building), UH Hilo (College of Hawaiian Language building), Honolulu Community College (science building) and Leeward Community College (innovation instruction building)). Priority #7 is authorization for special purpose revenue bond funding of a research facility and faculty and student housing at UH Mānoa.

The Executive Budget supports our #7 priority, and priorities #1-#3. However, funding for our first three priorities is capped at \$75 million in each year, "to be allocated at UH's discretion." Assuming we fund all of our priority #1, health and safety, at \$11 million, a cap at this \$75 million level means that we will make no headway at all on our deferred maintenance backlog.

To turbocharge this spending and shorten implementation delays, we're requesting more flexibility in procurement from the Governor and Legislature. We're also requesting \$250 million in authority to issue our own bonds, funded by our own revenues, principally to build more student and faculty housing.

The people, projects and programs of the University of Hawai'i are providing a bridge across the valley of recession to a brighter, more productive future for Hawai'i. As I recently stated in an op-ed in the *Honolulu Advertiser*, UH is part of the solution to Hawai'i's current economic problems. We're giving more Hawai'i residents the skills they need to be employable, create new businesses, and lessen our dependence on imported energy; and our capital renewal and deferred maintenance program of nearly \$350 million will help pump-prime the economy and directly create or preserve several thousand jobs. I hope you'll agree that now is the moment for bold action in support of public higher education in Hawai'i. Mahalo for your attention, and for your continuing support.

Hawaii Revised Statutes 304A-102 states:

The purposes of the university are to give thorough instruction and conduct research in, and disseminate knowledge of, agriculture, mechanic arts, mathematical, physical, natural, economic, political, and social sciences, languages, literature, history, philosophy, and such other branches of advanced learning as the board of regents from time to time may prescribe and to give such military instruction as the board of regents may prescribe and that the federal government requires.

University of Hawaii Board of Regents Policy states:

The primary mission of the University of Hawai'i system is to provide environments in which faculty and students can discover, examine critically, preserve and transmit the knowledge, wisdom, and values that will help ensure the survival of the present and future generations with improvement in the quality of life.

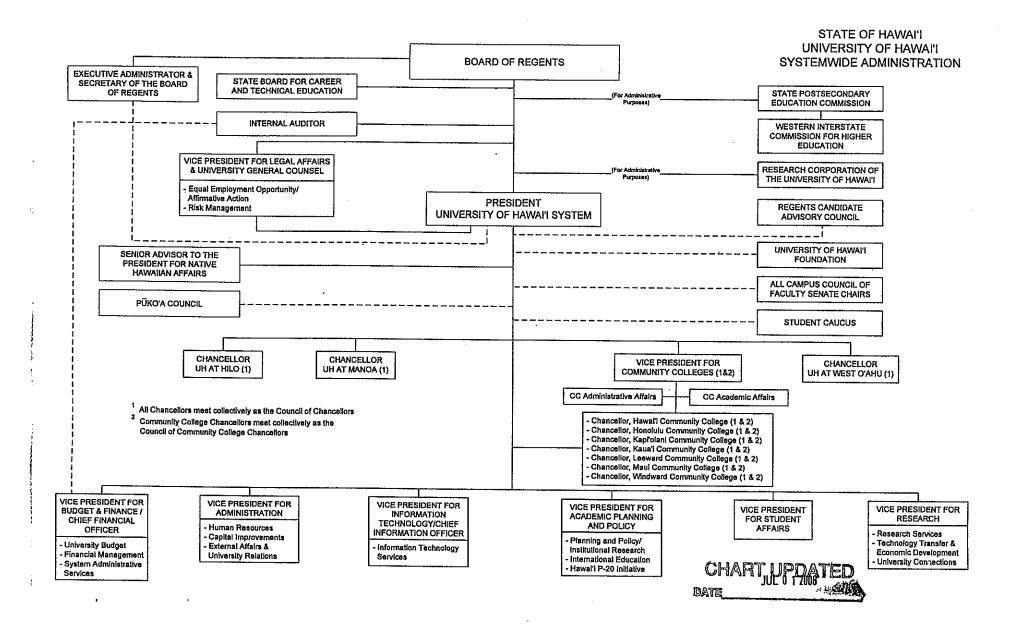

The UH System Strategic Plan approved by the Board of Regents in 2002 provides a fuller description as follows:

The common purpose of the University of Hawaii System of institutions is to serve the public by creating, preserving, and transmitting knowledge in a multicultural environment. The University is positioned to take advantage of Hawaii's unique location, physical and biological environment, and rich cultural setting. At all levels in the academy, students and teachers engage in the mastery and discovery of knowledge to advance the values and goals of a democratic society and ensure the survival of present and future generations with improvement in the quality of life. Functioning as a system, the purposes of the University of Hawaii are to:

Provide all qualified people in Hawaii with equal opportunity for high quality college and university education and training.

- Provide a variety of entry points into a comprehensive set of postsecondary educational offerings, allowing flexibility for students to move within the system to meet individual educational and professional goals.
- Advance missions that promote distinctive pathways to excellence, differentially emphasizing instruction, research, and service while fostering a cohesive response to state needs and participation in the global community.

As the only public higher education institution in Hawaii, the UH System bears a special responsibility to prepare a highly educated citizenry. In addition, the System supports the creation of quality jobs and the preparation of an educated workforce to fill them. Building on a strong liberal arts foundation, the UH System prepares the full array of workers from technicians, physicians, and scientists to artists, teachers, and marketing specialists—who are needed in a technologically advanced and culturally diverse island state.

	Priority L	list of Functions	
Priority #	Description of Functions	Performance Measures	<u>Statutory</u> <u>Reference</u> (HRS, PL, etc.)
1	"The purposes of the university are to give thorough instruction and conduct instruction and conduct research in, and disseminate knowledge of, agriculture, mechanic arts, mathematical, physical, natural, economic, political, and social sciences, languages, literature, history, philosophy, and such other branches of advanced learning as the board of regents from time to time prescribe and that the federal government requires. The standard of instruction shall be equal to that given and required in similar universities on the mainland United States. Upon the successful completion of prescribed courses, the board of regents may confer a corresponding degree upon every student who becomes entitled thereto. [L 2006, c 75, pt of §2]"	 Increase degree attainment of Native Hawaiians at UH 6- 9% per year from FY2008-2015. Increase degrees and certificates of achievement earned at UH 3-6% per year from FY 2008-2015. Increase disbursement of Pell Grants 5% per year from FY 2009-2015. Increase the going rates of public and private high schools to UH system campuses 3% per year from FY 2008-2015. Increase UH extramural fund support 3% per year from FY 2008-2015. Increase UH extramural fund support 3% per year from FY 2008-2015. Increase UH invention disclosures, patents, and licenses from 5-15% per year from FY 2008-2015. Increase UH degrees in STEM fields 3% per year from FY 2008-2015. Increase output of UH graduates for projected vacancies in workforce shortage areas 5% per year from 2008-2015. Decrease deferred maintenance backlog to \$126 million by 2015. 	HRS§304A-102

Maintaining the state aquarium for the general public	1	6.00		340,352	-	A
The Waikiki Aquarium is open everyday to the public and maintains over 3,500 animal from 500 different species. Annually we host over 300,000 visitors and are one of the top five paid visitor attraction on Oahu. The exhibits are designed to provide both a cultural perspective and a realistic simulation of natural ecosystems. Emphasis is given to ecology, natural history, biodiversity and behavior, along with conservation perspectives and human interactions with the marine environment. Late in 2005 the Waikiki Aquarium was selected by its peers as one of the top four US aquariums, and was featured in a nationally televised documentary in this context.		3.00		180,000	1;963,189	B
Maintain educational programs for organized school groups	1	4.00		156.000		Α

Performs research and exhibition to the public of aquatic life of Hawaii and other regions.	1	3.00		165,000		A
The Hawaii Revised Statutes stipulate that the University maintains a research laboratory at the Waikiki Aquarium. Research in marine life husbandry, propagation, conservation and other fields is an essential component of our activities. The proximity of the Aquarium to the Manoa campus provides easy accessibility for UH researchers in need of running seawater and large tanks for research, and the skills of Aquarium staff provide unparalleled husbandry expertise. At any given time, many Aquarium-initiated research projects are underway, along with individual projects run by university faculty and undergraduate and graduate students. The results of research done here are reported at professional conferences and in national and international peer- reviewed journals.		2.00		110,000	700,000	В
Operate the Hanauma Bay Giftshop. The Giftshop was established in 2002 through an inter-governmental agreement between the City and County of Honolulu and the University of Hawaii. The benefits to the Aquarium are to provides services to the guests of Hanauma Bay and to also inform visitors about the Waikiki Aquarium. Hanauma Bay is the third most popular beach aside form Waikiki and Ala Moana.	2	0.00		200,000	800,000	W

ÜOH 100: UNIVERSITY OF HAWAII AT MANOA

- The State of Hawaii's program structure document lists the objectives of University of Hawaii at Manoa as follows:
 - To aid eligible individuals to achieve higher levels of intellectual, personal, social and educational competency by providing occupational, general academic, and professional training;
 - To create new basic knowledge, develop solutions for technical and social problems, improve the quality of the faculty, contribute to the quality of undergraduate and graduate instruction programs, and strengthen the state's high-technology economic base by undertaking sponsored basic and applied research projects;
 - To improve the quality of life and provide direct assistance to individuals, special interest groups, individual communities, and the general public by making available a variety of instructional, cultural, recreational, vocational, problem-solving, and general informational services in which the institution has special competence;
 - To assist and facilitate in a directly supportive way the academic functions of the institutions;
 - To support, enrich and broaden the student's life while enrolled at the institution by making available a variety of services and activities which supplement the primary academic programs; by streamlining services; by developing civic, social and career values; and by enhancing student learning and curriculum infusion; and
 - To facilitate the operation of the institution as an organization by providing campus-wide executive management, fiscal, logistical and other related supporting services.
- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.
- 2d: None

ÜOH 210: UNIVERSITY OF HAWAII AT HILO

1b: SUMMARY OF PROGRAM OBJECTIVES:

To develop eligible individuals to higher levels of intellectual, personal, social, and vocational competency by providing occupational, general academic and professional training leading to certificates and degrees.

- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.
- 2d: None

ÜOH 220: UNIVERSITY OF HAWAII - SMALL BUSINESS DEVELOPMENT CENTER

- To stimulate the State's economy by developing eligible individuals to higher levels of entrepreneurial knowledge and skills and of business acumen by providing consulting and training and other services of benefit to the target group and general public.
- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.
- 2d: None

ÜOH 700: UNIVERSITY OF HAWAII - WEST OAHU

- To assist eligible individuals in the development of higher levels of intellectual, personal, social, and vocational competency by providing academic as well as professional and occupational instruction. The institution offers an enriching environment through a wide variety of support services, activities, and resources that supplement the academic programs.
- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.
- 2d: None

UOH 800: UNIVERSITY OF HAWAII, COMMUNITY COLLEGES

- To develop eligible individuals to higher levels of intellectual, personal, social, and vocational competency by providing formal vocational and technical training and general academic instruction for certificates or degrees, or in preparation for the baccalaureate; and by offering adult continuing education for both personal and vocational purposes.
- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.
- 2d: None

UOH 900: SYSTEMWIDE PROGRAMS - UOH, SYSTEMWIDE SUPPORT

1b: SUMMARY OF PROGRAM OBJECTIVES:

To facilitate the operation of the institution as an organization providing executive management, fiscal, logistical, career and technical education, student assessment, information technology and other related student, academic, and administrative support services across the ten-campus University of Hawaii (UH) System.

To plan and administer certain postsecondary education programs funded by the Federal government.

- 2b: Program ID Measures of Effectiveness support the University of Hawaii Strategic Plan and Performance Measures and Outcomes in meeting our State goals and objectives.
- 2c: Program results in the variance report allow us to assess if our performance is in line with our objectives and goals. The variance report allows us to make necessary adjustments when the indicators show that we have not reached or exceeded greater success.

2d: None

Table 6 UOH 100, UH Manoa Program Performance Results

		1			1
# Measures of Effectiveness	Direction of Success (increase/decrease)		FY08 Result	<u>FY09 Plan</u>	' <u>FY10 Plan</u>
1 Number of degrees granted as a % of entering freshmen four years ago	Increase	67	70	70	70
2 % of UH graduates entering UH grad school	Decrease	16	14	14	14
3 Course completion ratio of undergraduates	in den næretet som en sen at som som part, en i navne set for, den som en som en som som som som som som som s	96	96	96	96
4 Credits earned ratio of undergraduates		90	90	90	90
5 Number of awards received as a % of the total number of proposals submitted	Decrease	70	67	67	67
6 Total circulated book as a % of total number of books available for circulation	Decrease	15	13	13	13
7 Average number of media requests fulfilled per instructor	Decrease	86	84	84	84
8 Number of student receiving financial aid as a % of application received	Decrease	65	61	62	62
9 Number of students receiving finincial aid as a % of student enrollment	Increase	43	40	46	46
10 Number of students receiving on-campus housing as a % of requests received	Increase	87	96	90	90

B The program and financial plans allow a limited number of measures. Because there is a significant number of varying programs and activities on-going on the Manoa campus, the measures allowed are general in nature and are intended to give a broad overview of campus activities and how they are evaluated. They are not program specific because of the many programs

C At the unaggregated level, certain measures like graduation rates, grant awards, along with other evaluative criteria such as enrollment, etc., are good indicators of program performance. These measures and criteria are given significant consideration in the budget preparation and allocation processes.

D None

b. Discuss how this Program ID's Measures of Effectiveness relate to the department's mission and program objectives. The measures support UHWO's objectives in establishing its four year baccalaureate program.

.

c. Discuss how results of measures of effectiveness affect program activities.

.

The results are reflective of positive growth in the program, except for the area of grievances. Staff growth unfortunately presents greater risk for disagreements. Effective resolution of these grievances is the key to positive program growth.

Please identify any modifications to your program's performance measures and discuss the rationale for these modifications. If there were Pl no modifications, plese indicate "none".

None.

6	Ratings by Attendees (scale of 1-10)	decrease	9.50	8.80	9.00	9.00

The UHERO report of November 21, 2008 states that visitor arrivals for 2008 will decrease by 10.8% and that significant recovery will not occur until 2010. Our current operations are mainly funded by attendance revenue. Significant declines in our admission revenue will hinder our ability to offer our services at the current level. We are anticipating a reduction in the amount of visitors and visits by school organized school groups if schools cut back on funds for field trips. In addition, without adequate funds, we may be unable to maintain the facility in top condition so satisfaction ratings from visitors may drop.

University of Hawaiʻi Capital Improvements Program

Fiscal Biennium 2009-2011

Capital Improvements Program Budget Request

The Governor's Recommended Executive Capital Improvements Program (CIP) Budget for Fiscal Biennium 2009-2011 includes six projects for the University of Hawai'i totaling \$242.500 million. The following is a breakdown of the request by campus and means of finance.

	Fise	al Biennium 2009-2011	l
Campus	2009-2010	2010-2011	Total
University of Hawai'i at Mānoa	6,700,000	85,800,000	92,500,000
Revenue Bonds	6,700,000	85,800,000	92,500,000
Maui Community College	3,157,000	0	3,157,000
General Obligation Bond Fund	3,157,000	0	3,157,000
Windward Community College	1,578,000	0	1,578,000
General Obligation Bond Fund	1,578,000	0	1,578,000
University of Hawai'i-Systemwide	70,265,000	75,000,000	145,265,000
General Obligation Bond Fund	70,265,000	75,000,000	145,265,000
Total	81,700,000	160,800,000	242,500,000
Total by Means of Finance			
General Obligation Bond Fund	75,000,000	75,000,000	150,000,000
Revenue Bonds	6,700,000	85,800,000	92,500,000

The six projects included in the Governor's Recommended Executive CIP Budget meet the goals and objectives of the University's Strategic Plan by maintaining and improving campus structures to promote a nurturing learning and working environment. Details on the six projects are attached (pages 2-7). Also included is a worksheet comparing the Board of Regents' CIP Budget with the Governor's Recommended Executive CIP Budget (pages 8-9). Additionally, details of the Board of Regents' CIP Budget for Fiscal Biennium 2009-2011 is attached (pages 10-42). The Regents' CIP Budget totals \$738.357 million for 33 high priority projects.

Proposed Lapse of CIP Projects

There are no proposed lapses of University CIP projects.

2	Capital Renewal and Deferred Maintenance University of Hawai'i–Systemwide Plans, design, construction, and equipment for improvements to University of Hawai'i facilities. Project to include capital renewal, reduction of maintenance backlog, major and minor renovations, modernization of facilities, reroofing, mechanical and electrical systems, resurfacing, repainting, and other repairs and project costs to upgrade facilities at all University campuses. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: Statewide Representative District: Statewide	UOH 900	1 C 9,213 C 52,210 C 1 C 61,425	10,929 C	The University of Hawai'i's physical plant has accumulated a backlog of repairs and maintenance (R&M) due to the lack of general funds. This project includes rerooffing, mechanical and electrical systems, renovations, resurfacing, repainting, and other improvements and project costs to upgrade facilities at all University campuses. Facilities provide the centerpiece around which all other educational activities exist at higher education institutions. The total replacement value of all University of Hawai'i facilities is estimated at \$4.2 billion. Therefore, it is imperative to reinvest in the University's physical plant to ensure that the physical infrastructure facilitates the mission of the institution. The role of R&M is to maintain the physical infrastructure and facilities of our campuses so that they are functional, architecturally sound, aesthetically pleasing, and in compliance with building and safety codes to support quality instruction, research, student, and community services programs.

3A	Science Building Maui Community College Construction and equipment for the Science Building. Project to include all project related costs associated with equipping the facility. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 4 Representative District: 8	UOH 800	- - 3,156 C 3,157		This project will provide equipment to complete the Science Building at Maui Community College. The new facility will include classrooms, offices, and laboratories for various science related programs. The facilities that support Maui Community College science programs are completely inadequate. The overall lack of physical space and the poor condition of existing spaces have negatively impacted the program's ability to deliver instructional services and meet student needs. Programs with incompatible needs are often forced to share spaces, creating problems with experiments and other complex laboratory set ups. The lack of facilities also limits the number of classes/sections that can be offered at a time when the demand for science courses are growing. Other problems include: inadequate storage facilities (including spaces for hazardous materials); inadequate electrical, gas, and water for lab equipment and experiments; and a lack of integrated space where science faculty can interact. The new building will be designed to provide a uniquely integrated space for effective science instruction including dedicated laboratory and classroom spaces. With the new facility, the College will be able to meet existing needs as well as support emerging degree offerings that address student, community, and workforce needs.

38	Library and Learning Resources Center Windward Community College Construction and equipment for the Library and Learning Resources Center. Project to include all project related costs associated with equipping the facility. Plans Design Construction Equipment Financial Requirements Senatorial District: 24 Representative District: 48	UOH 800	- - 1 C 1,577 C 1,578	 0	This project will provide equipment to complete the integrated library, media, learning assistance, and computer center for Windward Community College. The project will consolidate the College's library, media, learning assistance, and computer centers into a single integrated facility. The integrated facility will allow the College to provide more centralized, efficient and up to date services to students, faculty and staff in an environment where responsiveness to changes in information and technology is crucial. The College programs that will be housed in the new building are currently located in facilities (former State Hospital Ward buildings) that are entirely inadequate for college level needs. As a consequence, Windward students do not have access to an academic infrastructure that is supported by current and integrated information technologies. It is essential that Windward Community College construct a facility that can serve as the focal point for research and study, to provide students, academic personnel, and community users with access to informational resources and up to date academic support.

4A	Center for Microbial Oceanography Research and Education Building University of Hawai'i at Mānoa Plans, design, and construction for the expansion of the Biomedical Sciences Building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, commissioning, refurbishment of existing courtyards, and all project related costs. Plans Design Construction Equipment Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	- 1,700 E - 1,700 1,700	 20,800 E 20,800	This funding authorization project will be financed with revenue bonds to develop an addition to the Biomedical Sciences Building at the University of Hawai'i at Mānoa. The primary occupant of the facility will be the Center for Microbial Oceanography: Research and Education (C-MORE). C-MORE is established as a National Science Foundation (NSF) sponsored Science and Technology Center. With its designation as a NSF Science and Technology Center, one of only five Centers in the nation, C-MORE will receive \$25 million from the NSF over five years. As a requirement for the award, the University of Hawai'i Administration committed 15,000 square feet of space during the grant application to house C-MORE. Given the growth of research at the University of Hawai'i at Mānoa, and lack of new buildings on campus during the last decade, such space does not exist. Therefore, the University intends to finance this high priority project through the sale of revenue bonds. While C-MORE will be the primary occupant of the facility, other academic and research units will also be tenants of the facility. The C-MORE project is envisioned as comprising a three-story structure of approximately 24,000 gross square feet and a 7,000 gross square foot penthouse housing 7,000 gross square feet of mechanical equipment. The facility will consist of research laboratories and support spaces, offices, classrooms, meeting spaces, and building support areas. The project may also include the refurbishment of the existing courtyard to promote outdoor meeting and informal gathering areas. The project will be designed with a fully integrated approach to meet laboratory standards, LEED standards, and other aspects of laboratory standards, LEED standards, and other aspects of laboratory standards, LEED standards, and other aspects of laboratory safety and flexibility.

4B	Faculty Housing University of Hawai'i at Mānoa Plans, design, construction, and equipment for faculty housing. Project to include ground and site improvements, equipment and appurtenances, and all project related costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	1,000 E 4,000 E - - 5,000	_ 1,000 Е	The University of Hawai'i at Mānoa is facing a growing number of retirements of its senior faculty members in the coming years and will be recruiting a significant number of new faculty members to fill these vacant positions in the near and intermediate future. In anticipation, the Faculty Housing program is exploring various development options to build additional residential units on University-owned lands at Wa'ahila Ridge (expansion of its current project site), Woodlawn Drive (current site of the College of Tropical Agriculture and Human Resources research unit), and Makapu'u Avenue (next to Lē'ahi Hospital) sites. The project assessment will include development concepts for each site, engineering assessment to include infrastructure and utility systems, traffic impacts and other site development issues, and other project development costs.

4A	New Classroom Building University of Hawai'i at Mānoa Design for a new classroom building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all related project costs. Plans Design Construction Equipment Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100		0	The project is to design a new classroom building on the Mānoa campus. Many of the campus buildings are old, obsolete, and lack quality space. This project will address significant problems related to the deteriorating state of many of our classroom facilities, the general lack of larger classrooms and office space to support the undergraduate education program and growing number of campuswide programs. The project will enable the University of Hawai'i at Mānoa to expand the classroom selections to accommodate current and near term enrollment projections, provide greater efficiencies and utilization of space, and improve our educational effectiveness. The development of a new classroom complex will also provide the University an opportunity to use the space as a surge area for programs affected by major renovations that are planned in the near term. Upon completion of the project, the students and faculty will be provided with modern and adequate classrooms to meet ongoing demands for adequate instructional facilities.

4B	New Gymnasium to Replace Klum Gym University of Hawai'i at Mānoa Plans for a new gymnasium to replace Klum Gym. Project to include development of program requirements, site location, and other related work. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	271 C 271	 	This project provides for the planning of a new 26,250 gross square foot facility to replace Klum Gym. This planning effort includes the demolition of Klum Gym and a portion of the intramural locker and shower rooms, and academic support rooms to accommodate the development of a new parking structure. Development on the University of Hawai'i at Mānoa campus is guided by the 1987 Long Range Development Plan (LRDP) and the 1989 Plan Review Use (PRU) Application as directed by the City and County of Honolulu. The planning documents call for the development of a new parking structure to be built to accommodate an increase of on-campus living, such as the new Frear Hall Dormitory, and the increase in classroom and research space, such as the new Agricultural Science Building and the Pacific Ocean Science and Technology Building. The LRDP and PRU call for Klum Gym to be demolished to provide space for an addition to the parking structure, as well as space for the new Klum Gym. Klum Gym is approximately 50 years old and is long overdue for replacement. The walls, windows, and roof allow moisture penetration, which creates a hazardous playing condition and destroys playing surfaces and equipment for the multi-sport facility.

4C	 Performing Arts Facility and Parking Structure University of Hawai'i at Mānoa Design for a performing arts facility at the University of Hawai'i at Mānoa. Project to include ground and site improvements, development of new facilities and parking, equipment and appurtenances, and all related project costs. 	UOH 100			The Performing Arts Facility will consolidate the Department of Theatre and Dance classes and faculty offices which are presently scattered in six different locations around the University of Hawai'i at Mānoa campus. The new facility will provide much needed space for faculty offices, classrooms, seminar rooms, dance studios, audio-visual rooms, performance spaces, rehearsal spaces, film and video classes, storage rooms, workshops, and locker/restroom facilities. By consolidating the teaching, rehearsal, and performance studios, students and faculty will be brought into closer proximity with one another and teaching, learning, and performing will be much more effective.
	Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24		- 5,864 C - 5,864	 0	Kennedy Theatre was built for performances, not a teaching venue. As a result, classes take place in bathrooms, on the lanai, and in the foyer of the theatre. Rehearsals are conducted in the College of Education Laboratory School across campus. Sound from the mainstage makes it impossible to use the Ernst Laboratory, which is adjacent to the mainstage, at the same time the mainstage is in use. The department is seriously hampered in its ability to provide educational and performance opportunities for students and is unable to expand its offerings to meet student demand because of the lack of appropriate facilities. The Department of Theatre and Dance has a world class Asian Theatre program, a children's theatre that gives performances to over 6,000 school children annually, and a full Western, traditional, modern and avant garde performance schedule. The project also includes the development of a new 480 stall parking structure to replace the surface parking lot which will be displaced by the development of the Performing Arts Facility.

	College of Education, New Building Jniversity of Hawai'i at Mānoa Plans and design for a new facility for the College of Education. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all related project costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	2009-2010 579 C 3,174 C - - 3,753		Justification This project will develop a new 60,000 gross square foot facility to replace an educational building lost in a fire on June 13, 2006. The project also includes the demolition of two existing old wooden structures that are inadequate and poses a safety hazard. The building destroyed in the fire was an old 20,000 gross square foot facility that housed the faculty and staff of the College of Education, the Center for Curriculum Research and Design Group (CRDG), and the Center for Disability Studies. The facility also housed a portion of the College of Education's Laboratory School, which serves as the "research laboratory" for the faculty of the CRDG, who have generated significant amounts of extramural funds. The new facility will allow all functions previously conducted in the burned building and old structures to be housed in modern, accessible, and safe facilities. The University of Hawai'i at Mānoa has identified a 300,000 square foot classroom and office space deficit. The loss of the 20,000 square foot building exacerbated this space shortfall, and the new facility will help to meet the space needs of the campus.

4F	College of Pharmacy University of Hawai'i at Hilo Plans and design for the College of Pharmacy Building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all related project costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 1 Representative District: 2	UOH 210	1,000 C 5,000 C - - 6,000		This project will develop a new facility to house the College of Pharmacy. The building will include classrooms, teaching laboratories, offices, and other related spaces in accordance with the Accreditation Council of Pharmacy Education standards and guidelines. Hawai'i is one of only a few states in the nation that does not provide pharmacology education. Health professional workforce shortages in pharmacy is expected to increase. Proactive education of a new generation of pharmacy health professionals will ensure quality health care and anchor the workforce needs of the State. Hawai'i students pursuing a degree in pharmacy are forced to leave Hawai'i to receive necessary education and credentials. The development of the College of Pharmacy building will enable local students to study in Hawai'i, thereby meeting their educational needs as well as the State's need for professionals in this field. This project provides the physical infrastructure needed for the pharmacy degree program at the University of Hawai'i at Hilo. The pharmacy degree program has the potential of becoming the largest graduate program at the University of Hawai'i at Hilo, and will bring the Campus the expertise in quality academic science curriculum that will benefit the University at large.

4K	Kalākaua Marine Education Center at Puakō University of Hawaiʿi at Hilo Plans for a Marine Science Education Center for the University of Hawaiʿi at Hilo. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 3 Representative District: 7	UOH 210	0	750 C 750	This project provides the planning of a marine education field station on University land at Puakō on the Island of Hawai'i for the education of undergraduate and graduate students throughout the University of Hawai'i System, cooperating educational institutions, train pre- and in-serve teachers, and to serve as a center of excellence in marine education for native Hawaiian students. The field station will include classrooms, teaching and research laboratories, faculty offices, student dormitory and dining hall, faculty housing, and facilities for boat storage, dive lockers, workshops, and a sea water system. The coral reefs at Puakō are unique field learning sites in a demonstrated subject of excellence and high demand at the University of Hawai'i at Hilo. Access to the coral reefs at Puakō are severely limited due to the lack of laboratory and housing facilities near the site. Travel from the University of Hawai'i at Hilo is not an acceptable alternative due to the danger of decompression sickness produced by altitude change crossing the Island of Hawai'i. Presently, students are housed in primitive cabins which are available for only one week a year. No laboratory or classroom facilities are available at the site. The establishment of a Marine Science Education Center at Puakō would enable access to the unique pristine coral reef and serve as a model cooperative marine education and research center. The Center will enable the study of Hawai'i's marine ecosystems and help to strengthen Hawai'i's economic base for the future by training students for positions in the expanding ocean industry of the State's economy.

5	Information Technology Center University of Hawai'i System Construction and equipment for an information technology and emergency operations center building to service the University of Hawai'i System and the Mānoa Campus. Project to include ground and site improvements, development of new facility, and all project related costs.	UOH 900	2009-2010	2010-2011	This project will develop a new building on the Mānoa campus to service Systemwide information technology infrastructure and an emergency operations center for the University System and Mānoa campus. Although information technologies are increasingly the core of knowledge-based institutions such as universities, the University of Hawai'i has shoehorned its core technology infrastructure into any available space on a piecemeal basis for more than thirty years. As a result, the campus computing center, data communications hub, phone system, and video hub are dispersed throughout the University of Hawai'i at Mānoa campus. None of the current facilities have adequate backup power, air conditioning, or security, and the State Auditor cited the inadequacies of the facility in their audit of the University's financial information in 2005. The development of the Information Technology Center is particularly critical to address the vulnerability of the
	Plans Design Construction Construction Equipment Equipment		- 25,319 C 25,319 E -	- - 2,813 C 2,813 F	University's entire information and communications infrastructure, which was highlighted by the State Auditor in December 2005. Keller Hall, a building that was originally developed in 1959, is the home to all University System servers and data communications that service the University's ten campuses. The computers are located on the ground floor of Keller Hall and were at risk during the October 30, 2004 Mānoa flood. The infrastructure was again threatened as recently as March 31, 2006, during a period of heavy rains on O'ahu. The new Information Technology Services Center will provide the following benefits:
	Financial Requirements Senatorial District: 10 Representative District: 24		50,638	5,626	 1 - Provide the first properly designed and supported "machine room" facilities for the University that will enable the provision of reliable 24x7 university-wide technology services, including through natural and man-made disasters. The replacement facility will house central computing, data networking, telephone, and video resources with reliable power, air conditioning, and connectivity to improve and facilitate disaster responsiveness. 2 - The University currently has no Emergency Operations Center (EOC) with environmental conditions and communications services essential in an emergency situation. Such an EOC has requirements very similar to those of a modern information technology data center, so the new facility will also serve as the EOC for the Mānoa campus and the University System. 3 - Reduce energy consumption by placing currently fragmented high-demand requirements for electricity and AC into properly-designed facilities. 4 - Provide high-quality space for faculty to develop instructional and media content in support of their teaching and research; make available new spaces for students to work with information technologies; provide access to teleconferencing and collaboration environments for members of the university community to work with colleagues and peers around the country and the world; and make available high-quality data center space for units that do not have adequate space to house program-specific servers and data storage. 5 - Free up general purpose space for required R&M and for education and research on campus.

6A	New Classroom Building University of Hawai'i at Mānoa Construction and equipment for a new classroom building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all related project costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	0	– – 107,000 C	The project is to construct and equip a new classroom building on the Mānoa campus. Many of the campus buildings are old, obsolete, and lack quality space. This project will address significant problems related to the deteriorating state of many of our classroom facilities, the general lack of larger classrooms and office space to support the undergraduate education program and growing number of campuswide programs. The project will enable the University of Hawai'i at Mānoa to expand the classroom selections to accommodate current and near term enrollment projections, provide greater efficiencies and utilization of space, and improve our educational effectiveness.

6B	College of Hawaiian Language Building University of Hawai ⁺ i at Hilo Construction and equipment for the College of Hawaiian Language Building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all related project costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 1 Representative District: 2	UOH 210	29,000 C 2,000 C 31,000	 0	The College of Hawaiian Language at the University of Hawai'i at Hilo is a primary source of Hawaiian language support in the State of Hawai'i and a national leader in indigenous language and cultural revitalization. The success of the College of Hawaiian Language has been recognized by academics and the media both nationally and internationally. Currently, the College of Hawaiian Language is dispersed in several buildings in cramped spaces. A new facility is required to consolidate the College for current and future program expansion, which is necessary to further develop the University of Hawai'i at Hilo as a leader in cultural and language revitalization and a model for other indigenous people. This project will provide a state of the art facility that will increase the visibility of the College of Hawaiian Language and supply the physical resources to accommodate continued curriculum development, high-technology learning, distance education needs, and serve as the area to host the many indigenous peoples from across the globe who frequently visit the College of Hawaiian Language's model programs.

6C	Advanced Technology Training Center Honolulu Community College Design, construction and equipment for an Advanced Technology Training Center. Project to include Science Program requirements, ground and site improvements, development of new facility, equipment and appurtenances, and all project related costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 12 Representative District: 28	UOH 800			 This project will provide an Advanced Technology Training Center at Honolulu Community College. The new multi-story facility will include classrooms, offices, and laboratories for various science and technology related programs and training. To realize the State's goal of developing a dynamic technology industry, along with a workforce to support the industry, it is imperative for the State to develop an Advanced Technology Training Center (ATTC). The development of an ATTC has long been the goal of Honolulu Community College. The College has expertise in the areas of technical workforce development and is the optimal place to house such a facility. Over the years, Honolulu Community College has established itself as the technological training center of the Pacific. It is no small task for a State supported institution to remain flexible and expedient enough to operate and train the workforce in a rapidly changing field. Nonetheless, Honolulu Community College's ability to remain dynamic; however, is severely limited by the age and capacity of its facilities. In fact, the current building that houses the majority of the College's science and technology programs was built over thirty years ago, well before the first, second, and third generations of the technology boom.

6D	Education and Innovation Instructional Facility Leeward Community College Design, construction, and equipment for an Education and Innovation Instructional Facility. Project to include ground and site improvements, development of new facility, equipment and appurtenances, and all project related costs. Plans Design Construction Equipment Financial Requirements Senatorial District: 18 Representative District: 36	UOH 800	- 1 C 12,879 C 1,429 C 14,309	0	This project is part of the first phase of Leeward Community College's approved Long Range Development Plan for campus expansion. The Education and Innovation Instructional Facility will house the Teacher Education and Training program. This program addresses the critical teacher shortage in the State, particularly on the Leeward Coast of O'ahu. Current and anticipated enrollment pressures, coupled with the need for additional classroom space, make this project a critical need. The last facility of any kind constructed at Leeward Community College occurred in 1979, when the automotive complex was built. Classroom, faculty office space, meeting space, and general institutional storage space is treated as a valuable commodity. Several academic departments have assigned three faculty members to a single office space that was originally designed for one faculty member. This facility will serve to address the most pressing academic space needs that currently exist.

7A	Center for Microbial Oceanography Research and Education Building University of Hawai'i at Mānoa Plans, design, and construction for the expansion of the Biomedical Sciences Building. Project to include ground and site improvements, development of new facility, equipment and appurtenances, commissioning, refurbishment of existing courtyards, and all project related costs. Plans Design Construction Equipment Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	- 1,700 E - - 1,700	 20,800 E 20,800	This funding authorization project will be financed with revenue bonds to develop an addition to the Biomedical Sciences Building at the University of Hawai'i at Mānoa. The primary occupant of the facility will be the Center for Microbial Oceanography: Research and Education (C-MORE). C-MORE is established as a National Science Foundation (NSF) sponsored Science and Technology Center. With its designation as a NSF Science and Technology Center, one of only five Centers in the nation, C-MORE will receive \$25 million from the NSF over five years. As a requirement for the award, the University of Hawai'i Administration committed 15,000 square feet of space during the grant application to house C-MORE. Given the growth of research at the University of Hawai'i at Mānoa, and lack of new buildings on campus during the last decade, such space does not exist. Therefore, the University intends to finance this high priority project through the sale of revenue bonds. While C-MORE will be the primary occupant of the facility, other academic and research units will also be tenants of the facility. The C-MORE project is envisioned as comprising a three-story structure of approximately 24,000 gross square feet and a 7,000 gross square foot penthouse housing 7,000 gross square feet of mechanical equipment. The facility will consist of research laboratories and support spaces, offices, classrooms, meeting spaces, and building support areas. The project may also include the refurbishment of the existing courtyard to promote outdoor meeting and informal gathering areas. The project will be designed with a fully integrated approach to meet laboratory standards, LEED standards, and other aspects of laboratory safety and flexibility.

78	Faculty Housing University of Hawai'i at Mānoa Plans, design, construction, and equipment for faculty housing. Project to include ground and site improvements, equipment and appurtenances, and all project related costs. Plans Design Construction <u>Equipment</u> Financial Requirements Senatorial District: 10 Representative District: 24	UOH 100	1,000 E 4,000 E - - 5,000		The University of Hawai'i at Mānoa is facing a growing number of retirements of its senior faculty members in the coming years and will be recruiting a significant number of new faculty members to fill these vacant positions in the near and intermediate future. In anticipation, the Faculty Housing program is exploring various development options to build additional residential units on University-owned lands at Wa'ahila Ridge (expansion of its current project site), Woodlawn Drive (current site of the College of Tropical Agriculture and Human Resources research unit), and Makapu'u Avenue (next to Lē'ahi Hospital) sites. The project assessment will include development concepts for each site, engineering assessment to include infrastructure and utility systems, traffic impacts and other site development issues, and other project development costs. At the present time, the Faculty Housing program has a waitlist of over 200 faculty members who have applied for faculty housing. The University of Hawai'i at Mānoa is developing a feasibility study to assess the potential demand, nature of housing, and composition of faculty housing needs for future recruitment of faculty members. The study will include evaluations of O'ahu residential sales market trends and the housing market outlook over the next five years. The study is also assessing the financial capacity of the potential faculty well assist in determining the number of units the University of Hawai'i at Mānoa needs in order to provide sufficient faculty housing inventory.
