Testimony for
House Bill 1360, H.D. 2, S.D. 1

RELATING TO THE WAIALUA AGRIBUSINESS INCUBATOR

Presented before the
Senate Committee on Ways and Means

The Twenty-third Legislature
State of Hawai'i
April 6, 2005

by

Dr. Andrew G. Hashimoto, Dean
College of Tropical Agriculture and Human Resources
University of Hawai'i at Mānoa

I am pleased to contribute the expertise of the College of Tropical Agriculture and Human Resources (CTAHR) to the decision-making process on House Bill 1360, H.D. 2, S.D. 1.

About 100,000 acres of Hawai'i's former sugarcane and pineapple land currently lie fallow, including about 20,000 acres in the Waialua district of O'ahu. Profitable farming of this land coupled with related agribusiness activity can create employment opportunities while retaining green, open space that is valued by residents and visitors alike. In 2004, the legislature passed House Concurrent Resolution 260, which requested that CTAHR develop and manage an agribusiness incubator in Waialua to support entrepreneurs in the development and manufacture of new agricultural products.

An incubator is an effective means by which the state can support the expansion of our vibrant and growing diversified agriculture sector. In the low-risk incubator environment, an entrepreneur-client can gain a foothold and work toward establishing an independent business, typically graduating in two to three years. An incubator helps its clients address the major factors that cause new businesses to fail: lack of capital, unrealistic marketing objectives, poor management skills, and isolation from other entrepreneurs and professionals. Incubator programs are a proven way to nurture new business ventures. The National Business Incubator Association reports that 87 percent of enterprises developed in an incubator environment survive their first five years, compared with only 25 percent of those developed without the benefits of incubation.

HB1360, HD2, SD1 authorizes the issuance of \$300,000 in general obligation bonds for the planning of an agribusiness incubator in Waialua that will be developed and managed by UH. CTAHR has federal monies to fund the operation of a statewide agribusiness incubator.

CTAHR's agricultural and economic expertise and ongoing extension service to the state's agricultural community make the college well-suited to develop and manage an

incubator. Waialua has rich and abundant agricultural land and is better located to serve incubator clients than the Mānoa campus, which is far from many of O‘ahu’s agricultural communities and has limited public parking. The facility in Waialua will not only serve the North Shore’s thriving diversified agriculture industry but also will be the base of incubator operations serving clients in O‘ahu and throughout the state.

I support HB1360, HD2, SD1 provided that its passage does not replace or adversely impact priorities as indicated in the University of Hawai‘i’s Executive Biennium Budget.

Thank you for the opportunity to testify.
