**HB 3192 RELATING TO CAPITAL IMPROVEMENT PROJECTS PERTAINING
TO LEEWARD COMMUNITY COLLEGE**

Chair Waters, Vice Chair Shimabukuro, and Members of the Committee:

The University of Hawai'i strongly supports the intent of HB 3192. The purpose of this bill is to make capital improvements program (CIP) appropriations for Leeward Community College.

Section 1 of HB 3192, Items A to HH includes 34 repairs and maintenance projects, all from Leeward Community College's Unfunded Deferred Maintenance Report dated January 2005. We strongly support increases to our repairs and maintenance budget. As a note, HB 1900, the Executive Supplemental Budget, includes a Systemwide CIP appropriation for the University of Hawai'i for Capital Renewal and Deferred Maintenance. HB 1900 currently includes \$43 million in general obligation bonds, and the University welcomes any additional funding for this important project that will benefit all campuses of the University of Hawai'i.

The University supports the intent of the last paragraph of Section 1 of HB 3192 (Page 10, Lines 16 through 21), as it pertains to energy efficiency and sustainable design as established by the United States Green Building Council. However, we are concerned with establishing a minimum rating level (i.e. silver) for new construction or major renovation work, as this will have a major impact on the total cost of developing/renovating a facility. We are currently unaware of any public facility in Hawai'i that meets the silver standard which is stipulated in Section 1; therefore, we recommend omitting the section, or amending it to read as follows:

The University shall implement sustainable design technology in new construction and major renovation projects to the extent possible and feasible within the total project appropriation.

Thank you for this opportunity to offer comments on HB 3192.
