## Legislative Testimony

---

Testimony Presented Before the  
House Committee on Higher Education  
February 3, 2009 at 2:00pm

by

Linda K. Johnsrud

Vice President for Academic Planning and Policy, University of Hawai'i

### HB 346 – MAKING APPROPRIATIONS TO THE UNIVERSITY OF HAWAII

Chair Chang, Vice Chair Nakashima, and members of the House Committee on Higher Education. Thank you very much for this opportunity to testify on House Bill 346 that establishes an undergraduate degree program in applied engineering at the University of Hawai'i at Hilo, creates a special advisory committee, and appropriates funds for the committee and two faculty positions.

The University of Hawai'i thanks the legislature for this intent to support the growth of the University of Hawai'i at Hilo. We support this proposal in principle, but not at this time.

The development of a new academic offering requires review by the Council of Chief Academic Officers representing all ten campuses. The Council is the advisory body that assesses academic and workforce need in the state, the cost of program implementation, potential articulation and transfer among campuses, academic considerations such as accreditation and faculty availability, and whether or not the effort duplicates existing programs at other campuses. After a campus is authorized to plan a new program, a program proposal goes before the Board of Regents.

Any new program proposed in the current budgetary environment must undergo stringent review of initial implementation as well as continuing operational costs. In this specific case, applied technology degrees are expensive, and it is important that we clearly delineate this proposal for applied engineering from UH Mānoa's engineering program and Maui Community College's proposal for an engineering technology program.

Thank you again for your support of UH, and the opportunity to testify on HB 346.
