Clyde Sakamoto
Chancellor, Maui Community College
University of Hawai'i

S.B. 959 Relating to Cable Television

Chairs Menor, Ige and Members of the Committees:

I am here to testify in support of SB 959 to amend Section 440G-15, HRS, to distribute one-third of all fees collected for the provision of cable service in the County of Maui to Maui Community College (MCC), the only accredited public institution of higher education serving the island of Maui, and the Maui Department of Education (DOE) to equally share the annual allocations from PEG franchise fees with government and public entities. As a concerned citizen as well as Chancellor to the College, I have witnessed the decline of resources from these fees to public and higher education. Last year the PEG Board, AKAKU, has effectively eliminated all funds for public and higher education in Maui County.

This bill would restore a fair portion of the PEG franchise fees to educational entities that are fully accredited by the Western Association of Schools and Colleges. These resources are crucial to address needs in education identified as priority by the most recent Focus Maui Nui survey, the County of Maui, the Maui Chamber of Commerce and the Maui Economic Development Board Strategic Plan.

PAST HISTORY:

In 1983 Maui Community College began distance learning services on Cable TV, including a mixture of live classes and pre-taped telecourses. For over 20 years, MCC has been providing the citizens of Maui County access to educational services and programs such as credit and non-credit courses, arts and humanities programs, life-long learning programs as well as access to both lower education and higher education programming through The Department of Education (DOE) and MCC/University of Hawai'i systems statewide.

In 1987 the Maui PEG Planning Committee was created by the Department of Commerce and Consumer Affairs (DCCA), comprised of MCC, DOE, County and non-profit agency representatives.

In 1992 the DCCA established the Maui PEG Consortium as an advisory board for distribution of PEG franchise fees. Cable franchise fees were allocated, per mandate with DCCA to P, E, and G services. A Public Access channel was also started on Maui.

In 1997 the PEG consortium was dissolved and AKAKU became the agency for PEG management on Maui and has since been the management arm of PEG franchise fees.

The "E" portion of funding provided to MCC (operators of the "E" segment of PEG) continued from 1993 until 1999. During those years, funding for "E" remained at an average of 29% of franchise fees. Directly following the establishment of AKAKU, funding to the "E" portion of franchise fees dropped to 15% (\$53,000 of a total of \$535,000). In 2000 all funding was discontinued.

Numerous attempts have been made to resolve the funding issues between MCC as the "E" channel provider and the AKAKU Board. During many of the discussions, MCC representatives were led to believe that the funding issues would be

resolved and that funds allocated for the “E” portion of PEG would be released. After approximately two years of paperwork, negotiations, and mediation, the AKAKU Board voted to release funding for MCC for the 2002 - 2003 fiscal year of approximately 9% of franchise fees. Unfortunately, no retroactive funding for fiscal years 99/00, 00/01, 01/02 were released. The AKAKU Board has been very clear that there will be no release of any retroactive funding. Retroactive funding totals to between \$112,000.00 to \$300,000.00 contingent on what percentage of franchise fees should be allocated to the “E” portion.

TODAY: FUNDING AND COMMITMENT TO EDUCATION

In July of 2003, the AKAKU Board unanimously voted to no longer provide operating funds for any State Agency, including MCC and the DOE. Since MCC operates the designated higher “E” channel of the PEG access network, this vote demonstrates the Boards’ lack of understanding regarding:

- 1) Contractual requirements with DCCA and the AKAKU Board to provide funds to the “E” portion of PEG access. Per contract financial support must be made to the “E” channel providers: MCC
- 2) Misunderstanding of the College's financial requirements to operate MCC-TV. Engineering, programming, and operational support to manage MCC-TV on a 24/7 basis requires funding. The availability of educational services is essential to the economic growth of our State. Programs and classes are facing cutbacks. Without additional funding from AKAKU to assist in the College in the production and operation of MCC-TV, the residents of Maui County may not benefit from expanded intellectual, educational, and cultural programming these funds would help provide.

Conclusion

Historically, education received a fair 28-32% of PEG funds. This permitted MCC and the DOE to support and strengthen our vital distance education services and

outreach efforts. Since Akaku took over the administration of PEG funds on Maui, they have cut educational funding to \$96,000.00 for the fiscal years 1999-2004. This reduction has occurred despite an annual increase in cable access franchise fees allocated to Akaku through Oceanic Time Warner Cable. Negative effects of these actions upon the College include the reduction in quality of services and instruction to cable TV students due to staff reductions, lack of ability to meet escalating student and community demand for distance education services, and the of inability to upgrade physical plant operations, including DTV format conversion from aging analog master control operations (currently in use) to digital and automated programming systems.

Education is responsible for half of the programming appearing on the four Maui PEG channels. MCC produces approximately 45 hours of new, original, local programming in the form of live credit classes and community education programs weekly. MCC also absorbs the full burden of equipping, maintaining, and operating the Education channel (MCC-TV) and programming it twenty-four hours a day, seven days a week, 365 days a year. These services represent substantial in-kind and out-of-pocket costs to the College on behalf of county-wide community access services.

SB 959 would restore distribution of PEG resources to help offset the substantial costs of supporting these efforts. While we support the public access and government access missions, we ask that the educational needs be given equal consideration. The DCCA's support of the Olelo-HENC agreement underscores the State's commitment to the concept of using PEG funds to bring comprehensive educational programs that meet both the broad and the specific needs of our growing populations. The educational community cannot maintain the current training and programming needs, or meet the escalating demand for cable classes and life-long learning via cable TV without the full funding that the State intended us to receive when they set up the PEG structure.

The College would like to see PEG access funds fairly distributed between the three access channels, Public, Education and Government. This means a yearly allocation of 30% of the total PEG franchise fees should be reserved for Education

access (divided between both DOE & MCC based on their needs) and these funds should be allocated as soon practical. In addition, funding that has not been released to Educational access since 1999, should also be distributed. These funds are currently held in reserve by Akaku and are currently being used as investment funds. Based on 15% per year (30% divided between MCC & DOE), the College should have received past funding amounting to approximately \$350,000 for fiscal years 1999 through 2004.

Your support of the legislation will positively affect the entire public and higher education system by providing increasingly significant resources that would allow students on Lanai, Molokai and on Maui to access expanded and improved levels of learning through cable television. Your serious consideration in support of this legislative initiative would be greatly appreciated.

Thank you for this opportunity to testify in support of this measure.
