SB 2960 Relating to Economic Development

Chair Fukunaga, Vice Chair Ige and Committee members.

Thank you for this opportunity to express support for SB 2960, which establishes the Hawai'i Innovations Fund to provide grants to individuals or businesses that conduct research or product development in the life sciences or advanced technology fields.

I serve as the Vice Chancellor for Research at the University of Hawai'i at Mānoa and I have responsibility for the research enterprise at our flagship campus.

We want to thank the legislature for their continued leadership in supporting Hawai'i's growing science and technology industry. We have tremendous potential for technology transfer in the areas of innovation occurring at the Mānoa campus as well as at the Kaka'ako campus.

Funds available to provide grants to conduct research or product development in the life sciences or advanced technology fields is critical to parlaying the research being done on our campus into economic development for the state.

Providing this additional support for our local technology companies and individuals that have been estimated to require \$2223 million from Hawai'i and external sources over the next five years. (source: Enterprise Honolulu, "A Turning Point in Capital Formation: Assessing Hawai'i's Strategic Options," August 2003.) In order for these companies to stay in Hawai'i, diversify the economy and improve the quality and quantity of jobs, at least half of these funds should come from Hawai'i Sources.
