Biosafety and Biosecurity in the Animal Facility

Lon V. Kendall, D.V.M., Ph.D., A.C.L.A.M.
Associate Director
Laboratory Animal Resources
Colorado State University
Fort Collins, Colorado

Overview: Working in biocontainment can become easily overwhelming for staff with the perceived threat of the agents, the complex procedures, and regulations personnel are subject to while working in containment. It is imperative that personnel working with animals in biocontainment understand the associated risk and the importance of the risk assessment in determining the threat, procedures and applicable regulations. This seminar will provide an overview of the risk assessment process and working with animals in biocontainment, demonstrating many of the practices are similar to what they already know and practice.

Monday, June 27, 2011 at 1:00 p.m. – 3:00 p.m.
John A. Burns School of Medicine, Kaka‘ako
Medical Education Building Auditorium, Room 315
