

Twenty Years of Genetically Engineered Crops: What the Past Tells Us About the Future

C. Neal Stewart, Jr.
Dept. of Plant Sciences
University of Tennessee, Knoxville

1:30 PM, Friday, Jan. 20
StJohn Rm 011

Neal Stewart holds the Ivan Racheff Chair of Excellence in plant molecular genetics at Univ. of Tennessee and is also the director of the Tennessee Plant Research Center. He is a member of the committee that authored a 2016 report on genetically engineered crops for the National Academies of Sciences, Engineering, and Medicine.
