

The Osher Lifelong Learning Institute at UH at Mānoa presents:

Climate Change Is Worse Than You Think But Still Fixable. Let's Prove It, Help Us Plant 10,000 Trees In One Day!

CAMILO MORA, Associate Prof of Geography, UH Manoa
Sunday, September 22 2019 at 2:00 pm

Art Auditorium ~ UH Manoa Free and Open to the Public

The ultimate solution to climate change is carbon neutrality: when our CO₂ emissions are equal to the emissions removed. The Carbon Neutrality Challenge provides a mechanism for people like you or me to become Carbon Neutral, and have fun along the way: 1) calculate how much CO₂ you generate, 2) estimate the number of trees necessary to sequester those emissions, 3) plant the trees, and 4) climate change solved! Let's make Hawai'i the first Carbon Neutral place in the world - where climate change starts to be fixed for real! Come learn how you can be part of the climate change solution and plant trees with the Mora Carbon Neutrality Team!

Part of OLLI-UHM's *Climate Action Series: Continued Pathways to Hope and Action*
