

Scholarly Metrics for Tenure and Promotion: Quantifying Research Impact

Summer 2022: Summer Dossier Series

Friday, July 8
11:30 am–12:45 pm
Online Event

What are the tools and methods for providing quantitative assessments of research productivity? What metrics could you use to help explain the importance of your research work to those who are outside of your subject area and may not know the top journals?

This presentation will show the resources provided by Hamilton Library to assist you in determining both standardized metrics of research impact, such as the H-index and Journal Impact Factor, and personalized measures such as altmetrics and article level metrics. No matter the field, from humanities to sciences, including such quantitative measures in your dossier can help you to demonstrate the impact of your work.

PRESENTER

Jonathan Young, MS, MLIS, PhD
Science and Technology Reference
Librarian, UHM Hamilton Library

OFDAS Faculty Mentoring Program (FMP)

We strive to host inclusive and accessible presentations. Live captioning will be provided. If our presenters agree, we will distribute their slides one day in advance and share a link to the event recording. To request additional accommodations, please email us before the event. Mahalo!
