SPECIAL SEMINAR: ONE HEALTH

Attaining Lasting Optimal Health for All: How the One Health Approach is a Tool For Achieving Your Vision

This seminar is a call to action to apply the One Health transdisciplinary approach to research, educational and service programs. The One Health approach will be described historically as well as using current paradigms. The root causes of the emergence of diseases will exemplify the urgent need for academia and other organizations to integrate the One Health approach across disciplines and to engage community-based and indigenous knowledge in each step of the process. The added value of implementing the One Health conceptual framework into academia is described as well as the barriers and enablers to implementation. The importance of the One Health approach to research will be illustrated by case examples. To achieve the vision of A.L.O.H.A., the University of Hawaii and JABSOM have an incredible opportunity to build on what is already in place, and purposefully use the One Health approach to build interdisciplinary and transdisciplinary capacity to solve the unprecedented challenges that global health faces now and in an all-too-near future.

Sponsored by The Hans and Ilza Veith Annual Lectureship in the History of Medicine at JABSOM in Memory of Charles Judd, Jr.

Bonnie J. Buntain, BS, MS, DVM

Diplomate Emerita American Board of Veterinary Practitioners

Diplomate American College of Veterinary Preventive Medicine

*Professor Emerita, Public Health and Food Safety, Faculty of Veterinary Medicine and Faculty of
Medicine, University of Calgary, Canada*

Academic Programs Officer III, College of Veterinary Medicine, University of Arizona

Friday, September 2, 2022

10:00 – 11:00 AM HST

**University of Hawaii at Manoa
John A. Burns School of Medicine, Kakaako Campus
Medical Education Building Room 304**
