

Digital Tools For Class Interactions

Spring 2023

There are loads of digital tools which are helpful for interaction and getting feedback in class. As more and more innovative technologies are determining our everyday lives and digital communication and interaction are becoming indispensable, a change in learning in class is needed. For digital natives, who grow up with smartphones, tablets and social networks, learning opportunities should include and take advantage of technical developments.

This event is sponsored by the OFDAS Center for Teaching Excellence (CTE).

Thursday, February 2
12:00 pm–1:15 pm
Kuykendall 106 Events Room

Workshop participants will:

- learn about different tools like Padlet, Etherpad, Mentimeter, Socrative, and Learningapps
- try out tools on their own devices (BYOD)
- think about and discuss how they can use these tools in the classroom

Join us, bring your own device and be (inter)active in the classroom.

PRESENTERS

Prof. Ingrid Geier, PhD
University of Teacher
Education Salzburg

Prof. Florian Geier, BEd
University of Teacher
Education Salzburg
