Tasks, Tests and Surveys

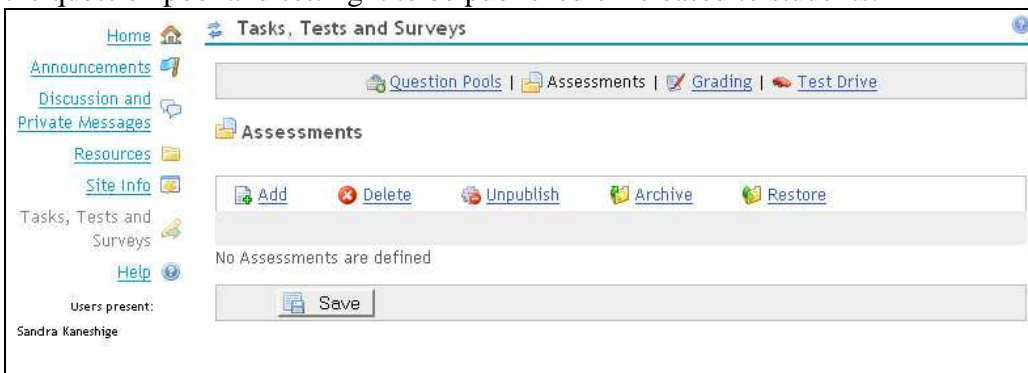

Tasks, Tests and Surveys can be used to create online assessments for delivery via a web interface to your student(s).

Getting Started:

To begin using Tasks, Tests and Surveys you must add the tool to your course (Site Info > Edit Tools > select Tasks, Tests and Surveys > click Continue > click Finish). Enter the new assessment area by clicking on the link.

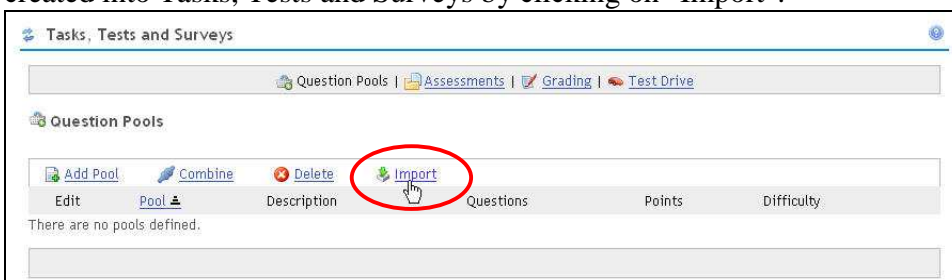

Tasks, Tests and Surveys works by first creating or importing a Pool of questions based on how many points you want to give for each question added to the pool, creating a quiz, selecting how many questions to pull from the question pool and setting it to be published or released to students.

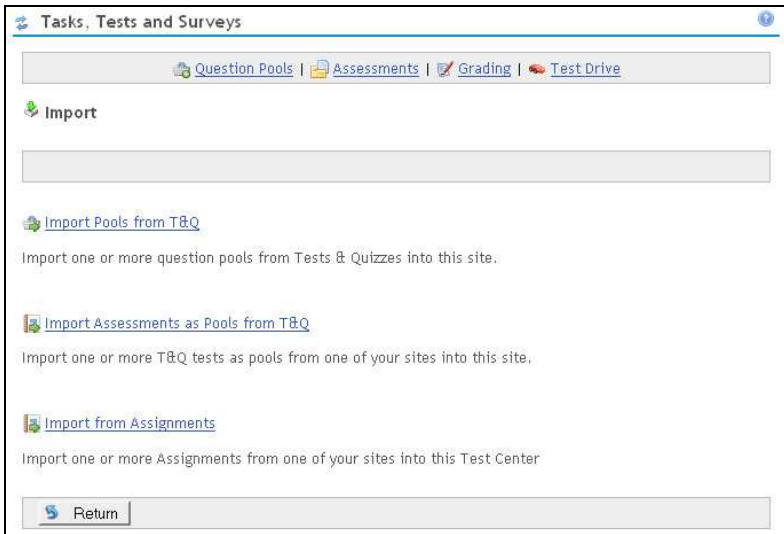

Importing questions/pools from Tests & Quizzes:

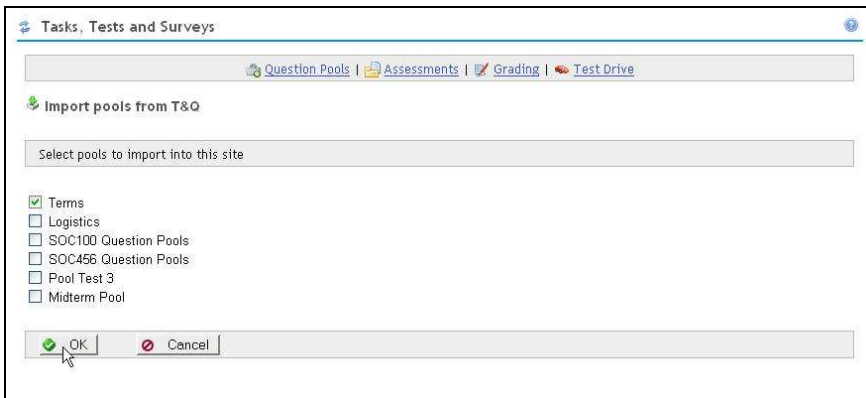

1. If you have been question pools or assessments in the Tests & Quizzes tool, you can "import" what you have created into Tasks, Tests and Surveys by clicking on "Import".

2. Click on the text links for either "Import Pools from T&Q" (if you have questions pools created), "Import Assessments as Pools from T&Q", OR "Import from Assignments".

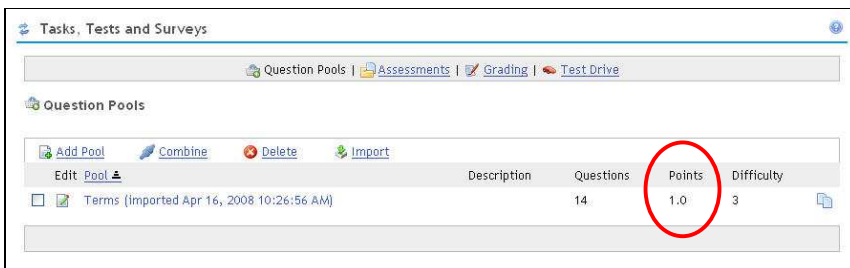

3. In this case I am importing a question pool by selecting the checkbox(s) next to each question pool I want to import and click "OK".

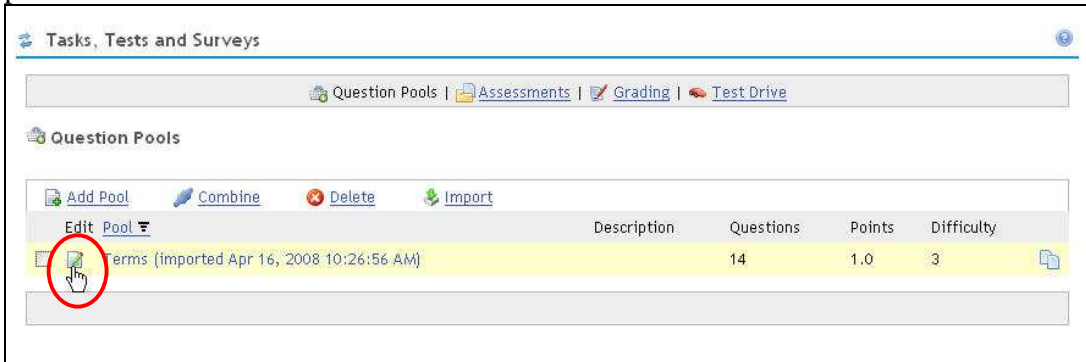

4. Once imported you should see the pool name in the Question Pools list. By default the pool was assigned a point value of 1. This means that every question contained in the pool is worth 1 point. The only way to change the point value is to edit the pool.

*****Different point values can NOT be given to individual questions within the same question pool.***

Edit a Question Pool Point Value:

1. To edit how many points each question is worth in a question pool, click on the paper/pencil icon next to the pool title.

3. Tasks:

Enter the task you would like students to perform (*this type of question can be used IF you are making your assessment more for an Assignment*), you could use this as an Essay type question OR have them upload something to you based on some instruction.

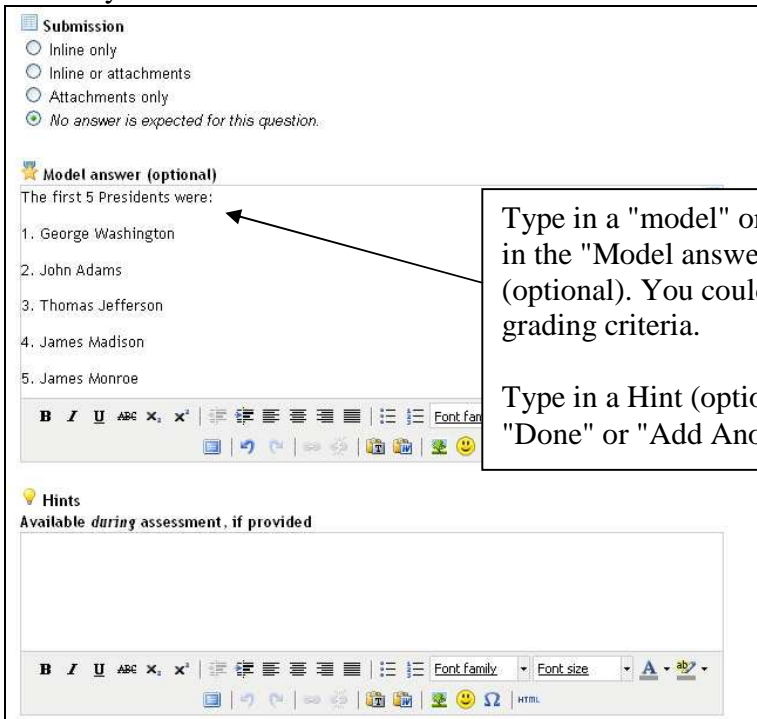

Under "Submissions" select how you would like the student response given:

Inline only: they can only type in the text block

Inline or attachments: they can type and add an attachment

Attachment only: they can only attach something

No answer is expected for this question: perhaps it is a physical task of some kind in which a grade will be manually added later

Type in a "model" or "perfect" answer in the "Model answer" textblock (optional). You could use this as your grading criteria.

Type in a Hint (optional) and click "Done" or "Add Another".

Once you have added all the questions to the pool, click "Done".

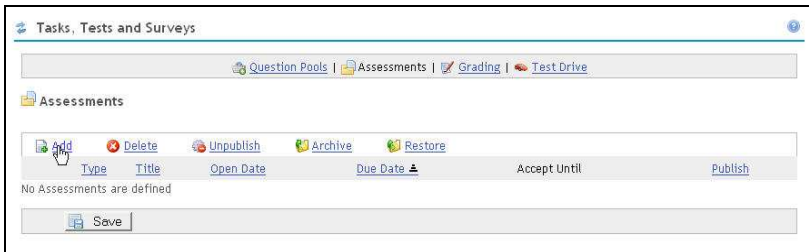

Create an Assessment (Test/Quiz, Assignment or Survey):

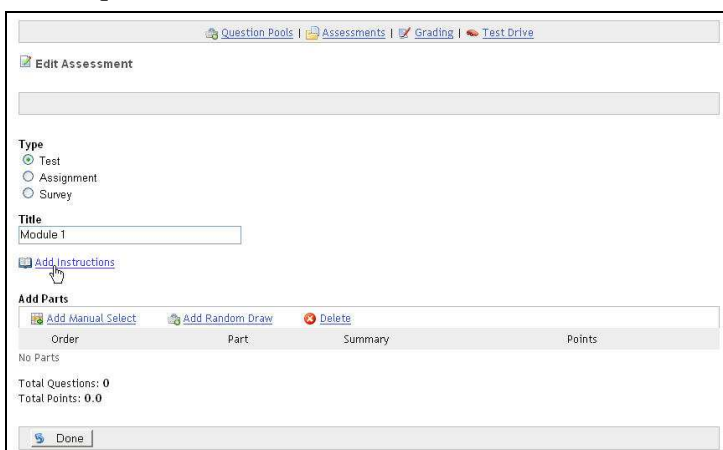

1. To add a test click on "Assessments".

2. Click "Add".

3. Enter quiz title, if desired click on "Add Instructions".

4. If you chose to add instructions type them in the text block and click "Close".

Instructions

Total Questions: 0
Total Points: 0.0

5. You can either select to "Add Manual Select" which will allow you to pick specific questions from a pool OR "Add Random Draw" to select a pool to randomly draw all questions or a specific amount of questions.

Add Parts

Add Manual Select Add Random Draw Delete

Order	Part	Summary	Points

 Suppress user name while grading

Password (optional)

Select when students can review their submitted assessment:

- *Upon submission*
- *Upon release*
- *After date*
- *Never*

Once the assessment is submitted students can return for review

Once all manual grading is done and you have selected to "Release" the assessment, students can review

Only after the date entered students can review

Students cannot review at all

Select what students will see in their review

Select either Auto or Manual release for grades: Manual release would be used for assessments that have essay, short answer or submission type questions.

IF you have added the Grade book tool to the course, you have the option to send the score to the grade book.

Honor Pledge: if selected students will have to agree to it prior to beginning assessment

Hints: choose if you want the "Hints" you added to be viewable by students in the assessment

Navigation:

- *Flexible:*
Students can go back and forth through assessment questions based on Layout choice **if a student skips a question they will be warned about any skipped questions when they select "Finish"
- *Strict:*
Students can only go forward, one question at a time **if a student skips a question they will NOT receive a warning about a missing answer when they select "Finish"

Layout: ONLY for "Flexible" navigation, choose how you would like questions presented to students

Type in a final message (optional)

Click "Save" when done.

Test Drive:

After the Publish settings have been saved, select to "Test Drive" the assessment. Test drive gives you the same experience a student would have when taking the quiz. This is a great way to preview your assessment before publishing.

To preview the assessment as the students would see it, click on "Test Drive".

Done

At this time you can select "Add" to add another student till all students that need special access have been accounted for OR click on "Assessments" to return to the assessment list.

To finalize the publishing process and release the assessment based on publish settings, click on the publish icon.

Scroll down to the bottom of the screen and click "Publish".

Notice the checkmark next to the publish icon, this means the assessment is ready for students to take the quiz.

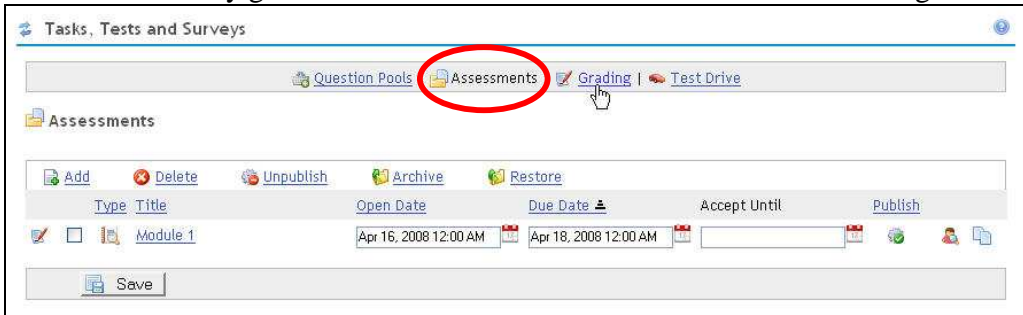

Edits AFTER Publishing:

You are able to edit the assessment settings only. You cannot add additional questions or parts to a published assessment. If a question has the wrong choice selected as the correct answer, changing it to the correct answer in the question pool will NOT update once a test is published. ****Note**, for "Surveys" you will not be able to ALTER the "Type" of assessment to something else within settings.

Grading:

To either manually grade or view student's submissions click on "Grading".
