UH Hilo	Student Affairs			What is the cost to educate on each campus and how much do taxpayers supplement the cost to education non-residents?				Tuition is determined in tuition schedules set by the BOR via RP 6,202. To get a general sense of costs, please visit the annual "coast of attendance" calculations. For example, for UHM you can see the calculations here: https://manoa.hawaii.edu/fas/cost/2023-2024-cost-of-attendance/
								For UH Hilo here: https://hilo.hawaii.edu/financialaid/CostofAttendance2425.php
Kapiʻolani CC	LLL			Who will decide campus ceilings for nonresident undergraduate enrollments? Are there no longer any ceilings? Where will the official policy / statement on ceilings be posted, if they still exist?				The intent of the policy change is to remove the hard cap and so there will no longer be any "ceilings," if by ceilings the current percentage differential between residents and nonresidents is what is meant. The revised language prioritizes residents.
Hawaiʻi CC	Student Affairs			3 a - Consider revising, perhaps using different language. Example: Undergraduate admission requirements will differ across UH Manoa, UH Hilo and UH West Oʻahu. 3.4 - States, At all campuses, including at the community colleges, both undergraduate and graduate programs established for the explicit purposes of educating and training students to meet state workforce needs have special obligation, etc..... Perhaps revise the first sentence includes community colleges with undergrad and grad programs.				3a: Thanks, we have included this language in the revisions. III.4: Have modified language to include community colleges with undergraduate programs.
UH West Oʻahu	N/A	I really don't think this deserves conversation as the principle of the matter represents in my opinion favoritism that presents itself as a double standard...if any student wishes to gain knowledge at higher institution they should all be judged equally...I think it goes deeper than what is being discussed as these "favored students" who come from a local public education system likely may not be able to adjust to the planned rigors of these higher education course platforms.	N/A	N/A as it was noted in Section 1	N/A as was noted in Section 1	I do believe the Fs and members of this governing body really take a hard look at this concept of "affirmative action" as favoring one body automatically disfavors another. In reality if there is a case where the institution cannot provide education to satisfy the demand to attend the institution, it brings up another issue that being internal policies of the institution		Section I: No changes have been made to this section. Section V: thank you for your feedback. The policy clarifies the distinction between resident and non-resident and so is not creating an "affirmative action" plan.
UH Hilo	UH Hilo Faculty Congress			Thanks so much for the opportunity to provide feedback on the proposed revisions to RP 5.211. The UH Hilo Faculty Congress unanimously approved a motion to strongly recommend deleting 3.a, specifically the statement "In general, it is expected that the undergraduate admission requirements for UH Mānoa will be more stringent than for UH Hilo and UH West Oʻahu" and avoid any language codifying comparative admission requirements. While we acknowledge that we may be likely to continue having less stringent undergraduate admission requirements than Manoa, we could see no benefit to including this language and discussed the potential harm from codifying what may be perceived as second-class status. The potential harms include diminishing our core undergraduate focus as a high quality small liberal arts university and harming the reputation of our niche graduate and professional programs. There were also concerns about lack of a definition for "stringent" and losing flexibility to adapt our admissions requirements to meet our mission.				Thank you for your comments. The language in that section has been revised based upon the recommendation from another campus to: In general, undergraduate admission requirements will differ between UH Mānoa, UH Hilo and UH West Oʻahu.
UHPA	UHPA						Requesting copy of all comments received from UH Faculty Senates. Refer to letter from Jamie Mow, UHPA, dated 4/4/24.	We will submit once consultation has been completed.

Campus	Organization/ Department	SECTION I: Purpose Comment/Rationale	SECTION II: Definitions Comment/ Rationale	SECTION III: Policy Comment/Rationale	SECTION IV: Policy Guidelines	SECTION V: Delegation of Authority	Other Comments	OVPAS Comments/Responses
UH Manoa	Enrollment Management			In Section III A 3, revise the second sentence "Graduate admissions criteria..." with the following sentence: Graduate admissions criteria are established by program faculty and the campus Graduate Division, with the approval of the Chancellor/Provost and/or other campus administrators, i.e. Deans of Directors as appropriate. (Justification/Reasoning: Graduate Division at Mānoa has policies and procedures with regard to minimum standards for admissions. Program requirements are the same or above our minimums.)				IIIA.3: Thanks -- we have revised the language upon this recommendation.
UH Maui College	Counseling						Any clarity on UH's obligation to residents for workforce needs and commitment to retaining admissions preferences policies for residents in programs like allied health, etc?	Specialized programs like allied health and admissions practices are not included in this policy. These are campus decisions. However, there are ongoing campus and system conversations about how to best support these high impact workforce areas.
